NOTES (use field notes form if needed):

Topsoil is light gray in color. Has a lot of roots and organic material. Looks and feels sandy. Roots are hard to dig through. Soil gets lighter, to a very light gray, almost white at 44 cm. Another soil change at 88 cm. Soil is damp and dark. Still sandy but is moldable, and balls up when it is screened. Total pit is 96 cm deep. Did not find anything significant. Munsell taken from east wall. Pit is offset 2.5 m east.
