# Regents Meet at Florida Tech

The Florida Board of Regents came to Florida Tech Monday, February 3, to hold their monthly business meeting. This was the first Regents meeting ever held at FTU. The Regents rotate the meetings among the seven state universities.

The regents accepted all proposals before them except for a tabling of Board action on the patent rights of Gatorade. The loyalty oath administered state university employees was amended to exclude the phrase, "I have not and will not lend my aid, support, advice, counsel, or other influence to the Communist party." The change was ordered by the Florida Supreme Court in a recent decision.

Land for a two campus state university in Dade County was

## Harvard vs Tech In Debate

The Harvard of the North is going to debate the Harvard of the South, or better known as FTU, April 2, 1969 at 8:00 p.m. in the Science Lecture Auditorium, according to Walt Komanski, Chairman of the Speakers Bureau.

Professor William Grasty, who will sponsor the debating team when it is established, says that there are several experienced debaters in the debate class he is now teaching.

The topic of the debate will be chosen from the following topics: "Resolved that the education of women is a fruitless process," or "Resolved: that the Presidential powers be restricted by Congress."

The proposed judges are Mayor Carl Langford, members of the Harvard Alumni, a Senior officer from the Navy Training Center, members from the FTU faculty, and a local college or high school debate coach.

## Housing Payment Date Changed

The spring quarter housing and food service payment due date has been revised to February 28. The original due date noted in the contract was February 1.

All current residents planning to live on campus during the spring quarter must complete payment by this date. Failure to do so may result in reassignment to a waiting list.

Financial aid recipients must return this invoice to the Housing Office indicating the amount of funds they will receive toward their room and board.

Students not returning for the Spring Quarter must notify the Director of Housing of their intent to cancel their contract for the spring quarter by February 28. This may be done by completing the appropriate section of the invoice.

Notification after this date may result in a \$50 charge against the resident's account.

Residents are encouraged to notify parents of this revised due date if payments will be coming from home.

## Banjo King To Perform At FTU

Eddie Peabody, world famous banjo player, known as the "Banjo King", will perform at FTU February 12, from 12:30 to 1:30 p.m. in the Multi-Purpose Room in the Village Center. The program will consist of dinner music and will be open to students, faculty and staff.

Mr. Peabody is presently appearing at the Langford Hotel in Winter Park. Appearing with Peabody is his personal accompanist, Jay Caruso and his "lord-o-vox". No admission will be charged for the concert.

approved in the Regents meeting. The accepted campus sites are 325 acres at Interama for \$20,000 in addition to 75 acres donated at their original cost and 350 acres at the old Tamiami Airport. A Duval area university site was also accepted by the Board. It includes 4,000 acres of land in the center of the projected Duval growth area east of Jacksonville which will be purchased for \$750,000.

From the state government, Sen. Richard Deeb of St. Petersburg, and Rep. Walter W. Sackett, Jr., of Dade County, appeared before the Regents to introduce a proposal that state funds for the university system be channeled into scholarships for students wishing to attend private Florida universities. This, they said, would eliminate the need for the Regents to spend much more money constructing state universities to take care of the rising number of college students in Florida. Further Board discussion on this proposal was put off until later meetings.

Agendas of requested equipment and other topics were submitted to the Board by the University of Florida, Florida State, Florida A&M, University of South Florida, and Florida Atlantic. All of the agendas were approved. The University of West Florida and FTU did not submit agendas, but a contract for a Science-Technology Building at FTU was awarded in the Board's general session.

Chancellor Robert Mautz suggested a new bonding program to the Regents Monday because of a hard financial situation the state university system will soon face. The planned construction to take care of the spiraling student population for 1969-71 might be left without funds due to the inadequacies of the present \$48 million bond issue scheduled for March. Also Governor Kirk's opposition to new taxes will make the needed \$237 million operating funds extremely hard to get. The bond issue may be solved if the 1969 State Legislature raises the present interest limit from 5.5 per cent to 6 per cent.

(Continued on Page 2)

## Pi Kappa Recognized

Pi Kappa Epsilon fraternity has been recognized by the Office of Student Affairs as an on campus social fraternity. It has been forming for the past two months and now has a roster of 32 members.

Originally Pi Kappa Epsilon began as the Triangulans Club with an original core of ten members. Later adding eight to its membership, it entered into Greek society as Delta Pi Alpha. The club finally decided to maintain a name close to Tau Kappa Epsilon, the national fraternity that Pi Kappa Epsilon eventually plans to affiliate with when FTU obtains accreditation.

The 1968-69 Pi Kappa Epsilon officers are Fred Carter, Prytanis; Gary Hallman, Acting Epiprytanis; Jim Patterson, Grammateus; Bill Beurmann, Epigrammateus; John Gustafson, Acting Crysophylos; Burt Kelly, Hypophetes, and Mike Utz, Histor.

Pi Kappa Epsilon stresses three points in life: socials, scholarship, and athletics. To fulfill the socials aspect they have planned a beach bonfire, an installation of officers, and an official presentation of "little sisters" at a formal dinner at the Statler Hilton House of Beef. Scholarship is satisfied by a study hall program every weekday night which is required for academically deficient members. The athletics program is covered by plans for Pi Kappas to participate in all intramurals offered at FTU.

President Millican talking with C. Burke Kibler, III (l) and Dr. Louis Murray (r) at the Board of Regents meeting held at FTU February 3.

We Live in the Present,  
By the Past, but  
for the . . .

FTU, Orlando, Fla.

February 7, 1969

## Science Building Contract Awarded to Wiggs-Maale

The contract for FTU's Science-Technology Building was awarded by the Board of Regents to the lowest bidding contracting firm, Wiggs and Maale Construction Company of West Palm Beach. Wiggs and Maale is presently constructing the new administration and classroom buildings for FTU.

Wiggs and Maale of West Palm Beach was the apparent low bidder, with a bid of \$2.6 million. FTU officials indicated that construction of the new structure would begin as soon as possible. Approximately \$1.1 million in Federal matching

funds is included in the project's funds.

The Science Technology Computer building will consist of three wings of two, three and five stories and will principally contain offices for the Engineering College Chairmen, 16 classrooms, three seminar-conference spaces and 20 specialized labs. It will contain one large 350-seat and two 108-seat lecture demonstration rooms, with the large room having a turntable demonstration stage adjacent to the preparation area. It will also house secretarial-clerical pools and waiting spaces, 45 faculty offices, mechanical and electrical shops and

storage spaces, library-reading room, staff lounges and other areas.

At the February 3 meeting of the Board of Regents here on the Tech campus, four bids for the science building were considered. Biltmore Construction of Clearwater submitted a bid of \$2,979,000 and C. A. Fielland of Tampa estimated a cost of \$3,055,000. A bid of \$2,970,000 was given by a Charlotte, North Carolina firm, Southeastern Construction, along with the Wiggs and Maale low bid of \$2,645,500, which was advocated by Forrest M. Kelley, Jr., architect to the Board of Regents.

The Wiggs and Maale bid was unanimously accepted by the Regents after they cleared up a small hitch in the estimate. None of the bids submitted included paving around the new building. To eliminate delay caused by asking for new bids to include the paving the Regents decided to accept the lowest bid and add the paving at a later date as a construction change order.

Also, expected to be in the change order are such features as drainage, a freight elevator and an irradiation cell. These items also were not included in any of the four construction bids.

## Wrestling Club To Form

All F.T.U. students interested in the participation and organization of a wrestling club contact Dr. Robert Rothberg at Extension 2622 or Brendan Voss at 671-3612. There are a number of AAU Wrestling Tournaments coming in the near future which present an opportunity for a competing team to be established at F.T.U.

Taus, social fraternity at FTU sponsored a deep-sea fishing trip Saturday, February 1, at Port Canaveral. The crew, consisting of 32 Taus members and faculty guests left FTU at 5:30 a.m. and boarded the "Miss Charleston", a craft chartered for the trip at Port Canaveral.

Approximately 110 fish of

various types were caught, ranging from an octopus landed by Fred Edwards to a 38 pound grouper caught by Dean Brinson.

Jim Fay, Taus President declared the trip a complete success and stated that a number of similar events will be sponsored by Taus in the future.

# Editorial

In all areas of education Florida's newest state university is seeking a level of parity with other longer established state schools. The challenge has been eagerly accepted by most of the students, faculty, and administration of Florida Tech. However, there are several deficiencies still existing, mostly due to the shortness of time in operation. One of the most serious inadequacies is apparent in the area of financial aid to students.

Did you ever apply for an FTU scholarship? Don't bother. There are none!!!

This academic year only three scholarships designated for FTU students were granted, all by private donors. The rest of the financial aid, based on "past academic ability or financial need", consisted of Regents scholarships, federal government grants, loans, work study programs, and Fla. state loans. FTU does give small emergency loans but the school must be repaid by the end of the quarter in which the loan was granted, (not unlike debtors prison).

The FTU Foundation, Inc. is a civic organization chartered to assist our new school in obtaining funds for matching loans and scholarships. It is supposed to take the place of an Alumni Association, which the school doesn't have for obvious reasons. When the foundation finally gains momentum, it will be a group of public minded citizens who have donated ten, one hundred, or one thousand dollar grants to the foundation. Anyone, including students, may join.

The sole official connection of the foundation group to the university will be through J. Phillip Goree, the vice president for business affairs at Tech. So far, the foundation, under the guidance of President Charles Andrews, has decided to channel what funds have been received into matching loans; for every one dollar FTU puts in, the federal government will add nine dollars. Loans have to be paid back at three per cent simple interest, and only relatively small amounts have been donated.

Work study programs are used especially by the typically conservative Central Floridian to whom the idea that a student should work his way through college is appealing.

These programs are fine in theory. But we must also become realistic; there is a competition among universities to attract the best students and scholarships are generally accepted as the best bait. If FTU really wants more of the top scholastic talent available, it must realize that usually the best students will have scholarships elsewhere while only loans are available here. The financially deprived student may not be able to attend FTU because none of the present programs will fit his needs. As it stands now a student living in Orlando might not be able to attend FTU while he might be able to go to a state school if he lived in Tampa or Gainesville.

So far the Board of Regents has left it up to the individual university to obtain the funds for scholarships or equivalent programs. To effectively meet this challenge administrative changes must be instituted. The time has passed for a developmental director to be appointed to properly guide a definite financial program; the time has also passed for the foundation fund to be placed in a "go" configuration.

William Loving, the director of student financial aid, readily admits, "We have a need for scholarships and grants in the immediate future." He is not kidding; adequate financial assistance to students is an integral part of the academic propulsion which will help FTU "Reach for the stars."

# Enrollment Figures Foreseen

At the Board of Regents meeting Monday morning in the FTU Conference room a chart of the expected enrollment of all the state universities was presented. The chart listed both the proposed headcount and the full-time equivalent (FTE) for the next 13 years.

FTU's headcount was 1,499 for 1968, while the FTE, which is the number of full time students, for the same period was 1,272. The projected headcounts for FTU are 2,936 for 1969; 3,482 for 1970; 4,123 for 1971; 4,902 for 1972; 5,882 for 1973; 7,176 for 1974; 8,934 for 1975; 11,681 for 1976; 13,848 for 1977; 16,564 for 1978; 19,427 in 1979, and 22,808 in 1980.

In comparison, FSU's expected headcount for 1980 was 33,159 and U.of.F.'s was 34,501. The total expected headcount in the entire state for 1970 is 181,641.

# Tuition Going Up?

A rumor has been circulating on campus that the tuition will be raised for the fall quarter to \$150. The FuTUre was told that the Board of Regents sets the tuition for state universities.

According to admissions there are no plans for a tuition raise at Tech. . . YET.

-o-

The FuTUre would like to take this opportunity to apologize to Chi Alpha social fraternity for failing to list it as a recognized campus organization in the January 31 issue of the FuTUre. Chi Alpha has received temporary recognition on the Tech campus.

"I think the reason the students like the snack bar so much Steve, is because of the great atmosphere it generates."

# Chi Alpha Dance Tonight

Two dances are scheduled for FTU students to commemorate St. Valentine's Day.

The first is the Chi Alpha semi-formal, "Heart Full of Soul", to be held tonight in the Grand Ballroom of the Angebilt Hotel in downtown Orlando. The "Something Knew" from Daytona will play from 9 p.m. to 1 a.m. Tickets are available today from Chi Alpha brothers and little sisters in the lobby of the LLRB and will be on sale at the door. Price is \$3 per couple.

The Village Center Board will present its "Hearts and Flowers" Valentine's Day Dance, February 14 from 8:30 p.m. to 12:30 a.m. "We The People" will play for the semi-formal dance and tickets may be purchased at the Village Center main desk for \$2 per couple.

# Regents Meeting

(Continued from Page 1)

The question of providing adequate fire protection for FTU, which was expected to be discussed at Monday's State Board of Regents meeting held at FTU was not brought up at the session.

It had been assumed that the board would make it one of their main points of consideration. One reason the topic was discussed according to board member Dr. Louis Murray of Orlando, was that the situation was still in the hands of the university itself to work out with fire department and Orange County officials.

However, Dr. Murray added, "We are not satisfied in any way with the problem and we intend to enter into it with the county and fire district if necessary."

He added that such discussions could get under way as early as next week.

Basically the situation revolves around "commitments" made by the county about five years ago to supply FTU with proper fire protection through the Union Park Fire Department and the Orlando Fire Department.

According to Murray the university has outgrown the Union Park Department through its need of protection for new multiple story buildings. And, the City of Orlando's fire fighting units are too far away.

County officials are questioning the actual legality of such possibly made commitments.

It's expected that the Board might ask the county to finance purchase of necessary fire fighting equipment to allow Union Park firemen to handle any blazes in FTU's multi-story buildings. As it stands now the department is only equipped to answer one-story alarms.

Florida Tech's only other source of fire protection, State Forestry Service, isn't even able to cope successfully with these types of fires.

# Constitution Submitted For Approval

Florida Technological University should have a student government very soon. The final draft of the Constitution was submitted to President Millican for approval and comments on Tuesday by the Constitutional Drafting Committee after almost a quarter and a half of debate and study. The final polishing was done shortly before submission at a meeting held in the student government office in the Village Center.

The members of the committee are reported proud of the product they have pieced together at numerous sessions. As one of the members put it, "I feel the late hours and hard work have really paid off in a complete, closely knit constitution." Another said, "In comparison to all the constitutions I have ever read or scrutinized, this one is by far the finest."

If the draft is handed back with approval from the administration, a copy will be submitted to the FuTUre for publication. If it is returned without approval, then FTU may go another quarter without a student government.

# Letter to the Editor

# Special Events Planned For Students By Food Service

Letter to the Editor:

FTU boarding students turned out en masse to enjoy an out-door cook-out for the evening meal Thursday, January 30. It featured "all you could eat, fresh from the grill."

This week and each succeeding week, a special event will be offered by the food service to highlight the week with a memorable occasion. The featured event planned for February 6 was to consist of roast round, oven browned potatoes, and all the trimmings. Also featured for hearty appetites will be a buffet which has always proved popular. Make your plans to be there.

So that we may have the opportunity to better serve you in our weekly events, we invite you to suggest occasions that you will be interested in. Use the suggestions sheet at the cash register in the food line.

James Eller  
Director of Auxilliary Services

# LITTLE MAN ON CAMPUS

"HOW MANY TIMES DO I HAVE TO TELL YOU STUDENTS TO STAY OUT OF TH' KITCHEN? — AND CLOSE THAT DOOR."

# Spring Formal Survey

Please Circle:

The "Future" is the weekly newspaper of Florida Technological University at Orlando, Florida. The "Future" is published by and for the students of FTU.

The "Future" reserves the right to refuse to print any letters which are submitted. All letters must bear the full name and address of the person (or persons) submitting them. Names will be withheld on request. Address all letters to: Editor, Future, P. O. Box 26267, Orlando, Florida.

Thousands of tax dollars were poured into this walk way around the fourth floor and now students can not even use it. See the story below for details.

## Cherokee 140 To Be At FTU

Pegasus' Pilots, the FTU flying club, is preparing to bring a Cherokee 140 airplane out to the Tech campus within a month for advertising purposes.

According to Ray Liles, president, it is not necessary for those interested in becoming members to know how to fly, but need only have an interest in learning.

Liles is the only member of the club holding a private license for flying, with the exception of Dr. Don Wall, sponsor, who is a Certified Flight Instructor (CFI).

There is a \$10 initiation fee to join the club and an additional \$15 goes into the club funds for flying purposes.

Anyone interested in joining Pegasus' Pilots should contact Dr. Don Wall or any member of the club.

The FUTURE is in great need of FTU students interested in advertising. Help is needed in ad selling, ad layout, record keeping, and billing.

Anyone interested in working for the advertising department please contact Bruce Hamilton, advertising manager, or any staff member.

Many FTU students use the library daily, yet it doesn't seem to bother them that the deck is off limits because of four locked doors equipped with an alarm system. Nor does it seem to bother the FTU staff. After almost two quarters of operation there is no evidence that any FTU staff member has made any effort to open up the deck for public use. Only during the Apollo spaceshot were the doors unlocked so that students could get a three foot closer look at the missile.

How about putting a monitor by one of the doors (just like in high school) to check books so that students could finally use the deck? The monitor could even be affiliated with "We Care" to screen out the suicidal students. After all, there are several other places on campus where the student suicide rate could climb, like the temporary parking lot on a rainy day or the cafeteria.

When contacted over a period of two or three weeks even the architects of FTU were unable to come up with any definite figures on the deck such as the cost of construction, hours of labor spent, or amount of materials used. However, James Gamble Rogers of the architectural firm of Rogers, Lovelock and Fritz said that the deck was designed for people to "get out there and get a good view" to enhance the exterior of the building. At least the deck does look good.

How can Florida Tech officials expect students to "Reach for the Stars" when the students can't even reach a fourth floor deck?

A new prophet has arrived on the third page of the FuTUre. "The Portable Prophet" has taken off for regions elsewhere leaving me, Portable, the Prophet, in his stead. "The Portable Prophet" will come rolling in from time to time to again dazzle FTU with his wit and wisdom, but technically the column now belongs to me. Things haven't necessarily changed for the better. I don't look any better than "The Portable Prophet" nor do I claim to be wiser or any more sane than he was. Too bad, huh?

The alarm sounds. The thought, "Fire!", leaps into everyone's mind. Hundreds of students pour out of the LLRB, anxiously anticipating the arrival of the fire engine that will save FTU from total destruction.

But there is no fire. No emergency at all. Someone just tried to go out on the observation deck through a library door.

Did the person want to throw some books down to a friend? Or was he planning to jump off the building in a wild, desperate suicide attempt? It had to be something like that. Surely he didn't want to do anything like enjoy the view or use one of the most interesting facets of architecture on the FTU campus.

It is left up to speculation as to why the deck was even added to the LLRB to begin with. As it is now, the deck is little more than several hundreds of pounds of concrete hanging on the top of the building. No one seems to be able to even estimate how much money was put to waste on the inaccessible structure. No one really seems to care.

# 'Here We Go Round The Mulberry Bush'

By ROBERT E. HOLSINGER

"Here We Go Round the Mulberry Bush" is a low budget English film. It was shot in a new satellite city of London and offers the viewer a new look at the old Isle.

The story line of the film is familiar—a young inexperienced boy looking for action. Initially he is batting zero with the birds. The boxscore improves somewhere around number four. In the sequence the viewer is exposed to a variety of comic responses, some new, some old. All are enlivened by the film's emphasis on a few popular devices, many monologues, cinematic fantasies, and for lack of a better term—what one could loosely call burlesque. All seem to work well.

The gist of what we have seen is neither moralistic nor lascivious. It is to some extent a take off on what we have all experienced as sexually curious human beings. The picture furnishes the viewer with an economic package of laughs. The production is not a heavy-weight artistically. Its durability is that of a toothbrush, you can make it last. The film's great strength rests on the fact that it was the only thing in town.

Barry Evans, plays the middle class school boy and does a fine job. A substantial amount of the footage is devoted to measuring his facial expressions; it is not wasted.

"MB" is recommended for adults only. Its billboard in unpretentious form uses the term "a blusher" for the general audience; it is par reactionwise. Certainly, the movie is a radical departure from the sickening wholesomeness of "My Three Sons." "Yaees, Brothers and Sisters," it has some sinfull overtones to the tune of "Are they actually doing it?" These scenes only exist to milk a comic effect. If you're an adolescent drive-in addict, tinted glass works both ways. So if you do go to the movie take time out and see the likeness.

# Traffic Committee Established at FTU

A traffic and parking committee has been established by the office of Student Affairs due to the perseverance of certain interested students.

Fred Clayton is serving as chairman with Barth Engert, Dr. Rexrhode and Miss Marjorie Payne serving on the committee. Bob Hazelwood, a resident student, and Kathy Hurd, a commuting student, are serving on the committee in the representative student capacity.

In an interview, Bob Hazelwood stated that even though the committee has not yet been called into formal session, he plans on taking definite strides in the parking situation. "I intend to push for the students—even if it means visiting the Dean's office every day," he said.

Hazelwood went on to say, "I am currently taking a poll of the resident students to find out how many resident students have cars at FTU at all times. There are approximately 140 to 150 resident students that own cars."

Hazelwood feels that since the resident students pay extra for their

education, they should be given the best parking spaces. The resident students feel that "C" lot should be re-designated for them. Lot "C" is currently being used for the clerical workers.

Hazelwood, a junior, also feels the remaining spaces in Lot "B" should be for the upperclassmen.

## Gracey Appointed To FTU Staff

James W. Gracey has been appointed to the administrative staff of the Personnel Services Division at FTU. Gracey will serve primarily in the area of wage and salary administration and position analysis.

Gracey is a native of Sanford, Florida, and a graduate of Seminole High, Orlando Junior College, and the University of Florida where his major study was personnel management. Prior to his collegiate study, he served four years in the U.S. Air Force Geodetic Survey in data computation.

ANDY CAPP

# Kersten Awarded Scholarship

Cathleen Kersten, a junior at FTU, has been awarded a scholarship by the Florida Bankers Association for the second time. The scholarship, awarded quarterly, consists of \$300.

Miss Kersten was awarded the scholarship for her high academic achievement. She maintained a 3.7 grade point average last quarter.

She is from Hollywood, Fla., and a resident student at Tech. She is in the College of Business Administration.

She holds one of the two scholarships now available at Tech.

## Dimont To Speak

Max Dimont, author of "Jews, God, and History" will meet with interested college students for an informal discussion February 23 at 3:30 p.m. at the Temple of Liberal Judaism. The temple is located on the corner of Robinson and Fern Creek. Refreshments will be served and there will be no admission charge.

Picture molding has been placed along one wall of the lobby of the LLRB. According to Steven Lotz, Chairman of the Department of Art, the addition will enable the presentation of exhibits by local artists and the showing of traveling collections. Such exhibits will be chosen by a committee of faculty and staff including Lotz and Ken Lawson, Director of the Village Center.

## Stadium to Stage 'Holiday on Ice'

The Orlando Sports Stadium, a multi-purpose stadium, is located off Highway 50 on Econlockhatchee Trail, approximately five miles from FTU. The stadium was built by Pete Ashlock and opened in November of 1967. The stadium was originally built to hold rodeos and has held various sports events, concerts, rallies and meetings.

Wrestling matches are held every Monday night at 8:15 p.m., featuring such greats in the wrestling profession, from the Orlando area, as Joe Scarpa, Eddie Graham, Jose Lothario, the Great Malenko, and Johnny Valentine.

In the past months, the stadium has played host to Gov. George Wallace; singers Glen Campbell, Buck Owens and the 5th Dimension; country-western jamborees; and ABA basketball, featuring the Miami Floridians.

The Orlando Sports Stadium is presently preparing for "Holiday On Ice" to be presented February 11 - 16. Shows will be held February 11 - 14 at 8 p.m., February 15 at 2:30 and 8 p.m., and on February 16 at 1:30 and 5:30 p.m. Events scheduled for the future include: an Al Hirt Concert, The Harlem Globetrotters on March 6, Jackie Wilson on March 7, and Diana Ross and the Supremes on April 3.

## Basketball Planned

There will be a meeting of all basketball team representatives on Tuesday, February 11, at 4:00 p.m. in Dr. Robert A. Rothberg's office to discuss the rules and set up the coming intramural basketball league here at FTU.

Dr. Rothberg urges all persons interested in wrestling and the formation of a wrestling club or team, to contact him as soon as possible.
