LOCHMEDEK

Vol. I.

WINTER PARK, FLORIDA, FRIDAY, OCTOBER 28, 1887.

No. 18.

THE THREE W'S.

[BOSTON TRANSCRIPT.]

Watch, friends, watch! The signal lights
are flashing.
To guide your boat through life, to harbor
safe and sure!
Fear not the mists you meet; nor waves,
high dashing.
Nor rocks you pass so near, while you en-
dure;
But gird your belt and steer your craft
along.
By truthful chart and faithful compass led!
The voyage o'er, you'll rest in peace at last.
On waters calm, with stormless skies o'er-
head.

Watch, friends, watch!

Work, friends, work! The idler's work is
never done.
The faithful rest, while he has just begun.
Your hearts will bound with honest pride,
As o'er the sea of life you safely glide.
If duty be your law, and work be fitly done,
Your God your guide, your hope his spot-
less Son.

Work, friends, work!

Wait, friends, wait! Be sure you're right,
then sail ahead.
Impatient zeal to victory never led;
With courage firm and temper ever sweet,
With cheerful zeal, your every task to meet,
With kindness pure to all who toil with you,
As good, as brave, and only brave as true,
Then shall you bless the world, and, by it
blessed.
Depart from earth, and with the ransomed
rest.

Wait, friends, wait!

Gen. H. B. Carrington.

AUTUMN IN FLORIDA.

To most of the world Florida seems
only worth considering in one season
of the year, the winter, but to those
who live here always, the other seasons
in their turn have quite as much to
recommend them as the winter. A few
months ago we had something to say
about our summer, and, like the little
boy in the reading book, we were
tempted to wish it were always sum-
mer, while now after the long warm
season, the cooler weather of autumn
comes with welcome refreshment, and

seems to brighten us up and make us
feel so fresh and new, that we wish it
might always be the same.

There is in truth much that is pleas-
ant and beautiful about our autumn
in Florida. The change to cooler
weather begins to be felt here in Sep-
tember, almost as soon as at the
North, but it progresses more slowly,
and in October and November, when
cold winds and rains, heavy frosts and
occasional flurries of snow are re-
ported from the North, we have only
reached weather cool enough to be de-
lightfully refreshing and invigorating,
without a suspicion of discomfort from
cold. The rains of summer, which
were welcome then to temper the heat
and stimulate the growth of trees and
plants, combined with the heat of the
sun when clear to induce a habit of
keeping under well ventilated shelter
as much as possible. A careless habit
of shirt sleeves and "mother hub-
bards" seemed the only way to be
comfortable, and we rather enjoyed
the *abandon* of the thing and took it
easy like the rest. All the world was
gone north, and social obligations were
few and far between—we could do as
we pleased—and we did. We read the
newspaper reports of excessive heat at
the North, and pitied our friends who
could not enjoy our cool breezes and
refreshing showers, and take our more
moderate temperature in the same
easy and comfortable way that we
did.

Now that the North has exchanged
the heat and drouth of summer for
cold rains and chilling winds, we again
congratulate ourselves on our beauti-
ful weather, and adapt ourselves to
our new surroundings with a relish of
their novelty. The rains are over and
we may venture out for the day with-
out an umbrella. The sun is no longer
an obstacle to enjoying out of door
life, and we may walk or drive with
comfort and pleasure whenever we
like. We can bear our coats and close
dresses, and we rather enjoy getting
ourselves into presentable and civil-
ized shape again. Our friends are

coming back, and are all the more
welcome for not having seen them for
a few months. We must stir about
and put our house in order to receive
them, and it seems like coming back to
life again to be moving amongst them
and have them dropping in on us. We
have done as we pleased until we be-
gan to tire of it, and now find a certain
satisfaction in bracing up again and
showing that we can do as civilized
society demands if we try.

Outside, the summer green has not
yet left the trees and grass, and the
leaves have not begun to fall, although
some things show a browner hue that
warns us of the coming change. The
flowers, although different every
month, seem even more abundant now
than during the summer. We are not
botanist enough to describe the differ-
ent varieties to be found, but that is
not necessary to enjoyment of fields
and woods gay with thousands of
bright blossoms—here a stretch of gold
and brown, thickly sprinkled through
the grass, there a waving mass of pink
or purple or white, and again innumera-
ble combinations and arrangements
of these and other colors, in all shapes
and sizes, and under all conditions of
light and shade and setting of sur-
rounding trees, bushes, grasses or
vines. A long season of comfortable
weather tempts us to the enjoyment of
all these things after they are past and
dead in less favored climes. We often
wish that those who only know Flor-
ida after the leaves are all fallen and
the grass is brown could be here at
this season to see it in a brighter dress,
and to enjoy the fine weather we are
having. We are sitting now with win-
dows and doors wide open, conscious
of neither heat nor cold, in fact under
no obligation to give a thought to the
temperature in any way. The air
comes to us fresh and pure, but so
nicely tempered that while we draw a
long deep breath of it, and feel its ex-
hilarating effect to the very tips of our
fingers, we try in vain to detect any
consciousness of the air itself, as it
passes in and out of the lungs. It is

as smooth and soft as the circulation of the blood. We live by it and are conscious of its effects, but must employ some unusual means to detect its actual presence. It seems a positive pleasure only to live, and yet we feel so free of all exertion or care about the maintenance of proper conditions of life, that mere living does not satisfy our ambition nor occupy our energy. We are free as a bird to seek out whatever field of exertion we may choose, and give our minds and strength to it. Is it any wonder that the well enjoy life, and feel at home and at one with the singing birds and bright things of the world about them? Is it any wonder that the soft air is like oil upon a wound to the sick and feeble—that the weakest lungs take it in without pain, and are healed? Is it not the country of all others for sick and well alike to live in and be happy? It is hard to persuade those who are enjoying it that it is not so, and we want all others who are so disposed to come and enjoy it with us and tell their friends about it.

Color Sounds.

Mr. Galton, in his inquiries into human faculty, says *Science*, has collected a number of very interesting and strange cases of persons to whom certain sounds always call up certain colors. In one case a whole language was developed for translating colors into sound and back again, and this favored individual could read words out of a wall paper pattern, or paint a pattern in order to represent a word. Two French writers recently described a case the peculiarity of which is its hereditary character. The gentleman in question has color for articulated sounds, but not for musical ones. Both his son and daughter have a similar faculty. The father and daughter agree quite closely on the colors going with the vowel and consonant sounds; but the names of the numerals are quite exceptional. When words seem to be colored to them only when spoken very slowly and separately, and then simply take on the colors of the component sounds, particularly the vowels, the names of the numerals have distinct colors which are entirely different in father and daughter. Intense thought of sound can bring up the color just as really hearing it does.

Oxychloride of Zinc Cement.

This cement or mastic is prepared by mixing 1 part of the finest pulverized glass with 3 parts of oxide of zinc thoroughly calcined (made from the carbonate), which is afterward kept in well-stoppered glass vials. Separately 1 part of borax is dissolved in the smallest possible quantity of water, it is mixed with a solution of chloride of zinc of 1.5 to 1.6 sp. gr., and is kept in this state in well closed vials. To use this mastic, enough of the powder is mixed with some of the liquid to form a putty, which hardens readily until like stone. Under the name of Paris dental cement a similar preparation is sold in the pharmacies which has even been used for filling hollow teeth. This composition can serve excellently for many other purposes; for example, to attach to each other different parts of technical, scientific, or domestic appliances, where a tenacious, quickly hardening cement is required.—*L'Electricite*.

Changes in Milk by Freezing.

Two samples were experimented with. One was frozen slowly, the other quickly, and afterwards partially thawed. In the former case, the ice contained the greater part of the fat, and the fluid portion most of the casein, milk sugar, and salts. In the quickly frozen and thawed sample, the fat was equally distributed between the solid and fluid portions. The author explains this by the fat globules rising to the top when the process of freezing is gradual. They thus become embedded in the flakes of ice; while in quickly frozen samples this cannot take place, and the fat is more evenly distributed. If a dealer whose milk has been frozen pours off the clear fluid which underlies the ice, he is liable to the suspicion of adulteration on the one hand, or will deliver milk above the standard on the other. Milk which has been frozen should be well thawed and shaken up, and not sold while any ice is visible.—*Journ. Chem. Society*.

An ingenious plan to save a dying pear tree was adopted in the garden of L. M. Chase, of Boston. The tree had girdled the tree so that it seemed bound to die. Mr. Chase planted four small trees around it and close to it, cut off the tops, pointed the ends, and making incisions in the bark of the pear, bent the small trees, and grafted them upon the dying trunk. They all lived, and that tree draws its nourishment from the small ones. This season a bushel of handsome pears were taken from it.—*Scientific American*.

THE PIONEER STORE

(IN)

WINTER PARK,

A. H. PAUL, PROPRIETOR

Would respectfully announce to the citizens of Winter Park and vicinity, that he has bought of Mr. J. R. Ergood his stock of

GROCERIES AND GENERAL MERCHANDISE, and will aim to keep up the reputation of the store, by keeping a LARGE AND WELL ASSORTED STOCK of the best goods that can be bought, and at prices that defy competition, for the same quality of goods, and he hopes by gentlemanly and courteous treatment to merit his share of the public patronage. His facilities for getting

FINE ALDERNEY CREAMERY BUTTER and keeping it in cold storage, insure to his customers a good article in the best possible condition.

HAY, OATS AND GRAIN at bottom prices. Come and see. Respectfully,

We are glad to see the movement for a public school well under way. It is a necessity for the town, and all hands should unite to help it along and make it a good one. The county funds will go far towards paying the expenses, but a small addition to them from local sources will enable a much better school to be maintained, besides giving the people of the town more influence in the management of it.

We are indebted to Miss M. E. Brown for a copy of the portrait of Osceola, mentioned by "Jotter," which she has had made by photo lithography. It shows the "noble red man" as few people of the present generation have ever seen him—a king in his own right, one of Nature's noblemen, fine in feature and strong in limb, as he could only be developed under the care of Mother Nature herself, unhampered by artificial standards, and the stumbling blocks which an unaccustomed civilization has since put in his way. We hope soon to give our readers a fuller account of him, as his life is locally of much interest, and we may be able to reproduce his portrait also.

Do not let anybody get ahead of you in the work of the Town Improvement Association. If every man in town will make sure that his own premises and the sidewalk and street in front of them are in good and attractive condition, little will remain to be done to make the streets of our town as pretty and pleasant as any. A few trees and a few loads of sawdust will generally do the business, and it will well repay the small expense necessary to accomplish it. Then let us join hands and put the Park in good shape, so that everybody who passes through on the

trains will think his visit to Florida incomplete, until he has seen more of the pretty place he has noticed in passing.

In connection with town improvement we have a suggestion to offer. The South Florida Railroad Company is now laying out gardens at the stations along its line, and will no doubt wish to make one at Winter Park. These gardens will be tastefully laid out and everything necessary done to make them attractive, and it will be for the interest of every town to have its railway garden as good as possible, as an attractive advertisement to meet the eyes of travelers. All the available land near our station is included in the Park, and so the railroad company can do nothing here unless in co-operation with the town. Now we suggest that this offers a fine opportunity to secure quite a substantial lift towards improving our Park, by working with the company. They would thus secure a much larger and finer garden than they would be willing to make by themselves, and the town would be able to make and maintain a much better park, and have but a portion of the expense to bear. Why cannot a committee of the Town Improvement Association confer with President Ingraham, and come to some understanding about it?

TOWN IMPROVEMENT.

A meeting of the Executive Committee of the Town Improvement Association is called for Thursday evening, Nov. 3, at 7 o'clock, at the office of the Winter Park Co., to begin the work of the winter. We hope that there will be a full attendance, as it is certainly one of the best institutions we have, and its work should be thorough this winter in the line of its objects—to improve and ornament the streets and public grounds of Winter Park, by planting and cultivating trees, cleaning and repairing sidewalks, and doing such other acts as shall tend to beautify and adorn said streets and grounds. The Association has some money on hand, and several of the members have not paid their dues. The Executive Committee should call a meeting of the citizens, get everybody interested in its work, and do all in its power to make this, in its proportion, as useful as its parent society at Stockbridge. We suppose that all citizens will be gladly welcomed at the committee meeting, and helpful thoughts and suggestions will be gladly received. We hope that all of the Executive Committee at least will be present.

YELLOW FEVER.

Our friends at a distance will naturally expect us to keep them posted on the yellow fever, and that must be our excuse for continuing to occupy our space (as we do not aim to be a medium for general news) with a matter which has ceased to give us any anxiety here at home. The epidemic in Tampa is as yet unabated, and the weather, which was cool for a few days last week, has again become warm and unfavorable to suppressing the disease. Thus far there have been about 250 cases of fever reported from Tampa, with an average of one death to every eight cases. It will thus be seen that while a much larger number of cases for the same time have occurred in Tampa than in Key West, the virulence of the disease is no greater, and therefore, with ordinary precautions, there is no danger of outside infection.

Thus, while all recognize the danger of going into Tampa, the fact that a close quarantine cordon has been drawn around the town, and that no new cases have occurred outside, causes a general feeling of relief and freedom from anxiety. Since last week many of the local quarantines in other parts of the State have been removed, as no longer necessary, and the Jacksonville Board of Health, which has been one of the strictest, has sent agents to inspect the cordon around Tampa, with the intention of raising their own local quarantine, if satisfied of the sufficiency of the cordon as a protection to the rest of the State. The general feeling, as we indicated last week, is that the fever is a local epidemic, due to local causes, and that places like our own, which are a hundred miles away, and healthy in themselves, have nothing at all to fear from it.

JOTTINGS.

Mr. H. S. Kedney's father is having an elegant house built on his place on the shore of Lake Maitland. It will be a fine addition to that neighborhood.

THE WINTER PARK JEWELRY STORE.—A fine line of Jewelry, Watches, Clocks, the celebrated Willson Spectacles, Florida Curiosities, &c. Repairing.

H. M. WOODRUFF.

Mr. T. W. Griffiths received the sad news of the death of his mother at Providence, R. I. last Monday morning. He left on the noon train to attend the funeral.

All Saints Episcopal Church has a sewing society connected with it that is largely attended and is very entertaining and interesting. Their last meeting was at the residence of Mrs. Paul.

The many friends of Mr. Knowles in this locality will regret to learn that he has been quite sick, and obliged to go to Washington, D. C. for medical treatment. He was fast improving when last heard from.

We notice that Mr. Wm. Hunter is moving into his handsome cottage on West Park Avenue.

There is a meeting of the Ladies' Library called for Saturday afternoon at their room. We hope it will be largely attended, and steps taken to keep the library advancing as in the past.

A Society of Christian Endeavor was organized at the Congregational Church last Sunday night with a membership of about thirty. Mr. McDuffee was elected president, Miss Ainsworth vice-president, and Mr. Alden secretary.

Mr. A. H. Paul has a new delivery outfit complete; and the way horns blow and bells ring all over town to notify our citizens of the presence of the butcher, the baker, etc. looks quite civilized. Keep it up, gentlemen, it is a great accommodation, and is appreciated!

We are informed that we are indebted to Mr. Frank Bartlett for mowing down a lot of weeds in various parts of the city that were obnoxious. We hereby tender him thanks, and wish to include all who have done anything of this nature for the good of the town.

One of the most interesting works of art we have seen lately is a fine engraving of the original portrait of Osceola, now in the hands of Miss Brown of this place, which portrait is the work of Geo. Catlin in 1838, who was an artist in the Indian ranks at that day. This old chief, who kept the whites at bay for so long, is standing in full Indian outfit, gazing away into the distance, as we suppose, at an imaginary foe. We do not feel competent to pass any artistic opinion either on the original or the engraving. Both can be seen at Mr. Maxson's Book Store, and it will certainly pay anybody that is interested in the history of Florida, especially our section, who has not seen them, to take a look at what we consider a very striking and interesting portrait.

The C. L. S. C. of Winter Park had a meeting at the Winter Park Co's office, Monday evening, Oct. 24th. The officers of this society are: President, Miss Grace Livingston; Vice President, Mr. E. L. Maxson; Secretary, Mrs. S. E. Burke. They have a membership of about 20, and there were about twenty-five present at the meeting. The prescribed books have been ordered, but have not yet arrived, and so the evening was pleasantly spent in discussing the methods of the Society, and reading selections from some of the books to be studied. Miss Livingston read from Edward Everett Hale's History of the United States, Mrs. E. P. Hooker and Mr. Raymond Alden read other selections, and the meeting adjourned to meet at same place on Bryant's Day.

We have received letters from several parties asking about the prospects for yellow fever here, and expressing a decision not to come here until the scare is over. To all such we say, that so far as Winter Park is concerned there is no cause for alarm. We have interviewed several parties who have had experience and who ought to be posted, and they all say that it would be almost an impossibility to have it here, basing their

opinions on the following facts: the cleanliness of the place, the room we have, nobody being crowded in anywhere; the odor from the pines is an excellent disinfectant in itself, and the liteness of the season. One man who had been through and through the yellow fever business and cholera as well, told us that we never could have either under present conditions. Come along friends and get away from pneumonia, diphtheria, small pox, etc., have a good time with us, and be perfectly healthy during your stay.

We had a very pleasant call from Mr. Gore, of the Reporter, on Tuesday. He came in the interest of the Immigration Association, a project which should receive the early attention of all our citizens. The railroad authorities north of us have entered into an agreement by which for every dollar we raise they will use three for advertising Florida. The Immigration Committee for Orange county hope to raise \$4,000, which will place \$16,000 to the credit of advertising our region. We hope every citizen will at least become a member of the association, which costs but one dollar, and that all who can will put in five, ten, or twenty dollars to help the cause. As long as one town in California raises more than the above amount to send a band to Boston and back giving concerts and advertising California, and appeals of this nature are met, if at all, in a half-hearted way here just so long will California and the West enjoy the boom, which our fine climate and fertile soil entitles us to. This country is no exception to the rule (and we hope we shall not be called upon by dear experience to prove it), that it takes money and lots of printers ink to get the claims of any section before the people. Mr. H. S. Kedney is the district Committeeman for this district, and we hope he will receive stacks of money for the Orange County Immigration Association.

SCHOOL MEETING.

The meeting of citizens with the School Trustees on Oct. 20, was quite largely attended. R. J. D. Larrabee was chosen Chairman, and E. L. Maxson, Secretary. They then took a vote on the subject of two trustees to fill out the Board, and Messrs. E. N. Coan and C. H. Ward were by this vote recommended, which, if ratified, makes the Board consist of J. R. Mizell, C. J. Ladd, E. L. Maxson, E. N. Coan, and C. H. Ward. The meeting instructed the Trustees to procure a good and suitable building to hold the school in, and to apply to the town council for funds to make up the difference between what the county funds come to and the expense of running the school.

The Committee was also instructed to confer with the College authorities about some extra desks they have, for use in the public school. After the meeting adjourned the Trustees had a meeting at which J. R. Mizell was elected Chairman, and E. L. Maxson Clerk of the Board, and steps were taken to procure a building and go ahead with the school at once. All these things look like business, and we hope to see a flourishing school going by Nov. 15, for as we have started out to occupy first place in Florida as a

school and resort town, we must have a good public school to begin with or forfeit our claims.

Notice of Incorporation.

Notice is hereby given that a Company has been formed under the General Law of Florida for the Incorporation of Railroads and Canals, called The Jacksonville & Mandarin Railway Company, for the purpose of constructing, maintaining and operating a railroad from Jacksonville to Mandarin, in the County of Duval, and State of Florida.

Drinking before Meals.

An acquaintance of the writer, who has suffered sorely from dyspepsia for a number of years, and has tried most of the numerous remedies a host of kind friends have recommended for her relief, hands us the following article from the *Medical News*, with the request that it be printed in the *Scientific American*. Our dyspeptic friend has found great relief in following the directions, and it is hoped that others may be also benefited.

"In the morning the stomach contains a considerable quantity of mucus spread over and adherent to its walls. If food enters at this time, the tenacious mucus will interfere, to some extent, with the direct contact between the food and the stomach necessary to provoke the secretion of gastric juice. A glass of water, taken before breakfast, passes through the stomach into the small intestines in a continuous and uninterrupted flow. It partly distends the stomach, stretching, and to some extent obliterating, the rugae; it thins and washes out most of the tenacious mucus; it increases the fullness of the capillaries of the stomach, directly if the water is warm, and indirectly in a reactionary way if it is cold; it causes peristalsis of the alimentary tract, wakes it up, so to speak, and gives it a morning exercise and washing. Care must be taken not to give cold water when the circulation, either local or general, is so feeble as to make reaction improbable. We should not risk it in advanced age, nor in the feeble, whether old or young, nor should it be given in local troubles like chronic gastric catarrh. In these cases it is best to give warm or hot water. The addition of salt is beneficial. Such a time-honored custom as drinking soup at the beginning of a meal could only have been so persistently adhered to because of it having been found by experience to be the most appropriate time. It does exactly what warm or hot water, with the addition of salt does, and more, in that it is nutritive and excites the flow of gastric juice."—*Scient. Amer.*

To Cure a Kicker.

The *Calistogian* gives this prescription its warmest endorsement: If you have a horse that is in the habit of kicking, put him in a narrow stall that has both sides thickly padded. Suspend a sack filled with hay or straw so that it will strike his heels, and let the horse and sack fight it out. Be sure to have things arranged so that the horse cannot hurt himself. The sack will be victorious every time, and in the end the horse will absolutely refuse to kick the sack or anything else.

THE FLORIDA ARCHITECTURAL BUILDING COMPANY,
Furnish Architectural Plans, Contract for Buildings, Furnish Building Materials, Kiln Dried Lumber, Scroll Work, Stair Work, Mouldings, Office Furniture, etc.
ALL WORK GUARANTEED.

❖LOCHMEDE❖

❖WINTER❖PARK❖FLORIDA❖

A beautiful location on the Water-shed or backbone of Florida, with nine beautiful lakes of running water; with the Hotel Seminole, accommodating 400 guests; with Rollins College and its 100 students, with an able faculty under Rev. E. P. Hooker, D. D., President. It is one of the most charming resorts in the State. Thousands have visited it to find health and recreation this winter, and none have gone away disappointed. Its educational advantages and its healthfulness, its location and its easy access by railroad makes it the most desirable and loveliest spot in Florida.

Having added a General Real Estate Department, those having property to sell, as well as those looking for investments, will find it to their advantage to give us a call. Property will be shown free of charge and maps, circulars, etc., promptly furnished on application to

THE WINTER PARK CO.

❖LOCHMEDE❖

We trust the people of Winter Park will be sufficiently pleased with our effort to give them an attractive paper to come to our support generously with advertisements and subscriptions, looking for the return on their investment quite as much to the impression of their town created by a presentable paper sent abroad, as to the direct value to them personally of the reading matter supplied, although we shall try to make this as good as possible, and of a character which shall be an index of the refined class of people to whom we look for support. Send us \$1.50 for

YOUR SUBSCRIPTION

and see that all people at a distance who are in any way likely to be interested in Winter Park have a chance to subscribe too. The more we get the better we can make the paper, and we shall take pride and pleasure in enlarging and improving as fast as we can afford to do so. Send us

YOUR ADVERTISEMENTS

and do not be ashamed of a small one, nor of a large one calculating the return from as big a one as you can afford. It will all help to make a good showing for the town.
