Bisecting & taking cut N half for screening  
We screened the half of Feature w/ the geologic screens  
but this is being taken as a test case & we probably  
won't do this again. We are not finding much that makes  
it worth the time & effort.

Feature/Ashy soil continues below unit floor, possible hearth  
→ Actually this ended up being 2 possible hearth features  
West side will keep D-3 & East side will be D-7.  
Bags for N half of features are labelled as both. cont. on notes form

## Features D-3 & D-7 Notes

We started bisecting the N half of what we had called Feature D3 & soon discovered that there are actually 2 different Features, 2 distinct possible hearths. The round fire pit to the West is going to keep D-3 & the East feature will be D-7.

We will start on the new planview map & revise the Features.

Mapped D-3 & D-7 separately on form & planview map.

Scooped out the ports of D-3 & D-7 in the Floor — Leaving <sup>South</sup> ~~East~~ half in pedestal to take for soil sample / taken out on 3/14 & continued on 3/21

3/21/22

Began cleaning features D3 & D7. We will be mapping the profiles today, & photograph the bisected part of the features.

features D3 & D7 were mapped & took munsell for both.

We are now collecting the features for

flotation sample.

Cleaning feature D5, bisecting, and mapping. Some small shells, bones, & a shank tooth collected. Took out South half of pedestal & feature. Root running below D5.
