# Taus Takes Tournament

Taus Fraternity won the Men's Intramural Volleyball Tournament last week after defeating the Ogres in the finals.

The Ogres, playing with five men for the majority of the match, captured the first game, 15-12. Taus came back with 15-8 and 15-5 victories to wrap up the championship. The volleyball title came on the heels of the Intramural Football Championship, which was also won by Taus.

Members of the winning team were Steve Cendenin, Dean Brunson, Danny Musselman, Earl Stokes, Scott Thompson, and John Roberts.

In an exhibition match, Taus edged out the faculty all-stars in three games, 15-8, 6-15 and 15-9.

Dr. Rothberg, head sports coordinator, felt that the tournament was conducted smoothly and efficiently with most of the credit going to the officials and referees for their outstanding jobs. Officials in the tournament were Fred Edwards, Don Mathis, Carl Hatch and Larry Green.

## Students Meet With Legislators

A joint state senate and house appropriations committee visited Tech Monday, on the first step of a statewide tour of state universities. This committee is attempting to discover the financial needs of the universities before the April legislative session.

Dr. Millican presented financial needs for the next legislative biennium, in which \$2.5 million in operating expenses will be needed, he said, out of a total of approximately \$20 million for the period. Other than the operating amount, the majority would be used for capital expansion as the university heads into its third phase of construction. The lawmakers had lunch with Dr. Millican, toured the Tech campus, and talked with several students informally in the late afternoon.

The students who met with this committee were: Mike O'Mara, Student Government; Cindy Nyiri, WRA; Chris Schmidt, student government; Ron Turner, student government; Melissa Hardman, B.C. Board, and Pat Johnson and John Gholdston, FuTure.

The students were asked their opinions on the increased utilization of space, more afternoon, late, and the establishment of Saturday classes. They were asked about the quality of instruction received at Tech.

## FuTure Interviews Paul Pickett

*This is the first part of an interview with Commissioner Paul Pickett, chairman of the Orange County Board of County Commissioners, conducted Friday, Feb. 7 in his office at the Orange County Courthouse.*

*The second part will appear next week.*

FuTure—Commissioner Pickett, how do you feel the opening of Florida Technological University is contributing to the overall growth of Central Florida, and particularly Orange County?

PICKETT—I think more important to what it's contributing to the growth is the fact that it has established an academic community invaluable anywhere. If I could have picked any type of a college or university for Central Florida it would certainly have been a technological university. Someday I'd like to see it just like Cal Tech or M.I.T., where people come from all over the world to go. The academic outlook changes the whole community picture. I think it just adds something that you can't get any other way.

FuTure—Do you think that these social contributions parallel the school's economic value to the area?

PICKETT—I think that they far exceed the economic contributions to the area. Many times we overemphasize the economic value of a university. Of course they're enormous. But I think much, much more important is the social value. Having the faculty and students here is the greatest asset. And then we work on down the line. That is if you're talking about financial contributions.

FuTure—Do you think that the people in Orange County are

perhaps still somewhat surprised to realize that a major university, one that was only a vision a few years ago, is now a reality in the community?

PICKETT—I don't think they're surprised. I think they're pleased, and I believe they're gratified. Of course it's impossible for anybody to say what 350,000 people are thinking, but I believe that the average person simply looks upon it as something they're very pleased

## Colonial Lanes Hosts Bowling

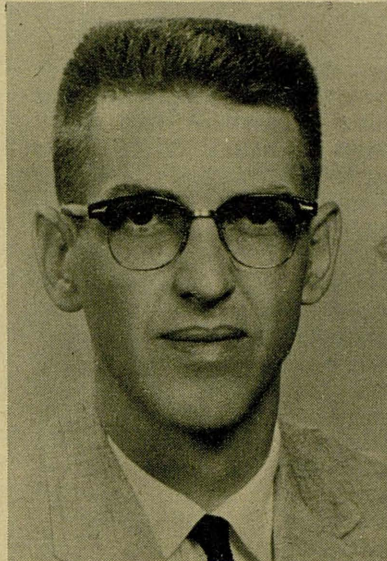

FTU students, faculty, and staff will be guests of the Colonial Bowling Lanes at 400 North Primrose Drive, Orlando, for an evening of free bowling on Thursday, February 20. Since accommodations are limited, all interested persons are asked to sign one of the posters on the bulletin boards in the Village Center Patio and in the Library lobby.

Bowling will begin at 6:30 pm and will feature free instruction. A bus will be furnished and will pick

up interested students at 6:00 pm in front of the Multi-Purpose Room of the Village Center.

Colonial Lanes is offering this free bowling in an attempt to acquaint FTU students, faculty and staff with their facilities and to encourage the formation of an FTU league bowling.

Arrangements for the event are being made by the intramural department and Village Center Student activities.

Orange County Commissioner Paul Pickett.

we have, rather than surprised.

CONTRIBUTIONS

FuTure—Now, what type of contributions would you say Orange County, in its turn, has

(Continued on Page 3)

## Library, Classes Discussed

The scheduling of classes and library books were among the subjects discussed at the monthly meeting of the Social Affairs Committee Feb. 6.

Attending the meeting were Dr. Carroll Gambrell, Jr.; Dr. W. Rex Brown; Dean Sarchet, and Dr. David Tucker, representing the administration. Student representatives were Mrs. Joyce Neese from Married Students; Mike O'Mara and Chris Schmidt from Student Government; Sandi Whidden representing WRA; Dan Tressler from MRA; Melissa Hardman from the Village Center Student Activities Board, and Christine Thomas representing the FuTure.

The problem of scheduling classes was discussed by Dr. Gambrell. "There are two constraints involved in the scheduling of classes," said Gambrell, "the availability of classrooms and the availability of professors. Because of these constraints, it is impossible to cater to special groups and to classes with few students." Dr. Gambrell added that the problem will most likely worsen in the fall because the enrollment is expected to double, unless the buildings now under construction are completed by the fall quarter.

Library books ready to be shelved are currently being stored in the basement because of the lack of space. When the general classroom and administration buildings are completed the library will extend its facilities to the third floor of the Library Building.

## Taus In Marathon

Taus fraternity of FTU will meet Delta Beta Phi of Orlando Junior College Saturday, February 15, in a marathon basketball game at the Davis Armory. The game will last for 14 hours, starting at 11 pm and continuing through Sunday afternoon. Each time one team makes a point, the opposing team will donate 10 cts. with all money going to the Cerebral Palsy Telethon.

The marathon will be open to the public and there will be no admission charge.

WE, THE STUDENTS OF FLORIDA TECHNOLOGICAL UNIVERSITY, IN ORDER THAT WE MAY MAINTAIN THE BENEFITS OF CONSTITUTIONAL LIBERTY, CREATE A REPRESENTATIVE ASSOCIATION THROUGH WHICH THE INDIVIDUAL STUDENT CAN PARTICIPATE ACTIVELY IN THIS UNIVERSITY, AND PROMOTE COOPERATION AMONG THE STUDENT BODY, FACULTY AND ADMINISTRATION, DO HEREBY ORDAIN AND ESTABLISH THIS CONSTITUTION FOR THE STUDENT BODY OF FLORIDA TECHNOLOGICAL UNIVERSITY.

The above is the preamble to the proposed constitution of the student body of Florida Technological University. Following these words is the constitution which the student body of FTU will accept or reject in a special referendum next Thursday and Friday. The voting polls will be open between the hours of 9 am and 4 pm both days.

Students may obtain copies of the constitution in the lobby of the Library Learning Resources Building and at the Village Center Main Desk. Members of the Constitutional Drafting Committee will man an information booth in the LLRB lobby later in the week to answer student questions. Those on the committee will be able to review and discuss the proposed constitution with students.

Work on the document has been in progress since late last quarter when FTU's student body approved the form of government that the constitution should follow.

If approved, the new constitution would call for university-wide executive officers, governors from the five colleges, and presidents from the four classes. In the Student Senate, representation would be apportioned by class and college.

Election of Officers will follow later, pending student approval of the new constitution in next week's referendum.

Outlined below is the capsule summary of the proposed Student

(Continued on Page 4)

## Continuing Education Program Extended

With its accent on the individual, Florida Tech has extended its education programs to two off campus centers. Under the guidance of Mr. Robert Humphrey, Director of Continuing Education, the organization has expanded to three counties and has gained an enrollment of approximately 560 students, most of whom have full time employment.

Several upper divisions credit courses, intended primarily for seniors at this time, are offered at Daytona Beach Junior College and Brevard Junior College. Fields including science and business administration are taught by professors from FTU one night a week, while five hour credit engineering classes meet twice a week.

Local services such as library materials and audio-visual aids are arranged for a resident professor and his staff at the centers.

Although many applicants have requested graduate level work Humphrey said the new program is a success and has great potential for bringing an education to all who want it.

FTU student leaders meet with Florida state legislators in a closed conference to discuss campus life. From left to right, Cindy Nyiri, Sen. Bill Gunter,

Robert Graham, Chairman of the House Committee, Mike O'Mara, Chris Schmidt, Joyce Neese, John Gholdston, and Pat Johnson.

# Editorial FuTure Urges Vote

The proposed constitution of the FTU student government will be distributed today. If you haven't already, get a copy. Take the constitution home and study it. It's acceptance or rejection is probably one of the most important decisions the student body here will make for a number of years to come.

A constitution is the backbone of a government. After a constitution is decided upon it may be amended and added to. However, any part of the constitution itself can not be changed without an entirely new constitution being drawn up and resubmitted to the president and the student body.

The proposed constitution is the product of many hours of argument, sweat, disagreement and (we hope) prayer. The FuTure editorial board has read the constitution and was unable to find any reason why it should not be approved.

A constitution is merely a springboard from which the government can be formed, but still this springboard must be able to hold up under the stress of a university government. The FuTure feels the proposed constitution will hold up under that stress and that it will be fair and just. We urge each student to vote for the constitution as it stands. However, we also emphasize that if there is a major mistake which could not be changed in an amendment, by all means vote against the constitution. It is your constitution. It must satisfy your needs fairly. If you find a minor point which is not covered in the constitution we suggest that you vote for the constitution and then let the candidates who will be running for student offices know what amendments you want. Remember, if this constitution is not passed at this election another constitution might not be prepared for student approval until late next quarter; thus delaying any form of student government. Think about the document. Talk to some of the S.G. members. Talk to your friends. But reach your own private conclusion. If you think you are the only student in school voting one way, go ahead and vote your way. The important thing is voice your opinion NOW!! Otherwise there is the danger of a minority running the school's government. It's your government, and only your voice can control it.

NOTE: As a point of information, it should be noted that the FuTure will not be subject to the student government's policies or its approval. The FuTure is not classified as a student organization but as a university publication and, by order of the Board of Regents, responsible only to the President or his appointed representative. Thus the newspaper at FTU, as in any normal society, will remain free to criticize and report on all governmental affairs; the FuTure will serve as FTU's fourth estate.

So, in considering the constitution, keep in mind that the FuTure will not be restrained by any of its provisions.

JSG ☺

## Letters to the Editor

In a discussion with Mr. Fred E. Clayton, Director of the Physical Plant, last Friday morning concerning several aspects of the traffic problem, I was able to obtain a few answers to questions which you, the student body, may be interested.

Mr. Clayton indicated to me that the money gathered from tickets is nominal-perhaps amounting to \$100. Many tickets, according to Mr. Clayton, are cleared without payment due to circumstances. The money collected, the majority coming from registration, is in the bank for use on future traffic projects.

Concerning parking, Mr. Clayton indicated that a strip of "D" parking has been added on the east-side of the "C" lot and a plan is now being worked on to create a resident lot south of the "C" and "C" resident dorms.

For residents who park Sunday night in "B" lot to unload, Mr. Clayton emphasized that these cars must be moved by 7:00 am—at the present time—indicating that this time may be modified at a later date.

I have had indications from students that more "D" spaces are needed in the "C" utility plant parking lot. This is a topic I will bring up in the traffic committee when it is convened. I welcome your suggestions and comment—only this way can we have an effective committee.

R. L. Hazelwood  
Resident Traffic Representative

Sir:

A welcome addition to our campus would be a temporary sidewalk, constructed perhaps of wood, to span the sandy strip between parking lots "B" and "C".

We are thankful for small favors.

Yours truly,  
C. T. Cook '72

Letter to the Editor:

This is in reference to the movies scheduled on Friday and Saturday nights at the Science Auditorium. On January 18 and February 8, after driving 25 miles to see the scheduled movie, it was announced that since the film projectionist had not shown up, there would be no show.

It seems that the film committee could find a responsible projectionist who will feel it his duty to show the films as scheduled. If this cannot be done, the Village Center should announce ahead of time that the film has been cancelled.

Signed  
An Interested Student

"HAVE TROUBLE WITH #4 LAST NITE? I SEE I LEFT OUT PART OF TH' PROBLEM WHEN I COPIED IT ON THE BOARD."

## Money Acquisition Explained

Any money which comes to any state university must come through a series of steps before it is actually given to the university. First the president of the university must prepare a detailed account of where the money is to go and who is to get it. This figure is supposedly to the exact dollar the university will need for the two year period. In the case of FTU President Millican requested \$20,932,235 in his 1969-71 legislative budget request. This was the figure that he figured FTU would need to operate on for the period from July 1, 1969 to July 1, 1971. This figure is then turned over to the Board of Regents for their approval. Generally this number is cut back somewhat and then added to a total which the Board will present to the state legislature. Again, in the case of FTU, the Board reduced the president's figure to \$19,730,789, which was \$1,201,446 less than the president decided FTU would need. Then, the Regents turn their figures over to the Legislature for approval. This is where the final decisions are made, because the Legislature either decides to approve the proposed figures or throw them out all-together. In the case of FSU last year their proposed figure was more than the legislature felt they needed for a category labeled Other Personnel Services (OPS). It is from this category that student assistants' salaries are paid. So the legislature simply threw FSU's figure out and did not give them anything in the OPS category for that period. So this method appears to be a game of "outguess the superiors", or perhaps, "let's see how much we can get away with." Another point that should be brought up here is that if a certain school requests and gets "X" number of dollars and only uses  $\frac{3}{4}$  of that figure then the request for the next year will be cut back even more, evidently penalizing that school for spending less than they

thought they would. It becomes advantageous then, around the end of the fiscal period for the schools to spend what money they might have left if they want any more for the next period.

Another source of income is what is referred to as the "Capital Outlay Buildings and Improvements Legislative Requests". This money is accrued from bonds sold to the public. The \$20,393,068 which the Board is asking for FTU must first be appropriated by the state legislature again, but on this money even the legislature is not the final word. After the April legislature sessions the Florida voters will vote on a bond issue, and if it is not passed this money does not come to FTU. This money, by the way, and as the name implies, is for buildings and Physical Plant.

Incidentally, in this "Capital Outlay Buildings" program for 1969-71 there is \$1,300,000 set aside for "Chancellor's and President's homes". So if the bond issue is voted in perhaps the President will be able to move out of his apartment into a home befitting his office near campus.

## Miss America To Visit FTU

Miss America, Judi Anne Ford of Belvidere, Illinois, will visit FTU on Monday, February 24. Sponsored by the Pepsi-Cola Company, Miss Ford will be on the campus from 2:00 p.m. - 4:00 p.m. to talk with students, faculty and staff.

Details of her two-hour stay will be outlined in next week's FuTure. Look for details and plan to greet Miss America.

By REG SMYTHE

## WFTU? To Begin Broadcast

"Regular campus radio programming should begin Spring quarter," Dr. Robert Arnold told members of the newly-formed Broadcasters' Club Wednesday.

Plans call for cable transmission of music and special interest programming to campus buildings, receivable on standard radios. The Physics Club will assist in setting up the quipment, and aid in the initial testing. They will also be responsible for maintenance of the equipment.

Staffing of WFTU (?) will be by Communications majors and other students interested in broadcasting.

Pro-tem officers elected at Wednesday's meeting were President, Gary Gaines; Vice-president, Stan Jump; Secretary, Maggi Strouse, and Treasurer, Jim Gantner.

Meetings of the club are each Wednesday at 5 p.m. in Rm. 211-LLRB. Interested students are invited to attend the meetings or to contact Dr. Robert Arnold, club advisor.

## Hearts and Flowers Dance Tonight

The "Hearts and Flowers" Valentine's Dance, sponsored by the Village Center will be held tonight from 8:30 pm to 12:30 am in the Multi-Purpose Room of the Village Center. Dress will be semi-formal and admission will be \$2.00 per couple. Entertainment will be provided by "We the People". Refreshments will be served.

## FuTure Challenges Campus Clubs

FTU will again have an exhibit at the Central Florida Fair in the Main Exhibition Hall from February 24 through March 8. The Public Information Department is in need of students or organizations to man the school's board.

Students are needed to work at the exhibit from 3 pm to 9 pm on all fair days except Sunday.

Students and organizations interested in devoting two or more hours of their time are asked to contact Wanda Russell in the Village Center (275-2612) to sign-up. Tickets to the Fair will be given to all volunteers.

(Editor's Note: The FuTure Editorial Board has signed up for Monday, February 24 for the entire afternoon. Doesn't it appear strange that the FuTure undertook this service project before the service or social clubs on campus did? So far, we're about the only ones.

Interview Cont.  
(from page 1)

made to FTU so far?

PICKETT—Well, FTU is here as a direct result of the activities of the Orange County government. When the site selection committee was looking for a place to put a university, Orange County government wanted them here very much and offered to buy the land where the school now sits and donate it to the university system for the establishment of the university. And this was when the Orange County government in fact had no money to do it with. It was financially impossible for them to do what they had agreed to do.

But they knew that if their offer was accepted there was always a way, somewhere, to accomplish it. The offer was accepted and then the Board of County Commissioners . . . and I was not one of them at that time; I'm not blowing my own horn here. . . got a group of people together, volunteer business and professional men, who went all over the county and got people to put up their personal funds, without interest, and put them in escrow to guarantee the paying of the price for the property. Dozens of public spirited people of financial means, without asking any questions, put up \$10,000 each or more, without interest and with no guarantee it would ever be repaid.

The only understanding was that Orange County government would repay these loans if, and when, they could. They had faith not only in Orange County government—they just knew that this was the greatest thing that could ever happen. And, if they lost their money, they knew it was still worth it to get the university here. Fortunately the money has all been repaid.

ALAFAYA TRIAL

FuTure—One question that's come up recently is the condition of the roadway, Alafaya Trail, that extends from East Highway 50 north to FTU. Have any plans yet been established by the county to have this roadway widened and resurfaced so it can better handle the traffic of students who drive to and from classes?

PICKETT—The original agreement made by the Board of County Commissioners, along with coming up with the \$1½ million to buy the land, was that we would provide proper roads, three of them. Two of them, the two important and expensive ones, were Alafaya Trail and Hall Road. The board could not possibly do both at the same time and Hall Road got the first priority. And, as you probably know, Hall Road is nearly completed now. It would have been completed already if we hadn't run into 50,000 yards of muck that we had to dig out and haul away before we could finish that last section. The money was set aside

The FUTURE is in great need of FTU students interested in advertising. Help is needed in ad selling, ad layout, record keeping, and billing.

Anyone interested in working for the advertising department please contact Bruce Hamilton, advertising manager, or any staff member.

HOUSE FOR RENT

Three bedrooms, two baths, unfurnished. On Lake Corner, on Highway 420, four miles North of E. 50. Due east of FTU. Country atmosphere near schools and shopping. \$175 per month. Call Mrs. Krohne 644-0692 ext. 240 or 647-7550 evenings.

APARTMENT FOR RENT

Need girl to share new apartment. Call 275-1297 after 5 p.m. \$55.00 per month including utilities.

Laundry & Dry Cleaning, Pick Up & Delivery Service. Monday, Wednesday & Friday, 1:30 p.m. Village Center Housing Desk. OVIEDO LAUNDRY & DRY CLEANING.

for this as a capital improvement. Hall Road is now completely paid for. It's not completed but the money to complete it has been put into a separate fund and Alafaya Trail comes next.

FuTure—How soon next?

PICKETT—There will be some work done on Alafaya Trail in calendar 1969. But it will be 1970 before it's like Hall Road.

FuTure—Its been mentioned that due to the procedure the county must go through with the state in carrying these projects out that this work on Alafaya Trail will not be able to be completed until that time. Is this the formal position of the project?

PICKETT—This appears to be the way it's set up right now. However, the roads on the so-called Five Year Plan that we approved, and that are approved by the state, is subject to change after it has been accepted. It just happened that we had two major demands at the same time, access to Disney in the southwest and access to FTU in the northeast, and unfortunately for the road system, fortunately for the county, they both hit at exactly the same time. And rather than make one wait entirely while we threw everything into the other one we took them both at the same time. So we're building a major road down near Disney while we're building Hall Road near FTU. Then we'll do the other road near FTU, then go back and do the second road near Disney.

NEXT WEEK: A discussion on zoning regulations and restaurants near FTU.

# Draft Chills Prophet

After just one week of writing this column, I didn't think people were that anxious to see me go. On February 13 my postman faithfully delivered a message to me from the U.S. Selective Service. Yes, even

but that's going a little too far. A simple "Happy Birthday" card from my draft board would have been sufficient.

I guess the all feared classification is my fault. I completely neglected to go down to FTU's super efficient Registrar's office and beg them to tell my local draft board that I am enrolled in FTU and maintaining a passing G.P.A. I was under the impression that one of the Registrar's duties included informing the Selective Service Board about FTU students automatically. I can't really complain . . . I'm constantly doing dumb things like relying on other people to do their jobs.

During the fall quarter there was an epidemic of I-A classifications being granted to Florida Tech's male population. It seems that the Registrar had not sent any information at all to students' draft boards, but when the problem was discovered the Registrar assured everyone that the matter would be taken care of. Since then these students who received I-A have been given to correct deferment classification. That was great . . . for them. But what about the students who are just now getting "the call"? I don't want to insinuate that the Registrar is slow or anything, but it has been ten weeks since the office promised some action.

It might be that I'm being a shade unfair to the Registrar. It could all be due to a mistake on the part of the Selective Service Board. I hate

to think that they might have contracted ineptness from FTU's Registrar. It's also an awful thought that my draft board is capable of doling out I-A's in spite of any pertinent information that they might have received.

Maybe I can get out of it by claiming to be a conscientious objector since I do profess to being a prophet. And there's always the 4-F method which is very popular. Being a full time student in a state university hasn't seemed to make any difference at all.

The FuTure, always ready to make the best of a situation, has suggested that I become its special Southeast Asia Prophet. I don't think that's such a phenomenal idea. Even though I'm a prophet, I don't think that I could make any sense out of a senseless war.

Don't be surprised if you see Portable, the Prophet, Collection Boxes appearing on campus. A bus ticket to Montreal is \$47.60. Any students interested in accompanying me are very welcome.

This is Portable, the Prophet. Peace.

# TEACHER PROFILE Abbott Psychology Head

Dr. David W. Abbott, acting head of the FTU psychology department and an associate professor, was born in Boothsby, Maine. He attended the University of Maine where he received a B.A. degree in math in 1959. He received his M.A. from New York University in 1962 and his Ph.D. from the University of Massachusetts in 1964.

He is a member of the American Psychological Association, the Southeastern Psychological Association, Society of the Sigma Xi, and Phi Kappa Phi.

Before coming to FTU, Dr. Abbott was an assistant professor at the University of Virginia and Stetson University at DeLand; Educational Advisor to the Judge Advocate General's School, in Charlottesville, Va.; and a part time instructor at the Carnegie Institute of Technology in Pittsburg, Pa. and the University of Massachusetts at Amherst.

He has also held the titles of Director of Research at the Guidance Center Inc. in Daytona Beach and Associate Research Scientist at the American Institute for Research in Pittsburg, Pa.

Dr. Abbott has published in a number of psychology journals from 1964 to the present concerning various stimulus reactions to conditioned eyelid response. He presented a paper to the Florida Educational Research Association at Daytona Beach in 1967. This paper was concerned with problems and solutions in the treatment of intangible data.

Dr. Abbott was awarded a research grant in 1967 by the Florida Council on Training and Research in Mental Health to study the model data system for evaluation of out-patient services.

Dr. Abbott resides in Oviedo with his wife Margaret and four children. Mrs. Abbott holds a B.S. degree in nursing. His hobbies include boating, snow skiing and motorcycles.

## Students to Vote On Constitution

(Continued from Page 1)

Government Constitution.

Article I of the Constitution pertains to the organization's name and the composition of the student body.

Article II, on the Legislature, outlines the composition, duties, and powers of the student Senate.

Composition, powers, and duties of the Executive branch are covered in Article III. Provision is made for the President, Vice-president, Corresponding Secretary, Recording Secretary, and Treasurer of the student body along with a President from each class and a Governor from each college.

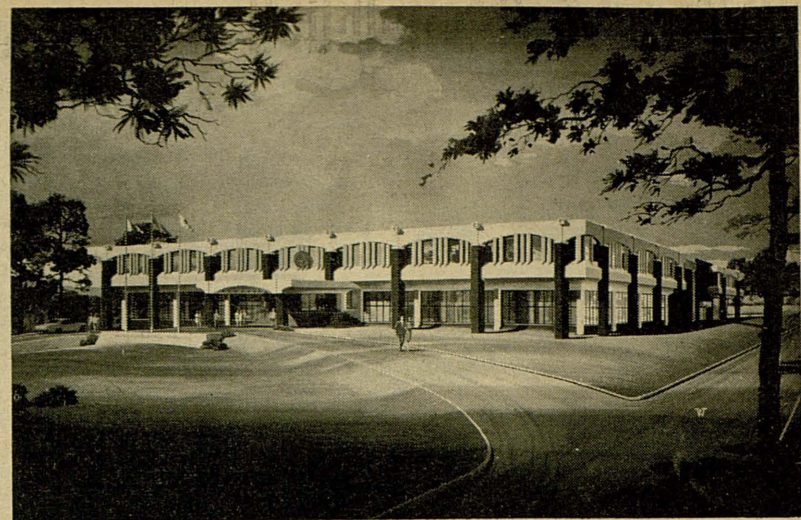

In Article IV, students are referred to the student Handbook for an explanation of the Student Judiciary system.

Article V provided for the methods and procedures necessary for amending and revising the Constitution.

Ratification by student note in special referendum is provided for in Article V, while Article VI provides for special inaugural Student Government elections to be held in the near future.

The Constitution Drafting Committee composed of students from all facets of campus society.

According to that committee the constitution was designed to be a workable and individually fair Student Government for each student at FTU.

This is the architects drawing of the main entrance of the administration building. The building is expected to be completed in the fall. See next weeks issue for story on classroom building.

## Knots Sing Valentines

One of the favorite days of the year arrived this morning. It is now the time for lace and cupid's and bolstering your name with your favorite person. The Knots, pledges to Tyes Sorority, have come up with an original and fun method for sending valentines. For a mere 25 cts. they will deliver a singing valentine to the one you love. The valentines may be purchased at the table on first floor in LLRB, and a list of songs for you to choose from will be furnished.

## On Movies

By ROBERT E. HOLSINGER

At this time an apology is in order. My task in the past weeks has been to give an opinion on the cinema. To some people diversions can be kind, because they have chosen the play things with which they are going to fondle. Motion pictures in this area do not offer much latitude; the situation is not ideal.

Many people have a talent for coining phrases that describe catastrophes with elegance. If there could be a choice, I would rather pick up the hitchhiker and ignore the accident. If one thinks it is easy to describe something that feels is artistically inferior, it might be said that he is spending too much of his time on the mediocre. The whole ordeal turns into an exercise that tries to measure a level of apathy. It is refreshing to remember that what seems superlative is a relative thing, so just play along. My father is a magician. . . . I think that in every critics dreams there is a utopia, a place where he could say, "Go see everything—it's all worth the effort. What is presented is just a matter of taste. The reason I prefer this work is because an actor in the other production kicked me once."

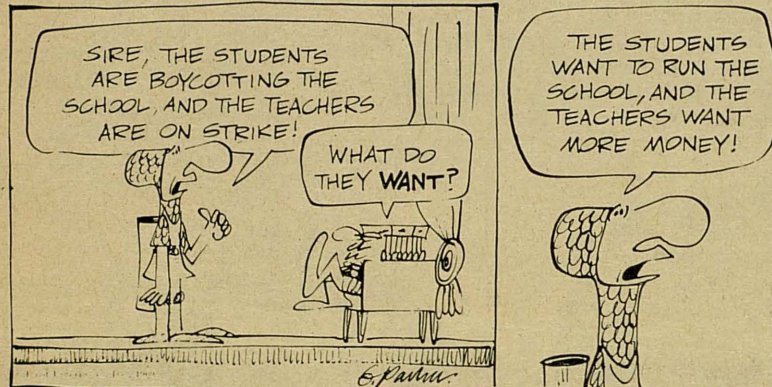

What I have seen in the past couple of weeks does not even merit a small glimpse back. It does not have the quality of the mundane. There are seconds of glory on T.V., Lee J. Cobb in "The Four Horsemen of the Apocalypse" and George C. Scott in "Doctor Strangelove", offer the viewer a short period of amazement. Nothing of this intensity has been seen by theater goers here recently. Things will improve.

The biggie of the week was "Camelot." Vanessa Redgrave is the most beautiful woman on the screen. So it is natural that the whole thing should turn into a royal cuckold. It was picture post card time and the wee willie weepies revisited.

## Wrestling Club To Form

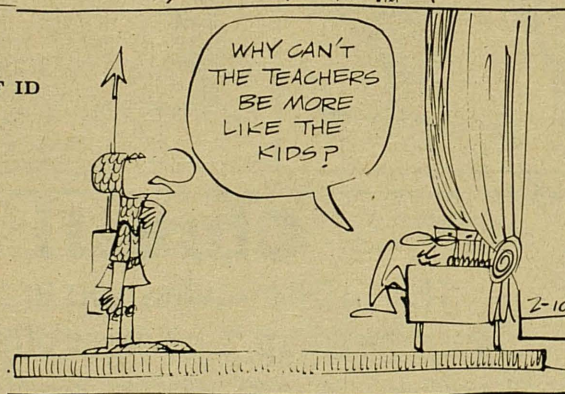

All F.T.U. students interested in the participation and organization of a wrestling club contact Dr. Robert Rothberg at Extension 2622 or Brendan Voss at 671-3612.

There are a number of AAU Wrestling Tournaments coming in the near future which present an opportunity for a competing team to be established at F.T.U.
