DEGREES OFFERED

COLLEGE OF ARTS AND SCIENCES

Master of Arts
Communication
English
Creative Writing
Literature
Technical Writing
History
Political Science
Sociology, Applied

Master of Science
Biology
Chemistry, Industrial
Computer Science
Mathematical Science
Physics
Psychology
Clinical
Industrial/Organizational
Statistical Computing

Doctor of Philosophy
Computer Science
Physics
Psychology
Human Factors

COLLEGE OF BUSINESS ADMINISTRATION

Master of Arts in Applied Economics (M.A.A.E.)

Master of Science in Accounting (M.S.A.)

Master of Science in Taxation (M.S.T.)

Master of Business Administration (M. B.A.)

Doctor of Philosophy
Business Administration

COLLEGE OF EDUCATION

Art Education
Business Education
Counselor Education
Educational Leadership
Educational Media
Elementary Education
English Language Arts
Exceptional Child

Educational Specialist
Curriculum and Instruction
Educational Leadership
School Psychology

Master of Arts and/or Master of Education
Instructional Systems
Mathematics Education
Music Education
Physical Education
Reading Education
Science Education
Social Science Education
Vocational Education

Doctor of Education

COLLEGE OF HEALTH AND PUBLIC AFFAIRS

Master of Arts
Communicative Disorders

Master of Science
Health Sciences Administration
Molecular Biology & Microbiology

Master of Public Administration (M.P.A.)
Master of Social Work (M.S.W.)
PEGASUS was the winged horse of the muses in Greek Mythology. He carried their hopes, their aspirations, and their poetry into the skies. PEGASUS is as futuristic as tomorrow's space exploration in our solar system and into the universe beyond. The seal also bridges the gap between the humanities and space technology.

Policy Statement

The University of Central Florida, under applicable rules of the Administrative Procedures Act, may change any of the announcements, information, policies, rules, regulations, or procedures set forth in this catalog. The catalog is published once a year and cannot always reflect new and modified regulations. Statements in this catalog may not be regarded in the nature of binding obligations on the institution or the State of Florida. While every effort will be made to accommodate the curricular needs of students, limited resources may prevent the University from offering all required courses in each semester or in day and evening sections.

Students will be held accountable for the requirements, policies, and procedures described in this catalog. Additional information or clarification of any policy or procedure may be obtained from the specified office.

The University of Central Florida values diversity in the campus community. Accordingly, discrimination on the basis of race, sex, national origin, religion, age, handicap or disability, marital status, parental status, or veteran’s status is prohibited.

Sexual harassment, a form of sex discrimination, is defined as unwelcome sexual advances, requests for sexual favors, or verbal or physical conduct of a sexual nature when: 1) submission to such conduct is made either explicitly or implicitly a term or condition of an individual’s employment or enrollment; 2) submission to or rejection of such conduct by an individual is used as the basis for employment or enrollment decisions affecting such individual, or 3) such conduct has the purpose or effect of substantially interfering with an individual’s work performance or enrollment, or creating an intimidating, hostile, or offensive working environment.

Sexual harassment is strictly prohibited and will be dealt with in accordance with University rule.

Employees, students, or applicants for employment or admission may obtain further information on this policy, including grievance procedures, from the Equity Coordinator. The Director of the Office of Equal Opportunity and Affirmative Action Programs is the campus Equity Coordinator responsible for concerns in all areas of discrimination. The office is located on the main campus, in Administration 330, Orlando, Florida 32816-0030. The phone number is (407) UCF-1EEO.

Drug-Free Workplace/Drug-Free Schools Policy Statement

The University of Central Florida, in accordance with legislation passed by the federal government as part of the war on drugs program, has adopted the policy statement DRUG-FREE WORKPLACE/DRUG-FREE SCHOOLS. Information regarding this policy may be obtained in the Office of Personnel Services (AD 230) or the Division of Student Affairs (AD 282).

Directions to UCF Campus

From Orlando International Airport: (20 Miles)
Go east on BeeLine Expressway (528) to 417 North. Take 417 North to University Blvd. Exit east onto University Blvd. to UCF.

From Daytona on I-4:
Exit 49 onto Route 434. Go through Longwood and Oviedo on 434 to UCF.

From Tampa on I-4:
Exit 28 onto BeeLine Expressway East (528). Go past Orlando International Airport to 417 North. Take 417 North to University Blvd. Exit east onto University Blvd. to UCF.

From South on Florida Turnpike:
Exit 254 (Orlando South - 441). Take first right onto BeeLine Expressway East (528). Go east past Orlando International Airport to 417 North. Take 417 North to University Blvd. Exit east onto University Blvd. to UCF.

From North on Florida Turnpike:
Exit 265 (Holland East-West) onto East-West Expressway East (408). Go east through Orlando to merge with 417 North to University Blvd. Exit east onto University Blvd. to UCF.

THE UNIVERSITY

UNIVERSITY OF CENTRAL FLORIDA

The University of Central Florida opened in the fall of 1968. Its original name, Florida Technological University, was changed by the Florida Legislature on December 6, 1978. This name change reflects the changing role of the University in the Central Florida area. Initially, the University was developed in response to the Cape Kennedy space complex, but with its enthusiastic acceptance by the Central Florida community and its rapid growth, the University began to acquire a broader educational mission.

The University's presently assigned role within the nine-campus State University System of Florida is that of a general purpose institution offering degree programs at all levels of instruction. In addition, the University has the responsibility of assisting in the economic development of the Central Florida region, especially in the areas of high technology, electronics, and tourism.

STATEMENT OF PURPOSE

The University of Central Florida serves the people of Florida by providing graduate education in most general areas of study and in specifically selected technological and professional disciplines.

Current offerings at the graduate level include 46 Masters, 5 Specialist, and 14 Doctoral programs.

INSTITUTIONAL PHILOSOPHY

The University of Central Florida's philosophy is based upon two tenets: ACCENT ON THE INDIVIDUAL and ACCENT ON EXCELLENCE. The University believes in the individual worth of each person and especially encourages the responsible individual who strives for excellence in every activity.

Research is considered an important part of advanced study, and UCF provides students with opportunities for research projects and independent study. Many projects involve community service and opportunities for student experience while receiving individual guidance from faculty.

In order to better serve the community, the University of Central Florida makes higher education easily available to the citizens of East Central Florida by offering a number of upper-division and graduate programs at Area Campuses in Cocoa, Daytona Beach and South Orlando.

ACCREDITATION

The graduate programs of the University are accredited by the Southern Association of Colleges and Schools.

In addition to the regional accreditation agencies, there are a number of professional, and academic bodies conferring accreditation in specific disciplines. College of Business Administration by the American Assembly of Collegiate Schools of Business (AACSB); College of Education, Florida State Department of Education and the National Council for Accreditation of Teacher Education (NCATE); Engineering, Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET). UCF is listed with an "A" rating in the Report of Credit Given by Educational Institutions.

EAST CENTRAL FLORIDA AREA

UCF is located in East Central Florida, a region with a population of about two million. Known principally for its tourist attractions, the area is one of the fastest growing regions in the nation. East Central Florida is noted for its many lakes. Atlantic beaches are an easy hour drive from the main campus. The area offers Walt Disney World and other attractions that draw more vacationers here than anywhere else. The area also offers the Florida Symphony Orchestra, Broadway productions, pop and classical music headliners, art festivals, a Shakespeare festival of UCF origin, the National Basketball Association's Orlando Magic and restaurants of every type and price.
THE ORLANDO CAMPUS

The 1,227-acre campus is located in the Orlando suburbs, 13 miles northeast of downtown. Forty-nine permanent buildings—valued at more than $100 million—radiate outwards from an academic core, where UCF's colleges, classrooms and library are located. More than $90 million in new construction, including a 700-bed residence hall and $11 million student union, is planned over the next three years. UCF recreational facilities include lighted tennis and raquetball courts, an outdoor swimming pool, golf driving range, volleyball and basketball courts and ball fields.

UNIVERSITY LIBRARIES

The University Library, housed in a facility of 200,000 square feet, has a collection of over 897,500 volumes with approximately 5,000 subscriptions (journals, newspapers, and other serials) and over 7,500 media titles. The Library is a partial depository for US and Florida documents, and US Patents. The Library online catalog, called LUIS, may be accessed through terminals in the Library, at other Campus locations, or from personal computers at home. Through LUIS, Library users can determine whether the UCF Library owns a particular item, and the location and availability of the item. In addition, LUIS also provides online access to catalogs of all state university libraries in Florida, and to ERIC and IAC Academic and Business Indexes.

The University Library is open approximately 95 hours each week, including evenings and weekends. A shortened schedule is maintained during vacation periods, and hours are extended during the last few weeks of each semester. A staff of professional librarians and paraprofessionals is available to assist and advise those using the Library. Arrangements may also be made for class or small group instruction. Faculty, staff, and students can obtain materials not available in the Library's collections through the Interlibrary Loan service. The Library can provide customized computer-produced bibliographies from any of approximately 500 different commercially available databases.
Special services are provided for the disabled. By using a computer terminal, disabled students can determine the availability of the books they need, and telephone the Library to request that books be brought to them at a convenient location on campus. A Kurzweil reading machine is available in the Library for the visually impaired; students or faculty may arrange for instruction in its use. Through the cooperation of the University's Office of Student Disability Services and the Florida Bureau of Blind Services, the Library staff can aid disabled students in obtaining special equipment they may need to use Library resources.

Students enrolled in the University's extended campus centers in Daytona Beach and Brevard County receive a full range of services from the Daytona Beach Community College Library and the Brevard Community College Library. Students at the South Orlando Campus have access to a small reference collection and "electronic" library. Online access to the catalog of the main Library collection is available from all branch campus locations and materials are delivered through a regular courier service.

CENTRAL FLORIDA RESEARCH PARK

The Central Florida Research Park, abutting the main UCF campus, is a university related research park established as a result of legislation passed by the Florida Legislature in 1978. The Park is a cooperative effort between the University of Central Florida, the Orange County Research and Development Authority, and the Orange County Board of County Commissioners (who appoint the members of the Authority). The governing body of the Park is the Orange County Research and Development Authority.

The objectives of the Central Florida Research Park are in keeping with the legislative action which enabled its creation... "to encourage and promote the establishment... of research and development activity combining the resources of... institutions of higher learning, private sector enterprise involved in pure or applied research, and state or federal governmental agency research."

The ultimate goal of university-related research parks is to establish an academic/industry community resulting in a unique approach to the creation of a more effective cooperative academic/industrial endeavor. The University and officials of the Central Florida Research Park believe that the potential for the establishment of close ties between the University and industry will create an attractive environment conducive to the location of research-oriented industry in the Park. This activity will enrich and support the academic, teaching, and research programs of the University. The University, in turn, as a community of scholars, reservoir of knowledge past and present, and creator of new knowledge and discovery, can provide the necessary expertise and human resources to enhance the research and development activities required and planned by Park residents.

Totally planned to provide a campus-like environment for business adjacent to UCF, the Central Florida Research Park consists of over 1,000 acres of land. Businesses which desire a "university relationship" can purchase or lease land in the Research Park on which to construct a facility or can lease space for office, office/lab, or light manufacturing activities.

Four University organizations including the Institute for Simulation and Training and the Center for Research in Electro-Optics and Lasers (CREOL), are located in the Research Park. The U.S. Naval Training Systems Center (NTSC), and the Army Simulation, Training and Instrumentation Command (STRICOM) the focal point of the nation's simulation and training industry, have their headquarters in the Research Park. Over 700 million dollars a year in federal contracts is granted by the Army and Navy each year.

Currently over 70 companies are located in the Research Park pursuing activities in simulation and training, lasers, optical filters, behavioral sciences, diagnostic test equipment, and oceanographic equipment. Almost 4,000 employees currently work in the Research Park including many students and faculty.

Research Park tenants are involved with the University of Central Florida through sponsored research, using faculty as consultants, and using graduate and undergraduate students for intern programs and part-time employment. Research Park tenants can also contract with the University for the use of the library computer resources and laboratory facilities. Cooperative projects range from technical research to developing business plans and employee training programs.
RESEARCH FACILITIES

Research facilities include access to a DEC MPP 1200 parallel processor and a Harris NightHawk NH-3800 processor within the Computer Science department, IBM RS/6000 model 580 and IBM 4381 model T92 processors within the Computer Services department, ES/9000 model 740 with three vectors at the Northeast Regional Data Center and access via INTERNET to worldwide computer facilities. In addition to the normal complement of laboratory instrumentation, scale-up and industrial control equipment is available for chemistry. Well-equipped laboratories are available for research in all areas of biology, as are a greenhouse and accompanying Arboretum, an extensive herbarium, a vertebrate collection, the Feller's House which is a research facility located on the Canaveral Seashore, and outstanding inland and coastal natural resources for fieldwork.

The Molecular Biology and Microbiology department has a full complement of laboratory equipment including a complete animal and tissue culture facilities. Cooperative agreements with area hospitals and other research organizations insure a high degree of professional interaction and the opportunity for a variety of joint research projects.

The engineering departments maintain modern, well-equipped laboratories and shop facilities. Close liaison is maintained with the Florida Solar Energy Center and the Central Florida Research Park. In addition to the fully equipped instrumental biofeedback research laboratory and psychological testing laboratory, there are physiological research laboratories and communicative disorders facilities.

SPONSORED JOURNALS AND PUBLICATIONS

The University's research efforts include sponsorship of a number of journals in a variety of disciplines.

The Canadian Review. Editor, Patrick Stewart

The Canadian Review is the publication of the Canadian Studies Programme of the University of Central Florida. It publishes articles, notes, teaching materials, and book reviews of interest to students and teachers of all areas of Canadian Studies.

Florida Association of Science Teachers Journal. Co-editors, Dr. R. C. Bird and Dr. J. H. Armstrong

The FAST Journal is the official publication of the Florida Association of Science Teachers, Inc., the Florida chapter of the National Science Teachers Association. This journal is a peer-reviewed publication, published three times a year, and is devoted to the advancement of science education.

Florida Journal of Supervision and Curriculum Development, (FASCD) Newsletter. Editor, Dr. M. L. Kysilka

The Florida Journal of Supervision and Curriculum Development is the official publication of the Florida Association for Supervision and Curriculum Development. The journal is a refereed journal and is intended for all persons interested in curriculum, instruction, supervision and leadership in education. Issues are theme based and contain articles by leading educators, reports of programs and practices, interpretations and reports of research and book reviews. The Florida Journal is published three times a year.

Florida Media Quarterly. Editor, Dr. D. J. Toler

Florida Media Quarterly, the official publication of the Florida Association for Media in Education, disseminates current information about all aspects of instructional media, school library/media programs, and instructional technology to media professionals throughout Florida and the U.S. Current circulation is approximately 1500.

The Florida Reading Quarterly. Editor, Rosie Webb Joels

The Florida Reading Quarterly is a refereed journal published four times a year by the Florida Reading Association. It is for the members of the association and all others concerned with reading, especially as it is practiced and encouraged through instruction and supervision in schools. Articles regarding theories of reading, instructional practices, research studies, materials, interviews and critiques are typical contents of the journal.

The Florida Review. Edited by Russell Kesler

The Florida Review is a biannual literary magazine produced at UCF with editorial offices in the Department of English. The Review showcases outstanding poetry, fiction, and
criticism by both Florida writers and out-of-state writers. Ongoing features include the annual printing of the winning poems from UCF's Florida Poetry Contest, and, in each issue's Floridianna section, a bibliography of works by Florida writers. The only editorial standard is literary excellence.

Global Perspectives. Managing Editor, Dr. John C. DiPierro

Global Perspectives is the official journal of the Transnational Studies Association and is the first nonpartisan, interdisciplinary, refereed journal of international relations devoted to the publication of research by graduate students and senior undergraduates worldwide. The journal's purpose is to provide a forum for responsible, objective expression of ideas through student research in all international aspects of politics, economics, business and marketing, security, law, organization, history, development, theory and methodology, culture and language studies, education and area studies. In addition to student research, the journal contains an editor's forum, letters to the editor, a guest essay by a prominent scholar, a commentary-article by an established scholar, special notices concerning international studies, book reviews, and occasional interviews with scholars or practitioners in the field.

Ideas in Education. Edited by Dr. Patricia C. Manning

The College of Education sponsors a refereed journal, Ideas in Education, which is an annual publication to provide a forum for exchanging, exploring, and researching contemporary issues in education. Ideas in Education is received by over 200 universities and libraries in the United States and throughout the world.

International Journal of Computers and Industrial Engineering, Dr. Gary E. Whitehouse and Dr. Yasser A. Hosni, Editors

The department of Industrial Engineering cosponsors the Journal of Computers and Industrial Engineering with Pergamon Press. The journal is a quarterly blind refereed journal which publishes theoretical and applied research in the field of industrial engineering and which emphasize computer use. The journal receives and publishes papers from academicians and practitioners from all over the world. An international "computer and Industrial engineering" conference sponsored by the journal, the industrial engineering departments at UCF and VPI is held annually in Central Florida. Pergamon Press handles the printing and distribution Nationally and Internationally.

International Journal of Mathematics and Mathematical Sciences. Dr. Lokenath Debnath, Chair and Professor of Mathematics, Managing Editor of the Journal

The Mathematics Department sponsors publication of the International Journal of Mathematics and Mathematical Sciences. This is a quarterly refereed journal primarily devoted to publication of research in all fields of mathematical and physical sciences, as well as related fields in which mathematical treatment is significantly involved. Through editorial activities, this office provides scholarly services to the international scientific community, promotes higher study and research, and disseminates knowledge in mathematical and physical sciences while cooperating with educational and research institution and organizations for the advancement of sciences and resources. In cooperation with a distinguished international editorial board, original research papers, research notes, researchexpository and survey articles are processed, edited and then published.

The Journal of Reading Education. Dr. Richard A. Thompson, Editor

The Journal of Reading Education is a refereed journal of the Organization of Teacher Educators in Reading, an international association of reading professors associated with the International Reading Association. Its content features theories of reading, research into the reading process, strategies for workshops and instructional delivery to preservice and inservice teachers. Subscribers are primarily reading professors and reading program administrators.

Journal of Research on Computing in Education: Co-editors, Dr. William C. Bozeman and Dr. Dennis W. Spuck (University of Houston).

The Journal of Research on Computing in Education is an official publication of the International Society for Technology in Education (ISTE). Published quarterly, the journal presents refereed articles on original research, system or project descriptions
and evaluations, assessments of the state of the art, and theoretical or conceptual positions that relate to the field of educational technology.

Public Administration in the 1980s. Dr. Peter W. Colby, General Editor

Public Administration in the 1980s is a series of books and monographs published by the State University of New York Press dealing with critical issues in public administration which face our nation during the decade of the 1980s. Cross-national studies, genuinely comparative work concerning national, state, and local public administration in the United States, and case studies which clearly are generalizable or which deal with issues of major significance are included. Manuscripts are reviewed by both peers and SUNY Press staff.

Social Studies Teacher; International Editor, Dr. Wentworth Clarke; Editorial Consultant, Dr. Fred Green

The Social Studies Teacher is a refereed professional journal published nationally and internationally by a consortium of state social studies councils affiliated with the National Council for the Social Studies. It features the activities and research of social studies professionals from throughout the United States, Canada, Great Britain, Western Europe, Japan and Australia, acting as a clearinghouse for ideas related to improving social studies substance and instruction.

UCF ALUMNI ASSOCIATION

The University of Central Florida Alumni Association was developed to maintain awareness and support of the University by our alumni. Membership is open to all alumni and friends of the University. Membership in the alumni association provides many benefits, including:

- A one year subscription to The UCF AlumnNews and Emphasis magazine.
- Invitations to special Alumni and University events, including UCFForum luncheons, homecoming activities, athletic events, and tailgate parties.
- Access to an on-campus Macintosh Computer Lab
- Book check-out privileges at the UCF library
- Use of several on-campus recreational facilities
- A Budget Rent-A-Car corporate discount card
- University Bookstore discount (UCF logo items, giftware, apparel)
- Discount on UCF football and basketball season tickets

Each member participates in the election of a Board of Directors for the Association, and every active member is eligible to hold office on the Board. The Board guides the direction of the Association and the development of programs and annual scholarships to undergraduate and graduate students. For information, contact the UCF Alumni Relations Office, Administration 340, Phone (407) UCF-ALUM (823-2586).

UNIVERSITY OF CENTRAL FLORIDA FOUNDATION, INC.

The UCF Foundation, Inc. is a non-profit, tax-exempt corporation directed member community based Board of Directors that encourages, solicits, receives, and administers private gifts and bequests of property and funds for scientific, educational, and charitable purposes. All gifts to UCF are received and processed through the Foundation for support of the University.

TRAVELING SCHOLAR PROGRAM

The University participates in the Board of Regent’s Traveling Scholar Program (6C-6.07) enabling a graduate student to take advantage of special resources available on another campus but not available on his own campus; for example, special course offerings, research opportunities, unique laboratories, and library collections. A traveling scholar is a graduate student who, by mutual agreement of the appropriate academic authorities in both the sponsoring and hosting institutions, receives a waiver of admission requirements and the application fee of the host institution and a guarantee of acceptance of earned resident credits by the sponsoring institution.

A traveling scholar must be recommended by his own graduate advisor, who will initiate a visiting arrangement with the appropriate faculty member of the host institution. After agreement by the student’s advisor and the faculty member at the host institution, graduate
deans at both institutions will be fully informed by the advisor and have the authority to approve or disapprove the academic arrangement. A student will register at the host institution and will pay tuition and/or registration fees according to fee schedules established at that institution.

Each university retains its full right to accept or reject any student who wishes to study under its auspices. A traveling scholar will normally be limited to one term on the campus of the host institution. (6-hour restriction).

A traveling scholar is not entitled to displacement allowance, mileage, or per diem payments. The home university, however, may at its option continue its financial support of the traveling scholar in the form of a fellowship or graduate assistantship with any work obligation to be discharged either at the home or at the host institution.

The Traveling Scholar form, reproduced as the UCF GS-8, must be used for documentation. This form must be completed and prior approval obtained before any course work can be taken.

QUILL

The Quill is a select club on the UCF campus which was organized in 1982 to recognize and honor faculty of the University who are authors of one or more books. Criteria of eligibility have been set up by the faculty, and there is an induction of new members at the annual meeting.

SCROLL

The Scroll is a select club on the UCF campus which was organized in 1987 to recognize and honor faculty of the University who have shown sustained research activities. Criteria of eligibility based upon a significant number of peer-reviewed articles in international and national journals have been set up by the faculty. Evaluation of nominees is done by a faculty committee and new members are inducted annually.

MINORITY STUDENT SERVICES

The Office of Minority Student Services is responsible for coordinating special programs, projects, and special services for minority students. The office cooperates in the recruitment, admission, and retention of minority students, and is responsible for monitoring and facilitating the academic progress of minority students. Minority Student Services also assists in arranging cultural and social programs to enhance the development of the individual.

UNIVERSITY BOOKSTORE

The University Bookstore carries required textbooks, supplemental books, and associated supplies for all UCF courses. In addition, a complete line of school and art supplies, sundries, paperbacks, gifts, and other items of interest is available. A customer service desk provides for special orders such as class rings. During the last three days of each semester, the bookstore has a "buy-back" period for used textbooks. Student I.D. cards must be presented as identification when selling books.

UCF AREA CAMPUSES

In addition to the academic programs offered on the Orlando campus, the University of Central Florida offers a number of upper-division programs and graduate programs at Area Campuses in Cocoa, Daytona Beach and South Orlando. Times and dates for all courses are listed in the regularly published schedule of classes.

UCF Brevard Area Campus

The University of Central Florida, Brevard Campus, is housed in the Clark Maxwell, Jr. Lifelong Learning Center on the Cocoa campus of Brevard Community College. The University offers junior, senior, and graduate-level courses and programs. Freshman and sophomore-level courses are provided by Brevard Community College. Students who have completed the Associate of Arts Degree are able to select from 17 baccalaureate programs offered by the University in Brevard. Newly admitted or currently enrolled UCF students may also register in selected upper division elective courses presented at UCF-Brevard. Graduate programs are offered in Education, Business, Public Administration, and Engineering.
The coordination between the University of Central Florida and Brevard Community College for the 2 + 2 baccalaureate degree has become a model for other institutions of higher education in the State of Florida. Contact: UCF Brevard Campus, 1519 Clearlake Road, Cocoa, Florida 32922, Phone: (407) 632-4127

UCF at Daytona Beach

The Daytona Beach Campus of the University of Central Florida is located in a new two-building Higher Education Center it shares with Daytona Beach Community College. The faculty and staff at the new facility have a strong commitment to serve the residents of Volusia and Flagler counties. In Daytona Beach, UCF offers junior, senior, and graduate level courses and programs. Freshman and sophomore level courses are provided by Daytona Beach Community College. Together, the two institutions provide the "2 + 2" Baccalaureate Degree. Additional courses and programs will be added as needs are identified. Contact: UCF Daytona Beach Campus, 1200 Volusia Avenue, PO Box 2811, Daytona Beach, FL 32120-2811, Phone: (904) 255-7423

UCF South Orlando Campus

Located on Lake Ellenor Drive in the heart of Orlando Central Park (west of South Orange Blossom Trail between Oak Ridge and Sand Lake Roads) the South Orlando Campus of the University of Central Florida is convenient to students who live or work in southwest Orange County and north to Osceola County. It offers upper division evening courses in business administration and the arts and sciences, a graduate engineering program, and undergraduate and graduate vocational education courses.

A television studio on site has the capacity to receive and transmit signals for live interactive television courses, and several courses are videotaped at the South Campus for distribution to other University sites.

There is a computer lab for student use, and the library is equipped with LUIS terminals. Admissions and financial aid information is available, as well as on-site registration for all UCF courses.

The South Orlando Campus also offers a variety of non-credit programs specifically designed to meet the needs of business and industry in the area, and serves as a center for statewide meetings and seminars. Contact: UCF South Orlando Campus, 7300 Lake Ellenor Drive, Orlando, Florida 32809, Phone: (407) 855-0881

INSTRUCTIONAL TELEVISION

The University offers a variety of courses by way of television. They are available either live or on tape at various locations both on and off campus. Live courses may be viewed at the South Orlando, Brevard, and Daytona Beach campuses, as well as at selected sites around the Greater Orlando area. Live courses may also be viewed on a Cable channel in the dorms and at several fraternity and sorority houses. Some courses are also broadcast to individual homes through local cable companies in Brevard and Orange Counties. Courses on tape are available in the learning centers or libraries at each of the University's four campuses.

Courses available on tape or live television are listed each semester in the schedule of classes. For additional information and updated course offerings, contact the Office of Orlando Area Programs at 407/855-0881.
INSTITUTES AND CENTERS FOR RESEARCH

HIV-AIDS INSTITUTE

The HIV-AIDS Institute is an interdisciplinary organization established in the College of Health and Public Affairs to facilitate the promotion of AIDS information and to serve as a principal coordinator in cooperation with local, regional, and state organizations, for AIDS education and other issues of particular interest to Central Florida.

Major goals of the Institute are to promote and provide educational research, and service programs for professionals, the general public, and private organizations; to serve as a regional information and educational center, to aid the educational community in promoting, securing, and maintaining up-to-date literature concerned with AIDS.

Contact Person: Dr. Sharon E. Douglass, Director, HPB 350, (407) 823-AIDS

CENTER FOR CONTINUING EDUCATION

The Center for Continuing Education develops, coordinates, and implements noncredit and sponsored credit institute programs of extension, outreach, and continuing education in cooperation with academic colleges and departments of the University. Learners wishing to continue their education are offered, as an alternative to regular credit courses, opportunities for academic credit, professional and personal growth, and enrichment at various locations. The primary purpose is to provide lifelong learning opportunities by using university resources to benefit nontraditional and traditional learners.

A broad spectrum of programs, many designed specifically for individuals and groups, include short courses, in-service training, conferences, seminars, institutes, special training programs, study-travel programs, and workshops.

Professional level noncredit programs are offered to meet the educational needs of business, professional, government, service, and civic organizations. To substantiate the content of professional programs, as well as to offer credentials to verify the learner’s participation, Continuing Education Units (CEU) are offered to qualified and eligible participants.

Additionally, training activities can be custom designed for specific professional groups or organizations desiring to complement their internal personnel training and development programs. Specialized certification courses, in response to legislative mandates (e.g., certified risk managers in certain health care facilities) are also offered.

The Center serves as facilitator for the academic colleges and performs the overall planning, coordination, and management of approved off-campus credit courses, degree programs, sponsored contract courses, and special credit instruction serving nonregularly matriculating students.

Outreach credit courses and programs offered by the academic colleges and coordinated by the Center are tailored to meet the educational needs of local residents and are business, industry, and government employees. These offerings are designed to provide continuing education to those persons desiring to maintain or enhance their professional technical competence. The goal of the Center for Outreach Credit Programs is to unite outstanding resources from the University and the public/private sector for the purpose of offering to participants an opportunity to meet personal aspirations and to obtain professional development while participating in life-long learning. Registration in continuing education courses does not require admission to the University, nor does it imply acceptance.

Director: Dr. Thomas A. Shostak, PC 547, Phone (407) 823-6100
Associate Director: Dale A. Badger, PC 547, (407) 823-6108
Associate Director: Dr. Consuelo Stebbins, PC 547, (407) 823-6103
CENTER FOR MULTILINGUAL MULTICULTURAL STUDIES

The Center provides English instruction for foreign students and area business persons. The intensive English program combines the latest in teaching methodology with computer-assisted instruction. Full-time students enrolled at the Advanced level may elect to take courses as nondegree-seeking students while enrolled in the English language program. Student (F-1) visas are extended to qualified applicants. Special attention is given to preparing students for academic coursework in their specialized fields of study. Four levels of instruction are offered which range from Beginning to Advanced. Students are required to take an entry placement test to determine their level of proficiency. The Center also offers English for special purposes for international business.

Director: Dr. Consuelo Stebbins. PC 547, Phone (407) 823-5515

CENTER FOR RESEARCH IN ELECTRO-OPTICS AND LASERS (CREOL)

CREOL is the State University System of Florida's Center of Excellence for research and education in optical and laser sciences and engineering. CREOL was established in 1986 to bring together diverse disciplines into cohesive program in optics and lasers. Research activities at the Center are integrated with academic program to insure involvement of both students and faculty. CREOL has 28 faculty positions devoted to lasers and optical sciences and engineering which are rapidly being filled by to scholars from around the world. CREOL occupies over 50,000 sq. ft. of space in the Central Florida Research Park adjacent to UCF main campus.

Research Program

CREOL research projects reflect the interdisciplinary nature of the faculty and the faculty diverse interest and is supported by federal, state, and private research grants. Faculty and students pursue joint research projects with industry and government laboratories. Current research activities include: laser propagation, laser/material interaction, nonlinear optics, integrated and guided-wave optics, infrared systems, optical signal processing, laser development, detector technology, ultrafast phenomena, modern x-ray optics and lithography, laser plasma, nonlinear optical spectroscopy, diffractive optics, thin film optics, free electron lasers, optoelectronics, growth of nonlinear and laser host materials, solid state and diode pumped lasers, laser material processing and others. The research facilities include fifty laboratories equipped with over ten million dollars of state-of-the-art optics equipment.

Academic Program

The academic program involves students from various science and engineering departments and reflects the diverse interest of the faculty and students. Degrees of MS and Ph.D. in Optical Sciences and Engineering, Optical Physics, Electrical Engineering and Physics are offered at UCF. The academic program includes 25 specialized courses in electro-optics and lasers as well as basic Electrical Engineering and Physics courses. Graduate research assistantship up to $14,000 per year are available at CREOL for highly qualified students. Exceptional students will be considered for assistantship enhancements up to $4,000 are available to exceptional students through the Litton Foundation and United Technologies Optical Systems.

Industrial Affiliates Program

CREOL has established an industrial affiliate program to facilitate strong cooperative relationships with industry. The program provides businesses and manufacturers with the benefits of cutting-edge research and with access to the expertise and facilities of CREOL. Faculty members are teaming with Florida-based small businesses to help them compete for federally sponsored SBIR programs. The program provides industry with effective way to contribute to and sustain the research and teaching in laser and electro-optical technology.

For information contact CREOL, 12424 Research Parkway, Suite 400, Orlando, FL 32826. Phone (407) 658-6800. Contact persons: Dr. M. J. Soileau, Director or Dr. M. G. Moharam, Chair Academic Affairs Committee.
INSTITUTE FOR SIMULATION AND TRAINING (IST)

The Institute for Simulation and Training (IST) is an internationally recognized research institute which focuses on technology advancement in training systems, education, and simulation and modeling.

IST was established in 1982 at the University of Central Florida and is located in the Central Florida Research Park, adjacent to the UCF campus. The Naval Training Systems Center, the Army Simulation, Training and Instrumentation Command (STRICOM) are also located in the Research Park. Additionally, more than 140 training and simulation companies maintain a presence in the Orlando area, causing the State of Florida to pass a resolution recognizing this area as the Center of Excellence for Simulation and Training technology.

The Institute serves this simulation and training community by providing a wide range of research services and working with university faculty to help develop curriculum and degree programs in simulation and training disciplines. UCF is the first university in the nation to offer a master's degree in simulation systems.

IST's research staff consists of scientists, engineers, and students. Program Managers and Principal Investigators have complete freedom to tailor interdisciplinary research teams to specific research projects. Several faculty members and graduate students have presented award winning papers at major conferences throughout the country.

IST researchers conduct basic and applied research for a broad range of training devices and programs. IST research areas include: simulation networking, visual simulation (including a Virtual Reality testbed), training systems effectiveness, artificial intelligence/expert systems, team training, computer graphics and animation, user interface design, computer architectures, simulation modeling, cognitive/information processing, database design and development, and instructional systems design. Laboratories, work space and administrative offices comprise nearly 30,000 square feet of total floor space in the Park's Research Pavilion. Major laboratories include: Visual Systems Lab, Language Technology Lab, Communications Lab, Visual Systems Lab, Low Cost Flight Trainer Lab, Mathematics Simulation Lab, and the Advanced Learning Technology Transfer Center.

In its role as a leader in the simulation and training community, the Institute has undertaken a program of technology transfer. Included in this effort is the development of research projects with potential commercial applications, adaptation of military technology to civilian educational markets, and the communication of research results through seminars, publications and workshops.

Contact Person: Dr. A. Louis Medin, Executive Director, Phone (407) 658-5000; FAX (407) 658-5059

SPACE EDUCATION AND RESEARCH CENTER (SERC)

The Space Education and Research Center (SERC) is an interdisciplinary organization that relies on faculty participation from all five colleges of the University. SERC's mission is to:

- Perform research to advance space technology
- Provide researchers with greater access to the upper atmosphere and space
- Help commercialize space services
- Positively affect educational opportunities and experiences
- Upgrade capability through training and development programs
- Become an active participant in the international space community

Research areas of interest include advanced launch systems, communications, the earth system sciences, educational technology, and space optics. The goal is to maximize space research opportunities for UCF faculty and students, while providing highly valued results to the space community.

In education, SERC serves as a catalyst for the development of new space related courses and programs. SERC also works with industry, government and the Central Florida school districts to improve science and mathematics education through the use of space applications and technology.

Contact Person: Dr. Jerry Ventre, Acting Director, 12424 Research Parkway, Suite 157, Orlando, FL 32826. Phone (407) 658-5599, FAX (407) 658-5595.
CENTER FOR APPLIED HUMAN FACTORS IN AVIATION (CAHFA)

The Center for Applied Human Factors in Aviation (CAHFA) has as its mission the enhancement of safety in the nation's airspace system through applied human factors research, systems design and training strategies. Chartered in 1990, CAHFA is a research consortium established between UCF and Charter partner Embry-Riddle Aeronautical University, Daytona Beach, Florida. CAHFA's professional staff maintains offices on both campuses. The complimentary strengths of the two universities are combined to create a research resource that is without peer for solving a vast assortment of aeronautical human factors problems. CAHFA research initiatives are targeted to significantly reduce human factors related accidents and incidents by determining the efficacy of and by developing strategies for achieving improvements in human performance.

Contact Person: Dr. Jefferson M. Koonce, Director and Chief Scientist, Phone (407) 823-1011; FAX (407) 823-5662

FLORIDA SOLAR ENERGY CENTER (FSEC)

The Florida legislature created the FSEC in 1974 to conduct research on alternative energy technologies, to improve the quality of available solar energy equipment, and to educate the public about energy options. Located on a 16-acre complex at Cape Canaveral, the center serves as a statewide institute administered by the University of Central Florida.

The FSEC conducts state, federal, and privately supported research in photovoltaics, energy use in buildings, electrical and uses, solar water heating, power electronics, innovative air conditioning systems, and the production and use of hydrogen. In addition, the center has developed and administers state-mandated programs that require the testing, certification, and approval of all solar energy equipment manufactured or sold in Florida. Through its public information office, FSEC responds to more than 15,000 requests for energy information each year. The center also conducts seminars and workshops for teachers and professionals statewide, and its technical library boasts one of the nation's most extensive holdings on solar and alternative energy. Current projects involve solar thermal systems, electric utilities research, hydrogen and energy systems, among others.

For information contact the Florida Solar Energy Center, 300 State Road 401, Cape Canaveral, FL 32920-4099.

Contact Person: Dr. David Block, Director, Phone (407) 783-0300; FAX (407) 783-2571

FLORIDA-CANADA INSTITUTE

The Florida-Canada Institute is hosted by the University of Central Florida for the State of Florida. The purpose of the Institute is to create and foster educational, commercial, cultural and social exchanges between Canada and Florida. The Institute offers such programs as the Canadian Speakers Series and Summer Seminars on Canadian Studies for school teachers. It provides opportunity for the state-wide dissemination of information about Canada to K-12 schools. Palm Beach Community College is the Florida State Division of Community Colleges co-host for the Florida-Canada Institute.

Contact Person: Dr. Henry Kennedy, Director, Phone (407) 823-2079

FLORIDA-CENTRAL EAST EUROPE INSTITUTE

The Florida-Central East Europe Institute is hosted by the University of Central Florida and Lake Sumter Community College for the Florida International Affairs Commission. The purpose of the Institute is to create and foster educational, commercial, cultural and social exchanges between the countries in central Europe, in the new Russian Commonwealth and Florida.

Contact Person: Richard Astro, Director, Research Pavilion, Suite 135, Phone: 407-658-5570 or 407-647-8022

SMALL BUSINESS DEVELOPMENT CENTER

The Small Business Development Center (SBDC) is part of a statewide organization designed to promote economic development by responding to the needs of the small business community. The SBDC, located in the College of Business Administration at the University of Central Florida, is responsible for a geographic area including Orange, Osceola, Lake, Citrus, Volusia, Flagler, and Sumter counties. Regional centers located at Brevard Community College and Seminole Community College assist small business in
Brevard and Seminole Counties. An additional center is located at Valencia Community College to assist small business owners with technology transfer information. Assistance is provided to both start-ups and existing businesses through workshops and individual counseling in the following areas:

- How to Start a Business
- Personnel
- Bookkeeping
- Business Tax
- Franchising
- Marketing
- Sources of Financing
- Product Innovation
- Business Plan Development

Additional programs provide assistance to clients in the areas of government contracting and energy conservation.

**Contact Person:** Mr. Aloyse T. Polter, Director, BA, Phone (407) 823-5554.

### CENTER FOR ECONOMIC EDUCATION

The Center for Economic Education strives to increase public knowledge of economic principles and their applications in daily life.

Researchers at the Center develop, collect, and distribute economic educational materials. They also consult with and provide instruction to area schools (K-12), community colleges, and community organizations. Instruction focuses on the principles of economics and their use in making rational economic decisions. Affiliated with the National Council on Economic Education and the Florida Council on Economic Education, the Center also conducts research in economic education.

**Contact Person:** Dr. Robert L. Pennington, Director, BA 325, Phone (407) 823-2870

### INSTITUTE FOR STATISTICS

The Institute for Statistics provides statistical consulting and analytical support to all areas of the University. The Institute makes valuable contributions to research by supporting non-statistical researchers with statistical consulting assistance during the planning of experiments and investigations, analysis of data, and the evaluation of results.

The Institute also provides statistical support to various governmental agencies and private organizations.

**Contact Person:** Dr. Mark E. Johnson, Director, Phone (407) 823-2289.

### DICK POPE, SR. INSTITUTE FOR TOURISM STUDIES

The Dick Pope Sr. Institute for Tourism Studies is dedicated to improving the quality of the tourism product and increasing the benefits of tourism accruing to the industry, the state and local community. To this end the Institute is involved in a variety of programs in the fields of research and public awareness.

The research includes the collection, development and dissemination of information relevant to the tourism and hospitality industry in the areas of marketing, consumer behavior and visitor satisfaction, feasibility, economic, motivational, and forecasting. Some of the Institute’s patrons include tourism promotion agencies at the state and local levels; tourism development commissions; professional associations; and private enterprises such as attractions, hotels, motels, food-service establishments, ground and air transportation companies, travel agencies and tour operators, and other related businesses.

The Institute devotes significant efforts to increasing public awareness of the tourism industry in Florida and elsewhere, and of the contribution of the industry to the social and economic welfare of the general public.

**Contact Person:** Dr. Ady Milman, Director, Phone (407) 823-2188

### SMALL BUSINESS INSTITUTE

Business schools have for some years been interested in getting students out of the classroom and involved with real business problems rather than “textbook” situations. By sponsoring the Small Business Institute program, the Small Business Administration does not only satisfy this need, but at the same time provides free professional help to small businessmen who are in need of managerial guidance.
The SBI program uses a team of senior-level undergraduate or graduate-level students who, under faculty supervision, provide management counseling and technical assistance to small business clients. Examples of these services are: general management audits, development of business plans, establishment of accounting systems, design of inventory systems, cost analysis, pricing strategies, and evaluation of alternative markets.

The major objective of the College of Business Administration at the University of Central Florida is to educate men and women for positions of productive responsibility in business and the professions. UCF's Small Business Institute program stresses analytic ability and the student's learning skills in recognizing and coping with change. The Small Business Institute program at the same time provides on the job experience and sound academic training for the student.

Contact Person: Dr. Ron Rubin, Director, Phone (407) 823-2682

INSTITUTE OF GOVERNMENT

The Institute of Government, an affiliate of the Florida Institute of Government, is housed in the Department of Public Administration and provides training and development as well as technical assistance to federal, state, and local government agencies and intergovernmental associations such as the Florida League of Cities. Training workshops, conferences, seminars, action research projects, citizen surveys, strategic planning, and organization development programs are among the services offered by the Institute.

Director: Ms. Marilyn Crotty, Phone: (407) 423-6335

INSTITUTE FOR TECHNICAL DOCUMENTATION

The Institute for Technical Documentation offers a variety of services for client companies, including the development of original technical documentation, the translation of documentation written in foreign languages, and the development of seminars to assist clients in writing their own documentation.

The Institute consists of a core of permanent professional staff, supplemented by University faculty, staff, and students, all of whom have demonstrated expertise in technical writing of documentation. These services are enhanced by the cooperative efforts of educators, engineers, foreign language experts, psychologists, and scientists who act as consultants to the Institute.

Computer-assisted processing aids in translating foreign languages, word processing and editing text, gathering reference material, and conducting information searches. Trained writers, established facilities, and continued contact with personnel in industry and research enable the Institute to engage in a wide variety of documentation projects.

Contact Person: Ms. Gloria W. Jaffe, Director, FA 450, (407) 823-2212.

CENTER FOR EXECUTIVE DEVELOPMENT

The Center for Executive Development of the College of Business Administration is committed to providing the best management and executive development programs in the State of Florida. Utilizing the resources of the College and University faculty, visiting executives and educators from around the world, the Center provides management and executive seminars in the areas of real estate, small business, general management, hospitality and human resources management for over 5,000 participants per year. Programs run from one day to over two weeks in length. Center activities are coordinated by program coordinators who are responsible for the following areas: Public Programming, In-House — Custom Seminars, Real Estate/Small Business 2000 and the Special Projects Groups. Examples of current programming within the Center includes: Train-the-Trainer, Management Development Series, Electronic Meeting/GroupWare Systems, Negotiation Skills, Purchasing, Supervising and Managing People, Lockheed Management Institute, Tax and Accounting Conference.

Also housed within the Center is the International Center for Business Leadership (ICBL). The function of the ICBL is to extend the reach of the College of Business to the global arena with programs that attract participants from around the nation and the world. The ICBL will use a UCF and global faculty network to provide world-class management and executive education programs for individuals and organizations.

Contact Person: Dr. Craig McAllaster, Director, Phone (407) 823-2446.
OAK RIDGE ASSOCIATED UNIVERSITIES (ORAU)

The University of Central Florida is a sponsoring institution of Oak Ridge Associated Universities (ORAU), a not-for-profit consortium of 62 colleges and universities and a management and operating contractor for the U.S. Department of Energy (DOE) with principal offices located in Oak Ridge, Tennessee. Founded in 1946, ORAU identifies and helps solve problems in science, engineering, technology, medicine, and human resources, and assists its member universities to focus their collective strengths in science and technology research on issues of national significance.

ORAU manages the Oak Ridge Institute for Science and Education (ORISE) for DOE. ORISE is responsible for national and international programs in science and engineering education, training and management systems, energy and environment systems, and medical sciences. ORISE's competitive programs bring students at all levels, precollege through postgraduate, and university faculty members into federal and private laboratories.

ORAU's office for University, Industry, and Government Alliances (UIGA) seeks out opportunities for collaborative alliances among its member universities, private industry, and federal laboratories. Current alliances include the Southern Association for High Energy Physics (SAHEP) and the Center for Bio-Electromagnetic Interaction Research (CBEIR). Other UIGA activities include the sponsorship of conferences and workshops, the Visiting Scholars program, and the Junior Faculty Enhancement Awards.

For additional information contact Dr. Michael Bass, Professor of Electrical Engineering and Physics, CREOL, Phone (407) 656-6800.
ADMISSION TO THE UNIVERSITY
AND GRADUATE PROGRAMS

Working with the Registrar, who is responsible for processing and issuing credentials of graduates, the Admissions Office oversees the college's application process and provides student services. The committee also helps students with academic advising and the enrollment process.

APPLICATIONS

Applications for admission to the University of Nevada, Reno, Graduate Admissions Office (G.A.O.) must be submitted to the same office. The same office also processes applications for non-degree-seeking students.

ADMISSION PROGRESS REPORTS

The Admissions Office prepares a progress report for each student. The report includes information on the student's progress towards graduation, including current and previous semesters.

FLAME OF HOPE

The Flame of Hope is a monument located on the University of Nevada, Reno campus. It is a symbol of hope and strength for the university community and serves as a reminder of the importance of perseverance and resilience.

The monument was commissioned by the university and was dedicated in 1992. It is located on the north end of the campus and is a popular gathering spot for students and visitors.

The Flame of Hope is a symbol of hope and strength for the university community and serves as a reminder of the importance of perseverance and resilience.
ADMISSION TO THE UNIVERSITY AND GRADUATE PROGRAMS

Working with the Registrar, whose function is to process and insure completeness of records, the program coordinator and the dean of the college admit the prospective student to graduate study in the area for which he or she is applying. It should be noted that post-baccalaureate admission to UCF does not guarantee admission to graduate status in a degree program.

ADMISSION PROCEDURE AND DOCUMENTS

APPLICATIONS
Applications for admission to the University for degree-seeking or non-degree-seeking (post-baccalaureate) study may be obtained from the Graduate Admissions Office. Completed applications must be submitted to the same office.

UCF students who graduate with a baccalaureate degree and wish to continue their studies must file an application for admission to either the graduate degree program or for non-degree (post-baccalaureate) admission. No fee is required of returning UCF students who have previously paid an application fee.

ACCREDITATION
For the purposes of this catalog, "accredited institutions" means those institutions accredited by the six regional associations:

New England Association of Schools and Colleges
Middle States Association of Colleges and Secondary Schools, Commission on Institutions of Higher Education
North Central Association of Colleges and Schools, Commission on Colleges and Universities
Northwest Association of Secondary and Higher Schools, Commission on Higher Schools
Southern Association of Colleges and Schools
Western Association of Schools and Colleges, Accrediting Commission for Senior Colleges and Universities and Accrediting Commission for Junior Colleges

Foreign institutions will be evaluated by UCF.

OFFICIAL TRANSCRIPTS
To be granted admission to UCF in either graduate or post-baccalaureate status, all applicants must have on file in the Registrar's Office official transcripts showing a baccalaureate degree and the grades for the last 60 semester hours of undergraduate work. If grades were transferred in from other schools in the last 60 semester (90 quarter) hours, official transcripts from those schools also must be sent. If applying to the Business or Psychology programs, all transcripts from all colleges attended are required. Final acceptance into degree-seeking graduate status is not granted unless an applicant's official transcripts and necessary test scores are on file so that they can be evaluated for admission.

GRADUATE EXAMINATIONS
The Board of Regents of the State of Florida requires every student to take either the Graduate Record Exam (GRE) or the Graduate Management Admission Test (GMAT) before the student can be transferred from post-baccalaureate status to graduate student status. Some programs may also require the GRE subject test before admission into graduate student status. Official copies must be mailed from the Educational Testing Service to the Graduate Admissions Office and be on file before graduate student status can be granted. UCF recommends that any individual contemplating class work beyond the bachelor's degree take the GRE or GMAT at the earliest possible date to avoid problems associated with a delay of acceptance into a graduate program. The GRE is given five times a year and the GMAT is given four times a year on the UCF main campus. An individual
should contact the UCF Counseling and Testing Center for registration dates and procedures, at (407) 823-2811. Preparatory courses are offered through the Center for Continuing Education at (407) 823-6100.

Educational Testing Service began a new policy, effective with the October 1985 GRE test, of reporting scores only until September 30 following the fifth anniversary of the test date. If ETS cannot provide an official copy, students will need to repeat the GRE and have an official score reported to UCF. However, the established time limit of acceptable official test scores varies with programs at UCF, as shown below:

**Arts and Sciences**

Biology 5-year limit
Chemistry, Industrial No limit
Communication No limit
Computer Science No limit on General test, but a 2-year limit on the GRE Computer Science Subject Test.

English No limit
History No limit
Mathematical Sciences 5-year limit
Physics No limit
Political Science No limit
Psychology 5-year limit
Sociology, Applied 7-year limit
Statistical Computing 5-year limit

**Business Administration** programs have a 5-year limit on the GMAT score.

**Education** programs have no limit.

**Engineering** programs have no limit.

**Health & Public Affairs**

Communicative Disorders 7-year limit
Health Sciences 7-year limit
Public Administration 5-year limit
Molecular Biology and Microbiology 5-year limit

**RECORDS DEADLINE - Supporting Documents**

All supporting admissions documents should be received by the Admissions Office no later than 15 days preceding the first day of classes. In some cases, applicants may be allowed to register on a temporary basis (without all records) assuming it can be determined from available records or consultation with the students that they appear admissible.

**RECORDS - Validity of Documents**

All supporting admissions documents must be received directly from the issuing institution or testing agency, and if the University finds that an applicant has made a false or fraudulent statement or a deliberate omission on the application, residency affidavit, health report, or any accompanying document or statement, that applicant may be denied admission. Should the student be enrolled when such fraud is discovered, he or she may be immediately withdrawn (with no refund), further enrollment denied, and credit earned and any degree based upon such credit invalidated. Actions for this type of offense will be handled administratively by the University Registrar's Office after notification to the alleged violator and hearing by that office.

**MEDICAL HISTORY REPORT**

All new students must furnish medical history reports on the approved University health form before registration will be allowed. The Medical History Report will be mailed to the applicant upon receipt of the application for admission.

Immunizations and diagnostic procedures may be required of students by the University prior to any registration. University requirements for vaccinations or immunizations may be
waived upon receipt of appropriate documentation from the student that the waiver is requested on the basis of religious grounds or upon the recommendation of a University physician.

Where physician examinations or certificates are required, they must be signed by a doctor of medicine or by a doctor of osteopathy. The University reserves the right to refuse registration to any student whose health record or report of medical examination indicates the existence of a condition which may be harmful to members of the University community.

REACTIVATION OF A STUDENT'S FILE

A student who has submitted an application for admission to the University of Central Florida, but never attended, may reactivate the original application within a period of two years. (No additional fee is required.) Please check current catalog for deadline date. After two years of non-attendance from initial application, files are destroyed. An application fee is required if student applies again after that period.

ADMISSION TO THE UNIVERSITY

ADMISSION PROCESS

Admission to the University does not imply admission to graduate status.

The admission process begins with the receipt of the application with fee at the Admissions Office. The Admissions Office acknowledges receipt of the application and fee and notifies the applicant of any deficiencies in the application (e.g., transcripts, GRE or GMAT test scores, etc.).

The application information is then forwarded to the degree program. Upon receipt, copies of transcripts and test scores are also forwarded to the degree program.

Applicants will receive their initial notice of acceptance to the University as non-degree seeking students and information for registration for classes from the Admissions Office. All inquiries for degree program information should be directed to the program coordinator or the department chair.

READMISSION TO THE UNIVERSITY

A regularly admitted student who has not been registered for two major semesters (Spring/Fall) must make application for readmission through the Admissions Office approximately one month before classes begin for the new semester. (See "Continuous Attendance" below.)

CONTINUOUS ATTENDANCE

Graduate students should be aware of two policies regarding continuous attendance at the University. The first may affect continuing status as a graduate student. The second affects the student's option to fulfill degree requirements under any UCF catalog in force during the student's most recent period of continuous attendance.

1. A student may not be guaranteed continuing graduate status if he or she does not enroll in the University for a period of two major semesters (Spring/Fall). When a student applies for readmission, after having been out two or more semesters, the program will review the student's record to determine if the student is returned to graduate status or be reverted to post-baccalaureate status.

2. Graduation policy allows a student to fulfill degree requirements as listed in their official program of study on file in the office of the major. Continuous attendance is interrupted when a student drops out of school for any term other than the summer term. Because students must occasionally interrupt their attendance for a brief period, a student will be considered to have interrupted continuous attendance only if the interruption is for two or more consecutive terms (Spring/Fall). Under these circumstances, a student may lose the option of fulfilling degree requirements originally listed in their official program of study on file in the office of the major.

WITHDRAWAL POLICY

A student may withdraw from a class up to the end of the eighth week of any regular academic semester or until the midpoint of any summer term. No withdrawal after the deadline is permitted except in extraordinary circumstances. Students who need to petition for withdrawal after the deadline should contact the Office of the Dean of their college.
A student is never automatically withdrawn from a class by not attending. Failure to officially withdraw from a class will result in a grade of "F." Course withdrawal forms are available in the Records Office (normally open until 6:00 p.m., Monday through Thursday, and until 5:00 p.m. on Friday).

Upon request, the instructor will provide the student with an assessment of his or her performance in the course prior to the last day for withdrawal.

ADMISSION TO A GRADUATE PROGRAM

Upon receiving copies of all transcripts and standardized test information from the Admissions Office, the degree program coordinator will admit on a regular or provisional degree-seeking graduate status or deny the applicant.

APPEALS PROCEDURE FOR REJECTED STUDENTS

Students who are rejected by a program but who meet the SUS minimum standards for admission to graduate status are allowed under Rule 6C-6.03 to appeal that decision. Those applicants may request reconsideration by written petition to the University within thirty days of the date of denial. The route of appeal will be first to the college dean and then to the Associate Vice President for Academic Affairs for submission to the Graduate Council for recommendation to the Provost.

ADMISSION CLASSIFICATIONS

Admission to graduate status can be in either of two categories: regular status or provisional status. (Post-baccalaureate status is considered non-degree-seeking.)

GRADUATE STATUS—REGULAR

The minimum system-wide requirements of the Board of Regents for admission to REGULAR graduate status are listed below. Additional requirements are specified by individual degree programs. All students who wish degree-seeking status must submit the GRE General Test score (or the GMAT score as required). Some programs also require the GRE Subject Test. Other programs may require a minimum GRE General Test score.

(1) A baccalaureate degree or equivalent from a regionally accredited university and an earned GPA of 3.0 or more (on a 4.0 maximum) while registered as an upper-division undergraduate student (normally based on the last sixty semester hours) or a total score of 1,000 or higher on the General Test (quantitative-verbal sections) of the Graduate Record Examination (or a GMAT score of 500 or higher as needed) or an equivalent score on an equivalent measure approved by the Board of Regents OR a previous graduate degree and official GRE or GMAT score.

Even though an applicant may qualify for minimum admission on the basis of the undergraduate grade point average or having a previous graduate degree, an official GRE or GMAT score must be on file before consideration for admission to Graduate Status.

(2) A student must be accepted by the program coordinator and the dean of the college offering the particular degree program sought. Requirements in addition to the minimums stated above may be specified by the individual degree programs.

(3) International students must demonstrate their proficiency in the English language as one of the conditions of admission. All international applicants whose primary language is not English and who have not earned a degree from an accredited American college or university, must take the TOEFL (Test of English as a Foreign Language). Evaluations of the TOEFL score will reside with the program coordinator. The Graduate Admissions Office of the University of Central will have international student documents evaluated. International students must have official copies of all transcripts sent to Graduate Admissions along with a certified English translation of the transcripts. Additional information may be required to clarify a transcript; the student will be notified of such requirements. The following programs require only document evaluation: Computer Science, Engineering, English, Health, Mathematical Science, Political Science and Statistical Computing. All other departments require course-by-course evaluations. Students must adhere to deadlines published in the catalog.
GRADUATE STATUS—PROVISIONAL

A student who does not fulfill the academic conditions for REGULAR admission may be admitted provisionally upon recommendation of the dean of the college to which admission is sought.

PROVISIONAL admissions may at no time exceed 10 percent of the graduate students admitted for any academic year in any single degree program.

PROVISIONAL students may be admitted to REGULAR status following satisfactory completion of 9 semester hours and upon recommendation by the program coordinator and college dean. If a student does not maintain a 3.0 GPA in the graduate program of study, he or she will be placed on ACADEMIC PROVISIONAL status for 9 semester hours, then reverted to post-baccalaureate status if the GPA is still unsatisfactory. A student with regular or provisional status whose overall GPA falls below 2.0 will be reverted to post-baccalaureate status.

POST-BACCALAUREATE STATUS

Post-baccalaureate status is considered to be non-degree-seeking. A student is placed in this category for computer records when the application is received. If a student wishes to be degree-seeking, he or she must have official GRE or GMAT test scores sent to the Admissions Office, along with official transcripts. The graduate program evaluates these documents and makes a decision on admissibility to graduate status. International students are not eligible for post-baccalaureate status unless they hold a baccalaureate degree from a regionally accredited United States university.

A student may elect to remain in post-baccalaureate status for various reasons (e.g., requirements in a graduate program at another institution, personal improvement, meeting job requirements, and removing academic deficiencies). While in this category, a student is allowed to take graduate courses on a space-available basis only. Also while graduate status students register the first day of registration, post-baccalaureate students register the last day. Furthermore, not all departments accept post-baccalaureate students. For those departments which do accept post-baccalaureate students, the procedures for enrollment into graduate level classes vary with each department. In some cases, a department will control enrollment by closing graduate courses after the scheduled registration time for graduate status students, and then admit non-degree-seeking students only by special permission.

All students who take course work while in post-baccalaureate status should be aware of the limit of 9 semester hours of course work which can be transferred into a graduate degree program when a student is given graduate status.

CHANGE OF MAJOR OR COLLEGE

When students wish to change their major or college after having been admitted to a graduate program, they must apply to the new program. The new program coordinator will then decide whether to admit the student.

DISMISSAL FROM THE GRADUATE PROGRAM

Students who fail to maintain satisfactory academic performance shall be reverted to post-baccalaureate status by the program or college Dean. In addition to unsatisfactory grades, other reasons for reverting a student to post-baccalaureate status include weak academic performance in the major field of endeavor, or poor performance in required examinations (e.g., end-of-the-program examination or thesis defense).

The student may appeal such a dismissal through the college to the Associate Vice President for Academic Affairs who will place it on the agenda of Graduate Council. Only in exceptional cases shall the student be readmitted to the program by the Graduate Council. In such cases, the student's entire program shall be re-evaluated and a new program will be submitted for consideration by the Graduate Council. It is entirely possible that additional courses will be required in the program of study before the student is allowed to continue in the graduate program.
SECOND MASTER’S DEGREE

Completion of one master’s program at UCF may qualify a student for a second master’s degree. Individuals seeking a second master’s degree must complete the normal UCF master’s degree requirements for the second degree.

Up to 6 semester hours from a completed master’s program from UCF or any other institution may be transferred into a second master’s program if the courses are not more than seven years old when the second degree is completed.

TRANSCRIPT REQUESTS

Transcripts of a student’s UCF academic record may be requested by the student through the Office of the Registrar. A student’s academic record can be released only upon written authorization by the student. Include in the request the full name and social security number. Indicate names and complete addresses to whom transcripts are to be sent. If grades or degree statements for the current term are needed, indicate that the transcript request is to be held until the final semester reports are posted. The first three transcripts are provided at no cost to the student. For additional transcripts, there is a charge of $2.00 each. The check or money order should be made payable to: UCF. Cash payments can be accepted only by the Cashier’s Office (Monday 9-6:30, Tues-Fri, 9-3:30). Students requesting transcripts may do so in person or by writing to: Transcript Request, Office of the Registrar, University of Central Florida, PO Box 160114, Orlando, FL 32816-0114.

INTERNATIONAL STUDENTS

UCF adheres to the principles that the University is primarily a community of scholars, both national and international, in pursuit of knowledge, and active in teaching, studying, and doing research. The presence of international students on the campus contributes substantially to the quality of the educational experience for everyone. It can bring to the classroom learning environment unique viewpoints and perceptions which would otherwise be lost to the U.S. students. Effective personal contact across cultures can reduce errors in understanding one another’s problems and foster a climate of international peace and cooperation among people of the world today.

The international student must submit the Test of English as a Foreign Language (TOEFL) score, as well as transcripts, if the student is not a graduate from an accredited college or university in the United States. When the official test score is received in the Admissions Office, copies will be sent to the graduate program coordinator who evaluates the student’s record, the undergraduate institution, and the student’s test score.

Each program has determined what minimum TOEFL score will be required, as shown below.

The Graduate Admissions Office of the University of Central Florida may have international student documents evaluated by Josef Silny & Associates, Inc. PO Box 248233, Coral Bables, FL 33124-8233. College of Business Administration applicants should send a transcript copy to World Education Services, Inc., (WES), P.O. Box 745, Old Chelsea Station, New York, NY 10011 for evaluation. International students must have official copies of all transcripts sent to Graduate Admissions along with a certified English translation of the transcripts. Additional information may be required to clarify a transcript; the student will be notified of such requirements. The following programs require only document evaluation: Computer Science, Engineering, English, Health, Mathematical Science, Political Science and Statistical Computing. All other departments require course-by-course evaluations. Students must adhere to deadlines published in the catalog.

International students are not eligible for postbaccalaureate status unless they hold a baccalaureate degree from a regionally accredited United States university.

INTERNATIONAL STUDENT MANDATORY HEALTH AND ACCIDENT INSURANCE

Each international student accepted for admission shall prior to registration, submit proof of compliance with the Board of Regents mandatory health and accident insurance (effective Fall semester, 1992).

Written proof of insurance, must be provided to the International Student Services Office and must be valid at all times. Cancellation of the policy, stoppage of the premium, will result in administrative withdrawal from all classes.

If the insurance is issued by an insurance carrier from outside of the United States, a notarized statement, in English, must be provided attesting to meeting the minimum coverage mandated by the State of Florida.
TUITION AND FEES

SCHEDULE OF FEES

A student’s basic expenses at the University will be for registration fees, room and board, textbooks, other instructional supplies, and miscellaneous items.

Required fees are established by the Board of Regents and the Florida State Legislature and are subject to change without notice. Fees are affected by residency status. Information on Florida residency for tuition purposes is on the following page.

All University fees must be paid at or before the end of the add/drop registration period. Failure to pay fees on or before due date will result in cancellation of the current registration.

The following schedule applies to all University of Central Florida students.

General Fees and Costs (Subject to change without notice)

A. Application fee. Must be paid by U.S. check or money order (required with all applications for admission to the University and not refundable)…………………….$20.00.

B. Registration Fees per semester for campus, centers, and continuing education courses. Minimum registration of one credit hour (at the level the student is classified) must be charged for students registering for zero hours (co-op student on work assignment, applicant for graduation during the semester that student is not registered).

¹ Undergraduate courses are those courses numbered 0-4999
² Graduate courses are those courses numbered 5000-7999

C. Room and Board (Based on accommodations and meal plan selected)

Residence Hall Rooms (per semester)…………………………..$880-$1,180
Board (meal plans, per semester)………………………………...$600-$1,050
Charge for late registration……………………………………$50.00
Charge for late payment…………………………………………$50.00

D. Books and supplies (estimated) per semester………………….$300.00

E. Late Registration and Late Payment Fees

∞ A $50 late registration fee will be assessed all students who register during the late registration period and pay fees by the deadline.
∞ A $50 late payment fee will be assessed all students who pay fees after the deadline.
∞ Both a $50 late registration fee and a $50 late payment fee will be assessed all students who both register late and pay fees after the deadline.
∞ Both a $50 late registration fee and a $50 late payment fee will be assessed all students who do not pay by the deadline, are cancelled and are then reinstated.

All payments accepted after drop cards are mailed, approximately the third week of classes, must be cash, cashier’s check or money order.

F. Vehicle Registration (required of everyone operating a motor-powered vehicle on campus) per calendar year for full-time, part-time students, and courtesy students from other institutions. Student’s fee…………………………………….$45.00

G. Student Health Fee—not refundable (per semester)

Assessed to all students except those enrolled exclusively in Continuing Education courses. This fee is also waived for senior citizens, for State employees under the fringe benefit plan, and for Certificate of Participation holders. University employees who use the Tuition Fee Waiver for class attendance may not elect to pay the Student Health Fee, regardless of the number of semester hours taken.

Fall & Spring Semesters ………………………………………...$47.30
Summer Semester ………………………………………………$35.20

H. Certificate of Participation Holder ……………………………Lab fees/out-of-state fees

I. I.D. Card replacement ………………………………………...$5.00

J. Scientific Laboratory fees—fee per student on specific course(s) ………$2.00 - $15.00

K. Return Check Charge

Service charge on all returned checks is $15.00 or 5%, whichever is greater, and results in the loss of check cashing privileges.
FLORIDA RESIDENCY FOR TUITION PURPOSES

To qualify as a Florida Resident for tuition purposes, students must:

Be a U.S. Citizen, Resident Alien, Parolee, Cuban National, Vietnamese Refugee, or other refugee or asylee so designated by the U.S. Immigration and Naturalization Service, AND

Have established a legal residence in this state and maintained that legal residence for 12 months immediately prior to the term in which they are seeking Florida resident classification. The student residence in Florida must be as a bona fide domiciliary rather than for the purpose of maintaining a mere temporary residence or abode incidental to enrollment in an institution of higher education, and should be demonstrated as indicated below (for dependent students, as defined by IRS regulations, a parent or guardian must qualify), AND

Submit the following documentation (or in the case of a dependent student, the parent must submit documentation) prior to the last day of registration for the term for which resident status is sought:

- Documentation establishing legal residence in Florida (this document must be dated at least one year prior to the first day of classes of the term for which resident status is sought). The following documents will be considered in determining legal residence:
  A. Declaration of Domicile.
  B. Proof of purchase of a home in Florida in which the student resides.
  C. Proof that the student has maintained residence in the state for the preceding year (e.g., rent receipts, employment records).
- Documentation establishing bona fide domicile in Florida which is not temporary or merely incidental to enrollment in a Florida institution of higher education. The following documents will be considered evidence of domicile even though no one of these criteria, if taken alone, will be considered as conclusive evidence of domicile:
  A. Declaration of Domicile.
  B. Florida voter registration.
  C. Florida vehicle registration.
  D. Florida driver license.
  E. Proof of real property ownership in Florida (e.g., deed, tax receipts).
  F. A letter on company letterhead from an employer verifying permanent employment in Florida for the 12 consecutive months before classes begin.
  G. Proof of membership in or affiliation with community or state organizations or significant connections to the State.
  H. Proof of former domicile in Florida and maintenance of significant connections while absent.
  I. Proof of reliance upon Florida sources of support.
  J. Proof of admission to a licensed practicing profession in Florida.
  K. Any other factors peculiar to the individual which tend to establish the necessary intent to make Florida a permanent home and that the individual is a bona fide Florida resident, including the age and general circumstances of the individual.
- No contrary evidence establishing residence elsewhere.
- Documentation of dependent/independent status (notarized copy of most recent IRS tax return).

OR

Become a legal resident and be married to a person who has been a legal resident for the required 12-month period, OR

Be a member of the Armed Forces on active duty stationed in Florida, or a spouse or dependent, OR

Be a member of the full-time instructional or administrative staff of a state public school, community college or university in Florida, a spouse or dependent, OR

Be a dependent and have lived five years with an adult relative who has established legal residence in Florida, AND

File a notarized residence affidavit with the Admissions Office.
The Admissions Office reserves the right to require additional documentation as seen necessary to accurately determine the resident status of any student.

APPEALS

Students who wish to appeal a late registration, late payment, or return check service charge fee may make their appeal to the Appeals Committee by initiating a student petition (Form 41-561). This form can be obtained from the Offices of Undergraduate Studies, Student Affairs, University Cashier, or the Student Accounts Section of Finance and Accounting. Students must submit their petitions to Student Accounts, Room 112, Administration Building, and may appear (not mandatory) before the committee which meets once each week.

CHECK CASHING

The University Bookstore cashes personal checks not exceeding $50.00. The University collects a $15.00 service fee, or five percent (5%) of the check amount, whichever is greater, for personal checks, drafts, or orders which are returned as uncollectible. Future check-cashing privileges may be denied.

PAST-DUE ACCOUNTS

All financial obligations to the University must be met if good standing is to be maintained. Failure to meet obligations can result in the withholding of grades and transcripts, and denial of registration and readmission to the University. The services of a professional collection agency and recourse to the courts may also be invoked if deemed necessary. All costs of collection, including attorney’s fees, are borne by the debtor.

PAYMENT PROCEDURES

Payment may be made in the Cashier’s Office, AD 108, from 9:00 a.m. to 6:30 p.m. on Monday, and 9:00 a.m. to 3:30 p.m., Tuesday through Friday. A photo ID (if paying by check) is required.

Payments (NO CASH) may be placed on the Cashier’s night depository; INCLUDE SS# ON CHECK OR MONEY ORDER.

Payments mailed must be postmarked no later than the deadline specified above. DO NOT SEND CASH.

Address Payment to:
Cashier’s Office, UCF, Orlando, FL 32816-0115

Penalty for Late Payment is $50.00. Do not assume classes will be cancelled if student does not pay fees or attend classes.

Payment guidelines for off-campus registration are contained on the off-campus registration form.

REFUND OF FEES

A refund of fees will be made under the following conditions upon presentation at the Student Accounts Office of a Certification of Withdrawal issued by the Registrar. No refunds will be made under this policy except upon proper application. Any debts to the University will be deducted up to the full amount of the refund.

A. Full refund when:
   1. Any class is dropped before the end of the Add/Drop period.
   2. Cancellation of the course by the University.
   3. Student is denied admission to an offered course by the University for whatever reason.

B. Partial refund (25% of the total registration and non-resident fees paid less building and capital improvement fees):
   1. Complete withdrawal from the University prior to the end of the fourth week of classes, during a 16- (or 17-) week semester or at the end of the first quarter of classes during a mini-semester or summer semester (rounded out to the end of the week in which the first quarter occur). Student must present withdrawal slip and request the refund from Student Accounts.
C. Refunds for exceptional circumstances at any time upon withdrawal for one or more courses:
   1. Up to 100% of tuition and registration fees due to circumstances determined by the University to be exceptional, including but not limited to sickness, death, involuntary call to military service or administrative errors created by the University.

D. Pro rata refunds for First Term at UCF students:
   1. Up to 90% of tuition and dorm charges for students who fully withdraw before 40% of the term has elapsed. Applies only to first term at UCF students. An administrative fee defined as the lesser of 5% of all charges or $100 will be deducted from the refund.

TUITION FEE WAIVERS FOR STATE OF FLORIDA EMPLOYEES

State employees, faculty and staff who utilize a tuition fee waiver for coursework (up to 6 credit hours) without payment of the registration fees must register on the day and time provided by the Registrar. Employees who register prior to the prescribed time and date will have an invalid fee waiver, and will be liable for all applicable fees on courses enrolled. It is the responsibility of the employee to register only on a space-available basis; and this is only during the prescribed time as indicated above by the Registrar. In addition, the tuition fee waiver cannot be used for courses which require increased costs (as it does for such courses as Thesis, Dissertation, Directed Individual Study, etc.). Lab fees cannot be waived. State employees must pay lab fees.

TUITION FEE WAIVERS FOR SENIOR CITIZENS

Persons 60 years of age or older who meet Florida residency requirements may register to audit classes without payment of tuition and application fees. Registration is on a space available basis during the last hour of Add/Drop Registration. The tuition fee waiver cannot be used for courses which require increased costs (such as Thesis, Dissertation, Directed Individual Study).

A Florida Residency Affidavit is required in order to establish Florida residency. A completed Student Health History must be filed prior to registration. Inquiries should be directed to the Undergraduate Admissions Office.

STATE TUITION EXEMPT PROGRAM (STEP)

Eligible members of the active Florida National Guard may receive a waiver of 50% of tuition and lab fees. Registration is on a space available basis only during the time designated by the Registrar.
ORGANIZATION OF GRADUATE PROGRAMS

THE GRADUATE COORDINATORS' COMMITTEE

The Graduate Coordinators' Committee is responsible for the monitoring of minimum University-wide standards concerning graduate admission and matriculation. It also coordinates the graduate programs of the various colleges of the University, although responsibility for the detailed operation of the various graduate programs is vested in the individual colleges.

The Graduate Coordinators' Committee consists of the Graduate Program Coordinators from each of the colleges who are responsible for their graduate programs, the Registrar, the Dean of Undergraduate Studies (Associate Vice President for Student Academic Services) and the Vice President for Research and Graduate Studies. The committee shall consider all administrative (non-policy) graduate processes, procedures and details such as admissions categories, graduate student workloads, stipends and course loads, forms and records used in graduate admissions, etc., and shall establish the parameters to be used in the colleges' annual status reports on graduate education to the Provost.

THE GRADUATE COUNCIL

The Graduate Council is a subcommittee of the Graduate Policy and Curriculum Committee. Its functions are to:

Recommend minimum university standards for admission to graduate programs and for granting graduate degrees.

Propose reviews and make recommendations to the Vice President for Academic Affairs concerning proposed new graduate courses; review and make final decisions on graduate course revisions and course deletions.

Review and make recommendations concerning existing graduate programs at least every five years; annually to review graduate program annual reports and make recommendations on the current operating procedures of all graduate programs.

Review and make recommendations concerning appeals (by petition) from students for exceptions to University policies or admission decisions. Appeals normally begin at the Graduate Program level and exhaust all academic college channels before being heard by the Graduate Council. Only formal appeals of denials by the college or program will be heard by the Council.

GRADUATE PROGRAMS

Coordinator of Graduate Programs: TBA, Vice President for Research and Graduate Studies, ADM 243, Phone (407) 823-3778.

UNIVERSITY GRADUATE REGULATIONS

The following are minimum University-wide standards for the operation of graduate programs. Additional requirements for each graduate program are described in the individual college descriptions (see Arts & Sciences, Business Administration, Education, Engineering, Health & Public Affairs).

MASTER’S PROGRAMS

STUDENT’S RESPONSIBILITY

It is the student’s responsibility to keep informed of all rules, regulations, and procedures required for graduate studies. Graduate program regulations will not be waived or exceptions granted because a student pleads ignorance of the regulations or claims failure of the advisor to keep him or her informed.

EXCEPTION TO GRADUATE REGULATIONS

When unusual situations arise, petitions for exceptions to graduate regulations must be approved by the appropriate department and college. Only formal appeals of denials by the college or program will be heard by the Graduate Council. Appeals must be submitted in writing to the Vice President for Research and Graduate Studies who will submit them to the Graduate Council.

MASTER’S COMMITTEE OR ADVISOR

Appointment of Committee or Advisor

It is the responsibility of the appropriate academic dean of the college or the coordinator of the program granting the degree to (1) determine whether an advisory committee or an advisor will be used and (2) approve the necessary appointments. The Provost reserves the right to place a representative on any advisory committee or to appoint a co-advisor.

Advisory Committee

A student seeking a degree requiring a thesis or one permitting considerable flexibility in course work, or a combination of the two, shall have an advisory committee of at least three members with designation of a chair and/or thesis director being optional. This committee shall recommend to the Dean of the college the design of the student’s program of study; provide continual guidance for the student; and be the principal mechanism for the evaluation of the student’s thesis and performance in any general examinations.

PROGRAM OF STUDY

A total program of study is in essence a contract between the student and the degree program specifying all degree requirements. It must be established prior to enrollment in the second term of the full-time graduate student. For a graduate student carrying a reduced load, the establishment of a program of study may be delayed up to the registration for the ninth graduate semester hour. A copy of the Program of Study must be completed by a student and maintained within the college. Each student must file a program of study within the first 10 hours of graduate work.

UCF EMPLOYMENT

Normally the employment of full-time graduate students will be limited to a half-time work load (20 hours/week).

COURSE REQUIREMENTS

Course Loads

A full-time graduate student must take at least 6 hours each semester, with 12 semester hours being the maximum load. During a short summer term (A or B), full-time would be 3 hours and half-time would be 2 hours. However, in order to meet residency requirement, doctoral students must register for 9 hours in two contiguous terms.

During the terms a student is employed as a teaching assistant or registered for special courses such as thesis, dissertation research, or dissertation writing, the hours may vary. Students receiving veterans education benefits should refer to the sections of this catalog on VETERANS BENEFITS and OFFICE OF VETERANS’ AFFAIRS.
Total Hours Required
A minimum of 30 semester hours (combined course work and thesis) is required.

Thesis Degrees
At least 24 semester credits of course work must be earned exclusive of thesis.

Non-Thesis Degrees
At least 50 percent of the credits offered for the degree must be in a single field of concentration. A research report is required for this degree. Some colleges offer a 36 credit hour, course work only option, in which a thesis or research report is not required.

Enrollment Requirement
Master's level students who are engaged in thesis or research report related activity must be enrolled for at least 1 credit hour each semester during which this activity takes place. This requirement does not negate the requirement that all graduate students be enrolled the term they graduate. (See "Registration in Term of Graduation").

Language Requirements
Foreign language requirements shall be at the option of the individual departments or appropriate units consistent with their college regulations.

Directed Independent Studies Courses
A maximum of three courses may be taken as Independent Study, for a total of no more than 6 semester hours.

APPLICABLE CREDITS AND COURSES

Residence Credit
At least 21 semester credits must be UCF credits. Residence credits may be earned through enrollment in courses physically offered on the main campus; or at the UCF area campuses (Cocoa, Daytona Beach, South Orlando); or at geographical locations where UCF courses are being taught by regular UCF faculty members.

Credit By Examination
Examination credit may be utilized to satisfy program course requirements, but not credit hour requirements.

Transfer of Credit
Work taken before a student is given graduate status at UCF may be transferred into the student's program of study. Transfer course work may come from the following areas:

a. Work taken as a post-baccalaureate student at UCF.

b. Work taken at institutions within the State University System (SUS).

c. Work taken at other institutions not in the SUS.

d. Work taken while in graduate status in another major while at UCF.

There is no maximum of hours on transfer work taken while in graduate status in another major at UCF except for what the program will allow. No more than 9 semester hours of graduate credit may be transferred into the graduate program from UCF post-baccalaureate work or SUS work. Work taken at other institutions has a maximum limit of 6 semester hours. However, any combination of the above transfer hours (except UCF graduate work) cannot exceed 9 hours.

Institutions not in the State University System must be fully accredited by a regional accrediting association of the Commission on Accreditation (e.g., the Southern Association of Colleges and Schools).

In all instances, only grades of B or better can be transferred.

Correspondence courses are not acceptable toward a graduate program of study; however, extension or continuing education courses may be accepted.

Recency of Credit
Credit for courses completed more than seven years prior to the term in which a degree is earned may not be used toward degree requirements in all colleges except Engineering, which requires a college waiver for work over five years old.
EXAMINATIONS

Evaluation

All examination procedures and other evaluation of a student's progress shall be the province of the individual department or appropriate unit operating within the framework of the college (or colleges for interdisciplinary programs).

Comprehensive Examination

An end-of-program comprehensive (final) examination, oral or written, is required of all students. This examination may consist of a thesis defense or an examination of course work material, or both, at the option of the department.

COURSE LEVELS OF GRADUATE WORK

6000-Level Courses. A minimum of one-half of the credit hours (including thesis hours) of an individual's program of study must be in 6000-level courses, which are designed exclusively for graduate students. Exceptions to this requirement must be approved by the college Graduate Program Coordinator. Exception to this rule has been granted to the Computer Science, Mathematics, and Statistics programs.

Undergraduate registration in 6000-level courses is allowed only with prior approval by the college. Students must be within nine hours of graduation, have a minimum 3.0 GPA, and not register for more than a total of twelve hours.

5000-Level Courses. Courses at the 5000 level may be utilized toward satisfying the graduate degree requirements.

Other. Under special circumstances 4000-level courses may be applied toward a master's degree, but not in excess of 6 semester hours. Courses at the 3000 level or below shall not be utilized in a graduate program of study unless permission is obtained from the college prior to enrollment in the course.

ACADEMIC STANDARDS

GPA in Program of Study

A graduate student's GPA shall be calculated on only those courses specified on the individual's Program of Study filed with the Office of the Dean (not including required prerequisites).

A minimum of a 3.0 GPA in the specified graduate program of study is required to maintain graduate student status and for graduation.

In any term where the GPA drops below 3.0 in a program of study, a student will be changed to ACADEMIC PROVISIONAL status for a maximum of 9 semester hours. If the student has not attained an overall graduate GPA of 3.0 in the program of study at the end of the 9 semester hours, he will be reverted to POST-BACCALAUREATE status. (Students admitted on PROVISIONAL status are similarly given 9 semester hours to attain a 3.0 GPA.)

No graduate level courses with a grade of "D" are acceptable in a program of study. In addition, no 4000-level courses or transfer courses with a grade of "C" or lower are acceptable in the program of study.

Graduate students whose overall GPA falls below 2.0 will be reverted to post-baccalaureate status.

Thesis and Research Report Grades

For thesis and research report courses, satisfactory (S) or unsatisfactory (U) grade designations are used as temporary grades while the work is in progress.

Upon completion of thesis or research reports, a standard grade (A, B, C, etc.) will be awarded.

Maximum Hours of Unsatisfactory Grades

Unsatisfactory grades for graduate students consist of grades below "B" and unresolved "I" grades. A student may earn a maximum total of 6 semester hours of "C" grades in the program of study. The final program of study may not contain unresolved "I" grades. This does not imply that a course in which a student has received these grades cannot be repeated to provide a better grade. Both grades will be used in computing the GPA in the program of study. There is no forgiveness policy on graduate grades. Exceeding 6 semester hours of unsatisfactory grades in a specified graduate program of study is reason for immediate removal from graduate status.
Incomplete Grade

A grade "I" (incomplete) is assigned by the instructor when a student is unable to complete a course due to extenuating circumstances, and when all requirements can clearly be completed in a short time following the close of regular classes. The Registrar’s Office must be notified of the appropriate grade to be assigned no later than the date shown in the academic calendar of the term immediately following that in which the "I" was assigned. Failure to complete course requirements by that day may, at the discretion of the instructor, result in the assignment of an "F" grade. It is the student's responsibility to arrange with the instructor for the changing of the "I" grade to receive credit. Both the new grade and the letter "I" will appear on the student's permanent record. If the "I" grade is not changed by the established deadline, it becomes a part of the student's permanent record and no credit is given for the class. A student may register for a course in which an "I" was received, but no repeat "R" action will be made on the permanent record.

Review of Performance

The primary responsibility for monitoring performance standards rests with the degree program. However, the Office of the Dean may monitor a student's progress and may revert any student to post-baccalaureate status if performance standards as specified above are not maintained.

A degree program may revert any graduate student to post-baccalaureate status at any time when, in its judgment, the individual is deemed incapable of successfully performing at required standards of excellence.

If a student is reverted to post-baccalaureate status, reinstatement to graduate student status can occur only through a successful petition to the college by the student.

DEGREE APPLICATION PROCESS

Application for Degree

An Intent to Graduate form must be filed in the University Records Office by the end of the first week of the term of graduation. If the student does not graduate in that term, a new form must be filed at the beginning of the term of anticipated graduation. An extension can be obtained by telephoning the Records Office to have the old form updated if graduation is to be the following term.

Certification for Degree

The college of the degree program must certify through the Office of the Dean that all University and program of study requirements have been met.

Registration in Term of Graduation

A student must be registered in any term in which UCF faculty or administrative and professional time will be required (e.g., review of thesis or research report by faculty or editorial staff, or for examinations, etc.). Therefore, unless the graduate program certifies to the Office of the Registrar that no UCF resources will be utilized, a student must be registered in the term of graduation.

DOCTORAL PROGRAMS

UNIVERSITY ADMISSIONS STANDARDS

Admission to graduate status generally requires a minimum of a 3.0 GPA in the last 60 semester hours of undergraduate studies, or a score of at least 1000 on the combined verbal-quantitative portion of the appropriate admissions examination (GRE or GMAT), or a master's degree from an accredited institution and GRE or GMAT scores. Admission to graduate status does not constitute admission to a doctoral program. Meeting minimum University admission standards for graduate status may not satisfy doctoral program admission requirements. Additional or higher criteria may be required by the college or department.

EXAMINATIONS

To avoid confusion of terminology for examinations, all programs should use the following terms:

Qualifying Examination. This title is used for the examination (optional by programs) which the student takes prior to being admitted to Doctoral (or Specialist) status.
Candidacy Examination. This title is used for the examination which the student takes prior to admission to Candidacy Status. This is a written examination and is permanently filed in the student's permanent records.

Dissertation Proposal Examination. After passing the general Candidacy Examinations, the student will write and defend a Dissertation Proposal in an oral examination.

Dissertation Defense. This is an oral examination (or defense) on the dissertation.

DOCTORAL STATUS
Eligibility for admission to a doctoral program should be limited to superior students who have demonstrated intellectual ability, high achievement, and adequate preparation for advanced study and research in a chosen field. The decision to accept the student in a doctoral program is made by the graduate committee of the program area concerned and the Dean of the college on the basis of qualifying examinations and/or other criteria as specified by the individual program area.

PROGRAM OF STUDY
A program of study (i.e., required course work) will be specified by the student's program area and approved by the college.

COURSE REQUIREMENTS
The course requirements for a doctoral degree will consist of lectures, seminars, discussions, and independent study. Each program of study will include a minimum of 72 semester hours of graduate credit beyond the baccalaureate degree, 57 semester hours of which must be exclusive of the dissertation, with at least 6 semester hours of course work outside the student's program area and no more than 12 semester hours of Independent Study (including independent study hours counted towards a master's degree). The particular plan of study, which may vary from student to student, should be formulated jointly by the student and the appropriate committee or advisor in the program area.

ACADEMIC STANDARDS
Academic standards for doctoral and specialist students will meet or exceed those previously stated for masters programs.

SPECIAL DEGREE REQUIREMENTS
Each student may be expected to demonstrate an appropriate competency in a related area. The appropriate competency must be carefully defined by the program area and approved by the student's committee and the Dean of the college. Any course credit earned in attaining such a skill does not count toward minimum hours requirements.

RESIDENCY REQUIREMENTS
Each student is expected to complete two contiguous semesters in full-time graduate student status after acceptance into a doctoral program. Doctoral students must be registered a minimum of 9 semester hours during this time.

TRANSFER CREDIT
The number of transfer credit hours to be applied to the minimum course requirement for a doctoral degree at UCF will be up to 30 semester hours of credit and will be determined on a case-by-case basis by the graduate committee of the program area at the time the student is admitted to the program. The transfer hours from the master's degree or post-master's work will consist of a maximum of six hours of 4000-level work, no 3000-level courses, and no courses with grades of less than "B." The College of Engineering allows up to 36 credit hours, including up to 6 thesis credits, to be transferred from the masters program.

TIME LIMITATION
The student has seven years from the date of admission to the doctoral program to complete the dissertation.
CANDIDACY

Admission to Candidacy

Admission to candidacy will occur after the student has satisfied all general degree requirements, has passed the general Candidacy Examinations, and has successfully defended the Dissertation Proposal.

Candidacy Examinations. Candidacy examinations are mandatory for admission to candidacy and are to be held at the completion of the student's course work and prior to the dissertation stage. These examinations must be written and should be based on the student's plan of study. In the examination the student is expected to demonstrate substantial mastery of the general knowledge of the field, including theory, bibliography and research methodology. These written examinations shall be administered and supervised on campus, and will be set up by the program area in coordination with the college. All written original examination materials will be kept in a permanent file.

Dissertation Proposal Examination. After passing the general candidacy examinations, the student must develop a written dissertation proposal which will be defended by the student in an oral examination conducted by the dissertation committee.

Status as Candidate

Enrollment. The student must continue to enroll for at least one semester hour of research or dissertation credit each semester after attaining candidacy status until the oral defense of the dissertation has been made. Post-candidacy enrollment is allowable for a maximum of four (4) years subject to the seven (7) year time limitation.

NOTE: The post-candidacy enrollment requirement of at least one semester hour, while generally satisfactory to encourage reasonable progress towards the degree for students not in residence, shall be interpreted as requiring enrollment in at least three semester hours of research or dissertation credit each semester by those students who are in residence at UCF and placing substantial time demands on their major professors.

Dissertation Committee Composition. A committee, which will consist of a minimum of four faculty members (three from the college in which the program is located and one from outside that college) and must be approved by the Dean of the college. Program areas may further specify committee membership. All members should be in fields related to the dissertation topic. All members vote on acceptance or rejection of the dissertation. The dissertation must be approved by a majority of the committee.

Dissertation. Dissertations are required in all doctoral programs. An oral defense of the dissertation is required with copies of the approved dissertation being prepared in accordance with program requirements and sent to University Microfilms International (UMI). Final unbound copies of the dissertation will be submitted to the college before the specified deadline.

Dissertation Defense. The Dean of the college or his/her designee will normally attend all dissertation defenses.

Certification for Degree

Doctoral candidates who have completed all the requirements for the degree and have successfully completed the dissertation may request certification to that effect prior to the receipt of the degree. Such certification will be issued by the Dean of the college.

PUBLIC ACCESS

Students, faculty, staff, and other interested parties are strongly encouraged to attend thesis and dissertation final defense sessions. Notices providing date, time, and location of such meetings must be distributed to all academic departments. Faculty advisors and students should consult the Instructions for Preparing Theses and Dissertations for deadlines. These sessions are educational and informative for graduate students and provide an opportunity for colleagues to observe the work of their peers with students. At the discretion of the Chair of the Committee, questions may be invited from the audience. That part of the session involving committee discussion leading to a vote on the acceptance of the work will be closed. Sessions may be recessed briefly to excuse visitors and candidate before this stage begins.
STUDENT AFFAIRS

INTRODUCTION

The term "student affairs" is used collectively to refer to the Student Affairs Division and its many functional departments responsible for the administration and management of programs, services, facilities, and activities designed to support the educational mission of the University. The Division of Student Affairs, exist primarily to enhance the teaching and learning process through its many programs and services. The Division, headed by a Vice President for Student Affairs, administers programs involving orientation, personal counseling, testing, housing, health services, international student services, recreational services, career planning and placement, student organizations, veterans' affairs, and other special activities. Students are invited to consult the staff of Student Affairs concerning any aspect of campus life.

Personal development may be enhanced through informed, experienced, and dedicated participation in University and community activities. Frequently, activities are referred to as "extracurricular," but at the University of Central Florida student activities are regarded as a part of the total educational program—a supplement to the individual student's academic program. The University sponsors a variety of cultural and entertainment programs which contribute to the student's social, cultural, recreational, and academic development. Students can become better acquainted with fellow students and faculty members through participation in student activities. The University provides ample opportunity to become a member of occupational, professional, social, and honorary organizations.

OFFICE OF THE DEAN OF STUDENTS

The Office of the Dean of Students is the primary source for students seeking information on non-academic areas of the University. The office staff strives to introduce students to educational opportunities designed to provide personal, social, and academic growth outside the classroom. Additionally, the Deans supervise the judicial affairs process as well as counsel students confronted with a variety of difficulties, referring students for specialized professional services as necessary.

The Division of Student Affairs annually publishes the student handbook, The Golden Rule, which contains more detailed information on student life. Copies may be obtained in the Student Affairs Suite, Room 282, Administration Building. Students are urged to take advantage of the many services and educational programs available through the Dean of Students Office and the Division.

ACADEMIC BEHAVIOR STANDARDS

The University of Central Florida is committed to a policy of honesty in academic affairs. Examples of conduct for which students may be subject to academic and/or disciplinary penalties including expulsion are:

- Cheating whereby non-permissible written, visual or oral assistance including that obtained from another student is utilized on examinations, course assignments or projects. The unauthorized possession or use of examination or course related material may also constitute cheating.
- Plagiarism whereby another's work is deliberately used/or appropriated without any indication of the source, thereby attempting to convey the impression that such work is the student's own. Any student failing to properly credit ideas or materials taken from another has plagiarized.

NOTE: A student who has assisted another in any of the aforementioned breach of standards shall be considered equally culpable.

In cases of cheating or plagiarism, the instructor may take appropriate academic action ranging from loss of credit for a specific assignment, examination or project to removal from the course with a grade of "F". Additionally, the instructor may request judicial action through the Dean of Students Office as outlined in The Golden Rule.

CONFIDENTIALITY OF STUDENT RECORDS

The procedures for the confidentiality of student records are based on state regulations and the federal Family Educational Rights and Privacy Act of 1974. Students who have questions or specific requests concerning the confidentiality of records should contact the
Office of the Dean of Students. Details of the University practices for confidentiality are presented in *The Golden Rule*.

**STUDENT GOVERNMENT**

The purpose of Student Government is to provide a system whereby students can effect progressive changes that bring about improvements in campus life. Student Government also endeavors to promote better communication and understanding among the UCF family and to provide certain services which impact student life. All enrolled students at UCF campuses, both graduate and undergraduate, are considered active members of Student Government who are allowed to voice their opinions through senate representatives. Funds available from the Activity and Service Fee paid by students are used to provide numerous activities and services to students to support their academic endeavors at UCF. SG is effective at lobbying for the rights of students at local, state, and national levels.

The democratic processes of SG is grounded in the fundamental structure of the U.S. Government. The executive, legislative, and judicial branches have representatives from each college at UCF. The structure of SG provides an atmosphere that reflects the democratic processes of the real world thus providing students an opportunity to become educated and experienced in practical situations.

Some of the services made available to students and funded by student activity and service fees are: legal services, computer lab, discount entertainment tickets, free local telephones, vehicles for clubs and organizations, and providing funding for recreational services as well as campus programming.

Students interested in working with SG may obtain information from the SG offices located in the Student Center.

**STUDENT LEGAL SERVICES**

Student Legal Services provides students with advice and consultation including court representation in selected areas of law such as landlord/tenant, consumer, simple wills, and non-criminal traffic. Each eligible student (an undergraduate enrolled in six UCF hours or graduate enrolled in four UCF hours) is entitled to consult with the Program Attorney about any legal matter not excluded by program guidelines, free of charge. Students in need of legal services should contact Student Legal Services at (407) 823-2538, or Student Center Room 210. This service is by appointment only, and no legal advice is given over the phone.

**CLASSROOM RESPONSIBILITY**

Students are responsible for maintaining classroom decorum appropriate to the educational environment. When the conduct of a student or group of students varies from acceptable standards and becomes disruptive to normal classroom procedures, the instructor has the authority to remove the offending party from the room.

**STUDENT CONDUCT**

Students are subject to federal, state and local laws and ordinances as well as regulations prescribed by the University of Central Florida and the Florida Board of Regents. The breach or violations of any of these laws or regulations may result in judicial action. Detailed conduct regulations and procedures are presented in the student handbook, *The Golden Rule*.

A person applying for admission to UCF who has been charged with a criminal offense may have the circumstances of the case reviewed by the appropriate Student Affairs administrator to consider eligibility for admission.

**SERVICES**

**UNIVERSITY COUNSELING AND TESTING CENTER**

The University Counseling and Testing Center (Recreational Services Building, Room 203) offers a professional staff of psychologists and counselors to assist students through educational, vocational, and career counseling; and personal, social, relationship, marriage, and family counseling.

The Center presents special programs throughout the year, including training in relaxation and coping skills, self-hypnosis training, stress reduction training, and group psychotherapy. All Center services are free to UCF students.
CAREER RESOURCE CENTER - CAREER PLANNING AND PLACEMENT

The Career Planning and Placement Office, located in Suite 124 of the Administration Building, is a career resource center for all University of Central Florida students and alumni. The Center provides individualized counseling about current and projected trends in the job market. Services also include: resume advice and critiquing, CHOICES—(computerized career guidance), career planning mini-classes, resume referrals at employers' request, on-campus interviews by employers, lists of full-time and part-time job vacancies, interviewing tips, and help in organizing a job search.

The Career Resource Center provides information about a broad cross section of employers.

To make the most effective use of the Placement Service, students are urged to register with the office two semesters prior to graduation.

Further information may be obtained by visiting the Center or telephoning (407) 823-2361.

HOUSING

Regularly enrolled single students paying registration fees for a minimum of nine semester hours may apply for assignment to University residential units. Currently, there are seven residence halls on the campus of the University of Central Florida. The total combined design capacity of the seven halls is 867 spaces. Because of the limited amount of space in University housing facilities, the University does not require any student to live on campus. There are no on-campus accommodations for married students.

Priority for assignment is given to incoming Freshmen who will occupy approximately 50 percent of the University's housing capacity and current residents who will occupy most of the remaining spaces. Applicants should CAREFULLY READ the application before submitting it to the Housing Office along with a Letter of Acceptance to the University and the $150 prepayment.

OFF-CAMPUS HOUSING

Within two miles of the UCF campus are numerous apartments and duplex communities in addition to a privately-owned residence hall complex. Sidewalks, bike paths, and Tri-County bus service connect many of these facilities with the University. Students living off-campus are invited to participate in one of the University meal plans.

STUDENT HEALTH SERVICES (SHC)

Recognizing the importance of lifestyle in health and the prevention of disease, the Student Health Service combines quality care for illness and accidents with an aggressive health education and lifestyle enhancement program. A Student Wellness Advocate Team enhances the health promotion efforts of the Student Health Center.

The Student Health Center (SHC) is staffed by medical doctors, certified nurse practitioners, physician's assistants, Registered Nurses, and a full complement of other medical support personnel. Full referral service to Orlando area specialists is established. Charges incurred outside the Student Health Center are the responsibility of the student. A variety of laboratory and x-ray tests are available at the Student Health Center. Testing for HIV (AIDS virus) is not done in our laboratory. Referral arrangements may be made for anonymous AIDS testing by contacting the Chief Nurse at the Student Health Center at (407) 823-2701, ext. 5275.

When the Student Health Center is not open, students can use the "Hot Line" phones at the front and back doors of the building to obtain help for urgent needs.

By Board of Regents regulation, each student must demonstrate Rubella and Rubella immunity prior to registration. The Student Health Center cannot provide immunization services to meet this requirement. It is a pre-registration requirement and prospective students are not eligible for services at the SHC. A routine health history form is also completed prior to registration, and this information is used for background purposes in providing medical care services. Medical records are held in the strictest confidence.

Each health fee paying student is entitled to the benefits outlined in the SHC brochure; faculty and staff can only be seen on an emergency basis, and then for a fee (except Worker
Compensation cases). Optional health and accident insurance may also be purchased by contacting the office of Student Affairs or Student Government (please note optional health and accident insurance is not part of the Student Health Center program and will provide a variety of coverages for health needs beyond the scope of Student Health Services). Blood drives are held several times annually by the Central Florida Blood Bank. Students, faculty, and staff are eligible for credits from the blood bank upon demonstrating need.

STUDENT CENTER
Student life at the University of Central Florida emanates from the Student Center. As the focal point for campus activities, the Student Center serves students, faculty, staff, patrons, alumni, and guests with its many programs, services, and facilities. The Student Center is funded through Activity and Service fees as allocated by Student Government.

Several student organizations flourish in the Student Center. The Campus Activities Board sponsors a wide variety of educational and entertaining programs for the UCF campus community. The Student Government Association provides for active leadership experiences through the Senate and committees working for student rights. The Orientation Team coordinates the orientation programs. Greek Council promotes membership in, and operation of, Fraternities and Sororities.

The Student Center provides other services for students as well. The Game Room offers billiards, ping pong and video games. Student Government Association operates a Macintosh computer lab. There are four food services facilities, an information desk, conference and meeting rooms, and the Student Center Auditorium. Reservations for university facilities can be made at the Student Center Information Desk. The Student Center Director is located in SC 198. For more information regarding the Student Center, call 823-2611.

STUDENT ORGANIZATIONS
Student Organizations play a vital role in enhancing student life at the University of Central Florida. Academic, pre-professional, honorary, military, minority/international, religious, service, social, special interest, and sports are the ten categories of the over 150 organizations available. The Student Organizations Office publishes a Student Organization Handbook listing all of the organizations at UCF and their purposes.

For further information regarding clubs and organizations, call (407) 823-5107 or visit the Student Organizations Office, Student Center, Room 215.

RECREATIONAL SERVICES
The Office of Recreational Services offers a wide variety of sports and recreational opportunities to the students of UCF and their immediate families and some opportunities to UCF faculty, staff, and the surrounding community.

These opportunities include intramural sports leagues and tournaments, organized recreation and fitness programs, unstructured open recreation, sports-related special events, screen printing and racquet stringing. Equipment may be checked out for use on and off campus.

The Office of Recreational Services is located next to the pool. The phone number is (407) 823-2408.

OFFICE OF STUDENT INFORMATION AND EVENING/WEEKEND STUDENT SERVICES
The Office of Student Information and Evening/Weekend Student Services is a one-stop communications network and information center committed to gathering and disseminating information to students. The office is also responsible for the administrative supervision of student affairs functions for all University students taking evening and weekend classes and for the administration and programming of the 24-hour Student Information Buzzline, (407) 823-5479. The office phone number is: (407) 823-3111.

Information Booth & Evening Student Services
Monday through Thursday—
 second floor Administration Building,
 Education Building Lobby, and College of
 Business Information Booth
 Friday (same locations as above)

9:00 a.m. to 9:00 p.m.

9:00 a.m. to 5:00 p.m.
Weekend Student Services
10:00 a.m. to 2:00 p.m.
2:00 p.m. to 5:00 p.m.

Saturday at SG Kiosk (407) 823-2060
Sunday at SG Kiosk (407) 823-2060

INTERNATIONAL STUDENT SERVICES

The International Student Office provides services for all international students and resident aliens. Its central role is to assist International students and scholars attending UCF to adjust to the changing lifestyle in order to achieve their educational goals and gain a meaningful living experience in the United States. A wide range of special services is provided to the UCF international community, such as issuance of immigration forms 1-20 A/B and IAP-66, assistance in locating off-campus apartments, counseling on personal, financial, academic, and cross-cultural communication matters, advice in immigration and tax matters, promotion of social activities, and home visits in Central Florida. Further information may be obtained from the International Office, Administration Building, Room 145D, or by calling (407) 823-2337.

STUDENT DISABILITY SERVICES

Student Disability Services provides information and orientation to campus facilities and services, assistance with classroom accommodations, assistance with course registration, handicapped parking decals, counseling, and referral to campus and community services for students with disabilities.

Services are available to students whose disabilities include, but are not limited to, hearing impairment, manual dexterity impairment, mobility impairment, specific learning disability (such as dyslexia), speech impairment, visual impairment, or other disabilities which require administrative or academic adjustments.

If a student needs special admission consideration based on a disability, the student should answer this question on the Application for Admission form and send the requested official documentation to the Graduate Admissions Office. Students who have a disability which may require special assistance also are requested to voluntarily contact the Office of Student Disability Services. All information is confidential and will be used only to assist the student.

Information and assistance are available for faculty members working with students who have disabilities.

A Telecommunication Device for the Deaf (TDD) is available for hearing-impaired or speech-impaired persons with TDD’s to contact the University (phone (407) 823-2116 TDD calls ONLY).

Further information may be obtained from the Student Disability Services Office, Administration Building Suite 282, Phone (407) 823-2371.

CREATIVE SCHOOL FOR CHILDREN

The Creative School for Children provides an educational program, including kindergarten—first grade, for children two through five years old. The daily program is planned and conducted by Florida-certified teachers. The program provides a wide variety of experiences in art, music, language, motor skills, science, math, social studies, perceptual development, socialization, and self-discovery. Planned and spontaneous field trips and special family programs are a part of the yearly schedule. Experiences in observation and training in academic areas are also made available to University students. Opportunities for educational research are available to University faculty and graduate students.

A Flex Time program is provided for children three through twelve years old. This program provides educational activities for children who need part time schedules. This program is open evenings Monday – Thursday.

The school conducts a Summer Day Camp for elementary school children during Summer “B” semester.

For further information, call the Creative School for Children, (407) 823-2726.

OFFICE OF VETERANS’ AFFAIRS

The Office of Veterans’ Affairs (OVA) is a center for all veterans, including students who are using VA educational benefits to further their education. The office, located in room 132 of the Student Center, has a professional staff augmented by student veterans to assist in
providing information concerning entitlements, filing claims to the Department of Veterans Affairs (DVA); and certifying enrollment at the University. The office also provides counseling for personal and academic concerns, tutorial assistance, and referral to various community agencies. Veterans and eligible dependents must be certified through the Office of Veterans' Affairs to receive DVA educational benefits. The office monitors the academic progress of all those receiving DVA educational benefits.

All veterans and dependents are urged to contact the office at an early stage in the process of applying for admission; especially Post-Baccalaureate students and students pursuing a Florida Teachers Certification.

VETERANS' BENEFITS

Veteran and eligible dependents eligible to receive VA benefits must make initial contact with the Veterans Certification Office. To maintain eligibility for DVA education benefits, students must adhere to the policies and procedures contained in the UCF "Student Veteran Handbook" and DVA rules and regulations. A copy of the "Student Veteran Handbook" can be obtained at the Office of Veterans' Affairs.

Students eligible for DVA education benefits, may also be eligible for a VA Deferral of Tuition and Fees. This deferment is authorized once each academic year, beginning with the Fall semester. The VA Deferral due date is published in the Class Schedule each semester. STUDENTS ELIGIBLE FOR FINANCIAL AID ADEQUATE TO COVER TUITION AND FEES ARE NOT ELIGIBLE FOR THIS DEFERMENT.

Veterans and eligible dependents who are fully accepted in a graduate degree program, or post-baccalaureate students pursuing a Florida Teaching Certificate, are required to carry 6 semester hours in courses numbered 5000 and above for full-time benefits; 4-5 semester hours in courses numbered 5000 and above for three-quarter time benefits; and 3 semester hours in courses numbered 5000 and above for half-time benefits. Students may take undergraduate courses, if a required part of the program, but when taken a different method is used to compute training time. Contact the Office of Veterans Affairs for clarification and guidance.

Students who are classified as post-baccalaureate, and working towards a graduate degree, must carry at least twelve (12) semester hours for full VA benefits, 9-11 semester hours for three-fourths, and 6-8 semester hours for one-half. Five (5) semester hours or less will be reimbursed at the cost of tuition and fees or quarter time depending on DVA Chapter. Veterans and eligible dependents who are pursuing course work while in a post-baccalaureate status can only receive benefits for courses which will be accepted for transfer into a graduate program when they are given graduate status (normally 9 semester hours). Students pursuing CPA or Real Estate examination review, or other special non-degree programs will receive benefits for all courses required by their program of study.

In order to receive veterans' educational benefits, students must maintain satisfactory academic progress, and conduct. Accordingly, benefits will be terminated for individuals who are disqualified, excluded, suspended or expelled from the University. If reinstated by the University and College of major following disqualification, exclusion, suspension or expulsion, the veteran or eligible dependent must contact the Office of Veterans' Affairs to have their DVA educational benefits re-started. Graduate students will continue to receive education benefits as long as the GPA earned each semester meets the College of major requirement (normally a 3.0). Students who fail to maintain graduate standing and are reverted to Post-baccalaureate status can only be certified for courses required by the program and needed to matriculate.
COLLEGE OF ARTS AND SCIENCES

The College of Arts and Sciences consists of seventeen academic departments, twelve of which offer graduate degrees: Biology, Chemistry, Communication, Computer Science, English, History, Mathematics, Physics, Political Science, Psychology, Sociology and Anthropology, and Statistics. The specific programs for the various degrees are listed below.

COLLEGE ADMINISTRATION

E. P. Sheridan .................................................. Dean
K. L. Seidel .................................................... Associate Dean
B. B. Morgan, Jr. .............................................. Associate Dean
B. A. Whisler .................................................. Assistant Dean
D. Velez ........................................................ Assistant Dean

ADVICEMENT

Graduate Office of Academic Support and Information Services (Grad - OASIS)

The Graduate Office of Academic Support and Information Services (Grad - OASIS) assists students in the College of Arts and Sciences in matters concerning College and University requirements and procedures. Admission materials, acceptance notification, program of study, graduate committee memberships, thesis and dissertation approvals, fellowship and financial aid information, waiver and petition forms, graduation certifications, etc., are processed through this office for all graduate students in the college. Questions concerning University and College graduate policies affecting Arts and Sciences majors should be directed to the Grad-OASIS staff in HFA-202 or by calling (407) 823-0144.

Doctor of Philosophy

Computer Science
Physics
Psychology (Human Factors)

Master of Arts

Communication
English
History
Political Science
Sociology, Applied

Master of Science

Biology
Chemistry, Industrial
Computer Science
Mathematical Science
Physics
Psychology (Clinical and Industrial/Organizational)
Statistics

GENERAL REQUIREMENTS

The course work and research requirements of the programs are designed with the intent of offering students the opportunity for educational advancement and professional training. A research report, thesis, or dissertation is required in most of the programs and is offered as an option in others.

The General Graduate Record Examination is required for graduate status in all programs even if a student is acceptable on the basis of a grade point average.

Each department is headed by a chair who reports to the dean of the college. A graduate program coordinator is designated for each program and is the key contact on questions of admission and degree requirements. Consult the individual degree program listings for descriptions of requirements and courses offered by each program.
Admission

Deadline for all application material for fall admission is February 15th. If accepted, applicants will be notified in March.

The Graduate Record Examination (GRE) is required of all graduate students. Minimal requirements for consideration for graduate status in any of the M.S. programs in Biology are a grade point average (GPA) of at least 3.0 for the last 60 semester hours of undergraduate study or a score of at least 1000 on the combined quantitative-verbal sections of the GRE. In addition, the department requires three letters of recommendation and a written statement of past experience and research, area of interest, and immediate and long-range goals. Personal interviews are helpful but not required. The department requires international students and students whose native language is not English to have a minimum TOEFL score of 550.

Applicants who fail to meet either the minimum program GPA or GRE requirement may occasionally be accepted if there is other convincing evidence of potential for high achievement and success. Applicants failing to satisfy minimum program criteria should submit a GRE Subject (Advanced) Biology Test score at or above the 50th percentile. In no case will GRE scores (verbal, quantitative, or advanced) older than five years be accepted.

Applicants need not have an undergraduate degree in a biological science but are expected to have the equivalent of 16 semester hours credit in the biological sciences, including at least 3 credit hours each in botany, and zoology; plus organic chemistry with laboratory; and basic college mathematics and statistics. After acceptance, minor deficiencies can be remedied by enrollment at the first opportunity in an appropriate course. Students receiving teaching or research assistantships are expected to maintain a minimum of 6 semester hours of approved graduate credit every term of departmental support.

Examinations

A comprehensive examination is required of all students in the program. The comprehensive exam must be taken no later than the semester preceding that of thesis defense. If a student fails the comprehensive examination, a minimum of four weeks must elapse before re-examination. The comprehensive exam may be taken a maximum of two times. In addition, an oral thesis defense is required in the thesis option. A minimum of four weeks must elapse between the comprehensive and thesis defense examinations.
Programs in Biology

The Master of Science degree in Biology is offered with the following areas of specialization: biology, botany, limnology, conservation biology, and zoology. There are two options available: (1) a thesis option which includes a minimum of 30 semester hours of courses; and (2) a non-thesis option which includes a minimum of 40 semester hours of courses.

Master of Science Degree Requirements—Biology

THESIS OPTION

A student selecting the biology thesis option will take the following courses:

**Group A** (three of the six courses) 12-14 Semester Hours

- PCB 5046C Advanced Ecology 5 hours
- PCB 5675C Evolutionary Biology 4 hours
  or
- BOT 5705C Plant Biosystematics 4 hours
- PCB 6585C Advanced Genetics 5 hours
- PCB 6721 Comparative Animal Physiology 3 hours
  or
- PCB 6365 Environmental Physiology 3 hours

**Group B** (both courses) 8 Semester Hours

- BSC 6938 Biology Seminar 2 hours
- BSC 6971 Thesis 6 hours

**Group C**

Restricted electives acceptable to the student's graduate committee.

Total Minimum Semester Hours Required: 30

NON-THESIS OPTION

A student selecting the biology non-thesis option will take the following courses:

**Group A** (three of the six courses) 12-14 Semester Hours

- PCB 5046C Advanced Ecology 5 hours
- PCB 5675C Evolutionary Biology 4 hours
  or
- BOT 5705C Plant Biosystematics 4 hours
- PCB 6585C Advanced Genetics 5 hours
- PCB 6721 Comparative Animal Physiology 3 hours
  or
- PCB 6365 Environmental Physiology 3 hours

**Group B** (both courses) 4 Semester Hours

- BSC 6909 Research Report 2 hours
- BSC 6938 Biology Seminar 2 hours

**Group C** 22-24 Semester Hours

Restricted electives acceptable to the student's graduate advisor.

Total Minimum Semester Hours Required: 40

CHEMISTRY, INDUSTRIAL

W. W. McGee, Ph.D. ............................................................ Professor
D.H. Miles, Ph.D. ............................................................... Professor
Admission

The Graduate Record Examination (GRE) is required of all graduate students. Minimal requirements for admission include a grade point average (GPA) of 3.0 for the last 60 semester hours of undergraduate study or a score of at least 1000 on the combined quantitative-verbal sections of the General (Aptitude) test of the GRE. In addition, the departmental evaluation relies on letters of recommendation. Proficiency examinations are given to all incoming graduate students. The results of these exams are used in planning the student's program of study. Deficiencies may require remedial course work.

Program in Industrial Chemistry

The Master of Science degree at the University of Central Florida is aimed particularly at preparing students for careers in the chemical industry, or in related fields which utilize chemical processing techniques. The curriculum is designed to provide a broad overall perspective of the industry and an awareness of economic and engineering considerations while placing the primary emphasis upon chemistry and the application of chemical principles to the development of products and processes.

Admission

The Graduate Record Examination is required of all graduate students. Minimal requirements for admission are a grade point average (GPA) of 3.0 for the last 60 semester hours of undergraduate study and a score of at least 1000 on the verbal-quantitative sections of the General (Aptitude) test of the GRE. Admission is restricted to fall semester only. Students must have graduate status to be eligible for 6000-level communication courses.

Programs in Communication

The following curriculum emphasizes communication research. The courses prepare students for research positions, some teaching positions, and entry to most Ph.D. programs in the field.

Master of Arts Degree Requirements—Communication

Students are required to complete 34 semester hours of work, including a thesis. Students must complete a basic core of courses in theory and methodology, and must successfully pass the program’s comprehensive examination.

The curriculum for the master’s degree includes the following courses:

Admission

Admission is based on satisfying the regular University requirements and department requirements. The minimum University requirements consist either of the following:

a. A baccalaureate degree from an accredited institution and an earned grade point average (GPA) of at least 3.0 in the last two years of undergraduate work or a combined score of 1000 or more on the quantitative-verbal sections of the General (Aptitude) Test of the Graduate Record Examination (GRE).

b. A previous graduate degree from an accredited institution.

c. The general GRE must be taken; regardless of satisfying (a) or (b).

The minimum department requirements are the following:

a. Each student is required to submit a score on the Subject (Advanced) GRE in Computer Science that is not more than two years old at the time of admission to regular graduate status.

b. An undergraduate degree in computer science is desirable, but not required. Applicants without a strong undergraduate background in computer science will be required to demonstrate an understanding of the material covered in the following courses:

- C01A 4150 Introduction to Computer Architecture
- COP 4710 Databases
- COP 4500 Numerical Calculus
- COP 4020 Programming Languages II
- COP 4600 Programming Systems
- COP 4210 Discrete Computational Structures

The student may choose to demonstrate the knowledge of these courses by scoring well on the Subject (Advanced) GRE in Computer Science. It is estimated that more than 85% of this GRE deals directly with the material covered in these courses.

c. International students must obtain a minimum score of 550 on the TOEFL exam.
Admission to Ph.D. Program

Admission to the Ph.D. program in Computer Science is formalized by the University upon the recommendation of the Computer Science Graduate Committee. In addition to satisfying the regular University requirements, the department requires that the applicant pass the Ph.D. Qualifying Examination and find a qualified faculty member in Computer Science willing to chair the student’s advisory committee. Any transfer credits toward requirements for the Ph.D. program must be approved by the University and the department. Normally, these credits must correspond to equivalent requirements and performance levels expected for the program.

*NOTE: Meeting minimum University admission standards for graduate status may not satisfy doctoral program admission requirements. Additional or higher criteria may be required.

Programs in Computer Science

The Department of Computer Science offers a Master of Science and a Doctor of Philosophy degree in Computer Science. Students receive a broad background in the areas of programming systems and languages, computer architecture, and computer science theory before specializing in a research area.

Research interests of the faculty include computer architecture, VLSI systems, parallel processing, design and analysis of algorithms, graph theory, microprocessors, programming languages, operating systems, natural language processing, computer vision, machine learning, data base management systems, computer graphics, interactive graphic systems of instruction, distributed processing/networking and computational complexity.

The department houses the Center for Parallel Computation, directed by Dr. N. Deo, containing a BBN Butterfly 64 processor machine and a DECmpp 12000.

9 Semester Hours

**RESTRICTED ELECTIVES**

Restricted electives must include two 6000-level Computer Science courses taught by the Department of Computer Science. These two 6000-level courses are exclusive of independent study and may not include any courses for which the grade received is below a B. Additional credits will normally be taken from 5000- and 6000-level Computer Science courses. Approval may be granted for at most six credits to be taken from graduate courses outside Computer Science.

Three options are available. The Research Survey option is a 36 hour program allowing at most 6 hours of independent study and requires that the student write a comprehensive literature survey paper, while enrolled in 3 hours of research on a current topic of interest in Computer Science. The Research Project and Research Thesis options are both 30 hour programs exclusive of independent study. The research project normally entails the implementation and description of a substantial piece of software, while the thesis requires the analysis and description of a much more theoretical endeavor. These tasks are intended to span two semesters; and students are to enroll in 3 credits of research each semester.
Regardless of the electives or option chosen, the plan of the student must satisfy the following:

- The plan of study must contain 30-36 semester hours depending upon the option selected.
- Grades received in these hours must be letter grades of A, B, or C with no more than 6 hours of C work and a grade point average of 3.0 or better.
- The plan of study can contain no courses below the 5000-level.
- The plan of study can contain no more than 6 hours (or two courses) of independent study in the Research Survey option and none in the other options.
- No course may be applied toward the degree which was completed more than 7 years prior to the date of graduation.
- Each student must also complete a research survey (exactly 3 credits), a research project or thesis (exactly 6 credits). The student must enroll for at least one hour in the semester graduation is to occur.

**SAMPLE PLANS OF STUDY**

Student's plan of study can be designed to emphasize any of a number of areas within Computer Science. The following are some sample plans of study. They do not include all areas of emphasis nor are they fixed, but they are included here to show the flexibility of the Master of Science program.

Doctor of Philosophy Degree Requirements—Computer Science

PH.D. QUALIFYING EXAMINATION

The Qualifying Examination is taken only when the student has obtained regular graduate status in Computer Science. The purpose of Phase I of this examination is to determine the student’s knowledge in important areas of computer science architecture, languages, theory—and, in Phase II, to assess the student’s potential to pursue an area of specialization and research.

Phase I (Written Exam)

Phase I of the Qualifying Examination consists of a written examination in the following three areas:

1. Architecture: CDA 5106 Advanced Computer Architecture
2. Languages: COT 5310 Formal Languages and Automata Theory
3. Theory: COT 5405 Design and Analysis of Algorithms

This phase will be offered twice per year in September and January, and each student will be allowed at most two attempts, in two consecutive offerings, to pass this phase.

Phase II (Committee Exam)

Upon successful completion of Phase I, the student must identify an area of study for his Ph.D. research and an advisory committee chaired by a Computer Science graduate faculty member. A tentative plan of study approved by the student’s advisory committee should be filed. The advisory committee will then examine the student to ascertain the student’s ability to conduct independent research. This examination will be a narrowly focused examination in and around the area of the student’s specialty. The format and length of the examination will be determined by the student’s committee (e.g., may be oral and/or written and may involve surveying literature and submitting critical reviews of selected research articles). Each student will be allowed at most two attempts to pass Phase II. However, the student is expected to pass Phase II within no more than one year from passing Phase I.

Upon successful completion of the Qualifying Examination, the student will be admitted to the Ph.D. program.

PLAN OF STUDY

The Ph.D. plan of study will consist of a minimum of fifteen (15) semester hours of Ph.D. dissertation (CAP, CDA, COP or COT 7980) credits and at least fifty-seven (57) semester hours of non-dissertation graduate (5000-level or above) credits. The latter must include at least fifteen semester hours of advanced (6000-level) computer science courses, exclusive of Special Topics courses, and six (6) graduate hours from outside computer science. The remaining credits are normally selected from computer science regularly scheduled courses, Special Topics courses, seminar courses and Independent Study. No more than twelve (12) credits of Independent Study can be used, and at least half the program must be 6000-level or above.
RESEARCH COMMITTEE
The formation of a research committee should occur as soon as the student has identified a potential research area. This committee will consist of no more than five faculty members, three of whom must be Computer Science graduate faculty and at least one of whom must be from outside the College of Arts and Sciences.

CANDIDACY EXAMINATION
The Candidacy Examination will consist of two parts: (1) a four-hour written examination in the specialty area as defined by the plan of study, to be designed by the chair in consultation with the members of the research committee, and (2) a presentation of a written doctoral research prospectus to the committee with an oral review of the proposal.

RESIDENCE REQUIREMENT
Students in the Ph.D. program are normally expected to be full-time students. Students must spend at least two consecutive semesters as a full-time student at UCF (that is, registered for a minimum of nine hours each of the two terms).

TIME LIMITATION
The student has seven years from the beginning of regular graduate status in the Ph.D. program to complete all requirements for the Ph.D. degree.

SPECIAL DEGREE REQUIREMENTS
Each student is expected to demonstrate competency in an area relevant to his research. This must be carefully defined by the student’s committee and approved by the Computer Science Graduate Committee and Office of the Dean.

DISSERTATION AND ORAL DEFENSE
Each student must write a dissertation on his research which describes a significant original contribution to the field of computer science. The oral defense of the dissertation is administered by the research committee which makes a critical inquiry into the work reported in the dissertation and into the areas of knowledge that are immediately relevant to the research. All members vote on acceptance or rejection of the dissertation. The dissertation must be approved by a majority of the committee. Upon approval, the final dissertation must be deposited in the department and in triplicate to the Office of the Dean before the final deadline of the term in which the student plans to graduate.

Admission

Minimum requirements for admission are a grade point average (GPA) of 3.0 for the last 60 semester credit hours earned as an undergraduate and a total score of 1000 on the aptitude section of the Graduate Record Examination (GRE). International students must score at least 575 on the Test of English as a Foreign Language (TOEFL).

Other criteria for admission are a baccalaureate degree in English or its equivalent, at least a year’s study of a foreign language, and approval by the Graduate Committee of the Department of English. Students are expected to have read widely in British and American literature, to be highly competent in writing, and to be familiar with the vocabularies of literary criticism and grammar.

An applicant for the concentration in creative writing should submit a portfolio of poetry, drama, or fiction.

A student with a baccalaureate degree in a subject other than English may qualify for Graduate status by presenting a score of at least 540 on the Advanced GRE Test in Literature or completing survey courses in British and American literature.

Applicants are urged to apply for the program and take the GRE before April 1 for the subsequent fall term and before November 1 for the spring term.

Master of Arts Degree Requirements—

English/Literature:

Each student must complete at least 33 hours, including one course in linguistics and five core courses. Near the end of the degree program, each candidate will write a comprehensive examination based on a prescribed reading list and a) write a thesis or b) take an oral examination on a specific area of literature.

ELECTIVES

12 Hours

COMPREHENSIVE EXAMINATION

SPECIALIZATION — Choose A or B

A. THESIS OPTION:

The candidate will complete a formal thesis on a topic selected in consultation with an advisory committee and will meet both departmental and university requirements for the thesis. The student will enroll at least once in LIT 6971, Thesis, for three hours of credit.

B. EXTENDED RESEARCH AND ORAL EXAMINATION OPTION:

The candidate will enroll in LIT 6908, Directed Independent Study, and read extensively in an area of specialty—English Romantic poetry, for example. The student will then complete a formal oral examination on the area of expertise.

TOTAL MINIMUM HOURS

33 hours

English/Creative Writing:

Each student must complete at least 33 hours, including six hours of writing workshops. Near the end of the degree program, each candidate will write a comprehensive examination based on a prescribed reading list and will write a creative thesis.

Admission

The Graduate Record Examination (GRE) is required of all graduate students. Minimal requirements for admission to the program are a grade point average (GPA) of 3.0 for the last 60 semester hours of undergraduate study and a score of at least 500 on the verbal section of the General (Aptitude) test of the Graduate Record Examination (GRE).

Program in History

The Master of Arts in History is aimed at providing for the academic growth of secondary school teachers, preparing students for Ph.D. work, and providing graduate courses for individuals who wish to enrich their intellectual lives. Departmental areas of research include American cultural and social history, local history, the American frontier, twentieth-century mass movements, and Nazism and anti-Semitism in Central Europe, as well as many other areas.

Master of Arts Degree Requirements—History

The Master of Arts in History requires 36 semester hours with no graduate credit given for any grade lower than "B." Specific requirements are:

<table>
<thead>
<tr>
<th>Course Code</th>

</tbody>
</table>

Students will also be expected to demonstrate a reading competence in one foreign language or to display a proficiency in quantitative methods by completing successfully the following courses (The statistical option is available only to those in American history.):

1. STA 3023: Statistical Methods
2. STA 5206: Statistical Analysis
3. STA 5505: Categorical Data Methods or STA 6226: Sampling Theory and Applications

Examination Requirements

Each candidate for the Master of Arts in History must pass a written examination upon the conclusion of regular course work. Each candidate will also be expected to conduct a thesis defense.

R. L. Phillips, Ph.D. ........................................ Professor of Engineering

Several faculty members are active in mathematics research, some of which is supported by external grants.

Admission

The Graduate Record Examination (GRE) is required of all graduate students. Admission requirements are the standard University criteria of a 3.0 grade point average (GPA) for the last 60 semester hours of credit earned towards the baccalaureate or a GRE score of at least 1000 for the combined verbal-quantitative sections of the General (Aptitude) Test. The GRE must be less than 5 years old.

Additionally, students entering the graduate program with regular status are assumed to have a working knowledge in such areas as calculus, differential equations, linear algebra (or matrix theory), boundary value problems, with statistics and computer programming at the undergraduate level. Those students who find they are not adequately prepared in one or more of these areas can select appropriate courses from the undergraduate curriculum to make up such deficiencies. Applicants not qualified for regular status may be initially admitted to the University in a post-baccalaureate status.

Program in Mathematical Science

The Master of Science degree program in Mathematical Science is an interdisciplinary program intended to provide a broad base in applied mathematics, mathematical statistics, and computational mathematics. The program is available in the evening hours to accommodate the working student.

Master of Science Degree Requirements

The Mathematical Science degree requires a total of 30 credit hours, with a minimum of 24 hours of course work.
REQUIRED COURSES:
A minimum of 24 semester hours must include graduate level mathematics, statistics, and computer science courses which are approved by the student's committee. Suggested courses in these areas are listed below:

Suggested mathematics courses:
- MAA 5210 Topics in Advanced Calculus 4 hours
- MAA 5405 Complex Variables 3 hours
- MAP 5407 Applied Mathematics I 3 hours
- MAP 6110 Introduction to Measure and Probability 3 hours
- MAP 6111 Mathematical Statistics 3 hours
- MAP 6408 Applied Mathematics II 3 hours

Suggested computer courses:
- MAP 5385 Applied Numerical Mathematics 3 hours
- OR
- COT 6505 Computational Methods/Analysis 3 hours

RESTRICTED ELECTIVES
Electives may be chosen from approved mathematics, statistics or computer science courses. Other graduate courses outside these departments may also be used if approved by the student's committee.

THESIS OR RESEARCH REPORT
Anywhere from 2 to 6 semester hours of credit may be given for the writing of a paper on an appropriate topic. Ordinarily a paper which is of sufficient magnitude to justify awarding more than 4 hours of credit is considered a thesis. Otherwise it is considered a research report.

An oral defense of the thesis or research report will be required.

EXAMINATION REQUIREMENTS
A final examination for either option may be given at the discretion of the student's committee.

Total Minimum Semester Hours Required: 30

K. Beck ................................................................. Assistant Professor of Chemistry

Admission
The Graduate Record Examination (GRE) is required of all applicants. Minimum requirements in order to be considered for admission to the graduate program in Physics are the standard University criteria of a 3.0 (A=4) grade point average (GPA) for the last 60 semester hours of credit earned towards the baccalaureate or a GRE score of at least 1000 on the combined verbal-quantitative sections of the General (Aptitude) Test. All admissions to graduate status are competitive and based on availability of faculty for sponsoring research. Students entering the graduate program with regular status are normally expected to have completed course work generally required for a Bachelor's Degree in Physics, including mechanics, electricity and magnetism, thermodynamics and quantum mechanics. The admission deadline for the fall semester of each academic year is usually February 15 of the preceding spring, although exceptions may be granted.

Program in Physics
The Department of Physics offers a Master of Science degree and a Doctor of Philosophy degree. Research opportunities are available in optics, laser physics, electro-optics, atomic and molecular physics, condensed matter physics, biophysics, particle physics, and chemical physics. Many opportunities exist to interact with local high technology industries. Research for a physics degree can also be conducted within the Center for Research in Electro-Optics and Lasers (CREOL).

Master of Science Degree Requirements—Physics
The Master of Science in Physics degree requires a total of 33 semester credit hours, with a minimum of 27 hours of course work and 6 hours of thesis. The course work is divided into core requirements (15 hours) and electives (12 hours). All electives must be approved by the student’s advisory committee.

Courses for teachers do not satisfy elective requirements for the Master’s Degree in Physics.

**THESIS** 6 Hours

The Master of Science in Physics candidate is required to conduct a program of original scientific research or some other investigation involving a creative element and to submit a written thesis detailing these investigations. An oral defense and examination of the thesis is required.

**Total Minimum Semester Hours Required:** 33

**Doctor of Philosophy Degree Requirements—Physics**

A student has the option of either choosing a general physics track or a track in optical physics. Both tracks require a total of 72 hours for completion and specify a set of six (18 hours) required core courses and four (12 hours) electives. A minimum of 15 hours of Dissertation is required; the remaining 27 hours consist of any combination of research, dissertation, or additional course electives. The electives are advanced courses in physics or other fields and are chosen by the student in consultation with the student’s advisory committee. At least 3 hours of the electives must be outside the student’s research specialty. In addition, each student is required to participate in the Physics Colloquium/Seminar program.

**Core Courses**

Regardless of the track, all students are required to take:

<table>
<thead>
<tr>

The courses in the core track not chosen may be used as electives.

Courses titled for teachers do not satisfy elective requirements for the Ph.D. degree in physics.

QUALIFYING EXAMINATION

Admission into Doctoral Status is contingent upon passing a Qualifying Examination consisting of both written and oral portions which covers all material included in the Core Courses and undergraduate preparation in physics. The written examination is divided into two sections appropriate to each of the above tracks, and also covers statistical mechanics and classical mechanics at the advanced undergraduate level. Typically, students sit for this exam after having completed three semesters of graduate study. The exam may be attempted no more than twice. A student failing at the second attempt may continue toward a Master’s Degree.

CANDIDACY EXAMINATION AND DISSERTATION PROPOSAL

The student writes a proposal of the research planned for his or her dissertation, and is then orally examined on it and the general research area by the dissertation committee. This examination can be attempted anytime after passing the qualifier, and after the student has begun research. Typically it should be a semester or two after the qualifier. Only after passing the candidacy, the student can register for official “Dissertation” hours (PHY 7980).

DISSERTATION DEFENSE

This is the final oral defense of the dissertation. It will be administered by the student’s dissertation committee following completion of a written dissertation describing the student's research.

POLITICAL SCIENCE

D. Kiel, Ph.D. .................................. Assistant Professor
R. Kurfirst, Ph.D. .................................. Assistant Professor

I. Master of Arts in Political Science

The Master of Arts in Political Science degree program is designed to accommodate a range of professional and intellectual needs. These include: (1) preparing students to enter positions in government and the private sector in which the ability to comprehend, influence, and respond to government policy is critical; (2) preparing students, through the M.A., for pursuit of a Ph.D. degree in Political Science at other institutions; and, (3) providing a well-rounded substantive curriculum for secondary school teachers seeking higher degrees, and for teachers in community colleges.
II. Admission to the Political Science Program

Minimum requirements for admission to UCF as a post-baccalaureate student are outlined in the graduate catalog. In addition, any student wishing to enroll in graduate courses in political science must meet the Department's requirements for Graduate Status (either Classified or Conditional Graduate Status), or must hold regular graduate status in another program at UCF.

Requirements for Classified Graduate Status are:

1. At least 12 semester hours of undergraduate course work in political science, including Scope and Methods of Political Science (POS 3703) or its equivalent. Students must have a grade of B or better in this course work.

   AND

2. Three letters of recommendation from individuals who can attest to the applicant’s potential for graduate work. These letters should address the applicant’s ability to think analytically and to communicate clearly.

   AND

3. An undergraduate grade point average of at least 3.0 overall.

   OR

4. A combined (quantitative and verbal) GRE score of at least 1000.

Note: All applicants are required to take the GRE. Admission generally will be denied to any applicant whose GRE score is below 850 (quantitative plus verbal), regardless of his or her undergraduate grade point average.

Conditional Graduate Status

Applicants who are not qualified for Classified Graduate Status may petition by letter the Department’s Graduate Committee for admission to Conditional Graduate Status. The applicant’s petition must address the specific reasons behind the failure to qualify for classified status. Students holding conditional graduate status must meet the following requirements before applying for classified status:

1. Removal of any deficiencies in undergraduate preparation. Undergraduate preparation includes completion of Scope and Methods of Political Science (POS 3703) or its equivalent and at least one upper division course in each of the following areas: American Politics, International or Comparative Politics, and Political Theory. Students must complete these courses with a grade of B or better.

2. For persons otherwise not qualified for classified graduate status, completion of three graduate courses, with grade B or better.

3. Completion of any other requirements determined by the Graduate Committee and stated on the student’s Program of Graduate Study form.

III. Degree Requirements for M.A. Program in Political Science

The Department of Political Science offers students two tracks toward the masters degree. The Political Analysis track provides an in-depth understanding of political life in the American case and in comparative perspective: The nature of institutions, the role of political organizations, and the effect of mass political behavior. The political analysis track is recommended for students who want to enter community college teaching or who wish to seek a doctorate at another institution. The Public Policy track prepares students to handle complex questions arising from key areas of government activity: Issues in science and technology, health and environmental regulation, foreign and defense policy, and other important areas. The public policy track is recommended for students most interested in developing a professional expertise in a policy specialty or who would like to enhance their current sphere of knowledge.

After being admitted (either as classified or conditional), the students must meet with one of the graduate advisors to discuss his or her plans for graduate study and to obtain permission to enroll in graduate courses in the Department. After completing nine hours of course work, all students must determine a preliminary program of study, either in the political analysis or the public policy track. Both tracks require 30 semester hours of credit (24 hours of course work plus 6 hours of thesis) and both share these core requirements:
Quantitative Methods in Political Research (POS 6746) 3 Hours
Seminar in American Politics (POS 6045) 3 Hours
Seminar in Political Theory (POT 6007) 3 Hours
Seminar in International Politics (INR 6007) AND
Seminar in Comparative Politics (CPO 6007) OR

A program of study in the political analysis track consists of:
Core requirements 12 Hours
Three special topics courses from:
American Politics (POS 6938)
Political Theory (POS 6938)
International Relations (POS 6938)
Comparative Politics (POS 6938)
Political Analysis (POS 6938) 9 Hours
Electives 3 Hours
Thesis (POS 6971) 6 Hours

A program of study in the public policy track consists of:
Core requirements 12 Hours
Public Policy Analysis (PUP 6007) 3 Hours
Two special topics courses from:
Science Policy (PUP 6938)
Social Policy (PUP 6938)
Foreign & Defense Policy (PUP 6938) 6 Hours
Electives 3 Hours
Thesis (POS 6971) 6 Hours

The political science seminars provide the common core of knowledge for students in both tracks. The specific subject matter of the topics courses will vary, depending upon the specialization of the instructor or the interests of the students in each track. Upon approval of the Graduate committee, topics courses may be repeated for credit.
Ordinarily, elective credits will be taken within political science. Students wishing to earn elective credits from another department must obtain the approval from the Graduate Committee.

After completion of the 24 hours of course work in their chosen track, a student will form a committee of three advisors and submit a written thesis prospectus which, upon acceptance by the committee, will become a part of the student's permanent file. Guidelines for the prospectus are available from the graduate coordinator. The completed thesis must be submitted to the thesis committee at least eight weeks prior to the date on which the degree is to be awarded. The student will then orally defend the thesis.

EXAMINATION
All candidates for a masters degree must take a comprehensive written examination. The examination will usually be administered after satisfactory completion of 24 hours. The examination will be based on the political science course work contained in the student's program of study. In addition, all students will be tested in the area of quantitative methods. The examination will be offered two times each academic year, during the final examination period for the Fall and Spring semesters. Students must inform the graduate coordinator...
of their intention to take the examination at least six weeks prior to its scheduled date. A committee, consisting of all political science faculty from whom the student has taken courses, will develop questions for the comprehensive examination. Students not passing the examination may take it a second time within one calendar year, but no student will be allowed to take the examination more than twice.

Admission

The Graduate Record Examination (GRE) is required of all graduate students. In addition to the University minimum admission criteria of a quantitative-verbal score of 1000 on the GRE or a GPA of 3.0 for the last two years of the baccalaureate degree, three standard letters of reference (at least two from academic sources) must be initiated by the student and sent by the reference directly to the department. A departmental admissions committee reviews the student’s credentials and may invite a group of candidates for an interview. Final selection is based on both paper credentials and the interview, if held. Admission to the program occurs only in the fall semester.

A completed file, which includes the application, official test scores, letters of reference, and transcripts to date, are due in the department by March 1. (Materials received prior to May 1 may be reviewed for a late admission decision if there are positions available.) Unless there is a complete file by this date, you will not be considered for admission for the forthcoming fall term.
Competency/Prerequisite Requirements

Clinical Program. Applicants must have a baccalaureate degree with a major in psychology or have completed the following undergraduate psychology content course areas prior to matriculation: Introduction to Psychology; Abnormal Psychology; Developmental Psychology (Life Span preferred) or Child Psychology; Personality Theories; Learning; Physiological Psychology; and a course in Research Methods or Statistics.

Industrial/Organizational Program. Applicants must either have a baccalaureate degree with a major in Psychology or a baccalaureate degree and completion of undergraduate psychology courses in statistics and research methods, and four additional upperdivision courses (12 semester hours) in the core content areas of psychology.

Masters Degree Programs in Psychology

There are two different Master of Science programs in Psychology.

The Master of Science degree program in Clinical Psychology is concerned with the application of psychological principles to individuals. Major areas of emphasis include assessment or evaluation skills, intervention or counseling and psychotherapy skills, plus an academic foundation in research methods. The program was initiated for the purpose of providing training and preparation at the master's level for individuals desiring to deliver clinical services through community agencies. Graduates have been involved in mental health rehabilitation through individual, marital, family and group psychotherapy, as well as crisis intervention and specialized therapeutic procedures. Graduates have met the education criteria for licensure as mental health counselors in Florida.

The Master of Science degree program in Industrial/Organizational Psychology is concerned with the application of psychological principles to organizations. Major areas of emphasis include selection and training of employees, applied theories of organizational behavior including models of motivation, job satisfaction, and productivity; test theory and construction; assessment center technology; statistics and experimental design and a variety of current topics.

Industrial/Organizational graduates are involved in many issues of critical importance to society including fairness in the selection and treatment of employees, the creation of work environments which maximize the satisfaction and productivity of employees, and the study of technological influences on human performance.

Master of Science Degree Requirements—Clinical Psychology

The M.S. degree program in Clinical Psychology is a two-year, four-semester program for full-time students with no summer course work. The program consists of a minimum of 50 semester hours of work as follows:

<table>
<thead>
<tr>
<th>ACADEMIC COURSE WORK</th>

* Must coregister for the appropriate section of lab.
**Must coregister with CYP 6948.

LABS

6 Semester Hours

Must coregister for one hour with each course as shown above.

CLP 6456L Clinical Lab: Counseling | 1 hour |
CLP 6457L Clinical Lab: Group Therapy | 1 hour |
Clinical Internship Requirement

The purpose of the internship requirement is to provide the M.S. candidate in Clinical Psychology with a comprehensive, practical-based experience under direct supervision. A public agency or nonprofit institution offering services to individuals, with nondiscriminatory practices (including ability to assume financial responsibilities) is the prototype. The intern is assigned to an acceptable agency for two consecutive academic semesters (20 hours per semester). An additional commitment of two hours per week is required for the group of interns to meet with a departmental faculty member for review, feedback and discussions. The intern participates in a wide variety of psychological assessment procedures, including intellectual, personality, educational, neuropsychological and differential diagnosis. A major portion of the training is in the area of psychotherapy/counseling.

The intern is expected to make a presentation at least once during the internship at the agency's formal seminars.

Given the community-based structure of the agency, it is desirable for the intern to have some exposure to the consultation role. It is believed that supervision by qualified and experienced personnel is the primary learning mode by which the intern develops his professional expertise and augments the classroom material previously acquired.

Facilities are provided by the intern or agency for audio and/or video tape recording of selected assessment and intervention experiences. The intern is provided with a system for maintaining an accurate account of his activity during the week. In addition, an Internship Expectation form is completed by the intern and supervisors. A minimum of 20 percent of the training time may be assigned to special services within the agency, or upon approval, in an area of interest to the intern at another facility. Satisfactory completion (grades of "A" or "B") of all first-year clinical coursework is the pre-requisite for internship placement eligibility.

Treatise (Research Report or Thesis)

Each student will satisfactorily complete either a library review research paper or an empirical research project. An oral defense is required.

Master of Science Degree Requirements—
Industrial/Organizational Psychology

The M.S. degree program in Industrial/Organizational Psychology is a four-semester program for full-time students with no summer course work; however, practicum placements and thesis research may be completed in the summer. The program consists of a minimum of 40 semester hours of work. The required courses, which are scheduled primarily in the evenings to accommodate working students, are as follows:

Industrial/Organizational Psychology

<table>
<thead>
<tr>

PSY 6318 Applied Testing and Selection, 3 hours

PRACTICA AND LABS
INP 6946 Industrial Psychology Practicum I, 3 hours
INP 6947 Industrial Psychology Practicum II, 3 hours

TREATISE (THESIS)
PSY 6971 Treatise (Thesis), 8 hours

Total Minimum Semester Hours Required: 40

QUALIFYING EXAMINATIONS
All students in the I/O program must pass a qualifying examination which is administered in March of the second year and covers all course work to that point.

PRACTICA
Practicum assignments serve to provide the student with experience in an applied setting while also aiding the organization in which the practicum occurs to meet some specific project need. Practica possibilities generated by the I/O faculty and students may involve settings in private industry, federal, state, or local government, educational institutions, or consulting firms.

Practicum assignments involve one semester commitments ranging from 12-15 hours per week on the part of the student. Depending on the nature of the assignment, this time may be distributed between the organization, library, field work, etc., in a variety of ways.

For each practicum a meeting is held between the student, the supervising faculty member, and a representative of the organization in which the work will be accomplished. Behavioral objectives are agreed upon, and it is expected that the student will carry out these objectives during the assigned time. Each practicum placement is supervised by a faculty member and the student is also responsible to the "contact" person in the organization where the work is occurring. Full-time students are typically assigned practicum projects for the fall and spring terms of their second year.

TREATISE (THESIS)
The I/O program requires that the student complete an empirical research thesis with an oral defense.

Doctor of Philosophy Degree Program
Human Factors Psychology
A Ph.D. professionals with degree program in Human Factors Psychology is offered to those with a baccalaureate or masters degree in psychology or an allied area. The program seeks to develop the capacity to design, conduct and apply human factors research in a variety of professional settings. It is patterned on the scientist-practitioner model of the American Psychological Association (APA) and adheres to guidelines established by the committee for Education and Training of APA’s Division 21 (Applied Experimental and Engineering Psychology). The program is designed to meet the accreditation requirements of the Education Committee of the Human Factors and Ergonomics Society. A variety of research, consulting and internship arrangements are included in the program.

Students receive training in the content and techniques of human factors psychology—including statistical and quantitative procedures, experimental design, survey methods, computer techniques and other research methodologies. Students must also select a concentration area, which may be in human-computer interaction, human-machine-environment interface, human performance, human factors in simulation and training or other areas of interest with the advisor’s authorization. A dissertation representing a significant research contribution to the field is required.
ADMISSIONS POLICY

The Graduate Record Examination (GRE) is required of all applicants. To be considered for acceptance as a regular graduate student, successful applicants are expected to have a minimum cumulative GRE score of about 1100 and an undergraduate GPA of about 3.20 in the last two years of study. However, the final admission criteria will normally be more stringent because of the competitiveness of the application process. Students whose native language is not English will be required to submit scores of at least 550 on the Test of English as a Foreign Language (TOEFL).

In addition, students will not normally be admitted to the program without having completed a minimum amount of basic preparation in content related to experimental psychology. This preparation will be judged on an individual basis but would typically consist of at least 18 semester hours including the following:

1. Courses in Research Methods, computer applications, and Statistical Methods.
2. General experimental psychology courses, e.g., Learning, Physiological, Perception, Human Learning, Cognition, Motivation and Measurement.

Applicants will be evaluated for program prerequisites and advised of any needs for additional preparation. Previous graduate work will be evaluated for credit on a case-by-case basis.

ADMISSION REQUIREMENTS

To be considered for admission, applicants must present:

1. A completed UCF graduate degree program application form,
2. Evidence of successful completion of undergraduate courses in statistics and in the general area of experimental psychology,
3. Official scores on the Graduate Record Examination (taken within the last five years),
4. Completed transcripts showing a baccalaureate degree (and masters degree, if conferred) and grades for all undergraduate and graduate work,
5. A written statement outlining the student's academic and professional goals, and
6. Three letters of reference, with at least two furnished by college or university professors who are acquainted with the applicant.

A file of all requested material must be submitted by March 1. Acceptance decisions are made only in the Spring semester for admission in the Fall of each year.

RESIDENCY REQUIREMENTS

A minimum of one year full-time student status is required. (Full-time is defined by UCF as a minimum of 9 hours per semester for two contiguous semesters.) Students are advised that the program is designed to be completed in 3-4 years of full-time study from the baccalaureate level and in 2-3 years from the master's level.

REQUIRED COURSES

The Doctor of Philosophy degree in Human Factors Psychology requires a total of 90 semester hours of graduate study. All students must complete both the Psychology core and the Allied areas core.

*Elective Course Groupings for Selected Concentration Areas:*

Students should choose electives in concentrated course groupings: for example, Human-Machine Systems, Performance Measurement and Evaluation, or simulation and training. Other elective course groupings may be developed for the specific interests of the student.

**MATHEMATIC AND COMPUTER SKILLS**

Students must demonstrate for graduation proficiency in both mathematics and computer skills; equivalent to calculus and to a higher-level programming language, respectively.

**CANDIDACY EXAMINATIONS**

Candidacy examination will be required prior to registering for dissertation courses.

**SOCIOLGY, APPLIED**

Catalog Program Description

In addition to the standard admission criteria to Graduate Studies, the Department requires three letters of reference including at least one from an academic source familiar with the applicant's abilities. The Graduate Record Examination (GRE) scores should be no more than seven years old.

The applicant's records will be reviewed on an individual basis for academic deficiencies. Supplemental course work may be recommended. Note also that there is no automatic connection between acceptance as a post-baccalaureate student and acceptance into this degree-granting program. Consult the Program Coordinator whenever questions arise.

Program in Applied Sociology

The Department of Sociology and Anthropology offers a graduate program leading to the Master of Arts degree in Applied Sociology with an opportunity for concentrated studies in deviant behavior and community policy. A primary focus of the graduate program is to enhance the abilities of the students to apply a sociological perspective and specific analytical skills to research topics in the Central Florida area. Toward this objective, the program promotes the application of sociological and social psychological knowledge, principles, and research skills in a variety of organizational, community, and institutional settings. Beyond a curriculum appropriate for general applied sociology, the program offers instruction and opportunity pertaining to deviant behavior, social disorganization, and social problems.

Examples of competencies in applied sociology include effective skills in conceptualization of human and organizational problems, communication skills, program design and evaluation, planning, feasibility and needs assessment studies, data management, analysis and presentation, the application of general systems theory and the social conflict perspective to organizational problems, community development and planned change.

Master of Arts Degree Requirements—Applied Sociology

Degree-seeking students in the Applied Sociology Program may elect to follow either a thesis or a non-thesis course of study. The degree of Master of Arts is conferred when students have fulfilled the requirements of either the Thesis or Non-thesis options. Both options require 30 hours of course work.

12 Semester Hours

ELECTIVES

Students will select a minimum of 12 semester hours of (nonrestricted) electives in consultation with their faculty advisor. No more than 6 hours may be taken in UCF graduate programs outside the Department.

THESIS OPTION

6 Semester Hours

A minimum of six semester hours of thesis credit and a successful defense of a thesis is required. The thesis option is highly recommended for students interested in community college teaching and/or graduate work beyond the Master of Arts Degree.

NON-THESIS OPTION

6 Semester Hours

All of the Department's graduate courses are research oriented seminars; however, in lieu of the thesis, students must take two additional courses (6 hours) in a chosen area of specialization. Non-thesis students may substitute up to 6 hours of their elective course work by completing a graduate practicum/internship (SYA 6946). The practicum must be approved by the Advisory Committee.
EXAMINATION REQUIREMENTS

Thesis Option:
Mandatory requirements include the successful completion of a two-part written comprehensive examination and a final oral defense of thesis.

Non-Thesis Option:
Mandatory requirements include the successful completion of a two-part comprehensive written examination and an additional specialty examination in the selected area of specialization.

Total Minimum Semester Hours Required: 30

Admission

The Graduate Record Examination (GRE) is required of all graduate students. Minimum requirements in order to be considered for admission to the graduate program in Statistical Computing are the standard University criteria of a grade point average (GPA) of 3.0 for the last 60 semester hours of credit earned towards the baccalaureate or a GRE score of at least 1000 on the combined verbal-quantitative sections of the General (Aptitude) Test. The GRE score must be less than five years old. Students entering the graduate program should have a good working knowledge of at least one programming language, and should have taken undergraduate courses in calculus, matrices (or linear algebra), and statistical methods. Those students who are not adequately prepared in these areas may need to complete some undergraduate coursework before beginning their graduate program. Applicants not qualified for regular graduate status may be initially admitted to the University in post-baccalaureate status and later admitted to regular status once all deficiencies have been eliminated.

Program in Statistical Computing

The program provides a sound foundation in statistical theory, statistical methods, numerical methods in statistical computing, and in the application of computer methodology to statistical analyses. The program is particularly well-suited for those individuals who have completed an undergraduate program in mathematics, statistics, or computer science, but is also available to persons in other disciplines who wish to develop an expertise in data analysis and statistical computing. Most graduate courses are offered during the late afternoon or evening hours in order to accommodate part-time and working students.

Master of Science Degree Requirements—
Statistical Computing

The Statistical Computing degree requires a total of 36 credit hours, with a minimum of 30 hours of course work.

## RESTRICTED ELECTIVES

15 Hours

Other statistics courses will be selected by the student in consultation with the advisor.

## EXAMINATION

All students must take a comprehensive written examination covering the courses, STA 6236, STA 5205, STA 6326, and STA 6327. For full-time students, this exam normally will be taken just prior to the start of the second year of graduate work.

Total Minimum Semester Hours Required: **36**
COLLEGE OF BUSINESS ADMINISTRATION

The College of Business Administration offers four professional programs leading to the master's degree: Master of Business Administration, Master of Science in Accounting, Master of Science in Taxation, and Master of Arts in Applied Economics. Also offered is a Doctor of Philosophy Degree (Ph.D.) in Business Administration with majors in Accounting and Finance. The Master of Business Administration program is also conveniently available to Brevard County and Daytona residents. Some courses are offered at UCF's Brevard Campus in Cocoa and others are taught by UCF College of Business faculty on the Melbourne Campus of Brevard Community College. Classes in Daytona are taught at the UCF Building on the campus of Daytona Beach Community College. All graduate programs in business are accredited by the American Assembly of Collegiate Schools of Business (AACSB).

The mission of the College of Business Administration at the University of Central Florida is to provide quality business education programs, at the undergraduate, graduate, and executive levels, to the citizens of the state of Florida and to selected clientele nationally and internationally. In delivering these programs, the College places primary emphasis on excellent teaching and research with a strong commitment to developing mutually supportive relationships with the business community of Central Florida.

In pursuit of its mission, the College of Business Administration affirms its commitment to the University's focus on excellence and accent on the individual. Furthermore, the College pledges to deliver innovative and progressive programs to its clientele. As the College approaches the twenty-first century, it has adopted "Driven by Excellence" as a motto and guiding force in achieving its goals and objectives.

ADMISSION TO MASTER’S PROGRAMS

Before candidates will be considered for admission, all required application documents—application, official transcripts, GMAT test score (or GRE test score for the program in Applied Economics only) and for M.B.A. and M.A.E. only, an essay and three recommendations—must be received in the College of Business Graduate Office by:

- Fall semester admission — June 15
- Spring semester admission — November 1
- Summer semester admission — March 15

Admission to graduate study in the College of Business Administration is open to individuals with a baccalaureate degree in any discipline from a regionally accredited college or university. Thus, all graduate programs are open to graduates in education, engineering, arts, sciences, and other fields as well as business.

Admissions are restricted each semester to an allotted number of individuals showing high promise of success in postgraduate studies. Admission criteria include academic achievement as an upper-division undergraduate student and satisfactory performance on the GMAT. For the M.A. in Applied Economics degree only, scores on either the GRE or GMAT may be submitted. Both GMAT and GRE scores have a limit of 5 years. Other indicators of promise include the applicant’s extracurricular activities, work experience and job responsibilities, and leadership experience.

Foreign students whose native language is not English are required to achieve a score of at least 575 on the Test of English as a Foreign Language (TOEFL).

Enrollment in graduate courses in the College of Business Administration is limited to students who have been accepted and classified with regular graduate status in the M.B.A. program, M.S. in Accounting, M.S. in Taxation, or the M.A. in Applied Economics, and to other students with regular graduate status elsewhere in the University. Graduate level courses may not be taken unless a student is accepted into a graduate program, i.e., graduate courses may not be taken in a post-baccalaureate status.

An applicant will not be considered for admission to any graduate course until a score on the GMAT or GRE (and TOEFL, if appropriate) has been received in addition to transcripts showing proof of attainment of the bachelor’s degree and transcripts from all colleges attended.

ACADEMIC STANDARDS

Graduate students in the College of Business Administration must maintain an overall 3.0 GPA in both their program of study and any graduate or undergraduate foundation core courses. In the event this is not maintained, a graduate student shall be placed in an academic provisional status. If a 3.0 GPA (grades of “B” or better) is then not obtained in the subsequent 9 semester hours of course work, the graduate student will be disqualified from the program. Further, if a graduate student accumulates grades of “C” or lower or unresolved “I” grades in more than three (3) foundation core courses, he will be disqualified from the program. If a graduate student accumulates more than six (6) hours of “C” or lower and/or unresolved “I” grades on course work in the professional core, then he will be disqualified from the graduate program. The forgiveness policy does not apply to any courses (graduate or undergraduate) taken by graduate students in the College of Business Administration. Students in all graduate programs must achieve a minimum grade of “C” in all foundation and professional core courses.

MASTER’S PROGRAMS

MASTER OF BUSINESS ADMINISTRATION

Program Advisor: S. Graham, BA 241, Phone (407) UCF-2186
Brevard Campus Advisor: L. P. Jarvis, Phone (407) 632-0098
Daytona Campus Advisor: J. H. Potts, Phone (904) 255-7423 Ext. 4071

The program leading to the Master of Business Administration degree at the University of Central Florida is designed to develop the student’s analytical, problem-solving, and decision-making capabilities to meet the challenges of leadership in professional management positions at present and in the changing world of the future.
The curriculum provides a challenging and creative learning environment in an intensive program of study that has a broad-based administrative emphasis. Recognizing that management methods of tomorrow may bear little resemblance to techniques in current use, the program emphasis is on sound general principles and decision-making techniques that provide a base for continued learning and professional development rather than upon business procedures which are subject to obsolescence.

The program can be completed on either a full-time or part-time basis on the Orlando Campus. For Brevard County residents the program is available on a part-time basis in the evening with some coursework offered on UCF's Brevard Campus in Cocoa and some coursework taught by College of Business Administration faculty at Brevard Community College's Melbourne Campus. The program is also offered on a part-time basis, evenings, at the UCF Building on the Daytona Beach Community College campus.

Master of Business Administration—Degree Requirements

Normally, the M.B.A. program can be completed in two years of full-time study. Recent related course work in business administration and certain quantitative areas, however, can reduce the length of the program. The curriculum consists of two parts, a foundation core and a professional core.

The foundation core is defined by the course requirements listed below, and its completion is a prerequisite to entering the professional core. Note that all or part of the foundation core requirements may be satisfied through advanced standing given in view of a student’s prior equivalent course work at the undergraduate or graduate level provided such course work has been satisfactorily completed at a regionally accredited college or university, preferably one accredited by the AACSB.

The professional core consists of 24 credit hours of advanced course work that substantially extends and applies knowledge developed in the foundation core. In addition, through the selection of nine credit hours of approved electives, the student has the opportunity to develop some degree of specialization in one of the following: accounting, economics, finance, management, marketing, information systems or entrepreneurship.

Accounting undergraduate majors may not take ACG 6425 but must take an elective in any other business area. Marketing undergraduate majors are not allowed to take MAR 6816. Instead, they must replace the course with one of the marketing electives outlined above.
ELECTIVES
Electives may be taken in accounting, economics, finance, marketing, management, or information systems management. One elective course may be taken outside the College of Business Administration with permission of the program coordinator. The M.B.A. program does not require a thesis. Students may not take more than 9 semester hours in accounting electives.

M.B.A. with Specializations

Entrepreneurship
The Entrepreneurship specialization requires nine hours of restricted electives within the MBA degree. Students should take three of the four classes listed below:

- GEB 6115 Entrepreneurship
- MAN 6299 Creative and Innovative Management
- FIN 6475 Business Evaluation
- MAR 5941 Small Business Institute

In addition, students may apply to take GEB 6946, the graduate internship in Entrepreneurship, as a substitute for one of the three required courses in the specialization.

Finance
An MBA specialization in Finance requires a minimum of nine hours of restricted graduate electives chosen from the list below. Undergraduate finance majors may choose an additional restricted elective instead of taking FIN 6406.

- FIN 6425 Asset Management
- FIN 6506 Investments
- FIN 6507 Seminar in Investments
- FIN 6627 International Financial Management
- FIN 6475 Business Valuation

International Business
An MBA specialization in International Business requires six hours of restricted graduate electives in addition to GEB 6365. Students may take their six hours from the following courses:

- ACG 5255 International & Multinational Accounting
- ECO 6705 Seminar in International Economics
- INR 6007 Seminar in International Politics
- FIN 6627 International Financial Management

Marketing
Students seeking a M.B.A. degree with a specialization in marketing should enroll in the M.B.A. Program. A specialization in Marketing requires a minimum of 9 hours of graduate electives, in addition to MAR 6816. Students may take their 9 hours of elective courses in marketing from the following courses:

- MAR 6406 Sales Management
- MAR 6456 Industrial Marketing
- MAR 6616 Marketing Research
- MAR 6666 Marketing Models
- MAR 6706 Contemporary Marketing Problems
- MAR 6845 Services Marketing

Real Estate
The Real Estate specialization requires REE 6306 and REE 6308 plus three hours of restricted electives chosen from those listed below. Undergraduate finance majors may substitute an additional three hours of the restricted electives in place of FIN 6406.

- FIN 6314 Management of Financial Institutions
- ECP 6605 Economics of Urban & Regional Problems
- FIN 6475 Business Valuation
- FIN 6425 Asset Management
- FIN 6506 Investments
EXAMINATION
The end-of-program requirement for the Master of Business Administration degree will include the following:

1. Students completing the program in three (3) consecutive years (no interruptions) or less will complete the capstone, integrative course MAN 6721, Business Policy and Responsibility, with a grade of "B" or better.

2. Students requiring more than three (3) years to complete the professional core must pass a comprehensive, integrative examination consisting of four (4) equal parts covering the areas of economics, finance, management, and marketing. Each part of the test must be passed. If any part of the examination is failed on the initial attempt, the student will prepare a plan of study in cooperation with the Department Chair and Director of the M.B.A. program in order to be eligible to retake that part in the following term. Each section may be taken a maximum of two times.

Total Minimum Semester Hours Required: 33-63

MASTER OF SCIENCE IN ACCOUNTING
Program Advisor: L. J. Savage, BA 433, Phone (407) UCF-5661 or UCF-2871

The Master of Science in Accounting degree provides candidates with greater breadth and depth in accounting than is possible in baccalaureate programs. The program emphasis is on the preparation of individuals for careers as professional accountants in public practice, financial institutions, governments, industry, and nonprofit organizations. (This program satisfies the requirements of the State Board of Accounting Rule 21-A-27.02.)

The Master of Science in Accounting degree is awarded upon satisfactory completion of a graduate program of 30 semester hours. At least 15 of the 30 hours must be made up of 6000 level courses. Students, with the assistance and approval of the program advisor, may select an area of specialization in Management, Public, Tax, General, or Not-for-Profit Accounting. Following is a list of required courses and restricted electives.

ACG 5675  Operational Auditing  3 hours
ACG 6946  Internship  3 hours

FOUNDATION CORE  60 Semester Hours

The courses in the foundation core for this program are usually satisfied if a person enters the M.S.A. program with an undergraduate degree in accounting. Such course work must have been satisfactorily completed at a regionally accredited college or university, preferably one accredited by the AACSB. The accounting undergraduate program at UCF meets these requirements. However, if deficiencies exist, they must be satisfied before advanced course work can be taken. Some of the prerequisite course work may be satisfied through credit by examination if approved by the school.

ACG 3103  Financial Accounting I  3 hours
ACG 3113  Financial Accounting II  3 hours
ACG 3361  Cost Accounting I  3 hours
ACG 4401  Accounting Information Systems I  3 hours
ACG 3501  Financial Accounting for Governmental and Nonprofit Organizations  3 hours
ACG 4123  Financial Accounting III  3 hours
ACG 4203  Financial Accounting IV  3 hours
TAX 4001  Federal Income Tax I  3 hours
ACG 4651  Auditing  3 hours
BUL 3112  Business Law I  3 hours
BUL 3121  Business Law II  3 hours
ECO 5005*  Economic Concepts  3 hours
ECO 5415*  Statistics for Business and Economics  3 hours
FIN 5405*  Financial Concepts  3 hours
MAC 3233  Concepts of Calculus  3 hours
MAN 4720  Business Policy  3 hours
MAN 5050*  Management Concepts  3 hours
MAN 5501*  Introduction to Production/Operations Management  2 hours
ISM 5021*  Introduction to Management Information Systems  3 hours
MAR 5055*  Marketing Concepts  3 hours

*Or undergraduate course equivalent taken as an undergraduate student.

Student must show clear evidence of proficiency in oral and written communication.

EXAMINATION

Satisfactory completion of an end-of-program comprehensive examination is required. The M.S. in Accounting program does not require a thesis.
MASTER OF SCIENCE IN TAXATION
Program Advisor: Dale Bandy, BA 435, Phone (407) UCF-2964 or UCF-2871

The Master of Science in Taxation degree program provides candidates with an opportunity to specialize in taxation. The program emphasis is on the preparation of individuals for careers as professional accountants in public practice, government, and industry. (This program satisfies the requirements of the State Board of Accounting to qualify for the CPA examination if a candidate holding the appropriate undergraduate degree in accounting takes ACG 5636, Advanced Auditing, as an elective in the M.S.T. program.) The Master of Science in Taxation degree is awarded upon completion of a graduate program with a minimum of 30 semester hours. The program consists of 18 hours of required graduate tax courses and 12 hours of restricted electives. Electives are selected with the assistance and approval of the advisor. Required courses and available electives are described below.

18 Semester Hours

RESTRICTED ELECTIVE COURSES

12 Semester Hours

A total of 12 semester hours of electives must be selected with advisor approval. Master of Science in Taxation electives may be selected from either the required courses or any category of elective courses available in the Master of Science in Accounting degree program (other than the 18 semester hours of tax courses listed above).

FOUNDATION CORE

60 Semester Hours

The courses in the foundation core for this program are satisfied if a person enters the M.S.T. program with a recent undergraduate degree in accounting from an AACSB accredited college or university. The accounting undergraduate program at UCF meets this requirement. Students with non-accounting undergraduate degrees or degrees from unaccredited institutions must complete the 60 semester hour foundation core. Credit is given for previously completed work. The courses included in the foundation core are listed in the Master of Science in Accounting degree requirements.

EXAMINATION

Satisfactory completion of the end-of-program comprehensive examination is required.

MASTER OF ARTS IN APPLIED ECONOMICS

Program Advisor: R. L. Pennington, BA 325, Phone (407) UCF-2870

The Master of Arts in Applied Economics degree is a one-year (full-time) or two-year (part-time) program designed to provide specialization in economics for persons desiring careers as economists in the academic, governmental, business, and financial communities. Contemporary society offers almost unlimited opportunities to individuals with an understanding of economic relationships and the tools of analysis to understand today's economic problems. Economists work on such problems as sales forecasting, market analysis, economic feasibility, hedging and commodity pricing, unemployment, inflation, balance of payments, energy development, pollution abatement, and many other current problems.
Master of Arts in Applied Economics—Degree Requirements

The Master of Arts in Applied Economics degree requires 30 semester hours presuming that all of the prerequisites have been completed prior to admission.

PREREQUISITES

The following prerequisites (or equivalents) should be completed before enrolling in 6000-level graduate courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 5005 Economic Concepts</td>
<td>3</td>
</tr>
<tr>
<td>ECO 5415 Statistics for Business and Economics</td>
<td>3</td>
</tr>
<tr>
<td>MAC 1104 College Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MAC 3233 Concepts of Calculus</td>
<td>3</td>
</tr>
</tbody>
</table>

Prerequisite work may be entirely or partially satisfied through prior equivalent coursework. Normally, such course work must have been satisfactorily completed at a regionally accredited college or university, preferably one accredited by the AACSB. Prerequisite course work does not count toward the 30 semester hours credit required for completion of the M.A. in Applied Economics degree.

REQUIRED COURSES

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 6115 Economic Analysis of the Firm</td>
<td>3</td>
</tr>
<tr>
<td>ECO 6206 Aggregate Economic Conditions and Analysis</td>
<td>3</td>
</tr>
<tr>
<td>ECO 6416 Statistical Methods for Business Decisions</td>
<td>3</td>
</tr>
</tbody>
</table>

REQUIRED COURSES

A minimum of twelve additional hours of economics elective course work is required.

ECONOMICS ELECTIVES

A maximum of nine hours of approved non-economics elective course work may be completed in disciplines such as accounting, finance, management, marketing, mathematics, statistics, public administration, and computer science. Career-oriented elective course work tracks are presented in later material.

NON-ECONOMICS ELECTIVES

A maximum of nine hours of approved non-economics elective course work may be completed in disciplines such as accounting, finance, management, marketing, mathematics, statistics, public administration, and computer science. Career-oriented elective course work tracks are presented in later material.

THESIS OR INTERNSHIP

Six credit hours of thesis or internship may be used to complete the M.A. in Applied Economics degree. The candidate may fulfill this requirement by completing: (1) a formal thesis on a topic selected in consultation with the candidate's advisory committee and meeting both departmental and university requirements or (2) an internship consisting of work in a business or governmental agency and an end-of-project report.

FINAL EXAMINATION

Candidates must satisfactorily complete a comprehensive final examination. If the thesis or internship option is chosen to complete the degree, the examination will normally consist of an oral examination over the thesis or internship project. The candidate's supervisory committee will have discretion to determine the extent of this requirement. Candidates choosing the non-thesis option will be required to pass a written examination covering economic theory and the candidate's career track.

Total Minimum Semester Hours Required: 30

CAREER-ORIENTED ELECTIVE TRACKS

Candidates for the Master of Arts in Applied Economics degree are encouraged to use the flexibility provided in the elective portion of the program to design a plan of study that enhances their particular career interests. The five suggested career-oriented elective tracks that follow are representative of some of the possibilities.

1. Financial Economics

For candidates seeking careers as financial economists in the fields of banking, brokerage, corporate or personal finance, selection among the following electives is recommended:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECO 6266</td>
<td>Business Cycles and Forecasting</td>
</tr>
<tr>
<td>ECO 6226</td>
<td>Seminar in Money, Banking and Monetary Policy</td>
</tr>
</tbody>
</table>
2. Public Sector Economics
For candidates seeking careers in the public sector as planners, policy analysts, or regulators, selection among the following electives is recommended:

- ECO 6226 Seminar in Money, Banking and Monetary Policy
- ECO 6505 Public Finance and Fiscal Policy
- ECP 6205 Labor Economics
- ECP 6405 Industrial Organization and Performance
- ECP 6426 Economics of Regulated Industries
- ECP 6605 Economics of Urban and Regional Problems
- ECP 6705 Managerial Economics
- REE 6306 Corporate Real Estate Investment Decision-Making

Approved electives in Public Administration
Approved electives in Political Science
Approved electives in Political Theory

3. Quantitative Economics
For candidates seeking careers as analysts, consultants, or researchers in business, government, or nonprofit institutions, selection among the following quantitative electives is recommended:

- ECO 6266 Business Cycles and Forecasting
- ECO 6424 Econometrics
- ECP 6705 Managerial Economics
- MAN 6546 Quantitative Models for Business Decisions
- MAR 6616 Marketing Research Methods

4. International Political Economy
For candidates seeking positions with international organizations (such as the World Bank or United Nations), or overseas business or government appointments, selection among the following electives is recommended:

- ECO 6705 Seminar in International Economics
- ECS 6015 Economic Development
- FIN 6627 International Financial Management
- INR 6007 Seminar in International Politics
- PUP 6058 Issues in International Public Policy

5. Human Resource Economics
For candidates seeking careers in the area of human resources development or positions in interdisciplinary manpower related issues, selection among the following electives is recommended:

- ECP 6205 Labor Economics
- ECS 6015 Economic Development
- EIN 5117 Management Information Systems
- EIN 6258 Man-Computer Interaction
- EVT 6267 Vocational Program Planning, Development and Evaluation
- ISM 6121 Systems Analysis and Development
- MAN 6156 Personnel Resources Administration
- MAN 6245 Organizational Behavior and Development
- PAD 6417 Human Resource Management
DOCTORAL PROGRAM

Doctor of Philosophy Degree—Ph.D.

J. D. Hatfield ......................................................... Program Director
Office: BA 230, Phone (407) UCF-5094

P. R. Welch ............................................................ Accounting Coordinator
Office: BA 429, Phone (407) UCF-2958

R. J. Clayton ........................................................ Finance Coordinator
Office: BA 420, Phone (407) UCF-5756

The objective of the doctoral program in business administration is to prepare students for academic careers in higher education in accounting and finance and management careers in profit and non-profit organizations. Success in the program is judged by the student's understanding of the issues and methodologies essential to the advancement of knowledge. Doctoral work is based on the achievement of academic and research competencies, rather than a specific number of courses. A student who participates in a doctoral program of study is expected to strive for the knowledge and skills necessary to develop excellence in teaching and to conduct quality research, and should at all times maintain the highest ideals of academic integrity and scholarship.

ADMISSION

Students applying for admission to the doctoral program in Business Administration will be required to submit recent scores on the Graduate Management Admission Test (GMAT). The international student must submit the Test of English as a Foreign Language (TOEFL) score if the student is not a graduate from an accredited college or university in the United States. Each international student must also submit a minimum score of 240 on the Test of Spoken English (TSE). In special cases, students will be admitted to the Ph.D. program with a bachelor's degree. Admission decisions are made on the recommendation of the faculty of the appropriate department or school.

Before candidates will be considered for admission, all required application documents including application, official transcripts, and GMAT test scores must be received in the College of Business Graduate Office by March 1.

DEGREE REQUIREMENTS

Upon admission to the doctoral program, the student shall be assigned an advisory committee. The student, with the approval of the student's advisory committee, shall complete a program of study, which, at a minimum, shall consist of the following:

FOUNDATION BODY OF KNOWLEDGE 30 Semester Hours

In Finance the foundation body of knowledge includes (a) the Common Body of Knowledge of the Master's in Business Administration Degree, or its equivalent, and (b) graduate credit hours (6 semester hours—total) in macro- and microeconomic theory.

For Accounting this requirement may be satisfied in any of the four following ways: (1) M.S.A., (2) M.S.T., (3) master's degree from an accredited program plus CPA, or (4) a Florida 150 hour CPA that includes certain accounting courses deemed essential by the Accounting Ph.D. Coordinator or the student's advisory committee.

Any selected alternative must include a graduate-level microeconomics course and a graduate-level macroeconomics course.

MAJOR CONCENTRATION 15 or 16 Semester Hours

Students must select a major concentration from Accounting with a 16-hour minimum or Finance with a 15-hour minimum.

Accounting Major: 16 Semester Hours

<table>

</tr>
</tbody>
</table>
Two other seminars from the following (3 hours each): 6 hours
ACG 7399 Seminar in Management Accounting Research
ACG 7699 Seminar in Auditing Research
TAX 7066 Seminar in Doctoral Tax Research

Finance Major: 15 Semester Hours
FIN 7811 Corporate Finance Theory 3 hours
FIN 7816 Investment Theory 3 hours
FIN 7813 Seminar in Financial Institutions and Markets 3 hours
FIN 7930 Seminar in Finance 3 hours
FIN 7915 Directed Research in Finance 3 hours

MINOR CONCENTRATION 9 Semester Hours
Students must select a minimum of nine hours in a unified area approved by the student’s doctoral study advisory committee. Each student’s program of study is individually tailored to accommodate student interests whenever possible, and this course work may be developed from offerings in the following disciplines with the advice and consent of the respective departments and advisory committee:

Accounting  Computer Science
Economics  Statistics
Finance  Political Science
Management  Sociology
Marketing  Engineering
Psychology  Mathematics

RESEARCH TOOLS 15 Semester Hours
The research tools requirement is intended to ensure a thorough exposure to research methods. All candidates are expected to demonstrate knowledge of mainframe and personal computers. Knowledge and use of available data bases and software are also expected. The required course work must include two of the following (a total of 6 semester credit hours):
FIN 7807 Corporate Finance Theory
GEB 7910 Research Methods in Business
QMB 7565 Applied Business Statistics

The remaining 9 semester hours (in addition to the minor concentration) typically are selected from offerings in the following disciplines:

Accounting  Sociology  Computer Science
Economics  Psychology  Mathematics
Statistics  Management Science
Engineering

CANDIDACY EXAMINATION
The student must successfully complete a comprehensive Candidacy Examination. This examination has written and oral parts, and covers the candidate’s program of study. Students are admitted to candidacy after satisfying all general degree requirements, passing the comprehensive examination, fulfilling the residency requirement, and successfully defending a written dissertation proposal in an oral examination conducted by the student’s advisory/dissertation committee.

DISSERTATION 6-24 Semester Hours
Total Doctoral Program Hours Required: 75-94 Semester Hours

FINAL DEFENSE
The successful completion of a final oral examination is required. This examination concentrates on, but is not limited to, the student’s dissertation defense.
COLLEGE OF EDUCATION

Advanced courses through the College of Education are for students with at least baccalaureate degrees. Both degree and non-degree programs may be planned for people in education-related positions in social and government agencies, business and industry, as well as for professional educators in private and public schools. Master of Education and Master of Arts degrees are awarded. Educational Specialist and Doctor of Education degrees are available in Educational Leadership and Curriculum/Instruction. Programs in the College of Education are accredited by NCATE (The National Council for the Accreditation of Teacher Education).

MASTER’S DEGREES

Admission

The Graduate Record Examination (GRE) is required of all graduate students. Minimal
requirements for admission are 1) a grade point average (GPA) of 3.0 for the last 50
semester hours of undergraduate study and a minimum score of at least 840 on the verbal-quantitative sections of the GRE or 2) a GPA of less than 3.0 combined with a GRE of 1000 or above. In addition, a student seeking a Master of Education degree must show evidence that all course work has been completed for the basic bachelor's level State of Florida teaching certificate. Master of Arts programs, available in some specialities, may be planned without the student's having previously completed certification courses.

Education programs at the branch campuses are limited access programs. Acceptance to the University and/or the College of Education does not constitute admission to the UCF Brevard or Daytona or UCF/Brevard's education program. A separate application must be made directly to the Daytona or Brevard Campus.

Provisional Admission

Students who fail to meet University admissions standards have the opportunity to apply for admission via the provisional category. To be considered for provisional admission, students must file an application for provisional status in the Education Records and Advisement Center. Department committees make recommendations to the College Graduate Standards and Curriculum Committee. The following criteria are applied in evaluating applications:

a. Ranking of undergraduate grade point average
b. Ranking of GRE score
c. Contribution, current and projected, to the profession
d. Number of years of professional experience
e. Number of post-baccalaureate hours taken
f. Grade point average on any post-baccalaureate work
g. Recommendations by college faculty and other professionals.

Provisional students who do not maintain a 3.0 GPA during their first nine hours of enrollment will be reverted to post-baccalaureate status.

Program of Study

Students are officially assigned formal academic advisors upon admission to a College of Education graduate degree program. It is the student's responsibility to seek advisement and finalize a program of study early in the degree program. Students are advised to file a program of study within the first nine hours of their graduate study. The acceptability and application of post-baccalaureate/transfer hours toward a degree is contingent upon the recommendation of the academic advisor and is approved only after a program of study has been officially filed through all University channels.

Academic advisors are not assigned to individuals admitted as post-baccalaureate students. Post-baccalaureate students may seek information and general advisement in the Education Records and Advisement Center.

Performance Standards

Minimum University-wide standards and regulations are applicable in addition to the specific College of Education requirements and regulations described in this section. In addition to the minimum University standard of maintaining a "B" (3.0 GPA) on all graduate work and earning no more than 6 hours of "C" work or unresolved "I" (incomplete) grades, College of Education students must maintain at least a "C" (2.5 GPA) in all co-requisite work prescribed in concert with a graduate degree program.

Students whose grade point average on degree work falls below 3.0 will be placed on academic provisional status for a nine semester-hour period of enrollment. During this time, the GPA must reach or exceed the 3.0 minimum to remain in the program. Only one academic provisional period is permitted, and no transfer credit may be applied.

Comprehensive Examination

Prior to graduation, all students are required to successfully complete a written comprehensive examination which is planned and evaluated by each student's major department. Failure on a comprehensive examination requires re-enrollment and re-examination during a subsequent semester.
Thesis/Research Report/Non-thesis Option

Master's degree students in Education, in consultation with advisors, may select one of three options: typically, thesis and research report options require a minimum of 33 semester hours while the non-thesis option requires a minimum of 36 hours.

MASTER'S DEGREE PROGRAMS IN EDUCATION

Programs are offered in a wide variety of areas within the general field of education. Master of Education programs are open only to students who have a baccalaureate degree and have completed course work for regular Florida State Teaching Certification. Master of Arts programs are open to qualified individuals who are noncertified or for certified bachelor-level students pursuing a second teaching field. In this section, the degree components for the various programs are outlined. Students should consult faculty advisors for answers to specific questions.

ART EDUCATION

Master of Education: Minimum hours required for M.Ed. 39/45

This program is designed to meet the expanded and deepening needs of the art teacher in the studio content areas, to examine contemporary problems in art education, review recent curriculum developments, study innovative developments, explore interdisciplinary concepts and become involved in research problems specific to the art teacher. This degree requires previous certification in art.

COUNSELOR EDUCATION

This program includes two degree options. The Master of Education degree program is designed to meet the needs of students who have a baccalaureate degree and have completed course work for regular Florida State Teaching Certification and plan to seek certification in school counseling.

The second option is a Master of Arts degree program for the student who has a baccalaureate degree in a discipline other than education. This degree is for: (a) the student desiring certification in school counseling; (b) the student who is interested in licensure as a mental health counselor; and (c) the student who is interested in working in college or university student personnel services.

EGC 6909 Research Report may be substituted by two three-semester hour courses. All program tracks require clinical experiences in the UCF practicum clinic and on-site in the community. The Mental Health track requires an internship of 1,000 clock hours. The other tracks require an internship of 600 clock hours.
Admissions criteria: To be considered for admission to any of the counselor education program tracks, an applicant must secure, complete and submit by the deadline (September 1 for Spring Term Admission, February 1 for Fall Term Admission), a special packet of materials for review by a faculty admissions committee. This material is separate from the University Graduate Admissions Application and may be obtained from the Educational Services Department office (ED 318). A formal interview is required and will be considered for final admission after the College of Education admission requirements are met. This program can accommodate a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met.

Exit requirements include:
1. Achieve at least a GPA of 3.0 in counseling specialization courses.
2. Achieve a B or better in EGC 6446 and EGC 6946.
3. Approval by Counselor Education faculty.
4. Satisfactory passing comprehensive written examinations.

The College reserves the right to refuse student entrance or terminate a student after admission to the Counselor Education Program, if in the judgment of the faculty, the student demonstrates unacceptable personal fitness to work in the counseling field with children, youth, and/or adults.

MHS  6800  Counseling Practicum  3 hours
MHS  6800  Student Affairs Practicum  3 hours
MHS  6830  Student Affairs Internship  3 hours

Courses must be taken in the following sequence:
SDS 6040, MHS 6400, 6401, 6800, 6500, 6800, 6830.

EDUCATIONAL LEADERSHIP

Two master's degree programs are offered in Educational Leadership: the Master of Education Degree (M.Ed.) and the Master of Arts Degree (M.A.). The M.A. option does not fulfill state certification requirements and requires 42 hours for completion.

The purpose of the Master of Education Degree (M.Ed.) in Educational Leadership is to prepare individuals for leadership positions and administrative careers in education. The M.Ed. Degree provides for two options: Educational Leadership or Curriculum and Instruction.

Option I. Educational Leadership is a 39-semester hour program of study applicable toward Florida Educational Leadership Certification which is designed to provide the theoretical and conceptual knowledge base required for the principalship, and for Florida Level I Educational Leadership Certification. Courses required in the program address the eight competency domains specified by the Florida Department of Education and included in the Florida Educational Leadership Examination (FELE). Educational Leadership Certification is subject to Florida Department of Education approval. An M.Ed. in Educational Leadership or its equivalent, three years of teaching experience, and successful completion of the Florida Educational Leadership Examination are required by the State of Florida for certification in Educational Leadership.

Option II. Curriculum and Instruction is a 33-hour program of study designed to prepare classroom teachers who wish to remain in the classroom as teachers, team leaders, departmental chairpersons, peer teachers or curriculum resource teachers.

EDUCATIONAL LEADERSHIP

Master of Education: Minimum hours required for M.Ed. 39

ELEMENTARY EDUCATION - MATHEMATICS EDUCATION

Master of Education: Minimum hours required for M.Ed. 33/36

This is a program for elementary teachers who serve as special mathematics laboratory teachers; or as adjunct mathematics-learning disability teachers helping the regular classroom teacher in diagnosing, prescribing, and remediating the instruction of children identified as learning disabled in mathematics; or as mathematics specialists who are the curriculum resource instructional leaders in their school.

This program includes the development of competencies in diagnosing learning difficulties and error patterns in mathematics, organizing and managing laboratory experiences, using a wide variety of specific teaching techniques for all content strands in a K-8 (pre-algebra) mathematics classroom individualized instruction programs. The program may qualify one for certification in Middle School Mathematics if he has sufficient mathematics (8 semester hours) content courses and certain experience-methods requirements.

AREA A - CORE 15 SH
EDF  6481  Fundamentals of Graduate Research in Education  3 hours
EDF  6401  Statistics for Educational Data  3 hours
EDF  6432  Measurement and Evaluation in Education  3 hours

**EXCEPTIONAL CHILD EDUCATION**

Two master's degree programs are offered in Exceptional Child Education—the Master of Education (M.Ed.) and the Master of Arts Degree (M.A.). The Master of Education M.Ed. degree provides for specialization in one of three areas:

a. **EH: Emotionally Handicapped (M.Ed.)** - Inability to achieve adequate academic progress or satisfactory interpersonal relationships not attributed primarily to physical, sensory or intellectual deficits.

b. **EMH: Educable Mentally Handicapped (M.Ed.)** - Significant impairment in general intellectual functioning concurrent with deficits in adaptive behavior which are manifested during the development period.

c. **SLD: Specific Learning Disability (M.Ed.)** - Disorder in one or more of the basic psychological processes involved in understanding or in using spoken or written language; learning problems not due primarily to other handicapping conditions.

**Master of Education: Minimum hours required for M.Ed. 33**

INSTRUCTIONAL TECHNOLOGY/EDUCATIONAL MEDIA

NOTE: The programs listed below are accredited by both NCATE (The National Council for the Accreditation of Teacher Education) and AECT (The Association for Educational Communications and Technology).
INSTRUCTIONAL TECHNOLOGY/MEDIA: EDUCATIONAL MEDIA

Master of Education: Minimum hours required for M.Ed. 39/45

This program leads to a Master of Education degree and certification as a school media specialist. It is designed to offer skills in administration, production, instructional design, organization, selection, evaluation and research which relate to school media programs. It stresses knowledge and applications of both present and future innovations and technologies for education.

The assumption is made within the Educational Media program that the applicant holds a teaching certificate currently valid in the State of Florida prior to entry into the program and at least one year of successful classroom experience.

**MUSIC EDUCATION**

**Master of Education: Minimum hours required for M.Ed. 36/39**

This program, offered in cooperation with the Department of Music, is for students who are certified to teach music (K-12). The Master of Education program, organized to increase knowledge and improve teaching skills, includes advanced work in research and educational foundations; a practicum in music education; and courses in foundations of music education, general music, teaching performance and curriculum. Advanced courses in music history, music theory, conducting and performance are included.

**MUSIC EDUCATION**

**Master of Arts: Minimum hours required for M.A. 37/40**

This program is offered for students who have completed a baccalaureate degree who seek certification in music (K-12). The Master of Arts program is organized to develop basic teaching skills as well as advanced work in research and educational foundations; courses in foundations of music education and methods of teaching music. Supervised internship experiences are included. In most cases, music specialization requirements for certification are met by the B.A. degree.

PHYSICAL EDUCATION

The Physical Education program offers a Master of Education degree (M.Ed.) and a Master of Arts degree (M.A.) with specializations in various aspects of physical education.

The M.Ed. degree is sufficiently flexible to meet a range of student needs in improving proficiency and competencies in teaching, curriculum, research design, administrative techniques and physical education for exceptional students. The degree provides for three separate options: The Adapted Physical Education option seeks to train qualified adapted physical education specialists, to serve special education students in regular classrooms. The Master Teacher option is designed to prepare master teachers for all students grades 6-12. The Perceptual Motor Development option focuses on the preparation of physical education teachers to work with exceptional children in the 0-9 age group.

READING EDUCATION

Master of Education: Minimum hours required for M.Ed. 36

This program prepares teachers for certification as reading specialists (e.g., reading resource teacher, reading laboratory teacher, reading/language arts supervisor, primary education specialist) in grades K-12 in public schools and private reading laboratories or clinics. Diagnosis of reading disabilities, techniques of corrective reading, psychological measurement, reading in the content fields, management of reading programs, reading trends and research and dimensions of the language arts other than reading are included with considerable emphasis on practicums with disabled readers from the early childhood to adult levels. People certified in areas of education other than elementary are eligible to pursue a degree in the program.

SCIENCE EDUCATION: PHYSICS

Master of Arts: Minimum hours required for M.A. 41/44
  Program for non-educational majors, or previously certified teachers in another field.

AREA A - CORE - 19 or 22 SH
  EDF 6481 Fundamentals of Graduate Research in Education 3 hours
  EDF 6155 Lifespan Human Development and Learning 3 hours
  ESE 6235 Curriculum Design 3 hours
  EDG 4321 Teaching Strategies 4 hours
  EDF 6517 History and Philosophy of American Education 3 hours

Select One Option:
Option A - Research Report - 3 SH
  ESE 6909 Research Report  2,1 hours
Option B - Non-Thesis - 6 SH (3 SH in 5000 or 6000 level Physics
Approved by Advisor)
  PHY 5015C Physics for Teachers II 3 hours

AREA B - SPECIALIZATION - 12 SH (9 SH OF 5000 OR 6000 LEVEL
PHYSICS APPROVED BY ADVISOR)
  SCE 6237 Science Programs in Secondary School OR 3 hours
  SCE 6238 Inquiry in the Sciences 3 hours

AREA C - INTERNSHIP - 10 SH
  ESE 6946 Graduate Internship 3 hours
  ESE 6946 Graduate Internship 7 hours
Corequisites: Students must have B.S. degree in Physics or B.S. degree with 30
SH in Physics—including Technology or History of Science.
  SCE 4360 Science Instructional Analysis 4 hours

SOCIAL SCIENCE EDUCATION

Master of Education: Minimum hours required for M.Ed. 33/36
  This program is designed to meet advanced knowledge and skill needs of the social
science classroom teacher.

AREA A - CORE - 9 or 12 SH
  EDF 6481 Fundamentals of Graduate Research in Education 3 hours
  EDF 6401 Statistics for Educational Data 3 hours
  EDF 6432 Measurement and Evaluation in Education 3 hours
Select One:
EDF 6155  Lifespan Human Development and Learning  3 hours
EDF 6517  History and Philosophy of American Education  3 hours
EDF 6608  Social Factors in American Education  3 hours

Select One Option:
Option A - Research Report - 3 SH
ESE 6909  Research Report  2.1 hours

Option B - Non-Thesis - 6 SH (Electives Approved by Advisor)
3 hours
3 hours

AREA B - SPECIALIZATION - 9 SH (ELECTIVES APPROVED BY ADVISOR)
3 hours

ESE 6325  Curriculum Theory  3 hours
SSE 6636  Contemporary Social Science Education  3 hours

SOCIAL SCIENCE EDUCATION

Master of Arts: Minimum hours required for M.A. 40/43

Program for non-education majors or previously certified teachers in another field.

AREA A - CORE - 18 or 21 SH
EDF 6481  Fundamentals of Graduate Research in Education  3 hours
EDF 6155  Lifespan Human Development and Learning  3 hours
ESE 6235  Curriculum Design  3 hours
EDF 6432  Measurement and Evaluation in Education  3 hours
EDF 6517  History and Philosophy of American Education  3 hours

Select One Option:
Option A - Research Report - 3 SH
ESE 6909  Research Report  2.1 hours

Option B - Non-Thesis - 6 SH (Electives Approved by Advisor)
6 hours

AREA B - SPECIALIZATION - 12 SH (ELECTIVES APPROVED BY ADVISOR)
12 hours

AREA C - INTERNSHIP - 10 SH
ESE 6946  Graduate Internship  3 hours
ESE 6946  Graduate Internship  7 hours
Corequisites: Students must meet required courses for 30 SH rule in Social Science.

SSE 4361  Social Science Instructional Analysis  4 hours

VOCATIONAL EDUCATION

Two types of degrees are available in Vocational Education. The Master of Education degree is designed to meet the needs of students who have a baccalaureate degree and who have completed course work for regular vocational Florida State Teaching Certification. This degree requires a minimum of 33 semester hours.

The Master of Arts degree is designed for the student who has a baccalaureate degree in a discipline other than education. This degree requires a minimum of 39 semester hours.

EDUCATIONAL SPECIALIST DEGREE PROGRAMS

Educational Specialist (Ed.S.) degree programs are offered in three areas: Curriculum/Instruction, designed for persons in teaching and other instruction/training leadership positions; Educational Leadership, for students who are interested in decision-making positions in educational organizations; and School Psychology, a special degree program that does not require a master's degree for admission but does have other special admission criteria.

CURRICULUM / INSTRUCTION AND EDUCATIONAL LEADERSHIP

Admissions Policy

Admissions will occur two times a year, Fall and Spring. Completed files must be on campus by September 15 for Spring admission screening and February 15 for Fall admission screening. Admitted students may begin course work during the first new semester after admission.

Completed files include: 1) completed UCF Graduate School application form, 2) transcripts from all post-secondary schools previously attended, 3) GRE scores, 4) three letters of recommendation, 5) professional resume, 6) statement of professional goals, 7) other information that may be requested after the file is started.

Additional Information

Admission to an Educational Specialist Degree Program is separate from admission to the Doctoral Program. Upon completion of the Specialist Degree, the candidate may apply for admission to the Ed.D. degree program.

Specialist Admission Requirements

1. A master's degree from an accredited institution;  AND
2. A combined score of 1000 or above on the General Graduate Record Examination (verbal/quantitative scores combined);  AND
3. Recommended for admission by the appropriate major program committee.

NOTE: Those applicants who do not meet admission criteria may appeal to the College of Education Graduate Standards and Curriculum Committee for consideration. A second GRE score of 900 or above is required for review by this committee.

Degree Requirements

1. Complete a minimum of 36 semester hours beyond the Master’s Degree including the selected program requirements.
2. Have an overall 3.0 GPA on all graduate work attempted.
3. The completed planned program must include a minimum of 12 graduate-level hours in the specialization area AND a minimum of 6 graduate-level hours in Research/Statistics.
4. Pass all required examinations.
Transfer Credit

Total transfer credit may not exceed 9 semester hours and must be earned after the Master's Degree (maximum of 9 semester hours from other institutions within the State University System (SUS) or 6 semester hours earned at institutions not in the SUS but which are fully accredited).

Post-master's degree work taken at UCF prior to admission to the program is considered to be transfer credit.

Required Examinations

Educational Leadership majors must successfully complete one 5-hour examination in general educational leadership.

Curriculum and Instruction majors must successfully complete one 3-hour examination in Curriculum and Instruction and one 3-hour examination in their area of specialization.

Time Limits

Course credit hours counted toward a degree may be no more than seven years old by the time the degree requirements are completed.

Continuous Attendance

Students may not be guaranteed continuing graduate status if they do not enroll in the University for a period of three consecutive semesters INCLUDING Summer.

Graduation policy allows students to fulfill degree requirements as listed in the UCF Catalog in force during the student's most recent period of attendance. Because students must occasionally interrupt their attendance for a brief period, they will be considered to have interrupted their attendance only if the interruption is for three or more consecutive terms, including Summer. Under these circumstances, students will lose the option of fulfilling degree requirements under earlier catalogs.

SCHOOL PSYCHOLOGY

The Educational Specialist degree program in School Psychology is a unique specialization in psychology and education. This program is based on the assumptions that school psychologists can apply relevant knowledge and skills from a variety of disciplines to the learning and adjustment problems of preschool and school-age children; and that relevant knowledge and skills can be transmitted through a variety of services including (a) consultation with teachers and parents, (b) direct services to children and young adults, and (c) indirect services to school and community organizations. School psychologists may practice in public or private schools, colleges and universities, rehabilitation centers, hospitals, mental health clinics, government agencies, child guidance centers, penal institutions, and may develop private practices. Applicants with backgrounds in education, psychology or other undergraduate majors may qualify. The program involves formal preparation and practical experiences focusing on psychological foundations (human development, learning and motivation), psycho-educational assessment, exceptional students, remediation or intervention techniques, counseling skills, as well as full-time supervised internship of two semesters in the public school setting. Graduates are certifiable at the state level.

Requirements for admission to the program include the following:

1. Admission to graduate school
2. Initial interview with the Program Coordinator
3. Baccalaureate degree from an accredited institution (usually in Education or Psychology)
4. Undergraduate GPA of 3.0 (on a 4.0 scale) for the last 60 semester hours
5. GRE score of 1,000 (verbal and quantitative scores combined)
6. Three letters of recommendation
7. Favorable recommendation for admission by the School Psychology Review Committee

Applicants graduating in spring and who might be experiencing difficulty in having complete transcripts sent to UCF by May 15, must request a letter from the Registrar of the institution granting the degree (to be submitted before the deadline) stating: (1) type of degree, (2) date of graduation; (3) major; and (4) final GPA.
This program can accommodate only a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met.

Admissions to this program will occur only in the Fall term. Information concerning specific admissions policy and procedures can be obtained from Dr. Carl Balado (407) 823-2054 or Dr. David Mealer (407) 823-2068.

Total Minimum Semester Hours Required: 66

DOCTOR OF EDUCATION DEGREE PROGRAMS

Doctor of Education (Ed.D.) degree programs are offered in two areas. One is Educational Leadership for students who are interested in management and leadership positions in educational organizations. The second is Curriculum and Instruction, designed for those interested in teaching in a college of education, teaching a content field at the community college level, becoming a school district leader in curriculum and instruction, or performing instructional design tasks in military or business settings.

Admission Policy

Admissions will occur two times a year, Fall and Spring. Completed files must be on campus by September 15 for Spring admission screening and February 15 for Fall admission screening. Admitted students may begin course work during the first new semester after admission.

Completed files include: 1) completed UCF Graduate School application form, 2) transcripts from all post-secondary schools previously attended, 3) GRE scores, 4) three letters of recommendation, 5) professional resume, 6) statement of professional goals, 7) other information that may be requested after the file is started.
Students interested in financial support through fellowship programs must have completed application files by December 15. Fellowships are typically awarded in the previous spring for students enrolling for the first time in the Fall Semester of the next academic year. Graduate assistantships may be granted for those who apply by February 15 for the following academic year.

Admission Requirements

1. Undergraduate GPA on the last 60 semesters hours of 3.0 (on a 4.0 scale); AND
2. A master's degree from an accredited institution; AND
3. Minimum score of 1000 on the General Graduate Record Examination (verbal/quantitative scores combined); AND
4. Recommended for admission by the appropriate major program area committee; AND
5. Completion of at least three years of full-time teaching or comparable experience.

NOTE: Those applicants who do not meet admission criteria may appeal to the College of Education Graduate Standards and Curriculum Committee for consideration. For those who do not meet the GRE requirement, a second score is required, and one of the two scores must be 940 or higher for consideration for provisional admission.

Degree Requirements for Curriculum/Instruction

1. Prerequisites
   (EDG 6223, EDF 6481, EDF 6401, or Equiv.) 9 semester hours
2. Curriculum/Instruction Core
   (EDF 7232, EDG 7221, EDG 7356, EDG 7692) 12 semester hours
   All core courses and the core examination must be completed in the first six semesters of enrollment in the doctoral program.
3. Specialization Area
   (includes selected courses in Teaching Field or Cognate, Instruction, Foundations, and Educational Leadership) Minimum 45 semester hours
4. Research and Data Analysis (EDF 7403, EDF 7463) 6 semester hours
5. Dissertation Minimum 18 semester hours
6. Pass all required examinations and successfully defend dissertation.
7. Have an overall 3.0 GPA on all graduate work included in the planned program.

Degree Requirements for Educational Leadership

1. Prerequisite Courses (as necessary)
2. Educational Leadership Core Courses 16 semester hours
3. Cognate Courses Minimum 6 semester hours
4. Area of Specialization Minimum 15 semester hours
5. Research and Data Analysis Minimum 12 semester hours
6. Dissertation Minimum 20 semester hours
7. Pass all examinations and successfully defend dissertation.
8. Have an overall 3.0 GPA on all graduate work attempted.

Transfer Credit

The number of transfer credit hours applied to the course requirements for a doctoral degree may not exceed 30 semester hours. Transfer credit will include graduate hours awarded by an accredited institution toward a master's degree and post-master's degree work. The transfer credit allowed will be determined on a case by case basis by the graduate advisor and program coordinator.

Post-Master's degree credit taken at UCF prior to admission to the program is considered to be transfer credit.
Candidacy Examinations

1. Examinations are normally taken no sooner than the last semester of the student's course work and must be completed prior to admission to candidacy. (The exception is for C & I students who take a qualifying examination after completing the C & I core courses.)

2. Examinations will be scheduled near the tenth week of the Fall and Spring Semesters. Examinations in the Summer Term must be arranged by the student with the coordinator of the respective program.

3. All doctoral candidates will be required to write in three areas; these are:
   a. Curriculum and Instruction
      Specialization/Teaching Field  5-hour examination
      Curriculum/Instruction        3-hour examination
      Research/Data Analysis       3-hour examination
   b. Educational Leadership
      General Administration/Supervision  5-hour examination
      Area of Specialization        3-hour examination
      Research/Data Analysis        3-hour examination

4. Students must be enrolled in the University during the semester an examination is taken.

Continuous Attendance

Graduation policy allows students to fulfill degree requirements as listed in the UCF Catalog in force during the student's most recent period of continuous attendance. Because students must occasionally interrupt their attendance for a brief period, they will be considered to have interrupted their attendance only if the interruption is for three or more consecutive terms, including Summer. Under these circumstances, students will lose the option of fulfilling degree requirements under earlier catalogs. To avoid problems associated with maintaining graduate status, doctoral students are encouraged to enroll each semester, including summers.

Residency Requirement

Each student shall complete two contiguous resident semesters in full-time graduate student status. “Full-time” is defined as being enrolled for a minimum of nine hours per semester.

Admission to Candidacy

Before students can enroll in dissertation hours, they must apply for admission to candidacy. To be eligible for candidacy, students must have completed all degree course requirements, passed all candidacy examinations, and successfully defended the dissertation proposal.

Status as a Candidate

1. Enrollment
   Students must continue to enroll for at least one semester hour of dissertation credit each semester after attaining candidacy status until the oral defense of the dissertation has been successful. Post-candidacy enrollment is allowed for a maximum of four years, subject to the seven-year time limitation.

2. Time Limitation
   A student has seven years from the date of admission to the doctoral program to complete the dissertation. If the seven-year limit is exceeded, the candidacy examinations may need to be repeated.

3. Dissertation Committee Composition
   A committee, which will consist of a minimum of four faculty members (three from the College of Education and one from outside the college), must be approved by the Dean of the College of Education and the Provost.

4. Dissertation
   Dissertations are required in all doctoral programs. College of Education candidates will follow the APA (American Psychological Association) guidelines.
Candidates

Examinations are normally taken immediately after the first term with the exception of the English exam. Work must be completed prior to the examination and must be submitted on time. English examinations will be scheduled at the first and third years of the academic cycle. The English examination will be written at the end of the second year. The second year will be divided into two semesters of examination: 3

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Semester</td>
<td>Second Semester</td>
<td>Third Semester</td>
</tr>
</tbody>
</table>

Examinations are normally taken immediately after the first term with the exception of the English exam. Work must be completed prior to the examination and must be submitted on time. English examinations will be scheduled at the first and third years of the academic cycle. The English examination will be written at the end of the second year. The second year will be divided into two semesters of examination:

- First Semester
  - Examinations
  - Coursework
  - Examination
- Second Semester
  - Examinations
  - Coursework
  - Examination
- Third Semester
  - Examinations
  - Coursework
  - Examination

A student must pass in the University during the semester of examination.

Continuing Attestation

Continuing Attestation allows students to fulfill degree requirements at a lower academic standard and continue their studies. Students who have attempted to fulfill the degree requirements may be required to complete additional coursework. Under these circumstances, the student will be required to complete the additional coursework.

Research and Development

Research and Development are performed to improve educational standards and contribute to the advancement of knowledge.

Admission to Candidacy

Candidates who are not eligible for admission to candidacy may appeal to the Dean of the College of Education and Education. The appeals must be submitted in writing within one year of the candidate's candidacy.

Statement of Candidacy

I, [Candidate's Name], do hereby solemnly swear that I am qualified for admission to candidacy in accordance with the regulations of the College of Education and Education.

Committees

Committees are appointed by the Dean of the College of Education and Education. They are responsible for overseeing the progress of candidates.

Discretion

Discretion is given to the Dean of the College of Education and Education. This discretion may be exercised in the best interests of the candidate and the College.

Approval

Candidates who are approved for candidacy must submit a statement of candidacy to the Dean of the College of Education and Education. The statement must be submitted in writing within three months of the candidate's candidacy.

- Industrial Engineering
- Manufacturing Engineering
- Operations Research
- Product Assurance Engineering
- Simulation Systems

Department of Mechanical and Aerospace Engineering (MAE)
- Aerospace Systems
- Materials Science & Engineering
- Mechanical Systems
- Thermo-Fluids

COLLEGE ADMISSION REQUIREMENTS

In addition to meeting the minimum university criteria, each applicant is required to satisfy college and department admission requirements. Specific department requirements are listed in each departmental section. Meeting the admissions requirements does not automatically guarantee admission, particularly to the doctoral programs, since enrollments may be restricted by limited college or department resources.
Masters Programs Admission Requirements:
1. A minimum GPA of 2.8 or better during the last two years of undergraduate degree work (independent of the GRE score) is required.
2. Applicants for Masters programs must present baccalaureate credentials appropriate to the specialized area of study including mathematics through differential equations.
3. All applicants whose native language is not English must score at least 550 on the TOEFL test.

Doctoral Programs Admission Requirements:
1. Each applicant is expected to have a masters degree in engineering (or related discipline) awarded by a recognized institution and meet the departmental admission requirements.
2. The applicant must successfully complete a Ph.D. Qualifying Examination conducted by the department. A student is normally given only one opportunity to pass the examination, but a second attempt may be approved by the department. The examination is normally taken within the first year of study beyond the masters degree.

COLLEGE DEGREE REQUIREMENTS
In addition to meeting the minimum university criteria (see University Graduate Regulations), each degree candidate must also satisfy college and department degree requirements. Specific department requirements are listed in respective departmental sections.

Thesis Option, Masters Degree Requirements
1. A minimum of thirty semester hours of approved course work including six hours of thesis credits is required.
2. No more than six hours of thesis credits will be applied toward degree requirements.
3. At least 15 credit hours must be from 6000-level courses.
4. A maximum of 9 semester hours of graduate credit may be transferred into the program from UCF post-baccalaureate or SUS work. Transfer credits taken at other institutions, not in the SUS, are limited to 6 semester hours. Only grades of 'B' or better can be transferred.
5. A maximum of 6 credits of 4000-level courses may be applied toward a masters degree, 3000-level courses are not acceptable.
6. A minimum 'B' average must be maintained in the program of study and no more than two 'C' grades are allowed.
7. A written thesis and final oral defense are required.
8. A maximum of 6 semester hours of Independent Study may be used toward the degree. Directed research credits may not be applied toward the degree.

Non-Thesis Option, Masters Degree Requirements
Most departments within the College of Engineering offer a 36 semester hour, non-thesis option intended primarily for part-time students. The program requirements are the same as for the thesis option except that the thesis requirement is replaced by 12 credit hours of course work. An end-of-program comprehensive examination, oral or written, is required.

Doctoral Degree Requirements
1. A minimum of 84 semester hours beyond the baccalaureate degree, including 24 semester hours of dissertation credits, are required.
2. At least 6 semester hours of course work outside the College of Engineering and no more than 12 hours of independent study may be used to satisfy degree requirements.
3. Up to 36 semester hours of credit, including a maximum of 6 credits of thesis, may be transferred from the masters program. There is no limit on the number of post-masters credits that may be transferred into the Ph.D. program. The transfer credits from the masters degree or post-masters work will consist of a maximum of 6 hours of 4000-level work, no 3000-level courses, and no courses with grades less than 'B'.
4. A written dissertation and final oral defense are required.
FEEDS (Florida Engineering Education Delivery System)

FEEDS is a Florida statewide system whereby graduate level engineering courses are delivered via video tape to cooperating university centers and selected industrial sites. Most graduate courses offered each semester are available through FEEDS. A student taking courses through FEEDS must meet the same requirements as a student on campus and will earn the same credit as if attending on campus. Courses delivered by the system may contribute to graduate degrees in engineering.

A student need not be enrolled in a graduate degree program in order to take a FEEDS course. A student who intends to seek admission to a graduate program should be aware that no more than 9 credit hours of courses may be transferred into a degree seeking program. Certain courses may have the requirement that the student come to the main campus for exams or laboratory participation.

For information concerning FEEDS, consult the UCF-FEEDS catalog (published each semester) or contact the Director of UCF-FEEDS at (407) 823-2455.

Civil Engineering

Graduate work and research in Civil Engineering reflect the very broad nature of the field, which has as its purpose the enhancement of the infrastructure of society. The educational program includes course work in structural analysis and design, geotechnical engineering and foundations, transportation planning and operations, construction engineering, and water resources. Faculty research interests include geotechnical studies of subsurface conditions. Other geotechnical interests relate to soil testing and design of advanced testing devices. Research in transportation is carried out through the Transportation Systems Institute. In the structures area, research interests include structural dynamics, nonlinear structural analysis and software development and reinforced concrete. Students completing the program find positions in consulting firms, construction and construction-related industries, and in city, county, state, and federal government agencies.

Environmental Engineering

The Environmental Engineering program concerns itself with prevention and correction of pollution effects on the natural and man-made environments. Strong faculty research interests have resulted in a program of distinction for the college and the university. Research monies support students in the general areas of water treatment, wastewater treatment, solid and hazardous waste management, atmospheric pollution control, community noise prediction/abatement, and stormwater management. Faculty members engage in both applied and basic research.

Students with strong science or engineering backgrounds have a variety of research areas and levels of interest which they can pursue. Those completing the program find job opportunities in federal, state and local governments, consulting and industry.
Degree Programs

The Civil and Environmental Engineering Department offers the Master of Science in Civil Engineering (MSCE), Environmental Engineering (MSEnve), and the Master of Science (MS) degree in Structures and Foundations, Transportation Systems, Environmental Sciences and Water Resources. The MS degree programs are designed primarily for students who have not received an undergraduate degree in engineering. The Department also offers Doctor of Philosophy (Ph.D.) degrees in Civil and Environmental Engineering.

All student programs of study must have no more than 6 hours of 4XXX level courses. More than one-half of the courses must be in the 6XXX level. The State University System of Florida requires that the student take the Graduate Record Examination (GRE, aptitude section only), prior to being admitted as a regular graduate student.

There are two options for the master degree program, the thesis option and the research report option. The thesis option requires a thesis that is equivalent to 6 hours out of a total of 30 hours. It is the required option for students on contracts and grants as well as any student receiving department financial support.

The research report option requires a research report that is equivalent to 3 hours out of a total of 33 hours. This option is primarily suitable for part-time, non-resident students. The research report should meet thesis publication guidelines.

Master of Science in Civil Engineering (M.S.C.E.)

The Department offers a Master of Science in Civil Engineering (M.S.C.E.) degree for students who have an undergraduate degree in Civil Engineering or another closely related field of engineering. The degree requires 33 semester hours of acceptable graduate work which includes a Research Report (3 semester hours) or 30 semester hours of acceptable graduate work which includes a Thesis (6 semester hours). The student develops an individual program of study with a Faculty Advisor.

Research Report or Thesis 3 or 6 Semester Hours

TOTAL HOURS REQUIRED 33 or 30 Semester Hours
Master of Science (M.S.) Degree in Transportation Systems

The Department offers a Master of Science (M.S.) degree in Transportation Systems to students with appropriate baccalaureate backgrounds. Students should have background (or articulation course work) in the following areas:

Prerequisites
- Probability and Statistics for Engineers (STA 3032)
- Engineering Economic Analysis (EGN 3613)
- Operations Research (ESI 4312)
- Transportation Engineering (TTE 4004)
- Mathematics through Differential Equations (MAC 3311, 3312, 3313; MAP 3302)
- Physics I with Calculus (PHY 3048)

Required Courses
- TTE 5204 Traffic Engineering 15 Semester Hours
- TTE 5205 Highway Capacity 3 hours
- TTE 5805 Geometric Design of Transportation Systems 3 hours
- TTE 6625 Mass Transportation Systems 3 hours
- TTE 6526 Planning and Design of Airports 3 hours

Electives
- 15 or 9 Semester Hours

Research Report or Thesis
- 3 or 6 Semester Hours

TOTAL HOURS REQUIRED
- 33 or 30 Semester Hours

Master of Science (M.S.) Degree in Water Resources

The Water Resources program is offered to students with appropriate baccalaureate backgrounds and should include the following articulation course work. Each student must have an individual program of study approved by their faculty committee.

Prerequisites
- Geotechnical Engineering (CEG 4101C)
- Probability and Statistics for Engineers (STA 3032)
- Hydrology (CWR 4101C)
- Hydraulics (CWR 4201C)
- Engineering Economic Analysis (EGN 3613)

Required Courses
- CWR 5545 Water Resources Engineering 12 Semester Hours
- CWR 6125 Groundwater Hydrology 3 hours
- CWR 6235 Open Channel Hydraulics 3 hours
- CWR 6535 Modeling Water Resources Systems 3 hours

Electives (approval of major advisor)
- 18 or 12 Semester Hours

Research Report or Thesis
- 3 or 6 Semester Hours

TOTAL HOURS REQUIRED
- 33 or 30 Semester Hours

Master of Science (M.S.) Degree in Structures and Foundations

This option is offered to students with appropriate baccalaureate backgrounds which includes articulation and coursework as follows:

Articulation (as approved by the student’s advisor and committee)
- Mathematics through Differential Equations (MAC 3311, 3312, 3313; MAP 3302)
- Probability and Statistics for Engineers (STA 3032)
- Engineering Analysis (EGN 3420)
- Engineering Economics (EGN 3613)
- Physics I with Calculus (PHY 3048)
Engineering Analysis - Statics and Dynamics (EGN 3310, EGN 3321)
Mechanics of Materials (EGN 3331)
Structural Engineering Analysis (CES 4102)
Structural Steel Design (CES 4605)
Structural Concrete Design (CES 4709)
Geotechnical Engineering I (CEG 4101C)
Fluid Mechanics (EGN 3353)
Hydraulics (CWR 4201C)
Engineering and the Environment (EGN 3704)

**Required Courses**
(take 5 of these 6 courses)

(Plus the course not chosen as required or other courses as approved by the student's advisor and committee)

**Thesis** 6 Semester Hours
**Research Report** 3 Semester Hours

**TOTAL HOURS REQUIRED** 33-30 Semester Hours

**Master of Science in Environmental Engineering (M.S. Env.E) Degree**

The Department offers a Master of Science Degree in Environmental Engineering (M.S. Env.E.) for students who have an undergraduate degree in Environmental Engineering or any other closely related field of engineering and thus require a minimum of articulation. The student works out an individual program of study with a Faculty Advisor to make sure that all prerequisites are met.

**CORE Courses** 15 Semester Hours

**Electives** 18-12 Semester Hours

**Research Report or Thesis** 3 or 6 Semester Hours

The remaining course work is selected from sub-discipline courses

TOTAL HOURS REQUIRED 33 or 30 Semester Hours

133
DOCTOR OF PHILOSOPHY/Ph.D.

The Ph.D. degree is primarily intended for a student with a Master's degree in Civil or Environmental Engineering or a closely related discipline. The Civil Engineering program is intended to allow a student to study in depth, with emphasis on research, structural analysis and design, geotechnical engineering and foundations, transportation planning and operations, and water resources. The Environmental Engineering program is intended to allow a student to study and conduct research in the general areas of water treatment, waste water treatment, solid and hazardous waste management, atmospheric pollution control, community noise abatement, and stormwater management.

Admission

In addition to satisfying regular University admissions criteria, the student must have a master's degree in Civil or Environmental Engineering or a closely related discipline from a recognized institution. Prospective applicants should forward a detailed resume and a letter with research interests for department review. In addition, the student must pass a Ph.D. Qualifying Examination in one of the departmental disciplines. This examination is normally taken within the first year of study beyond the master's degree.

Degree Requirements

The Ph.D. degree requires a minimum of 84 semester hours beyond the bachelor's degree, 30 of which will be dissertation credits and at least 9 of which must be graduate level mathematics courses. A maximum of 36 semester hours, including 6 thesis hours, may be transferred from a master's degree toward these requirements. An additional 9 semester hours of post-masters work may be transferred. A program of study must be developed with an advisory committee and meet with departmental approval at the beginning of the Ph.D. program, at which time transfer credit will be evaluated on a course by course basis.

Examinations

In addition to the Qualifying Examination, the student must pass a Candidacy Examination and a Dissertation Defense Examination. The Candidacy Examination is normally taken near the end of the coursework and consists of written and oral presentations of a research proposal. The Dissertation Defense Examination is an oral examination taken as defense of the written dissertation.

The Electrical and Computer Engineering Department supports graduate degree programs and research in the major sub-discipline areas of electrical engineering, computer engineering, and optical sciences and engineering. The faculty include members with national and international reputations in teaching and research. Our facilities are among the best with a modern building and well equipped laboratories.

Research interests of the faculty include antennas, microwave and millimeter wave circuits and devices, communication systems, digital signal/image processing, IFF devices, electromagnetic theory, speech processing, VLSI design, spread spectrum systems, SAW and ACT devices, spectral estimation, solid state device modeling and CAD techniques, communication networks, integrated services digital networks, neural networks, systems and controls, robotics, robust control, computer control, microelectronics semiconductors, thin films, power system stability, bipolar device modeling, solid state lasers, optical propagation, fiber optics, optical signal processing, laser induced damage, optical testing, diffractive optics, phase conjugation, infrared detectors, fourier optics, lens design, non-linear optics, power electronics, digital systems, computer architecture, software engineering, expert systems, simulation, and computer vision.

Degree Programs in Electrical Engineering

The Department of Electrical and Computer Engineering offers the Master of Science in Electrical Engineering degree (M.S.E.E.), the Master of Science degree (M.S.), and the Doctor of Philosophy (Ph.D.).

**MASTER OF SCIENCE IN ELECTRICAL ENGINEERING - M.S.E.E.**

The M.S.E.E. degree is intended for students with a baccalaureate degree in electrical engineering or related field from an approved institution. Admission requirements include a minimum grade point average of 3.0 (A = 4.0) on the last 60 semester hours of the bachelor's degree and a minimum combined scomo of 1000 on the General test of the Graduate Record Examination. Students with a degree from an international institutional must score 550 or better on the Test of English as a Foreign Language.
Students with a grade point average of less than 3.0 may be admitted on a trial program basis in some circumstances. Specific information can be obtained from the department. Students with a non-electrical engineering degree must have had the equivalent course work or satisfy the following articulation program:

- Mathematics through Differential Equations (MAP 3302 or equivalent)
- Physics with Calculus (PHY 3048, PHY 3049 or equivalent)
- Electronics (EEL 3307 or equivalent)
- Communications (EEL 3552 or equivalent)
- EM Fields (EEL 3470 or equivalent)
- Digital Systems (EEL 3342 or equivalent)

Additional courses may also be required to correct any undergraduate course deficiencies.

**Thesis Option Degree Requirements**

This option requires a minimum of thirty semester hours of approved course work. Program requirements include:

a. At least 6 credits from one of the following specialization areas:
   - Communications
   - Controls
   - Digital Signal Processing
   - Electromagnetics
   - Electronics
   - Electro-optics
   - Solid State and Microelectronics

b. One course from any other 2 areas listed in Part a (6 hours total).

c. No more than 6 credits of thesis will count toward the degree requirement.

d. The remainder of the program is chosen in conjunction with an advisor in an approved program of study.

e. At least 15 credit hours must be from 6000 level courses.

Detailed information on the specializations is available in the department. Students must have an advisor appointed and an official program of study submitted before completing six semester hours of course work.

**Non-Thesis Degree Requirements**

This option requires a minimum of 36 semester hours of course work and is intended primarily for part-time students. Program requirements are the same as the thesis option except that the thesis requirement is replaced by 12 hours of course work, and a final comprehensive examination is required.

**DOCTOR OF PHILOSOPHY- P.h.D.**

The Ph.D. degree is primarily intended for students with a master’s degree in electrical engineering or a closely related discipline who wish to pursue a career in research or academia. Specializations include communications, digital signal processing, controls, electro-optics, electromagnetics, electronics, and solid-state/microelectronics.

**Admission**

Students must satisfy university requirements and have completed a master’s degree in electrical engineering or a closely related discipline, with a minimum grade point average of 3.5 of a possible 4.0, and a minimum of 1200 on the combined scores of the General test of the Graduate Record Examination.

Students are admitted initially on a pre-Ph.D. basis and required to pass a Qualifying examination. Then the student must form a dissertation committee and submit an approved program of study before being admitted to degree seeking status.
Degree Requirements

The Ph.D. degree requires a minimum of 84 semester hours of graduate course work, 24 of which will be dissertation hours. Graduate course work includes 5000 or higher level courses, with a maximum of 12 hours of independent study. Up to 6 hours of 4000 level work are acceptable if transferred from a master’s degree program. At least 6 hours must be taken outside a college of engineering. There is a residency requirement of two continuous semesters in full-time graduate student status (minimum of 9 semester hours) after acceptance to graduate program at UCF. A program of study must be developed with an advisory committee and meet with departmental approval at the beginning of the Ph.D. program, at which time transfer credit will be evaluated on a course by course basis. The degree must be completed within seven years from the date of admission to doctoral program.

Transfer Credits

A limited number of credit hours may be transferred from a master’s degree toward these requirements, including a maximum of 6 hours of 4000-level courses; no 3000-level courses; and no courses with grades less than ‘B’.

Examinations

In addition to the Qualifying Examination discussed above, the student must pass a Candidacy Examination and a Dissertation Defense Examination. The Candidacy Examination is normally taken near the end of the course work and consists of a written and oral presentation of a research proposal. The Dissertation Defense Examination is an oral examination taken in defense of the written dissertation.

Degree Programs in Computer Engineering

The Department of Electrical and Computer Engineering offers the Master of Science in Computer Engineering (M.S.Cp.E.), and the Doctor of Philosophy (Ph.D.) degree.

Master of Science in Computer Engineering (M.S.Cp.E.)

This degree requires a baccalaureate degree in Computer Engineering or a closely related discipline. Minimum requirements for regular status are a 3.0 grade point average (GPA) in the last 60 hours of the undergraduate degree program and a minimum of 1000 in the quantitative and verbal portions of the Graduate Record Examination (GRE). For students whose native language is not English, a minimum score of 550 on the TOEFL is required. A post-baccalaureate trial program of 9 semester hours may be allowed for students with a grade point average of less than 3.0 but greater than 2.8.

Thesis Option Degree Requirements

This program requires 30 semester hours, at least half of which must be at the 6000 level and will include 6 hours of thesis credit. The prerequisites for the program are shown below. The CORE requirements for all students will be met by Required Courses. A graduate committee chair must be formed prior to completing 9 hours of coursework. Non-CORE courses taken before a student is in regular status and has a chair may not be accepted towards the M.S.Cp.E. The entire graduate committee must be appointed and a thesis abstract provided to them prior to registering for thesis credit.

Prerequisites

Mathematics through Differential Equations (MAP 3302)
College Physics with Calculus (PHY 2049C)
Computer Organization (EEL 4767)
Probability and Statistics (STA 3032)
Numerical Methods & Matrix Algebra (EGN 3420)
Engineering Data Structures (EEL 4851)
Digital Logic Circuits (EEL 3342C)
Additional courses may be required to correct deficiencies.
Required Courses (CORE)

EEL 5881  Software Engineering I  3 hours
EEL 5704  Introduction to Digital Systems  3 hours
EEL 5874  Expert Systems & Knowledge Engineering  3 hours

Semester Hours 9

Non-Thesis Degree Requirements

This option requires a minimum of 36 semester hours of course work and is intended primarily for part-time students. Program requirements are the same as for the thesis option except that the thesis requirement is replaced by 12 hours of course work, and a final comprehensive examination is required.

Doctor of Philosophy (Ph.D.)

The Ph.D. degree is primarily intended for students with a master's degree in Computer Engineering or a closely related discipline who wish to pursue a career in research or academia. Specializations include digital systems, software engineering, expert systems and machine intelligence, image processing and engineering systems analysis.

Admission

Students must satisfy university requirements and have completed a master's degree in Computer engineering or a closely related discipline, with a minimum grade point average (GPA) of 3.5 of a possible 4.0, and a minimum of 1000 on the combined scores of verbal and quantitative portions of the Graduate Record Examination (GRE).

Students are admitted initially on a pre-Ph.D. basis and required to pass a Qualifying Examination. Then the student must form a dissertation committee and submit an approved program of study before being admitted to degree seeking status.

Degree Requirements

The Ph.D. degree requires a minimum of 84 semester hours of graduate course work, 24 of which must be dissertation hours. Graduate course work includes 5000 or higher level courses, with a maximum of 12 hours of independent study. Up to 6 hours of 4000 level work are acceptable if transferred from a master's degree program. At least 6 hours must be taken outside a college of engineering. There is a residency requirement of two continuous semesters in full-time graduate student status (Minimum of 9 semester hours) after acceptance to the graduate program at UCF. A program of study must be developed with an advisory committee and meet with departmental approval at the beginning of the Ph.D. program, at which time transfer credit will be evaluated on a by course basis. The degree must be completed within seven years from the date of admission to the doctoral program.

Transfer Credits

A limited number of credit hours may be transferred from a master’s degree toward these requirements, including a maximum of 6 hours of 4000-level courses; no 3000-level courses; and no courses with grades less than ‘B’.

Examinations

In addition to the Qualifying Examination discussed above, the student must pass a Candidacy Examination and a Dissertation Defense Examination. The Candidacy Examination is normally taken near the end of the course work and consists of a written and oral presentation of a research proposal. The dissertation Defense Examination is an oral examination taken in defense of the written dissertation.
Degree Programs in Optical Sciences and Engineering

Admission

For admission into the MS program, applicants must have completed a Bachelor’s degree with a major in electrical engineering, physics, optics, mathematics, or other appropriate discipline with a minimum grade point average of 3.2 out of 4.0 in the last 60 hours of undergraduate studies. For admission into the Ph.D. Program, applicants must have completed a master’s degree with a major in electrical engineering, physics, optics, mathematics, or other appropriate discipline with a minimum grade point average of 3.5 out of 4.0 in the graduate program. A cumulative Graduate Record Examination (GRE) score of 1100. Foreign students whose native language is not English will be required to have a minimum score of 550 on the TOEFL examination.

Articulation

Undergraduate articulation courses may be required for students with BS and/or MS degrees in fields other than electrical engineering, physics, and optics. The articulation courses will be determined by the graduate coordinator in consultation with student’s research advisor on a case by case basis.

Master’s Program - M.S.

The thesis option program consists of 30 credit hours, of which 6 are required thesis hours. The remaining 24 hours are divided into a minimum of 15 hours in optical science and engineering, a minimum of 3 hours of mathematics, and up to 6 hours of general sciences and engineering electives. The student must conduct a program original scientific research or some other investigation involving creative element and to submit a written thesis detailing these investigations. An oral defense and examination of the thesis is required.

The non-thesis option program consists of 36 credit hours divided into a minimum of 24 hours of optical science and engineering, a minimum of 3 hours of mathematics, and up to 9 hours of general sciences and engineering electives. A final comprehensive examination is required.

DOCTORAL PROGRAM - Ph.D.

The program consists of 84 credit hours, of which 24 are required dissertation hours. The remaining 60 hours are divided into 24 hours of optical science and engineering, 12 hours of electrical engineering, sciences, or mathematics electives, and up to 24 hours of independent studies and research.

Admission to the Doctoral status is contingent upon passing Qualifying Examination consisting of both written and oral portions which covers all material included in the core courses. A Candidacy Examination covering the course work and the general knowledge in the student’s specialty area is required. The student must submit a written Dissertation Proposal describing the dissertation topic to be chosen by the candidate. An oral examination covering the details of the student’s research project will be conducted. Upon completion of the original scientific research program, a written Dissertation describing the student’s publishable research must be submitted. An oral defense of the dissertation is required.

The department's graduate programs have developed to support the emergence of the Central Florida area as one of the national centers of high technology as well as service industry. The original Master of Science in Engineering (M.S.E.) offerings included Industrial Engineering and Manufacturing Engineering. The original Master of Science (M.S.) offering included Computer Integrated Manufacturing, Engineering Management, and Operations Research. In 1984, the department began offering the nationally unique degree in Simulation Systems. This degree was specifically developed to support the Center of Excellence in Simulation and Training established in the Central Florida region. In 1989, the department received Board of Regents permission to offer Florida's first graduate degree in Product Assurance Engineering. This degree serves the increasing demand for individuals trained in the areas of productivity and quality.

The department's emergence as one of the America's leading research units began in 1987 with a multi-year grant from the Florida High Technology and Industry Council to a consortium formed between General Electric Company, Embry-Riddle Aeronautical University, and UCF's Industrial Engineering Department. This grant was to support the development of an Intelligent Simulation and Training System (ISTS) to train air traffic controllers. These efforts are producing new knowledge about generic Intelligent Simulation and Training Systems. The project has supported research by 9 faculty members, 11 Ph.D. students, and 11 M.S. students. As a result of this work, multiple proposals have been prepared and submitted, including a $15 million proposal to the National Science Foundation's Engineering Education Coalition. In 1988, the department became one of the subcontractors to a multi-year research effort involving the University of Oregon and the Florida Solar Energy Center, sponsored by the U.S. Department of Energy. The purpose of this effort is to define how to achieve Energy Efficient, Affordable Industrialized Housing in the 21st Century. In 1989, the department became part of a multi-year effort with NASA to improve the efficiency and productivity of space shuttle processing operations. In 1990, the department was selected to offer M.S. in Engineering Management to selected NASA engineers at the Kennedy Space Center. Currently the program has an enrollment of 120 NASA engineers.

In 1991, the department ranked sixth among Industrial Engineering departments in the country in total external supported research, third in graduate enrollment, eighth in faculty size, and twelfth in enrollment of Ph.D. students. The department ranks first among Industrial Engineering departments in Florida in all categories. Among UCF's academic departments, the Industrial Engineering Department ranks first in total external support. The Central Florida Chapter of the Florida Engineering Society, selected the Industrial Engineering Department as the 1993 "outstanding public sector organization of the year".

Degree Programs

The Department of Industrial Engineering and Management Systems offers Master of Science in Engineering degrees in Industrial Engineering (MSIE) and Manufacturing Engineering (MSMfgE); Masters of Science (M.S.) degrees in Computer Integrated Manufacturing, Engineering Management, Operations Research, Product Assurance Engineering, and Simulation; and the Doctor of Philosophy (Ph.D.) degree.
Degree Requirements

The Master of Science in Engineering degrees require an undergraduate degree in Industrial Engineering or a closely related discipline. They are offered as a 30 semester hour program that includes a Thesis. The Master of Science options are available with thesis (30 semester hours) or without thesis (36 semester hours).

A program of study, satisfying the requirements of a departmental discipline, must be developed with a faculty advisor and meet with departmental approval. A student with an undergraduate degree outside the selected departmental discipline may be required to satisfy an articulation program. Substitutions for required courses must meet with the approval of the advisor and the department.

MASTER OF SCIENCE IN ENGINEERING - M.S.E.

Industrial Engineering (M.S.I.E.) 30 semester Hours

This degree requires a Bachelor of Science in Industrial Engineering as a prerequisite.

Simulation Systems (M.S.) 30-36 Semester Hours
The Master of Science degree in Simulation Systems is designed to prepare individuals with undergraduate degrees in engineering, mathematics, or science for careers in the simulation field. There are two alternate tracks in this option. The Simulators and Training System Track and the Simulation Modeling and Analysis Track.

Prerequisites (both tracks)
Mathematics through Differential Equations (MAP 3302)
Probability and Statistics for Engineers (STA 3032)*
Computer Programming

*May be satisfied by taking STA 5156 as part of the program of study.

The Simulators and Training Systems Track
This track of the Masters in Simulation program responds to the needs of professionals in the training simulation (simulator) industries. Students in this track will have an opportunity for first-hand experience in the simulation field through UCF's Institute of Simulation and Training.

STA 5265 Experimental Design and Response     3 hours
EIN 6971 Thesis (optional)                     6 hours

Electives                                       3-15 Semester Hours

DOCTOR OF PHILOSOPHY DEGREE - Ph.D. in INDUSTRIAL ENGINEERING

The Ph.D. is primarily intended for a student with a master’s degree in industrial engineering or a closely related discipline. The program is intended to allow a student to study in depth, with emphasis on research, industrial engineering, manufacturing, engineering management, operations research, or simulation and training.

Admission

Students must satisfy regular university admissions criteria: Minimum TOEFL score of 550 (applicants whose native language is not English only); minimum GPA 3.0 in last 60 semester hours of undergraduate studies or minimum GRE score of 1000 combined verbal-quantitative portion. In addition, the student must have a masters degree in industrial engineering or a closely related discipline from a recognized institution. Before admission to the doctoral program, students must complete any needed articulation course work and pass a Ph.D. Qualifying Examination. This examination is normally taken within the first year after all articulation work is completed.

Degree Requirements

The Ph.D. degree requires a minimum of 84 semester hours of graduate course work, 24 of which will be dissertation hours. Graduate course work includes 5000 or higher level courses, with a maximum of 12 hours of independent study. Up to 6 hours of 4000 level work are acceptable if transferred from a master’s degree program. At least 6 hours must be taken outside a college of engineering. There is a residency requirement of two continuous semesters in full-time graduate student status (minimum of 9 semester hours) after acceptance to graduate program at UCF. A program of study must be developed with an advisory committee and meet with departmental approval at the beginning of the Ph.D.
program, at which time transfer credit will be evaluated on a course by course basis. The degree must be completed within seven years from the date of admission to doctoral program.

Transfer Credits

A maximum of 36 semester hours, including up to 6 thesis hours, may be transferred from a master’s degree toward these requirements. Limitations: a maximum of 6 hours of 4000-level courses; no 3000-level courses; and no courses with grades less than “B”. Any number of additional semester hours of post-masters work may be transferred.

Examinations

In addition to the Qualifying Examination discussed above, the student must pass a Candidacy Examination and a Dissertation Defense Examination. The Candidacy Examination is normally taken near the end of the course work and consists of a written and oral presentation of a research proposal. The Dissertation Defense Examination is an oral examination taken in defense of the written dissertation.

Prerequisites

Students must have background (or articulation course work passed with a grade of B or better) in the following areas:

- A high level structured programming language
- Probability and Statistics (STA 3032)
- Work Measurement (EIN 3314)
- Industrial Facilities Planning (EIN 4364)
- Manufacturing Engineering (EIN 4391)

Required Courses

The following areas must form part of the Student’s program of study. Substitute courses may be approved by the department’s Ph.D. Committee.

Fields of Emphasis and Research

Major fields of emphasis in the Mechanical and Aerospace Engineering Department include aerospace systems (experimental and computational aerodynamics, turbulent flow, flight dynamics and simulation, optimal control and attitude dynamics of space vehicles, aerospace design), materials science and engineering (corrosion, wear, surface science, thin films, opto-electronic and composite materials), mechanical systems (experimental mechanics, finite and boundary elements, tribology, fracture, nonlinear dynamics, nondestructive evaluation), and thermo-fluids (laser machining, turbomachinery, two-phase flow, computational thermofluids, HVAC, energy conservation). Current research projects in aerospace systems include design of an assured crew return vehicle, application of laser doppler anemometry to supersonic flow, and design of a heavy gas wind tunnel. Current research projects in materials science and engineering include characterizing wear and environmentally induced cracking, laser surface treatment, solar cells and crystal growth. Current research projects in mechanical systems include laser-based techniques for measurement of surface roughness and displacement fields in tribosystems, finite element simulation of dynamic crack tip stress fields and of penetration by composite projectiles, non-linear dynamics of composite and smart structures, and nondestructive evaluation methods. Current research projects in thermo-fluids include computer-aided laser machining, laser-material interactions, heat pipes, phase change materials and combustion studies.

Degree Programs

The Mechanical and Aerospace Engineering Department (MAE) offers the Master of Science in Mechanical Engineering (MSME) and the Doctor of Philosophy (Ph.D.) degrees with options in Aerospace Systems, Materials Science and Engineering, Mechanical Systems, and Thermo-Fluids.

MASTER OF SCIENCE IN MECHANICAL ENGINEERING - MSME

Admission

The MSME degree is intended primarily for a student with a bachelor's degree in mechanical or aerospace engineering or a closely related discipline from a recognized institution. Minimum requirements for admission to regular status are a 3.0 grade point average (4.0=A) in the last two years of undergraduate study, a combined score of 1000 on
the quantitative and verbal portions of the Graduate Record Examination (GRE), and, for students whose native language is not English, a score of 550 on the Test of English as a Foreign Language (TOEFL). A post-baccalaureate trial program of 9 semester hours may be allowed for students with a grade point average of less than 3.0 but greater than 2.8.

**Degree Requirements**

The MSME degree is offered as a thesis or a non-thesis program in each of the four departmental disciplines of Aerospace Systems, Materials Science and Engineering, Mechanical Systems, and Thermo-Fluids. The thesis program requires 30 semester hours, at least half of which must be at the 6000 level and will include 6 hours of thesis credit. The non-thesis program requires 36 semester hours of course work, at least 15 of which must be at the 6000 level. A program of study, satisfying the requirements of a departmental discipline, must be developed with an advisor at the beginning of the MSME study and meet with departmental approval. A student with an undergraduate degree outside of the selected departmental discipline may be required to satisfy an articulation program. Substitutions to the program of study must meet with the approval of the advisor and the department. A student pursuing the thesis program may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the program of study and the proposed thesis topic. Further information is available in a Master's Degree General Procedures manual available from the MAE Department.

**Aerospace Systems**

**30-36 Semester Hours**

**Prerequisites**

- Mathematics through Differential Equations (MAP 3302)
- Programming and Numerical Methods (EGN 3420)
- High Speed Aerodynamics (EAS 4134)
- Flight Mechanics (EAS 4105)
- Flight Structures (EAS 4200)
- Aerothermodynamics of Propulsion Systems (EAS 4300)

**Required Courses**

- EAS 6123 Advanced Aerodynamics 3 hours
- EAS 6405 Advanced Flight Dynamics 3 hours
- EML 5060 Mathematical Methods in Mechanical and Aerospace Engineering 3 hours
- EML 6067 Finite Elements in Mechanical and Aerospace Engineering I
  or Computational Fluid Dynamics and Heat Transfer I 3 hours

**Representative Electives**

- EAS 5157 V/STOL Aerodynamics and Performance 3 hours
- EAS 5302 Direct Energy Conversion 3 hours
- EAS 6138 Advanced Gas Dynamics 3 hours
- EAS 6185 Turbulent Flow 3 hours
- EAS 6415 Spacecraft Attitude Dynamics and Control 3 hours
- EAS 6507 Fundamentals of Astrodynamics 3 hours
- EAS 6517 Optimal Spacecraft Attitude and Control 3 hours
- EML 5152 Intermediate Heat Transfer 3 hours
- EML 5224 Acoustics 3 hours
- EML 5237 Intermediate Mechanics of Materials 3 hours
- EML 5402 Turbomachinery 3 hours
- EML 5532C Computer-Aided Design for Manufacture 3 hours
- EML 5713 Intermediate Fluid Mechanics 3 hours
- EML 6062 Boundary Elements in Engineering 3 hours
- EML 6067 Finite Elements in Mechanical and Aerospace Engineering I 3 hours
- EML 6068 Finite Elements in Mechanical and Aerospace Engineering II 3 hours

DOCTOR OF PHILOSOPHY- Ph.D.

The Ph.D. degree is primarily intended for a student with a master’s degree in mechanical or aerospace engineering or a closely related discipline. The program is intended to allow a student to study in depth, with emphasis on research, in Aerospace Systems, Materials Science and Engineering, Mechanical Systems, or Thermo-Fluids.

Admission

In addition to satisfying the admission requirements for the MSME degree, admission to the Ph.D. program requires that the student possesses a master’s degree in mechanical or aerospace engineering or a closely related discipline from a recognized institution. Admission to Doctoral Status requires that the student passes a Ph.D. Qualifying Examination in one of the four departmental disciplines of Aerospace Systems, Materials Science and Engineering, Mechanical Systems, or Thermo-Fluids, establishes a Doctoral Advisory Committee, and submits a departmentally approved Program of Study. These steps are normally completed within the first year of study beyond the master’s degree.

Degree Requirements

The Ph.D. degree requires a minimum of 84 semester hours beyond the bachelor’s degree, 27 of which will be dissertation credits and at least 9 credits of which must be graduate level mathematics courses. A maximum of 30 semester hours, including 6 thesis hours, may be transferred from a master’s degree toward these requirements. Post-masters credit up to 18 semester hours may be considered for transfer. Transfer credit will be evaluated on a course by course basis as part of the Program of Study approval process.

Examinations

In addition to the Qualifying Examination discussed above, the student must pass a Candidacy Examination and a Dissertation Defense Examination. The Candidacy Examination is normally taken near the end of the course work and consists of a written and oral presentation of a research proposal. The Dissertation Defense Examination is an oral examination taken in defense of the written dissertation. Further information on these examinations and other requirements of the Ph.D. program are contained in a Ph.D. Degree General Procedures manual available from the MAE Department.
Doctor of Philosophy in Physics

The Ph.D. degree is primarily intended as a terminal degree for those entering physics in preparation for a research career. The program is specifically designed to provide a broad educational background in physics, including advanced courses in areas of specialization.

Admission

Applicants to the Ph.D. program are required to submit a resume, a statement of purpose, letters of recommendation, and GRE scores. A minimum of 16 semester hours of undergraduate coursework in physics or mathematics is expected. International students may also be required to provide evidence of English proficiency.

Degree Requirements

The Ph.D. program requires a minimum of 72 semester hours beyond the bachelor's degree. This includes a combination of coursework, research, and dissertation. A minimum of 24 semester hours must be in research courses. The dissertation must be a significant contribution to the field of physics.

Examinations

Examinations are an integral part of the Ph.D. program. The Candidacy Exam, Qualifying Exam, and Dissertation Defense Exam are all required. The dissertation defense is a major milestone, and the candidate must demonstrate a thorough understanding of the subject matter.

Course General Physics courses are available from the MFE Department.
COLLEGE OF HEALTH AND PUBLIC AFFAIRS

The College of Health and Public Affairs offers five graduate programs: the Master of Arts in Communicative Disorders, the Master of Science in Health Sciences Administration, the Master of Science in Molecular Biology and Microbiology, the Master of Public Administration, and the Master of Social Work. The mission of the College of Health and Public Affairs is to provide undergraduate and graduate education, to foster, through research, the development and transmission of knowledge, and to offer continuing education for community professionals and citizens.

PROGRAMS IN COMMUNICATIVE DISORDERS

Professional education is offered in Communicative Disorders leading to the Master of Arts degree in Speech-Language Pathology. The program requires the equivalent of two years full-time attendance to complete and is designed to meet the certification requirements of the American Speech-Language-Hearing Association. The program is accredited by the Educational Standards Board of the American Speech-Language-Hearing Association. Full-time registration (at least 6 hours) in the program is required.

The faculty is keenly aware of the need for combining clinical skills with theoretical foundations. Supervised student practica are offered in the Communicative Disorders Clinic on campus as well as in external settings. Selected outstanding professionals in Central Florida (physicians, speech/language pathologists) make up the clinical faculty which supplements the clinical expertise of the regular faculty.

All students will enroll in SPA 6505 or 6506, Clinical Practica, or equivalents, each semester in attendance, with the exception of the semester they are enrolled in SPA 5553L, Differential Diagnosis in Speech and Language Laboratory, and the semester they are completing the thesis/non-thesis option. Students must complete 350 clock hours of practicum experience as outlined by the American Speech-Language-Hearing Association before graduation.

Master of Arts in Communicative Disorders
Degree Requirements

Dona Hedrick ........................................... Graduate Program Coordinator
Office: HPB 113, Phone (407) 823-2121

PREREQUISITES

B.A. in Speech and Hearing (Communicative Disorders) or special prerequisite courses to be arranged with the program coordinator.

All students must take STA 4163, Statistical Methods II, or equivalent, and achieve a grade of "C" or better prior to, or during, their graduate program. This course is a prerequisite to SPA 5805, Research in Communicative Disorders.

SPA 6403 Advanced Studies in Communicative Disorders: Language 4 hours

PRACTICUM credit toward degree 6 Semester Hours
All students must register for three hours each semester while in attendance, with exceptions as noted.

THESIS/NON-THESIS OPTIONS
Each student will complete a thesis or non-thesis option.

Thesis Option 6 Semester Hours
Students selecting the thesis option will complete a thesis in the area of speech/language pathology for six semester hours of credit. An advisory committee of three faculty members, chaired by a departmental faculty member, will be selected to guide the student through the thesis requirements. An oral defense of the thesis is required.

Non-thesis Option 7 Semester Hours
A student selecting the Clinical Internship option must complete 6 semester hours of Internship in Speech-Language Pathology. In addition, a student in the Clinical Internship option must register for one hour of Directed Research.

EXAMINATIONS
A final comprehensive examination on course work is required. This examination must be passed before a student can be considered a degree candidate.

Total Minimum Semester Hours Required: 51

HEALTH SCIENCES
J. Stephen Lyle Graduate Program Coordinator
Office: HPB 102, Phone (407) 823-2972

At this time, the only option for the degree program is in Health Services Administration. The program of study required for the degree is outlined below:

Admission
Admission to graduate status in the Master of Science in Health Sciences program is based on the following:

a. A baccalaureate degree from a regionally accredited college or university and a grade point average of 3.0 on a 4.0 scale for the last 60 semester hours of credit earned for the baccalaureate degree, and a Graduate Record Examination score of at least 840 (A GMAT score of 400 may be used to satisfy this requirement); or a grade point average of at least 2.75 for the last 60 semester hours and a GRE score of at least 1000 (A GMAT score of 500 may be used to satisfy this requirement). The GRE or GMAT must not be over 7 years old.

or

A graduate degree from a regionally accredited institution.

b. Submission of three letters of recommendation from individuals capable of assessing the applicant's ability to undertake graduate work.

c. Completion of undergraduate course work comprising a knowledge of the U.S. health care systems; basic statistics, and personal computers.

In accordance with SUS and UCF policy, a limited number of students who do not meet all the requirements for regular admission to the Program but do show promise of success may be admitted in a provisional status.
Admission into graduate status is determined twice a year for the Fall and Spring semesters. All students must take the GRE or GMAT regardless of the basis for admission. After acceptance, all students must meet with their academic advisor to plan a program of study.

**Electives:**

Students must choose a minimum of 5 courses in consultation with the advisor. Electives may include a research project, thesis, independent study or courses from such areas as Business, Public Administration, Engineering, Computer Science, or Health Services Administration.

**Comprehensive Examination:**

A final written examination is required of all students in the Program. The exam will be completed within the first four weeks of the term in which the student expects to graduate. Examinations will receive an evaluation of "pass," "conditional pass," or "fail." If a student receives a "conditional pass" on the comprehensive examination, a written re-examination will have to be taken covering the area failed. A student failing the examination must repeat the entire examination. All students must successfully pass the comprehensive examination to graduate.

**Thesis and Research Report Option:**

Students may choose to do a research project or thesis with the consent of the academic advisor. Normally, 3 credit hours is earned for the research project and 6 for the thesis. Students should discuss this with the advisor when the program of study is completed.

**Total Hours Required for the Degree:** 39 Semester Hours

**MOLECULAR BIOLOGY AND MICROBIOLOGY**

R. M Gennaro, Ph.D. ............................................... Chair and Graduate Program Coordinator
Office: BIO 330, Phone: (407) 823-5932

**Admission**

The minimum requirements for consideration for graduate status in the M.S. Program in Molecular Biology and Microbiology are a grade point average (GPA) of at least 3.0 for the last 60 semester hours of undergraduate study or a score of at least 1000 on the combined quantitative-verbal sections of the Graduate Record Exam (GRE). Additionally, the department requires three letters of recommendation plus a written statement of past experience and research, area of interest, and immediate and long-range goals. Personal interviews are helpful but not required.

The department requires international students and students whose native language is not English to have a minimum TOEFL score of 550.

Applicants who fail to meet either the minimum program GPA or GRE requirement may occasionally be accepted if there is other convincing evidence of potential for high achievement and success. Applicants failing to satisfy minimum program criteria should
submit a GRE Subject (Advanced) Biology Test score at or above the 50th percentile. In no case will GRE scores (verbal, quantitative, or advanced) older than five years be accepted. Applicants need not have an undergraduate degree in molecular biology or microbiology but are expected to have the equivalent of 16 semester hours credit in biological sciences including a course in general microbiology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

Examinations
A comprehensive examination is required of all students in the M.S. program. The comprehensive exam must be taken no later than the fourth week of that semester after the one in which the student completes all course work in the program of study. If a student fails the comprehensive examination, a minimum of four weeks must elapse before re-examination. The comprehensive exam may be taken a maximum of two times. In addition, an oral thesis defense is required. A minimum of four weeks must elapse between the comprehensive and thesis defense examinations.

Master of Science Degree Requirements
The course and credit requirements will consist of a minimum of 30 semester hours of credit, including six credits of Thesis, two credits of Graduate Seminar, and such other courses as specified by the student's graduate committee in the Approved Program of Study.

MOLECULAR BIOLOGY AND MICROBIOLOGY

| APB  | 5236 | Applied Microbiology | 3 cr (3.0) |

SUMMARY OF M.S. DEGREE REQUIREMENTS

ADMISSION
1. 3.0 G.P.A. last 60 semester hours or 1000 on GRE (quant. + verbal).
2. Three letters of recommendation.
4. 16 semester hours in Biological sciences, including one course in general microbiology, plus one year of organic chemistry, one year of physics, basic university math and statistics, and lab skills equivalent to the minimum of our undergraduate.

EXAMINATION
1. Comprehensive covering all course work in program of study.
2. Final thesis defense.

DEGREE REQUIREMENTS
Minimum of 30 semester hours, including six (6) semester hours of Thesis, and two (2) Semester hours of Graduate Seminars (1/2 6000 level ect.).
PUBLIC ADMINISTRATION

Robert B. Denhardt ........................................ Chair and Graduate Program Coordinator
Office: PH-102, Phone (407) 823-2604

Admission

The Graduate Record Examination (GRE) is required of all graduate students. Minimum requirements for regular admission are a grade point average (GPA) of 3.0 for the last 60 semester hours of undergraduate study or a total score of 1000 or higher on the verbal-quantitative sections of the GRE or a previous graduate degree. A limited number of students who do not meet these requirements but who do have at least a 2.5 GPA and an 800 GRE score may be admitted on a provisional basis. Individuals whose native language is other than English are required to have a minimum TOEFL score of 550.

Program in Public Administration

The Department of Public Administration’s Master of Public Administration (M.P.A.) degree program provides opportunities for students to prepare for employment or advance their careers as public administrators. Our intention is to produce graduates equipped with the public management skills and analytic techniques needed for successful careers in government, non-profit, and closely-related business fields.

Master of Public Administration Degree Requirements

The M.P.A. Program consists of 36-42 hours. Each student completes a core of eight courses (24 hours), an advanced curriculum of three courses (9 hours) selected in consultation with the advisor, and a capstone experience equivalent to one course (3 hours). Those students without practical administrative experience in the public sector must complete an internship (3 hours). Finally, a research report option is available for students wishing to complete a more substantial research project than might be accommodated in the other courses.

MINIMUM CORE REQUIREMENTS (24 hours)

PAD 6053 Public Administrators in the Governance Process
PAD 6035 Public Administrators in the Policy Process
PAD 6700 Analytic Techniques for Public Administrators I
PAD 6701 Analytic Techniques for Public Administrators II
PAD 6037 Public Organization Management
PAD 6227 Public Budgeting and Financial Management
PAD 6417 Human Resource Management
PAD 6335 Strategic Planning and Management

ADVANCED CURRICULUM (9 hours)

An advanced curriculum of at least three courses that concentrate on a specific area germane to the practice of public administration may be taken within the Department of Public Administration or from other departments. Those elective courses offered within the Department will provide an emphasis on state and local government; however, other emphases may be developed in consultation with the advisor.

CAPSTONE EXPERIENCE (3 hours)

Students will engage in a capstone experience intended to bring together the various areas of knowledge and skills covered in the MPA program. Students are encouraged to complete this requirement through enrollment in PAD 6062 Advanced Concepts and Applications in Public Administration. However, where that is not possible, students may complete this requirement through completion of a comprehensive written exam covering the core courses in the program and the completion of one additional elective course (3 hours). Both the capstone course and the comprehensive exam will be graded on a pass/fail basis.
INTERNSHIP (3 hours)

The internship, required of students without experience in a public sector administrative position, will provide the student with the opportunity to apply theory and analytic techniques to a real world situation. The student will be required to submit a summary and critique paper on the experience to the department’s internship coordinator at the end of the assignment.

RESEARCH REPORT (6 hours) (Optional)

Six semester hours of credit may be earned by completing an independent investigatory research report which results in a report acceptable to the department’s graduate committee. Three of the six hours credit for the research report may substitute for three hours of the advanced curriculum requirement. This option is available only by permission of the graduate program coordinator.

TOTAL HOURS (36-42)

Basic Requirements (Core, Advanced Curriculum, Capstone Experience) 36 hours
Basic Requirements plus Internship 39 hours
Basic Requirements plus Research Report 39 hours
Basic Requirements plus Internship plus Research Report 42 hours

MASTER OF SOCIAL WORK (M.S.W.) in
CLINICAL SOCIAL WORK PRACTICE

TBA ........................................... Graduate Coordinator
Office: TR 42 Phone (407) 823-2114

The master degree program in social work (M.S.W.) is focused on the study of rehabilitative and preventive interventions aimed at reducing the impact of social problems on families and individuals. This advanced degree in social work prepares students for licensed clinical practice in Florida.

The UCF program in CLINICAL SOCIAL WORK PRACTICE prepares students for social work generalist and clinical specialist practice functions, particularly in urban settings. “Generalist Practice Functions” encompass (a) assessing people and resource systems, (b) providing services and resources to people in need, (c) obtaining services and resources for people in need, and (d) improving services and resources for people in need. “Clinical Specialist Practice Functions” consist of (a) resolving client problems through individual, family, and group therapies, and (b) preventing social problems.

The M.S.W. program is in candidacy status for accreditation by the Council on Social Work Education.

Admission Policy

Students begin coursework in Social Work in the Fall semester only. Potential students must make application to the Graduate School of the University of Central Florida and take the GRE test. UCF requires the following of all applicants to the MSW program:

- Bachelor degree from an accredited institution.
- Good standing with institution last attended.
- A 3.0 or better Grade Point Average (GPA) on a 4.0 scale for the last 60 semester credit hours of college studies.
- Students with a lower GPA may be admitted with a combined score of at least 1000 on the required GRE.
- One official transcript of all undergraduate and graduate course work attempted and/or completed.—Three references (one academic, one employment, and one applicant’s choice). If an employment reference is not available, then a personal
reference may be submitted in support of graduate study. If a person graduated more than five years ago, that applicant may substitute work or personal references in place of academic references.

One college level course in each of the following six areas: biology, English or communications, culture, mathematics or computer science, psychology, and sociology.

— A medical history report on the UCF health form.
— A typed PERSONAL STATEMENT. Directions for completing this statement may be obtained from the Department of Social Work. In the statement the applicant describes reasons and experiences leading to the choice social work as a profession, professional goals and interests, and strengths and limitations related to the practice of social work. Applicants also discuss an issue facing social work from the perspective of the role and responsibility of the profession in relation to that issue.
— If you are an International Student: a confidential financial statement on the form provided by the Graduate Admissions Office; and TOEFL test results.

Students in the program are expected to demonstrate initiative, dependability, social concern, self awareness, appreciation for diversity in others, problem solving ability, ease in relating with others, skill in writing and speaking, and professional ethics.

Advanced Standing

If other qualifications are met, applicants with a Bachelor of Social Work degree from an accredited CSWE program may be admitted to the Advanced Standing Program. The Department of Social Work will review the applicant’s transcript to determine eligibility and the number of course credit hours that will be waived from the core curriculum. A maximum of 30 credit hours can be waived for an applicant with a B.S.W. degree.

CURRICULUM

PREREQUISITES

Introductory college-level courses or equivalents are required before admission into the program.

Biology
Psychology
Sociology

English or Communications
Mathematics or Computer Science
Culture

CORE: GENERALIST SOCIAL WORK PRACTICE

The core curriculum may be taken in a B.S.W. degree program or as the first 30 hours of the M.S.W. program.

COURSE DESCRIPTIONS

CLASSIFICATION OF COURSES

3000-4999 are junior- and senior-level courses and are designed primarily for advanced undergraduate students. Selected 4000-4999 courses may serve the needs of the individual graduate students if approved for inclusion in an individual program of graduate study by a supervisory committee approved by the Dean of the college.

5000-5999 are beginning graduate-level courses.

6000-6999 are courses open only to graduate students.

7000 are doctoral-level courses.

FLORIDA'S STATEWIDE COURSE NUMBERING SYSTEM

Courses in this catalog are identified by prefixes and numbers that were assigned by Florida's Statewide Course Numbering System. This common numbering system is used by all public postsecondary institutions in Florida and by two participating private institutions. The major purpose of this system is to facilitate the transfer of courses between participating institutions.

Each participating institution controls the title, credit, and content of its own courses and assigns the first digit of the course number to indicate the level at which students normally take the course. Course prefixes and the last three digits of the course numbers are assigned by members of faculty discipline committees appointed for that purpose by the Florida Department of Education in Tallahassee. Individuals nominated to serve on these committees are selected to maintain a representative balance as to type of institution and discipline field or specialization.

The course prefix and each digit in the course number have meaning in the Statewide Course Numbering System (SCNS). The list of course prefixes and numbers, along with their generic titles, is referred to as the "SCNS taxonomy." Descriptions of the content of courses are referred to as “course equivalency profiles.”

</tbody>
</table>

GENERAL RULE FOR COURSE EQUIVALENCIES

Equivalent courses at different institutions are identified by the same prefixes and same last three digits of the course number and are guaranteed to be transferable between the participating institutions that offer the course, with a few exceptions. (Exceptions are listed below.)

For example, a survey course in social problems is offered by 31 different postsecondary institutions. Each institution uses “SYG 010” to identify its social problems course. The level code is the first digit and represents the year in which students normally take this course at a specific institution. In the SCNS taxonomy, “SYG” means “Sociology, General,” the century digit “0” represents “Entry-Level General Sociology,” the decade digit “1” represents “Survey Course,” and the unit digit “0” represents “Social Problems.”

In science and other areas, a “C” or “L” after the course number is known as a lab indicator. The “C” represents a combined lecture and laboratory course that meets in the same place at the same time. The “L” represents a laboratory course or the laboratory part of a course, having the same prefix and course number without a lab indicator, which meets at a different time or place.
Transfer of any successfully completed course from one participating institution to another is guaranteed in cases where the course to be transferred is offered by the receiving institution and is identified by the same prefix and last three digits at both institutions. For example, SYG 1010 is offered at a community college. The same course is offered at a state university as SYG 2010. A student who has successfully completed SYG 1010 at the community college is guaranteed to receive transfer credit for SYG 2010 at the state university if the student transfers. The student cannot be required to take SYG 2010 again since SYG 1010 is equivalent to SYG 2010. Transfer credit must be awarded for successfully completed equivalent courses and used by the receiving institution to determine satisfaction of requirements by transfer students on the same basis as credit awarded to native students. It is the prerogative of the receiving institution, however, to offer credit for courses successfully completed which have not been designated as equivalent.

Sometimes, as in Chemistry, a sequence of one or more courses must be completed at the same institution in order for the courses to be transferable to another institution, even if the course prefix and numbers are the same. This information is contained in the individual SCNS course equivalency profiles for each course in the sequence.

**THE COURSE PREFIX**

The course prefix is a three-letter designator for a major division of an academic discipline, subject matter area, or sub-category of knowledge. The prefix is not intended to identify the department in which a course is offered. Rather, the content of a course determines the assigned prefix used to identify the course.

**AUTHORITY FOR ACCEPTANCE OF EQUIVALENT COURSES**

State Board of Education Rule 6A-10.024(17), Florida Administrative Code, reads: When a student transfers among institutions that participate in the common course designation and numbering system, the receiving institution shall award credit for courses satisfactorily completed at the previous participating institutions when the courses are judged by the appropriate common course designation and numbering system faculty task forces to be equivalent to courses offered at the receiving institution and are entered in the course numbering system. Credit so awarded can be used by transfer students to satisfy requirements in these institutions on the same basis as native students.

**EXCEPTIONS TO THE GENERAL RULE FOR EQUIVALENCY**

The following courses are exceptions to the general rule for course equivalencies and may not be transferable. Transferability is at the discretion of the receiving institution:

A. Courses in the _900_–_999_ series (e.g., ART 2905)
B. Internships, practica, clinical experiences, and study abroad courses
C. Performance or studio courses in Art, Dance, Theater, and Music
D. Skills courses in Criminal Justice
E. Graduate courses

College preparatory and vocational preparatory courses may not be used to meet degree requirements and are not transferable.

Questions about the Statewide Course Numbering System and appeals regarding course credit transfer decisions should be directed to Dr. David Dees in the Office of Undergraduate Studies, AD 210, Phone (407) 823-2691 or the Florida Department of Education, Office of Postsecondary Education Coordination, 1101 Florida Education Center, Tallahassee, Florida 32399-0400. Special reports and technical information may be requested by calling telephone number (904) 488-6402 or Suncom 278-6402.

**SPECIAL COURSES**

In addition to the regular courses listed in this catalog, special courses may be available. Consult an academic advisor for details.

In order to register for any of the special numbers below, a student must present an authorization form (GS-10) obtained from the Department.
Directed Independent Studies  5907  6908
Directed Research  5917  6918
Special Topics/Seminars  5937  6938
*Internships, Practicums, Clinical Practice  5944  6946
Study Abroad  5957  6958
*Research Report  6909
*Treatise (Thesis or Research Report)  6971
*Thesis—Specialist  6973
*Doctoral Research  7919
*Doctoral Special Topics/Seminars  7939
*Doctoral Dissertation  7980
*For Graduate Status students only.
*These courses may be assigned variable credit. Some may be repeated upon approval.

ABBREVIATIONS IN COURSE DESCRIPTIONS
PR denotes a PREREQUISITE course which must be earned prior to enrollment in the listed course.
CR denotes a COREQUISITE course which must be taken concurrently with or prior to the listed course.
C.I. denotes that registration is contingent upon the CONSENT OF THE INSTRUCTOR.

HOURS CODE
Each course listed is followed by a code which shows hours of credit and contact hours.
Example: ECI 5215C Hydraulic Engineering  EN 3(2,3)
ECI 5215C is offered by the College of Engineering (EN), carries 3 hours of credit, but requires 5 contact hours which consist of 2 hours in class and 3 hours laboratory or field work.

165
COURSE OFFERINGS

ACG 5005  BA 3(3,0)
Financial Accounting Concepts: PR: Acceptance into the graduate program. The conceptual background for financial statements. (Not open to accounting majors.)

ACG 5206  BA 3(3,0)

ACG 5255  BA 3(3,0)
International and Multinational Accounting: PR: ACG 4123 or C.I. and meet School admission requirements. An examination of the environmental factors affecting international accounting concepts and standards. Cross-country differences in accounting treatments are compared.

ACG 5346  BA 3(3,0)
Cost Accounting II: PR: ACG 3361, ACG 4123, FIN 3403, ECO 3411 or C.I. and meet School admission requirements. Continuation of ACG 3361. Overhead and joint cost allocation, capital budgeting and analysis, EOC analysis, decentralization, and quantitative decision analysis.

ACG 5435  BA 3(3,0)
Accounting Control Systems: PR: Graduate standing, ACG 3361 and ACG 4401, or ACG 5625, or C.I. An integrative course designed to provide a systematic approach to the integration of financial accounting, managerial accounting, taxation, and general business courses.

ACG 5506  BA 3(3,0)
Managerial Accounting for Governmental and Nonbusiness Organizations: PR: ACG 3501, ACG 4123 or C.I. and meet School admission requirements. Study of problems and methods of applying managerial accounting concepts in a nonprofit environment.

ACG 5625  BA 3(3,0)
Auditing and EDP: PR: ACG 4401, ACG 4123, ACG 4651 and meet School admission standards. An examination of auditing procedures followed when a company uses a computer to process financial records.

ACG 5636  BA 3(3,0)
Advanced Auditing: PR: ACG 4401, ACG 4123, ACG 4651, STA 3023 and meet School admission requirements. A continuation of ACG 4651. Special topics relative to the standards, practices and procedures followed in the audit function.

ACG 5675  BA 3(3,0)
Operational Auditing: PR: ACG 4123 and ACG 4651 and meet School admission requirements. The standards, principles, practices and procedures followed in the internal audit function.

ACG 6356  BA 3(3,0)
Seminar in Cost Accounting: PR: ACG 5346, graduate standing and all foundation courses for the accounting program or equivalents. A study of current selected topics in cost and management accounting.

ACG 6405  BA 3(3,0)
Accounting Information Systems II: PR: Graduate standing and all foundation courses for the accounting program or equivalents. Design and analysis of information systems and special auditing topics.

ACG 6425  BA 3(3,0)
Managerial Accounting Analysis: PR: Graduate standing and ACG 5005, or one year of accounting, and ECO 5415. (Not open to accounting majors.) Accounting as an information measurement system for internal planning and control.

ACG 6519  BA 3(3,0)
Seminar in Auditing for Government and Nonbusiness Organizations: PR: Graduate standing and all foundation courses for the accounting program or equivalents. Examination of standards for audit of governmental organizations and programs; institutional issues of auditor independence; reporting audit findings in a public-sector environment.
ACG 6685  
Professional Accountancy Practice: PR: Graduate standing and all foundation courses for the accounting program or equivalents. Study of the formation and operation of a professional accounting practice.

ACG 6696  
Seminar in Auditing: PR: ACG 5636, graduate standing and all foundation courses for the accounting program or equivalents. A study of current auditing topics.

ACG 6805  
Seminar in Accounting Theory: PR: Graduate standing and all foundation courses for the accounting program or equivalents. An examination of the evolution of contemporary accounting theory with emphasis on current and future developments.

ACG 6806  
Seminar in Professional Accounting Issues: PR: Graduate standing and all foundation courses for the accounting program or equivalents. An examination of current issues confronting the accounting profession.

ACG 6946  
Internship

ACG 7157  
Seminar in Financial Accounting Research: PR: Admission to doctoral program, equivalent of Master's degree in Accounting or Taxation, QMB 7565, and GEB 7910; and C.I. Extensive coverage of empirical literature dealing with bankruptcy prediction, earnings forecasting, income smoothing, information content, analytical review and related financial accounting research.

ACG 7399  
Seminar in Management Accounting Research: PR: Admission to doctoral program, ACG 7157, and C.I. Extensive study of the theoretical aspects and empirical literature on accounting decision support; emphasizing human information processing, nonfinancial measures of effectiveness, and field research of existing practice.

ACG 7698  
Directed Research Project in Auditing: PR: Admission to doctoral program and ACG 7699, or C.I. Highly individualized research project on a specific auditing research issue. Includes proposals, development, methodology, data gathering, analysis, and reporting results.

ACG 7699  
Seminar in Auditing Research: PR: Admission to doctoral program, ACG 7157, and C.I. A thorough review and critical analysis of auditing research literature, with emphasis on emerging research issues and methods.

ACG 7887  
Accounting Research Forum: PR: Admission to doctoral program. Research and pedagogical issues in accounting, including research presentations by faculty, doctoral students, and invited scholars. May be taken for 4 hours credit.

ACG 7915  
Directed Research in Accounting: PR: GEB 7910 and C.I. Advanced study in specialized areas of accounting research. Study designed to lead towards publishable research or student's dissertation. By definition, topical areas will vary.

NOTE: All AMH graduate colloquia listed below require intensive reading in the literature of a given field, class discussions, and the preparation of papers. The prerequisites for 5000-level courses are senior standing and the consent of the instructor. All seminars listed below involve supervised research and the writing of term papers. The consent of the instructor is required for every seminar.

AMH 5116  
Colloquium in U.S. Colonial History

AMH 5137  
Colloquium in U.S. Revolutionary Period

AMH 5149  
Colloquium in Early U.S. History, 1789-1815

AMH 5169  
Colloquium in the Age of Jackson

AMH 5176  
Colloquium in Civil War and Reconstruction
AMH 5219
Colloquium in Late 19th Century U.S.

AMH 5296
Colloquium in 20th Century U.S.

AMH 5391
Colloquium in U.S. Cultural History

AMH 5407
Colloquium in the American South

AMH 5446
Colloquium in U.S. Frontier

AMH 5508
Colloquium in Women in American History.

AMH 5515
Colloquium in U.S. Diplomatic History: May be repeated for credit when content is different.

AMH 6939
Seminar in U.S. History: May be repeated for credit when content is different.

ANT 5479
Comparative Cultural Analysis: The dynamics of cultural processes in a multi-ethnic setting.

ARE 5251
Art for Exceptionalities: Concepts, principles, and methods of integrating art processes into the education of the physically, emotionally, and mentally handicapped.

ARE 5358
Found Arts: PR: ARE 4440 and ARE 4443 or C.I. Materials available for instruction in the public schools will be explored in depth in relation to their appropriateness and productive qualities.

ARE 5648
Contemporary Visual Arts Education: PR: ARE 4443 or C.I. Continued study of current programs and innovations in public school Visual Arts Programs.

ARE 6195
Teaching Art Appreciation With Interdisciplinary Strategies: PR: Grad. Status and public school teaching experience. This course will focus on the examination of art appreciation examples & concepts toward planning curriculum (interdisciplinary for the study of art history, criticism and aesthetics.

ARE 6665
Arts Advocacy: The content of this course will deal with the study and development of plans to produce arts advocacy programs for the public school system.

ARH 5451
Artistic Worldviews: PR: Post-bac status; nine hours of art courses or C.I. Art from individual and cultural perspectives of varying ethnic, religious, occupational, regional, and generational groups.

ARH 5454
Found Arts: PR: C.I. Materials available for instruction in the public schools will be explored in depth in relation to their appropriateness and productive qualities.

ARH 5479
Contemporary Women Artists: PR: Six credits of art courses or C.I. An indepth study on contemporary women artists from a feminist perspective.

ARH 5893
Critical Perspectives on Women Artists: The cultural forces influencing women artists, and how those artists have been constrained or misrepresented by the language of art or by art history.

ARH 5933
ART 5109C
Crafts Design: Crafts design and production, including the use of rigid, flexible, and linear materials.

ART 5109C
Multi-Cultural Crafts Design: The content of this course will include an appreciation for and the production of Western and Non-Western art forms.

BOT 5495C
Bryology: PR: BOT 4303C or C.I. A lecture-laboratory survey course on the diversity and classification of mosses, liverworts and hornworts with special emphasis on those found in Florida.

BOT 5686
Conservation and Management of Native Plants: PR: BOT 4713C, PCB 3043 and/or BOT 4503C or C.I. Identification, conservation, propagation and management of Florida rare, endangered, indicator or reclamation species.

BOT 5705C
Plant Biosystematics: PR: Graduate standing or C.I. Evolutionary processes among plant taxa and populations utilizing cytology, morphology, biochemistry, breeding systems, and co-evolution.

BOT 6146C
Terrestrial Vegetation: PR: 8 hours in biological sciences or science teaching experience or C.I. Classification and identification among terrestrial plant groups and their natural association in the field. Major reference sources reviewed.

BSC 6909
Research Report

BSC 6950
Biological Research Resources: PR: Graduate Status. Research methodology including literature resources, problem conceptualization, research proposals, data collection, and analysis and presentation of findings.

BSC 6971
Thesis

BTE 6171
Business Education Curriculum: PR: Basic Teacher Certificate or C.I. Curriculum planning and development; objectives, innovations, problems and issues in contemporary business programs.

BTE 6425
Advanced Business Instruction Techniques: PR: Graduate standing or C.I. Research, methods and materials related to current practices in Business Education.

BTE 6426
Office Simulation Techniques: PR: Basic Teacher Certificate or C.I. Methods of office simulation for teachers at the developmental and performance levels.

BTE 6935
Seminar in Business Education: PR: Graduate Standing or C.I. Current problems, issues and trends in Business Education.

BTE 6946
Practicum Business Education: PR: Graduate Standing. Techniques, materials and instructional media; evaluation and new trends of instruction in all areas of Business Education.

BUL 5125
Legal and Social Environment of Business: PR: Admission to graduate program. Analysis of the legal and ethical environment of business, the effects of legislation and regulation on business activity, and the role of law and ethics in the decision making process.

CAP 5410
Computer Vision: PR: COP 3530. Image formation, binary vision, region growing and edge detection, shape representation, dynamic scene analysis, texture, stereo and range images, and knowledge representation.
CAP 5610  AS 3(3,0)
Machine Learning: PR: CAP 4630 or C.I. Origin/evaluation of machine intelligence; machine learning concepts and their applications in problem solving, planning and expert systems; symbolic role of humans and computers.

CAP 5635  AS 3(3,0)
Artificial Intelligence and Prolog: PR: CAP 4630. Analysis of deductive databases, applications of logic programming to knowledge representation and “expert systems.”

CAP 5636  AS 3(3,0)

CAP 5725  AS 3(3,0)
Computer Graphics Systems 1: PR:COP 3530. Architecture of graphics processors; display hardware; principles of programming and display software; problems and applications of graphic systems.

CAP 6411  AS 3(3,0)
Computer Vision Systems: PR: CAP 5410. Perceptual organization, geometric reasoning, knowledge and model representations, interpretations; Acronyn, Visions, Consight, 3PPO, ANGY, ALVEN.

CAP 6412  AS 3(3,0)
Advanced Computer Vision: PR: CAP 5410. Computational theories of perception, shape from X’ techniques, multi-resolution image analysis, 3-D model based vision; perceptual organization, spatio-temporal model, knowledge based vision systems.

CAP 6613  ED 3(0)
Utilizing Microcomputers in Education: Instruction in microcomputers emphasizing applications of software in the classroom and for school record keeping.

CAP 6640  AS 3(3,0)
Computer Understanding of Natural Language: PR: CAP 5601. A study of the different approaches to build programs to “understand” natural language. The theory of parsing, knowledge representation, memory and inference will be studied.

CAP 6671  AS 3(3,0)
Intelligent Systems: PR: CAP 5610. Study of computer systems exhibiting intelligent attributes, particularly learning; basic concepts related to characteristics, capabilities, design and principles of operation; discussion of relevant philosophical/social issues.

CAP 6701  AS 3(3,0)
Computer Graphics Systems II: PR: CAP 5725, Modeling design and analysis of graphics systems; data structures, numerical techniques, algorithms and optimum seeking methods for various problems in computer graphics.

CAP 6918  AS 3
Research

CAP 7919  AS 3
Doctoral Research

CAP 7980  AS 3
Doctoral Dissertation

CAP, CDA, CIS, COP or COT prefixes are used for the following:

CCE 5005  EN 3(3,0)
Construction Engineering II: PR: CCE 4004 or C.I. Construction planning, equipment, and methods used in heavy construction.

CCE 5035  EN 3(3,0)
Construction Law & Project Management: PR: C.I. Contracts, specifications, and law for engineers. Strategic planning, management, development, design, and production of construction projects. Value engineering, project funding and cash flow.

CCE 6505  EN 3(3,0)
Construction Building System Techniques: PR: CES 4127 or C.I. Wood engineering techniques and architectural principles in construction. Construction design of mechanical and electrical systems.
CCE 6506  

CDA 5106  
Advanced Computer Architecture I: PR: CDA 4150. Evolution of computer architecture; memory organization; cache; virtual memory; high speed processor design; pipeline multi-functional and array machines; special architecture case studies; overview of channel architecture.

CDA 5110  
Parallel Architecture & Algorithms: PR: COT 4210, CDA 5106. General-purpose vs. special-purpose parallel computers; arrays; messagepassing; shared-memory; taxonomy; parallelization techniques; communication; synchronization and granularity; parallel data structures; automatic program restructuring.

CDA 5210  
Architecture and Design of VLSI: PR: CDA 4150 or equivalent. Overview of VLSI technology. Logical design of basic subsystems; integrated system design tools; design of a VLSI computer system.

CDA 5212  
VLSI Design Tools: PR: CDA 5210, a strong programming background and C.I. VLSI implementation systems; layout languages; tools; graphic tools; sticks compactor; design rule checking algorithms; simulation models; tools; routing algorithms; silicon compilers; knowledge-based VLSI tools.

CDA 5213  
VLSI Testing and System Integration: PR: CDA 5210. Test vectors; fault models; design for testability; LSSD; languages for testing; performance measurements; interrupts; bus concepts and standards; testing and systems integration.

CDA 6107  
Advanced Computer Architecture II: PR: CDA 5106. Multiprocessor systems; interconnection network; stack architectures; high-level language architecture; design languages; performance evaluation.

CDA 6108  
Selected Topics in Computer Architecture: PR: CDA 5106. Selected research papers on multiprocessors, data base machines, virtual machines, ultracomputer, connection machine, MPP, Butterfly flow architectures, object-based architectures, fault-tolerant architectures.

CDA 6211  
VLSI Algorithms and Architecture: PR: CDA 5210. VLSI algorithms, algorithms on regular geometries, hierarchically organized machines; illustrative algorithms: Matrix, DFT, recurrence evaluation, pattern matching, searching, sorting, graph, etc.; area-time complexity issues.

CDA 6501  
Computer Communications Networks Architecture: PR: CDA 5106. Introduction to networking; architecture of circuit, message and packet switching networks; local computer networks architecture; modems; protocols.

CDA 6520  
Computer Networks Design and Distributive Processing: PR: CDA 6501 and COP 5611. Computer communications networks design considerations, network operating system, distributive processing.

CDA 6919  
Research

CDA 7919  
Doctoral Research

CDA 7980  
Doctoral Dissertation

CEG 5015  
Geotechnical Engineering II: PR: CEG 4101C. Continuation of CEG 4101C with emphasis on shear strength and design factors for earth pressures bearing capacity, and slope stability.

CEG 6065  
Soil Dynamics: PR: CEG 4101C. Comprehensive coverage in calculating the dynamic response of foundations, presenting a variety of contemporary techniques for fields and laboratory.
CEG 6115  EN 3(3,0)
Foundation Engineering: PR: CEG 5015. Analysis and design of spread footings, mat foundations, retaining walls, sheeting and bracing systems and pile foundations.

CEG 6317  EN 3(3,0)

CEG 6415  EN 3(3,0)
Seepage Analysis: PR: CEG 4101C. Seepage and groundwater flow analysis: levees, earth dams, retention ponds, etc. Appropriate computer programs and engineering applications.

CEN 5610  AS 3(3,0)
Software Engineering: PR: COP 4020 and knowledge of ADA. Study of design techniques for large software systems, modularization, task assignment, management techniques, implementation techniques, testing, quality control, documentation and maintenance.

CES 5143  EN 3(3,0)
Matrix Structural Analysis: PR: CES 4102 or equivalent. Optimization and matrix methods applied to the design of real structures.

CES 6116  EN 3(3,0)
Finite Elements in Structures: PR: C.I. Applications of the finite element method to the analysis and design of linear and non-linear structural components and systems.

CES 6129  EN 3(3,0)

CES 6144  EN 3(3,0)
Matrix Methods of Structural Analysis: PR: CES 5141 or C.I. Structural analysis of beams, frames, and plates using matrix methods and current computer programs.

CES 6209  EN 3(3,0)

CES 6218  EN 3(3,0)

CES 6606  EN 3(3,0)
Steel Design: PR: CES 4605 or equivalent. Design of complete steel structures to include economics, plastic design, and real building examples.

CES 6706  EN 3(3,0)
Concrete Design: PR: CEG 4702 or equivalent. Design of concrete structures to include economics, slabs, prestressed concrete, and real building examples.

CGN 5320C  EN 3(2,2)
Geographic Information Systems: Programming theory and application of Geographic Information systems to Civil Engineering projects.

CGN 5504C  EN 3(2,2)
Civil Engineering Materials: PR: EGN 3350C, EGN 3331 or C.I. Structure, properties and applications of materials used in civil engineering including concrete, steel, asphalt, wood, soils, and composite materials.

CGN 5506C  EN 3(2,2)
Asphalt Concrete Mix Design: PR: CEG 4101C. Properties of asphalt, aggregate and asphalt mixtures, Marshall mix design, Hveem mix design, pavement rehabilitation.

CGN 6425  EN 3(3,0)
Mathematical Modeling in Civil Engineering: PR: C.I. Development of modeling techniques applied to the analysis of contemporary Civil Engineering problems including transportation, fluid flow, and two-dimensional continuum analysis.

</tbody>
</table>
CHS 6260
Chemical Unit Operations and Separations: PR: C.I. A study of the elements and dynamics that are fundamental to industrial separation methods and transport processes.

CHS 6261
Chemical Process and Product Development: PR: C.I. Development of chemical products and processes including the determination of technical economic feasibility; use of experiment design in the optimization of variables and scale-up methods.

CIS 5105
Computational Techniques in Management Information Systems: PR: COP 4710. The role of computers in management information systems; analysis, design approaches, processing methods and data management; use of state-of-the-art software in design and development.

CLP 5004
Psychology of Adult Adjustment: PR: C.I. A survey of situations encountered during adulthood, including marriage, birth, parenthood, trauma, illness, death, etc. Effective adjustment.

CLP 5166

CLP 6416

CLP 6441
Individual Assessment:* PR: Graduate admission and C.I. Theories and techniques of psychological assessment with primary emphasis on interviewing, skills, cognitive assessment and report writing. Experience administering a variety of individual intelligence tests.

CLP 6441L
Clinical Lab – Individual Assessment: C.I. Practice in specific techniques in individual assessment. To be taken concurrently with CLP 6441.

CLP 6445
Psychological Theory and Assessment:* PR: CLP 6441, Graduate admission and C.I. Theories of personality and techniques of personality assessment with primary emphasis on interviewing skills, objective and projective techniques, and report writing.

CLP 6445L
Clinical Lab – Personality Assessment: C.I. Practice in specific techniques in personality assessment. To be taken concurrently with CLP 6445.

CLP 6456
Individual Counseling – Theory and Practice:* PR: Graduate admission and C.I. Introduction to Counseling Theory, Experiential Laboratory.

CLP 6456L
Clinical Lab – Counseling; C.I. Practice in specific techniques in counseling. To be taken concurrently with CLP 6456.

CLP 6457

CLP 6457L
Clinical Lab: Group Therapy: C.I. Practice in specific techniques in group therapy. To be taken concurrently with CLP 6457.

CLP 6458
Behavior Therapy:* PR: CLP 6456, Graduate admission and C.I. Introduction to the principles and procedures of behavior modification as a clinical intervention technique.

CLP 6458L
Clinical Lab: Behavior Therapy: C.I. Practice in specific techniques in behavior therapy. To be taken concurrently with CLP 6458.

Clinical Lab – Behavior Therapy: C.I. Practice in specific techniques in behavior therapy. To be taken concurrently with CLP 6458.

CLP 6459L Clinical Lab – Marriage and Family Counseling: C.I. Practice in specific techniques in marriage and family counseling. To be taken concurrently with CLP 6459.

CLP 6932 Ethical and Professional Issues in Mental Health Practices: PR: Graduate admission, C.I. Examination of codes of ethics, laws, and professional standards in the mental health field.

COM 6303 Communication Research 1: Analysis of theory and methodology in communication research, with emphasis on persuasion, nonverbal communication, and interpersonal communication.

COM 6304 Communication Research II: PR: Statistics and COM 6303. Planning and implementation of research in persuasion, nonverbal communication, and interpersonal communication.

COM 6468 Communication & Conflict: Research seminar in the study of communication and conflict.

COM 6908 Independent Study

COM 6918 Research

COM 6971 Thesis

COP 5021 Programming Languages II: PR: COP 4020 and COT 4210. Introduction to compiler construction, parsing, parser generators, attributed grammars and the implementation of block structures and recursion. Students write a high-level language translator.

COP 5570 Software Tools: PR: COP 4600 and COP 5021. Systems programming languages, concurrent programming, design and implementation of software development/maintenance tools. A large programming project is required.

COP 5611 Operating Systems Design Principles: PR: COP 4600. Structure and functions of operating systems, process communication techniques, high-level concurrent programming, virtual memory systems, elementary queueing theory, security, distributed systems, case studies.

COP 5711 Principles of Data Base Systems: PR: COP 4710. Physical data organizations, popular data base systems, data models; reorganization, security, recovery, concurrency, distributed data bases, data base machines.

COP 6514 Operating Systems Techniques: PR: COP 5611. Techniques in the design and implementation of operating systems. Case studies of several experimental and commercial operating systems.

COP 6621 Compiler Construction: PR: COP 5021, COT 5310. Techniques in the design and implementation of compilers. Optimization, code generation, error recovery, attributed grammars. A project is required.

COP 6730 Data Base System Techniques: Recent and/or more advanced developments in data base systems (e.g., recovery protocols, concurrency control schemes, query processing techniques, user interfaces, expert data base systems.)
COP 6731
Data Base System Theory: PR: COP 5711. Theoretic aspects of data bases (e.g., relational data theory, security models, data models, performance optimization.)

COP 6918
Research

COP 7919
Doctoral Research

COP 7980
Doctoral Dissertation

COT 5310
Formal Languages and Automata Theory: PR: COP 4020 and COT 4210. Classes of formal grammars and their relation to automata, normal forms, closure properties, decisions problems, LR(k) grammars.

COT 5405

COT 5501
Computational Methods/Applications: PR: COT 4500. Computational solution techniques for algebraic equations, ODE and PDE models of applications selected from science, engineering, applied mathematics and computer science.

COT 5515
Computational Methods/Linear Systems: PR: COT 4500 and MAS 3113. Mathematical models for linear systems, linear programming, the simplex method, integer and mixed-integer programming, introduction to nonlinear optimization and linearization.

COT 6300
The Theory of Parsing and Translation: PR: COT 5310. Methods of top-down and bottom-up parsing, LL(k), recursive descent, precedence, bounded-context, SR(s,k), SLR(k), LALR(k), LR(k), parser compression and generation.

COT 6410
Computational Complexity: PR: COT 5405. Properties of algorithms, computational equivalence of machines, time-space complexity measures, examples of algorithms of different complexity, classification of algorithms, classes P and NP.

COT 6415

COT 6505

COT 6506

COT 6818
Research

COT 7919
Doctoral Research

COT 7980
Doctoral Dissertation

CRW 5004
Graduate Writers' Workshop: Student writers present their own work, receiving detailed analysis of its strengths and weaknesses from their fellow writers and from the teacher.

ECM 5135

ECM 6235

ECO 5005
Economic Concepts: PR: Acceptance into the graduate program. Introduction to micro- and macroeconomic analysis.

ECO 5415
Statistics for Business and Economics: PR: Acceptance into the graduate program and MAC 3233 or equivalent. Statistical theory and problems relating to business and economics including time series and correlation theory, index number theory and statistical inference.

ECO 6115
Economic Analysis of the Firm: PR: Graduate standing and ECO 5005 or equivalent. Commodity price and output determination; factor price determination and functional income distribution; analysis of different types of markets.

ECO 6206
Aggregate Economic Conditions and Analysis: PR: Graduate standing and ECO 5005 or equivalent. An analysis of aggregate economic conditions including the determination of output, employment and income levels.

ECO 6226
Seminar in Money, Banking and Monetary Policy: PR: Graduate standing and ECO 5005 or equivalent. Study of the structural foundation and policy making activities of the monetary authorities.

ECO 6266
Business Cycles and Forecasting: PR: ECO 5005 and ECO 6416 or equivalents, graduate standing. Use of economic tools for measuring changes in aggregate economic activity, changes in production and prices, and the use of statistical techniques.

ECO 6305
History of Economic Thought: PR: Graduate standing and ECO 5005 or equivalent. A study of the leading ideas of the major contributors to the development of economic thought.

ECO 6416
Statistical Methods for Business Decisions: PR: Graduate standing and ECO 5415 or equivalent. Multivariate methods and related tools applied to analyze business and economic data as an aid in decision making.

ECO 6424
Econometrics: PR: ECO 6416 and graduate standing. The mathematical formulation of economic theories and the use of statistical procedures to measure the theoretical relationships and to verify or reject the theories.
ECO 6505  BA 3(3,0)
Public Finance and Fiscal Policy: PR: Graduate standing and ECO 6115 or equivalent. Analysis of the role of government and the effects of spending, taxing, and borrowing on the economy.

ECO 6705  BA 3(3,0)
Seminar in International Economics: PR: Graduate standing and ECO 6115 or equivalent. An inquiry into the theory of international trade and finance, commercial policy and economic integration.

ECP 6205  BA 3(3,0)
Labor Economics: PR: Graduate standing and ECO 6115 or equivalent. An investigation into the nature and function of the labor markets, with specific concern for both institutional and noninstitutional imbalance.

ECP 6405  BA 3(3,0)
Industrial Organization and Performance: PR: Graduate standing and ECO 6115. A study of the performance of various types of market structure and practice relative to price and efficiency.

ECP 6605  BA 3(3,0)
Economics of Urban and Regional Problems: PR: Graduate standing and ECO 6115. Economic analysis of the problems arising from and associated with the growth and development of cities and regions.

ECP 6705  BA 3(3,0)
Managerial Economics: PR: Graduate standing and ECO 6115 or equivalent. The use of economic tools and methods of reasoning applied to a wide range of business and economic problems.

ECS 6006  BA 3(3,0)
Seminar in Comparative Economic Systems: PR: Graduate standing and ECO 5005 or equivalent. An examination of factors that influence economic systems, patterns of resource allocation and income distribution in differing economic environments.

ECS 6015  BA 3(3,0)
Economic Development: PR: Graduate standing and ECO 5005 or equivalent. Analysis of theories and problems of growth and development with special attention to resource scarcity, population growth, and interaction of foreign trade and internal development.

EDA 6061  ED 3(3,0)
Organization and Administration of Schools: PR: Basic Teacher Certificate or C.I. Introduction to and overview of educational administration including governance, finance communications and information management, personnel evaluation.

EDA 6106  ED 3(3,0)
Trends in Educational Administration: PR: Master's degree and/or Rank II certification including a course in school organization. Exemplary organization patterns in school administration will be examined. Study of patterns of functions in selected outstanding school organizations.

EDA 6201  ED 3(3,0)
Educational Business Management Systems: PR: Master's degree and a graduate course in school finance and business administration. Identification and study of exemplary management procedures and systems in education.

EDA 6222  ED 3(3,0)
Administration of Educational Personnel and Contracts: PR: Master's degree and/or Rank II certification, including a course in educational law. Study of educational settings in which administrators deal with contracts and legal dimensions of instructional, technical, and staff personnel. Federal, state, and local factors will be analyzed.

EDA 6232  ED 3(3,0)
Legal Aspects of School Operation: PR: Basic Teacher Certificate or C.I. Study of state and federal laws affecting the operation of public schools emphasizing individual rights and responsibilities of students, faculty, and administrators.

EDA 6240  ED 3(3,0)
Educational Financial Affairs: PR: Basic Teacher Certificate or C.I. Theoretical and practical approaches to managing school business affairs at central office and individual school levels.

EDA 6260  ED 3(3,0)
Educational Systems Planning and Management: PR: Basic Teacher Certificate or C.I. Application of current educational management and behavioral theory for systems approaches in schools and educational facilities.
EDA 6300  
Community School Administration: PR: C.I. The relationships between the school and the community with special emphasis on community needs and the development of a total community school program.

EDA 6502  
Organization and Administration of Instructional Programs: PR: Basic Teacher Certificate or C.I. Study of school organization, administration and management with emphasis toward organizational theory, leadership, evaluation and change and improvement strategies.

EDA 6540  
Organization and Administration of Higher Education: PR: C.I. Purposes, organizations and administration of two-year and four-year institutions of higher education in the U.S. Public and private colleges are studied.

EDA 6931  
Contemporary Issues in Educational Leadership: A capstone course intended to stimulate inspection, analysis, and dialogue regarding contemporary issues and tensions facing educational leaders and educational systems.

EDA 6946  
Internship: PR: C.I. Normally, the Educational Leadership internship is completed during the latter part of the degree program. Application must be made in semester prior to internship through the student's advisor.

EDA 6971  
Treatise

EDA 7192  
Educational Leadership: PR: Advanced graduate status of C.I. An analysis of the interactive process and functioning of groups; development of skills essential for effective educational leadership; and the change process.

EDA 7195  
Politics, Governance and Financing of Educational Organizations: PR: Advanced graduate status or C.I. The study of policy development as a political process; governance issues; and financial issues in education.

EDA 7205  
Planning, Research and Evaluation Systems in Educational Administration: PR: Advanced graduate status or C.I. The study of research and evaluation methodologies, system theory, and planning and design strategies in educational administration.

EDA 7225  
Educational Personnel, Contracts and Negotiations: PR: Advanced graduate status or C.I. Program and completion of a course in school law. Readings, discussions and research pertaining to administration of educational personnel and contracts with emphasis on collective bargaining negotiations and grievance resolution.

EDA 7235  
Seminar in School Law: PR: C.I. Seminar to explore various legal aspects related to the administration and organization of American education and to enable the individual to research in depth selected legal topics.

EDA 7241  
Economics of Public Education: PR: C.I. Economic effects of schools upon the local, state and national economy; resource allocation and education investment.

EDA 7260  
Educational Facilities: PR: C.I. Administration of educational facilities such as surveys, finance plans and specifications, equipment, contracts, construction procedures, maintenance and custodial services.

EDA 7274  
Seminar: Applications of Technology to Educational Leadership: PR: EDA 6260 or C.I. Study of administrative and leadership technology applications at the school building or district level.
EDA 7905
Directed Independent Study

EDA 7919
Dissertation Research: PR: C.I.

EDA 7930:
Seminar in School Administration: PR: C.I. Discussion of problems in school administration, patterns of curriculum organization and research projects.

EDA 7943
Field Project: PR: C.I. Field experience and projects for advanced graduate students. Participation in school plant surveys, accreditation visitation, curriculum studies, administrative analysis, field research. May be repeated for credit.

EDA 7980
Dissertation: PR: Admission of candidacy.

EDE 5541
Individualizing Instruction in the Elementary School: PR: Basic Teacher Certificate or C.I. Study of basic philosophy, organizational patterns, techniques, materials and activities related to individualizing instruction in the elementary school classroom.

EDE 6205
Elementary School Curriculum: PR: Basic Teacher Certificate or C.I. Analysis of the forces which shape and contribute to the vertical and horizontal curriculum designs of elementary schools.

EDE 6971
Treatise

EDF 5245
Preparation and Management of Classroom Instruction: PR: C.I. Study of strategies for instructional planning and classroom management that result in optimum learning.

EDF 5259
Classroom Management and Teaching: PR: C.I. Study of teaching behaviors and strategies for classroom management that result in a minimum of behavior problems and sound instructional planning.

EDF 6155
Lifespan Human Development and Learning: Research in childhood, adolescent and adult development relevant to contemporary American education. Emphasis on application of theory to educational practice.

EDF 6233
Analysis of Classroom Teaching: PR: EDF 6481 or C.I. Analyses of effective teaching practices and their effect upon classroom instruction and learning.

EDF 6236
Principles of Instruction and Learning: The analysis and application of selected concepts and theories of learning in relation to curriculum design, classroom strategies, and instructional techniques.

EDF 6259
Strategies of Classroom Management: Study of strategies of classroom management that result in optimum learning and a minimum of behavior problems.

EDF 6401
Statistics for Educational Data: PR: EDF 6481 or C.I. Design of educational evaluation; analysis of data, descriptive and inferential statistics, interpretation of results.

EDF 6432
Measurement and Evaluation in Education: PR: Graduate standing. Concepts of measurement and evaluation, classroom test construction, creation and use of derived scores, selection and use of published measurement instruments, current issues.

EDF 6437
Development and Validation of Educational Tests and Measures: PR: EDF 6401, EDF 6432. Criterion and norm-referenced test development for educational agencies: specifications, item development and trial, scaling, passing scores, and test norms.
EDF 6481 Fundamentals of Graduate Research in Education: PR: Graduate standing. Review and critique of research literature, use of library resources for educational research, and introduction to the concepts of research design and data analysis.

EDF 6486 Research Design in Education: PR: EDF 7403 or C.I. An examination of methodological techniques for specific educational problems. Intended for students in the process of designing independent research studies.

EDF 6517 History and Philosophy of American Education: PR: C.I. A critical analysis of the conceptual and operative educational systems developed in the United States of America.

EDF 6608 Social Factors in American Education: Analysis of general and specific aspects of American education as they relate to social and behavioral sciences.

EDF 6886 Multicultural Education: A survey of multicultural education; analysis of the relationship between cultural transmission, cultural pluralism, and the learning process within American schools.

EDF 6971 Thesis

EDF 7232 Analysis of Learning Theories in Instruction: PR: Advanced graduate standing or C.I. Analysis of theories and research relevant to understanding learning in educational settings.

EDF 7403 Quantitative Foundations of Educational Research: PR: EDF 6401 or C.I. Examination of appropriate methods in applied educational contexts. Consideration of analysis strategies for educational data, emphasis on identification and interpretation of findings.

EDF 7463 Analysis of Survey, Record and Other Qualitative Data: PR: EDF 6401. Applications of summative evaluation for education: interpretation of impact data, measurement scales, survey and record data.

EDF 7475 Qualitative Research in Education: PR: EDF 7463. Introduction to the philosophical and conceptual basis of qualitative research methods, strategies for gathering, analyzing and interpreting qualitative data, emerging issues.

EDG 5325 Techniques for the Developing Professional in Education: PR: C.I. Analysis, study, development and use of techniques for enhanced instruction in the educational setting.

EDG 5337 Teaching Individuals, Small and Large Groups: Study of teaching skills for effectively instructing individuals in various educational groups, with consideration of developmental and behavioral characteristics of students.

EDG 5745 Teaching the Non-English Student: PR: FLE 3063 or bilingual and non-linguistic instruction in curriculum areas and in English as a second language.

EDG 5941 Clinical Practice: PR: Admission to STEP II, III or IV. Clinical internship in an appropriate educational setting under the direction of a university supervisor or peer teacher.

EDG 6046 Contemporary Issues In Education: An analysis of current trends in education and their impact on educational programs.

EDG 6223 Curriculum Theory and Organization: An exploration and examination of the foundations, design, development and organization of curriculum in K-Plus settings and professionals’ roles in curriculum decision making.
EDG 6253  
Curriculum Inquiry: Provides participants with the knowledge and skills necessary to understand, plan, and implement effective curriculum practices and change in K-Plus and other instructional settings.

EDG 6285  
Evaluation of School Programs: PR: Graduate standing. History of program evaluation, systems approaches to program evaluation, concepts of stakeholder and qualitative approaches to program evaluation, the role of evaluator and administrator.

EDG 6327  
Techniques of Game Use in Education: Analysis, development, and use of educational games as an approach to classroom teaching.

EDG 6415  
P.R.I.D.E. (Professional Refinements in Developing Effectiveness): PR: C.I. Questioning techniques, student non-verbal communication; build a symmetry of classroom rewards and penalties; analyze critical incidents that institute practices for the lowest risk and greatest gain.

EDG 6416  
Project: T.E.A.C.H.: PR: C.I. Topics in questioning and paraphrasing skills, positive support problem solving skills, counseling techniques, non-confrontation strategies, group dynamics and discipline decision making.

EDG 6417  
Teaching Through Learning Channels: PR: C.I. Teaching effectiveness on identifying and use of student learning channels, analysis of curricula based on learning channels; develop alternative strategies to meet needs of heterogeneous classroom.

EDG 6940  
Graduate Internship: PR: Approval of Student Internship Office. Internship in an appropriate educational setting under the direction of a qualified field supervisor and/or a university supervisor. (May be repeated for credit.)

EDG 6946  
Practicum, Clinical Practice

EDG 6971  
Thesis

EDG 7221  
Advanced Curriculum Theory: PR: EDF 6232; ESE 6325 or C.I. An analysis of the research base which supports the various dimensions of the curriculum field.

EDG 7356  
Models of Teaching and Instructional Theory: PR: EDF 6232 or C.I. Examination of models of teaching. Focus on the roles of the teacher, applicable contexts and learning goals; historical, philosophical, learning, and research bases.

EDG 7692  
Issues in Curriculum: PR: EDG 7221; EDG 7356 or C.I. Examination of the relationships between the research bases of instructional and curriculum theories with emphasis on current issues and concerns.

EDG 7919  
Dissertation Research: PR: C.I.

EDG 7939  
Special Topics/Seminars: PR: Doctoral level.

EDG 7980  
Dissertation: PR: Admission to Candidacy.

EDH 6065  
History and Philosophy of Higher Education: PR: C.I. Early European and American universities, both state and private. Also considers small and private junior and senior colleges.

EDH 6215  
Community College Curriculum: PR: C.I. Examination of the background, development, function, and goals of the curriculum of the community college.
EDH 6305  

EDH 6505  
Finance in Higher Education: PR: Completion of Phase II of Education Professional Preparation or C.I. Fundamental considerations in the finance of institutions of higher education.

EDM 5235  
Teaching in the Middle School: Methods of middle school teaching; team planning and teaching; developmental and learning patterns of the emerging adolescent; use of alternative teaching strategies.

EDS 5356  
Supervision of Professional Laboratory Experiences: PR: C.I. Study of the undergraduate professional laboratory experiences program with emphasis on the role and responsibilities of the teacher education associate or supervising teacher.

EDS 5357  
Supervision of Clinical Experiences: PR: C.I. Study of the beginning teacher and STEP programs with emphasis on the role and responsibilities of the peer teacher or building level administrator.

EDS 6050  
Supervision of Instruction: Effective supervisory principles and practices which can be used for instructional improvement.

EDS 6053  
Trends in Educational Supervision: PR: Basic supervision course or C.I. Examination and analysis of the trends, issues, and problems in educational supervision.

EDS 6100  
Leadership: PR: C.I. Analysis of the interactive process within and between groups, emphasizing the formation and functioning of groups; development of skills essential for effective leadership.

EDS 6123  
Educational Supervisory Practices I: PR: Basic Teacher Certificate or C.I. Analysis of effective supervisory behavior as it relates to human relations/communication skills; leadership; motivation; curriculum development; community relations; and service to teaching.

EDS 6130  
Educational Supervisory Practices II: PR: Basic Teacher Certificate or C.I. Analysis of effective supervisory behavior as it relates to planning and change; observation and conferencing skills; staff and group development; problem solving; and decision making.

EDS 6971  
Thesis

EDS 7111  
Administration and Supervision of Staff Development: PR: Basic Teacher Certificate or C.I. Role and procedures for the supervisor or administrator in staff development. Assessment of staff development needs and delivery systems are stressed.

EEC 5205  
Programs and Trends in Early Childhood Education: PR: Basic Teacher Certificate or C.I. Philosophy, content, facilities, instructional materials and activities appropriate for children 3 to 8 years of age; current research; issues and trends. Concurrent laboratory experiences.

EEC 5206  
Organization of Instruction in Early Childhood Education: PR: Basic Teacher Certificate or C.I. Organization and techniques in instruction relating to language arts, social sciences, science, mathematics, health and physical education; problems relating to reading readiness perception and cognition (K-3). Concurrent laboratory experience.

EEC 5208  
Creative Activities in Early Childhood: PR: Basic Teacher Certificate or C.I. Organization of instruction and methods for creative activities involving music, art, literature and educational toys. Integration of activities and basic skills curriculum (K-3). Concurrent laboratory experience.
EEC 6268
Play Development, Intervention and Assessment: Explores play development, facilitation, intervention and assessment.

EEC 6406
Guiding and Facilitating Social Competence: Provides students with techniques to facilitate and guide the behavior and emotional growth of young children.

EED 6071
Behavior Disorders in Schools: PR: Basic Teacher Certificate or C.I. Assessment analysis of behavior disorders, cause and effects, identification and theories.

EED 6226
Theory and Application for EH: PR: C.I. Study of various approaches to use in teaching emotionally handicapped children interpersonal and cognitive skills with special emphasis on the severe and moderate populations.

EEL 5173

EEL 5240C

EEL 5255

EEL 5323C
Thin Film Technology: PR: EEL 3306 or equivalent. To present the various thin film deposition techniques for the fabrication of microelectronic, semiconductor and optical devices.

EEL 5353
Semiconductor Device Modeling and Simulation: PR: EEL 3307. Large signal and small signal model development for semiconductor diodes, BJTs, and MOSFETs. Parameter extraction, numerical algorithm, and SPICE simulation are included.

EEL 5355C
Fabrication of Solid-State Devices: PR: EEL 4308. Fabrication of microelectronic devices, processing technology, ion implantation and diffusion, device design, and layout. Laboratory includes device processing technology.

EEL 5357
CMOS Analog and Digital IC Design: PR: EEL 3306 and EEL 4309. The objective of this course is to present the principles and techniques of the design of analog and digital circuits that are to be implemented in a CMOS technology.

EEL 5370

EEL 5434
Microwave Circuits and Devices: PR: EEL 4436 or EEL 5555. Planar transmission lines; passive microwave circuits; active circuit design using Gunn, IMPATT, FETS, RTDS, etc.; microwave integrated circuits.

EEL 5441
Introduction to Wave Optics: PR: EEL 4440, or PHY 4424 or C.I. Electromagnetic foundation of light waves as applied to reflection, refraction, diffraction, interference, polarization, coherence, and guided waves.

EEL 5450C
Thin Film Optics: PR: PHY 4424 or EEL 4440 and EEL 5441 or EEL 5451. Principles of thin film optics and its applications in optical electro-optical, and laser systems.
EEL 5453

EEL 5451L
Electro-Optics Laboratory: PR: EEL 4440 or EEL 5441 or C.I. Study of laboratory techniques for optical measurements and performance of measurements on electro-optic devices to determine operational characteristics.

EEL 5462C

EEL 5513
Digital Signal Processing Applications: PR: EEL 4750. The design and practical consideration for implementing Digital Signal Processing Algorithms including Fast Fourier Transform techniques; and some useful applications.

EEL 5517
Surface Acoustic Wave Devices and Systems: PR: EEL 3552C. Course discusses SAW technology which includes the physical phenomenon, transducer design and synthesis, filter design and performance parameters. Actual devices and communication systems are presented.

EEL 5542

EEL 5547

EEL 5555
RF Communications: PR: EEL 3552C. RF communication systems, 10 MHz to 1500 MHz. Scattering parameters, noise, receiver design, system implementation, spread spectrum. RF network and spectrum analyzers.

EEL 5563

EEL 5630

EEL 5704
Introduction to Digital Systems: PR: EEL 3342C or C.I. Analysis and synthesis of combinational, synchronous and asynchronous sequential logic circuits. Introduction to controller design using a digital design language.

EEL 5741C
Microcomputer-based Monitoring and Control Systems: PR: EEL 3342; EEL 4767C or C.I. Machine language programming; software development aids; systems design; interfacing considerations.

EEL 5771C

EEL 5820
Image Processing: PR: MAP 3302, EGN 3420, EEL 4750 or C.I. Two dimensional signal processing techniques; pictorial image representation; spatial filtering; image enhancement and encoding; segmentation and feature extraction; introduction to image understanding techniques.

EEL 5825
Pattern Recognition: PR: MAP 3302, EGN 3420. Theoretic and syntactic methods of pattern analysis: Decision functions; optimum decision criteria; training algorithms; feature extraction; unsupervised learning; data reduction and potential functions.
EEL 5874
Expert Systems and Knowledge Engineering: PR: EEL 4872 or C.I. Introduction to expert systems in engineering. Expert systems tools and interviewing techniques. This course is hands-on and project-oriented.

EEL 5881
Software Engineering I: PR: EGN 3420, EEL 4851 or C.I. Design, implementation, and testing of computer software for Engineering applications.

EEL 5891
Continuous System Simulation I: PR: EEL 3657 or C.I. Use of state-space techniques, numerical integration, and CSSL programs. Laboratory assignments.

EEL 6141
Synthesis of Electric Filters: Analysis and design of electric filters.

EEL 6338
Advanced Topics in Microelectronics: PR: C.I. The course covers advanced topics in microelectronics such as semiconductor device physics, semiconductor device fabrication, and semiconductor device modeling.

EEL 6354
Semiconductor Devices II: PR: EEL 5355C or C.I. Advanced course in the theory and design of semiconductor devices. Topics include injection, recombination, p-n junctions, FETs, and bipolar devices. Theory and models are developed.

EEL 6371

EEL 6372
Advanced Electronics II: PR: EEL 5357 or EEL 6371. Advanced topics of current interest in VLSI design.

EEL 6443

EEL 6446
Optical Systems Design: PR: EEL 5453 or C.I. Design principles of lens and mirror optical systems; evaluation of designs using computer techniques.

EEL 6457
Advanced Topics in Electro-Optics: PR: C.I. Current research topics in electro-optics, such as optical computing, binary optics, advanced system design issues, novel laser systems, etc.

EEL 6463
Antenna Analysis and Design II: PR: EEL 5462C. Moment method, GTD, aperture antennas, reflectors, frequency independent antennas and microstrip antennas.

EEL 6488

EEL 6492
Advanced Topics in Electromagnetics and Microwaves: PR: C.I. Advanced and current topics in EM fields, antennas, and microwaves.

EEL 6502
Adaptive Digital Signal Processing: PR: EEL 5513 or C.I. Weiner filtering, Least Mean Square and Recursive Least Squares based algorithms, adaptive prediction and identification with applications such as echo cancellation, etc.

EEL 6504
EEL 6505  Multi-dimensional Digital Processing: PR: EEL 5513 or C.I. Multi-dimensional signals and systems. Two-dimensional transforms and filters. Image processing applications.

EEL 6530  Communication Theory: PR: EEL 5542 or C.I. Communication in the presence of noise; analog and pulse modulation; use of phase-locked loops, synthesizers, VCOs, system implementations.

EEL 6537  Detection and Estimation: PR: EEL 6543. Use of hypothesis testing (Bayes, Minimax, NeymanPearson) and estimation theory (Bayes, Maximum-likelihood) for detecting or estimating signals in noise. Application in communications and radar.

EEL 6558  Advanced Topics in Digital Signal Processing: PR: C.I. Advanced and current topics in digital signal processing, such as neural network, spectral analysis, speech processing.

EEL 6560  Laser Engineering: PR: EEL 5441 or C.I. Principles of laser amplification and oscillations; design of lasers; general characteristics of excitation systems.

EEL 6564  Optical Communication Theory: PR: EEL 6530 or C.I. Optical communication schemes; Statistical modelling; coherent and non-coherent detection time synchronization channel characterization.

EEL 6555  Infrared Technology: PR: C.I. Analysis of infrared systems radiation theory, sources, atmospheric transmission, detection, noise, materials, optical design, system design.

EEL 6590  Advanced Topics in Communications: PR: C.I. Advanced and current topics in communications, such as coding theory, information theory, spread spectrum, etc.

EEL 6674  Optimal Estimation for Control: PR: EEL 5173 or C.I. Optimal filtering, smoothing and prediction methods are analyzed with applications to a number of linear and nonlinear dynamic systems.
EEL 6680
Advanced Topics in Modern Control Systems: PR: C.I. To introduce the student to present-day issues in control systems analysis, design, and implementation.

EEL 6707
Digital Computer Systems: PR: EEL 6708 or C.I. Analysis of special purpose computer elements, computers and computer systems. Microprocessor based systems, systems with one or more central or I/O processors, networks of computers.

EEL 6708

EEL 6743C
Microcomputer Applications Design: PR: EEL 5741C or C.I. Advanced applications of microcomputer systems. Design of systems and software to implement a case study in microcomputer usage.

EEL 6755
VLSI Design of Digital Signal Processors: PR: EEL 5173 and EEL 6502 (or C.I.) Signal processing techniques and algorithms as applied to digital filters, detection, and estimation. VLSI design methodology and components are applied to signal processors.

EEL 6763
Current Topics in Parallel Processing: PR: EEL 6708 or C.I. Research topics in parallel architectures, including, but not limited to, systolic architectures, wavefront arrays, interconnection networks, reconfigurable architectures and fast algorithms.

EEL 6785

EEL 6812
Introduction to Neural Networks: PR: EEL 5825 or C.I. Artificial neural network theory, models and architectures. Neurobiological basis, learning theory, applications, and hardware implementation issues.

EEL 6823
Image Processing II: PR: EEL 5820 or C.I. Advanced topics in image processing: non-linear and adaptive filtering, morphological processing, color image processing, texture analysis, and image coding.

EEL 6843
Machine Perception: PR: EEL 5820 or EEL 5825 or C.I. Advanced methods of machine understanding; simulation of intelligent machine systems; automatic recognition systems; visual tracking systems; multispectral feature analysis.

EEL 6845
Intelligent Control: PR: C.I. Design and development of intelligent machine systems; decision theory; intelligence modeling; neural models; advanced techniques in intelligent control.

EEL 6857
Engineering Data Reduction: PR: C.I. Digital analysis of multidimensional data. Applications of multidimensional orthogonal transforms.

EEL 6875
Engineering of Artificial Intelligence Systems: PR: EEL 5874 or C.I. Introduction to the engineering of knowledge-based automated reasoning systems including the use of representation languages and object-oriented techniques. It is based on LISP.

EEL 6876
Current Topics in Artificial Intelligence in Engineering Systems: PR: EEL 6875 or C.I. Research in current topics including artificial intelligence, relevant to engineering systems including causal modeling, qualitative reasoning, temporal reasoning and inductive reasoning. Review of current literature.
EEL 6878  
Modeling and Artificial Intelligence: PR: EEL 6875 or C.I. Introduction to various applications of artificial intelligence techniques as they affect the engineering aspects of computer-based simulation, modeling and training. The course will be taught as a seminar, making significant use of the current research literature. Topics include Intelligent Tutoring Systems, Situational Awareness, Intelligent Instructional Support, and Qualitative Modeling.

EEL 6883  
Software Engineering II: PR: EEL 5881 or equivalent; C.I. Continuation of EEL 5881. Emphasis on term projects and case studies.

EEL 6885  

EEL 6887  
Software Engineering Life-Cycle Control: PR: EEL 5881, EEL 6883. Issues in software development life-cycle control including project cost and time estimation, methods and models, manpower allocation, and system configuration management.

EEL 6893  
Continuous System Simulation II: PR: EEL 5891. Continuation of EEL 6426 including advanced features of Continuous Simulation Languages such as user-defined macros, linear analysis package, and sampled data systems. A simulation study term project is required.

EEL 6885  
Current Issues in Real-Time Simulation: PR: EEL 5771C, EEL 5891. Design considerations in real-time, computer based, training simulator systems. Laboratory assignments.

EEL 6887  

EEX 5051  
Exceptional Children in the Schools: PR: Senior Standing or C.I. Characteristics, definitions, educational problems and appropriate educational programs for the exceptional children in schools.

EEX 5702  
Planning Curriculum for Prekindergarten Children with Disabilities: Focus on curriculum planning; developmentally appropriate practices and implementation of individualized instruction for prekindergarten children with disabilities.

EEX 5750  
Communication with Parents and Agencies: Presentation of methods of interacting with community agencies, supporting and collaborating with families, developing a case management system and facilitating program transition.

EEX 6017  
Typical and Atypical Applied Child Development: Focus on the stages and sequence of development and the impact of disabilities and biomedical risk factors on learning and development.

EEX 6051  
Instructional Strategies PREK-6: A varying exceptionalities strategies (SLD, EH, MH) course using a cross-categorical model. The course is concerned with the pre-k handicapped child through grade 6.

EEX 6055  
Instructional Strategies 6-12: A varying exceptionalities strategies (SLD, MH, ED) course using a cross-categorical model. The course is concerned with grades 6-12 and low incidence populations.

EEX 6107  
Teaching Spoken and Written Language: Diagnosis and remediation of spoken and written language problems found in the exceptional populations. Overview of alternative methods of communication.

EEX 6224  
Observation and Assessment of Young Children: Study of formal and informal observation and assessment.
EEX 6257
Exceptional Adolescents: An examination of the problems, diagnosis, teaching strategies and materials peculiar to the exceptional adolescent.

EEX 6266
Assessment and Curriculum Prescriptions for the Exceptional Population: The class addresses contemporary assessments and models for assessing exceptional children. Curriculum and prescription are also addressed.

EEX 6266
Assessment and Curriculum Prescriptions for the Exceptional Population: The class addresses contemporary assessments and models for assessing exceptional children. Curriculum design and prescription are also addressed.

EEX 6342
Seminar—Critical Issues in Special Education: An examination of research and current literature dealing with some of the critical issues in all areas of special education.

EEX 6524
Organization and Collaboration in Special Ed.: PR: C.I. The course is designed to address evaluation, assessment, personnel resource, grant writing and other administrative issues. Collaborative models of intervention and service delivery are presented.

EEX 6612
Methods of Behavioral Management: Analysis of the principles of behavior management and precision teaching and application of these principles to the solving of classroom management problems.

EEX 6863
Supervised Teaching Practicum with Exceptional Children: PR: Bachelor's degree, approved program and C.I. Supervised observation and teaching of an exceptional student.

EEX 6971
Treatise

EGC 5036
Guiding Human Relationships: PR: Senior standing or Basic Teacher Certificate. Human relationship skills which will enhance intra- and inter-personal relating skills in classrooms.

EGC 6437
Advanced Counseling Techniques: PR: EGC 6435, EGC 6436 or C.I. A presentation of advanced techniques, approaches and strategies to counseling and psychotherapy. An experiential component will be included.

EGI 6051
Understanding the Gifted/Talented Student: A study of characteristics of the gifted/talented students; theories and research; identification procedures; special problems; educational forces.

EGI 6245
Program Planning and Methodology for Gifted/Talented Students: A study of organization, curriculum, strategies and activities for the gifted/talented student; diagnostic teaching; learning-teaching styles; instructional materials; individualized instruction.

EGN 5034
Engineering and Public Works: PR: C.I. The purposes, function, and role of engineering within public works.

EGN 5035
Topics in Technological Development: PR: C.I. Selected topics in the technological development of western civilization including the weight-driven clock, steam engine, electric light, etc.

EGN 5036

EGN 5840
Small Rocket Applications for Teachers: PR: Admission to Martin Marietta/UCF Academy. Earth and space environments, rocket propulsion, meteorological and environmental measurements, payload launch procedures, orbits and trajectories, safety, model rocket experiments, field trip, student science experiments.
EIN 5117  Management Information Systems I: PR: C.I. Design and implementation of computer-based management information systems. Organizational, managerial, and economic aspects of MIS.

EIN 5248C  Ergonomics: PR: C.I. Applications of anthropometry; functional anatomy, mechanics, and physiology of the musculoskeletal concepts in the engineering design of industrial tools, equipments and workstations.

EIN 5255  Training Simulator Engineering: Introduction to significant topics relative to the development and use of simulators for knowledge transfer in the technical environment.

EIN 5356  Cost Engineering: Cost estimation and control of engineering systems throughout the product life cycle.

EIN 5368  Materials Handling: Material handling function in manufacturing environment; quantitative techniques for analysis, controls, storage and warehousing, automation and cost justification; lab focuses on plant trips and case studies.

EIN 5381  Engineering Logistics: Study of the logistics life-cycle involving planning, analysis and design, testing, production, distribution, and support.

EIN 5388  Forecasting: PR: STA 3032 or STA 5156. Industrial applications of forecasting methods with emphasis on microcomputer based packages.

EIN 5399  Concurrent Engineering: PR: EIN 4411. Elements of concurrent engineering and its applications. Topics include quality function deployment, design for manufacturability and design for assembly.

EIN 5415  Tool Engineering and Manufacturing Analysis: PR: EIN 4391 or C.I. Tool materials and design, tolerance technology, theory of metal cutting, and machineability.

EIN 5602C  Expert Systems in Industrial Engineering: Overview of basic concepts, architecture and construction of expert systems in IE. Intelligent simulation training systems, case studies and problems. Laboratory exercises.

EIN 6140  Project Engineering: PR: C.I. Role of engineer in project management, emphasis on qualitative and quantitative techniques in planning, organization supervision, control of projects from conceptual design to field installation; applications via term project.

EIN 6249C  Biomechanics: PR: EIN 5248C or consent of instructor. Applications of body link system, kinematic aspect of body movement and mechanics of the human body concepts in the engineering design of work systems.

EIN 6256  Ergonomics in High Tech Environments: PR: EIN 5249C and EIN 6270C or C.I. Integration of man-machine concepts to the ergonomics applications in the design of physical man-machine properties.

EIN 6264C  Environmental Hygiene and Occupational Health: PR: EIN 5215 or C.I. Evaluation and control of mechanical, physical, and chemical environment. Environments considered include heat, cold, noise, vibration, light pressure, radiation, solid waste, air contaminants, etc.
EIN 6270C
Work Physiology: PR: EIN 5248 or C.I. Applications of the concepts of endurance fatigue, recovery, and the energy cost of work in the determination of work capacity, job design, personnel assignment, and work/rest scheduling.

EIN 6317
Training Systems Engineering: How human performance deficiencies should be addressed from a systems engineering point of view. Manpower, personnel, and training considerations will be examined.

EIN 6322
Engineering Management: PR: C.I. Investigate special topics for improvements of engineering enterprises in nationally and internationally competitive environments. Topics may include organization structure, motivation theory, technology management and entrepreneurship.

EIN 6330
Quality Control in Automation: PR: ESI 4234 or C.I. Quality control applications in industrial automation, implementation of quality control through automated inspection, statistical tolerancing, application of statistics in quality control.

EIN 6336
Production & Inventory Control: PR: EIN 4333 or equivalent. Review of models and techniques used in forecasting, production control and inventory control. Includes aggregate planning, production scheduling, inventory management, models, etc.

EIN 6339
Productivity Engineering: Basic concepts and tools including measurement, evaluation, planning, and improvement. Latest models and techniques pertinent to both the manufacturing and service sectors are introduced.

EIN 6357
Advanced Engineering Economic Analysis: PR: EGN 3613; STA 3032 or equivalent. Topics include measuring economic worth, economic optimization under constraints. Analysis of economic risk and uncertainty, foundations of utility functions.

EIN 6392C
Manufacturing Systems Engineering: PR: EIN 4391 C. The integration of manufacturing technologies and information processing concepts into a system for controlling the manufacturing enterprise.

EIN 6398

EIN 6417
Precision Engineering: PR: ESI 4234 or C.I. Designing for high precision, machine accuracy, error reduction, thermal effects, coordinate measuring machines, and machine calibration with laser interferometry.

EIN 6418C
Electronics Manufacturing: PR: EIN 4391 or C.I. Electronics fabrication and assembly, FMS and CAD/CAM in electronics, information and control systems, micromachining with lasers, and surface mount technology.

EIN 6425
Scheduling and Sequencing: Basic problems, models and techniques of scheduling. Emphasis on general job shop scheduling problems. Analytical, graphical and heuristic methods are examined.

EIN 6603
Readings in Expert Systems/AI in Industrial Engineering: PR: EIN 5602C or equivalent. Reading and discussing current topics in expert systems/AI as applied to IE. Current literature in intelligent simulation training systems.

EIN 6605C

EIN 6607C
Computer Numerical Control: Computer numerical control (NC) systems and languages. Surface and part definition.
EIN 6606
Surface Design and Manufacture: Techniques for designing surfaces and parts, and methods for describing their manufacture.

EIN 6645
Modeling and Simulation of Real-time Processes: Mathematical modeling and computer simulation of engineering and scientific systems. Examination of hardware, software and solution methods for real-time systems.

EIN 6647
Intelligent Simulation: The use of intelligent objects in building simulation models to achieve a goal by altering the scenarios during problem solution.

EIN 6649
Intelligent Simulation Training System Design: A systems approach to building intelligent simulation training systems. Emphasis on removing the human instructor from the content training.

EIN 6933
Systems Acquisition: What the engineer needs to know about the systems acquisition process when dealing with government contracting agencies.

ELD 6112
Foundation and Diagnosis of Learning Disabilities: PR: Basic Teacher Certificate or C.I. A study of the history, definition, causes, characteristics and current issues; consideration of diagnostic tests, materials and procedures.

ELD 6323
Theory and Application for SLD: PR: C.I. Systematic programming techniques for Specific Learning Disabilities based on research and diagnostic information with special emphasis on the moderate population.

ELD 6944
Diagnostic Learning-Disabilities Laboratory: A laboratory designed for individual competence measurement of testing-evaluation skills. Must be scheduled concurrently with ELD 6112, Foundations and Diagnosis of LD.

EMA 5104

EMA 5106
Metallurgical Thermodynamics: PR: EGN 3343, EGN 3365C. Laws of thermodynamics, phase equilibria, reactions between condensed and gaseous phases, reaction equilibria in condensed solution and phase diagrams.

EMA 5108
Surface Science: PR: PHY 3049 and C.I. Methods of chemical and physical analysis of surfaces, with emphasis on ultra-high vacuum spectroscopies utilizing electron, ion and photon probes.

EMA 5140
Introduction to Ceramic Materials: PR: EGN 3365C. Uses, structure, physical and chemical properties, and processing of ceramic materials. Discussions will include recent developments for high technology applications.

EMA 5163
Polymer Science and Engineering: PR: EGN 3365C. Molecular structure, physical and chemical properties, preparation and processing of macromolecular materials. Discussions will include recent developments for high technology applications.

EMA 5326

EMA 5584
EM 6126
Physical Metallurgy: PR: EMA 5104 or EML 3236. Analytical methods in crystallography, dislocation theory, annealing, solid solutions, phases and phase diagrams, ferrous and non-ferrous alloy systems.

EM 6136

EM 6504
Modern Characterization Techniques for Materials: PR: EMA 5108. Practical approach and demonstrations of materials characterization emphasizing state of the art techniques.

EM 6626
Mechanical Metallurgy: PR: EMA 5104 or EML 3234. Elastic behavior and plasticity, dislocation theory, mechanical behavior of materials, fracture, elements of fracture mechanics, environment assisted cracking, creep and fatigue failures.

EM 6628

EME 5051
Technologies of Instruction & Information Management: Theories and practices utilizing instructional media and information technologies. Emphasis on new and emerging technologies and their effects on the school and media program.

EME 5054
Instructional Systems: A Survey of Applications: Applications of instructional technology in settings other than public schools. Survey of facilities, programs, and services in business, industry, religion, government, higher education and medical settings.

EME 5056
Communication for Instructional Systems—Process: Principles of written and oral communications for instructional technologists; development of assertiveness and interpersonal skills; conducting training programs for employees; creating hard copy materials.

EME 5057
Communication for Instructional Systems—Application: PR: EME 5056. Applications of technology, communications theory, platform skills, and instructional design to the effective presentation of training programs and instruction.

EME 5208
Production Techniques for Instructional Settings: Skills in producing instructional materials. Emphasis on graphic, audio, video and photographic skills and the application of instructional and communication theories.

EME 5225
Media for Children and Young Adults: Survey of materials for children's and young adults' informational and recreational needs; analysis, evaluation, and utilization of print and non-print materials.

EME 5408
Computer Applications in Instructional Technology: Techniques and skills for the use of computers for productivity and instruction by the instructional technologist.

EME 6053
Current Trends in Instructional Technology: PR: EME 6613. Survey of current trends and issues of importance to the field of instructional technology.

EME 6058
Current Trends in Educational Media: PR: C.I. Survey of current trends and issues of importance to the field of Educational Media.

EME 6062
Research in Instructional Technology: PR: EDF 6481, EME 6613 or EME 6605. Critical review and evaluation of landmark research in the areas of educational media, instructional design and instructional systems.

Multimedia Systems: PR: EME 5208 or EME 5057 or C.I. Advanced skills in computer-based graphic, audio, and video production. Integration of media into instructional packages. Application of instructional development skills and working with clients.

Media Systems Design: PR: EME 5054, EME 6613. Principles of communication, learning theory, and research in instructional technology applied to the design of mediated instructional messages.

Computer Assisted Instruction: PR: EME 5408. Utilization of commercial authoring systems and authoring languages to produce CAI ranging from drill and practice through simulations. Emphasis upon design and development phases.

Instructional Applications of Interactive Video: PR: EME 5408. Examines videotape and videodisc based interactive video systems as they apply to instructional settings. Requires basic knowledge of computer literacy and instructional design theory.

Role of the Media Specialist in Curriculum & Instruction: PR: EME 5051, EME 5208. Development of skills in instruction and instructional design. Emphasis on teaching, consultation and media skills and curricular involvement of the media specialist.

Instructional System Design: PR: EME 5054. Systematic design of instruction including task analysis, learner analysis, needs assessment, content analysis, specification of objectives, media selection, evaluation and revision; analysis of ID models.

Administration of Instructional Systems: PR: EME 5408, EME 6613. Provides opportunities for students to examine parameters, problems, and areas of importance in the management of instructional systems.

Administrative Principles in Media Centers: PR: EME 6605. Principles of planning, evaluating, budgeting, staffing, and marketing the school media program. Development of policies and procedures for the school media center, legislation technology, professionalism.

Organization of Media and Information: Methods for organizing print and non-print media, with instruction in cataloging and classification, using standard bibliographic tools and procedures.

Information Sources and Services: Development of skills in identifying appropriate information sources for school media centers, providing reference services, and teaching research skills and search strategies.

Information Retrieval Systems: PR: EME 5408. Examines applications of information retrieval that are appropriate for instructional technologists. Includes elements of search strategy construction, database and index structure, and online search procedures.

Practicum, Clinical Practice

</thead>
<tbody>
<tr>
<td>EML 5152</td>
<td>Intermediate Heat Transfer: PR: EML 4142, EML 5713, CR: EML 5060. An intermediate level course dealing with heat and mass diffusion, boundary layer problems, and radiation from real bodies. Emphasis on combined modes, numerical methods.</td>
<td>EN 3(3,0)</td>
</tr>
<tr>
<td>EML 5224</td>
<td>Acoustics: PR: EML 4220, CR: EML 5060. Elements of vibration theory and wave motion; radiation, reflection, absorption, and transmission of acoustic waves; architectural acoustics; control and abatement of atmospheric noise pollution; transducers.</td>
<td>EN 3(3,0)</td>
</tr>
<tr>
<td>EML 5228C</td>
<td>Modal Analysis: PR: EML 4220, EML 4303C, EML 5060. Theoretical basis. Measurement techniques, excitation, transducers, data acquisition. Detailed data analysis, modal parameter extraction, curve-fitting procedures. Modelling.</td>
<td>EN 3(3,0)</td>
</tr>
<tr>
<td>EML 5245</td>
<td>Tribology: PR: EGN 3331, EGN 3353, EGN 3365C, or C.I. Principles of fluid film lubrication (liquid and gas, journal and thrust bearings), contact mechanics (rolling element bearings), design of bearings and load bearing surfaces, friction and wear of materials, tribotesting.</td>
<td>EN 3(3,0)</td>
</tr>
<tr>
<td>EML 5402</td>
<td>Turbomachinery: PR: EML 3101, EML 4703 or EAS 4134. Application of the principles of fluid mechanics, thermodynamics and aerodynamics to the design and analysis of steam and gas turbines, compressors and pumps.</td>
<td>EN 3(3,0)</td>
</tr>
<tr>
<td>EML 5532C</td>
<td>Computer-aided Design for Manufacture: PR: EGN 3331 and EML 3500 or C.I. Theory and application of computer algorithms for the synthesis, simulation, design and manufacture of mechanical and thermal systems.</td>
<td>EN 3(2,2)</td>
</tr>
<tr>
<td>EML 5546</td>
<td>Engineering Design with Composite Materials: PR: EML 5237. Mechanics of structural components of composite materials under static, thermal, vibratory loads. Instability, Lamina and laminate theory, energy methods, failure theories and structural joining methods.</td>
<td>EN 3(3,0)</td>
</tr>
<tr>
<td>EML 5572</td>
<td>Probabilistic Methods in Mechanical Design: PR: EML 3500, STA 3032. Uncertainty modelling in design. Use of probabilistic mathematics to assess strength, stiffness, toughness, and stability. Applications.</td>
<td>EN 3(3,0)</td>
</tr>
<tr>
<td>EML 5713</td>
<td>Intermediate Fluid Mechanics: PR: EML 4703. CR: EML 5060. Fluid kinematics; conservation equations; Navier-Stokes equations; boundary layer flow; inviscid flow; circulation and vorticity; low Reynolds number flow; turbulence.</td>
<td>EN 3(3,0)</td>
</tr>
<tr>
<td>EML 6062</td>
<td>Boundary Element Methods in Engineering: PR: EML 5237 or EML 5713 or C.I. Integral (numerical) solution of potential, Poisson and diffusion equations; applications to heat transfer and fluid flow; complex variable boundary element methods.</td>
<td>EN 3(3,0)</td>
</tr>
<tr>
<td>EML 6066</td>
<td>Computational Methods in Mechanical and Aerospace Engineering: PR: MAP 3302. Competence in high level programming language. Interpolation, extrapolation, finite difference, quadratures. Linear and nonlinear systems of equations, solution of ODE’s and method of weighted residuals with applications in heat transfer, fluid mechanics, and aerospace engineering.</td>
<td>EN 3(3,0)</td>
</tr>
<tr>
<td>EML 6067</td>
<td>Finite Elements in Mechanical and Aerospace Engineering I: PR: EML 5237 or EML 5713 or C.I. Finite element analysis of thermomechanical response of aerospace and mechanical components and structures. Plates and shells. Vibrations. Composite materials. Minimum weight design. CAD interface. Introduction to codes.</td>
<td>EN 3(3,0)</td>
</tr>
</tbody>
</table>
EML 6068

EML 6104

EML 6105

EML 6124

EML 6131

EML 6154
Conduction Heat Transfer: PR: EML 5152 or C.I. Classical and numerical techniques applied to the solution of steady and transient conduction problems. Applications to the design of thermal systems.

EML 6155
Convection Heat Transfer: PR: EML 5152, EML 5713 or C.I. Convection heat, mass and momentum transfer in laminar and turbulent flows. Applications to the design of thermal systems.

EML 6157

EML 6158

EML 6211
Continuum Mechanics: PR: EML 5237, EML 4703 or equivalent. Tensors; deformation and strain; stress; field equations, constitutive equations, applications in fluid dynamics and linear elasticity.

EML 6223

EML 6226
Analytical Dynamics: PR: EML 5271. Kane method for kinematics and dynamics of particle and rigid bodies is developed and contrasted with Newton and Lagrange methods.

EML 6227
Nonlinear Vibration: PR: EML 5060 and EML 5271. Robust, reliable algorithms for simulation of nonlinear phenomena; phase planes; limit cycles; stability; period-doubling bifurcations; strange attractors; Poincare maps; Floquet theory; Lyapunov exponents; applications to mechanical and aerospace systems.

EML 6279
Synthesis of Mechanisms: PR: EML 5271 or C.I. Advanced synthesis, analysis, and design of planar and spatial mechanisms. Inversion techniques; computer applications; design of robotic manipulators.

EML 6305C
Experimental Mechanics: PR: EML 4304, EML 5237. Selected topics in strain measurements, photoelasticity, holographic interferometry; laser speckle measurement; acoustic emission; measurement of correlation and coherence functions.
EML 6311  System Control: PR: EML 4312; CR: EML 5060. Modern control theory for linear and non-linear systems; controllability and observability. Linear state feedback and state estimators, compensator design.

EML 6531  Mechanical Behavior of Materials: PR: EML 5237 or C.I. Failures of materials in mechanical design. Macroscopic concepts of damage tolerance, life prediction and fracture control. Introduction to plasticity, creep, fretting, shock, instability and wear.

EML 6653  Theory of Elasticity: PR: EML 5237. Review of stress and strain; solution by tensor stress and potential functions, axisymmetric problems; wave propagation.

EML 6725  Computational Fluid Dynamics & Heat Transfer I: PR: EML 5152 or C.I. Finite Difference methods; error and stability analysis; applications to model equations and further developments; matrix methods.

EML 6726  Computational Fluid Dynamics & Heat Transfer II: PR: EML 6725. Development of governing equations; turbulence modeling; numerical solution of Euler and potential equations, Navier-Stokes equations, and boundary layer equations; grid generation.

EMR 6205  Theory and Application for EMH: PR: C.I. Study of various approaches to use in teaching the Educable Mentally Handicapped motor, interpersonal and cognitive skills with special emphasis on the severe and moderate moderate.

EMR 6362  Teaching Students with Mental Disabilities: Strategies for teaching mentally handicapped students: development, implementation, and evaluation of individualized plans; special approaches to teaching functional skills; developmental programming; data based management.

ENC 5214  Production and Publication Methods: Theory and practice of production and publication methods for technical writers.

ENC 5219  Graphics in Technical Writing: A study of the creation and editing of graphics in technical documents.

ENC 6217  Technical Writing: Study of language, style, mechanics, graphics, and management necessary for technical editing.

ENC 6244  Teaching Technical Writing: The techniques and theories of teaching technical writing.

ENC 6261  Technical Writing, Theory and Practice: Study of major trends in technical communication theory and the practices this theory generates.

ENC 6292  Project Management for Technical Writers: Managing a writing project from inception to production: planning, budgeting, personnel, writing and editing.

ENC 6296  Computer Documentation: The theory and practice of producing software documentation from planning through production.

ENC 6306  Persuasive Writing: Theory and practice of writing persuasively.

ENV 6055  
Fate and Transport of Subsurface Contaminants: PR: EES 4111C, EES 4202C, CWR 6125. Principal concepts and modeling of the physical, chemical, and biological transport and transformation processes for subsurface contaminants.

ENV 6106  
Theory and Practice of Atmospheric Dispersion Modeling: PR: ENV 4121C or C.I. Atmospheric composition and dynamics. Engineering methods of mathematical modeling, both for point source and mobile source. Current computer models will be used.

ENV 6126  
Design of Air Pollution Controls: PR: ENV 4121C. Current methods for engineering design and performance analysis of air pollution control equipment to include scrubbers, baghouses, electrostatic precipitators, VOC incinerators, others.

ENV 6347  
Hazardous Waste Incineration: Theory and applications of design and operations of hazardous waste incinerators. Includes detailed consideration of air pollution control equipment.

ENV 6356  
Solid Wastes Management: PR: ENV 4341 or C.I. Study of the extent and characteristics of the solid waste problem, collection and disposal systems, environmental modeling and selected designs.

ENV 6519  
Aquatic Chemical Processes: PR: EES 4202C and EES 4111C or C.I. The applicability of water chemistry and physical chemistry on natural waters and waste-water with emphasis on environmental engineering problems.

ENV 6558  
Industrial Waste Treatment: PR: ENV 4561. Theories, methods, unit operations of management, reduction, treatment, disposal of industrial wastes.

ENV 6616  
Receiving Water Impacts: PR: EES 4202C and EES 4111C or C.I. Study of fate and transport of pollutant loadings into receiving waters, based upon physical, chemical, and biological interactions in natural systems.

ESE 5214  
Secondary School Curriculum Improvement: PR: Basic Teacher Certificate or C.I. Secondary school self-studies for curriculum projects, accreditation reports or staff development.

ESE 6235  
Curriculum Design: PR: Basic Teacher Certificate or C.I. Goal analysis, task analysis, needs assessment and writing performance objectives for developing courses of study.

ESE 6325  
Curriculum Theory: PR: Graduate standing or C.I. The foundations, design, constituent parts, development and implementation of change in public school curricula.

ESE 6416  
Curriculum Evaluation: PR: ESE 6235, or an equivalent curriculum course.

ESE 6971  
Treatise  

ESE 5236  
Reliability Engineering: PR: ESI 4234, or equivalent or C.I. Reliability theory and modeling approaches. Topics include: failure data analysis, maintainability, reliability standards (DOD), software reliability, reliability in design, and electronic systems reliability.

ESI 5316  
Operations Research: PR: EGN 4634 or C.I. Methods of operations research including formulation for models and derivation of solutions; linear programming, network models, queuing theory, simulation and nonlinear optimization techniques.

ESI 5451  
Network Based Project Planning, Scheduling and Control: PR: ESI 4312 or ESI 5316. Probabilistic and deterministic approaches for planning, scheduling, and controlling complex, large scale projects. PERT, CPM, resource leveling, risk analysis.
ESI 5531
Discrete Systems Simulation: PR: STA 3032 or STA 5156, COP 3215. Methods for performing discrete systems simulation, including network modeling, will be treated.

ESI 6217
Statistical Aspects of Digital Simulation: PR: STA 5156 or C.I. Statistical issues in digital simulation including input data analysis, pseudorandom number generation, experimental design, and simulation output analysis.

ESI 6224
Quality Assurance Management: PR: ESI 4234 or equivalent or C.I. Implementation and management of the quality assurance function. Planning and organization for quality, quality cost, Quality Audit and Corrective Actions.

ESI 6225

ESI 6227
Total Quality Management: PR: ESI 6225 or equivalent. Origins and practices of the U.S. TQM movement. TQM as a competitive strategy. Productivity and performance improvement strategies with TQM.

ESI 6336

ESI 6358
Decision Analysis: PR: ESI 4212 or ESI 5316. Classical Bayesian analysis; utility and its measurement; multiattribute utility methods; influence diagrams; Analytic Hierarchy Process; behavioral aspects; simulation.

ESI 6427
Linear Programming and Extensions: PR: ESI 4312 or ESI 5316. Simplex and Revised Simplex Method; interior-point methods; duality; large-scale optimization; decomposition algorithms; upper bounds: linearization; parametric LP; goal programming.

ESI 6437
Nonlinear Mathematical Programming and Dynamic Programming: PR: ESI 4312 or ESI 5316. Optimality conditions and algorithms for unconstrained and constrained nonlinear problems. Introduction to dynamic programming approach to multistage problems.

ESI 6484

ESI 6529

ESI 6532

NOTE: All EUH graduate colloquia listed below require intensive reading in the literature of a given field, class discussions, and the preparation of papers. The prerequisites for 5000-level courses are senior standing and the consent of the instructor. All seminars listed below involve supervised research and the writing of term papers. The consent of the instructor is required for every seminar.

EUH 5237
Colloquium in Europe from 1815-1848

EUH 5238
Colloquium in Europe from 1848-1914

EUH 5247
Colloquium in Europe from 1919-1939

EUH 5285
Colloquium in Europe Since World War II
EUH 5371
Colloquium in Spanish History
AS 3(3,0)

EUH 5517
Colloquium: Tudor-Stuart England
AS 3(3,0)

EUH 5527
Colloquium in 18th Century England
AS 3(3,0)

EUH 5579
Colloquium in Soviet Russia
AS 3(3,0)

EUH 5595
Colloquium in Czarist Russia
AS 3(3,0)

EUH 5608
Colloquium in European Intellectual History
AS 3(3,0)

EUH 6939
Seminar in European History: May be repeated for credit when content is different.
AS 3(3,0)

EVT 5260
Cooperative Programs in Vocational Education: PR: Basic Teacher Certificate or C.I. Study of cooperative vocational programs and achievement of competencies needed to establish, manage and coordinate co-op program activities in all vocational areas.
ED 2-4(2-4,0)

EVT 5315
Applied Clinical Teaching Techniques in Vocational Education: PR: Basic Teacher Certificate or C.I. Study and practice of clinical teaching methods, development of student performance assessment instruments, planning clinical learning experiences, and recordkeeping.
ED 2-3(2-3,0)

EVT 5316
Clinical Coordination for the Health Occupations Teacher: PR: Basic Teacher Certificate or C.I. Development of clinical guidelines, resources, student schedules, and risk-management programs. Includes negotiating clinical contractual agreements and planning field supervision.
ED 2-3(2-3,0)

EVT 5561
Student Guidance in the Vocational Program: PR: Basic Teacher Certificate or C.I. Achievement of skills used by teachers as they gather student data, confer with students and help students plan for employment or further education.
ED 2-3(2-3,0)

EVT 5564
Student Vocational Organizations: PR: Basic Teacher Certificate or C.I. Competencies needed by vocational teachers as they establish and supervise student vocational organizations in secondary and post-secondary schools.
ED 2-3(2-3,0)

EVT 5817
Management of Vocational Programs: PR: Basic Teacher Certificate or C.I. Study and achievement of selected competencies needed by vocational teachers, supervisors and local administrators in the management of vocational education programs in the schools.
ED 2-4(2-4,0)

EVT 6264
Administration in Vocational Education: PR: Basic Teacher Certificate or C.I. Administrative responsibilities in a local program of Vocational Education which includes two or more fields of occupational education.
ED 3(3,0)

EVT 6265
Supervision in Vocational Education: PR: Basic Teacher Certificate or C.I. Supervisory techniques for planning and implementing improvement of staff, curriculum and personal relations in Vocational Education.
ED 3(3,0)

EVT 6267
Vocational Program Planning, Development and Evaluation: PR: Basic Teacher Certificate or C.I. Achievement of selected teacher competencies related to program objectives, courses of study, long range plans and techniques for evaluating vocational program effectiveness.
ED 2-4(2-4,0)

EVT 6664
School/Community Relations for Vocational Education: PR: Basic Teacher Certificate or C.I. Achievement of proficiency in the use of media techniques to promote the vocational program. Development and maintenance of productive relationships between school and community groups.
ED 2-4(2-4,0)
EVT 6971
Treatise

EXP 5208
Sensation and Perception: PR: C. I. A study involving the human information processing with regard to physical and psychological variables in sensory and perceptual phenomena.

EXP 5256
Human Factors I: PR: None. Survey of human factors literature. Introduction to topics including human capabilities and human interfaces with human-machine systems.

EXP 5257
Human Factors II: PR: EXP 5256 (HF1). The second in the series of basic human factors courses involving an in-depth examination of issues.

EXP 5258

EXP 5445
Psychology of Learning and Motivation: PR: DEP 5057 or C.I. Examination of theories and research concerning the acquisition and retention of behavior as well as motivational factors which influence learning and behavior.

EXP 5506

EXP 6255
Human Performance Assessment: PR: C.I. Human performance dimensions and concepts of assessment of human capabilities; performance acquisition, information processing and decision making; applications of principles to understanding of stress and performance effectiveness.

EXP 6938
Teaching Seminar: PR: C.I. Orientation to and supervision in teaching assigned courses.

EXP 6946
Human Factors Internship: PR: EXP 5255, EXP 6257, PSY 6216, PSY 6217, EXP 5255, INP 6330. Supervised placement in an industrial, governmental, or consulting setting. Student completes a specific project under the supervision of an organizational sponsor and a faculty member.

FIN 5406
Financial Concepts: PR: Acceptance into the graduate program, ACG 5005 and ECO 5005 and ECO 5415 or equivalents. Effects of financial decisions upon the firm, interrelationships of these effects and alternatives available to financial managers in making these financial decisions.

FIN 6314
Management of Financial Institutions: PR: Graduate standing and FIN 6406. Analysis of management policies of financial institutions including asset, liability and capital management. Study of the legal, economic and regulatory environment faced by banks.

FIN 6406
Financial Analysis and Management: PR: Graduate standing and FIN 5405 or equivalent. Conceptual and practical problems associated with financial management of the nonfinancial corporation.

FIN 6425
Asset Management and Financial Decisions: PR: Graduate standing and FIN 6406. Considers the interrelated decision making process of asset allocations, corporate fund raising, dividend policies and market maximization.

FIN 6475
Business Valuation: PR: Graduate standing and FIN 6406. Theory and practice of estimating the value of small, closely held businesses.

FIN 6506
Analysis of Investment Opportunities: PR: Graduate standing and FIN 6406. Deals with the theory and tools of analysis required in the management of financial assets.
FIN 6507: BA 3(3,0)
Seminar in Investments: PR: Graduate standing, FIN 6406 and FIN 6506. Analysis of options, futures, and other derivative securities and their use in hedging strategies. Other topics include institutional equity and bond portfolio management techniques.

FIN 6627: BA 3(3,0)
International Financial Management: PR: ECO 6416, FIN 6406. The theory of finance as applied to the operations of multinational firms and international capital markets.

FIN 7807: BA 3(3,0)
Corporate Finance Theory: PR: Admission to the Business doctoral program and FIN 6406 or equivalent; ECO 6416 or equivalent; or consent of instructor. Elaborate coverage of significant theoretical/classical literature and review of empirical literature to provide a sound framework of conceptual knowledge for doctoral students.

FIN 7813: BA 3(3,0)
Seminar in Financial Markets and Institutions: PR: Admission to business doctoral program and FIN 6406 or equivalent, ECO 6416 or equivalent, and consent of instructor. Extensive study of the theoretical and empirical literature dealing with current theory of the operation of financial markets and financial intermediaries.

FIN 7816: BA 3(3,0)
Investment Theory: PR: Admission to business doctoral program; FIN 7811, QMB 7565, and consent of instructor. Extensive coverage of theoretical and empirical literature dealing with modern investment thought, portfolio theory, capital market equilibrium, and related topics.

FIN 7915: BA 3(3,0)

FIN 7930: BA 3(3,0)
Seminar in Finance: PR: FIN 7813, FIN 7816, and C.I.: Study of private sector financial theory, policy, empires, and decision-making.

GEB 6115: BA 3(3,0)
Entrepreneurship: PR: Graduate standing. Seminar on topics concerning the entrepreneurial process in small and large organizations, including need assessment, sources and methods of innovation, financing, and barriers to entrepreneurship.

GEB 6365: BA 3(3,0)
International Business Environment: PR: Graduate standing, MAN 5050, MAR 5055, ACG 5005, FIN 5405, and ECO 5005. Extensive Coverage of International Business environment with emphasis on the functional operation of multinational firms.

GEB 7910: BA 3(3,0)
Research Methods in Business: PR: Admission to Business doctoral program and ECO 6416 or equivalent; or consent of instructor. A foundation research course in business, exposing students to a full range of research experiences.

HIS 6159: AS 3(3,0)
Historiography: Selected topics in the study of history. May be repeated for credit on consent of instructor.

HIS 6945: AS 3(3,0)
Teaching Practicum: Student observation, participation, direction, and leadership in a college survey course.

HIS 6971: AS 1-6(1-6,0)
Thesis

HSA 5198: HPA 3(3,0)
Information Systems and Computer Applications in Medicine: PR: C.I.: Overview of health informations systems with an emphasis on computer applications. Discussion of software and hardware requirements.

HSA 6107: HPA 3(3,0)
Health Care Organization and Management I: Study of health care organizations, including modern management, organizational structure, systems control, human performances, planning, and leadership.
HSA 6108
Health Care Organization and Management II: PR: HSA 6107, HSA 5148, HSC 6911. Emphasis on planning, development, marketing approaches, and problem solving using computer methods.

HSA 6815
Practicum in Health Care Management: PR: Graduate status or C.I. Supervised practicum in health care institution management.

HSC 6132
Health Care Finance: PR: ACC 5004, FIN 5405. Graduate status. The identification of resources available to health care institutions, allocation of resources and control of resource expenditures.

HSC 6245
Community Health Education: Development and evaluation of community health education programs within voluntary health organizations. HMOs, hospitals, and academic institutions.

HSC 6247
Health Science Curriculum Development: PR: Graduate status or C.I. Developing an instructional plan for Health Science curriculum including goal and task analysis, performance objectives, varied learning experiences and student evaluation.

HSC 6306
Organization and Management of Health Science Programs: PR: Graduate status or C.I. Management of professional health education programs in various institutional settings: university, community college, academic medical centers. Includes program planning, development, and evaluation.

HSC 6392
Issues and Trends in the Health Professions: PR: Graduate status or C.I. Exploration of current status, issues, problems and future trends in the practice and education of health professions.

HSC 6402
Environmental Health: PR: Graduate status or C.I. Recognition and evaluation of control problems arising from environmental contamination, which includes safe water supply, waste disposal, and food resources.

HSC 6412
Epidemiology: PR: Graduate status or C.I. A study of the distribution and determinants of diseases and injuries in human populations.

HSC 6513
Principles and Practice of Medicine: PR: Graduate status or C.I. A comprehensive survey of medicine.

HSC 6555
Principles and Applications of Medicine: PR: HSC 4550 or comparable course. The study of medical principles and conditions and their applications to health management and health education settings.

HSC 6556
Current Concepts in Pathophysiology Mechanisms: PR: HSC 4550 or equivalent; Human Anatomy and Physiology or C.I. A study of pathophysiologic mechanisms in causation and evolution of various disease states with special emphasis on recent work.

HSC 6559
Prevention of Cardiovascular Disease: Current methods of prevention and management of major cardiovascular disturbances. Diagnostic measures, intervention techniques for prevention, and rehabilitation and management methods.

HSC 6566
Issues in Geriatric Health Care: Identification of the health care needs of the elderly and the services required to meet them. Analysis of the current issues, problems, and trends in geriatric health.

HSC 6575
Principles of Preventive Medicine: Total concept of health care including methods of screening, diagnosis, treatment, rehabilitation, and promotion of health in diverse populations.

HSC 6605
Health and Society: PR: Graduate status or C.I. Understanding health and illness as defined by patients, providers, and other persons in the social system.
HSC 6636  

HSC 6815  
Practicum in Health Science Education: PR: Graduate status or C.I. Supervised practicum in academic, clinical, or community instructional program.

HSC 6909  
Research Report

HSC 6911  
Scientific Inquiry in the Health Profession: PR: Graduate status or C.I. Research design and evaluation in health professions.

HSC 6911  
Scientific Inquiry in the Health Professions: PR: STA 2014 or comparable course. The course will cover research design and evaluation, theory building, and biostatistics.

HSC 6971  
Thesis

HUN 5937  
Nutrition and Exercise Physiology: This course correlates human nutrition with exercise physiology. Nutritional concepts are related to human performance and fitness.

INP 6215  
Assessment Centers and Leadership: PR: Graduate admission and C.I. Survey of assessment center technology and application with emphasis on leadership theory and practice.

INP 6317  

INP 6605  
Training and Performance Appraisal: PR: Graduate admission and C.I. Survey of theories, research and practice in the areas of industrial/organizational training and performance appraisal.

INP 6939  
Current Topics and Applied Problems in Industrial/Organizational Psychology: PR: Graduate admission and C.I. Survey of current topics in Industrial/Organizational psychology with emphasis on applied problems.

INP 6946  
Industrial Psychology Practicum I: PR: Graduate admission and C.I. Supervised placement in an applied setting.

INP 6947  
Industrial Psychology Practicum II: PR: Graduate admission and C.I. Supervised research in industry. (May be repeated for credit.)

INR 6007  
Seminar in International Politics: Introduces the student to the advances in international relations theory and research through a broad sampling of approaches and methods.

ISM 5021  
Introduction to Management Information Systems: PR: Acceptance into the graduate program. Designed to provide the student with the fundamentals of business data processing and management information systems used by organizations in a modern society.
ISM 6121 Systems Analysis and Development: PR: MAN 5050 and graduate standing. Study and application of systems concepts for the improvement of organizational work and information systems.

ISM 6305 Information Resources Management: PR: ISM 5021, MAN 5050, MAN 5501 and graduate standing. An advanced study of information system management including system planning, project selection, and management, and organizational information management policies.

ISM 6395 Seminar – Management Information System: PR: ISM 6305, ISM 6121 and graduate standing. This seminar covers theoretical foundations and current research directions in Management Information Systems. Topics include organizational and managerial processing; systems design, development and implementation.

LAE 5195 CFWP Teacher Consultant: PR: C.I. This course is designed for Fellows of the CFWP Summer Institute who will plan, practice, and present writing inservice components to public schools.

LAE 5295 Writing Workshop I: PR: C.I. Students will engage in exploration and practice of effective writing strategies. May include teaching small groups of students. May be repeated for credit.

LAE 5319 Methods of Elementary School Language Arts: Principles, procedures, organization and current practices in reading, writing, listening and talking.

LAE 5367 English Composition and Literature for Teachers of Advanced Placement: PR: Graduate standing and C.I. A two-week summer institute for secondary school teachers preparing to teach Advanced Placement courses.

LAE 5372 Theory and Practice in Composition: PR: Senior standing or C.I. Intensive study of theories of composition, with practical experience in the writing laboratory and in composition classes.

LAE 5415 Children’s Literature in Elementary Education: Survey of children’s literature: criteria for selection according to literary elements and child development needs. Methods for presenting to children; integrating literature with elementary curricula.

LAE 5465 Literature for Adolescents: PR: Senior standing or C.I. Selecting and evaluating books for adolescents with emphasis on the use of literature in the development of young people.

LAE 5495 Assessing Writing: PR: C.I. Students will explore a variety of strategies for assessing students’ writing including holistic scoring, primary trait scoring, and portfolio assessment.

LAE 6296 Writing Workshop II: PR: C.I. This course is designed for Fellows in CFWP Summer Institute. Students research topics about writing and participate in writing response groups.

LAE 6375 Practicum: The Teaching of Composition: Close work with an experienced instructor in teaching an undergraduate composition course, combined with regular group meetings for discussion of problems of teaching composition.
LAE 6467  
Studies in Adolescent Literature: Analysis of major works in genre, examination of criticism, instructional strategies, and research in teaching adolescent literature.

LAE 6616  
Trends in Language Arts Education: PR: Basic Teacher Certificate or C.I. Historical development and trends; English usage systems; materials; instructional strategies.

LAE 6637  
Research in Teaching English: Examination and interpretation of major research in English Education. Design of models for research in language instruction in secondary schools.

LAE 6714  
Investigation in Children's Literature: PR: A previous survey course in children's literature. Learning through the utilization of children's literature; literature analysis and evaluation; story telling; visual and reference materials.

LAE 6792  
CFWP Teacher/Researcher: PR: C.I. Teachers who have completed a NWP Summer Institute will examine classroom research methods and trends, and design a study to conduct the following year.

LAH 5713  
Colloquium in U.S.-Latin American Relations

LAH 6938  
Seminar in Latin American History: May be repeated for credit when content is different.

LEI 6443  
Recreation: A comprehensive study of Public, private and school recreation programs.

LIN 5137  
Linguistics: Modern linguistic theories and studies focusing on language acquisition and development, contemporary American English, semantics, and paralinguistics.

LIN 5705  
Psycholinguistics: PR: Graduate status or C.I. Foundations of language in affective consciousness and the human nervous system. Pragmatic analysis of word meaning and its precise scientific measurement. Implications for communicative disorders.

LIN 6932  
Problems in Linguistics: PR: LIN 5137. Study of the application of linguistics to various aspects of teaching and communication.

LIT 5039  
Studies in Contemporary Poetry: English language poetry from 1945 to the present. Emphasis will be on American poets, but others such as English or Australian will be included.

LIT 5097  
Studies in Contemporary Fiction: Fiction in the last 20 years in the United States and Britain. May be repeated for credit.

LIT 5309  
Media and Popular Literature: PR: Senior standing or C.I. Study of the literary content of contemporary media and of popular fiction. Application to classroom teaching.

LIT 5366  
The Romantic Revolt (19th Century Literature): The romantic revolt in poetry and prose; English, American, and Continental literature, 1798-1832.
LIT 5367
The Victorian Age: PR: Senior standing or C.I. Study of poets and essayists from 1837 to 1900, including Tennyson, the Brownings, Arnold, Hopkins, Carlyle, and Mill; emphasizing Dickens, George Eliot, the Brontës, Hardy, and other novelists.

LIT 6009
Literary Genres: PR: Graduate standing. Provenance, structure and critical problems in a specific genre such as tragedy, the epic, the novel, or the lyric. May be repeated for credit when content is different.

LIT 6105
World Literature: PR: Graduate standing. Study of the influence on British and American literature of selected foreign works read in translation. May be repeated for credit when content is different.

LIT 6365
Movements in Literature: PR: Graduate standing. Study of a movement such as naturalism, romanticism, or classicism, or of a literary period such as the Baroque or the Southern Renaissance. May be repeated for credit when content is different.

LIT 6506
Major Authors: PR: Graduate standing. Study of a single author or of two or three associated authors, with emphasis on biography, bibliography, and style. May be repeated for credit when content is different.

MAA 5210
Topics in Advanced Calculus: PR: MAC 3313 or C.I. Selected topics in multivariable calculus including limits, continuity, Euler’s theorem, the Jacobian, and double series; extension of single variable concepts including uniform convergence and improper integrals.

MAA 5405
Complex Variables: PR: MAC 3313 or C.I. Analytic functions; integration in the complex plane; Laurent series and residue calculus; inversion of Laplace transforms; conformal mappings; application in engineering and the physical sciences.

MAA 6508
Hilbert Spaces with Applications: PR: MAP 3302, MAS 3106 or C.I. Normed and inner product spaces; Hilbert spaces; orthonormal systems; linear operators and spectral decomposition; applications to differential and integral equations.

MAD 5205
Combinatorics and Graph Theory II: PR: MAD 4203 or C.I. Polya’s theory of counting; Latin squares and rectangles; block designs; coding theory; probabilistic methods; hypergraphs; applications.

MAD 6309
Advanced Graph Theory I: A seminar devoted mainly to reading papers and presenting their content. Advanced areas of graph theory will be covered. Primarily for Ph.D. students in Computer Science.

MAE 5318
Current Methods in Elementary School Mathematics: Strategies of instruction of computation and concepts of number, geometry and measurement. Instructional materials. (Meets Elementary Education certification requirements.)

MAE 5325
Teaching Mathematics in the Middle/Junior High School: PR: 12 semester hours of mathematics including at least College Algebra. Consideration of the curriculum and instructional techniques appropriate for students in Middle/Junior High School.
MAE 5356  
Teaching General Mathematics in the Secondary School: PR: MAE 3330 or C.I. This course addresses specific techniques for developing general mathematics skills and concepts beginning in Grade 6. Problem solving, motivation and innovative methods are explored.  

MAE 5395  
Teaching Measurement in Schools: Metric system, methods of developing different measurement skills and concepts and curriculum changes needed to accommodate measurement.  

MAE 5637  
Laboratory Programs in Mathematics: PR: Basic Teacher Certificate or C.I. Design and development of special materials and projects for mathematics independent study. Emphasis teaching and applying the metric system.  

MAE 6145  
Mathematics Curriculum, K-12: PR: At least 6 semester hours of graduate credit in mathematics education or C.I. Development of historical and current issues and forces in mathematics curriculum. New mathematics programs and contemporary curricular issues will be emphasized.  

MAE 6336  
Teaching Advanced Mathematics in the Secondary School: PR: MAE 3330 or C.I. This course addresses topics in a pre-calculus, analysis or calculus course.  

MAE 6337  
Teaching Algebra in the Secondary School: PR: MAE 3330 or C.I. This course addresses specific techniques for developing algebra skills for pre-algebra through pre-calculus algebra needs. Logical deductions, problem solving, computer applications and innovative methods are explored.  

MAE 6338  
Teaching Geometry in the Secondary School: PR: MAE 3330 or C.I. This course addresses specific techniques for developing geometry skills beginning in the general mathematics classes of Grade 6 through the high school geometry course.  

MAE 6517  
Diagnosis/Remediation of Difficulties in Mathematics for the Classroom Teacher: PR: Basic Teacher Certificate or C.I. The study of techniques for diagnosis and remediation of difficulties in mathematics.  

MAE 6641  
Problem Solving and Critical Thinking Skills: PR: Regular Certificate or C.I. Development of procedures and practices necessary to implement critical thinking skills and problem solving techniques in the schools.  

MAE 6656  
Using Technology in the Instruction of K-12 Mathematics: PR: CAP 6613 or C.I. The application of computer technology to mathematics instruction including calculators, CAI, CMI, application software, simulators, and video disc technology.  

MAE 6899  
Seminar in Teaching Mathematics: PR: Six semester hours of graduate credit in mathematics education. Development of historical and current issues, forces, and individuals and their impact on the teaching of mathematics K-12; Consideration of advanced instructional techniques. (May be repeated for credit.)  

MAE 6971  
Treatise  

MAE 7795  
Seminar on Research in Mathematics Education: PR: Doctoral standing.  

MAN 5050  
Management Concepts: PR: Acceptance into the graduate program. Theory and practice of managing organizations to include planning, organizational theory, human behavior and control.  

MAN 5501  
Introduction to Production/Operations Management: PR: Acceptance into the graduate program and ECO 5415 or equivalent. Introduction to the fundamental concepts, processes and institutions involved in the production of goods and services required by modern society.
MAN 6055 Planning and Control Analysis: PR: Graduate standing and MAN 5050 or equivalent. Emphasizes elements of the planning and control processes including objectives, action programs and control procedures. Discusses integration of the two processes.

MAN 6075 History of Management Thought: PR: Graduate standing and MAN 5050. The historical development of management in modern society with emphasis on the interrelationship between the management processes and the economic, social, and political environments.

MAN 6121 Group Decisions and Analysis: PR: Graduate standing and MAN 5050 or equivalent. Experience in company-wide management decision making by groups using the management game techniques. Analysis of the group decisionmaking process using video tapes.

MAN 6156 Personnel Resources Administration: PR: Graduate standing. A seminar in integrating the personnel, manpower planning, and labor relations fields through the study of concepts and problems in these areas.

MAN 6158 Human Resources Management Issues: PR: MAN 6156 or C.I. A course providing advanced study in selected topics of current interest in Human Resource Management.

MAN 6245 Organizational Behavior and Development: PR: Graduate standing and MAN 5050 or equivalent. The analysis of human behavior in organizations in terms of the individual, small group, intergroup relationships, and the total organization.

MAN 6299 Creative and Innovative Management: This course examines the emerging theories and practices related to creative and innovative management. It combines the creativity of new concepts, new ideas, new directions, and the like with their innovative implementation in a management context.

MAN 6305 Personnel Resources Administration: PR: Graduate standing. A seminar in integrating the personnel, manpower planning, and labor relations fields through the study of concepts and problems in these areas.

MAN 6515 Research and Development Management: PR: Graduate standing and MAN 5050. An examination of the function of research and development and the impact of technological innovation on our economic and social systems.

MAN 6546 Quantitative Models for Business Decisions: PR: Graduate standing and ECO 5415 or equivalent. Quantitative techniques useful for the solution of business problems. Mathematical model building to aid the decision making process is stressed.

MAN 6565 Production/Operations Analysis: PR: MAN 5050, MAN 5501 or equivalents and MAN 6546. Study of the production/operations environment and the development of the organization’s operations strategy and plan.

MAN 6721 Business Policy and Responsibility: PR: Graduate standing and completion of all MBA professional core courses or their equivalent. MBA program capstone course providing the student experience in formulating policy and strategy for the direction of a business firm from the integrated viewpoint of a CEO.

MAP 5385 Applied Numerical Mathematics: PR: MAP 3301 or C.I. Classical topics or numerical analysis and their applications, Romberg integration, Richardson extrapolation, Gaussian quadrature schemes.
MAP 5396  AS 3(3,0)
Splines and Data Fitting: PR: MAP 3302, MAS 3105 or 3106, or C.I. Topics on univariate splines and data fitting; applications to regression analysis, differential and integral equations; algorithms for different types of splines.

MAP 5407  AS 3(3,0)
Applied Mathematics 1: PR: MAP 3302 or C.I. Calculus of variations; Hamilton's principle; eigenvalues and stationary points; Rayleigh-Ritz method; differential equations, and approximation methods.

MAP 5426  AS 3(3,0)
Special Functions: PR: MAP 3302 or C.I. Series and integral representations, generating functions, recurrence relations and orthogonality properties of the special functions. Emphasis on Bessel, Legendre, and hypergeometric functions.

MAP 6104  AS 3(3,0)
Introduction to Nonlinear Dynamics: PR: MAP 3302, PHY 3048 or equivalent, or C.I. Nonlinear differential equations; bifurcation theory; Hamiltonian dynamics; integrable systems and breakdown of integrability; chaos in conservative and dissipative systems.

MAP 6111  AS 3(3,0)
Mathematical Statistics: PR: MAS 6238 (Measure & Probability) or consent of instructor. Strong laws of large numbers, consistency and asymptotic normality, complete and sufficient statistics, maximum likelihood and least squares, optimal estimators, hypothesis testing.

MAP 6122  AS 3(3,0)

MAP 618  AS 3(3,0)
Measure and Probability: PR: MM 5210 or C.I. Measure and integration, probability measures, random variables, distribution and characteristic functions. Convergence in LP, probability, distribution and with probability one.

MAP 6356  AS 3(3,0)
Partial Differential Equations: PR: MAP 3302 or C.I. First and second order linear equations; classification and analytical methods of solution; Green's functions and integral representations; applications in engineering and physical sciences.

MAP 6408  AS 3(3,0)
Applied Mathematics II: PR: MAP 5407, MAA 5210 or C.I. Linear vector spaces and linear operators, eigenvalue problems in Hilbert space, Fourier series, integral equations, partial differential equations and orthogonal functions.

MAP 6424  AS 3(3,0)
Transform Methods: PR: MM 5405 or C.I. Laplace, Fourier, Hankel and other Integral transforms, inversion theorems; the Z transform; applications to physical problems.

MAP 6445  AS 3(3,0)
Approximation Techniques: PR: MM 4228 or MM 5210 or C.I. Normed linear spaces; Weierstrass approximation theorem; Tchebycheff approximation by polynomials; trigonometric approximation; orthogonal expansions and least squares approximations.

MAP 6971  AS 2-6
Thesis

MAR 5055  BA 3(3,0)
Marketing Concepts: PR: Acceptance into the graduate program. Study of functions, institutions and basic marketing of goods in the U.S. economy.

MAR 5941  BA 3(3,0)
Small Business Consulting: PR: Graduate standing. All foundation classes. FIN 6406, MAR 6816. Provides students opportunity to apply knowledge learned in the classroom to real business situations. Open to undergraduate majors in the College of Business Administration with approval of the department chair.

MAR 6077  BA 3(3,0)
Contemporary Marketing Problems: PR: Graduate standing, MAR 6816, or C.I. Analysis of contemporary marketing problems resulting from social, economic, and political developments.
MAR 6406  BA 3(3,0)
Sales Management and Control: PR: Graduate standing and MAR 5055 or equivalent. Designed to provide an analysis of the sales and management process. Topics covered include selection and training, compensation, behavioral issues and sales planning, evaluation, and control.

MAR 6456  BA 3(3,0)
Advanced Industrial Marketing Management: PR: MAR 5055 or equivalent or C.I. This course provides a comprehensive introduction to the distinctive characteristics of industrial markets. The course reviews what is known about organizational buying behavior which provides the foundation necessary to formulate marketing strategies.

MAR 6616  BA 3(3,0)
Marketing Research Methods: PR: Graduate standing, ECO 6416. Investigation of primary research methods used to generate information for marketing decision makers. Problem definition, research design; data collection, data processing, statistical interpretation, and communication of research results.

MAR 6668  BA 3(3,0)
Marketing Models: PR: MAR 6816 & ECO 6416. This course provides a working knowledge and managerial perspective on a range of marketing models and their associated analytical techniques.

MAR 6816  BA 3(3,0)
Marketing Policy: PR: Graduate standing and MAR 5055 or equivalent. (Not open to undergraduate marketing majors.) Marketing policy formulation and decision making with respect to planning, pricing, promotion, and distribution.

MAR 6845  BA 3(3,0)
Services Marketing: PR: MAR 5055 or equivalent or C.I. Marketing in services industries is the focus of study with particular emphasis on unique aspects of services marketing, the service marketing mix, and the implementation of service strategies.

MCB 5205  HPA 3(3,0)
Infectious Processes: PR: MCB 3013C or C.I. Discussion of current theories of the infectious process and the response of host cells and tissue to infection.

MCB 5505C  HPA 3(2,3)

MCB 5554  HPA 3(3,0)
Applied Microbiology: PR: MCB 3013C or C.I. Biochemistry of industrial processes including economies, screening, scale up, quality control and applied genetics.

MCB 6407C  HPA 3(3,4)
Laboratory Methods for Molecular Biology: PR: PCB 3023 or MCB 4404. Experimental techniques and design in laboratory biological research.

MCB 6417C  HPA 3(3,0)
Microbial Metabolism: PR: C.I. Relationship between microbial metabolism and and principal cellular activities, emphasizing transport, respiration, differentiation and synthesis.

MCB 6971  HPA 1-6
Thesis

MET 5710  EN 3(3,0)
Meteorology for Engineers: PR: MAC 3313. Studies of the atmospheric processes from physical thermodynamics and synoptic viewpoints.

MHS 5005  ED 3(3,0)
Introduction to the Counseling Profession: PR: Completion of Phase II of Education Professional Preparation or C.I. Overview of the philosophy, organization, administration and the roles of counselors in various work settings.
MHS 6020 Mental Health Care Systems: PR: EGC 5005 or C.I. Foundations of mental health counseling including organizational, administration, fiscal and accountability structures.

MHS 6220 Individual Psycho-Educational Testing I: An overview of appraisal instruments for individual testing with emphasis on administration, scoring, and interpretation. Designed for practitioners interested in understanding individual assessment.

MHS 6400 Theories of Individual Counseling: PR: EGC 5005 or EGC 6426, EDF 6481, or C.I. Major theories and approaches to counseling, correlating them with counterpart theories of personality and learning.

MHS 6401 Techniques of Counseling: PR: EGC 6435 or C.I. The nature of the counseling and its relationships to theoretical concepts.

MHS 6414 Family Counseling I: PR: EGC 5005 or EGC 6426, or C.I. Presentation of specific family counseling theories. An evolution and current state of the art.

MHS 6420 Counseling Special Populations: PR: EGC 5005 or EGC 6426 or C.I. Application of counseling principles with various special populations including multicultural subgroups, persons of abuse, exceptional children, gay and lesbian people, etc.

MHS 6421 Play Process in Counseling with Children: PR: EGC 6045, 6505, or C.I. Theories and application of the principles of play in the counseling process with children.

MHS 6431 Family Counseling II: PR: EGC 6414, EDF 6481, or C.I. Presentation of techniques to work with entrenched, paradoxical, and "fixed" family systems which pose problems for the family and the Counselor.

MHS 6450 Counseling Substance Use and Abuse: PR: EGC 5005 or EGC 6426, or C.I. Examination within systematic, theoretical framework of the function that a substance, individual and the environment play in use and abuse of illicit and licit substances.

MHS 6480 Human Sexuality and Relationships: A basic course in understanding how human beings form intrapersonal and interpersonal relationships and how sexuality develops.

MHS 6500 Group Procedures and Theories in Counseling: PR: EGC 6436. This course is designed to give the student an understanding of the role of theories in group counseling as well as the many process applications of groups.

MHS 6510 Advanced Group Counseling: PR: EGC 6505 or C.I. This course is designed to give students practical experience in leading groups. It is also intended to challenge the student to explore professional and advanced issues in group counseling.

MHS 6600 Consultation, Staffing and Case Management: PR: EGC 6505 or C.I. Understanding the counselor's role as consultant and staffing team member. Study of case management procedures.

MHS 6780 Ethical and Legal Issues: Studies of ethical standards and legal issues in counseling and other human service professions.
MHS 6800
Practicum in Counselor Education: PR: EGC 6505 or C.I. Supervised counseling emphasizing competence in (1) individual counseling; (2) working with groups; (3) tests in educational-career-personal counseling. May be repeated for credit.

MHS 6630
Counseling Internship: PR: C.I. Supervised placement in setting appropriate for program track. (May be repeated for credit.)

MHS 6930
Current Trends in Counselor Education: PR: EGC 5005 or 6055 or C.I. Current trends affecting the rapid changes in the counseling field.

MHS 6971
Treatise

MLS 5512
Clinical Immunology: PR: PCB 3233, MLS 4511, or C.I. Advanced theory and application of immunologic diagnostic testing stressing the utilization of monoclonal technology.

MLS 6340
Advanced Hemostasis: PR: MLS 4334C or C.I. Examination of current theories and practice and the relationship to pathophysiologic processes in hemostasis.

MLS 6940
Advanced Clinical Practicum I: PR: C.I. Advanced clinical experience related to current practices and trends in one of the following areas of clinical laboratory technology: immunohematology; hematology; clinical chemistry; immunopathology; clinical microbiology; electron microscopy or toxicology.

MLS 6941
Advanced Clinical Practicum II: PR: C.I. Advanced study in one of the clinical laboratory areas listed in MLS 6890.

MLS 6942
Advanced Clinical Practicum III: PR: C.I. Advanced study in one of the clinical laboratory areas listed in MLS 6890.

MLS 6943
Advanced Clinical Practicum IV: PR: C.I. Advanced study in one of the clinical laboratory areas listed in MLS 6890.

MMC 6445
Mass Media Research 1: An introduction to mass communication theories and to both applied and theoretical research in mass communication.

MMC 6446
Mass Media Research II: PR: Statistics and MMC 6445. Planning and implementation of mass media research.

MMC 6603
Communication and Society: The importance of the mass media, their structure, role, and problems.

MMC 6611
Effects of Advertising on Society: An in-depth study of advertising’s effects on consumer behavior, societal mores and media economics.

MMC 6612

MUE 5611
Trends in Elementary School Music Education: PR: MUE 3401 or equivalent or C.I. Advanced study of instructional strategies and materials; integration of music education experiences with classroom activities; personal musical skill development; current research and new curricula.

MUE 5695
Trends in Arts Education: PR: Initial Certification or C.I. Investigation of current trends in arts education; development of strategies for utilizing understandings of arts education in the total curriculum of elementary students.
MUE 6155
Teaching Performing Organizations: PR: Basic Teacher Certificate or C.I. Techniques and skills for the planning, administering and directing performing music organizations. Examination of historical and philosophical foundations of music education.

PAD 5041  HPA 3(3,0)
Ethics and Values in Public Administration: Issues of ethics in the public sector—the basis for public concern, past practice, present patterns of response; individual/social aspects of ethical behavior.

PAD 5336  HPA 3(3,0)
Introduction to Urban Planning: PR: C.I. Issues of urbanization, regional development, land use and comprehensive planning, environmental planning, and social planning.

PAD 5337  HPA 3(3,0)
Urban Design: PR: C.I. Planning techniques such as planned unit developments, capital improvements planning, and growth management, and planning methods including needs assessment and graphic design.

PAD 5338  HPA 3(3,0)
Land Use and Planning Law: Review of national and local aspects of the legal underpinnings of urban planning aspects such as

PAD 5425  HPA 3(3,0)
Dispute Resolution in the Public Sector: An examination of the skills needed to resolve disputes in the public sector through facilitation, mediation, and other alternative methods.

PAD 5427  HPA 3(3,0)
Labor Relations in the Public Sector: Current trends and developments in employment relations in the public sector, especially employee organization, negotiations, and the collective bargaining process.

PAD 5806  HPA 3(3,0)
Local Government Operations: Operational functions of municipal and county governments and the role of the chief executive officer.

PAD 5807  HPA 3(3,0)
Administrative Practice in the Public Sector: Application of various theoretical concepts to the real world of public administration. Policy formulation and execution is examined through the case study model.

PAD 6035  HPA 3(3,0)
Public Administration in the Policy Process: Analysis of the role of the public administrator in the analysis, formulation, implementation, and evaluation of public policies, especially at the state and local level.

PAD 6037  HPA 3(3,0)
Public Organization Management: Structure, functioning, performance of public organizations, and behavior of individuals and groups, application for public management. Includes both macro and micro approaches to organizational behavior.

PAD 6053  HPA 3(3,0)
Public Administrators in the Governance Process: An examination of the political, social, economic, and moral context of modern public administration, with special attention to the ethical dimensions of the administrator's role.

PAD 6062  HPA 3(3,0)
Advanced Concepts and Applications in Public Administration: PR: Completion of all core requirements. An integrative course applying the skills, knowledge, and values considered in the program to selected public problems.
PAD 6227  
Public Budgeting and Financial Management: Budgets as planning programming documents, stressing the relationships of policy and budgetary decisions, problems in grantsmanship and revenue decision making, program budgeting, PPBS and incrementalism.

HPA 3(3,0)

PAD 6307  
Policy Implementation: Program analysis and organization structure as policy tools, examining the implementation of differential policy and the administrator as policy maker and change agent.

HPA 3(3,0)

PAD 6327  
Public Program Evaluation Techniques: Techniques and skills utilized in the evaluation of public programs.

HPA 3(3,0)

PAD 6335  
Strategic Planning and Management: An examination and analysis of planning, goal setting, and strategic management in public sector organizations.

HPA 3(3,0)

PAD 6417  
Human Resource Management: Administrator as manager and motivator of public employees with particular emphasis on organizational behavior and contemporary public service legislation.

HPA 3(3,0)

PAD 6700  
Analytic Techniques for Public Administration I: Statistical methodology and use of computers as a tool for decision making in the public sector.

HPA 3(3,0)

PAD 6701  
Analytic Techniques for Public Administration II: PR: Completion of PAD 6700. Applied analytical tools for administrators in the public sector. Practical use of computers in policy and decision making.

HPA 3(3,0)

PAD 6716  
MIS for Public Managers: PR: C.I. Use of systems concept and computers in contemporary public sector management information systems.

HPA 3(3,0)

PAD 6908  
Directed Independent Studies

HPA Variable Credit 1-7

PAD 6918  
Directed Research

HPA 6(6.0)

PAD 6934  
Special Issues in Public Administration: Substantive and theoretical issues confronting the broad spectrum of contemporary public administration. May be repeated for credit.

HPA 3(3,0)

PAD 6946  
Internship PR: C.I.

HPA 3(3,0)

PCB 5044  
Ecosystems of Florida: PR: PCB 3043, PCB 3043L or equivalent. Ecosystems of Florida will be discussed to include geography, geology, climate, energetics, nutrient cycling, community structure and conservation. Weekend field trips are required.

AS 5(3,2)

PCB 5045C  
Conservation Biology: PR: PCB 3043 and PCB 3063. Scientific basis of conservation; conservation of ecosystems, populations, exploited species, and endangered species. Weekend field trips are required.

AS 4(3,2)

PCB 5046C  

AS 5(3,4)

PCB 5235  
Immunopathology: PR: 3233. In-depth overview of diseases due to deficiencies or over-reactivity of the immune system.

HPA 3(3,0)

PCB 5675C  
Evolutionary Biology: PR: PCB 3043 and PCB 3063 or C.I. Review of concepts in evolutionary biology. Emphasis on evolution at and below the species level; consideration of genetics and ecological factors in divergence and speciation.

AS 4(3,2)

PCB 5806  
Endocrinology: PR: PCB 4723 and BCH 4053 or C.I. Mechanisms of action of hormones; interrelationships between the nervous and endocrine system.

HPA 3(3,0)
PCB 6049  Contemporary Studies in Biology: PR: Graduate standing. Analysis of current publications and developments in theory and concepts of biological sciences. May be repeated for credit as content is variable.

PCB 6365  Environmental Physiology: PR: Physiology and ecology or C.I. The effects of major environmental factors on the physiology of plants and animals.

PCB 6585C  Advanced Genetics: PR: PCB 3063 or C.I. Recent advances in genetics, stressing molecular and developmental trends.

PCB 6721  Comparative Animal Physiology: PR: An undergraduate course in animal physiology or equivalent. Comparison of structural and functional adaptations of animal organ systems. Emphasis upon maximization of fitness under given environmental conditions.

PET 5355  HPA 3(3,0)  Exercise Physiology and Health: In-depth study of adaptations of cardiovascular and respiratory systems during varying degrees of exercise.

PET 6040C  Analysis of Human Performance: Analytical techniques of kinesiology and their methods of application to individual and team activities.

PET 6086  ED 3(3,0)  Exercise Intervention and Risk Hazards: Prevention of select major risk hazards through exercise intervention.

PET 6088  ED 3(3,0)  Wellness Development in Children: An analysis of Wellness characteristics and concepts as they affect the wellness of children.

PET 6089  ED 3(3,0)  Personal and Organizational Wellness: Professional implications of the U.S. Wellness Movement and assessment of the nature and quality of corporate and other instructional programs.

PET 6238C  ED 3(2,1)  Perceptual Motor Development: Theoretical and laboratory study of the relationship between perceptual motor development and learning. Special attention is given to identifying and remediating motor deficit.

PET 6367  ED 3(3,0)  Physical Performance and Energy Supplies: The relation of nutrients to aerobic performance.

PET 6377  ED 3(3,0)  Physiology of Neuromuscular Mechanisms: Human body morphology and function critical in producing motion, strength, power, and endurance.

PET 6386C  ED 3(3,2)  Environmental Exercise Physiology: A study of physiological adaptation resulting from prescribed physical activity programs.

PET 6388  ED 3(3,0)  Exercise Physiology and Cardiovascular Disease Prevention: The physiology of exercise as it affects the onset of cardiovascular diseases.

PET 6416  ED 3(3,0)  Administration of Corporate Wellness Programs: Administrative implications for the development of a corporate wellness program.

PET 6515C  ED 3(3,0)  Measurement in Kinesiology and Physical Education: Techniques of measurement and evaluation of human performance and their applications to physical education.

PET 6615  AS 2(2,1)  Psychomotor Assessment of Exceptional Children: PR: PET 6655 or C.I. Assessment techniques and methodology for determining psychomotor needs of exceptional children is presented. Application of competencies is required.
PET 6645 Advanced Studies in Adapted Physical Education: PR: EEX 5050. Survey course that addresses the development, educational, and socialization needs of exceptional children. A minimum of 15 observation hours are required.

PET 6646 Methods and Curriculum in Adapted Physical Education: PR: PET 6645, PET 6655, PET 6615. Individualized educational and developmental programming for exceptional children. Models of service delivery and instruction are presented. Practicum required.

PET 6647 Program Development in Adapted Physical Education: PR: C.I. Development of appropriate physical education programs for exceptional children. Course includes teacher-consultant, collaboration, inservice training, legislative issues, resource utilization.

PET 6655 Developmental Aspects of Motor Disabilities: PR: C.I. Course addresses developmental aspects of motor and health disabilities. A developmental focus is presented. Observation required.

PET 66910 Problem Analysis - Review of Literature: PR: EDF 6432 and C.I. Comprehensive review of literature related to a selected topic in physical education; identification, analysis and evaluation of developments, issues and research problems. (May be repeated for credit.)

PET 66946 Practicum, Clinical Practice

PET 6971 Treatise

PHC 6000 Epidemiology: PR: HSC 6911 or equivalent. A study of the distribution and determination of diseases and injuries in human populations.

PHC 6146 Health Planning and Policy: Review of the determinants of the revolution of the health care system in the U.S.; analysis of public health, preventive medicine, and therapeutic medicine in terms of quality, access, and cost; methodologies and issues in comprehensive health planning, and trends in health policy development.

PHC 6160 Health Care Finance: The identification of resources available to health care institutions, allocation of resources, and control of resource expenditures.

PHC 6300 Environmental Health: Recognition and evaluation of control problems arising from environmental contamination, which includes safe water supply, waste disposal, and food resources.

PHC 6411 Health and Society: Understanding health and illness as defined by patients, providers, and other persons in the social system.

PHC 6420 Case Studies in Health Law: Health law including patient care, liability, malpractice, workmen's compensation, and legal responsibilities of health personnel.

PHY 5015C Physics For Teachers: C.I. Hands-on lecture-lab course. Dynamics, electricity, magnetism, optics, nuclear radiation.

PHY 5100 Topics in Contemporary Physics for Teachers: PR: C.I. The study of recent findings in a selected area such as particle physics, surface physics, planetary atmospheres, lasers, geophysics, etc.
PHY 5200C  AS 1(0.5,1.5)
Newtonian Mechanics for Teachers: PR: C.I. A lab, lecture, demonstration course studying selected topics in classical mechanics.

PHY 5240  AS 3(3.0)

PHY 5300C  AS 1(0.5,1.5)
Electricity for Teachers: PR: C.I. Circuits, multimeters, oscilloscopes, circuit elements.

PHY 5302C  AS 1(0.5,1.5)

PHY 5346  AS 3(3.0)
Electrodynamics I PR: PHY 3320, MAP 3302, or C.I. Boundary value problems in electrostatics and magnetostatics. Maxwell's equations; EM fields in matter; wave generation and propagation; wave guides; and resonant cavities.

PHY 5401C  AS 1(0.5,1.5)
Optics for Teachers: PR: C.I. Geometrical and physical optics; spectrometers and lasers.

PHY 5431  AS 3(3.0)
Optical Properties of Materials: PR: PHY 4324, MAP 3302, PHY 4424. Normal modes (dipole and Raman active); microscopic theory of absorption, dispersion, and refraction; wave propagation, crystal optics; scattering mechanisms, optical activity.

PHY 5446  AS 3(3.0)
Laser Principles: PR: PHY 3101, MAP 3302, PHY 4424. Classical introduction to the basic principles of laser gain media, properties of laser resonators and modes; description of specific laser systems.

PHY 5465C  AS 1(0.5,1.5)
Wave Motion for Teachers: PR: C.I. Water waves, waves on strings, sound and vibrations.

PHY 5500C  AS 1(0.5,1.5)
Thermal Physics for Teachers: PR: C.I. Engines, heat pumps, kinetic theory, phase changes, radiation, weather.

PHY 5524  AS 3(3.0)

PHY 5601  AS 1(1.0)

PHY 5606  AS 3(3.0)
Quantum Mechanics I: PR: PHY 4604 or C.I. Basic postulates of quantum mechanics, operators, eigenvalues, parity, potential wells, harmonic oscillator, time dependent and time independent Schrodinger equation, matrix formulation, and time independent perturbation theory.

PHY 6246  AS 3(3.0)

PHY 6347  AS 3(3.0)
Electrodynamics II: PR: PHY 5346 or C.I. Dynamics of charged particles in electromagnetic fields. Antennas; radiation by moving charges; magnetohydrodynamics; and multipole radiation.

PHY 6353  AS 3(3.0)
Accelerator Physics: PR: PHY 5346, PHY 6347. Dynamics of charged particles in electromagnetic fields, electron optics; details of the electrostatic accelerator, the linear accelerator, and cyclic accelerators; properties of cavities and orbiting electrons; new accelerator schemes, including the free electron laser.
PHYSICS OF FREE ELECTRONS: PR: PHYS 5346, PHYS 6347. Interaction between electrons and fields, transmission lines, microwave tubes and waveguides, synchrotron radiation and undulators, the free electron laser in both the Compton and Raman regimes.

NONLINEAR OPTICS: PR: PHYS 5346. Maxwell's equations in nonlinear media, frequency conversion techniques (SHG, SFG, OPO), stimulated scattering, phase conjugation, wave-guided optics, nonlinear crystals.

SPECIFIC LASER SYSTEMS: PR: PHYS 5446 or 6560 or C.I. Review of Laser Principles, Specifics of gas, ion, solid state, dye, metal vapor, free electron, and semiconductor lasers and power supplies.

QUANTUM MECHANICS II: PR: PHYS 5606 or C.I. Time dependent perturbation theory, exchange symmetry, Dirac Equation, second quantization, and scattering theory.

ADVANCED QUANTUM MECHANICS: PR: PHYS 5606, PHYS 6624. This course will introduce the advanced graduate students to the methods of Quantum field theory, essential for the understanding of many branches of physics.

COMPUTER METHODS IN PHYSICS FOR TEACHERS: PR: C.I. Trajectories with air resistance, trajectories in rotating space colonies, refraction of waves in continuous media, luminosity patterns, temperature profiles.

NUCLEAR PHYSICS FOR TEACHERS: PR: C.I. The interaction of ionizing radiation with matter, alpha, beta, gamma decay, fission, fusion, neutron activation, half lives and equilibrium.

NUCLEAR AND PARTICLE PHYSICS: PR: PHYS 4604 or equivalent. Particles and nuclei, symmetries and conservation laws, interactions, models.

CONDENSED MATTER PHYSICS: PR: PHYS 4604, PHYS 3101 or C.I. Crystal lattice cell structure, phonons, free electron model, band theory of solids, Fermi surface, solid state applications, polymers.

PLASMA PHYSICS: PR: PHYS 4220, PHYS 3044, or C.I. Introduction to theory and experimental basis of both weakly and highly ionized plasmas. Instabilities, plasma waves, nonlinear effects, controlled thermonuclear fusion.

SPECIAL RELATIVITY FOR TEACHERS: PR: C.I. Length contraction, time dilation, simultaneity, conservation of mass-energy, conservation of momentum, Compton scattering.

THEORETICAL METHODS: Basic Mathematical methods applicable to all branches of physics.

PHZ 6424  

PHZ 6425  

PHZ 6971  
Thesis  
AS 6

POS 6046  
Seminar in American National Politics: Examines major aspects of the American system, including mass behavior, public opinion, and political institutions.

POS 6746  
Quantitative Methods in Political Research: PR: C.I. Methods of model building and research design, including conceptualization and measurement of political variables; techniques of data collection and quantitative analysis; and computer usage.

POS 6938  
Special Topics/Political Analysis: This course title covers all political analysis special topics courses which are not listed in the catalog with a course number. May be repeated for credit.

POS 6946  
Supervised Teaching Internship  
AS Variable Credit

POS 6971  
Thesis  
AS Variable Credit

POT 6007  
Seminar in Political Theory: An examination of analytic and normative theories of politics and society using selected topics as a substantive focus.

PSB 5005  
Physiological Psychology: PR: PSB 3002 or C.I. An advanced survey of the physiological basis of behavior emphasizing the relationship between the nervous system and behavior.

PSB 6446  
Advanced Abnormal and Clinical Psychopharmacology: PR: Graduate admission and C.I. Diagnosis of psychopathology and drug treatment of these disorders. Examination of the efficacy of psychoactive drugs.

PSY 6216  
Advanced Research Methodology I: PR: Graduate admission and C.I. Logic and procedures of psychological research and evaluation; application of experimental and non-experimental techniques in analyzing psychological variables; review of relevant psychological research.

PSY 6217  
Advanced Research Methodology II: PR: PSY 6216, Graduate admission and C.I. Structure and planning of complex psychological experiments; internal and external validity; application of advanced experimental procedures in analyzing psychological variables; review of relevant psychological research.

PSY 6308  
Psychological Testing I: PR: Graduate admission and C.I. Theory of test construction including test reliability and validity.

PSY 6318  
Applied Testing and Selection: PR: PSY 6308, Graduate admission and C.I. Issues in selecting employees and an examination of currently used tests in industry.

PSY 6908  
Directed Independent Studies: PR: C.I. Conduction of a selected research study under the supervision of a faculty member in the field of Human Factors Psychology.

PSY 6909  
Research Report  
AS 1-3(0,0)
Directed Research: PR: PSY 6217, EXP 6257, PSY 6938, ten additional graduate hours in PSY, and C.I. Directed Research involves supervised research activity in an agency setting. The student will devote 15 hours per week in the assigned setting to work on an applied research problem with joint supervision by faculty and agency staff.

Research Report: PR: PSY 6918. Preparation of a written report of the project completed in PSY 6918. This report will be in the form of a research publication of technical report.

Research Planning

Thesis

Doctoral Research

PUP 6007
Public Policy Analysis: Examination of the role of the state and the policy process (agenda-setting, formulation, implementation), and case studies in environmental, economic, education, or welfare or other policy.

PUP 6938
Special Topics/Public Policy: This course title covers all public policy special topics courses which are not listed in the catalog with a course number. May be repeated for credit.

QMB 7565
Applied Statistical Business Decision Models: PR: Admission to Business doctoral program; ECO 6416 or equivalent; or consent of instructor. Logic and procedures used in research and data evaluation in the business sciences applying advanced statistical models to decision-making problems.

RED 5147
Developmental Reading: Principles, procedures, organization and current practices in the elementary reading program. Materials and methods of instruction.

RED 5514
Classroom Diagnosis and Development of Reading Proficiencies: PR: RED 5147 or equivalent. Classroom diagnosis and corrective teaching in reading; instructional materials. Case study required.

RED 6116
Trends in Reading Education: PR: Basic Teacher Certificate or C.I. Analysis of historical development and current trends; management systems; instructional strategies and investigation of research.

RED 6336
Reading in the Content Areas: PR: Basic Teacher Certificate or C.I. Identification and evaluation of reading skills, diagnosis of reading problems and development of methods and materials to increase student reading performance.

RED 6337
Reading in the Secondary School: PR: RED 6336. Basic Teacher Certification or C.I. Nature of the adolescent reader; organizational patterns, principles, and procedures; diagnostic and remediation materials

RED 6746
Management of Reading Programs: Overview of K-12 reading instruction goals and program management models; role of reading supervisor and in-service needs assessment and delivery.

RED 6845
Advanced Evaluation and Instruction in Reading: PR: RED 5514 or C.I. Administration and interpretation of formal and informal evaluation strategies. Factors and instructional techniques contributing to reading achievement. Case studies, parent involvement.

RED 6846
Reading Practicum: PR: RED 6845 or C.I. Evaluation and instructional practices for individualization of reading instruction in a laboratory setting. Parent interview and case report.
RED 6946
Practicum, Clinical Practice

RED 6971
Treatise

REE 6306
Corporate Real Estate Investment Decision-Making: PR: Acceptance into the graduate program and FIN 5405 or equivalent. Study of the theory and practice of location, acquisition, management and disposition of corporate real estate assets.

REE 6308
Corporate Real Estate Development: PR: Graduate Standing and REE 6306. Real estate decision making in the private sector utilizing tools of financial economic analysis.

RET 5910
Research Methods in Cardiopulmonary Physiology: Introduction to methods used in scientific and medical research in cardiopulmonary physiology. Literature review, experimentation, and analysis of data.

RET 6555
Cardiac Rehabilitation: PR: HSC 6566. Lecture course emphasizing the principles underlying the formulation and implementation of a comprehensive cardiac rehabilitation and prevention program.

RMI 6006
Risk Management: PR: Acceptance into the graduate program and FIN 5405 or equivalent. An introduction to risk management with emphasis on the business firm, but also treating several major risk management issues in the public sector.

SCE 5716
Methods in Elementary School Science: Organization of instruction in elementary school science including methods, evaluation, materials, strategies, and current practices.

SCE 5825
Space Science for Educators: PR: Senior Standing or C.I. Introduction to space science, manned space flight and space education curriculum.

SCE 6237

SCE 6238
Inquiry in the Sciences: PR: Graduate standing or science certification. Teaching science by inquiry in the secondary school and development of inquiry lessons.

SCE 6616
Trends in Elementary School Science Education: PR: Basic Teacher Certification or C.I. Study of historical development and current trends; analysis of science curricula, materials.

SDS 6040
Student Personnel Services in Higher Education: PR: Completion of Phase II of Education Professional Preparation or C.I. A basic introduction to student personnel services which covers philosophy, history, functions, theory and issues.

SDS 6200
Procedures for Group Testing: PR: EGC 5005 or EGC 6426, EDF 6481 or EDF 6482. Survey of various educational and psychological objective instruments used in schools to measure achievement, aptitude, interests, ability. Emphasis on administration and score interpretation.

SDS 6330
Career Development: PR: EGC 5005, 6426 or 6655; EDG 6481; or C.I. A study of career development theories, occupational and educational information, approaches to career decision-making, lifestyle and leisure in the development of the whole person.

SDS 6411
Counseling with Children and Adolescents: PR: EGC 6436 and EDF 6155 or C.I. Study of counseling theory, process and techniques as applied to children and adolescents. Course will contain an experiential component.
SDS 6426: Guidance and Counseling of Gifted/Talented Individuals: Guidance and counseling procedures and strategies for gifted/talented students; self-assessment; group dynamics; communication with parents; career goals; alternate educational opportunities.

SDS 6620: Organization and Administration of School Counseling and Guidance Programs: PR: EGC 5005. In-depth analysis of counseling and guidance programs in schools, including the development and management of comprehensive programs.

SDS 6624: The College Community and the Student: PR: Completion of Phase II of Education Professional Preparation or C.I. and EGC 5005. A study of the composition of student populations in American colleges and universities and the factors within the learning environment which support student development.

SOW 5105: Human Behavior and Social Environment I: Individual and study of human development and psychosocial functioning of individuals at various life stages with particular attention to implications of human diversity.

SOW 5106: Human Behavior and Social Environment II: Social Systems: Study of the patterns and dynamics of families, groups, organizations, and communities from a social work and a systems perspective.

SOW 5132: Social Work Practice: Generalist Practice: Study of social work functions, knowledge, values, roles and skills; the use of a generalist model of practice.

SOW 5305: Social Work Research: Study of group research designs in social work; quantitative analyses; and related ethical issues.

SOW 5357: Clinical Supervision: Supervisory theory and practice in clinical settings.

SOW 5404: Evaluating Social Work: Study of single case designs in social work; recording methods; behavioral and standardized measures; applications to individuals, families, groups, programs, communities.

SOW 5532: Field Education I: Generalist Practice: CR: SW Practice I. Supervised practice of social work in an agency for 224 clock hours.

SOW 5533: Field Education II: Interventions: PR: SOW 5532 Field Education I. CR: SW Practice II. Continuation of SOW 5532 Field Education I in the same field agency for 224 clock hours.

SOW 5655: Child Abuse: Treatment and Prevention: The social worker's role and interventions with victims of child abuse and their family members.
SOW 5662
Strategies in Employee Assistance Programs: Techniques for establishing, providing, and evaluating services to people with problems which affect job performance.

SOW 5712
Interventions with Substance Abusers: Strategies for working with persons who abuse drugs, alcohol, and other substances.

SOW 6123
Psychosocial Pathology: An urban Perspective Study of psychosocial dynamics of dysfunctional behavior prevalent in urban settings.

SOW 6246
Urban Problems and Policies: Study of urban problems, policies and planning from the perspective of their impact on individuals and families.

SOW 6324
Clinical Practice with Groups: Group therapy and support approaches to such problems as addictions, sexually transmitted diseases, spouse abuse, and batterers.

SOW 6348
Clinical Practice with Individuals: Behavioral, crisis, and psychosocial theories applied to such problems as adjustment, rape, suicide, elder and child abuse, homelessness, residential/shelter care, delinquency and retardation.

SOW 6535
Field Education III: Clinical Practice-Individuals and Families: PR: SOW 5532 and SOW 5533. Supervised specialist practice in a field agency for 304 clock hours.

SOW 6536
Field Education IV: Clinical Practice-Groups: PR: SIW 6535. Continuation of SOW 6535, Field Education III, in the same field agency for 304 additional clock hours.

SOW 6612
Clinical Practice with Families: Family-focused models of intervention applied to such problems as resettlement/uprooting, divorce, single parenting and blended families.

SOW 6689
Sex Therapy: Intervention approaches for sex related problems.

SOW 6914
Research Project: Clinical Practice in Urban Setting: Student selected research on an issue of clinical practice in urban settings.

SPA 5005

SPA 5120
Physiological Acoustics: PR: SPA 4032. Graduate status or C.I. Lectures, readings and experiments pertaining to the subjective reception of sound.

SPA 5225
Fluency Disorders: PR: Graduate status or C.I. Identification and evaluation of disorders of rhythm. Emphasis will be on methods of intervention in disorders of fluency.

SPA 5225L
Fluency Disorders Laboratory: PR: Graduate status or C.I. Practical application of clinical skills in fluency disorders.

SPA 5307
Differential Diagnosis of Auditory Disorders: PR: SPA 4032. Graduate status or C.I. Clinical techniques in pure tone speech, acoustic impedance and electrophysiologic response audiometry.

SPA 5327
Aural Habilitation/Rehabilitation: PR: Graduate status or C.I. Principles and procedures involved in speech and language acquisition, management, utilization of residual hearing, speech reading and the use of hearing aids.
SPA 5553L Differential Diagnosis in Speech and Language Laboratory: PR: SPA 6204, SPA 6403, SPA 6211, SPA 5805. Students will be assigned to diagnostic teams in which they will apply the techniques presented in SPA 5553. Experiences will include test administration, interviewing, writing of diagnostic reports and oral presentations with staffings.

SPA 5554 Therapeutic Communication: PR: Graduate status or C.I. Practical interviewing and counseling in the area of Communicative Disorders. Emphasis is on facilitating clinician-client interactions.

SPA 5600 Administration and Management of Communicative Disorders Programs: PR: SPA 3002. Methods and techniques for organization and administration of Speech/Language and Hearing Disorders in public school, hospital, rehabilitation center and private practice facilities.

SPA 5805 Research in Communicative Disorders: PR: STA 4163, Graduate status or C.I. This course is designed to introduce the student to empirical research in the area of communication disorders. Emphasis is on hypothesis testing, methodology, analysis and interpretation of results.

SPA 6132 Measurements in Speech Science: PR: Graduate status or C.I. The application of instrumentation to research in normal speech and language behaviors. Measurements include use of electronic instruments, such as the oscilloscope.

SPA 6204L Advanced Studies in Communicative Disorders: Articulation Laboratory: PR: SPA 3112, SPA 3112L, SPA 4201. Practical application of clinical skills in articulation disorders. May be repeated for credit.

SPA 6211L Voice Disorders Laboratory PR: Graduate status or C.I. Practical application of clinical skills in voice disorders.

SPA 6308 Auditory Evaluation and Assessment Procedures for Special Populations: PR: Graduate status or C.I. Audiometric testing and functional communicative assessment procedures for geriatric, pediatric, and other special populations.

SPA 6345 Amplification: PR: Graduate status or C.I. Hearing aids, selective evaluation procedures, electroacoustic measurements, coupling techniques, and orientation and counseling.

SPA 6403 Advanced Studies in Communicative Disorders: Language: PR: Graduate status or C.I. Presentation of the syntactic, semantic and pragmatic nature of children's language disorders. Emphasis will be on techniques and methods of diagnosis and intervention with children from birth through adolescence. May be repeated for credit.

SPA 6410 Language Problems in Adults: PR: SPA 4251, Graduate Status, or C.I. A study of the language disorders in adults associated with neurological problems, brain injury, systemic disease, and aging.

SPA 6505 Clinical Practicum in Speech Pathology-Language: PR: Graduate status or C.I. Advanced clinical practice in communicative disorders. May be repeated with change of content.
Clinical Practicum in Audiology: PR: SPA 4032. Advanced clinical practice in communicative disorders. May be repeated with change of content.

Differential Diagnosis in Speech and Language: PR: SPA 6204, SPA 6403, SPA 6211, SPA 5805. Administration and interpretation of evaluation techniques, including standardized tests, will be presented. Emphasis will be on those techniques which allow for differential diagnosis of speech and language disorders.

Directed Independent Studies

Directed Independent Research

Special Topics/Seminars - May be repeated for credit.

Internship, Practicums, Clinical Practice

Thesis

Evolution of Communication Theory: General Survey - major communication trends from classical era to the present. Comparison of Aristotelian and non-Aristotelian rhetorics. Contributions of principal figures will be discussed.

Modern Communication Theory: Comparative analysis of theories and models of human communication, behavior systems, encoding and decoding processes, interaction variables, and social context.

Small Group Communication: A study of communication and its effect on small group behavior.

Infant Development Assessment: PR: Graduate admission and C.I. Analysis of test theory and practice in administration, scoring, and interpretation of instruments assessing cognitive, visual-motor ability and adaptive behavior to pre- and primary school children.

Multicultural Issues and Assessment: PR: Graduate admission and C.I. An investigation of some of the major multicultural issues with emphasis on administration, scoring and interpretation of instruments related to this population.

Psycho-Educational Diagnosis I: PR: Graduate admission and C.I. Measurement of intellectual and cognitive functioning of children and adults. Administration, scoring and interpretation of Wechsler scales and selected psychometric instruments.

Introduction to Psychological Services in Schools: PR: Graduate admission and C.I. A course presenting an overview of the philosophy, organization, programs and operation of school psychological services.

School Consultation Techniques: PR: C.I. Theories and models of school consultation and clinical practice in the consultative role. (Three hours required.)

Practicum in School Psychology

School Psychology Internship: PR: Graduate admission and C.I. Supervised placement in school setting.

Methods in Elementary School Social Science: Study of instructional programs in social sciences; objectives; materials; techniques; current research; and their application in elementary school setting.

Trends in Elementary School Social Studies Education: PR: Basic Teacher Certificate or C.I. Historical development and current trends, strategies for inquiry instruction, intellectual, social and personal dimensions of social studies.

Contemporary Social Science Education: PR: Basic Teacher Certificate of C.I. A survey of recent developments and contemporary programs in all areas of the social sciences.

Probability and Statistics for Engineers: PR: STA 3032 or equivalent. Theory and applications of discrete and continuous random variables, hypothesis tests, confidence intervals, regression analysis, and correlation.

Experimental Design: PR: STA 4164, STA 5206 or STA 5156. Construction and analysis of designs for experimental investigations. Blocking, randomization, replication; Incomplete block designs; factorial and fractional designs; design resolution.

Statistical Analysis: PR: STA 3023; not open to students who have completed STA 4164. Data analysis; statistical models; estimation; tests of hypotheses; analysis of variance, covariance and multiple comparisons; regression and nonparametric methods.

Categorical Data Methods: PR: STA 4163 or STA 5206. Considers discrete probability distributions, contingency tables, measures of association and advanced methods including loglinear modeling, logistic regression, McNemar’s Test, Mantel-Haenszel tests.

Statistical Computing I: Computer systems, approximating probabilities/percentiles, random number generation, linear model computations, density estimation.

Statistical Computing II: Dynamical graphics, multivariate structures, statistical optimization problems, multivariate generation, relation to evolving computational environments.

Response Surface and Mixture Experiments: PR: STA 5205. Approximating response functions; first-order and second-order response surfaces; ridge systems; mixture problems, component proportions, and the analysis of mixture data.

Sampling Theory and Applications: PR: STA 4321. Different techniques of sampling, sampling for proportions, choosing sample size, ratio estimates, effects of sampling and non-sampling errors.

Regression Analysis: PR: MAS 3113 and STA 4164. General linear model, model aptness and remedial measures, regression through the origin, independent and dependent indicator variables, multicollinearity, outliers, biased regression.
STA 6246
Linear Models: PR: MAS 5115, STA 4164, and STA 4322. Theoretical development of full rank linear statistical models, least squares and maximum likelihood estimation, interval estimation, hypothesis testing, introduction to less than full rank models.

STA 6326

STA 6327

STA 6329
Statistical Applications of Matrix Algebra: PR: MAC 3313 and STA 4164 or STA 5206. Basic theory of determinants, inverses, generalized inverses, eigenvalues and eigenvectors, partitioned matrices, diagonalization and decomposition theorems, least squares and statistical applications.

STA 6357

STA 6507
Nonparametric Statistics: PR: At least one course in statistics. Theory and methods for one and two sample problems; one and two way layouts; independence problems; regression problems.

STA 6662
Statistical Methods for Industrial Practice: Variance components, PCRs, autocorrelation structures, charting, EVOP, design strategies, calibration, standards and associated awards.

STA 6707

SYA 5625
ProSeminar: Survey of conceptual issues, methodological concerns, and findings in substantive sociological areas that currently dominate scholarly inquiry, including such topics as crime, deviance, community, alcoholism, education.

SYA 6126
Social Theory: PR: C.I. The study of selected sociological theories in terms of relevance, usefulness, and adequacy for applied sociology.

SYA 6305
Social Research: PR: C.I. Research methodology including problem conceptualization, sampling designs, research proposals, data collection and evaluation techniques for applied settings.

SYA 6455
Research Analysis: PR: SYA 6305, Undergraduate statistics, or C.I. Data management, selection of statistics, data analysis, evaluation, data presentation, and computer skills.

SYA 6556
Social Organization and Human Resources: PR: C.I. Complex organization theory, social systems analysis, competence in group dynamic skills and use of human resources in agencies, businesses, and industries.

SYA 6557

SYA 6971
Thesis
SYO 6515 Issues in Social Disorganization: PR: C.I. Sociological study and analysis of the manner in which American society is organized and the consequences of the way in which its cultural premises are arranged.

SYP 6045 Clinical Sociology: PR: C.I. The use of applied strategies which employ sociological diagnosis and treatment of community groups and their members.

SYP 6515 Deviant Behavior Issues: PR: C.I. An examination and evaluation of the forms of social deviance, and the organizations designed to respond to them.

TAX 6065 Seminar in Tax Research: PR: Graduate standing and all foundation courses for the accounting program or equivalents. Advanced study of and research in tax law. Procedures governing tax controversies and tax compliance.

TAX 6135 Seminar in the Taxation of Corporations and Shareholders: PR: TAX 5015 and graduate standing and all foundation courses for the accounting program. Federal taxation relating to corporate organization, distributions, liquidations, accumulations and reorganizations.

TAX 6205 Seminar in the Taxation of Partnership Income: PR: TAX 5015 and graduate standing and all foundation courses for the accounting program. Federal taxation relating to partnership income including formation, distributions and retirements.

TAX 6405 Seminar in the Taxation of Estates, Gifts and Trusts: PR: TAX 5015 and graduate standing and all foundation courses for the accounting program. Federal and Florida estate and inheritance taxes; taxation of gifts and trusts.

TAX 6845 Seminar in Tax Planning: PR: TAX 5015 and graduate standing and all foundation courses for the accounting program. Substantive provisions of federal tax law; tax planning from a business viewpoint; case studies of the effect of tax law on business decisions.

TAX 6971 Thesis BA 1-6

TAX 7066 Seminar in Doctoral Tax Research: PR: Admission to doctoral program, ACG 7157, and C.I. A review and critical analysis of tax research literature, with emphasis on emerging issues, methodology, and data gathering.

TSL 5140 ESOL Strategies: This course will survey cross-cultural communication and understanding, testing and evaluation, curriculum and methods of teaching ESOL to meet the needs of limited English proficient students.

TSL 5142 Critical Approaches to ESOL: Analysis, planning, design, and evaluation of curriculum and curricular models.

TSL 5345 ESOL: This course is designed to develop understanding, knowledge and skills of the current methods used in the teaching of ESOL.

TSL 5440 Problems in Evaluation in ESOL: Survey, selection, and design of instruments of evaluation for use with limited English proficient students.

TSL 5525 ESOL Cultural Diversity: This course is designed to identify major cultural groups represented by the LEP population in Florida schools and to understand their special needs.

<th>Course Title</th>
<th>Prerequisite(s)</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>TTE 5204</td>
<td>Traffic Engineering</td>
<td>PR: TTE 4004. Study of operator and vehicle characteristics, and design for street capacity, signals, signs, and markings.</td>
<td></td>
</tr>
<tr>
<td>TTE 5205</td>
<td>Highway Capacity and Traffic Flow Analysis</td>
<td>PR: TTE 4004. Highway capacity for all functional classes of highways. Traffic signalization, including traffic studies, warrants, cycle length, timing, phasing and coordination.</td>
<td></td>
</tr>
<tr>
<td>TTE 5206</td>
<td>Traffic Flow Theory and Applications</td>
<td>PR: TTE 4004 and STA 3032. Fundamental theories and applications of traffic movements on highways and streets.</td>
<td></td>
</tr>
<tr>
<td>TTE 5700</td>
<td>Railroad Engineering</td>
<td>PR: TTE 4004 and C.I. The major technical factors in location, construction, maintenance, and operation of railroad transportation systems.</td>
<td></td>
</tr>
<tr>
<td>TTE 5805</td>
<td>Geometric Designs of Transportation Systems</td>
<td>PR: TTE 4004. Study of geometric and construction design elements in the engineering of transportation systems.</td>
<td></td>
</tr>
<tr>
<td>TTE 5835</td>
<td>Pavement Design</td>
<td>PR: CEG 4101. Pavement types, wheel loads, stresses in pavement components, design factors such as traffic configurations, environmental, economic, drainage, and materials.</td>
<td></td>
</tr>
<tr>
<td>TTE 6009</td>
<td>Advanced Technologies in Transportation</td>
<td>PR: TTE 4004; TTE 5204 and C.I. Theories and applications of advanced technologies in transportation engineering.</td>
<td></td>
</tr>
<tr>
<td>TTE 6526</td>
<td>Planning and Design of Airports</td>
<td>PR: C.I. Background of aviation and airport development, aircraft characteristics. Planning and design of airport components. Heliport and STOL ports and pavement and drainage design.</td>
<td></td>
</tr>
<tr>
<td>TTE 6625</td>
<td>Mass Transportation Systems</td>
<td>PR: C.I. Planning, design, construction, operation, and administration of mass transportation systems.</td>
<td></td>
</tr>
<tr>
<td>ZOO 5456C</td>
<td>Ichthyology</td>
<td>PR: ZOO 3303C or C.I. Introduction to the biology of the fishes, their classification, evolution and life histories.</td>
<td></td>
</tr>
<tr>
<td>ZOO 5463C</td>
<td>Herpetology</td>
<td>PR: 6 hours of zoology or C.I. Introduction to the biology of the amphibians and reptiles, their classification, evolution and life histories.</td>
<td></td>
</tr>
<tr>
<td>ZOO 5475C</td>
<td>Ornithology</td>
<td>PR: 6 hours of zoology or C.I. Introduction to the biology of birds, their classification, evolution, and life histories.</td>
<td></td>
</tr>
<tr>
<td>ZOO 5486C</td>
<td>Mammalogy</td>
<td>PR: 6 hours of zoology or C.I. Introduction to the biology of mammals, their classification, evolution and life histories.</td>
<td></td>
</tr>
<tr>
<td>ZOO 5745C</td>
<td>Essentials of Neuroanatomy</td>
<td>PR: Human/Comparative Anatomy, or Human/Animal Physiology or C.I. Fundamental concepts of both morphological and functional organization of the nervous system. Primary emphasis on human structure.</td>
<td></td>
</tr>
<tr>
<td>ZOO 5815</td>
<td>Zoogeography</td>
<td>PR: 8 hours of zoology or C.I. Principles and concepts concerning regional patterns of animal distributions of the world, both past and present.</td>
<td></td>
</tr>
