CONSTRUCTION CONTINUES

Construction will begin early next month on FTU's general classroom building. It will be located to the left of the library-learning resources building and should be ready for occupancy next fall.

Bids were opened last week for the facility, the first step in the second phase of construction on campus. Other buildings planned for the second phase are the administration building, the science building of technology, and the physical education facility.

Bids will be opened for construction of the Administration Classroom Building on November

7, 1968. It will be located directly in front of the Library Learning Resources Building. It will house the permanent administrative offices of the University President, Vice-Presidents, Academic Planning, Public Relations, Business Manager, and the President's Conference Room. Also housed in the Administration Building will be the suites for the Deans of the five colleges and their staff, as well as the Registrar and Admissions Department, Finance and Accounting, Procurement, Personnel Services, Physical Plant Divisions, and a special area for the Dean of Student Affairs and his staff. It will

also contain 30 classrooms, and 50 faculty offices. Construction on the Administration Classroom Building is expected to begin in December and will take about two years for completion of this facility.

The large Science-Technology Building will be located between the Science Building and the

Library Learning Resources Building. Bids are expected to be opened sometime in late December or early January.

This building will be composed of three wings. Two of these wings will consist of classrooms, lecture halls, labs, and offices. The third wing will house a computer processing center.

FTU?

Vol. I Number 2 Orlando, Fla. Oct. 18, 1968

INTRAMURALS ENDANGERED

Because of the present state of development of the campus, there is some danger that those students engaged in intramural activities may fall victim to snake bite.

Dr. E. W. Stoner, university physician, advises that any student bitten by a snake should be taken immediately to the emergency room of the nearest hospital and

not to the Student Health Center.

This is because a skin test is usually required of snake bite victims to see if they are allergic to the anti-venom serum that may have to be administered.

The closest hospital for anyone bitten on campus is Winter Park Memorial Hospital just off Aloma Avenue.

Name Contest Extended

In the first issue of the FTU newspaper, a contest was held to obtain a name. The replies being few, a title was not selected.

Various names were offered for use such as: Tech News and Views; Pegasus; Citronaut; FTU Star and the Paragon. It was decided that none of these entries were appropriate since most lacked originality and ingenuity.

Some originality did creep into a few of the entries. One suggestion, "The Horse Sheet", was considered but judged in appropriate as a newspaper name. The entry was accepted as the title of a column on page 4, how-

ever. Other off-beat suggestions received are: "Dr. Tangerine's Orange Remedy News," and "We need help in keeping the Snack Bar table clean," inscribed on a napkin.

The contest will continue until a suitable title is selected. Anyone still interested in suggesting a name may do so by sending his suggestion to the paper at P.O. Box 26,267, FTU.

CIRCLE 'K' ELECTS

Circle "K", under the leadership of sponsors Mr. Bill Loving & the East Orlando Kiwanis Club, elected officers Wednesday night.

Those elected were President: Tom Kearny; V. President: George

Village Center Serves Students

The first of five Village Centers is now in operation at Florida Technological University. Facilities in the first presently include a multi-purpose room which serves as the dining room.

Other facilities include a snack bar, meeting rooms, a space reservation desk, the University Infirmary, the Student Government Office, newspaper office and Village Center Student Activity Office. A lost and found service is also being operated in the Student Activities area of the Village Center. The students, along with the faculty, and staff, are encouraged to leave "found" objects and reported "lost" articles at the village center main desk, ext. 2633.

To further enhance students' enjoyment of leisure time the

Village Center Activities has purchased a supply of cards and games and has them on hand for student use. Any student may check out game supplies by leaving his I.D. card at the main desk.

In the near future it is hoped that a central sound system and public address system will be installed. Village Center Student Activities will be able to provide an extensive music listening program for students.

Plans have been formulated to commence phase two construction of the final wing of the first Village Center. This new wing will include two large food service dining rooms and a 2900 square foot game room which could be used for billiards, table tennis, and a variety of other activities.

must meet three prerequisites: Male; 2.0 avg. and be enrolled at FTU.

The service club, expects to have many school and community projects. Among the first of these were the "Welcome to Orlando" folders.

A fraternity made up of anything except neurotic children and vandals would, it seems, be interested in benefiting a college campus. Yet, there is one, excuse the cliché, "local yokel" fraternity which displays their ignorance by advertising it in a most inappropriate manner. Writing on walls has always been indicative of infants and mental patients, not college fraternity members. The approximate cost of removing these "masterpieces" from the walls is \$1000 and \$50 for repainting the water tower.

It would certainly be appreciated if these "men" (and the primate of unknown species who climbed the water tower) would attempt reconciliation by removing their handiwork; that is if it is not beyond their level of human endeavor.

Camel Lot ?

It is a well known fact that a great majority of the students at FTU commute to school. With this situation, parking facilities have posed a disastrous problem.

At the present time, there are four paved parking lots along with two "desert" type lots. Anytime between 8 a.m. and 5 p.m., you can usually find these lots completely full along with various automobiles dotting the curbs, ditches, and "lawns".

If you are one of the fortunate people to have a parking decal denoting you as a "D" student, you have undoubtedly taken quite a few physical fitness hikes over the vast plains of FTU.

One idea brought forth to conquer this disability was to carry a bicycle in the trunk of your automobile. Although you may not wear out your shoes as quickly, you will be spending your saved shoe dollars on new "wide-oval, red-streak" bicycle tires.

If luck holds out, some business-minded student may start a transit system from the various parking areas to the Library Building and Science Area.

To overcome the inconveniences caused by long distances and mud, it is proposed that the school obtain the services of a fully equipped wrecker to help damsels in distress and an air-conditioned bus with stereo to transport dreary students in parking lot to the science lecture room.

Until the time that our fortunes can bring us a better situation, buy a pair of roller skates, a strong shovel and remember---it could be worse.

Featured Female

Attention: All eligible males feast your eyes on this column each week if you want to know who that lovely female is that you are always passing in the hall but with whom you never have a chance to talk.

"Co-ed of the Week" will feature an interview with one of FTU's innumerable campus lovelies. A photograph will be published along with

some interesting information about the girl's background and current interests.

This article is designed to acquaint girls and guys with one another. "Co-ed of the Week" will give all the FTU students a quick glance at the variety of personalities, talents, interests, and future plans of the young ladies that the newspaper will publish weekly for your social convenience.

Campus Follies

Everyone begs-- join a committee.... organize.... someone ought to form a committee to look into the committees everyone else isn't signing up for. Apathy already? Hmmm!

And here come the fighting citranauts? How's that grab you? Is everyone pleased with FTU and "reach for the stars?" Hmmm!

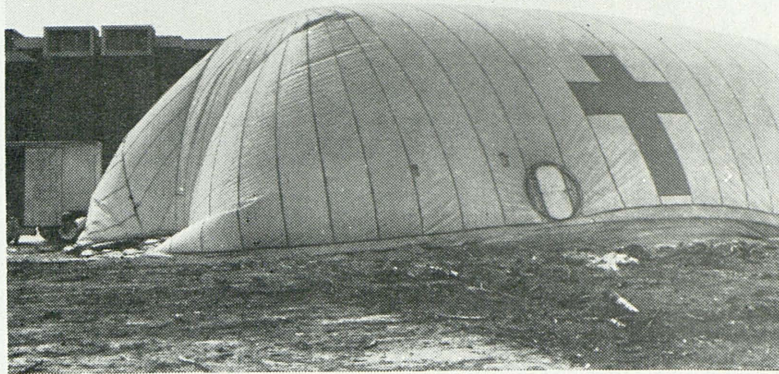

Funny how all teachers who expound on how unfair grading is throw pop quizzes every class to let you know where you stand. Hmmm!

Seems national fraternities may sputter awhile.... it's said school accreditation is necessary before colonization. They'll have trouble convincing students however. Hmmm!

Moby Dick Beached

?

I am now at that uncomfortable age when my good uncle sends me greetings and salutations from my friends and neighbors.

Because of this, I have suddenly become aware of all of the different ways to avoid the well-named, cold-shiver-giving draft. I thought also, that since there are several other persons at FTU who are facing the same problem that they would all enjoy reaping the benefits of my research.HOW?....

I found that there were many ways to become exempt, most of which led to unfavorable ends which I figured all interested and affected students would like to know.

I. This is the ever-available method of skipping to Canada. All one needs to do is to move to Canada until he is 70, and then the draft will never be able to touch him. HOWEVER, I had one friend who tried this and was drafted by the RCMP (Royal Canadian Mounted Police).

II. Another available "out" is to put on lipstick and carry a purse and every now and then, to make it look good, invite some other boy to go to a drive-in with you. The only thing wrong with this "gay" method is that once you start, see how easy it is to take gym next quarter.

III. You might also try to major in something fun like Theoretical Atomical Physics, (if that sort of thing interests you). The only thing I could really find wrong with that, is in case of an invasion, you would be the first people that the enemy would kill.

IV. Still another method, (and the last of my ideas is to take a large wooden match, strike it on some abrasive surface and hold it about 2 inches from your dreft notice. Actually this is the best solution of them all, because after that, you can spend the rest of your life not worrying about the draft, or money

for you will be in some nice warm Federal Pen. (By the way, I have heard that Dow Chemical Company is going to retaliate by making plastic draft cards.)

So in closing, let me just say that it would be safer to go to Viet Nam, than run the risk of being killed in a peace demonstration. In short, Dear Dr. Spock: Stick to babies and let us take care of ourselves.

THIS IS JOHN THE GOOD

GOODNIGHT!

Students attending orientation wheeled a double take on this grotesque structure.... For the record it is not the Goodyear blimp, an hallucination, or fallout from a Billy Graham crusade. The device was slated to become the temporary home of the university's soon-to-be established, dramatics company.

In a talk with the head of the drama department, Dr. David D. Mays, this writer was surprised to discover that the former structure was poorly suited for the use as a theatre. It seems that the problems of acoustics in the shelter were so erratic that only random areas of audibility could be guaranteed. Several people also complained of irritation ear difficulties. This was due to the shelter's two air compressors that were necessary to insure inflation of the dome. Other skepticism centered around the complexities of durability and maintenance over extended periods of time.

A replacement for the bubble structure is already in the works. Dr. Mays stated that bids are now being recieved from several tent companies in the Sarasota area, for a planned yellow and blue striped 50 by 124 foot tent, capable of seating 285 people in proscenium fashion.

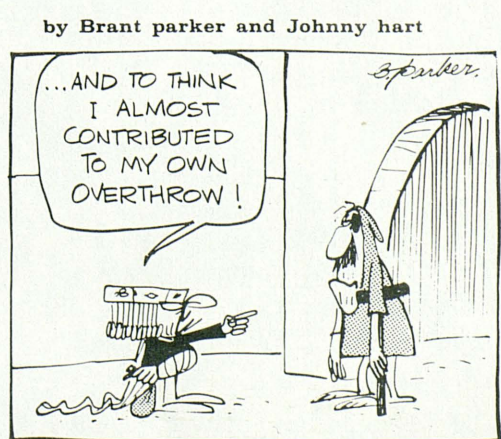

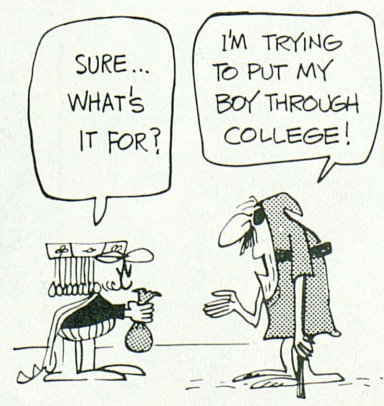

This season along the sandy sidewalks of Florida Technological University, the well-dressed "Citranaut"? should include in her campus wardrobe such necessities as a Bedouin sheep-herders cloak,

mosquito netting, machete with matching field belt, pith helmet, and any other attire suitable for the rigors of isolated environs.

Alas, Floridians, when fall, that forgotten season here, heralds the return of all the absolutely great clothes for the coming cold days. Period clothes are still really big; so all the Bonnies, Lauras, Princess Fair Flying High, Harlows, and Abmish Jwayma (a too obviously made up Indian name) lurking in your minds can materialize. Pant suits are second only to the vote on the list of mandatory items. Be a walking exclamation mark of Good Taste, circa 68. You deserve to.

The Bookstore announced the arrival of several new books which are now available for students, They are;

Contemporary View of Physics	The Secretary's Handbook
Report Writing	Statistics
Teaching Reading	Nature of Mathematics
Measurement and Evaluation of Teaching	Programmed Word Attack for Teachers
Classical Studies on Physical Activities	Secondary School Curriculum and Improvement
Teaching and Learning	John Milton's Complete Poems and Major Prose
Twenty Thousand Words	Course Record Book
Multiple Methods of Teaching Mathematics	
Learning Theory for Teachers	
Administrating Elementary Schools

Saturday, October 19

Movie: "TOBRUK", 8-10 p.m. Admission 50¢ Science Aud. 107

Tuesday, October 22

Organizational Meeting of Tech Club, Room 154, Village Center, 7:30 - 8:30p.m.

Friday, October 25

Movie: "THE IPCRESS FILE", Admission 50¢, Science Aud. 107 8-10 p.m.

The Horse Sheet

by mort

This column is being written in the hopes of shedding light on some of the deep dark secrets on the FTU campus. Each week I will deal with a different crisis facing the FTU Citranauts (Citranauts?)

Before I go any further maybe I should tell you a little about myself. I am writing under a pen name to save face. (ED. NOTE: Mort-- who wants to save a face like that??) My identity is such a mystery our advisor doesn't know who I am.

I will tell you that I am majoring in getting a husband (No, President Millican I'm not the only girl with that major-I'm just the only one that admits it!!!!) My schedule consists of Track, (I'm a firm believer in the theory that a girl should chase a guy until he catches her!) Physical warfare (we all know why I need that); and the usual fundamental studies for Freshmen and fresh women!!

The other day I noticed an article in an old issue of "Cosmopolitan", (the single girls answer to "Playboy"). The article stated that Orlando ranked fifth in the nation for the number of single men to single women- Now I've only one question to ask, "Where are they?????" After an on-the-spot survey on FTU's campus I've come to the conclusion that 90% of the guys in Orlando are good looking and the other 10% go to FTU. (ED. NOTE - WATCH IT, KID)

So you are still wondering about my identity, huh???

(Listen, YOU ARE WONDERING ABOUT MY IDENTITY, CLOWN!!!!)

Well, (chuckle chuckle, chortle chortle) Eat your hearts out, babies!!

Well, I will leave you for now with a small piece of advice (don't knock-knockit---it;s free free!)

If you can't be with the boy you love, love the boy you're with!

TEACHER'S PROFILE

Kissel Heads Communications

Those who are enrolled in course in the field of communication are destined to come in contact with Dr. Bernard C. Kissel, head of the department.

Dr. Kissel was born in Grand Rapids, Michigan. He attended Grand Rapids Jr. College. Later he enrolled at the University of Michigan, where he received his B.A. in speech. He was active in sports throughout college, participating in both football and track.

Upon graduation he was inducted into the armed services as a Lieutenant, and then served in the Korean Conflict.

Dr. Kissel, after his discharge, returned to the University of Michigan to receive his Masters and Ph.D. in Communications.

As an educator he occupied the position of an instructor at the University of Michigan for a period of two years. Then transferring to the University of Texas, he taught nine years on subjects ranging from speech to semantics.

Dr. Kissel is very active in many civic groups and organizations. He is chairman of the board of the Presbyterian Campus Ministry, and is an elder in the Presbyterian church.

He was not only instrumental in the creation of the Association for the Visual Handicapped Students in Public and Private schools but also, served a term as the organization's vice-president.

Other organizations he has been affiliated with include: advertising manager for the Southern Speech Association; assistant editor of Speech Monographs; Editorial Advisor for Prentice Hall and Allyn Barn. A member of the legislative assembly of the Speech Association of America.

At present Dr. Kissel's family, his wife and four children reside in Maitland.
