Looking for the 2018-2019 Undergraduate Catalog? Click here or select the catalog you wish to view from the drop-down menu above.

World-class research, pioneering partnerships, renowned faculty, and graduate students who enjoy a rich blend of academics, research, culture, and fun is graduate study at the University of Central Florida in one of the most dynamic metropolitan areas in the United States-Orlando, Florida.

What's New

The University of Central Florida is the university that seeks opportunities, creates opportunities, and brings them to fruition. The University's culture of opportunity is driven by the diverse people it attracts, its Orlando environment, its history of entrepreneurship, and its youth, relevance, and energy.

Here you will find the latest updates about the new master, doctoral, and specialist programs, certificates, fellowships, and more. Check here and often to find out what's new in the UCF College of Graduate Studies.

As of July 1, UCF launched two new colleges and a new interdisciplinary school that will enhance the opportunities for academic excellence in the new Academic Health Sciences Center in Lake Nona and the UCF Downtown campus in Orlando.

College of Health Professions and Sciences

As part of the newly created Academic Health Sciences Center along with the College of Medicine and the College of Nursing, the College of Health Professions and Sciences will be focused on educating students for rewarding careers in prevention, diagnosis or therapy at hospitals, community-based and specialized-care facilities, schools, and nonprofit and social service agencies.

College of Community Innovation and Education

The anchor of our UCF Downtown campus, the College of Community Innovation and Education brings together community-facing programs engaged with the social and economic fabric of thriving, modern cities and grounded in transformative education.

Nicholson School of Communication and Media

An interdisciplinary, inter-college school, the Nicholson School of Communication and Media, includes communication, digital media, and film programs and will redefine content creation, digital art, and communication for the 21st century.

Graduate Degree Programs

This year, UCF approved four new programs:

- Athletic Training MAT ♦
- Big Data Analytics PhD ♦
- Emergency and Crisis Management MECM ◆►
- Integrative Anthropological Sciences PhD ♦

Four new graduate certificate programs were approved:

- Dual Languages Graduate Certificate ♦
- Educational Program Evaluation Graduate Certificate ♦
- Hospitality and Tourism Technologies Graduate Certificate ◆►
- Public Policy Analysis Graduate Certificate ◆►

Two new graduate degree tracks were created in the following programs:

- The Management MS program added the Entrepreneurship Track MSM ◄.
- A Non-Thesis Track, MS ♦ has been added to the Nanotechnology MS program.

Other changes occurred in the following programs:

- Education Leadership MA has changed the name of one of its track to Higher Education/College Teaching and Leadership Track MA.
- The Community College Education Graduate Certificate has changed its name to College Teaching and Leadership Graduate Certificate ◄◆►.
- The Nonprofit Management, Out of State Cohort Track MNM ◄ has been reactivated.

University Fellowships
The university is proud to offer several merit-based fellowships to new degree-seeking graduate students. Each year, incoming graduate students who apply by the Fall Priority admissions deadline are eligible for university fellowship consideration. Our most prestigious doctoral fellowships provide four years of support (including a fellowship stipend, tuition support, and health insurance coverage) to the most qualified doctoral applicants to the institution.

Students who have successfully completed a McNair Scholars program as an undergraduate are encouraged to apply for the UCF Graduate McNair Fellowship. This award provides financial support to the most outstanding undergraduate McNair scholars who enroll in UCF graduate programs. More information is available at UCF Graduate Fellowships.

The UCF Multidisciplinary Doctoral Fellowship is awarded to an outstanding doctoral student in good academic standing who is engaged in innovative multidisciplinary research. The purpose of this fellowship is to allow the pursuit of research questions that cross traditional disciplinary boundaries.

The Graduate Dean's fellowship is offered to superior graduate students who are newly enrolling in one of UCF's master's, specialist, or doctoral programs. These awards provide a fellowship stipend as a supplement to a qualifying graduate assistantship.

In a continuing effort to support the research efforts of our graduate students, the university provides over $250,000 per academic year in funding to master's, specialist, and doctoral students who deliver a research paper or comparable creative activity at a professional meeting. For information about the criteria applicants for this award must meet, please see Presentation Fellowship. For more information on all UCF Fellowships available to qualified graduate students, as well as information on other funding opportunities, visit Funding.

**Important Information**

This catalog contains a description of the various policies, graduate programs, degree requirements, course offerings, and related matters intended to be in effect at the University of Central Florida during the 2018-2019 academic year. However, any matter described in this catalog is subject to change. As a result, statements in this Graduate Catalog may not be regarded in the nature of binding obligations on the institution or the State of Florida, or as an irrevocable commitment from the University to the reader.
faculty, and staff and by supplying the infrastructure that enables these programs to achieve national prominence.

**Basic and applied research, as well as creative activity, are integral parts of a quality education.** UCF faculty members are scholar-teachers. As such, they create new knowledge, new points of view, and new means of expression in a broad range of academic, professional, and socially significant areas. Their creativity fosters innovation as they convey their results, methods, values, and expressions to students, colleagues, and the public.

**UCF works actively to build partnerships that promote the development of central Florida’s economy through carefully targeted programs of graduate study and research.** The I-4 High-Technology Corridor Council, whose goal is to attract, retain, and expand high technology investment and jobs, is but the latest example of UCF’s collaboration with partners from industry, state and local government, and higher education.

**Service to its community is an important extension of the metropolitan mission of the university.** Public service is prominent at UCF, and the university develops partnerships with the community to enrich the educational, artistic, cultural, economic, and professional lives of those it serves in central Florida and beyond.

**Education is more than classroom experience.** UCF students are involved in cooperative research and participate in artistic, social, cultural, political, and athletic activities. UCF provides academic diversity by bringing to its campus national and international leaders who expose students and the community to a wide range of views and issues. UCF achieves cultural diversity by using its multi-campus facilities to serve a diverse population of traditional and nontraditional students from various races, cultures, and nationalities.

**UCF is committed to the free expression of ideas, the equality of all people, and the dignity of the individual.**

### UCF Story

#### Graduate Education that Creates Opportunities

The University of Central Florida is one of the largest pre-eminent research universities in the country. Located in Orlando, one of the most dynamic metropolitan areas in the United States, UCF benefits from a diverse faculty and staff who create a welcoming environment. UCF is a university that creates and provides opportunities for students to grow, learn and succeed.

As central Florida's higher-education partner, UCF plays a major role in the region's fast-paced growth through its community and corporate partnerships, its research programs, and the talents of its more than 318,000 alumni, over 66,000 students, and 7,500 faculty and staff. As a metropolitan research university, UCF is committed to innovative community partnerships, world-class research with local impact, and the integration of technology and learning.

### Centers of Excellence

UCF's colleges include Arts and Humanities, Sciences, Business Administration, Education and Human Performance, Engineering and Computer Science, Graduate Studies, Health and Public Affairs, Hospitality Management, Medicine, Nursing, and Optics and Photonics.

The university's internationally renowned colleges, centers and institutes include the College of Optics and Photonics/CREOL (Center for Research and Education in Optics and Lasers), the Rosen College of Hospitality Management, the Advanced Materials Processing and Analysis Center (AMPAC), the Biomolecular Science Center, the School of Modeling, Simulation and Training, the Florida Solar Energy Center (FSEC), the NanoScience Technology Center, the National Center for Forensic Science, the Florida Space Institute, and the Florida Photonics Center of Excellence. For additional information regarding these centers and institutes and other research programs, visit www.research.ucf.edu/centers.html.

### Pride in Accomplishments

The reputation of any educational institution is best reflected in the accomplishments of its students, faculty, and alumni—and for a university that's now more than 50 years old, UCF has moved rapidly from promise to academic prominence.
Campus Accomplishments

- UCF faculty ranked 21st in the nation among public universities for the number of U.S. patents they secured and 41st in the world, according to the National Academy of Inventors.
- UCF and the U.S. Fish & Wildlife Service reached a historic agreement establishing a permanent research facility in the Archie Carr National Wildlife Refuge on the beaches of Brevard County, one of the most important sea turtle nesting beaches in the Western Hemisphere.
- Twenty-five UCF graduate programs were ranked in the top 100 in their respective fields by *U.S. News & World Report's Best Graduate Schools of 2019*. Among these are Emergency Management and Homeland Security, Counselor Education, Nonprofit Management, Optics and Photonics, Public Management and Leadership, Criminology, Public Budgeting and Finance, Industrial Engineering and Health Administration, to name a few.
- UCF's Florida Interactive Entertainment Academy was named the No. 3 graduate-level video game design school in North America by *The Princeton Review* and *PC Gamer* magazine.

Notable Research

- UCF scientist Sudipta Seal, whose research has led to groundbreaking therapeutic applications in regenerative nanomedicine, has been chosen as a 2018 inductee into the Florida Inventors Hall of Fame. He holds more than 60 patents for an array of discoveries including multi-functional nanomaterial additives for aerospace nanoenergetics and his research in power plant fly ash waste has created unique chemistry of ash particles with nanostructures that can be used to clean up oil spills.
- The National Science Foundation awarded UCF more than $20 million to manage and operate the Arecibo Observatory in Puerto Rico. UCF researchers Raymond Lugo and Yan Fernandez lead the research portion of the project, while UCF partners UMET and Yang Enterprises, Inc. will focus on the educational outreach and IT and maintenance of one of the world's most powerful radio telescopes.
- UCF Pegasus Professor Debra Reinhart was named the 2018 Gordon Maskew Fair Award recipient. The national award honors the very best leaders in environmental engineering or environmental science based on their conduct, achievements and significant contributions to the control of the quality of the world's environment. Reinhart is the first UCF recipient and the first woman to be honored since the awards began in 1971.
- UCF chemistry professor Fernando Uribe-Romo has discovered a way to trigger the process of photosynthesis in a synthetic material, turning greenhouse gases into clean air and producing energy all at the same time. His work has generated interest across the world and led to a Tedx talk.
- Two UCF math majors were selected for highly competitive Research Experience for Undergraduates grants from the National Science Foundation. The students put their math skills to use in unique ways by working with College of Arts and Humanities faculty. The students are Evan Waldmann who is headed to Harvard University and Hanna Reed who is headed to University of Tennessee, Knoxville. They will work with faculty there over the 2018 summer.

Degrees of Distinction

With 1,682 full-time faculty, the university offers 92 bachelor's degrees, 84 master's and MFA degrees, three specialist degrees, and 34 doctoral degrees as well as 80 graduate certificate programs and the Doctor of Medicine program.

The list of prominent alumni gets longer with each graduation ceremony. A sampler of notable alumni includes Kevin Beary, former Sheriff, Orange County, Florida; Juanita Black, president, Mental Health Association of Central Florida; Jim Atchison, President and CEO, SeaWorld Parks and Entertainment; John C. Bersia, Pulitzer Prize-winning writer; Phil Dalhausser, Olympic Gold Medalist, volleyball; Ericka Dunlap, Miss America 2004; Cheryl Hines, actress; R. Glenn Hubbard, former chair, U.S. Council of Economic Advisors; George Kalogridis, president, Walt Disney World Resort; Mark Miller, country music singer/songwriter, Sawyer Brown band; William W. Parsons, Jr., Director, NASA's John C. Stennis Space Center; Angel Ruiz, president and CEO, Ericsson North America; Nicole Stott, space shuttle astronaut; Daniel Tosh, standup comedian/television host; and Al Weiss, President of Worldwide Operations, Walt Disney Parks and Resorts.

International Impact

UCF's growing cadre of international students adds both diversity and global connections to its central Florida community. More than 130 countries—most notably India,
China, Canada, Vietnam, Jamaica, United Kingdom, and Colombia—are represented in the student body, and faculty research is taking place in areas ranging from South America to the Arctic polar ice cap.

UCF has study and research agreements with 98 institutions in 36 countries—providing learning and research opportunities for students and faculty in countries ranging from the Udmurt Republic to South Africa. The university's Eastern Europe Linkage Institute alone maintains educational and research partnerships with 20 institutions in nine countries, including Russia, Ukraine, Slovakia, the Czech Republic, Bulgaria, Lithuania, Romania, Poland, and the United States. The student experience abroad does not stop in the classroom with opportunities available for students to travel internationally.

Strength in Diversity and Inclusiveness

Increasing diversity and inclusiveness is one of the central goals of UCF. The university is particularly proud of an aggressive minority recruitment plan, and minorities now account for nearly 20 percent of the faculty.

The student community includes Hispanic/Latino (18%), African-American (12%), and Asian/Pacific Islander (12%) students and represents 64 of Florida's 67 counties, all 50 states, and 145 countries.

Partnerships and Community Service

One of UCF's main objectives is to be America's partnership university. Hundreds of joint projects are in place with community organizations and government agencies at all levels and corporations—ranging from collaborative research in nanoscience to neighborhood nursing clinics.

Two major partnerships target the region's most prominent business sectors. The Rosen College of Hospitality Management will increase the university's already significant commitment to the area's tourism and hospitality sector. High-tech interests are being well-served by the Florida High Tech Corridor partnership—an initiative of UCF, University of South Florida and the University of Florida that now involves more than 25 local and regional economic development organizations, 14 community colleges and thousands of companies.

Orlando and Beyond

In addition to its 1,415-acre main campus in Orlando, UCF has area campuses in Daytona Beach, Cocoa, and Clermont; centers in Deland, Palm Bay, Melbourne, Kennedy Space Center, Downtown Orlando, South Orlando, Kirkman Road, and Lake Mary; and instructional sites in Deltona, Flagler, New Smyrna, Osceola, Celebration, Leesburg, Chiefland, Lecanto, and Sumterville giving students throughout central Florida the chance to take classes, pursue degrees, and interact with faculty and staff.

Pardon Our Dust

- The Downtown Orlando Campus will open with 7,700 students in Fall 2019.
- The John C. Hitt Library expansion happening in three phases will include an automated book-retrieval system, additional open shelving for materials, 24-hour study rooms and space for researchers to collaborate, the first phase is slated for late spring 2018.
- Trevor Colbourn Hall will house the new Graduate Student Center, is set to open Fall 2018.
- UCF's iconic Reflecting Pond is under repair after summer hurricanes caused the renovations. Students will notice when the Pond opens back up that LED lights that change colors reopened in Spring 2018.
- Student Union Expansions will be completed by Fall 2019 with increase space and seating from 315 to 750 and by Summer 2018 offer new eats from Steak & Shake, Panda Express, Qdoba, Which Wich, Chilis and Huey Magoo's.

Virtual Campus

UCF's virtual campus UCF Online is leading the way in the integration of technology, teaching, and learning. Twenty-five graduate degrees and 30 certificate programs are available online, in addition to many individual graduate-level courses. Essential student services, such as parking, course registration, and textbook purchases are also available online.

For more information on UCF's online programs, visit www.ucf.edu/online.

UCF Athletics

For the fourth consecutive year, UCF student-athletes are graduating at a higher rate than any other NCAA Division I Football Bowl Subdivision public institution in the nation.
UCF has an overall success rate of 94 percent - the highest among US public institutions and the highest in the state of Florida.

UCF Knights football became the 2017 Peach Bowl champions and finished the season undefeated with a 13-0 record.

UCF Knights cheer team places second at UCA Nationals.

### Central Florida—A great place to be

UCF is located 13 miles east of downtown Orlando, 45 miles from the Atlantic Ocean and Cape Canaveral, and 100 miles from Tampa and the Gulf of Mexico. The area boasts world-class shopping and dining, amusement parks, lakes, golf courses, jogging and biking trails, and nature preserves.

### UCF—A Time of Opportunity

The time is now for UCF—one of the fastest growing, metropolitan research universities in the country and a catalyst for economic development in central Florida. Significant in size, excellent in academics, and prominent in accomplishments, the University of Central Florida is one of Florida's leading educational assets.

The University's culture of opportunity is driven by the diverse people it attracts, its Orlando location, its history of entrepreneurship, and its youth, relevance, and energy.

### Facts

#### About the University

- **Status:** One of 12 of Florida's public universities
- **Location:** In metropolitan Orlando area, 13 miles east of downtown Orlando
- **Carnegie Classification:** Comprehensive Doctoral; Research Universities - Very High Research Activity
- **Number of Graduate Programs:** 34 Doctoral, 84 Master's, 80 Graduate Certificates, 3 Specialist Programs, and 1 Professional Program (Medicine)
- **Overall Student Enrollment in Fall 2017:** 66,180
- **Graduate Enrollment in Fall 2017:** 8,721, including 1,996 doctoral, 5,892 master's, 416 certificate, 51 specialist, and 366 nondegree-seeking students

- **Class Offerings:** Courses offered in Arts and Humanities, Business Administration, Education and Human Performance, Engineering and Computer Science, Graduate Studies, Health and Public Affairs, Hospitality Management, Medicine, Nursing, Optics and Photonics, and Sciences are offered at night, online and at UCF's regional campuses.

#### About UCF Graduate Students

- **Graduate Student Characteristics, Fall 2017**
  - Doctoral - 55 percent full-time students, 45 percent part-time students
  - Master's - 40 percent full-time students, 60 percent part-time students
  - Gender - 59 percent female, 41 percent male

- **Average Age of Graduate Students, Fall 2017:** 32 years old
- **Ethnicity of Graduate Student Population, Fall 2017**
  - White, Non-Hispanic - 53.2 percent
  - African American, Non-Hispanic - 11.6 percent
  - American Indian or Alaskan Native - Less than 1 percent
  - Asian - 12.4 percent
  - Hispanic/Latino - 17.7 percent
  - Native Hawaiian/Other Pacific Islander - Less than 1 percent
  - Multi-racial - 2.1 percent
  - Not specified - 2.9 percent

#### Financial Support for Graduate Students

- **Assistantships:** Each year over 1,500 graduate students are awarded graduate assistantships that provide financial support for their graduate education.
- **Fellowships:** Over 2 million dollars in support was awarded to doctoral and master's students.
- **Tuition Remission:** University fellows and graduate students appointed on full-time assistantships (20 hours per week) receive full resident (in-state) tuition remission. Students appointed on half-time assistantship appointments (10 hours per week) receive remission of one-half of the resident (in-state) tuition. All nonresident university fellow and graduate
assistants with appointments totaling 20 hours per week are charged a “differential out-of-state fee” of $0.00.

- Health Insurance - The College of Graduate Studies provides health insurance coverage for all university fellows and graduate assistants with appointments totaling 20 hours per week.

**Research Activities 2017**

Academic research fuels the innovation economy and UCF is an integral part of statewide efforts to attract, retain and grow high technology companies in Florida. UCF's programs in engineering, optics, and photonics, and simulation and training, biomedical science, computer science and nanoscience are among the best in the nation. In 2017 UCF researchers received $148.7 million in contracts and grants, the largest percentage of funds coming from the federal government, which has a vested interest in advancing knowledge and fueling America's innovation pipeline.

Research faculty are the strength behind the development of new technologies. UCF's incubation and entrepreneurship programs help turn those technologies into companies, which in turn help those companies put products on the market.

- Total Research Awards - $148.7 million
- Total Federal Awards - $73.97 million
- Total State Awards - $33.76 million
- Total Industry Awards - $41.06 million
- Patents - UCF holds more than 989 U.S. Patents

**UCF Centers and Institutes**

**Research**

- Advanced Materials Processing and Analysis Center (AMPAC) - $1.18 million
- Florida Solar Energy Center (FSEC) - $3.66 million
- Institute for Simulation and Training (IST) - $14.33 million
- Florida Space Institute - $9.8 million

**College Research**

- Education - $15.2 million
- Engineering and Computer Science - $33 million
- Health and Public Affairs - $8.45 million
- Medicine - $11.01 million
- Optics and Photonics (CREOL) - $11.71 million
- Sciences - $16.8 million

- Graduate Program Directors
- Graduate Faculty and Graduate Faculty Scholars

Overview

The College of Graduate Studies provides leadership and vision for graduate education at the University of Central Florida. Program quality, graduate admissions, recruiting, enrollment management, student services, and records, financial support, policies, appeals, program development and review, benchmarking, and completion of graduate degrees are important concerns of the College.

Working in conjunction with the Faculty Senate Committees and the college and graduate program coordinators, the College of Graduate Studies is responsible for developing university-wide graduate plans and policies, coordinating graduate activities, distributing tuition support and fellowships to the colleges, facilitating the adoption of new graduate programs, coordinating the recruitment of graduate applicants, and admitting graduate students to the university. Students apply to the university through the Office of Graduate Admissions. Admission decisions are made by the graduate program directors and the College of Graduate Studies.

The College of Graduate Studies houses several interdisciplinary graduate programs: Geographic Information Systems Graduate Certificate; Interdisciplinary Studies MA and MS; Modeling and Simulation PhD, MS and Graduate Certificate; and Nanotechnology MS and PSM.

Mission Statement

The UCF College of Graduate Studies provides leadership and services to create high-quality learning environments for graduate students.

About Our Mission

The UCF College of Graduate Studies is an advocate for graduate education, working to mobilize and manage the resources needed for enrollment and program growth. We track and analyze emerging trends and changes in graduate education, both nationally and with our peer institutions, and provide support and guidance for interdisciplinary and cooperative programs. We are mindful of the need to retain the academic values of the graduate programs while acting as a partner in the social and economic well-being of the community and state.

We collaborate with the faculty to develop policies and best practices that further the high academic standards and excellence of our graduate programs. We provide information and services that students need to enhance their experience with UCF and that faculty and staff need to effectively carry out their responsibilities to students. Cooperation with colleges, graduate programs, institutes and centers, administrative offices, and support services is emphasized to provide an excellent experience for our graduate students from inquiry to graduation.

Through its primary activities, programs and services, the UCF College of Graduate Studies contributes to program development and growth, enrollment management and recruiting, enhanced infrastructure and technological support for our graduate students and programs, and quality student support services for a diverse and talented graduate student population.

Graduate Council

The Graduate Council is a standing committee of the Faculty Senate and reports to the Senate on graduate policy and curriculum matters. The Graduate Council deals with policy issues and standards for the university. New graduate program requests, changes to existing graduate programs, additions, deletions and modifications to graduate courses, and new policies or changes to existing graduate policies are initiated and reviewed by the Graduate Council. New graduate degree programs require final approval by the Board of Trustees, and approval for doctoral programs is required from the Florida Board of Governors. The Graduate Council has four committees that examine and formulate policies and procedures, hear petitions for variances from a graduate program or university requirements, review new graduate program requests, review changes to existing graduate programs, additions, deletions and modifications to graduate courses and provide input on graduate program reviews, among other matters. For specific duties and membership requirements of the committees and the Council please see Section VII of the Faculty Constitution at http://www.facultysenate.ucf.edu/constitution/index.asp.

College Graduate Coordinators

College graduate coordinators are appointed by the respective college deans (or Directors of Schools with graduate academic programs) to work with the College of Graduate Studies. The primary responsibilities of the college graduate coordinators are to identify academic opportunities for graduate education in their colleges, plan for enrollment growth and the use of resources in the graduate programs, communicate the college vision of graduate education to faculty, staff, students, and the university, coordinate and represent college graduate concerns to others, conduct studies that ensure program quality and standards in the college and report this information to the university, assist with program reviews, and prepare an annual report to the College of Graduate Studies on college graduate activities.

- College of Arts and Humanities—Lynn Hepner
- College of Business Administration—Dr. Taylor Ellis
- College of Education—Dr. Jesse P. Mendez
- College of Engineering and Computer Science—Dr. Mostafa Bassiouni
- College of Health and Public Affairs—Dr. Ross Wolf
- College of Medicine—Dr. Saleh Naser and Dr. Steve Ebert
- College of Nursing—Dr. Donna Felber Neff
- Rosen College of Hospitality Management—Dr. Alan Fyall
- College of Optics and Photonics—Dr. David Hagan
- College of Sciences—Dr. Jana Jasinski
- School of Modeling, Simulation and Training—Dr. Joseph LaViola, Jr.

Graduate Program Directors

The graduate program directors are appointed by the respective department Chairs (or Directors of other units with graduate academic programs) to work with the college and university personnel on behalf of graduate education. Under the direction of the department chair, they are responsible for the graduate program's health and quality. They oversee the recruiting of graduate students and respond to inquiries; provide for student services such as mentoring, career development opportunities, and student orientations; plan for office space for graduate assistants; inform students and faculty of student completion rates; inform students and faculty of financial support available to graduate assistants; and ensure program standards in their department. Graduate program directors are the main contacts for each of the graduate programs.

Graduate Faculty and Graduate Faculty Scholars

University-Wide Qualifications for Participation in Graduate Education

Graduate education requires the participation of highly competent faculty who are willing to share their specialized skills and knowledge with graduate students. Graduate faculty teach graduate courses, serve as members of thesis and dissertation committees, and serve as faculty advisers for thesis and dissertation students and chairs of thesis and dissertation committees. The following guidelines outline the minimal credentials necessary for faculty to serve the many different roles they play in graduate education. Programs may set higher qualification standards or additional requirements. As the
university is committed to encouraging, facilitating and rewarding interdisciplinary, multi-disciplinary and cross-disciplinary educational and scholarly activities, service of faculty and staff members in more than one department, school, center/institute, or college is encouraged as a way to further this objective.

Faculty engaged in graduate education must possess either a terminal academic degree in, or closely related to, the discipline in which they are teaching, or expertise in a field related to the topic of the thesis or dissertation if serving on a thesis or dissertation committee. Substitution for the terminal degree may be granted with documented relevant exceptional experience and scholarly or creative activity when recommended by the graduate program committee and approved by the department chair/unit director. No graduate student at UCF may teach UCF graduate courses as the instructor of record.

For the appointment of individuals in the process of obtaining a terminal degree, the College of Graduate Studies can certify that all requirements for a degree have been met.

Members of the Graduate Faculty cannot have personal or financial (including employment) arrangements that may pose a conflict of interest with a student on whose thesis or dissertation committee they serve.

This policy has five major sections:

- Section A defines the terms describing the roles played by faculty in graduate education.
- Section B establishes the role of the graduate program committees in the process of appointing Graduate Faculty and Graduate Faculty Scholars.
- Section C establishes the roles and qualifications for appointment as Graduate Faculty and Graduate Faculty Scholars.
- Section D establishes procedures for review, renewal, and termination of appointments to the Graduate Faculty.
- Section E establishes the responsibilities for the various members of dissertation committees.

A.1: Faculty Roles in Graduate Education

Faculty involved in graduate education comprise members of the Graduate Faculty (Sections C.1-C.2) and Graduate Faculty Scholars (Section C.3). These faculty may be eligible to assume the following roles as part of their involvement in graduate education at UCF:

- Instructor of record for graduate-level courses (graduate teaching)
- Member of a thesis or dissertation committee
- Chair of a thesis or dissertation committee: In the vast majority of cases, the chair is the adviser of the scholarly activities of the student. A chair of a thesis or dissertation committee also oversees all of the administrative functions of the committee. A Graduate Faculty Scholar is not eligible to serve as a chair of a thesis or dissertation committee.
- Co-chair of a thesis or dissertation committee: A co-chair is a member of a thesis or dissertation committee who shares with the chair in the scholarly advisory activities of the student. In cases in which a Graduate Faculty Scholar oversees the day-to-day scholarly activities of the student, the Graduate Faculty Scholar may be appointed as a co-chair of the thesis or dissertation committee.
- Vice-chair of a thesis or dissertation committee: A vice-chair serves as a voice of experience in thesis and dissertation committees. A vice-chair must be appointed to committees in which the chair has no prior experience serving on thesis or dissertation committees. To be appointed as a vice-chair, the committee member must have prior experience serving on at least one thesis or dissertation committee that has successfully graduated a student.

Descriptions of the responsibilities of members and chairs of dissertation committees are detailed in Section E.

B.1: Graduate Program Committees

Each graduate program will be administered by a graduate program committee consisting of faculty members who participate in the program. An active graduate program committee is required for each graduate program in order to provide program oversight and to ensure that the qualifications of contributing individuals are appropriate for participation in graduate education. Graduate program committee members are appointed in accordance with established department/school procedures and the qualifications established in this document.

B.2: Qualifications for Serving on Graduate Program Committees

Tenured, tenure-earning or ranked faculty who are members of the Graduate Faculty may serve on graduate program committees. The graduate program director will be the chair of the graduate program committee.
C.1: The Graduate Faculty

Tenured, tenure-earning, ranked Clinical or ranked Research professors, ranked lecturers or ranked instructors, and ranked librarians are eligible for appointment to the Graduate Faculty. Appointment to the Graduate Faculty begins with a nomination by the graduate program committee that is relevant to the graduate education duties of the individual faculty member. The nomination must then be approved by the department chair/unit director for review and appointment by the Dean of the College of Graduate Studies. Qualified graduate faculty members may be eligible to serve in more than one graduate program. Graduate faculty members who are outside of a student's program are eligible to serve as external members of a thesis or dissertation advisory committee.

Special graduate faculty nominations may be made to the Graduate Council at the discretion of the Dean of the College of Graduate Studies.

All graduate faculty are eligible to teach graduate courses, serve as members of thesis and dissertation committees, and serve as chairs or co-chairs of master's thesis committees.

C.2: Eligibility Criteria for Service as Chairs of Thesis and Dissertation Committees

All chairs and co-chairs must be approved by the graduate program committee of the student's program. Graduate program committees may specify additional guidelines for service as a chair or co-chair of thesis or dissertation committees.

Scholarly currency requirement to serve as a chair of a dissertation committee: For graduate faculty members to serve as a chair or co-chair of a dissertation committee, they must demonstrate significant current involvement in scholarly research or creative productivity. Scholarship and creative activity are evidenced and recognized through publications, presentations, performances, exhibits, awards, and competitions. Other considerations include a continuing fulfillment of professional obligations through, for example, manuscript review, journal editorship, and national advisory and review panels. The criteria for scholarly currency are to be established by each graduate program and approved by the department chair/unit director. The criteria must be submitted to the Dean of the College of Graduate Studies prior to nominations for graduate faculty appointments and updated for the reappointment process.

Required thesis or dissertation committee experience:
Graduate faculty who have not served as a member of a thesis or dissertation committee to completion may serve as the chair of a thesis or dissertation committee, but must have a vice-chair appointed to the committee who has previously served as a member of a thesis or dissertation committee to completion.

C.3: Graduate Faculty Scholars

Other qualified individuals may serve as graduate faculty scholars in graduate faculty roles confined to specific, well-defined graduate faculty assignments. Graduate faculty scholars play important roles in graduate education at UCF, but their status as graduate faculty scholars is distinct from that of members of the Graduate Faculty.

The appointment of graduate faculty scholars begins with a nomination by the graduate program committee that is relevant to the graduate education duties of the individual. The nomination must then be approved by the department chair/unit director for review and appointment by the Dean of the College of Graduate Studies.

Graduate faculty scholars may be designated as "Teaching-Only" if their responsibilities will be restricted solely to teaching graduate courses.

Graduate faculty scholars may serve as members of thesis or dissertation committees for the purpose of bringing specific disciplinary knowledge to the committee. In instances deemed appropriate by the graduate program committee, graduate faculty scholars may also serve as co-chairs or vice chairs of thesis and dissertation committees, but may not serve as chairs of these committees. Graduate faculty scholars serving on thesis and dissertation committees, either as members or co-chairs, must have documented evidence of exceptional relevant experience and/or scholarly or creative productivity, as determined by the graduate program committee.

It is expected that graduate faculty scholars will attend the various committee meetings associated with serving as a member of a thesis or dissertation committee.

D.1: Graduate Faculty Reappointments

Individual qualifications for reappointment as a graduate faculty member will be re-evaluated by the Program Review Committee of the Graduate Council. Reappointment evaluations will be conducted at the time of the periodic university program review, or sooner, as deemed appropriate by the graduate program committee or at the request of the Dean of the College of
Graduate Studies. At that time, individuals must re-submit their current credentials to the Program Review Committee of the Graduate Council if they wish to have their appointment renewed. Qualifications will be based on accomplishments since the last program review and the criteria established by the nominating graduate program.

D.2: Guidelines for a Thesis or Dissertation Committee Member Who Leaves UCF

A thesis or dissertation committee member who leaves UCF may be eligible to continue serving on the committee as a graduate faculty scholar with the approval of the graduate program committee.

D.3: Guidelines for a Thesis or Dissertation Committee Chair Who Leaves UCF

In the event that a chair of a thesis or dissertation committee leaves UCF:

1. With the approval of the graduate program committee, a chair of a thesis or dissertation committee who leaves UCF may continue to serve as chair and supervise the thesis or dissertation for one calendar year after leaving.
2. If one calendar year has passed since the faculty member left UCF and the advisee has not yet completed the degree requirements, the departed faculty member may continue to serve as co-chair of the thesis or dissertation committee as a graduate faculty scholar, with approval of the graduate program committee; however, a new chair from the student's department (or college, if a college-wide program) shall be designated.

D.4.1: Faculty Emeriti

Emeritus graduate faculty members may continue to participate in graduate education as a graduate faculty scholar, without the necessity of nomination. With the approval of the graduate program committee, they may continue to serve for a specified period of time as faculty advisers and chairs of thesis and dissertation committees established prior to emeritus status. Emeriti faculty may not chair additional thesis and dissertation committees but may continue to serve on thesis and dissertation committees as a member or co-chair for as long as they remain active with the institution.

D.4.2: Retired Faculty

In the event that a chair of a thesis or dissertation committee retires from UCF:

1. With the approval of the graduate program committee, a chair of a thesis or dissertation committee who retires from UCF may continue to serve as chair and supervise the thesis or dissertation for one calendar year after leaving.
2. If one calendar year has passed since the faculty member retired and the advisee has not yet completed the degree requirements, the retired faculty member may continue to serve as co-chair of the thesis or dissertation committee as a graduate faculty scholar, with approval of the graduate program committee; however, a new chair from the student's department (or college, if a college-wide program) shall be designated.

E.1: Responsibilities of Members of Dissertation Committees

1. To meet at regular intervals at least once per year to:
   (i) discuss and approve the proposed dissertation research and the plans for carrying out the research; and (ii) to assess progress towards the dissertation and give the student a yearly letter of evaluation in addition to S/U grades awarded for 7980 courses.
2. To review iThenticate results from dissertation submittals.
3. To participate in the candidacy and/or dissertation prospectus examination.
4. To participate in the dissertation defense to assure: (i) that the dissertation is acceptable as original research and a contribution to the discipline; and (ii) that it meets the standards of the University.

E.2: Responsibilities of the Chair (and co-Chair) of Dissertation Committees

1. In cooperation with the program director, to review the program of study, the research, and all other degree requirements by meeting with the student early
in the program and immediately after appointment as chair/co-chair.

2. To suggest to the student possible committee members who could serve on the dissertation committee.

3. To establish timelines for the research, set expectations, and evaluate the student progress based upon these.

4. To meet at regular intervals with the student to discuss the proposed dissertation research and the plans for carrying out research.

5. To review in a timely manner all written materials submitted by the student and offer suggested revisions.

6. To meet at least once per year with the student and the dissertation committee to assess progress toward the dissertation and give the student an annual review in addition to the S/U grades awarded for 7980 courses. The chair shall send the annual review to the program director after consultation with the dissertation committee.

7. To coordinate the ongoing efforts of the committee as its chair, and to participate fully in the responsibilities of the committee members as a member of the dissertation committee.

8. To chair the candidacy and/or dissertation prospectus examinations.

9. To be physically present and chair the dissertation defense, ensure its proper conduct as described above, and submit to the program director for the student's records all necessary grades, forms and other materials.

10. In disciplines where funding is essential to the success of the thesis or dissertation work, to acquire funds (and appropriate facilities) sufficient to support the research of the student.

any way with the department of the committee, such as through joint or secondary joint appointments.

4. Graduate faculty scholars are external members.

**E.4: Dissertation Committee Procedures**

1. For on-campus defenses, no fewer than four faculty members, including all members of the dissertation committee, shall be in attendance with the student during the dissertation defense, and at least half of the committee must be physically present.

2. Graduate programs may elect to offer the option of a virtual dissertation defense (student off-campus defense) upon approval of the graduate program director, the department, and the college. If the student defends virtually, at minimum the dissertation committee chair will be present at the campus location of the public defense. No fewer than four faculty members, including all members of the dissertation committee, shall be in attendance during the dissertation defense.

3. Only members of the dissertation committee may sign the dissertation, and a majority must approve the dissertation.

**F.1: Exceptions**

Exceptions may be made at the discretion of the Vice Provost and Dean of the College of Graduate Studies.

---

**E.3: Responsibilities of the External Committee Member of a Dissertation Committee**

1. External committee membership will entail the full responsibilities of other committee membership as specified in section E.1 above, including being present at the final defense.

2. External committee members should bring specific disciplinary knowledge or research expertise to the committee.

3. External committee members may be appointed from outside of the university or outside of the college (if the committee is for a college-wide program). The external committee member may not be affiliated in any way with the department of the committee, such as through joint or secondary joint appointments.

4. Graduate faculty scholars are external members.
Admissions

The UCF College of Graduate Studies coordinates the admission process with each of the graduate program directors to admit prospective students to graduate study. The College of Graduate Studies also admits students who are applying as nondegree-seeking students.

In order to enroll in graduate classes, students must have obtained a baccalaureate or higher degree, prior to the start of the term for which the student is admitted, from a regionally accredited U.S. institution or from a recognized foreign institution. Students without a baccalaureate or higher degree from a regionally accredited U.S. institution or a recognized foreign institution are not admitted to graduate degree programs, graduate certificate programs, or graduate nondegree status. The College of Business Administration requires that all degrees must have been earned from a regionally accredited U.S. institution or a recognized foreign institution.

Admission to the University

The admission process begins with the receipt of the Graduate Online Application for Admission along with all application requirements. In order to be considered for admission to a graduate program, the following information must be submitted and on file in the UCF College of Graduate Studies by the stated application deadline: application, residency, and any application requirements specified by the program. These documents become part of UCF's files and will not be returned to or copied for the applicant. All application requirements, aside from transcripts and test scores, must be submitted together with the online application. Transcripts and test scores must be official.

For specific graduate program information, refer to the appropriate program descriptions in the Graduate Programs section of this catalog. Program application deadlines are listed for each graduate program. Some programs require a pre-application and may require additional documents as part of this process.

NOTE: All graduate programs require that all application requirements (application form, residency form, recommendations, essay/personal statement, resume) be submitted online simultaneously by the stated application deadline. Official test scores (if required) must be sent directly from ETS/Pearson Vue to the UCF College of Graduate Studies (institution code 5233 for GRE and TOEFL; institution code RZT-HT-58 for GMAT). Official transcripts should be sealed in an envelope by the registrar of the former institution and sent directly to the UCF College of Graduate Studies, P.O. Box 160112, Millican Hall 230, Orlando, FL 32816-0112.

Once the online application and all application requirements are received, the UCF College of Graduate Studies will send you an e-mail notifying you of its receipt. Actual processing of the application, however, is not initiated until the application fee and other application requirements are received in the UCF College of Graduate Studies. The College of Engineering and Computer Science encourages prospective students to pre-apply to their graduate programs prior to beginning the university application process. The College of Optics and Photonics require a pre-application prior to beginning the university application process. Please refer to the graduate program’s admissions information in order to become familiar with the procedures specific to each program.

When all application requirements are received by the stated deadline and processed by our office, the appropriate graduate program reviews it in order to make an admission recommendation. Acceptance into a graduate program will be granted by the UCF College of Graduate Studies.

Nondegree-seeking applicants will receive notice of acceptance to the university and registration information from the UCF College of Graduate Studies. Admission as a nondegree student does not constitute admission to a graduate program or graduate certificate program.

Readmission to the University

A regularly admitted student who has not been registered for three consecutive semesters must apply for readmission to the same graduate program through the UCF College of Graduate Studies. Readmission is also required if a student has been previously dismissed from a graduate program and wishes to gain entrance back into that same program. Students seeking readmission must complete the online application along with all application requirements. An application processing fee is required. Please refer to the Graduate Programs section to ensure that you have not missed the deadline for your program. Readmissions are not guaranteed.

- U.S. Citizens and Resident Aliens
- International Students
- Information for All Applicants
- Residency
U.S. Citizens and Resident Aliens

The application for admission to a graduate program is submitted electronically through the online application. The College of Optics and Photonics require that you fill out their preapplication form before completing the online application for graduate admission. The College of Engineering and Computer Science encourages prospective students to pre-apply before completing the online application for graduate admission.

- College of Engineering and Computer Science pre-application: www.graduate.cecs.ucf.edu
- College of Optics and Photonics pre-application: http://www.creol.ucf.edu/Academics/Prospective/PreApplication.aspx

U.S. citizens and resident aliens in the United States must submit the following application requirements directly to the UCF College of Graduate Studies:

- Graduate Online Application for Admission (electronically signed and submitted by the applicant).
- Residency Classification form (submit with online application).
- A $30 nonrefundable application fee is required of all applicants for each application submitted.
- One official transcript (in a sealed envelope) from each college/university attended.
  - For UCF students applying to UCF graduate programs: You do not need to request transcripts of your UCF course work. The UCF College of Graduate Studies will request those transcripts internally.
- Graduate Record Examination scores (GRE) or General Management Admission Test (GMAT) scores for doctoral applicants and for those applying to master's programs that require an admissions test. These scores must be sent directly to UCF by the appropriate testing agency.
- Test of English as a Foreign Language (TOEFL) scores sent directly to UCF, if an applicant is from a country where English is not the only official language, or when an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will also accept International English Language Testing System (IELTS) scores.
- Recommendations, if required by the graduate program (complete this section of the online application).
- Resume, essay, or other materials if required by the graduate program (must be submitted as part of the online application).
- Immunization Form*.

Some graduate programs may require interviews, portfolios, or other material. Official application requirements (or duplicate copies) should not be submitted directly to the graduate programs as it will delay the processing of the application. All official application requirements, with the exception of test scores and transcripts must be submitted online. The UCF College of Graduate Studies must receive the application and all application requirements by the stated application deadline.

*To expedite processing of materials, download and print the Immunization Form from the online application. Send the completed form to the address specified on the form. This form is not used in making an admission decision. However, you will not be allowed to enroll at UCF without submitting the Immunization Form. Please visit the UCF Health Services website for additional information regarding this required form.

Nondegree-seeking Students

If you are interested in taking graduate courses at UCF for personal or professional enhancement or to prepare for possible admission to a graduate program, you may enroll as a nondegree-seeking student. An online application must be submitted.

Nondegree-seeking students must submit the following application requirements directly to the UCF College of Graduate Studies:

- Graduate Online Application for Admission (electronically signed and submitted by the applicant).
- Residency Classification form (submit with online application).
- A $30 non-refundable application fee is required of all applicants for each application submitted.
- One official transcript (in a sealed envelope) showing an earned bachelor's degree from a regionally accredited institution.
  - For UCF students applying as nondegree-seeking: You do not need to request transcripts of your UCF course work. The UCF College of Graduate Studies will request those transcripts internally.
- Immunization Form*
The UCF College of Graduate Studies must receive the online application and all application requirements electronically (with the exception of transcripts) by the stated application deadline.

Please note that nondegree admission or admission to a graduate certificate program at UCF does not guarantee admission to graduate status in a degree program. International students are not eligible for nondegree status unless they hold an eligible visa. International students taking online courses from their home country are eligible to be nondegree-seeking since they do not require a visa.

Not all graduate degree programs accept nondegree-seeking students. Please contact the program director for the graduate program you wish to take classes in before beginning the online application process to verify if the program accepts nondegree-seeking students and if specific enrollment instructions apply for graduate-level courses.

In general, nondegree-seeking students are not eligible for financial aid, assistantships, fellowships, or tuition support, although it is best to check with the Office of Student Financial Assistance for specific details. Nondegree-seeking students must be enrolled in 12 credit hours or more to be considered in full-time status.

*To expedite processing of materials, download and print the Immunization Form from the online application. Send the completed form to the address specified on the form. This form is not used in making an admission decision. However, you will not be allowed to enroll at UCF without submitting the Immunization Form. Please visit the UCF Health Services website for additional information regarding this required form.

Transient Students

Students attending UCF for a term from another institution where they are receiving their graduate degree are classified as transient students. Transient students can apply online as a Nondegree-seeking student. An online application must be submitted.

Application requirements for transient students are:

- Graduate Online Application for Admission (electronically signed and submitted by the applicant; select "Nondegree (General)").
- A $30 non-refundable application fee is required of all applicants for each application submitted.
- Residency Classification form (submit with online application).
- An official transcript (in a sealed envelope) showing an earned bachelor's degree from a regionally accredited institution OR a letter from your home institution stating that you are in good academic standing and that the institution will accept the transfer of the hours.
- Immunization Form*

*To expedite processing of materials, download and print the Immunization Form from the online application. Send the completed form to the address specified on the form. This form is not used in making an admission decision. However, you will not be allowed to enroll at UCF without submitting the Immunization Form. Please visit the UCF Health Services website for additional information regarding this required form.

Certificate Students

If you are interested in taking graduate courses at UCF in a specialized or interdisciplinary area, you may enroll in one of our many graduate certificate programs. In order to apply to a certificate program, complete the online application.

Application requirements for certificate students are:

- Graduate Online Application for Admission (electronically signed and submitted by the applicant).
- A $30 non-refundable application fee is required of all applicants for each application submitted.
- Residency Classification form (submit with online application).
- One official transcript (in a sealed envelope) showing an earned bachelor's degree from a regionally accredited institution.
- For UCF students applying for a certificate: You do not need to request transcripts of your UCF course work. The UCF College of Graduate Studies will request those transcripts internally.
- Immunization Form*

*To expedite processing of materials, download and print the Immunization Form from the online application. Send the completed form to the address specified on the form. This form is not used in making an admission decision. However, you will not be allowed to enroll at UCF without submitting the Immunization Form. Please visit the UCF Health Services website for additional information regarding this required form.

If you are a regular graduate student in a graduate degree program and wish to supplement your degree with a graduate certificate, you may do so by completing the online application indicating the graduate certificate program you are interested in. In order to complete a graduate certificate program, a student must apply and be admitted to a specific graduate certificate program. International students on an F-1 visa may not be accepted solely into a certificate program unless they are
concurrently enrolled in a graduate degree program, in the English Language Institute at UCF or are attending UCF as a transient student and hold an I-20 from an approved institution.

Students who choose to pursue both a degree and a professional graduate certificate must sustain normal academic progress toward the degree program.

*To expedite processing of materials, download and print the Immunization Form from the online application. Send the completed form to the address specified on the form. This form is not used in making an admission decision. However, you will not be allowed to enroll at UCF without submitting the Immunization Form. Please visit the UCF Health Services website for additional information regarding this required form.

**International Students**

The application for admission to a graduate program is submitted electronically through the online application. The College of Optics and Photonics require that you fill out their preapplication form before completing the online application for graduate admission. The College of Engineering and Computer Science encourages prospective students to pre-apply before completing the online application for graduate admission.

- College of Engineering and Computer Science pre-application: www.graduate.cecs.ucf.edu
- College of Optics and Photonics pre-application: www.creol.ucf.edu/Academics/Prospective/PreApplication.aspx

If you are not a U.S. citizen or resident alien, you must submit the following application requirements directly to the UCF College of Graduate Studies:

Graduate Online Application for Admission (electronically signed and submitted by the applicant by the stated application deadline).

- A $30 non-refundable application fee, paid as a check or money order in U.S. currency drawn on a U.S. bank and made payable to the University of Central Florida, is required of all applicants for each application submitted.
- One official transcript (in a sealed envelope) showing a bachelor's degree earned at a regionally accredited U.S. institution or from a recognized foreign institution, accompanied by an official certification of degree, with date awarded. If a student has attended more than one college or university, separate transcripts must be submitted.
- Residency Classification form (submit with online application)
- The university conducts a complete assessment of all required credential documents (official transcript(s) and official certification of degree) submitted by the student, including the record of all academic coursework. Excluding the Physical Therapy DPT program, all master's programs not requiring a standardized admissions test (i.e. GRE, GMAT), and those master's programs in the College of Business Administration and the Rosen College of Hospitality Management, the university will evaluate all credentials for international students who have received their degree at a college or university outside of the United States. Additional information is available in the Transcripts Evaluation section on this webpage.
- Graduate Record Examination scores (GRE) or General Management Admission Test (GMAT) scores for doctoral applicants and for those applying to master's programs that require an admissions test. These scores must be sent directly to UCF by the testing agency.
- Test of English as a Foreign Language (TOEFL) scores sent directly to UCF, if an applicant is from a country where English is not the only official language, or when an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will also accept International English Language Testing System (IELTS) scores.
- Financial Statement with a letter indicating commitment (from your parents, government, or others) to financially support your education.
- Recommendations, if required by the graduate program (complete this section of the online application).
- Resume, essay, or other material, if required by the graduate program (must be submitted as part of the online application).
- Immunization Form*

Some graduate programs may require interviews, portfolios, or other materials. Official application requirements (or duplicate copies) should not be submitted directly to the graduate programs as it will delay the processing of the application. All official application requirements, with the exception of test scores and transcripts, must be submitted online. The UCF College of Graduate Studies must receive the application and all application requirements by the stated application deadline.

*To expedite processing of materials, download and print the Immunization Form from the online application. Send the
completed form to the address specified on the form. This form is not used in making an admission decision. However, you will not be allowed to enroll at UCF without submitting the Immunization Form. Please visit the UCF Health Services website for additional information regarding this required form.

International Student Admissions Policies

UCF adheres to the principle that the university is primarily a community of scholars, both national and international, in pursuit of knowledge, and active in teaching, studying, and doing research. The presence of international students on the campus contributes substantially to the quality of the educational experience for everyone. It can bring to the classroom learning environment unique viewpoints and perceptions that would otherwise be lost. Effective personal contact across cultures can reduce errors in understanding one another's problems and foster a climate of international peace and cooperation among people of the world today.

To expedite the application process, international applicants should submit all documents (application, test scores, letters of recommendation, transcripts, etc.) under the same name, preferably the name as it is listed on the official passport. Upon receiving an application, the UCF College of Graduate Studies assigns a student identification number (for example, 828-XX-XXXX). This number should be included whenever possible in all correspondence. International students are not eligible for nondegree/certificate status unless they hold an eligible visa.

Additional information regarding immigration processes and transition to the UCF community is available from UCF Global. It is to be noted that due to federal regulations around international student visas 8 CFR 214.3(k), the College of Graduate Studies will only admit international graduate students in a degree program under the Graduate Status—Regular and must meet all relevant admission criteria under this status.

International applicants are encouraged to begin the application process early. Also, international applicants should ensure that all application requirements, including those required to issue an I-20, are received by the stated application deadline. Only official documentation is accepted and it is the student's responsibility to submit all documents by the application deadline.

Official Transcripts

All applicants for graduate admission must provide one official transcript (in a sealed envelope) showing a bachelor's degree earned at a regionally accredited U.S. institution or an internationally recognized institution and an official diploma/degree certificate, with date awarded. If a student has attended more than one college or university, separate transcripts must be submitted for each institution. To be official, transcripts and diploma/degree certificate must bear the original seal or signature of the school's registrar or of the appropriate school official or office. To ensure the timely evaluation of academic credentials, applicants should submit all transcripts, accompanied by diploma/degree certificate, at the time of application and by the stated application deadline.

Transcript Evaluation

Evaluation Policy

The university conducts a complete assessment of all required credential documents (official transcripts and official certification of degrees) submitted by the student, including the record of all academic coursework. Excluding the Physical Therapy DPT program, Communication Sciences and Disorders MA program, all master's programs not requiring a standardized admissions test (i.e. GRE, GMAT), and those master's programs in the College of Business Administration and the Rosen College of Hospitality Management, the university will evaluate all credentials for international students who have received their degree at a college or university outside of the United States. Additional information regarding specific application requirements and credentials processing for the Physical Therapy DPT program, Communication Sciences and Disorders MS program, those master's programs not requiring a standardized admissions test, and for all master's programs in the College of Business Administration and the Rosen College of Hospitality Management is given below.

The university does not consider documents certified by a notary public or commissioner of oaths to be official. Photocopies of certified documents are not acceptable. Coursework completed at one institution but listed on the record of a second institution is not acceptable. A separate copy of the record from the first institution is required.

If these documents are written in a language other than English, a certified translation in English must be provided together with the original language records. Any translated record should be a literal and not an interpretive translation. Acceptable English translations may be provided by sworn court-approved translators, qualified translators working within university
foreign language departments, and from reputable translation agencies. We recommend the services of University Language Services (ULS) and Josef Silny and Associates, Inc. for certified translations.

If a student is missing any documentation or other required information, an evaluator will contact the student by e-mail to request the additional documentation/information. In the case that a student is missing documentation/information, the evaluation process will be placed on hold until the university has received all necessary documentation. All students are advised to submit all required documentation as early as possible so as to not to delay the evaluation process.

In the event that the university receives documentation that is questionable, or suspicious in any way, the university will verify authenticity with the issuing foreign institution. If an institution must be contacted for verification, the evaluation process will be placed on hold until the university has received all necessary information.

Equivalency Information

All international applicants for graduate study at the University of Central Florida must hold a U.S. Bachelor's degree, or its equivalent, from a regionally accredited or governmentally recognized institution of higher learning. This is a minimum requirement for admission to a graduate program at UCF. For a list of some country-specific information on foreign degree equivalents and required documentation, please visit the Sample Country Requirements website.

The following requirements apply to applicants to the Physical Therapy DPT program, the Communication Sciences and Disorders MA program, any master's programs not requiring a standardized admissions test, and master's programs in the College of Business Administration and Rosen College of Hospitality Management:

In addition to official transcripts and certification of degrees, a course-by-course credential evaluation with GPA calculation is required of all students who have attended a college/university outside the United States. Credential evaluations are accepted from Josef Silny and Associates, Inc. or World Education Services (WES) only. All documents required by World Education Services (WES) or Josef Silny and Associates, Inc., must be submitted directly by the applicants. The university is not responsible for forwarding any documents received by our office to Josef Silny and Associates, Inc. or World Education Services (WES).

Resources for International Transcript Evaluations

UCF accepts transcript evaluations from the following two agencies only:

- Josef Silny and Associates, Inc.
- World Education Services, Inc.

Documents Needed to Issue an I-20

Refer to the UCF Global website for information on policies and documents needed to issue an I-20. All documents needed to issue an I-20 must be received by the stated application deadline.

For additional questions about documents required for I-20 issuance, you may contact the UCF Global office by e-mail (INTLadmissions@ucf.edu) or by telephone (407) 823-2337.

International Application Deadlines

Complete applications (including all application requirements) for all graduate programs must be received electronically by the date listed below to be considered for admission for that term. Failure to meet these deadlines may prevent admission as a regular graduate student for the term. Please refer to the Graduate Programs section in this catalog for programs that have earlier deadlines for international applicants.

The following dates are university application deadlines for international students (students from abroad):

Fall admission: January 15
Spring admission: July 1
Summer admission: November 1

The following dates are university application deadlines for international transfer students (transfers from U.S. schools):

Fall admission: March 1
Spring admission: September 1
Summer admission: December 15

In addition, students who wish to be considered for fellowships or assistantships must have a complete application package by January 15 (or the designated Fall Priority date for their program).
Test of English as a Foreign Language

International students, except those who are from countries where English is the only official language, those who have earned a degree from a regionally accredited US college or university, or those who have earned a degree from a country where English is the only official language or a university at which English is the only official language of instruction, are required to submit a score on the Test of English as a Foreign Language (TOEFL) before they can be admitted to the university. Although we prefer the TOEFL, we will also accept International English Language Testing System (IELTS) scores. Students who are non-native speakers of English (and do not have a degree from a U.S. institution) must pass the English Speaking test administered by the UCF English Institute before they will be permitted to teach as a Graduate Teaching Associate or Graduate Teaching Assistant.

A TOEFL computer-based score of 220 or 80 on the internet-based TOEFL (or equivalent score on the paper-based test) or 6.5 on the IELTS is required unless otherwise specified by the program. The list below includes programs that have determined a minimum required TOEFL or IELTS score higher than the university requirement.

International Student Mandatory Health and Accident Insurance

Each international student accepted for admission must, prior to registration, submit proof of compliance with the Board of Education's mandatory health and accident insurance. There are no exceptions made for submitting this proof. Written proof of insurance must be provided to the Student Health Services Center and must be valid at all times. Cancellation of the policy or stoppage of the premium will result in administrative withdrawal from all classes. If an insurance carrier from outside of the United States issues the insurance, a notarized statement, in English, must be provided attesting to meeting the minimum coverage mandated by the state of Florida.

If an insurance carrier from outside of the United States issues the insurance, a notarized statement, in English, must be provided attesting to meeting the minimum coverage mandated by the state of Florida.

For additional information regarding student health insurance, contact the UCF Health Services.

Tax Obligations

The Internal Revenue Service (IRS) is the U.S. government institution that oversees the withholding and filing of taxes. International students are not always exempt from income taxes in the United States. To determine your tax obligations, students should visit the IRS website.

Upon arrival at UCF, international students will be required to apply for a Social Security Number (SSN) or Individual Taxpayer Identification Number (ITIN) and provide this number to the Registrar's Office at UCF. UCF Global will help international students complete the paperwork required for their visa and SSN or ITIN.

International students who will have graduate assistantships will not be allowed to begin work until the department or program submits the valid SSN and assistantship paperwork to UCF Human Resources.

International students who are to receive tuition support or fellowships must provide a valid SSN to the Registrar's Office before payment processing can occur. Those with fellowships must also complete additional paperwork with the UCF Finance and Accounting Office. Deferments for tuition and fellowship
awards will be placed on the student's account, but payment cannot occur until all required paperwork is completed and the valid SSN has been provided to the Registrar's Office.

Employment of International Students

International students must have their I-20 authorized by the International Services Center for any on-campus or off-campus employment. Approved on-campus employment must be validated by presenting all immigration documents and Social Security Number to the UCF Human Resources (HR) Department. International students are not allowed to start employment until they present receipt of Social Security Card application or Social Security Number issued to them by the Social Security Administration.

For detailed information on employment and taxation, visit the websites of UCF Human Resources and UCF Finance and Accounting.

Information for All Applicants

Application Forms

The application for admission to a graduate program is submitted electronically through the online application. A nonrefundable application fee is required of each applicant for each application submitted.

Official Transcripts

To be granted admission to UCF in graduate or nondegree status, all applicants must request official transcripts (in a sealed envelope) from their previous institution showing a baccalaureate degree and their grades in all work attempted while registered as an undergraduate student OR while registered as an upper-division undergraduate student (normally based on the last sixty attempted semester hours). Transcripts must be mailed directly from the previous institution to the UCF College of Graduate Studies.

For UCF students applying to UCF graduate programs: You do not need to request transcripts of your UCF course work. The UCF College of Graduate Studies will produce those transcripts internally.

If grades were transferred from other schools in the last 60 semester hours, official transcripts from those schools also must be obtained and submitted. If applying to Business, Social Work, or Psychology, all transcripts from all colleges attended are required. Final acceptance into degree-seeking graduate status is not granted unless an applicant's official transcripts are on file so that they can be evaluated for admission.

Graduate Examinations

All students who wish to be admitted in regular degree-seeking status to a doctoral program or wish to be considered for university-wide fellowships must submit an official GRE General Test score (or an official GMAT score as required). Some master's level programs may also require the GRE or GMAT for admission. Some graduate programs may also require the GRE subject test before admission into graduate student status.

International students, except those who are from countries where English is the only official language, those who have earned a degree from a regionally accredited US college or university, or those who have earned a degree from a country where English is the only official language or a university at which English is the only official language of instruction, are required to submit a score on the Test of English as a Foreign Language (TOEFL). Although we prefer the TOEFL, we will also accept International English Language Testing System (IELTS) scores.

Official test scores must be electronically forwarded to the UCF College of Graduate Studies directly from the appropriate testing agency. Test scores must be on file by the stated application deadline. UCF recommends that any individual contemplating class work beyond the bachelor's degree take the GRE or GMAT at the earliest possible date to avoid problems associated with a delay of acceptance into a graduate program. Test scores are usually available in four to six weeks.

Registration Information and Resources:

- **GMAT Services** -- 1-800-GMAT-NOW | www.mba.com/us | UCF Institution Code: RZT-HT-58
- **GRE Services** -- 1-800-GRE-CALL | www.ets.org | UCF Institution Code: 5233
- **TOEFL Services** -- 1-800-GO-TOEFL | www.ets.org | UCF Institution Code: 5233
- **IELTS Services** -- 1-626-564-2954 | www.ielts.org
Preparatory courses are offered through UCF's Division of Continuing Education -- (407) 882-0260 | www.ce.ucf.edu

Pearson Vue and the Educational Testing Service's policy are to report scores only until September 30 following the fifth anniversary of the test date. In other words, test scores are only valid for five years. If ETS/Pearson Vue cannot provide an official copy, students will need to repeat the GRE or GMAT and have an official score reported to the UCF College of Graduate Studies. Test of English as a Foreign Language (TOEFL) scores are only valid from ETS for two years.

Medical History Report

All new students must furnish medical history reports on the approved university Immunization Form before registration will be allowed. The Immunization Form is available from the UCF Health Services. This form should be completed and mailed to the address on the form. Immunizations and diagnostic procedures may be required of students by the university prior to any registration. University requirements for vaccinations or immunizations may be waived upon receipt of appropriate documentation from the student that the waiver is requested on the basis of religious grounds or on the recommendation of a university physician.

Where physician examinations or certificates are required, they must be signed by a doctor of medicine or by a doctor of osteopathy. The university reserves the right to refuse registration to any student whose health record or report of medical examination indicates the existence of a condition that may be harmful to members of the university community.

Validity of Application Requirements

If the university finds that an applicant has made a false or fraudulent statement or a deliberate omission on the application, residency affidavit, health report, or any accompanying document or statement, that applicant will be denied admission. If the student is enrolled when such fraud is discovered, the student may be immediately withdrawn (with no refund), denied further enrollment, and invalidated on credit and any degree based on such credit. International students may face deportation. Actions for this type of offense are handled administratively by the Division of Student Development and Enrollment Services after notification to the alleged violator and hearing by that office.

Deadline for Application Requirements

If the graduate program has a specific deadline, the application and all application requirements must be received electronically by that deadline (see the Graduate Programs section in this catalog). For all other programs and nondegree applicants, the application and all application requirements should be received by the UCF College of Graduate Studies no later than July 15 for fall admission, December 1 for spring admission, or April 15 for summer admission. For international applicants, all application requirements should be received by the UCF College of Graduate Studies and all documents required to issue an I-20 be received by the International Service Center no later than January 15 for fall admission, July 1 for spring admission, and November 1 for summer admission. In some cases, applicants may be allowed to register on a temporary basis (without all application requirements), assuming it can be determined from available records or consultation with the students that they appear admissible. Failure to submit records by mid-term of the first semester will result in registration holds for all succeeding terms. Transcripts should be sealed in an envelope by the registrar of the former institution and mailed directly to the UCF College of Graduate Studies.

Professional Credentialing or Licensure

If you intend to pursue professional licensure or other credentialing in your state or elsewhere, we advise you to contact the applicable state credentialing authority to familiarize yourself with its specific requirements and determine if your selected UCF program of study meets its academic criteria. You are welcome to contact a UCF program advisor with questions in this regard and we will do our best to assist you in your career planning.

Change of Major

When students wish to change their major or college, after having applied and/or been admitted to a graduate program, they must file a new online application and submit all application requirements for their intended new program at the UCF College of Graduate Studies. A new application processing fee is required. The program director of the new graduate program will then review the student's application file and make an admission recommendation.
Second Master's Degree

Individuals seeking a second master's degree must file a separate online application and application fee for that graduate program and complete the normal UCF master's degree application requirements for the second degree.

Up to nine semester hours from a completed master's program at UCF or any other institution may be transferred into a second master's program if the courses are not more than seven years old when the second degree is completed.

Applicants are not permitted to apply to a second master's degree program if they have previously earned the same master's degree from UCF regardless of any difference in track selection. Questions concerning this should be directed to gradadmissions@ucf.edu.

Admission Decisions

After receiving all official transcripts, standardized test information, and other documents required by the program, the graduate program director will make an admission recommendation. Admission to graduate status can be in any one of the following categories: regular, conditional, provisional, provisional/restricted, provisional/conditional, restricted, or restricted/conditional status.

Final admission to a graduate program is granted by the UCF College of Graduate Studies. Admission is only valid for the term in which the student is admitted. If the student does not enroll in their first term of admission, their admission will be revoked and they will need to reapply to a future term.

Admission Classifications

Graduate Status—Regular

All students who wish to be admitted in regular degree-seeking status or nondegree-seeking status must submit a final, official transcript from a regionally accredited US institution or its equivalent from a foreign institution. All students who wish to be admitted in regular degree-seeking status to a doctoral program or wish to be considered for university-wide fellowships must also submit an official GRE General Test score or an official GMAT score as required. The minimum university application requirements for admission to regular graduate status are listed below. Individual graduate programs may specify additional application requirements.

- A bachelor's degree from a regionally accredited U.S. institution or its equivalent from a foreign institution and a GPA of 3.0 or more (on a 4.0 maximum) in all work attempted while registered as an undergraduate student OR while registered as an upper-division undergraduate student (normally based on the last sixty attempted semester hours); OR, a graduate degree or professional degree or equivalent from a regionally accredited U.S. institution or its equivalent from a foreign institution in a field related to the discipline of the program to which the student is applying.
- Students applying to doctoral programs must submit a competitive score on the General Test of the Graduate Record Examination or a competitive score on the Graduate Management Admission Test (as required) or an equivalent score on an equivalent measure approved by the graduate program and the university.
- Students applying to doctoral programs must also submit three letters of recommendation, a resume or curriculum vita, and a written essay.
- A student must be accepted by the program director offering the particular degree program sought and the UCF College of Graduate Studies. Graduate programs are encouraged to have more restrictive application requirements than the minimum university application requirements. Graduate program requirements may be based on other factors such as work experience, research interests of the prospective student, evidence of extracurricular or community work, personal interviews, or other factors specified by the program.
- International students must demonstrate their proficiency in the English language. International students, except those who are from countries where English is the only official language, those who have earned a degree from a regionally accredited US college or university, or those who have earned a degree from a country where English is the only official language or a university at which English is the only official language of instruction, are required to submit a score on the Test of English as a Foreign Language (TOEFL) and achieve a score on the computer-based test of 220 or 80 on the internet-based TOEFL (or equivalent score on the paper-based test) or IELTS before they can be admitted to the university. Although we prefer the TOEFL, we will accept IELTS scores of 6.5 or higher unless otherwise specified by the program.
- International students applying to master's programs that do not require a GRE or GMAT, must submit a course-by-course evaluation with GPA calculation of their official transcripts from a credential evaluation service recommended by UCF. This course-by-course
evaluation must show a GPA that is equivalent to a 3.0 from an earned degree that is equivalent to a U.S. bachelor's degree.

- It is to be noted that due to federal regulations around international student visas 8 CFR 214.3(k), the College of Graduate Studies will only admit international graduate students in a degree program under the Graduate Status – Regular and must meet all relevant admission criteria under this status.

**Graduate Status—Conditional**

A student who meets the minimum university application requirements for regular admission (as listed above) but has not submitted all required documents may be admitted conditionally upon recommendation of the program director to which admission is sought and the UCF College of Graduate Studies. Conditions must be met by mid-term of the first semester. Registration will only be available for the term the student has been admitted. Future term enrollment will be open once the conditions are met. At that time, the student will be changed to regular graduate status.

**Graduate Status—Restricted**

Even though minimum university application requirements are met, a graduate program may attach restrictions to the admission of an applicant, such as higher GPA requirements, completing a standardized test, completing certain prerequisite courses, maintaining a certain GPA in the first few hours of a graduate program, etc. Students may be denied admission to regular graduate status if the restrictions are not met. The student also has not submitted all application requirements for admission. All application requirements for admission must be submitted by mid-term of the first semester. Registration will only be available for the term the student has been admitted. Future term enrollment will be open once the conditions are met.

**Graduate Status—Provisional**

A student who does not fulfill the minimum university application requirements for regular admission (as listed above) may be admitted provisionally upon recommendation of the program director to which admission is sought and the UCF College of Graduate Studies.

**Graduate Status—Restricted/Conditional**

Even though minimum university application requirements are met, a program may attach restrictions to the admission of an applicant, such as higher GPA requirements, completing a standardized test, completing certain prerequisite courses, maintaining a certain GPA in the first few hours of a graduate program, etc. Students may be denied admission to regular graduate status if the restrictions are not met. The student also has not submitted all application requirements for admission. All application requirements for admission must be submitted by mid-term of the first semester. Registration will only be available for the term the student has been admitted. Future term enrollment will be open once the conditions are met.

**Graduate Status—Provisional/Restricted**

A student who does not fulfill the minimum university application requirements for regular admission (as listed above) and has not met the graduate program's specific requirements may be admitted in provisional/restricted status upon recommendation of the program director to which admission is sought and the UCF College of Graduate Studies. A graduate program may attach restrictions to the admission of an applicant, such as higher GPA requirements, completing a standardized test, completing certain prerequisite courses, maintaining a certain GPA in the first few hours of a graduate program, etc.

Provisional/restricted students may be admitted to regular status following satisfactory completion of nine semester hours, in the graduate program and upon recommendation by the program director and Vice Provost and Dean of the UCF College of Graduate Studies AND satisfactory completion of the graduate program's restrictions. Students may be denied admission to regular graduate status if the graduate program's restrictions are not met.
Graduate Status—
Provisional/Conditional

A student who does not fulfill the minimum university application requirements for regular admission (as listed above) and has not submitted all required documents for admission may be admitted in provisional/conditional status upon the recommendation of the program director to which admission is sought and the UCF College of Graduate Studies.

Provisional/conditional students may be admitted to regular status following satisfactory completion of nine semester hours, in the graduate program and upon recommendation by the program director and Vice Provost and Dean of the College of Graduate Studies AND the submission of all application requirements for admission. All application requirements for admission must be submitted by mid-term of the first semester. Registration will only be available for the term the student has been admitted. Future term enrollment will be open once the conditions are met.

Nondegree-seeking Status

Students are generally placed in this category at their request. International students are not eligible for nondegree status unless they hold an eligible visa status. A student may elect to remain in nondegree status for various reasons (e.g., requirements in a graduate program at another institution, personal improvement, meeting job requirements, and removing academic deficiencies).

While in nondegree-seeking status, students are allowed to take graduate courses, in some departments, on a space-available basis. Nondegree students may also enroll in specific graduate certificate programs. Not all departments accept nondegree students and the procedures for enrollment into graduate-level classes vary with each department. **Students should check with the individual departments or colleges before submitting an application and attempting to register.**

In general, Nondegree-seeking students are not eligible for financial aid, assistantships, fellowships, or tuition support, although it is best to check with the Office of Student Financial Assistance for specific details.

Graduate Certificate Status

Nondegree-seeking students or regular graduate students in a graduate degree program may enroll in one of UCF’s graduate certificate programs. In all cases, certificate students must have earned a baccalaureate or higher degree, or equivalent, from a regionally accredited university. Unless they are also enrolled in a regular degree program, graduate certificate students are treated as nondegree seeking students. Students who pursue both a degree and a professional certificate must sustain normal academic progress toward the degree program. International students on an F-1 visa are not accepted solely into a certificate program unless they are concurrently enrolled in a graduate degree program, in the Intensive English Language Program at UCF or are attending UCF as a transient student and hold an I-20 from an approved institution.

Nondegree to Regular Graduate Status

Nondegree students wishing to apply to a graduate degree program must file a new online application and application fee for that degree program. The new online application and all application requirements must be submitted by the stated application deadline for the graduate degree program. Students who have been admitted in provisional status in a graduate degree program must file a new application if they wish to be accepted by a graduate degree program different from the program to which they were provisionally admitted.

Appeals

According to state and university regulations, students who are not accepted by a program but who meet the University minimum standards for admission to graduate status are permitted to appeal that decision. The appeal procedure consists of the student writing a letter within thirty days of the date of denial to the program director indicating the desire to appeal and the reasons for the appeal. The program director may ask the department or program graduate committee to examine the necessary information and recommend a response to the appeal. The program director will recommend an admission action to the department chair.

Should the department chair deny the appeal, and there are new circumstances, facts, or other matters that the student feels warrants consideration, the student may request further consideration from the graduate college by writing a letter to the Vice Provost and Dean of the UCF College of Graduate Studies indicating the desire to appeal further and the reasons why an appeal is sought. The Vice Provost and Dean of the UCF Graduate College may ask the Graduate Council to examine the necessary information and recommend a response to the appeal. The decision of the Vice Provost and Dean of the UCF College of Graduate Studies is final.
Residency

For information about Florida Residency for Tuition Purposes and Residency Reclassification, see the Cost section of the Graduate Admissions page.

Registration

Overview

UCF’s registration system allows students to enroll for the entire upcoming academic year (3 semesters). This improves a student's ability to plan for upcoming terms and allows students more opportunity to make any necessary adjustments to registration. It is important for students to register for courses they plan to complete and fulfill requirements within their degree plan. Students are not required to register for all three terms during their initial appointment but the upcoming academic year will be available. For additional information regarding Multiple Term Registration (MTR), please visit the Registrar's Office webpage.

During each academic semester, registration is held for all new, currently enrolled, degree-seeking, and nondegree-seeking students for the following term. Registration sessions consist of Registration and Late Registration (held during the first week of classes each term).

Multiple term registration begins following mid-term of the spring semester for the following summer, fall, and spring terms. Class listings are available only online through the Class Schedule Search at my.ucf.edu. The dates and times for each registration period are included in the Academic Calendar.

Note: Newly admitted students (degree or nondegree) must register for classes in their first term in order to become and remain active. New students that do not enroll in classes in their first term will have their file inactivated and all future registration dropped. Once their file is inactivated, they will need to re-apply by completing a new online application and submitting a new application processing fee.

Please note that the last day to Drop classes is now one day before the last day to Add classes. Please visit the Registration page on the Graduate Students website for more information on registration and related topics.

Online Registration

Registration is available over the web using the myUCF system at my.ucf.edu and in the college advising offices.

UCF NID (Network Identification Number)

Students obtain the UCF NID Number on their first login to myUCF at my.ucf.edu. The initial login will use a default
password. Following instructions, students choose a new password and reminder clue.

**Web Enrollment Guide**

The *Web Enrollment Guide* is published online once a year by the Registrar's Office. The *Web Enrollment Guide* provides the official "Academic Calendar" and describes the policies and procedures governing registration each term. The *Web Enrollment Guide* is available on the Registrar's Office website.

**Immunization Form**

All new first-term graduate students must have an Immunization Form completed before they are allowed to register at UCF. Holds placed on registration will be removed by the UCF Health Services once the Immunization Form is received. Forms may be obtained on the UCF Health Services website.

**Continuing Graduate Students**

Continuing graduate students register through myUCF after their assigned appointment day and time, which can be found in myUCF. All continuing students should register early. For graduate students with fellowships or assistantships, failure to register early may result in delays in receiving assistantship paychecks and sometimes result in the loss of tuition waivers. Continuing graduate students registering for internship, independent study, thesis or dissertation hours, or research report hours must fill out a Registration Agreement form obtained from their adviser or department office. The college graduate office will normally register students into these courses.

**Enrollment of International Students**

International students are required to seek advisement from UCF Global to ensure that their enrollment status meets full-time status in compliance with USCIS regulations. Students must obtain advisement from UCF Global before dropping or withdrawing from courses that would affect their enrollment status.

**Nondegree-seeking Students**

Before registering, all nondegree-seeking students should check with the departments where they want to take courses in to learn what is required for registration by that department. Certain classes are restricted, and it is best to find this out first. In the College of Education, nondegree-seeking students can ONLY register for 5000- and 6000-level classes. In the College of Business Administration, nondegree-seeking students cannot register for graduate courses. The College of Engineering and Computer Science will only allow nondegree-seeking students to register with special approval from the program director. Nondegree-seeking students who want to register for College of Arts and Humanities, College of Health and Public Affairs, College of Optics and Photonics, College of Sciences or Rosen College of Hospitality Management courses should check with the individual graduate programs for more detailed information.

Nondegree-seeking students must be registered for 12 hours to be considered full-time. Nondegree-seeking students who already have certification elsewhere (i.e., from a College of Education in another state) are not eligible to receive financial aid. In general, nondegree-seeking students are not eligible for financial aid, assistantships, fellowships, or tuition support, although it is best to check with the Office of Student Financial Assistance for specific details.

**Holds**

A hold (negative service indicator) may be placed on a student's records, transcripts, grades, diplomas or registration due to financial or other obligations to the University. Satisfaction and clearance of the hold is required before a release can be given. Students may check for holds on the myUCF system at my.ucf.edu. To obtain an immediate release for Student Accounts financial holds, you may make your credit card or e-check payment online from your student account. After making a successful payment, contact Student Account Services with the remit ID to confirm your payment and have your hold released.

To release UCF College of Graduate Studies holds, the students must provide the outstanding application requirement(s) to complete their records.

**Audit Registration**

Audit students are those who desire to attend class(es) without receiving academic credit. Regular tuition and fees are assessed
for audit registration. See "Tuition and Fees" for more information about the cost of auditing classes at UCF. Audit registration is on a space-available basis at the assigned time of Registration or at any time during Late Registration and Add/Drop when Late Registration fees will apply. Audit requests for students who register prior to this time will be denied. Students may not change to audit status after Late Registration and Add/Drop, but must remain in the course or withdraw through normal withdrawal procedures. New students must be accepted for admission. Audit forms, available on the Registrar's Office website and in the Registrar's and college advising offices, must be signed by the instructor and presented to the Registrar's Office at the time of registration.

Senior Citizen Audit

Senior citizens (60 years of age or older) who have been residents of the State of Florida for at least one year as of the first day of classes may enroll tuition free as audit students (i.e., no academic credit) on a space-available basis. Forms to be completed include the "Residency Affidavit," the "Student Health History," and the "Senior Citizen Audit Application" and "Senior Citizen Audit Registration Form." These forms are available in the Registrar's Office (Millican Hall 161) or at the Registrar's Office website. It is necessary to complete the required forms during the last hours of registration as noted in the Academic Calendar. Direct student expenses after the completion of registration include the campus ID card, vehicle registration, and textbooks.

State Employee Registration

State of Florida employee enrollment into courses for which the employee will seek a tuition waiver will occur on a space-available only basis on the last day of registration each term at the time specified on the Academic Calendar. For waiver eligibility and application information, see the "Tuition Support" section.

Fee Payments

All graduate students must pay their tuition and fees by the published fee payment deadline. If a department or college has not recorded tuition support by then, students must pay all tuition and fees. If a department or college has waived partial tuition and it is recorded, then students must pay the remainder of the tuition owed and all of the fees by the published deadline. It is important for graduate students to register early to provide the department or college enough time to record tuition support. Please visit the Student Accounts Information website for details on fee invoice and payment procedures.

Residency

For information about Florida Residency for Tuition Purposes and Residency Reclassification, visit the Cost page on the Graduate website.

Fee Invoices

The "Fee Invoice" is your verification of registration. You are not assured of being registered for any class until you print out your Fee Invoice/Schedule. Your fee invoice lists your fees and the classes in which you are registered. Please print a new invoice if you drop or add classes so that the invoice will reflect changes in your fees. Newly admitted students should review their Fee Invoice carefully. If a "non-resident" rate is added to your bill and you believe this is in error, please contact the UCF College of Graduate Studies as soon as possible. For information on Florida Residency for Tuition Purposes please visit the "Financial Information" section of this catalog. If you wish to pay your fees by credit card, press the "ePay fees" button, which will take you to the UCF online credit card payment system. Be sure to have your current address on file (see "Address and E-mail Changes," below).

You may print your "Fee Invoice" through myUCF at my.ucf.edu under the Student Accounts menu or at UCF Kiosks.
Mandatory Health Information

In order for a student to register, the State University System of Florida requires:

- All students born AFTER 1956 to present documented proof of immunity to measles (rubeola).
- All students UNDER the age of 40 to present documented proof of immunity to rubella (German measles).
- All students (REGARDLESS OF AGE) to submit a signed medical history form. Distance learning students who will never come to UCF or an area campus are only required to submit the medical history form.

Students are not allowed to register without proper health information documentation. Please refer to the Immunization Form for specific details of requirements and acceptable documentation. If you have questions, contact the Immunization Coordinator, UCF Health Services (phone: 407-823-3707; fax: 407-823-3135). Office hours for the UCF Health Services vary. Please visit the UCF Health Services website for additional information.

Name Changes

To change the legal name maintained on the student's official UCF record, the student must submit a completed "Change of Name" form and supporting documentation to the appropriate UCF office. Attach to the form a copy of a legal name change document (e.g., marriage certificate, divorce decree, etc.). Undergraduate students must submit the form to the Registrar's Office (Millican Hall 161). Graduate students must submit the form to the UCF College of Graduate Studies (Millican Hall 230). Current UCF employees and students who have been UCF employees within twelve months of the date the name change is requested must submit the form to the Human Resources Office (12565 Research Parkway). The "Change of Name" form is available from the Registrar's Office website or in Millican Hall 161.

Address and EMail Changes

To communicate in a more expedient manner, UCF uses email as the primary means of notifying students of important university business and information dealing with registration, deadlines, financial assistance, scholarships, tuition and fees, etc., as described in Student Responsibility for University Communication in this catalog.

If the student's address changes, it is the student's responsibility to make the appropriate changes to the address through myUCF at my.ucf.edu or at any of the kiosks located on campus. Address and e-mail changes also can be made by submitting a Change of Address form or by writing the Registrar's Office, P.O. Box 160114, Orlando, FL 32816-0114 or fax to 407-648-5022. Written requests must be signed and the student number provided. Address changes can also be made by writing the UCF College of Graduate Studies, University of Central Florida, P.O. Box 160112, Millican Hall 230, Orlando, FL 32816-0112 or fax to 407-823-6442.

Transcript Requests

For UCF students applying to UCF graduate programs: You do not need to request transcripts of your UCF coursework. The UCF College of Graduate Studies will request those transcripts internally.

Requests for official UCF transcripts are made through the Registrar's Office (in person, by mail, or by fax). "Transcript Request Forms" are also available on the Registrar's Office website. A student's academic record can be released only upon written authorization signed by the student. Telephone and e-mail requests are not accepted. Transcripts cannot be released if the student is on hold due to a financial obligation to the university. Transcript requests must include the student's signature, full name, identification number, and the name and complete address of the person(s) or organizations to whom transcripts are to be sent. If final grades or degree statement are needed, indicate that the transcript request is to be held until all requested data are posted.

A $10 per transcript charge is assessed for each transcript request. Payment for official transcripts is required at the time of the request and may be satisfied by cash, check or money order (made payable to UCF), credit card, or UCF Card. Requests received by mail must be accompanied by a check, money order, or credit card information (i.e., card type, card number, 3-digit Security Number, expiration date, and the name to which the
Cash payments can be accepted only by the Cashier's Office during that office's regular business hours. The UCF Card payment option is available only at the main Orlando campus and must be made in person at the Registrar's Office (MH 161). Mail written requests for transcripts to Registrar's Office, Attn: Transcripts, P.O. Box 160114, Orlando, FL 32816-0114. For fax request information and payment procedures, refer to the Registrar's Office website or call 407-823-3100. Transcripts may be sent electronically to other Florida public institutions. Transcripts not claimed with 30 days of printing will be discarded and must be reordered. A $10 per reordered transcript fee must be submitted with the reorder request. Grades are available from myUCF.

**Enrollment Certifications**

Students may obtain their enrollment online through myUCF. Enrollment certification is free to currently enrolled students. Parents, employers, background checking firms, and other third-party agencies may request enrollment and degree verifications online at http://www.degreecchk.com/. A fee will be assessed for all such requests. UCF has contracted with Credentials, Inc. to provide current enrollment, degree and past attendance verifications online 24 hours a day, seven days a week. Credentials, Inc. Customer Service is available at 1-847-446-1027, ext. 104 between 7:00 a.m. and 7:00 p.m. CST/CDT Monday through Friday.

**Enrollment Status for Fall and Spring Terms**

</tbody>
</table>

* LTHT = Less Than Half Time

**4.5 hours applies only to College of Business Administration credit hours.

For students receiving university fellowships, assistantships, and tuition support, see Full-time Enrollment Requirements in the General Graduate Policies section of this catalog.

All Federal loan recipients must enroll at least half-time for each term that a loan is requested (that is, 4.5+ hours in fall/spring; 3+ hours in summer, regardless of classification). The in-school grace and deferment period of the loan remains as long as the student has enrolled at least halftime. Nondegree-seeking students have different requirements and should contact the Office of Student Financial Assistance for specific information.

Students on family insurance policies that require full-time status must take at least 9 hours per semester in the fall and spring terms (6 hours in the summer term) to be considered full time. Students classified as nondegree-seeking must enroll in at least 12 hours of coursework in order to be considered full time.

**VA Educational Benefits**—For degree and nondegree-seeking students, the VA benefits pay levels for credit hour enrollment are:

** Applies to College of Business Administration credit hours.
Withdrawal Policy and Academic Record Change Requests

Withdrawal for each term begins after "Late Registration and Add/Drop" ends. Students may withdraw from a class and receive the notation of "W" until the date noted in the "Academic Calendar" of the Web Enrollment Guide. A student may withdraw from courses using myUCF at https://my.ucf.edu, or by visiting the Registrar's Office (Millican Hall 161), certain college advising offices, or a Regional Campus records office. Students may withdraw by fax at 407-823-5652. Faxed requests must be received by 5:00 p.m. on the last day to withdraw and must include the student's identification number, the course(s) to be dropped, and the student's signature. Students also may send a written request to the Registrar's Office by mail (to P.O. Box 160114, Orlando, FL 32816-0114). This letter must be time-stamped or postmarked before the published withdrawal deadline and must include the student's identification number, the course(s) to be dropped, and the student's signature. Students seeking to withdraw in person must sign the request and must provide photo identification. The official date of withdrawal is the date the university receives the withdrawal request. Requests received by mail are processed using the postmark as the official date of withdrawal.

Withdrawing from classes may have financial aid, NCAA eligibility, or international Visa consequences. Students should seek appropriate advisement prior to withdrawing from a class.

A student is not automatically withdrawn from a class for not attending, nor can an instructor withdraw a student from a class. Upon request the instructor will provide the student with an assessment of the student's performance in the course prior to the last day of withdrawal.

Withdrawals are not permitted after the deadline except in extraordinary circumstances such as serious medical problems. Unsatisfactory academic performance is not an acceptable reason for withdrawal after the deadline. Graduate students seeking to petition for a late withdrawal should consult the College of Graduate Studies (MH 230). At the time of the request, the College of Graduate Studies will ascertain from the instructor whether the student was passing or failing the course. If the student was passing, a "WP" will be recorded on the student's permanent record; if failing, a "WF" will be entered. Medical and late withdrawals are generally for all courses taken in the semester.

If a medical withdrawal is approved, a "WM" will be recorded for each course. Graduate students who receive a medical withdrawal may be placed on hold until the university can determine that the student is ready to return. If a medical withdrawal is not approved, the request may be approved as a late withdrawal and grades of "WP" or "WF" will be recorded. A grade of "WF" will affect the calculation of the student's grade point average.

Following the close of Late Registration and Add/Drop each term, students withdrawing from courses will incur both grade and fee liability. Graduate students with circumstances determined by the university to be exceptional and beyond their control may apply for a cancellation of enrollment and the elimination of fee liability. Exceptional circumstances include, but are not limited to sickness, death, involuntary call to military service, or administrative errors created by the University. Graduate students must submit a petition and all supporting documentation for a late Drop of courses to the College of Graduate Studies (Millican Hall 230; 407-823-2766) within six months of the end of the semester for which the late Drop is sought.

If a graduate student withdraws from a course while an alleged academically dishonest act is under consideration, and the case is not subsequently resolved in favor of the student, the university reserves the right to assign the appropriate grade for the course.

Financial Support

Graduate students who will be supported on assistantships must contact their program coordinator to see that their employment contract form is filled out and to request tuition support. Paychecks are delayed when these arrangements are not made prior to the beginning of the semester. All graduate students who are receiving fellowships should register as early as possible so that payment arrangements can be made by the UCF College of Graduate Studies.
Student Responsibility to Inform Offices

All graduate students who have financial aid, or who need financial support in order to attend UCF, should be sure to inform all appropriate offices of all changes in financial status. Remember to inform the departmental office, the Office of Student Financial Assistance, and the UCF College of Graduate Studies of all changes related to enrollment, graduate status, or financial support.

Parking

All vehicles parked on campus, including evening students' vehicles, must be registered with the Parking Services Office and display the appropriate permit or decal. Parking Services offers assistance to motorists, including battery jump-starts and unlocking car doors. For more information see the Parking Services Office's website.

Visitor Information Center

To park on campus without a decal, purchase a daily permit at the Visitor Information Center across from the Progress Energy University Welcome Center or from the pay-and-display machines on campus. Daily permits are valid only in student lots. Meters are also available in selected locations.

Policies

The policies in this section of the Graduate Catalog are minimum university-wide standards for graduate programs. The Graduate Programs section in this catalog describes additional requirements for each graduate program, and the individual college and program descriptions in the Colleges and Special Programs section may discuss specific college requirements. Also, student handbooks for each of the graduate programs provide additional policies and procedures that are specific to each graduate program.

- Doctoral Program Policies

General Graduate Policies

Student Responsibility to Keep Informed

It is the student's responsibility to keep informed of all rules, regulations, and procedures required for graduate studies. Graduate program regulations will not be waived or exceptions granted because students plead ignorance of the regulations or claim failure of the adviser to keep them informed.

Student Responsibility for University Communication

Please refer to the General University Policies regarding student responsibility for communication.

University Admission Standards

The university seeks to enroll students of the highest quality. In addition, the university encourages applications from a diverse population and values diversity in our graduate programs.
Admissions recommendations are made by the academic programs on the basis of a wide variety of information submitted as part of the student's application package. Admissions committees consider factors such as students' academic qualifications, research and work experiences, professional goals and skills, match with program objectives and professional qualifications, the number of openings available in the program, and the resources available to support the student. An applicant's character, integrity, and general fitness to practice a particular profession may also be considered in the admission process. Admission is limited and, in most programs, not all qualified students can be admitted. While UCF supports students obtaining multiple UCF degrees at different levels or in different programs, students who have received a degree in a UCF graduate program are not eligible for admission to the same program, even if it has tracks that have substantively different curricula.

In general, graduate admission to the university requires that students must have obtained (prior to the start of the term for which the student is admitted) the equivalent of a baccalaureate degree from a regionally accredited institution or from a recognized foreign institution. Students without the equivalent of a baccalaureate degree from a regionally accredited institution or a recognized foreign institution are not admitted to graduate degree programs, graduate certificate programs, or graduate nondegree status. All applicants for graduate admission must submit official transcripts for all academic work. In addition to the above, all admitted students must submit evidence to document their attainment of the following minimum requirements.

Minimum UCF Requirement

1. This regulation applies to all students admitted to graduate programs.
2. Each admitted student to a graduate degree program or to a postbaccalaureate professional program must meet the following minimum requirements:
   1. Earned a bachelor's degree or equivalent from a regionally accredited U.S. institution or its equivalent from a foreign institution AND
   2. Earned a 3.0 GPA (or equivalent) or better in all work attempted while registered as an undergraduate student working for a baccalaureate degree, OR
   3. Earned a 3.0 GPA (or equivalent) or better in all work attempted while registered as an upper-division student working for a baccalaureate degree, OR
   4. Earned a previous graduate degree or professional degree or equivalent from a regionally accredited U.S. institution or its equivalent from a foreign institution in a field related to the discipline of the program to which the applicant is applying.
3. Additionally, all applicants to doctoral programs must meet the following specific requirements:
   1. Each applicant to a doctoral degree program shall present scores that are acceptable for the program to which the student is applying on the Graduate Record Examination (verbal, quantitative, and writing), or an equivalent measure on the GMAT, whichever is deemed most appropriate to the program. Students, including international students, who already have a graduate degree obtained from a regionally accredited institution in the same or in a related area are not required to take the Graduate Record Examination or GMAT unless it is required by the program.
   2. In addition, doctoral applicants must submit three letters of recommendation, a resume or curriculum vitae, and a written essay.
   3. The submitted materials must be used in the context of a holistic credential review process.
   4. Each doctoral program may determine other requirements for admission, consistent with their mission and purpose. Any additional admissions requirements so imposed by doctoral programs must be published annually in the Graduate Catalog and on the website of the doctoral program; further, such requirements shall be reviewed and updated annually.
   5. These requirements shall not include preferences in the admissions process for applicants on the basis of any category protected by law.
4. Additionally, all applicants to master's programs must meet the following specific requirements:
   1. A score on standardized exams such as the GRE or GMAT is not required by the university for admission to a master's degree program, although individual programs may still require the exams for admissions purposes.
   2. Each master's program may determine other requirements for admission, consistent with their mission and purpose. Any additional admissions requirements so imposed by master's programs must be published annually in the Graduate Catalog and on the website of the master's program; further,
such requirements shall be reviewed and updated annually.

3. These requirements shall not include preferences in the admissions process for applicants on the basis of any category protected by law.

4. For international students in master's programs that do not require a GRE or GMAT, a course-by-course evaluation of the student's official transcript must be submitted by a credential evaluation service recommended by UCF that shows a GPA equivalent from an earned degree equivalent to a U.S. bachelor's degree.

5. In addition to the above requirements, international students must show proficiency in written and spoken English by
   1. proving they are from a country where English is the only official language; or
   2. establishing that a prior bachelor's, master's or doctoral degree was earned from a regionally accredited college or university in the United States; or
   3. establishing that a prior bachelor's, master's or doctoral degree was earned from a country where English is the only official language or a university at which English is the only official language of instruction; or
   4. submitting a qualifying score on the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Qualifying scores are a TOEFL computer-based score of 220; a TOEFL internet-based score of 80 (or equivalent score on the paper-based test); or an IELTS score of 6.5. Specific programs may establish higher scores for qualification, and such information must be included in the Graduate Catalog and program website information for that specific program.

6. Exceptions to the above requirements:
   1. In any academic term, up to 20 percent of the graduate students may be admitted in a given degree program as exceptions to the minimum requirements for graduate admissions as defined in (2).
   2. Students who do not meet the admissions criteria and who wish to enroll in courses but not degree programs at the postbaccalaureate level may enroll under the classification of nondegree-seeking students. Graduate programs wishing to admit these students to graduate degree programs after the students have satisfactorily completed up to nine hours of graduate coursework may do so provided that the number so admitted is included as part of the 20 percent exception, as defined in paragraph 6(a) above.
   3. It is noted that due to federal regulations around international student visas 8 CFR 214.3(k), the College of Graduate Studies will only admit international graduate students in a degree program under the Graduate Status-Regular and must meet all relevant admission criteria under this status.

7. Applicants may appeal an admissions decision by following the university admissions appeal procedure. Information regarding this procedure is available in the Admissions section in the Graduate Catalog.

Student Admissions Classifications

Students may be admitted into graduate status in the categories defined below. Classifications within a graduate status may be viewed in the Admissions section of the catalog.

Degree-seeking Students

A degree-seeking student is a student who has been formally admitted into a master's, specialist, or doctoral program.

Graduate Certificate Students

Students who have applied to and been accepted into a graduate certificate program are classified as graduate certificate students. Graduate certificate students who subsequently apply to and are accepted into a graduate degree program may, at the discretion of the program adviser, transfer the credit hours from one earned graduate certificate program into a graduate degree program.
Nondegree Students

Students are classified in nondegree status if they have not applied to and been accepted into a graduate degree or certificate program. Some students in this status are completing application requirements for a graduate program. Courses taken prior to acceptance to a degree program may be used to fulfill degree program requirements as transfer credits only with the approval of the program director. There are strict transfer credit limits – please see the transfer credit policy (link) and consult with the specific program director.

Program of Study

A Program of Study is a listing of coursework agreed to by the student and the degree program specifying course degree requirements. A specific Program of Study, which may vary from student to student, must be formulated jointly by the student and the appropriate committee or adviser in the program area and approved by the college. A Program of Study form can be obtained from the graduate program director. This form should be prepared and signed by the adviser and student, then given to the graduate program director for review and filing in the student's permanent file. It must comply with the student's relevant catalog.

Programs of Study for students seeking a master's or specialist degree should be on file with the College of Graduate Studies by the end of the student's second major term (based on full-time enrollment) and must be on file by the end of the term prior to the term of expected graduation. Programs of Study for students seeking a doctoral degree should be on file with the College of Graduate Studies by the end of the third major term of enrollment (based on full-time enrollment) and must be on file prior to the change to candidacy status.

All graduate programs of study must include independent learning as part of course and other assignments. This may be accomplished by research papers and reports, evidence of reflective learning in individual portfolios, creation of original works, and/or demonstration of integration of knowledge as part of coursework in a capstone course and other requirements for the degree.

The student and his/her advisory committee may make changes in the program of study at any time with approval of the graduate program director. However, once established, the program of study cannot be altered solely due to poor academic performance of the student.

Course Category Definitions

(Please see specific policies under Master's degree and Doctoral degree program requirements for the proper use of hours that can be applied to degrees.)

In an effort to establish a balance among the essential components of graduate degrees, the 2008-2009 Policy Committee of the Graduate Council categorized the wide variety of graduate courses offered at UCF into the three essential components of graduate education: (1) formal course work; (2) research and independent scholarly work; and (3) disciplinary training. While many courses offer a combination of these elements of graduate education, most can be classified as predominantly addressing one of these components. The following definitions were established to help establish a common vocabulary for this categorization.

- **"Courses"** – All enrollment hours with an official class number.
- **Core/Required courses** – Courses that cover a certain body of knowledge that is central to a program of study. These courses must be taken to fulfill degree requirements, and may only be substituted by equivalent coursework.
- **Elective courses** – Courses that cover a certain body of knowledge that is important, but optional for a program of study.

Formal Course Work

- **Formal courses** – Existing UCF courses that involve standard class instruction of a defined body of disciplinary knowledge. These courses involve interactions between a formal course instructor and the students that make up the class and can be traditional, face-to-face courses, web courses, and media-enhanced courses. Such classes include both core/required courses as well as elective courses, seminar courses and independent study courses (XXX 6908), but are distinguished from the various categories of individualized research and scholarly courses.
- **Independent Study (XXX 6908)** – A course of study created outside of the standard-format formal courses offered by the university. Independent Study must have a formally defined core of knowledge to be learned by the student(s). The core of knowledge to be learned by the student(s) must be specified in written
form and approved by the student(s), the instructor, and the program coordinator prior to enrollment in Independent Study.

Research and Scholarly Work

- **Directed Research (XXX 6918, XXX 5917)** – Graduate-level research/scholarly work. Research hours taken at the graduate level. These can include laboratory rotations in addition to standard research and scholarly endeavors directed toward completion of a project.
- **Doctoral Research (XXX 7919)** – Doctoral-level research/scholarly work. Research hours at the doctoral level taken prior to passing candidacy. These can include laboratory rotations, preparation for candidacy exams, or standard research and scholarly endeavors directed toward completion of a project or a dissertation.
- **Doctoral Dissertation (XXX 7980)** – Research or scholarly hours taken after advancement to candidacy and directed toward completion of a dissertation.
- **Thesis (XXX 6971, XXX 6973)** – Research hours directed toward completion of a thesis.
- **Research Report (XXX 6909)**

Satisfactory (S) or unsatisfactory (U) grades are used to reflect student progress in these research and scholarly work courses. Other grades may not be assigned in these courses. Should a student in a given term be given an incomplete (I), then this grade should be changed to an S or U upon completion of the work. Students who do not maintain satisfactory progress in their research, as determined by their thesis or dissertation advisory committee, may be placed on probation or dismissed should unsatisfactory progress continue.

Disciplinary Training

- **Internships (XXX 6946)** – Courses that provide training experiences for students in their discipline. It is not a "formal course," but may be a required element of some programs.
- **Practica and Clinical Practice (XXX 5944 or XXX 6946)**

Graduate programs must select the grading scale for these disciplinary training courses to be either on an A–F or Satisfactory (S)/Unsatisfactory (U) scale, but not both in any one section.

Grade System

The university uses an alphabetic system to identify student grades and other actions regarding student progress or class attendance. This system, with a grade point equivalent per semester hour, is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points Per Semester Hour of Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.75</td>
</tr>
<tr>
<td>B+</td>
<td>3.25</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.75</td>
</tr>
<tr>
<td>C+</td>
<td>2.25</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.75</td>
</tr>
<tr>
<td>D+</td>
<td>1.25</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>D-</td>
<td>0.75</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
<tr>
<td>NC</td>
<td>No Credit*</td>
</tr>
</tbody>
</table>

* Available only in CHM 1032, CHM 2045C, CHS 1440, ENC 1101, ENC 1102, MAC 1105H, MAC 1105, MAC 1114, MAC 1140, MAC 2147, MAC 2233, MAC 2241, MAC 2253, MAC 2281, MAC 2281H, MAC 2311, MAC 2311H, and STA 2014C.

Other Actions

I  Incomplete

N  No grade reported by instructor

R* (followed by grade) Repeated course (Grade Forgiveness)

S  Satisfactory (with credit)/Satisfactory Progress (Research, Thesis, or Dissertation)

T* (followed by grade) Subsequently repeated (no credit)
U Unsatisfactory (no credit)
W Withdrawn
WF Withdrawn Failing
WH Health Form Withdrawal
WM Medical Withdrawal
WP Withdrawn Passing
X Audit (no credit)

* "R" and "T" actions only apply to undergraduates.

The designation of "N" will be temporarily assigned by the Registrar's Office only in the case when a grade has not been submitted by the faculty by the "grades due" deadline. The designator will be replaced by the earned letter grade at the earliest opportunity in the semester that immediately follows. The "N" designator may not be assigned by faculty.

Grade changes other than medical withdrawals will be considered only during the semester immediately following the one in which the grade was assigned, except that grades assigned during the spring semester may be changed during either the following summer term or fall semester. A change in grade must be approved by the dean of the college or school. If an academic action such as dismissal or probation has been taken by the university before a grade change, the action will remain in effect regardless of the grade change. A grade will not be changed after a degree has been conferred.

Course_Requirements

Course Levels of Graduate Work

7000-Level Courses—courses for doctoral students. Master's and nondegree students may enroll in 7000-level courses with permission from the program.

6000-Level Courses—courses for graduate students. Nondegree students should check with their academic adviser before registering for 6000-level courses. Undergraduate registration in 6000-level courses is allowed only in special situations with prior approval by the college. Undergraduate students must be within nine hours of graduation, have a minimum 3.0 GPA, and not register for more than a total of twelve hours in that term. See also the catalog section on Senior Scholars.

5000-Level Courses—courses for graduate students. Nondegree students and seniors may enroll in 5000-level courses with permission from the program.

Zero Credit Courses

Zero credit hour courses, by definition, have no impact on the overall program hours and should not be used to add fundamental discipline content. A zero credit hour course must not exceed the expected time commitment associated with one credit hour, that is, the amount of work "that reasonably approximates not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester ... or the equivalent amount of work over a different amount of time" (SACSCOC Credit Hours Policy Statement). A zero credit hour course can include laboratory work, internships, practica, studio work, and other academic work.

Split-Level Classes

Although generally discouraged, UCF allows departments to offer split-level undergraduate and/or graduate classes. In such cases, two courses approved for different levels of instruction (e.g., a 4000- and 5000-level course) are offered together in the same room, at the same time, and with the same instructor, but under two different course numbers. In limited cases, classes taught in split-level format may comprise undergraduate and graduate level courses. In general, split-level classes are restricted to situations where the enrollment in one of the courses would be insufficient to allow the course to be offered on a stand-alone basis. When such split-level classes are scheduled, the following conditions must be maintained:

- Both the graduate and the undergraduate courses must have been approved previously through the established university process for approving courses so that there are two separate and complete syllabi for each course, and the syllabi clearly demonstrate more advanced subject matter and expectations for the graduate course than the undergraduate course. The graduate course documents submitted for approval must indicate that the course will be offered in a split-level format.
- Graduate split-level classes must only be assigned to faculty members who meet the university-wide minimum qualifications for teaching graduate-level courses.
Courses may not be combined into a split-level class if the course numbers of the two courses are more than one level apart. For example, 4000- and 5000-level courses may be combined into a split-level class; 4000-level courses may not be combined with 6000-level courses.

Students may not take both the undergraduate and graduate levels of a split-level course for credit, except in the case of performance and seminar classes, which can be taken for credit multiple times. Graduate students must take the graduate level of a split-level course for it to count toward fulfilling graduate program requirements.

The graduate and undergraduate courses must have distinct requirements and performance expectations. Graduate students must have course requirements or assignments that require more in-depth analysis and understanding of the topics, provide broader coverage of the content area, demonstrate higher knowledge and skills, and/or show greater independence of thought and application of concepts than what is typically required of undergraduate students. The level and amount of learning by graduate students must be equivalent to what is typically expected in 5000-level or higher courses. The different requirements and expectations must be spelled out clearly in the course syllabi for the respective courses.

Documentation of split-level class offerings must be maintained in the dean's office of the academic college, in expectation of future audits. Copies of both syllabi must be provided to the Undergraduate and Graduate Deans for all classes offered in split-level format.

Language Requirements

Foreign language requirements shall be at the option of the individual departments or appropriate units consistent with their college regulations.

Credit by Examination or Waiver

Students who believe they have mastered the content of a graduate-level course should present a portfolio to the graduate program director documenting the learning experience. If the committee, after examining the portfolio, believes the student has mastered the content presented in a graduate-level course, the student should be allowed to demonstrate that mastery through examination. Examination credit may be used to satisfy program course requirements, but not credit hour requirements.

Correspondence courses are not acceptable toward a graduate program of study; however, credit-bearing extension or continuing education courses may be accepted. The acceptance of courses from unaccredited agencies or institutions threatens the integrity and value of the graduate degrees awarded by UCF. Graduate-level coursework demands the mastery of skills, theories, and concepts at a much higher level than undergraduate-level coursework. Therefore, the university will not allow students to transfer coursework from professional societies, independent agencies, employees, or companies unless they are ACE (American Council on Education) certified.

Full-time Enrollment Requirements

A full-time degree-seeking graduate student must take at least 9 credit hours in the fall and spring semesters. A half-time load is defined as enrolled in at least 4.5 credit hours in fall and spring terms. During the summer term, full-time is 6 credit hours and half-time is 3 credit hours. There are two exceptions to this policy:

1. For master's students pursuing a thesis option, full-time enrollment is defined as 3 hours per semester [including summers, of only thesis hours (XXX 6971)], after completion of all coursework and until successful completion and defense of thesis. Students enrolled in thesis hours simultaneously with coursework hours must be enrolled in a combined nine credit hours to be considered full time for the fall and spring semesters, or six credit hours to be enrolled full time in the summer semester.

2. For doctoral students who have passed the candidacy exam and are registered for doctoral dissertation (XXX 7980) hours only, full-time is 3 hours per semester, including summers, until successful completion and defense of dissertation.

Special Considerations

One exception to this policy is for students pursuing the Clinical Psychology PhD program that requires a 12-month, full-time pre-doctoral internship (CLP 6949) in which registration for one hour per semester (for a total of three semesters) is also defined as full-time.
All international students on F or J visas must maintain full-time, degree-seeking status regardless of financial support received from the university. F and J visa holders should contact the UCF Global to ensure that their enrollment conforms to the full-time definition for their visa status. International students should not change their course schedule or drop classes without advisement from the UCF Global. All international students who enroll in less than 9 hours per term must submit to UCF Global a Reduced Course Load Form that explains the nature of the reduced hours and must obtain approval from UCF Global (see www.intl.ucf.edu for Reduced Course Load Form). This requirement also applies to international students who are enrolled in less than 9 hours per term in thesis or dissertation hours.

Students who receive financial support from outside UCF and who have loan obligations are responsible for enrolling in the number of credit hours that meet the full-time or half-time criteria specified by the funding source. Enrollment certification is provided by the Registrar's Office based upon the UCF definition of full-time graduate status.

Students who do not satisfy these full-time enrollment requirements may have to start repaying student loans and will not qualify for graduate assistantships, fellowships or tuition support. Students receiving financial aid should refer to the Program Eligibility Charts on the Office of Student Financial Assistance website (http://finaid.ucf.edu) under "Receiving Aid" to determine their specific enrollment requirements.

Students receiving veteran's benefits should contact Veteran's Affairs (www.va.sdes.ucf.edu) for additional information about course loads.

Nondegree-seeking students must be enrolled in 12 credit hours or more to be considered in full-time status.

**Dual Degree Shared Credit Policy**

The following policies apply to course credits that are counted toward fulfilling the requirements in two degree programs (dual degree shared credit). These policies do not extend to certificate programs. Policies governing credits shared between two certificate programs or between degree programs and certificate programs can be found under either the Graduate Certificate Program Policies or the Master's or the Doctoral Transfer Credit Policies.

The following policies serve to supplement and extend the shared credit policies that can be found in the existing Master's and Doctoral Transfer Credit Policies.

**General Limit to Use of Credits for More Than One Degree**

No credit hours may be counted for more than two degree programs.

**Accelerated Bachelor's/Master's Programs**

- Accelerated Bachelor's/Master's programs have a limit of 9 SCH shared credit for graduate degrees requiring up to 36 credit hours. For graduate degrees requiring more than 36 credit hours, accelerated Bachelor's/Master's programs have a limit of 12 SCH shared credit. Proposals for accelerated Bachelor's/Master's programs must include a strong curricular rationale that can support the streamlining of credit requirements in the two degrees.
- Shared credit is limited to formal course work, exclusive of independent study. Grades below a B- are not acceptable to fulfill Master's degree requirements if taken while in undergraduate status.
- Only outstanding students may enter accelerated Bachelor's/Master's programs (explicit requirements may be specified by the graduate program). All students in these programs must have met the undergraduate general education requirements. Students must apply and be formally admitted to the master's program following receipt of the bachelor's degree.
- Accelerated Bachelor's/Master's programs must be approved by the Graduate Council Curriculum Committee. Such programs must not unduly delay the completion of the bachelor's degree nor limit the breadth of the student's undergraduate experience.

**Dual Degree Programs**

**Definition**

Dual degree programs lead to two different degree citations on the transcript and two separate diplomas. These may combine master's programs, doctoral programs, and professional degree programs. The purpose of a dual degree program is to allow students to undertake complementary programs of graduate
study simultaneously through streamlined curricular arrangements that allow dual credit for a specified set of courses.

**Approval**

Dual degree programs must be approved by the Graduate Council Curriculum Committee; individualized dual degree programs for specific students are not allowed. Proposals for all dual degree programs must include a strong curricular rationale that can support the streamlining of credit requirements in the two degrees. Dual degree programs that include a new degree program as one of the component degrees must instead be approved by the Graduate Council Program Review Committee.

**Shared Credit Limit**

A minimum of 50% of required credit hours must be unique to each degree and cannot be used for dual credit. Departments and programs may impose more stringent shared credit limits, but may not exceed the university limit.

**Student Admission**

Students may be admitted directly to a dual degree program. Upon admission, the Graduate School will place an indicator on the student's record to activate the second program of the dual degree option prior to the completion of 18 SCH in the first program. No admissions requirements established by the Graduate School or by either individual program may be waived. For example, if one dual degree program requires acceptable scores for the GRE and the other does not require it, the applicant must take the standardized exam to be considered for admission to both degrees. International students must contact the UCF Global prior to applying to a dual degree program. Students that apply to the regular program without the dual degree option and later become interested in the dual degree option must contact the dual degree program director prior to completing 18 SCH in the regular program.

**Academic Requirements**

Formal proposals for dual degree programs must include -

1. a clear rationale for specifying whether joint or distinct examinations can satisfy the requirements for each of the component programs; and
2. specifications concerning the composition of the advisory committee, with representation from both programs.

All students must have two co-advisors, with one from each program.

Should a student fail to make satisfactory academic progress and be placed on probation, the student should consult with both advisors about the future course of action. Please refer to the section on Academic Progress and Performance for options for students who are dismissed as a result of unsatisfactory academic performance. Please note that students dismissed from a dual degree program may only pursue retention and readmission options with one of the degree programs and may not be retained in or readmitted into the dual-degree program.

**Student Financial Support**

Formal proposals for dual degree programs must include a clear structure for the financial arrangements for supported students.

**Other Policies**

- All standard policies apply.
- The graduate status GPA minimum must be met for both programs.
- Students enrolled in dual degree programs must have both degrees conferred simultaneously. No dual degrees will be awarded retroactively.
- Dual degree proposals must include statements concerning the handling of grievances, intellectual property issues, and the assigning of teaching "credit" and fees.

**Limited Nondegree Students Enrolling in Graduate Classes**

All students who wish to enroll as limited nondegree students at the graduate level will be accepted as nondegree-seeking students at the graduate level. Students wishing to enroll should complete the online graduate application, pay the application fee, provide transcripts from previous institutions, and complete residency forms.
The UCF College of Graduate Studies will make available the nondegree graduate application form to those faculty who are meeting classes for the first time at an off-campus site or regional campus; those faculty should collect the appropriate information and forms. These materials should be returned directly to the UCF College of Graduate Studies, where they will be processed and students will be registered.

Students will be placed on hold for the following semester's registration, awaiting the transcript from a previous institution that verifies the bachelor's degree.

**Academic Progress and Performance**

**Review of Academic Performance**

The primary responsibility for monitoring academic performance standards rests with the degree or certificate program. However, the academic college and the UCF College of Graduate Studies will monitor a student's progress and may dismiss any student if performance standards or academic progress as specified by the program, college or university are not maintained. Satisfactory academic performance in a program includes maintaining at least a 3.0 graduate status GPA (defined below) in all graduate work taken since admission into the program. Satisfactory performance also involves maintaining the standards of academic progress and professional integrity expected in a particular discipline or program. Failure to maintain these standards may result in dismissal of the student from the program.

**Graduate Status GPA**

A graduate status GPA will be calculated based on the graduate courses taken at UCF since admission into each degree or certificate program. The graduate status GPA is used to monitor the student's progress in the program. The university requires that students must maintain a graduate status GPA of at least 3.0 or higher in order to maintain regular graduate student status, receive financial assistance, and qualify for graduation. This GPA requirement cannot be waived.

In addition, a graduate status GPA will be calculated for nondegree students based on graduate courses taken at UCF while in nondegree status. Please note that the graduate status GPA does not carry forward from one program to another or from nondegree status into a degree or certificate program.

**Probationary Status, Dismissal and Readmission - Students in Nondegree Status**

Nondegree students whose graduate status GPA or cumulative GPA falls below 2.0 will be immediately dismissed from the university. (A graduate student's cumulative GPA is the GPA for all courses taken at UCF as a graduate student. The graduate status GPA is defined above.) Dismissed students are not allowed to enroll in courses unless they are readmitted either to a graduate program or as a nondegree student.

Nondegree students whose graduate status GPA drops below 3.0 but remains above 2.0 will be automatically changed to academic probationary status by the College of Graduate Studies. Students will receive a notice of probation at the beginning of the probation period, and the notice of probation will be imprinted on the student's advising transcript. Students have up to nine credit hours of letter-graded course work (graded A-F) to attain a graduate status GPA of 3.0 or higher, at which point they will be removed from probationary status. If the student has not attained a graduate status GPA of 3.0 by the end of the probationary nine credit hours, he/she will be dismissed from the university.

Students dismissed from nondegree status may seek admission from a graduate program at any time, but must wait one full year from the term of their dismissal to seek readmission to nondegree status. Dismissed students seeking readmission must submit a complete new application. A readmission decision will be made and the decision is final with no additional opportunity for appeal. If a dismissed student is readmitted, they will be admitted in a restricted status for 9 hours. If at the end of the 9 hours a 3.0 graduate status GPA and a 2.0 overall GPA is not achieved the student will be dismissed with no opportunity to return as a non-degree seeking student.
**Probationary Status and Dismissal - Students in a Degree or Certificate Program**

Students whose graduate status GPA falls below 2.0 will be immediately dismissed from the university. Dismissed students are not allowed to enroll in courses unless they are readmitted either to a graduate program or as a nondegree student.

Students whose graduate status GPA drops below 3.0 but remains above 2.0 will be automatically changed to academic probationary status by the College of Graduate Studies. Unsatisfactory performance may also be indicated by a "U" grade in graduate course work. Under such circumstances the program may elect to place the student on academic probation.

Students will receive a notice of probation at the beginning of the probation period, and the notice of probation will be imprinted on the student's advising transcript. Students have up to nine credit hours of letter-graded course work (graded A-F) to attain a graduate status GPA of 3.0 or higher, at which point they will be removed from probationary status. If the student has not attained a graduate status GPA of 3.0 at the end of the probationary nine credit hours, he/she will be dismissed from the graduate program unless an approved Conditional Retention Plan is in place as described below. Students who have not remedied the unsatisfactory "U" performance, as defined by the program, may also be dismissed from the program.

The graduate program will also be notified at the time of probation and given an opportunity during the 9-hour probationary period to formally prepare a "Conditional Retention Plan". The Conditional Retention Plan should show how the student can realistically regain his/her regular graduate status (GPA 3.0) within a reasonable time (usually one semester). It should also define the courses to be taken and the timing of the courses to regain his/her graduate status. In addition, the plan could include other conditions as necessary for the continued enrollment of the student in the program such as retaking courses requiring better performance, taking remedial course work in specified areas, or completing special projects to better prepare the student for success in the program. The plan is developed by the graduate program director so that ideally the student and the faculty will know exactly what conditions are required for the continued enrollment of the student. Failure to meet the conditions will result in dismissal without any further appeal of retention. An approved Conditional Retention Plan will usually include an extension of the probationary period, if needed, thus allowing the student to continue without interruption in his/her program even should the student fail to succeed in his/her initial probationary period. The plans are signed by the student and the graduate program director and submitted to the College of Graduate Studies for review and approval. The primary responsibility for monitoring the progress of the student in meeting the Conditional Retention Plan rests with the degree or certificate program, although the appropriate academic college and the College of Graduate Studies may also monitor the plans for compliance.

International students placed on probationary status will be sent to the UCF Global for advisement regarding the immigration status implications of this action.

After dismissal, the following options are available:

**OPTION A. The Program Requests Retention of the Student within One Year After Dismissal.**

The dismissed student may not take program-related course work during this process, which must occur within the next semester following dismissal. The request for retention should include reasons for readmitting the dismissed student, as well as provide a "Conditional Retention Plan" as described above. If the request is approved by the College of Graduate Studies, the student will be readmitted into the program under the Conditional Retention Plan in restricted status; failure to meet the conditions will result in dismissal without any further appeal of retention. Requests for retention that are submitted to the College of Graduate Studies early enough for adequate review and approval prior to the late registration period will enable students to re-enroll in the next semester and not have a "dismissal" on his/her transcript.

**OPTION B. The Dismissed Student Applies for Entry into the Program from Which He/She Was Dismissed After One Year of Nonenrollment in that Program.**

In this case, the student must submit a complete new application (application fee, letters of reference if applicable, AND a statement describing why the student thinks he/she is more capable now to successfully complete the program). The program must submit a "Conditional Retention Plan" (as described above) if they choose to support the former student.
The Conditional Retention Plan must be submitted to the College of Graduate Studies for approval before an admissions decision is made.

A student that is admitted back into a program from which he/she was dismissed will continue to have the original dismissal denoted on the transcript and will continue with the same graduate status GPA that the student held prior to dismissal. Also, the student is admitted as a restricted student and must meet the conditions prescribed by the Conditional Retention Plan to enter regular graduate status.

**OPTION C: Apply to Another Program.**

This option is always available and requires a complete new application. Previously dismissed students accepted into new programs will be admitted under restricted status and have a new graduate status GPA (see Graduate Status GPA section above).

Students with a graduate status GPA of less than 3.0 seeking admission to a different graduate program will be admitted under restricted status with conditions as prescribed by the new program.

Dismissed students will not be allowed to enroll in graduate courses unless they have been admitted to another graduate program or admitted as nondegree students taking classes with permission from the department.

**NOTE:** Individual graduate programs may have more stringent grade requirements than described above. Students must abide by the academic performance standards of their graduate program.

**Maximum Hours of Unsatisfactory Grades**

"C" grades (C, C+, C-), as well as D, D+, D-, F, and U grades, are all considered unsatisfactory grades.

A student may apply a maximum total of six semester credit hours of "C" grades, or the "C" grade credits associated with at most two classes, whichever is greater, to satisfy degree program requirements.

Exceeding six semester credit hours of unsatisfactory grades is grounds for dismissal for all degree-seeking and nondegree students. A course in which a student has received an unsatisfactory grade may be repeated, however, both grades will be used in computing the GPA. There is no forgiveness policy for any course taken while in graduate status.

**Incomplete Grades**

A grade of "I" (incomplete) is assigned by the instructor when a student is unable to complete a course due to extenuating circumstances, and when all requirements can clearly be completed in a short period of time following the close of regular classes. In all circumstances where an "I" grade is received, the student and faculty member must complete an agreement form that specifies how and when the incomplete grade will be made up. This agreement form is submitted with the instructor grade rolls at the end of the semester, and a copy of this agreement is given to the Graduate College for further follow-up. For those students on financial assistance such as loans, the incomplete (I) must be made up by the agreement date. Failure to complete course requirements by that date may, at the discretion of the instructor, result in the assignment of an "F" grade, or a "U" grade for thesis, dissertation, or research report hours. It is the student's responsibility to arrange with the instructor for the changing of the "I" grade.

Grades of "I" must be resolved within one calendar year or prior to graduation, whichever comes first. Incompletes in regular course work left unresolved will be changed to "F" if not changed in the allowed time period, and this time period may be sooner for those receiving financial assistance. The exception to this is enrollment in thesis (XXX 6971) and dissertation (XXX 7980) hours where the incomplete grade will be allowed to continue until graduation. UCF fellowship students cannot receive fellowship funds while holding incomplete grades and have thirty days from the issuance of the Incomplete to remedy it in order to continue to receive fellowship funds.

**Enrollment**

Students must be enrolled in order to take exams, to conduct research or to use any university resources and to graduate. Students who have completed all degree requirements may enroll in IDS 6999 during their semester of graduation.

**Continuous Enrollment and Active Student Status**

Students must be enrolled for at least one semester of every three consecutive semesters in order to maintain active student status. Students who do not meet this enrollment requirement breach continuous enrollment and will be removed from active
student status. These students must reapply for admission. Readmission is not guaranteed.

Students with extenuating circumstances that will compel them to be unenrolled for three consecutive semesters or more may complete a Leave of Absence Form to petition to remain in active student status. This form must be submitted no later than the end of the add/drop period of the third semester of non-enrollment. See the section below for details.

1. Because of current U.S. government regulations, international students must be enrolled every fall and spring semester. For students in this category, a Leave of Absence is only available for documented medical reasons.

2. A student who is discontinued for breach of continuous enrollment will lose the option of fulfilling the degree requirements originally listed in his/her official program of study already on file and will instead be subject to the degree requirements listed in the graduate catalog in effect at the time the student is readmitted to the program.

**Continuous Enrollment**

Students engaged in thesis or dissertation work must be continuously enrolled every term. Doctoral students who have begun taking dissertation hours and Master's students who have completed their required course work and are completing their thesis requirement are required to be continuously enrolled (including summer) until the thesis or dissertation is completed. For details, see the Master's and Doctoral enrollment policies under Thesis and Dissertation Requirements below. Students with extenuating circumstances that will prevent them from enrolling continuously may submit a Leave of Absence Form. See the section below for details.

**Enrollment in Multiple Graduate Programs**

- Students are allowed to enroll in multiple master's and doctoral degree programs.
- Approval of the program(s) where the student is currently enrolled is not required for application to or enrollment in additional program(s).
- The College of Graduate Studies shall inform the program(s) of current enrollment when a student is accepted for enrollment in a new program.

- Students will be held responsible for showing academic progress in each program in which they are enrolled.

**Special Leave of Absence**

A Leave of Absence may be granted to a student to temporarily waive the continuous enrollment requirement.

- A leave may be requested in cases where the student can demonstrate good cause (e.g., illness, family issues, financial difficulties, personal circumstances, recent maternity/paternity, employment issues). The specific reason for the Leave of Absence request must be indicated by the student on Leave of Absence Form.
- Students may request up to 6 consecutive semesters of non-enrollment.
- Time spent in a Leave of Absence will not reduce the total time limitation for degree completion (see the policy regarding Time Limitation for Degree Completion in the master's, specialist, and doctoral policies).
- If a student fails to enroll in the semester following the last term in the approved Leave of Absence, the student will have failed to maintain continuous enrollment and must apply for readmission to the university.

A Leave of Absence will be granted only after approval from the Graduate Program Director for the student's program of study and the College of Graduate Studies (and the UCF Global for international students, when applicable).

For students seeking a temporary waiver of the continuous enrollment policy, the Leave of Absence Form must be submitted no later than the end of the add/drop period of the third semester of non-enrollment.

For thesis and dissertation students, the Leave of Absence Form must be submitted when a student will not be enrolled for any number of terms. For those students, the Leave of Absence Form must be submitted no later than the end of the add/drop period of the term of non-enrollment.

**Readmission**

To file for readmission, students must complete a new application, submit the application fee, and update their residency information and health history (if applicable).
Students should apply for readmission if they were previously admitted and enrolled in a graduate program but have been absent for three consecutive semesters. For more information on readmission, please visit the Graduate website.

### Academic Grievance Procedure

The UCF College of Graduate Studies allows for petitions of university requirements and their academic matters. Academic matters are those involving instruction, research, or decisions involving instruction or affecting academic freedom.

The academic grievance procedure is designed to provide a fair means of dealing with graduate student complaints regarding a specific action or decision by a faculty member, program or college, including termination from an academic program. Academic misconduct complaints associated with sponsored research will invoke procedures outlined by the Office of Research and Commercialization.

Students who believe they have been treated unfairly may initiate a grievance. The procedure provides several levels of review, and at each level of review the participants are further removed and have a broader outlook than where the grievance originated. Procedures for initiating an academic grievance can be found at The Golden Rule [www.goldenrule.sdes.ucf.edu](http://www.goldenrule.sdes.ucf.edu/) (see section 11).

### Petitions of Graduation Requirements Procedures

Students have the responsibility to familiarize themselves with policies and procedures of the university, college, and program. Students are responsible for knowing the degree requirements and for following the policies that govern the academic program. However, when unusual instances arise, making it appropriate for students to request exceptions of existing graduate academic policies for graduate students, graduate students may petition the appropriate unit for an exception to this requirement. The university is always looking for the compelling reason that an exception is warranted, so this needs to be carefully described in any petition. The procedures are:

- The graduate student completes a Graduate Petition Form and submits it to the graduate program director, specifying the requirement (either a program or university requirement) and the exception desired. The graduate student needs to provide a compelling reason for an exception to be made.
- The graduate program director may ask the program graduate committee to examine and provide advice about the petition to the graduate program director. The graduate program director will then make a recommendation about the exception to the unit head. The unit head will then make a final recommendation.
- The petition will then be sent to the College of Graduate Studies for a final decision. The Vice Provost and Dean of the College of Graduate Studies may ask the Appeals Committee of the Graduate Council of the Faculty Senate to examine the information provided in the petition at their next scheduled meeting and make a recommendation concerning the petition to the Vice Provost and Dean.
- The Vice Provost and Dean of the College of Graduate Studies may consider the input of the Appeals Committee of the Graduate Council and will make a final decision about the petition for the university.

### Degree or Certificate Completion

### Application and Certification for Graduate Degrees

Students planning to graduate in the next term must complete the Application for Graduation (Intent to Graduate available at my.ucf.edu). Students who have not applied for graduation by the last day of classes in the term preceding the graduation semester may not be listed in the Commencement Program. If the student does not graduate in that term, a new application for graduation must be filed at the beginning of registration for the term of anticipated graduation. Graduating students must be enrolled at UCF during the term of graduation. Graduates may contact the Registrar's Office for Commencement ceremony and guest ticket information.

Assuming that the student is in good standing at the university, degrees will be awarded only after successful completion of the degree requirements stated in the Graduate Catalog under which the student plans to graduate and final recommendation from the faculty and dean of the respective college.

The college of the degree program must certify through the college dean that all program and college requirements have been met. Degree certification forms (Degree Audit forms or
program of study with approval signatures) are forwarded to the UCF College of Graduate Studies for final determination that all program, college, and university requirements have been met.

Application and Certification for Graduate Certificates

In order to be processed for completion of a graduate certificate program, students must file an application for completion (Graduate Certificate Completion form) with the office that offers the certificate program. The Graduate Certificate Completion form should be filed by the time that the student is registering for the final course in the certificate program, and such forms must be filed no later than the end of the semester in which the student enrolls in the last course required for the certificate program. Forms can be found on the UCF Graduate website (www.graduate.ucf.edu).

The college of the graduate certificate program must certify through the college dean that all program and college requirements have been met. Completed Graduate Certificate Completion forms (available at www.graduate.ucf.edu) are forwarded to the UCF College of Graduate Studies for final determination of program, college, and university requirements. For each certificate program, the graduate program director will certify successful completion of the program's academic requirements. The certificate is mailed to the student unless the student or the graduate program requests other arrangements. Certificate recipients are not recognized at commencement.

Thesis and Dissertation Requirements

An oral defense of an original thesis or dissertation is required with the approved thesis or dissertation being prepared in accordance with program, college, and university requirements.

Academic dishonesty in thesis, research report and dissertation work may result in reversion to postbaccalaureate status or termination from the degree program. Our emphasis on academic honesty requires quotations or ideas of others to be accompanied by appropriate citations.

All theses and dissertations that use research involving human subjects, including surveys, must obtain approval from an independent board, the Institutional Review Board (IRB), for this prior to starting the research. It is imperative that proper procedures are followed when using human subjects in research projects. Information about this process can be obtained from the Office of Research and Commercialization (www.research.ucf.edu). Failure to obtain this prior approval could jeopardize receipt of the student's degree.

Students who wish to complete their degree requirements in a given semester must take their oral defense and submit the final electronic copy of their thesis or dissertation by the dates shown in the Academic Calendar. All students are required to submit their thesis or dissertation electronically.

Traveling Scholars

The Traveling Scholar status enables a UCF graduate student to take advantage of special resources available on another campus that are not available at UCF (for example, special course offerings, research opportunities, unique laboratories, and library collections). Provided the appropriate approval described below is obtained, Traveling Scholar credits are guaranteed to be accepted as earned UCF credits, as long as the grades obtained are B- or higher.

A Traveling Scholar must be recommended by his or her own graduate adviser, who will initiate a visiting arrangement with the appropriate faculty member of the host institution. After agreement by the student's adviser and the faculty member at the host institution, graduate deans at both institutions will be fully informed by the adviser and have the authority to approve or deny the academic arrangement. A student will register at the host institution and will pay tuition and/or registration fees according to fee schedules established at that institution. The Traveling Scholar Form must be completed by the student and approved by the UCF College of Graduate Studies before any coursework can be taken.

Each university retains its full right to accept or reject any student who wishes to study under its auspices. A Traveling Scholar will normally be limited to one term for a total of six credit hours taken as a traveling scholar at another institution.
A Traveling Scholar is not entitled to displacement allowance, mileage, or per diem payments. The home university, however, may at its option continue its financial support of the traveling scholar in the form of a fellowship or graduate assistantship with any work obligation to be discharged either at the home or at the host institution.

To obtain credit for approved Traveling Scholar courses, the student must request an official transcript be sent from the host institution to the UCF College of Graduate Studies (Millican Hall 230, P.O. Box 160112, Orlando, FL 32816-0112; Phone 407-823-2766), and the graduate program director must complete the Transfer Request Form so that the credits can be entered into the student database. Credits earned at another institution while in Traveling Scholar status will be considered internal transfer credits and do not count toward the student's graduate status GPA. These hours may count toward UCF residency requirements if prior approval is obtained. Graduate students are not allowed to be traveling scholars in their final, or graduation, term except by prior approval of the UCF College of Graduate Studies.

An international graduate student who is registered at another educational institution besides UCF as a Traveling Scholar or as a transient student is required to complete a Reduced Course Load Form to satisfy SEVIS requirements of being enrolled full-time. International graduate assistants employed at UCF must be enrolled full-time at UCF.

Assistantship Opportunities

As part of a program's professional development plan for students, full-time graduate students may be offered the opportunity to gain experience as a Graduate Teaching Assistant (or Associate or Grader; GTA), Graduate Research Assistant (or Associate; GRA), or Graduate Assistant. Please visit the Financial Information section in the catalog for more information.

Assignments to these professional development activities are intended to supplement the student's academic program of study in order to give the student professional experiences that will enhance the student's development and prepare him/her for postgraduation employment. While these activities provide the opportunity for students to be graduate assistants, their overriding purpose is to help develop the skills, abilities, and professionalism of the student.

All graduate assistants (GTAs and GRAs) must be assigned to at least a half-time appointment (0.25 FTE assignment, approximately equivalent to 10 hours per week). However, the standard assignment for graduate assistants is a full-time appointment (0.5 FTE assignment approximately equivalent to 20 hours per week). Students who desire more than a full-time appointment during fall and spring semesters must complete a Supplemental Assignment Form. The UCF College of Graduate Studies will only grant exceptions to this policy in rare circumstances and for compelling reasons related to the student's professional development. Exceptions are granted only rarely during the first year of a student's program of study. Decisions are based on the student's academic record, the appointment FTE, the relationship of the assignments to the student's program of study, support from the graduate program director, and related factors.

Student FICA exemption. Graduate assistants who are enrolled at least part-time (5 hours in fall, 5 hours in spring, or 3 hours in summer) will be exempt from FICA/Medicare taxes during pay periods that overlap with the academic term and during breaks of less than five weeks. Breaks longer than five weeks where graduate students are on a graduate assistant appointment but not enrolled will result in withholding FICA/Medicare taxes.

Academic Common Market Scholars

The University of Central Florida is a participating institution in the Academic Common Market (ACM) program with other southern universities sharing unique academic programs on the undergraduate and graduate level. However, the University of Central Florida only participates at the graduate level.

The Academic Common Market offers students the opportunity to enter degree programs that are not available in their home state, while still being eligible to pay in-state tuition rates. Students taking part in this program must be admitted by a participating university (notifying that university of their planned attendance as an ACM Scholar), and will need to obtain a letter of certification from their respective ACM state coordinator.

The first step is to contact your respective state coordinator for information on how to apply for the Academic Common Market. Contact information for state coordinators can be found on the following website: http://home.sreb.org/acm/states.aspx.

After making contact with your state coordinator, if you are eligible for the ACM, you can apply to the University of Central Florida online through the website at application.graduate.ucf.edu/. When filling out the Florida Residency Classification section, select the option that states "I am a Florida Resident for tuition purposes" and fill out the entire section. Before saving the page, you will need to add an
explanation for your Florida residency. Please select the letter "N," which states "I am a Southern Regional Education Board's Academic Common Market graduate student."

Upon submission of your application, and your program's required admissions criteria, you will receive a decision from the program in which you have applied. If accepted, you can present that information to your state coordinator, who will then be able to provide UCF with a certification letter. With that letter, UCF will then be able to offer you Florida residency for tuition purposes.

The participating universities are located in the following states:

Alabama  Louisiana  Tennessee
Arkansas  Maryland  Texas*
Delaware  Mississippi  Virginia
Florida*  North Carolina  West Virginia
Georgia  Oklahoma
Kentucky  South Carolina

*Only Florida, North Carolina, and Texas participate at the graduate level.

For more information, please contact the UCF College of Graduate Studies at 407-823-2766 (Millican Hall 230, P.O. Box 160112, Orlando, FL 32816-0112). Additional information on the Academic Common Market, including contact information for state coordinators and all available academic programs, can be found on the Southern Regional Education Board (SREB) website, www.sreb.org.

Proprietary and Confidential Information

It is the intent of the University to foster the professional development of its faculty and students. In particular, the proprietary and patent policies serve to protect the interests of UCF graduate students so that they can engage in research that will ultimately be published. In no circumstances should the University knowingly enter into an agreement with outside agencies that would prevent the ultimate publication of the graduate student's work, as a thesis or dissertation or other means. These policies also help to clarify protections for intellectual property contained in theses/dissertations for students who engage in employment outside the University.

If thesis or dissertation work is supported by a contractual agreement with an outside agency, and provision was made in the agreement to delay disclosure of the study's results for the purpose of filing a patent or copyright, then this section describes procedures for handling the thesis/dissertation. (See also Patent and Invention Policy below for explanations of rights associated with patents and copyrights.)

1. Only for those theses and dissertations where a prior written agreement was made between UCF and an outside agency or where the University wishes to pursue a copyright/patent may publication of the thesis/dissertation be delayed, or in exceptional circumstances as determined by the University on a case by case basis. Review and delay of disclosure of the thesis/dissertation may take up to 6 months.

2. The review by the outside agency or by the University for the purpose of copyright or patent will follow the oral defense of the document. If it appears that the review process will delay certification of the degree or if the delay of disclosure is exercised, the certification process will be completed but the thesis or dissertation will not be released for up to 6 months.

3. No graduate degree will be awarded when the thesis or dissertation, after a reasonable interval, is not available to the public. If the material is sensitive, classified, or will be patented, the thesis or dissertation will not be released for up to 6 months.

4. Contractual agreements that contain provisions for review and delay of disclosure shall be reviewed by the Office of Research and Commercialization. Exceptional cases may include a delay of disclosure for more than six months and/or review prior to the oral defense.

5. The student and the student's Adviser shall be informed of the possibility of the delay of disclosure at the time of the appointment of the Adviser.

Ownership of Intellectual Property

The "Patent and Invention Policy" for graduate students is included here in its entirety. Departments and colleges should discuss this policy with graduate students at orientations.

PREMISE: UCF has three fundamental responsibilities with regard to graduate student research. They are to (1) support an academic environment that stimulates the spirit of inquiry, (2) develop the intellectual property stemming from research, and (3) disseminate the intellectual property to the general public. In most cases, UCF owns the intellectual property developed using
university resources. The graduate student as inventor will according to this policy share in the proceeds of the invention.

1. **University Authority and Responsibilities:** Florida Statute Section 1004.23 authorizes the University to take any action necessary to secure letters of patents, copyrights, and trademarks on any work products and to enforce its rights therein. This policy applies to graduate students who are considered University personnel.

2. **Definitions:** For the purposes of this policy the following definitions shall apply:
   
   1. A **work** includes any copyrightable material (other than journal articles) such as printed material, computer software or databases, audio or visual materials, circuit diagrams, mask works, architectural and engineering drawings, lectures, musical or dramatic compositions, choreographic works, pictorial or graphic works, and sculptural works.
   
   2. An **Invention** includes any discovery, invention, process, composition of matter, article of manufacture, know-how, design, model, technological development, strain, variety, culture of any organism, or portion, modification, translation, or improvement of these items, and any mark used in connection with these items.
   
   3. **Instructional Technology Material** includes motion pictures, film strips, photographic and other similar visual materials, live video and audio transmissions, computer programs, computer-assisted instructional coursework, programmed exhibits, and combinations of the above materials, which were prepared or produced in whole or part by a graduate student, and which are used to assist or enhance instruction.
   
   4. **University Support** includes the use of University funds, personnel, facilities, equipment, materials, or technological information, and includes such support provided by other public or private organizations when it is arranged, administered, and/or controlled by the University.
   
   5. **Student-generated Effort** means that the ideas come from the graduate student alone outside the field or discipline for which the graduate student is employed by the University, the work was not made with the use of University support, and the University is not held responsible for any opinions expressed in the effort.

   6. **Research** means the inquiry or examination in some field of knowledge undertaken to establish facts or principles that are true. Research, as used in this policy, does not include work done in an internship or coop setting where new knowledge in a field is not actively sought, but rather a setting that offers a real-life experience for the graduate student.

3. **Work(s)**
   
   1. **Student-generated Effort**—A work made solely by the graduate student, outside the field or discipline for which the graduate student is employed by the University, is the property of the graduate student, who has the right to determine the disposition of such work and the revenue derived from such work.
   
   2. **University-supported Efforts**—If the work was not made solely in the course of student-generated efforts, the work is the property of the University, and the graduate student shall share in the proceeds therefrom.

4. **Disclosure**
   
   1. Upon creation of a work that is potentially patentable, and prior to any publication, the graduate student shall disclose to the Office of Research and Commercialization any work made in the course of University-supported efforts, together with an outline of the project and the conditions under which it was done.
   
   2. The Office of Research and Commercialization shall gather information to assess the relative equities of the graduate student and the university in the work.
   
   3. Within 120 days after such disclosure, the Office of Research and Commercialization will inform the graduate student whether the university seeks an interest in the work.
   
   4. The graduate student and the university shall not commit any act which would tend to defeat the university’s or graduate student’s interest in the work and shall take
any necessary steps to protect such interests.

4. **Invention(s)**
   
   1. **Student-generated Efforts**
      
      All inventions made outside the field or discipline in which the graduate student is employed by the university and for which no university support has been used are the property of the graduate student.
   
   2. **University-supported Efforts**
      
      An invention made in the field or discipline in which the graduate student is employed by the university, or receiving university support, is the property of the university and the graduate student shall share in the proceeds therefrom.
   
   3. **Disclosure**
      
      1. A graduate student as inventor or co-inventor shall fully and completely disclose to the Office of Research and Commercialization all inventions which the inventor(s) may develop or discover while a graduate student of the University, together with an outline of the conditions under which it was done. With respect to inventions made during the course of approved outside employment, the graduate student as inventor or co-inventor may delay such disclosure, when necessary to protect the outside employer’s interest, until the decision has been made by the outside employer whether to seek a patent.
      
      2. The Office of Research and Commercialization shall inform the graduate student as inventor as well as all other inventors within 120 days of disclosure as to whether the University wishes to assert an ownership interest in the intellectual property.
      
      3. The division of proceeds generated by the licensing or assignment of an invention shall be according to the established royalty division set forth in the patent policy of the University of Central Florida Research Foundation.
   
   4. The graduate student as inventor(s) and the University shall not commit any act which would tend to defeat the University’s or inventors’ interest in the invention and shall take any necessary steps to protect such interests.

5. **Release of Rights**

   At any stage of making the patent applications, or in the commercial application of an invention, if it has not otherwise assigned to a third party the right to pursue its interests, the Office of Research and Commercialization, may elect to withdraw from further involvement in the protection or commercial application of the invention. At the request of the graduate student in such case, the University shall transfer the invention rights to the inventor(s), in which case the invention shall be the inventor(s) property, and none of the costs incurred by the University or on its behalf shall be assessed against the inventor in whole or in part.

6. **University Policy**

   1. The University has a policy addressing the division of proceeds between graduate students and faculty when the research is done and results in a dissertation, University Regulations, 6C7-2.029 Copyrights, and Patents). The University also has a policy addressing the division of proceeds between UCF inventor(s) and the University (see University Regulations, 6C7-2.029). It is also contained in the Patents and Copyrights Policy of the UCF Research Foundation. This same division of royalties will apply in the disbursement of royalty income to graduate students as inventor(s) unless this has been negotiated in a separate contractual agreement.
   
   2. All sponsored research done by graduate students enrolled at the University for and with companies must have a contractual agreement with UCF negotiated at the start of that research. Graduate students must be informed at the start of the research about any contractual agreements that would concern the future publication of their research work.
   
   3. Dissertation or thesis dissemination can be delayed because of patent or proprietary information concerns of a sponsor. This can occur when a prior contractual agreement has been entered into that includes
provisions for a research sponsor's review between the sponsor and University. (See Proprietary and Confidential Information above.)

General University Policies

Classroom Responsibility

Students are responsible for maintaining classroom decorum appropriate to the educational environment. When the conduct of a student or group of students varies from acceptable standards and becomes disruptive to normal classroom procedures, the instructor has the authority to remove the offending party from the room and refer the student to the Office of Student Conduct (SRC 155) for disciplinary action.

Student Conduct

Students are subject to federal and state laws and local ordinances as well as regulations prescribed by the University of Central Florida and the Florida Board of Governors. The breach or violation of any of these laws or regulations may result in disciplinary action. Behavioral breaches of state law, UCF requirements, or program expectations are grounds for dismissal from the program of study and the university. Detailed conduct regulations and procedures are presented in The Golden Rule (www.goldenrule.sdes.ucf.edu).

A person applying for admission to UCF who has declared an adjudication of a violation of conduct policies at a previous college or university or a violation of the law that resulted in probation, community service, a jail sentence, or the revocation or suspension of their driver's license (including traffic violations that resulted in a fine of $200 or more) will have circumstances of the case reviewed by the Office of Student Conduct (SRC 155) to consider eligibility for admission.

Credit Hour Policy

Credit hour: A credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than

(1) One hour of classroom or direct faculty instruction and a minimum of two hours of out of class student work each week

for approximately fifteen weeks for one semester or the equivalent amount of work over a different amount of time; or

(2) At least an equivalent amount of work as required in paragraph (1) of this definition for academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Religious Observances

It is the policy of the University of Central Florida to reasonably accommodate the religious observances, practices, and beliefs of individuals in regard to admissions, class attendance, and the scheduling of examinations and work assignments. A student who desires to observe a religious holy day of his or her religious faith will notify all of his/her instructors and be excused from classes to observe the religious holy day.

The student will be held responsible for any material covered during the excused absence, but will be permitted a reasonable amount of time to complete any work missed. Where practicable, major examinations, major assignments, and university ceremonies will not be scheduled on a major religious holy day.

Students who are absent from academic or social activities because of religious observances will not be penalized. A student who believes that he/she has been unreasonably denied an educational benefit due to his/her religious belief or practices may seek redress under the Student Grievance Procedure, located in The Golden Rule.

University Closings

In the event of some extraordinary event (such as a natural disaster or prolonged power outage), the President shall determine whether it is necessary to cancel classes and approve administrative leave for employees in affected areas. Department chairs, in consultation with their faculty and with the college dean, shall determine the effect on final examinations and other academic matters.

Non-Discrimination Policy

The University of Central Florida does not unlawfully discriminate in any of its education or employment programs and activities on the basis of an individual's race, color, ethnicity, national origin, religion (or non-religion), age, genetic information, sex (including pregnancy and parental status),
gender identity or expression, sexual orientation, marital status, physical or mental disability (including learning and intellectual disabilities), political affiliations, prior conviction of a crime, protected veteran’s status or membership in any other protected classes as set forth in state or federal law. The University prohibits discrimination based on these protected classes, which includes the prohibition of discriminatory harassment, sexual assault, sexual exploitation, relationship violence, stalking, sexual or gender-based harassment, and retaliation against a person for the good faith reporting of any of these forms of conduct or participation in or party to any investigation or proceeding related to a report of these forms of conduct.

Discriminatory harassment consists of verbal, physical, electronic or other conduct based upon an individual’s protected class as set forth above that interferes with that individual’s educational or employment opportunities, participation in a University program or activity, or receipt of legitimately-requested services under either Hostile Environment Harassment or Quid Pro Quo Harassment. Hostile Environment Harassment is discriminatory harassment that is so severe, persistent or pervasive that it unreasonably interferes with, limits, deprives, or alters the conditions of education (e.g., admission, academic standing, grades, assignment); employment (e.g., hiring, advancement, assignment); or participation in a University program or activity (e.g., campus housing), when viewed from both a subjective and objective perspective. Quid Pro Quo Harassment is discriminatory harassment where submission to or rejection of unwelcome conduct is used, explicitly or implicitly, as the basis for decisions affecting an individual's education; employment; or participation in a University program or activity.

Sexual harassment is any unwelcome sexual advance, request for sexual favors, or other unwanted conduct of a sexual nature, whether verbal, non-verbal, graphic, physical, or otherwise, when the conditions for Hostile Environment Harassment or Quid Pro Quo Harassment are present. Gender-based harassment includes harassment based on gender, sexual orientation, gender identity, or gender expression, which may include acts of aggression, intimidation, or hostility, whether verbal or non-verbal, graphic, physical, or otherwise, even if the acts do not involve conduct of a sexual nature, when the conditions for Hostile Environment Harassment or Quid Pro Quo Harassment are present. Sexual assault consists of sexual contact and/or sexual intercourse that occurs without consent. Sexual exploitation is purposely or knowingly doing or attempting to do any of the following: recording or photographing private sexual activity and/or a person’s intimate parts (including genitalia, groin, breasts or buttocks) without consent; disseminating or posting images of private sexual activity and/or a person’s intimate parts (including genitalia, groin, breasts or buttocks) without consent; allowing third parties to observe private sexual activity from a hidden location (e.g., closet) or through electronic means (e.g., Skype or livestreaming of images); subjecting another person to human trafficking; or exposing another person to a sexually transmitted infection or virus without the other’s knowledge. Relationship violence includes any act of violence or threatened act of violence that occurs between individuals who are involved or have been involved in a sexual, dating, spousal, domestic, or other intimate relationship. Stalking occurs when a person engages in a course of conduct directed at a specific person under circumstances that would cause a reasonable person to fear for the person’s safety or the safety of others, or to experience substantial emotional distress.

A student or employee determined by the University to have committed an act of discrimination as described above is subject to disciplinary action, up to and including permanent separation from the University. Third Parties who commit these acts may have their relationships with the University terminated and/or their privileges of being on University premises withdrawn.

Most University faculty and staff (including professors, lecturers, instructors, academic advisors, trainers coaches, and resident assistants) are not confidential employees and are required to immediately report to the University's Title IX Coordinator (Dawn Welkie) all relevant details (obtained directly or indirectly) about an incident of sexual assault, relationship violence and/or stalking that involves any student. Confidential employees (including Health Services employees, Counseling and Mental Health Services employees, Ombuds Office employees, Student Legal Services employees and Victim Services employees) are not required to make these reports and will not disclose information without the permission of the student (subject to limited exceptions). More information about UCF’s resources and reporting options for individuals who have experienced sexual harassment (including sexual violence) and related policies can be found at http://shield.ucf.edu.

Employees, students, contractors, vendors, visitors, guests or third parties may obtain further information on this policy, including grievance procedures, from the Office of Equal Opportunity and Affirmative Action Programs (EOAA). Nancy Myers (EOAA Director) is responsible for the University’s response to all forms of discrimination based on a protected class, and Dawn Welkie (EOAA Assistant Director) is the Title IX Coordinator who is responsible for the University’s response to reports of sex discrimination. For more information about EOAA, please visit EOAA’s website at www.eeo.ucf.edu or call 407-UCF-1EOO.

Sexual Harassment Policy

The University of Central Florida values diversity in the campus community. Accordingly, discrimination on the basis of race,
sex, national origin, religion, age, disability, marital status, parental status, veteran's status, sexual orientation, or genetic information is prohibited.

Sexual harassment, a form of sex discrimination, is defined as unwelcome sexual advances, requests for sexual favors, or verbal or physical conduct of a sexual nature when:

- Submission to such conduct is made either explicitly or implicitly a term or condition of an individual's employment or enrollment;
- Submission to or rejection of such conduct by an individual is used as the basis for employment or enrollment decisions affecting such individual; or
- Such conduct has the purpose or effect of substantially interfering with an individual's work performance or enrollment, or creating an intimidating, hostile, or offensive working or academic environment.

Sexual harassment is strictly prohibited. Occurrences will be dealt with in accordance with the guidelines above and university rules. Employees, students, or applicants for employment or admission may obtain further information on this policy, including grievance procedures, from the Equity Coordinator. The Director of the Office of Equal Opportunity and Affirmative Action Programs is the campus Equity Coordinator responsible for concerns in all areas of discrimination. The office is located on the main campus, in Millican Hall 330, Orlando, FL 32816-0030. The phone number is 407-UCF-1EEO. Policies and guidelines are available online at http://www.eeo.ucf.edu.

Golden Rule

The Golden Rule is the university's policy regarding nonacademic discipline of students and limited academic grievance procedures for graduate (grade appeals in individual courses, not including thesis and dissertation courses) and undergraduate students. Information concerning The Golden Rule can be found at www.goldenrule.sdes.ucf.edu/. Section 11, "Student Academic Behavior," addresses appeals of graduate program actions or decisions.

University Notices

This catalog contains a description of the various policies, academic programs, degree requirements, course offerings, and related matters intended to be in effect at the University of Central Florida during the 2014 - 2015 academic year. However, any matter described in this catalog is subject to change. As a result, statements in this Graduate Catalog may not be regarded in the nature of binding obligations on the institution or the State of Florida, or as an irrevocable commitment from the University to the reader.

Drug-Free Workplace/Drug-Free Schools Policy Statement

Standards of conduct and disciplinary sanctions will be imposed for the unlawful possession, misuse or distribution of illicit drugs and alcohol by UCF students and employees on UCF property or as part of any of its activities. The unlawful manufacture, distribution, dispensation, possession or misuse of a controlled substance, prescription medication or the unlawful possession and use of alcohol is harmful and prohibited in and on UCF owned and controlled property or as part of any of its activities. Any UCF employee or student determined to have violated this policy shall be subject to disciplinary action for misconduct, action which may include termination/expulsion and referral for prosecution. No employee/student is to report to work/class or attend any university activity while under the influence of illegal drugs or alcohol. Violation of these policies by an employee/student will be reason for evaluation/treatment for drug/alcohol disorder and/or for disciplinary action up to and including termination/expulsion and/or referral for prosecution consistent with local, state and federal law.

Academic Behavior Standards

The University of Central Florida is committed to a policy of honesty in academic affairs. Examples of conduct for which students may be subject to academic and/or disciplinary penalties including expulsion are:

- Cheating, whereby non-permissible written, visual, or oral assistance including that obtained from another student is utilized on examinations, course assignments, or projects. The unauthorized possession or use of examination or course related material may also constitute cheating.
- Plagiarism, whereby another's work is deliberately used or appropriated without any indication of the source, thereby attempting to convey the impression that such work is the student's own. Any student failing to properly credit ideas or materials taken from another has plagiarized.
- Unauthorized assistance: communication to another through written, visual, or oral means. The presentation of material which has not been studied or learned, but rather was obtained solely through someone else's efforts and used as part of an examination, course assignment or project.
Unauthorized possession or use of examination or course related material may also constitute cheating.

- Commercial Use of Academic Material: Selling notes, handouts, etc. without authorization or using them for any commercial purpose without the express written permission of the university and the Instructor is a violation of this rule.

NOTE: A student who has assisted another in any of the aforementioned breach of standards shall be considered equally culpable. In cases of cheating or plagiarism, the instructor may take appropriate academic action ranging from loss of credit for a specific assignment, examination, or project to removal from the course with a grade of "F." Additionally, the instructor may request disciplinary action through the Office of Student Rights and Responsibilities as outlined in The Golden Rule.

### Student Use of Technology

The University of Central Florida expects all students to have ready access to a personal computer and software appropriate to his or her field of study. Students can meet this expectation by purchasing or leasing a computer, sharing a computer with family or roommates, or using a UCF computer lab.

All UCF students should expect to use a personal computer in many university activities, including course work, accessing library information, registering for classes, and e-mailing correspondence to instructors or fellow students. In addition, many UCF courses require the use of the Internet.

The University of Central Florida has developed one of the nation’s most advanced campus technology environments, and all UCF students are provided free e-mail accounts and Internet access. Students wishing to acquire a personal computer are strongly advised to consider a laptop equipped with a wireless networking card. Recommended configurations can be found on the university’s website at www.cstore.ucf.edu

### Student Responsibility for University Communication

UCF uses e-mail as the official means of notifying students of important university business and academic information concerning registration, deadlines, financial assistance, scholarships, student accounts (including tuition and fees), academic progress and problems, and many other critical items for satisfactory completion of a UCF degree program. The university sends all business-related and academic messages to a student's Knights E-mail address to ensure that there is one repository for that information. Every student must register for, and maintain a Knights E-mail account at http://www.knightsemail.ucf.edu and check it regularly to avoid missing important and critical information from the university. Any difficulty with establishing an account or with accessing an established account must be resolved through the UCF Computer Services Service Desk so that a student receives all important messages.

Additionally, each student must have an up-to-date emergency e-mail address and cell phone number by which to be reached in case of a crisis on campus. This emergency contact information will be used only for emergency purposes. Also, both permanent and local mailing addresses must be on record, so that any physical documents that must be mailed can be delivered.

It is critical that students maintain and regularly check their Knights E-mail account for official announcements and notifications. Communications sent to the Knights E-Mail address on record will be deemed adequate notice for all university communication, include issues related to academics, finances, registration, parking, and all other matters. The University does not accept responsibility if official communication fails to reach a student who has not registered for, or maintained and checked on a regular basis, their Knights E-Mail account. Please ensure that this information is current and that any changes in contact information are made online through the myUCF portal at https://my.ucf.edu/.

### Complaint Policy

The University of Central Florida supports the right of students to file grievances, lodge complaints, and make appeals in a safe environment free of fear, retaliation, or other adverse consequence. The university has a number of offices and committees that are responsible for implementing the institution's established procedures for addressing written academic and nonacademic student complaints.

In most cases, the recommended strategy for complaints of any nature is to ask the concerned individual to first contact the person or office most directly connected to the issue, unless there are compelling reasons not to do so. If the concerned individual does not want to contact a faculty or staff member directly, he or she begins with the next highest level of authority, which typically is the department chair or director. If the problem or complaint is unresolved or the individual is not satisfied with the resolution, he or she may file a written grievance or appeal. Specific procedures are included in specific sections of this catalog and the Golden Rule.
Records

Student records submitted to the university become the property of the university and cannot be returned to or copied for the student or released to a third party. Student records are digitally scanned.

Family Educational Rights and Privacy Act (FERPA)

The procedures for protecting the confidentiality of student records are based on state regulations and the federal Family Educational Rights and Privacy Act of 1974. FERPA affords students certain rights with respect to their education records. They are:

1. The right to inspect and review the student's education records within 30 days of the day the University receives a written request for access. Students should submit to the University Registrar, dean, head of the academic department, or other appropriate official, written requests that identify the record(s) they desire to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed;

2. The right to request the amendment of the student's education records that the student believes are inaccurate or misleading. The student may ask the University to amend a record that he or she believes is inaccurate or misleading. The student should write the University official responsible for the record, clearly identify the part of the record to be changed, and specify why the current record is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing;

3. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent. One exception that permits disclosure without consent is disclosure to school officials with legitimate educational interests.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by a State University to comply with the requirements of FERPA. The name and address of the office that administers FERPA is: Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington DC, 20202-4605.

Directory Info

FERPA authorizes the University to classify certain information concerning students as "directory information," which means that it may be released to anyone upon request. In accordance with Florida Statutes Section 228.093, the University is required to release student directory information to independent vendors upon request. Directory information at UCF includes:

- name,
- current mailing address,
- telephone number,
- date of birth,
- major field of study,
- dates of attendance,
- enrollment status,
- degrees and awards received,
- participation in officially registered activities and sports
- athletes' height and weight.

All other student information will be released in accordance with FERPA; in most cases this requires the student's prior written and signed consent. The University extends to students the opportunity to withhold any or all information, including directory information. Students can do this online at https://my.ucf.edu > Student Self Service > Student Center > Personal Information > FERPA/Directory Restriction or complete the Directory Disclosure/Release Authorization form.
available at the Registrar's Office (Millican Hall 161) or at http://www.registrar.sdes.ucf.edu, requesting that this information be withheld. The Golden Rule outlines the University procedures for confidentiality. For additional information describing FERPA policy, go to the Department of Education Family Policy Compliance Office website.

Higher Education Act

Lists, descriptions, and sources of information required for disclosure under the Higher Education Act may be obtained from the Registrar's Office (Millican Hall 161) or from the Registrar's website (Higher Education Act).

Doctoral Program Policies

Doctoral Admission

Requirements

Eligibility for admission to a doctoral program is limited to superior students who have demonstrated intellectual ability, high achievement, and adequate preparation for advanced study and research in a chosen field.

Minimum university standards for admission can be found in the Admissions section of the catalog. Meeting minimum university admission standards may not satisfy doctoral program admission requirements. Programs often require additional or higher criteria. See the Graduate Programs section of the catalog for specific program requirements.

Additionally, all applicants to doctoral programs must meet the following specific requirements:

Each applicant to a doctoral degree program shall present scores that are acceptable for the program to which the student is applying on the Graduate Record Examination (verbal, quantitative, and writing), or an equivalent measure on the GMAT, whichever is deemed most appropriate to the program. Students, including international students, who already have a graduate degree obtained from a regionally accredited institution in the same or in a related area are not required to take the Graduate Record Examination or GMAT unless it is required by the program.

Course Requirements

The primary objective of doctoral study is to educate students to a point of excellence in conducting, disseminating, and applying scholarly research, with the explicit goal of making original, substantive contributions to their degree discipline. The advanced nature of doctoral education requires student participation, debate, evaluation, and discussion of diverse ideas and approaches. Careful analysis, independent research, and greater understanding and application of ideas are also expected.

The doctoral degree program requirements will consist of core and elective courses, seminars, directed and doctoral research, independent study, and dissertation research.

- Each doctoral program of study will include a minimum of 72 semester hours of graduate credit beyond the baccalaureate degree or a minimum of 42 semester hours of graduate credit beyond the master's degree; these graduate credits must be taken as part of an approved graduate program of study. Some programs require considerably more than the minimum of 72 hours because of the nature of the discipline and the standards of the associated profession.
- All graduate credit in a doctoral program must be at 5000 level or higher.
- At least one-half of the credit hours used to meet program requirements must be in 6000-level or 7000-level courses, including the allowed number of research and dissertation hours.
- At least 50 percent of the credits offered for the degree are expected to be derived from a single field of concentration (that is, from one department). However, programs that are interdisciplinary in nature may be exempt from this policy upon approval from the Graduate Council Curriculum Committee.
- Only graduate-level credit with a grade of "C-" or higher may be used to satisfy degree requirements.
- A university-wide minimum of at least 27 hours of formal course work exclusive of Independent Study (XXX 6908), dissertation and research is required for all doctoral programs; some programs require a greater number of formal coursework hours.
- A university-wide minimum of at least 15 hours of dissertation credits is required for all doctoral programs, although some programs require a greater number of dissertation hours.
- The dissertation hour requirements may only be satisfied by enrollment in dissertation hours.
Course Levels

6000- and 7000-Level Courses—A minimum of 36 credit hours (including courses taken in a master's program) must be in 6000-level and 7000-level courses, which are designed, respectively, for graduate students and doctoral students only. For students with waived hours from an earned master's, this amount is at least one-half of the program hours remaining after the waived hours are applied.

Transfer of Credit

Types of Transfer Credit

Three different types of credit may be brought into a program of study for coursework taken outside of UCF or prior to enrolling in the program for which the degree is sought.

1. **External transfer credits:** course credits completed at a regionally accredited institution (excluding UCF) or recognized international institution.

   External transfer credits are eligible for transfer only if they meet the following criteria:
   - Only graduate-level courses may be accepted as transfer credits.
   - Only courses with a grade of "B-" or higher are allowed to be transferred into a program of study (not petitionable).
   - Only hours that are no more than seven years old at the time the degree is conferred may be transferred, unless part of an earned graduate degree.
   - Only formal coursework hours, but not thesis or research hours, may be used as transfer credits (not petitionable).

   External transfer credits are limited to up to 9 credit hours for students who do not have a completed graduate degree or for students in doctoral programs that require a master's degree for admission.

2. **Internal transfer credits:** graduate-level course credits completed

   1. at UCF prior to enrolling in the program for which the degree is sought, including those taken in undergraduate status at UCF as part of a Senior Scholar or accelerated program; or
   2. as a Traveling Scholar (see Traveling Scholars in the General Graduate Policies for more information).

   Internal credits are eligible for transfer only if they meet the following criteria:
   - Only graduate-level or higher courses may be accepted as transfer credits.
   - Only courses with a grade of "B-" or higher are allowed to be transferred into a program of study (not petitionable).
   - Only hours that are no more than seven years old at the time the degree is conferred may be transferred, unless part of an earned graduate degree.

   (Note: Internal thesis or research hours may be used as transfer credits, but may not be used to satisfy formal coursework requirements.)

   Graduate degree programs are permitted to accept as internal transfer credits up to nine hours of graduate-level coursework taken by a student while in undergraduate status at UCF. More than nine hours may be accepted if part of a formally approved accelerated program.

3. **Waived credits:** 30 credit hours in a program of study that are waived on the basis of an earned master's degree, not based on individual courses.

   For students in doctoral programs that do not require a master's degree for admission, students with an earned master's degree may have 30 credit hours waived if the following criteria are met:
   - the earned degree is from a regionally accredited institution or recognized foreign institution;
   - the master's degree was earned in the same or a closely related area of study

Transfer Credit Limits

In no case may the sum of all transfer and waived credits exceed 50% of the total degree requirements of any doctoral degree.

The acceptance of transfer or waived credits in a program of study must be approved by the program; graduate programs may
stipulate additional constraints beyond those included in the university transfer policy.

All transfer and waived credits to be used toward a doctoral degree should be finalized by the end of the third major (fall/spring) term of program enrollment (based on full-time enrollment), and must be finalized prior to the change to candidacy status.

The thesis or dissertation credit requirements of a program may not be satisfied by waived or transfer credits.

Students may be required to obtain a Joseph Silny evaluation to obtain transfer or waived credits from recognized international institutions.

For students who do not have a completed graduate degree, the total number of transfer credits are limited to up to 15 credit hours, or up to all of the hours taken to fulfill an earned UCF graduate certificate.

For students in doctoral programs that require a master's degree for admission, the total number of transfer credits are limited to up to 15 credit hours, or up to all of the hours taken to fulfill an earned UCF graduate certificate. Credits from the required, earned master's degree may not be used to satisfy doctoral program requirements.

For students in doctoral programs that do not require a master's degree for admission, students with an earned master's degree from a regionally accredited institution or recognized foreign institution may:

- waive 30 credit hours of requirements and credits in a program of study; or
- transfer up to 30 credit hours from any earned master's degree in the same or a closely related area of study, provided a course-by-course review is performed.

Students who transfer up to 30 credit hours from any earned master's degree or who have 30 credit hours waived from an earned master's degree may also transfer up to 9 additional graduate credits, provided the sum of all transfer and waived credits does not exceed 50% of the total degree requirements.

### Summary Table of Transfer Credit Limits

*Exceptions:

- Up to all of the hours taken to fulfill an earned UCF graduate certificate.
Academic Integrity Training

All students newly admitted to doctoral programs must complete training designed to inculcate an awareness and understanding of the fundamental issues of academic integrity and the responsible conduct of research (RCR) in a manner that is consistent with federal regulations. This required training includes: (1) the online Collaborative Institutional Training Initiative (CITI) "Responsible Conduct of Research" training module in the appropriate disciplinary area; and (2) four face-to-face ethics/RCR workshops coordinated by the College of Graduate Studies and the Office of Research and Commercialization, or an approved alternative training offered as a program requirement for all students in the program. Students in a program that has approved alternative ethics/RCR training must still complete the online CITI Responsible Conduct of Research training in the appropriate disciplinary area.

The workshops and CITI training modules are open to all UCF graduate students and postdoctoral fellows and associates. For the ethics/RCR workshops, priority is given to doctoral students who are required to complete these workshops prior to advancement to candidacy.

Deadlines:

1. All academic integrity/RCR training requirements must be completed prior to a student's advancement to candidacy.
2. The CITI module should be completed by the end of a student's second major (Fall/Spring) term of enrollment.
3. All academic integrity and RCR training requirements must be completed in a manner that is consistent with federal regulations.

A doctoral student who has not completed the required training in academic integrity and the responsible conduct of research will not be advanced to candidacy.

Workshops:

The College of Graduate Studies and the Office of Research and Commercialization offer a series of workshops to enable students to fulfill the four workshop requirement. Students must take at least two workshops from a set of core workshops which focus on: personal integrity in the classroom; plagiarism; data management (including fabrication, falsification, and confidentiality); authorship and peer review; mentor and trainee responsibilities; collaborative research; and conflicts of interest. Students must complete two additional workshops from among the set of core workshops or a series of additional workshops, which will provide more specialized training such as human subjects, animal welfare; and other areas of ethical concern unique to a discipline or research area.

Programs may develop alternatives for the training workshops that focus on issues of particular relevance to their specific disciplines and fields, or that better accommodate the schedules of their students. Alternative training must be offered as a program requirement for all students in the program. The training content must be specified in the syllabus/syllabi of required formal courses and include the core topics listed above as well as other topics appropriate to the specific discipline. Alternative training content must be submitted for review and approval by the College of Graduate Studies and the Office of Research and Commercialization prior to student attendance.

Further information concerning workshop sessions and registration and how to complete the CITI training module may be found at Academic Integrity Training.

Time Limitation and Continuous Enrollment

A student has seven years from the date of admission to the doctoral program to complete the dissertation and the doctoral degree. This is not affected by earning a master's degree along the way.

Credits that are part of an earned master's degree can be transferred into the plan of study upon approval of the program. Transfer credits from an unearned degree that are seven years or older at the time of admission, will not be transferred into a student's Program of Study.

Extenuating circumstances may arise that hinder a student's progress towards program completion and ability to maintain continuous enrollment. If such a need arises, the student may petition for a Special Leave of Absence. Leaves are classified as medical (e.g., illness, injury) or a non-medical (e.g., family needs, military deployment).

Students should be proactive in maintaining accurate records with the university and petition for a Special Leave of Absence prior to the need. When this is not possible, students should do so promptly after the need arises. Students are required to complete and submit the Leave of Absence form with all relevant supporting documents.

Students may be granted a Special Leave of Absence for up to one year or 3 consecutive academic terms. Course registration during the granted leave is not required. Time to degree
completion will be extended to account for the duration of the approved leave.

Students who do not maintain continuous enrollment without a Special Leave of Absence (see Continuous Attendance and Special Leave of Absence in the General Graduate Policies) or exceed the period allowed in the leave request must file for readmission to the university.

Readmission

If doctoral students do not maintain continuous enrollment (see Continuous Attendance in the General Graduate Policies), they must file for readmission to the university. To file for readmission, the student must complete a new online Application. For more information about readmission, refer to the Admissions in this catalog.

Readmission decisions are individually made, based on such factors as space in the program, reasons for the break in graduate education, progress in the degree program, among others. Readmission is not guaranteed.

Conferral of Master's Degrees for Students in Doctoral Degree Programs

A student making satisfactory progress in a doctoral program may be eligible to be awarded a master's degree in the same discipline. Policies concerning these degrees can be found under Master's Program Policies.

To avoid confusion of terminology for examinations, all programs should use the following terms:

**Qualifying Examination.** Eligibility to continue a doctoral program should be limited to superior students who have demonstrated intellectual ability, high achievement, and adequate preparation for advanced study and research in a chosen field. The decision to allow a student continuing progress toward a doctorate is made by the graduate committee of the program area concerned on the basis of the qualifying examination (optional by programs) and/or other criteria as specified by the individual program area. This exam is normally given within the first year of the doctoral program. This is a written examination and is permanently filed in the student's records in the program. Programs have their own requirements as to how many times this exam can be repeated.

**Candidacy Examination.** This exam takes place prior to admission to Candidacy Status. This is a written examination and is permanently filed in the student's permanent records. It is normally taken near the end of completion of coursework and must be passed before being allowed to enroll in doctoral dissertation (XXX 7980) hours. Programs have their own requirements, which are explained in their graduate student handbooks, as to how many times this exam can be repeated.

**Dissertation Proposal Examination.** After passing the general Candidacy Examination, the student will write and defend a Dissertation Proposal in an oral examination. Programs have their own requirements as to how many times this exam can be repeated. All materials including the approved proposal and other agreements will be kept in the student's file in the program.

**Dissertation Defense.** This is an oral examination (or defense) of the dissertation.

Examination Committee

In some programs, a doctoral examination committee will be formed consisting of several faculty members representing the appropriate disciplines and approved by the Dean or college designee to administer qualifying and/or candidacy examinations. In many cases, this committee will consist of the program graduate committee. All members will evaluate and vote as to whether students have successfully completed the exams.

Candidacy

**Admission to Candidacy**

A student must demonstrate his or her readiness for the PhD program by successfully completing the candidacy examination before admission to full doctoral status and enrollment into dissertation hours. The Candidacy Examination should be taken when the student is nearing the end of coursework. The exam is administered by the members of the student's dissertation advisory committee or another appropriate committee appointed by the program. External committee members of the dissertation advisory committee are not appointed until after the student has passed the Candidacy exam. Admission to candidacy will be approved by the program director and the college coordinator and forwarded to the UCF College of Graduate Studies for status change. Only after admission to candidacy may a student register for doctoral dissertation hours (XXX 7980). Effective beginning in the fall 2010 term, students must have passed
candidacy and have the candidacy and dissertation advisory
committee documentation received and processed by the
College of Graduate Studies prior to the first day of classes for
the term in order to enroll in dissertation hours for that term.
Students enrolling in dissertation hours for the first time during
the summer must have their paperwork submitted prior to the
first day of classes for Summer C, regardless of which summer
session they will enroll in.

Doctoral students admitted to candidacy are expected to enroll
in dissertation hours and to devote full-time effort to conducting
their dissertation research and writing the required dissertation
document. Students in doctoral candidacy must continuously
enroll in at least three hours of dissertation coursework (XXX
7980) each semester (including summer) until the dissertation is
completed.

Candidacy Examination

The purpose of the Candidacy Examination is for the student to
demonstrate a strong foundation of knowledge within the
specific discipline, and the ability and preparation to conduct
independent scholarly research. The committee may examine a
broad range of appropriate capabilities, including theory,
bibliography, research methodology, and the evaluation of
preliminary research, when appropriate. The examination must
have a written component; it also may include an oral defense of
a written report or dissertation proposal. All written examination
materials will be kept in the student's file in the program.

Dissertation Requirements

Dissertations are required in all PhD programs. For EdD
programs, some tracks require a dissertation, while others
require a dissertation-in-practice (see the program information
consists of an original and substantial research study designed,
conducted, and reported by the student with the guidance of the
Dissertation Committee. The written dissertation must include a
common theme with an introduction and literature review,
details of the study, and results and conclusions prepared in
accordance with program and university requirements. The
dissertation is expected to represent a significant contribution to
the discipline. Since this work must be original, it is very
important that care is taken in properly citing ideas and
quotations of others. Failure to do so is academic dishonesty and
subject to termination from the program without receiving the
degree. An oral defense of the dissertation is required.

Enrollment in Dissertation
Hours

The university requires all doctoral students to take a minimum
of 15 credit hours of doctoral dissertation hours; however,
specific programs may require more than this minimum.
Dissertation research is considered to be a full-time effort, and
post-candidacy enrollment in at least three doctoral dissertation
(XXX 7980) credit hours constitutes full-time graduate status.
Doctoral students who have passed candidacy and have begun
taking doctoral dissertation hours (XXX 7980) must enroll in at
least three dissertation hours each semester (including summers,
without skipping a semester) and continue doing so until they
complete and successfully defend the dissertation. Students
wishing to enroll in fewer than 3 credit hours must have
approval from their advisor. Students who need to interrupt their
dissertation work for extenuating circumstances must submit a
Leave of Absence Form to the College of Graduate Studies.
Submission and approval of the form must be obtained prior to
the first day of classes for the term of non-enrollment.

Dissertation Advisory
Committee Membership

Doctoral students must have a Dissertation Advisory Committee
prior to advancement to candidacy status. The Committee will
consist of a minimum of four members who are approved
members of the Graduate Faculty or Graduate Faculty Scholars
(see Graduate Faculty). At least three members must be
Graduate Faculty, one of whom must serve as the chair of the
committee. One member must be from either outside the
student's department at UCF (or college, if a college-wide
program) or outside the university. The Graduate Program
Committee may specify additional advisory committee
membership beyond the minimum of four. These additional
advisory committee members must also be approved members
of the Graduate Faculty or Graduate Faculty Scholars. Graduate
Faculty members must form the majority of any given
committee.

Committee membership must be approved by the program
director and submitted to the College of Graduate Studies. All
members must be in fields related to the dissertation topic. The
UCF College of Graduate Studies reserves the right to review
appointments to a dissertation advisory committee, place a
representative on any dissertation advisory committee, or
appoint a co-chair. A student may request a change in
membership of the dissertation advisory committee with the
approval of the program director and re-submission to the
College of Graduate Studies.
All members vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal and final dissertation must be approved by a majority of the committee.

Responsibilities of Members of Doctoral Advisory Committees

All members of the doctoral advisory committee have responsibilities. See the Graduate Faculty and Graduate Faculty Scholars Policy for this information.

Dissertation Preparation

Thesis and Dissertation (ETD) describes university requirements and formatting instructions for dissertations and outlines the steps graduate students must follow in order to submit their dissertations electronically to the UCF College of Graduate Studies. The Thesis and Dissertation Office offers online and face-to-face workshops to inform graduate students about procedures, deadlines, and requirements associated with preparing a dissertation. Students who have just passed Candidacy are strongly encouraged to visit the online workshop.

Dissertation students will submit their dissertations electronically. Electronic thesis/dissertation (ETD) submissions will be archived by the UCF library in digital format and will be more widely accessible. In addition, students may use video and audio clips as well as other formats that may be appropriate for their field of study.

All dissertations that use research involving human subjects, including surveys, must obtain approval from an independent board, the Institutional Review Board (IRB), for this prior to starting the research. Graduate students and the faculty that supervise them are required to attend training on IRB policies, so this needs to start well in advance of the research start date. It is imperative that proper procedures are followed when using human subjects in research projects. Information about this process can be obtained from the Office of Research and Commercialization (www.research.ucf.edu). Click on "Compliance" and the IRB Policy and Procedures Manual is available. In addition, should the nature of the research or the faculty supervision change since the IRB approval was obtained, then new IRB approval must be sought. Failure to obtain this prior approval could jeopardize receipt of the student's degree.

Students who wish to complete their degree requirements in a given semester must take their oral defense and submit their dissertation to the UCF College of Graduate Studies by the dates shown in the Academic Calendar.

Dissertation Defense

The dissertation defense is an oral presentation and defense of the written dissertation describing the student's research. The advisory committee will evaluate and judge the dissertation defense. Successful students must demonstrate that they are able to conduct and report original independent research that contributes substantially to the discipline in which they study. The defense is a formal academic requirement and should be accorded respect and dignity, and thus, no refreshments or other distractions should be served during the defense.

The dean of the college or his/her designee will normally attend all dissertation defenses. Dissertations will be approved by a majority vote of the dissertation advisory committee. Further approval is required from the Dean or Dean designee and the UCF College of Graduate Studies before final acceptance of the dissertation in fulfilling degree requirements.

Dissertation Virtual Defense

Graduate programs may elect to offer the option of a virtual dissertation defense (student off-campus defense) upon approval of the program coordinator/director, the department, and the college. Programs that choose to offer the option of a virtual defense must develop and ensure procedures for the implementation of the virtual defense process and procedures must be published in the program's handbook. These procedures should address the form and time for the student's request for a virtual defense, the process for seeking approval, the teleconferencing facilities and equipment to be used, the availability of technical support during the defense, alternative plans if needed, and other relevant issues. Use of a web conferencing platform like Lync or Adobe Connect is recommended as is the preparation of participants and testing of the system prior to the defense date. Students must also seek approval for a virtual defense by the time they file the intent to graduate. It is expected that at minimum the dissertation committee chair will be present at the campus location of the public defense. Individual programs may add further restrictions or requirements for students to proceed with virtual defenses.
Review for Original Work

The university requires all students submitting a dissertation as part of their graduate degree requirements to first have their electronic documents submitted through iThenticate for advisement purposes and for review of originality. The dissertation chair is responsible for scheduling this submission to iThenticate and for reviewing the results from iThenticate with the student's advisory committee. The advisory committee uses the results appropriately to assist the student in the preparation of their dissertation.

Before the student may be approved for final submission to the university, the dissertation chair must indicate completion of the Review for Original Work through iThenticate by signing the Dissertation Approval Form.

Dissertation Dissemination

While UCF respects the wishes of students who would like to publish their work and/or apply for patents, it is essential for scholarly research conducted at a university to be available for dissemination. While several options are available for the release of an ETD, it is the goal of the university that all dissertations be available through the UCF Libraries catalog. Students with potential patent concerns are required to discuss the following options with their dissertation adviser and indicate the availability choice on the Thesis and Dissertation Release Option electronic form, which the student submits in the myUCF Student Center.

For those with no patent or copyright concerns:
- Immediate worldwide dissemination with no restrictions.

For those who have patent issues, dissemination options must be discussed and agreed to with your adviser. Choices are:
- Pending dissemination of the entire work for six months for patent or other proprietary issues, with an additional six months extension available. Once the patent and proprietary issues are resolved, then immediate worldwide dissemination with no restrictions.
- Pending dissemination of the entire work for six months for patent or other proprietary issues, with an additional six months extension available. Once the patent and proprietary issues are resolved, choosing this option allows the student to make the dissertation available to the university community for the period chosen below, and then for it to be distributed via the Web beyond that time.

- one year
- three years*
- five years*

For those who have copyright concerns, dissemination options are a student decision within the guidelines of individual departments that may have requirements for dissemination. If a department has no guidelines for dissemination, then students are free to choose one of the options below. In general, those in the sciences and engineering will choose one year while students in the arts and humanities may choose longer. Choosing this option allows the student to make the dissertation available to the university community for the period chosen below, and then for it to be distributed via the Web beyond that time.

- one year
- three years*
- five years*

*Does not require dissertation adviser signature and approval.

Public Access

Students, faculty, staff, and other interested parties are strongly encouraged to attend dissertation final defense sessions. Notices providing the date, time, and location of such meetings must be distributed to all academic departments.

These sessions are educational and informative for graduate students and provide an opportunity for colleagues to observe the work of their peers with students. At the discretion of the Chair of the Committee, questions may be invited from the audience. That part of the session involving committee discussion leading to a vote on the acceptance of the work will be closed. Sessions may be recessed briefly to excuse visitors and the candidate before this stage begins.

Education Specialist Programs

Education Specialist (EdS) degrees are awarded in Educational Leadership, Curriculum and Instruction, and School Psychology (which offers a track in School Counseling). The EdS degree provides an opportunity for professionals in leadership positions in an educational environment to receive in-depth academic study. This degree provides the opportunity for the development of a high level of professional proficiency in such areas as instruction, supervision, administration, curriculum, and current research literature. The primary goal of the EdS degree is teaching or acquiring professional proficiency in a specialized education-related area. Because the purpose of the EdS degree may differ from that of the EdD, credit earned in an EdS
program is not automatically transferable to a doctoral program. Instead, if a holder of an EdS degree enters a doctoral program at a later date, the doctoral advisory committee will decide how much of the credit earned in the EdS program will be credited toward the doctorate. In any case, only 30 hours taken prior to doctoral status may be transferred into the doctoral program of study.

Specialist Admission Requirements

Admission to the Education Specialist program requires (1) a master's degree in an approved program from a regionally accredited institution or recognized foreign institution (except in the case of the School Psychology Specialist program, which does not require a master's degree, but does have other special admission criteria), (2) a competitive score on the GRE, (3) other criteria as required by the individual departments, and (4) a recommendation for admission by the appropriate College of Education Graduate Admissions Committee.

Examinations

Educational Leadership majors must successfully complete one 5-hour examination in their major area and one 3-hour examination in an area of specialization. Curriculum and Instruction majors must successfully complete one 3-hour examination in their teaching specialty and one 3-hour examination in the Educational Foundations area. School Psychology (School Psychology Track) students must successfully complete one 3-hour examination during the last semester of enrollment.

Program of Study and Academic Standards

A program of study (i.e., required course work) will be specified by the student's program area and approved by the college. Minimal core requirements for the EdS degree consist of 36 hours beyond the master's degree, which must include a minimum of 12 graduate-level hours in the specialization area, 6 graduate-level hours in research/statistics, and additional core requirements that are specific to each of the EdS degrees. An approved program of study must be on file with the College of Graduate Studies by the end of the student's second major term. A graduate status GPA of 3.0 must be maintained in all graduate course work taken at UCF since admission into the specialist program. All academic standards which apply to master's students will also apply to specialist students.

Transfer of Credit

Any credits taken prior to the term of admission to your program and used to satisfy specific program requirements are considered graduate transfer credits.

The acceptance of transfer credits in a program of study must be approved by the program. Graduate programs may stipulate additional constraints beyond those included in the university transfer policy.

All transfer credits toward a master's or specialist degree should be finalized by the end of the second term of program enrollment (based on full-time enrollment), and must be finalized by the end of the term prior to the term of expected graduation.

The thesis credit requirement of a program may not be satisfied by transfer credits.

Students with international transfer credits from recognized international institutions may be required to obtain a Joseph Silny evaluation.

No more than 9 credit hours from a previously earned degree may be used to satisfy the requirements of a specialist's degree, except as part of a formally approved accelerated bachelor's/master's program.

The total number of transfer credits may not exceed 50% of program requirements, except under two circumstances.

1. UCF graduate certificate credits: up to all of the hours taken to fulfill an earned UCF graduate certificate can be used toward a graduate degree within the same or closely related discipline. If the number of transfer credits for an earned UCF graduate certificate is equal to or exceeds 50% of program requirements, additional transfer credits are not allowed.

2. Transfer of credits from a UCF doctoral program to a master's program (other than master's degrees obtained along the way to a doctoral degree): transfer of credits that exceed 50% of program requirements is at the discretion of the program and requires approval of the Appeals Committee.

Two different types of transfer credit can be brought into a specialist's program of study.
1. **External transfer credits**: graduate-level course credits completed at a regionally accredited institution (excluding UCF) or recognized international institution.

External credits are eligible for transfer only if they meet the following criteria:
- Only graduate-level or higher courses may be accepted as transfer credits.
- Only courses with a grade of "B-" or higher are allowed to be transferred into a program of study (not petitionable).
- Only hours that are no more than seven years old at the time the degree is conferred may be transferred, unless part of an earned graduate or professional degree.
- Only formal course work hours, but not thesis or research hours, may be used as transfer credits (not petitionable).

External transfer credits are limited to up to 9 credit hours.

2. **Internal transfer credits**: graduate-level course credits completed

1. at UCF prior to enrolling in the program for which the degree is sought, including those taken in undergraduate status at UCF as part of a Senior Scholar or accelerated program; or
2. as a Traveling Scholar (see Traveling Scholars in the General Graduate Policies for more information).

Internal credits are eligible for transfer only if they meet the following criteria:
- Only graduate-level courses may be accepted as transfer credits.
- Only courses with a grade of "B-" or higher are allowed to be transferred into a program of study (not petitionable).
- Only hours that are no more than seven years old at the time the degree is conferred may be transferred, unless part of an earned graduate degree.

Graduate degree programs are permitted to accept up to nine hours of graduate-level course work taken by a student while in undergraduate status at UCF. More than nine hours may be accepted if part of a formally approved accelerated program.

Graduate degree programs are permitted to accept up to nine credit hours.

---

**Summary Table of Transfer Credit Limits**

<table>
<thead>
<tr>
<th>Student Situation</th>
<th>Specific Requirements</th>
<th>General Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Transfer credits from an earned graduate degree</td>
<td>≤ 9 SCH</td>
<td>Sum may not exceed 9 SCH</td>
</tr>
<tr>
<td>External credits</td>
<td>≤ 9 SCH</td>
<td></td>
</tr>
<tr>

<td>≤ 9 SCH</td>
<td></td>
</tr>
<tr>
<td>Other internal transfer credits</td>
<td>Total transfer credits may not exceed 50% of program requirements*</td>
<td></td>
</tr>
</tbody>
</table>

*Exceptions:
- May exceed 50% only if all transfer credits are from a single earned UCF graduate certificate; no additional credits may be transferred.
- Transfer of credits from a UCF doctoral program to a master's program within the same discipline.

**Time Limitation and Continuous Attendance**

The student has seven years from the date of admission (prerequisite, articulation, and foundation courses are exempt) to the specialist program to complete the degree. No course older than seven years, at graduation, may be used in the program of study for a specialist degree. Students who do not maintain continuous enrollment (missing enrollment at the university for a period of three consecutive semesters) must file for readmission to the university, although seven years is measured from when the student was first admitted to the program.

**Readmission**

Specialist students should maintain continuous enrollment in their degree program. Students who anticipate that they may not be able to enroll continuously due to external circumstances
should apply for a Special Leave of Absence (see Special Leave of Absence in the General Graduate Policies section).

If specialist students do not apply for a Special Leave of Absence and do not maintain continuous enrollment (see Continuous Attendance in the General Graduate Policies section), they must file for readmission to the university. To file for readmission, the student must complete a new online Application. For more information about readmission, refer to the Admissions section of this catalog.

Readmission decisions are individually made, based on such factors as space in the program, reasons for the break in graduate education, progress in the degree program, among others. Readmission is not guaranteed.

### Master's Program Policies

#### Master's Admission Requirements

Admissions to a master's degree program requires a bachelor's degree from a regionally accredited institution, or recognized foreign institution, and a minimum of a 3.0 GPA in the overall bachelor's degree program or in the last 60 attempted semester hours of undergraduate studies. Some master's programs do not require a GRE or GMAT score for the admissions process while others do. Please see the Graduate Programs section of the catalog for information about specific program requirements.

Programs often require additional or higher criteria. An applicant's character, integrity and general fitness to practice a particular profession may also be considered in the admission process. The university encourages applications from a diverse population and values diversity in our graduate programs.

#### Course Requirements

The program requirements for a master's degree may include core and elective courses, seminars, independent study, clinical courses, directed research, and thesis research.

- A minimum of 30 semester hours of postbaccalaureate, graduate work (5000-level or higher) is required and must be taken as part of an approved graduate program of study. Some programs require more than the minimum of 30 hours because of the nature of the discipline and the standards of the associated profession.

- At least half of the credit hours used to meet program requirements must be at the 6000 level.
- Only graduate-level work with a grade of "C-" or higher may be used to satisfy degree requirements.
- For the master's degree, at least 24 semester hours of core and elective courses must be earned exclusive of thesis and research.
- In no case will the number of thesis hours in excess of the amount required by a program be counted toward degree completion.
- At least 50 percent of the credits offered for the degree are expected to be derived from a single field of concentration (that is, from one department). However, programs that are interdisciplinary in nature may be exempt from this policy upon approval from the Graduate Council Curriculum Committee.
- A research report, capstone course, comprehensive exam, or other culminating experience that demonstrates that graduate students have engaged in independent learning is required in a nonthesis option master's program. An explanation of how the culminating experience promotes independent learning is required in each program's curricular description.
- A thesis hour requirement may only be satisfied by enrollment in thesis hours.
- In the case where a student changes from a thesis to a nonthesis option, up to 6 thesis hours may be used to substitute for other research hours.

### Independent Study Hours

Independent study (XXX 6908) may be taken for a total of no more than six semester hours.

### Residence Credit

The master's degree program must include at least 21 semester credit hours taken at UCF. Residence credits may be earned through enrollment in courses physically offered on the main campus; or at the UCF regional campuses (Brevard, Daytona Beach, and Downtown); or at geographical locations where UCF courses are being taught by regular UCF faculty members. Residence credits may also include UCF courses offered through the web or courses taken as a Traveling Scholar if prior approval is obtained.
Transfer of Credit

Any credits taken prior to the term of admission to your program and used to satisfy specific program requirements are considered graduate transfer credits.

The acceptance of transfer credits in a program of study must be approved by the program. Graduate programs may stipulate additional constraints beyond those included in the university transfer policy.

All transfer credits toward a master's or specialist degree should be finalized by the end of the second term of program enrollment (based on full-time enrollment), and must be finalized by the end of the term prior to the term of expected graduation.

The thesis credit requirement of a program may not be satisfied by transfer credits.

Students with international transfer credits from recognized international institutions may be required to obtain a Joseph Silyn evaluation.

No more than 9 credit hours from a previously earned degree may be used to satisfy the requirements of a master's degree, except as part of a formally approved accelerated bachelor's/master's program.

The total number of transfer credits may not exceed 50% of program requirements, except under two circumstances.

1. UCF graduate certificate credits: up to all of the hours taken to fulfill an earned UCF graduate certificate can be used toward a graduate degree within the same or closely related discipline. If the number of transfer credits for an earned UCF graduate certificate is equal to or exceeds 50% of program requirements, additional transfer credits are not allowed.

2. Transfer of credits from a UCF doctoral program to a master's program (other than master's degrees obtained along the way to a doctoral degree): transfer of credits that exceed 50% of program requirements is at the discretion of the program and requires approval of the Appeals Committee.

Two different types of transfer credit can be brought into a master's program of study.

1. External credits are eligible for transfer only if they meet the following criteria:

   - External transfer credits: graduate-level course credits completed at a regionally accredited institution.
   - Only graduate-level or higher courses may be accepted as transfer credits.
   - Only courses with a grade of "B-" or higher are allowed to be transferred into a program of study (not petitionable).
   - Only hours that are no more than seven years old at the time the degree is conferred may be transferred, unless part of an earned graduate or professional degree.
   - Only formal course work hours, but not thesis or research hours, may be used as transfer credits (not petitionable).

2. Internal transfer credits: graduate-level course credits completed

   - at UCF prior to enrolling in the program for which the degree is sought, including those taken in undergraduate status at UCF as part of a Senior Scholar or accelerated program; or
   - as a Traveling Scholar (see Traveling Scholars in the General Graduate Policies for more information).

Internal credits are eligible for transfer only if they meet the following criteria:

   - Only graduate-level courses may be accepted as transfer credits.
   - Only courses with a grade of "B-" or higher are allowed to be transferred into a program of study (not petitionable).
   - Only hours that are no more than seven years old at the time the degree is conferred may be transferred, unless part of an earned graduate degree.

Graduate degree programs are permitted to accept up to nine hours of graduate-level course work taken by a student while in undergraduate status at UCF. More than nine hours may be accepted if part of a formally approved accelerated program.

The sum of transfer credits from an earned graduate or professional degree, external transfer credits, and transfer credits from graduate-level course work taken by a student while in undergraduate status at UCF may not exceed nine credit hours.

Accelerated Undergraduate and Graduate Programs

Some programs combine undergraduate and graduate coursework in a more seamless educational experience for students, reducing the time spent working on both degrees and providing a challenging educational experience to outstanding undergraduates. These accelerated bachelor's and master's (4+1) programs usually will allow students to complete a bachelor's and master's degree within about five years and are intended for only the most highly qualified undergraduate students.

While students are classified as undergraduate students, they are subject to undergraduate policies. Similarly, when classified as graduate students, they are subject to graduate policies and may qualify for graduate financial support.

The undergraduate requirements listed in the Graduate Catalog for specific programs are for informational purposes only. The official requirements are detailed in the Undergraduate Catalog and take precedence over what is described here.

Senior Scholars

UCF undergraduates who meet departmental eligibility requirements may enroll in UCF graduate courses and use them toward their undergraduate degree and their graduate program of study upon admission to a UCF graduate program. As Senior Scholars, they are entitled to use up to nine graduate credit hours (more may apply for some accelerated programs) toward a UCF graduate degree or certificate, provided they have received advisement and written approval to do so from the graduate program director. This permission must be obtained before enrolling in the graduate courses. In addition to approval from the graduate program director, undergraduates must consult their undergraduate adviser to ensure that registration in graduate-level course work will meet their bachelor's degree requirements. The student must receive college and university approval to interrupt the residency requirement. The University Waiver Form can be obtained from the undergraduate department office. Tuition and fees for graduate-level courses are different from undergraduate courses, and it is the student's responsibility to consult with the Office of Student Financial Assistance (http://finaid.ucf.edu/) regarding adjustments that might be needed for Bright Futures and other scholarship funding.

Time Limitation for Degree Completion

The student has seven years from the date of admission to the master's program to complete the degree. Students may transfer in coursework according to the transfer work policy, however, courses older than seven years at the time of admission will not be transferred into the student's Program of Study.

Students who anticipate being out for an extended period of three consecutive semesters or longer should apply for a Special Leave of Absence no later than the end of the add/drop period of the third semester of absence. Students who do not maintain continuous enrollment without a Special Leave of Absence (see Continuous Attendance and Special Leave of Absence in the General Graduate Policies) must file for readmission to the university, although seven years is measured from when the student was first admitted to the program.
Readmission

Master's students should maintain continuous enrollment in their degree program. Students who anticipate that they may not be able to enroll continuously due to external circumstances should apply for a Special Leave of Absence (see Special Leave of Absence in the General Graduate Policies).

If master's students do not maintain continuous enrollment and have not filed for a special leave of absence (see Continuous Attendance in the General Graduate Policies), they must file for readmission to the university. To file for readmission, the student must complete a new online Application. For more information about readmission, refer to the Admissions section of this catalog.

Readmission decisions are individually made, based on such factors as space in the program, reasons for the break in graduate education, progress in the degree program, among others. Readmission is not guaranteed.

Other Academic Requirements

Comprehensive Culminating Experience

An appropriate culminating academic experience is required of all master's degree students. It may include a thesis defense, written or oral examination, research report, capstone course, presentation and defense of a portfolio of student work, or other appropriate scholarly activity of a type that has been approved by the Graduate Council that demonstrates that graduate students have engaged in independent learning. An explanation of how the culminating experience promotes independent learning is required in each program's curricular description.

Advisement

Appointment of Committee or Adviser

An academic adviser and advisory committee is required when the student is enrolled in a thesis option and can be useful when there is substantial flexibility in course work. It is the responsibility of the department to appoint an adviser and advisory committee.

Thesis Requirements

The thesis is the culminating or comprehensive experience for those who conduct an original research study as part of a thesis-option program. The thesis consists of a common theme with an introduction and literature review, details of the study, and results and conclusions. Since the work is original, it is very important that care is taken in properly citing ideas and quotations of others. Academic dishonesty in thesis, research report and dissertation work may result in termination from the degree program.

An oral defense of the thesis is required. The approved thesis must be written and prepared in accordance with program, college, and university requirements. Thesis and Dissertation (ETD) describes university requirements and formatting instructions for theses and outlines the steps that graduate students must follow in order to submit their theses electronically to the UCF College of Graduate Studies.

Additionally, the Thesis and Dissertation Office offers workshops to inform graduate students about procedures, deadlines, and requirements associated with preparing a thesis.

Thesis students are required to submit their thesis electronically. Electronic thesis/dissertation (ETD) submissions are archived by the UCF library in digital format that is widely accessible. The electronic thesis may include video and audio clips as well as other formats that are appropriate for the field of study.

All theses that use research involving human subjects, including surveys, must obtain approval from an independent board, the Institutional Review Board (IRB) prior to starting the research. Graduate students and the faculty that supervise them are required to attend training on IRB policies, so this needs to start well in advance of the research start date. It is imperative that proper procedures are followed when using human subjects in research projects. Information about this process can be obtained from the Office of Research and Commercialization (www.research.ucf.edu). Click on "Compliance" and the IRB Policy and Procedures Manual is available. In addition, should the nature of the research or the faculty supervision change since the IRB approval was obtained, then new IRB approval must be sought. Failure to obtain this prior approval could jeopardize receipt of the student's degree.
Students who wish to complete their degree requirements in a given semester must take their oral defense and submit their final electronic copy to the UCF College of Graduate Studies by the dates shown in the Academic Calendar.

Thesis Advisory Committee Membership

A student writing a thesis must have a Thesis Advisory Committee consisting of at least three members who are approved members of the Graduate Faculty or Graduate Faculty Scholars (www.graduatecatalog.ucf.edu/gradfaculty/). This committee will recommend to the Dean of the college regarding the student's program of study, provide continual guidance for the student, and be the principal mechanism for the evaluation of the student's thesis and performance in any general examinations. At least two members of the Thesis Advisory Committee must be Graduate Faculty, one of whom must serve as the chair of the committee. Graduate Faculty Scholars may serve as a member or co-chair of a thesis advisory committee but may not serve as the chair.

Program areas may specify additional committee membership beyond the minimum of three. These committee members must also be approved members of the Graduate Faculty or Graduate Faculty Scholars. Graduate Faculty members must form the majority of any given committee. Additional information regarding the criteria for serving as a member, co-chair, or chair of a Thesis Advisory Committee is provided in the updated Graduate Faculty policy.

Committee membership must be approved by the program director and submitted to the College of Graduate Studies. All members must be in fields related to the thesis topic. The UCF College of Graduate Studies reserves the right to review appointments to a Thesis Advisory Committee, place a representative on any Thesis Advisory Committee, or appoint a co-chair. A student may request a change in membership of the Thesis Advisory Committee with the approval of the program director and re-submission to the College of Graduate Studies.

All committee members vote on acceptance or rejection of the final thesis. The thesis proposal and final thesis must be approved by a majority of the committee.

Responsibilities of Members of Thesis Advisory Committees

All members of the doctoral advisory committee have responsibilities. See the Graduate Faculty and Graduate Faculty Scholars Policy for this information.

Enrollment in Thesis Hours

After completion of other course requirements, master's level students may be considered full-time if they enroll in at least three credit hours of thesis (XXX 6971) hours only. They subsequently must enroll in three thesis hours each semester continuously (including summers) until successful completion of minimum program coursework and thesis hours. After which, with the approval of the thesis committee chair or adviser, students may enroll in a minimum of one thesis hour per semester. Students enrolled in thesis hours simultaneously with coursework hours must be enrolled in a combined nine credit hours to be considered full time for the fall and spring semesters, or six credit hours to be enrolled full time in the summer semester. Students who need to interrupt their thesis work for extenuating circumstances must submit a Leave of Absence Form to the College of Graduate Studies. Submission and approval of the form must be obtained prior to the first day of classes for the term of non-enrollment.

Thesis Defense

Thesis defenses will be approved by a majority vote of the Thesis Advisory Committee. Thesis committee members who do not approve of the thesis may choose not to sign the thesis approval sheet. Further approval is required from the Dean or Dean designee and the UCF College of Graduate Studies before final acceptance of the thesis in fulfilling degree requirements.

Virtual Thesis Defenses

Graduate programs may elect to offer the option of a virtual thesis defense (student off-campus defense) upon approval of the program coordinator/director, the department, and the college. Programs that choose to offer the option of a virtual defense must develop and ensure procedures for the implementation of the virtual defense process and procedures must be published in the program's handbook. These procedures should address the form and time for the student's request for a
virtual defense, the process for seeking approval, the teleconferencing facilities and equipment to be used, the availability of technical support during the defense, alternative plans if needed, and other relevant issues. Use of a web conferencing platform like Lync or Adobe Connect is recommended as is the preparation of participants and testing of the system prior to the defense date. Students should also seek approval for a virtual defense by the time they file the intent to graduate. It is expected that at minimum the thesis committee chair will be present at the campus location of the public defense. Individual programs may add further restrictions or requirements for students to proceed with virtual defenses.

Review for Original Work

The university requires all students submitting a thesis as part of their graduate degree requirements to first have their electronic documents submitted through iThenticate for advisement purposes and for review of originality. The thesis chair is responsible for scheduling this submission to iThenticate and for reviewing the results from iThenticate with the student's advisory committee. The advisory committee uses the results appropriately to assist the student in the preparation of their thesis.

Before the student may be approved for final submission to the university, the thesis chair must indicate completion of the Review for Original Work through iThenticate by signing the Thesis Approval Form.

Thesis Dissemination

While UCF respects the wishes of students who would like to publish their work and/or apply for patents, it is essential for scholarly research conducted at a university to be available for dissemination. While several options are available for the release of an ETD, it is the goal of the university that all theses be available through the UCF Libraries catalog. Upon uploading the final ETD to the UCF Libraries ETD website, students, in some cases with their advisers, must choose one of the options for the availability of their ETD through UCF. Students with potential patent concerns are required to discuss the following options with their thesis adviser and indicate the availability choice on the Thesis and Dissertation Release Option electronic form, which the student submits in the myUCF Student Center.

For those with no patent or copyright concerns:

- Immediate worldwide dissemination with no restrictions.

For those who have patent issues, dissemination options must be discussed and agreed to with your adviser. Choices are:

- Pending dissemination of the entire work for six months for patent or other proprietary issues, with an additional six months extension available. Once the patent and proprietary issues are resolved, then immediate worldwide dissemination with no restrictions.
- Pending dissemination of the entire work for six months for patent or other proprietary issues, with an additional six months extension available. Once the patent and proprietary issues are resolved, choosing this option allows the student to make the thesis available to the university community for the period chosen below, and then for it to be distributed via the Web beyond that time.
  - one year
  - three years*
  - five years*

For those who have copyright concerns, dissemination options are a student decision within the guidelines of individual departments that may have requirements for dissemination. If a department has no guidelines for dissemination, then students are free to choose one of the options below. In general, those in the sciences and engineering will choose one year while students in the arts and humanities may choose longer. Choosing this option allows the student to make the thesis available to the university community for the period chosen below, and then for it to be distributed via the Web beyond that time.

- one year
- three years*
- five years*

*Does not require thesis adviser signature and approval.

Public Access

Students, faculty, staff, and other interested parties are strongly encouraged to attend thesis final defense sessions. Notices providing date, time, and location of such meetings must be distributed to all academic departments.

These sessions are educational and informative for graduate students and provide an opportunity for colleagues to observe the work of their peers. At the discretion of the Chair of the Thesis Advisory Committee, questions may be invited from the audience. That part of the session involving committee discussion leading to a vote on the acceptance of the work will be closed. Sessions may be recessed briefly to excuse visitors and the candidate before this stage begins.
Conferral of Master's Degrees for Students in Doctoral Degree Programs

A student making satisfactory progress in a doctoral program may be eligible to be awarded a master's degree in the same discipline. The master's degree program and the College of Graduate Studies have the authority to determine whether the doctoral program credits satisfactorily fulfill the master's degree requirements. All requirements for the master's degree must be fulfilled, including passing all examinations and submitting a thesis, if so required. Up to a maximum of 9 SCH of substitutions are allowable, provided that the substitutions are higher level courses for their precise lower level counterparts, exclusive of substitutions for thesis hours.

In such cases:

1. The program requirements for the master's degree are governed by the requirement term used for the doctoral degree program.
2. The two degrees are not considered to be part of a formal "dual degree" program and, therefore, are not subject to the policies governing dual degree programs.
3. Courses credited towards the Master's degree are not implemented as transfer credits to another program, and therefore fall outside of the transfer credit policy. The general restriction that no credit hours may be counted for more than two degree programs applies to these master's degrees as well. Credits from a previously earned master's degree may not be used to fulfill the requirements of a master's degree for a student in a doctoral degree program (a "master's along-the-way").

Graduate Certificate Program Policies

Graduate certificate programs are a way for universities to provide the latest disciplinary knowledge in the most flexible and convenient formats for the professional development of its alums and others who desire further education. Graduate certificate programs are very popular options at UCF for graduate study without having to commit to an existing master's or doctoral program. One of the benefits of enrolling in a graduate certificate program is that later, should students decide to do so, they can usually apply all of the credits earned in the graduate certificate to a graduate program. The graduate certificate program is meant to be flexible and offer a short-term of study that provides specialized knowledge that supplements an existing degree. Graduate certificate programs are particularly helpful to those professions where licensure and continuing professional development are required. Many of our graduate certificate programs are offered online for convenience. One of the most important benefits of our graduate certificate programs is that they are taught by our graduate faculty using regular graduate courses at the university.

UCF has 68 graduate certificate programs available to supplement existing graduate programs or to provide specialized knowledge in disciplines that complement the education of working professionals in the metropolitan area served by UCF. Many of our area employees have advanced graduate degrees and can enhance their education with specialized groups of courses. Frequently, a package of specialized courses that forms a certificate will increase employment credentials, lead to career enhancement, and produce more income.

It is the intent of these programs to be current and to provide specialized, state-of-the-art content to area employees. Often certificate programs are offered using flexible and nontraditional delivery systems that provide the best service to the employees in this metropolitan area. Distributed learning, weekend courses, evening courses, and accelerated term courses are acceptable.

Certificate programs are often ideal for nondegree students who would like to sample graduate courses before committing to a graduate degree program. Certificate programs may round out a graduate degree program, providing a special emphasis that supplements a graduate degree. Frequently, a certificate program can provide an interdisciplinary focus that provides more depth and understanding to an existing graduate program.

Any academic unit may propose a graduate certificate program that encompasses graduate courses in its graduate program. If an interdisciplinary certificate program is proposed, it must be acceptable to departments and faculty offering the courses and graduate programs on which the certificate program is based.

Certificate Program Admission Requirements

Students currently admitted to a graduate degree program or to nondegree status can apply and are eligible to enroll in graduate certificate programs. In addition, individuals who have previously completed bachelor's, master's, or doctoral degrees are eligible to enroll in certificate programs. In order to apply to a graduate certificate program, a student must submit an online
admissions application, pay a $30 application fee, and submit an official transcript showing an earned bachelor's or higher degree from a regionally accredited or recognized foreign institution. On the online application, the student must designate the certificate program that he/she wishes to enter. Students are required to submit the application and obtain formal admission to the graduate certificate program. Students are advised to apply for the graduate certificate program well in advance of completion of all required courses. Students must complete the certificate requirements that are listed in the Graduate Catalog that is in effect at the time of their formal admission to the certificate program.

Admission to a certificate program does not guarantee admission to a graduate program. However, once a person is accepted into a master's, specialist and doctoral graduate program, credits from a completed UCF certificate program may be applied toward an existing graduate program with the consent of the program.

Nondegree students who are enrolled in a certificate program are not eligible for tuition support, assistantships, or fellowships, and are not generally eligible for federal financial aid.

Course Requirements and Loads

A certificate program must include a minimum of nine semester hours. The course work must consist of an integrated and organized sequence of study; course substitutions are not permitted.

No internship or independent study courses may be used in a certificate program. The use of practicum courses in certificate programs is not generally encouraged, but may be used in programs where there is a strong professional setting and on-campus faculty supervision. Alternative delivery programs are acceptable and encouraged.

Certificate students must take the full number of required hours for a certificate program. Generally, a course may not apply toward more than one certificate program. However, if an overlap of coursework occurs between two or more certificate programs for the same student, the student must complete the total required hours by taking electives approved by the program.

All courses that are offered as part of a certificate program must be graduate-level courses. Students must earn course grades of "B-" or better to get credit toward the certificate. Courses may be retaken to achieve a better grade. However, the certificate will only be awarded if the graduate status GPA in the certificate program of study is 3.0 or higher.

Transfer of Credit

No graduate credit hours taken at other institutions can be applied to a graduate certificate program at UCF. If requested prior to the completion of the certificate program requirements, graduate credit hours taken at UCF from a prior baccalaureate, master's, specialist, or doctoral degree may be applied toward a certificate, with the consent of the program, provided they are no more than seven years old. The request for using credits from prior years must be submitted no later than the end of the add/drop period in the semester in which the student takes the final course in the certificate program.

Time Limitation for Certificate Completion

The student has seven years from the date of admission (prerequisite, articulation, and foundation courses are exempt) to the certificate program to complete the certificate. In addition, no course older than seven years at the time of graduation may be used in the Program of Study for a certificate. Students who do not maintain continuous enrollment (missing enrollment at the university for a period of three consecutive semesters) must file for readmission to the university, although seven years is measured from when the student was first admitted to the program.

Students who anticipate being out for an extended period of three consecutive semesters or longer should apply for a Special Leave of Absence no later than the end of the add/drop period of the third semester of absence. Students who do not maintain continuous enrollment without a Special Leave of Absence (see Continuous Attendance and Special Leave of Absence in the General Graduate Policies) must file for readmission to the university, although seven years is measured from when the student was first admitted to the program.

Readmission

Certificate students should maintain continuous enrollment in their certificate program. Students who anticipate that they may not be able to enroll continuously due to external circumstances should apply for a Special Leave of Absence (see Special Leave of Absence in the General Graduate Policies).
The student has seven years from the date of admission to the program to earn their degree. Students who do not maintain continuous enrollment (missing enrollment at the university for a period of three consecutive semesters) must file for readmission to the university. Although seven years is measured from when the student was first admitted to the program.

If certificate students do not maintain continuous enrollment and have not filed for a special leave of absence (see Continuous Enrollment in the General Graduate Policies), they must file for readmission to the university. To file for readmission, the student must complete a new online Application. For more information about readmission, refer to the Admissions section of this catalog.

Readmission decisions are individually made, based on such factors as space in the program, reasons for the break in graduate education, progress in the certificate program, among others. Readmission is not guaranteed. Completion of Graduate Certificate

In order to be processed for completion of a graduate certificate program, students must have obtained formal admission into the graduate certificate program (see Certificate Program Admission Requirements above). Students nearing completion of a graduate certificate program must complete the online Intent to Graduate Form by logging into myUCF and navigating to the Student Center Academics > Undergraduate and Graduate Careers > Intent to Graduate: Apply. Intents to graduate should be filed online no later than the last day of registration for the semester of graduate certificate completion.

Students will only be processed for completion of a graduate certificate if they have previously submitted a certificate application form, have been formally admitted to the program, and have filed an intent to graduate. Students must be enrolled in the semester in which the graduate certificate is being completed.

International Graduate Student Policies

Full-time Enrollment Requirements

A full-time degree-seeking graduate student must take at least 9 credit hours in the fall and spring semesters. A half-time load is defined as enrolled in at least 4.5 credit hours in fall and spring terms. During the summer term, full-time is 6 credit hours and half-time is 3 credit hours. There are two exceptions to this policy:

1. For master's students pursuing a thesis option, full-time enrollment is defined as 3 hours per semester (including summers, without skipping a semester) of thesis coursework (XXX 6971), after completion of all coursework and until graduation. Students who wish to enroll in part-time hours should consult their adviser.
2. For doctoral students who have passed the candidacy exam and are registered for doctoral dissertation (XXX 7980) hours only, full-time is 3 hours per semester until graduation. Such students must continue to enroll in at least three dissertation hours each semester (including summers, without skipping a semester) until they successfully complete the dissertation and graduate. Students who wish to enroll in part-time hours should consult their adviser.

Graduate students receiving assistantships, tuition support, and fellowships must be enrolled full-time as degree-seeking students who maintain good academic progress.

Special Considerations

All international students on F or J visas must maintain full-time, degree-seeking status regardless of financial support received from the university. F and J visa holders should contact UCF Global to ensure that their enrollment conforms to the full-time definition of their visa status. International students should not change their course schedule or drop classes without advisement from the UCF Global. All international students who enroll in less than 9 hours per term must submit to UCF Global a Reduced Course Load Form that explains the nature of the reduced hours and must obtain approval from UCF Global (see www.intl.ucf.edu for Reduced Course Load Form). This requirement also applies to international students who are enrolled in less than 9 hours per term in thesis or dissertation hours.

Students who do not satisfy these full-time enrollment requirements will not qualify for graduate assistantships, fellowships or tuition support.
International Student Employment

According to U.S. Citizenship and Immigration Services (USCIS) regulations, graduate students who are on an F-1 or J-1 visa may accept employment on campus without prior USCIS approval as long as students are enrolled full-time and employment does not interfere with their studies.

Graduate students who desire to engage in off-campus employment must be approved by the UCF Global for Curricular Practical Training (CPT) prior to beginning the employment. CPT is defined as employment that is an integral part of the established curriculum and can be in the form of an internship or cooperative educational experience. In order to qualify for CPT, there are several requirements that must be met. Please speak with an adviser at the UCF Global for more information on these requirements and prior to engaging in off-campus employment.

During the fall and spring semesters, on-campus employment is limited to no more than 20 hours per week while school is in session. During the summer, on-campus employment may be up to 40 hours per week. (Please note that all graduate assistants during the summer must enroll in a full-time course load.) Employment may also be up to 40 hours per week during vacation or other break periods. Please speak with an adviser at the UCF Global for clarification of these policies.

On-campus employment is not permitted after completion of the program of study unless the student is issued a Form I-20A-B to begin a new program and intends to enroll in the next regular academic term or session.

Students who received a bachelor's degree at one school and will start a master's degree or PhD at UCF are eligible to work during the summer at UCF as long as a Form I-20A-B was issued for the new master's or PhD program.

International students on an F-1 visa are eligible to apply for one year of optional practical training (OPT) after completion of their program.

For more information about the employment of international students, contact the UCF Global at 407-823-2337 or visit the office to speak with an adviser.

English-speaking Ability for Graduate Teaching Associates and Assistants

Students who plan to serve as graduate teaching associates or assistants (GTAs) and for whom English is a second language are required to pass the SPEAK test. The SPEAK test evaluates an individual's English-speaking skills. This requirement applies to all students from countries where English is not the native language; however, such students will be exempt if they have completed a previous degree from a regionally accredited U.S. college or university, from a country where English is the only official language, or from a university at which English is the only official language of instruction, or they have received a score of 26 or higher on the Speak portion of the ibt TOEFL. Only exempted students and those who have attended the UCF GTA Training and satisfactorily passed the evaluation of their English-speaking skills may be assigned as GTAs.

For more information about this requirement and the free English-speaking training that the university provides, see "English-speaking Ability for Graduate Teaching" in the Assistantships section of this graduate catalog. See Graduate Teaching in the UCF Graduate Student Handbook for Information on registering for GTA Training and SPEAK testing.

International Visiting Scholars

The following policy and procedures allow departments to invite international visitors to study, teach, or participate in research activities at UCF. The policy is directed to those who do not wish to earn a degree, but who may audit courses in the postbaccalaureate, nondegree-seeking status for professional development and who normally have complete financial support provided by some outside agency. These visiting scholars will have J-1 visa status and use the Professor, Research Scholar, or Specialist category as permitted by immigration regulations. Visitors seeking degrees will use regular UCF admission procedures and must enter the United States using the F-1 or J-1 visa student category.

Visiting scholars who are required to audit courses at UCF must fill out the UCF application for admission as a nondegree student and pay the application fee. The deadline is about four months before the beginning of a term. A faculty member, as Faculty Sponsor, must accept the responsibility for
recommending, advising, and directing the activities of the scholar. The procedure for extending an invitation to a prospective scholar is as follows:

1. If financial support will be provided to the visiting scholar using university resources, then the approval of the university must be obtained on all correspondence with the visiting scholar. Written arrangements should be made with the Vice President for Research for financial support prior to invitations to visiting scholars.

2. The Department Chair will submit a recommendation to the Dean specifying the Faculty Sponsor, documenting anticipated activities, and providing the following information on the Visiting Scholar:
   1. Date of birth
   2. City and country of birth
   3. Country of residence if different from country of birth
   4. Place of work (academic institution, business firm, etc.)
   5. Current position held in country of residence
   6. Academic background
   7. Professional experience
   8. Source and amount of financial support (recommended honorarium, if any)
   9. English proficiency
   10. Dates of visit
   11. Statement of how the Visiting Scholar will participate in research and what will be accomplished
   12. Office space, equipment, etc. which will be required for scholar's use

3. If arrangements are approved, the Dean will notify the Vice President for Research that the College is extending an invitation. The Chair's recommendation will be included with the notification. These will be sent to the UCF College of Graduate Studies so that the invitation and application may be placed in the visiting scholar's official university file.

4. The UCF College of Graduate Studies will then forward copies of the information to the UCF Global. Upon receipt and verification of the required documents, a Form DS-2019 for the purpose of the J-1 visa application J-1 Visa will be issued.

5. The Faculty Sponsor will then correspond with the visitor detailing the conditions of the visit, including whatever limited financial support and facilities will be provided and what is expected of the Scholar, with copies of this correspondence sent to the UCF Global and the Vice President for Research. The Scholar will be asked to write a brief report at the termination of the visit.

6. All visiting scholars should report to the UCF Global directly upon arrival at UCF to ensure that their immigration documents are in order.

During each academic term of the visit, the Visiting Scholar may be required to audit one hour of XXX 6918, Directed Research, under the direction of the Faculty Sponsor and also may be permitted (or required) to audit regular courses. The Visiting Scholar will be admitted to postbaccalaureate status and will audit courses as directed and approved by the Faculty Sponsor. The Visiting Scholar will not be permitted to take courses for credit unless formally admitted to a degree program or upon written approval from the Dean of the college in which the student is studying.

The international visiting scholar will be appointed Visiting Research Scholar or Visiting Scholar in the College and may be given a modest honorarium. Such scholars will normally not be maintained on the College payroll, but are expected to have extended financial support.

**Linkage Agreements**

The State of Florida has established various linkage agreements to assist in the development of stronger economic and social ties between Florida and strategic foreign countries. Linkage Institutes are set up throughout the state and provide out-of-state tuition exemption to scholars from the foreign countries represented by the institutes. To participate in these exemptions, students must apply to the Linkage Institute for the country in which they reside to receive an out-of-state tuition award. Students participating are required to return home after their tenure of graduate study for a length of time equal to the exemption period. Each institute develops its own criteria for selection of students and typically supports the out-of-state fees for about 20 to 30 scholars a year. The institutes established in Florida are listed below with their contact persons.

Financial Information

Graduate education provides personal enrichment and a deeper understanding of some aspect of the world around us, but also is an important investment in the future of a community. It is an investment on the part of the student that opens the door to new careers, wider choices of work assignments, and greater opportunities for advancement to higher paying jobs. It is also an investment on the part of the university and the community as a whole in the training of the next generation of workers, leaders, educators, innovators, and contributing citizens. Besides the time investment, a graduate student has financial expenses that include tuition and education-related fees, instructional supplies, and living expenses. UCF helps to offer the opportunities provided by graduate education at a very reasonable cost.

For a significant portion of the graduate student population at UCF, the process of learning and being trained for disciplines that require graduate-level education includes participating in the research, teaching, and community-building missions of the University. This partnership between graduate students and the University is recognized by both the University and the State of Florida by means of financial support in the form of fellowships, tuition remission, and research and teaching assistantships. Many of the assistantship appointments represent professional opportunities as well as a means of financial support.

In order to qualify for fellowships, tuition remission, or assistantships, graduate students are expected to be enrolled full-time in a degree program. Assistantship appointments require the student to be engaged in paid appointments that promote the missions of the University. The details of these requirements are described in Financial Support Requirements, as well as in the fellowships, assistantships, tuition support, and health insurance pages in the Financial Information section of this catalog.

- Financial Support Requirements
- Graduate Fellowships
- Graduate Assistantships
- Graduate Tuition Support
- Paid Health Insurance Coverage
- Student Financial Assistance
- Tax Obligations
- Tuition and Fees
- Costs and Residency

Financial Support Requirements

Graduate students must meet all of the following requirements each term that they receive fellowships, assistantships, or tuition remission:

- Students must be accepted as a graduate student in a degree program and enrolled full-time. See Full-time Enrollment Requirements. Nondegree-seeking students and students who are only admitted to a graduate certificate program are ineligible for UCF financial support.
- Students must maintain good academic standing. See Academic Progress and Performance.
- In order to receive tuition remission, students must be either graduate assistants (position codes 9181-9184, 9186, or 9187), University Fellows, or be admitted as part of a formal, written University-approved agreement. The graduate assistant category includes the following types of appointments: Graduate Assistant (GA, Position Code 9186); Graduate Teaching Assistant (GTA, Position Code 9184); Graduate Teaching Associate (GTA, Position Code 9183); Graduate Teaching Assistant-Grader (GTA, Position Code 9187); Graduate Research Assistant (GRA, Position Code 9182); and Graduate Research Associate (GRA, Position Code 9181). Full tuition support requires a qualifying university fellowship or a 0.5 FTE appointment (20 hours per week) and stipend level of at least $12,000 ($6,000 in fall and spring) for doctoral students or $10,000 ($5,000 in fall and spring) for master's students for the academic year. Half tuition support requires a 0.25 FTE appointment (10 hours per week) and stipend level of at least $6,000 ($3,000 in fall and spring) for doctoral students or $5,000 ($2,500 in fall and spring) for master's students for the academic year.
- Tuition remission will be provided only for courses that are part of the student's program of study and necessary for progress toward the student's graduate degree.
- Graduate fellowships have additional requirements. See Graduate Fellowships.

Graduate Fellowships

The UCF College of Graduate Studies awards more than $2 million in university fellowships to provide financial support for the graduate education of over 300 graduate students each year.
These fellowships are funded by university appropriations, endowments, and other outside sources.

Fellowships are awarded on the basis of academic merit to the most highly qualified applicants. Some fellowships are available only to applicants who are underrepresented in higher education in the State of Florida. For eligibility, students must be accepted as a graduate student in a degree program and enrolled full-time. See Full-time Enrollment Requirements. Students who are interested in being considered for a fellowship are strongly encouraged to apply for admission by the priority date and to communicate their interest in receiving a fellowship to their intended graduate program. GRE scores are required to be considered for most fellowships even if not required for admission to a specific program. Most fellowships require Graduate Program Directors to nominate students to the College of Graduate Studies through the college and program offices. All admitted graduate students are automatically considered in this nomination process. Other fellowships, however, require students to fill out a fellowship application. For more details about graduate fellowships, visit Fellowships.

International students receiving fellowships are subject to up to 14 percent withholding on their fellowship payments. International students must obtain a Social Security Number (SSN) prior to receiving payment of a fellowship. More information on this issue can be obtained from the Global UCF (INTLadmissions@ucf.edu).

## General Fellowship Requirements

- Students usually receive only one UCF fellowship per term, and students are eligible to receive a given fellowship only once.
- Fellowships are only awarded to highly qualified individuals who are admitted, degree-seeking graduate students (regular or conditional admission) by the time the fellowship is awarded. Students on conditional admission status may be offered a fellowship, but must submit documentation required for regular admission status prior to fellowship disbursement. Students on provisional and restricted admission status, nondegree-seeking (postbaccalaureate) students, and graduate certificate students are not eligible to receive fellowships.
- All fellowships require full-time graduate enrollment. See Full-time Enrollment Requirements.
- Fellowship students must make acceptable academic progress during each term of the award or the fellowship will be canceled. See Academic Progress for Fellowship Recipients below.
- Fellowship students must participate in events scheduled for the university fellowship community and in selected service activities for the UCF community. Additional information about this requirement is found at for UCF Fellows.
- Some fellowships have additional requirements, which are described in the fellowship details found at Fellowships.

## Students Working Full Time

Students who are employed full-time in on-campus or off-campus jobs may not receive university fellowships, as UCF fellowship recipients are expected to be primarily focused on graduate study and related activities on campus (e.g., graduate assistantships, research activities, participation in professional organizations).

In addition, students receiving tuition assistance from another source (UCF Employee Tuition Voucher, State Employee Tuition Voucher, etc.) may not also receive a UCF graduate tuition waiver. Graduate assistants and fellows are not eligible to receive UCF Employee Tuition or State Employee Tuition Vouchers.

## Academic Progress for Fellowship Recipients

Fellowship recipients are required to be in good standing and to make satisfactory academic progress to continue to receive a fellowship award. To be considered in good standing, fellowship recipients are required to maintain the standards listed below.

- Fully accepted into a graduate degree program at UCF.
- Enrolled as full-time graduate students. See Full-time Enrollment Requirements.
- Maintain a graduate status GPA of 3.0 each term of the award.
- Receive satisfactory grades in all classes, and no grade of incomplete ("I"). (Unsatisfactory grades are C, C+, C-, D, F, and U.)
Failure to meet any one of these standards will result in the cancellation of the fellowship. The College of Graduate Studies may grant rare exceptions to this policy after review of evidence of mitigating circumstances presented by the student and the graduate program.

Graduate Fellowships

The following list identifies the fellowships offered by the university and the funding programs in which the university participates. Those for which the College of Graduate Studies provides a graduate tuition waiver are marked (TW). For the most current information regarding fellowships, students are encouraged to consult Fellowships, as well as Funding.

- UCF Trustees Doctoral Fellowship (TW)
- UCF Presidential Doctoral Fellowship (TW)
- UCF Multidisciplinary Doctoral Fellowship (TW)
- UCF Graduate Dean's Dissertation Completion Fellowship (TW)
- UCF MFA Provost's Graduate Fellowship (TW)
- UCF Graduate Research Excellence Fellowship (TW)
- UCF Graduate Dean's Fellowship
- McKnight Doctoral Fellowship (TW)
- UCF Graduate RAMP Fellowship (TW)
- UCF Graduate McNair Fellowship (TW)
- Summer Mentoring Fellowship (TW)
- Delores A. Auzenne Fellowship
- Florida A&M University Feeder Program (TW)
- UCF Graduate Presentation Fellowship

Fellowship Disbursement

Most graduate fellowships are disbursed through the Office of Student Financial Assistance, based on instructions provided by the UCF College of Graduate Studies. Student Financial Assistance begins disbursing fellowship funds and other aid after the registration and Drop/Add period has ended (usually the second week into the term). For the portion of tuition charges covered by the fellowship, the tuition payment deadline will be deferred until fellowship disbursement. If students are not enrolled in full-time hours by the end of the Drop/Add period, their fellowship will be cancelled. Students are responsible for paying the balance of tuition and fees by the Payment Deadline published in the UCF Academic Calendar. Fellowship payment will first be applied to the student's account balance. Remaining funds will be disbursed to the student either as a check mailed to the current mailing address of record or as a direct deposit into the student's account, if the student has provided the bank information in myUCF.

Students can check to see if fellowship payment has been applied to their account through myUCF. In myUCF, select "Student Accounts" to see awards that have been set up to pay against your account.

Graduate Assistantships

Graduate students often receive assistantships in their departments or other university offices while pursuing graduate studies. Graduate assistants may teach, conduct research, or perform other tasks that contribute to the student's professional development.

Graduate students may become Graduate Teaching Associates, Assistants, or Graders (GTAs), Graduate Research Associates or Assistants (GRAs), or Graduate Assistants (GAs). For eligibility, students must be accepted as a graduate student in a degree program and be enrolled full-time. Graduate students enrolled fully online program that exempts them from paying campus-based fees are not eligible for graduate assistantships. See Full-time Enrollment Requirements.

Both half- and full-stipend assistantships are available. Half-stipend assistantships require students to perform assistantship assignments for a minimum of 10 hours per week during the period of the assignment. Full-stipend assistantships require students to perform assistantship assignments for a minimum of 20 hours per week during the period of the assignment. University policy requires that graduate assistants (position codes 9181-9184, 9186, and 9187) with half-stipend assistantships receive a minimum stipend of $6,000 ($3,000 in fall and spring) for doctoral students or $5,000 ($2,500 in fall and spring) for master's students; graduate assistants with full-stipend assistantships receive a minimum stipend of $12,000 ($6,000 in fall and spring) for doctoral students or $10,000 ($5,000 in fall and spring) for master's students per academic year. In rare circumstances, students may be appointed to assistantships with total hourly commitments that extend beyond hours per week. During the fall and spring terms, approval for appointments above 20 hours per week must be requested using the Supplemental Assignment Form; during the summer term, prior approval is not required. Departments vary widely in their normal stipend rates.

Specific eligibility and application guidelines for graduate assistants are established by the colleges and departments. To apply for an assistantship, students should contact their Graduate Program Director in the department of study. (For your Graduate
Program Director's e-mail address and telephone number, see the "Contact Info" in the Graduate Programs section of this graduate catalog.

Part-time students (those registered for less than 9 hours in fall and spring terms, or less than 6 hours in summer term) and nondegree students are not eligible to receive assistantships.

**Background Investigations**

UCF requires a criminal history background investigation for all new hire graduate assistantship students (job codes 9181, 9182, 9183, 9184, 9186, 9187), as well as for those students who are being rehired as graduate assistants after being off the university payroll for one year or more. UCF requires authorization from the graduate assistantship student to conduct this background check, using the Fair Credit Reporting Act Disclosure and Authorization to Release Information Form at http://hr.ucf.edu.

**Assistantship Payment**

Graduate students who have assistantships receive bi-weekly payments following the schedule set by Human Resources. Assistantship payments do not show as a credit on the student's term bill; thus, they do not defer tuition and fee charges. Students are responsible for paying the balance on their term bill by the payment deadline published in the Academic Calendar.

Graduate students on assistantships should be aware of the Internal Revenue Service guidelines for exemption from FICA withholding taxes. For more information, please see "Federal Tax Guidelines" on the UCF Human Resources website.

**Graduate Research Associates and Assistants**

Graduate research associates and assistants (GRAs, job codes 9181 and 9182) may assist faculty with research activities, participate in research efforts in university institutes and centers or in off-campus projects affiliated with the university, or perform other research-related duties. They may also be assigned to nonacademic university offices such as Academic Affairs, University Analysis and Planning Support, and Operational Excellence and Assessment Support.

GRAs are typically supported by grants and contracts, but may also be supported by departmental funds. GRAs will have the cost of resident tuition paid by university funds (i.e., through grants, contracts, college or division funds, foundation funds or through a formal, written university-approved agreement).

**Graduate Assistants**

Graduate assistants (GAs, job code 9186) may assist in general office tasks and services not involved in teaching or research assignments for colleges, departments, or nonacademic university offices. GAs will have the cost of resident tuition paid by university funds (i.e., through grants, contracts, college or division funds, foundation funds or through a formal, written university-approved agreement).

**Graduate Teaching Associates, Assistants and Graders**

Graduate teaching associates, assistants, and graders (GTAs) support the teaching mission of the university and can be hired under three job codes: Graduate Teaching Associate (9183, Instructor of Record); Graduate Teaching Assistant (9184); and Graduate Teaching Assistant - Grader (9187). GTAs may be assigned as instructors of record for undergraduate courses, as assistants to the faculty in their teaching responsibilities or in other roles directly related to credit-earning formal course instruction, or as tutors for students on specific course-related material or general skills. GTAs assisting members of the faculty may have responsibilities that include assisting in laboratory courses, grading, preparation of course materials, or performing clerical tasks associated with course instruction.

GTAs will receive graduate tuition waivers that cover the cost of resident tuition or will have the cost of resident tuition paid by the employing unit.

**Graduate Teaching Requirements**

- Students must have completed at least 18 hours of graduate courses in the discipline prior to being assigned as an instructor of record or teaching independently at the university. Graduate Teaching Associates may not teach graduate courses.
- New graduate teaching associates, assistants, and graders are required to satisfy the UCF GTA Training requirements before beginning their assistantship
 assignment. Graduate teaching associates must complete the online GTA Grader Training and GTA Assistant Training and attend an all day, face-to-face workshop presented by the Faculty Center for Teaching and Learning. Graduate teaching assistants must complete the online GTA Grader Training and GTA Assistant Training. Graduate teaching graders must complete the online GTA Grader Training.

- Students with access to student records must maintain the confidentiality of all student records and information. Failure to do so will result in immediate dismissal.
- All graduate students involved in classroom instruction who received their undergraduate degrees from a foreign institution must prove their facility with spoken English. See "English-speaking Ability for Graduate Teaching Assistants" below for more information.

For more information regarding GTAs at UCF and registration for GTA Training and SPEAK testing, see Graduate Teaching.

### English-speaking Ability for Graduate Teaching

The English-speaking skills of graduate students with English as a second language who plan to serve as graduate teaching associates or assistants (job codes 9183 or 9184) will be evaluated as part of the GTA Training that is offered each semester. This requirement applies to all students from countries where English is not the native language; however, such students will be exempt if they have completed a previous degree from a regionally accredited U.S. college or university, from a country where English is the only official language, or from a university at which English is the only official language of instruction, or they have received a score of 26 or higher on the Speak portion of the ibt TOEFL. Only exempted students and those who have attended the UCF GTA Training and satisfactorily passed the evaluation of their English-speaking skills may be assigned as GTAs.

English-speaking ability will be evaluated at UCF using the SPEAK test provided by the Educational Testing Service at the beginning of the fall and spring semesters. Should you need to take a SPEAK exam in the summer, please contact the English Language Institute directly.

The university provides you with free English-speaking training if your scores are between 45 and 55 on the initial SPEAK test.

<table>
<thead>
<tr>
<th>Initial SPEAK Score</th>
<th>English-speaking Training</th>
</tr>
</thead>
<tbody>
<tr>
<td>55 or more</td>
<td>No training needed; you may be a GTA Associate or Assistant provided you meet other SACS-related qualifications.</td>
</tr>
<tr>
<td>50</td>
<td>One semester of free training (Oral Communication for Internationals) will be provided by the university with an additional SPEAK exam required at the end of the semester's training. Failure to attend 15 or more sessions or to complete the required SPEAK exam in that semester will result in you being charged for the training and final SPEAK exam. You may be employed as a GTA Assistant to help with laboratory or other duties under the supervision of a faculty member, provided you meet other SACS-related qualifications.</td>
</tr>
<tr>
<td>Less than 45</td>
<td>Please consult the English Language Institute for an intensive English language program that will meet your needs. These programs charge a fee, depending upon your needs that must be paid by you.</td>
</tr>
</tbody>
</table>

If students achieve a satisfactory post-evaluation at the end of the semester, they may be assigned as GTAs. Otherwise, students must apply for further training at their or their department's expense.

### Assessment of Graduate Teaching Associates, Assistants, and Graders

All GTAs will be evaluated on their teaching each semester using the GTA Performance Assessment Form provided by the College of Graduate Studies. Completion of the form constitutes a summary assessment based on prior classroom visits, informal observations, input from students, discussions with the GTA, and other evidence of performance. The faculty member who is
supervising the GTA must complete the assessment and meet with the assistant to discuss the assessment. The form is sent to the College of Graduate Studies by the end of the semester.

Assistantship agreements will not be approved for GTAs who are missing Performance Assessment Forms.

Use of the assessment is at the discretion of the department in reassigning or continuing the student in their GTA position.

Employment of International Students

For information regarding the employment of international students, see International Students in the Admissions section of this catalog.

Parental Leave for Graduate Assistants

The Parental Leave program is designed to assist graduate assistants on existing assistantship agreements during pregnancy or immediately after the birth or adoption of their infant child. The mother may choose to use up to six weeks of leave for pregnancy and/or maternity needs. The spouse or partner may choose to use up to six weeks of leave to assist in the care of the newborn child and the child's mother during the postpartum period. Graduate assistants who have assumed parenthood through the adoption of an infant may also use this leave. This includes graduate assistants in a domestic partnership. For this leave policy, a domestic partner is defined as a same-sex individual who shares a committed, mutually-dependent relationship.

Qualifying for Parental Leave

Only full-time enrolled graduate students holding active assistantship appointments (job codes 9181, 9182, 9183, 9184, 9186, or 9187) are eligible for the leave. These include Graduate Teaching Assistants (GTAs), Graduate Research Assistants (GRAs), and Graduate Assistants (GAs). For assistantship descriptions, see https://graduate.ucf.edu/assistantships/.

Applicants for the leave must submit an Application for Parental Leave to the College of Graduate Studies (send to gradassistantship@ucf.edu or Fax 407-823-6442) at least four weeks prior to the anticipated start date of the leave. Provisions will be made for those who must start leave earlier than anticipated due to medical circumstances. The application consists of two parts. Part 1 is the Request form giving the anticipated dates of leave and showing approval of the leave by the funding sponsor of the assistantship (e.g., department chair, research adviser, unit head). Part 2 is the Anticipated Parent Information from an attending physician about the pregnancy and/or birth or from an adoption agency verifying the date of adoption and arrival of the infant.

All students on parental leave must submit an Intent to Return to Assistantship from Parental Leave form to the College of Graduate Studies (send to gradassistantship@ucf.edu or Fax 407-823-6442) at least two weeks before their anticipated return date. Those who experienced pregnancy and delivery must complete the Medical Release section on the form affirming that they have sufficiently recovered to resume their assistantship responsibilities.

Benefits to Graduate Assistants

During the approved parental leave, the student will retain student status and all privileges of an enrolled student.

Approved parental leave is paid leave for up to six weeks but maybe a shorter period, depending on the student's graduate assistantship agreement(s). The student's assistantship status will be maintained during the leave, including paid tuition remission and health insurance (if the student accepted this coverage offered by the College of Graduate Studies).

The parental leave applies to the graduate assistantship position and does not excuse students from required coursework. Prior to the leave, the student is expected to confer with his/her course instructors to develop plans as necessary to make up any academic work that may be missed during the leave.

Assistantship Payment and Coverage

The College of Graduate Studies will pay the assistantship stipend equal to the rate of the student's existing assistantship agreement(s) during the approved leave period. Arrangements for this payment will be coordinated with the student's assistantship sponsor (i.e., hiring department).

Since the assistantship sponsor does not pay the stipend during the approved leave, the sponsor may hire a replacement at its own expense to fill the duties of the student on leave. This hire may be done using a short-term OPSGRD or a Supplemental
Assignment for an existing graduate assistant. The Supplemental Assignment will be approved by the College of Graduate Studies as long as the replacement is in good academic standing with at least a Graduate Status GPA of 3.0, has a history of academic progress in the degree program, and has completed required training for their assignments (e.g., GTA training and SPEAK Test; for grants, responsible conduct of research training).

The parental leave period of up to six weeks is only in effect for the duration of an existing assistantship agreement and will not extend beyond the agreement end date. However, parental leave could be divided between the end of one semester and the beginning of the subsequent semester if there are assistantship agreements in both semesters.

Graduate Tuition Support

Graduate assistants or graduate students who receive certain university-wide fellowships will receive tuition support (formally referred to as "tuition remission") as part of their financial package. Tuition remission is in the form of either tuition waivers or tuition payments from university funds.

Tuition support pays the resident tuition ("in-state" tuition); it does not include payment of local fees (health fee, athletic fee, etc.). However, certain programs will pay additional fees for their supported students. For nonresident students, see below. Tuition support is generally described in the student's financial offer letter. Students should contact their program or department if they have questions about the tuition support that will be provided.

For students receiving tuition support based on their graduate assistantship(s), the level of tuition support is dependent on the level of assistantship support. To receive half tuition support, students are required to have a single assistantship assignment for a minimum of 10 hours per week during the period of the assignment. To receive full tuition support, students are required to have a single assistantship assignment for a minimum of 20 hours per week, or two assistantship assignments, each for a minimum of 10 hours per week during the period of the assignment.

Certain fellowships also provide tuition support. Students should review the letter offering the fellowship and the terms of the award to see if tuition support is included. Specific questions concerning the amount of tuition included with a given fellowship may be directed to the UCF College of Graduate Studies at gradfellowship@ucf.edu.

Tuition support for nonresident students:

For nonresident students, all university fellows who receive tuition support and qualifying graduate assistants will not be charged the nonresident fee ("out-of-state" tuition) or the nonresident financial aid fee. Peace Corps Fellows will not be charged the nonresident fee or nonresident financial aid fee for the duration of their graduate studies at UCF. Qualifying assistantships include a single appointment of at least 0.5 FTE (20 hours per week) or two appointments of at least 0.25 FTE (10 hours per week). It is important to note that this will only be in effect for the terms of the fellowship or the qualifying assistantship appointment(s).

Note: Students receiving tuition assistance from another source (UCF Employee Tuition Voucher, State Employee Tuition Voucher, etc.) may not also receive a UCF graduate tuition waiver.

Student Obligations

Student drops or withdraws from a course but remains full-time. If a student drops or withdraws from a course for which tuition remission has been received but remains full-time enrolled, the tuition remission will be removed and the student must pay the tuition for that course. Holds will prevent the student from registering for classes, receiving transcripts, or receiving grade reports until the payment is received. However, if the student enrolls in a replacement course that is acceptable in the Program of Study, the tuition remission will cover the replacement course.

Student drops or withdraws from a course and becomes part-time. If a student drops or withdraws from a course for which tuition remission has been received and becomes part-time as a result, the tuition remission will be removed and the student must pay for tuition. Holds on student records will prevent students from registering for classes, receiving transcripts, or receiving grade reports until the payment is received. (In extreme cases, a student may request an exception to this policy.)

Student is dismissed or resigns from assistantship. Students with tuition remission who are dismissed from the university or resign from their graduate assistantship (GA, GTA, or GRA) at any point during the term will have their tuition remission removed and must pay for tuition.
Requesting Tuition Remission

Upon the recommendation of program and college offices, the UCF College of Graduate Studies assigns tuition waivers and facilitates tuition payments to qualifying graduate assistants. Students should discuss their tuition support needs with their Graduate Program Director.

Students with Positions in Nonacademic Units

Students may also be hired as a graduate assistant (GA or GRA) in a nonacademic office. Tuition remission for these appointments is in the form of tuition payments. Students should discuss their tuition support needs with their nonacademic office supervisor.

Contact the UCF College of Graduate Studies if you are unsure if the office is considered nonacademic.

Tuition Remission Posting

All tuition support will be posted to your student account through the Office of Student Accounts, based on instructions provided by the UCF College of Graduate Studies for graduate tuition waivers, or by the program, college or office for tuition payments. Upon enrollment in full-time hours, students receiving tuition support will have their tuition deferred for the amount of the award. Students are responsible for paying the remaining balance of tuition and fees by the Payment Deadline published in the UCF Academic Calendar.

Paid Health Insurance Coverage

The College of Graduate Studies provides health insurance coverage as part of the complete financial packages offered to all qualifying university fellows and graduate assistants with appointments totaling 20 hours per week.

Qualifying Fellowships and Assistantships

- Students with university fellowships that are accompanied by tuition waivers are eligible for paid health insurance coverage.
- Graduate assistants are eligible for paid health insurance coverage if they have a single appointment of at least 0.5 FTE (20 hours per week) or two appointments of at least 0.25 FTE (10 hours per week). Graduate assistantships must be accompanied by resident tuition remission in the form of either GTA tuition waivers or tuition payments paid by university funds.

Full annual coverage will be provided in two separate time periods. Students with qualifying assistantships and fellowships in the fall term will receive fall coverage, running from August 15 through December 31. Students with qualifying assistantships and fellowships in the spring term will receive coverage for the remainder of the policy year, running from January 1 through August 14. Students with a qualifying assistantship or fellowship only in summer term will receive summer coverage, running from May 1 through August 14.

All students qualifying for paid health insurance coverage will be required to accept or decline the health insurance coverage in their myUCF Student Center by submitting the Graduate Health Insurance electronic form. See Health Insurance for more information about this health insurance coverage.

Communications from the College of Graduate Studies and the health insurance company will be sent to the student's Knights e-mail address and the local mailing address in the university records. Students who anticipate receiving health insurance coverage due to their assistantship or fellowship are advised to keep their contact information current at myUCF (my.ucf.edu).
Student Financial Assistance

Office of Student Financial Assistance

Director: Alicia Keaton
Millican Hall, Room 107
Switchboard: (407) 823-2827
Fax: (407) 823-5241
Email: finaid@ucf.edu
Website: finaid.ucf.edu

Office Hours:

Monday: 9:00 a.m. - 5:30 p.m.
Tuesday/Wednesday/Friday: 9:00 a.m. - 5:00 p.m.
Thursday: 9:00 a.m. - 5:30 p.m.

(Hours subject to change during holidays and semester breaks.)

The Office of Student Financial Assistance, a unit with Student Development and Enrollment Services is dedicated to supporting UCF's mission and goals through the efficient delivery of student aid. The office provides UCF students with a comprehensive offering of financial assistance options to support student success and the attainment of a university degree. Financial aid counseling is available on a walk-in basis. To protect the privacy of student records, we offer limited counseling services through phone and email.

Student Eligibility

To receive aid from most federal and state financial aid programs, students must meet certain requirements. All students are encouraged to complete the Free Application for Federal Student Aid (FAFSA) annually, before December 1, to determine eligibility for aid. The FAFSA results are required for many programs. The federal processor, using a standardized formula, calculates financial need. Those results are then forwarded to the schools that were identified on the application. UCF must be listed on the FAFSA in order to receive the data. UCF's Federal School Code is 003954. Regulations are subject to change at any time.

Application Priority Date

All students must apply and/or reapply annually for financial aid.

To be considered for the full range of financial aid funding available, students should complete the Free Application for Federal Student Aid (FAFSA)/Renewal FAFSA by mid-November. The processed results of the FAFSA must be received by December 1 to meet the university's application priority date.

If the priority date is missed, students should apply as soon as possible after that date.

Students should not wait to be admitted to UCF before applying for financial aid; however, they cannot be offered a financial aid package until they have been admitted to the university.

Students enrolling in the fall semester should submit all requested documents by the May 30, priority deadline for timely review and processing of their financial aid file. However, all students should have a completed financial aid file at least 60 days prior to the beginning of any given semester. Students who apply late for aid should be prepared to cover their own living expenses, as well as other out-of-pocket expenses, well into the term.

Application Procedures

The FAFSA can be filed electronically at www.fafsa.gov.

Using the IRS Data Retrieval Tool found within the FAFSA is the most accurate and secure method of providing the required tax information. Applicants who use the unchanged data generated by the IRS Data Retrieval Tool will not be required to provide federal tax return transcripts from the IRS to the financial aid office. Students who are selected for verification who did not use the IRS Data Retrieval Tool, or changed data after using the tool, may be required to submit IRS tax return transcripts to verify tax information. Per federal regulation, copies of tax returns (Form 1040, 1040EZ, etc.) are no longer acceptable. The only exceptions to this rule include those who file tax returns in Puerto Rico or foreign countries.

Information provided on the Student Aid Report (SAR) should be reviewed thoroughly.

Review all correspondence, follow instructions on the SAR, and follow through within 5-10 business days. Delays can be costly as well as frustrating.
Federal regulations require that some students be selected for verification. If selected, students will be asked to provide documents supporting the information submitted on the FAFSA. Subsequent requests for data may be necessary after initial submissions are reviewed. Prompt response to requests will expedite completion of this process.

Students selected for verification for the 2018-2019 aid year are advised to submit all requested documents by the May 30, verification priority deadline for timely processing. Students should have a completed financial aid file no later than 60 days prior to the beginning of a semester.

Late or incomplete submission of documents can result in delayed disbursement or possible loss of eligibility for aid.

Offered federal funds and other need-based financial aid are considered estimates until verification is complete and all necessary corrections have been made.

**Specific Eligibility Requirements and Conditions for Receiving Financial Aid**

Students must be accepted and classified as degree-seeking at UCF in an eligible program of study.

For purposes of financial aid, enrollment is based on classes that count toward degree completion. To ensure enrollment in sufficient hours for the various financial aid programs, please refer to the Program Eligibility Charts on the Office of Student Financial Assistance website.

Students must maintain UCF’s Standards for Satisfactory Academic Progress.

Students are required to inform the Office of Student Financial Assistance of any additional sources of aid they expect to receive beyond those listed on the myUCF portal. Any subsequent awards or income may necessitate a revision of the financial aid package. This includes, but is not limited to, any private scholarships, third party tuition payments, departmental payments and/or waivers.

Students may not receive aid in excess of their Cost of Attendance.

Students must not be in default on any federal educational loan or owe the repayment on a federal grant at this or any other institution.

Students must provide all information requested for the completion of their file. If selected, verification must be completed within specified deadlines and prior to the receipt of all federal and most state and institutional funds.

Students must notify the Office of Student Financial Assistance of any changes in their housing status, household size, or family members in college from that listed on their FAFSA.

Students must reapply annually for financial aid.

Students must accept, reduce or decline offered loan(s) on the myUCF View Financial Aid screen. First-time borrowers at UCF must complete an online Entrance Loan Counseling session and Master Promissory Note (MPN) for Federal Direct Stafford Loans.

Students must be U.S. citizens or eligible non-citizens, (e.g. resident aliens). Eligible non-citizens include a permanent U.S. resident with a Permanent Resident Card (I-551); a conditional permanent resident with a Conditional Green Card (I-551C); as well as some I-94 classifications.

For need-based programs, students must show a financial need as determined by the FAFSA.

A male applicant must be registered with Selective Service, if applicable.
School Costs

Estimated student budgets have been developed as a guide to help students anticipate their costs at UCF.

Financial Aid Programs Available at UCF

The Program Eligibility Charts found on the Office of Student Financial Assistance website under “Receiving Aid” list the various programs and their specific enrollment requirements. Detailed information for each program can also be found on the website under its particular title.

Scholarships and Fellowships are awarded based on various criteria, such as financial need, campus/community activities, leadership positions, academic success, and work experience. Scholarships are designed to reward, encourage, and assist students in pursuing academic excellence and leadership roles.

Federal Work Study is a need-based program that provides part-time employment to the student with financial need, allowing them to earn money to help with educational expenses. The program encourages community service work and/or work related to the student's course of study. Individual departments hire students while the Office of Student Financial Assistance determines the student's eligibility, award amount, and pay rate.

Loans are borrowed funds that must be repaid. Graduate students must be enrolled at least half-time in UCF classes that count toward degree completion to receive federal loans. Master's, Specialist and Doctoral students must have a minimum of 4.5 hours per term for fall or spring, and/or 3 hours in the summer. Master's thesis and Doctoral dissertation students must have a minimum of 3 hours in all terms. Graduate and professional students will be offered Federal Direct Unsubsidized Loans up to their maximum loan eligibility.

Award Notification

Award notifications are mailed to first time UCF students after March 1, while email award notifications are sent to continuing students. Initial awards may be amended due to factors such as contingent admission status, less than half-time enrollment, lack of academic progress, changes required due to verification, incomplete files, over awards, receipt of additional resources, etc.

Financial aid awards will be based upon the student's financial need. The amounts listed on the award notifications are estimates based on full-time enrollment. For purposes of financial aid, enrollment is based solely on classes that count toward degree completion. If a class is not required to earn a degree, then the hours of that class are not used to calculate a student's eligibility.

Admission to UCF must be finalized with no contingencies. Students must be classified as degree-seeking.

Verification, if required must be completed. Students must meet the Standards for Satisfactory Academic Progress. If all eligibility requirements are met, financial aid funds may be disbursed.

It is the student's responsibility to be aware of minimum eligibility requirements for each program, which can be found on the Program Eligibility Charts on the Office of Student Financial Assistance website. When requirements are no longer met, awards will be adjusted as necessary. Some awards may be canceled. All changes can be viewed on the myUCF portal, Student Center, "View Financial Aid." All awards are subject to change.
Deferrals of Tuition and Fees

Deferments allow for the delay that occurs between the date that tuition and fees are due and the date on which financial aid disbursements are made, which is generally two weeks after the term begins. The fee invoice reflects the deferred due date for tuition and fees. Students given a deferment are advised that their tuition and fees charges must be paid by the due date noted on the fee invoice, which is the deferment date. The following programs are not included in the automatic deferral program: work-study programs, third party deferrals and other waivers, and direct-pay scholarships.

The deferment process occurs automatically if the student is meeting all general eligibility requirements and has enrolled in sufficient hours for the financial aid program(s). Please refer to the Program Eligibility Charts on the Office of Student Financial Assistance website for more information. Students should use myUCF to obtain up-to-date information.

In order for loans to defer tuition and fees, students must accept the offered loan on myUCF View Financial Aid screen. In order, to have access to accept loans, all required items on the To Do List must be submitted. Students must drop classes prior to the end of Drop/Swap and Add to prevent fee liability for those classes.

Confirmation of Academic Engagement and Disbursements

The timing of disbursements is contingent upon students meeting all conditions for receiving aid. Disbursement of financial aid begins the second week of the semester and continues each week thereafter. During the first week of classes, students are required to confirm academic engagement in each of their courses. This is done through either the student completing an academic activity that has been established by the faculty member or by faculty physically taking attendance. Student may complete the academic activities after the first week of classes but they may receive a later disbursement of aid for those courses. At the end of the Drop/Swap and Add period, awards are adjusted based on the student's enrollment and confirmation of academic engagement in each course. The week following, the disbursement process is initiated by moving students' awards to their student account. Once funds are disbursed to the Office of Student Account Services, the disbursement record is posted on the myUCF portal under "View My Account" on the Student Center. Charges appearing on the student's account will be deducted at that time. Any remaining financial aid will be processed as a refund. If charges remain on the account after disbursements, or if subsequent charges are made to the student's account, it is the student's responsibility to ensure they are paid. Students signed up for direct deposit should allow up to four business days for funds to show in their bank account. For refund checks that are being mailed, students should allow up to 7 business days to receive their check at their current mailing address on myUCF.

Students should be aware of the disbursement process so that they are prepared to use their personal savings for anticipated expenses such as books and supplies at the beginning of the term. The Short Term Advance (STA) for Books or the Textbook Purchase Program is available for students to help with these expenses. The STA application is available for download prior to each term, so that funds may be available as early as two weeks before the first day of classes. For additional information regarding these two programs, visit finaid.ucf.edu/receiving/funds-for-books/.

Satisfactory Academic Progress (SAP)

Federal regulations require the university to establish Standards of Satisfactory Academic Progress as a general eligibility requirement for financial aid. A student must maintain Satisfactory Academic Progress in a course of study regardless of whether the student previously received financial aid or transferred in from another institution.

To meet the standards adopted by the University of Central Florida, a student must:

Maintain a minimum cumulative GPA of a 3.0 at the graduate level.

Complete a minimum of 70 percent of all credit hours attempted including accepted transfer hours.

Graduate within the number of hours allowed by the Satisfactory Academic Progress policy. Students are allowed a specific number of attempted hours, based on their classification. This includes transfer hours accepted toward the degree plus all UCF hours.
Graduate Certificate
27 Attempted Hours
(includes all hours taken while classified as a graduate certificate student)

Master's
70 Attempted Hours
(includes all hours taken while classified as a graduate student)

Specialist
100 Attempted Hours
(includes all hours taken while classified as a graduate student)

Doctoral
120 Attempted Hours
(includes all hours taken while classified as a graduate student)

Compliance with these requirements are checked at the end of each term.

Students who do not meet the above standards will be placed on Financial Aid Warning status for the next semester. At the end of that semester, students must either meet the standards or aid will be placed on Financial Aid Cancellation status meaning all federal aid will be canceled for future terms until student either meets the standards or the student has an appeal approved. Approved appeals will result in the student being placed on Financial Aid Probation status with an academic plan on file demonstrating the requirements for the student to get back on track towards graduation.

Repeated course(s), including the original attempt, will be counted toward the completion ration and maximum time frame requirements.

Once a student has attempted the maximum hour for a classification level, the student will be canceled including those working towards a second master's degree.

Re-establishing Eligibility after Cancellation

Any student with extenuating circumstances, (i.e., the death of a relative, an illness or injury of the student, etc.), who is placed on cancellation status may appeal to the Financial Aid Review Committee for reinstatement based on his/her special case.

If the student was canceled for the failure to complete 70 percent of the attempted hours and since cancellation, he/she has brought up the percentage to a minimum of 70 percent, the student will be reinstated during the end of the semester review process. If a student was canceled for not meeting the GPA requirement, they will be placed back on a reinstated status once their GPA has been brought up to the required level during the end of semester review process.

To appeal, the student must:

- Complete the Satisfactory Academic Progress Appeal Form; (available on the Office of Student Financial Assistance website at finaid.ucf.edu, under Forms).
- Include a detailed statement that explains the extenuating circumstances that prevented: or resulted in the student not meeting the SAP standards.
- Attach documentation supporting specific circumstance(s) to the appeal form.
- Meet with the Academic Advisor and have the advisor complete an Academic Plan. The Academic Plan should include courses that are required for degree completion and that will assist the student in moving successfully to meeting the SAP standards.
- Submit the appeal, supporting documentation, and academic plan to the Office of Student Financial Assistance.

After a thorough evaluation of the detailed statement, academic plan and all supporting documentation, the Financial Aid Review Committee will notify the student of the decision by email communication or the student may view their updated status on myUCF, Student Center, under "View Financial Aid Status." Students reinstated on Financial Aid Probation will be required to have an academic plan that will be monitored by the Office of Student Financial Assistance.

For detailed SAP policy information, please refer to the Office of Student Financial Assistance website.

Satisfactory Academic Progress Probation

Students who submit a SAP Appeal that is approved will be placed on Financial Aid Probation and will remain on probation as long as they successfully comply with the prescribed academic plan that is submitted as part of the SAP Appeal. Progression will be monitored during the probationary period at the beginning and end of each semester to ensure the student is following the prescribed academic plan and successfully matriculating through their program of study. All probation students must successfully complete a minimum of 70% of the credit hours that they attempt each semester. In addition, student
on probation for GPA and/or completion ratio must make positive progression in the appropriate area(s). Financial disbursements will not be made for a semester unless it is verified that the prior review (if applicable) was acceptable and the student is in the proper classes for the term in question.

**Graduate Certificate Programs**

There are a very limited number of Certificate Programs that are eligible for federal financial aid funding. Only course work required for the program will be considered in calculating aid eligibility. Financial aid disbursements will take place after the Drop/Swap and Add period and courses have been verified, along with confirmation of academic engagement. Students must meet all eligibility requirements prior to disbursement.

Students enrolled in approved certificate programs, must adhere to the following:

- Federal financial aid is available for up to 27 attempted credit hours at the Graduate Certificate classification.
- Must meet the minimum GPA requirements for the Graduate Certificate Program.
- The appeal process is the same as indicated below. In cases of unsuccessful completions or reaching the maximum hours limit, the Academic Plan for Financial Aid is required. Satisfactory Academic Progress (SAP) will be reviewed at the end of each semester.

**Over Awards**

An over-award occurs when a student's award package has exceeded either the unmet need or Cost of Attendance. To prevent over awards, students are required to notify the Office of Student Financial Assistance of any potential/anticipated awards not already listed on the student's financial aid award summary of myUCF, Student Center. This includes waivers or scholarships that are awarded to students at the beginning of the semester or during the academic year. If the Office of Student Financial Assistance is not aware of additional resources prior to disbursing aid, then that aid (including loans), may have to be reduced and sometimes paid back by the student if the resource creates an over award. A hold will be placed on the student's account preventing future registration and the ability to receive academic transcripts until the over award has been fully repaid to the university. Students are advised to discuss the impact of receiving scholarship funding after other financial aid funds have disbursed with the financial aid office.

**Refunds and Return of Title IV Funds**

Students should be aware that if they withdraw from the university after having received financial assistance, they may be required to repay a portion of that assistance. Students who received Federal Direct Stafford Loans should also know that the Registrar's Office is required to notify the National Student Loan Data System (NSLDS) of student withdrawals. This may change their loan deferment status with their loan servicer(s). Information about late drops, withdrawals, and medical withdrawals can be found on the Office of Student Financial Assistance website at finaid.ucf.edu/general-info/withdrawals/.

**Professional Judgment**

The federal methodology used to determine eligibility for federal student aid is a standardized calculation for all applicants. However, in some cases, special circumstances may be taken into consideration. Students with extenuating circumstances (i.e. loss of employment, divorce, the death of a spouse, etc.) should meet with a financial aid counselor to review the situation. If a student presents extenuating circumstances, an appeal can be submitted to include support documentation for review. The appeal will be reviewed and a decision will be made through the Professional Judgment review process.

**Repeated Coursework**

Federal regulations state that students may only receive federal financial aid funding for one repetition of a previously passed course. As a result, any repeated course(s) that the student enrolls in (current or future terms) cannot be used in the calculation of his/her enrollment level for financial aid purposes for that particular term, regardless of whether or not financial aid was received for the course(s). The repeated course(s), including the original attempt, must be counted towards maximum time frame and hours completion ratio requirements for Satisfactory Academic Progress purposes, which can impact a student's financial aid eligibility. For detailed information, visit finaid.ucf.edu/receiving/repeat-coursework/.
Student Rights and Responsibilities

Students have the right to full information about the financial aid programs available at UCF, application procedures, aid deadlines and the criteria used to determine a financial aid package. Students have the right to appeal decisions made by the Office of Student Financial Assistance. Students also have the right to equitable treatment of their financial assistance applications. Although each student's case is analyzed individually, eligibility standards are applied uniformly without regard to race, gender, religion, creed, national origin, or disability. All students' records are confidential. It is the student's responsibility to review and understand all information and instructions, meet all deadlines, and provide all information and documentation accurately. Errors and omissions can cause delays and prevent students from receiving assistance. Misrepresentation is a violation of federal regulations.

Helpful Hints

- Apply early to be considered for the full range of financial aid available each year by completing the Free Application for Federal Student Aid (FAFSA)/Renewal FAFSA. The processed results of the FAFSA must be received by UCF from the federal processor by December 1 to meet the university's application priority date.
- Use the IRS Data Retrieval Tool located within the FAFSA application. Applicants who use the unchanged data generated by the IRS Data Retrieval Tool will not be required to provide federal tax return transcripts from the IRS. Students who are selected for Verification who did not use the IRS Data Retrieval Tool, or changed data after using the tool, will be required to submit IRS tax return transcripts to verify tax information. Per federal regulation, copies of tax returns (Form 1040, 1040EZ, etc.) are no longer acceptable. The only exceptions to this rule include those who file tax returns in Puerto Rico or foreign countries.
- Students should activate their Knights Email account, and check it regularly to avoid missing important and critical information from the Office of Student Financial Assistance and the university.
- Complete all items on your myUCF, Student Center, "To Do List." Respond promptly to all information requests.

- Students may visit the office during normal business hours to meet with a counselor.
- Comprehensive information can be found on the Office of Student Financial Assistance website: finaid.ucf.edu.

Tax Obligations

All students must obtain a Social Security Number (SSN) in order to receive payments from the university, including fellowships, assistantships, and tuition support. Students are responsible for determining their tax obligations. For forms and information, students should contact the Internal Revenue Service (1-800-829-1040) or consult their personal tax adviser.

For more information on international students and tax obligations, see International Students in the Admission and Registration section of this catalog.

FICA Exemption Guidelines

The Internal Revenue Service (IRS) excludes certain types of student wages from the IRS definition of "employment" for purposes of FICA tax withholding. Please consult Federal Tax Guidelines on the UCF Human Resources website for details about this exemption.
Tuition and Fees

Student Account Services

Sr. Associate Controller: Kelly D’Agostino
Millican Hall, Room 109
Phone (407) 823-2433
E-mail: stuaccts@ucf.edu
Web Address: www.studentaccounts.ucf.edu

General Information

Student Account Services is here to serve the students who attend the University of Central Florida by maintaining accurate financial records and communicating with students concerning their accounts.

Student Account Services is responsible for:

- Tuition and Fee Assessment/Refunds (Student Account Services)
- Processing Payments
- Overdue payment and institutional loans collection (Loans and Collections)

Schedule of Fees

Note: 2018-2019 tuition and fees have not been established at the time of this publication. Rates for the 2018-2019 academic year will be available in July 2018 at http://studentaccounts.ucf.edu/tf-graduate/. Fees are subject to change without notice.

Tuition and Fees: Tuition and fees are established by the State Legislature and the University Board of Trustees and are subject to change without notice. Fees are affected by residency status. Tuition and fees are charged per semester or term for main campus, regional campus, and continuing education courses. Tuition is assessed on a per credit hour basis. Students classified as zero-hour registration students are assessed one credit hour at the Florida Resident Tuition rate at the course level for which the student is registered.

Tuition Fee Invoice: A student's Fee Invoice will show all tuition and fee charges, payments and deferments associated with the term, and courses in which the student is currently enrolled. The Fee Invoice will not show fees such as housing, library, parking, etc. Tuition Fee invoices are available 24/7 on the web https://my.ucf.edu, and from the student's college advising offices. Students should review their current Tuition Fee Invoice prior to making a payment. Tuition Fee invoices are not mailed. The Tuition Fee Invoice should be reviewed once after initial registration of courses and also after making any changes to the initial registration to ensure that the fees are adjusted accordingly.

Fee Payment Deadlines: All university tuition and fees must be paid by the published dates. Tuition and fees not paid or deferred by the payment deadline date for each term will result in late fees and may result in the cancellation of all classes. Refer to the Academic Calendar each term for the fee payment deadlines.

Limited Non-Degree Enrollment Classes: Payment guidelines for Limited Non-Degree enrollment classes can be found on the "Registration Form for Non-Admitted Students." It is the student's responsibility to officially drop or withdraw from courses to avoid additional financial obligations.

Student Financial Responsibility Statement

Registration at UCF requires students to acknowledge the following financial responsibility statement:

The following agreement includes details on your responsibilities related to, but not limited to the following:

You are responsible for paying for any course for which you are enrolled in at the end of UCF’s drop period. If your account becomes delinquent, you agree to reimburse UCF for the fees of any collection agency, which may be based on a percentage of the delinquent account balance.

Fee Responsibility: By registering for courses at UCF, I promise to pay the university the principal, and any late fees, fines or penalties, by the due dates stated on my student account and applicable university catalogs and/or websites. I understand that withdrawal for each term begins after the drop deadline and that I remain fee liable for any class from which I withdraw. I understand that non-attendance does not constitute a drop or withdrawal. I also understand that notifying my professor, advisor, or other university representative does not constitute a drop or withdrawal. If I withdraw from courses with the intent of not returning to UCF, I must also drop courses for any future terms or I shall be fee liable and receive a grade.

Payment of Fees: If payment is made by check (electronic or paper) and the check is not honored by my bank, I agree that a returned check fee will be charged to my student account. If I expect financial aid to pay all or part of my financial obligations
to UCF, I understand that it is my responsibility to meet all requirements for aid disbursement to my student account. I authorize UCF to use the financial aid to pay for all education costs charged to my student account in accordance with federal guidelines. I understand that it is my responsibility to ensure that all requirements of grantors, lenders, employers, and other third-party payers are met on a timely basis. I understand that despite my expectations for payment from financial aid or other sources, I am ultimately responsible for all charges incurred. I understand that my financial aid may be adjusted due to my student eligibility and/or student status (e.g., part-time, full-time). In connection with any such adjustments, I agree to repay UCF any amounts that the university pays, on my behalf, to lenders or other financial aid providers and that such amounts constitute an educational loan from the university.

Bankruptcy: UCF is an institution of higher education. As such, certain financial obligations are considered to be an educational loan offered for the sole purpose of financing an education and therefore is a non-dischargeable debt, pursuant to the United States Bankruptcy Code section 523(a)(8).

Official Notification: I understand that UCF sends electronic notifications (emails) to my official Knights email account to communicate important updates and that I am responsible for taking action on correspondence sent to this address.

Note: The Fall 2019 Financial Responsibility Statement had not been established at the time of this publication.

Payment Procedures

Payment must be received or postmarked no later than the fee payment deadlines as specified on the Academic Calendar. The primary form of payment of most account holders is online through the E-pay system via the myUCF portal. Currently, students can pay using a check or a credit card in this system. Payments cannot be transacted by telephone.

Acceptable Forms of Payment:

- Personal Checks
- Credit Cards (Acceptable credit card types are subject to change). Please review the Student Account Services website: www.studentaccounts.ucf.edu for current payment information.
- E-Pay (https://my.ucf.edu)—E-Check (Personal Check) or Credit Card
- A nonrefundable convenience fee or processing fee will apply per credit card transaction.

- Payments made at any time on the date of the published fee payment deadline will be considered on time. See the Academic Calendar.

E-Pay process:

- Sign in the myUCF portal as usual then click on the link for Student Self Service; this will open your Student Center page. Use the right scroll bar to scroll to the Finances section. You will find the My Account section.
- Click on the link for the Tuition Fee Invoice. Select the current term (i.e. summer 2018, fall 2018, or spring 2019). The Fee Invoice will provide you your schedule, the charges, the Amount Due, and deferrals.
- Annotate the Amount Due as you will need that amount once you are on the E-Pay system.
- Scroll down to the bottom of the page and click on the Due Charges/E-Pay link to make a payment.

Mailed payments: (Please do not send cash)

- Include student's name and UCF ID# on personal checks or money orders (make check payable to University of Central Florida).
- Address payments to:
  University of Central Florida
  Student Account Services
  Attn: Payment Processing
  P.O. Box 160115
  Orlando, FL 32816-0115

Payment Drop – 24-Hour Depository at the main campus (located on Reflecting Pond side entrance of Millican Hall) (no cash)

Other Forms of Payment

Tuition and fees may be partially or completely paid by financial aid, Florida Prepaid, tuition waivers, or departmental grants. The student is responsible to pay any amount that is not covered by these types of payments by the due date on his or her fee invoice.

Financial Aid

See Student Financial Assistance for rules and procedures.

All fees not deferred by financial aid are due by the due date on his or her fee invoice.
UCF Payment Plan

The UCF payment plan is a 2-payment design in which the student pays $15 upfront to be allowed to pay only 50% of the total tuition bill by the regular payment deadline, therefore avoiding a late payment fee, and being dropped for non-payment. The student is then responsible for paying the remaining 50% by the Payment Plan deadline on their Fee Invoice. Students receiving financial aid, Florida Prepaid, waivers, or third party payments already have an extended payment deadline and will not be eligible for the UCF payment plan.

For information regarding Florida Prepaid College Plan or Tuition Waivers please refer to the Student Account Services website.

Tuition and Fees for Senior Citizens

Persons 60 years of age or older who meet Florida residency requirements may register to audit classes on a space-available basis without payment of tuition and application fees. Registration is on a space-available basis; see the appropriate term's Academic Calendar [http://calendar.ucf.edu](http://calendar.ucf.edu) for registration dates and times. The tuition fee waiver cannot be used for courses that require increased costs (such as thesis, dissertation, and directed individual study). A "Florida Residency" Affidavit is required to establish Florida residency. A completed "Student Health History" form must be filed prior to registration. Inquiries should be directed to the Registrar's Office (MH 161; Telephone: 407-823-3100).

Refund of Fees

A refund of fees will be processed under the conditions noted below. The student must submit a written appeal for a refund or other appeal action to the University within six months of the close of the semester/term to which the refund or other appeal action is applicable. Any debts to the University will be deducted from the refund, up to the full amount.

Full Refund Eligibility

The following conditions allow a full refund: 1) A class is dropped before the end of the Drop period; 2) Cancellation of a course by the university.

Partial Refund (25%)

Twenty-five percent of tuition and associated fees assessed and paid, adjusted for waivers is refundable when the student withdraws completely from the University prior to the end of the fourth week of classes during a 16 or 17 week semester, or at the end of the first quarter of classes during a summer session.

Exceptional Circumstances

Refunds for exceptional circumstances may be available for certain Administrative Record Changes of courses. Up to 100% of tuition and registration fees are refundable if due to circumstances determined by the University to be exceptional, including, but not limited to, sickness, death, involuntary call to military service, or University administrative error. If approved, a Late Withdrawal does not result in a refund of tuition and fees. Please visit the Academic Services website for more information.

A written appeal for a refund or other appeal action must be submitted to the University within six (6) months of the close of the semester to which the refund or other appeal action is applicable.

Direct Deposit

Students are strongly encouraged to establish direct deposit with the University. Direct Deposit prevents delays due to lost checks or change of address. All refunds from students' accounts can be directly deposited into the student's checking account to any U.S.A. bank in the federal system. Funds are usually available within 24-48 hours after disbursement, and enrollment only takes a few minutes. To enroll, sign in at [https://my.ucf.edu](https://my.ucf.edu) and click on Student Self Service. Go to the Student Account Services link, then click on Direct Deposit and follow the instructions.

Past Due Accounts

All financial obligations to the University must be met. Failure to meet obligations can result in the withholding and denial of registration, diploma, transcripts, and readmission to the University. The services of a professional collection agency and recourse to the courts may also be invoked if deemed necessary. All costs of collection, including attorney's fees, are the responsibility of the debtor.

Do not assume your registration will be canceled if you fail to pay fees or attend classes. Tuition deferrals, for example, will prevent class cancellation for non-payment.
Late Fees

Late Payment Fees apply to students who do not pay their fees (or obtain a full fee deferment) by the payment deadline. The Late Payment Fee is $100 per term minimum.

Late Registration Fees are charged to students who enroll following the close of the regular registration period for the term, who re-register, or who enroll for the first time that term during Late Registration and Drop/Swap and Add period. The Late Registration Fee is $100.00 per term minimum.

Late Payment DNP (Drop for Non-Payment) Fees are charged to students who are dropped for non-payment of courses per term minimum.*

*Summer term is divided into sessions, and the late fees are charged per session.

Administrative Procedures Act

The University of Central Florida, under applicable rules of the Administrative Procedures Act, may change any of the announcements, information, policies, and rules, regulations or procedures set forth on the Registrar's Office website. Statements in the Registrar's Office website may not be regarded in the nature of binding obligations on UCF or the state of Florida. While every effort will be made to accommodate the curricular needs of students, limited resources may prevent the University from offering all required courses in each term or in day and evening sessions. Students should refer to the current Undergraduate Catalog or the Graduate Catalog for the complete Policy Statement.

UCF Online

Courses

UCF offers hundreds of online courses to all students every semester. The online course materials and methods have been developed by UCF faculty members to maximize the learner's achievement of course and program objectives and to provide students with convenient and flexible learning opportunities.

Support for all students in online courses is available at https://cdl.ucf.edu/support/student/. Online courses are identified in the Class Schedule Search available at my.ucf.edu. In the Additional Search Criteria section, use the drop-down list next to Mode of Instruction to search for the values described below.

Online instruction modes are:

WORLD WIDE WEB (W): These are courses conducted via web-based instruction and collaboration. Some courses may require minimal campus attendance or in-person/proctored examinations.

VIDEO STREAMING (V): These are courses delivered over the web via streaming digital video which may be supplemented by additional web activity, projects or exams.

VIDEO STREAMING/REDUCED SEAT TIME (RV): In these courses, classroom-based content is available over the web via streaming video and classroom attendance is not required. Other required activities that substitute for video instruction may include any of the following elements: web activity, in-person or proctored examinations, and labs. See course notes for details.

MIXED-MODE/REDUCED SEAT TIME (M): These courses include both required classroom attendance and online instruction. Classes have substantial activity conducted over the web, which substitutes for some classroom meetings.

ACTIVE LEARNING REDUCED SEAT TIME (RA): These courses utilize web-based learning technologies as the primary instructional medium within a blended course combining required face-to-face and online elements. Classes have substantial activity conducted online, and classroom activities are limited to no more than 20 percent of the instructional time over the course of the semester.

Personalized Adaptive Learning (PAL) is a class attribute that may apply to any type of course (e.g. P, W, M, RA). Class attributes are displayed in the course description returned by the class search tool in my.ucf.edu. In a PAL course, a portion of the overall online content is delivered via an adaptive learning system that customizes objective-driven content and assessments.
to create a personalized learning path for each student according to their knowledge, skills, and learning needs.

**UCF Online Programs and Students**

UCF offers dozens of programs as listed below that can be completed entirely with online courses. These programs are available to all students and UCF Online provides an option for students who are interested in taking online courses exclusively. Newly admitted students who choose this option may not enroll in classes with scheduled face-to-face meetings. This includes classes coded P (face-to-face instruction), RA (active learning reduced seat time), and M (Mixed mode/reduced seat time).

Students enrolled as a UCF Online student are exempt from some campus-based fees and are restricted from the corresponding campus-based services such as the Recreation and Wellness Center and Student Health Services. UCF Online students do have access to all academic and support services such as financial aid, advising, library services, and career services. UCF Online students also have the support of a dedicated staff of success coaches specifically trained and enabled to meet the needs of students without regular access to UCF's physical campuses. See [www.ucf.edu/online](http://www.ucf.edu/online) for more information.

The University of Central Florida has been approved by Florida to participate in National Council for State Authorization Reciprocity Agreements. The reciprocity agreements allow for the open delivery of academic credit-earning activities in participating states, including academic field experiences such as internships or practicums. More information available at registrar.ucf.edu/restrictions.

UCF Connect

UCF Connect is a partnership-driven unit designed to strategically extend UCF’s reach to communities in and beyond Central Florida that provides access to quality continuing and higher education for students who, because of time, distance, preference, or life circumstance, might not otherwise have the opportunity to pursue educational opportunities.

The Central Florida Higher Education Consortium, branded as DirectConnect™ to UCF, is a unique partnership between UCF and College of Central Florida, Daytona State College, Eastern Florida State College, Lake-Sumter State College, Seminole State College, and Valencia College. This agreement provides entry for A.A. and A.S. graduates to UCF as an enhancement to the Florida state-mandated 2 + 2 agreement. Students entering UCF as a DirectConnect™ to UCF student are admitted according to the UCF policies when A.A. or A.S. degrees are awarded. UCF Success Coaches are available on each of the DirectConnect™ to UCF campuses.

UCF Connect offers an opportunity to complete a number of programs through the UCF Connect Centers. Strategically located within an 80-mile radius of the UCF Orlando campus, the UCF Connect Centers partner with the six DirectConnect™ to UCF state colleges, fostering seamless and convenient advancement from completion of an A.A. or A.S. degree to upper-level division work on a baccalaureate degree. With close proximity to Orlando, resources are available at UCF and the UCF Connect Centers, such as admissions, registration, financial aid, advising, student clubs and organizations, accessibility services, veteran’s affairs, "smart classrooms," libraries, computer labs, and more. Accessible academic programs vary by location. For the most current information on any of the UCF Connect Centers, check the website at www.connect.ucf.edu/.

Accreditation

Overview

The University of Central Florida is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award degrees at the associate, baccalaureate, master's, specialist, and doctoral levels. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call (404) 679-4500 for questions about the accreditation of the University of Central Florida.

Please note the commission's expectation that contact occurs only if there is evidence to support significant non-compliance with a requirement or standard. For other information about UCF's SACSCOC accreditation, please contact the university's SACSCOC liaison in UCF's Office of Academic Affairs.

For the purposes of this catalog, "accredited institutions" means those institutions accredited by one of the seven U.S. regional associations. The seven regional associations are:

- New England Association of Schools and Colleges, Commission on Institutions of Higher Education
- Middle States Commission on Higher Education
- Higher Learning Commission
- Northwest Commission on Colleges and Universities
- Southern Association of Colleges and Schools Commission on Colleges
- Western Association of Schools and Colleges, Senior College and University Commission
- Western Association of Schools and Colleges, Accrediting Commission for Community and Junior Colleges

Graduate Admission Requirement

In order to enroll in graduate classes, students must have obtained a baccalaureate or higher degree, prior to the start of the term for which the student is admitted, from an institution accredited by one of the above accrediting agencies or from a recognized foreign institution. Students without a baccalaureate or higher degree from an accredited institution (or equivalent) are not admitted to graduate degree programs, graduate certificate programs, or graduate nondegree status.

Recognized Institution

A "recognized institution" in a country outside of the United States is an institution that is recognized by that nation's Ministry of Education or similar authority, as a post-secondary, academic-degree-granting institution.

Other Accreditations

In addition to the regional accreditation agencies, there are a number of scientific, professional, and academic bodies conferring accreditation in specific disciplines. Several UCF graduate programs are accredited or are similarly recognized by one or more of the following agencies:

- The Association to Advance Collegiate Schools of Business (AACSB International)
- National Council for Accreditation of Teacher Education (NCATE)
- National Association of School Psychologists (NASP)
- Council for Accreditation of Counseling and Related Educational Programs (CACREP)
- Florida Department of Education
- Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA)
- Commission on Collegiate Nursing Education (CCNE)
- Council on Social Work Education (CSWE)
- Commission on Accreditation in Physical Therapy Education (CAPTE)
- National Association of Schools of Music (NASM)
- Accreditation Committee of the Human Factors and Ergonomics Society
- American Psychological Association (APA)
- Network of Schools of Public Policy, Affairs and Administration (NASPAA)
- Commission on Accreditation of Healthcare Management Education (CAHME)
- Liaison Committee on Medical Education (LCME)
- National Association of Schools of Theatre (NAST)

Doctoral

Big Data Analytics PhD ♦

Program Description

The Doctor of Philosophy in Big Data Analytics is accepting applications for Fall 2018 semester.

Big Data Analytics will train researchers with a statistics background to analyze massive, structured or unstructured data to uncover hidden patterns, unknown correlations and other useful information that can be used to make better decisions.

The program will provide a strong foundation in the major methodologies associated with Big Data Analytics such as predictive analytics, data mining, text analytics and statistical analysis with an interdisciplinary component that combines the strength of statistics and computer science. It will focus on statistical computing, statistical data mining and their application to business, social, and health problems complemented with ongoing industrial collaborations. The scope of this program is specialized to prepare data scientists and data analysts who will work with very large data sets using both conventional and newly developed statistical methods.

Curriculum

The Ph.D. in Big Data Analytics requires 72 hours beyond an earned Bachelor's degree. Required coursework includes 42 credit hours of courses, 15 credit hours of restricted elective coursework, and 15 credit hours of dissertation research.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—42 Credit Hours

- STA 5104 - Advanced Computer Processing of Statistical Data 3 Credit Hours
- STA 5703 - Data Mining Methodology I 3 Credit Hours
- STA 6106 - Statistical Computing I 3 Credit Hours
- STA 6236 - Regression Analysis 3 Credit Hours
- STA 6238 - Logistic Regression 3 Credit Hours
- STA 6326 - Theoretical Statistics I 3 Credit Hours
- STA 6327 - Theoretical Statistics II 3 Credit Hours
- STA 6329 - Statistical Applications of Matrix Algebra 3 Credit Hours
- STA 6704 - Data Mining Methodology II 3 Credit Hours
- STA 7722 - Statistical Learning Theory 3 Credit Hours
- STA 7734 - Statistical Asymptotic Theory in Big Data 3 Credit Hours
- STA 6714 - Data Preparation 3 Credit Hours
- CNT 5805 - Network Science 3 Credit Hours
- COP 5711 - Parallel and Distributed Database Systems 3 Credit Hours
- STA 6107 - Statistical Computing II 3 Credit Hours
- STA 6207 - Response Surface and Mixture Experiments 3 Credit Hours
- STA 6226 - Sampling Theory and Applications 3 Credit Hours
- STA 6237 - Nonlinear Regression 3 Credit Hours
- STA 6246 - Linear Models 3 Credit Hours
- STA 6346 - Advanced Statistical Inference I 3 Credit Hours
- STA 6347 - Advanced Statistical Inference II 3 Credit Hours
- STA 6507 - Nonparametric Statistics 3 Credit Hours
- STA 6662 - Statistical Methods for Industrial Practice 3 Credit Hours
- STA 6705 - Data Mining Methodology III 3 Credit Hours
- STA 6707 - Multivariate Statistical Methods 3 Credit Hours
- STA 6709 - Spatial Statistics 3 Credit Hours
- STA 6857 - Applied Time Series Analysis 3 Credit Hours

Restricted Electives—15 Credit Hours (at least 9 credit hours must be STA coursework)

Other courses may be included in a Plan of Study with departmental approval.

All Ph.D. students must have an approved Plan of Study (POS) developed by the student and advisor that lists the specific courses to be taken as part of the degree. Students must maintain a minimum GPA of 3.0 in their POS, as well as a "B" (3.0) in all courses completed toward the degree and since admission to the program.

- STA 6107 - Statistical Computing II 3 Credit Hours
- STA 6207 - Response Surface and Mixture Experiments 3 Credit Hours
- STA 6226 - Sampling Theory and Applications 3 Credit Hours
- STA 6237 - Nonlinear Regression 3 Credit Hours
- STA 6246 - Linear Models 3 Credit Hours
- STA 6346 - Advanced Statistical Inference I 3 Credit Hours
- STA 6347 - Advanced Statistical Inference II 3 Credit Hours
- STA 6507 - Nonparametric Statistics 3 Credit Hours
- STA 6662 - Statistical Methods for Industrial Practice 3 Credit Hours
- STA 6705 - Data Mining Methodology III 3 Credit Hours
- STA 6707 - Multivariate Statistical Methods 3 Credit Hours
- STA 6709 - Spatial Statistics 3 Credit Hours
- STA 6857 - Applied Time Series Analysis 3 Credit Hours
Examinations

After passing candidacy, students will enroll into dissertation hours (STA7980) with their dissertation advisor. The dissertation can be either research- or project-based depending on the area of study, committee, and with the approval of the dissertation advisor.

Qualifying Examination

The qualifying examination is a written examination that will be administered by the doctoral exam committee at the start of the fall term (end of the summer) once a year. The courses required to prepare for the examination are STA 5703, STA 6704, CNT 5805, STA 6326, STA 6327 and COP 5711. Students must obtain permission from the Graduate Program Coordinator to take the examination. Students normally take this exam just before the start of their third year and are expected to have completed the exam by the start of their fourth year. To be eligible to take the Ph.D. qualifying examination, the student must have a minimum grade point average of 3.0 (out of 4.0) in all the coursework for the Ph.D. The exam may be taken twice. If a student does not pass the qualifying exam after the second try, he/she will be dismissed from the program.

Candidacy Examination

The candidacy exam is administered by the student's dissertation advisory committee and will be tailored to the student's individual program to propose either a research- or project-based dissertation. The candidacy exam involves a dissertation proposal presented in an open forum, followed by an oral defense conducted by the student's advisory committee. This committee will give a Pass/No Pass grade. In addition to the dissertation proposal, the advisory committee may incorporate other requirements for the exam. The student can attempt candidacy any time after passing the qualifying examination, after the student has begun dissertation research (STA7919, if necessary), but prior to the end of the second year following the qualifying examination. The candidacy examination can be taken no more than two times. If a student does not pass the candidacy exam after the second try, he/she will be removed from the program.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours.

- Completion of all coursework, except for dissertation hours
- Successful completion of the qualifying examination
- Successful completion of the candidacy examination including a written proposal and oral defense
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars
- Submittal of an approved program of study
Dissertation

After passing the qualifying exam, the student must select a dissertation adviser. In consultation with the dissertation adviser, the student should form a dissertation advisory committee. The dissertation adviser will be the chair of the student's dissertation advisory committee. In consultation with the dissertation advisor and with the approval of the chair of the department, each student must secure qualified members of their dissertation committee. This committee will consist of at least four faculty members chosen by the candidate, three of whom must be from the department and one from outside the department or UCF. Graduate faculty members must form the majority of any given committee. A dissertation committee must be formed prior to enrollment in dissertation hours.

The dissertation serves as the culmination of the coursework that comprises this degree. It must make a significant original theoretical, intellectual, practical, creative or research contribution to the student's area within the discipline. The dissertation can be either research- or project-based depending on the area of study, committee, and with the approval of the dissertation advisor. The dissertation will be completed through a minimum of 15 hours of dissertation research credit.

Independent Learning

As will all graduate programs, independent learning is an important component of the Big Data Analytics doctoral program. Students will demonstrate independent learning through research seminars and projects and the dissertation.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A personal statement identifying the area of research interest and a description of the applicant's academic and professional experiences.
- Three letters of recommendation.
- A Bachelor's degree or its equivalent in statistics, data analytics or a related field from a regionally accredited institution or recognized foreign institution.
- The student should have a minimum cumulative GPA of 3.0 for all bachelor's level work completed.
- A competitive score on the combined quantitative and verbal sections of the Graduate Record Examination (GRE) or a competitive GMAT score taken within the last five years prior to admission to the program.
- A current curriculum vitae.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.
Biomedical Sciences MD/PhD

Track Description

The College of Medicine offers an integrated MD/PhD curriculum that enables students to fulfill all requirements and earn the Doctor of Medicine and the Doctor of Philosophy.

This program provides opportunity for MD students to obtain advanced research and training experience and for PhD students to obtain medical training. The program develops physician-scientists with preparation for both academic research and teaching careers. Physician-scientists are in an excellent position to facilitate bench-to-bedside translation of applicable research findings.

Curriculum

Students must fulfill all requirements for both programs to earn both the MD and PhD degrees. As indicated in the curriculum description, some medical modules can be substituted for certain graduate courses and vice versa to help reduce redundancy and streamline time to completion of this integrated program.

Students will be able to complete the MD/PhD program in as few as 6 years, although most students will likely require 7-8 years to fulfill all of the requirements. An MD/PhD program committee consisting of faculty from both the medical and graduate programs will serve as the oversight committee responsible for tracking and evaluating student progress in this program.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Students in the integrated MD/PhD Track in Biomedical Sciences must be accepted in the College of Medicine MD program and begin working on their PhD research project during the first two years of medical school. Students take medical courses during the first two years and must successfully pass the USMLE Step 1 exam at the end of year 2 prior to beginning full-time graduate studies in the Biomedical Sciences PhD Program. Required and elective graduate courses for the PhD program are completed in years 3-4 while the student is continuing research.

Clinical clerkships that are typically completed in years 3-4 of medical school will in most cases be deferred until the student has completed the PhD program requirements, though some minimum level of ongoing clinical training will continue throughout the entire duration of the program. This ensures that the student remains connected with clinical education and training even while primarily focused on the graduate portion of the MD/PhD program.

The Biomedical Sciences PhD program requires a minimum of 72 credit hours beyond the bachelor's degree, including a minimum total of 27 hours of formal course work exclusive of independent study that are required. The 72 credit hours in the PhD program consists of 23 credit hours of core courses, 12 credit hours of electives, and a minimum of 15 credit hours of dissertation research. The remaining 22 credit hours may consist of additional electives, doctoral research and/or dissertation research.

Students entering with a master's degree may request that up to 30 semester credit hours of previous course work be waived as degree requirements with approval from the dissertation committee.

The MD curriculum can be found here:
http://med.ucf.edu/academics/md-program/integrated-curriculum/

Programmatic deficiencies expected of applicants from diverse settings will be addressed early in the program by completion of appropriate course work. Students may register for doctoral research until they have been admitted to candidacy, after which they must register for dissertation research.

New students will rotate through at least two different laboratories to identify a faculty mentor/sponsor and research area of interest for their dissertation. Finally, a sequence of required seminars will familiarize students with field-related literature and introduce them to the conceptual and technical frameworks in which they will work. All students receiving assistantships must enroll full time.

MD/PhD students are required to maintain good academic standing in both the MD and PhD components of the curriculum. Students must first satisfactorily complete the first two years of the medical school curriculum and pass the USMLE Step 1 exam before they can begin full-time PhD enrollment.

Required Courses—23 Credit Hours

- BMS 6001 - Cellular Function and Medical Genetics 5 Credit Hours (Medical Module replaces BSC 6432)
- BSC 6433 - Biomedical Sciences II 5 Credit Hours
- IDS 7692L - Experiments in Biomedical Sciences 1-3 Credit Hours (lab rotation)
• IDS 7692L - Experiments in Biomedical Sciences 1 Credit Hour (lab rotation)
• IDS 7690 - Frontiers in Biomedical Sciences 1 Credit Hours (four semesters, 1 credit hour each semester)
• BSC 6431 - Practice of Biomedical Sciences 3 Credit Hours
• IDS 6694 - Experimental Design and Analysis in Biomedical Sciences 2 Credit Hours

**Elective Courses—12 Credit Hours**

At least 12 hours of electives must be taken from the following list. Any electives not on this list must be approved by the Graduate Committee before being counted toward degree credit requirements. Directed research, doctoral research and dissertation research may be used to satisfy requirements beyond the first 12 hours, with approval from the program director. Students successfully completing the first year of medical school at UCF may substitute the following medical modules to fulfill the elective course requirement:

- BMS 6006 - Health and Disease 5 Credit Hours
- BMS 6050 - Psychosocial Issues in Healthcare 4 Credit Hours
- BMS 6631 - Hematology and Oncology 4 Credit Hours

Others: If approved by the Graduate Committee.

**Additional Electives**

Additional electives may be taken as needed from the following list of approved graduate courses:

- BSC 5418 - Tissue Engineering 3 Credit Hours
- BSC 5436 - Biomedical Informatics Structure Analysis 3 Credit Hours
- BSC 6407C - Laboratory Methods in Molecular Biology 3 Credit Hours
- CAP 5510 - Bioinformatics 3 Credit Hours
- CHM 5305 - Applied Biological Chemistry 3 Credit Hours
- CHM 5450 - Polymer Chemistry 3 Credit Hours
- CHM 5451C - Techniques in Polymer Science 3 Credit Hours
- CHS 6251 - Applied Organic Synthesis 3 Credit Hours
- CHS 6535 - Forensic Molecular Biology 3 Credit Hours
- CHS 6535L - Forensic Analysis of Biological Materials 3 Credit Hours
- CHS 6536 - Population Genetics and Genetic Data 3 Credit Hours
- GEB 5516 - Technological Entrepreneurship 3 Credit Hours
- IDS 5127 - Foundation of Bio-Imaging Science 3 Credit Hours
- MCB 5205 - Infectious Processes 3 Credit Hours
- MCB 5208 - Cellular Microbiology: Host-Pathogen Interactions 3 Credit Hours
- MCB 5225 - Molecular Biology of Disease 3 Credit Hours
- MCB 5505 - Molecular Virology 3 Credit Hours
- MCB 5722C - Methods in Biotechnology 4 Credit Hours
- MCB 5932 - Current Topics in Molecular Biology VAR Credit Hours
- MCB 5397 - ST: Cellular Metabolism 3 Credit Hours
- MCB 6226 - Molecular Diagnostics 3 Credit Hours
- MCB 6417C - Microbial Metabolism 3 Credit Hours
- PCB 5025 - Molecular and Cellular Pharmacology 3 Credit Hours
- PCB 5236 - Cancer Biology 3 Credit Hours
- PCB 5238 - Immunobiology 3 Credit Hours
- PCB 5265 - Stem Cell Biology 3 Credit Hours
- PCB 5275 - Signal Transduction Mechanics 3 Credit Hours
- PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours
- PCB 5596 - Biomedical Informatics: Sequence Analysis 3 Credit Hours
- PCB 5815 - Molecular Aspects of Obesity, Diabetes and Metabolism 3 Credit Hours
- PCB 5838 - Cellular and Molecular Basis of Brain Functions 3 Credit Hours
- PCB 6528 - Plant Molecular Biology 3 Credit Hours
- PCB 6585C - Advanced Genetics 4 Credit Hours
- PCB 6595 - Regulation of Gene Expression 3 Credit Hours
- PCB 6677 - Molecular Evolution and Phylogenetics 3 Credit Hours
- ZOO 5748C - Clinical Neuroanatomy 5 Credit Hours

**Unrestricted Electives—22 Credit Hours Minimum**

Students should take 22 credit hours of electives, directed research, doctoral research or dissertation research, in consultation with their adviser.

**Dissertation—15 Credit Hours Minimum**

- IDS 7980 - Dissertation Research 15 Credit Hours
Candidacy Examination

Candidacy will consist of writing and orally defending a proposal outlining a novel research idea to the dissertation committee. The written proposal will be prepared independently, following NIH-style grant format, and must be approved by the dissertation committee (see Biomedical Sciences PhD Program description for full description of Candidacy Exam requirements and procedures). After passing the candidacy examination and meeting other requirements as specified, the student can register for dissertation hours.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Successfully complete a minimum of 48 credit hours.
- Successful completion of Academic Integrity requirements.
- Successful completion of all coursework, except for dissertation hours.
- Successful completion of candidacy.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submission of an approved program of study.

Dissertation Defense

The dissertation should be of significant scope and depth such that the work has made significant advances in the area of biomedical science.

The Ph.D. dissertation research must generate sufficient quantity and quality data to support a minimum of two original manuscripts (first-authored by the student) in a mainstream journal in the field. One first-author original research article published or accepted for publication is required for pre-defense. In addition to meeting the pre-defense requirement for publication, a second manuscript must have been submitted and subjected to peer review before the defense.

Upon completion and approval of the doctoral dissertation by all designated faculty and university offices, the student will make a formal presentation of the research findings in seminar format to the dissertation committee and other university faculty and students. The candidate will answer questions and defend conclusions about the subject matter.

Independent Learning

The dissertation serves as the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Interested applicants must first apply to the UCF medical school through AMCAS and indicate on their medical school application that they are applying for MD/PhD.

Students interested in pursuing a combined MD/PhD degree must apply and be accepted into medical school and the Biomedical Sciences PhD program. Separate applications are required, and students wishing to pursue this joint degree program should indicate this and state their reasons on both applications.

AMCAS Application

Applicants must complete an application through the online American Medical College Application Service (AMCAS) at www.aamc.org. AMCAS is the national application service that processes applications for M.D. Programs throughout the nation. Through AMCAS, an applicant may apply to most M.D. programs by completing one application and paying the appropriate fees. AMCAS provides the college with applicant information immediately upon completion of AMCAS transcript verification process.

The AMCAS application period begins in late May and terminates on or before December 15 prior to the year in which the applicant anticipates enrollment. The AMCAS Application deadline is the date when students must submit the application, all fees, original transcripts, and associated data to AMCAS.

Applicants who are selected for medical school interviews at UCF will be invited to apply through the Graduate School portal for the PhD portion of the combined program. Please note that applications that do not come through AMCAS will not be considered for MD/PhD track.

Applicants entering the program with regular status are expected to have completed course work required for a bachelor's degree in chemistry, cell biology, biochemistry, biophysics, genetics, molecular biology or microbiology.
In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE or MCAT score taken within the last five years.
- Three letters of recommendation.
- Statement of research interest and purpose, including a summary of relevant work or research experience.
- Résumé.
- A personal or telephone interview.

In addition to the above requirements, students must also meet the requirements for medical school admission: [http://med.ucf.edu/administrative-officers/student-affairs/admissions/](http://med.ucf.edu/administrative-officers/student-affairs/admissions/).

Admission is based on an overall assessment of the qualifications submitted and the interview. All admissions to the MD/PhD program are competitive and based on availability of faculty for sponsoring research. Application Deadlines

Biomedical Sciences PhD

Program Description

This program is no longer accepting applications for Fall 2018.

The Biomedical Sciences PhD program is an interdisciplinary program that combines biological and physical science. This program is intended to educate students in independent research and team collaboration within the field.

Curriculum

The Biomedical Sciences PhD program requires a minimum of 72 credit hours beyond the bachelor's degree, including a minimum total of 27 hours of formal course work exclusive of independent study that are required.

The program requires 23 credit hours of core courses, 12 credit hours of electives, and a minimum of 15 credit hours of dissertation research. The remaining 22 credit hours may consist of additional electives, doctoral research and/or dissertation research. Students with an earned master's degree may request that up to 30 credit hours of previous course work be waived.

New students will take a two-semester introductory course, participate in laboratory rotations to identify a research area of interest, and take a sequence of required seminars.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Programmatic deficiencies expected of applicants from diverse settings will be addressed early in the program by completion of appropriate course work. Students entering with a master's
degree may request that up to 30 semester credit hours of
previous coursework be waived as degree requirements with
approval from the dissertation committee. Students may register
for doctoral research until they have been admitted to candidacy,
after which they must register for dissertation research.

New students will take a two-semester course that provides an
introduction to the interdisciplinary area of biomedical sciences.
In addition, a laboratory rotation will allow students to have a
brief but intensive experience working with faculty in at least
two different research laboratories to find a research area of
interest for their dissertation. Finally, a sequence of required
seminars will familiarize students with field-related literature
and introduce them to the conceptual and technical frameworks
in which they will work. All students receiving assistantships
must enroll full time.

Required Courses—23 Credit Hours

- BSC 6432 - Biomedical Sciences I 5 Credit Hours
- BSC 6433 - Biomedical Sciences II 5 Credit Hours
- IDS 7692L - Experiments in Biomedical Sciences 1-3
  Credit Hours (lab rotation)
- IDS 7692L - Experiments in Biomedical Sciences 1 Credit
  Hour (lab rotation)
- IDS 7690 - Frontiers in Biomedical Sciences 1 Credit
  Hours (four semesters, 1 credit hour each semester)
- BSC 6431 - Practice of Biomedical Sciences 3 Credit
  Hours
- IDS 6694 - Experimental Design and Analysis in
  Biomedical Sciences 2 Credit Hours

Elective Courses—12 Credit Hours

At least 12 hours of electives must be taken from the following
list. Any electives not on this list must be approved by the
Graduate Committee before being counted toward degree credit
requirements. Directed research, doctoral research, and
dissertation research may be used to satisfy requirements beyond
the first 12 hours, with approval from the program director.

Others: If approved by the Graduate Committee.

Unrestricted Electives—22 Credit Hours Minimum

Students should take 22 credit hours of electives, directed research, doctoral research or dissertation research, in consultation with their adviser.

Dissertation—15 Credit Hours Minimum

- IDS 7980 - Dissertation Research 15 Credit Hours

Candidacy Examination

Candidacy will consist of writing and orally defending a proposal outlining a novel research idea to the dissertation committee. The written proposal will be prepared independently, following NIH-style grant format, and must be approved by the dissertation committee (see Biomedical Sciences PhD Program Handbook for full description of Candidacy Exam requirements and procedures). After passing the candidacy examination and meeting other requirements as specified, the student can register for dissertation hours.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Successfully complete a minimum of 48 credit hours.
- Successful completion of all coursework, except for dissertation hours.
- Successful completion of candidacy examination.
- Successful defense of the written dissertation proposal.
- Successful completion of Academic Integrity requirements.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Dissertation Defense

The dissertation should be of significant scope and depth such that the work has made significant advances in the area of biomedical science.

The Ph.D. dissertation research must generate sufficient quantity and quality data to support a minimum of two original manuscripts (first-authored by the student) in a mainstream journal in the field. One first-author original research article published or accepted for publication is required for pre-defense. In addition to meeting the pre-defense requirement for publication, a second manuscript must have been submitted and subjected to peer review before the defense.

Upon completion and approval of the doctoral dissertation by all designated faculty and university offices, the student will make a formal presentation of the research findings in seminar format to the dissertation committee and other university faculty and students. The candidate will answer questions and defend conclusions about the subject matter.

Independent Learning

The dissertation serves as the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants entering the program with regular status are expected to have completed course work required for a bachelor's degree in chemistry, cell biology, biochemistry, biophysics, genetics, molecular biology or microbiology.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Statement of research interest and purpose, including a summary of relevant work or research experience.
- Résumé or CV.
- A personal or telephone interview.

Admission is based on an overall assessment of the qualifications submitted and the interview. All admissions to graduate status are competitive and based on availability of faculty for sponsoring research.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Business Administration PhD

Program Description

The Business Administration PhD program prepares students for careers in higher education and management. Students may choose from four tracks: Accounting, Finance, Management and Marketing.

The objective of the doctoral program in Business Administration is to prepare students for academic careers in higher education and management careers within profit and nonprofit organizations. Success in the program is judged by the student's understanding of the issues and methodologies essential to the advancement of knowledge.

Curriculum

Total Credit Hours Required: 84 Credit Hours Minimum beyond the Bachelor's Degree

Upon admission to the Business Administration doctoral program, the student will be assigned an adviser. With the approval of the adviser, the student will complete a program of study including the following requirements.

General Preparation and Course Work

- MBA degree or equivalent—30 credit hours: Each track may specify different requirements for this category.
- Major—12-21 hours.
- Minor/Support Area—6-9 credit hours.
- Research Tools—12-15 credit hours: All doctoral students are required to take two applied statistics courses. Other research tool courses will be specified by the track.
- Teaching—Each track will require some education related to teaching. It may take the form of classes, noncredit seminars, mentoring or a teaching requirement.
- Candidacy Examination: The student must successfully complete a comprehensive candidacy examination. This exam has written and oral parts, and covers the candidate's program of study. Students are admitted to candidacy after satisfying all general degree requirements, passing the comprehensive exam, and fulfilling the residency requirement.
- Dissertation—15 credit hours: The student must successfully defend a written dissertation proposal in an oral examination conducted by the student's advisory/dissertation committee. The final defense of the successful dissertation will require an oral examination that
concentrates on, but is not limited to, the student's dissertation defense.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements and deadlines.

The next admission cycle for this program is Fall 2020.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Business Administration PhD, Accounting Track

Track Description

The objective of the Accounting track in the Business Administration PhD program is to prepare students for academic careers at major research universities.

Dixon School faculty guide student learning through a combination of coursework and hands-on research projects with the objective of contributing new insights to the field. Students immerse themselves in classic and cutting-edge research in accounting, theories drawn from psychology, economics and/or sociology as well as the methods used to discover and evaluate new ideas in the field. Success in the program is judged by the student's understanding of the issues and methodologies essential to the advancement of knowledge.

The program requires a full-time commitment on the part of the students supported by stipends, tuition waivers, health insurance options etc. as described in the Graduate Student Handbook and on the College of Graduate Studies website.

Curriculum

The Accounting track of the Business Administration PhD program requires 84 credit hours beyond the bachelor's degree. Students must meet prerequisite requirements of 30 credit hours, and then complete 18 credit hours of accounting core courses, 12 credit hours of research methods/tools courses, 9 credit hours of electives, and 15 credit hours of dissertation.

Total Credit Hours Required: 84 Credit Hours Minimum beyond the Bachelor's Degree

Prerequisites: Foundation Body of Knowledge—30 Credit Hours

In the Accounting track of the Business Administration PhD program, the foundation body of knowledge may be satisfied with a master's degree in Accounting, Business Administration, Taxation or its equivalent from an Association to Advance Collegiate Schools of Business (AACSB) accredited school that includes certain accounting courses deemed essential by the Accounting PhD director. Alternatively, this requirement may
be satisfied by courses approved by the School of Accounting's doctoral advisory committee.

Required Courses—30 Credit Hours

Accounting Core—18 Credit Hours

- ACG 7157 - Seminar in Archival Research in Accounting 3 Credit Hours
- ACG 7399 - Seminar in Behavioral Accounting Research 3 Credit Hours
- ACG 7826 - Seminar in the Social and Organizational Context of Accounting 3 Credit Hours
- ACG 7885 - Research Foundations in Accounting 3 Credit Hours
- ACG 7887 - Accounting Research Forum 1 Credit Hours (Workshop, 1 credit hour per semester)

Research Methods/Tools—12 Credit Hours

The research tools requirement is intended to ensure a thorough exposure to research methods. All candidates are expected to demonstrate knowledge of statistical methods as well as usage of statistical packages, including design, analysis, and interpretation of results. Research tools courses should be approved by the PhD Director. Examples of courses that will satisfy this requirement include:

- PSY 6216C - Research Methodology 4 Credit Hours
- PSY 6308C - Psychological Testing 4 Credit Hours
- PSY 7217C - Advanced Research Methodology I 4 Credit Hours
- PSY 7218C - Advanced Research Methodology II 4 Credit Hours
- PSY 7219C - Advanced Research Methodology III 4 Credit Hours
- PSY 7315 - Psychometric Theory and Practice 3 Credit Hours
- ECO 6424 - Econometrics I 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- SYA 6315 - Qualitative Research Methods 3 Credit Hours
- SYA 6425 - Design and Conduct of Social Surveys 3 Credit Hours

Elective Courses—9 Credit Hours

Restricted—3 Credit Hours

Choose one of the following accounting courses:

- ACG 7888 - Seminar in Critical Accounting and AIS 3 Credit Hours
- ACG 7917 - Advanced Research Methods in Accounting and Accounting Information Systems Rch 3 Credit Hours

Other accounting electives as they are developed for the program

Unrestricted—6 Credit Hours

Students must take 6 credit hours in a minor/support area. Students must select a minimum of six credit hours in a unified area approved by the PhD Director. Each student's program of study is individually tailored to accommodate interests whenever possible. This coursework may be developed from offerings in the following areas with the advice and consent of the respective departments and the advisory committee:

- Marketing
- Economics
- Political Science
- Psychology
- Gender Studies
- Management
- Sociology
- Environmental Studies
- Communication
- Philosophy
- Public Affairs

Dissertation—15 Credit Hours

- ACG 7980 Dissertation 15 credit hours (minimum)

Admission to Candidacy

Students must complete a comprehensive candidacy examination that includes written and oral portions. Students must defend a written dissertation proposal in an oral examination conducted by the student's advisory/dissertation committee. The final defense of the dissertation will also require an oral examination.
Students officially enter candidacy when the following has been accomplished:

- Completion of all course work, except for dissertation hours.
- Successful completion of the comprehensive candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Teaching Requirement

The requirements for the teaching component of the degree will be developed with the doctoral program director based on the student's experience. Normally, this requirement will be satisfied through teaching a minimum of three credit hours of class instruction under the direct supervision of a faculty member. As appropriate, students will also be required to attend teaching development workshops and seminars.

Independent Learning

The dissertation serves as the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE or GMAT score taken within the last five years.
- Three letters of recommendation.
- Goal statement.
- Résumé.
- Other: Previous publications and/or other relevant supporting documentation.
- A computer-based score of 233 (or 91 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.

Admission decisions are made based on faculty recommendations from the appropriate department or school. Admissions will generally be made only for the fall semester, every other year; however, exceptions may be made in some cases. All interested students should contact the program director for their track for information about applying to this program. The college strongly encourages applications from minority and diverse populations. Race, national origin, and gender are not used in the evaluation of students for admission into graduate and professional programs.

Business Administration PhD,
Finance Track

Track Description
The Finance track in the Business Administration PhD program prepares students for careers in higher education and management within profit and nonprofit industries.

Success in the program is judged by the student's understanding of the issues and methodologies essential to the advancement of knowledge.

Curriculum
The Finance track of the Business Administration PhD program requires 84 credit hours beyond the bachelor's degree. Students must meet prerequisite requirements of 30 credit hours, and then complete 18 credit hours of finance core courses, 6 credit hours of a minor/support area, 12 credit hours of research methods/tools courses, 3 credit hours of electives, and 15 credit hours of dissertation.

| Total Credit Hours Required: 84 Credit Hours Minimum beyond the Bachelor's Degree |
| Required courses for all students are indicated with an asterisk in the lists below. Specific courses from the foundation body of knowledge category are determined based on a student's background in consultation with the doctoral program coordinator. Required course work prior to beginning study includes successful completion of at least a two-course sequence of 6 credit hours of calculus and previous course work in economics, finance and statistics. The program requires 27 hours of formal course work, exclusive of independent study, as well as 15 credit hours of dissertation research. |

Prerequisites: Foundation Body of Knowledge—30 Credit Hours
In the Finance track of the Business Administration PhD program, the foundation body of knowledge includes (a) the finance, accounting, statistics and economics common body of knowledge in a MBA degree or its equivalent and (b) graduate courses in financial management, investments, financial institutions and international finance. Alternatively, this requirement may be satisfied by courses deemed essential by the Finance track program coordinator in consultation with the PhD committee.

Required Courses—39 Credit Hours

Finance Core—18 Credit Hours
- FIN 7935 - Finance Research Forum 1 Credit Hours
- FIN 7808 - Introduction to the Theory of Finance 3 Credit Hours
- FIN 7807 - Corporate Finance Theory 3 Credit Hours
- FIN 7816 - Investment Theory 3 Credit Hours
- FIN 7930 - Seminar in Market Microstructure 3 Credit Hours
- FIN 7811 - Seminar in Financial Markets and Institutions 3 Credit Hours
- Other courses as deemed acceptable by the doctoral program coordinator.

Minor/Support Area—6 Credit Hours
- ECO 6118 - Microeconomic Theory I 3 Credit Hours
- ECO 7116 - Microeconomic Theory II 3 Credit Hours

Research Methods/Tools—12 Credit Hours
- ECO 6403 - Mathematical Economics 3 Credit Hours
- ECO 6424 - Econometrics I 3 Credit Hours
- ECO 7426 - Econometrics II 3 Credit Hours
- ECO 6404 - Games and Economic Behavior 3 Credit Hours
- ECO 6453 - Experimental Economics 3 Credit Hours
- ECO 7117 - Advanced Topics in Economic Theory 3 Credit Hours
- ECO 7428 - Time Series 3 Credit Hours
- ACG 7157 - Seminar in Archival Research in Accounting 3 Credit Hours
Other courses as deemed acceptable by the doctoral program coordinator.

**Elective—3 Credit Hours**

Elective course approved by the doctoral program coordinator 3 Credit Hours

**Dissertation—15 Credit Hours**

- FIN 7980 - Dissertation 15 Credit Hours minimum

**Admissions to Candidacy**

Students must complete a comprehensive candidacy examination that includes written and oral portions.

Students must defend a written dissertation proposal in an oral examination conducted by the student's advisory/dissertation committee. Students officially enter candidacy when the following have been accomplished:

- Completion of all course work, except for dissertation hours.
- Successful completion of the comprehensive candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

The final defense of the dissertation will also require an oral examination.

**Teaching Requirement**

The requirements for the teaching component of the degree will be developed with the doctoral graduate program director based on the student's experience. Normally, this requirement will be satisfied through teaching a minimum of three credit hours of class instruction under the direct supervision of a faculty member. As appropriate, students will also be required to attend teaching development workshops and seminars.

**Independent Learning**

The dissertation serves as the independent learning experience.

Business Administration PhD, Management Track

Track Description

The objective of the Management track in the Business Administration PhD program is to prepare students for academic careers at major research universities.

Management Department faculty members help students understand current approaches to explaining and investigating management processes, and facilitate research projects aimed at contributing new insights to the field. Our students immerse themselves in the timely and timeless lessons offered by management scholars, as well as the methods used to discover and evaluate new ideas. This training also provides our students with the knowledge and critical perspective necessary to be master educators. The Management program is designed to produce well-rounded members of our profession who are well prepared to contribute to the research, education, and service missions of the Management discipline. The program requires a full-time commitment on the part of the students, allowing no time for secondary outside employment. Stipends, tuition waivers, health insurance options, described in the Graduate Student Handbook and on the College of Graduate Studies website, provide the financial resources that support this full-time status.

Curriculum

The Management track of the Business Administration PhD program requires 84 credit hours beyond the bachelor's degree. Students must meet prerequisite requirements of 30 credit hours, and then complete 18 credit hours of management core courses, 6 credit hours of a minor/support area, 12 credit hours of research methods/tools courses, 3 credit hours of electives, and 15 credit hours of dissertation.

Total Credit Hours Required: 84 Credit Hours Minimum beyond the Bachelor's Degree

The general expectation for the Management program follows. The program is tailored to the needs of the individual student and may require work that is not included in the following descriptions. The program requires 36 hours of formal course work exclusive of independent study as well as 15 credit hours of dissertation research (MAN 7980).
Prerequisites: Foundation Body of Knowledge—30 Credit Hours

The foundation body of knowledge includes the common body of knowledge in an MBA degree or its equivalent from an AACSB-accredited or comparable school. This requirement may be satisfied with a master's degree in Management or by courses deemed essential by the Management track program coordinator.

Required Courses—39 Credit Hours

Management Core—18 Credit Hours

- MAN 7275 - Organizational Behavior 3 Credit Hours
- MAN 7207 - Organization Theory 3 Credit Hours
- MAN 7777 - Corporate-level Strategic Management 3 Credit Hours
- MAN 7900 - Directed Readings in Management 3 Credit Hours
- MAN 7916 - Seminar in Management Research Var Credit Hours

Minor/Support Area—6 Credit Hours

Students may select a minimum of six credit hours, typically within a unified area, approved by the student's adviser and the program coordinator. Each student's program of study is individually tailored to accommodate student interests, and often emphasizes additional training in research methodology necessary to produce high quality scholarly research.

Research Methods/Tools—12 Credit Hours

The research tools requirement is intended to ensure a thorough exposure to research methods. All candidates are expected to demonstrate knowledge of statistical methods as well as usage of statistical packages. This includes design, analysis, and interpretation of results. The student's advisory committee and the program coordinator will recommend and/or approve specific courses for each student. Representative courses include, but are not limited to the following:

- PSY 6216C - Research Methodology 4 Credit Hours
- PSY 7217C - Advanced Research Methodology I 4 Credit Hours
- PSY 7218C - Advanced Research Methodology II 4 Credit Hours
- PSY 7219C - Advanced Research Methodology III 4 Credit Hours
- GEB 7911 - Structural Equation Modeling for Business Research 3 Credit Hours
- MAR 7626 - Multivariate Analysis for Business Research 3 Credit Hours
- EDF 7427 - Psychometrics 3 Credit Hours
- PAF 7804 - Advanced Statistics for Public Affairs I: Multivariate Analysis 3 Credit Hours
- STA 6237 - Nonlinear Regression 3 Credit Hours
- STA 6507 - Nonparametric Statistics 3 Credit Hours
- STA 6707 - Multivariate Statistical Methods 3 Credit Hours

Elective—3 Credit Hours

Elective course approved by the faculty adviser 3 Credit Hours

Dissertation—15 Credit Hours

- MAN 7980 - Dissertation Research 15 Credit Hours minimum

Admission to Candidacy

Students must complete a comprehensive candidacy examination that includes written and oral portions. This usually takes place near the end of coursework, in the late second year or early third year of the program.

Students must defend a written dissertation proposal in an oral examination conducted by the student's advisory/dissertation committee.

Students officially enter candidacy when the following have been accomplished:

- Completion of all course work, except for dissertation hours.
- Successful completion of the comprehensive candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.
- The final defense of the dissertation will also require an oral examination.

Teaching Requirement

The requirements for the teaching component of the degree will be developed with the doctoral graduate program director based on the student's experience. Normally, this requirement will be
satisfied through teaching a minimum of three credit hours of class instruction under the direct supervision of a faculty member. As appropriate, students will also be required to attend teaching development workshops and seminars.

**Independent Learning**

The dissertation satisfies the independent learning requirement.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE or GMAT score taken within the last five years.
- Three letters of recommendation.
- Goal statement.
- Résumé.
- Other: Previous publications and/or other relevant supporting documentation.
- A computer-based score of 233 (or 91 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.

Admission decisions are made based on faculty recommendations from the appropriate department or school. Admissions will generally be made only for the fall semester of even years (e.g. Fall 2014, Fall 2016). In evaluating applicants, the committee considers all materials submitted. This committee made up of our most research-active faculty, the program director, and program coordinator, considers favorably: past academic writing/projects, collaborative work with distinguished faculty, prior career success, standardized scores on the GMAT or GRE, and letter of intent. Given that our program is designed as an "immersion" into the academic inquiry, we look for applicants who demonstrate a level of intellectual curiosity that will drive their research efforts. GMAT/GRE scores should be competitive for full consideration. Generally, successful applicants score at or higher than the 50% ranking on both verbal and quantitative portions of the tests. Admissions are competitive, and standardized scores are often considerably higher than this. Consideration of candidates generally begins in mid-January and continues until we have the number of accepted offers we intend to accept. Generally, a cohort consists of 4-6 students. Our program supports students with interest in the primary areas of Strategic Management, Organizational Behavior, and Entrepreneurship. Letters of intent should reflect the particular area of interest is pursuing. The college strongly encourages applications from minority and diverse populations. Race, national origin, and gender are not used in the evaluation of students for admission into graduate and professional programs.

The next admissions cycle for this program will be in Fall 2018.

| International Applicants | Jan 15 | Jan 15 - | - |

The next admissions cycle for this program will be in Fall 2018.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

**Financials**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.
Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

College of Business Administration

Business Administration PhD, Marketing Track

Track Description

The Marketing track in the Business Administration PhD program prepares students for careers in higher education.

The objective of the Marketing track in the Business Administration PhD program is to prepare students for academic careers in higher education and management careers within profit and nonprofit organizations. Success in the program is judged by the student’s understanding of the issues and methodologies essential to the advancement of knowledge.

Curriculum

The Marketing track of the Business Administration PhD program requires 84 credit hours beyond the bachelor’s degree. Students must meet prerequisite requirements of 30 credit hours, and then complete 18 credit hours of marketing core courses, 9 credit hours of a minor/support area, 12 credit hours of research methods/tools courses, and 15 credit hours of dissertation.

Total Credit Hours Required: 84 Credit Hours Minimum beyond the Bachelor's Degree

Prerequisites: Foundation Body of Knowledge—30 Credit Hours

In the Marketing track of the Business Administration PhD program, this requirement may be satisfied with a master's degree in marketing, business administration or an equivalent degree from an AACSB-accredited school. Alternatively, this requirement may be satisfied by courses deemed essential by the department's PhD coordinator in consultation with the PhD committee.

Required Courses—39 Credit Hours

Marketing Core—18 Credit Hours

- MAR 7575 - Seminar in Consumer Behavior 3 Credit Hours
- MAR 7638 - Seminar in Marketing Theory, Scaling, and Measurement 3 Credit Hours
- MAR 7666 - Seminar in Marketing Models I 1.5 Credit Hours
- MAR 7667 - Seminar in Marketing Models II 1.5 Credit Hours
- MAR 7807 - Seminar in Marketing Strategy I 1.5 Credit Hours
- MAR 7808 - Seminar in Marketing Strategy II 1.5 Credit Hours
- MAR 7919 - Special Topics: Doctoral Research Projects in Summer I and Spring II 6 Credit Hours

Minor/Support Area—9 Credit Hours

A minimum of nine hours of course work is required in a minor/support area. The course work should be from a unified area and will be planned with the advice and consent of the department's PhD coordinator in consultation with the PhD committee.

Research Methods/Tools—12 Credit Hours

The department's doctoral advisory committee and the PhD Coordinator will determine the additional research tools courses.

- MAR 7626 - Multivariate Analysis for Business Research 3 Credit Hours
• Additional courses approved by the PhD coordinator in consultation with the PhD committee 9 Credit Hours

Dissertation—15 Credit Hours

• MAR 7980 - Dissertation 15 Credit Hours minimum

Admission to Candidacy

Students must successfully pass a readiness exam in the first summer. In the second summer of the program after course work has been completed students must pass a comprehensive candidacy examination that includes written and oral portions.

Students must defend a written dissertation proposal in an oral examination conducted by the student's advisory/dissertation committee.

• Students officially enter candidacy when the following have been achieved:
  • Successful completion of all course work (excluding dissertation hours).
  • Successful completion of the readiness exam administered in the first summer.
  • Successful completion of the comprehensive candidacy exam administered in the second summer.
  • Successful defense of the written dissertation proposal.
  • Formation of the dissertation advisory committee, consisting of approved graduate faculty and graduate faculty scholars.
  • Submission of an approved program of study.
  The final defense of the dissertation will require an oral examination.

Teaching Requirement

The requirements for the teaching component of the doctoral degree will be developed by the Department Chair in consultation with the PhD coordinator. Normally, this requirement will be satisfied through teaching a minimum of three credit hours of class instruction under the direct supervision of the Department Chair or his/her designee. As appropriate, students will also be required to attend teaching development seminars and workshops.

Independent Learning

The dissertation satisfies the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

• One official transcript (in a sealed envelope) from each college/university attended.
• Official, competitive GRE or GMAT score taken within the last five years.
• Three letters of recommendation.
• Research Statement.
• Résumé.
• Other: Previous publications and/or other relevant supporting documentation.
• A computer-based score of 233 (or 91 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.

Admission decisions are made based on faculty recommendations from the appropriate department or school. Admissions will generally be made only for fall semester, every other year. All interested students should contact the program director for their track for information about applying to this program. The college strongly encourages applications from minority and diverse populations. Race, national origin, and gender are not used in the evaluation of students for admission into graduate and professional programs.

**Chemistry PhD**

**Program Description**

The Chemistry PhD program focuses on Materials Chemistry, Environmental Chemistry, Forensic Science and Biochemistry. The training prepares future scientists and educators for research within contemporary fields to accommodate changing and growing industry demands.

The PhD program in Chemistry provides a doctoral education in three technical focal areas: Materials Chemistry, Environmental Chemistry, Forensic Science and Biochemistry, drawing upon the strengths of the Department of Chemistry and other units, such as the College of Optics and Photonics and Advanced Materials Processing and Analysis Center. These areas meet the ever-pressing demand for the development of new materials and the increasing urgency of addressing crucial environmental and security problems. The curriculum has been formulated in collaboration with industrial scientists and represents a response to current and projected competencies needed by the industry. The purpose of the program is to develop scientists and educators capable of conducting research to solve important problems in contemporary fields of the chemical sciences while preparing a highly skilled work force to ensure the technological/economic health and competitiveness in central Florida.

**Curriculum**

The Chemistry PhD program requires 72 credit hours beyond the bachelor's degree with a minimum 18 credit hours of electives in the chosen sub-discipline, an original research project, and dissertation presentation. A maximum of 24 credit hours may be transferred for students that have completed an approved MS degree program. At least 27 hours of formal course work, exclusive of independent study, are required in order to fulfill degree requirements. This includes four core courses and four electives, three of which must be taken from Chemistry. Six credit hours of directed research are also required; additional courses may be specified by the student's research adviser.

**Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree**

One of the primary means of education and training in the PhD program is achieved through successful completion of an original research project, close mentorship by their research adviser and the presentation and defense of the PhD dissertation. This intense research experience provides the education and training necessary for the student to substantiate his/her expertise and develop the skills necessary to become an independent professional.

By the second semester, students will choose a dissertation adviser and establish a program of study. Students will take a seminar course a minimum of seven times. A final seminar credit hour will be taken in preparation for the dissertation defense. During this semester, the student will present a seminar to the department on their dissertation research. The research
adviser and graduate program director will establish an advisory committee for each student. Students must maintain a 3.0 GPA or higher.

**Required Courses: 19 Credit Hours**

**Core: 12 Credit Hours**

Students must take four of the following courses.

- CHM 6710 - Applied Analytical Chemistry 3 Credit Hours
- CHM 6440 - Kinetics and Catalysis 3 Credit Hours
- CHS 6251 - Applied Organic Synthesis 3 Credit Hours
- CHS 6240 - Chemical Thermodynamics 3 Credit Hours
- BCH 6740 - Advanced Biochemistry 3 Credit Hours

**Seminar: 7 Credit Hours**

- CHM 6936 - Graduate Chemistry Seminar 1 Credit Hours (six seminar credits must be taken prior to presenting candidacy; the seventh seminar credit will be taken the semester before anticipated graduation)

**Elective Courses: 18-38 Credit Hours in Chosen Concentration**

**Directed Research: 6 Credit Hours**

- CHM 6918 - Directed Research VAR Credit Hours

**Elective Courses: 12 Credit Hours**

- Selected from courses list below or chosen by adviser

**Additional Courses: 0-20 Credit Hours**

Students who enter the program with a master's degree need to take four elective courses (12 credit hours) and 6 credit hours of directed research. They may choose four courses from the departmental offerings or three courses from the departmental offerings and one from outside of the department. Directed research will always be within the department. Students who enter the program without a master's degree will be required to take 20 additional hours for a total of 38 credit hours of a combination of elective and research courses.

A program of study requires 27 hours of total formal course work exclusive of independent study. Students and advisers need to be careful about how elective courses are selected so that at least 12 credit hours of electives must be formal course work, exclusive of independent study. Doctoral research, dissertation research, independent study and directed research may also be used to satisfy additional hours in the concentration.

**Materials Chemistry Concentration**

Choose from the following courses (one may be from outside the department) in addition to 6 hours of directed research.

- CHM 5225 - Advanced Organic Chemistry 3 Credit Hours
- CHM 5580 - Advanced Physical Chemistry 3 Credit Hours
- CHS 6260 - Chemical Unit Operations and Separations 3 Credit Hours
- CHM 6711 - Chemistry of Materials 3 Credit Hours
- CHM 6620 - Solid State Inorganic Chemistry 3 Credit Hours
- CHM 5450 - Polymer Chemistry 3 Credit Hours
- CHM 5451C - Techniques in Polymer Science 3 Credit Hours
- CHM 5715C - Optical Materials Processing and Characterization Techniques 3 Credit Hours
- CHM 6449 - Photochemistry 3 Credit Hours
- CHM 5305 - Applied Biological Chemistry 3 Credit Hours
- CHM 6938 - Special Topics 3 Credit Hours
- CHM 5235 - Applied Molecular Spectroscopy 3 Credit Hours
- CHM 6134 - Advanced Instrumental Analysis 3 Credit Hours
- CHM 7938 - Frontiers in Chemistry 1 Credit Hours (three semesters, 1 credit hour each semester)
- CHM 7919 - Directed Research in Materials Chemistry 6 Credit Hours

**Courses from outside the Chemistry Department.**

- OSE 5203 - Geometrical Optics 3 Credit Hours
- OSE 5313 - Materials for Optical Systems 3 Credit Hours
- OSE 5414 - Fundamentals of Optoelectronic Devices 3 Credit Hours
- EMA 5504 - Modern Characterization of Materials 3 Credit Hours
- EMA 6518 - Transmission Electron Microscopy 3 Credit Hours
- EMA 5108 - Surface Science 3 Credit Hours
- EMA 6129 - Solidification and Microstructure Evolution 3 Credit Hours
- EMA 6130 - Phase Transformation in Metals and Alloys 3 Credit Hours
- EMA 6136 - Diffusion in Solids 3 Credit Hours
- EMA 6516 - X-ray Diffraction and Crystallography 3 Credit Hours
- IDS 7691 - Structure-Function-Relationships of Biomolecules I 5 Credit Hours
- PHY 5933 - Selected topics in biophysics of macromolecules 3 Credit Hours
- PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours
- BSC 5408L - Advanced Biology Laboratory Techniques 3 Credit Hours

Environmental Chemistry Concentration

Choose from the following courses (one may be from outside the department) in addition to 6 hours of directed research.

- CHS 6260 - Chemical Unit Operations and Separations 3 Credit Hours
- CHS 6613 - Current Topics in Environmental Chemistry 3 Credit Hours
- CHS 6508 - Advanced Mass Spectrometry for Forensic Science 3 Credit Hours
- CHM 5235 - Applied Molecular Spectroscopy 3 Credit Hours
- CHM 5580 - Advanced Physical Chemistry 3 Credit Hours
- CHM 6134 - Advanced Instrumental Analysis 3 Credit Hours
- CHM 6449 - Photochemistry 3 Credit Hours
- CHM 6938 - Special Topics 3 Credit Hours
- CHM 7938 - Frontiers in Chemistry 1 Credit Hours (three semesters, 1 credit hour each semester)
- CHM 7919 - Directed Research in Environmental Chemistry 6 Credit Hours

Courses from outside the Chemistry Department.

- ENV 5410 - Water Treatment 3 Credit Hours
- ENV 6046 - Membrane Mass Transfer 3 Credit Hours
- ENV 6055 - Fate and Transport of Subsurface Contaminants 3 Credit Hours
- ENV 6106 - Theory and Practice of Atmospheric Dispersion Modeling 3 Credit Hours
- ENV 6126 - Design of Air Pollution Controls 3 Credit Hours
- ENV 6336 - Site Remediation and Hazardous Waste Treatment 3 Credit Hours
- ENV 6519 - Aquatic Chemical Processes 3 Credit Hours
- ENV 6558 - Industrial Waste Treatment 3 Credit Hours

Forensic Science Concentration

Choose from the following courses in addition to 6 hours of directed research.

- CHS 6545 - Forensic Analysis of Explosives 3 Credit Hours
- CHS 6546 - Forensic Analysis of Ignitable Liquids 3 Credit Hours
- CHM 6134 - Advanced Instrumental Analysis 3 Credit Hours
- CHM 5451C - Techniques in Polymer Science 3 Credit Hours
- CHM 6938 - Special Topics 3 Credit Hours
- CHS 6535 - Forensic Molecular Biology 3 Credit Hours
- CHS 6535L - Forensic Analysis of Biological Materials 3 Credit Hours
- CHS 6536 - Population Genetics and Genetic Data 3 Credit Hours
- CHM 7938 - Frontiers in Chemistry 1 Credit Hours (three semesters, 1 credit hour each semester)
- CHM 7919 - Directed Research in Forensic Science 6 Credit Hours

Biochemistry Concentration

Choose from the following courses (one may be from outside the department) in addition to 6 hours of directed research.

- CHM 5305 - Applied Biological Chemistry 3 Credit Hours
- CHM 5235 - Applied Molecular Spectroscopy 3 Credit Hours
- CHM 5225 - Advanced Organic Chemistry 3 Credit Hours
- CHM 6278 - The Organic Chemistry of Drug Design 3 Credit Hours
Courses from outside the Chemistry Department.

- IDS 7691 - Structure-Function-Relationships of Biomolecules 15 Credit Hours
- PHY 5933 - Selected topics in biophysics of macromolecules 3 Credit Hours
- MCB 5654 - Applied Microbiology 3 Credit Hours
- MCB 6417C - Microbial Metabolism 3 Credit Hours
- BSC 6407C - Laboratory Methods in Molecular Biology 3 Credit Hours
- IDS 5127 - Foundation of Bio-Imaging Science 3 Credit Hours
- PCB 5236 - Cancer Biology 3 Credit Hours
- PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours
- EMA 6516 - X-ray Diffraction and Crystallography 3 Credit Hours
- EMA 6518 - Transmission Electron Microscopy 3 Credit Hours

Dissertation: 15 Credit Hours Minimum

Within three months before defending the dissertation, the student will present a dissertation research seminar to the Department of Chemistry, registering for one credit hour of seminar.

- CHM 7980 - Doctoral Dissertation 15 Credit Hours

Qualifying Examinations

Students will be expected to satisfy qualifying (proficiency) requirements (analytical chemistry, biochemistry, inorganic chemistry, organic chemistry and physical chemistry) during the first year by taking exams in four of these five areas. Additional course work may be required if one or more of the qualifying exams is not satisfied. These exams may be waived if the entering student possesses an MS degree in the Chemical Sciences. Satisfaction of this requirement will help ensure that all students are adequately prepared for the core courses. If a student does not satisfy the proficiency exam requirements within the first year, the student may be subject to dismissal from the program.

Candidacy Examination

By the end of the sixth semester (excluding summers), students must pass the PhD candidacy oral examination. The candidacy examination consists of writing and orally defending an original research proposal to the student's program faculty advisory committee. The research proposal will focus on a topic not directly related to the student's dissertation research and must be approved by the adviser and advisory committee. Failure to pass the PhD candidacy exam will result in dismissal from the program.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all required and formal elective course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Dissertation Defense

The final requirement for the PhD degree is completion of a satisfactory written dissertation of the student's research, along with successful presentation and defense of the dissertation to the advisory committee, including one doctorate-holding non-program faculty member.

Equipment Fee

Full-time students in the Chemistry PhD program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.
Independent Learning

The grounding in scientific research methodology provided by the dissertation requirement is a central focus of the proposed program. Students will conduct research either on site or at the professional laboratories where they work. In either case, a member of the UCF Chemistry Department graduate faculty will act as research adviser and approve the research topic. This research culminates in the writing and presentation of the dissertation. The student will present his/her dissertation for examination by a committee consisting of a minimum of five members including the research adviser. One of the committee members will be from outside the Chemistry department. A majority of the program committee members will hold tenure-earning faculty appointments in the Chemistry Department. The committee has to be approved by the Graduate Coordinator of the Chemistry program and the department Chair. The dissertation must be judged worthy of publication by the dissertation committee and may not be submitted for examination until so deemed. For students performing their dissertation research off campus, the dissertation adviser will visit the student's laboratory, where their research is to be performed, before the research begins and on a regular basis until the work is complete.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in the Chemical Sciences or a closely related field.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendations.
- A statement of purpose.
- Résumé.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Chemistry 117
Civil Engineering PhD

Program Description

The Civil Engineering PhD program includes courses and research in structural analysis and design, geotechnical engineering and foundations, transportation planning and operations, traffic engineering, construction engineering, and water resources engineering. This will prepare students for roles in consulting firms, construction and construction-related industries and academic institutions as well as in city, county, state and federal government agencies.

The PhD in Civil Engineering reflects the very broad nature of the field, which encompasses the design, construction and enhancement of the infrastructure of society. The educational program includes course work in structural analysis and design, geotechnical engineering and foundations, transportation planning and operations, traffic engineering and water resources engineering.

Faculty research interests include geotechnical studies of subsurface conditions, soil testing "superpave" mix design, intelligent transportation systems, traffic safety, structural dynamics, nonlinear structural analysis and software development, reinforced concrete, construction engineering, hydraulic modeling, coastal ocean modeling, stormwater management and watershed management.

Curriculum

The PhD in Civil Engineering is a research-oriented degree that requires course work combined with intensive research. The program requires a minimum of 72 credit hours beyond the bachelor's degree. Thirty of the 72 credit hours can be met with either a nonthesis or thesis MS in Civil Engineering. This leaves 42 credit hours, of which 18 credit hours must be Dissertation Research and a minimum of 15 credit hours must be formal course work. A maximum of 9 credit hours of Doctoral Research can be replaced by additional formal course work subject to the approval of the PhD adviser and the advisory committee.

For both MS to PhD and BS to PhD students, the program of study must be developed with an advisory committee and meet with departmental approval at the beginning of the PhD program, at which time transfer credit will be evaluated on a course-by-course basis.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree 42 Credit Hours Minimum beyond the Master's Degree

Elective Courses: 54 Credit Hours Minimum

- To be approved by a faculty adviser and the graduate coordinator.
- At least 27 credit hours of formal course work is required, exclusive of research and independent study. For students entering the program with a completed master's degree, at least 15 of the 27 credit hours (exclusive of independent study and research) must be taken at UCF after the master's program from approved formal courses. For students entering the program without a master's degree in Civil Engineering or a closely related discipline, at least 45 credit hours of formal course work are required.
- Doctoral Research (XXX 7919) - 9 credit hours maximum (more than 9 research credit hours can be taken, but only a maximum of 9 credit hours will be counted toward the program of study).
- Independent Study (XXX 6908) - 3 credit hours maximum
- No more than a total of 12 credit hours of doctoral research plus independent study will be included in a program of study.
- Directed Research (XXX 6918) is not permitted in a PhD program of study.

Students can choose among the following courses with the consent of the academic adviser. Students that have no MS degree should complete the core courses for the MS degree in the respective focus area. These focus areas are: Structural Engineering, Geotechnical Engineering, Transportation Systems Engineering, Water Resources Engineering and Construction Engineering. For each one of these areas there is a suggested list of core courses.

Suggested elective courses include:

Geotechnical Engineering

- CEG 6065 - Soil Dynamics 3 Credit Hours
CEG 6115 - Foundation Engineering 3 Credit Hours
CEG 6317 - Advanced Geotechnical Engineering 3 Credit Hours
TTE 5835 - Pavement Engineering 3 Credit Hours

Structural Engineering

CES 5144 - Matrix Methods for Structural Analysis 3 Credit Hours
CES 5325 - Bridge Engineering 3 Credit Hours
CES 5606 - Advanced Steel Structures 3 Credit Hours
CES 5706 - Advanced Reinforced Concrete 3 Credit Hours
CES 5821 - Masonry and Timber Design 3 Credit Hours
CES 6010 - Structural Reliability 3 Credit Hours
CES 6116 - Finite Element Structural Analysis 3 Credit Hours
CES 6209 - Dynamics of Structures 3 Credit Hours
CES 6220 - Wind and Earthquake Engineering 3 Credit Hours
CES 6230 - Advanced Structural Mechanics 3 Credit Hours
CES 6527 - Nonlinear Structural Analysis 3 Credit Hours
CES 6715 - Prestressed Concrete Structures 3 Credit Hours
CES 6840 - Composite Steel Concrete Structures 3 Credit Hours

Transportation Systems Engineering

TTE 5204 - Traffic Engineering 3 Credit Hours
TTE 6205 - Highway Capacity 3 Credit Hours
TTE 5805 - Geometric Design of Transportation Systems 3 Credit Hours
TTE 5835 - Pavement Engineering 3 Credit Hours
TTE 6256 - Traffic Operations 3 Credit Hours
TTE 6270 - Intelligent Transportation Systems 3 Credit Hours
TTE 6315 - Traffic Safety Analysis 3 Credit Hours
TTE 6526 - Planning and Design of Airports 3 Credit Hours
CGN 6655 - Regional Planning, Design, and Development 3 Credit Hours
STA 5206 - Statistical Analysis 3 Credit Hours or
ESI 5219 - Engineering Statistics 3 Credit Hours

Water Resources Engineering

CWR 5125 - Groundwater Hydrology 3 Credit Hours
CWR 5205 - Hydraulic Engineering 3 Credit Hours
CWR 5515 - Numerical Methods in Civil and Environmental Engineering 3 Credit Hours
CWR 5545 - Water Resources Engineering 3 Credit Hours
CWR 5634 - Water Resources in a Changing Environment 3 Credit Hours
CWR 6102 - Advanced Hydrology 3 Credit Hours
CWR 6126 - Groundwater Modeling 3 Credit Hours
CWR 6235 - Open Channel Hydraulics 3 Credit Hours
CWR 6236 - River Engineering and Sediment Transport 3 Credit Hours
CWR 6535 - Modeling Water Resources Systems 3 Credit Hours
CWR 6539 - Finite Elements in Surface Water Modeling 3 Credit Hours

Construction Engineering and Management

Students are also allowed to take courses from other specialization areas. Students can take courses from Civil Engineering or Environmental Engineering and other departments, including but not limited to Statistics, Mathematics, and Industrial, Mechanical, and/or Electrical Engineering, and Computer Science, with the consent of the academic adviser.

CCE 5205 - Decision Support for Infrastructure Projects 3 Credit Hours
CCE 5006 - Infrastructure Systems Management 3 Credit Hours
CCE 5220 - Sustainable Infrastructure Systems 3 Credit Hours
CCE 6036 - Advanced Construction Planning and Control 3 Credit Hours *
CCE 6211 - Design and Monitoring of Construction Processes 3 Credit Hours *
CCE 6045 - Cost Analysis of Sustainable Infrastructure Systems 3 Credit Hours

Dissertation: 18 Credit Hours

XXX 7980 (where XXX can be CGN, CEG, CES, CWR, or TTE; 18 credit hours)

Examinations

The student must pass three examinations.
Qualifying Examination

The first is the PhD Qualifying Examination in one of the departmental disciplines. This written examination must be taken within the first year of admission into the PhD program. It may be attempted no more than twice.

Candidacy Examination

The student must pass a Candidacy Examination, normally taken near the end of the course work. It consists of a written and oral presentation of a research proposal, and may include additional written or oral questioning by the committee. A copy of the written examination will be kept as part of the student's official record.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours. Evidence that items have been completed must be received by the College of Graduate Studies on the Friday before the first day of classes for those who wish to enroll in dissertation hours in that semester:

- Completion of all but 6 hours or less of course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Dissertation Defense Examination

The Dissertation Defense Examination is an oral examination taken as defense of the written dissertation.

The College of Engineering and Computer Science requires that all dissertation defense announcements be approved by the student's adviser and posted on the college's website and on the College of Graduate Studies Events Calendar at least two weeks before the defense date.

Equipment Fee

Students in the Civil Engineering PhD program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning

The Independent Learning Requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to submit a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying the application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Master's or bachelor's degree in Civil Engineering or a closely related discipline.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting applicants into their research program.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Clinical Psychology PhD

Program Description

The Psychology Department offers a Psychology PhD in Clinical Psychology, educating students in both the science and the practice of clinical psychology.

The Clinical Psychology track in the Psychology PhD Program emphasizes the scientist-practitioner model of training as promulgated by the American Psychological Association (APA). The doctoral program in Clinical Psychology is accredited by the American Psychological Association.

The advent of managed care has resulted in significant changes in the mental health care delivery system and the role of clinical psychologists in that system. Psychologists are utilized less for the direct delivery of psychological services and increasingly for performing professional duties such as administration, development of programmatic treatments, program evaluation, supervision, and research. Thus, there is a need for training to reflect the professional roles of the Clinical Psychologist in the twenty-first century. The Clinical Psychology doctorate is designed to respond to these changing roles.

Consistent with the mission of a major metropolitan university, the Clinical Psychology PhD Program at UCF takes advantage of, and builds upon, a multitude of community partnerships. One specific example of programmatic efforts to develop partnerships with community agencies is our extensive partnership with public and private health service delivery resources in the Central Florida area who participate as externship training sites.

Curriculum

The Clinical Psychology track in the Psychology PhD Program is designed to be a full-time program, with some summer enrollment expected. There are a total of 84 semester hours of courses, practica, and research requirements.

Total Credit Hours Required: 84 Credit Hours Minimum beyond the Bachelor's Degree. 54 Credit Hours Minimum beyond the Master's Degree.

In addition to the 84 semester hours, graduate students engage in a variety of clinical training experiences that occur in health and mental health facilities throughout greater Orlando. Courses are presented in sequential fashion and students entering with a Bachelor's degree must earn a Master's degree in route to the PhD. Students who enter with a Master's degree must complete at least 54 semester hours at UCF. A Dissertation that represents...
a significant scientific contribution to the discipline is required. Successful completion of the Qualifying and Comprehensive Examination is required to be admitted into candidacy and prior to initiation of Dissertation research.

Required Courses—69 Credit Hours (Plus 15 Dissertation Credit Hours Listed Below)

Psychology Foundation Courses—12 Credit Hours

- DEP 5057 - Developmental Psychology 3 Credit Hours
- SOP 5059 - Advanced Social Psychology 3 Credit Hours
- PSB 5005 - Physiological Psychology 3 Credit Hours
- EXP 6506 - Human Cognition and Learning 3 Credit Hours

Research Courses—18 Credit Hours

- PSY 7217C - Advanced Research Methodology I 4 Credit Hours
- PSY 7218C - Advanced Research Methodology II 4 Credit Hours
- PSY 7219C - Advanced Research Methodology III 4 Credit Hours
- PSY 6971 - Thesis 6 Credit Hours

Clinical Courses—33 Credit Hours

- CLP 7446C - Child Psychological Assessment 3 Credit Hours
- CLP 7447C - Adult Psychological Assessment 3 Credit Hours
- CLP 7145C - Introduction to Clinical Psychology and Psychotherapy 1 Credit Hours (2 credit hours; taken two times at 1 credit hour each time)
- CLP 7125 - Adult Psychopathology 3 Credit Hours
- CLP 7136 - Child Psychopathology 3 Credit Hours
- CLP 7623 - Ethical and Professional Issues in Clinical Psychology 3 Credit Hours
- CLP 7494 - Adult Empirically Supported Treatments 3 Credit Hours
- CLP 7474 - Child Empirically Supported Treatments 3 Credit Hours
- CLP 7943C - Clinical Practicum VAR Credit Hours
- CLP 6949 - Predoctoral Internship 1 Credit Hours
- CLP 7942L - Supervision Practicum 1 Credit Hours

Elective—6 Credit Hours

- Any graduate-level course as approved by the program director

Dissertation—15 Credit Hours

- PSY 7980 - Doctoral Dissertation 15 Credit Hours

Quality/Comprehensive Doctoral Examinations

Domain A: Research

- Theoretical or Review Article, or
- Empirical Article

Domain B: Clinical Practice/Consultation

- Comprehensive Case Presentation, or
- Program Development (Rx/Prevention)

Purpose—The purpose of the Qualifying and Comprehensive Examination is to develop and assess the competency of professional behaviors in doctoral-level graduate students in the Clinical Psychology PhD Program that are consistent with the program's professional training goals. These goals include but are not limited to the development and demonstration of skills and abilities that enable graduating students to (a) conduct and publish independent empirical research; and (b) be expertly trained, empirically oriented clinicians capable of designing, implementing and assessing programs concerned with health service and mental health delivery broadly defined.

Requirements, Rationale, and Objectives—Successful completion of Qualifying and Comprehensive Examination requirements reflects the program's desire to ensure overall breadth of training in the field of Clinical Psychology that is complemented by individually tailored professional training experiences and competencies consistent with a student's professional career goals. The two professional domains outlined above are consistent with this intent. All graduate students are expected to discuss possible selections with their major professor/faculty adviser prior to formalizing their choices. Choices made are expected to reflect individual professional training goals and the desire for additional knowledge and expertise in a selected area. All competency domains contain two options, and graduate students are free to
select either option (see options "a" and "b" under each domain in above matrix) in consultation with their faculty adviser.

Admission to Candidacy

The following are required to be admitted to Candidacy and enroll in Dissertation hours:

- Completion of most course work, except for Dissertation hours.
- Successful completion of the Candidacy Examination.
- The Dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

The American Psychological Association requires that graduate students be evaluated at least annually and provide written feedback to graduate students. Because Clinical Psychology involves the provision of mental health services to the public, special care must be taken to ensure that graduate students possess the requisite interpersonal sensitivity and skill. As a result, evaluation procedures within this track will focus not only on academic performance but also on: clinical proficiency; ethical and professional conduct; response to supervision; interpersonal behavior; and interpersonal functioning. The Clinical Psychology committee reserves the right to drop from the program graduate students who continue to exhibit serious difficulties in these behavioral domains and do not respond to feedback and efforts at remediation.

Master of Science in Clinical Psychology

Graduate students enrolled in the Clinical Psychology PhD Program earn a Master of Science in Clinical Psychology in route to their doctorate unless they are admitted with an acceptable Master's degree. This is a nonterminal Master's degree available only to students in the Clinical Psychology PhD program.

Independent Learning

As befits the nature of graduate training and the pursuit of a doctoral degree, graduate students in Clinical Psychology are expected to engage in independent learning throughout their graduate career. The completion of the Master's Thesis and the doctoral Dissertation are two examples of independent learning in which all graduate students participate. In addition, depending upon their career goals, other experiences, such as directed readings or additional research projects, may be undertaken by graduate students.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must have at least a Bachelor's degree with a major in Psychology or a Bachelor's degree and completion of undergraduate or graduate courses in statistics/research methods and six additional upper division courses in core content areas of Psychology (i.e., personality theory, abnormal psychology, learning, physiological psychology, clinical psychology, developmental psychology, social psychology). Applicants who enter with a Master's degree may be eligible to waive or transfer up to 30 credit hours for credits earned from a completed Master's degree from an accredited institution (as long as this number does not exceed 50% of the program's requirements). In these cases, each applicant's situation will be reviewed individually based on program standards and requirements.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE scores taken within the last five years (use UCF Institution Code: 5233)
- Evidence of successful completion of undergraduate coursework in statistics and general areas of Psychology.
- Curriculum Vitae.
- Three letters of recommendation, with at least two furnished by college or university professors who are acquainted with the applicant.
- A clear statement concerning the type of research you wish to pursue as a graduate student, and the Clinical Faculty member you believe would be best suited to serve as your major professor and mentor.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Due to the competitive nature of the application process, strong candidates are likely to meet criteria that are more stringent than those listed here. Strong candidates are also likely to have both research and clinical experience. A department admissions committee reviews the applicants' credentials and may invite a
group of candidates for an interview. Final selection is based on both submitted credentials and the interview.

In 2016, the Doctoral Program in Clinical Psychology received 126 applications for admission, but only six students entered the Ph.D. program. Accepted students had, on average, between 1.5 and 2 years prior research experience and were well matched with the Clinical Faculty's research and training interests. Previous graduate work will be considered on a case-by-case basis (including acceptance of a previously completed Master's Thesis). Graduate students may be eligible to waive up to 30 credits earned from a completed Master's degree from an accredited institution. Each graduate student's situation is considered individually by the Clinical Faculty. Graduate students should submit a request to the Director of Clinical Training and provide a course catalog description, course syllabus, and other relevant information to enable the Clinical Faculty to make a determination of equivalence with a course in the PhD curriculum. The waived hours must come from graduate-level course work (e.g., numbered 5000 and above in the Florida SUS approach). No courses with grades less than "B" will be considered for waiver. Graduate students who did not complete an empirical Master's Thesis as part of their required training at another accredited institution must complete an empirical Master's Thesis prior to forming a Dissertation committee. Graduate students who completed an empirical Master's Thesis at their former accredited institution may submit the Master's Thesis to the Director of Clinical Training, who will assign a Clinical Faculty committee to review the Master's Thesis and determine whether it meets the PhD program's standards for excellence. Graduate students must propose and successfully defend an approved Master's Thesis under the direction of Clinical Faculty if the Master's Thesis that they completed at a previous institution fails to meet the PhD program's standards.

Computer Engineering PhD

Program Description

The Computer Engineering PhD prepares students for careers in research or academia with potential focus in computer systems and VLSI design, software engineering and algorithms, intelligent systems and Machine Learning, computer networks and computer security, as well as simulation systems.

The doctoral program in Computer Engineering is primarily intended for students with a master's degree in Computer Engineering or a closely related discipline wishing to pursue a career in research or academia. Specializations include computer systems and VLSI design, software engineering and algorithms, intelligent systems and Machine Learning, computer networks and computer security and simulation systems.

Research interests of the Computer Engineering faculty include computer architecture, software engineering, artificial intelligence, expert systems, modeling and simulation, computer
networking and ubiquitous computing, computer security, and very large-scale integration (VLSI) systems.

The specific research that each one of the EECS faculty conduct can be found at the School of EECS website (www.eecs.ucf.edu).

Curriculum

The Computer Engineering PhD degree requires a minimum of 72 credit hours beyond the bachelor's degree. Of these 72 hours, a minimum of 36 credit hours must be formal coursework, exclusive of independent study coursework. A minimum of 15 credit hours with up to a maximum of 24 credit hours of dissertation hours can be credited toward the degree. No more than 12 credit hours of Independent Study are allowed. The remaining hours can be a combination of formal coursework and/or pre-candidacy doctoral research. Details about this program can be found in the Computer Engineering PhD Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Formal coursework required is 36 credit hours, exclusive of independent study and research. A minimum of 15 credit hours of dissertation are required. All other credit hours will be determined with a faculty adviser. Students admitted with an earned master's degree may request to have up to 30 of those credit hours counted toward their doctoral program. The student's doctoral adviser in conjunction with the graduate office will determine the precise number of hours to be counted subject to Graduate Studies regulations.

The Program of Study (POS) form must be approved by an adviser in the selected specialization area no later than the end of the second semester after admission. The program of study must meet all the university requirements specified in the graduate catalog.

Articulation Courses

Undergraduate articulation courses are required to be completed prior to admission for students who do not hold a Bachelor of Science degree in Computer Engineering. In particular, the articulation courses specified below, plus all of the prerequisite string which any of them require, must be completed prior to admission. Grades of "B" or higher must be obtained in each articulation course specified below. Articulation courses are not eligible for inclusion on a graduate Program of Study.

- EEE 3342C Digital Systems
- EEL 3801 Computer Organization
- COP 3502 Computer Science I
- COP 3503 Computer Science II

In addition, choose one of the following:

- COP 4331 Processes for Object-Oriented Development
- EEL 4768C Computer Architecture
- EEL 4781 Computer Communications Networks

Required Courses: 36 Credit Hours

Suggested courses listed below.

Elective Courses: 12-21 Credit Hours

May include formal coursework, directed research hours, doctoral research hours, dissertation research, and no more than 12 credit hours of Independent Study.

Suggested courses listed below.

Suggested Courses for Doctoral Program

The Computer Engineering Program supports a number of specialization areas. These specialization areas are (in alphabetical order): Computer Networks and Computer Security (CNCS), Computer Systems and Reconfigurable Hardware (CS/RH), Intelligent Systems and Machine Learning (ISML), and Software Systems and Algorithms (SSA). Please contact your graduate program assistant at 407-823-0378 for a list of faculty within each specialization area.

For each one of these areas there is a suggested list of courses stated below. Students are also allowed to take courses from other specialization areas, but the majority of their courses should be chosen from courses in their specialization area.

Computer Networks and Computer Security (CNCS)

- CDA 5106 - Advanced Computer Architecture 3 Credit Hours
- CDA 5110 - Parallel Architecture and Algorithms 3 Credit Hours
- CDA 6530 - Performance Models of Computers and Networks 3 Credit Hours
- CDA 6938 ST: Research in Computer and Network Security 3 Credit Hours
- CGS 5131 - Computer Forensics I: Seizure and Examination of Computer Systems 3 Credit Hours
- CNT 5008 - Computer Communication Networks Architecture 3 Credit Hours
- CNT 6418 - Computer Forensics II 3 Credit Hours
- CNT 6519 - Wireless Security and Forensics 3 Credit Hours
- CNT 6707 - Advanced Computer Networks 3 Credit Hours
- COP 5537 - Network Optimization 3 Credit Hours
- COP 5611 - Operating Systems Design Principles 3 Credit Hours
- CAP 6133 - Advanced Topics in Computer Security and Computer Forensics 3 Credit Hours
- COT 5405 - Design and Analysis of Algorithms 3 Credit Hours
- EEE 5390C - Full-Custom VLSI Design 3 Credit Hours
- EEE 6327 - Design of Video Coding Systems 3 Credit Hours
- EEL 5704 - Computer Aided Logical Design 3 Credit Hours
- EEL 5825 - Pattern Recognition 3 Credit Hours
- EEL 5874 - Expert Systems and Knowledge Engineering 3 Credit Hours
- EEL 6769 - Parallel Knowledge Processing Systems 3 Credit Hours
- EEL 6812 - Introduction to Neural Networks 3 Credit Hours
- EEL 6875 - Autonomous Agents 3 Credit Hours
- EEL 6876 - Current Topics in Artificial Intelligence 3 Credit Hours
- EEL 6878 - Modeling and Artificial Intelligence 3 Credit Hours

Intelligent Systems and Machine Learning (ISML)

- CAP 5055 - AI for Game Programming 3 Credit Hours
- CAP 5512 - Evolutionary Computation 3 Credit Hours
- CAP 5610 - Machine Learning 3 Credit Hours
- CAP 5636 - Advanced Artificial Intelligence 3 Credit Hours
- CAP 5645 - Machine Learning Methods for Biomedical Data 3 Credit Hours
- CAP 6616 - Neuroevolution and Generative and Developmental Systems 3 Credit Hours
- CAP 6640 - Computer Understanding of Natural Language 3 Credit Hours
- CAP 6671 - Intelligent Systems: Robots, Agents, and Humans 3 Credit Hours
- CAP 6675 - Complex Adaptive Systems 3 Credit Hours
- CAP 6676 - Knowledge Representation 3 Credit Hours
- EEL 5852 - Pattern Recognition 3 Credit Hours
- EEL 5874 - Expert Systems and Knowledge Engineering 3 Credit Hours
- EEL 6769 - Parallel Knowledge Processing Systems 3 Credit Hours
- EEL 6812 - Introduction to Neural Networks 3 Credit Hours
- EEL 6875 - Autonomous Agents 3 Credit Hours
- EEL 6876 - Current Topics in Artificial Intelligence 3 Credit Hours
- EEL 6878 - Modeling and Artificial Intelligence 3 Credit Hours

Software Systems and Algorithms (SSA)

- CAP 6515 - Algorithms in Computational Biology 3 Credit Hours
- CGS 5131 - Computer Forensics I: Seizure and Examination of Computer Systems 3 Credit Hours
- CNT 6418 - Computer Forensics II 3 Credit Hours
- CAP 5510 - Bioinformatics 3 Credit Hours
- CAP 6133 - Advanced Topics in Computer Security and Computer Forensics 3 Credit Hours

Computer Systems and Reconfigurable Hardware (CS/RH)

- CDA 5106 - Advanced Computer Architecture 3 Credit Hours
- CDA 5110 - Parallel Architecture and Algorithms 3 Credit Hours
- CDA 6107 - Parallel Computer Architecture 3 Credit Hours
- CDA 6938 Multi-Core Architecture and Programming 3 Credit Hours
- COP 5537 - Network Optimization 3 Credit Hours
- COT 6415 - Complexity of Parallel Computation 3 Credit Hours
- EEE 5390C - Full-Custom VLSI Design 3 Credit Hours
- EEE 6327 - Design of Video Coding Systems 3 Credit Hours
- EEL 5704 - Computer Aided Logical Design 3 Credit Hours
Dissertation: 15-24 Credit Hours

- XXX 7980 Dissertation Research (15 credit hours minimum).
- The program will only allow students to complete up to 24 hours of dissertation coursework in XXX 7980.

The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website at least two weeks before the defense date.

Qualifying Review

The Qualifying Review relies on annual appraisals of the student's progress conducted by the student's research/academic adviser and advisory committee, once formed. The student's appraisal template that the adviser completes will assess the student's academic performance (course performance) and research performance. On an annual basis, and based on the completed PhD Student Annual Review template, as well as additional student documentation attached with approval of the adviser, the EECS Graduate Committee will rate the student's performance as "Above Expectation," "At Expectation," or "Below Expectation" toward the completion of the PhD degree.

Students must pass the Qualifying Review no later than the deadline, which is the semester in which they complete 24 credit hours after admission or within two calendar years after admission, whichever occurs later. If a student has passed the Qualifying Review, then the student is eligible to continue PhD studies. However, a student who does not pass the Qualifying Review by the deadline will be dismissed from the degree program and will be given the opportunity to complete a master's degree (if applicable).

Dissertation Committee

PhD dissertation committees for this degree program must have all of the below characteristics:

- consist of at least five committee members including the committee chair
- the committee chair must be either a Regular Appointment faculty member in EECS or a Secondary-Joint Appointment faculty member in EECS
- at least 50% of committee members (when tabulated including the chair) must be EECS regular faculty
- the majority of committee members must vote in favor of passing for the student to Pass
- in addition to the above, all college and university requirements (such as one member outside of EECS) must be met.

Joint faculty members may serve as committee chairs, but graduate faculty scholars may not serve as committee chairs.

Candidacy Examination

After passing the Qualifying Review, students are required to successfully complete the candidacy examination in order to demonstrate readiness for preliminary research in a chosen field of study. This exam is administered by the student's dissertation advisory committee. Preparedness for taking the candidacy examination requires that the student must demonstrate his/her readiness for the PhD program in Computer Engineering by authoring an accepted journal article or high-quality conference paper. The student must be the first author on this paper and the research advisor must also be an author on this paper to be used for Candidacy. The publication should reflect the work related to the student's PhD research. Candidacy is normally attempted at the completion of required coursework and must be passed before registering for doctoral dissertation hours (EEL 7980). Continuous enrollment in at least 3 hours of doctoral dissertation hours is required once a student starts taking dissertation credits.
Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours.

- Completion of all required formal coursework, except for dissertation hours.
- Successful completion of the candidacy examination.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Signed and well-formed Doctoral Committee Candidacy Status form and associated paperwork must be submitted to the Electrical and Computer Engineering Graduate Office for processing on or before the last day to defend Dissertation during the semester prior to enrolling in dissertation credits.

Dissertation Proposal Exam

After passing the candidacy examination, the student will write a dissertation proposal and present it to the dissertation advisory committee for approval. The proposal must include a description of the research performed to date and the research planned to be completed for the dissertation. The presentation of a written dissertation proposal must be deemed as passing requirements by the majority of the dissertation committee.

Equipment Fee

Students in the Computer Engineering PhD program pay a $28 equipment fee each semester that they are enrolled. Part-time students pay $14 per semester.

Independent Learning

The Independent Learning requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to submit a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying the application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Master's or bachelor's degree in Computer Engineering or a closely related discipline.
- Résumé
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may also be required to correct any course deficiencies. Students should contact the graduate program director for further information.

**Computer Science PhD**

**Program Description**

The Computer Science PhD program prepares students in the highest level of theory and practice of Computer Science, aiding with the development of research and instruction skills for positions in academia, industry and government sectors.

The Computer Science PhD program produces professionals trained at the highest possible academic level in the theory and practice of Computer Science in order to meet current and projected market demands for Computer Science experts. Students graduate with proven abilities in research and instruction and have expertise suitable for positions in industry, academia and government.

Students in the program receive a broad background in the areas of programming systems and languages, computer architecture and computer science theory while specializing in a research area. Research interests of the computer science faculty include affective computing, applied perception, bioinformatics, computational biology, computational geometry, computer and network security, computer architecture, computer forensics, computer graphics, computer networks, computer vision, cryptography, data compression, database management systems, data mining, design and analysis of algorithms, evolutionary computation, genetic algorithms, graph theory, hardware/software co-design, image processing, machine learning, mixed and virtual reality, mobile computing, modeling and simulation, multimedia systems, natural language processing, neural networks, parallel and distributed processing, performance evaluation, programming languages, quantum computing, semantic web, software agents, software engineering and VLSI systems.

**Curriculum**

The Computer Science PhD program requires a minimum of 72 credit hours beyond the bachelor's degree. A plan of study for each student must be filed within the first two weeks of the student's second semester in the program. Details about this program can be found in the Computer Science PhD Handbook.

This plan must satisfy the following:

- A minimum of 72 credit hours (including CDA 5106, COT 5405, and COT 6410 - all with a grade of "B" (3.0) or better). At most 30 credit hours can be waived from a completed MS program, exclusive of thesis, independent study, dissertation, and research. Otherwise, at most 9 external credits can be transferred.
- A 3.0 or better grade point average is required. At most 6 credit hours with "C" (2.0) are allowed.
- No courses below the 5000-level, with no 5000-level CGS prefix coursework.
- No more than 12 credit hours of independent study (6908).
- Five 6000- or 7000-level courses (15 credits) with grades of "B" (3.0) or better taught by EECS faculty. None of these may be independent study or dissertation for which letter grades (not S/U) are assigned.
- Six additional computer science graduate credits to make the total of all non-independent study (e.g., formal coursework exclusive of independent study) of at least 36 credits.
• A minimum of 15 credit hours and a maximum of 24 credit hours of PhD dissertation (CAP, CDA, CEN, CIS, CNT, COP or COT 7980).

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Prerequisites—12 Credit Hours

An undergraduate degree in Computer Science is desirable but not required. Applicants without a strong undergraduate background in Computer Science must demonstrate an understanding of the material covered in the following upper-division undergraduate courses:

• EEL 4768C Computer Architecture 3 Credit Hours
• COP 4020 Programming Languages I 3 Credit Hours
• COP 4600 Operating System 3 Credit Hours
• COT 4210 Discrete Computational Structures 3 Credit Hours

Required Courses—9 Credit Hours

• CDA 5106 - Advanced Computer Architecture 3 Credit Hours
• COT 5405 - Design and Analysis of Algorithms 3 Credit Hours
• COT 6410 - Computational Complexity 3 Credit Hours

Elective Courses—48 Credit Hours

• Grades must be a "C" (2.0) or better with at most 6 credit hours having grades below "B" (3.0) and an overall grade point average of 3.0 or better.
• No courses below the 5000-level, with no 5000-level CGS prefix course work.
• No more than 12 credit hours of independent study (6908).
• Five 6000- or 7000-level courses (15 credits) with grades of "B" (3.0) or better taught by EECS faculty. None of these may be independent study or dissertation for which letter grades (not S/U) are assigned. At least 36 hours must be formal course work, exclusive of independent study or doctoral research.

Dissertation—15 Credit Hours

• XXX 7980 (15 credit hours minimum)

Qualifying Review

The Qualifying Review (QR) will be offered twice a year the in Fall and the Spring semester. A student enrolled in the PhD program is required to take the QR in the third semester (excluding the Summer semesters). The Graduate Committee will meet twice a year to evaluate the results. To pass QR a student should have at least one publication with the adviser and should have passed two core classes, or passed one and be enrolled in a second one. A second QR attempt should be not later than the fifth semester; at that time the student should have passed the three core courses.

Dissertation Committee

The Dean, through the Chairs and Directors, is responsible for committee formation, additions and deletions. The doctoral committee must consist of a minimum of four members; three must be graduate faculty members from within EECS and one must be at large from outside the EECS faculty. Joint faculty members may serve as school-faculty committee members. The Computer Science Graduate Committee may specify additional membership. The College of Graduate Studies reserves the right to review appointments to advisory committees, place a representative on any advisory committee, or appoint a co-adviser.

Joint faculty members may serve as committee chairs, but graduate faculty scholars may not, although they may serve as co-chairs.

All members vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal and final dissertation must be approved by a majority of the advisory committee.

Candidacy Examination

After passing qualifiers, students are required to successfully complete the candidacy examination to demonstrate readiness for preliminary research in a chosen field of study. This exam requires the acceptance of a professional paper by a peer-reviewed conference or journal that is deemed acceptable to the student's advisory committee as a major contribution to student's area of research. Candidacy is normally taken near the completion of required course work and must be passed before registering for doctoral dissertation hours (XXX 7980). Continuous enrollment in at least 3 hours of doctoral dissertation hours is required once a student starts taking 7980 credits. The candidacy status change form and any associated paperwork (advisory committee form, program of study, etc.) must be submitted for processing by the last day of classes of the
semester prior to enrolling in dissertation credits. In order to start taking dissertation hours you must be within 57 credit hours.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours. Evidence of successful completion of these requirements must be received in the College of Graduate Studies by the day before the first day of classes in which the student wishes to enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submission of an approved program of study.

Time Limitation

Students have seven years from the beginning of regular graduate status in the PhD program to complete all requirements for the degree, although most students finish within 4 to 5 years.

Dissertation Proposal

After passing the candidacy examination, the student will write a dissertation proposal and present it orally to the dissertation advisory committee for approval. The proposal must include a description of the research performed to date and research plans.

Dissertation and Oral Defense

Students must write a dissertation on their research that describes a significant original contribution to the field of computer science. The oral defense of the dissertation is reviewed by the research committee. The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website and the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date. The dissertation must be approved by the dissertation adviser and committee, the school director or designee and the dean of the college or designee. Format approval from the Thesis and Dissertation Editor and final approval of satisfaction of degree requirements by the College of Graduate Studies is required.

Equipment Fee

Students in the Computer Science PhD program pay a $34 equipment fee each semester that they are enrolled. Part-time students pay $17 per semester.

Independent Learning

The Independent Learning requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to submit a free pre-screening () of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying the application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.
Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Outstanding students with a bachelor's degree are encouraged to apply directly into the doctoral program. Admission to the PhD program is formalized by the university upon the recommendation of the Computer Science Graduate Coordinator.

An undergraduate degree in Computer Science is desirable but not required. Applicants without a strong undergraduate background in Computer Science must demonstrate an understanding of the material covered in upper-division undergraduate courses listed under the Articulation Section of the Curriculum Information. Applicants may choose to demonstrate their knowledge of these courses by taking these courses as non-degree seeking and scoring "B" or better in all of them.

### Application Deadlines

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

### Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

### Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

### Conservation Biology PhD

#### Program Description

The Conservation Biology PhD program prepares students for independent research and roles within industry, nongovernmental organizations, academia or government sectors combining biological sciences with disciplines such as economics, law, urban/rural planning, politics, communication, philosophy and environmental engineering.

The Conservation Biology PhD program provides an interface between traditional biological sciences and the areas of economics, law, urban and rural planning, politics, communication, philosophy and environmental engineering. The purpose of this training is to produce scientists capable of doing independent research and the ability to work within the broader area of environmental politics, law and economics to communicate issues of conservation biology to policy makers, the general public and industry.

Students will choose one of two specializations: Conservation Biology or Integrative Biology. The Conservation Biology Track is intended to provide the academic background necessary to begin work in industry, nongovernmental organizations or government in a leadership role applying cutting-edge principles to problem solving in conservation biology. The Integrative Biology Track embraces applied and basic research concerning ecological questions to address current concerns in the area of conservation biology. Students taking either track would be prepared to pursue an academic career.

### Curriculum

Students in the Conservation Biology PhD program must choose either the Conservation Biology Track or the Integrative Biology Track.
The Conservation Biology Track requires 72 credit hours beyond the bachelor's degree, including a minimum of 27 hours of formal course work exclusive of independent study. The formal course work includes 15 credit hours of required core courses and 12 credit hours of graduate-level courses from Biology (or other departments) selected in consultation with the adviser and the dissertation committee (at least 4 of the 12 credit hours must be offered through the Biology Department). The remaining 45 credit hours may consist of additional electives, doctoral dissertation research (PCB 7980), and a maximum of 12 credit hours of combined directed research (PCB 6918, PCB 7919, and PCB 5917) and independent study (PCB 6908). In addition, 15 credit hours of the remaining 45 credit hours must be comprised of doctoral dissertation research (PCB 7980).

The Integrative Biology Track requires 72 credit hours beyond the bachelor's degree, including a minimum of 27 hours of formal course work exclusive of independent study. The formal course work includes 7 credit hours of required core courses and 20 credit hours of graduate-level courses from Biology (or other departments) selected in consultation with the adviser and the dissertation committee (at least 12 of the 20 credit hours must be offered through the Biology Department). The remaining 45 credit hours may consist of additional electives, doctoral dissertation research (PCB 7980), and a maximum of 12 credit hours of combined directed research (PCB 6918, PCB 7919, and PCB 5917) and independent study (PCB 6908). In addition, 15 credit hours of the remaining 45 credit hours must be comprised of doctoral dissertation research (PCB 7980).

A student is required to establish a program of study before the completion of nine credit hours of course work, in conjunction with their dissertation adviser and advisory committee. A student's advisory committee may require the candidate to take any graduate course taught at UCF if deemed appropriate for the student's area of emphasis. Students entering with a master's degree may request up to 30 semester credit hours of previous work be waived toward the requirements for this degree with approval from the advisory committee. Students who transfer 30 credit hours must still take 2 credit hours of Biology Seminar (BSC 6935) and Professional Development I (PCB 6095) and II (PCB 6096). Students may register for dissertation research only after passing the candidacy exam.

**Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree**

**Independent Learning**

Graduate students enrolled in the Conservation Biology PhD program are expected to engage in independent learning throughout their graduate career. Research toward, and ultimate completion, of the doctoral dissertation is the primary example of independent learning in which all doctoral students participate. Independent learning is also a key component of the core course in Conservation Biology and Advanced Research Communication, where emphasis is placed on the development of analytical skills and critical thinking. In addition, depending on their career goals, other experiences such as directed readings, additional research projects, or internships may be undertaken by the students.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

Applicants should first identify faculty who match their own research interests, and then contact faculty in advance to inquire about research opportunities in faculty labs and to solicit agreement that a faculty member is interested in serving as the student's dissertation advisor. Applicants to the Ph.D. program who do not have a consenting dissertation advisor within the faculty will not be accepted into the program.

**Application Deadlines**

Students applying for summer or spring admission will be considered on an ad hoc basis.

**Conservation Biology PhD, Conservation Biology Track**

**Track Description**

The Conservation Biology Track in the Conservation Biology PhD program prepares students for independent research and roles within industry, nongovernmental organizations or government sectors combining traditional biological sciences with economics, law, urban/rural planning, politics, communication, philosophy and environmental engineering.

The Conservation Biology track in the Conservation Biology PhD program is intended to provide the academic background necessary to begin work in industry, nongovernmental organizations or government in a leadership role applying cutting-edge principles to problem solving in conservation biology. Students taking this track will be prepared to pursue an academic career.

**Curriculum**

The Conservation Biology Track in the Conservation Biology PhD program requires 72 credit hours beyond the bachelor's degree, including a minimum of 27 hours of formal course work exclusive of independent study. The formal course work includes 15 credit hours of required core courses and 12 credit hours of graduate-level courses from Biology (or other departments) selected in consultation with the adviser and the dissertation committee (at least 4 of the 12 credit hours must be offered through the Biology Department). The remaining 45 credit hours may consist of additional electives, doctoral dissertation research (PCB 7980), and a maximum of 12 credit hours of combined directed research (PCB 6918, PCB 7919, and PCB 5917) and independent study (PCB 6908). In addition, 15 credit hours of the remaining 45 credit hours must be comprised of doctoral dissertation research (PCB 7980).

A student is required to establish a program of study before the completion of nine credit hours of course work, in conjunction with their dissertation adviser and advisory committee. Students are required to complete a minimum of 12 hours of electives in consultation with their advisory committee. In addition to these selected electives, a student's advisory committee may require the candidate to take any graduate course taught at UCF if deemed appropriate for the student's area of emphasis. Students entering with a master's degree may request up to 30 semester credit hours of previous work be waived toward the requirements for this degree with approval from the advisory committee. Students who transfer 30 credit hours must still take 2 credit hours of Biology Seminar (BSC 6935) and Professional Development I (PCB 6095) and II (PCB 6096). Students may register for dissertation research only after passing the candidacy exam.

**Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree**

**Required Courses: 15 Credit Hours**

- PCB 6042 - Conservation Biology Theory 4 Credit Hours
- PCB 6053C - Restoration Ecology 4 Credit Hours
- PCB 6466 - Methods in Experimental Ecology 3 Credit Hours
- BSC 6935 - Seminar in Biology 1 Credit Hours (2 credit hours, take twice at 1 credit hour each)
- PCB 6095 - Professional Development in Biology I 1 Credit Hours
- PCB 6096 - Professional Development in Biology II 1 Credit Hours
Elective Courses: 42 Credit Hours

A minimum of 12 credit hours of formal graduate-level courses from Biology, or other departments, are selected in consultation with the adviser and the dissertation committee. The goal is to tailor the program of study to the individual student's needs while maximizing exposure to a variety of disciplines including, among others, policy, economics, engineering, chemistry or sociology. The remaining 30 credit hours may include additional electives, dissertation research (PCB 7980), internship, and a maximum of 12 credit hours of combined independent study (PCB 6908) and directed research (PCB 6918, PCB 7919, and PCB 5917). Professional internship hours can be substituted for directed research.

Dissertation: 15 Credit Hours Minimum

- PCB 7980 - Dissertation 15 Credit Hours

Advisory Committee

The Advisory Committee shall consist of a minimum of four members, including the dissertation adviser, with at least three members coming from the graduate faculty in the Biology Department. At least one member will be from a department other than Biology or from outside the university. The chair, or co-chair, must be a member of the program graduate faculty.

Enrollment Requirements

Students are required to register for 9 credit hours in fall and spring and 6 credit hours in summer before their candidacy exam. After being admitted to candidacy, minimum enrollment is 3 credit hours of dissertation research each semester.

Qualifying Examination

The written qualifying examination should be completed within the first two years of the student's program. The exam seeks to cover areas of general knowledge and discipline-specific knowledge within the student's declared track. These questions could be related to the dissertation research proposal or designed to examine general knowledge and reasoning within the field.

The candidate will meet with their advisory committee at least two months prior to the examination to discuss expectations. Committee members must clearly articulate in writing the general areas that may be examined. Any student failing the examination must repeat the examination within six calendar months of the date of the first examination and requires a majority vote by committee members to pass the exam. A second failed attempt will result in dismissal from the program.

Candidacy Examination

Each student will be required to generate, organize and orally defend a written proposal outlining their dissertation research to their dissertation advisory committee no later than 12 months after passing the Qualifying Examination. The oral Candidacy Examination will cover all areas within the scope of the student's doctoral program and requires that the student demonstrate knowledge of the theory, literature and research methodologies relevant to the proposed area of research as well as demonstrate an understanding of how their work relates to the field of biology as a whole. After passing the candidacy examination and meeting other requirements, the student will be deemed as having been admitted to candidacy and can register for dissertation hours. Once a student is admitted to candidacy, the focus will be on dissertation research. For most students, the research and writing of the dissertation will take two to three years after advancing to candidacy. During this time, students should remain in close contact with the dissertation adviser and advisory committee and annual progress reports must be filed with the Graduate Program Director.

Candidacy Examination Proposal

A written dissertation proposal, already approved by the adviser, must be submitted to each committee member no later than two weeks prior to the Candidacy Examination. Typically, the proposal will be in the format described below. However, in cases where this format is not appropriate, an alternative format may be used with the approval of the dissertation adviser. The proposal should be approximately 10 to 15 pages in length not including references, single-spaced and typed in 12-point font with one-inch margins on all sides. The use of figures and tables is encouraged. With rare exceptions it is expected that dissertation research will be hypothesis-driven.

- Specific Aims: Describe concisely the problem(s) to be addressed and the specific goals of the dissertation research as they relate to the problem(s), including clear statements of hypotheses to be tested.
- Background and Significance: Review background literature relevant to the dissertation topic, indicating clearly where gaps in knowledge exist. Justify the need for the research by explaining its anticipated significance. Conclude by linking gaps in current knowledge to the proposed specific aims.
- Methodology: Outline carefully the study design (observations, experiments, models, statistical analysis, etc.) related to, and the methodology to be used for, each specific aim. Methodologies should be explained in
sufficient detail to allow committee members to assess the validity of its use in the study. Potential outcomes and alternative approaches should be discussed.

- Literature Cited: References should be indicated in the main body of the proposal wherever appropriate and should follow the format of a peer-reviewed journal in a field of study appropriate to your research. This section can be as long as necessary.

Examination

At least two weeks prior to the examination, an abstract describing the proposed research will be posted in the Biological Sciences Building and circulated by e-mail among faculty and graduate students. The candidate will present the research proposal in a forum open to all faculty, students and visitors. The oral presentation should be approximately 30-45 minutes in length to be followed by a public question-and-answer period. Presentation of preliminary data is neither required nor expected, but should be provided if available and relevant. With the exception of the advisory committee and candidate, all faculty, students and visitors will leave at the conclusion of the public question-and-answer period. The committee will continue the exam in closed session with further questioning. Questions can be directed to any matter relevant to the research proposal and areas of weakness previously identified in the written (qualifying) exam. A majority vote is required to pass the examination; however, no more than one negative vote is permitted. The majority must include the dissertation adviser. Any student failing the examination must repeat the examination within six calendar months of the date of the first examination. A second failed attempt will result in dismissal from the program.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Program of study submitted and approved.
- Dissertation Committee formed (without external member)
- Successful completion of the qualifying exam.
- Completion of all coursework (except for dissertation hours)
- External member added to Dissertation Committee.
- Successful completion of candidacy exam.

Dissertation Defense

The dissertation is expected to represent an original and significant contribution to the discipline. Upon completion and approval of the doctoral dissertation by all appropriate faculty and university offices, the student will make a formal presentation of the research findings in seminar format to the dissertation committee and other university faculty and students who may wish to attend.

The dissertation should be in a format appropriate for publication and should be “tightened” to a readiness for submittal by use of appendixes for nonessential information. The major role of the student's advisory committee is to offer guidance on study design and interpretation of results. A polished draft must be delivered to the advisory committee for review after the student and dissertation adviser have agreed upon editorial changes; this should occur well before the anticipated date of the final defense. Committee members have the right to reject documents that fail to meet these guidelines. Committee members should be given at least two weeks to review the draft before the student attempts to schedule the final defense. The final defense is to be scheduled only after the advisory committee agrees that the dissertation is ready for defense. Committee members should return the corrected dissertation to the student two weeks after receipt and the candidate should check with committee members to ensure they have the time to review the document. If the student delivers the final draft to the committee one month prior to the proposed defense date, that would allow two weeks before the scheduled defense date for the student to make recommended changes.

At least two weeks prior to the defense, an abstract describing the research conducted and conclusions reached will be posted in the Biological Sciences Building, circulated by e-mail among faculty and graduate students, and posted at the College of Graduate Studies Events Calendar. The candidate will present the research in a forum open to all faculty, students, and visitors. The oral presentation should be approximately 45-50 minutes in length to be followed by a question-and-answer period. In the presentation the candidate should focus on background information, describe the research performed, and draw attention to the significance of the conclusions reached. With the exception of the committee and candidate, all faculty, students, and visitors will leave at the conclusion of the question-and-answer period. The committee will continue the defense and the candidate will answer questions about the subject matter presented and defend the conclusions drawn. The committee will ask questions of the process used and assess the candidate's level of competency with the research topic. A majority vote is required to pass the examination; however, no more than one negative vote is permitted. The majority must include the dissertation adviser.

Student Orientation

An orientation for all incoming students will be scheduled one week prior to each fall semester. The orientation will include tours of the program facilities, a session on registration,
university policies and procedures, and expectations of doctoral study. Further, Environmental Health and Safety will present a program on topics such as laboratory safety, chemical and fire safety, biohazard training, and radiisotope handling. Expectations for Graduate Teaching Assistants (GTA) and Graduate Research Assistants (GRA) will be fully covered. In addition, students will be required to participate in the program for GTAs offered by the UCF Faculty Teaching and Learning Center and the College of Sciences. Students are strongly encouraged to attend the university's orientation also, held approximately one week before classes begin in the Fall semester.

Independent Learning

The dissertation satisfies the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Résumé.
- Statement of research interest and purpose, including a summary of relevant work or research experience.
- A computer-based score of 230 (or 89 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.

Students entering the graduate program with regular status are normally expected to have completed course work generally required for a bachelor's degree in biology.

Applicants should first identify faculty who match their own research interests, and then contact faculty in advance to inquire about research opportunities in faculty labs and to solicit agreement that a faculty member is interested in serving as the student's dissertation advisor. Applicants to the Ph.D. program who do not have a consenting dissertation advisor within the department faculty will not be accepted into the program. Admission is competitive and based on an overall assessment of the qualifications as submitted and the availability of faculty to serve as dissertation advisor.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, the identification of a dissertation advisor, and the applicant's potential for completing the degree.

Application Deadlines

Students applying for summer or spring admission will be considered on an ad hoc basis.

Conservation Biology PhD, Integrative Biology Track

Track Description

The Integrative Biology track in the Conservation Biology PhD program prepares students for independent research and roles within industry, nongovernmental organizations or government sectors combining traditional biological sciences with economics, law, urban/rural planning, politics, communication, philosophy and environmental engineering.

The Integrative Biology track in the Conservation Biology PhD program embraces applied and basic research concerning ecological questions to address current concerns in the area of conservation biology. Students taking this track will be prepared to pursue an academic career.

Curriculum

The Integrative Biology Track requires 72 credit hours beyond the bachelor's degree, including a minimum of 27 hours of formal course work exclusive of independent study. The formal coursework includes 7 credit hours of required core courses and 20 credit hours of graduate-level courses from Biology (or other departments) selected in consultation with the adviser and the dissertation committee (at least 12 of the 20 credit hours must be offered through the Biology Department). The remaining 45 credit hours may consist of additional electives, doctoral dissertation research (PCB 7980), and a maximum of 12 credit hours of combined directed research (PCB 6918, PCB 7919, and PCB 5917) and independent study (PCB 6908). In addition, 15 credit hours of the remaining 45 credit hours must be comprised of doctoral dissertation research (PCB 7980).

A student is required to establish a program of study before the completion of nine credit hours of coursework, in conjunction with their dissertation adviser and advisory committee. Students are required to complete a minimum of 20 hours of electives in consultation with their advisory committee. In addition to these selected electives, a student's advisory committee may require the candidate to take any graduate course taught at UCF if deemed appropriate for the student's area of emphasis. Students entering with a master's degree may request up to 30 semester credit hours of previous work be waived toward the requirements for this degree with approval from the advisory committee. Students who transfer 30 credit hours must still take 2 credit hours of Biology Seminar (BSC 6935) and Professional Development I (PCB 6095) and II (PCB 6096). Students may register for dissertation research only after passing the candidacy exam.

Total Credit Hours Required: 73-74 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses: 7 Credit Hours

- PCB 6466 - Methods in Experimental Ecology 3 Credit Hours
- BSC 6935 - Seminar in Biology 1 Credit Hours (2 credit hours, take twice at 1 credit hour each)
- PCB 6095 - Professional Development in Biology I 1 Credit Hours
- PCB 6096 - Professional Development in Biology II 1 Credit Hours

Elective Courses: 50 Credit Hours

A minimum of 20 credit hours of formal graduate-level courses from Biology, or other departments, are selected in consultation with the adviser and the dissertation committee. The goal is to tailor the program of study to the individual student's needs while maximizing exposure to a variety of disciplines including, among others, policy, economics, engineering, chemistry or sociology. The remaining 30 credit hours may include additional electives, dissertation research (PCB 7980), and a maximum of 12 hours of combined independent study (PCB 6908) and directed research (PCB 6918, PCB 7919, and PCB 5917). Professional internship hours can be substituted for directed research.

Dissertation: 15 Credit Hours Minimum

- PCB 7980 - Dissertation 15 Credit Hours
Advisory Committee

The Advisory Committee shall consist of a minimum of four members, including the dissertation adviser, with at least three members coming from the graduate faculty of the Biology Department. At least one member will be from a department other than Biology or from outside the university. The chair, or co-chair, must be a member of the program graduate faculty.

Enrollment Requirements

Students are required to register for 9 credit hours in fall and spring and 6 credit hours in summer before their candidacy exam. After being admitted to candidacy, minimum enrollment is 3 credit hours of dissertation research each semester.

Qualifying Examination

The written qualifying examination should be completed within the first two years of the students program. The exam seeks to cover areas of general knowledge and discipline-specific knowledge within the student's declared track. These questions could be related to the dissertation research proposal or designed to examine general knowledge and reasoning within the field.

The candidate will meet with their advisory committee at least two months prior to the examination to discuss expectations. Committee members must clearly articulate in writing the general areas that may be examined. Any student failing the examination must repeat the examination within six calendar months of the date of the first examination and the examination requires a majority vote by committee members. A second failed attempt will result in dismissal from the program.

Candidacy Examination

Each student will be required to generate, organize and orally defend a written proposal outlining their dissertation research to their dissertation advisory committee no later than 12 months after passing the Qualifying Examination. The oral Candidacy Examination will cover all areas within the scope of the student's doctoral program and requires that the student demonstrate knowledge of the theory, literature and research methodologies relevant to the proposed area of research as well as demonstrate an understanding of how their work relates to the field of biology as a whole. After passing the candidacy examination and meeting other requirements, the student will be deemed as having been admitted to candidacy and can register for dissertation hours. Once a student is admitted to candidacy, the focus will be on dissertation research. For most students, the research and writing of the dissertation will take two to three years after advancing to candidacy. During this time, students should remain in close contact with the dissertation adviser and advisory committee and annual progress reports must be filed with the Graduate Program Director.

Candidacy Examination Proposal

A written dissertation proposal, already approved by the adviser, must be submitted to each committee member no later than two weeks prior to the Candidacy Examination. Typically, the proposal will be in the format described below. However, in cases where this format is not appropriate, an alternative format may be used with the approval of the dissertation adviser. The proposal should be approximately 10 to 15 pages in length not including references, single-spaced and typed in 12-point font with one-inch margins on all sides. The use of figures and tables is encouraged. With rare exceptions it is expected that dissertation research will be hypothesis-driven.

- Specific Aims: Describe concisely the problem(s) to be addressed and the specific goals of the dissertation research as they relate to the problem(s), including clear statements of hypotheses to be tested.
- Background and Significance: Review background literature relevant to the dissertation topic, indicating clearly where gaps in knowledge exist. Justify the need for the research by explaining its anticipated significance. Conclude by linking gaps in current knowledge to the proposed specific aims.
- Methodology: Outline carefully the study design (observations, experiments, models, statistical analysis, etc.) related to, and the methodology to be used for, each specific aim. Methodologies should be explained in sufficient detail to allow committee members to assess the validity of its use in the study. Potential outcomes and alternative approaches should be discussed.
- Literature Cited: References should be indicated in the main body of the proposal wherever appropriate and should follow the format of a peer-reviewed journal in a field of study appropriate to your research. This section can be as long as necessary.

Examination

At least two weeks prior to the examination, an abstract describing the proposed research will be posted in the Biological Sciences Building and circulated by e-mail among faculty and graduate students. The candidate will present the research proposal in a forum open to all faculty, students and visitors. The oral presentation should be approximately 30-45 minutes in length to be followed by a public question-and-answer period. Presentation of preliminary data is neither required nor expected, but should be provided if available and relevant. With
the exception of the advisory committee and candidate, all faculty, students and visitors will leave at the conclusion of the public question-and-answer period. The committee will continue the exam in closed session with further questioning. Questions can be directed to any matter relevant to the research proposal and areas of weakness previously identified in the written (qualifying) exam. A majority vote is required to pass the examination; however, no more than one negative vote is permitted. The majority must include the dissertation adviser. Any student failing the examination must repeat the examination within six calendar months of the date of the first examination. A second failed attempt will result in dismissal from the program.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Program of study submitted and approved.
- Dissertation Committee formed (without external member).
- Successful completion of qualifying exam.
- Completion of all coursework (except for dissertation hours).
- External member added to Dissertation Committee.
- Successful completion of candidacy exam.

Dissertation Defense

The dissertation is expected to represent an original and significant contribution to the discipline. Upon completion and approval of the doctoral dissertation by all appropriate faculty and university offices, the student will make a formal presentation of the research findings in seminar format to the dissertation committee and other university faculty and students who may wish to attend.

The dissertation should be in a format appropriate for publication and should be “tightened” to a readiness for submittal by use of appendixes for nonessential information. The major role of the student's advisory committee is to offer guidance on study design and interpretation of results. A polished draft must be delivered to the advisory committee for review after the student and dissertation adviser have agreed upon editorial changes; this should occur well before the anticipated date of the final defense. Committee members have the right to reject documents that fail to meet these guidelines. Committee members should be given at least two weeks to review the draft before the student attempts to schedule the final defense. The final defense is to be scheduled only after the advisory committee agrees that the dissertation is ready for defense. Committee members should return the corrected dissertation to the student two weeks after receipt and the candidate should check with committee members to ensure they have the time to review the document. If the student delivers the final draft to the committee one month prior to the proposed defense date, that would allow two weeks before the scheduled defense date for the student to make recommended changes.

At least two weeks prior to the defense, an abstract describing the research conducted and conclusions reached will be posted in the Biological Sciences Building, circulated by e-mail among faculty and graduate students, and posted on the College of Graduate Studies Events Calendar. The candidate will present the research in a forum open to all faculty, students, and visitors. The oral presentation should be approximately 45-50 minutes in length to be followed by a question-and-answer period. In the presentation the candidate should focus on background information, describe the research performed, and draw attention to the significance of the conclusions reached. With the exception of the committee and candidate, all faculty, students, and visitors will leave at the conclusion of the question-and-answer period. The committee will continue the defense and the candidate will answer questions about the subject matter presented and defend the conclusions drawn. The committee will ask questions of the process used and assess the candidate's level of competency with the research topic. A majority vote is required to pass the examination; however, no more than one negative vote is permitted. The majority must include the dissertation adviser.

Student Orientation

An orientation for all incoming students will be scheduled one week prior to each fall semester. The orientation will include tours of the program facilities, a session on registration, university policies and procedures, and expectations of doctoral study. Further, Environmental Health and Safety will present a program on topics such as laboratory safety, chemical and fire safety, biohazard training, and radioisotope handling. Expectations for Graduate Teaching Assistants (GTA) and Graduate Research Assistants (GRA) will be fully covered. In addition, students will be required to participate in the program for GTAs offered by the UCF Faculty Center for Teaching and Learning and the College of Sciences. Students are strongly encouraged to attend the university orientation as well, held approximately one week prior to each fall semester.

Independent Learning

The dissertation satisfies the independent learning experience.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Résumé.
- Statement of research interest and purpose, including a summary of relevant work or research experience.
- A computer-based score of 230 (or 89 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.

Students entering the graduate program with regular status are normally expected to have completed course work generally required for a bachelor's degree in biology.

Applicants should first identify faculty who match their own research interests, and then contact faculty in advance to inquire about research opportunities in faculty labs and to solicit agreement that a faculty member is interested in serving as the student's dissertation advisor. Applicants to the Ph.D. program who do not have a consenting dissertation advisor within the department faculty will not be accepted into the program. Admission is competitive and based on an overall assessment of the qualifications as submitted and the availability of faculty to serve as dissertation advisor.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, the identification of a dissertation adviser, and the applicant's potential for completing the degree.

Application Deadlines

Students applying for summer or spring admission will be considered on an ad hoc basis.

<table>
<thead>
<tr>

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Criminal Justice PhD

Program Description

The Doctoral Program in Criminal Justice is a post-master's program of study and research. The program is composed of a substantive core focused on criminal justice theory and institutions, a research methods core that prepares social scientists in the scientific method and social-science statistics, and a selection of substantive criminal justice specializations (policing, corrections, and juvenile justice).

The program focuses on criminal justice and takes advantage of the city of Orlando and surrounding cities and counties to examine criminal justice issues from multiple angles and levels.

The program is intended to serve many purposes. Chief among them are:

- Prepare disciplinary stewards capable of advancing scholarship in criminal justice;
- Prepare a qualified workforce to assume criminal justice instructional responsibilities in postsecondary institutions;
- Prepare analysts competent to staff federal, state, and local criminal justice agencies; and
- Improve safety and justice in communities through research partnerships with neighborhood, city, county and state agencies and associations.

Students completing the program will be well prepared to pursue academic positions in universities, research positions in criminal justice agencies, and consultancies in program evaluation and needs assessment.

Curriculum

The Doctoral Program in Criminal Justice is a 57-credit-hour, post-master's program of study and research. Substantive emphasis is placed on core coursework in criminal justice theory and institutions, and on in-depth concentrations in policing, corrections or juvenile justice. Students complete a minimum of 42 credit hours of doctoral coursework and 15 credit hours of dissertation research.

Total Credit Hours Required: 57 Credit Hours Minimum beyond the Master's Degree

Prerequisites

Applicants are expected to have a master's degree in criminal justice or a closely related discipline. Applicants' transcripts will be reviewed for successful completion of a sufficient number of fundamental criminal justice classes. Applicants may be required to complete master's-level courses in certain topics before being admitted to the program or permitted to take classes.

Students must have completed master's-level courses in advanced research methods and advanced quantitative methods and be familiar with SPSS, SAS, STATA, or R prior to enrolling in the Methodological Core courses. Students who do not meet this requirement may be required to complete remedial coursework prior to enrolling in CCJ 7708 - Advanced Quantitative Methods for Criminal Justice Research and CCJ 7727 - Advanced Research Methods in Criminal Justice. All students must also have completed master's level courses in the concentration area they choose prior to taking courses in that area (policing, corrections, or juvenile justice).

Required Courses: 36 Credit Hours

Substantive Core: 15 Credit Hours

A grade of B (3.0) or better is required for all courses listed in the Substantive Core.

- CCJ 7019 - Seminar in the Nature of Crime 3 Credit Hours
- CCJ 7457 - Seminar in Criminal Justice Theory 3 Credit Hours
- CCJ 7096 - Seminar in Criminal Justice Systems 3 Credit Hours
- CCJ 7785 - Teaching Criminal Justice 3 Credit Hours
- CCJ 7775 - Criminal Justice Research in the Community 3 Credit Hours

Methodological Core: 12 Credit Hours

A grade of B (3.0) or better is required for all courses listed in the Methodological Core.

- CCJ 7727 - Advanced Research Methods in Criminal Justice 3 Credit Hours
- CCJ 7708 - Advanced Quantitative Methods for Criminal Justice Research 3 Credit Hours

Select two courses:

Select two courses from the list below or another methodological course with adviser approval:

- CCJ 7725 - The Geography of Crime: Theory and Methods 3 Credit Hours
- Students selecting this option must complete
• CCJ 6073 - Data Management Systems for Crime Analysis 3 Credit Hours
• CCJ 6079 - Crime Mapping and Analysis in Criminal Justice 3 Credit Hours
• CCJ 7747 - Hierarchical Linear Modeling in Criminal Justice Research 3 Credit Hours
• CCJ 7752 - Structural Equation Modeling in Criminal Justice Research 3 Credit Hours

Concentration Area: 9 Credit Hours

Students select an area of concentration and complete the assigned 9 credit hours of coursework. Entering doctoral students must have completed a master's-level precursor in their chosen area (e.g., master's-level survey course in policing if the area chosen is Policing Theory and Research). A grade of B (3.0) or better is required for all courses listed in the selected Concentration area. Areas of concentration are:

Policing Theory and Research

• CJE 6320 - Seminar in Police Administration 3 Credit Hours
• CJE 6456 - Seminar in Policing Urban Communities 3 Credit Hours
• CJE 6706 - Seminar in Police Socialization and Culture 3 Credit Hours

Correctional Theory and Research

• CJC 6135 - Seminar in Institutional Corrections 3 Credit Hours
• CJC 6165 - Seminar in Community Corrections 3 Credit Hours
• CJC 6486 - Seminar in Correctional Effectiveness 3 Credit Hours

Juvenile Justice Theory and Research

• CJJ 6124 - Seminar in Prosecuting Juvenile Offenders 3 Credit Hours
• CJJ 6126 - Seminar in Juvenile Corrections 3 Credit Hours
• CJJ 6546 - Seminar in Policing and Prevention in the Juvenile Justice System 3 Credit Hours

Elective Courses: 6 Credit Hours

Students select two additional courses (3 credit hours each) in consultation with program adviser and mentor.

Examinations

Students must successfully complete a series of cumulative examinations to ensure expertise in the substantive, methodological and concentration areas. Students will take an exam coming to the core criminal justice coursework, a research methods and statistics proficiency exam, and an exam in the student's concentration area. Students may enroll in doctoral research (CCJ 7919) during the period of study preceding the examinations. Students will be given two attempts at each exam. If unsuccessful on the second attempt the student will be dismissed from the program.

Dissertation: 15 Credit Hours

Upon successful completion of all examinations, students will enter candidacy and complete a dissertation. The dissertation topic should be grounded in the student's selected concentration area. Dissertation committees will contain a minimum of four faculty members, at least three of which (including the chair) will be from the Department of Criminal Justice. The fourth member must be from outside the Department of Criminal Justice and may be from outside the university. All dissertation committee members must be approved graduate faculty or graduate faculty scholars.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

• One official transcript (in a sealed envelope) from each college/university attended.
• An earned Master's degree in criminal justice or a closely related discipline from an accredited institution.
• Official, competitive GRE score taken within the last five years.
• Three letters of reference from faculty or professionals who can assess the student's ability to succeed in a doctoral program. A minimum of two letters must be from university faculty members, at least one of which must be written by a faculty member from the institution/program from which the Master's degree was earned, preferably a
thesis advisor or close mentor who has the capacity to
directly assess the applicant's potential for PhD-level work

- A personal narrative of 500 - 1,000 words describing
research interests, educational expectations, career
aspirations, level of computer skills, and any special
qualifications that may enhance the overall learning
environment of the CJ PhD program.
- A curriculum vita.
- A writing sample that is at least 2,000 words long, is
academic in nature (e.g., paper written for a Master's class),
and demonstrates the applicant's ability to complete
graduate-level composition. Should not be an article
accepted for publication and applicant must be sole author.
Applicants may be requested to participate in an interview (in
person, by Skype, or by phone) with the Department's Doctoral
Program Committee.

Admission to the Criminal Justice doctoral program will be
granted on a competitive basis. Meeting minimum UCF
admission standards does not guarantee program admission.
Final admission is based on evaluation of the applicant's
abilities, past performance, recommendations, match to the
program, ability to enhance program strength and diversity, and
potential for completing the degree and making significant
contributions to criminal justice.

Application Deadlines

All application materials must be submitted by the appropriate
deadline listed below.

Curriculum and Instruction
EdD

Program Description

The Curriculum and Instruction EdD program is intended for
individuals who are engaged in the practice of education in a
variety of settings including schools, colleges, universities,
businesses and industry. The program prepares students for
engaging in the study of practice based problems in education
and data driven decision making, to generate real world
solutions.

The Curriculum and Instruction EdD program is designed for
experienced practicing educators and practitioners who wish to
gain advanced skills in:

- Evaluating the effectiveness of educational and clinical
programs and identifying impediments to effective practice
and program improvement;
• Analyzing and synthesizing educational and clinical research and scholarship to identify research-based practices and solutions to complex problems of the practice;
• Leading the change process through the implementation of data and evidence-based decisions and solutions.

The Doctor of Education program culminates with the Dissertation in Practice.

Curriculum

The Doctor of Education (EdD) program is a professional practice doctorate. It is problem-based and designed for practitioners who aspire to positions of influence through their engagement in the development of others. The program builds that expertise from a core of courses in learning, development and motivation; data, accountability and leadership; organizational contexts and the use of research to drive decision-making. Students will work with a team of faculty and field advisers who will support their specialization area. This program is intended for professionals who are interested in teaching in a college, university, or community college, or leading program improvement in a school or school district, higher education, social service agencies, military or business settings.

The EdD in Curriculum and Instruction consists of three distinct program areas, all with emphasis on professional practice: core, concentration, and capstone. The program requires 21 credit hours of core courses, 15 credit hours within the chosen concentration area and 18 credit hours of dissertation in practice, including proposal, defense, and final submission of a dissertation in practice.

Total Credit Hours Required: 54 Credit Hours Minimum beyond the Master's Degree

Required Courses—54 Credit Hours

Core—21 Credit Hours

The Core courses include 12 credit hours covering what all graduates of a professional practice doctoral program should know and be able to do and 9 credit hours of research continuum designed to identify, analyze and evaluate complex problems of practice.

• EDP 7517 - Facilitating Learning, Development and Motivation 3 Credit Hours
• EDF 7457 - Data, Assessment, and Accountability 3 Credit Hours
• EDA 7101 - Organizational Theory in Education 3 Credit Hours

Area of Specialization—15 Credit Hours

The area of specialization is comprised of 12 to 15 credit hours of specialization courses and 3 credit hours of "Laboratory of Practice."

Students must select an area of specialization. These courses are designed to enhance the student's professional practice by extending the knowledge base earned through the master's degree and work experience. Specialization areas are subject to the discretion of the College based on course and faculty availability. Applicants are advised to contact the Program Director regarding specializations.

Students must complete one 3-credit-hour "Laboratory of Practice" experience. The Laboratory of Practice is a field-based experience. This is not a "work for credit" experience; rather, it places the student in a professional setting for the purpose of gaining practical leadership experience. Students may also enroll in an internship designated by the concentration area as an alternative to the Laboratory of Practice.

• EDG 7947 - Laboratory of Practice (3 credit hours; may be repeated for a total of 6 credit hours) Examples of concentration areas are provided below; however, these are only examples and do not represent specific requirements.

Students should be aware that not every specialization course is offered every semester and concessions will need to be considered based on the availability of coursework, faculty, course prerequisites, and other institutional factors.

Example I: Curriculum and Instruction

The Curriculum and Instruction option provides students with a broad understanding of the factors affecting education and approaches to addressing systemic problems. For example, a student interested in curriculum design and development and contemporary instructional practice may select the following specialization to include:

• EDG 7692 Issues in Curriculum 3 Credit Hours
• EDG 7221 - Advanced Curriculum Theory 3 Credit Hours
Program Milestones

Program milestones are observable demonstrations of competency administered in place of comprehensive exams. Milestones are designed to monitor student progress and clear the student for continuation to the next program level.

- Milestone 1 - Gap Analysis
- Milestone 2 - Prospectus
- Milestone 3 - Dissertation in Practice Proposal and Proposal Defense

To enter EDG 7987 - Dissertation in Practice for the EdD, students must have an overall 3.0 GPA on all graduate work in the program and successfully complete the three required program milestones.

Dissertation in Practice—18 Credit Hours

The dissertation in practice is the culmination of coursework and field experience as it relates to complex problems of education practice. The dissertation is the final demonstration of competency in the Curriculum and Instruction EdD. It is a rigorous academic project and is expected to demonstrate the skills and knowledge the student has acquired throughout the program as applied in an authentic professional environment. The dissertation is completed in partnership with the student, university faculty, and the student's mentor/client. It may be a group or team project.

The dissertation in practice is presented in a thorough and comprehensive written report. It must be appropriately formatted according to APA 6th edition citation guidelines. The student must present findings to both university faculty and the student's client. The dissertation in practice will be evaluated on the thoroughness, applicability and appropriateness of the work.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- Official transcript
  One official transcript (in a sealed envelope) from each college/university attended.
- Master's degree in a closely related field.
- Graduate Record Examination scores and transcripts
  Official, competitive GRE score taken within the last five years.
- The goal statement
  The goal statement is a critical element of your application materials to the EdD program. It should clearly convey the applicant's intended Area of Specialization (see below), professional experience, and professional goals after completion of the program. The admissions committee will review the goal statement to determine whether the EdD program is the right match for the applicant. In addition, as a sample of the applicant's writing ability, the goal statement should be clear and concise.
- Area of Specialization
  The applicant will be asked to indicate a preferred Area of Specialization in the Goal Statement. Areas of Specialization may be found here. Applicants are required to meet or speak with the Specialization Area Advisor about their interests prior to submitting an application. Please contact the Program Coordinator to discuss options for Areas of Specialization not included in our current program offerings.
- Resume
  The applicant should include his/her most recent professional resume or curriculum vitae. The EdD in Curriculum and Instruction is a doctorate in the professional practice of education and as such emphasizes a minimum of three (3) years' experience in the field.
- Three letters of reference
  Three letters of reference will be read by the admissions committee to determine whether the applicant has the academic ability to succeed in the program. As such, these letters should be written by graduate faculty who are able to judge the applicant's abilities in a doctoral program, including their research and writing skills. One of the
letters may be from the applicant's employer/supervisor. This letter will support the applicant's professional experience and commitment to the program.

- Interview
  The applicant may be requested to interview with EdD program faculty. The interview is an important way for faculty to attach faces to names and draw distinctions among applicants. Students in the EdD in Curriculum and Instruction program will spend three full years working closely with faculty and colleagues in both individual and group settings. The interview allows faculty to meet potential students to begin the process of forming a cohesive and dynamic cohort.

Doctor of Medicine MD

Program Description

UCF's M.D. Program allows students to prepare for careers in every discipline of medicine and to focus on an individualized area of study or research. The M.D. Program learning experience is a unique and exciting blend of state-of-the-art technology, interactions with virtual patients, clinical and laboratory experiences, research, facilitator-directed small group sessions, and interactive didactic lectures. The UCF College of Medicine is fully accredited by LCME.

Program highlights include:

Clinical experiences are embedded throughout the first two years in P-1 and P-2 Community of Practice modules. At least twice a month, students will work with community preceptors in a variety of settings to practice skills and to apply the concepts mastered in the integrated basic science curriculum to real patients.

As part of approach described by the Dean as "Keep the Dream Alive!", each student will complete a focused inquiry and research project in the I-1 and I-2 modules. The scope of the project is limited only by the student's imagination and may include bench or clinical research as well as studies of quality of care, hospitality in medicine, quality of life, legal aspects of medicine, and more. Students will work with a mentor to develop a project or area of study that focuses on the student's unique interest and career plans.

Innovative simulation and animation experiences have been designed explicitly to integrate into and reinforce the curriculum. From basic science concepts to clinical diagnoses and treatment, the human patient mannequin simulators and online interactive virtual patients enhance and complement learning.

UCF offers these joint degrees:
MD/MBA, a joint medical and business degree program focusing on developing effective problem-solving and decision-making skills.

MD/MS in Hospitality and Tourism Management, a specialized degree program for individuals interested in enhancing their management skills through studying hospitality and service-oriented business models.

MD/PhD, a College of Medicine program that prepares clinician-scientists for a career in academic medicine to become leaders in the international academic medical community.

Curriculum

The four-year medical curriculum at UCF is designed to fully integrate basic science and clinical medicine, provide students with appreciation of cultural diversity and the need for sensitivity in treating patients, foster professionalism in all interactions, and ignite a passion for life-long learning.

The first two years of the curriculum are structured into modules, with the first year focusing on a fundamental understanding of how the various basic science disciplines relate to the normal human body. The second year takes an organ system-based approach and applies the basic knowledge of the first year to the study of clinical disease, pathological processes, and treatment. In concert with these aspects of medicine, the curriculum also covers psychosocial issues, cultural differences, communication skills, and physical diagnosis skills as they relate to the different topics in medicine.

The third and fourth years of the curriculum are devoted to clinical experience through clerkships, selectives, and electives. The clinical curriculum provides practical patient experiences complemented by basic science lectures, simulations, journal clubs, and conferences throughout the six core clerkships.

Throughout all four years of the M.D. program, Longitudinal Curricular Themes (LCT’s) emphasize critical aspects of medicine and medical care that are not addressed in the basic core curriculum. The LCT’s include Ethics and Humanities, Gender-Based Medicine, Medical Informatics, Medical Nutrition, Geriatrics and Principles of Palliative Care, Culture, Health and Society, and Patient Safety. Each of these themes will be highlighted when appropriate in the core curriculum and reinforced through a variety of interactive experiences.

Application Requirements

For information on applying to the MD Program, please see med.ucf.edu/admissions/ or contact the Office of Admissions at the UCF College of Medicine (Phone: 407.266.1350, Email: mdadmissions@ucf.edu).

Education PhD, Communication Sciences and Disorders Track

Track Description

This program is no longer accepting applications effective Summer 2017.

The Communication Sciences and Disorders track in the Education PhD program is designed specifically for those who wish to pursue careers as scholars, teachers and leaders in the area of school speech-language pathology with a content focus on language disorders and literacy.

The Communication Sciences and Disorders track in the Education PhD program is designed specifically for those who wish to pursue careers as scholars, teachers and leaders in the area of school speech-language pathology with a content focus on language disorders and literacy. The program prepares doctoral-level professionals to serve as university professors in academic or clinical course work and supervisors or directors of school programs at district, state or national levels. The emphasis is on developing expertise in conducting research to promote evidence-based practice and in collaborating with professionals from a variety of related disciplines.

Curriculum

The Communication Sciences and Disorders track in the Education PhD program requires a minimum of 81 credit hours beyond the master's degree. Students must complete 24 credit hours of core courses, 18 credit hours of specialization courses, 9 credit hours of electives, and 24 credit hours of dissertation. In addition, the internship in this track requires 2 credit hours in university teaching, 2 credit hours in clinical supervision, and 2 credit hours of professional development. All students must complete the candidacy examination.
Total Credit Hours Required: 81 Credit Hours Minimum beyond the Master's Degree

Required Courses: 42 Credit Hours

Core: 24 Credit Hours

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from group B:

Specialization: 18 Credit Hours

- SPA 6843 - Severe Language-Based Reading and Writing Disabilities 3 Credit Hours
- SPA 7490 - Advanced Studies in Language Disorders 3 Credit Hours
- SPA 7493 - Advanced Studies in School Speech-Language Pathology 3 Credit Hours
- SPA 7494 - Doctoral Seminar 1: Spoken and Written Language Disorders Preschool and Early Elem 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours
- IDS 7657 - Professional Collaboration Around Language Issues 3 Credit Hours

Elective Courses: 9 Credit Hours

- Advanced course work in Reading 3 Credit Hours
- Advanced course work in Exceptional Education 3 Credit Hours
- Additional course work in Teaching English to Speakers of Other Languages 3 Credit Hours

Dissertation: 24 Credit Hours

Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee.

- Dissertation Research 24 Credit Hours minimum

Internship: 6 Credit Hours

Specialization in all tracks must include a professional internship (minimum of 6 credit hours). In the Communication Sciences and Disorders Track, however, students must complete a three-part internship:

- University teaching 2 Credit Hours
- Clinical supervision **2 Credit Hours**
- Professional development **2 Credit Hours**

**Candidacy**

To enter candidacy for the PhD, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required examinations. Examinations will be scheduled by the student and major adviser. The associate dean for graduate studies and research must be notified of the date and location of the exam 30 days in advance. Students must be enrolled in the university during the semester an examination is taken.

The following are required to be admitted to candidacy and enroll in dissertation hours:
- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

**Candidacy Examinations**

All PhD candidates will be required to complete two examinations.

Please note that there may be variations in length of exam time and content based on the respective requirements of each track.
- Research in the Specialization—8-hour written examination.
- Specialization—3-hour oral examination.

**Independent Learning**

The dissertation satisfies the independent learning requirement.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

**Financials**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**Fellowships**

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Education PhD, Counselor Education Track**

**Track Description**

The CACREP accredited Counselor Education track in the Education PhD program is designed specifically for those who wish to pursue careers as counselor educators at the university level or as supervisors in schools or agencies.

The program is fully accredited with the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). In addition to advanced curricular experiences in counseling, courses are designed to examine the fundamental issues and theory of teaching adults in higher education, research, supervision, consultation and to provide supervised experiences in each area. The UCF Community Counseling and Research Center serves as a hub for teaching and research in the program, includes facilities for group counseling and play therapy, and provides annual services to over 1,400 individuals, couples, and families in the central Florida community. The
clinic also provides opportunities for doctoral students to practice their supervision skills.

Curriculum

The Counselor Education track in the Education PhD program requires a minimum of 84 credit hours beyond the master's degree. Students must complete 27 credit hours of core courses, 27 credit hours of specialization courses, 24 credit hours of dissertation, and 6 credit hours of internship. All students must also complete the candidacy examination.

Total Credit Hours Required: 84 Credit Hours Minimum beyond the Master's Degree

Required Courses—54 Credit Hours

Core—27 Credit Hours

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 6401 - Statistics for Educational Data 3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from group B:

Group A

- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Group B

- IDS 7938 - Research Cluster Seminar 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Specialization—27 Credit Hours

- MHS 7406 - Advanced Theories in Counseling 3 Credit Hours
- MHS 7801 - Advanced Practicum in Counselor Education 3 Credit Hours
- MHS 6510 - Advanced Group Counseling 3 Credit Hours
- MHS 7700 - Professional Issues in Counselor Education 3 Credit Hours
- MHS 7311 - Professional Issues in Counselor Education II 3 Credit Hours
- MHS 7611 - Supervision in Counselor Education 3 Credit Hours
- MHS 7808 - Practicum in Counseling Supervision 3 Credit Hours
- MHS 7730 - Research Seminar in Counselor Education 3 Credit Hours
- MHS 7XXX Advanced Multicultural Counseling 3 Credit Hours

Dissertation—24 Credit Hours

Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee.
Required Internship—6 Credit Hours

- MHS 7840 - Internship in Counselor Education 3 Credit Hours (repeatable)

Candidacy

To enter candidacy for the PhD, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required examinations. Examinations will be scheduled by the student and major adviser. The associate dean for graduate studies and research must be notified of the date and location of the exam 30 days in advance. Students must be enrolled in the university during the semester an examination is taken.

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submission of an approved program of study.

Candidacy Examinations

All PhD candidates will be required to complete two examinations.

Please note that there may be variations in length of exam time and content based on the respective requirements of each track.

- Research in the Specialization—8-hour written examination.
- Specialization—3-hour oral examination.

Independent Learning

The dissertation satisfies the independent learning requirement.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree in a closely related field and master's level competency in educational research and statistics.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Goal statement.
- Resumé.
- An interview is required. Please refer to the Counselor Education webpage to view the current scheduled interview date and times. Click admission > Dates and deadlines you will be able to view the updated interview date and location information.

Education PhD, Early Childhood Track

Track Description

The Early Childhood track in the Education PhD program is designed to prepare highly competent doctoral-level professionals to assume leadership positions in teaching, research and service in the area of early childhood.

This track will prepare you with ways to apply your knowledge and skills to prepare you for your field.

Curriculum

The Early Childhood track in the Education PhD program requires a minimum of 69 credit hours beyond the master's degree. Students must complete 24 credit hours of core courses, 15 credit hours of specialization courses, 6 credit hours of independent study, and 24 credit hours of dissertation. All students must also complete the candidacy examination.

Total Credit Hours Required: 69 Credit Hours Minimum beyond the Master's Degree

Required Courses: 45 Credit Hours

Core Courses: 24 Credit Hours

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from group B:

Group A

- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling in Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

**Education PhD, Elementary Education Track**

**Track Description**

The Elementary Education track in the Education PhD program is designed to provide further education for those aspiring to work in the area of education at the post-secondary level (four-year colleges and/or research universities).

The program permits students to concentrate their doctoral study in either a field of emphasis, such as science, mathematics, literacy and social studies, or to create an interdisciplinary focus, such as mathematics-science or reading-social studies. The program of study is most appropriate for educators who can create, analyze and synthesize educational studies and for educators seeking employment in settings requiring a strong research base. In contrast to the EdD, the doctoral program relies on students who progress through their program of study in cohorts and who are full members of the learning community of the College of Education. The program includes a strong philosophical base, research seminars requiring one-on-one work with faculty members, cluster seminars requiring work with several faculty members in interdisciplinary research projects, and long-term mentoring via supervised internships.

**Curriculum**

The Elementary Education track in the Education PhD program requires a minimum of 69 credit hours beyond the master's degree. Students must complete 24 credit hours of core courses, 6 credit hours of specialization courses, 12 credit hours of electives, 3-6 credit hours of internship, and 24 credit hours of dissertation. All students must also complete the candidacy examination.

**Total Credit Hours Required: 69 Credit Hours Minimum beyond the Master's Degree**

**Required Courses: 30 Credit Hours**

**Core: 24 Credit Hours**

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from group B:

**Group A**

- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
• EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
• EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
• EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
• EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
• EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
• SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Group B

• IDS 7938 - Research Cluster Seminar 3 Credit Hours
• EDF 7405 - Quantitative Methods II 3 Credit Hours
• EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
• EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
• EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
• EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
• EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
• SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Specialization: 6 Credit Hours

• Philosophical Foundations for Studies in Education 3 Credit Hours
• Writing for Professional Publication in Education 3 Credit Hours

Elective Courses: 12 Credit Hours

Areas of emphasis: four additional courses in one or more areas including Science Education, Literacy Education, Technology Education, or Arts Education with one course from outside the college in a related field of study (12 credit hours minimum).

Dissertation: 24 Credit Hours

Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee.

• EDE 7980 - Dissertation Research 24 Credit Hours minimum

Required Internship: 3-6 Credit Hours

Depending on the student’s experiential background, the program of study requires three to six variable credit hours of supervised internships. Often elementary teachers seeking the PhD have served as successful supervising teachers to undergraduate interns. If this is not the case, the adviser may seek to have the doctoral student take three credit hours to serve as a supervised internship coordinator at the university level. Additionally, students interested in long-term goals related to research may want to use the variable credit hours to accumulate a minimum of 250 hours as a supervised intern working for an educational researcher. Most likely, since our doctoral students' career goals will align with the professoriate, students will be required to teach one university course with supervision and feedback from an established professor. The adviser/program coordinator will determine the kind of internship and the number of semester hours needed. These internship experiences are highly valued and set the candidate apart from other applicants as they seek employment at the college and university level.

• EDE 6946 Elementary Education Internship 3-6 Credit Hours minimum

Candidacy

To enter candidacy for the PhD, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required examinations. Examinations will be scheduled by the student and major adviser. The associate dean for graduate studies and research must be notified of the date and location of the exam 30 days in advance. Students must be enrolled in the university during the semester an examination is taken.

The following are required to be admitted to candidacy and enroll in dissertation hours:

• Completion of all course work, except for dissertation hours.
• Successful completion of the candidacy examination.
• Successful defense of the written dissertation proposal.
• The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
• Submission of an approved program of study.
Candidacy Examinations

All PhD candidates will be required to complete two examinations.

Please note that there may be variations in length of exam time and content based on the respective requirements of each track.

- Research in the Specialization—8-hour written examination.
- Specialization—3-hour oral examination.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree in a related field of study, including one Graduate Curriculum course, and master's level competency in educational research and statistics.
- A minimum of 12 credit hours of Graduate Education courses.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Goal statement.
- Résumé.
- Writing sample.
- Interview.
- Elementary certification, with a minimum of three years teaching experience in early childhood, elementary, or middle school.

Education PhD, Exceptional Education Track

Track Description

The Exceptional Education track in the Education PhD program is designed to prepare highly competent doctoral-level professionals to assume leadership positions in teaching, research and service in the area of special education.

The Exceptional Education track is a challenging program of study. The program focuses on developing the qualifications to conduct research, implement best practices based on research, and evaluate new programs and projects that serve students with disabilities.

Curriculum

The Exceptional Education track in the Education PhD program requires a minimum of 69 credit hours beyond the master's degree. Students must complete 24 credit hours of core courses, 15 credit hours of specialization courses, 6 credit hours of internship, and 24 credit hours of dissertation. All students must also complete the candidacy examination.

Total Credit Hours Required: 69 Credit Hours Minimum beyond the Master's Degree

Required Courses: 39 Credit Hours

Core Courses: 24 Credit Hours

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from group B:

Specialization Courses: 15 Credit Hours

- EEX 7936 - Current Issues Trends in Special Education 3 Credit Hours
- EEX 7527 - Professional Writing Grant Writing in Special Education 3 Credit Hours
- EEX 7766 - Technology Research Training in Special Education 3 Credit Hours
- EEX 7428 - Personnel Preparation: Special Education 3 Credit Hours
- EEX 7320 - Program Evaluation and Planning in Special Education 3 Credit Hours

Group A

- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours

- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)
Dissertation: 24 Credit Hours

Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee.

- EEX 7980 - Dissertation Research 24 Credit Hours minimum

Internship: 6 Credit Hours

Specialization in this track must include a minimum of 6 credit hours in professional internship.

- EEX 7865 - Internship in College Instruction in Special Education 3 Credit Hours
- EEX 7866 - Internship in Practicum Supervision in Special Education 3 Credit Hours

Candidacy

To enter candidacy for the PhD, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required examinations. Examinations will be scheduled by the student and major adviser. The associate dean for graduate studies and research must be notified of the date and location of the exam 30 days in advance. Students must be enrolled in the university during the semester an examination is taken.

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submission of an approved program of study.

Candidacy Examinations

All PhD candidates will be required to complete two examinations.

Please note that there may be variations in length of exam time and content based on the respective requirements of each track.

- Research in the Specialization—8-hour written examination.
- Specialization—3-hour oral examination.

Independent Learning

The dissertation satisfies the independent learning requirement.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree in a closely related field.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Goal statement.
- Résumé
- A timed writing sample produced during the interview.
- Group interview with faculty. Current doctoral students may also interview applicants.

Application Deadlines

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more
information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Education PhD, Exercise Physiology Track

Track Description

The Exercise Physiology track in the Education PhD program provides advanced studies in the area of exercise physiology and wellness, sport and exercise science.

Students interested in the doctoral program might come from the biological and health-related professions, exercise science, physical education, or athletic training.

Curriculum

The Exercise Physiology track in the Education PhD program requires a minimum of 75 credit hours beyond the master's degree. Students must complete 24 credit hours of core courses, 27 credit hours of specialization courses, and 24 credit hours of dissertation. All students must also complete the candidacy examination.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Master's Degree

Required Courses: 51 Credit Hours

Core Courses: 24 Credit Hours

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from group B:

Group A

- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Group B

- IDS 7938 - Research Cluster Seminar 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
Specialization Courses: 27 Credit Hours

Students select nine specialization courses from the following list.

- PET 6357C - Environmental Perturbation and Human Performance 3 Credit Hours
- PET 6363 - Dietary and Nutritional Supplementation for Athletic Performance 3 Credit Hours
- PET 6366 - Exercise, Nutrition and Weight Control 3 Credit Hours
- PET 6376 - Sport Nutrition 3 Credit Hours
- PET 6381 - Physiology of Neuromuscular Mechanisms 3 Credit Hours
- PET 6388 - Cardiovascular Physiology 3 Credit Hours
- PET 6389 - Physiological Aspects of Sport and Training 3 Credit Hours
- PET 6395 - Program Design in Strength and Conditioning 3 Credit Hours
- PET 6515 - Assessment and Evaluation in Sport and Exercise Science 3 Credit Hours
- PET 6521 - Exercise Physiology Instrumentation 3 Credit Hours
- PET 6690 - Exercise Prescription for Special Populations 3 Credit Hours
- PET 7365 - Cardiovascular Dynamics During Exercise 3 Credit Hours
- PET 7368 - Regulation of Metabolism During Exercise 3 Credit Hours
- PET 7387 - Exercise Endocrinology 3 Credit Hours
- PET 7535 - Research and Experimental Design in Exercise Physiology 3 Credit Hours
- PET 7939 - Advanced Research Seminar 3 Credit Hours

Dissertation: 24 Credit Hours

Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee.

- PET 7980 - Dissertation Research 24 Credit Hours minimum

Candidacy

To enter candidacy for the PhD, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required examinations. Examinations will be scheduled by the student and major adviser. The associate dean for graduate studies and research must be notified of the date and location of the exam 30 days in advance. Students must be enrolled in the university during the semester an examination is taken.

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submission of an approved program of study.

Candidacy Examinations

All PhD candidates will be required to complete two examinations.

Please note that there may be variations in length of exam time and content based on the respective requirements of each track.

- Research in the Specialization—8-hour written examination.
- Specialization—3-hour oral examination.

Independent Learning

The dissertation satisfies the independent learning requirement.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.
In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree in a closely related field and master's level competency in educational research and statistics.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Goal statement.
- Resumé/vita reflecting relevant experience.
- Writing sample.

Education PhD, Higher Education Track

Track Description

The Higher Education track in the Education PhD program is designed for applicants who have extensive experience as administrators or staff in postsecondary institutions who want to pursue careers as scholars and leaders.

A doctoral degree in this track will broaden the analytical skills necessary to contribute to the advancement of the field of higher education through research, administration and teaching. The students in this program are considered future leaders interested in intensive study of the organizational and policy issues influencing the diverse sector comprising contemporary American postsecondary education.

Curriculum

The Higher Education track in the Education PhD program requires 75 credit hours beyond the master's degree. The curriculum includes 24 credit hours of core courses, 27 credit hours of specialization courses, and 24 credit hours of dissertation.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Master's Degree

Required Courses: 51 Credit Hours

Core: 24 Credit Hours

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from group B:

Specialization: 27 Credit Hours

Group C

- EDH 7207 - Curriculum, Instruction, and Distance Learning in Higher Education 3 Credit Hours
- EDH 7366 - Assessment Practices in Higher Education 3 Credit Hours
- EDH 7208 - International Perspectives of Higher Education 3 Credit Hours

Candidacy Examination: 0 Credit Hours
(Required for Advancement to Candidacy [Dissertation hours])

Candidacy examinations will be scheduled near the tenth week of the fall and spring semesters; summer exams will be scheduled for the sixth week of the term. The exams are:

- Part 1. Written examination: Higher education (five hours)
- Part 2. Written examination: Area of specialization (three hours)
- Part 3. Oral examination (one hour)

Evidence of the following are required to be eligible to complete the doctoral comprehensive examination in the Education PhD program, Higher Education track:

- Currently enrolled in the university during the semester any comprehensive examination is taken.
- Submission of an approved program of study (overall GPA 3.0 or greater on all graduate work).
- Completion of most course work. (Students may only take exams when only 2-3 semesters of course work remain. This statement does not refer to dissertation hours.)
- In consultation with program faculty, the dissertation advisory committee is formed, paperwork filed, and approved. (Committee consists of four members: a minimum of three approved CEDHP graduate faculty and one approved graduate faculty scholar or CEDHP faculty.)
- Submission of an approved doctoral comprehensive examination application by the stated deadline.
- Fulfill any program deadlines for submitting comprehensive examination content-related materials (topics, questions, etc.) to the program coordinator by the stated deadline. (See program website for details HEPS: http://education.ucf.edu/highered/).
Candidacy

Candidacy is the stage of doctoral studies when students focus exclusively on planning, researching and writing their proposal and dissertation. To enter candidacy for the Education Ph.D. program, Higher Education & Policy Studies track, students must have an overall 3.0 GPS on all graduate work included in the planned program and pass all required examinations. In addition, evidence of the following are required to be admitted to candidacy and enroll in dissertation hours at least one week before the first day of classes for which the students wishes to enroll in dissertation hours:

- Submission of an approved program of study.
- Completion of all course work, except for dissertation hours.
- Successful completion of all parts of the candidacy examinations.
- In consultation with program faculty, the dissertation advisory committee is formed, paperwork filed, and approved. (Committee consists of four members: a minimum of three approved CEDHP graduate faculty and one approved graduate faculty scholar or CEDHP faculty.)

Note: Once students enter Candidacy, they must enroll in a minimum of three dissertation hours (see below) every semester (including summers), until they graduate from the program.

Dissertation: 24 Credit Hours

Registration for dissertation hours is not permitted until the student is admitted to Candidacy.

Doctoral students must work with their doctoral adviser/major professor to prepare a proposal and present and defend the proposal to the dissertation committee. Once the proposal is completed and approval is secured from the UCF Institutional Review Board (IRB), students conduct research and submit and defend the final research dissertation to their dissertation committee.

Required Documentation during Dissertation Stage

All items listed are necessary to fulfill the requirements to graduate.

- Application to Defend Dissertation Proposal
- Dissertation Proposal Approval
- Application for IRB Approval of Research
- Defense Dissertation Announcement
- Dissertation Approval
- Application to Graduate

- All necessary requirements of the College of Graduate Studies for graduation

Independent Learning

The dissertation satisfies the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- Evidence of a minimum of one year full-time or two years part-time professional higher education work experience. Evidence may include, but not be limited to, any one of the following: work experience listed on the resume/CV with confirmation email/telephone, letter of reference, or copies of annual reviews, etc. (Please note that graduate assistantships, teaching assistantships, internships and practica do not fulfill this requirement.)
- One official transcript (in a sealed envelope) from each college/university attended.
- Minimum GPA of 3.0 (on 4.0 scale) in the last 60 credit hours of undergraduate degree.
- Minimum GPA of 3.0 (on 4.0 scale) for all graduate work at the time of application.
- A master's degree in a closely related field from a regionally accredited institution.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation (electronic or hard copy).
- Goal statement. (Describe the following: preparedness for the program, career goals related to program, and potential area of research interest in the program.)
- Resumé/CV.
- Submit one of the following writing samples: research paper, journal article, grant proposal, policy analysis, or program evaluation.

Education PhD, Mathematics Education Track

Track Description

The Mathematics Education track in the Education PhD program is designed to prepare mathematics educators for various career options, including training educators, teaching postsecondary mathematics, and conducting research in mathematics education.

Doctoral students in the track engage in undergraduate teaching, participate in research activities with faculty, experience internships, and interact with the nationally acclaimed Lockheed Martin/UCF Teaching Academy for Mathematics and Science.

Curriculum

The Mathematics Education track in the Education PhD program requires a minimum of 72 credit hours beyond the master's degree. Students must complete 24 credit hours of core courses, 9 credit hours of specialization courses, 12 credit hours of electives, 3 credit hours of internship, and 24 credit hours of dissertation. All students must also complete the candidacy examination.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Master's Degree

Required Courses: 33 Credit Hours

Core: 24 Credit Hours

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from group B:
Group A
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Specialization: 9 Credit Hours
- MAE 7640 - History of Mathematics Education 3 Credit Hours
- MAE 7795 - Seminar on Research in Mathematics Education 3 Credit Hours

Elective Courses: 12 Credit Hours
- Course work in elementary mathematics education 3 Credit Hours
- Course work in secondary mathematics education 3 Credit Hours
- Course work in mathematics or mathematics education 6 Credit Hours

Dissertation: 24 Credit Hours
Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee.
- MAE 7980 - Dissertation Research 24 Credit Hours minimum

Internship: 3 Credit Hours
- MAE 7945 - Internship in Mathematics Education 3 Credit Hours minimum

Candidacy
To enter candidacy for the PhD, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required examinations. Examinations will be scheduled by the student and major adviser. The associate dean for graduate studies and research must be notified of the date and location of the exam 30 days in advance. Students must be enrolled in the university during the semester an examination is taken.

The following are required to be admitted to candidacy and enroll in dissertation hours:
- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submission of an approved program of study.

Candidacy Examinations
All PhD candidates will be required to complete two examinations.

Please note that there may be variations in length of exam time and content based on the respective requirements of each track.
- Research in the Specialization—8-hour written examination.
- Specialization—3-hour oral examination.
Independent Learning

The dissertation satisfies the independent learning requirement.

Application Requirements

Education PhD, Methodology, Measurement and Analysis Track

Track Description

The Methodology, Measurement, and Analysis track in the Education PhD program is designed to prepare methodologists in education, the social sciences, and other human sciences for either the professoriate or practice including diverse quantitative and qualitative areas such as statistical consulting and data analytic fields, psychometrics, and program evaluation.

Four major areas are encompassed in the Methodology, Measurement, and Analysis program: quantitative research, qualitative research, measurement, and program evaluation.

Curriculum

The Methodology, Measurement and Analysis track in the Education PhD program requires a minimum of 75 credit hours beyond the master's degree. Students must complete 24 credit hours of core courses, 18 credit hours of specialization courses, 6 credit hours of electives, 3 credit hours of internship, and 24 credit hours of dissertation. All students must also complete the candidacy examination.
Total Credit Hours Required: 75 Credit Hours Minimum beyond the Master's Degree

Required Courses: 42 Credit Hours

Core: 24 Credit Hours

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from group B:

Group A

- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Specialization: 18 Credit Hours

- EDF 7427 - Psychometrics 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7476 - Advanced Research Methods 3 Credit Hours
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours

Electives: 6 Credit Hours

- EDF 6447 - Development and Validation of Educational Tests and Measures 3 Credit Hours
- EDF 6464 - Mixed Methods for Evaluation in Educational Settings 3 Credit Hours
- EDF 6486 - Research Design in Education 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDG 6285 - Evaluation of School Programs 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7479 - Applications of Technology in Qualitative Research: Data, Organization, and Analysis 3 Credit Hours

Dissertation: 24 Credit Hours

Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee.
• EDF 7980 - Dissertation Research 24 Credit Hours minimum

Internship: 3 Credit Hours

• EDF 7XXX Internship 3 Credit Hours

Candidacy

To enter candidacy for the PhD, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required examinations. Examinations will be scheduled by the student and major adviser. The associate dean for graduate studies and research must be notified of the date and location of the exam 30 days in advance. Students must be enrolled in the university during the semester an examination is taken.

The following are required to be admitted to candidacy and enroll in dissertation hours:

• Completion of all course work, except for dissertation hours.
• Successful completion of the candidacy examination.
• Successful defense of the written dissertation proposal.
• The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
• Submittal of an approved program of study.

Candidacy Examinations

All PhD candidates will be required to complete two examinations.

Please note that there may be variations in length of exam time and content based on the respective requirements of each track.

• Research in the Specialization—8-hour written examination.
• Specialization—3-hour oral examination.

Independent Learning

The dissertation satisfies the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

• One official transcript (in a sealed envelope) from each college/university attended.
• A master's degree in a closely related field.
• Official, competitive GRE score taken within the last five years.
• Three letters of recommendation.
• Goal statement.
• Résumé.
• Writing Sample.
• Interview.

Education PhD, Reading Education Track

Track Description

The Reading Education track in the Education PhD program is designed to provide further education for those aspiring to work in the area of education at the post-secondary level (four-year college and/or research university) or as a lead teacher/resource teacher for a school district. The program assumes prior study in reading education.

The program provides for an area of advanced study in the field of reading and a concentration in a closely related field. The program includes a strong research base through the research core and specialization course work and an internship during which a candidate gains professorial experience.

Students are required to have the equivalent of the Master of Education in Reading degree, 21 hours of graduate reading education credit, prior to entering the program. In the event that a student does not have 21 hours of graduate reading education credit, the student can be admitted to the program, but will be required to complete the 21 hours in addition to the required program hours.

Curriculum

The Reading Education track in the Education PhD program requires a minimum of 78 credit hours beyond the master's degree. Students must complete 24 credit hours of core courses, 15 credit hours of specialization courses, 9 credit hours of electives, 3-6 credit hours of internship, and 24 credit hours of dissertation. All students must also complete the candidacy examination.

Total Credit Hours Required: 78 Credit Hours Minimum beyond the Master's Degree

Required Courses: 39 Credit Hours

Core: 24 Credit Hours

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
  - EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from group B:

Group A

- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Group B

- IDS 7938 - Research Cluster Seminar 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
• EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
• EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
• EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
• SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Specialization: 15 Credit Hours

• RED 7797 - Theoretical Processes of Reading Comprehension 3 Credit Hours
• RED 7743 - Reading and Writing Processes 3 Credit Hours
• RED 7648 - Analysis and Evaluation of Trends and Issues in Literacy Education 3 Credit Hours
• RED 7745 - Research in Reading Education Seminar 3 Credit Hours
• RED 7697 - Literacy for the Twenty-First Century 3 Credit Hours

Elective Courses: 9 Credit Hours

Students choose a minimum of 9 credit hours of elective courses from a concentration in a related field, such as Communication Sciences and Disorders, Exceptional Student Education, TESOL, Language Arts Education, Children's/Adolescent Literature.

Dissertation: 24 Credit Hours

Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present to the dissertation committee, and defend the final research submission with the dissertation committee.

• RED 7980 - Dissertation Research 24 Credit Hours minimum

Internship: 3-6 Credit Hours

• RED 7947 - Internship in Reading Education 3 Credit Hours (repeat 1-2 times)

Candidacy

To enter candidacy for the PhD, students must have an overall 3.0 grade point average on all graduate work included in the planned program and pass all required examinations. Examinations will be scheduled by the student and major adviser. The associate dean for graduate studies and research must be notified of the date and location of the exam 30 days in advance. Students must be enrolled in the university during the semester an examination is taken.

The following are required to be admitted to candidacy and enroll in dissertation hours:

• Completion of all course work, except for dissertation hours.
• Successful completion of the candidacy examination.
• Successful defense of the written dissertation proposal.
• The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
• Submission of an approved program of study.

Candidacy Examinations

All PhD candidates will be required to complete two examinations.

• Research in the Specialization—8-hour written examination.
• Specialization—3-hour oral examination.

Independent Learning

The dissertations fulfills the independent learning requirement.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

• One official transcript (in a sealed envelope) from each college/university attended.
• A master's degree in a related field of study, including one Graduate Curriculum course, and master's level competency in educational research and statistics.
• A minimum of 21 credit hours of graduate reading education courses.
• Official, competitive GRE score taken within the last five years.
• Three letters of recommendation.
Goal statement.
• Resumé.
• Writing sample.
• Interview.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Education PhD, Science Education Track

Track Description

This Science Education track in the Education PhD program is designed to prepare science educators for various career options, including training science teachers, teaching postsecondary science, and conducting research in science education.

Doctoral students in this track engage in research activities with an interdisciplinary faculty, experience internships, and interact with the nationally acclaimed Lockheed Martin/UCF Teaching Academy for Mathematics and Science.

Curriculum

The Science Education track in the Education PhD program requires a minimum of 78 credit hours beyond the master's degree. Students must complete 24 credit hours of core courses, 15 credit hours of specialization courses, 9 credit hours of electives, 3-6 credit hours of internship, and 24 credit hours of dissertation. All students must also complete the candidacy examination.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Master's Degree

Required Courses: 42 Credit Hours

Core: 24 Credit Hours

• IDS 7501 - Issues and Research in Education 3 Credit Hours
• IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
• EDF 7475 - Qualitative Research in Education 3 Credit Hours
• EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
• EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
• IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
Group A

- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Group B

- IDS 7938 - Research Cluster Seminar 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Specialization: 18 Credit Hours

- SCE 7746 - Teaching Theory and Research in Science Education 3 Credit Hours
- SCE 7145 - Design of Post Secondary Science Curriculum 3 Credit Hours
- SCE 7242 - Assessment in Science Teaching, Learning and Research 3 Credit Hours
- SCE 7864 - Science Technology and Society 3 Credit Hours
- SCE 7935 - Seminar--Professional Writing/Grants in Science Education 3 Credit Hours
- SCE 7146 - Professional Issues in Science Education 3 Credit Hours

Electives: 3 Credit Hours

- Additional specialization electives 3 Credit Hours minimum

Dissertation: 24 Credit Hours

Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee.

- SCE 7980 - Doctoral Dissertation 0-12 Credit Hours

Internship: 6 Credit Hours

- SCE 7942 - Internship/Practicum in Science Education 3 Credit Hours (K-12 or Community College) (6 credit hours minimum: 2 semesters, 3 hours each of internship)

Candidacy

To enter candidacy for the PhD, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required examinations. Examinations will be scheduled by the student and major adviser. The associate dean for graduate studies and research must be notified of the date and location of the exam 30 days in advance. Students must be enrolled in the university during the semester an examination is taken.

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submission of an approved program of study.
Candidacy Examinations

All PhD candidates will be required to complete two examinations.

Please note that there may be variations in length of exam time and content based on the respective requirements of each track.

- Research in the Specialization—8-hour written examination.
- Specialization—3-hour oral examination.

Independent Learning

The dissertation serves as the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree in a closely related field.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Goal statement.
- Resumé.
- Interview.

Education PhD, Social Science Education Track

Track Description

The Social Science Education track in the Education PhD program is designed to prepare social science educators for successful careers in research and teaching.

The program assists students in providing options to careers in preparing social science teachers, teaching post-secondary social science (history, political science, economics, etc.), and conducting research activities in social science education. Doctoral students in the track engage in research activities with
an interdisciplinary faculty, experience internships, and interact with various social science educators and social science experts. Throughout this program, students are mentored by experienced and successful university social science education faculty. Based on the students' previous graduate course work, students may be required to complete additional graduate social science education (SSE) courses and/or graduate content courses beyond the minimum requirements.

Curriculum

The Social Science Education track in the Education PhD program requires a minimum of 69 credit hours beyond the master's degree. Students must complete 24 credit hours of core courses, 18 credit hours of specialization courses, 3 credit hours of internship, and 24 credit hours of dissertation. All students must also complete the candidacy examination.

Total Credit Hours Required: 69 Credit Hours Minimum beyond the Master's Degree

Required Courses: 42 Credit Hours

Core: 24 Credit Hours

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from Group A
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from Group B

Group A

- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Group B

- IDS 7938 - Research Cluster Seminar 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Specialization: 18 Credit Hours

- SSE 7740 - History of Social Studies Education 3 Credit Hours
- SSE 7796 - Research in Social Science Education Seminar 3 Credit Hours
- SSE 7797 - Content and Program Analysis in Social Science Education 3 Credit Hours
- SSE 7700 - Critical Issues in Social Studies Teacher Education 3 Credit Hours
- Social Science Education (SSE) Electives 6 Credit Hours; must be approved by adviser

Dissertation: 24 Credit Hours

Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee.

- SSE 7980 - Dissertation Research 24 Credit Hours minimum
Internship: 3 Credit Hours

- SSE 7947 - Internship in Social Science Education 3 Credit Hours

Candidacy

To enter candidacy for the PhD, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required examinations. Examinations will be scheduled by the student and major adviser. The associate dean for graduate studies and research must be notified of the date and location of the exam 30 days in advance. Students must be enrolled in the university during the semester an examination is taken.

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submission of an approved program of study.

Candidacy Examinations

All PhD candidates will be required to complete two examinations.

Please note there may be variations in length of exam time and content based upon the respective requirements of each track.

- Research in the Specialization—8-hour written examination.
- Specialization—3-hour oral examination.

Independent Learning

The dissertation fulfills the independent learning requirement.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree in a closely related field.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Goal statement / letter of intent.
- Resumé/vita reflecting relevant experience.
- Writing sample.

Eligibility for admission to a doctoral program should be limited to superior students who have demonstrated intellectual ability, high achievement, and adequate preparation for advanced study and research in a chosen field.

Education PhD, Teaching English to Speakers of Other Languages Track

Track Description

The University of Central Florida is uniquely positioned to meet the critical need for advanced degrees in TESOL. Faculty from the College of Education and Human Performance and the College of Arts and Humanities approach TESOL issues from multiple perspectives and collaborate in teaching and research. Combining the interdisciplinary expertise of faculty in two Colleges, the PhD Track in TESOL offers students in-depth experiences in the research, theory, and practice of TESOL, as well as flexibility in selecting a complementary cognate that meets their professional goals.

Curriculum

The Teaching English to Speakers of Other Languages (TESOL) track in the Education PhD program requires at least 72 credit hours of study beyond the master's degree. The curriculum includes 24 credit hours of core courses, 15 credit hours of TESOL specialization courses, 9 credit hours of cognate courses, and 24 credit hours of dissertation. All students must also complete the candidacy examination.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Master's Degree

Prerequisites

- TSL 6250 - Applied Linguistics in ESOL 3 Credit Hours

Required Courses: 48 Credit Hours

Core: 24 Credit Hours

- IDS 7501 - Issues and Research in Education 3 Credit Hours
- IDS 7500 - Seminar in Educational Research 1-3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- IDS 7502 - Case Studies in Research Design 3 Credit Hours or one of the approved research electives from group A:
  - EDF 7406 - Multivariate Statistics in Education 3 Credit Hours or one of the approved research electives from group B:

Group A

- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)
Group B

- IDS 7938 - Research Cluster Seminar 3 Credit Hours
- EDF 7405 - Quantitative Methods II 3 Credit Hours
- EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
- EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
- EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
- EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
- EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours
- SPA 7495 - Doctoral Seminar II: Spoken and Written Language Disorders 3 Credit Hours (Communication Sciences Track students only)

Specialization: 15 Credit Hours

Students are required to take the following five courses:

- TSL 6643 - Diachronic Analysis of Second Language Acquisition Processes 3 Credit Hours
- TSL 6379 - Second Language Literacy 3 Credit Hours
- TSL 6600 - Second Language Vocabulary Acquisition 3 Credit Hours
- TSL 6252 - Sociolinguistics for ESOL 3 Credit Hours
- TSL 7006 - Second Language Teacher Preparation 3 Credit Hours

Cognate: 9 Credit Hours

A minimum of 9 credit hours of cognate courses must be approved by the adviser and graduate program director. Possible cognates include Communication Sciences and Disorders, Community College Teaching, Exceptional Education, Global and Comparative Education, Multicultural Education, Instructional Technology, Program Administration, Reading, and other related areas.

Dissertation: 24 Credit Hours

Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee.

- TSL 7980 - Dissertation Research VAR Credit Hours

Examinations

A qualifying examination will be required during the first year of study as an intake, diagnostic tool to determine student proficiency in TESOL. A written candidacy examination will be required to be admitted to candidacy and will normally occur at the completion of course work.

Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submission of an approved program of study.

Additional Program Requirement:

Students must have completed a minimum of two college-level courses in a foreign language or basic proficiency in a foreign language as measured by the American Council on the Teaching of Foreign Languages (ACTFL) oral proficiency interview (OPI) or other assessment approved by the program faculty before completion of 36 hours of study. Non-native speakers of English may use their native language to meet this requirement. This requirement may be satisfied prior to admission but must be satisfied prior to candidacy.

Independent Learning

The dissertation satisfies the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
A master's degree in a closely related field.
Official, competitive GRE score taken within the last five years.
Three letters of recommendation no more than one year old from people who can attest to your potential and ability for doctoral level work.
Goal statement.
Resume.
A master's thesis or two original papers related to graduate coursework.

Educational Leadership EdD

Program Description

The Educational Leadership EdD program is designed to prepare educators for leadership positions at all levels of educational administration from PK-12 to higher education, as well as leadership positions in various educational agencies or organizations. As well, the program prepares students for positions in teaching and research. As a professional program, studies are flexible and diverse, allowing for individual needs to be met. While a thorough knowledge of the field of educational leadership is expected of all doctoral students, individuals will also gain expertise in at least one area of specialization. Specialization knowledge is obtained through course work, independent and directed studies, research, and field experiences. Educational Leadership doctoral programs are designed to broaden administrative knowledge and skills of practicing professionals.

The Higher Education track is appropriate for students who are committed to advancing their leadership capabilities in college and university settings. The Program of Study has been designed to broaden the administrative knowledge and skills of higher education professionals who bring to the program a prior discipline specialization. Students admitted to the program are typically employed in teaching, research and administrative positions in universities, colleges, community colleges and education related institutions and organizations. The Higher Education track requires completion of a dissertation.

The Executive track in Educational Leadership EdD. The Executive EdD is appropriate for students who are committed to advancing their leadership opportunities and capabilities in PK-12 and other organizational settings. Students admitted to the program are typically employed in teaching and administrative positions in elementary and secondary schools, as well as other educational agencies and organizations. Focus areas include: political and organizational theory, leadership, systems theory, planning and evaluation, school law and finance, data-based decision making, communications, instructional leadership, human resource management, program analysis and evaluation. Educational Leadership certification is not included in this program.
The program is taught in a lock-step cohort-based format to be convenient to those who are working in teaching and administrative positions. The Executive track requires completion of a client-based field study.

Curriculum

Students must choose one of either two tracks in the Educational Leadership program: the Executive Track or Higher Education Track. The Executive track requires a minimum of 54 credit hours beyond the master's degree, including 6 credit hours of a client-based Doctoral Field Study and at least 15 credit hours of Dissertation in Practice. The Higher Education track requires 63 minimum credit hours based on evidence of a master's degree with an emphasis related to the study of higher education as a field of inquiry.

Total Credit Hours Required: 54-63 Credit Hours Minimum beyond the Master's Degree

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Educational Leadership EdD, Executive Track

Track Description

The Executive track in the Educational Leadership EdD program is designed to prepare educators for leadership positions in PK-12 organizations and other educational organizations. The program prepares students for professional practice as scholarly practitioners.

The Executive EdD is appropriate for students who are committed to advancing their leadership opportunities and capabilities in PK-12 and other organizational settings. Students admitted to the program are typically employed in teaching and administrative positions in elementary and secondary schools, as well as other educational agencies and organizations. Focus areas include: political and organizational theory, leadership, systems theory, planning and evaluation, school law and finance, data-based decision making, communications, instructional leadership, human resource management, program analysis and evaluation Educational Leadership certification is not included in this program.

Curriculum

The Executive track requires a minimum of 54 credit hours beyond the master's degree, including 6 credit hours of a client-based Doctoral Field Study and at least 15 credit hours of Dissertation in Practice. The plan of study for the Executive track in the Educational Leadership EdD is arranged as a lock-step cohort-based program to facilitate scheduling for those who
are employed in teaching and administrative positions. Details about this program are found in the Executive Handbook.

**Total Credit Hours Required:** 54 Credit Hours Minimum beyond the Master's Degree

**Required Courses: 39 Credit Hours**

**Core: 24 Credit Hours**

- EDA 7101 - Organizational Theory in Education 3 Credit Hours
- EDA 7192 - Educational Leadership 3 Credit Hours
- EDA 7195 - Politics, Governance, and Financing of Educational Organizations 3 Credit Hours
- EDA 7205 - Planning, Research, and Evaluation Systems in Educational Administration 3 Credit Hours
- EDA 7225 - Advanced Legal Studies in Education 3 Credit Hours
- EDA 7215 - Community Outreach for Educational Leaders 3 Credit Hours
- EDA 7193 - Instructional Leadership 3 Credit Hours
- EDA 7224 - Human Resource Development in Educational Organizations 3 Credit Hours

**Research Methods: 9 Credit Hours**

- EDF 7471 - Research in Educational Leadership I 3 Credit Hours
- EDF 7407 - Research in Educational Leadership 2 3 Credit Hours
- EDF 7408 - Research in Educational Leadership 3 3 Credit Hours

**Doctoral Field Study: 6 Credit Hours**

Doctoral students will conduct a dissertation in practice on an issue or problem of practice during the last four semesters of the program. The proposal is developed during the first 3 semester hours of EDA 7943 and implemented during the second semester.

- EDA 7943 - Field Project in Educational Leadership 3-6 Credit Hours

**Dissertation in Practice: 15 Credit Hours**

In EDA 7987 - Dissertation in Practice students conduct scholarly research on a complex problem of practice in an education organization. The dissertation in practice will have an introduction and its essential components, literature review, methodology, findings, and discussion and conclusions.

- EDA 7987 - Dissertation in Practice 1-6 Credit Hours
  (15 credit hours minimum)

**Candidacy**

To enter candidacy for the Executive track in the Educational Leadership EdD program, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required milestones.

The following are required to be admitted to candidacy:

- Completion of an on-demand writing whitepaper to be completed prior to summer semester Year 1.
- Completion of a dissertation in practice proposal accepted during the summer semester of Year 2.
- Completion of all course work, except for the Doctoral Field Study.
- Submission of an approved program of study.

**Independent Learning**

The doctoral field study provides the independent learning experience by having students a study on an issue or problem of practice in education.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Master's degree in a closely related field.
- Official, competitive GRE score, taken within the last five years.
- Three letters of recommendation.
- Resume.
- Goal statement.

Admission to the program is once per year, fall term only, with I

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Educational Leadership EdD, Higher Education Track

Track Description

The Higher Education track in the Educational Leadership EdD program is appropriate for students who are committed to advancing their leadership capabilities in college and university settings.

The Higher Education track in the Educational Leadership EdD program has been designed to broaden the administrative knowledge and skills of higher education professionals who bring to the program a prior discipline specialization. Students admitted to the program are typically employed in teaching, research and administrative positions in community colleges and universities or education related agencies.

Curriculum

Students pursuing the Higher Education track in the Educational Leadership EdD program are typically employed in two- or four-year colleges or universities. Their programs of study require them to complete a minimum of 36 credit hours of specified core and specialization courses plus two elective courses. Students must also complete 12 credit hours in research methods and 15 credit hours of dissertation. The 63 minimum credit hours is required beyond the master's degree, with an emphasis related to the study of higher education as a field of inquiry. Details about the administration of this program can be found in the Higher Education Handbook.

Total Credit Hours Required: 63 Credit Hours Minimum beyond the Master's Degree

Required Courses: 36 Credit Hours

Core: 18 Credit Hours

- EDH 6046 - Diversity in Higher Education 3 Credit Hours
- EDH 7040 - Research on the College Student 3 Credit Hours
- EDH 7401 - Higher Education and Public Policy 3 Credit Hours
- EDH 7631 - Managing change, conflict, and stability in Higher Education 3 Credit Hours
- EDH 7934 - Higher Ed Literature, Research, and Professional Writing Seminar 3 Credit Hours
• EDH 7665 - Higher Education Leadership 3 Credit Hours

Specialization: 12 Credit Hours

• EDH 7405 - Legal Issues in Higher Education 3 Credit Hours
• EDH 7066 - Higher Education: Philosophical/Historical Perspectives 3 Credit Hours
• EDH 7508 - Finance in Higher Education 3 Credit Hours
• EDH 7636 - Organizational Theory and Practices in Higher Education 3 Credit Hours

Research Methods: 12 Credit Hours

Students take these three required research courses:

• EDF 6401 - Statistics for Educational Data 3 Credit Hours
• EDF 7403 - Quantitative Foundations of Educational Research 3 Credit Hours
• EDF 7475 - Qualitative Research in Education 3 Credit Hours

Choose a fourth research course from among those listed below:

• EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
• EDF 7XXX - Mixed Methods Research in Education 3 Credit Hours
• EDF 7405 - Quantitative Methods II 3 Credit Hours
• EDF 7406 - Multivariate Statistics in Education 3 Credit Hours
• EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education 3 Credit Hours
• EDF 7415 - Latent Variable Modeling In Education 3 Credit Hours
• EDF 7473 - Ethnography in Educational Settings 3 Credit Hours
• EDF 7474 - Multilevel Data Analysis In Education 3 Credit Hours
• EDF 7479 - Applications of Technology in Qualitative Resrch: Data, Organztn, and Analysis 3 Credit Hours
• EDF 7488 - Monte Carlo Simulation Research in Education 3 Credit Hours

Elective Courses: 6 Credit Hours

Choose only two courses from the list below.

• EDH 6047 - Theories of College Student Development 3 Credit Hours
• EDH 6105 - Retention Strategies in Colleges and Universities 3 Credit Hours
• EDH 7366 - Assessment Practices in Higher Education 3 Credit Hours
• EDH 7409 - Legal Issues in Higher Education II 3 Credit Hours
• EDH 7638 - Advanced Seminar in Higher Education 3 Credit Hours
• EDH 7208 - International Perspectives of Higher Education 3 Credit Hours
• EDH 7207 - Curriculum, Instruction, and Distance Learning in Higher Education 3 Credit Hours

Candidacy Examination: 0 Credit Hours

(Required for Advancement to Candidacy [Dissertation hours])

Candidacy examinations will be scheduled near the tenth week of the fall and spring semesters; summer exams will be scheduled for the sixth week of the term. The exams are:

• Part 1. Written examination: Higher education (five hours)
• Part 2. Written examination: Area of specialization (three hours)
• Part 3. Oral examination (one hour)
• Evidence of the following are required to be eligible to complete the doctoral comprehensive examination in the Educational Leadership EdD program, Higher Education track:
  • Currently enrolled in the university during the semester any comprehensive examination is taken.
  • Submission of an approved program of study (overall GPA 3.0 or greater on all graduate work).
  • Completion of most course work. (Students may only take exams when only 2-3 semesters of course work remain. This statement does not refer to dissertation hours.)
  • In consultation with program faculty, the dissertation advisory committee is formed, paperwork filed, and approved. (Committee consists of four members: a minimum of three approved CEDHP graduate faculty and one approved graduate faculty scholar or CEDHP faculty.)
  • Submission of an approved doctoral comprehensive examination application by the stated deadline.
  • Fulfill any program deadlines for submitting comprehensive examination content-related materials
Candidacy

Candidacy is the stage of doctoral studies when students focus exclusively on planning, researching and writing their proposal and dissertation. To enter candidacy for the Educational Leadership EdD program, Higher Education track, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required examinations. In addition, evidence of the following are required to be admitted to candidacy and enroll in dissertation hours at least one week before the first day of classes for which the student wishes to enroll in dissertation hours:

- Submission of an approved program of study.
- Successful completion of all course work, except for dissertation hours.
- Successful completion of all parts of the candidacy examination.
- In consultation with program faculty, the dissertation advisory committee is formed, paperwork filed, and approved. (Committee consists of four members: a minimum of three approved CEDHP graduate faculty and one approved graduate faculty scholar or CEDHP faculty.)

Note: Once students enter Candidacy, they must enroll in a minimum of three dissertation hours (EDH 7980) every semester (including summers), until they graduate from the program.

Dissertation: 15 Credit Hours

Registration for dissertation hours is not permitted until the student is admitted to Candidacy.

Doctoral students must work with their doctoral adviser/major professor to prepare a proposal and present and defend the proposal to the dissertation committee. Once the proposal is completed and approval is secured from the UCF Institutional Review Board (IRB), students conduct research and submit and defend the final research dissertation to their dissertation committee.

- **EDH 7980 - Dissertation VAR Credit Hours** (15 credit hours minimum)

Required Documentation During Dissertation Stage:

All items listed are necessary to fulfill the requirements to graduate.

- Application to Defend Dissertation Proposal
- Dissertation Proposal Approval
- Application for IRB Approval of Research
- Defense Dissertation Announcement
- Dissertation Approval
- Application to Graduate
- All necessary requirements of the College of Graduate Studies for graduation

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Minimum GPA of 3.0 (on 4.0 scale) in the last 60 credit hours of undergraduate degree.
- Master's degree from a regionally accredited institution.
- Minimum GPA of 3.0 (on 4.0 scale) for all graduate work at the time of application.
- Official, competitive GRE score, taken within the last five years.
- Three letters of recommendation (electronic or hard copy).
- Resumé/CV.
- Goal statement. (Describe the following: preparedness for the program, career goals related to the program, and potential area of research interest in the program.)
- Evidence of a minimum of one year full-time or two years part-time professional higher education work experience. Evidence may include, but not be limited to, any one of the following: work experience listed on the resume/CV with confirmation email/telephone, letter of reference, or copies of annual reviews, etc. (Please note that graduate assistantships, teaching assistantships, internships and practica do not fulfill this requirement.)
- An interview might be required.

Electrical Engineering PhD

Program Description

The Electrical Engineering PhD (one of the three PhD programs offered by the School of EECS) prepares students for careers in research or academia with specializations including Communications, Digital Signal Processing/Image Processing, Controls and Robotics, Electromagnetics, Electro-Optics, Photonics, Power Electronics and Electronics, Solid-State/Microelectronics, and VLSI Design.

The specific research that each one of the EECS faculty conduct can be found at the School of EECS website (www.eecs.ucf.edu).

The Doctor of Philosophy in Electrical Engineering is primarily intended for students with a master's degree in Electrical Engineering or a closely related discipline who wish to pursue a career in research or academia. Specializations include Communications, Digital Signal Processing/Image Processing, Controls and Robotics, Electromagnetics, Electro-Optics, Photonics, Power Electronics and Electronics, and Solid-State/Microelectronics.

Research interests of the Electrical Engineering faculty include antennas, microwave and millimeter circuits/devices, communication systems, digital signal/image processing, power electronics, electronic circuits, IFF devices, electromagnetic theory, radar and microwave remote sensing, speech processing, VLSI design, spread spectrum systems, SAW and ACT devices, spectral estimation, solid state device modeling and computer-aided design (CAD) techniques, communication networks, integrated services digital networks, neural networks, systems and controls, robotics, robust control, computer control, microelectronics, semiconductors, thin films, power system stability, bipolar device modeling, solid state lasers, optical propagation, fiber optics, optical signal processing, laser-induced damage, optical testing, diffractive optics, phase conjunction, infrared detectors, Fourier optics, lens design, and nonlinear optics.

Curriculum

The Electrical Engineering PhD degree requires a minimum of 72 credit hours beyond the bachelor's degree. Of these 72 hours, a minimum of 36 credit hours must be formal coursework, exclusive of independent study coursework. A minimum of 15 credit hours with up to a maximum of 24 credit hours of dissertation hours can be credited toward the degree. No more than 12 credit hours of Independent Study are allowed. The
remaining hours can be a combination of formal coursework and/or pre-candidacy doctoral research.

**Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree**

Formal coursework required is 36 credit hours, exclusive of independent study and research. A minimum of 15 credit hours of dissertation hours are required. All other credit hours will be determined with a faculty adviser. Students admitted with an earned master's degree may request to have up to 30 of those credit hours counted toward their doctoral program. The student's doctoral adviser in conjunction with the graduate office will determine the precise number of hours to be counted subject to Graduate Studies regulations.

The Program of Study (POS) form must be approved by an adviser in the selected specialization area no later than the end of the second semester after admission. The program of study must meet all the university requirements specified in the graduate catalog. Details about this program are located in the Electrical Engineering PhD Handbook.

**Articulation Courses**

Undergraduate articulation courses are required to be completed prior to admission for students who do not hold a Bachelor of Science degree in Electrical Engineering. In particular, the articulation courses specified below, plus all of the prerequisite string which any of them require, must be completed prior to admission. Grades of "B" or higher must be obtained in each articulation course specified below. Articulation courses are not eligible for inclusion on a graduate Program of Study.

- EEL 3123C Network and Systems
- EEE 3307C Electronics I
- EEL 3470 Electromagnetic Fields
- EEL 3552 Signal Analysis and Communications
- EEE 3350 Semiconductor Devices I

In addition, choose one of the following:

- EEL 3657 Linear Control Systems
- EEE 4309C Electronics II
- EEL 4750 Digital Signal Processing Fundamentals

**Required Courses: 36 Credit Hours**

Suggested courses listed below.

**Elective Courses—12-21 Credit Hours**

- May include formal coursework, directed research hours, doctoral research hours, dissertation research, and no more than 12 credit hours of Independent Study.
- Suggested courses listed below.

**Suggested Courses for Doctoral Program**

The Electrical Engineering Program supports a number of specialization areas. These technical areas are (in alphabetical order): Electromagnetics and Optics (EO), Signal Processing and Systems (SPS), and Micro-Systems and Nano-Systems (MNS). The Micro-Systems and Nano-Systems area covers the typical Electrical Engineering topic areas of Electronics, Power Electronics and Micro-Electronics, while the Signal Processing and Systems area covers the typical electrical topic areas of communications, controls, and signal processing. Please contact your graduate program assistant Nicole Mitchell at nicole@eecs.ucf.edu or 407-823-0378 for a list of faculty within each specialization area.

For each one of these areas there is a suggested list of courses stated below. Students are also allowed to take courses from other specialization areas, but the majority of their courses should be chosen from courses in their specialization area.

**Suggested Courses for Electromagnetics and Optics (EO)**

- EEE 5542 - Random Processes I 3 Credit Hours
- EEE 5557 - Introduction to Radar Systems 3 Credit Hours
- EEL 5437C - Microwave Engineering 4 Credit Hours
- EEL 5439C - RF and Microwave Communications 4 Credit Hours
- EEL 5462C - Antenna Analysis and Design I 3 Credit Hours
- EEL 5462C - Antenna Analysis and Design II 3 Credit Hours
- EEL 6463 - Antenna Analysis and Design III 3 Credit Hours
- EEL 6482 - Electromagnetic Theory I 3 Credit Hours
- EEL 6488 - Electromagnetic Theory II 3 Credit Hours
- EEL 6481 - Numerical Techniques in Electromagnetics 3 Credit Hours
- EEL 6489 - Advanced Topics in Electromagnetics and Microwaves 3 Credit Hours
- EEL 6504 - Communications Systems Design 3 Credit Hours
- EEL 6530 - Communication Theory 3 Credit Hours
- MAP 5426 - Special Functions 3 Credit Hours
- MAP 5435 - Advanced Mathematics for Engineers 3 Credit Hours
- MAP 6424 - Transform Methods 3 Credit Hours
- OSE 5041 - Introduction to Wave Optics 3 Credit Hours
- OSE 5414 - Fundamentals of Optoelectronic Devices 3 Credit Hours
- OSE 6111 - Optical Wave Propagation 3 Credit Hours
- OSE 5115 - Interference and Diffraction 3 Credit Hours
- OSE 6143 - Fiber Optics Communication 3 Credit Hours
- OSE 6225 Radiometry and Detection 3 Credit Hours
- OSE 6211 - Imaging and Optical Systems 3 Credit Hours
- OSE 6445 - Fundamentals of Ultrafast Optics 3 Credit Hours
- OSE 6455C - Photonics Laboratory 3 Credit Hours
- OSE 6615L - Optoelectronic Device Fabrication Laboratory 3 Credit Hours
- OSE 6525 - Laser Engineering 3 Credit Hours

Suggested Courses for Micro-Systems and Nano-Systems (MNS)

- BME 5572 - Biomedical Nanotechnology 3 Credit Hours
- EEL 5245C - Power Electronics 3 Credit Hours
- EEE 5332C - Thin Film Technology 3 Credit Hours
- EEE 5352C - Semiconductor Material and Device Characterization 3 Credit Hours
- EEE 5353 - Semiconductor Device Modeling and Simulation 3 Credit Hours
- EEE 5356C - Fabrication of Solid-State Devices 4 Credit Hours
- EEE 5370 - Operational Amplifiers 3 Credit Hours
- EEE 5378 - CMOS Analog and Digital Circuit Design 3 Credit Hours
- EEE 5390C - Full-Custom VLSI Design 3 Credit Hours
- EEE 5555 - Surface Acoustic Wave Devices and Systems 3 Credit Hours
- EEE 6317 - Power Semiconductor Devices and Integrated Circuits 3 Credit Hours
- EEE 6358 - Advanced Semiconductor Device 1 3 Credit Hours
- EEL 6246 - Power Electronics II 3 Credit Hours
- EEE 6326C - MEMS Fabrication Laboratory 3 Credit Hours
- EEE 6338 - Advanced Topics in Microelectronics 3 Credit Hours
- EEE 6371 - Advanced Electronics I 3 Credit Hours
- EEE 6372 - Advanced Topics in Electronics 3 Credit Hours

Suggested Courses for Signal Processing and Systems (SPS)

- EEE 5513 - Digital Signal Processing Applications 3 Credit Hours
- EEE 5542 - Random Processes I 3 Credit Hours
- EEE 5557 - Introduction to Radar Systems 3 Credit Hours
- EEE 6504 - Adaptive Digital Signal Processing 3 Credit Hours
- EEE 6508 - Advanced Topics in Digital Signal Processing 3 Credit Hours
- EEL 5820 - Image Processing 3 Credit Hours
- EEL 5825 - Pattern Recognition 3 Credit Hours
- EEL 5630 - Digital Control Systems 3 Credit Hours
- EEL 5173 - Linear Systems Theory 3 Credit Hours
- EEL 6504 - Communications Systems Design 3 Credit Hours
- EEL 6530 - Communication Theory 3 Credit Hours
- EEL 6590 - Advanced Topics in Communications 3 Credit Hours
- EEL 6812 - Introduction to Neural Networks 3 Credit Hours
- EEL 6619 - Nonlinear Robust Control and Applications 3 Credit Hours
- EEL 6621 - Nonlinear Control Systems 3 Credit Hours
- EEL 6662 - Advanced Robotics 3 Credit Hours
- EEL 6667 - Planning and Control for Mobile Robotic Systems 3 Credit Hours
- EEL 6671 - Modern and Optimal Control Systems 3 Credit Hours
- EEL 6674 - Optimal Estimation for Control 3 Credit Hours
- EEL 6616 - Adaptive Control 3 Credit Hours
- EEL 6680 - Advanced Topics in Modern Control Systems 3 Credit Hours
- EEL 6683 - Cooperative Control of Networked Autonomous Systems 3 Credit Hours
- EEL 6823 - Image Processing II 3 Credit Hours
- EEL 5669 - Introduction to Robotics and Autonomous Vehicles 3 Credit Hours
- EEL 6026 - Optimization of Engineering Systems 3 Credit Hours
- CAP 5015 Multimedia Compression in the Internet 3 Credit Hours
- CAP 5415 - Computer Vision 3 Credit Hours
- CAP 6419 - 3D Computer Vision 3 Credit Hours
- CAP 6411 - Computer Vision Systems 3 Credit Hours
- CAP 6412 - Advanced Computer Vision 3 Credit Hours

**Dissertation: 15-24 Credit Hours**

- XXX 7980 Dissertation Research (15 credit hours minimum).
- The program will only allow students to complete up to 24 hours of dissertation coursework in XXX 7980.

The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website, www.cecs.ucf.edu/graddefense, at least two weeks before the defense date.

**Qualifying Review**

The Qualifying Review relies on annual appraisals of the student's progress conducted by the student's research/academic adviser and advisory committee, once formed. The student's appraisal template that the adviser completes will assess the student's academic performance (course performance) and research performance. On an annual basis, and based on the completed PhD Student Annual Review template, as well as additional student documentation attached with approval of the adviser, the EECS Graduate Committee will rate the student's performance as "Above Expectation," "At Expectation," or "Below Expectation" toward the completion of the PhD degree.

Students must pass the Qualifying Review no later than the deadline, which is the semester in which they complete 24 credit hours after admission or within two calendar years after admission, whichever occurs later. If a student has passed the Qualifying Review, then the student is eligible to continue PhD studies. However, a student who does not pass the Qualifying Review by the deadline will be dismissed from the degree program and will be given the opportunity to complete a master's degree (if applicable).

**Dissertation Committee**

PhD Dissertation Committees for this degree program must have all of the below characteristics:

- consist of at least five committee members including the committee chair

- the committee chair must be either a Regular Appointment faculty member in EECS or a Secondary-Joint Appointment faculty member in EECS
- at least 50% of committee members (when tabulated including the chair) must be EECS regular faculty
- the majority of committee members must vote in favor of passing for the student to Pass
- in addition to the above, all college and university requirements (such as one member outside of EECS) must be met.

Joint faculty members may serve as committee chairs, but graduate faculty scholars may not serve as committee chairs.

**Candidacy Examination**

After passing the Qualifying Review, students are required to successfully complete the candidacy examination in order to demonstrate readiness for preliminary research in a chosen field of study. This exam is administered by the student's dissertation advisory committee. Preparedness for taking the candidacy examination requires that the student must demonstrate his/her readiness for the PhD program in Electrical Engineering by authoring an accepted journal article or high-quality conference paper. The student must be the first author on this paper and the research advisor must also be an author on this paper to be used for Candidacy. The publication should reflect the work related to the student's PhD research. Candidacy is normally attempted at the completion of required coursework and must be passed before registering for doctoral dissertation hours (EEL 7980). Continuous enrollment in at least 3 hours of doctoral dissertation hours is required once a student starts taking dissertation credits.

**Admission to Candidacy**

The following are required to be admitted to candidacy and enroll in dissertation hours.

- Completion of all required formal coursework, except for dissertation hours.
- Successful completion of the candidacy examination.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submission of an approved program of study.

Signed and well-formed Doctoral Committee Candidacy Status form and associated paperwork (dissertation advisory committee and program of study, etc.) must be submitted to the Electrical and Computer Engineering Graduate Office for processing on or before the last day to defend Dissertation during the semester prior to enrolling in dissertation credits.
Dissertation Proposal Exam

After passing the candidacy examination, the student will write a dissertation proposal and present it to the dissertation advisory committee for approval. The proposal must include a description of the research performed to date and the research planned to be completed for the dissertation. The presentation of a written dissertation proposal must be deemed as passing requirements by the majority of the dissertation committee.

Equipment Fee

Students in the Electrical Engineering PhD program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

Independent Learning

The Independent Learning Requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Bachelor's or Master's degree in Electrical Engineering or a closely related discipline.
- Résumé.
- Statement about educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting applicants into their research programs.

Additional courses may also be required to correct any course deficiencies. Students should contact the graduate program director for further information.

Environmental Engineering PhD

Program Description

The Environmental Engineering PhD program focuses on pollution control, pollution prevention, and the correction of pollution effects on natural and man-made environments preparing students for careers in environmental engineering with consulting firms; with industry; within federal, state, and local governments; and/or in higher education.

The Environmental Engineering PhD program focuses on pollution control, pollution prevention, and the correction of pollution effects on natural and man-made environments. The program is known for its strong faculty research interests. Areas of study include drinking water treatment, astute treatment, solid and hazardous waste management, atmospheric pollution control and modeling, environmental water resources, and storm water management. The program's mission is to prepare students for careers in environmental engineering with consulting firms; with industry; within federal, state, and local governments; and/or in higher education.

The program offers an intensive, individually tailored research program suitable for development of an academic or similar research-oriented career. Graduates of the program will have technical knowledge in critical areas of environmental engineering, critical thinking skills, formed and maintained partnerships with industry, government agencies, and professional organizations, and have developed awareness of the changing environmental needs of society and the global environment.

Curriculum

The Environmental Engineering PhD program is research oriented and requires a minimum of 72 credit hours beyond the bachelor's degree. Thirty of the 72 credit hours can be met with either a nonthesis or thesis MS in Environmental Engineering. This leaves 42 credit hours of which 18 credit hours must be Dissertation and a minimum of 15 credit hours must be formal course work. A maximum of 9 credit hours of Doctoral Research can be used in the doctoral program, which could be replaced by additional formal coursework.

For students not having an MS degree who directly enter the PhD program (BS to PhD), there will be a minimum of 45 credit hours formal coursework (i.e., 30 credit hours identical to the coursework for a nonthesis MS in Environmental Engineering plus a minimum of 15 credit hours course work past the MS). However, unlike MS students, BS to PhD students will be required to take only 4 of the 5 required courses from the nonthesis MS in Environmental Engineering requirements. In addition, these students can enroll for Doctoral Research credit hours during or after their first semester in the program. The 27 credit hours required in addition to the 45 credit hours coursework will be 18 credit hours in Dissertation Research, and a maximum of 9 credit hours in Doctoral Research. Up to 9 credit hours of Doctoral Research can be replaced by additional formal coursework subject to the approval of the PhD adviser and the advisory committee.

For both MS to PhD and BS to PhD students, the program of study must be developed with an advisory committee and meet with departmental approval at the beginning of the PhD program, at which time transfer credit will be evaluated on a course-by-course basis.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree 42 Credit Hours Minimum beyond the Master's Degree

Required Courses: 12 Credit Hours

All students completing the PhD program must take one course each from 4 of the 5 technical areas listed below for a total of 12 credit hours.
Water Process Engineering

- ENV 6015 - Physical/Chemical Treatment Systems in Environmental Engineering 3 Credit Hours

Wastewater Process Engineering

- ENV 6016 - Biological Treatment Systems in Environmental Engineering 3 Credit Hours

Waste Treatment/Water Treatment/Industrial Treatment

- ENV 6347 - Hazardous Waste Incineration 3 Credit Hours
- ENV 6558 - Industrial Waste Treatment 3 Credit Hours
- ENV 5410 - Water Treatment 3 Credit Hours
- EES 5318 - Industrial Ecology 3 Credit Hours

Air Quality Modeling/Air Pollution Control

- ENV 6106 - Theory and Practice of Atmospheric Dispersion Modeling 3 Credit Hours
- ENV 6126 - Design of Air Pollution Controls 3 Credit Hours

Water Resources

- Any CWR course at the 5000 or 6000 level 3 Credit Hours
- ENV 5636 - Environmental and Water Resources Systems Analysis 3 Credit Hours
- ENV 6047 - Environmental Informatics and Remote Sensing 3 Credit Hours

Elective Courses: 42 Credit Hours

- To be approved by a faculty adviser and the graduate coordinator
- At least 27 credit hours of formal course work is required, exclusive of research and independent study. For students entering the program with a completed master's degree, at least 15 of the 27 credit hours (exclusive of independent study and research) must be taken at UCF after the master's program, from approved formal courses. For students entering the program without a master's degree in Environmental Engineering or a closely related discipline, at least 45 credit hours of formal course work are required.

- Doctoral Research (XXX 7919) - 9 credit hours maximum (more than 9 research credit hours can be taken, but only a maximum of 9 credit hours will be counted toward the program of study).

- Independent Study (XXX 6908) - 3 credit hours maximum

- No more than a total of 12 credit hours of doctoral research plus independent study will be included in a program of study.

- Directed Research (XXX 6918) is not permitted in a PhD program of Study.

Students can choose among the following courses with the consent of the academic adviser. Students that have no MS degree should complete the core courses for the MS degree in Environmental Engineering or Environmental Engineering Sciences. In addition, all elective courses will be 5000 or 6000 level courses.

In addition, elective courses can be chosen from any of the following disciplines:

**Engineering:** any 5000 or 6000 level course from any Engineering discipline. Typical electives come from Environmental Engineering (ENV courses), Water Resources Engineering (CWR courses), Civil Engineering, Construction Engineering, and Industrial Engineering.

**Non-Engineering:** Statistics, Molecular Biology, Microbiology, Biochemistry, Organic Chemistry, General or Inorganic Chemistry, Biology, Math, and Physics.

Suggested elective courses include:

- EES 5318 - Industrial Ecology 3 Credit Hours
- ENV 5410 - Water Treatment 3 Credit Hours
- ENV 5505 - Sludge Management Operations in Environmental Engineering 3 Credit Hours
- ENV 5517 - Engineering Chemical and Biological Processes 3 Credit Hours
- ENV 5636 - Environmental and Water Resources Systems Analysis 3 Credit Hours
- ENV 6015 - Physical/Chemical Treatment Systems in Environmental Engineering 3 Credit Hours
- ENV 6016 - Biological Treatment Systems in Environmental Engineering 3 Credit Hours
- ENV 6046 - Membrane Mass Transfer 3 Credit Hours
- ENV 6030 - Environmental Biotechnology 3 Credit Hours
- ENV 6047 - Environmental Informatics and Remote Sensing 3 Credit Hours
- ENV 6106 - Theory and Practice of Atmospheric Dispersion Modeling 3 Credit Hours
```
- ENV 6126 - Design of Air Pollution Controls 3 Credit Hours
- ENV 6336 Site Remediation and Hazardous Waste Treatment 3 Credit Hours
- ENV 6347 - Hazardous Waste Incineration 3 Credit Hours
- ENV 6515L - Biological Unit Operations and Processes Laboratory 3 Credit Hours
- ENV 6519 - Aquatic Chemical Processes 3 Credit Hours
- ENV 6558 - Industrial Waste Treatment 3 Credit Hours

Dissertation: 18 Credit Hours
- ENV 7980 - 18 Credit Hours minimum

Examinations

Students must pass three examinations. The first is the PhD qualifying examination. This examination must be taken within the first year of admission into the PhD program. It may be attempted no more than twice. In addition to the qualifying examination, students must pass the candidacy examination and the dissertation defense examination. The candidacy examination is normally taken near the end of the course work and consists of a written and oral presentation of a research proposal, and may include additional written or oral questioning by the committee. A copy of the written examination will be kept as part of the student's official record. The dissertation defense examination is an oral examination taken as defense of the written dissertation.

The College of Engineering and Computer Science requires that all dissertation defense announcements be approved by the student's adviser and posted on the college's website and on the College of Graduate Studies Events Calendar at least two weeks before the defense date.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours. Evidence of meeting these requirements must be received by the College of Graduate Studies by the day before the first day of classes for the semester in which a student wishes to enroll in dissertation hours.

- Completion of all but 6 hours, or less, of course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Equipment Fee

Full-time students in the Environmental Engineering PhD program pay $16 per semester for equipment used in the laboratories. Part-time students pay $8 per semester.

Independent Learning

The Independent Learning Requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
```
A bachelor's and/or master's degree in Environmental Engineering or a closely related discipline.

- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Final articulation requirements will be determined by the department after students have been admitted and after discussions with their advisers.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Hospitality Management, PhD

Program Description

The PhD in Hospitality Management prepares individuals for teaching and research-based careers in academia or as practitioner researchers and field consultants in hospitality and tourism enterprises.

Curriculum

The doctoral program requires 58 credit hours of courses beyond the master's degree, including 16 credit hours of core courses, 27 credit hours of specialization courses, and 15 credit hours of Dissertation. An additional 9 credit hours are required in the Candidacy term for those students who are self-funded.

Total Credit Hours Required: 58 Credit Hours Minimum beyond the Master's Degree

Required Courses: 43 Credit Hours

Core: 16 Credit Hours

- HMG 7587 - Foundations in Hospitality and Tourism Research 3 Credit Hours
- HMG 7589 - Advanced Research Methods in Hospitality and Tourism 3 Credit Hours
- HMG 7588 - Research Seminar in Hospitality and Tourism 1 Credit Hours
- PAF 7802 - Advanced Research Methodology for Public Affairs 3 Credit Hours or
- HMG 6586 - Research Methods in Hospitality and Tourism 3 Credit Hours
- PAF 7804 - Advanced Statistics for Public Affairs I: Multivariate Analysis 3 Credit Hours
HMG 7295 - Theories in Hospitality and Tourism 3 Credit Hours

Specialization: 27 Credit Hours

At least 6 credit hours should be from HMG 7XXX level courses. Course selection should be based on the student's area of interest in consultation with the major adviser and approved by the Graduate Programs' Director.

Strategies and Tactics

Select a minimum of two courses from the following list:

- HMG 7258 - Strategies and Tactics: Lodging 3 Credit Hours
- HMG 7546 - Strategies and Tactics: Guest Service Management 3 Credit Hours
- HMG 7715 - Strategies and Tactics: Travel and Tourism 3 Credit Hours
- HMG 7876 - Strategies and Tactics: Foodservice 3 Credit Hours

Research Electives

Select a minimum of three Research Electives from the following list:

- HMG 6918 - Directed Research 3 Credit Hours
- PAF 7805 - Advanced Statistics for Public Affairs II: Survey of Statistical Methods 3 Credit Hours
- PAF 7820 - Qualitative Methods for Public Affairs 3 Credit Hours
- EDF 7475 - Qualitative Research in Education 3 Credit Hours
- EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data 3 Credit Hours
- EDF 7406 - Multivariate Statistics in Education 3 Credit Hours

HMG 6000 Level or Greater Courses

Select the remainder of your minimum 27 credit hours from any HMG 6000 level or greater courses or approved 6000/7000 level courses from other UCF colleges.

- FSS 6365 - Management of Food Service Operations 3 Credit Hours
- HMG 6227 - Advanced Training and Development in the Hospitality Industry 3 Credit Hours
- HMG 6228 - Critical Issues in Hospitality Human Resources 3 Credit Hours
- HMG 6245 - Managing Hospitality and Guest Services Organizations 3 Credit Hours
- HMG 6251 - The Management of Lodging Operations 3 Credit Hours
- HMG 6466 - Applied Revenue Management Techniques in Hospitality 3 Credit Hours
- HMG 6556 Digital Marketing and Big Data Management for Hospitality and Tourism 3 Credit Hours
- HMG 6585 - Data Analysis in Hospitality and Tourism Research 3 Credit Hours
- HMG 6267 - Case Studies in Restaurant Management 3 Credit Hours
- HMG 6296 - Hospitality/Tourism Strategic Issues Planning 3 Credit Hours
- HMG 6347 - Advanced Vacation Ownership Resort Planning 3 Credit Hours
- HMG 6446 - Hospitality/Tourism Information Technology 3 Credit Hours
- HMG 6565 Social Media in Hospitality and Tourism 3 Credit Hours
- HMG 6476 - Feasibility Studies for the Hospitality/Tourism Enterprises 3 Credit Hours
- HMG 6477 - Financial Analysis of Hospitality Enterprises 3 Credit Hours
- HMG 6529 - Vacation Ownership Resort Sales Management 3 Credit Hours
- HMG 6528 - Convention and Conference Sales and Services 3 Credit Hours
- HMG 6533 - Hospitality/Tourism Industry Brand Management 3 Credit Hours
- HMG 6566 - Principles of Destination Marketing and Management 3 Credit Hours
- HMG 6596 - Strategic Marketing in Hospitality and Tourism 3 Credit Hours
- HMG 6710 - International Tourism Management 3 Credit Hours
- HMG 6738 - Tourism Industry Analysis 3 Credit Hours
- HMG 6797 - Event Administration 3 Credit Hours
- HMG 6756 - Mega-Events 3 Credit Hours

Dissertation: 15 Credit Hours

Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee.

- HMG 7980 - Dissertation Research 15 Credit Hours (minimum)
Candidacy

To enter candidacy for the PhD, students must have an overall 3.0 GPA on all graduate work included in the planned program and pass all required examinations. Examinations will be scheduled by the student and major adviser in collaboration with the Graduate Programs' Director and Rosen College Examination Committee. Students must be enrolled in the university during the semester an examination is taken.

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination form.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Candidacy Examinations

All PhD candidates will be required to complete two examinations. The written portion of the Candidacy Exam consists of two days, each with a different emphasis. Day one encompasses "Area I" of your GPS (Graduate Plan of Study), and it emphasizes research methodology, statistics and theory. Day two will have a broader emphasis and encompass "Area II" course content in your GPS. The latter will further include questions related to your dissertation topic. Upon completion of the written portion of the examination students are required to pass a one-hour oral examination with questions arising from Area I, Area II and your dissertation.

Independent Learning

The dissertation satisfies the independent learning requirement.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree in a closely related field.
- Official, competitive GRE or GMAT score taken within the last five years.
- Three letters of recommendation.
- Goal statement (This is your opportunity to outline in 500 words why you wish to come to the program, what you think you will contribute to the program and how you feel the program will enhance you both personally and professionally).
- Résumé
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Human Factors and Cognitive Psychology PhD

Program Description

A PhD degree track in Human Factors and Cognitive (HFC) Psychology, accredited by the Human Factors and Ergonomics Society, is offered to those with a baccalaureate or master's degree in psychology or an allied area. The track seeks to develop the capacity to design, conduct, and apply human factors and cognitive psychology research in a variety of professional and academic settings. It is patterned on the scientist-practitioner model of the American Psychological Association (APA) and adheres to guidelines established by the committee for Education and Training of APA's Division 21 (Applied Experimental and Engineering Psychology).

The PhD degree track in HFC Psychology seeks to develop the capacity to design, conduct, and apply applied experimental and human factors research in a variety of professional settings. Students receive training in the content and techniques of human factors psychology-including statistical and quantitative procedures, experimental design, survey methods, computer techniques, and other research methodologies. Students also select a concentration area, which they complete as part of their required elective coursework. Examples include human-computer interaction, human-machine-environment interface, human performance, human factors in simulation and training, cognitive neuroscience, or other areas of interest with advisor authorization. In addition to the course requirements, students must demonstrate their knowledge and skills by completing the five competency domains. Finally, a dissertation representing a significant research contribution to the field is required.

We continue to improve the curriculum to adapt to the changing professional and societal demands and to offer the best graduate education and training in human factors and cognitive psychology. In particular, we have modified our curriculum and program requirements and introduced project and outcome-based competency assessments. These changes have helped to focus students' attention on their respective programs of research while simultaneously developing the knowledge and skill sets required to be Ph.D. scientist/practitioners in human factors and cognitive psychology.

In addition to the program curriculum and research activities, the HFC program continues to serve the local community by improving the enjoyment, comfort, and safety of Walt Disney World entertainment rides, serving as an educational professional at several local colleges and universities and consulting at several government agencies and private industries. To date, our doctoral program continues to be the largest and one of the most prominent in the nation. Both faculty and students have received numerous honors and awards from the Human Factors and Ergonomics Society.

Curriculum

For students who enter with a baccalaureate degree, the Human Factors and Cognitive track in the Psychology PhD program requires a minimum of 75 credit hours, and students may earn the MA degree in route to the PhD by completing all of the requirements of the PhD except for dissertation. For students who already have a master's degree in Psychology, the MA is not available. Students who enter with a master's degree in psychology will be allowed to waive up to 30 hours of graduate coursework with approval of the program faculty, and will also be required to complete a minimum of 60 semester hours at UCF.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

For students who already have a master's degree in psychology, the number of credit hours will depend on the number of credit hours transferred or waived. However, all students in the program must complete 15 credit hours of dissertation.

Required Courses: 42 Credit Hours

Students are required to achieve a minimum grade of B- in each core curriculum course. Students who take PSB 6328 and PSB 6348 must achieve a B- in both courses. If students earn a C+ or lower in any core curriculum course, they will be placed on
Students should choose electives in concentrated course groupings: for example, human-machine systems, performance measurement and evaluation, simulation and training, or quantitative methods. Other elective course groupings may be developed for the student's specific interests. Students may choose to satisfy these elective requirements by taking courses outside the Psychology Department that can serve their multidisciplinary needs. Courses outside of the Department that have already been approved as electives are contained in the list below. A student who wishes to use courses that are not included on this list may seek approval by petitioning the HFC Faculty Committee through their academic adviser. Students may take up to 12 credit hours of Directed Research, however, it will be subject to immediate review by the Program Committee and may be dismissed from the program. It is anticipated that in most cases earning a C+ or lower in two or more core curriculum courses they will result in dismissal from the program.

- EXP 5256 - Human Factors I 3 Credit Hours
- EXP 6257 - Human Factors II 3 Credit Hours
- EXP 6258 - Human Factors III 3 Credit Hours
- EXP 5208 - Sensation and Perception 3 Credit Hours
- EXP 6116 - Visual Performance 3 Credit Hours
- EXP 6255 - Human Performance 3 Credit Hours
- EXP 6506 - Human Cognition and Learning 3 Credit Hours
- EXP 6541 - Advanced Human Computer Interaction 3 Credit Hours
- INP 7089 - Human Factors Professional Issues 3 Credit Hours
- PSB 5005 - Physiological Psychology 3 Credit Hours
- PSY 7217C - Advanced Research Methodology I 4 Credit Hours
- PSY 7218C - Advanced Research Methodology II 4 Credit Hours
- PSY 7219C - Advanced Research Methodology III 4 Credit Hours

Elective Courses: 18 Credit Hours

Students should choose electives in concentrated course groupings: for example, human-machine systems, performance measurement and evaluation, simulation and training, or quantitative methods. Other elective course groupings may be developed for the student's specific interests. Students may choose to satisfy these elective requirements by taking courses outside the Psychology Department that can serve their multidisciplinary needs. Courses outside of the Department that have already been approved as electives are contained in the list below. A student who wishes to use courses that are not included on this list may seek approval by petitioning the HFC Faculty Committee through their academic adviser. Students may take up to 12 credit hours of Directed Research, however, it is highly recommended that they take elective courses that are related to their discipline from other graduate programs or departments at UCF. Electives may include but are not limited to the following courses:

- DEP 5057 - Developmental Psychology 3 Credit Hours (Spring Only)
- DIG 5876 - Quantitative Aspects of Modeling and Simulation 3 Credit Hours
- DIG 6432 - Transmedia Story Creation 3 Credit Hours (Fall, Summer)
- EIN 5248C - Ergonomics 3 Credit Hours
- EIN 5251 - Usability Engineering 3 Credit Hours
- EIN 5255C - Interactive Simulation 3 Credit Hours (Spring Only)
- EIN 6258 - Human Computer Interaction 3 Credit Hours
- EME 6613 - Instructional System Design 3 Credit Hours (Occasional)
- EME 6614 - Instructional Game Design for Training and Education 3 Credit Hours
- EXP 5254 - Human Factors and Aging 3 Credit Hours (Fall Only)
- EXP 6939 - Teaching Seminar 3 Credit Hours
- IDS 6916 - Simulation Research Methods and Practicum 3 Credit Hours
- IDS 6146 - Modeling and Simulation Systems 3 Credit Hours
- IDS 6147 - Perspectives on Modeling and Simulation 3 Credit Hours (Fall only). May be substituted by:
  - DIG 5875C Introduction to Modeling and Simulation 3 Credit Hours (Summer Only)
- IDS 6148 - Human Systems Integration for Modeling and Simulation 3 Credit Hours
- IDS 6149 - Modeling and Simulation for Test and Evaluation 3 Credit Hours
- INP 5825 - Human-computer Interface (HCI) design: A team approach 3 Credit Hours
- INP 7310 - Organizational Psychology I 3 Credit Hours
- PPE 5055 - Personality Theories 3 Credit Hours
- PSB 6328 - Psychophysiology 3 Credit Hours
- PSB 6348 - The Neuroanatomical Basis of Psychological Function 3 Credit Hours
  - PSB 6352 - Neuroimaging Design and Analysis Methods 3 Credit Hours
  - PSB 7349 - Advanced Topics in Cognitive Neuroscience 3 Credit Hours
  - PSY 5605 - History and Systems of Psychology 3 Credit Hours
- SOP 5059 - Advanced Social Psychology 3 Credit Hours

Concentration in Cognitive Neuroscience

The Human Factors and Cognitive Psychology PhD Program offers students opportunities for both lab and course-based training in Cognitive Neuroscience. To support cognitive neuroscience research training, the Department of Psychology
maintains state-of-the-art research facilities, including space and equipment for electroencephalography/event-related potentials (EEG/ERP), functional near-infrared spectroscopy (fNIRS), eye tracking, pupillometry, heart-rate variability, respiration, and electrodermal activity, as well as external collaborations to support functional magnetic resonance imaging (fMRI). In addition, the HFC Program also offers a course-based concentration in Cognitive Neuroscience with the following curriculum:

A student who elects to complete the concentration must achieve a minimum grade of B- in each course.

- PSB 6328 - Psychophysiology 3 Credit Hours
- PSB 6348 - The Neuroanatomical Basis of Psychological Function 3 Credit Hours
- PSB 6352 - Neuroimaging Design and Analysis Methods 3 Credit Hours
- PSB 7349 - Advanced Topics in Cognitive Neuroscience 3 Credit Hours
- Select 6 credit hours of elective courses from the list above.

Note:

Admission to these courses is not guaranteed, but is contingent on the decision of the department, college, and instructor of record for the course.

Dissertation: 15 Credit Hours

- PSY 7980 Doctoral Dissertation 15 Credit Hours

Competency Requirements

Purpose

The purpose of the competency requirements is to develop and assess the competency of professional behaviors in doctoral-level graduate students in the Human Factors & Cognitive Psychology program that are consistent with the program's professional training goals. These goals include but are not limited to the development and demonstration of skills and abilities that enable graduating students in (1) research; and (2) competently serve as innovative teachers/instructors in colleges and universities, and as presenters at local, regional, national, and international professional conferences.

Competency requirements are detailed below and involve the completion of five professional activities to satisfy two competency domains.

Domain 1: Research

1. Published/ Publishable Article (1st author)
   a. Deadline: End of sixth semester in Program (excluding summers)

2. First Year Project
   a. Deadlines:
      i. Manuscript: Two weeks after the start date of the first semester of the second year
      ii. Presentation: Approximately two weeks after submission of the manuscript

3. Second Year Project
   a. Deadlines:
      i. Manuscript: Two weeks after the start date of the first semester of the second year
      ii. Presentation: By the end of the spring semester of the third year in the program.

4. Literature Review
   a. Deadline: Prior to the start of the second semester of the third year in the program.

Domain 2: Teaching/Professional Presentations

- Undergraduate Instructor Experience, or
- Professional Presentations

Deadline: End of sixth semester in Program (excluding summers)

Requirements, Rationale and Objectives

Successful completion of the competency requirements reflects the Program's desire to ensure overall breadth of training in the field of Human Factors & Cognitive psychology that are complemented by individually tailored professional training experiences and competencies consistent with a student's professional career goals. The two professional domains outlined above (and detailed in the subsequent sections) are consistent with this intent. Students are required to complete all domains as well as required coursework (including electives) to be eligible for doctoral candidacy. The student must meet all domain requirements during his or her enrollment in the UCF HFC Ph.D. program. Work completed the program will not be considered for domain completion.
Research Domain

1. Published/Publishable Article

Students are required to submit an article to a refereed journal and receive feedback on the manuscript. Students must be first or solo author on empirical research that is either published or publishable in a peer-reviewed journal. If the student does not receive word on journal submission by 6 months or if the article is rejected, the faculty committee will review the student's work and determine if it fulfills the requirement.

Fulfillment of this component is intended to (a) complement the student's graduate level coursework in research methods, design, statistics, and ongoing research practica, (b) hone conceptual and professional writing skills related to publishing findings in scholarly journals, (c) encourage students to submit completed scholarly works to journals for peer review, and (d) provide students with the opportunity to receive and react to comments offered by professional journal reviewers. The student must complete research and article while enrolled in the HFC Program. The student must report receipt of the peer review and complete and submit all forms for inclusion in their portfolio within thirty (30) days of receiving feedback from the journal. The student must also inform his/her advisor, the Program Assistant, and the Program Director each time an activity is added to his/her Competency portfolio. Failure to meet the thirty-day deadline will result in disqualification of the manuscript for satisfying this competency. The manuscript and editorial response may be reviewed by the HFC committee to determine whether the student has satisfied this requirement.

2. First Year Project

In the first year, all students must do a laboratory research project (the First Year Project) that includes at least one empirical study. The project must be approved and will be supervised by the student's advisor. Two weeks after the start date of the first semester of the second year (if this date falls on a weekend or academic holiday the due date will be the first day following on which University classes are in session), the student must provide a written paper describing their work structured in accordance with APA guidelines and including all sections necessary for a typical journal submission in their field. It should not exceed 20 pages of text (exclusive of References, Tables, and Figures). Approval of the paper is required by two members of the Human Factors and Cognitive Psychology program faculty (one of whom will be the student's advisor). Additionally, the student must undergo a one-hour oral examination based on the written report. This examination will be in the format of an academic talk delivered to area faculty and students that will occur approximately 2 weeks following submission of the First Year Paper. Satisfactory performance on both the paper and oral examination is required to maintain good standing in the program. Cases in which performance is deemed unsatisfactory will result in academic probation with a retention plan for the student, who must successfully complete this plan to maintain status in the program. However, if a student already on academic probation delivers a first-year project (either paper or talk) that is deemed unsatisfactory then they may be removed from the program at the discretion of the program director. Failure to complete the first-year project is grounds for dismissal from the program.

3. Second-Year Project

In the second year, all students must do a laboratory research project (the Second Year Project) that includes at least one empirical study. The project must be approved and will be supervised by the student's advisor. Two weeks after the start date of the first semester of the second year (if this date falls on a weekend or academic holiday the due date will be the first day following on which University classes are in session), the student must provide a written paper describing their work structured in accordance with APA guidelines and including all sections necessary for a typical journal submission in their field. It should not exceed 20 pages of text (exclusive of References, Tables, and Figures). Approval of the paper is required by two members of the Human Factors and Cognitive Psychology program faculty (one of whom will be the student's advisor). Additionally, the student must undergo a one-hour oral examination based on the written report. This examination will be in the format of an academic talk delivered to area faculty and students that will occur approximately 2 weeks following submission of the Second Year Paper. Satisfactory performance on both the paper and oral examination is required to maintain good standing in the program. Failure to complete the second-year project is grounds for dismissal from the program.

4. Literature Review Paper

Students will fulfill the Literature Review Paper requirement by completing a sole-authored review paper of literature in their area of research interest. The paper will synthesize research of that selected area and derive and include proposals of novel hypotheses, models, or frameworks that can be used to formalize the selected literature to advance future research.
Fulfilling this requirement is intended to a) develop students' expertise in their research area, b) refine students' abilities to capture current understanding of a research topic through scholarly writing, c) encourage students to develop well-supported and testable hypotheses that can advance research in their field, and d) provide students an opportunity to receive feedback from all program faculty.

Students can focus this review on their intended dissertation topic and use said review as a basis for their dissertation introduction. This is not a requirement. Prior to beginning the review, students must document approval of the topic from their advisor. They must also obtain commitment from a second reader (from within the HFC faculty) to assess the completed review. The second reader cannot be the same second reader selected for the student's First Year Research Project. Prior to the start of the second semester of the third year, the student must submit the completed review to their advisor and second reader. Any changes required by readers must be integrated and the revision completed to the readers' satisfaction in order for the student to fulfill this requirement.

The review paper must be formatted in accordance with APA guidelines. Students may refer to papers published in Annual Review of Psychology for guidelines on the length, composition, and level of support included in a well-composed review.

http://www.annualreviews.org/journal/psych

**Teaching/Professional Presentations Domain**

Fulfillment of this domain requires first that all students complete the UCF Graduate Studies 2-day GTA Training session. In addition, students must either serve as instructor of record for an undergraduate course at UCF or complete formal presentations. Students are free to select either option in consultation with their faculty advisors. If the student opts for instructor of record of an undergraduate course, the student must do the following: Submit a syllabus, lecture notes, examinations, two course evaluations (mid and end-of-semester administered online by UCF, distributed by Psychology), as well as written feedback from the student's faculty advisor or members of the student's competency committee who directly observed or viewed videotapes of at least three lectures. If the student opts to conduct professional presentations, that student must complete at least two presentations (see table below) in which he or she is an author and is also the primary presenter. Written feedback from the student's faculty advisor or members of the student's competency committee who directly observed or viewed videotapes of the five lectures must be available for review. Professional presentations do not include poster presentations or classroom presentations (e.g., guest lecturer).

Fulfillment of the traditional **Teaching** domain is intended to provide students with (a) additional training and opportunities to develop instructional skills consistent with university level instruction, (b) the opportunity to receive and react to constructive comments concerning their developing instructional skills, (c) additional opportunities to learn and develop expertise in using newly developed technology and methods relevant to university level instruction (e.g., active learning groups, computer assisted technology, software programs that facilitate and complement traditional instructional activities), and (d) additional expertise in select areas of psychology to prepare them for future professional instructional opportunities following graduation from the University. The **alternative option** under this domain is intended to encourage students to engage in research studies beyond those required by the program and to present their findings at professional meetings.

Fulfillment of this requirement is expected to promote research involvement throughout graduate training and promote student competency in (a) developing written submissions of completed empirical works, (b) oral presentations skills with professional audiences, (c) learning and using innovative technology relevant to paper/poster presentations, and (d) receiving and reacting to constructive comments offered by professionals.

Students satisfy this domain by accumulating 4 points for teaching and/or professional presentation. For presentations, the student must be the presenter. Points are assigned as follows:

- One paper presentation (lecture) at National/International Conference (2 points)
- One poster presentation at National/International Conference (1 point)
- One paper presentation at Regional Conference (1 point)
- One poster presentation at Regional Conference (1/2 point)
- Teaching Assistant for a research methods laboratory section (limit of one section per semester) (1 point)
- HFC Program Colloquium/Brown-bag presentation (1 point)
- Teaching a course as instructor of record (4 points)

The student must report each activity and complete and submit all forms for inclusion in their portfolio within thirty (30) days of the presentation or of the end of the semester in which the teaching activity occurred. The student must also inform his/her adviser, the Program Assistant, and the Program Director each time an activity is added to his/her Competency portfolio. Failure to meet the thirty-day deadline will result in disqualification of the activity for satisfying this competency. The activity may be reviewed by the HFC committee to determine whether the student has satisfied this requirement.
**Procedures and Time Guidelines for Completing the Competency Requirements**

Students admitted to the Ph.D. Human Factors and Cognitive Psychology Program will complete competency domains (Research and Teaching/Professional Presentations) to fulfill the professional competency requirements. Students are strongly encouraged to discuss their preferences and planned course for fulfilling these requirements with their academic advisors. Students should consult with the Program Assistant within the first two weeks of each semester to verify that their dossier is up-to-date. Students admitted to the Ph.D. Human Factors and Cognitive Psychology Program will not be able to fulfill the requirements with previous work completed at any institution previous to their enrollment in the HFC Ph.D. program at the University of Central Florida (UCF).

Successful completion of the competency criteria must be completed before proposing the dissertation. The deadlines for completion of each competency are indicated in the Table 1. Each student's competency evaluation committee (which may be different from or identical to the dissertation committee) will determine whether the student has successfully fulfilled the competency requirements. Students are strongly encouraged to consult with their advisor in selecting a competency evaluation committee. One consideration in identifying potential committee members is the topic you select to meet the research domain. Students are responsible for submission of paperwork required to establish their committee, and they should consult with the Program Assistant to coordinate this process.

A written summary of the results and the student's Professional Activity Domain dossier will be forwarded to the Human Factors and Cognitive Psychology Program faculty for review and final approval. Students must submit their candidacy dossiers to the HFC Program faculty thirty (30) days prior to the beginning of the semester they anticipate becoming ABD. Failure to do so may result in delaying their advancement to candidacy. The Program faculty will then review each submitted dossier and the Director of the HFC Program will notify students in writing following the successful completion of the competency requirements. Students may formally propose their dissertation following written notification that they have completed the competency requirements.

**Graduate Research: Doctoral Dissertation**

Prior to enrollment into PSY 7980 Doctoral Dissertation, you must have passed candidacy and your dissertation committee must be reviewed and approved by the College of Sciences Associate Dean of Graduate Studies. This form can be found online at: http://www.students.graduate.ucf.edu/files/DoctoralstudentsengagingindissertationresearchmustbecontinuouslyenrolledinatleastthreethreesofPSY7980everysemester,includingsummersuntiltheysuccessfullydefendandsubmittheirdissertationtotheUniversityThesisEditor.

Students will complete a minimum of 15 dissertation credit hours to meet the requirements for graduation.

**Program Guidelines**

All dissertations must involve the collection and analysis of original data. In exceptional circumstances, the use of an archival data set may be accepted through petition to the Graduate Committee. Oral presentation of the dissertation/dissertation prospectus must be made to the Dissertation/Dissertation Committee for approval prior to initiating the research. The proposal generally includes the following: (a) title, (b) introduction to the problem, (c) comprehensive review of relevant literature, (d) establishing the uniqueness of the study, (e) theoretical background and hypotheses, (f) planned methodology, and (g) planned data analytic approach. Students are encouraged to write their dissertation proposal and dissertation using APA publication style (see APA Publication Manual, 6th edition) and to submit their completed research to relevant professional journals in their field of research. An appendix to the dissertation and/or dissertation may be used to include a more comprehensive literature review as determined by the student's committee members. After submitting a written proposal to the Dissertation/Dissertation Committee, the committee will meet with the student to discuss and evaluate the proposal. The approval of the proposal by a majority of committee members indicates that the committee members find the research to be original and appropriate, the literature review to be accurate and appropriately comprehensive, and the research design/planned data analytic strategy to be appropriate for the study.

After receiving committee approval for the thesis/dissertation, all students must receive approval from the University's Institutional Review Board (IRB) before data can be collected from human participants. Information about this process can be obtained from the Office of Research (www.research.ucf.edu). Failure to obtain this prior approval could jeopardize receipt of the student's degree.

Students should refer to the Graduate Studies Thesis and Dissertation Webcourse, which describes UCF's formatting requirements for dissertations and outlines the steps graduate students must follow to submit their dissertations to Graduate Studies for archiving.
Dissertation Committee Composition

Doctoral students must establish a Dissertation Committee prior to the Candidacy Examination. The Committee will consist of a minimum of four members. At least three members must be qualified regular faculty members from the student's department at UCF, one of whom must serve as the chair of the committee. One member must be from either outside the student's department at UCF or outside the university. It is likely that the student's adviser will serve as the chair of the committee. Students are therefore strongly encouraged to consult with their adviser in identifying potential committee members.

All members vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal and final dissertation must be approved by a majority of the committee.

Dissertation Committee/Candidacy Status Form:
http://www.students.graduate.ucf.edu/files/

These approval forms should be completed and submitted to the HFC program assistant. Refer to the above website for detailed information.

Time Limitation and Deadlines for Dissertation Completion

A student has seven years from the date of admission to the doctoral program to complete the Ph.D. requirements. If the seven-year limit is exceeded, the candidacy examinations as well as coursework may need to be repeated.

Deadline, Dissertation Proposal Defense: End of eighth semester in Program (excluding summers)

Deadline, Dissertation Defense: End of eleventh semester in Program (excluding summers)

Master of Arts in Human Factors and Cognitive Psychology

Students enrolled in the Human Factors and Cognitive Psychology (HFC) PhD track may elect to earn a Master of Arts in HFC Psychology in route to their doctorate. This is a nonterminal master's degree available only to students in the HFC Psychology PhD track.

Additional Program Requirements

The MA in HFC Psychology requires a total of 60 credit hours beyond the bachelor's degree, as well as successful completion of the candidacy examination that qualifies the student for candidacy status within the HFC Psychology PhD. All HFC MA students take the same credit hours of core courses (less the 15 hour dissertation requirement) as well as and 18 credit hours of electives. All required courses and selected electives are described in the PhD program of study above.

Note: The MA in HFC cannot be pursued if a master's in psychology or master's in modeling and simulation has already been awarded.

Independent Learning

Given the nature of graduate training and the pursuit of a doctoral degree, graduate students in Human Factors and Cognitive Psychology are required to become involved in independent learning throughout their graduate careers. The obtaining of the master's degree on route to the doctoral degree and the doctoral dissertation are examples of independent learning in which all graduate students participate. In addition, the comprehensive evaluation activities which include passing a research methods examination, teaching, research with publishing, and applied experience are required of all graduate students. Depending upon their career goals, other experiences such as directed readings or additional research projects may be undertaken by the students.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Degree(s) should be in psychology or an allied area.
- Evidence of successful completion of undergraduate courses in statistics and general areas of experimental psychology.
- Résumé or Curriculum Vitae.
A clear statement concerning the professional background, the type of research you wish to pursue as a graduate student, and the faculty member you believe would be best suited to serve as your major professor and mentor.

Three letters of recommendation, with at least two furnished by college or university professors who are acquainted with the applicant.

Students are not normally admitted to the program without having completed a minimum amount of basic preparation in content related to experimental psychology. This preparation is judged on an individual basis but typically consists of at least 18 semester hours in the following:

- Courses in research methods, computer applications, and statistical methods.
- General experimental psychology courses, e.g., learning, physiological, perception, human learning, cognition, motivation, and measurement.

Applicants are evaluated for program prerequisites and advised of any need for additional preparation. Previous graduate work is evaluated for credit on a case-by-case basis.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree. Admission criteria are more stringent because of the competitiveness of the application process.

* Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

### Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

### Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

### Industrial and Organizational Psychology PhD

#### Program Description

The Industrial and Organizational Psychology track in the Psychology PhD program educates and trains students to contribute to and perpetuate psychological science and practice.

The Industrial and Organizational Psychology track in the Psychology PhD program develops competency through research and training for the application of psychological principles to organizations. The degree is patterned on the
The scientist-practitioner model of the American Psychological Association (APA).

Program graduates are involved in many issues of critical importance to society, including fairness in the selection and treatment of employees, the creation of work environments that maximize the satisfaction and productivity of employees, and the study of technological influences on human performance.

The doctoral program provides students with training consistent with the scientist-practitioner model. A key assumption of the program is that every graduate must be a highly competent scientist who can contribute to both the science and practice of the discipline.

To view our Industrial and Organizational Psychology Doctoral Program Handbook, please visit www.handbooks.graduate.ucf.edu/IOPsychPhD.

**Curriculum**

The Psychology PhD program in Industrial and Organizational Psychology (I/O) requires four to five years of full-time study beyond the baccalaureate and three to four years beyond the master's. The first few years are devoted to course work and the final year to the doctoral dissertation.

Students enrolled in the doctoral program who wish to earn a master's degree en route to the PhD must meet with their PhD adviser and the program director for the MS program in Industrial and Organizational Psychology to plan a program of study. Students may be granted a master's degree after completing 38 hours of graduate courses in the PhD program including Industrial Psychology I, Organizational Psychology I, Professional Issues, Advanced Research Methods I and II, Advanced Social Psychology, Psychometric Theory, and Practice. Those who choose to do a master's thesis must also take a minimum of 6 hours of thesis and the three elective courses below. Those who choose the nonthesis option must take one Seminar in I/O Psychology, as well as either Industrial Psychology Practicum or I/O Psychology Consulting Practice, and the three elective courses below:

In addition, students taking the nonthesis option must document that they have co-authored a manuscript that was presented at a professional conference or submitted for publication in a professional journal or book.

The I/O program requires a minimum of 75 credit hours of graduate study for students who enter the program with a baccalaureate degree. The nature of this study is determined by the I/O Area Program Committee.

### Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

- INP 6058 - Job Analysis and Performance Appraisal 3 Credit Hours
- INP 6605 - Training and Team Performance 3 Credit Hours
- INP 6215 - Assessment Centers and Leadership 3 Credit Hours

### Required Courses: 48 Credit Hours

#### I/O Area Courses: 33 Credit Hours

- INP 7214 - Industrial Psychology I 3 Credit Hours
- INP 7251 - Industrial Psychology II 3 Credit Hours
- INP 7310 - Organizational Psychology I 3 Credit Hours
- INP 7311 - Organizational Psychology II 3 Credit Hours
- INP 7081 - Professional Issues in Industrial and Organizational Psychology 3 Credit Hours
- PSY 7315 - Psychometric Theory and Practice 3 Credit Hours
- PSY 7217C - Advanced Research Methodology I 4 Credit Hours
- PSY 7218C - Advanced Research Methodology II 4 Credit Hours
- PSY 7219C - Advanced Research Methodology III 4 Credit Hours
- INP 7071 - Research Methods in Industrial and Organizational Psychology 3 Credit Hours

#### Psychology Field Courses: 6 Credit Hours

- SOP 5059 - Advanced Social Psychology 3 Credit Hours
- EXP 6506 - Human Cognition and Learning 3 Credit Hours

#### Research Courses: 6 Credit Hours

- INP 6933 - Seminar in Industrial and Organizational Psychology 3 Credit Hours (taken twice) or
- INP 6971 - Thesis 3 Credit Hours (taken twice)
Teaching Experience: 3 Credit Hours

All students must successfully teach a minimum of one undergraduate course as instructor of record prior to completing the I/O Psychology PhD degree.

Fulfillment of the Teaching requirement involves first taking the UCF College of Graduate Studies online and face-to-face GTA Training and EXP 6939 - Teaching Seminar. In addition, students need to serve as instructor of record for an undergraduate class at UCF. First-time students as instructor of record must submit a syllabus, lecture notes, examinations, two course evaluations (mid and end-of-semester), as well as written feedback from the student's major professor or members of the student's doctoral committee who directly observed or viewed videotapes of at least one lecture. Students will be required to administer student evaluations to their class mid-way through the semester so that they can receive feedback and make any necessary changes. The student's adviser will provide ratings of the student's performance as instructor of record at the end of the semester. If the adviser believes that the student has not performed satisfactorily, the adviser will determine remediation specific to the student's weakness (e.g., presentation skills). This remediation is not limited to, but may include, the following: serving as a guest lecturer for another instructor of record, taking a course or seminar, or teaching another semester, as determined by the student's adviser.

Fulfillment of the traditional Teaching requirement is intended to provide students with (a) additional training and opportunities to develop instructional skills consistent with university-level instruction, (b) the opportunity to receive and react to constructive comments concerning their developing instructional skills, (c) additional opportunities to learn and develop expertise in using newly developed technology and methods relevant to university-level instruction (e.g., active learning groups, computer-assisted technology, software programs that facilitate and complement traditional instructional activities), and (d) additional expertise in select areas of psychology to prepare them for future professional instructional opportunities following graduation from the university.

- EXP 6939 - Teaching Seminar 3 Credit Hours

Elective Courses: 12 Credit Hours

Students must select four elective courses. These courses must be approved by the student's major adviser and the program director. The courses in this set are selected by the student in conjunction with his or her adviser. Note, however, that all courses in the set must be approved by the I/O Program Committee. The available elective courses include, but are not limited to, the following:

- PPE 5055 - Personality Theories 3 Credit Hours
- MAN 6311 - Advanced Topics in Human Resources Management 3 Credit Hours
- MAN 7207 - Organization Theory 3 Credit Hours
- MAN 6385 - Strategic Human Resources Management 3 Credit Hours
- INP 6605 - Training and Team Performance 3 Credit Hours
- INP 6215 - Assessment Centers and Leadership 3 Credit Hours
- INP 6058 - Job Analysis and Performance Appraisal 3 Credit Hours
- INP 6318 - Recruitment, Placement and Selection 3 Credit Hours
- INP 6933 - Seminar in Industrial and Organizational Psychology 3 Credit Hours (may be taken up to 6 times for credit)

Dissertation: 15 Credit Hours

- PSY 7980 - Doctoral Dissertation 15 Credit Hours

Candidacy Examination

After completing all required courses, students must pass all three sections of the Candidacy Examination. This is a written examination covering the content of the field and are graded by the I/O faculty. Candidacy Examinations may be taken a maximum of three times. Failure to pass any section of the examination on three occasions will result in the student being dismissed from the program.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Independent Learning

Given the nature of graduate training and the pursuit of a doctoral degree, graduate students in industrial and organizational psychology are expected to engage in independent learning throughout their graduate career. The
completion of the doctoral dissertation is an example of independent learning in which all graduate students participate. In addition, a master's thesis or other research projects will be undertaken by the students from the first year on. To facilitate this process, students are expected to attend weekly program-sponsored research presentations during the fall and spring semesters and will be required to give at least three of these presentations prior to graduation.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Bachelor's or master's degree in Psychology or another allied area.
- Evidence of successful completion of undergraduate courses in statistics and in the general area of experimental psychology.
- Résumé.
- Statement outlining the student's academic and professional background and goals, along with career aspirations and goals.
- Three letters of recommendation, with at least two furnished by college or university professors who are acquainted with the applicant.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

It is preferred that applicants to the program either have a bachelor's degree with a major in psychology, or a baccalaureate degree and completion of undergraduate psychology courses in statistics and research methods; and four additional upper-division courses (12 credit hours) in the core content areas of psychology, for a minimum of 18 upper-division hours in psychology. It is up to the discretion of the I/O admissions committee whether a student accepted into the I/O Psychology PhD program, with a bachelor's degree other than psychology, will be required to take upper-division courses in the core content areas of psychology.

Applicants should note that admission to the PhD program is competitive, and successful applicants are expected to have an outstanding academic record. Admission to the program is based upon an overall assessment of the applicant's potential for completing it and for making significant contributions to the science and/or practice of I&O psychology. Admissions decisions are generally made by the second week in March and applicants are notified of their status shortly thereafter. Note that admission to the program is restricted to the fall semester of each academic year.

Industrial Engineering PhD

Program Description

The Industrial Engineering PhD program prepares students for extensive research and careers in academia, industry and government while providing a broad knowledge of industrial engineering.

The Doctor of Philosophy in Industrial Engineering is intended for a student with a bachelor's or master's degree in Industrial Engineering or a closely related discipline.

The PhD program is designed to produce highly skilled researchers with both broad knowledge of industrial engineering and in-depth knowledge of specialty fields for careers in academia, industry, and government. The program allows a candidate to thoroughly study some aspect of industrial engineering through faculty expertise in research areas such as management systems, systems simulation and modeling, operations research, quality systems engineering, interactive simulation and training systems, systems engineering, and human systems engineering, human-computer interaction, and ergonomics.

The Industrial Engineering program is structured to support the emergence of Central Florida as a national center of high technology as well as supporting the diverse service industries in the region and throughout the nation.

In the Industrial Engineering PhD program, students may be able to individually craft their programs of study and select their courses to focus in one or more of the following research areas for their dissertations:

Human Systems Engineering/Ergonomics:

As technology has become more sophisticated, the need to design for the human user has become more difficult, yet even more important. Human engineering and ergonomics assist in ensuring that as technology advances, the abilities, limitations, and needs of humans are considered in the system design. This not only supports the needs of the user, it also optimizes the efficiency and usability of the system designed. Traditionally, ergonomics has been associated with biomechanical issues and work measurement and performance issues in physical system design, as well as occupational and industrial safety. The broader focus of human engineering encompasses those issues as well as incorporating the reaction and effectiveness of human interaction with systems, both physical systems and virtual systems such as computer-based models.

Research in the Human Systems Engineering and Ergonomics area provides students with the necessary knowledge in human engineering and ergonomics to effectively design tasks, industrial systems, and work environments that maximize human performance, safety, and overall productivity.

Interactive Simulation and Training Systems:

The Interactive Simulation and Training Systems research within the Industrial Engineering MS program focuses on providing a fundamental understanding of significant topics relative to simulation systems and the requirements, design, development, and use of such systems for knowledge transfer in the technical environment. Courses in this area address the evolving and multiple discipline application of interactive simulation by providing a wealth of electives to support development of individual student interests and talents. In conjunction with UCF's Institute for Simulation and Training, industrial organizations involved in simulation in the Central Florida region, military organizations, and other governmental organizations, ISTS research in the MS program provides exposure to both military and commercial interactive simulation and training systems.

The emphasis is on the application and development of interactive simulation and training systems to meet various requirements including, but not limited to: simulators, skill trainers, organizational learning systems, computer and web-based interactive simulation systems and other novel interactive simulation efforts. Courses in the interactive simulation and training systems area prepare individuals with an undergraduate degree in engineering, science, education, psychology, mathematics or other related disciplines for careers in simulation, focusing particularly on the interactive simulation and training systems industries.

Management Systems/Engineering management:

As a result new knowledge is needed to help the technical organization understand how to improve. The Management Systems/Engineering Management studies and research in the Industrial Engineering program are intended for individuals of all engineering disciplines. Research and coursework focus on a systems view of engineering problems related to the management of complex industrial, military, government, and social systems.

**Operations Research:**

The Operations Research courses in the Industrial Engineering MS program uses mathematics and computer-based systems to model operational processes and decisions in order to develop and evaluate alternatives that will lead to gains in efficiency and effectiveness. Drawing on probability, statistics, simulation, optimization, and stochastic processes, Operations Research provides many of the analytic tools used by industrial engineers as well as by other analysts to improve processes, decision-making, and management by individuals and organizations. Research in this area is ideal for students who have an undergraduate degree in engineering, mathematics, or science. The knowledge in these courses build on an undergraduate Engineering, Mathematics, or Science degree to develop a strong modeling and analytical capability to improve processes and decision-making.

**Quality Systems Engineering:**

The Quality Systems Engineering research in the Industrial Engineering MS program focuses on providing the knowledge for improving product and process quality in manufacturing and service industries. Quality Systems Engineering provides both the quantitative tools for measuring quality and the managerial focus and organizational insight required to implement effective continuous improvement programs and incorporate the voice of the customer. The Quality Systems Engineering courses builds on an undergraduate degree in industrial engineering or a closely related discipline to provide the necessary knowledge to plan, control, and improve the product assurance function in government, military, service, or manufacturing organizations.

**Simulation Modeling and Analysis:**

The Simulation Modeling and Analysis research and studies in the Industrial Engineering MS program focus on providing a fundamental understanding of the functional and technical design requirements for simulation in manufacturing and service industries. Research in this area is based on a systems modeling paradigm and provides coding and development capability in the context of a broader systems framework. Significant exposure to design and analysis aspects is a core element of the track. The Simulation Modeling and Analysis research and coursework prepare individuals with an undergraduate degree in Engineering, Science, Mathematics, or a closely related discipline for careers in simulation, focusing particularly on using simulation as an analysis and design tool for the manufacturing and service industries.

**Systems Engineering:**

Intelligence in being infused into everyday systems, processes and infrastructure that enable physical goods to be developed, manufactured, bought and sold. These same systems also facilitate the movement and delivery of global products and services that support worldwide markets such as finance, energy resources and healthcare systems.

With these technological advancements, comes a new level of complexity as organizations struggle to integrate systems, processes and data feeds. As a result, the demand for systems engineering and related skills is expected to grow significantly.

Systems engineers design and implement computer systems, software and networks, including defining complex system requirements, and determining system specifications, processes and working parameters.

The Systems Engineering studies and research in the Industrial Engineering MS program are intended for individuals of all engineering disciplines. Research and coursework focus on a systems view of engineering problems related to the management of complex industrial, military, government, and social systems.

**Curriculum**

The Industrial Engineering PhD program requires a minimum of 72 credit hours beyond the bachelor's degree. If a student holds a master's degree, the student must complete at least 27 credit hours of required coursework, in addition to 15 credit hours of dissertation.

Of the total coursework taken, 27 hours must be formal course work exclusive of independent study and 15 credit hours must consist of dissertation research (EIN 7980). All remaining hours are determined with a faculty adviser and approved by the department. Details about this program are located in the Industrial Engineering PhD Handbook.

**Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree**

As a pre-doctoral student at the beginning of the PhD program, a preliminary plan of study must be developed with the graduate program director and meet with departmental approval. At this time transfer credit will be evaluated on a course-by-course basis. The student's plan of study itemizing the study plan must
be approved prior to the end of the first semester of studies by
the Graduate Director of the IEMS department.

After completion of the Qualifying Examination and admission
as a doctoral student, the official plan of study is developed that
must meet with departmental approval. The student's
dissertation committee approves the final plan of study after the
Candidacy Examination is passed. These steps are normally
completed within the first year of study beyond the master's
degree. The degree must be completed within seven years from
the date of admission as a pre-doctoral student and within four
years of passing the Candidacy Examination.

The Department of Industrial Engineering and Management
Systems monitors student progress and may dismiss a student if
performance standards or academic progress are not maintained.
Satisfactory academic performance in a program includes, but is
not limited to, maintaining at least a 3.0 GPA in all graduate
work taken as part of (or transferred into) the plan of study.
Satisfactory performance also involves maintaining the
standards of academic progress and professional integrity
expected in our discipline. Failure to maintain these standards
may result in dismissal from the program.

Required Courses: 6 Credit Hours

- ESI 6891 - IEMS Research Methods 3 Credit Hours
- ESI 6247 - Experimental Design and Taguchi Methods 3 Credit Hours

Elective Courses: 51 Credit Hours

- At least seventeen unrestricted electives
- A maximum of 30 semester credit hours from an earned
  master's degree may be applied toward these requirements.
  Waived credits are evaluated on a course-by-course basis.

Dissertation: 15 Credit Hours

- EIN 7980 Dissertation (15 credits hours minimum)

List of Electives

Students, with the approval of their advisers and/or the graduate
program director, may select from the following groups of
courses to satisfy the needs of their research goals or career
objectives. To assist students in achieving their goals and
objectives, courses are grouped below to suggest focus areas,
only as guides for advising and course selection. The listing of
these courses does not guarantee that they will be offered by the
department in a particular year or semester.

In addition to the courses listed below, students may be allowed
to take courses from the following disciplines, with the approval
of the graduate program director, as an elective in their graduate
plan of study.

- Other Engineering Programs
- Computer Science
- Mathematics and Statistics
- Business Administration/Management

Group A: Human System Engineering/Ergonomics

- EIN 5248C - Ergonomics 3 Credit Hours
- EIN 5251 - Usability Engineering 3 Credit Hours
- EIN 6270C - Work Physiology 3 Credit Hours
- EIN 6258 - Human Computer Interaction 3 Credit Hours
- EIN 6279C - Biomechanics 3 Credit Hours
- EIN 6935 - Advanced Ergonomics Topics 3 Credit Hours
- EIN 6271 - Human Reliability 3 Credit Hours

Group B: Quality and Production Systems

- ESI 6225 - Quality Design and Control 3 Credit Hours
- ESI 6224 - Quality Management 3 Credit Hours
- EIN 5392C - Manufacturing Systems Engineering 3 Credit Hours
- EIN 6336 - Production and Inventory Control 3 Credit Hours
- EIN 6425 - Scheduling and Sequencing 3 Credit Hours
- EIN 5356 - Cost Engineering 3 Credit Hours
- ESI 5227 - Total Quality Improvement 3 Credit Hours

Group C: Management Systems

- EIN 6182 - Engineering Management 3 Credit Hours
- EIN 5117 - Management Information Systems 3 Credit Hours
- EIN 6370 - Innovation in Engineering Design 3 Credit Hours
- EIN 6339 - Operations Engineering 3 Credit Hours
- EIN 5108 - The Environment of Technical Organizations 3 Credit Hours
Group D: Simulation, Optimization, and Modeling

- ESI 6336 - Queueing Systems 3 Credit Hours
- ESI 5306 - Operations Research 3 Credit Hours
- ESI 6418 - Linear Programming and Extensions 3 Credit Hours
- ESI 6532 - Object-Oriented Simulation 3 Credit Hours
- ESI 5531 - Discrete Systems Simulation 3 Credit Hours
- EIN 5255C - Interactive Simulation 3 Credit Hours
- EIN 6528 - Simulation Based Life Cycle Engineering 3 Credit Hours
- EIN 6645 - Real-Time Simulation Agents 3 Credit Hours
- EIN 6936 - Seminar in Advanced Industrial Engineering 3 Credit Hours
- ESI 6891 IEMS Research Methods 3 Credit Hours
- ESI 6217 - Statistical Aspects of Digital Simulation 3 Credit Hours

Group E: Systems Engineering

- ESI 6358 - Decision Analysis 3 Credit Hours
- ESI 5359 - Risk Assessment and Management 3 Credit Hours
- EIN 6215 - System Safety Engineering and Management 3 Credit Hours
- ESI 5236 - Reliability Engineering 3 Credit Hours
- EIN 5346 - Engineering Logistics 3 Credit Hours

Examinations

At Qualifying Examination (QE) time students should know their intended direction of research but they do not necessarily know their specific topic/problem. The QE’s objective is to determine whether the student’s knowledge allows for a thorough understanding of methods and techniques discussed in the literature in his/her area(s) of interest.

The IEMS PhD Qualifying Examination is a take-home exam designed to test the student's knowledge of fundamentals within the discipline and to assess the student's ability to conduct independent research and to think analytically, creatively, and independently. Exam questions address the student's global research awareness as well as his/her analytical thinking, research potential, and communication skills. The student must be able to understand the field's literature, as well as to summarize and discuss research findings.

It is strongly recommended that students take ESI 6891 IEMS Research Methods prior to taking the Qualifying Examination. While thinking about taking the Qualifying Examination, students are strongly encouraged to evaluate their options for research and make informed decisions about their area of research interests. It is recommended that students seek advice from faculty members whose research interests match their own research areas in order for the students to properly select their electives and develop the appropriate plan of study.

In addition to the Qualifying Examination, the student must pass a Candidacy Examination and a Dissertation Defense Examination. Details about these examinations and other requirements are located in the Industrial Engineering PhD Handbook.

The Candidacy Examination may be taken any time after successful completion of the Qualifying Examination, but not in the same semester. The objective of the Candidacy Examination is to determine if the student has the breadth and depth of knowledge required to conduct independent research in the proposed area. The Candidacy Examination includes an oral presentation of a detailed dissertation proposal, which becomes the oral candidacy document, and the written component of the Candidacy Examination is satisfied by the proposal document, which becomes the required candidacy document.

The Dissertation Defense Examination is an oral examination taken in defense of the written dissertation. The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website and on the Events Calendar of the College of Graduate Studies website at least two weeks before the defense date.

Dissertation Committee Requirement

The doctoral committee must consist of a minimum of four members: at least three must be graduate faculty members from within the student's department, and one must be at large, from graduate faculty scholars outside the Industrial Engineering faculty. The committee chair must be a member of the graduate faculty who is approved to direct dissertations. Faculty members with joint appointments in IEMS may serve as department-faculty committee members. Adjunct faculty and off-campus experts who are graduate faculty scholars may serve as the outside-the-department person on the committee, as well as serve as co-chairs of the committee with the approval of the department Chair. The College of Graduate Studies reserves the right to review appointments to advisory committees, place a representative on any advisory committee, or appoint a co-adviser.
Joint faculty members may serve as committee chairs. Off-campus experts and adjunct faculty who are graduate faculty scholars may not serve as committee chairs, but may serve as co-chairs.

All committee members vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal or final dissertation must be approved by the advisory committee with no more than one dissenting vote.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours. Evidence of successful completion of these requirements must be received by the College of Graduate Studies one day prior to the start of classes for the semester in which a student wishes to enroll in dissertation hours.

- Completion or near completion of course work, except for dissertation hours.
- Successful completion of the candidacy examination, including successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.

Submittal of an approved program of study.

Equipment Fee

Students in the Industrial Engineering PhD program pay a $58 equipment fee each semester that they are enrolled. For part-time students, the equipment fee is $29 per semester.

Independent Learning

The Independent Learning requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

These application requirements are effective for those applying to Spring 2018 and beyond. For Fall 2017 application requirements, please visit http://2016-2017.graduatecatalog.ucf.edu/programs/.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended
- Bachelor's or Master's degree in Industrial Engineering or a closely related discipline
- Official, competitive score on the GRE taken within the last five years
- Résumé or Curriculum Vita
- Goal Statement
  The Goal Statement should discuss all relevant professional background and any previous research experience. The statement should explain the motivation behind the pursuit of a doctoral degree in Industrial Engineering at UCF. Future career goals after the completion of the applicant's doctoral study should be discussed.

  Most importantly, the applicant must clearly describe the particular area(s) of research interest. The applicant should identify at least one UCF faculty member who shares a similar research focus and is believed to be best suited to serve as a potential dissertation advisor.

  The goal statement should between 500 and 1,000 words.

- Three letters of recommendation
  The letters of recommendation should be from faculty members, university administrators and employers with a supervisory role of the applicant. The letters, which must be current to the application and must not be for another degree program, should address the educational and career
goals of applicant. The letter writers should also know the applicant well enough to discuss the applicant's capacity to perform, excel and succeed in a graduate program. Letters for PhD applicants must discuss the applicant's ability to perform graduate-level research. At least two of the letters should be furnished by college or university professors who are acquainted with the applicant.

Applications are accepted for the fall and spring terms only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Fellowships and assistantships may be awarded based on the student's GPA, GRE scores, letters of recommendation, curriculum vitae/resume, and goals statement.

Students must complete any needed articulation course work and pass a PhD Qualifying Examination in order to be admitted as a regular doctoral student. This exam is normally taken within the first year after all articulation work is completed.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Integrative Anthropological Sciences PhD ♦

Program Description

The Integrative Anthropological Sciences PhD emphasizes cross-disciplinary empirical research on the dynamics of transformation and change in societies past and present. The program integrates methodologies from the science and technology components of Science, Technology, Engineering, and Math (STEM) with the theoretical and analytical strengths of social science to address critical social challenges.

The curriculum is comprised of the following basic elements: 1) a core curriculum focused on methodological expertise; 2) a topical curriculum covering the dynamics of transformation in human societies; 3) professional competence in workplace skills embedded into all courses; and 4) experiential learning via independent research. The central purpose of the program is to produce graduates with the necessary methodological expertise and analytical skills to create innovative solutions to the ongoing challenges of local and global disparities, environmental and anthropogenic crises, and the resilience and vulnerability of human populations.

Curriculum

The Integrative Anthropological Sciences PhD requires 51 credit hours beyond an earned master's degree. Required coursework minimally includes 12 credit hours of core courses, 24 credit hours of elective courses, and 15 hours of dissertation research. If foundational or theoretical coursework is not present in the
earned master's, remaining credit hours may consist of additional electives, doctoral research, and a maximum of 12 credit hours of directed research and independent study.

Total Credit Hours Required: 51 Credit Hours Minimum beyond the Master's Degree

Required Courses: 12 Credit Hours

Core: 9 Credit Hours

- ANG 6002 - Proseminar in Anthropology 3 Credit Hours
- ANG 6931 - Science, Technology, and the Transformation of Human Societies 3 Credit Hours
- ANG 7075 - Advanced Anthropological Topics in Geospatial Analysis 3 Credit Hours

Research Methods: 3 Credit Hours

Select one course from the list below.

- ANG 6498 - Advanced Qualitative Methods in Anthropology 3 Credit Hours
- ANG 7496 - Advanced Quantitative Methods in Anthropology 3 Credit Hours

Elective Courses: 24 Credit Hours

Unrestricted Electives: 24 Credit Hours

All students in the doctoral program must complete 24 hours of unrestricted electives. The unrestricted electives offer the student the opportunity to explore their interests, further advance their methodological skills, and gain interdisciplinary experience. To fulfill their unrestricted electives requirement, students may also take graduate-level courses in programs outside the department, particularly in Biology, Sociology, Political Science, History, and the College of Health and Public Affairs but, outside courses must not exceed 12 credit hours. The student's faculty advisor and the Graduate Program Committee must approval all graduate courses taken outside the department. The student may also use the second methods course identified in the Core requirement as an Unrestricted Elective. The departmental course options for the Unrestricted Electives include the following:

- ANG 5094 - Writing in Anthropology 3 Credit Hours
- ANG 5100 - Archeological Sciences 3 Credit Hours
- ANG 5166 - Problems in Maya Studies 3 Credit Hours
- ANG 5167 - Maya Hieroglyphs 3 Credit Hours
- ANG 5191 - Mortuary Archaeology 3 Credit Hours
- ANG 5228 - Maya Iconography 3 Credit Hours
- ANG 5272 - Culture, Inequality and Global Development 3 Credit Hours
- ANG 5301 - Anthropology of Tourism 3 Credit Hours
- ANG 5307 Peoples and Culture of Latin America 3 Credit Hours
- ANG 5341 Caribbean Cultures 3 Credit Hours
- ANG 5486 - Quantitative Research in Anthropology 3 Credit Hours
- ANG 5531 - Nutritional Anthropology 3 Credit Hours
- ANG 5620 - Language and Culture 3 Credit Hours
- ANG 5622 Language, Culture, and Pedagogy 3 Credit Hours
- ANG 5738 - Advanced Medical Anthropology 3 Credit Hours
- ANG 5742 - Problems in Forensic Anthropology 3 Credit Hours
- ANG 5822 - Maya Field Research 3 Credit Hours
- ANG 5852 - GIS Methods in Anthropology 3 Credit Hours
- ANG 5853 - Advanced GIS Methods in Anthropology 3 Credit Hours
- ANG 5857 Peoples and Culture of Latin America 3 Credit Hours
- ANG 5938 - Advanced Medical Anthropology 3 Credit Hours
- ANG 6003 - Ethics in Anthropology 3 Credit Hours
- ANG 6021 - Advanced Topics in Environmental Transformations 3 Credit Hours
- ANG 6110 - Archaeological Theory and Method 3 Credit Hours
- ANG 6125C - Applied Materials Analysis in Anthropological Sciences 3 Credit Hours
- ANG 6144 - Contemporary Problems in the Study of Complex Societies 3 Credit Hours
- ANG 6168 - The Ancient Maya 3 Credit Hours
- ANG 6181C - GIS Applications in Anthropology 3 Credit Hours
- ANG 6184 - Advances in Archaeological Practice 3 Credit Hours
- ANG 6324 - Contemporary Maya 3 Credit Hours
- ANG 6390 Seminar in Cultural Anthropology 3 Credit Hours
- ANG 6405 - Food Security and Sustainability 3 Credit Hours
- ANG 6411 - Business Practices for the Anthropological Sciences 3 Credit Hours
- ANG 6467 - Advanced Topics in Medical Anthropology 3 Credit Hours
- ANG 6520C - Advanced Human Osteology 3 Credit Hours
- ANG 6536 - Advances in Bioarchaeology 3 Credit Hours
• ANG 6587 - Seminar in Biological Anthropology 3 Credit Hours
• ANG 6701 - Public and Applied Anthropology 3 Credit Hours
• ANG 6740C - Advanced Forensic Anthropology 3 Credit Hours
• ANG 6801 - Ethnographic Research Methods 3 Credit Hours
• ANG 6821C - Forensic Archaeology Field Methods 3 Credit Hours
• ANG 7184C - Applied Integrative Isotopic Sciences 3 Credit Hours

Proficiency Requirement

Prior to enrollment in dissertation hours, students are required to demonstrate a proficiency in a second language (other than English) or an additional methodological area dependent on the student's intended research area. The language requirement may be met by achieving an average grade of B or higher in two years' (four semesters) of a single undergraduate-level language that is relevant to the student's research. Students may meet this requirement by providing evidence of four semesters of undergraduate enrollment with a B average prior to admission to the program, by taking the necessary undergraduate-level courses during their program of study in the Ph.D. program, or by passing a university-administered equivalent proficiency examination that places them into the 5th-semester of higher of undergraduate language classes at UCF. The student may also meet this requirement with methodological skills (for example, statistics proficiency, qualitative methods proficiency etc) gained through appropriate and approved coursework. The Graduate Coordinator will determine which requirement is to be met.

Dissertation: 15 Credit Hours Minimum

ANG 7980 Dissertation Research 15 credit hours
In consultation with the advisor and with the approval of the Doctoral Program Committee, each student must secure qualified members of their dissertation committee. The dissertation committee will consist of a minimum four members. At least three members must be Anthropology Graduate Faculty, and the student's advisor will serve as the committee chair. One member must be from either outside the student's Department at UCF. Graduate faculty members must form the majority of any given committee. A Dissertation Committee must be formed prior to enrollment in dissertation hours.

A student who passes their candidacy exam (proposal defense) will begin the dissertation process. The dissertation serves as the culmination of the coursework that comprises this research-based degree. It must make a significant original theoretical, intellectual, practical, creative, or research contribution to the student's area within the discipline. Dissertations will be theoretically grounded, show expertise in the topic area, and utilize methodologically sound analysis of either quantitative data or mixed-methods data. The dissertation will be completed through a minimum of 15 hours of dissertation credit, which students will use to conduct original research.

Examinations

Written and Oral Qualifying Examination

The written and oral examination is to be completed by each student after completion of the four required core courses, ideally at the beginning of the third semester of coursework. This examination will test students on theoretical and methodological literature pertaining to the discipline. Exam questions will be based on the specific core course selections of individual students. Exam questions will be provided by course instructors and each exam will be assembled by the Doctoral Program Committee. If an exam-taking student's advisor is on the Doctoral Program Committee, they must recuse themselves from the exam assembly. The written component of the Qualifying Examination will be composed of 4-8 questions, but will not exceed 60 pages in total (references additional). Students will be given 5 days to complete the exam, starting at 9:00 a.m. on Monday before classes begin in the fall or spring semesters and ending at 5:00 p.m. on Friday the same week. Students are required to notify the Graduate Program Director of their intention to take the exam by June 1 for the fall semester and October 1, for the spring semester. The Exam Committee will be given 2 weeks to grade the exam and schedule the oral examination. An oral examination, to last no longer than 2 hours, will allow the Exam committee to ask the student questions pertaining to the written examination. Immediately after the oral examination, the Exam Committee will determine if the student passed the examination. A conditional pass will require students to revise and resubmit their answers to one or more questions deemed insufficient by the Exam Committee. Any student failing the examination must repeat the examination by the next fall semester. Students who fail the test in fall may retake the exam in the spring semester. They will be given sufficient notice to meet the October 1 notification deadline. A second failed attempt will result in dismissal from the program.
Candidacy Examination—Written Proposal and Oral Defense

Advancement to candidacy will require the successful defense of dissertation proposal. The purpose of the dissertation proposal is to explain the subject under investigation, place it within the existing scholarly literature, and to present the planned approach for conducting dissertation research. The proposal defense will take place in the semester prior to the one in which they intend to enroll in dissertation hours, normally during the 4th semester. Students may not schedule a proposal defense with their dissertation committee until they have passed the written and oral qualifying exam. The oral defense will be based on a written research proposal that follows the guidelines and format of the National Science Foundation (NSF) Doctoral Dissertation Improvement Grant. Once the student has completed their proposal in consultation with their advisor they will schedule a Proposal Defense. The defense is not to last more than 90 minutes. Immediately after this defense, the student's Dissertation Committee will meet to decide whether the student passed the written proposal and oral defense. A student who passes the candidacy examination is then permitted to begin the actual research and writing of the doctoral dissertation.

Independent Learning

As with all graduate programs, independent learning is an important component in the IAS doctoral program. Students will demonstrate independent learning through research seminars, directed research and the dissertation. Doctoral students are also expected to pursue additional independent reading beyond formal coursework relevant to their research and career direction.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree or its equivalent in Anthropology or a closely related discipline.
- A minimum cumulative GPA of 3.5 for all master's level work completed.
- Official, competitive GRE score taken within the last five years.
- A personal statement not to exceed 500 words.
- A curriculum vitae.
- A writing sample of at least 2,500 words demonstrating the ability to conduct graduate-level work.
- Three letters of recommendation.
- An on campus, by phone or Skype interview with a potential advisor, in coordination with the Doctoral Program Committee.
- International applicants whose first language is not English are required to submit results of the Test of English as a Foreign Language (TOEFL) or other equivalent test approved by the Graduate College unless they hold a degree from a US accredited institution. The TOEFL is strongly preferred. The minimum TOEFL score for full admissions consideration is 90 on the Internet-based test (IBT), 232 on the computer-based test, or 575 on the paper-based test. The minimum IELTS score is 7.0. Applicants should plan to take the appropriate test no later than November to ensure consideration of their applications by the December 1 deadline.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on an evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Materials Science and Engineering PhD

Program Description

The Materials Science and Engineering PhD program provides students with a fundamental and applied research-based education suitable for seeking employment in industry or academia.

The Materials Science and Engineering PhD program is designed for students with a master's degree in materials science and engineering, or closely related disciplines. The program provides students with a fundamental and applied research-based education suitable for seeking employment in industry or academia.

Curriculum

The Materials Science and Engineering PhD program requires a minimum of 72 credit hours beyond the bachelor's degree. The program requires 27 hours of formal course work exclusive of independent study and a minimum of 15 hours of dissertation research (EMA 7980). A minimum of 12 credit hours of elective coursework is required to be taken at UCF. Details of program requirements are located in the Materials Science and Engineering PhD Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Students entering the Materials Science and Engineering PhD program with a bachelor's degree are required to complete 72 credit hours of graduate coursework, of which 27 hours must be formal coursework, 12 credit hours must be elective courses taken at UCF and a minimum of 15 dissertation credit hours.

Students entering the Materials Science and Engineering PhD program with a master's degree are required to complete 72 credit hours of graduate coursework including up to 30 hours of credit transfer for formal courses from their master's degree. These students have to take at least 12 credit hours of formal elective courses as listed below at UCF and 27 credit hours of formal graduate coursework in total.

The rest of the hours in the PhD program can be chosen by the student in consultation with the adviser and the dissertation committee and with the approval of the program director.

Core Courses: 12 Credit Hours

The following core courses are used as the basis for the doctoral qualifying exam and are recommended, but not required:

- EMA 5104 - Intermediate Structure and Properties of Materials 3 Credit Hours
- EMA 5106 - Metallurgical Thermodynamics 3 Credit Hours
- EMA 5317 - Materials Kinetics 3 Credit Hours
- EMA 6126 - Physical Metallurgy 3 Credit Hours or
- EMA 6319 - Colloids and Interface Engineering 3 Credit Hours

Elective Courses: 57 Credit Hours

The program requires that 27 credit hours must be formal coursework, exclusive of independent study. Of these, it is required that 12 credit hours consist of elective courses taken at UCF, outside of the core courses listed above. Note that if both EMA 6126 - Physical Metallurgy and EMA 6319 - Colloids and Interface Engineering Colloids and Interface Engineering are taken, one of them may be taken as an elective. Elective courses that are commonly taught in Materials Science and Engineering are listed below:

- EMA 5104 - Intermediate Structure and Properties of Materials 3 Credit Hours
- EMA 5106 - Metallurgical Thermodynamics 3 Credit Hours
- EMA 5317 - Materials Kinetics 3 Credit Hours
- EMA 6626 - Mechanical Behavior of Materials 3 Credit Hours
- EMA 5108 - Surface Science 3 Credit Hours
- EMA 5140 - Introduction to Ceramic Materials 3 Credit Hours
- EMA 6130 - Phase Transformation in Metals and Alloys 3 Credit Hours
- EMA 6136 - Diffusion in Solids 3 Credit Hours
- EMA 5585 - Materials Science of Thin Films 3 Credit Hours
- EMA 6516 - X-ray Diffraction and Crystallography 3 Credit Hours
- EMA 5586 - Photovoltaic Solar Energy Materials 3 Credit Hours
- EMA 5060 - Polymer Science and Engineering 3 Credit Hours
- EMA 6518 - Transmission Electron Microscopy 3 Credit Hours
- EMA 5705 - High Temperature Materials 3 Credit Hours
- EMA 5610 - Laser Materials Processing 3 Credit Hours
- EML 6085 - Research Methods in Mechanical and Aerospace Engineering 3 Credit Hours
- EMA 6149 - Imperfections in Crystals 3 Credit Hours

Electives Outside EMA Offerings

Other courses may be included in the elective hours with the approval of the student's faculty adviser and the Materials Science and Engineering graduate program director.

- CHM 5450 - Polymer Chemistry 3 Credit Hours
- CHM 5451C - Techniques in Polymer Science 3 Credit Hours
- CHM 5715C - Optical Materials Processing and Characterization Techniques 3 Credit Hours
- CHM 6711 - Chemistry of Materials 3 Credit Hours
- EEE 5332C - Thin Film Technology 3 Credit Hours
- EEE 5352C - Semiconductor Material and Device Characterization 3 Credit Hours
- EEE 6326C - MEMS Fabrication Laboratory 3 Credit Hours
- EML 5290 - Introduction to MEMS and Micromachining 3 Credit Hours
- EML 5291 - MEMS Materials 3 Credit Hours
- OSE 5312 - Light Matter Interaction 3 Credit Hours
- OSE 6432 - Guided Waves and Optoelectronics 3 Credit Hours
- PHY 5140C - Ion-Solid Interactions 3 Credit Hours
- PHZ 5405 - Condensed Matter Physics 3 Credit Hours

Dissertation: 15 Credit Hours

The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website, www.cecs.ucf.edu/graddefense and on the Events Calendar of the College of Graduate Studies website at least two weeks before the defense date.

- EMA 7980 15 Credit Hours minimum

Examinations

Both a qualifying exam and a candidacy exam are required. The doctoral qualifying exam is offered twice each year, during the fall and shortly after the end of the spring semesters. This is a two-day written examination intended to evaluate the student's mastery of the field of Materials Science and Engineering. Depending on their area of research specialization and with their faculty adviser's approval, students may choose to take one of two versions of the exam. One focuses on Nanomaterials and the second is more broadly based in Materials Science Engineering. Details of the content of the two exams may be found at the departmental website, http://mse.ucf.edu/graduateprogram/CurrentStudents.php. The candidacy exam should be taken in the academic semester immediately following the student's passing of the qualifying exam and is scheduled by mutual agreement of the student and his/her dissertation committee. The student must prepare a written description of their proposed dissertation research prior to the examination, and present that to their dissertation committee to review prior to the candidacy examination. Additionally, the student may be questioned orally during the exam by the dissertation committee on topics relevant to the proposed dissertation research.

Admission to Candidacy

The following items are required to be admitted to candidacy and enroll in dissertation hours (enrollment in dissertation hours begins the semester following the completion of these requirements). Evidence of meeting these requirements must be received by the College of Graduate Studies by the day before the first day of classes for the semester in which a student wishes to enroll in dissertation hours.
• Completion of 51 credit hours of course work, except for dissertation hours.
• Successful completion of the qualifying examination.
• Successful completion of the candidacy examination.
• Successful defense of the written dissertation proposal.
• The dissertation advisory committee is formed, consisting of approved Graduate Faculty and Graduate Faculty Scholars.
• Submission of an approved program of study.

Dissertation Defense

All dissertations in Materials Science and Engineering must represent high-quality scientific work. Prior to scheduling the dissertation defense, the high quality of the research must be evidenced by: (1) two refereed journal publications with the doctoral candidate as first author that are in print, or formally accepted for publication, or (2) satisfaction of an alternative publication requirement as recommended by the Dissertation Advisory Committee and approved by a majority vote at a meeting of the program faculty (those having primary or secondary appointments in the MSE Department).

The dissertation proposal must be successfully defended and accepted by the Dissertation Committee in a meeting convened for that purpose. The dissertation proposal must be a complete dissertation document provided to the committee at least two weeks prior to the date of defense. In addition, the high quality of the research must be evidenced by two refereed journal publications of the doctoral candidate as first author that are in print, or formally accepted for publication, prior to the dissertation defense.

All members of the Dissertation Committee vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal and final dissertation must be approved by a majority of the advisory committee.

Equipment Fee

Full-time students in the Materials Science and Engineering PhD program pay $17 per semester for equipment each semester that they are enrolled. Part-time students pay $8.50 per semester.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

• One official transcript (in a sealed envelope) from each college/university attended.
• Official, competitive GRE score taken within the last five years.
• Master's and/or bachelor's degree in Materials Science and Engineering or a closely related discipline.
• Résumé.
• Statement about educational, research, and professional career objectives should include the student's intention for full or part-time study and their desire for an assistantship or fellowship.
• Three letters of recommendation.
• Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Mathematics PhD

Program Description

The Mathematics PhD program prepares students with a broad base in pure, applied and industrial mathematics. The goal of the program is to produce students who will attain distinction in their fields of research. In order to achieve this, the program has required core courses as well as a set of electives providing cross-disciplinary subjects. All students are required to take electives outside the department.

Students in the program can specialize in one of many aspects of mathematics, including Approximation Theory, Applied and Computational Harmonic Analysis, Big Data and Mathematical Statistics, Combinatorics and Graph Theory, Commutative Algebra and Algebraic Geometry, Control and Optimization, Differential and Symplectic Geometry, Fluid and Plasma Dynamics, Functional Analysis, Inverse and Ill-posed Problems, Mathematical Biology, Mathematical Finance, Nonlinear Waves and Nonlinear Dynamics, Numerical Analysis, Orthogonal Polynomials, Partial Differential Equations, Probability and Stochastic Analysis, Tomography and Medical Imaging, and Wave Propagation. Responding to this wide variety of interests, the program offers flexibility in the composition of the core courses as well as the candidacy examination. The program is comprehensive with opportunities for students to pursue research in a variety of disciplines.

Curriculum

The Mathematics PhD program consists of at least 75 credit hours of course work beyond the bachelor's degree, of which a minimum of 39 hours of formal course work, exclusive of independent study, and 15 credit hours of dissertation research (7980) are required. The program requires 18 credit hours of core courses, and 6 to 12 credit hours in two 2-semester sequences.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—18 Credit Hours

The remaining 30 to 36 credit hours consist of additional dissertation research (7980 or 7919), at least 15 credit hours of regular classroom elective courses, and at most 12 credit hours of independent study or independent directed research. Electives require the approval of the adviser and the graduate program director; up to 12 credit hours may be taken outside the department. At least one-half of the program courses must be taken at the 6000 level. Students who pass the qualifying examination may substitute some of the core courses at the approval of the adviser and the graduate program director.

All students are required to complete the following courses with grade of "B" or better

- MAA 5228 - Analysis 1
- 3 Credit Hours
- MAA 6229 - Analysis II 3 Credit Hours
- MAT 5712 - Scientific Computing 3 Credit Hours
- MAP 6385 - Applied Numerical Mathematics 3 Credit Hours
- MAS 5145 - Advanced Linear Algebra and Matrix Theory 3 Credit Hours
- MAA 6405 - Complex Variables 3 Credit Hours or
- MAP 5336 - Ordinary Differential Equations and Applications 3 Credit Hours or
- MAA 6306 - Real Analysis 3 Credit Hours or
- MAP 6111 - Mathematical Statistics 3 Credit Hours

Elective Courses—42 Credit Hours

At least 21 hours of course work here must be formal course work, exclusive of independent study.

Restricted Electives—6-12 Credit Hours

All students are required to complete two 2-semester sequences. Sequences are pairs of related courses that give advanced knowledge in an area of mathematics.

Each sequence must be approved by the dissertation adviser, dissertation committee, and the graduate program director. The following shows examples of acceptable sequences using current courses. We expect that other sequences will be developed as our program grows. Note that some sequences consist of a core course plus one elective, while others consist of two electives. Thus, the credit hours in this requirement are variable (6 to 12 credit hours). A written examination on two such sequences will be required as part of the candidacy examination (see more details in Candidacy Examination section).

- MAP 6407 - Integral Equations and the Calculus of Variations 3 Credit Hours
- MAP 6408 - Perturbations and Asymptotic Methods 3 Credit Hours
- MAA 6405 - Complex Variables 3 Credit Hours
- MAA 6404 - Complex Analysis 3 Credit Hours
- MAD 5205 - Graph Theory I 3 Credit Hours
- MAD 6309 - Graph Theory II 3 Credit Hours
- MAP 5336 - Ordinary Differential Equations and Applications 3 Credit Hours
- MAP 6356 - Partial Differential Equations 3 Credit Hours

- MAA 6238 - Measure and Probability I 3 Credit Hours and
- MAA 6245 - Measure and Probability II 3 Credit Hours
- MAP 6111 - Mathematical Statistics 3 Credit Hours and
- MAA 7239 - Asymptotic Methods in Mathematical Statistics 3 Credit Hours
- MAA 6306 - Real Analysis 3 Credit Hours and
- MAA 6506 - Functional Analysis 3 Credit Hours

Unrestricted Electives—30-36 Credit Hours

Electives are chosen in consultation with the student's advisory committee and may be chosen from the suggested options: Discrete Mathematics, General Applied Mathematics, Mathematical Computer Tomography, Image Processing and Computer Graphics, Mathematical Finance, Mathematical Physics, Pure Mathematics, and Mathematical Statistics. A list of elective course options can be obtained from the graduate program director.

Courses taken outside the Mathematics department must be approved by the adviser and graduate program director. These courses are selected in consultation with the student's advisory committee.

Dissertation—15 Credit Hours Minimum

- XXXX 7980 Dissertation Research 15 Credit Hours (minimum)

Qualifying Examination

The qualifying/comprehensive examination is based on the core course work (MAA 5228 - Analysis I, MAA 6229 - Analysis II, MAS 5145 - Advanced Linear Algebra and Matrix Theory). To continue in the PhD program students must pass the examination at the PhD level. Two attempts are permitted. The examination will be administered twice a year: once in the Fall semester and the other in the Spring semester. To take the examination, students must have earned a "B" or better in each core course, must have a minimum grade point average of 3.0 (out of 4.0) in the program, or must obtain permission from the graduate program director. Students will normally take the examination after the first year and are expected to have passed it by the end of the second year of study unless a written request for a postponement has been approved by the Graduate Committee at
least two months before the examination date. The student must pass the Qualifying Examination in at most two attempts.

It is strongly recommended that the student select a dissertation adviser by the completion of 18 credit hours of course work, and it is strongly recommended that the student works with the dissertation adviser to form a dissertation committee within two semesters of passing the Qualifying Examination.

Candidacy Examination

The Candidacy Examination consists of a written examination based on the materials from two of the selected two-semester sequence courses taken by the students beyond the core courses on Analysis and Advanced Linear Algebra (MAA 5228, MAA 6229, MAS 5145). A committee formed or selected by the Graduate Committee or the graduate program director is responsible for preparing and grading the written examinations.

After passing the candidacy examination and meeting other requirements, the student can register for Doctoral Dissertation (MAP 7980 or MAA 7980). A minimum of 15 Doctoral Dissertation credit hours are required. The Candidacy Examination can be attempted after passing the qualifying examination. The Candidacy Examination must be completed within three years after passing the qualifying examination. A student must successfully pass the Candidacy Examination within at most two attempts.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Dissertation Proposal Examination

After passing the candidacy examination, the student will prepare a dissertation proposal and orally present it to the dissertation advisory committee for approval. The proposal will include a description of the research performed to date and an agenda for the research planned to be completed for the dissertation. In addition to standards of correctness, indicating a suitable level of mastery of the material of the area of the dissertation, and suitability of the proposed dissertation topic, the presentation must meet current standards for professional presentations within the discipline of mathematics. For the successful completion of the Dissertation Proposal Examination the presentation must be judged as passing the requirements for the examination by the majority of the dissertation committee. This exam must be passed within 18 months of passing the candidacy examination and not later than the end of the sixth year of graduate study. A candidate must pass this examination within at most two attempts.

Dissertation Defense

Upon completion of a student's research, the student's committee schedules an oral defense of the dissertation. Most students complete the program within five years after obtaining their bachelor's degree. Students are expected to complete the dissertation in no more than seven years from the date of admission to the program.

Independent Learning

The required 15 credit hours of dissertation will provide ample opportunities for students to gain the independent learning experience through studying published research papers and deriving, on their own, new and meaningful research results.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

- In addition to the general UCF graduate application requirements, applicants to this program must provide:
- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's degree in related field.
- Official, competitive GRE score, taken in the last five years.
- Three letters of recommendation.
- Goal statement.
- Résumé.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of the program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.
Transfer of credits from other programs will be considered on a course-by-course basis. Additionally, students entering the graduate program with regular status are assumed to have a working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), and maturity in the language of advanced calculus (at the level of MAA 4226). Students who are not adequately prepared in one or more of these areas can select appropriate courses from the undergraduate curriculum to make up such deficiencies. Such courses, unless specially approved, do not count toward the graduate degree.

Mathematics PhD, Financial Mathematics Track

Track Description

The Financial Mathematics track in the Mathematics PhD program is designed to prepare students for research and leadership positions in industry, government, non-governmental organizations, and academia requiring employment of financial mathematics.

Curriculum

The Mathematics PhD program consists of at least 75 credit hours of course work beyond the bachelor's degree, of which a minimum of 48 hours of formal course work, exclusive of independent study, are required. The program requires 36 credit hours of core courses and 15 credit hours of dissertation research (7980).

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—36 Credit Hours

The remaining credit hours consist of additional dissertation research (7980 or 7919), at least 12 credit hours of regular classroom elective courses, and at most 12 credit hours of independent study or independent directed research. Students who pass the qualifying examination may substitute some of the
core courses with the approval of the adviser and the graduate program director.

All students are required to complete the following courses with grade of "B" or better.

- MAA 5228 - Analysis I 3 Credit Hours
- MAA 6229 - Analysis II 3 Credit Hours
- MAT 5712 - Scientific Computing 3 Credit Hours
- MAP 5606 - Differential Equations for Financial Mathematics 3 Credit Hours
- MAP 5612 - Computational Methods for Financial Mathematics I 3 Credit Hours
- MAP 5641 - Financial Mathematics I 3 Credit Hours
- MAP 6385 - Applied Numerical Mathematics 3 Credit Hours
- MAP 6642 - Financial Mathematics II 3 Credit Hours
- MAP 6616 - Computational Methods for Financial Mathematics II 3 Credit Hours
- MAP 6646 - Risk Management for Financial Mathematics 3 Credit Hours
- MAS 5145 - Advanced Linear Algebra and Matrix Theory 3 Credit Hours
- STA 6857 - Applied Time Series Analysis 3 Credit Hours

Elective Courses: 24 Credit Hours

Elective courses require the approval of the adviser and the graduate program director; up to 12 credit hours of elective courses may be taken outside the department. At least one-half of the program courses must be taken at the 6000 level. At least 12 hours of elective course work must be formal course work, exclusive of independent study.

Electives are chosen in consultation with the student's advisory committee and may be chosen from the suggested options: Discrete Mathematics, General Applied Mathematics, Mathematical Computer Tomography, Image Processing and Computer Graphics, Mathematical Finance, Mathematical Optics, Mathematical Physics, Pure Mathematics, Rational Mechanics, Signal Analysis, and Mathematical Statistics. A list of elective course options can be obtained from the graduate program director.

Courses that are taken outside the Mathematics department must be approved by both the adviser and graduate program director. These courses are selected in consultation with the student's advisory committee.

Dissertation: 15 Credit Hours Minimum

After passing the candidacy examination and meeting the other requirements that are required for admission to candidacy, the student can register for Doctoral Dissertation (MAP 7980). A minimum of 15 Doctoral Dissertation credit hours are required for the degree.

- MAP 7980 - Dissertation Research 15 Credit Hours (minimum)

Qualifying Examination

The qualifying/comprehensive examination is based on the core course work. To continue in the PhD program, students must pass the examination at the PhD level. Two attempts are permitted. The examination will be administered twice a year: one in the Fall semester and the other in the Spring semester. To take the examination, students must have earned a "B" or better in each core course, must have a minimum grade point average of 3.0 (out of 4.0) in the program, or must obtain permission from the graduate program director. Students will normally take the examination after the first year and are expected to have passed it by the end of the second year of study, unless a written request for a postponement has been approved by the Graduate Committee at least two months before the examination date. The student must pass the Qualifying Examination in at most two attempts.

It is strongly recommended that the student select a dissertation adviser by the completion of 18 credit hours of course work, and it is strongly recommended that the student works with the dissertation adviser to form a dissertation committee within two semesters of passing the Qualifying Examination.

Candidacy Examination

The Candidacy Examination consists of a written examination based on the materials from two selected two-semester sequence courses taken by the students. A committee formed or selected by the Graduate Committee or the graduate program director is responsible for preparing and grading the written examinations.

Each sequence that is selected for the candidacy examination must be approved by the dissertation adviser, the dissertation committee, and the graduate program director. Students in the Financial Mathematics Track will ordinarily select one of the sequences for their candidacy examination to be MAP 5XXX/MAP 6XXX Financial Mathematics I and II.

The Candidacy Examination can be attempted after passing the qualifying examination. The Candidacy Examination must be
completed within three years after passing the qualifying examination. A student must successfully pass the Candidacy Examination within at most two attempts.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Dissertation Proposal Examination

After passing the candidacy examination, the student will prepare a dissertation proposal and orally present it to the dissertation advisory committee for approval. The proposal will include a description of the research performed to date and an agenda for the research planned to be completed for the dissertation. In addition to standards of correctness, indicating a suitable level of mastery of the material of the area of the dissertation, and suitability of the proposed dissertation topic, the presentation must meet current standards for professional presentations within the discipline of mathematics. For the successful completion of the Dissertation Proposal Examination, the presentation must be judged as passing the requirements for the examination by the majority of the dissertation committee. This exam must be passed within 18 months of passing the candidacy examination and not later than the end of the sixth year of graduate study. A candidate must pass this examination within at most two attempts.

Dissertation Defense

Upon completion of a student's research, the student's committee schedules an oral defense of the dissertation. Most students complete the program within five years after obtaining their bachelor's degree. Students are expected to complete the dissertation in no more than seven years from the date of admission to the program.

Independent Learning

The required 15 credit hours of dissertation will provide ample opportunities for students to gain the independent learning experience through studying published research papers and deriving, on their own, new and meaningful research results.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's degree in related field.
- Official, competitive GRE score, taken in the last five years.
- Three letters of recommendation.
- Goal statement.
- Résumé.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of the program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Transfer of credits from other programs will be considered on a course-by-course basis. Additionally, students entering the graduate program with regular status are assumed to have a working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), boundary value problems, statistics, computer programming, and maturity in the language of advanced calculus (at the level of MAA 4226). Students who are not adequately prepared in one or more of these areas can select appropriate courses from the undergraduate curriculum to make up such deficiencies. Such courses, unless specially approved, do not count toward the graduate degree.

Mechanical Engineering PhD

Program Description

The Mechanical Engineering PhD program prepares students with an in depth study and emphasis on research in Aerospace Systems, Mechanical Systems, or Thermofluids.

The Doctor of Philosophy degree in Mechanical Engineering is intended for students with a master's or a bachelor's degree in Mechanical or Aerospace engineering or a closely related discipline. The doctoral program is intended to allow students to study in depth, with an emphasis on research in Aerospace Systems, Mechanical Systems, or Thermofluids.

Curriculum

The Mechanical Engineering PhD program requires a minimum of 72 credit hours beyond a bachelor's degree. This program requires 15 dissertation credit hours minimum and may include up to a total of 12 credit hours combined of directed (XXX 6918) or doctoral research (XXX 7919) and/or of independent study (6908) with an approved Program of Study. At least 39 hours of the program of study must consist of formal coursework, exclusive of directed research (XXX 6918), doctoral research (XXX 7919) and independent study (XXX 6908). The rest of the hours can be chosen by the student in consultation with the adviser and the dissertation committee and with the approval of the graduate program coordinator. Details about this program are located in the Mechanical Engineering PhD Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Students entering the program with a master's degree are required to complete 42 credit hours minimum, of which 15 credit hours minimum must be formal coursework, exclusive of directed research (XXX 6918), doctoral research (XXX 7919), and independent study (XXX 6908), and 15 credit hours minimum of dissertation research (XXX 7980). No more than 12 credit hours combined of directed (XXX 6918) or doctoral research (XXX 7919) and/or independent study (XXX 6908) may be taken toward fulfilling the degree program of study coursework requirements.

Students entering the program with a bachelor's degree are required to complete 72 credit hours minimum, of which 39 credit hours minimum must be formal coursework, exclusive of directed research (XXX 6918), doctoral research (XXX 7919), and independent study (XXX 6908), and 15 credit hours minimum of dissertation research (XXX 7980). No more than 12 credit hours combined of directed (XXX 6918) or doctoral research (XXX 7919) and/or independent study (XXX 6908) may be taken toward fulfilling the degree program of study coursework requirements.

The rest of the hours in the PhD program can be chosen by the student in consultation with the adviser and the dissertation committee and with the approval of the Graduate Coordinator. These credit hours may include doctoral directed research hours or doctoral dissertation hours.
Unless a completed (signed) program of study itemizing the study plan is approved prior to the end of the first semester of studies, the Graduate Director of the MMAE department may choose not to accept any part of the coursework (including independent studies and/or directed research) taken by the student on a program of study subsequently submitted by the student.

Admission to doctoral status requires that the student (1) pass a PhD Qualifying Examination, (2) establish a Doctoral Advisory Committee and (3) submit a departmentally approved Program of Study. These steps are normally completed within the first year of study beyond the master's degree.

Students must register for the seminar course a minimum of four times during their graduate career in the doctoral program. Students must complete the EML 5936 seminar course twice prior to taking the candidacy exam and twice after completing the candidacy exam. The students must also complete the course with a satisfactory (S) grade in all attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.

- EML 5090 - Mechanical and Aerospace Seminar 0 Credit Hours

Elective Courses: 57 Credit Hours

- May include up to a total of 12 credit hours combined of Directed (XXX 6918) or Doctoral Research (XXX 7919) and/or of Independent Study (6908)
- At least 45 credit hours must be formal coursework, exclusive of independent study, doctoral research and/or directed research.

Dissertation: 15 Credit Hours

- EML 7980 15 Credit Hours minimum

Examinations

In addition to the Qualifying Examination discussed above, the student must pass a Candidacy Examination and a Dissertation Defense Examination. The Candidacy Examination is taken near the end of the course work and consists of a written and oral presentation of a research proposal. The MMAE department requires that a PhD student submits his/her candidacy exam the academic semester immediately following his/her successfully passing the PhD Qualifying Exam. The Dissertation Defense Examination is an oral examination taken in defense of the written dissertation. The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's advisor and posted on the college's website and on the Events Calendar of the College of Graduate Studies website at least two weeks before the defense date.

More information on these examinations and other requirements of the PhD program are contained in the Mechanical Engineering PhD Handbook.

Dissertation Committee

The doctoral committee must consist of a minimum of five members: three must be graduate faculty members from within the student's department, and one must be at large from outside the Mechanical, Materials and Aerospace Engineering Department. The committee Chair must be a member of the graduate faculty approved to direct dissertations. Joint faculty members serve as department-faculty committee members as well as chairs of dissertation committees. Adjunct faculty and off-campus experts, if approved graduate faculty scholars, may serve as the outside-the-college person in the committee. Program areas may further specify additional committee membership. The UCF College of Graduate Studies reserves the right to review appointments to advisory committees, place a representative on any advisory committee, or appoint a co-adviser.

All members vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal and final dissertation must be approved by a majority of the advisory committee.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours (enrollment in dissertation hours begins the semester following the completion of these requirements). Evidence of meeting these requirements must be received by the College of Graduate Studies by the day before the first day of classes for the semester in which a student wishes to enroll in dissertation hours.

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the written dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved Graduate Faculty and Graduate Faculty Scholars.
- Submission of an approved program of study.
Equipment Fee

Students in the Mechanical Engineering PhD program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

MAE Department Graduate Seminar Requirement

The MAE Graduate seminar is a zero (0) credit hour (S/U) course that is offered each fall and spring academic semesters. Prior to graduation, all MAE graduate students who are pursuing a PhD dissertation are required to register, participate, and receive a satisfactory (S) for four (4) semesters of MAE Graduate seminar, with at least two of these taken prior to candidacy.

Independent Learning

The Independent Learning Requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Bachelor's or Master's degree in Mechanical or Aerospace Engineering or a closely related discipline.
- Résumé.
- Statement about educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the graduate program director for more information.

Application Deadlines

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.
Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Modeling and Simulation PhD

The UCF School of Modeling, Simulation, and Training (SMST) was recently approved beginning with the 2018-2019 academic year. The SMST is home to UCF's renowned Institute for Simulation and Training (IST) and the Modeling and Simulation graduate programs. This designation as a school is a formal recognition of the exceptional growth and success of IST and the graduate program internationally, nationally, and within the local Central Florida region.

Program Description

The Modeling and Simulation PhD is an interdisciplinary degree primarily intended for students with an academic or work background in mathematics, sciences, engineering, or computer science who wish to pursue a career in academia, government, defense, entertainment, technology, service or manufacturing.

Simulation is the quintessential utility tool. In one way or another, just about every engineering or scientific field uses simulation as an exploration, modeling, or analysis technique. Simulation is not limited to engineering or science. Simulation is used in training, management, and concept exploration and involves constructing human-centered, equipment-centered, and/or stand-alone computer-based models of existing as well as conceptual systems or processes. The purpose of simulation is to evaluate the behavior of the human, organization, equipment, and/or systems under study through the evaluation of output from the corresponding simulation construct. Because of the scale and complexity of modeling and simulation, practitioners have developed both generalized and specialized skills.

Input from industry and government M&S users and developers has been instrumental in identifying the key competencies for M&S professionals and has been critical to the development of this curriculum. The curriculum is designed to provide a broad overall perspective of the developing simulation industry and an awareness of the economic considerations. Upon completion of the program, graduates will have the diverse training necessary to enable them to work in varied capacities in government agencies, or in the defense, service, entertainment, and manufacturing industries.

Students in the Modeling and Simulation graduate program have often focused their study and research efforts in one or more of the following research areas:

Behavioral Cybersecurity

The Behavioral Cybersecurity in M&S research area has attracted those who wish to gain expertise in the latent cognitive aspects of security for computer systems, servers, mobile devices, networks, software, and network-enabled devices. Typical problem areas for behavioral aspects of cybersecurity include insider threats, hacker motivations, user training and education, digital ethics, cyber law and policy, senior leader education, and cyber workforce development and education. Typical courses include Behavioral Aspects of Security, Cyber Operations Lab, Emerging Cyber Issues, Digital Ethics, Human Cognition and Learning, Cyber Crime and Criminal Justice, and Data Mining Methodology I.

Human Systems

The Human Systems in M&S research area has attracted those who wish to gain expertise in the content and techniques of human behavior in simulation systems, including human factors, human-computer interaction, virtual worlds, statistical and quantitative procedures, experimental design, computer techniques, and other research methodologies. Typical problem areas for R&D include human-in-the-loop simulation; team performance under stress; and use of visual, audio, haptic, and other sensory input/output modalities to coordinate human-machine activities. Typical courses include Human Factors, Training Systems Engineering, Human Computer Interaction, Intelligent Simulation, and Distributed Learning.

Computer Visualization

Computer Visualization in M&S is a research area that attracts those who wish to gain expertise in technical aspects of computer graphic systems, virtual environments, and human-
centered simulation systems applying the state-of-the-art in computer graphics and other human-interface technologies. Typical courses include Human Computer Interaction, Computer Graphics Systems, Computer Vision, Machine Perception, Human-Virtual Environment Interaction, and Sensation and Perception. Students in this research area typically have an interest in the area of Emerging Media, which focuses on the development of new forms of interactive media and the creation of story-driven content for them such as interactive works of art, electronic games, virtual reality, the Internet, portable devices and mobile applications, wearable computers, etc.

Simulation Modeling and Analysis

The Simulation Modeling and Analysis research area attracts those who desire to gain expertise in using simulation as an optimization tool for effective design, planning, analysis, and decision-making. The emphasis of this area is on problem definition, model formulation, design of simulation experiments, and model-based analysis. This area attracts those who seek to develop skills in the application of advanced quantitative methods to modeling and simulation. Building on backgrounds in operations research, mathematics or statistics, they should gain experience in modeling and simulation through the application of optimization, mathematical and statistical theory to build multidisciplinary simulation models and conducting rigorous simulation experimentation. A graduate will be prepared to work with corporate and government decision-makers as they model and evaluate the impacts of proposed policies and system designs. Typical courses include Engineering Statistics, Statistical Aspects of Digital Simulation, and Mathematical Modeling, Discrete Systems Simulation, Object-Oriented Simulation, Experimental Design, and Quantitative Aspects of Modeling and Simulation.

Simulation in Healthcare

Simulation in Healthcare is a fast growing area in M&S. Issues related to bringing down the cost of healthcare and reducing costly medical errors are generating many new opportunities related to systems analysis, communication between healthcare providers and patients, and simulation-based training, to name a few. Currently a disproportionate amount of the US economy goes to healthcare, at least twice as much as the average of the 25 richest nations, and health outcomes in the US place the country near the bottom of this group of countries. M&S can contribute significantly towards improving this situation. Typical courses include Discrete Systems Simulation, Experimental Design, and Object-Oriented Simulation, Engineering Statistics, Human Computer Interaction.

Interactive Simulation and Intelligent Systems

Interactive Simulation and Intelligent Systems research attracts those who wish to pursue or are currently pursuing careers in the training simulation/simulator industries. Graduates specializing in this research area typically are interested in creating designs for simulators and simulator-based training systems and to apply expert systems and other intelligent systems in a simulation setting. Typical courses include Training Systems Engineering, Simulation of Real-Time Processes, and Intelligent Simulation.

Simulation Infrastructure

The research area of Simulation Infrastructure attracts those who wish to gain an in-depth understanding of the basic components of simulation systems and their patterns of configuration and communication, including hardware and software issues. They will gain experience in the development of distributed simulation and training environments. Graduates should be able to implement such systems or manage a team capable of developing such systems. Typical courses include Performance Models of Computers and Networks, Simulation Design and Analysis, High Performance Computer Architecture, and Analysis of Computer and Communication Systems. Simulation Management: Simulation Management research area attracts those who wish to gain expertise in the management of projects related to modeling, simulation, and training (MS&T). Graduates who focus in this area of study should be prepared to manage such projects for military agencies or MS&T companies. Typical courses include Environment of Technical Organizations, Modeling and Simulation of Real-Time Processes, Management Information Systems, and Project Engineering.

Simulation Management

Simulation Management research area attracts those who wish to gain expertise in the management of projects related to modeling, simulation, and training (MS&T). Graduates who focus in this area of study should be prepared to manage such projects for military agencies or MS&T companies. Typical courses include Environment of Technical Organizations, Modeling and Simulation of Real-Time Processes, Management Information Systems, and Project Engineering.

Curriculum

The Modeling and Simulation PhD requires a minimum of 72 credit hours of coursework beyond the bachelor's degree, including a minimum of 15 dissertation hours.
The M&S PhD program requires 15 credit hours of 5 required core courses. These core courses will provide an interdisciplinary framework for all students.

The remaining 42 credit hours may consist of additional unrestricted elective courses and research hours. At least 27 hours of the total program must consist of formal coursework, exclusive of independent study.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree
Total Credit Hours Required: 42 Credit Hours Minimum beyond the Master's Degree

Students may fulfill the restricted elective requirements through the courses chosen in the restricted core. Such students will meet the total credit hour requirements with additional unrestricted elective courses.

Required Courses: 15 Credit Hours

Core: 15 Credit Hours

- IDS 6147 - Perspectives on Modeling and Simulation 3 Credit Hours
- IDC 6XXX Mathematical Foundations of Modeling and Simulation 3 Credit Hours
- IDS 6XXX Understanding Humans for Modeling and Simulation 3 Credit Hours
- IDS 6145 - Simulation Techniques 3 Credit Hours
- IDS 6262 - Research Design for Modeling and Simulation 3 Credit Hours

Restricted Elective: 3 Credit Hours

Students must select an elective course from the Modeling and Simulation Graduate Program. Appropriate courses include those that follow. Others may be added over time with Program Director approval.

- IDC 5602 - Cybersecurity: A Multidisciplinary Approach 3 Credit Hours
- IDC 6601 - Behavioral Aspects of Cybersecurity 3 Credit Hours
- IDC 6700 - Interdisciplinary Approach to Data Visualization 3 Credit Hours
- IDS 5142 - Modeling and Simulation for Instructional Design 3 Credit Hours
- IDS 6146 - Modeling and Simulation Systems 3 Credit Hours
- IDS 6149 - Modeling and Simulation for Test and Evaluation 3 Credit Hours
- IDS 6916 - Simulation Research Methods and Practicum 3 Credit Hours
- IDS 6938 - Intelligent Tutoring System (ITS) Design 3 Credit Hours

Unrestricted Electives: 39 Credit Hours

All M&S PhD degree program students must take at least 39 credit hours of unrestricted elective courses that reflect at least two disciplines that support the student's area of graduate study.

A student must carefully select a set of courses in order to design an appropriate plan of coursework. The purpose of the courses is to ensure that students have depth in their research area as well as have breadth in the interdisciplinary area of modeling and simulation. The set of courses should also support a student's area of graduate study and to meet the specific educational needs, goals and objectives of that student.

Unrestricted electives must consist of at least 9 credit hours of formal courses, excluding independent study. The remaining credits may consist of additional coursework, directed research, independent study, and additional dissertation as advised appropriately by faculty adviser and/or program director.

Modeling and Simulation PhD Elective Courses

In addition to successfully completing the core courses for the M&S PhD program, students are required to carefully select electives with the guidance of a Program Director or faculty adviser. Elective choices should be made with the intent to strengthen a research interest and/or area of focus in order to meet the individual student's educational goals and objectives.

Listed below are suggested courses in various areas of focus or specialization. These course groupings are mere guides, are not exhaustive and are only meant to assist with advising and course selection in order to meet the individual student's educational goals and objectives. They are not intended to restrict elective choices among focus areas as we strongly encourage Modeling and Simulation students to maintain an interdisciplinary approach to their graduate studies.

If a student identifies another UCF course which may be of value to his/her M&S research area, but is not already identified in a list below, that student may request approval from the Graduate Program Director for the course to be used as an elective in the Graduate Plan of Study. All such requests must be made in advance of enrolling in the course.

Those electives categorized as "General" and "Fundamentals of Modeling and Simulation" would be appropriate for all students.
regardless of interest area. The remaining categories are grouped by area of interest.

General

- ESI 6247 - Experimental Design and Taguchi Methods 3 Credit Hours
- ESI 6891 - IEMS Research Methods 3 Credit Hours
- IDS 5907 - Independent Study Variable
- IDS 5917 - Directed Research Variable
- IDS 6908 - Independent Study Variable
- IDS 6918 - Directed Research Variable
- IDS 6946 - Internship Variable
- IDS 7919 - Doctoral Research Variable
- PHI 5340 - Research Methods in the Cognitive Sciences 3 Credit Hours
- PSY 6216C - Research Methodology 4 Credit Hours
- STA 5205 - Experimental Design 3 Credit Hours
- STA 5205 - Experimental Design 3 Credit Hours

Fundamentals of Modeling and Simulation

- ESI 5219 - Engineering Statistics 3 Credit Hours
- ESI 6217 - Statistical Aspects of Digital Simulation 3 Credit Hours
- ESI 6247 - Experimental Design and Taguchi Methods 3 Credit Hours
- ESI 6532 - Object-Oriented Simulation 3 Credit Hours
- IDC 6700 - Interdisciplinary Approach to Data Visualization 3 Credit Hours
- IDS 6146 - Modeling and Simulation Systems 3 Credit Hours
- IDS 6147 - Perspectives on Modeling and Simulation 3 Credit Hours
- IDS 6149 - Modeling and Simulation for Test and Evaluation 3 Credit Hours
- IDS 6950 - Modeling and Simulation Capstone Report Planning 1 Credit Hours
- IDS 6145 - Simulation Techniques 3 Credit Hours

Behavioral Cybersecurity

- CAP 6133 - Advanced Topics in Computer Security and Computer Forensics 3 Credit Hours
- CAP 6135 - Malware and Software Vulnerability Analysis 3 Credit Hours
- CDA 6530 - Performance Models of Computers and Networks 3 Credit Hours
- CJE 6688 - Cyber Crime and Criminal Justice 3 Credit Hours
- CNT 5008 - Computer Communication Networks Architecture 3 Credit Hours
- CNT 5410L - Cyber Operations Lab 3 Credit Hours
- CNT 6519 - Wireless Security and Forensics 3 Credit Hours
- COT 5405 - Design and Analysis of Algorithms 3 Credit Hours
- EEL 6785 - Computer Network Design 3 Credit Hours
- EEL 6883 - Software Engineering II 3 Credit Hours
- ESI 5531 - Discrete Systems Simulation 3 Credit Hours
- EXP 5256 - Human Factors I 3 Credit Hours
- EXP 6506 - Human Cognition and Learning 3 Credit Hours
- IDC 5602 - Cybersecurity: A Multidisciplinary Approach 3 Credit Hours
- IDC 6600 - Emerging Cyber Issues 1 Credit Hours
- IDC 6601 - Behavioral Aspects of Cybersecurity 3 Credit Hours
- IDS 6916 - Simulation Research Methods and Practicum 3 Credit Hours
- INR 6365 - Seminar on Intelligence 3 Credit Hours
- INR 6366 - The Intelligence Community 3 Credit Hours
- PHI 6938 - ST: Digital Ethics 3 Credit Hours
- STA 5703 - Data Mining Methodology I 3 Credit Hours
- STA 5825 - Stochastic Processes and Applied Probability Theory 3 Credit Hours

Human Systems

- CAP 6515 - Algorithms in Computational Biology 3 Credit Hours
- CAP 6671 - Intelligent Systems: Robots, Agents, and Humans 3 Credit Hours
- CAP 6676 - Knowledge Representation 3 Credit Hours
- DIG 6432 - Transmedia Story Creation 3 Credit Hours
- DIG 6812 - Digital Interaction for Informal Learning 3 Credit Hours
- EIN 5248C - Ergonomics 3 Credit Hours
- EIN 5317 - Training System Design 3 Credit Hours
- EIN 6215 - System Safety Engineering and Management 3 Credit Hours
- EIN 6258 - Human Computer Interaction 3 Credit Hours
- EIN 6649C - Intelligent Tutoring Training System Design 3 Credit Hours
- EME 6458 - Virtual Teaching and the Digital Educator 3 Credit Hours
- EME 6507 - Multimedia for Education and Training 3 Credit Hours
- EME 6601 - Instructional Simulation Design for Training and Education 3 Credit Hours
• EME 6614 - Instructional Game Design for Training and Education 3 Credit Hours
• EME 6646 - Learning, Instructional Design, and Cognitive Neuroscience 3 Credit Hours
• EXP 5208 - Sensation and Perception 3 Credit Hours
• EXP 5256 - Human Factors I 3 Credit Hours
• EXP 6257 - Human Factors II 3 Credit Hours
• EXP 6258 - Human Factors III 3 Credit Hours
• EXP 6506 - Human Cognition and Learning 3 Credit Hours
• IDS 6148 - Human Systems Integration for Modeling and Simulation 3 Credit Hours
• IDS 6149 - Modeling and Simulation for Test and Evaluation 3 Credit Hours
• PHI 5225 - Philosophy of Language 3 Credit Hours
• PHI 5325 - Topics in Philosophy of Mind 3 Credit Hours
• PHI 5327 - Topics in the Cognitive Sciences 3 Credit Hours
• PHI 5329 - Philosophy of Neuroscience 3 Credit Hours
• PSB 5005 - Physiological Psychology 3 Credit Hours
• TTE 6270 - Intelligent Transportation Systems 3 Credit Hours

Computer Visualization

• CAP 5725 - Computer Graphics I 3 Credit Hours
• CAP 6411 - Computer Vision Systems 3 Credit Hours
• CAP 6412 - Advanced Computer Vision 3 Credit Hours
• CAP 6676 - Knowledge Representation 3 Credit Hours
• CDA 5106 - Advanced Computer Architecture 3 Credit Hours
• COT 5405 - Design and Analysis of Algorithms 3 Credit Hours
• DIG 6605 - Physical Computing 3 Credit Hours

• IDC 6700 - Interdisciplinary Approach to Data Visualization 3 Credit Hours
• IDS 6149 - Modeling and Simulation for Test and Evaluation 3 Credit Hours

Waived Credits

The doctoral program will allow up to 30 credit hours to be waivered from an earned master's degree.

Dissertation: 15 Credit Hours Minimum

• XXX 7980 - Dissertation Research 15 Credit Hours minimum

Qualifying Examination

The M&S Qualifying Examination (QE) consists of a written paper and an oral presentation to an Evaluation Committee. Detailed information regarding the M&S QE is provided at this link: http://www.ist.ucf.edu/grad/Forms/phd-milestones.pdf.

Dissertation Adviser and Dissertation Advisory Committee

Students have the responsibility to select a Dissertation Adviser from a list of faculty authorized to direct dissertations. The student and the Dissertation Adviser, then, must identify and select the other members of the student's Dissertation Advisory Committee. The Dissertation Advisory Committee consists of a minimum of four members.

All committee members should hold a doctoral or terminal degree and be in fields related to the dissertation topic, and at least three members must be regular Modeling and Simulation graduate faculty (one to serve as chair) from at least two UCF colleges. At least one member of the committee must have served as a committee member on a prior M&S Thesis or Dissertation Advisory Committee. In some cases, with approval from the Program Director, a committee member may serve as co-chair of the committee. The M&S Program Director can assist students with selection of their adviser as well as with committee formation, additions, and deletions. The UCF College of Graduate Studies has the right to review appointments to advisory committees, place a representative on any advisory committee, or appoint a co-adviser.

Candidacy Examination

The Candidacy Examination evaluates the student's preparation to perform independent research to undertake the research in the student's dissertation topic. A student may sit for the Candidacy Examination upon:

1. passing the Qualifying Examination;
2. completing all conditions placed as a result thereof; and
3. completing all but 6 credit hours or less of the courses prescribed in the student's Graduate Plan of Study.

The Candidacy Examination includes all of the following:

The Dissertation Research Proposal

The research proposal is a written exposition of an academic or scientific topic and specific research question(s)/hypothesis(es) that is/are developed by the student; the research proposal identifies the chosen area(s) of research and offers convincing
support of the need for the research investigation being proposed. Specifically, the research proposal includes at least the following components:

- **Motivation of the research investigation.** Background and the motivation for the pursuit of the dissertation topic should be clearly and thoroughly explained including the historical and modern view of the topic and the rationale and need for the proposed research. The specific research question(s)/hypothesis(es) that is/are being addressed and the research objectives must be described;
- **Literature review on the topic of the dissertation.** A good literature review expands upon the reasons behind selecting the research question(s)/hypothesis(es). The review is an extensive summary and synopsis of the area(s) of research, and it provides a critical and in-depth evaluation of previous related research on the topic. It is an abstracting and synthesis of previous research, and the review explains how it integrates into the proposed research investigation. All sides of an argument must be clearly explained, to avoid bias, and areas of agreement and disagreement should be highlighted; and
- **A detailed proposed methodology for conducting the research.** This methodology must be consistent with the requirements of the field. It is customary to include any preliminary modeling and results in this discussion to show the potential of strengths and weaknesses of the methodology.

### An oral defense of the Dissertation Research Proposal

This defense includes a formal, oral presentation of the written Dissertation Research Proposal before the Dissertation Advisory Committee.

### A refereed published or accepted for publication manuscript

Students preparing for the Candidacy Examination should have at least one refereed published or accepted for publication manuscript directly related to the dissertation research, and the student must be a significant contributor to the work and the paper. If the refereed manuscript is not published, it should be fully accepted, and not conditionally accepted. This manuscript may be a journal or proceedings publication from a reputable conference.

All members vote on acceptance or rejection of the Dissertation Research Proposal and the Dissertation Proposal must be approved with at most one dissenting member of the advisory committee. A student is normally given one opportunity to pass the oral defense of the Dissertation Research Proposal, but the M&S Program Director, upon the recommendation of the student's Dissertation Advisory Committee, may approve at most a second attempt.

### Admission to Candidacy

In summary, the following are required for a student to be admitted to candidacy and subsequently enroll in dissertation hours:

- Completion of all course work, except for dissertation hours;
- The Dissertation Advisory Committee is formed, consisting of approved graduate faculty and graduate faculty scholars;
- Submission of an approved Graduate Plan of Study;
- Successful completion of the Candidacy Examination (see Candidacy Examination section above for details).

### Dissertation Defense

The Dissertation Defense is a formal, oral examination of the written dissertation before the Dissertation Advisory Committee. All members vote either "Pass" or "Fail" of the written dissertation, and the dissertation and Dissertation Defense must be approved with at most one dissenting member of the advisory committee. A student is normally given one opportunity to pass the oral defense of the dissertation, but the M&S Program Director, upon the recommendation of the student's Dissertation Advisory Committee, may approve at most a second attempt.

### Plan of Study

After admission to the PhD program, students should file a Graduate Plan of Study (GPS) with the Modeling and Simulation Graduate Program Office.

The purpose of the GPS is to design an appropriate program of coursework to support a student's area of graduate study and to meet the specific educational needs, goals and objectives of that student. The coursework must be selected to form a unified, cohesive plan of study. All graduate credit in a doctoral program must be at 5000 level or higher, and at least one-half of the credit hours used to meet program requirements must be in 6000-level or 7000-level courses.

The GPS should be developed under the supervision of the Dissertation Adviser(s) and members of the Dissertation Advisory Committee, although initially it may be constructed under the supervision of the M&S Graduate Program Office.
Changes in the Graduate Plan of Study can be made (due to course offering deletions, schedule conflicts, etc.) and with the approval of the M&S Graduate Program Office.

Programs of Study for students seeking a doctoral degree should be on file with the College of Graduate Studies by the end of the third major term of enrollment (based on full-time enrollment) and must be on file prior to the change to candidacy status.

Equipment Fee

Full-time students in the Modeling and Simulation PhD program pay a $27 equipment fee each semester that they are enrolled. Part-time students pay a $13.50 equipment fee each semester that they are enrolled.

Independent Learning

The dissertation is a project that constitutes independent learning conducted under the guidance of a Dissertation Advisory Committee. Three must be members of the Modeling and Simulation graduate faculty. All members vote on acceptance or rejection of the Dissertation Research Proposal and the Dissertation Proposal must be approved with at most one dissenting member of the advisory committee. A student is normally given one opportunity to pass the oral defense of the Dissertation Research Proposal, but the M&S Program Director, upon the recommendation of the student's Dissertation Advisory Committee, may approve at most a second attempt.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended
- Official, competitive score on the GRE taken within the last five years
- Résumé or Curriculum Vitae
- Goal Statement
  - The goal statement should discuss all relevant professional background and any previous research experience. The statement should explain the motivation behind the pursuit of a Doctoral degree in Modeling and Simulation.
- Three letters of recommendation
  - The letters of recommendation should be from faculty members, university administrators and employers. The letters, which must be current to the application, should address the educational and career goals of applicant. The letter writers should also know the applicant well enough to discuss the applicant's capacity to perform, excel and succeed in a graduate program. Letters for PhD applicants must discuss the applicant's ability to perform graduate-level research. At least two of the letters should be furnished by college or university professors who are acquainted with the applicant.

Applications are accepted for the fall and spring terms only.

Readmission

Applicants who are reapplying for admission need not resubmit transcripts and GRE scores if the transcripts and scores are previously filed with UCF. However, the following application requirements do need to be current for the new application for readmission:

- Résumé/Curriculum Vitae
- Goal Statement
- Letters of Recommendation

Prerequisites

Students who enter the Modeling and Simulation Program are expected to have an academic and/or work background that has prepared them in mathematics (introductory calculus and probability and statistics) and computer literacy, including proficiency with word processing, spreadsheet, and database programs, and, preferably, familiarity with at least one higher order programming language (e.g., C/C++, Visual Basic, Java, etc.). Students with undergraduate or graduate degrees in Engineering, Computer Science, or Mathematics will generally have this background.

For students with less technical academic preparation, the prerequisite core course IDC 5XXX Introductory Mathematics
for Modeling and Simulation will prepare them to pursue the required core course IDC 6XXX Mathematical Foundations of Modeling and Simulation. This prerequisite course will also prepare students to pursue several, but not all, of the focus areas. For example, these students could pursue the Simulation Management or Human Systems focus areas but would need a number of prerequisite courses in mathematics, statistics, and computer science to pursue focus areas such as Simulation Infrastructure.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student’s graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Nursing PhD

Program Description

The Doctor of Philosophy program in Nursing is designed to prepare students for positions as nursing faculty members, leaders in the application of innovative technologies to nursing education and clinical care, executive leaders in healthcare systems, and scientists who contribute to the body of nursing knowledge through their research.

The doctoral program in Nursing prepares nurse scholars to possess a body of knowledge about theory, processes, and methods of inquiry in the discipline of nursing. The program allows students to contribute to disciplinary and interdisciplinary knowledge in nursing and healthcare on the basis of sound conceptual, methodological, and ethical decision-making.

Program Outcomes

At the completion of the PhD in Nursing Program, graduates will be able to:

- Conduct research to generate a body of knowledge and test theories that advance nursing science.
- Develop a program of scholarship that integrates research, teaching, leadership, and service to the profession.
- Contribute to interdisciplinary solutions that advance health care in a global society.

For information on how this program may prepare you for professional licensure, please visit the program website.

Please note: This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.
UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Curriculum

For the Nursing PhD, total graduate credit must equal or exceed 72 credit hours. Students take 36 credit hours of required courses that focus on foundation, knowledge development and research methods, 15 dissertation credit hours, and 9 credit hours of electives allowing students to gain additional expertise in the area chosen for their dissertation. Details about this program are located in the Nursing PhD Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Students in the Nursing PhD program must complete all course work with GPA of 3.0 (“B”) or better, a satisfactory dissertation and defense of dissertation.

Required Courses—36 Credit Hours

Foundation Areas—9 Credit Hours
- NGR 7892 - Healthcare Systems and Policy 3 Credit Hours
- NGR 7805 - Doctoral Scholarship 3 Credit Hours
- NGR 7806 - Doctoral Scholarship II 3 Credit Hours

Knowledge Development—9 Credit Hours
- NGR 7115 - Philosophical and Theoretical Foundations of Nursing Science 3 Credit Hours
- NGR 7123 - Concept Development in Nursing 3 Credit Hours
- NGR 7939 - Dissertation Seminar 3 Credit Hours

Research Methods—18 Credit Hours
- NGR 7815 - Qualitative Methods in Nursing Research and Healthcare I 3 Credit Hours
- NGR 7817 - Quantitative Methods for Nursing and Healthcare I 3 Credit Hours
- NGR 7818 - Quantitative Methods for Nursing and Healthcare II 3 Credit Hours or
- NGR 7808 - Qualitative Methods in Nursing and Healthcare II 3 Credit Hours
- NGR 7807 - Research Approaches and Designs for Nursing and Healthcare 3 Credit Hours
- NGR 7823 - Psychometrics and Measurement for Nursing Research 3 Credit Hours
- NGR 7919 - Doctoral Research 3 Credit Hours

Elective Courses—9 Credit Hours Minimum

The supporting course work is designed to permit students to gain additional expertise and knowledge in the area chosen for the dissertation. These courses may vary from student to student depending upon individual needs or objectives. Course selection should be influenced by the following criteria:
- Increase in understanding of the phenomenon of interest
- Increase in understanding of specific methodologies or analytical techniques relevant to the student's dissertation.
- Exposure to experiences relevant to the phenomenon of interest or methodological elements relevant to the student's dissertation.

The UCF College of Nursing strongly encourages all PhD students to actively seek out interdisciplinary supporting courses including those offered by other disciplines. All supporting courses must be approved by the student's faculty adviser or dissertation committee chairperson.

Dissertation Research—15 Credit Hours Minimum

The dissertation research addresses the design and conduct of research that advances nursing science. Students conduct the dissertation in areas of faculty interest and expertise. Students are required to complete at least 15 credit hours of dissertation and are required to register for 3 credit hours of dissertation each semester until they complete the degree requirements.

- NGR 7980 - Dissertation Research 15 Credit Hours

Doctoral Research

The course NGR 7919 Doctoral Research is designed for students to gain research experience with a faculty researcher. Students must obtain permission from the faculty member before registering for this course and complete the College of Nursing doctoral research form. The purpose of this course is for students to have an experience with research in addition to that of the dissertation. This course is not to be used as a pilot study for the student's dissertation.
Admission to Candidacy and Examinations

The process for candidacy will start with the appointment of the full dissertation advisory committee including the external member. The Candidacy Examination has both written and oral components. When these are completed successfully, the student becomes a doctoral candidate and is eligible to enroll in dissertation credits. When candidacy status is obtained, the student must enroll in at least three-semester credits of dissertation credit each semester until successful oral defense of the dissertation is made and all graduation requirements are completed. The university requires a minimum of 15 dissertation credits. Post-candidacy status is subject to the rules and regulations of the University of Central Florida Graduate Catalog.

The following are required to enroll in dissertation hours. Evidence that items have been completed must be received by the UCF Graduate College on the Friday before the first day of classes for those who wish to enroll in dissertation hours in that semester:

- Completion of all coursework, except for dissertation hours.
- Successful completion of the candidacy examination.
- The dissertation advisory committee is formed, consisting of approved graduate faculty, graduate faculty scholars, and the approved external member.
- Submittal of an approved program of study (should be finalized by the student's third semester).

Equipment Fee

Full-time students in the Nursing PhD program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 each semester.

Independent Learning

The dissertation satisfies the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Master's and a Bachelor's Degree in nursing from an accredited institution or the equivalent.
- Licensure as a Registered Nurse in the state of Florida. (Does not apply to international applicants).
- Official, competitive GRE score taken within the last five years.
- An essay of no more than 500 words addressing goals for doctoral study to knowledge development for Nursing.
- A personal interview.
- Research interests that match faculty expertise.
- Resume/Curriculum Vitae which reflects prior education, recent clinical accomplishments, any scholarly work (publications and presentations), and activities with professional organizations. For recent graduates, this can include accomplishments as a student.
- Three letters of recommendation evaluating the potential for doctoral study preferably by nursing instructors, nurse employers or nurses with advanced degrees.

The College of Nursing accepts the most qualified students based on evaluations of the applicant's abilities, past performance, recommendations and match of UCF programs with applicant's career goals. Students are admitted to the program in the summer for the program of study.

The College of Nursing has implemented a database, LEAP*RN to manage information regarding student coursework and plans of study, clinical placements, and all evaluation data. This database will assist us in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. All students will be responsible for an annual fee payable directly to LEAP*RN. Holds will be placed on registration and enrollment if the subscription cost is not paid.

Please call the College of Nursing Graduate Office (407) 823-0133 to speak with a doctoral adviser to discuss your goals for doctoral study. It would be very advantageous to discuss the program before you write your essay in the admission application.

For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Program Tracks

Nursing PhD, BSN to PhD Track

Track Description

The Doctor of Philosophy program in Nursing is designed to prepare students for positions as nursing faculty members, leaders in the application of innovative technologies to nursing education and clinical care, executive leaders in healthcare systems, and scientists who contribute to the body of nursing knowledge through their research. The BSN to PhD track is designed to support students in completing the PhD in a timely fashion to provide for a longer research career.

The doctoral program in Nursing prepares nurse scholars to possess a body of knowledge about theory, processes, and methods of inquiry in the discipline of nursing. The program allows students to contribute to disciplinary and interdisciplinary knowledge in nursing and healthcare on the basis of sound conceptual, methodological, and ethical decision-making. Students in the BSN to PhD track will have focused support in grant writing for programs such as the National Research Service Award (NRSA).

Program Outcomes

At the completion of the PhD in Nursing Program, graduates will be able to:

- Conduct research to generate a body of knowledge and test theories that advance nursing science.
- Develop a program of scholarship that integrates research, teaching, leadership, and service to the profession.
- Contribute to interdisciplinary solutions that advance health care in a global society.

For information on how this program may prepare you for professional licensure, please visit the program website.

Please note: This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit
UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Curriculum

The Nursing BSN to PhD program requires a minimum of 75 credit hours beyond a bachelor's degree in Nursing. This program includes 51 credit hours of required courses that focus on foundation, knowledge development and research methods, 15 dissertation credit hours, and 9 credit hours of electives allowing students to gain additional expertise in the area chosen for their dissertation. Details about this program are located in the Nursing PhD Handbook.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Students in the Nursing BSN to PhD program must complete all course work with GPA of 3.0 ("B") or better, a satisfactory dissertation and defense of dissertation.

Required Courses—51 Credit Hours

Foundation Areas—12 Credit Hours
- NGR 7892 - Healthcare Systems and Policy 3 Credit Hours
- NGR 7805 - Doctoral Scholarship 3 Credit Hours
- NGR 7806 - Doctoral Scholarship II 3 Credit Hours
- NGR 7952 - Scientific Writing for Nurses and Healthcare Professionals 3 Credit Hours

Knowledge Development—9 Credit Hours
- NGR 7115 - Philosophical and Theoretical Foundations of Nursing Science 3 Credit Hours
- NGR 7123 - Concept Development in Nursing 3 Credit Hours
- NGR 7939 - Dissertation Seminar 3 Credit Hours

Research Methods—30 Credit Hours
- NGR 7807 - Research Approaches and Designs for Nursing and Healthcare 3 Credit Hours
- NGR 7815 - Qualitative Methods in Nursing Research and Healthcare I 3 Credit Hours
- NGR 7817 - Quantitative Methods for Nursing and Healthcare I 3 Credit Hours
- NGR 7818 - Quantitative Methods for Nursing and Healthcare II 3 Credit Hours or
- NGR 7808 - Qualitative Methods in Nursing and Healthcare II 3 Credit Hours
- NGR 7823 - Psychometrics and Measurement for Nursing Research 3 Credit Hours
- NGR 7916 - Research Grants Process and Proposal Writing 3 Credit Hours
- NGR 7932 - Nursing Research Grants Process and Proposal Writing 3 Credit Hours
- NGR 7919 - Doctoral Research 3 Credit Hours (9 Credit Hours; 3 credit hours taken three times)

Elective Courses—9 Credit Hours Minimum

The supporting course work is designed to permit students to gain additional expertise and knowledge in the area chosen for the dissertation. These courses may vary from student to student depending upon individual needs or objectives. Course selection should be influenced by the following criteria:

- Increase in understanding of the phenomenon of interest
- Increase in understanding of specific methodologies or analytical techniques relevant to the student's dissertation.
- Exposure to experiences relevant to the phenomenon of interest or methodological elements relevant to the student's dissertation.

The UCF College of Nursing strongly encourages all PhD students to actively seek out interdisciplinary supporting courses including those offered by other disciplines. All supporting courses must be approved by the student's faculty adviser or dissertation committee chairperson.

Dissertation Research—15 Credit Hours Minimum

The dissertation research addresses the design and conduct of research that advances nursing science. Students conduct the dissertation in areas of faculty interest and expertise. Students are required to complete at least 15 credit hours of dissertation and are required to register for 3 credit hours of dissertation each semester until they complete the degree requirements.

- NGR 7980 - Dissertation Research 15 Credit Hours
Doctoral Research

The course NGR 7919 Doctoral Research is designed for students to gain research experience with a faculty researcher. Students must obtain permission from the faculty member before registering for this course and complete the College of Nursing doctoral research form. The purpose of this course is for students to have an experience with research in addition to that of the dissertation.

Admission to Candidacy and Examinations

The process for candidacy will start with the appointment of the dissertation advisory committee. The Candidacy Examination has both written and oral components. When these are completed successfully, the student becomes a doctoral candidate and is eligible to enroll in dissertation credits. When candidacy status is obtained, the student must enroll in at least three-semester credits of dissertation credit each semester until successful oral defense of the dissertation is made and all graduation requirements are completed. The university requires a minimum of 15 dissertation credits. Post-candidacy status is subject to the rules and regulations of the University of Central Florida Graduate Catalog.

Students are required to complete the following prior to scheduling their candidacy examination:

- Submittal of an approved program of study (should be finalized by the student's third semester).
- Completion of all coursework, except for dissertation hours.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.

Following successful completion of the candidacy examination, the student may enroll in dissertation hours. Evidence that items have been completed must be received by the Graduate College on the Friday before the first day of classes for those who wish to enroll in dissertation hours in that semester.

Equipment Fee

Full-time students in the Nursing PhD program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 each semester.

Independent Learning

The dissertation satisfies the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor's Degree in nursing from an accredited institution or the equivalent.
- Licensure as a Registered Nurse in the state of Florida. (Does not apply to international applicants).
- Official, competitive GRE score taken within the last five years.
- An essay of no more than 500 words addressing goals for doctoral study to knowledge development for Nursing.
- A personal interview.
- Research interests that match faculty expertise.
- Resume/Curriculum Vitae which reflects prior education, recent clinical accomplishments, any scholarly work (publications and presentations), and activities with professional organizations. For recent graduates, this can include accomplishments as a student.
- Three letters of recommendation evaluating the potential for doctoral study preferably by nursing instructors, nurse employers or nurses with advanced degrees.

The College of Nursing accepts the most qualified students based on evaluations of the applicant's abilities, past performance, recommendations and match of UCF programs with applicant's career goals. Students are admitted to the program in the summer for the program of study.

The College of Nursing has implemented a database, LEAP*RN to manage information regarding student coursework and plans of study, clinical placements, and all evaluation data. This database will assist us in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. All students will be responsible for an annual subscription for a fee payable directly to LEAP*RN. Holds will be placed on registration and enrollment if the subscription cost is not paid.

Please call the College of Nursing Graduate Office (407) 823-0133 to speak with a doctoral adviser to discuss your goals for doctoral study. It would be very advantageous to discuss the program before you write your essay in the admission application.

Nursing Practice DNP

Program Description

The Doctor of Nursing Practice (DNP) program prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP Project.

The program offers five tracks: Adult/Gerontology Acute Care Nurse Practitioner, Adult/Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Advanced Practice DNP, and Nurse Executive DNP.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

Note for International Students: Please contact the College of Nursing at gradnurse@ucf.edu or 407-823-2744 prior to applying to this online program.

Please note: This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit
http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

**Curriculum**

The Doctor of Nursing Practice (DNP) curriculum requirements vary according to the track chosen by the student. Please see the information for each track. Additional details about this program are located in the Nursing DNP Handbook.

Students will take coursework corresponding to the eight essential competencies delineated by the American Association of Colleges of Nursing (AACN). The competencies address the following:

- Scientific underpinning for practice
- Organizational and systems leadership for quality improvement and systems thinking
- Clinical scholarship and analytical methods for evidence-based practice
- Information systems/technology and patient care technology for the improvement and transformation of health care
- Health care policy for advocacy in health care
- Inter-professional collaboration for improving patient and population health outcomes
- Clinical prevention and population health for improving the nation's health
- Advanced nursing practice

**DNP Project: 6-9 Credit Hours**

The DNP Project is the product of the culminating or comprehensive experience of an independent project that demonstrates application of advanced clinical and evidence-based practice. The DNP Project is guided and evaluated by an academic committee and is derived from the practice immersion experience (residency). It will serve as a foundation for future scholarly practice.

The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base. DNP projects may include but are not limited to:

- Analyze policy: develop, implement, evaluate, or revise policy
- Design and use databases to retrieve information for decision making, planning, evaluation
- Conduct financial analyses to compare care models and potential cost savings, etc.
- Design and evaluate new models of care
- Design and evaluate health promotion and disease prevention programs
- Assess integration of technology in care

The theme that links these forms of scholarly experiences is the use of evidence to improve either practice or patient outcomes. Additional examples of DNP projects can be found on the National Organization of Nurse Practitioner Faculty (NONPF) website under Practice Doctorate Resource Center.

**Progress to Degree**

Students are required to maintain a 3.0 grade point average. Grades below B are not acceptable in the doctoral program in the College of Nursing. Students who receive a grade of below B in any course are subject to dismissal from the DNP program and will be reviewed by the DNP Admissions, Progression and Graduation Committee for continuation in the program. Students who do not maintain a 3.0 GPA will be put on probation or dismissed from the program.

**Graduation Requirements**

- All course work completed with a minimum grade of "B"
- A satisfactory DNP Project
- Clinical performance evaluated at a satisfactory level
- A satisfactory public presentation of the DNP Project

**Equipment Fee**

Full-time students in the Nursing Practice DNP program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 each semester.

**Independent Learning**

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from clinical practice, will be developed in depth with faculty supervision.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

Applicants holding an MSN degree in an APN specialty role or a post-MSN certificate (NP, CNS, CRNA, CNM) from an accredited institution should apply to the Advanced Registered Nurse Practitioner Post Master's Track.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Nursing Practice DNP, Adult-Gerontology Acute Care Nurse Practitioner Track

Track Description

The Doctor of Nursing Practice (DNP) program in the Adult-Gerontology Acute Care Nurse Practitioner Track prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP project.

The Adult-Gerontology Acute Care Nurse Practitioner Track prepares the advanced practice nurse to care for patients with medically complex stable and unstable acute, critical and chronic illnesses across care settings ranging from hospitals to subacute, ambulatory care, clinic and home care environments at the DNP level, incorporating DNP essentials in practice with a culminating DNP project.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems and disseminate findings.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.

Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.
For information on how this program may prepare you for professional licensure, please visit the program website.

Curriculum

This track will not be accepting applications or enrolling new students effective Fall 2018.

The DNP Adult-Gerontology Acute Care Nurse Practitioner track requires a minimum of 76 credit hours beyond the baccalaureate degree. The curriculum includes 41 credits of core courses shared with other DNP tracks, 12 credits of APN core and 23 credits of specialty courses. A total of 1,080 practicum hours are required to earn the DNP. The program prepares nurses at the entry level for advanced practice for the current healthcare system based on a strong scientific foundation for practice; offers flexibility and emphasis on evidence-based practice, leadership and organizational analysis; and provides analytic, critical thinking and diagnostic reasoning skills to examine practice innovations involving completion of the residency project during the clinical residency courses. Details about this program are in the Advanced Practice DNP Handbook.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Prerequisite Courses—9 Credit Hours

Students with a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of 'B' or better.

- NUR 3805 - Dimensions of Professional Practice 3 Credit Hours
- NUR 4637 - Public Health Nursing 3 Credit Hours
- NUR 3165 - Nursing Research 3 Credit Hours

Advanced Practice Core Courses—12 Credit Hours

- NGR 5003 - Advanced Health Assessment and Diagnostic Reasoning 2 Credit Hours
- NGR 5003L - Advanced Health Assessment and Diagnostic Reasoning Lab 1 Credit Hours
- NGR 5141 - Pathophysiological Bases for Advanced Nursing Practice 3 Credit Hours
- NGR 5638 - Health Promotion 3 Credit Hours
- NGR 6172 - Pharmacology for Advanced Nursing Practice 3 Credit Hours

Specialty Courses: Adult-Gerontology Acute Care Nurse Practitioner—23 Credit Hours

- NGR 6210 - Adult-Gerontology Acute Care Nurse Practitioner I 3 Credit Hours
- NGR 6230L - Diagnostics and Skills for the Critically Ill 1 Credit Hours (120 clinical hours)
- NGR 6211 - Adult-Gerontology Acute Care Nurse Practitioner II 3 Credit Hours
- NGR 6211L - Adult-Gerontology Acute Care Nurse Practitioner II Clinical 3 Credit Hours (180 clinical hours)
- NGR 6175 - Critical Care Pharmacology 3 Credit Hours
- NGR 6212 - Adult-Gerontology Acute Care Nurse Practitioner III 3 Credit Hours
- NGR 6212L - Adult-Gerontology Acute Care Nurse Practitioner III Clinical 3 Credit Hours (180 clinical hours)
- NGR 6215L - Adult-Gerontology Acute Care Nurse Practitioner Practicum 3 Credit Hours (180 clinical hours)

DNP Core Courses—41 Credit Hours

- NGR 5800 - Theory for Advanced Practice Nursing 3 Credit Hours
- NGR 6801 - Research Methods 3 Credit Hours
- NGR 6874 - Nursing Environment Management 3 Credit Hours
- NGR 7673 - Epidemiology Principles in Advanced Practice Nursing 3 Credit Hours
- NGR 7793 - Leadership and Economics in Advanced Practice Nursing 3 Credit Hours
- NGR 7827 - Concepts, Measurement, and Data Management 3 Credit Hours
- NGR 7820 - Innovative Technologies in Healthcare 3 Credit Hours
- NGR 7892 - Healthcare Systems and Policy 3 Credit Hours
- NGR 7855C - Evidence-Based Practice Development for DNP 3 Credit Hours
- NGR 7065 - Advanced Clinical Management for Advanced Practice Nursing 3 Credit Hours
- NGR 7748L - Advanced Clinical Practice Selective for Advanced Practice Nursing 1-3 Credit Hours (120 clinical hours)
**DNP Project**

The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base. DNP projects may include but are not limited to:

- Translate research into practice and evaluate outcomes
- Quality improvement (care processes, continuity of care, patient outcomes)
- Implement and evaluate evidence-based practice guidelines
- Analyze policy: develop, implement, evaluate or revise policy
- Design and use databases to retrieve information for decision making, planning, evaluation
- Conduct financial analyses to compare care models and potential cost savings, etc.
- Design and evaluate new models of care
- Design and evaluate health promotion and disease prevention programs
- Assess integration of technology in care

The theme that links these forms of scholarly experiences is the use of evidence to improve either practice or patient outcomes. Additional examples of DNP projects can be found on the National Organization of Nurse Practitioner Faculty (NONPF) website under Practice Doctorate Resource Center.

**Independent Learning**

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from clinical practice, will be developed in depth with faculty supervision.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Official, competitive GRE score taken within the last five years.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)
- Address the following 2 items in a written essay. Responses to both questions should not exceed 1 page, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals.
  - Identify one significant contemporary issue of the problem in U.S. healthcare and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae: CV should reflect prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates, this can include accomplishments as a student
- An interview with faculty may also be required.

*For Students with an RN license and a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu or 407-823-2744 for additional options.
Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with a DNP adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice.

Upon admission to the program student will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. Students must be able to meet clinical partner background requirements to continue in the program.

The College of Nursing has implemented a database, LEAP*RN to manage information regarding student coursework and plans of study, clinical placements, and all evaluation data. This database will assist us in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. All students will be responsible for an annual subscription for a fee payable directly to LEAP*RN. Holds will be placed on registration and enrollment if the subscription cost is not paid.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

**Financials**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**Fellowships**

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Nursing Practice DNP, Adult-Gerontology Clinical Nurse Specialist Track**

**Track Description**

This program has been temporarily suspended effective Fall 2014.

The Doctor of Nursing Practice (DNP) program in the Adult/Gerontology Clinical Nurse Specialist Track prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP project.

The DNP Adult/Gerontology Clinical Nurse Specialist Track allows students to earn an MSN along the way to the Doctor of Nursing Practice (DNP). This MSN allows students in the DNP program to sit for certification examinations when they have completed the list of courses required. Certification authorizes them to function in the advanced role while they complete the DNP curriculum.
Curriculum

Total Credit Hours Required: 86 Credit Hours Minimum beyond the Bachelor's Degree

The DNP Adult/Gerontology Clinical Nurse Specialist track allows students to acquire an MSN along the way upon completion of 45 credit hours of master's level courses, including 600 hours of clinical practice. This is followed by an additional 41 credit hours of doctoral-level courses, including 9 credit hours of the DNP Project and at least 420 clinical hours. All totaled, 1,020 practicum hours including those leading to the MSN are required to earn the DNP.

Required Courses for MSN: 45 Credit Hours

Core Courses: 21 Credit Hours

- NGR 5003 - Advanced Health Assessment and Diagnostic Reasoning 2 Credit Hours
- NGR 5003L - Advanced Health Assessment and Diagnostic Reasoning Lab 1 Credit Hours (60 clinical hours)
- NGR 5141 - Pathophysiological Bases for Advanced Nursing Practice 3 Credit Hours
- NGR 5800 - Theory for Advanced Practice Nursing 3 Credit Hours
- NGR 5884 - Legal and Professional Behavior in Advanced Practice Nursing 3 Credit Hours
- NGR 6172 - Pharmacology for Advanced Nursing Practice 3 Credit Hours
- NGR 6801 - Research Methods 3 Credit Hours
- NGR 6813 - Evidence Based Nursing Practice 3 Credit Hours

Specialty Courses: Adult/ Gerontology Clinical Nurse Specialist: 24 Credit Hours

- NGR 5720 - Organizational Dynamics 3 Credit Hours
- NGR 6265 - Adult/Gerontology CNS I 3 Credit Hours
- NGR 6265L - Adult/Gerontology CNS I Clinical 3 Credit Hours (180 clinical hours)
- NGR 6266 - Adult/Gerontology CNS II 3 Credit Hours
- NGR 6266L - Adult/Gerontology CNS II Clinical 3 Credit Hours (180 clinical hours)
- NGR 6267 - Adult/Gerontology CNS III 3 Credit Hours
- NGR 6267L - Adult/Gerontology CNS III Clinical 3 Credit Hours (180 clinical hours)

Required Courses for the DNP: 41 Credit Hours

The DNP courses serve to enhance the skill and science base of the graduate and strengthen the focus on research utilization. Safety and efficiency in health care systems is addressed and organizational and policy implications are emphasized within the context of care delivery. An emphasis is placed on evidence-based practice, state-of-the-art interventions and information fluency.

- NGR 6722 - Financial Management and Resource Development 3 Credit Hours
- NGR 7065 - Advanced Clinical Management for Advanced Practice Nursing 3 Credit Hours
- NGR 7673 - Epidemiology Principles in Advanced Practice Nursing 3 Credit Hours
- NGR 7748L - Advanced Clinical Practice Selective for Advanced Practice Nursing 1-3 Credit Hours (120 clinical hours)
- NGR 7779C - Program Development and Management for DNP 3 Credit Hours (60 clinical hours)
- NGR 7793 - Leadership and Economics in Advanced Practice Nursing 3 Credit Hours
- NGR 7820 - Innovative Technologies in Healthcare 3 Credit Hours
- NGR 7827 - Concepts, Measurement, and Data Management 3 Credit Hours
- NGR 7855C - Evidence-Based Practice Development for DNP 3 Credit Hours (60 clinical hours)
- NGR 7892 - Healthcare Systems and Policy 3 Credit Hours
- NGR 7911C - Doctoral Project I 3 Credit Hours (60 clinical hours)
- NGR 7912C - Doctoral Project 2 3 Credit Hours (120 clinical hours)
- NGR 7913 - Doctoral Project 3 3 Credit Hours
- Elective 3 Credit Hours

Progress to Degree

Students are required to maintain a 3.0 grade point average. Students who receive a grade of below B in any course will be reviewed by the DNP Admissions, Progression and Graduation Committee for continuation in the program. Grades of below B are not acceptable in the doctoral program in the College of
Nursing. Students who do not maintain a 3.0 GPA will be put on probation or dismissed from the program.

Graduation Requirements

- All course work completed with a minimum grade of "B"
- A satisfactory DNP Project
- Clinical performance evaluated at a satisfactory level
- A satisfactory public presentation of the DNP Project
- A professional portfolio

Independent Learning

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from clinical practice, will be developed in depth with faculty supervision.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution.*
- Undergraduate Statistics course.
- Official, competitive GRE score taken within the last five years.
- Licensure as a registered nurse in the State of Florida. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)
- Address the following 3 items in a written essay. Total word count for all (not each) answers should be 500 words or less, double spaced, 12 point Times New Roman font, and 1 inch margins:
  - Describe how your professional experiences have prepared you for future education in the role which is the focus of your desired track.
  - Describe your plans to alter your work, professional and/ or personal obligations in order to have the time needed for graduate course and clinical practice work.
  - Identify one significant contemporary issue/ problem in the US Health care system and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates this can include accomplishments as a student.
- An interview with faculty may also be required.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

*For students with a Bachelor's degree in a discipline other than nursing, but possess a Florida RN License, please contact the College of Nursing at gradnurse@ucf.edu or 407-823-2744 for additional options.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office (407-823-2744) to speak with a DNP adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice. Students are admitted to the program in the fall for the program of study; however, spring admissions are possible for a revised plan of study.

Admission to the program is competitive, based on evaluations of the applicant's abilities, past performance, recommendations and match of UCF programs with the applicant's career goals. The College of Nursing accepts most qualified students.

Students may take classes as a nursing nondegree-seeking, postbaccalaureate student on a space-available basis. Students must designate on their application that they are applying to the College of Nursing in order to facilitate processing of files. Successful completion of postbaccalaureate courses does not guarantee admission to the graduate program. Students may only take nonclinical courses. Prior to applying as a nondegree student, please contact the main nursing advising office for deadlines and nondegree options at gradnurse@ucf.edu.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance
available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Nursing Practice DNP, Adult-Gerontology Primary Care Nurse Practitioner Track

Track Description

The Doctor of Nursing Practice (DNP) program in the Adult/Gerontology Primary Care Nurse Practitioner Track prepares nurses at the highest level of practice for the current healthcare environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP project.

The DNP Adult/Gerontology Primary Care Nurse Practitioner Track prepares students to care for primary care patients from adolescence through old age in primary care and home care settings, incorporating DNP essentials in practice with a culminating DNP project.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems and disseminate findings
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

For information on how this program may prepare you for professional licensure, please visit the program website.

Curriculum

The DNP Adult/Gerontology Primary Care Nurse Practitioner track requires a minimum of 75 credit hours beyond the baccalaureate degree. The curriculum includes 42 credits of core courses shared with other DNP tracks, 12 credits of APN core and 18 credits of specialty courses. A total of 1,020 practicum hours are required to earn the DNP. The program prepares nurses at the entry level for advanced practice for the current healthcare system based on a strong scientific foundation for practice; offers flexibility and emphasis on evidence-based practice, leadership and organizational analysis; and provides analytic, critical thinking and diagnostic reasoning skills to examine practice innovations involving completion of the residency project during the clinical residency courses. Details about this program are located in the Advanced Practice DNP Adult-Gerontology DNP Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Prerequisite Courses—9 Credit Hours

Students with a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of 'B' or better.

- NUR 3805 - Dimensions of Professional Practice 3 Credit Hours
- NUR 4637 - Public Health Nursing 3 Credit Hours
• NUR 3165 - Nursing Research 3 Credit Hours

Advanced Practice Core Courses—12 Credit Hours

• NGR 5003 - Advanced Health Assessment and Diagnostic Reasoning 2 Credit Hours
• NGR 5003L - Advanced Health Assessment and Diagnostic Reasoning Lab 1 Credit Hours (60 clinical hours)
• NGR 5141 - Pathophysiological Bases for Advanced Nursing Practice 3 Credit Hours
• NGR 5638 - Health Promotion 3 Credit Hours
• NGR 6172 - Pharmacology for Advanced Nursing Practice 3 Credit Hours

Specialty Courses: Adult/Gerontology Nurse Practitioner—18 Credit Hours

The theme that links these forms of scholarly experiences is the use of evidence to improve either practice or patient outcomes. Additional examples of DNP projects can be found on the National Organization of Nurse Practitioner Faculty (NONPF) website under Practice Doctorate Resource Center.

• NGR 6201 - Adult I Primary Care 3 Credit Hours
• NGR 6240L - Adult I Clinical for APNs 3 Credit Hours (180 clinical hours)
• NGR 6202L - Adult II Primary Care Clinical 2 Credit Hours (120 clinical hours)
• NGR 6334 - Women's Health for APNs 2 Credit Hours
• NGR 6263 - Gerontologic Care for APNs 3 Credit Hours
• NGR 6263L - Gerontologic Care Clinical for NPs 2 Credit Hours (120 clinical hours)
• NGR 6248L - Family Nurse Practitioner/Adult-Gero Nurse Practitioner Practice Practicum 3 Credit Hours (180 clinical hours)

DNP Core Courses—42 Credit Hours

The DNP courses serve to enhance the skill and science base of the graduate and strengthen the focus on research utilization. Safety and efficiency in health care systems is addressed and organizational and policy implications are emphasized within the context of care delivery. An emphasis is placed on evidence-based practice, state-of-the-art interventions and information fluency

• NGR 5800 - Theory for Advanced Practice Nursing 3 Credit Hours
• NGR 6801 - Research Methods 3 Credit Hours
• NGR 6874 - Nursing Environment Management 3 Credit Hours
• NGR 7065 - Advanced Clinical Management for Advanced Practice Nursing 3 Credit Hours
• NGR 7673 - Epidemiology Principles in Advanced Practice Nursing 3 Credit Hours
• NGR 7748L - Advanced Clinical Practice Selective for Advanced Practice Nursing 1-3 Credit Hours (180 clinical hours)
• NGR 7793 - Leadership and Economics in Advanced Practice Nursing 3 Credit Hours
• NGR 7820 - Innovative Technologies in Healthcare 3 Credit Hours
• NGR 7827 - Concepts, Measurement, and Data Management 3 Credit Hours
• NGR 7855C - Evidence-Based Practice Development for DNP 3 Credit Hours (60 clinical hours)
• NGR 7892 - Healthcare Systems and Policy 3 Credit Hours
• NGR 7911C - Doctoral Project I 3 Credit Hours (60 clinical hours)
• NGR 7912C - Doctoral Project 2 3 Credit Hours (120 clinical hours)
• NGR 7913 - Doctoral Project 3 3 Credit Hours

DNP Project

The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base. DNP projects may include but are not limited to:

• Translate research into practice and evaluate outcomes
• Quality improvement (care processes, continuity of care, patient outcomes)
• Implement and evaluate evidence-based practice guidelines
• Analyze policy: develop, implement, evaluate or revise policy
• Design and use databases to retrieve information for decision making, planning, evaluation
• Conduct financial analyses to compare care models and potential cost savings, etc.
• Design and evaluate new models of care
• Design and evaluate health promotion and disease prevention programs
• Assess integration of technology in care

The theme that links these forms of scholarly experiences is the use of evidence to improve either practice or patient outcomes.
Additional examples of DNP projects can be found on the National Organization of Nurse Practitioner Faculty (NONPF) website under Practice Doctorate Resource Center.

**Progress to Degree**

Students are required to maintain a 3.0 grade point average. Students who receive a grade below "B" in any course will be reviewed by the DNP Admissions, Progression and Graduation Committee for continuation in the program. Grades of below B are not acceptable in the doctoral program in the College of Nursing. Students who do not maintain a 3.0 GPA will be put on probation or dismissed from the program.

**Graduation Requirements**

- All course work completed with a minimum grade of "B"
- A satisfactory DNP Project
- Clinical performance evaluated at a satisfactory level
- A satisfactory public presentation of the DNP Project

**Independent Learning**

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from clinical practice, will be developed in depth with faculty supervision.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Official, competitive GRE score taken within the last five years.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)

- Address the following 2 items in a written essay. Responses to both questions should not exceed 1 page, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals
  - Identify one significant contemporary issue of the problem in U.S. healthcare and explore how members of the nursing profession can help address that issue or solve that problem
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates, this can include accomplishments as a student.
- An interview with faculty may also be required.

*For Students with an RN license and a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu for additional options.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with a DNP adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice.

Upon admission to the program student will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. Students must be able to meet clinical partner background requirements to continue in the program.

The College of Nursing has implemented a database, LEAP*RN to manage information regarding student coursework and plans of study, clinical placements, and all evaluation data. This database will assist us in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. All students will be responsible for an annual subscription for a fee payable directly to LEAP*RN. Holds will be placed on registration and enrollment if the subscription cost is not paid.

Nursing Practice DNP, Advanced Practice Track

Track Description

The Doctor of Nursing Practice (DNP) program prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP Project.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems and disseminate findings.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

For information on how this program may prepare you for professional licensure, please visit the program website.

Please note: This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.
UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Curriculum

For the Doctor of Nursing Practice (DNP), total graduate credit must equal or exceed 72 credit hours. Students take 27 credit hours of core courses, 9 credit hours of electives, and 6 credit hours of a DNP Project. The total clinical hours (including those hours accrued in the MSN degree) will be 1000. The total clinical hours noted in this curriculum are based on an MSN total of 500 hours. Actual hours may vary depending on a review of MSN program hours demonstrated on entry into the program. The core courses have been carefully constructed to incorporate the AACN competencies for DNP graduates. Details about this program are located in the Nursing DNP Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Students will take course work that incorporates The Essentials of Doctoral Education for Advanced Nursing Practice [American Association of Colleges of Nursing (AACN), 2006]. The Essentials address the following:

1. Scientific underpinning for practice
2. Organizational and systems leadership for quality improvement and systems thinking
3. Clinical scholarship and analytical methods for evidence-based practice
4. Information systems/technology and patient care technology for the improvement and transformation of health care
5. Health care policy for advocacy in health care
6. Inter-professional collaboration for improving patient and population health outcomes
7. Clinical prevention and population health for improving the nation's health
8. Advanced nursing practice

DNP Core Courses—27 Credit Hours

The DNP core courses serve to enhance the skill and science base of the graduate and strengthen the focus on evidence-based practice. Safety and efficiency in health care systems is addressed and organizational and policy implications are emphasized within the context of care delivery. An emphasis is placed on evidence-based practice, state-of-the-art interventions and information fluency.

- NGR 6874 - Nursing Environment Management 3 Credit Hours
- NGR 7892 - Healthcare Systems and Policy 3 Credit Hours
- NGR 7673 - Epidemiology Principles in Advanced Practice Nursing 3 Credit Hours
- NGR 7065 - Advanced Clinical Management for Advanced Practice Nursing 3 Credit Hours
- NGR 7855C - Evidence-Based Practice Development for DNP 3 Credit Hours (60 clinical hours)
- NGR 7748L - Advanced Clinical Practice Selective for Advanced Practice Nursing 3 Credit Hours (180 clinical hours)
- NGR 7827 - Concepts, Measurement, and Data Management 3 Credit Hours
- NGR 7793 - Leadership and Economics in Advanced Practice Nursing 3 Credit Hours
- NGR 7820 - Innovative Technologies in Healthcare 3 Credit Hours

Electives—9 Credit Hours

- Electives 9 Credit Hours

DNP Project—6 Credit Hours

The DNP Project is the product of the culminating or comprehensive experience of an independent project that demonstrates application of advanced clinical and evidence-based practice. The DNP Project is guided and evaluated by an academic committee and is derived from the practice immersion experience (residency). It will serve as a foundation for future scholarly practice.

The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base. DNP projects may include but are not limited to:

- Translate research into practice and evaluate outcomes
- Quality improvement (care processes, continuity of care, patient outcomes)
- Implement and evaluate evidence-based practice guidelines
- Analyze policy: develop, implement, evaluate, or revise policy
- Design and use databases to retrieve information for decision making, planning, evaluation
- Conduct financial analyses to compare care models and potential cost savings, etc.
- Design and evaluate new models of care
- Design and evaluate health promotion and disease prevention programs
- Assess integration of technology in care
The theme that links these forms of scholarly experiences is the use of evidence to improve either practice or patient outcomes. Additional examples of DNP projects can be found on the National Organization of Nurse Practitioner Faculty (NONPF) website under Practice Doctorate Resource Center.

- **NGR 7911C - Doctoral Project 1** 3 Credit Hours (60 clinical hours)
- **NGR 7912C - Doctoral Project 2** 3 Credit Hours (120 clinical hours)

**Progress to Degree**

Students are required to maintain a 3.0 grade point average. Grades below B are not acceptable in the doctoral program in the College of Nursing. Students who receive a grade of below B in any course are subject to dismissal from the DNP program and will be reviewed by the DNP Admissions, Progression and Graduation Committee for continuation in the program. Students who do not maintain a 3.0 GPA will be put on probation or dismissed from the program.

**Graduation Requirements**

- All course work completed with a minimum grade of "B"
- A satisfactory DNP Project
- Clinical performance evaluated at a satisfactory level
- A satisfactory public presentation of the DNP Project

**Equipment Fee**

Full-time students in the Nursing Practice DNP program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 each semester.

**Independent Learning**

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from clinical practice, will be developed in depth with faculty supervision.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- MSN degree in an APN specialty role or a post-MSN certificate (NP, CNS, CRNA, CNM) from an accredited institution.
- Advanced Registered Nurse Practitioner (ARNP) licensure in the State of Florida required. (Out of state applicants must be eligible for licensure in Florida and must achieve ARNP licensure to begin clinical courses.)
- Certification as an APN or ability to obtain it in the first semester of enrollment is required.
- Documentation of the number of clinical hours completed during master's program. Acceptable documents are license exam application form or the attached.
- A personal interview may be required with two members of the College of Nursing Doctoral Committee.
- Address the following 2 items in a written essay. Responses to both questions should not exceed 1 page, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals.
  - Identify one significant contemporary issue of the problem in U.S. healthcare and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates, this can include accomplishments as a student.
- Documentation of the number of clinical hours completed during master's program. Acceptable documents are your license exam application form completion of the Verification of Clinical Hours Form.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with a DNP adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice.

Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.
Upon admission to the program student will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. Students must be able to meet clinical partner background requirements to continue in the program.

The College of Nursing has implemented a database, LEAP*RN to manage information regarding student coursework and plans of study, clinical placements, and all evaluation data. This database will assist us in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. All students will be responsible for an annual subscription for a fee payable directly to LEAP*RN. Holds will be placed on registration and enrollment if the subscription cost is not paid.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

**Financials**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**Fellowships**

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Nursing Practice DNP, Executive Track ➤**

**Track Description**

The Executive Track in the Doctor of Nursing Practice (DNP) program is a dynamic and engaging academic curriculum that prepares the nurse executive for the multiple dimensions of administrative responsibilities within varied healthcare environments. The Executive DNP track extends and enhances the knowledge, skill and performance of healthcare system leaders in a wide variety of clinical and administrative environments.

The DNP Executive Track meets the unique needs and taps the talent of nurse executives through experiential learning and leadership projects in a team-centered environment. It provides enrolled executives the opportunity to interact with prominent healthcare experts who address emergent and challenging issues for nurse leaders, and encourages networking with colleagues across local and state healthcare and policy organizations.

**Program Objectives**

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems and disseminate findings.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and health care systems.

Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

For information on how this program may prepare you for professional licensure, please visit the program website.

Please note: This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Curriculum

The Executive Track in the Doctor of Nursing Practice program prepares nurses at the highest level of practice for the current healthcare environment based on a strong scientific foundation for practice; offers flexibility and emphasis on evidence-based practice, leadership, and organizational analysis, and provides analytic skills to examine practice innovations involving completion of the residency project requirement. Details about this program are located in the Executive DNP Handbook. For the Doctor of Nursing Practice (DNP), total graduate credit must equal or exceed 72 credit hours.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—27 Credit Hours

- NGR 6874 - Nursing Environment Management 3 Credit Hours
- NGR 7673 - Epidemiology Principles in Advanced Practice Nursing 3 Credit Hours
- NGR 7793 - Leadership and Economics in Advanced Practice Nursing 3 Credit Hours
- NGR 7827 - Concepts, Measurement, and Data Management 3 Credit Hours
- NGR 7820 - Innovative Technologies in Healthcare 3 Credit Hours
- NGR 7892 - Healthcare Systems and Policy 3 Credit Hours
- NGR 7855C - Evidence-Based Practice Development for DNP 3 Credit Hours (60 practice hours)
- NGR 7779C - Program Development and Management for DNP 3 Credit Hours (120 practice hours)
- NGR 7778L - Advanced Leadership Selective for DNP 3 Credit Hours (190 practice hours)

Elective—3 Credit Hours

- Graduate Elective 3 Credit Hours (chosen from an approved list)

DNP Executive Residency—3 Credit Hours

The DNP Residency provides an in-depth clinical experience for students. This advanced practicum provides the opportunity to link policy making with clinical systems, translate research into practice and serve as change agents for health care. The clinical residency experience is facilitated by an advanced practice expert clinician/teacher.

- NGR 7976L - Executive DNP Residency 3 Credit Hours (180 practice hours) Can be repeated.

DNP Professional Practice Immersion

DNP clinical requirements are 1000 hours post-baccalaureate. Immersion hours depend upon record review of hours completed at the master's level.

- NGR 7942L - DNP Professional Practice Immersion VAR Credit Hours (60-180 practice hours) Can be repeated.

DNP Project—9 Credit Hours

The DNP Project is the product of the culminating or comprehensive experience of an independent project that demonstrates application of advanced clinical and evidence-based practice. The DNP Project is guided and evaluated by an academic committee and is derived from the practice immersion
experience (residency). It will serve as a foundation for future scholarly practice.

The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base.

- **NGR 7911C - Doctoral Project 1** 3 Credit Hours (60 practice hours)
- **NGR 7912C - Doctoral Project 2** 3 Credit Hours (120 practice hours) Can be repeated.
- **NGR 7913 - Doctoral Project 3** 3 Credit Hours Can be repeated.

### Independent Learning

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from clinical practice, will be developed in depth with faculty supervision.

### Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

**PATH 1: Traditional MSN in Nursing Leadership and Management**

In addition to the general UCF graduate application requirements, applicants to this program that hold an MSN degree in Nursing Leadership and Management must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- MSN degree in Nursing Leadership and Management from an accredited institution.
- Florida licensure required for all students who will be taking clinical and practical coursework in Florida health care agencies and institutions. For those students at a distance, a license is required in the state or country in which they practice.
- Address the following 2 items in a written essay. Responses to both questions should not exceed 1 page, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals.
  - Identify one significant contemporary issue of the problem in U.S. healthcare and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates, this can include accomplishments as a student.

**PATH 2: MS or MSN in a field other than Nursing Leadership and Management**

In addition to the general UCF graduate application requirements, applicants to this program that holds an MS or MSN degree in a field other than Nursing Leadership and Management must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Master's Degree from an accredited institution.
- Florida licensure required for all students who will be taking clinical and practical coursework in Florida health care agencies and institutions. For those students at a distance, a license is required in the state or country in which they practice.
- Address the following 2 items in a written essay. Responses to both questions should not exceed 1 page, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals.
  - Identify one significant contemporary issue of the problem in U.S. healthcare and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates, this can include accomplishments as a student.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with a DNP adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice.
Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Upon admission to the program student will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. Students must be able to meet clinical partner background requirements to continue in the program.

The College of Nursing has implemented a database, LEAP*RN to manage information regarding student coursework and plans of study, clinical placements, and all evaluation data. This database will assist us in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. All students will be responsible for an annual subscription for a fee payable directly to LEAP*RN. Holds will be placed on registration and enrollment if the subscription cost is not paid.

Nursing Practice DNP, Family Nurse Practitioner Track

Track Description

The Doctor of Nursing Practice (DNP) program in the Family Nurse Practitioner Track prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP project.

The DNP Family Nurse Practitioner Track allows students to earn an MSN along the way to the Doctor of Nursing Practice (DNP). This MSN allows students in the DNP program to sit for certification examinations when they have completed the list of courses required. Certification authorizes them to function in the advanced role while they complete the DNP curriculum.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
• Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.

• Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.

• Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

For information on how this program may prepare you for professional licensure, please visit the program website.

Curriculum

The DNP Family Nurse Practitioner Track allows requires a minimum of 74 credit hours beyond the baccalaureate degree. The curriculum includes 40 credit hours of core courses shared with other DNP tracks, 12 credits of APN core and 22 credits of specialty courses. A total of 1,020 practicum hours are required to earn the DNP. The program prepares nurses at the entry level for advanced practice for the current healthcare system based on a strong scientific foundation for practice; offers flexibility and emphasis on evidence-based practice, leadership and organizational analysis; and provides analytic, critical thinking and diagnostic reasoning skills to examine practice innovations involving completion of the residency project during the clinical residency courses. Details about this program are located in the Advanced Practice DNP Family Nurse DNP Handbook.

Total Credit Hours Required: 74 Credit Hours Minimum beyond the Bachelor's Degree

The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base. DNP projects may include but are not limited to:

• Translate research into practice and evaluate outcomes
• Quality improvement (care processes, continuity of care, patient outcomes)
• Implement and evaluate evidence-based practice guidelines
• Analyze policy: develop, implement, evaluate or revise the policy
• Design and use databases to retrieve information for decision making, planning, evaluation
• Conduct financial analyses to compare care models and potential cost savings, etc.
• Design and evaluate new models of care
• Design and evaluate health promotion and disease prevention programs
• Assess integration of technology in care

The theme that links these forms of scholarly experiences is the use of evidence to improve either practice or patient outcomes. Additional examples of DNP projects can be found on the National Organization of Nurse Practitioner Faculty (NONPF) website under Practice Doctorate Resource Center.

Prerequisite Courses—9 Credit Hours

Students with a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of ‘B’ or better.

• NUR 3805 - Dimensions of Professional Practice 3 Credit Hours
• NUR 4637 - Public Health Nursing 3 Credit Hours
• NUR 3165 - Nursing Research 3 Credit Hours

Advanced Practice Core Courses—12 Credit Hours

• NGR 5003 - Advanced Health Assessment and Diagnostic Reasoning 2 Credit Hours
• NGR 5003L - Advanced Health Assessment and Diagnostic Reasoning Lab 1 Credit Hours (60 clinical hours)
• NGR 5141 - Pathophysiological Bases for Advanced Nursing Practice 3 Credit Hours
• NGR 5638 - Health Promotion 3 Credit Hours
• NGR 6172 - Pharmacology for Advanced Nursing Practice 3 Credit Hours

Specialty Courses: Family Nurse Practitioner—22 Credit Hours

• NGR 6201 - Adult I Primary Care 3 Credit Hours
• NGR 6240L - Adult I Clinical for APNs 3 Credit Hours (180 clinical hours)
• NGR 6263 - Gerontologic Care for APNs 3 Credit Hours
• NGR 6263L - Gerontologic Care Clinical for NPs 2 Credit Hours (120 clinical hours)
• NGR 6305 - Pediatric Primary Care 3 Credit Hours
• NGR 6305L - Pediatric Primary Care Clinical 2 Credit Hours (120 clinical hours)
• NGR 6334 - Women's Health for APNs 2 Credit Hours
• NGR 6342L - Women's Health for APNs Clinical 1 Credit Hours (60 clinical hours)
**Independent Learning**

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from clinical practice, will be developed in depth with faculty supervision.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Official, competitive GRE score taken within the last five years.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)
- Address the following 2 items in a written essay. Responses to both questions should not exceed 1 page, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Identify one significant contemporary issue of a problem in U.S. healthcare and explore how members of the nursing profession can help address that issue or solve that problem.
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals.
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates, this can include accomplishments as a student.
- An interview with faculty may also be required.

*For Students with an RN and a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu for additional options.
Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with a DNP adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice.

Upon admission to the program student will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. Students must be able to meet clinical partner background requirements to continue in the program.

The College of Nursing has implemented a database, LEAP*RN to manage information regarding student coursework and plans of study, clinical placements, and all evaluation data. This database will assist us in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. All students will be responsible for an annual subscription for a fee payable directly to LEAP*RN. Holds will be placed on registration and enrollment if the subscription cost is not paid.

Optics and Photonics PhD

Program Description

The Optics and Photonics PhD program provides the highest-quality education in optical science and engineering, allowing students to conduct scholarly, fundamental, and applied research, while aiding in the development of Florida's and the nation's technology-based industries.

Research activities cover all aspects of optics, photonics, and lasers, and the Center for Research and Education in Optics and Lasers (CREOL), the Florida Photonics Center of Excellence (FPCE), and the Townes Laser Institute (TLI) are integral parts of the College of Optics and Photonics. Current research areas include: linear and nonlinear guided-wave optics and devices, high speed photonic telecommunications, fiber optic fabrication, fiber optic communications, solid state laser development, nonlinear optics, laser-induced damage, quantum-well optoelectronics, quantum optics, photonic information processing, infrared systems, optical diagnostics, optical system design, image analysis, virtual reality, medical imaging, diffractive optics, optical crystal growth and characterization, high intensity lasers, x-ray optics, EUV sources, optical glasses, laser materials processing, free-electron lasers, and light matter interaction.

The College of Optics and Photonics (COP) was the first program to be offered the distinction of a college devoted to Optics in the United States. The College of Optics and Photonics
has grown rapidly and now has 55 faculty members and faculty with joint appointments, 41 research scientists and 148 graduate students with research activities covering all aspects of optics, photonics, and lasers. Research expenditures are over $10 million annually, with more than 20 percent of the funding coming from industrial partners, illustrating the effectiveness of the commitment to partnerships that is a foundational value of the COP.

Curriculum

The Optics and Photonics PhD program is intended for students with a bachelor's or master's degree in Optics, Electrical Engineering, Physics, or closely related fields who wish to pursue a career in research or academia. Students with degrees in related fields may be required to take undergraduate articulation courses determined by the program director on a case-by-case basis.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Students are required to pass a qualifying examination, usually taken after 12 months in the program. About one year after passing the qualifying exam, students must take a candidacy examination, form a dissertation committee, and submit an approved plan of study before being admitted to candidacy doctoral status. The PhD core courses are not absolutely required, but they have been designed to include a significant portion of the material upon which the qualifying examination is based. Consequently, students are strongly encouraged to include most of these courses in their plan of study.

The Optics and Photonics PhD program requires a minimum 72 credit hours beyond the bachelor's degree, of which more than 50 percent should be at the 6000 level or higher. These hours must be comprised of:

- At least 39 credit hours of formal coursework satisfying the following requirements:
  - at least 30 credit hours must be Optics (prefix OSE) courses.
  - at least 6 credit hours must be science and engineering graduate research methods/laboratory courses of which at least 3 credit hours must be in Optics.
- at least 15 credit hours of Dissertation (OSE 7980)

Additional notes on the curriculum:

- Up to 30 credit hours of appropriate graduate courses earned in a master's program from accredited universities may be waived with approval from the graduate committee.
- Only courses with grades of "B" or better can be transferred.

Required Courses: 24 Credit Hours

Core Courses: 18 Credit Hours

- OSE 6111 - Optical Wave Propagation 3 Credit Hours
- OSE 5115 - Interference and Diffraction 3 Credit Hours
- OSE 5312 - Light Matter Interaction 3 Credit Hours
- OSE 6211 - Imaging and Optical Systems 3 Credit Hours
- OSE 6474 - Optical Communications Systems 3 Credit Hours
- OSE 6525 - Laser Engineering 3 Credit Hours

Research Methods/ Laboratory Courses: 6 Credit Hours

At least 6 credit hours of approved Optics and related science/engineering research methods/laboratory courses are required from the list below. At least one must be in Optics (OSE). One required laboratory may be waived if the student can demonstrate an equivalent hands-on proficiency in that laboratory specialization. These research methods/laboratory courses count toward the formal graduate course work requirement.

- OSE 6234C - Applied Optics Laboratory 3 Credit Hours
- OSE 6455C - Photonics Laboratory 3 Credit Hours
- OSE 6526C - Laser Engineering Laboratory 3 Credit Hours
- OSE 6615L - Optoelectronic Device Fabrication Laboratory 3 Credit Hours
- Other graduate science and engineering labs may be taken with college approval.

Elective Courses: 33 Credit Hours

Minimum

Restricted Electives: 6 Credit Hours

In addition to the required courses above, students will need to complete an additional 6 credit hours to meet the 30 hours of formal Optics (OSE) course work required. An additional three hours of optics coursework will also be required if the student waived out of one of the research methods/laboratory courses.
above, or if one of the laboratory courses taken is not an OSE prefix.

Other courses with significant optics content may be accepted toward the Optics (OSE) coursework requirement, upon approval by the Associate Dean.

A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section.

Unrestricted Electives: 27 Credit Hours Minimum

A combination of formal course work and research hours comprise the remaining unrestricted hours. At least 9 of these hours must be formal course work, which may be graduate optics, science or engineering courses. In addition to the 9 hours, 18 credits may be regular formal course work, doctoral research hours, independent study, or doctoral dissertation hours. The independent study hours are limited to a maximum of 3 credit hours. Any courses outside of the graduate optics, science or engineering disciplines must be approved by the college associate dean.

Dissertation: 15 Credit Hours Minimum

OSE 7980 - Dissertation Research 15 Credit Hours

Qualifying Examination

Before students are eligible to take the candidacy examination, they must pass a written qualifying examination, which for full-time students is normally taken at the end of the first year of graduate study. The purpose of the qualifying exam is for the student to demonstrate mastery of the fundamentals of optics and photonics. The exam is administered by the doctoral qualifying examination committee, which consists of several graduate faculty members representing the appropriate disciplines, appointed by the director or designee. The committee's duties include the preparation and grading of the examination material, and it may solicit input from other interested faculty. The exam is a closed book written exam in the general areas of electromagnetic foundations of optics, interference, diffraction, coherence, linear systems imaging, and light matter interaction. Students who do not pass the qualifying examination in two attempts will not continue in the program.

Candidacy Examination

Students are required to successfully complete the candidacy examination before admission to full doctoral status. The purpose of the candidacy exam is for the student to demonstrate his or her readiness for the PhD program through preliminary research work in the chosen field of study. The candidacy exam is comprised of written and oral portions. The exam is administered by the members of the student's dissertation advisory committee who are full faculty members of the College of Optics and Photonics. External committee members of the dissertation advisory committee are not appointed until after the student has passed the candidacy exam. The exam is normally taken near the completion of required course work. Students must pass the candidacy exam before registering for doctoral dissertation hours (OSE 7980).

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of most course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Dissertation Proposal and Defense

Approximately one year after passing the general candidacy examination, and after the student has begun research, the student will write a dissertation proposal and present it to their dissertation advisory committee for its approval. The proposal must include the research performed to date and the research planned to complete the dissertation. The committee, which consists of three graduate faculty members from the College of Optics and Photonics and one faculty member from outside the college, must be approved by the director or designee and will meet annually to review the student's progress. The dissertation advisory committee also administers the dissertation oral defense examination.

Independent Learning

The dissertation satisfies the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.
In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's or master's degree in Optics, Electrical Engineering, Physics or closely related discipline.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation
- Goal statements: Personal Statement and Research Statement
- Personal Statement should describe your career goals. Please include why you want to come to CREOL and how the PhD will help you achieve your ultimate career goals. Do you want to work in industry or do you want to go into academia?
- Research Statement should describe the type of research that you are most interested in or specific faculty members that you wish to work with. If there are multiple areas of research, please provide information for each area.
- Résumé

Students with degrees in related fields may be required to take undergraduate articulation courses determined by the program director on a case-by-case basis.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Physical Therapy DPT

Program Description

The Doctor of Physical Therapy (DPT) program educates students to become competent, compassionate, and ethical practitioners in a variety of health care settings. Graduates will be highly dedicated professionals with excellent patient care, communication, critical thinking, patient education and advocacy, management and research skills.

Mission

The mission of the University of Central Florida's Doctor of Physical Therapy Program is to cultivate excellence in physical therapist practice through comprehensive and focused doctoral education. The program fosters excellence through its dedication to foundational sciences, clinical skill proficiency, research and evidence-based practice, service and professional duty, and lifelong learning. The program is committed to the development and strengthening of the healthcare community in order to optimize patient care in the dynamic healthcare environment.
Vision

The Doctor of Physical Therapy Program at the University of Central Florida will be distinguished for:

- Its breadth, depth, and collaborative approach to physical therapist education
- Clinical excellence and advancement of clinical practice
- Scholarly achievements and professional recognition of students, faculty, and clinical partners
- Dedication to the health and well-being of the Central Florida community
- Professional commitment and advocacy
- Cultivation of professional development to advance the practice of physical therapy

The Doctor of Physical Therapy Program is a three-year (nine consecutive semesters) professional doctoral curriculum designed to prepare entry-level therapists to practice in a variety of clinical settings. The professional curriculum is a full-time "lock-step" program with no opportunity to take courses other than those prescribed by the program. The program includes multiple clinical practica and internships ranging from six weeks to twelve weeks long. Applicants need to note that one or more of the clinical practica may be assigned at a site sufficiently removed from the Orlando area and may require the student to provide transportation and housing.

Students who successfully complete the course of study will be granted the Doctor in Physical Therapy degree (DPT), enabling the graduate to take the national board examination leading to state licensure as a Physical Therapist. For information on how this program may prepare you for professional licensure, please visit here. The UCF Doctor of Physical Therapy program promotes lifelong learning and professional development, which is attained through active involvement in professional organizations such as the American Physical Therapy Association. UCF's Doctor of Physical Therapy Program is fully accredited by the Commission on Accreditation of Physical Therapy Education.

Curriculum

The Doctor of Physical Therapy (DPT) Program is a full-time professional doctoral program requiring completion of 112 credits beyond the bachelor's degree. The course work is taken in a prescribed sequence over nine semesters as provided here and all course work is required. The program requires a total of 36 weeks of full-time clinical training. During the clinical affiliations, students work under the direct supervision of a licensed physical therapist.

Total Credit Hours Required: 112 Credit Hours Minimum beyond the Bachelor's Degree

Prerequisites

Each prerequisite course must be completed with a minimum grade of "C". The overall GPA for all prerequisite courses must be a 3.00 or higher to be considered for admission. The program recommends all prerequisite courses be completed at the time of application. Candidates with all prerequisites completed at the time of application may be given preference over those still completing courses. No more than two prerequisite courses may be in progress the fall semester prior to the program's start and no more than one course may be in progress during the spring semester prior to the program's start. Courses older than seven years will not be accepted. Online courses are NOT accepted for the following prerequisites: anatomy courses, physiology courses, physics courses, or chemistry courses. Hybrid courses are only accepted for the prerequisite courses listed above if the lab component is delivered in a face-to-face format (submission of course description/syllabi may be required to verify course delivery mode). Email ptinfo@ucf.edu to request a prerequisite review.

Anatomy and Physiology - Two courses with labs and a minimum of 8 credit hours is required. One of two options must be met:
Option 1: One semester of Human Physiology with lab and one semester of Anatomy with lab.
Option 2: Two semesters of Anatomy/Physiology combined courses with labs.

Biology / Biological Studies - Two courses and a minimum of 6 credit hours is required. Labs are not required. Must be courses for science majors.

Chemistry - Two courses with labs and a minimum of 8 credit hours is required. Introduction and survey courses are NOT accepted.

Physics - Two courses with labs and a minimum of 8 credit hours is required. General Physics and Physics with Calculus are both acceptable courses.

Psychology - One course (3 credit hours) is required. Any psychology course that is taken within the Psychology Department will meet this requirement.

Statistics - One course (3 credit hours) is required.
### Required Courses

#### Year 1

**Summer Term 1 (14 Credit Hours)**
- PHT 5003 - Foundations of Physical Therapy **2 Credit Hours**
- PHT 5125 - Clinical Kinesiology **2 Credit Hours**
- PHT 5125L - Clinical Kinesiology Lab **2 Credit Hours**
- PHT 6115C - Gross Anatomy/Neuroscience I **6 Credit Hours**
- PHT 6156 Applied Human Physiology for Health Sciences **3 Credit Hours**

**Fall Term 1 (17 Credit Hours)**
- PHT 5240 - Physical Assessment **1 Credit Hours**
- PHT 5240L - Physical Assessment Lab **2 Credit Hours**
- PHT 5260 - Patient Care Skills **2 Credit Hours**
- PHT 5260L - Patient Care Skills Lab **1 Credit Hours**
- PHT 6118C - Gross Anatomy/Neuroscience II **6 Credit Hours**
- PHT XXXXL Physiologic Assessment in Physical Therapy Practice (2 Credit Hours)
- PHT 6606 - Research Methods in Physical Therapy **2 Credit Hours**

**Spring Term 1 (15 Credit Hours)**
- PHT 5218 - Theories and Procedures I **2 Credit Hours**
- PHT 5218L - Theories and Procedures I Lab **1 Credit Hours**
- PHT 5241 - Therapeutic Exercises I **2 Credit Hours**
- PHT 5241L - Therapeutic Exercise Lab I **2 Credit Hours**
- PHT 6242 - Orthopedic Physical Therapy **2 Credit Hours**
- PHT 6242L - Orthopedic Physical Therapy Lab **1 Credit Hours**
- PHT 6306 - Pathology/Pharmacology **4 Credit Hours**
- PHT XXXX Pharmacology in Physical Therapy Practice **2 Credit Hours**

#### Year 2

**Summer Term 2 (11 Credit Hours)**
- PHT 5718 - Neurological Physical Therapy **2 Credit Hours**
- PHT 5718L - Neurological Physical Therapy Lab **1 Credit Hours**
- PHT 6219 - Theories and Procedures II **2 Credit Hours**
- PHT 6219L - Theories and Procedures II Lab **1 Credit Hours**
- PHT 6245 - Therapeutic Exercise II **3 Credit Hours**
- PHT 6245L - Therapeutic Exercise II Lab **1 Credit Hours**
- PHT 7722C - Physical Therapy Integration I **2 Credit Hours**

**Fall Term 2 (15 Credit Hours)**
- PHT 6521 - Management of Physical Therapy Services **3 Credit Hours**
- PHT 6322C - Pediatric Physical Therapy **3 Credit Hours**
- PHT 6070C - Radiology/Imaging for Physical Therapy **3 Credit Hours**
- PHT 6716C - Advanced Orthopedic Physical Therapy **2 Credit Hours**
- PHT 6720 - Wound Care and Professional Issues **1 Credit Hours**
- PHT 6805C - Clinical Education I **3 Credit Hours**

**Spring Term 2 (13 Credit Hours)**
- PHT 6374C - Gerontology in Physical Therapy Practice **2 Credit Hours**
- PHT 6381C - Cardiopulmonary Physical Therapy **2 Credit Hours**
- PHT 6618 - Research Applications in Physical Therapy **2 Credit Hours**
- PHT 6719 - Advanced Neurological Physical Therapy **2 Credit Hours**
- PHT 6719L - Advanced Neurological Physical Therapy Lab **1 Credit Hours**
- PHT 7134C - Physical Therapy Integration II **2 Credit Hours**
- PHT 7730C - Primary Care for the Physical Therapist **2 Credit Hours**
Year 3

Summer Term 3 (6 Credit Hours)
- PHT 7822C - Advanced Clinical Education I 6 Credit Hours

Fall Term 3 (10 Credit Hours)
- PHT 7721C - Advanced Orthopedic Physical Therapy II 1 Credit Hours
- PHT 7772C - Advanced Neurological Physical Therapy II 1 Credit Hours
- PHT 7780C - Advanced Gerontology in Physical Therapy 1 Credit Hours
- PHT 7329C - Advanced Pediatric Physical Therapy 1 Credit Hours
- PHT 7521C - Management of Physical Therapy Services II 2 Credit Hours
- PHT 7823C - Advanced Clinical Education II 4 Credit Hours

Spring Term 3 (11 Credit Hours)
- PHT 7021 - Professional Practice in Physical Therapy 2 Credit Hours
- PHT 7900 - Capstone Project in Physical Therapy 3 Credit Hours
- PHT 7XXXC ***Elective Course 2 Credit Hours
  o ***Elective Course Options (student must select at least one of the following courses, pending availability):
    - PHT 7742C - Acute Care Physical Therapy 2 Credit Hours
    - PHT 7778C - Advanced Manual Therapy 2 Credit Hours
    - PHT 7764C - Advanced Neurological Treatment 2 Credit Hours
    - PHT 7702C - Advanced Orthotics and Prosthetics 2 Credit Hours
    - PHT 7779C - Sports Physical Therapy 2 Credit Hours

Examinations

This program requires a final comprehensive examination on all course work in the program of study. Students are required to pass the comprehensive examination with an 80% proficiency. Students will be allowed to re-take the examination for a total of three (3) attempts. A student may not graduate from the Doctor of Physical Therapy program until the comprehensive examination is passed with an 80%. Failure to pass the examination after 3 attempts will result in a meeting with the Retention and Advancement Committee for the Doctor of Physical Therapy Program, where further action will be determined. In addition, comprehensive examinations may be required at the end of each year of the program. Participation and completion of a capstone (research) project is also required of each student prior to graduation.

Equipment Fee

Students in the Doctor of Physical Therapy program pay a $90 equipment fee each semester that they are enrolled.

Independent Learning

All students in the Doctor of Physical Therapy (DPT) program are required to engage in independent learning, a process in which individuals take the initiative, with or without help of others to attain knowledge, skills, and professional behaviors. Tangible assignments, such as "Grand Rounds" (i.e., patient case studies), research projects, scholarly reviews, and full-time clinical practica mandated by the program and provide important independent learning experiences giving students ample opportunities to develop and demonstrate independent learning skills as a result of self-inquiry and group dialogue.

Application Requirements

The Doctor of Physical Therapy program at UCF participates in the Physical Therapist Centralized Application Service, known as PTCAS. Prospective students applying to the entry-level physical therapist education program for the 2019 entering class must apply online using the PTCAS application. To learn more about the PTCAS application process, visit www.ptcas.org.

All application materials MUST be sent directly to PTCAS. Materials sent to the university or program and not to PTCAS will not be accepted. The following application materials must be received by PTCAS no later than November 1.
- Completed PTCAS Application (www.ptcas.org), including all documents required by PTCAS.
- One official transcript from each college/university attended.
- Official GRE scores taken within last five years. Use GRE CODE for UCF PTCAS: 3871 (Do not use the "Institution Code" for GRE listed to the right.)
- Prerequisite courses completed within seven (7) years of anticipated matriculation.
- A minimum of 30 hours of volunteer or work experience under the direct supervision of a licensed physical therapist.
Hours must be verified through PTCAS by November 1st to be considered. A variety of settings is recommended.

- Three (3) letters of recommendation with PTCAS recommendation forms, including one from a physical therapist.
- Applicants who have attended a college/university outside the United States must also provide a course-by-course credential evaluation with GPA calculation through WES.
- UCF Graduate Application (supplemental) must be submitted in addition to PTCAS application. Deadline to submit the supplemental application is December 1, 2018.

Incomplete applications will NOT be reviewed.

Application requirements:

- The bachelor's degree may be in any discipline from a regionally accredited institution and may be in progress at the time of application. However, the degree must be awarded prior to the program's start date in the Summer C semester (mid-May).
- Minimum GPA of 3.00 (on 4.00 scale) in the last 60 credit hours of an undergraduate degree.
- Minimum GPA of 3.00 (on 4.00 scale) for all prerequisite courses. Each prerequisite course grade must be a 'C' or higher.
- Minimum GRE scores of 146 for verbal reasoning; 144 for quantitative reasoning; and 3 on the analytical writing portion.
- An on-campus interview, by invitation only.
- UCF Graduate Application (supplemental) MUST be completed by December 1, 2018, with supplemental application fee paid by ALL APPLICANTS.
- A resume will only be required for students who are offered an interview by the program. Once requested, the applicant will email the resume directly to the program.

Applicants not meeting these minimum requirements will not be considered for admission. Meeting minimum requirements does not guarantee an applicant an interview or admission to the program. All applicants and admitted students to the Doctor of Physical Therapy program must perform certain Essential Functions in order to participate and complete program requirements.

PTCAS will begin accepting applications in July, however, the program will not begin reviewing applications until September.

Admissions decisions will be made only once per academic year. Incoming students must begin the program in the summer C semester (mid-May).

Thirty-eight (38) students are admitted to the program each year. The demographics of a recent class include an average age of 24 years and a grade point average of 3.77 (on a 4.0 scale) for both GPA of upper-division coursework and prerequisite courses and an average GRE scores of 156Q / 155V / 4WA.

Admission to the program is competitive based on the above criteria, the applicant's abilities, past academic performance, work experience and match of the applicant with the program's mission and goals.

Application Deadlines

Applications are only accepted for Summer admission. The application for this program can be found at www.ptcas.org.

Physics PhD

Program Description

The Physics doctoral program offers research opportunities in condensed matter physics, physics of nanostructured devices, surface science, optical physics, complex systems, biophysics, atomic and molecular physics, physics education and planetary/space science.

The doctoral program in Physics intends to provide a broad base in experimental and theoretical physics. Students will obtain distinction in their field of study with research opportunities in condensed matter physics, nanostructure devices, surface science, optical physics, complex systems, biophysics, atomic and molecular physics, physics education and planetary/space science.

The rules and recommendations below do not apply to the Planetary Sciences track of the Physics PhD program.

Curriculum

The Physics PhD program requires a total of 72 credit hours for completion. A specific set of six required core courses (18 credit hours), thirteen elective courses (39 credit hours), and a minimum of 15 credit hours of dissertation are part of the 72 hours.

Total Credit Hours Required: 72 Credit Hours
Minimum beyond the Bachelor's Degree. 42 Credit Hours
Minimum beyond the Master's Degree.

Of the 39 credit hours, 9 credit hours must be formal courses and 3 credit hours must be in a methods course selected from a list approved by the Physics department (see below). The remaining 27 credit hours need to be a combination of directed research, other electives, and/or dissertation. Courses must be selected so that at least one-half of the required 72 hours are taken at the 6000 level.

Required Core Courses: 18 Credit Hours

All students are required to take the following core courses. For all core courses there will be weekly recitations.

- PHY 5606 - Quantum Mechanics I 3 Credit Hours
- PHY 6624 - Quantum Mechanics II 3 Credit Hours
- PHY 5346 - Electrodynamics I 3 Credit Hours
- PHY 6347 - Electrodynamics II 3 Credit Hours
- PHY 5524 - Statistical Physics 3 Credit Hours
- PHY 6246 - Classical Mechanics 3 Credit Hours

Elective Courses: 39 Credit Hours

Elective and research courses are determined by the student's chosen specialization as listed below. Of the 39 credit hours, 9 credit hours must be from formal courses and 3 credit hours must be in a methods course approved by the department. The remaining 27 credit hours can consist of any combination of courses.

Formal Courses: 9 Credit Hours

Students must complete three formal courses (9 credit hours) from the specialization coursework listed below.

Methods Course: 3 Credit Hours

Students must complete one methods course (3 credit hours) from the following list:

- PHZ 5156 - Computational Physics 3 Credit Hours
- AST 5765C - Advanced Astronomical Data Analysis 3 Credit Hours
- PHY 5937 - Nano-Electronics 3 Credit Hours

Remaining Electives: 27 Credit Hours

Students must complete 27 credit hours of unrestricted electives, which may consist of formal courses, research, and/or dissertation hours. Students should consult with their adviser about selections for the remaining unrestricted electives.
General Physics Specialization

The General Physics Specialization emphasizes strong preparation in physics fundamentals. It is intended to prepare students for careers in theoretical physics teaching at the college level. A number of active research programs exist in the department to accommodate such students.

Recommended Courses

- PHY 6673 - Advanced Quantum Mechanics 3 Credit Hours
- PHY 5933 - Selected topics in biophysics of macromolecules 3 Credit Hours
- PHZ 5156 - Computational Physics 3 Credit Hours
- PHZ 5405 - Condensed Matter Physics 3 Credit Hours
- PHZ 6426 - Condensed Matter Physics I 3 Credit Hours
- PHZ 6428 - Condensed Matter Physics II 3 Credit Hours
- PHZ 5437 - Nanoscale Surface Physics 3 Credit Hours
- PHZ 5432 - Introduction to Soft Condensed Matter Physics 3 Credit Hours
- PHY 5933 - Selected topics in biophysics of macromolecules 3 Credit Hours
- PHY 6667 - Quantum Field Theory I 3 Credit Hours
- PHY 7669 - Quantum Field Theory II 3 Credit Hours
- COT 6600 - Quantum Computing 3 Credit Hours
- PHZ 5304 - Nuclear and Particle Physics 3 Credit Hours
- PHZ 6234 - Atomic Physics 3 Credit Hours
- PHZ 6420 - First Principles Computational Methods in Condensed Matter Physics and Materials Science 3 Credit Hours
- PHY 6600C - Theory and Computations of Molecular Wavefunctions 3 Credit Hours
- PHY 6938 - Selected Topics in Scattering Theory 3 Credit Hours
- PHY 6938 - Special Topics: Electrodynamics III 3 Credit Hours
- OSE 5312 - Light Matter Interaction 3 Credit Hours
- OSE 6347 - Quantum Optics 3 Credit Hours
- PHY 7919 - Doctoral Directed Research

Condensed Matter Physics Specialization

The Condensed Matter Physics Specialization is intended to prepare students for careers in materials physics, nanoscale science and technology, semiconductors, and soft condensed matter physics. It emphasizes strong experimental preparation with hands-on courses in advanced materials characterization and processing instrumentation. Related research programs at UCF include magnetic nanostructures, soft condensed matter, electronic and optoelectronic devices, and nanoscale characterization.

Recommended Courses

- PHZ 5405 - Condensed Matter Physics 3 Credit Hours
- PHZ 6426 - Condensed Matter Physics I 3 Credit Hours
- PHZ 6428 - Condensed Matter Physics II 3 Credit Hours
- PHZ 5156 - Computational Physics 3 Credit Hours
- PHZ 6420 - First Principles Computational Methods in Condensed Matter Physics 3 Credit Hours
- PHZ 5437 - Nanoscale Surface Physics 3 Credit Hours
- PHZ 5432 - Introduction to Soft Condensed Matter Physics 3 Credit Hours
- PHY 5933 - Selected topics in biophysics of macromolecules 3 Credit Hours
- PHY 6667 - Quantum Field Theory I 3 Credit Hours
- PHY 7669 - Quantum Field Theory II 3 Credit Hours
- COT 6600 - Quantum Computing 3 Credit Hours
- PHY 6938 - Theory and Computation of Molecular Wave Functions 3 Credit Hours
- PHY 6938 - Selected Topics in Scattering Theory 3 Credit Hours
- Two "studio lab" courses: PHY 5140C - Ion-solid interactions (3 credit hours) and PHZ 5425C - Electron Solid Interactions (3 credit hours)

Other courses from Materials Science, Physics, Optical Science and Engineering, Electrical Engineering, or Industrial Chemistry require approval of the student's adviser and the graduate program director.

Optical Physics Specialization

The Optics Specialization coordinator is David Hagan, PhD, College of Optics and Photonics. Students are recommended to take at least one of the following courses.

- OSE 6111 - Optical Wave Propagation 3 Credit Hours
- OSE 5115 - Interference and Diffraction 3 Credit Hours

Laboratory Course

Select at least one of the following laboratory courses.

- OSE 6526C - Laser Engineering Laboratory 3 Credit Hours
- OSE 6455C - Photonics Laboratory 3 Credit Hours
The remaining courses (up to three) may be selected from other graduate courses in Optics (see www.creol.ucf.edu).

**Dissertation: 15 Credit Hours Minimum**

All students must complete a minimum of 15 credit hours of dissertation prepared in consultation with a dissertation adviser. A fifteen-page written proposal is presented orally to the student's dissertation committee within one year after the written candidacy exam. The final oral defense of the dissertation is administered by the student's dissertation committee following completion of a written dissertation describing the student's research.

- **PHY 7980 - Dissertation Research 15 Credit Hours**

**Seminar Attendance**

Students in their fourth semester and beyond will be required to attend a major fraction of seminars and colloquia hosted by the Physics Department, as well as to make an annual presentation of their research work or independent study.

**Examinations**

**Placement Exam**—All incoming PhD students in Physics will be required to take a diagnostic test similar to the Physics subject GRE. This test has placement purposes only, allowing the Graduate Program Director and academic adviser to identify possible weaknesses in the student's background and help devise a suitable plan of study. There is no passing or failure.

**Candidacy Exam**—The candidacy exam consists of two parts.

Part 1 is a written exam covering topics such as those listed in the Graduate Catalog for the courses PHY 5606 - Quantum Mechanics I, PHY 6624 - Quantum Mechanics II, PHY 5346 - Electrodynamics I, PHY 6347 - Electrodynamics II, PHY 5524 - Statistical Physics, and PHY 6246 - Classical Mechanics. Students are expected to show mastering of these topics at or above the undergraduate level. The written exam should be taken immediately after the core courses have been completed. After passing the written exam, the student should identify a research supervisor and a dissertation committee must be put in place with the approval of the graduate program director. Students are only allowed two attempts at passing the written part of the candidacy exam.

Part 2 is an oral exam that combines an examination of the student's command of Physics and a written dissertation proposal. The oral exam should be taken no later than one year after the written exam has been satisfied.

**Admission to Candidacy**

The following are required to obtain candidacy status and enroll in dissertation hours:

- Completion of a minimum 30 credit hours to include all required core courses, 18 credit hours of core courses, 3 credit hours of Methods Course, and 9 credit hours of formal electives. (Directed Research and Dissertation hours are not included) *Note: For students that transfer from a doctoral program post-candidacy, a minimum 9 credit hours enrollment in their first semester is required in order to satisfy the UCF earned non-zero GPA.
- Successful completion of both part I (written exam) and part II (oral exam) of the candidacy exam.
- The dissertation advisory committee is formed, consisting of a chair, approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.
- Completion of CITI and RCR Workshops

**Independent Learning**

The Physics PhD program requires a doctoral dissertation. This will provide ample opportunities for students to gain independent learning experience through studying published research papers, conducting research and presenting their results in conferences and in peer-reviewed scientific journals.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- The Physics Subject Test of the GRE is recommended, but not required.
- Three letters of recommendation.
- Statement of goals.
- Résumé.

Students entering the Physics graduate program with regular status are normally expected to have completed course work
generally required for a bachelor's degree in physics, including mechanics, electricity and magnetism, thermal and statistical physics, and quantum mechanics.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

<td><strong>Track Description</strong></td>
<td>The goal of the Planetary Sciences Track of the Physics PhD program is to foster a vibrant planetary science research environment that can attract top students, researchers, and faculty and contribute significantly to the exploration of space. The Planetary Sciences track is designed to prepare students to be competitive in the global planetary sciences research community.</td>
</tr>
<tr>
<td><strong>Curriculum</strong></td>
<td>The Planetary Sciences track in the Physics PhD program requires a minimum of 72 credit hours beyond the bachelor's degree or 42 hours beyond the master's degree.</td>
</tr>
<tr>
<td><strong>Total Credit Hours Required</strong></td>
<td>72 Credit Hours Minimum beyond the Bachelor's Degree. 42 Credit Hours Minimum beyond the Master's Degree.</td>
</tr>
<tr>
<td><strong>This includes</strong></td>
<td>completion of 6 required courses (18 credit hours), 5 elective courses (15 credit hours) of regular course work selected in consultation with the student's dissertation advisory committee, a minimum of 15 credit hours of dissertation, and the remaining 24 credit hours of appropriately selected research, dissertation, and elective courses. Courses must be selected so that at least 36 of the 72 hours are at 6000 level or higher. No more than 12 hours of independent study may be credited toward the PhD degree. The PhD includes a Candidacy Exam to</td>
</tr>
</tbody>
</table>
be taken after the completion of the core courses, a written
dissertation, and a dissertation defense before the student's
dissertation advisory committee.

Required Courses: 18 Credit Hours

The core is designed to give students a broad foundation in the
planetary sciences and a rapid training in the data analysis
techniques that will be necessary for a successful research and
publications.

- PHY 5524 - Statistical Physics 3 Credit Hours
- PHY 6246 - Classical Mechanics 3 Credit Hours
- PHZ 5156 - Computational Physics 3 Credit Hours or
  AST 5765C - Advanced Astronomical Data Analysis 3
  Credit Hours
- AST 5154 - Advanced Planetary Geophysics 3 Credit
  Hours
- AST 5263 - Advanced Observational Astronomy 3
  Credit Hours
- AST 5165 - Planetary Atmospheres 3 Credit Hours

Elective Courses: 15 Credit Hours

- AST 6938 - Planetary Astronomy Seminar 3 Credit
  Hours
- AST 6112 - Origin and Evolution of Planetary
  Systems 3 Credit Hours
- AST 5334 - Extrasolar Planets and Brown Dwarfs 3
  Credit Hours
- AST 5937 - Astrobiology 3 Credit Hours
- AST 5145 - Advanced Asteroids, Comets, and
  Meteorites 3 Credit Hours

Other Electives: 24 Credit Hours

Please see your adviser. This may include elective courses,
dissertation hours, or selected research courses.

- PHZ 5505 - Plasma Physics 3 Credit Hours
- PHY 5346 - Electrodynamics I 3 Credit Hours
- PHY 6347 - Electrodynamics II 3 Credit Hours
- PHY 5606 - Quantum Mechanics I 3 Credit Hours
- PHY 6624 - Quantum Mechanics II 3 Credit Hours
- OSE 5041 - Introduction to Wave Optics 3 Credit
  Hours
- EEL 5820 - Image Processing 3 Credit Hours
- OSE 5312 - Light Matter Interaction 3 Credit Hours

Dissertation: 15 Credit Hours

- AST or PHY 7980 - Dissertation 15 Credit Hours

Dissertation Supervisory Committee

Within the first half-semester of admission to the planetary
sciences graduate track, each student must select, by mutual
agreement, a faculty adviser and at least three other faculty
members to serve on his or her Dissertation Supervisory
Committee. A quorum for supervisory committee meetings will
be three faculty members. UCF faculty, UCF self-funded
research scientist, and non-UCF planetary scientist qualified to
be Graduate Faculty Scholars are eligible to serve on
supervisory committees. The committee should include one non-
UCF planetary scientist. Changes in the membership of a
Supervisory Committee must be approved by the Planetary
Sciences Graduate Committee. The adviser is expected to meet
regularly with the student. The full committee shall meet with
the student at least once per year to review and make
recommendations regarding the student's academic progress.

Candidacy Exam

The Planetary Sciences Track requires a candidacy exam to be
taken after the completion of the core courses. This exam is
composed of a written component and an oral exam. The written
component is a journal-level research paper that has either been
accepted for publication or submitted for publication. The oral
component is in two parts: (1) A public presentation of the
research contained in the paper including the traditional
question-and-answer period of a scientific presentation; and (2)
private questioning on the detail of the presented research as
well as the topics covered in the student's preparation and
coursework.

Dissertation Proposal

The dissertation proposal may be presented simultaneously with
the candidacy exam or in a separate meeting not more than one
semester thereafter. The Dissertation proposal is not formally an
examination in the Planetary Sciences Track and the supervisory
committee may direct any form of presentation it desires and
may question the student. Before substantial work is done on the
dissertation, the Supervisory Committee must approve the
proposal and must also assess whether additional coursework is
necessary to begin the dissertation. Such coursework should be
completed at the earliest opportunity. The supervisory
committee then becomes the dissertation committee.

Admission to Candidacy
The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all required and formal elective course work, except for research hours.
- Successful completion of the candidacy examination.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.
- Completion of CITI and RCR Workshops

**Dissertation Defense**

The dissertation defense is the final requirement for the PhD. It consists of a public presentation of the dissertation typically lasting 45-60 minutes including the traditional question-and-answer period of a scientific presentation, followed by private questioning by the Dissertation Supervisory Committee. Procedures are similar to the candidacy exam.

**Independent Learning**

The Planetary Sciences Track in the Physics PhD program requires a dissertation.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Statement of goals.
- Students entering the Planetary Sciences graduate track program with regular status are normally expected to have completed coursework generally required for a bachelor's degree in a closely related science field such as physics, chemistry, geology, biology, or mathematics.
- CV or Résumé.

Additional courses may also be required to correct any course deficiencies for those applicants without full preparation in physics and astronomy. Students should contact the graduate program director for further information.

Current students in the existing Physics graduate program wishing to switch to the Planetary Sciences track must submit a letter to the Planetary Science Graduate Committee addressed to Dr. Dan Britt. The letter should include the request to join the planetary sciences track, the student's degree goal (Masters or PhD), the name of the student's planetary sciences adviser, and a brief description of their expected area of research. Upon departmental approval, a Graduate Status Change Form will be submitted to the College of Graduate Studies.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on the evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree. For information on the Planetary Sciences track contact the Planetary Sciences Graduate Advisor Dr. Dan Britt at 407-823-2600 or dbritt@ucf.edu.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

**Financials**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.
Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Public Affairs PhD

Program Description

The Doctoral Program in Public Affairs provides a unique focus on public administration, planning, policy, and research. The program prepares future scholars and leaders to better recognize and respond to complex social ills which cross traditional disciplinary boundaries. Students may choose from five tracks: Criminal Justice, Governance and Policy Research, Health Services Management and Research, Public Administration, and Social Work.

Instead of a discipline specific approach to the intransient problems facing our society today, the Doctoral Program in Public Affairs is an interdisciplinary program which draws upon the strengths of faculty in Criminal Justice, Health Management and Informatics, Public Administration, and Social Work. The program prepares students for academic appointments in colleges and universities as well as research and leadership positions in public, nonprofit, and private agencies. The

dynamic mix of an interdisciplinary faculty, together with students from varied backgrounds, creates a stimulating environment to examine many of the contemporary social ills communities are currently facing.

The program matches career goals of students through the interdisciplinary nature of course content, the interaction with faculty from all four disciplines, and the flexibility inherent in the choice of electives. Those seeking advancement within public agencies or nonprofit organizations can choose a mix of electives, including course work from other UCF programs, while those seeking to teach at the college or university level can focus on taking more courses within their discipline.

Upon completing the program, graduates will have the theoretical, analytical, and ethical foundation to provide alternative solutions to these social ills while deepening our understanding of the underlying problem. This holistic approach answers to both applied and theoretical concerns and, as such, has the potential to have both local as well as national impact on programming and decision-making.

Curriculum

The Doctoral Program in Public Affairs accommodates the needs of both traditional students and working professionals. All coursework is offered in the evening hours and selected courses offer reduced seat time.

Students must complete 60 credit hours beyond the master's degree distributed in the following manner:

- a three-course, 9-credit hour required Public Affairs substantive core
- a six-course, 18-credit hour required Public Affairs methodological and statistical core
- a three-course, 9-credit hour discipline specific specialization
- a two-course, 6-credit hour unrestricted elective requirement
- one course, 3-credit hour required Public Affairs practicum
- 15 credit hours of dissertation (minimum)

Students are required to take electives as directed by their track adviser. Students may take a maximum of two 3-credit-hour independent study courses to be used as electives with approval.

Total Credit Hours Required: 60 Credit Hours Minimum beyond the Master's Degree

The Public Affairs PhD program curriculum comprises an interdisciplinary core with advanced studies offered in five tracks: Criminal Justice, Governance and Policy Research, Health Services Management and Research, Public
Administration, and Social Work. The program has a community-based focus with an emphasis on collaborative relationships across public, private and nonprofit sectors of the community.

A maximum of 6 credit hours of Independent Study may be used as electives with adviser's approval.

Transfer work will only be accepted by the Public Affairs PhD program if taken as part of an approved plan of study for a doctoral program at UCF or elsewhere. A maximum of 6 credit hours taken at the doctoral level may be considered for transfer. The acceptance of transfer credit into the track for Public Affairs specialization or general elective component is dependent upon the approval of the Track Coordinator in consultation with the PAF Director. Transfer work will not be accepted into the PAF substantive or methodological core components.

A grade of B- or better is required in all courses. Students receiving a grade of "C+" or lower will be required to repeat the course and receive a grade of B- or better prior to taking the Research Proficiency Exam or Qualifying Exam. Any student who receives more than one "C" in their doctoral coursework may be dismissed from the program.

A minimum of 3.0 graduate status GPA and program of study GPA is required to maintain graduate student status and for graduation. Students with a GPA less than 3.0 may be dismissed from the program.

Any student who receives an "F" grade in their doctoral coursework will be dismissed from the program.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

Public Affairs PhD, Criminal Justice Track

Track Description

The Doctoral Program in Public Affairs is an interdisciplinary program drawing from the strengths of faculty in Criminal Justice, Health Management and Informatics, Public Administration, and Social Work. The Criminal Justice Track prepares students for academic positions in colleges and universities as well as research and leadership positions in public, nonprofit and private agencies. The dynamic mix of an interdisciplinary faculty with students of varied backgrounds creates a stimulating environment to examine contemporary organizational, institutional and community problems and issues. Graduates possess the theoretical, analytical and ethical foundation to produce new knowledge that impacts policies and programs and enhances institutional and community performance.

Curriculum

Students must complete 60 credit hours beyond the master's degree distributed in the following manner:

- a three-course, 9-credit hour required Public Affairs substantive core
- a six-course, 18-credit hour required Public Affairs methodological and statistical core
- a three-course, 9-credit hour required discipline-specific specialization
- a two-course, 6-credit hour unrestricted elective requirement
- a one course, 3-credit hour required Public Affairs practicum
- 15 credit hours of dissertation minimum

Total Credit Hours Required: 60 Credit Hours Minimum beyond the Master's Degree

A maximum of 6 credit hours of Independent Study may be used as electives with adviser's approval.

Transfer work will only be accepted by the Public Affairs PhD program if taken as part of an approved plan of study for a doctoral program at UCF or elsewhere. A maximum of 6 credit hours taken at the doctoral level may be considered for transfer. The acceptance of transfer credit into the track specialization or elective component is dependent upon the approval of the Track Coordinator in consultation with the PAF Program Director.

A grade of B- or better is required in all substantive core and methodological core courses. Students receiving a grade of "C+" or lower will be required to repeat the course and receive a grade of B- or better prior to taking the Research Proficiency Exam and Qualifying Exam. Any student who receives more than one grade of C+ or lower in their doctoral course work may be dismissed from the program.

A minimum of 3.0 graduate status GPA and program of study GPA is required to maintain graduate student status and for graduation. Students with a GPA less than 3.0 may be dismissed from the program.

Any student who receives an "F" grade in their doctoral course work will be dismissed from the program.

Required Courses: 45 Credit Hours

Public Affairs Substantive Core: 9 Credit Hours

- PAF 7000 - Foundations of Public Affairs: People, Places, Policies and Paradigms 3 Credit Hours
- PAF 7230 - Strategic Change and Management for Public Affairs 3 Credit Hours
- PAF 7317 - Social Inquiry and Public Policy 3 Credit Hours

Methodological and Statistical Core: 18 Credit Hours

- PAF 7802 - Advanced Research Methodology for Public Affairs 3 Credit Hours
- PAF 7804 - Advanced Statistics for Public Affairs I: Multivariate Analysis 3 Credit Hours
- PAF 7805 - Advanced Statistics for Public Affairs II: Survey of Statistical Methods 3 Credit Hours
- PAF 7820 - Qualitative Methods for Public Affairs 3 Credit Hours
- PAF 7325 - Policy and Program Evaluation for Public Affairs 3 Credit Hours
Advanced Methodology

Choose one of the following courses:

- PAF 7868 - Advanced Statistics for Public Affairs III: Continued Survey of Statistical Methods 3 Credit Hours
- PAF 7856 - Applications of Structural Equation Modeling in Public Affairs 3 Credit Hours
- Pre-approved methodological or statistical course 3 Credit Hours

Practicum: 3 Credit Hours

At the end of the required coursework, students will take the Practicum in Community-Based Research course (PAF 7947). Led by a professor, the practicum provides the student with the opportunity to work within an interdisciplinary team to use their substantive learning and apply their methodological and statistical tools to a real community problem. This experiential learning brings the student out to the community while bringing the community into the university.

- PAF 7947 - Practicum in Community-based Research 3 Credit Hours

Track Specialization: 15 Credit Hours

Students are required take three of the following courses:

- CJE 6456 - Seminar in Policing Urban Communities 3 Credit Hours
- CJE 6320 - Seminar in Police Administration 3 Credit Hours
- CCJ 6XXX - Seminar in Police Culture 3 Credit Hours
- CJC 6135 - Seminar in Institutional Corrections 3 Credit Hours
- CJC 6165 - Seminar in Community Corrections 3 Credit Hours
- CJC 6486 - Seminar in Correctional Effectiveness 3 Credit Hours
- CCJ 6XXX - Juvenile Justice (Prerequisite: The Juvenile Justice System) 3 Credit Hours
- CJJ 6546 - Seminar in Policing and Prevention in the Juvenile Justice System 3 Credit Hours
- CJJ 6124 - Seminar in Prosecuting Juvenile Offenders 3 Credit Hours
- CJJ 6126 - Seminar in Juvenile Corrections 3 Credit Hours
- CJL 6568 - Law and Social Control 3 Credit Hours

Choose two additional courses from the following list:

- See adviser for appropriate methodological elective 3 Credit Hours
- Directed independent study 3 Credit Hours
- Or other course that will add to the student's course of study. Requires approval of adviser. 3 Credit Hours

Dissertation: 15 Credit Hours

- PAF 7980 - Dissertation Research

Assignment of Faculty Advisers

Upon acceptance of a student into the program, the program director provides students with an initial orientation and a general advising session. The Track Coordinator in conjunction with the PAF Director helps the student throughout the foundation stage of the program, assisting in the clarification of interests and goals and facilitating the introduction of students to faculty and research interests that can advance the student's program of study. Criminal Justice Track students will be advised by the Criminal Justice Track Coordinator. The Track Coordinator assists the student in selecting elective courses, finalizing the program of study, and facilitating discussion with faculty members who have similar research interests. Discussion and review of dissertation topics should take place with the faculty member who has agreed to chair the dissertation committee. The dissertation chair is to be selected by the student prior to commencing the dissertation prospectus.

Research Proficiency Exam and Qualifying Exam

Upon successful completion of the required courses and the required Practicum course, students are required to take a Research Proficiency Exam (RPE) and Qualifying Exam (QE). The Research Proficiency Exam will be taken after the successful completion of the Methodological Core courses. Following successful completion of all PAF core courses (not including Track Specialization courses), students are required to pass a Qualifying Exam. The exam is given following finals in the fall or spring semesters.

Students are given two opportunities to pass the RPE and the QE. Students who fail any section twice are dismissed from the program. Any student who fails any the RPE twice or the QE twice will not be readmitted into the PAF program. This policy includes all tracks and/or any master's to PhD program(s) within
the PAF program. Please refer to the student handbook for further information.

Candidacy Status

Students officially enter candidacy when the following work has been accomplished:

- Completion of all course work, except for dissertation hours.
- Successful completion of the Research Proficiency Exam and Qualifying Exam.
- The dissertation advisory committee is formed and has been approved by the PAF Program Director and the College of Graduate Studies. Members of the committee must be approved graduate faculty or graduate faculty scholars.
- Submittal of an approved graduate program of study.
- Submission of dissertation prospectus to iThenticate.com. Subsequent results to be within acceptable rating.
- Successful defense of the dissertation prospectus.
- All approved documentation has been received by the PAF and Graduate offices

Equipment Fee

Full-time students in the Public Affairs Program pay a $40 equipment fee each semester that they are enrolled. Part-time students pay $20 per semester.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must hold a master's degree from an accredited institution, preferably in criminal justice, health, public administration or social work. Applicants with a master's degree in a field not directly related to public affairs may be required to take courses at the master's level in preparation for doctoral level study. Any requirements for preparatory coursework will be communicated at the time of acceptance into the program and will generally be taken prior to beginning doctoral-level coursework. These courses, if required, will not substitute for the listed doctoral degree requirements. Admission is offered for fall semester only.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended for both bachelor's and master's degrees.
- Official, competitive GRE score taken within the last five years.
- A narrative statement of 1000 words or less addressing the following:
  - What is your reason for pursuing a doctoral degree in Public Affairs in our program? Be sure to include future goals and plans.
  - What research areas, pertaining to Public Affairs are you interested in researching?
  - What will be your contribution as a student to the program?
- Résumé.
- A writing sample. An academic paper is preferred, but the program will consider writing samples that demonstrate analytical writing (i.e. grant applications, position papers, etc.)
- Three letters of recommendation from faculty or professionals who can assess the applicant's ability to succeed in a doctoral program. Academic references are strongly preferred.

The Public Affairs Program Admissions Committee will begin reviewing applicant files once the student has submitted all of the above documents. Admission to the Doctoral Program in Public Affairs is granted on a competitive basis. Meeting minimum UCF admission standards does not guarantee program admissions. The Admissions Committee will base final admission on the evaluation of the applicant's abilities, past performance, recommendations, match to the program, correspondence of the applicant's career and academic interests with those of the core and affiliated faculty, and potential for completing the degree and making a significant contribution to Public Affairs.

Public Affairs PhD, Governance and Policy Research Track

Track Description

Admission to this program track has been suspended effective Summer 2015.

The Governance and Policy Track in the Public Affairs PhD program prepares students to perform high-quality policy-relevant research concerned with governance and public policy issues, primarily those with national and global implications. Students are empowered to provide unbiased, evidence-based information that is directly relevant to real public-policy problems.

Curriculum

Total Credit Hours Required: 60 Credit Hours Minimum beyond the Master's Degree

Students must complete 60 credit hours beyond the master's degree, including 15 courses (45 credit hours) above the master's level distributed in the following manner:

- a three-course, 9-credit required Public Affairs substantive core
- a six-course, 18-credit required Public Affairs methodological and statistical core
- a three-course, 9-credit required discipline-specific specialization
- a two-course, 6-credit hour electives (may be taken outside the student's discipline)
- a one course, 3-credit required Public Affairs practicum
- 15 credit hours of dissertation minimum

Students are required to take a statistical assessment the summer semester prior to their entering the program fall semester. This assessment will be used to determine a student's statistical knowledge and competency. Students that receive a passing score will be exempt from taking a 6XXX level statistics course. Those students requiring the 6XXX level course will meet with the Track Coordinator to determine which course will meet the requirement. Students are required to complete and pass the course prior to registering in PAF 7804 - Advanced Statistics for Public Affairs I: Multivariate Analysis. The 6XXX level course credit hours may be included in the student's program of study as an elective.

A maximum of 6 credit hours of Independent Study may be used as electives with advisor's approval.

Transfer work will only be accepted by the Public Affairs PhD program if taken as part of an approved plan of study for a doctoral program at UCF or elsewhere. A maximum of 6 credit hours taken at the doctoral level may be considered for transfer. The acceptance of transfer credit into the track specialization and general elective component is dependent upon the approval of the Track Coordinator in consultation with the PAF Director. Transfer work will not be accepted into the PAF substantive or methodological core components.

A grade of B- or better is required in all courses. Students receiving a grade of "C+" or lower will be required to repeat the course and receive a grade of B- or better prior to taking the Qualifying Exam. Any student who receives more than one
grade of "C+" or lower in their doctoral course work may be dismissed from the Public Affairs program.

A minimum of 3.0 graduate status GPA and program of study GPA is required to maintain graduate student status and for graduation. Students with a GPA less than 3.0 may be dismissed from the program.

Any student who receives an "F" grade in their doctoral course work will be dismissed from the program.

**Required Courses: 45 Credit Hours**

**Public Affairs Substantive Core: 9 Credit Hours**

- PAF 7000 - Foundations of Public Affairs: People, Places, Policies and Paradigms 3 Credit Hours
- PAF 7230 - Strategic Change and Management for Public Affairs 3 Credit Hours
- PAF 7317 - Social Inquiry and Public Policy 3 Credit Hours

**Methodological and Statistical Core: 18 Credit Hours**

- PAF 7802 - Advanced Research Methodology for Public Affairs 3 Credit Hours
- PAF 7804 - Advanced Statistics for Public Affairs I: Multivariate Analysis 3 Credit Hours
- PAF 7805 - Advanced Statistics for Public Affairs II: Survey of Statistical Methods 3 Credit Hours
- PAF 7820 - Qualitative Methods for Public Affairs 3 Credit Hours
- PAF 7325 - Policy and Program Evaluation for Public Affairs 3 Credit Hours

**Advanced Methodology**

Choose one of the following courses:

- PAF 7868 - Advanced Statistics for Public Affairs III: Continued Survey of Statistical Methods 3 Credit Hours
- PAF 7856 - Applications of Structural Equation Modeling in Public Affairs 3 Credit Hours
- Pre-approved methodological or statistical course 3 Credit Hours

**Practicum: 3 Credit Hours**

At the end of the required coursework, students will take the PAF 7947 - Practicum in Community-based Research. Led by a professor, the practicum provides students with the opportunity to work within an interdisciplinary team to use their substantive learning and apply their methodological and statistical tools to a real community problem. This experiential learning brings the student out to the community while bringing the community into the university.

**Track Specialization: 9 Credit Hours**

Students are required to take the following three courses and attain a "B-" or higher:

- PAF 7055 - Seminar in State and Local Government Policy Research 3 Credit Hours
- PAF 7510 - Seminar in Policy Evaluation and Performance Measurement 3 Credit Hours
- PAF 7858 - Advanced Seminar in Governance and Policy Research 3 Credit Hours

**Elective: 6 Credit Hours**

Choose two additional courses from the following courses:

- PAF 7757 - Seminar in Global Governance and Policy Research 3 Credit Hours
- See adviser for appropriate methodological elective 3 Credit Hours
- Directed independent study 3 Credit Hours
- Or other course that will add to the student's course of study. Requires approval of adviser. 3 Credit Hours

**Dissertation: 15 Credit Hours**

- PAF 7980 Dissertation Research

**Assignment of Faculty Advisers**

Upon acceptance of a student into the program, the PAF Program Director provides students with an initial orientation and a general advising session. The Track Coordinator in conjunction with the PAF Director helps the student throughout the foundation stage of the program, assisting in the clarification of interests and goals and facilitating the introduction of students to faculty and research interests that can advance the student's program of study. Governance and Policy Research Track students will be advised by the Governance and Policy Research
Track Coordinator. The Track Coordinator assists the student in selecting elective courses, finalizing the program of study, and facilitating discussion with faculty members who have similar research interests. Discussion and review of dissertation topics should take place with the faculty member who has agreed to chair the dissertation committee. The dissertation chair is to be selected by the student prior to commencing the dissertation prospectus.

Qualifying Examination

Following successful completion of all required courses, students are required to pass a qualifying examination. The examination is given following finals during fall and spring semesters. Students are given two opportunities to pass all sections of the exam. Any student who fails any section twice are dismissed from the program. Any student who fails any section of the qualifying exam twice will not be readmitted to the PAF program. This policy includes all tracks and/or any masters to PhD program(s) within the PAF program.

Candidacy Status

Students officially enter candidacy when the following has been accomplished:

- Completion of all course work, except for dissertation hours.
- Successful completion of the qualifying examination.
- The dissertation advisory committee is formed and has been reviewed and accepted by the PAF Director. Members of the committee are to be approved graduate faculty and graduate faculty scholars.
- Submittal of an approved graduate program of study.
- Submission of dissertation prospectus to turnitin.com. Subsequent results to be within acceptable rating.
- Successful defense of the dissertation prospectus.
- All approved documentation has been received by the PAF and Graduate offices.

Equipment Fee

Full-time students in the Public Affairs Program pay a $40 equipment fee each semester that they are enrolled. Part-time students pay $20 per semester.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must hold a master's degree from an accredited institution, preferably in criminal justice, health, public administration or social work. Applicants who do not have a master's degree in a field directly related to public affairs may be required to take courses at the master's level in preparation for doctoral level study. This preparatory course work requirement will be communicated at the time of acceptance into the program. These courses will not substitute for the doctoral degree requirements and will generally be taken prior to beginning the doctoral level course work. Admission is offered for fall semester only.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended for both bachelor's and master's degrees.
- Official, competitive GRE score taken within the last five years.
- A narrative statement of 1000 words or less describing the applicant's educational expectations, career aspirations, level of computer skills, and any special qualifications or experiences that may enhance the overall learning environment of the PAF program.
- Résumé.
- A writing sample, i.e., academic paper, report, etc.
- Three letters of recommendation from faculty or professionals who can assess the applicant's ability to succeed in a doctoral program.

Admission to the Doctoral Program in Public Affairs is granted on a competitive basis. Meeting minimum UCF admission standards does not guarantee program admissions. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match to the program, correspondence of the applicant's career and academic interests with those of the core and affiliated faculty, and potential for completing the degree and making a significant contribution to Public Affairs.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.
Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Public Affairs PhD, Health Services Management and Research Track

Track Description

The Doctoral Program in Public Affairs is an interdisciplinary program that includes the professional and academic expertise of faculty in the fields of Criminal Justice, Health Management and Informatics, Public Administration, and Social Work. The Health Services Management and Research Track prepares students for academic positions in colleges and universities as well as research and leadership positions in public, nonprofit and for profit agencies and organizations.

A dynamic mix in the Public Affairs Doctoral Program of an interdisciplinary faculty and students from varied backgrounds creates a stimulating environment in which to examine contemporary organizational, institutional and community challenges. Graduates of the PAF Doctoral Program possess the theoretical, analytical and ethical foundation to discover new knowledge that will impact affirmatively public policy decisions and develop programs and systems that will enhance the delivery of services to an expectant and unyielding public.

Curriculum

Students must complete 60 credit hours beyond the master's degree distributed in the following manner:

- a three-course, 9-credit required Public Affairs substantive core
- a six-course, 18-credit required Public Affairs methodological and statistical core
- a three-course, 9-credit required discipline-specific specialization
- a two-course, 6-credit unrestricted elective requirement
- a one course, 3-credit required Public Affairs practicum
- 15 credit hours of dissertation minimum

Total Credit Hours Required: 60 Credit Hours Minimum beyond the Master's Degree

A maximum of 6 credit hours of Independent Study may be used as electives with adviser's approval.

Transfer work will only be accepted by the Public Affairs PhD program if taken as part of an approved plan of study for a doctoral program at UCF or elsewhere. A maximum of 6 credit hours taken at the doctoral level may be considered for transfer. The acceptance of transfer credit into the track specialization and a general elective component is dependent upon the approval of the Track Coordinator in consultation with the PAF Director. Transfer work will not be accepted into the PAF substantive or methodological core components.

A grade of B- or better is required in all substantive core and methodological core courses. Students receiving a grade of "C+" or lower will be required to repeat the course and receive a grade of B- or better prior to taking the Research Proficiency Exam and Qualifying Exam. Any student who receives more than one "C" in their doctoral course work may be dismissed from the program.

A minimum of 3.0 graduate status GPA and program of study GPA is required to maintain graduate student status and for graduation. Students with a GPA less than 3.0 may be dismissed from the program.

Any student who receives an "F" grade in their doctoral course work will be dismissed from the program.
Required Courses: 45 Credit Hours

Public Affairs Substantive Core: 9 Credit Hours

- PAF 7000 - Foundations of Public Affairs: People, Places, Policies and Paradigms 3 Credit Hours
- PAF 7230 - Strategic Change and Management for Public Affairs 3 Credit Hours
- PAF 7317 - Social Inquiry and Public Policy 3 Credit Hours

Methodological and Statistical Core: 18 Credit Hours

- PAF 7802 - Advanced Research Methodology for Public Affairs 3 Credit Hours
- PAF 7804 - Advanced Statistics for Public Affairs I: Multivariate Analysis 3 Credit Hours
- PAF 7805 - Advanced Statistics for Public Affairs II: Survey of Statistical Methods 3 Credit Hours
- PAF 7820 - Qualitative Methods for Public Affairs 3 Credit Hours
- PAF 7325 - Policy and Program Evaluation for Public Affairs 3 Credit Hours

Advanced Methodology

Choose one of the following courses:

- PAF 7868 - Advanced Statistics for Public Affairs III: Continued Survey of Statistical Methods 3 Credit Hours
- PAF 7856 - Applications of Structural Equation Modeling in Public Affairs 3 Credit Hours
- Pre-approved methodological or statistical course 3 Credit Hours

Practicum: 3 Credit Hours

At the end of the required coursework, students will take the PAF 7947 - Practicum in Community-based Research. Led by a professor, the practicum provides the student with the opportunity to work within an interdisciplinary team to use their substantive learning and apply their methodological and statistical tools to a real community problem. This experiential learning brings the student out to the community while bringing the community into the university.

Track Specialization: 15 Credit Hours

Students are required to take the following three courses:

- HSA 7116 - Theories in Healthcare Management 3 Credit Hours
- HSA 7936 - Advanced Seminar in Health Economics 3 Credit Hours
- HSA 7938 - Advanced Seminar in Health Services Research 3 Credit Hours

Choose two additional courses from the following list:

- HSA 6108 - Health Care Organization and Management II 3 Credit Hours
- HSA 6128 - Health Care Services Management 3 Credit Hours
- HSA 6342 - Health Care Human Resources 3 Credit Hours
- PHC 6000 - Epidemiology 3 Credit Hours
- PHC 6146 - Health Planning and Policy 3 Credit Hours
- PHC 6160 - Health Care Finance 3 Credit Hours
- HSA 7125 - Globalization and Health 3 Credit Hours
- See adviser for appropriate methodological elective 3 Credit Hours
- Directed independent study 3 Credit Hours
- Or other course that will add to the student's course of study. Requires approval of adviser. 3 Credit Hours

Dissertation: 15 Credit Hours

- PAF 7980 Dissertation Research

Assignment of Faculty Advisers

Upon acceptance of a student into the program, the program director provides students with an initial orientation and a general advising session. The Track Coordinator in conjunction with the PAF Director helps the student throughout the foundation stage of the program, assisting in the clarification of interests and goals and facilitating the introduction of students to faculty and research interests that can advance the student's program of study. Health Services Management and Research Track students will be advised by the Health Services Management and Research Track Coordinator. The
Track Coordinator assists the student in selecting elective courses, finalizing the program of study, and facilitating discussion with faculty members who have similar research interests. Discussion and review of dissertation topics should take place with the faculty member who has agreed to chair the dissertation committee. The dissertation chair is to be selected by the student prior to commencing the dissertation prospectus.

Research Proficiency Exam and Qualifying Exam

Upon successful completion of the required courses and the required Practicum course, students are required to take a Research Proficiency Exam (RPE) and Qualifying Exam (QE). The Research Proficiency Exam will be taken after the successful completion of the Methodological Core courses. Following successful completion of all PAF core courses (not including Track Specialization courses), students are required to pass a Qualifying Exam. The exam is given following finals in the fall or spring semesters.

Students are given two opportunities to pass the RPE and the QE. Students who fail any section twice are dismissed from the program. Any student who fails any the RPE twice or the QE twice will not be readmitted into the PAF program. This policy includes all tracks and/or any master's to PhD program(s) within the PAF program. Please refer to the student handbook for further information.

Candidacy Status

Students officially enter candidacy when the following work has been accomplished:

- Completion of all course work, except for dissertation hours.
- Successful completion of the Research Proficiency Exam and Qualifying Exam.
- The dissertation advisory committee is formed and has been reviewed and approved by the PAF Program and the College of Graduate Studies. Members of the committee are to be approved graduate faculty or graduate faculty scholars.
- Submittal of an approved graduate program of study.
- Submission of dissertation prospectus to turnitin.com. Subsequent results to be within acceptable rating.
- Successful defense of the dissertation prospectus.
- All approved documentation has been received by the PAF and Graduate offices.

Equipment Fee

Full-time students in the Public Affairs Program pay a $40 equipment fee each semester that they are enrolled. Part-time students pay $20 per semester.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must hold a master's degree from an accredited institution, preferably in criminal justice, health, public administration or social work. Applicants with a master's degree in a field not directly related to public affairs may be required to take courses at the master's level in preparation for doctoral level study. Any requirements for preparatory coursework will be communicated at the time of acceptance into the program and will generally be taken prior to beginning doctoral-level coursework. These courses, if required, will not substitute for the listed doctoral degree requirements. Admission is offered for fall semester only.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended for both bachelor's and master's degrees.
- Official, competitive GRE score taken within the last five years.
- A narrative statement of 1000 words or less addressing the following:
  - What is your reason for pursuing a doctoral degree in Public Affairs in our program? Be sure to include future goals and plans
  - What research areas pertaining to Public Affairs are you interested in researching?
  - What will be your contribution as a student to the program?
- Résumé.
- A writing sample. An academic paper is preferred, but the program will consider writing samples that demonstrate analytical writing (i.e. grant applications, position papers, etc.)
- Three letters of recommendation from faculty or professionals who can assess the applicant's ability to succeed in a doctoral program. Academic references are strongly preferred.
The Public Affairs Program Admissions Committee will begin reviewing applicant files once the student has submitted all of the above documents. Admission to the Doctoral Program in Public Affairs is granted on a competitive basis. Meeting minimum UCF admission standards does not guarantee program admissions. The Admissions Committee will base final admission on the evaluation of the applicant's abilities, past performance, recommendations, match to the program, correspondence of the applicant's career and academic interests with those of the core and affiliated faculty, and potential for completing the degree and making a significant contribution to Public Affairs.

Public Affairs PhD, Public Administration MPA Dual Degree Track

Track Description

The Public Affairs PhD - Public Administration MPA Dual Degree Track provides academically talented students an opportunity to earn the Doctor of Philosophy in Public Affairs and the Master of Public Administration degrees concurrently. Students successfully completing the PhD/MPA Dual Degree program will have the skills and analytical techniques for careers in academia or in the public and nonprofit sectors. After successful completion of the PhD/MPA Dual Degree program, students will receive two diplomas, one for the Public Administration MPA degree and one for the Public Affairs PhD degree.

Students seeking admission to the PhD/MPA Dual Degree program should apply directly to the Public Affairs PhD - Public Administration MPA Dual Degree Track. Only one application will be required. If admitted, student will be active in both the Public Administration MPA and the Public Affairs PhD programs.

Curriculum

The Public Administration MPA Dual Degree track in the Public Affairs PhD program consists of 84 credit hours, including 63 credit hours of required courses, 6 credit hours of electives approved by the student's faculty adviser or program director, and 15 credit hours of dissertation. For required courses, students first complete seven core courses plus the capstone course for the MPA program (24 credit hours), and then take four Public Affairs substantive core courses and six Public Affairs methodological and statistical core courses for the PhD
program (30 credit hours), plus three courses (9 credit hours) from the Public Administration track in the PhD program.

**Total Credit Hours Required: 84 Credit Hours Minimum beyond the Bachelor's Degree**

A maximum of 6 credit hours of Independent Study may be used as electives with adviser's approval.

A grade of "B-" or better is required in all courses listed under the MPA requirement and Public Affairs requirements. Students receiving a grade below a "B-" in the Substantive Core or Methodological Core must repeat the course and receive an acceptable grade prior to taking the Research Proficiency Exam and Qualifying Exam. Any student who receives more than one grade of "C" in their doctoral course work may be dismissed from the program.

A minimum of 3.0 graduate status GPA and program of study GPA is required to maintain graduate student status and for graduation. Students with a GPA less than 3.0 may be dismissed from the program.

Any student who receives an "F" grade in their master's level or doctoral course work will be dismissed from the program.

**Required Courses: 63 Credit Hours**

**Required Courses for MPA: 24 Credit Hours**

In addition to the following required courses, the MPA degree will include 6 credit hours of advanced research methods and quantitative methods in Public Affairs and 12 credit hours of electives that are incorporated into the prescribed PhD curriculum.

- **PAD 6035 - Public Administration in the Policy Process** 3 Credit Hours
- **PAD 6037 - Public Organization Management** 3 Credit Hours
- **PAD 6053 - Public Administrators in the Governance Process** 3 Credit Hours
- **PAD 6207 - Public Financial Management** 3 Credit Hours
- **PAD 6227 - Public Budgeting** 3 Credit Hours
- **PAD 6335 - Strategic Planning and Management** 3 Credit Hours
- **PAD 6417 - Human Resource Management** 3 Credit Hours
- **PAD 6062 - Advanced Concepts and Applications in Public Administration** 3 Credit Hours

**Required Courses for PhD: 39 Credit Hours**

**Public Affairs Substantive Core: 9 Credit Hours**

- **PAF 7000 - Foundations of Public Affairs: People, Places, Policies and Paradigms** 3 Credit Hours
- **PAF 7230 - Strategic Change and Management for Public Affairs** 3 Credit Hours
- **PAF 7317 - Social Inquiry and Public Policy** 3 Credit Hours

**Methodological and Statistical Core: 18 Credit Hours**

- **PAF 7802 - Advanced Research Methodology for Public Affairs** 3 Credit Hours
- **PAF 7804 - Advanced Statistics for Public Affairs I: Multivariate Analysis** 3 Credit Hours
- **PAF 7805 - Advanced Statistics for Public Affairs II: Survey of Statistical Methods** 3 Credit Hours
- **PAF 7820 - Qualitative Methods for Public Affairs** 3 Credit Hours
- **PAF 7325 - Policy and Program Evaluation for Public Affairs** 3 Credit Hours

**Advanced Methodology (Select one course):**

- **PAF 7868 - Advanced Statistics for Public Affairs III: Continued Survey of Statistical Methods** 3 Credit Hours
- **PAF 7856 - Applications of Structural Equation Modeling in Public Affairs** 3 Credit Hours
- **Pre-approved methodological or statistical course** 3 Credit Hours

**Practicum: 3 Credit Hours**

At the end of the required coursework, students will take the Practicum in Community-Based Research course (PAF 7XXX). Led by a professor, the practicum provides the student with the opportunity to work within an interdisciplinary team to use their substantive learning and apply their methodological and statistical tools to a real community problem. This experiential learning brings the student out to the community while bringing the community into the university.

**Track Specialization: 9 Credit Hours**

Students take the following three courses:
- PAD 7026 - Advanced Seminar in Public Administration 3 Credit Hours
- PAD 7057 - Advanced Public Management 3 Credit Hours
- PAD 7827 - Network Governance 3 Credit Hours

Elective Courses: 6 Credit Hours

The two required elective courses (3 credit hours each) offered within the dual degree provide an emphasis on public and nonprofit management; however, other emphases may be developed in consultation with the adviser. With prior approval from the Program Director, up to 6 credit hours of elective course work may be taken from outside the department. Students must show that elective courses taken outside of the department directly support an academic or professional career in public administration.

Students take two of the following courses:

- PAD 7317 - Program Design and Management 3 Credit Hours
- PAD 7707 - Advanced Research in Public Administration 3 Credit Hours
- Methodological elective approved by adviser 3 Credit Hours
- Directed independent study 3 Credit Hours
- Pre-approved methodological or statistical course 3 Credit Hours

Dissertation: 15 Credit Hours

- PAF 7980 Dissertation Research

Research Proficiency Exam and Qualifying Exam

Upon successful completion of the required courses and the required Practicum course, students are required to take a Research Proficiency Exam (RPE) and Qualifying Exam (QE). The Research Proficiency Exam will be taken after the successful completion of the Methodological Core courses. Following successful completion of all PAF core courses (not including Track Specialization courses), students are required to pass a Qualifying Exam. The exam is given following finals in the fall or spring semesters.

Students are given two opportunities to pass the RPE and the QE. Students who fail any section twice are dismissed from the program. Any student who fails any the RPE twice or the QE twice will not be readmitted into the PAF program. This policy includes all tracks and/or any masters to PhD program(s) within the PAF program. Please refer to the student handbook for further information.

Candidacy

Students officially enter candidacy when the following has been accomplished:

- Completion of all course work, except for dissertation hours.
- Successful completion of the Research Proficiency Exam and Qualifying Exam.
- The dissertation advisory committee is formed and has been approved by the PAF Program Director and the College of Graduate Studies. Members of the committee are to be approved graduate faculty or graduate faculty scholars.
- Submittal of an approved graduate program of study.
- Submission of dissertation prospectus to turn-it-in.com. Subsequent results to be within acceptable rating.
- Successful defense of the dissertation prospectus.
- All approved documentation has been received by the PAF and Graduate offices.

Additional Program Requirements

Students initially admitted to the MPA/PhD dual degree program who subsequently decide they only want to receive the MPA degree may have all applicable courses completed as part of the two degree programs applied to the MPA degree program without being counted as transfer courses.

Equipment Fee

Full-time students in the Public Affairs PhD Program pay a $40 equipment fee each semester that they are enrolled. Part-time students pay $20 per semester.

Independent Learning

Independent learning is demonstrated throughout the curriculum, through the process of inquiry and dialogue. Tangible projects, such as research scholarly papers and the dissertation contribute to the self development of MPA/PhD students.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- A narrative statement of 1000 words or less addressing the following:
  - What is your reason for pursuing a doctoral degree in Public Affairs in our program? Be sure to include future goals and plans.
  - What research areas pertaining to Public Affairs are you interested in researching?
- What will be your contribution as a student to the program?
- Résumé.
- A writing sample. An academic paper is preferred, but the program will consider writing samples that demonstrate analytical writing (i.e. grant applications, position papers, etc.).
- Three letters of recommendation from faculty or professionals who can assess the applicant's ability to succeed in a doctoral program. Academic references are strongly preferred.

The Public Affairs Program Admissions Committee will begin reviewing applicant files once the student has submitted all of the above documents. Admission to the Doctoral Program in Public Affairs is granted on a competitive basis. Meeting minimum UCF admission standards does not guarantee program admissions. The Admissions Committee will base final admission on the evaluation of the applicant's abilities, past performance, recommendations, match to the program, correspondence of the applicant's career and academic interests with those of the core and affiliated faculty, and potential for completing the degree and making a significant contribution to Public Affairs.

Public Affairs PhD, Public Administration Track

Track Description

The Doctoral Program in Public Affairs is an interdisciplinary program that includes the professional and academic expertise of faculty in the fields of Criminal Justice, Health Management and Informatics, Public Administration, and Social Work. The Public Administration Track prepares students for academic positions in colleges and universities as well as research and leadership positions in public, nonprofit and for profit agencies and organizations.

The Public Administration Track integrates the historical evolution of the public administration field, the current challenges in theory and practice in our increasingly interconnected society, and the future directions needed as a discipline and society to achieve responsive solutions to complex public problems.

Curriculum

Students must complete 60 credit hours beyond the master's degree distributed in the following manner:

- a three-course, 9-credit required Public Affairs substantive core
- a six-course, 18-credit required Public Affairs methodological and statistical core
- a three-course, 9-credit required discipline-specific specialization
- a two-course, 6-credit unrestricted elective requirement
- one course, 3-credit required Public Affairs practicum
- 15 credit hours of dissertation minimum

Total Credit Hours Required: 60 Credit Hours Minimum beyond the Master's Degree

A grade of B- or better is required in all courses, including Substantive Core, Methodological Core and Track Specialization/Elective courses. Students receiving a grade of C+ or below in the Substantive Core or Methodological Core courses must repeat the course and receive an acceptable grade prior to taking the Research Proficiency Exam and Qualifying Exam. Any student who receives more than one "C" in their doctoral coursework may be dismissed from the program.

A minimum of 3.0 graduate status GPA and program of study GPA is required to maintain graduate student status and for graduation. Students with a GPA less than 3.0 may be dismissed from the program.

Any student who receives an "F" grade in their doctoral coursework will be dismissed from the program.

Required Courses: 45 Credit Hours

Public Affairs Substantive Core: 9 Credit Hours

- PAF 7000 - Foundations of Public Affairs: People, Places, Policies and Paradigms 3 Credit Hours
- PAF 7230 - Strategic Change and Management for Public Affairs 3 Credit Hours
- PAF 7317 - Social Inquiry and Public Policy 3 Credit Hours

Methodological and Statistical Core: 18 Credit Hours

- PAF 7802 - Advanced Research Methodology for Public Affairs 3 Credit Hours
- PAF 7804 - Advanced Statistics for Public Affairs I: Multivariate Analysis 3 Credit Hours
- PAF 7805 - Advanced Statistics for Public Affairs II: Survey of Statistical Methods 3 Credit Hours
- PAF 7820 - Qualitative Methods for Public Affairs Evaluation 3 Credit Hours
- PAF 7317 - Social Inquiry and Public Policy 3 Credit Hours

Advanced Methodology

Choose one of the following courses:

- PAF 7868 - Advanced Statistics for Public Affairs III: Continued Survey of Statistical Methods 3 Credit Hours

Transfer work will only be accepted by the Public Affairs PhD program if taken as part of an approved plan of study for a doctoral program at UCF or elsewhere. A maximum of 6 credit hours taken at the doctoral level may be considered for transfer. The acceptance of transfer credit into the track specialization and a general elective component is dependent upon the approval of the Track Coordinator in consultation with the PAF Director. Transfer work will not be accepted into the PAF substantive or methodological core components.
- **PAF 7856 - Applications of Structural Equation Modeling in Public Affairs** 3 Credit Hours
- Pre-approved methodological or statistical course 3 Credit Hours

**Practicum: 3 Credit Hours**

At the end of the required coursework, students will take the PAF 7947 - Practicum in Community-based Research. Led by a professor, the practicum provides the student with the opportunity to work within an interdisciplinary team to use their substantive learning and apply their methodological and statistical tools to a real community problem. This experiential learning brings the student out to the community while bringing the community into the university.

- **PAF 7947 - Practicum in Community-based Research** 3 Credit Hours

**Track Specialization: 9 Credit Hours**

Students are required to take the following three courses and attain a "B" or higher:

- **PAD 7026 - Advanced Seminar in Public Administration** 3 Credit Hours
- **PAD 7057 - Advanced Public Management** 3 Credit Hours
- **PAD 7827 - Network Governance** 3 Credit Hours

Choose two additional elective courses from the following:

- **PAD 7317 - Program Design and Management** 3 Credit Hours
- **PAD 7707 - Advanced Research in Public Administration** 3 Credit Hours
- See adviser for appropriate methodological elective 3 Credit Hours
- Directed independent study 3 Credit Hours
- Or other course that will add to the student's course of study. Requires approval of adviser. 3 Credit Hours

**Dissertation: 15 Credit Hours**

- **PAF 7980 Dissertation Research**

**Assignment of Faculty Advisers**

Upon acceptance of a student into the program, the program director provides students with an initial orientation and a general advising session. The Track Coordinator in conjunction with the PAF Director helps the student throughout the foundation stage of the program, assisting in the clarification of interests and goals and facilitating the introduction of students to faculty and research interests that can advance the student's program of study. Public Administration Track students will be advised by the Public Administration Track Coordinator. The Track Coordinator assists the student in selecting elective courses, finalizing the program of study, and facilitating discussion with faculty members who have similar research interests. Discussion and review of dissertation topics should take place with the faculty member who has agreed to chair the dissertation committee. The dissertation chair is to be selected by the student prior to commencing the dissertation prospectus.

**Research Proficiency Exam and Qualifying Exam**

Upon successful completion of the required courses and the required Practicum course, students are required to take a Research Proficiency Exam (RPE) and Qualifying Exam (QE). The Research Proficiency Exam will be taken after the successful completion of the Methodological Core courses. Following successful completion of all PAF core courses (not including Track Specialization courses), students are required to pass a Qualifying Exam. The exam is given following finals in the fall or spring semesters.

Students are given two opportunities to pass the RPE and the QE. Students who fail any section twice are dismissed from the program. Any student who fails any the RPE twice or the QE twice will not be readmitted into the PAF program. This policy includes all tracks and/or any masters to PhD program(s) within the PAF program. Please refer to the student handbook for further information.

**Candidacy Status**

Students officially enter candidacy when the following has been accomplished:

- Completion of all course work, except for dissertation hours.
- Successful completion of the Research Proficiency Exam and Qualifying Exam.
- The dissertation advisory committee is formed and has been reviewed and approved by the PAF Director and the College of Graduate Studies. Members of the committee
are to be approved graduate faculty or graduate faculty scholars.
- Submittal of an approved graduate program of study.
- Submission of dissertation prospectus to turnitin.com. Subsequent results to be within acceptable rating.
- Successful defense of the dissertation prospectus.
- All approved documentation has been received by the PAF and Graduate offices.

Equipment Fee

Full-time students in the Public Affairs Program pay a $40 equipment fee each semester that they are enrolled. Part-time students pay $20 per semester.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must hold a master's degree from an accredited institution, preferably in criminal justice, health, public administration or social work. Applicants with a master's degree in a field not directly related to public affairs may be required to take courses at the master's level in preparation for doctoral level study. Any requirements for preparatory coursework will be communicated at the time of acceptance into the program and will generally be taken prior to beginning doctoral-level coursework. These courses, if required, will not substitute for the listed doctoral degree requirements. Admission is offered for fall semester only.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended for both bachelor's and master's degrees.
- Official, competitive GRE score taken within the last five years.
- A narrative statement of 1000 words or less addressing the following:
  - What is your reason for pursuing a doctoral degree in Public Affairs in our program? Be sure to include future goals and plans.
  - What research areas pertaining to Public Affairs are you interested in researching?
  - What will be your contribution as a student to the program?
- Résumé.
- A writing sample. An academic paper is preferred, but the program will consider writing samples that demonstrate analytical writing (i.e. grant applications, position papers, etc.).
- Three letters of recommendation from faculty or professionals who can assess the applicant's ability to succeed in a doctoral program. Academic references are strongly preferred.

The Public Affairs Program Admissions Committee will begin reviewing applicant files once the student has submitted all of the above documents. Admission to the Doctoral Program in Public Affairs is granted on a competitive basis. Meeting minimum UCF admission standards does not guarantee program admissions. The Admissions Committee will base final admission on the evaluation of the applicant's abilities, past performance, recommendations, match to the program, correspondence of the applicant's career and academic interests with those of the core and affiliated faculty, and potential for completing the degree and making a significant contribution to Public Affairs.

The Fall 2018 application deadline has been extended until June 1, 2018.

International Applicants

| Jan 15 | Jan 15 | - |

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.
Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Public Affairs PhD, Social Work Track

Track Description

The Social Work Track in the Public Affairs PhD program prepares students for university faculty and research positions, as well as leadership roles in public, non-profit and private human service, health and community-based agencies, drawing upon research and evaluation skills.

The Social Work Track in the Public Affairs PhD program prepares students for university faculty and research positions, as well as leadership roles in public, non-profit and private human service, health and community-based agencies, drawing upon research and evaluation skills. The track is designed to: (1) to develop student learning and competencies for social work scholarship and research, incorporating disciplinary knowledge in interdisciplinary contexts, and (2) to foster student learning in domains relevant to social work research in the 21st Century; namely through the understanding and application of concepts and tools in knowledge translation, evaluation, evidence-based research, the design of innovative social ventures, and the development and testing of interventions for improving social service practice, social welfare and social policy. Students applying to this track must have a Master of Social Work (MSW) for consideration.

Curriculum

Students must complete 60 credit hours beyond the master's degree distributed in the following manner:

- a three-course, 9-credit required Public Affairs substantive core
- a six-course, 18-credit required Public Affairs methodological and statistical core
- a three-course, 9-credit required discipline-specific specialization
- a two-course, 6-credit unrestricted elective requirement
- one course, 3-credit required Public Affairs practicum
- 15 credit hours of dissertation minimum

Total Credit Hours Required: 60 Credit Hours Minimum beyond the Master's Degree

A maximum of 6 credit hours of Independent Study may be used as electives with adviser's approval.

Transfer work will only be accepted by the Public Affairs PhD program if taken as part of an approved plan of study for a doctoral program at UCF or elsewhere. A maximum of 6 credit hours taken at the doctoral level may be considered for transfer. The acceptance of transfer credit into the track specialization or general elective component is dependent upon the approval of the Track Coordinator in consultation with the PAF Director. Transfer work will not be accepted into the PAF substantive or methodological core components.

A grade of B- or better is required in all Substantive Core and Methodological Core courses. Students receiving a grade of "C+" or lower will be required to repeat the course and receive a grade of B- or better prior to taking the Research Proficiency Exam and Qualifying Exam. Any student who receives more than one "C" in their doctoral course work may be dismissed from the program.

A minimum of 3.0 graduate status GPA and program of study GPA is required to maintain graduate student status and for graduation. Students with a GPA less than 3.0 may be dismissed from the program.

Any student who receives an "F" grade in their doctoral course work will be dismissed from the program.
Required Courses: 45 Credit Hours

Public Affairs Substantive Core: 9 Credit Hours

- PAF 7000 - Foundations of Public Affairs: People, Places, Policies and Paradigms 3 Credit Hours
- PAF 7230 - Strategic Change and Management for Public Affairs 3 Credit Hours
- PAF 7317 - Social Inquiry and Public Policy 3 Credit Hours

Methodological and Statistical Core: 18 Credit Hours

- PAF 7802 - Advanced Research Methodology for Public Affairs 3 Credit Hours
- PAF 7804 - Advanced Statistics for Public Affairs I: Multivariate Analysis 3 Credit Hours
- PAF 7805 - Advanced Statistics for Public Affairs II: Survey of Statistical Methods 3 Credit Hours
- PAF 7820 - Qualitative Methods for Public Affairs 3 Credit Hours
- PAF 7325 - Policy and Program Evaluation for Public Affairs 3 Credit Hours

Advanced Methodology

Choose one of the following courses:

- PAF 7868 - Advanced Statistics for Public Affairs III: Continued Survey of Statistical Methods 3 Credit Hours
- PAF 7856 - Applications of Structural Equation Modeling in Public Affairs 3 Credit Hours
- Pre-approved methodological or statistical course 3 Credit Hours

Practicum: 3 Credit Hours

At the end of the required coursework, students will take the PAF 7947 - Practicum in Community-based Research. Led by a professor, the practicum provides the student with the opportunity to work within an interdisciplinary team to use their substantive learning and apply their methodological and statistical tools to a real community problem. This experiential learning brings the student out to the community while bringing the community into the university.

Track Specialization: 9 Credit Hours

Students are required to take the following three courses and attain a "B-" or higher:

- SOW 6383 - Social Work Administration 3 Credit Hours
- SOW 7492 - Theory Building in Social Work and Applied Social Science Disciplines 3 Credit Hours
- SOW 7494 - Conducting Evidence-based Practice Research in Social Work and Allied Fields 3 Credit Hours

Electives: 6 Credit Hours

Choose two additional courses from the following:

- SOW 7397 - Social Entrepreneurship in Public and Social Sectors 3 Credit Hours
- See adviser for appropriate methodological elective 3 Credit Hours
- Directed reading 3 Credit Hours
- Or other course that will add to the student's course of study. Requires approval of adviser. 3 Credit Hours

Dissertation: 15 Credit Hours

- PAF 7980 Dissertation Research

Assignment of Faculty Advisers

Upon acceptance of a student into the program, the program director provides students with an initial orientation and a general advising session. The Track Coordinator in conjunction with the PAF Director helps the student throughout the foundation stage of the program, assisting in the clarification of interests and goals and facilitating the introduction of students to faculty and research interests that can advance the student's program of study. Social Work Track students will be advised by the Social Work Track Coordinator. The Track Coordinator assists the student in selecting elective courses, finalizing the program of study, and facilitating discussion with faculty members who have similar research interests. Discussion and review of dissertation topics should take place with the faculty member who has agreed to chair the dissertation committee. The dissertation chair is to be selected by the student prior to commencing the dissertation prospectus.
Research Proficiency Exam and Qualifying Exam

Upon successful completion of the required courses and the required Practicum course, students are required to take a Research Proficiency Exam (RPE) and Qualifying Exam (QE). The Research Proficiency Exam will be taken after the successful completion of the Methodological Core Courses. Following successful completion of all PAF core courses (not including Track Specialization Courses), students are required to pass a Qualifying Exam. The exam is given following finals in the fall or spring semesters.

Students are given two opportunities to pass the RPE and the QE. Students who fail any section twice are dismissed from the program. Any student who fails any the RPE twice or the QE twice will not be readmitted into the PAF program. This policy includes all tracks and/or any masters to PhD program(s) within the PAF program. Please refer to the student handbook for further information.

Candidacy Status

Students officially enter candidacy when the following has been accomplished:

- Completion of all course work, except for dissertation hours.
- Successful completion of the Research Proficiency Exam and Qualifying Exam.
- The dissertation advisory committee is formed and has been reviewed and approved by the PAF Director and the College of Graduate Studies. Members of the committee are to be approved graduate faculty or graduate faculty scholars.
- Submittal of an approved graduate program of study.
- Submission of dissertation prospectus to turnitin.com. Subsequent results to be within acceptable rating.
- Successful defense of the dissertation prospectus.
- All approved documentation has been received by the PAF and Graduate offices.

Equipment Fee

Full-time students in the Public Affairs Program pay a $40 equipment fee each semester that they are enrolled. Part-time students pay $20 per semester.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must hold a master's degree in Social Work from an accredited institution. Admission is offered for fall semester only.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended for both bachelor's and master's degrees.
- Official, competitive GRE score taken within the last five years.
- A narrative statement of 1000 words or less addressing the following:
  - What is your reason for pursuing a doctoral degree in Public Affairs in our program? Be sure to include future goals and plans.
  - What research areas pertaining to Public Affairs are you interested in researching?
  - What will be your contribution as a student to the program?
- Résumé.
- A writing sample. An academic paper is preferred, but the program will consider writing samples that demonstrate analytical writing (i.e. grant applications, position papers, etc.).
- Three letters of recommendation from faculty or professionals who can assess the applicant's ability to succeed in a doctoral program. Academic references are strongly preferred.

The Public Affairs Program Admissions Committee will begin reviewing applicant files once the student has submitted all of the above documents. Admission to the Doctoral Program in Public Affairs is granted on a competitive basis. Meeting minimum UCF admission standards does not guarantee program admissions. The Admissions Committee will base final admission on the evaluation of the applicant's abilities, past performance, recommendations, match to the program, correspondence of the applicant's career and academic interests with those of the core and affiliated faculty, and potential for completing the degree and making a significant contribution to Public Affairs.

Security Studies PhD

Program Description

The Security Studies doctoral program is designed to produce specialists capable of analyzing and communicating security issues to policy makers, the general public, the government, and academia.

It is expected that the majority of graduates will work in military and other governmental organizations, international corporations, and agencies that deal with security. Others will seek employment in research and teaching in institutions of higher education.

Curriculum

The PhD degree consists of 62 credit hours beyond the master's degree. A master's degree is required for admission to the program with at least 30 credit hours of master's level work (including both coursework and thesis hours). The 62 credit hours consist of 17 credit hours of required courses, 15 credit hours of restricted electives, 12 hours of unrestricted electives (including courses offered in other departments, research, independent study, and internship), and a minimum of 18 credit hours of dissertation work.

Total Credit Hours Required: 62 Credit Hours Minimum beyond the Master's Degree

Required Courses—17 Credit Hours

Core Courses—15 Credit Hours

- INR 7139 - Issues in Domestic Security 3 Credit Hours
- INR 7337 - Issues in International Security 3 Credit Hours
- POS 7745 - Advanced Quantitative Methods in Political Research 3 Credit Hours
- POS 7707 - Advanced Qualitative Methods in Political Research 3 Credit Hours
- INR 7332 Scientific Study of Security 3 Credit Hours
Professional Development Courses—2 Credit Hours

- POS 7930 - Professional Development: Academic Careers in Security Studies 1 Credit Hours
- POS 7267 - Professional Development: The Practice of Security Studies 1 Credit Hours

Elective Courses—27 Credit Hours

Restricted Electives—15 Credit Hours

All students in the doctoral program must complete a minimum of 15 hours of course work in approved restricted elective graduate seminars. The choice of specific courses will be based on the research interests of students and made in conjunction with their faculty advisor. In this way, students achieve two distinct but related goals: a broad competence in the variety of methodological, theoretical, and substantive approaches to security studies and advanced proficiency in the areas that are most germane to their research interests. Approved restricted electives include:

- CPO 6038 - Political Development 3 Credit Hours
- CPO 6058 - Revolution and Political Violence 3 Credit Hours
- CPO 6307 - Issues in Latin American Politics 3 Credit Hours
- CPO 6729 - Global Security in the Age of Migration 3 Credit Hours
- CPO 6776 - Comparative Rising Powers 3 Credit Hours
- CPO 6785 - Political and Economic Inequality in Comparative Perspective 3 Credit Hours
- CPO 6901 - Seminar in Comparative Politics 3 Credit Hours
- INR 6039 - International Political Economy 3 Credit Hours
- INR 6062 - Peace Studies 3 Credit Hours
- INR 6065 - Seminar on War 3 Credit Hours
- INR 6067 - Human Rights and Security 3 Credit Hours
- INR 6068 - Politics of Civil Wars 3 Credit Hours
- INR 6091 - Seminar in American Security Policy 3 Credit Hours
- INR 6136 - Seminar in American Foreign Policy 3 Credit Hours
- INR 6228 - International Politics of the Caspian Sea Region 3 Credit Hours
- INR 6275 - International Politics of the Middle East 3 Credit Hours
- INR 6339 - Strategic Warning Analysis 3 Credit Hours
- INR 6346 - Politics of International Terrorism 3 Credit Hours
- INR 6356 - Environmental Security 3 Credit Hours
- INR 6365 - Seminar on Intelligence 3 Credit Hours
- INR 6366 - The Intelligence Community 3 Credit Hours
- INR 6507 - International Organization 3 Credit Hours
- POS 6686 - National Security Law 3 Credit Hours
- POS 6726 - Political Behavior in International Conflict 3 Credit Hours
- POS 6743 - Geographic Tools for Political Science Research 3 Credit Hours
- POS 6747 - Advanced Topics in Quantitative Political Analysis 3 Credit Hours
- POS 6938 - Special Topics/Political Analysis 3 Credit Hours

Unrestricted Electives—12 Credit Hours

The unrestricted electives provide students with an opportunity to further expand their doctoral training beyond the program's core courses and the restricted electives. Unrestricted electives may include regularly scheduled graduate courses in political science, graduate-level courses in programs outside the department, independent study courses, doctoral research courses with a highly focused student/faculty research component, and internships that enable students to gain valuable experience in a non-academic setting. Unrestricted electives may be taken at any point in the student's program of study; however, no more than a total of twelve hours of graduate course work can be from outside of the department, dissertation research, independent study, or internship combined; in addition, no more than a total of six hours can be from either independent study or internship. Students with suitable academic backgrounds may work in areas such as cyber security or science and technology taking courses in relevant departments. A student's faculty advisor and the department's Graduate Program Director must approve all graduate courses taken outside of the department as well as any internships.
Modern Language or Methods Requirement

Prior to enrollment in dissertation hours, students are required to demonstrate proficiency in one modern language (other than English) or an additional methodological course dependent on the student's intended research area. The language requirement is two years (four semesters) of a single college-level modern language, which should normally be in an area relevant to the student's research. Students may meet the requirement by providing evidence of four semesters of enrollment or by passing a university-administered equivalent proficiency examination. The methods requirement is met by taking a methods course as part of the elective course requirements, with the approval of the Graduate Program Director.

Milestones and Examinations

Preliminary Advisory Committee Meeting

No earlier than April 1 and not later than June 1, of their first year in the program, students will assemble and meet with a Preliminary Advisory Committee of no fewer than three full-time Political Science faculty members, all of whom should have Graduate Faculty or Grad Faculty Scholar Status. Prior to this meeting, the student will present committee members with a written statement of their primary research interests. During this meeting faculty members provide feedback on the student's statement of research interests and will identify key literatures that the student will be expected to be familiar with as they pursue their dissertation. During this meeting faculty members provide feedback on the student's statement of research interests and will identify key literature that the student will be expected to be familiar with as they pursue their Dissertation Advisory Committee. Note that college approval for the committee is not required at this time and that students are able to change the composition of their committee at any time (subject to program and college approval). Students will not be permitted to take Candidacy Exam C until they have conducted their Preliminary Advisory Committee Meeting.

Written Candidacy Exams

Each student will take the following exams:

- An exam in qualitative methods, addressing the material taught in INR 7707.
- An exam in quantitative methods, addressing the material taught in INR 7745.
- An exam addressing the contemporary literature in security studies.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all coursework, except for dissertation hours
- Successful completion of all written candidacy exams
- Formation of a dissertation advisory committee
- Submittal of an approved program of study

Dissertation—18 Credit Hours Minimum

The dissertation is the culmination of the coursework that comprises this research-based degree. It must make a significant theoretical, historical, intellectual, practical, creative, or research contribution to the student's area within the discipline. The dissertation will be completed through a minimum of 18 hours of dissertation credit, which students will use to accomplish original research. Students must maintain enrollment in dissertation hours until the degree is awarded. The dissertation must conform to standard disciplinary, institutional, and departmental practices. Consistent with College of Graduate Studies Policies, a dissertation can only be approved after the successful completion of a Dissertation Defense.

- POS 7980 - Dissertation Research 18 Credit Hours

The Dissertation Advisory Committee

It is the responsibility of the student to secure the agreement of four qualified members to serve on their dissertation committee. Committee members are qualified if they are approved members of the Graduate Faculty of Graduate Faculty Scholars. At least three members must be Graduate Faculty, and the Committee Chair must be an approved Graduate Faculty member. One member of the committee must be external to the political science department (i.e., from another UCF department or external to the university). Graduate Faculty members must form the majority of any given committee. A dissertation committee must be formed prior to enrollment into dissertation hours. Students are able to alter the composition of their committee at their discretion, but revised committees must comply with all of these regulations and be approved by the program and the College of Graduate Studies.
The Dissertation Proposal

After students have passed their candidacy exams, but before the end of the first semester that they are enrolled in dissertation hours, they must successfully complete a dissertation proposal. A successful dissertation proposal explains the subject under investigation, correctly places it within the existing scholarly literature, and present the planned approach for writing the dissertation. Dissertation proposals are only approved after they are presented to the dissertation advisory committee in a Dissertation Proposal Hearing. During the Dissertation Proposal Hearing, students must demonstrate a thorough understanding of their field of inquiry and convince committee members that their dissertation proposal is feasible. If the dissertation advisory committee is unsatisfied with the proposal or the student's preparation for undertaking it, they may, at their discretion, insist on revisions to the proposal and/or a rehearing(s) prior to approving the dissertation proposal.

Equipment Fee

Full-time students in the Security Studies PhD pay $39 per semester for equipment each semester that they are enrolled. Part-time students pay $19.50 per semester.

Independent Learning

As with all graduate programs, independent learning is an important component in the Security Studies doctoral program. Students will demonstrate independent learning through research seminars, directed research and the dissertation.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- A competitive score on each of the quantitative and verbal sections of the Graduate Record Examination (GRE) taken within three years prior to admission to the program.
- Three letters of reference that evaluate the applicant's academic performance and their suitability and potential for undertaking doctoral study, at least one of which must be written by a faculty member at the institution where the master's degree was earned, preferably the thesis adviser for those applicants who wrote a master's thesis.
- A personal statement of 500 words identifying areas of research interest in political science, faculty with whom they would like to work, and describing the applicant's academic and professional experiences and future career goals.
- A writing sample of the applicant's work that is at least 2500 words long and demonstrates ability to complete graduate-level research.
- Résumé.
- For international applicants whose first language is not English, a score of 90 or better on the TOEFL internet-based test (iBT); or a score of 232 or better on the TOEFL computer-based test; or a score of 575 or better on the TOEFL paper-based test; or a score of 7.0 or better on the IELTS.

Applicants should plan to take the appropriate test no later than December to ensure consideration of their applications by the January 1 deadline.

Applicants' records will be reviewed on an individual basis for academic deficiencies and evaluated to assess their potential for success in the program. Supplemental course work may be recommended. Consult the graduate program director whenever questions arise.

A department admissions committee that reviews the applicants' credentials will conduct interviews with the top candidates (either in-person on campus or by phone or Skype). Final selection is based on both submitted credentials and interview.

Meeting minimum UCF admissions criteria does not guarantee program admission. Final admission is also based on evaluation of the applicant's abilities, past performance, recommendations, match of this program to the applicant's career/academic goals, applicant's potential for completing the degree, and the interview.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

### Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

### Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

### Sociology PhD

#### Program Description

The Sociology PhD program provides training in the skills necessary to secure research careers in academic and nonacademic professions and emphasizes applied research in community-based settings.

The Sociology PhD program is organized around a curriculum combining strong grounding in the acquisition of methodological skills with advanced study in one of the department's four areas of concentration: the Sociology of Crime/Deviance; Domestic Violence; Social Inequalities; and Health, Families, and Communities.

The program is one of only a few in the United States focusing on applied research. Students are trained in specific applied research skills such as data analysis and program evaluation. Combined with course work in one of the four substantive areas, graduates will be trained for employment in academic settings, industry, business, government, and nonprofit agencies. The program provides training in the skills necessary to secure research careers in academic and nonacademic professions and emphasizes applied research in community-based settings.

#### Curriculum

The Sociology PhD requires a minimum of 60 credit hours beyond the master's degree, with 15 credit hours coming from required core courses, three credit hours from a restricted elective in theory, and three credit hours from a restricted elective in research methods and data analysis. Students select a minimum of 12 elective credit hours in one of the department's four areas of concentration, Sociology of Crime/Deviant Behavior; Domestic Violence; Social Inequalities; or Health, Families and Communities.

**Total Credit Hours Required: 60 Credit Hours Minimum beyond the Master's Degree**

Students must earn a grade of "B" (3.0) or better in the program's required courses. Courses may be retaken to achieve a better grade; however, students must maintain a minimum GPA of 3.0 in their program of study.

### Contact Info

**Thomas Dolan PhD**  
Associate Professor  
thomas.dolan@ucf.edu  
Telephone: 407-823-2608  
HPH 302D
Required Courses: 21 Credit Hours

Core: 15 Credit Hours

- SYA 7019 - Advanced Sociological Theory 3 Credit Hours
- SYA 7309 - Advanced Sociological Research Methods 3 Credit Hours
- SYA 7407 - Advanced Data Analysis 3 Credit Hours
- SYA 6657 - Program Design and Evaluation 3 Credit Hours
- SYA 7658 - Social Policy and Research Analysis 3 Credit Hours

Theory: 3 Credit Hours

Select one course from the list below.

- SYA 6933 - Topics in Sociological Theory 3 Credit Hours
- SYA 6128 - Theoretical Criminology 3 Credit Hours

Research Methods: 3 Credit Hours

Select one course from the list below.

- SYA 6315 - Qualitative Research Methods 3 Credit Hours
- SYA 6425 - Design and Conduct of Social Surveys 3 Credit Hours
- SYA 7457 - Topics in Data Analysis 3 Credit Hours
- SYA 6356 - Geographic Information Systems in Society 3 Credit Hours
- SYA 6452 - GIS Applications 3 Credit Hours

Elective Courses: 24 Credit Hours

Major Area of Concentration Electives: 12 Credit Hours Minimum

Students will select a minimum of 12 credit hours of unrestricted electives in one of the department's four areas of concentration.

- Sociology of Crime/Deviant Behavior
- Domestic Violence
- Social Inequalities
- Health, Families and Communities

Unrestricted Electives: 12 Credit Hours Minimum

The unrestricted electives provide students with an opportunity to expand their doctoral training beyond the program's core courses and the electives in the student's major area of concentration. Unrestricted electives may include formal course work, graduate-level courses in programs outside the Sociology Department, independent study courses with a highly focused student/faculty research component, directed research, doctoral research and a research practicum, which enable students to gain valuable research experience in a nonacademic setting. At least 9 hours from concentration electives and unrestricted electives must consist of formal course work, exclusive of independent study. Unrestricted electives may be taken at any point in the student's program of study. The research practicum and courses from other departments must be approved by the student's adviser and the Graduate Director.

Dissertation: 15 Credit Hours Minimum

- SYA 7980 - Dissertation Research 15 Credit Hours

Examinations

Content

Section 1: Theoretical Foundations of Sociology

All students will answer two of three questions. All students who take the exam in the same area of concentration in a given semester will receive the same three questions. One of the questions will require students to trace the connections between classical and contemporary sociological theories and a second question will require students to discuss the three central theoretical paradigms in sociology.

Section 2: Methods and Statistics

All students will answer two of three questions. All students who take the exam in the same area of concentration in a given semester will receive the same three questions. One of the questions will require students to interpret statistical results in tabular form.

Section 3: Major Area of Concentration

All students will answer three of four questions covering general information within the area of concentration. All students who take the exam in the same area of concentration in a given semester will receive the same four questions.
Committee

The Qualifying Exams will be graded by a committee of three faculty members who teach or do research in the area of concentration. Prior to the final faculty meeting of each spring semester, four separate qualifying exam committees will be formed by faculty choosing to become a member of one or more areas of concentration. Each qualifying exam committee will create the exam to be used for the next academic year and select the three members who will be the Grading Committee.

Administration

The Qualifying Exam will be offered to students twice during the academic year (once during the fall semester and once during the spring semester). Students must notify the Graduate Director by June 1 to take the exam in the fall semester or by October 1 to take the exam in the spring semester. They will select a major area of concentration. The exam will be distributed by the Graduate Director via email on the Monday of the week prior to the beginning of the fall semester and the Monday prior to the start of the spring semester. Students will have four days (96 hours) to complete all sections of the exam and return the exam to the Graduate Director via email. The Graduate Director will then distribute the exam to the appropriate grading committee.

Students are expected to work on the Qualifying Exam alone, and all exams will be submitted to turnitin.com.

Each grading committee will have three weeks to notify the Graduate Director of the student's grade on the exam (High Pass, Pass, Conditional Pass, or Fail). A grade of conditional pass on an exam will require the student to revise and resubmit one or more questions identified as insufficient by the Grading Committee. The student will have one week to complete each question that must be rewritten.

If a student fails the exam, he/she must retake the exam the next semester it is offered. If the exam is failed a second time, the student will be dismissed from the Ph.D. Program in Sociology.

Candidacy Examination

The dissertation proposal hearing constitutes the program’s candidacy examination, and students who successfully pass their proposal hearing along with other requirements shall be admitted to candidacy. The proposal will encompass an overview of the dissertation topic that includes an in-depth review of relevant literature, a precise statement of the research question, and specific research design (planned methodology and analysis). The student's Dissertation Advisory Committee will supervise the preparation of the dissertation proposal and the proposal hearing.

Admission to Candidacy

The following are required to be admitted to candidacy and enroll in dissertation hours:

- Completion of all course work, except for dissertation hours.
- Successful completion of the candidacy examination.
- Successful defense of the dissertation proposal.
- The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
- Submittal of an approved program of study.

Dissertation

A dissertation is required for completion of the PhD, along with an oral defense of the dissertation proposal and completed dissertation through a minimum of 15 credit hours, which students use to accomplish original research on a topic approved by their adviser and three committee members. One committee member must be from a relevant field outside the Department of Sociology. The dissertation must conform to standard disciplinary, institutional, and departmental practices. Students may not enroll for dissertation credit until they have completed all examinations in their program of study.

Applied Research Practicum (Optional)

An important component of the Sociology PhD program is the research practicum. The practicum is three to six credit hours of directed research experience in a nonacademic setting, which will provide a "hands-on" approach for advanced doctoral students. Although completion of a research practicum will not be required for all doctoral students, it is expected that some students, including most of those seeking employment in research positions in public and private agencies, will take advantage of this opportunity. Doctoral students must pass their qualifying examinations before being eligible for a research practicum. The student's graduate adviser and the department's Graduate Director must approve the research practicum. Hours completed in a research practicum will count as unrestricted electives in the student's program of study.

Equipment Fee

Full-time students in the Sociology PhD program pay a $39 equipment fee each semester that they are enrolled. Part-time students pay $19.50 per semester.
Independent Learning

As with all graduate programs, independent learning is an important component in the Sociology doctoral program. Students will demonstrate independent learning through research seminars, directed research and the dissertation.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Master's degree in a related field from an accredited institution (Note: Official, preliminary transcript reflecting Master's degree in-progress may be submitted prior to first semester of enrollment. Final, official transcripts are required post admission to document completion of master's degree.).
- Official, competitive GRE scores taken within the last five years.
- Three letters of recommendation, at least two from academic sources regarding the applicant's potential for success in the program.
- A 250-500 word personal statement identifying the area of research interest, faculty with whom they would like to work with and a description of the applicant's academic and professional experiences and goals.
- Résumé.
- A writing sample, at least 2,500 words and demonstrating the ability to complete advanced graduate work.

Applicants' records will be reviewed on an individual basis for academic deficiencies and evaluated to assess their potential for success in the program. Supplemental course work may be recommended. Consult the graduate program director whenever questions arise.

Meeting minimum UCF admissions criteria does not guarantee program admission. Final admission is also based on evaluation of the applicant's abilities, past performance, recommendations, match of this program to the applicant's career/academic goals, and applicant's potential for completing the degree.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Texts and Technology PhD

Program Description

Dedicated to inventing the future of the humanities, Texts and Technology is an interdisciplinary doctoral program that integrates fields such as writing, rhetoric, philosophy, technical communication, and public history with digital methods and practices in coding, game design, and archiving. The program supports engagement with digital practices in dialectical, rhetorical, procedural, and critical-cultural fields. The T&T program considers literacy in a broad sense, from traditional notions of writing and communication to more contemporary notions of computational and procedural literacy (e.g., using programming and new media installations as inventive methods for production, critique, and analysis).

Since 2001, UCF's Texts and Technology doctoral program has excelled in supporting its students with an internationally recognized faculty and by offering a rigorous curriculum in a friendly environment. Students bring knowledge of a specific discipline and deepen their understanding of the subject through a digital lens. In the T&T program, students adapt, develop, assess, and invent information practices in relation to emergent information technologies in and beyond the humanities.

Curriculum

The Texts and Technology (T&T) PhD requires a minimum of 42 credit hours of coursework beyond the master's degree, including a minimum of 3 hours of doctoral research and 15 hours of dissertation. Fifteen credit hours are required in five core courses. These core courses provide an interdisciplinary framework for all students. Six credit hours are required in internship and practicum hours. The remaining 36 credit hours consist of additional elective courses and research hours.

Total Credit Hours Required: 42 Credit Hours Minimum beyond the Master's Degree

Transfer and Waived Credits

Upon approval by the T&T Program Director, a certain amount of graduate credits may be waived or transferred. Please refer to the UCF Doctoral Program Policies section for specific guidelines and eligibility.

Required Courses: 15 Credit Hours

Core: 12 Credit Hours

- ENG 6800 - Introduction to Texts and Technology 3 Credit Hours
- ENG 6810 - Theories of Texts and Technology 3 Credit Hours
- ENG 6801 - Texts and Technology in History 3 Credit Hours
- DIG 6836 - Design and Development for Texts and Technology 3 Credit Hours

Research Methods: 3 Credit Hours

Select one course from the list below, or an alternate 6000-level methods course subject to approval by the instructor and the Texts and Technology Program Director.

- ENG 6812 - Research Methods for Texts and Technology 3 Credit Hours
- DIG 6825 - Digital Media Research Methods 3 Credit Hours
- ENC 6720 - Research Methods in Rhetoric and Composition 3 Credit Hours
- HIS 6159 - Historiography 3 Credit Hours

Elective Courses: 18 Credit Hours

Area of Specialization: 9 Credit Hours

Students select an Area of Specialization no later than after having completed 18 credit hours in the program. Students are required to select 9 credit hours from an Area of Specialization as noted below, or other graduate courses in the discipline subject to approval by the instructor and the Texts and Technology Program Director.

Listed are suggested courses in various Areas of Specialization. These course groupings are mere guides, are not exhaustive and are meant to assist with advising and course selection in order to meet the individual student's educational goals and objectives. The lists are not intended to restrict elective choices among focus areas as we strongly encourage Texts and Technology students to maintain an interdisciplinary approach to their doctoral education.

If a student identifies another UCF graduate course that may be of value to his/her Texts and Technology research area, but it is not already identified in a list below, that student may request approval from the T&T Program Director for the course to be
used as an elective in the Graduate Plan of Study. All such requests must be made in advance of enrolling in the course.

Digital Humanities

ENG 6812 - Research Methods for Texts and Technology (3 credit hours) is the recommended Methods course.

- DIG 5137 - Information Architecture 3 Credit Hours
- DIG 6546 - Previsualization and Concept Development 3 Credit Hours
- DIG 6647 - Science and Technology of Dynamic Media 3 Credit Hours
- ENC 5225 - Theory and Practice of Document Usability 3 Credit Hours
- ENC 6426 - Visual Texts and Technology 3 Credit Hours
- ENC 6428 - Digital Literacies 3 Credit Hours
- ENG 6808 - Narrative Information Visualization 3 Credit Hours
- ENG 6806 - Digital Editing and Databases 3 Credit Hours
- ENG 6811 - Cultural Contexts in Texts and Technology 3 Credit Hours
- ENG 6814 - Gender in Texts and Technology 3 Credit Hours
- FIL 5800 - Research Methods in Film and Digital Media 3 Credit Hours
- PHI 5665 - Knowledge, Responsibility, and Society 3 Credit Hours
- PHI 6679 - Digital Ethics 3 Credit Hours
- PHI 6679 - Narrative Information Visualization 3 Credit Hours
- PHI 6679 - Digital Ethics 3 Credit Hours
- PHM 5035 - Environmental Philosophy 3 Credit Hours
- THE 5545 - Theatre for Social Change 3 Credit Hours
- TPP 5248C - Storytelling as a Theatrical Art Form 2 Credit Hours
- WST 5347 - Research in Women and Gender Studies 3 Credit Hours
- WST 5601 - Theories in Gender Studies 3 Credit Hours

Public History

If the student does not hold a master's degree in History, HIS 6159 – Historiography (3 credit hours) is the recommended Methods course. If the student holds a master's degree in history, the recommended Methods course is ENG 6812 - Research Methods for Texts and Technology (3 credit hours).

- AMH 5378 - History of Technology 3 Credit Hours
- AMH 5636 - Colloquium in US Environmental History 3 Credit Hours
- AMH 6346 - Seminar in the History of American Automobility 3 Credit Hours
- AMH 6429 - Seminar in Community and Local History 3 Credit Hours
- AMH 6592 - Seminar in Oral History 3 Credit Hours
- ENG 6808 - Narrative Information Visualization 3 Credit Hours
- HIS 5067 - Introduction to Public History 3 Credit Hours
- HIS 5083 - Cultural Heritage Management 3 Credit Hours
- HIS 5925 - History in the Digital Age 3 Credit Hours
- HIS 6068 - Seminar in Documentary Editing and New Media 3 Credit Hours
- HIS 6096 - Seminar in Historic Preservation 3 Credit Hours
- HIS 6165 - Digital Tools for Historians 3 Credit Hours
- HIS 6942 - Internship 3 Credit Hours
- PHI 6679 - Digital Ethics 3 Credit Hours

Rhetoric and Composition

ENC 6720 - Research Methods in Rhetoric and Composition (3 credit hours) is the recommended Methods course.

- DIG 5137 - Information Architecture 3 Credit Hours
- DIG 5487 - Principles of Visual Language 3 Credit Hours
- DIG 6136 - Design for New Media 3 Credit Hours
- DIG 6432 - Transmedia Story Creation 3 Credit Hours
- DIG 6812 - Digital Interaction for Informal Learning 3 Credit Hours
- DIG 6546 - Previsualization and Concept Development 3 Credit Hours
- DIG 6605 - Physical Computing 3 Credit Hours
- DIG 6647 - Science and Technology of Dynamic Media 3 Credit Hours (required)
- ENC 5225 - Theory and Practice of Document Usability 3 Credit Hours
- ENC 6296 - Writing and Designing Online Help Systems 3 Credit Hours
- ENC 6428 - Digital Literacies 3 Credit Hours
- ENC 6808 - Narrative Information Visualization 3 Credit Hours
- PHI 6679 - Digital Ethics 3 Credit Hours

Digital Media

DIG 6825 - Digital Media Research Methods (3 credit hours) is the recommended Methods course.

- DIG 5137 - Information Architecture 3 Credit Hours
- DIG 5487 - Principles of Visual Language 3 Credit Hours
- DIG 6136 - Design for New Media 3 Credit Hours
- DIG 6432 - Transmedia Story Creation 3 Credit Hours
- DIG 6812 - Digital Interaction for Informal Learning 3 Credit Hours
- DIG 6546 - Previsualization and Concept Development 3 Credit Hours
- DIG 6605 - Physical Computing 3 Credit Hours
- DIG 6647 - Science and Technology of Dynamic Media 3 Credit Hours (required)
- ENC 5225 - Theory and Practice of Document Usability 3 Credit Hours
- ENC 6296 - Writing and Designing Online Help Systems 3 Credit Hours
- ENC 6428 - Digital Literacies 3 Credit Hours
- ENC 6808 - Narrative Information Visualization 3 Credit Hours
- PHI 6679 - Digital Ethics 3 Credit Hours
• ENC 5337 - Rhetorical Theory 3 Credit Hours
• ENC 5705 - Theory and Practice in Composition 3 Credit Hours
• ENC 6245 - Teaching Professional Writing 3 Credit Hours
• ENC 6332 - Gendered Rhetoric 3 Credit Hours
• ENC 6333 - Contemporary Rhetoric and Composition Theory 3 Credit Hours
• ENC 6335 - Rhetorical Traditions 3 Credit Hours
• ENC 6338 - The Rhetorics of Public Debate 3 Credit Hours
• ENC 6339 - Rhetorical Movements 3 Credit Hours
• ENC 6425 - Digital Literacies 3 Credit Hours
• ENC 6712 - Studies in Literacy and Writing 3 Credit Hours
• ENC 6740 - Topics in Rhetoric and Composition 3 Credit Hours
• ENC 6808 - Narrative Information Visualization 3 Credit Hours
• ENC 6811 - Cultural Contexts in Texts and Technology 3 Credit Hours
• ENC 6812 - Research Methods for Texts and Technology (3 credit hours) is the recommended Methods course.
• ENC 6261 - Technical Writing, Theory and Practice 3 Credit Hours (required)
• ENC 5225 - Theory and Practice of Document Usability 3 Credit Hours
• ENC 6217 - Technical Editing 3 Credit Hours
• ENC 6292 - Project Management for Technical Writers. 3 Credit Hours
• ENC 6297 - Production and Publication Methods 3 Credit Hours
• ENC 6296 - Writing and Designing Online Help Systems 3 Credit Hours
• ENC 6425 - Hypertext Theory and Design 3 Credit Hours
• ENG 6074 - Historical Movements in Literary, Cultural, and Textual Studies 3 Credit Hours
• ENG 6078 - Contemporary Movements in Literary, Cultural, and Textual Theory 3 Credit Hours
• ENG 6808 - Narrative Information Visualization 3 Credit Hours
• LIT 6435 - Rhetoric of Science 3 Credit Hours
• LIT 6936 - Studies in Literary, Cultural, and Textual Theory 3 Credit Hours
• PHI 6679 - Digital Ethics 3 Credit Hours

Interdisciplinary Electives: 9 Credit Hours

Students select 9 credit hours of interdisciplinary electives from any Area of Specialization, or from other departments within the university, subject to approval by the instructor and the Texts and Technology Program Director. This requirement encourages students to find graduate-level coursework best suited to develop their research agendas and to prepare for their dissertations.

Dissertation: 18 Credit Hours

Candidacy Examination: 3 Credit Hours

• ENC 7919 Doctoral Research 3 credit hours

Students are admitted to doctoral candidacy status upon completion of a written examination with three parts—one part based on a reading list reviewed biennially by the Texts and Technology faculty and the other two parts based on reading lists prepared by each student and approved by the examination committee. The candidacy examination for each student is written and evaluated by a committee of three UCF Texts and Technology graduate faculty members chosen by the student. Students must be registered for ENC 7919 during the semester in which they take their candidacy examination and they must find a Texts and Technology core faculty member to serve as the chair of their examination during the semester before enrolling in ENC 7919. Students cannot register for dissertation credit ENC 7980 until the semester after they have successfully passed the candidacy examination. Students who fail the candidacy examination a second time cannot continue in the program.

Admission to Candidacy

The following are required in order to be admitted to candidacy and enroll in dissertation hours:

• Successful completion of all coursework, except for dissertation hours.
• Successful completion of the candidacy examination.
• An approved dissertation advisory committee is on file, consisting of approved graduate faculty and graduate faculty scholars.
• A current, approved program of study is on file.
Dissertation and Oral Defense: 15 Credit Hours

- **ENC 7980 Doctoral Dissertation** (15 credit hours)

Students choose their dissertation adviser and committee from among the faculty in the Texts and Technology PhD program and must have one member from outside the College of Arts and Humanities. Students choose the adviser and committee after they have completed approximately 27 credit hours toward the degree or after the first year-and-a-half of coursework. All dissertation committee members, including outside readers, must hold a PhD or another relevant degree or, if serving as a UCF Graduate Scholar, the external member must have documented evidence of exceptional relevant experience and/or scholarly or creative productivity.

Students must write a dissertation on their research that will explain and defend a significant original contribution to the field of Texts and Technology. It may be of a theoretical, historical or pragmatic nature, but must meet conventional academic standards. Students are required to submit and defend a written dissertation proposal (the prospectus) during the first year in dissertation. The dissertation committee administers the candidate's oral defense of the dissertation, with passing determined by acceptance by a majority of the committee. The dissertation adviser, the dissertation committee and the dean of the college or designee must approve the final dissertation. Format approval is required from the Thesis and Dissertation Office and final approval of degree requirement completion by the College of Graduate Studies (Millican Hall 230).

Students will submit at least one substantial scholarly article to a national and/or international peer-reviewed journal with the approval and assistance of the dissertation chair and the director of the doctoral program.

Internship and Practicum: 6 Credit Hours

- **ENG 6813 - Teaching Online in Texts and Technology** 3 Credit Hours
- **ENG 6947 - Internship in Texts and Technology** 3 Credit Hours

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript from each college/university attended, demonstrating a competitive GPA in the student's major field of study.
- Applicants must hold an earned master's degree from a regionally accredited or recognized foreign institution prior to entering the Texts and Technology program. Fields with a technological and/or textual theory component, such as digital humanities, public history, technical communication, digital media, cultural studies, philosophy, rhetoric, or linguistics, are especially applicable. The total Texts and Technology doctoral program is a combination of an earned master's degree and the Ph.D. core/elective coursework, internship and practicum hours, research hours, and dissertation hours. **Earned Master's Degree (minimum 30 credit hours) + 42 UCF Graduate Credit hours = 72 graduate credit hours.**
- Official, competitive GRE score (the test must have been taken within the last five years).
- Three letters of recommendation. The letters of recommendation should be from faculty members, university administrators, and employers. The letters, which must be current to the application, should address the educational and career goals of the applicant. The letter writers should also know the applicant well enough to discuss the applicant's capacity to perform, excel and succeed in a graduate program. Letters must discuss the applicant's ability to perform graduate-level research. At least two of the letters should be from college or university professors who are acquainted with the applicant.
- **Statement of Purpose:**
  - The statement should explain the motivation behind the pursuit of an interdisciplinary doctoral degree in Texts and Technology and discuss future career goals.
  - The statement should discuss all relevant professional background and any previous research experience.
  - The applicant must clearly describe the particular area(s) of research interest and identify any UCF faculty members who share a similar research focus and with whom the applicant would like to work. Applicants are encouraged to visit the Texts and Technology website for additional information regarding the program and faculty (http://www.tandt.cah.ucf.edu).
  - The statement should be between 500 and 1,200 words.
• Substantial academic writing sample and an optional digital portfolio illustrating the applicant's ability to engage in advanced academic work. Acceptable writing samples may include a chapter from a master's thesis, a conference paper, a term paper for a seminar, or other research projects that demonstrate the applicant's ability to pursue the type of research that could possibly lead to a completed dissertation.

• Résumé or CV.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is competitive and is based on a comparative evaluation of each applicant's proficiencies, past performance, recommendations, as well as the match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Specialist

Education EdS

Program Description

The Specialist in Education program is designed with two tracks for students: the Master's + 30 Track and the School Counseling Track. The Master's + 30 Track is an advanced graduate program for post master's students. It is designed for professionals who wish to increase their knowledge to prepare for doctoral work, to add expertise in their current field of teaching, or to add an additional field of expertise. The EdS in Education School Counseling Track prepares students to work as professional school counselors in Pre-K through postsecondary school settings and is an NCATE Accredited Program within the Other School Profession (OSP).

The Specialist in Education program is designed for practicing educators who wish to gain expertise in a subfield within education, and offers two tracks: School Counseling Track and the Master's + 30 Track. The program builds that expertise from a core of courses curriculum, instruction, learning theory, and research, and then allow students to work with an adviser to develop a program of study to gain expertise. The program is intended for educators who are interested in teaching in a college, university, or community college, or leading curriculum and instructional improvement in a school or school district, higher education, or military or business settings.

The specialist program provides a foundation of advanced graduate course work but is not a "terminal" academic degree. The Education EdS is an advanced graduate program providing opportunities for master's graduates to enhance their professional preparation and/or preparation for the doctorate (either the EdD or the PhD) by completing additional graduate coursework that results in an earned degree.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track (i.e., Masters + 30 or School Counseling) in this program. Tracks may have different requirements.

Admission to an education specialist program is separate from admission to the doctoral program. Upon completion of the EdS degree, the student may apply for admission to a doctoral program.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Program Tracks

Education EdS, Master's +30 Track
Education EdS, School Counseling Track

Contact Info

Mike Hynes PhD
Professor
michael.hynes@ucf.edu
Telephone: 407-823-2005
ED 209D
The Education EdS, Master's +30 Track is an advanced graduate program for post-master's students. It is designed for professionals who wish to increase their knowledge to prepare for doctoral work, add expertise in their current field of teaching, or add an additional field of expertise.

The program prepares educators who are interested in teaching in a college, university or community college, or in leading curriculum and instructional improvement in a school or school district, higher education, or military or business settings.

**Curriculum**

The Master's +30 track in the Education EdS program requires 30-33 credit hours beyond the master's degree, including advanced foundational core courses, specialization courses, and a capstone seminar.

**Total Credit Hours Required:** 30-33 Credit Hours Minimum beyond the Master's Degree

**Required Courses: 30-33 Credit Hours**

**Advanced Foundational Core: 13-16 Credit Hours**

* Must be taken in the first semester of the program.

** Capstone: 2 Credit Hours**

- EDF 6635 - Capstone: Action Research in Teacher Leadership 3 Credit Hours ** or
- IDS 6971 - Thesis 6 Credit Hours

**Specialization: 15 Credit Hours**

For the specialization, students must complete 15 credit hours of specialization courses from one of the following UCF College of Education programs. Courses are selected with approval of the student's adviser.

- One of the tracks in the Teacher Leadership MEd program
- The specialization or electives in another MEd program
- The concentration in the Education EdD program
- One of the tracks in the Education PhD program

**Independent Learning**

The EdS requires a small-scale research study (if co-enrolled in a doctoral program) or completion of a capstone experience such as an internship, research report, or thesis (if this is a "terminal" program for the student).

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree in a related field of study.
- An official GRE score is not required for admission to the Education EdS, Master's + 30 Track. However, preference will be given to applicants who submit a competitive score. *Note that students who wish to co-enroll*
for the Ed.D. Program must apply to that program and comply with all admission criteria for that program including an acceptable GRE score.

- A goal statement detailing the specific subfield of education in which the applicant intends for a specialization and explains how the degree will contribute to the applicant's career development plan. Applicants are strongly encouraged to contact faculty members in the College of Education and Human Performance in their area of specialization before they apply to identify a potential advisor.

- Resume

- All applicants must attend an interview session and an orientation to be accepted to the program. These will be held on dates announced on the College of Education and Human Performance website.

- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

**Education EdS, School Counseling Track**

**Track Description**

The Specialist in Education (EdS)—School Counseling track in the CACREP accredited Counselor Education program is designed for practicing educators who wish to gain expertise in a subfield within education or a closely related field. The program prepares students to work as professional school counselors in Pre-K through postsecondary school settings and is an NCATE Accredited Program within the Other School Profession (OSP).

Students enrolled in the School Counseling track of the EdS in Education should remain in close contact with their advisor to keep informed of any programmatic changes implemented to comply with new state requirements.

As part of the program's pragmatic approach to preparing counselors, in addition to classroom studies, all students complete clinical experiences in the UCF Community Counseling and Research Center and field-based experiences in the community. The UCF Community Counseling and Research Center serves as a hub for training and research in the program, with graduate students providing annual services to over 1,400 individuals, couples, and families in the central Florida community.
Curriculum

The School Counseling track in the Education EdS program prepares students for certification as a professional school counselor. The program requires a minimum of 48 credit hours beyond the master's degree, including 6 credit hours of core courses, 27 credit hours of specialization, 9 credit hours of DOE-required certification courses (if these have not been completed prior to entry), 9 credit hours of professional clinical experiences, and 6 credit hours of electives in either the nonthesis or thesis option.

Total Credit Hours Required: 48 Credit Hours Minimum beyond the Master's Degree

Required Courses: 33 Credit Hours

Core: 6 Credit Hours

- EDF 6155 - Lifespan Human Development and Learning 3 Credit Hours
- EDF 6481 - Fundamentals of Graduate Research in Education 3 Credit Hours

Specialization: 27 Credit Hours

- MHS 6220 - Individual Psychoeducational Testing I 3 Credit Hours
- MHS 6400 - Theories of Counseling and Personality 3 Credit Hours
- MHS 6401 - Techniques of Counseling 3 Credit Hours
- MHS 6420 - Foundations of Multicultural Counseling 3 Credit Hours
- MHS 6500 - Group Procedures and Theories in Counseling 3 Credit Hours
- SPS 6815 - Legal and Ethical Issues in Professional School Counseling 3 Credit Hours
- SDS 6347 - Career Development 3 Credit Hours
- SDS 6411 - Counseling with Children and Adolescents 3 Credit Hours
- SDS 6620 - Coordination of Comprehensive Professional School Counseling Programs 3 Credit Hours

Elective Courses/Nonthesis Option: 6 Credit Hours

Students must select two electives in their specialization as approved by their adviser.

- Two approved electives 6 Credit Hours

Professional Clinical Experiences: 9 Credit Hours

The clinical experiences are comprised of two sections, Practicum and Internship. Both are experiential in nature and are independent learning activities that take place in authentic settings in which students must apply, reflect on, and refine knowledge and skills acquired in the program to work with actual clients and students. The practicum is conducted on campus in the UCF Community Counseling and Research Center and the internship is conducted at various schools around central Florida.

*Prerequisites for MHS 6803 - Practicum in Counselor Education are as follows: MHS 5005, MHS 6400, MHS 6401, MHS 6500, and SPS 6815. MHS 6420 and SDS 6411 are also pre or co-requisites for MHS 6803. A minimum of 27 credit hours are required prior to beginning the practicum.

**The prerequisites for SDS 6947 - Internship in Professional School Counseling include SPS 6815, a "B" or better in MHS 6803, and MHS 6420.

- MHS 6803 - Practicum in Counselor Education 3 Credit Hours *
- SDS 6947 - Internship in Professional School Counseling 1-6 Credit Hours **
- SDS 6947 - Internship in Professional School Counseling 3 Credit Hours

Additional Program Requirements

- Achieve at least a GPA of 3.0 in counseling specialization courses.
- EdS students are strongly encouraged to take MHS 5005 during their first semester if not already taken in a Counselor Education master's program.
- Achieve a "B" or better in MHS 5005, MHS 6401, MHS 6803 and SDS 6947.
- Complete a total of 700 hours of clinical experiences, 100 of which will be in the UCF Community Counseling and Research Center and 600 of which are field-based experiences in a school setting.
- Complete a portfolio and receive approval by Counselor Education faculty.
- Complete a professional exit exam.
DOE Certification - 9 Credit Hours

(EdS students need to have a Master’s in Education (MEd) degree in order to waive the following education courses):

- TSL 5085 - Teaching Language Minority Students in K-12 Classrooms 3 Credit Hours
- RED 5147 - Developmental Reading 3 Credit Hours
- EDG 6415 - Principles of Instruction and Classroom Management 3 Credit Hours

Independent Learning

Practica and internships are independent learning activities that take place in authentic settings in which students must apply, reflect on, and refine knowledge and skills acquired in the program. The internship experience provides students with the practical experience of facilitating a comprehensive, professional school counseling program in a school setting (e.g., leading classroom guidance lessons, facilitating group counseling, providing individual counseling services).

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The School Counseling Track, EdS degree will no longer be accepting applications for summer enrollment. All interviews for candidates will be held with Counselor Education interviews in general, which occur every fall and spring. This change will allow for more consistency in all of the Counselor Education degree programs.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree in a related field of study.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation
- Resumé.
- Goal statement

The Specialist in Education-School Counseling track can accommodate only a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met.

The College of Education and Human Performance reserves the right to refuse student entrance or terminate a student after admission to the Specialist in Education-School Counseling track, if in the judgment of the faculty the student demonstrates unacceptable personal fitness to work in the counseling field with children, youth, and/or adults.

A formal interview is required and will be scheduled after the College of Education and Human Performance admission requirements are met. The interview dates for March and October will be posted on our Counselor Education website.

Attendance at the program orientation session at 4:30 p.m. on the Thursday before classes begin, the semester to which the student applied, is mandatory.

Admission to an Education Specialist program is separate from admission to the Doctoral program. Upon completion of the EdS degree, the student may apply for admission to a Doctoral program.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.
Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Educational Leadership EdS

Program Description

The Education Specialist in Educational Leadership program is designed for those currently employed in or interested in decision-making positions in educational organizations. The program is an advanced professional degree designed specifically for individuals who have completed a master's degree in a field other than Educational Leadership and who wish to meet the requirements for Florida Level 1 Educational Leadership Certification while working toward a degree. For information on how this program may prepare you for professional licensure, please visit the program website or contact the program coordinator.

Students who complete an EdS in Educational Leadership may apply for admission to the doctoral program. The EdS program requires a research report at the completion of studies.

Curriculum

The Educational Leadership EdS program requires a minimum of 36 credit hours beyond the master's degree. Students must complete EDA 6909 Research Report at the completion of their study, as well as successfully complete EDA 6946 – Internship by earning at least a grade of "B."

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Master's Degree

Required Courses: 30 Credit Hours

Core: 9 Credit Hours

*EDA 7101 will be taken the last fall semester of enrollment prior to graduation; enrollment requires instructor permission.

- EDA 7101 - Organizational Theory in Education 3 Credit Hours *
- EDA 6946 - Internship VAR Credit Hours
- EDA 6909 - Research Report 3 Credit Hours

Specialization: 21 Credit Hours

- EDA 6061 - Organization and Administration of Schools 3 Credit Hours
- EDA 6232 - Legal Aspects of School Operation 3 Credit Hours
- EDA 6240 - Educational Financial Affairs 3 Credit Hours
- EDA 6260 - Educational Systems Planning and Management 3 Credit Hours
- EDA 6931 - Contemporary Issues in Educational Leadership 3 Credit Hours
- EDS 6123 - Educational Supervisory Practices I 3 Credit Hours
- EDS 6130 - Educational Supervisory Practices II 3 Credit Hours

Co-requisite/Elective Courses: 6 Credit Hours

EDF 6401 and EDF 6481 are required co-requisites if students have not already completed them in their master's degree. If the courses have been completed, students must take up to 6 credit hours of electives as approved by their adviser.

- EDF 6401 - Statistics for Educational Data 3 Credit Hours
- EDF 6481 - Fundamentals of Graduate Research in Education 3 Credit Hours
  or
- Electives 6 Credit Hours as approved by adviser

Additional Program Requirements

Educational leadership majors must successfully complete:

- 3 credit hour EDA 6946 Administrative Internship (should be taken within the last two semesters of enrollment)
• Pass all sections of the Florida Educational Leadership Examination and receive scores in time for graduation.

Independent Learning

Students must complete a research report at the conclusion of their studies.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree in a related field of study.
- Official, competitive GRE score taken within the last five years.
- Resumé.
- Three letters of recommendation.

Admission to the EdS in Educational Leadership program is separate from admission to the doctoral program. EdS graduates may apply for admission to the doctoral program.

School Psychology EdS

Program Description

The School Psychology EdS program is designed for students who wish to become certified School Psychologists. This specialist degree has a very specific curriculum to meet the respective licensing requirements for school psychologists.

The EdS in School Psychology is a state-approved initial teacher preparation program that is subject to any change in the Florida Administrative Code (State Board of Education Rule 6A-5.066). Students enrolled in this program should remain in close contact with their adviser to keep informed of any program changes implemented to comply with new state requirements.

The School Psychology EdS program is designed to prepare students in becoming certified School Psychologists. This
specialist degree has very specific requirements to meet the respective licensing requirements for school psychologists.

The School Psychology Program is a unique specialization in psychology and education. This program is based on two assumptions. School psychologists can apply relevant knowledge and skills from a variety of disciplines to the learning and adjustment problems of preschool and school-age children. Also, relevant knowledge and skills can be transmitted through a variety of services including (a) consultation with teachers and parents, (b) direct and indirect services to children and young adults, and (c) direct and indirect services to school and community organizations. School psychologists may practice in public or private schools, colleges and universities, rehabilitation centers, hospitals, mental health clinics, government agencies, child guidance centers, penal institutions, and may develop private practices. Applicants with backgrounds in education, psychology or other closely related undergraduate majors may qualify for the School Psychology degree program.

The program involves formal preparation and practical experiences focusing on psychological foundations (human development, learning and motivation), psychoeducational assessment, exceptional students, remediation or intervention techniques, counseling skills, as well as a full-time supervised internship of two semesters in the public school setting. Graduates are certifiable at the state level and the program is approved and accredited by NASP/NCATE. For information on how this program may prepare you for professional licensure, please visit the program website or the program coordinator.

Curriculum

The School Psychology EdS degree requires a minimum of 83 credit hours beyond the bachelor's degree, as well as a portfolio, practicum and research report at the completion of study. Please note that 65 credit hours are completed before internship. The research report and internship courses comprise 18 credit hours that are completed during the internship.

Total Credit Hours Required: 83 Credit Hours Minimum beyond the Bachelor's Degree

With the exception of SPS 5605 - Building and Improving Relationship and Emotional Intelligence, SPS 5177 - Enhancing Individual and Student IQ, and SPS 6700 - Advanced Psychoeducation and Data-Based Decision Making, SPS courses are only open to students in the School Psychology Program.

Prerequisites or Co-requisites (DOE Certification)

- TSL 5085 - Teaching Language Minority Students in K-12 Classrooms 3 Credit Hours
- EDG 6415 - Principles of Instruction and Classroom Management 3 Credit Hours or
- EDF 6727 - Critical Analysis of Social, Ethical, Legal, and Safety Issues Related to Education 3 Credit Hours
- RED 5147 - Developmental Reading 3 Credit Hours

Required Courses: 59 Credit Hours

Core: 9 Credit Hours

- EDF 6401 - Statistics for Educational Data 3 Credit Hours
- EDF 6481 - Fundamentals of Graduate Research in Education 3 Credit Hours
- EEX 5051 - Exceptional Children in the Schools 3 Credit Hours

Specialization: 50 Credit Hours

- SPS 6601 - Introduction to Psychological Services in Schools 3 Credit Hours
- SPS 6606 - Consultation in School Psychology 3 Credit Hours
- SPS 6608 - Seminar in School Psychology 3 Credit Hours
- SPS 6801 - Developmental Bases of Diverse Behaviors 3 Credit Hours
- SPS 6225 - Behavioral and Observational Analysis of Classroom Interactions in Schools 3 Credit Hours
- SPS 6931 - Ethical and Legal Issues in School Psychological Services 3 Credit Hours
- MHS 6400 - Theories of Counseling and Personality 3 Credit Hours
- MHS 6401 - Techniques of Counseling 3 Credit Hours
- SPS 6191 - Individual Psychoeducational Diagnosis I 4 Credit Hours
- SPS 6192 - Individual Psychoeducational Diagnosis II 4 Credit Hours
- SPS 6125 - Preschool Psychoeducational Assessment 3 Credit Hours
- SPS 6194 - Assessment of Special Needs 3 Credit Hours
Choose two courses from the following list:

- SPS 6703 - Child and Adolescent Deviant Behavior and Treatment 3 Credit Hours
- SPS 6175 - Cultural Diversity and Nonbiased Assessment 3 Credit Hours
- SPS 5605 - Building and Improving Relationship and Emotional Intelligence 3 Credit Hours
- SPS 5177 - Enhancing Individual and Student IQ 3 Credit Hours

Research Report: 6 Credit Hours

Choose one of the following two sets of courses.

- SPS 6909 - Research Report I and II 6 Credit Hours
- SPS 6402 - Applied Prevention and Intervention in Schools I 3 Credit Hours
- SPS 6403 - Applied Prevention and Intervention in Schools II 3 Credit Hours

Practicum and Internship: 18 Credit Hours

- SPS 6946 - Practicum in School Psychology I 3 Credit Hours
- SPS 6946 - Practicum in School Psychology II 3 Credit Hours
- SPS 6948 - School Psychology Internship 6 Credit Hours (12 credit hours)

Additional Program Requirements

- Complete an electronic portfolio that documents reflections on study and learning experiences throughout the program and receive approval by the School Psychology faculty.
- Pass a comprehensive exam.
- Pass the Florida Teacher Certification Examination (FTCE).

UPDATE: In order to demonstrate mastery of general knowledge, Graduate Record Exam test administrations conducted on or after July 1, 2015, may be used as an acceptable means of demonstrating a mastery of general knowledge. A minimum passing score on a GRE subtest in an applicable general knowledge content area, as defined in the table below, will satisfy the requirement of demonstrating a mastery of general knowledge for the applicable general knowledge content area.

<table>

</tbody>
</table>

NOTE: Effective January 1, 2015, only examination results earned by educators within 10 years prior to the date of application for a new Florida Educator’s Certificate with the Florida Department of Education may be acceptable for certification eligibility requirements (SBR 6A-4.002).

Equipment Fee

Students in the School Psychology EdS program pay a $90 equipment fee each semester that they are enrolled. A materials fee of $45 is charged for each of four assessment courses.

Independent Learning

A practicum and research report are required as the culminating independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants
must apply online. All requested materials must be submitted by the established deadline.

Applicants will receive priority consideration for admission by attending an Information Session with program faculty. Call (407) 823-2401 for meeting dates or visit the program website at https://edcollege.ucf.edu/schpsy/.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A baccalaureate degree in Education, Psychology, or related discipline.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation (one from a faculty member).
- Resumé.
- A one-page goal statement.
- Receive a favorable recommendation for admission by the School Psychology Review Committee.

This program can only accommodate a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met. Admissions to this program will only occur in the fall term. Information concerning specific admissions policies and procedures can be obtained from the program website: http://schpsy.education.ucf.edu/index.cfm. All other questions will be answered during the Information Sessions prospective students are required to attend.

### Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

### Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Master of Fine Arts
Creative Writing MFA

Program Description

The Creative Writing MFA offers a workshop-intensive program in fiction, literary nonfiction, and poetry, emphasizing the art and craft of literary writing and concentrating on the student's written work.

The MFA program emphasizes the study of craft and published writing alongside the closely analyzed production of original work by students. Opportunities for professional development as writers, teachers, and editors abound. Our prolific, dedicated faculty members have won numerous prestigious awards for their work and have served as officers in the Associated Writing Programs (AWP) and other national organizations. The MFA program in Creative Writing offers workshop courses in fiction, literary nonfiction, and poetry, emphasizing the art and craft of literary writing and concentrating on the student's written work.

Curriculum

The minimum total hours required for the Creative Writing MFA is 36 credit hours, including a minimum of nine required credit hours of graduate writing workshop classes. Each candidate will write a book-length creative thesis. There is no nonthesis option in Creative Writing.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Prerequisites and Co-requisites

Students are required to have a proficiency in American and British Literature as reflected by completing at least one survey course in each field. Students with baccalaureate degrees in subjects other than English whose transcripts do not clearly indicate successful completion of such courses will be required to complete survey courses in British and American literature as co-requisites before the thesis defense. The particular courses that satisfy these co-requisites are selected in consultation with the MFA program director.

Required Courses—15 Credit Hours

Core—9 Credit Hours

While students are expected to concentrate their workshop study in the chief genre, multi-genre proficiency is encouraged. Additional credit hours beyond the required 9 credit hours in CRW 6025 Advanced Graduate Writing Workshop are recommended to assist the student in developing better writing and publication skills.

- CRW 6025 - Advanced Graduate Writing Workshop 3 Credit Hours Must be repeated for credit

Specialization—6 Credit Hours

The student will complete two of the following courses:

- LIT 6039 - Studies in Contemporary Poetry 3 Credit Hours
- LIT 6097 - Studies in Contemporary Fiction 3 Credit Hours
- LIT 6076 - Studies in Contemporary Nonfiction 3 Credit Hours
- CRW 5130 - Form and Theory in Creative Writing 3 Credit Hours

Elective Courses—15 Credit Hours

Restricted Electives—6 Credit Hours

- CRW 6720 Professional in Creative Writing 3 Credit Hours (Should be taken during the first semester in the program)
- CRW 6976 - Scholarship and Publication Models 3 Credit Hours
- CRW 6806C - Teaching Creative Writing 3 Credit Hours (Required for teaching assistants who wish to be considered for teaching Creative Writing courses in our undergraduate program.)
- CRW 5938 - Special Topics Seminar 3 Credit Hours
- CRW 5948C - Creative Writing Service Learning 3 Credit Hours
- CRW 6946 - Internship 3 Credit Hours
- CRW 6025 - Advanced Graduate Writing Workshop 3 Credit Hours
Unrestricted Electives—6 Credit Hours

- CRW 5130 - Form and Theory in Creative Writing 3 Credit Hours
- LIT 6216 - Issues in Literary Study 3 Credit Hours
- LIT 6936 - Studies in Literary, Cultural, and Textual Theory 3 Credit Hours
- ENC 5705 - Theory and Practice in Composition 3 Credit Hours
- LIT 6276 - Teaching College Literature 3 Credit Hours

Additional Electives—3 Credit Hours

Thesis—6 Credit Hours

- CRW 6971 Thesis 3 Credit Hours

The candidate will complete a book-length manuscript of publishable quality, written and revised in CRW 6971 Thesis, that meets both departmental and university requirements for the thesis.

Practicum and Internship

Although a practicum or an internship is not required, they are encouraged to better prepare the student for their profession. These courses fulfill the 6-hour requirement in restricted electives and are listed in that category.

- CRW 6946 Internship
  - The Florida Review Internship 3 Credit Hours
  - The Cypress Dome Internship 3 Credit Hours
  - Other Approved Internship 3 Credit Hours
- CRW 5948C - Creative Writing Service Learning 3 Credit Hours

Independent Learning

The creative thesis, a book-length manuscript of original creative work, is the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation (preferably from current or former teachers).
- Statement of background and goals. In the first sentence of your statement, please specify the primary genre of study (fiction, poetry, or literary nonfiction). If you were not an English major, we recommend you include a list (5-7 titles) of recently read contemporary books in the genre in which you are applying.
- Résumé or CV.
- A portfolio of fiction, poetry, or creative nonfiction. The portfolio must be in English and in the applicant's primary genre (up to 15 pages of poetry, 30 pages of fiction, or 30 pages of literary nonfiction). This manuscript is the most important element of a candidate's application. It will be evaluated by a committee of creative writing faculty to assess the candidate's readiness for graduate study. The committee's decision is based upon its qualitative assessment for the manuscript's competence in standard English and originality, and the author's demonstrated potential to succeed in the profession of creative writing.
- At least one survey course in both English and American literature at the university level (may be taken while in graduate residence).

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Emerging Media MFA

Program Description

The Master of Fine Arts in Emerging Media program offers tracks in Animation and Visual Effects, Entrepreneurial Digital Cinema, and Studio Art and the Computer. The MFA is a terminal scholarly and creative degree suitable for those students wishing to pursue careers as professors in higher education or as creative leaders in the industry.

The Animation and Visual Effects track requires 60 credit hours, and the other two tracks require 66 credit hours. Students in all tracks follow a three-year cohort style program (six full-time semesters excluding summers). Degree credit is obtained in theory courses, electives, supervised research, and a thesis project. Student’s progress through the program by taking required classes in particular semesters. Students must remain with their cohort in order to remain in good academic standing and graduate.

The Animation and Visual Effects track is a specialized program designed to emulate the professional studio environment, providing each student with an opportunity to assume an artistic leadership role. The principal emphasis is placed on narrative film structure and the entrepreneurial aspect of animation as related to studio and job creation.

The Entrepreneurial Digital Cinema track is designed for individuals who intend to work directly on the creation of new films and other media products and prepares graduates to teach in colleges and universities. This rigorous professional program is for visual artists and practitioners who demonstrate exceptional artistic and intellectual prowess, and evidence of significant professional promise. The MFA degree produces graduates with mastery of storytelling while allowing for individualized specialization.

The Studio Art and the Computer track provides students an opportunity to inform and enhance their artistic practice using twenty-first-century electronic media. The emphasis on electronic media is pliable enough to encompass the many ways in which technology intersects with contemporary art and design. Students in the program are invited to combine their backgrounds in traditional art- or computer-related disciplines within a conceptually driven, interdisciplinary environment. Courses provide exposure to time-based media, performance art, video art, sound works, kinetic sculpture, computer-based art, and art using the Internet in order to understand how these forms are driving twenty-first-century artistic practice and informing our understanding of contemporary cultural identities.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track within this program. Track(s) may have different application requirements.
Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Emerging Media MFA, Animation and Visual Effects Track

Track Description

Housed in the School of Visual Arts and Design (SVAD), the Emerging Media MFA - Animation and Visual Effects track is a specialized program designed to emulate the professional studio environment, providing each student with an opportunity to assume an artistic leadership role. The principal emphasis is placed on narrative film structure and the entrepreneurial aspect of animation as related to studio and job creation. Courses are designed to give students the ability to understand the collaborative function of a commercial studio, which is necessary in order to prepare students for careers in animation. Labs and studios are equipped with the same industry-standard software and hardware used in professional studios.

Students desiring admission to the Emerging Media MFA - Animation and Visual Effects track should be primarily interested in the opportunity to create or direct their own animation and visual effects. In this program students are encouraged to develop their visual storytelling skills while using a variety of animation and visual effects techniques, including traditional hand-drawn, stop motion, 2D computer, and 3D computer animation.

Applicants should have an undergraduate degree in animation, visual effects, emerging media, art, film, theater, computer science, graphic design, illustration, creative writing, mass communications, game design, or related field and must demonstrate, through a portfolio of work and writing, that they are currently proficient and successful in the area of Animation.

The Emerging Media MFA - Animation and Visual Effects track is a competitive program whereby students receive the best instruction from professors who have had extensive professional industry experience. Drawing on the expertise of the current faculty, graduates are well qualified to enter the teaching and academic professions. SVAD graduates have a competitive edge for greater opportunities within the animation, visual effects, and simulation industry.

Current SVAD alumni work in creating simulations for the U.S. Navy, NASA, DISTI, Lockheed Martin and other local and regional companies. In addition, SVAD alumni are currently working nationally and internationally for major animation and gaming companies such as Walt Disney Animation Studios, Reel EFX, Nickelodeon Animation Studios, Electronic Arts, Riot Games, and Blizzard Entertainment.

Curriculum

The Animation and Visual Effects track in the Emerging Media MFA program is a full-time three-year program (six full-time semesters excluding summers in most instances) and students must progress through the program by taking required classes in particular semesters. The program requires a minimum of 60 credit hours including a thesis project. All courses must be approved by the Graduate Program Director. The thesis consists of producing a short film and thesis document.

Total Credit Hours Required: 60 Credit Hours Minimum beyond the Bachelor's Degree
Graduate students must maintain a 3.0 or better GPA in all course work to complete the program.

**Required Courses: 48 Credit Hours**

- DIG 5439C - Script and Story Development for Animation and Visual Effects 3 Credit Hours
- DIG 5865 - The History of Animation and Visual Effects 3 Credit Hours
- DIG 5386C - Animation and Visual Effects Production I 3 Credit Hours
- DIG 5366C - Animation and Visual Effects Production II 3 Credit Hours
- DIG 5387C - Visual Development and Design for Animation and Visual Effects 3 Credit Hours
- DIG 5378C - Editing for Animation and Visual Effects I: Theory and Production 3 Credit Hours
- DIG 6379C - Editing for Animation and Visual Effects II: Practical Editing 3 Credit Hours
- DIG 6385C - Visual Effects for Animation and Live Action I 3 Credit Hours
- DIG 5388C - Animation and Visual Effects Production III 3 Credit Hours
- DIG 6384C - Directing for Animation and Visual Effects 3 Credit Hours
- DIG 5389C - Animation and Visual Effects Production IV 3 Credit Hours
- DIG 6377C - Visual Effects for Animation and Live Action II 3 Credit Hours
- DIG 6866C - Technical Problem Solving for Animation and Visual Effects 3 Credit Hours
- FIL 5800 - Research Methods in Film and Digital Media 3 Credit Hours
- FIL 6619 - Guerilla Marketing and Models of Distribution 3 Credit Hours

**Thesis: 12 Credit Hours**

The final oral review before the supervisory thesis committee occurs at the end of the sixth semester. At the same time, the graduate student presents a short film production. Students are required to submit an electronic version of the thesis to the UCF College of Graduate Studies. After approval by the UCF College of Graduate Studies, the UCF Library will add it to its archives and make the electronic version of the thesis accessible on the web. The required thesis is created during the independent learning experience in the degree program.

- DIG 6971 - Thesis 12 Credit Hours

**Course Schedule**

The Emerging Media MFA - Animation and Visual Effects track is a full-time, three-year cohort program that requires students to abide by the following course sequence. Students must remain with their cohort in order to remain in good academic standing and graduate.

**Year 1**

**Fall: 12 Credit Hours**

- DIG 5439C - Script and Story Development for Animation and Visual Effects 3 Credit Hours
- DIG 5865 - The History of Animation and Visual Effects 3 Credit Hours
- DIG 5386C - Animation and Visual Effects Production I 3 Credit Hours
- DIG 5366C - Animation and Visual Effects Production II 3 Credit Hours
- DIG 5387C - Visual Development and Design for Animation and Visual Effects 3 Credit Hours
- DIG 5378C - Editing for Animation and Visual Effects I: Theory and Production 3 Credit Hours
- DIG 6379C - Editing for Animation and Visual Effects II: Practical Editing 3 Credit Hours
- DIG 6385C - Visual Effects for Animation and Live Action I 3 Credit Hours
- FIL 5800 - Research Methods in Film and Digital Media 3 Credit Hours

**Spring: 12 Credit Hours**

- DIG 6388C - Animation and Visual Effects Production III 3 Credit Hours
- DIG 6384C - Directing for Animation and Visual Effects 3 Credit Hours
- DIG 6389C - Animation and Visual Effects Production IV 3 Credit Hours
- DIG 6377C - Visual Effects for Animation and Live Action II 3 Credit Hours
- DIG 6866C - Technical Problem Solving for Animation and Visual Effects 3 Credit Hours
- FIL 5800 - Research Methods in Film and Digital Media 3 Credit Hours
- FIL 6619 - Guerilla Marketing and Models of Distribution 3 Credit Hours

**Year 2**

**Fall: 9 Credit Hours**

- DIG 6379C - Editing for Animation and Visual Effects II: Practical Editing 3 Credit Hours
- DIG 6388C - Animation and Visual Effects Production III 3 Credit Hours
- DIG 6377C - Visual Effects for Animation and Live Action II 3 Credit Hours
- DIG 6385C - Visual Effects for Animation and Live Action I 3 Credit Hours
- DIG 5386C - Animation and Visual Effects Production I 3 Credit Hours
- DIG 5366C - Animation and Visual Effects Production II 3 Credit Hours
- DIG 5387C - Visual Development and Design for Animation and Visual Effects 3 Credit Hours
- DIG 5388C - Animation and Visual Effects Production III 3 Credit Hours
- DIG 6384C - Directing for Animation and Visual Effects 3 Credit Hours

**Spring: 9 Credit Hours**

- DIG 6866C - Technical Problem Solving for Animation and Visual Effects 3 Credit Hours

- DIG 6389C - Animation and Visual Effects Production IV 3 Credit Hours
- DIG 6377C - Visual Effects for Animation and Live Action II 3 Credit Hours
- DIG 6365C - Media and Music for Animation and Visual Effects 3 Credit Hours

**Year 3**

**Fall: 9 Credit Hours**

- DIG 6866C - Technical Problem Solving for Animation and Visual Effects 3 Credit Hours
- DIG 6971 - Thesis 6 Credit Hours

**Spring: 9 Credit Hours**

- FIL 6619 - Guerilla Marketing and Models of Distribution 3 Credit Hours
- DIG 6971 - Thesis 6 Credit Hours

**Equipment Fee**

Students in the Emerging Media MFA program pay a $90 equipment fee each semester that they are enrolled.

**Independent Learning**

A thesis is required.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants to the MFA program normally must hold an earned bachelor's degree in one of the areas below or equivalent and must have exhibited, through portfolio of work or writing that they are currently proficient and successful in the area of Animation.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) for each college/university attended.
- A bachelor's degree in one of the following areas or equivalent:
  - Animation
  - Art
  - Emerging Media
  - Film
  - Theatre
  - Computer Science
  - Graphic Design
  - Illustration
  - Creative Writing
  - Mass Communications
  - Game Design
- Statement of purpose: In your own words, submit a 500-to-700 word statement of why you are interested in the Emerging Media MFA -Animation and Visual Effects track and what your intended focus might be. Tell us a little about yourself and professional goals.
- Three letters of recommendation preferably from people who have a personal knowledge of your abilities and scholarship such as educators/faculty members, employment supervisors, organizational leaders or industry professionals with whom you have worked.
- Resume: Please submit a one to two page resume documenting your educational credentials, relevant professional and internship experience, academic achievements, honors, exhibits, publications, memberships, and interest including volunteer work.
- Original Animation/VFX Production Concept for a one to five-minute project:
  - A full storyboard
  - A full script treatment for that storyboard
  - Visual Development drawings of characters, setting, and production design reflecting research and technique
- Other Creative Work:
  - A portfolio of ten to twenty pieces of traditional or digital work.
  - For each item submitted, include the title, media, date of completion, and size or length of piece.
  - Some examples of work that could be submitted include:
    - 2D Design: Painting, drawing, photography, mixed media, fashion design, character design, illustrations, graphic designs, game or film visual development artwork.
    - 3D Design: Sculpture, theatrical design, architectural renderings or models, 3D computer models, and installation pieces.
    - Drawing from life: Human and animal drawings, quick sketches, long poses, and perspective drawing.
    - Time Arts work (less than 3 minutes of work): Animation pieces, flip books, and live action reel.
• Storytelling: Script or fictional narrative writing, sequential art illustration, comic book and graphic novel illustration and writing, book illustrations, and additional storyboards.

• A computer-based score of 230 (or 89 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.

• Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Meeting minimum UCF admission criteria does not guarantee admission to the MFA program. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, the applicant's potential for completing the degree, and the current applicant pool. A strong emphasis is placed on the review of the portfolio of original creative work and the letter of research intent.

Emerging Media MFA, Entrepreneurial Digital Cinema Track

Track Description

The Master of Fine Arts in Emerging Media, Entrepreneurial Digital Cinema track offers students preparation for jobs in the emerging world of digital motion pictures as educators, filmmakers, and business people. The program requires each student to complete a self-financed feature-length film or long-form equivalent body of work as a thesis project.

In addition to an education in the crafts of digital filmmaking (from initial research through postproduction and marketing), the program aims to train entrepreneurs and educators. Class work and independent research combine to educate students in the theory and practices employed by filmmakers in storytelling; how entrepreneurial filmmakers capitalize, manage and sell their work; and how a production team working on a digital motion picture to achieve artistic goals.
Curriculum

The Emerging Media MFA track in Entrepreneurial Digital Cinema is a three-year cohort style program (six full-time semesters excluding summers) and students must progress through the program by taking required classes in particular semesters. The program requires a minimum of 66 credit hours, including 48 required credit hours, 6 elective credit hours, and 12 credit hours devoted to the thesis project. While students may make a thesis film outside the narrative feature film model (i.e., an experimental or documentary film), all MFA candidates are required to take the core and specialized courses that teach the customs and skills required of the narrative model. All thesis projects are self-financed.

Total Credit Hours Required: 66 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—48 Credit Hours

- FIL 5406 - Theories of Film Production 3 Credit Hours
- FIL 5419 - Developing the Film Screenplay 3 Credit Hours
- FIL 5800 - Research Methods in Film and Digital Media 3 Credit Hours
- FIL 6146 - Screenplay Refinement 3 Credit Hours
- FIL 6454 - Microbudget Production Design 3 Credit Hours
- FIL 6596 - Advanced Directing Workshop for Film and Digital Media 3 Credit Hours
- FIL 6644 - Microbudget Pre-Production 3 Credit Hours
- FIL 6649 - Microbudget Post-Production 3 Credit Hours
- FIL 6619 - Guerilla Marketing and Models of Distribution 3 Credit Hours
- FIL 6673 - Arts and Media Entrepreneurship 3 Credit Hours
- DIG 5487 - Principles of Visual Language 3 Credit Hours
- ART 5280 - Serial Content 3 Credit Hours
- ART 5941 - Graduate Practicum I 1 Credit Hours
- ART 6683C - Time Arts 3 Credit Hours
- ART 6930 - Graduate Seminar 1 Credit Hours (to be taken 4 times)
- ART 6942 - Graduate Practicum II 1 Credit Hours
- ARH 5897 - Advanced Seminar in Art History 3 Credit Hours

Elective Courses—6 Credit Hours

Students select a minimum of 6 credit hours of coursework, internship, independent study or directed research from the School of Visual Arts and Design. Alternatively, students may select relevant graduate courses from other units with prior approval from the student's thesis chair.

Thesis—12 Credit Hours

Before undertaking the thesis project, candidates must meet with the thesis advisory committee to submit and discuss the proposed project and obtain the committee's approval. The thesis requires intensive applied learning in order to complete a feature-length project and/or body of work. Additionally, the thesis project has a strong research component both in the initial development phase and in the creation of the distribution and marketing plan for the project. The final stage of the curriculum serves as a bridge to the professional world and supports the entrepreneurial philosophy of the program. The thesis project must be reviewed by the faculty adviser throughout the production process, and meet agreed upon criteria within a stated time frame. Once the thesis project is completed, candidates must have a screening or exhibition of the work, and meet with the thesis advisory committee for final approval and oral defense.

- FIL 6971 - Thesis 12 Credit Hours

Course Schedule

The Emerging Media MFA is a full-time 3-year cohort program that requires students to abide by the following course sequence. Students must remain with their cohort in order to remain in good academic standing and graduate.

Year 1—Complete script and pre-production. Select thesis chair and committee members.

Fall—13 Credit Hours

- ARH 5897 - Advanced Seminar in Art History 3 Credit Hours
- DIG 5487 - Principles of Visual Language 3 Credit Hours
- ART 5941 - Graduate Practicum I 1 Credit Hours
- FIL 6673 - Arts and Media Entrepreneurship 3 Credit Hours
FIL 5419 - Developing the Film Screenplay 3 Credit Hours

Spring—13 Credit Hours

- ART 5280 - Serial Content 3 Credit Hours
- ART 6942 - Graduate Practicum II 1 Credit Hours
- FIL 5800 - Research Methods in Film and Digital Media 3 Credit Hours
- FIL 6146 - Screenplay Refinement 3 Credit Hours
- FIL 5406 - Theories of Film Production 3 Credit Hours

Year 2—Select production methodology, crew, and cast. Schedule production.

Fall—13 Credit Hours

- ART 6683C - Time Arts 3 Credit Hours
- ART 6930 - Graduate Seminar 1 Credit Hours
- FIL 6454 - Microbudget Production Design 3 Credit Hours
- FIL 6619 - Guerilla Marketing and Models of Distribution 3 Credit Hours
- FIL 6644 - Microbudget Pre-Production 3 Credit Hours

Spring—9 Credit Hours

- ART 6930 - Graduate Seminar 1 Credit Hours
- FIL 6596 - Advanced Directing Workshop for Film and Digital Media 3 Credit Hours
- FIL 6649 - Microbudget Post-Production 3 Credit Hours
- FIL 6971 - Thesis (Pre-Production) 2 Credit Hours

Year 3—Complete post-production and enter the marketing/distribution phase.

Fall—9 Credit Hours

- ART 6930 - Graduate Seminar 1 Credit Hours
- FIL 6971 - Thesis (Post-Production) 5 Credit Hours
- ART, DIG or FIL Elective 3 Credit Hours

Spring—9 Credit Hours

- ART 6930 - Graduate Seminar 1 Credit Hours
- FIL 6971 - Thesis (Post-Production) 5 Credit Hours
- ART, DIG or FIL Elective 3 Credit Hours

Equipment Fee

Students in the Emerging Media MFA program pay a $90 equipment fee each semester that they are enrolled.

Independent Learning

A thesis is required. Students may also register for FIL 5944/6946 Internship for elective credit. Central Florida holds many internship opportunities and the program nurtures its relationship with film production companies.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the Admissions, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A BA or BFA in film production is preferred, however, degrees in cinema studies, art, photography, journalism, communications, philosophy, literature and any of the liberal arts are acceptable if accompanied by a strong video portfolio.
- Academic Goal Statement: Applicants must provide an Artist's Statement that reflects the candidate's vision for their feature film or equivalent body of work as well as how this particular project will benefit from graduate-level study and faculty mentorship. The candidate should describe what he or she hopes to gain from attending graduate school, both creatively and academically.
- Essay: Respond to the following prompt in 750 words or less: Robert Bresson's *A Man Escaped*, Jean Luc Godard's *Alphaville*, and Jim Jarmusch's *Stranger Than Paradise* are examples of films that took advantage of production and financial limitations that led to particular and powerful aesthetic choices. Describe how the visual style and aesthetic quality of your proposed thesis film require the limitations of the microbudget production process.
- Portfolio: All applicants must submit a creative portfolio that includes a link to a filmmaking reel that is no longer than 15 minutes in length. The film sample must include at least one complete short film that the applicant has
participated in as a principle creative collaborator (i.e. as writer, director, producer, director of photography, and/or editor). Applicants must provide a document that includes the online link to the film sample, along with (1) the film's title; (2) the applicant's role in the making of the film; and (3) the date the film was completed. All films must be submitted via YouTube, Vimeo, or similar link. When uploading the film sample, please title the submission with your full name, and select "unlisted" as your Privacy choice. Other materials in the portfolio can include but are not limited to, additional screenwriting samples, photography, documentation of work in other media, critical media analysis, and any other materials which reflect the candidate's experience with moving image scholarship and practice.

• Writing Sample: Applicants planning to make a narrative feature-length film should provide a treatment for a proposed feature film, along with a script sample of another work that he/she has written. The applicant does not have to be the author of the script that he/she plans to direct as the thesis film if accepted into the program—students may use a script that is in the public domain and direct his/her interpretation of it, or someone else may write a script that the student will direct. If the applicant proposes making a documentary feature or an experimental film as his/her MFA thesis project, in place of a script, a Film Treatment should be submitted. The Treatment should define the subject of the film and express the filmmaker's intentions regarding approach and style. The length of the treatment should reflect the scope of the project and should comprehensively address three parts:
  o Rationale/Thesis
    This section should address why this topic was selected and why this film should be made. The reasons can be personal, political, social, dramatic, poetic or scientific. This portion of the Treatment justifies the investment of time and energy in the project and it grounds the filmmaker in a context that supports intention, vision, and commitment to the subject and the art. It can also be the place where a "challenge" or a question is stated – one the documentary will address or attempt to answer.
  o Content
    This section should include an outline detailing what the documentary is about and what will be explored and expressed. The filmmaker should address how the film will develop its story and why. This section describes the initial ideas of the filmmaker, recognizing that documentaries can change as the subject is explored. This section should include information about locations and interviews, specifically explaining how they will be integrated into the film as a whole.
  o Approach
    The filmmaker should express the style in which the film will be made and how this style will enhance and express the nature of the subject and the meanings the filmmaker intends to reveal.

• Résumé: Résumé, AND a 250-word biography, that details the applicant's creative and entrepreneurial accomplishments as they relate to professional and/or educational settings.
• This must be uploaded directly to the online application.
• Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Please submit all materials, with the exception of official transcripts, electronically as part of the online application. Applicants may be asked to participate in an admissions interview. Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on the evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, the applicant's potential for completing the degree and the current applicant pool.

**Emerging Media MFA, Studio Art and the Computer Track**

**Track Description**

The Studio Art and the Computer track of the MFA in Emerging Media, provides students an opportunity to inform and enhance their artistic practice using 21st Century electronic media.

This emphasis on electronic media is pliable enough to encompass the many ways in which technology intersects with contemporary art and design.

Students in the program are invited to combine their backgrounds in traditional art or computer-related disciplines within a conceptually driven, interdisciplinary environment. Courses provide exposure to time-based media, performance art, video art, sound works, kinetic sculpture, computer-based art, and art using the Internet in order to understand how these forms are driving 21st century artistic practice and informing our understanding of contemporary cultural identities.

**Curriculum**

The Studio Art and the Computer MFA track is composed of a minimum of 66 credit hours, to be acquired in three years (six full-time semesters excluding summers). Degree credit is obtained in theory courses, studio art courses, electives, and supervised research. All courses must be approved by the Graduate Program Director. The thesis consists of a body of artistic work accompanied by electronic (Internet) documentation and a culminating exhibition.

**Total Credit Hours Required: 66 Credit Hours Minimum beyond the Bachelor’s Degree**

Graduate students must maintain a 3.0 or better GPA in all course work to complete the program. Continuation in the MFA program requires a positive annual evaluation by the Program Director of the School of Visual Arts and Design and by the Graduate Committee of the School of Visual Arts and Design.

**Required Courses: 51 Credit Hours**

- ART 5280 - Serial Content 3 Credit Hours
- ART 5284 - Design Theory and Methods 3 Credit Hours
- ART 5696 - Art, Design and Human Interactions 3 Credit Hours
- ART 5698 - Concourse I 3 Credit Hours
- ARH 5897 - Advanced Seminar in Art History 3 Credit Hours
- ART 5910 - Studio Concentration I 3 Credit Hours should be taken twice for a total of 6 Credit Hours
- ART 5941 - Graduate Practicum I 1 Credit Hours
- ART 6683C - Time Arts 3 Credit Hours
- ART 6687 - Research Concentration I 3 Credit Hours
- ART 6689 - Research Concentration II 3 Credit Hours
- ART 6699 - Concourse II 3 Credit Hours
- ART 6911 - Studio Concentration II 3 Credit Hours should be taken twice for a total of 6 Credit Hours
- ART 6930 - Graduate Seminar 1 Credit Hours
- ART 6942 - Graduate Practicum II 1 Credit Hours
- DIG 5487 - Principles of Visual Language 3 Credit Hours
- DIG 6136 - Design for New Media 3 Credit Hours

**Elective Courses: 9 Credit Hours**

Students should choose from graduate level courses within the School of Visual Arts and Design that are not already required for their program. These courses included those with the following prefixes: ARH, ART, DIG and FIL. If approved by the Graduate Program Director, there are many graduate-level courses in the College of Arts and Humanities that can be used as electives in addition to other graduate courses. These courses must be selected so as to ensure that at least one-half of the courses in the student's plan of study are taken at the 6000 level.
Normally, at least half of the selected electives should be taken within the School of Visual Arts and Design.

A listing of courses offered can be found in the drop-down Catalog Menu at the top of the page under "Courses."

- Electives - 9 Credit Hours

Thesis: 6 Credit Hours

The thesis consists of a body of artistic work accompanied by electronic (Internet) documentation and a culminating exhibition.

The final oral review before the supervisory thesis committee occurs at the end of the sixth semester. At the same time, the graduate student presents a thesis exhibition of selected works from the cumulative body of works produced during his/her three years of residency. In addition, the thesis requires an artist's statement and documentation. The thesis will contain research intentions, results, and the body of the creative works produced. Students are required to submit an electronic version of the thesis to the UCF College of Graduate Studies. After approval by the UCF College of Graduate Studies, the UCF Library will add it to its archives and make the electronic version of the thesis accessible on the web. The required thesis is the independent learning experience in the degree program.

- ART 6971 - Thesis 6 Credit Hours

Course Schedule

The Emerging Media MFA is a full-time 3-year cohort program that requires students to abide by the following course sequence. Students must remain with their cohort in order to remain in good academic standing and graduate.

Year 1

Fall: 13 Credit Hours

- ARH 5897 - Advanced Seminar in Art History 3 Credit Hours
- ART 5284 - Design Theory and Methods 3 Credit Hours

Equipment Fee

Students in the Emerging Media MFA program pay a $90 equipment fee each semester that they are enrolled.
Independent Learning

A thesis is required.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants to the MFA program normally must hold an earned BFA degree in Visual Art from a regionally accredited institution. Applicants who hold an earned BA, BS, or other baccalaureate degree in Visual Art or a related discipline from an accredited university may also apply.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A letter of research intent that is at least a page describing the applicant's creative background, proposed research interests, and the relationship between this program and the applicant's future goals. Research in the context of the MFA program primarily means the full-time creation of an original body of art work over the course of three years of residence.
- Two letters of recommendation preferably from former visual art professors.
- A computer-based score of 230 (or 89 internet-based score) on the Test of English as a Foreign Language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.
- Portfolio of original creative works
  - 20 jpeg images total (1000 pixels longest dimension – 72 dpi) or a 3-minute demo reel for animation portfolios. Please abide by these guidelines.
  - The total portfolio file size must no larger than 2.5 MB. If you are submitting a video file that is larger than 2.5 MB please upload the video to YouTube or Vimeo and provide the link in this section of the application. View YouTube uploading instructions here: http://www.google.com/support/youtube/bin/answer.py?hl=en&answer=57924. When uploading the video, please title the submission with your full name, and select "unlisted" as your Privacy choice.
  - Please upload a document with the link to your portfolio to the application. The link can be from YouTube, Vimeo, DropBox, Google Drive, etc. You may also upload your PDF portfolio directly to the application or submit it via email to svadadvising@ucf.edu.

Meeting minimum UCF admission criteria does not guarantee admission to the MFA program. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, the applicant's potential for completing the degree, and the current applicant pool. A strong emphasis is placed on the review of the portfolio of original creative work and the letter of research intent.

**Theatre MFA**

**Program Description**

The Theatre MFA program is currently not accepting applications for the Design, Musical Theatre, and Acting tracks. Please contact the program for more information.

The Theatre MFA program with tracks in Acting, Design, Musical Theatre, and Theatre for Young Audiences is designed for students who demonstrate the artistic and intellectual capacity and evidence of professional promise to pursue careers in professional and academic theatre.

The program is a highly selective, rigorous, three-year professional training program emphasizing both theatre theory and practice. The MFA degree is rooted in the belief that classroom study and practical experience in the theatre are of equal and complementary value. The production aspect, therefore, is integrated into the curriculum because it is the principal means available for the coordination of all the elements of dramatic art. We seek to pursue all possible ways to fuse production responsibilities with classroom work effectively for the purpose of teaching and training.

Students, in addition to becoming highly trained theatre practitioners, must also demonstrate the ability to understand the conceptual basis of their art and to be able to articulate that understanding to others. Toward this end, the department will recruit and develop graduate students who can serve, along with faculty and staff, as role models for undergraduate students whose BA and BFA programs of study are integrally connected and dependent.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

Theatre MFA, Acting Track

Track Description

We are not accepting applications for Fall 2019. Our next recruitment cycle begins in Spring 2020 for Fall 2020 admission.

The Master of Fine Arts in Theatre offers an Acting track designed for students who demonstrate the artistic and intellectual capacity and evidence of professional promise to pursue careers in professional and academic theatre.

The program is a highly selective, rigorous, three-year professional training program emphasizing both theatre theory and practice. The MFA degree is rooted in the belief that classroom study and practical experience in the theatre are of equal and complementary value. The production program, therefore, is integrated into the curriculum because it is the principal means available for the coordination of all the elements of dramatic art. We seek to pursue all possible ways to use the production program effectively for the purpose of teaching and training.

Students, in addition to becoming highly trained theatre practitioners, must also demonstrate the ability to understand the conceptual basis of their art and to be able to articulate that understanding to others. Toward this end, the department will recruit and develop graduate students who can serve, along with faculty and staff, as role models for undergraduate students whose BA and BFA programs of study are integrally connected and dependent.

Curriculum

The Acting track of the Theatre MFA program requires 47 credit hours of core and specialization courses that follow a suggested yearly schedule in addition to a thesis and an internship. The electives can be chosen (with instructor approval) from existing courses in the MFA tracks in Acting, Musical Theatre, Design, and Theatre for Young Audiences. Because allowed electives are both two- and three-credit-hour courses, the course of study shows a sliding number of credits for electives. Consequently, although the 61 credit hours are required, a student may graduate with as many as 65 credit hours.

Total Credit Hours Required: 61 Credit Hours Minimum beyond the Bachelor's Degree

Students must maintain a minimum "B" (3.0) overall Theatre grade point average to continue in the major. Theatre courses with grades of less than "C" will not be counted toward degree requirements. All Acting program students are required to audition for all fall and spring productions and must accept the roles assigned. A student's continuation in the program is contingent upon a positive annual evaluation. Students must successfully complete internship and thesis requirements. The thesis proposal must be approved in advance.

Of the 61 hours required for the Acting track, the following courses constitute the MFA Graduate Core Curriculum. See the Course Schedule below for an understanding of how the curricular elements are articulated.

Required Courses: 47 Credit Hours

Core: 6 Credit Hours

- THE 5910 - Research Methods in Theatre 3 Credit Hours
- TPP 5087C - Theatre Careers in Performance 3 Credit Hours

Specialization: 41 Credit Hours

Shown below is the suggested course schedule.

Elective Courses

- TPP 6808 - Independent Study 1 credit hour
- TPP 6686 - Playwriting for Young Audiences 3 Credit Hours
- TPP 5246C - Circus Arts 2 Credit Hours
- TPA 5885C - Puppetry 2 Credit Hours
- TPP 5125C - Improvisation Studio 2 Credit Hours
- TPP 5248C - Storytelling as a Theatrical Art Form 2 Credit Hours

Thesis: 6 Credits

- THE 6971 - Thesis 6 Credit Hours

Internship: 8 Credit Hours Minimum

- THE 6948 - Professional Internship 4 Credit Hours
Course Schedule

Year 1

Fall: 11 Credit Hours

- TPP 5156C - Acting Studio I 3 Credit Hours
- TPP 5515 - Movement Studio I 2 Credit Hours
- TPP 5715C - Stage Voice I 2 Credit Hours
- THE 5910 - Research Methods in Theatre 3 Credit Hours
- TPP 5278C - Musical Theatre Lab 1 Credit Hours

Spring: 10 Credit Hours

- TPP 5157C - Acting Studio II 3 Credit Hours
- TPP 5516C - Movement Studio II 2 Credit Hours
- TPP 5716C - Stage Voice II 2 Credit Hours
- THE 5307 - Contemporary Theatre Practice 3 Credit Hours

Year 2

Fall: 10 Credit Hours

- TPP 6146C - Acting Studio III 3 Credit Hours
- TPP 6517 - Movement Studio III 2 Credit Hours
- TPP 6716C - Stage Voice II 2 Credit Hours
- THE 6507 - Dramatic Theory and Criticism 3 Credit Hours

Spring: 12 Credit Hours

- TPP 5087C - Theatre Careers in Performance 3 Credit Hours
- TPP 6518C - Movement Studio IV 2 Credit Hours
- TPP 6718C - Stage Voice IV 2 Credit Hours
- TPP 6267 - Acting Studio IV 2 Credit Hours
- THE 5205 - American Theatre 3 Credit Hours

Year 3

Fall: 9 Credit Hours

- THE 6948 - Professional Internship 4 Credit Hours
- THE 6971 - Thesis 3 Credit Hours
- TPP 6186C - Advanced Scene Study 2 Credit Hours

Spring: 9 Credit Hours

- THE 6948 - Professional Internship 4 Credit Hours
- THE 6971 - Thesis 3 Credit Hours
- TPP 6933 - Acting Studio V 2 Credit Hours

Transfer and Residency

Students who do not hold a master's degree can usually transfer up to nine semester hours into this program. Ordinarily, students holding completed MS or MA degrees will not be admitted into the MFA program. Each case will be evaluated on an individual basis. Final acceptance and number of credits to be transferred will be determined by a graduate faculty committee. A minimum of 51 credits must be taken at the University of Central Florida. A student without an earned master's degree must complete a residency requirement of at least five semesters with at least four of them being full-time, consecutive semesters. Summer session may be counted toward the four consecutive semesters.

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A 3.0 Theatre GPA.
- An essay stating applicant's academic and professional goals.
- Résumé.
- An 8 X 10 headshot.
- Three letters of recommendation.
- An audition.
- Interview.
- Complete the general entrance and area-specific undergraduate prerequisites or their equivalents.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA.
Auditions, Portfolio, and Interview Requirements:

- **MFA Acting** applicants are required to participate in an interview and perform two contrasting monologues. For more details about these requirements, contact the Theatre Department at theatre.cah.ucf.edu.

**General Entrance and Area Specific Prerequisites** - Students applying for entrance into the MFA Programs must have successfully completed the following undergraduate courses or their equivalent:

- **Design** - Script Analysis or Play Analysis, Directing I, Theatre History I and II, Dramatic Literature I and II, Stagecraft I, Stagecraft II, Theatre Drafting, 2D CADD, Scene Design I, Lighting Design I, Costume Construction, Costume Design I.
- **Theatre for Young Audiences** - Script Analysis or Play Analysis, Directing I, Theatre History I and II, Dramatic Literature I and II, as well as experience in some area of theatre and/or education.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on the evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

No part-time students will be admitted into the MFA program.

Theatre MFA, Theatre for Young Audiences Track

Track Description

The Master of Fine Arts in Theatre for Young Audiences track is designed for students who demonstrate the artistic and intellectual capacity and evidence of professional promise to pursue careers in professional and academic theatre.

The program is a highly selective, rigorous, three-year professional training program emphasizing both theatre theory and practice. The MFA degree is rooted in the belief that classroom study and practical experience in the theatre are of equal and complementary value. The production program, therefore, is integrated into the curriculum because it is the principal means available for the coordination of all the elements of dramatic art. We seek to pursue all possible ways to use the production program effectively for the purpose of teaching and training.

Students, in addition to becoming highly trained theatre practitioners, must also demonstrate the ability to understand the conceptual basis of their art and to be able to articulate that understanding to others. Toward this end, the department will recruit and develop graduate students who can serve, along with faculty and staff, as role models for undergraduate students whose BFA programs of study are integrally connected and dependent.

Curriculum

The Theatre for Young Audiences track of the Theatre MFA program requires 6 credit hours of core courses and 26 credit hours of specialization courses to be completed following a yearly schedule in addition to a thesis and an internship. The electives can be chosen (with instructor approval) from existing courses in the MFA tracks in Acting and Theatre for Young Audiences. Because allowed electives are both two- and three-credit-hour courses, the course of study shows a sliding number of credits for electives. Consequently, although 61 credit hours are required, a student may graduate with as many as 65 credit hours. Students earning the degree are expected to demonstrate proficiency in their area of specialization.

Total Credit Hours Required: 61 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—32 Credit Hours

Core—6 Credit Hours

- THE 5910 - Research Methods in Theatre 3 Credit Hours
- THE 6086C - Careers in Professional Theatre 3 Credit Hours

Specialization—26 Credit Hours

- THE 6756 - Methods of Teaching Drama 3 Credit Hours
- THE 5385 - Dramatic Literature for Children 3 Credit Hours
- TPA 5081C - Design Concepts for Youth Theatre 3 Credit Hours
- TPP 5386C - Directing for Young Audiences 3 Credit Hours
- THE 6726 - Advanced TYA Seminar 3 Credit Hours
- TPP 5289C - Acting Methodologies 2 Credit Hours
- THE 6507 - Dramatic Theory and Criticism 3 Credit Hours
- TPP 6216C - Theatre for Young Audiences Tour 3 Credit Hours
- TPP 6247 - Theatre for Social Change 3 Credit Hours

Elective Courses—11 Credit Hours

- TPP 6686 - Playwriting for Young Audiences 3 Credit Hours
- TPP 5246C - Circus Arts 2 Credit Hours
- TPA 5885C - Puppetry 2 Credit Hours
- TPP 5125C - Improvisation Studio 2 Credit Hours
- TPP 5248C - Storytelling as a Theatrical Art Form 2 Credit Hours
- TPP 5935C - Contemporary Practices in Youth Theatre 2 Credit Hours

Thesis—6 Credit Hours

- THE 6971 Thesis 6 Credit Hours

Internship—6-12 Credit Hours

The internship must be a minimum of 6 credits with the option of taking up to 12 credits. If students decide to only take the minimum 6 internship credits, the remaining 6 credits must be taken in the electives area.
Students must maintain a minimum "B" (3.0) overall Theatre grade point average to continue in the major. Theatre courses with grades of less than "C" will not be counted toward degree requirements. A student's continuation in the program is contingent upon a positive annual evaluation. Students must successfully complete an internship, present a written journal documenting their experience and a thesis project. The thesis proposal must be approved in advance.

- THE 6948 - Professional Internship 4 Credit Hours

Examination

A comprehensive departmental Theatre exam is administered to the MFA students in the Theatre for Young Audiences Track at the end of their course work. The department allows two attempts at a comprehensive exam.

Transfer and Residency

Students who do not hold a master's degree can usually transfer up to nine semester hours into this program. Ordinarily, students holding completed MS or MA degrees will not be admitted into the MFA program. Each case will be evaluated on an individual basis. Final acceptance and number of credits to be transferred will be determined by a graduate faculty committee. A minimum of 51 credits must be taken at the University of Central Florida. A student without an earned master's degree must complete a residency requirement of at least five semesters with at least four of them being full-time, consecutive semesters. Summer session may be counted toward the four consecutive semesters.

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Undergraduate degree in Theatre or equivalent.
- A 3.0 Theatre GPA.
- Official, competitive GRE score taken within the last five years.
- Essay stating applicant's academic and professional goals.
- Résumé.
- An 8 X 10 headshot.
- Three letters of recommendation.
- An audition.
- Interview.
- Complete the general entrance and area specific undergraduate prerequisites or their equivalents.

Auditions, Portfolio, and Interview Requirements:

- MFA Theatre for Young Audiences applicants are required to participate in an onsite interview and students must either audition (perform two contrasting monologues, not to exceed three minutes total) or give a creative presentation.

For more details about these requirements, contact the Theatre Department at www.theatre.cah.ucf.edu.

General Entrance and Area Specific Prerequisites—Students applying for entrance into the MFA Programs must have successfully completed the following undergraduate courses or their equivalent:

- Design—Script Analysis or Play Analysis, Directing I, Theatre History I and II, Dramatic Literature I and II, Stagecraft I, Stagecraft II, Theatre Drafting, 2D CADD, Scene Design I, Lighting Design I, Costume Construction, Costume Design I.

- Theatre for Young Audiences—Script Analysis or Play Analysis, Directing I, Theatre History I and II, Dramatic Literature I and II, as well as experience in some area of theatre and/or education.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.
No part-time students will be admitted into the MFA program.

Master

Accounting MSA

Program Description

The Master of Science in Accounting (MSA) degree program prepares individuals for careers as professional accountants and consultants in public accounting, financial institutions, government, industry, and nonprofit organizations.

The MSA degree, along with the appropriate prerequisite work from an undergraduate degree in accounting, satisfies the education requirements to become a licensed CPA in the state of Florida. For information on how this program may prepare you for professional licensure, please visit http://business.ucf.edu/degree/accounting-msa/.

Curriculum

The Master of Science in Accounting (MSA) degree is awarded upon satisfactory completion of a minimum of 30 credit hours, and a final written exit exam. In the total program of study, a minimum of 21 credit hours of the coursework must be completed in accounting/tax courses. Students, with the assistance and approval of the program adviser, may select other courses that reflect their interests and career objectives.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Faculty members in the Kenneth G. Dixon School of Accounting emphasize independent learning in various ways in all courses in the MSA program. Cases and research projects that involve independent work outside the classroom are incorporated into all coursework. The cases and projects are both individual and team prepared. Students are asked to do research that requires they utilize the library, internet, and resources other than the material provided by the professor. The results of independent research activity are presented in either a written report or case analysis or oral presentation. Students work to develop and enhance skills and competencies that will support them professionally throughout their careers. The approaches used in our courses encourage students toward life-long learning.

Foundation Prerequisite Courses

The courses included in the business and accounting foundation core are listed below. An applicant with a recent undergraduate
accounting degree should satisfy most of the core foundation requirements. Other recent related business coursework may partially satisfy these core requirements. The business foundation core is designed for students with a nonbusiness undergraduate degree (e.g., psychology, education, or engineering). The accounting foundation core is designed for students with an undergraduate business degree (e.g., finance, marketing, or management). All business and accounting foundation core deficiencies must be satisfied before graduate MSA coursework can be taken. Before taking any foundation courses, please have your undergraduate transcripts reviewed by the MSA Program Adviser.

Business Foundation Core—21 Credit Hours

- ACG 2021 - Financial Accounting 3 Credit Hours
- ACG 2071 - Managerial Accounting 3 Credit Hours
- ECO 2013 - Macroeconomics 3 Credit Hours
- ECO 2023 - Microeconomics 3 Credit Hours
- ECO 3401 - Quantitative Business Tools I 3 Credit Hours
- ECO 3411 - Quantitative Business Tools II 3 Credit Hours
- FIN 3403 - Business Finance 3 Credit Hours

Accounting Foundation Core—24 Credit Hours

- ACG 3131 - Intermediate Financial Accounting I 3 Credit Hours
- ACG 3141 - Intermediate Financial Accounting II 3 Credit Hours
- ACG 3361 - Cost Accounting I 3 Credit Hours
- ACG 4401 - Accounting Information Systems 3 Credit Hours
- ACG 4651 - Auditing 3 Credit Hours
- ACG 4801 - Accounting Information Systems 3 Credit Hours
- BUL 3130 - Legal and Ethical Environment of Business 3 Credit Hours
- TAX 4001 - Taxation of Business Entities and Transactions 3 Credit Hours

Required Courses—15 Credit Hours

- ACG 6636 - Advanced Auditing 3 Credit Hours
- ACG 6415 - Advanced Accounting Information Systems 3 Credit Hours
- ACG 6805 - Accounting Theory 3 Credit Hours
- ACG 6305 - Advanced Managerial Accounting 3 Credit Hours
- TAX 5015 - Advanced Tax Topics 3 Credit Hours

Elective Courses—15 Credit Hours

Restricted Accounting Elective Courses—6 Credit Hours

- ACG 6255 - International and Multinational Accounting 3 Credit Hours
- ACG 6519 - Governmental and Nonprofit Accounting 3 Credit Hours
- ACG 6675 - Operational Auditing 3 Credit Hours
- ACG 6685 - Fraud Auditing 3 Credit Hours
- ACG 6835 - Ethics and Professionalism in Accounting and Auditing 3 Credit Hours
- ACG 6946 - Graduate Accounting Internship 3 Credit Hours

Restricted Elective Courses—9 Credit Hours

MSA students can take additional ACG courses or TAX courses as restricted electives. Most MBA courses or electives other than ACG 6425 and BUL 6444 may be taken as restricted electives. BUL 5332 - Advanced Business Law Topics is recommended for UCF students with an undergraduate degree in accounting who plan to take the CPA exam. Please note that some of the MBA courses may be restricted to only those students enrolled within a specific MBA track. Up to six hours may be selected from outside the College of Business Administration. Courses outside the College of Business Administration must be selected with the student's area of interest and/or career objectives in mind and with the approval of the program adviser.

Comprehensive Examination

Satisfactory completion of an end-of-program comprehensive written examination is required. The MSA program does not require a thesis.

Additional Program Requirements

Students must maintain a 3.0 GPA in the accounting foundation core. Students must earn a grade of "B-" or higher in any undergraduate course taken after completion of the Bachelor's degree in order for that course to count as a prerequisite in or to fulfill an admissions requirements for the MSA degree.
5000-level courses taken in the undergraduate career that are used to earn the undergraduate accounting degree cannot be transferred into the MSA degree program.

Any student enrolled in a College of Business Administration master's degree program who earns more than two final course grades below a B- will be dismissed from the program and retention plans will not be supported by the College of Business Administration.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
  - GPA in upper-division accounting and tax courses.
- Official, competitive GMAT score taken within the last five years.
- Résumé.
- A computer-based score of 233 (or 91 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Aerospace Engineering

Program Description

The Master of Science in Aerospace Engineering (MSAE) is designed to prepare students for careers as engineers in aerospace.
Students may choose from three tracks: Accelerated BS to MSAE, Space Systems Design and Engineering, and Thermofluid Aerodynamic Systems Design and Engineering.

Curriculum

The MSAE is awarded upon completion of a minimum of 30 credit hours. Students of the program must select a thesis or nonthesis option. All students are expected to identify an adviser and file an official degree program of study prior to the completion of nine semester hours of study. At least one-half of the required credits must be taken at the 6000 level. Students should consult the Graduate Director for assistance.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

The program offers three tracks: Space Systems Design and Engineering, Thermofluid Aerodynamic Systems Design and Engineering, and Accelerated BS to MSAE. Students must be pursuing a track within the discipline. The MSAE is awarded upon completion of a minimum of 30 credit hours, which includes 12 credit hours of required courses, 6 credit hours of specialization, 6-9 credit hours of electives and depending on whether a student selects a thesis or nonthesis option. Thesis option students will be required a minimum of 6 credit hours and nonthesis students will be required to take the course EML 6085 - Research Methods in Mechanical and Aerospace Engineering or EML 6918 Directed Research and make a presentation on a chosen topic before a committee of faculty members.

All students are expected to identify an adviser and file an official degree program of study prior to the completion of nine semester hours of study. At least one-half of the required credits must be taken at the 6000 level. Students should consult the Graduate Director for assistance.

For the Accelerated track, the BSAE is awarded after completion of 71 hours of engineering courses and all other university requirements, and the MSAE is awarded upon completion of the master's program. Courses designated in General Education Program and Common Program Prerequisites are usually completed in the first 60 hours (see engineering major requirements in the Undergraduate Catalog).

A student with an undergraduate degree outside of the selected departmental discipline may be required to satisfy an articulation program. Substitutions to the program of study must meet with the approval of the adviser and the department. More information is available at the department website listed above.

Thesis Option

The thesis option requires 30 credit hours, at least half of which must be at the 6000 level and will include 6 credit hours of thesis credit. A student pursuing the thesis program may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the program of study and the proposed thesis topic.

The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the Events Calendar of the College of Graduate Studies website at least two weeks before the defense date.

Nonthesis Option

The nonthesis option is primarily designed to meet the needs of part-time students and requires 30 credit hours of course work, at least one-half of which must be at the 6000 level. In addition, students pursuing the nonthesis option are required to take EML 6085 - Research Methods in Mechanical and Aerospace Engineering as part of their 30-credit-hour course requirement. For students who are not on campus and upon prior approval from the graduate coordinator, EAS 6918 Directed Research (3 credit hours) may be substituted as the student's independent learning experience. In the case substitution EAS 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research certifying independent learning.

MAE Department Graduate Seminar Requirement

The MAE Graduate seminar is a zero credit hour course (S/U) that is offered each Fall and Spring academic semesters. All MAE graduate students who are pursuing the MSME are required to register, participate, and receive a satisfactory (S) grade for two semesters of MAE Graduate seminar prior to graduation.

Equipment Fee

Students in the Aerospace Engineering MSAE program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.
Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis for the thesis option. The non-thesis option independent learning experience is provided by the required course, EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 credit hours). For students who are not on campus and upon prior approval from the graduate coordinator, EAS 6918 Directed Research (3 credit hours) may be substituted as the student's independent learning experience. In the case substitution EAS 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research certifying independent learning.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's degree in Aerospace Engineering or closely related discipline.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the MMAE graduate program director for further information.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Program Tracks

- Aerospace Engineering MSAE, Accelerated BS to MSAE Track
- Aerospace Engineering MSAE, Space Systems Design and Engineering Track
- Aerospace Engineering MSAE, ThermoFluid Aerodynamic Systems Design and Engineering Track
Aerospace Engineering
MSAE, Accelerated BS to MSAE Track

Track Description

The Accelerated BS to MS track in the Aerospace Engineering MSAE program allows highly qualified undergraduate students in Aerospace Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program. Participation will enable completion of the Bachelor of Science and Master of Science degrees in five instead of six years for students enrolled in full-time course work.

Curriculum

The BSAE is awarded after completion of 128 total undergraduate student credit hours including 71 hours of engineering courses and all other university requirements, and the MSAE is awarded upon completion of the master's program. Courses designated in General Education Program and Common Program Prerequisites are usually completed in the first 60 hours (see engineering major requirements in the Undergraduate Catalog).

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Up to 12 credit hours of approved 5000- and 6000-level courses of grades "B" (3.0) or better may be counted toward the BS and MS degrees. Additional notes on the Accelerated Undergraduate and Graduate Program in Aerospace Engineering:

- Students who change degree programs and select this major must adopt the most current catalog.
- Students must earn at least a "B" (3.0) in each undergraduate and graduate engineering course for them to be counted toward the major.

Undergraduate Requirements

Please see the current edition of the Undergraduate Catalog and the College of Engineering website listed above for additional information about academics and accelerated programs.

Graduate Requirements

For thesis option students, at least 18 credit hours beyond the 12 credit hours counted toward the undergraduate degree are required and must include 6 credit hours of thesis (EAS 6971); for the nonthesis option, the 18 credit hours need to include either EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 credit hours) or EML 6918 Directed Research (3 credit hours). The remaining credit hours can be selected from courses from other tracks. Accelerated Aerospace students must declare their interest in either the Space Systems Design and Engineering Track or the Thermofluid Aerodynamic Systems Design and Engineering Track by completing a Program of Study with their adviser.

Students must register for the seminar course a minimum of two times during their graduate career in the master's program (thesis option). The students must also complete the course with a satisfactory (S) grade in both attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.

Additionally, all students pursuing the thesis option must enroll in the following course:

- EML 5936 - Mechanical and Aerospace Seminar 0 Credit Hours

Equipment Fee

Students in the Aerospace Engineering MSAE program pay a $90 equipment fee each semester that they are enrolled.

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis or EML 6085 - Research Methods in Mechanical and Aerospace Engineering. The nonthesis option independent learning experience is provided by the required course EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 credit hours). For students who are not on campus and upon prior approval from the graduate coordinator, EAS 6918 Directed Research (3 credit hours) may be substituted as the student's independent learning experience. In the case substitution EAS 6918 is approved, a
A letter must be provided by the member of the faculty supervising the directed research certifying independent learning.

### Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The **Accelerated BS to MS program** in Aerospace Engineering allows highly qualified University of Central Florida undergraduate majors in Aerospace Engineering to begin taking graduate level courses that will count toward their master’s degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year directly through the College of Engineering and Computer Science. If accepted, students will complete the University Graduate application when they are ready to enroll as a full-time graduate student. If the student has a degree in the discipline, but were not previously part of this accelerated program, then they should apply to either the **Space Systems Design and Engineering or Thermofluid Aerodynamic Systems Design and Engineering Track** instead. Additional information about this track may be located at: [http://www.cecs.ucf.edu/current-students/bs-ms-program/](http://www.cecs.ucf.edu/current-students/bs-ms-program/).

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening ([www.cecs.ucf.edu/prescreen](http://www.cecs.ucf.edu/prescreen)) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's degree in Aerospace Engineering or closely related discipline.
- Résumé.
- Statement of educational, research, and professional career objectives.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the MMAE graduate program director for further information.

Aerospace Engineering
MSAE, Space Systems Design and Engineering Track

Track Description

The Master of Science in Space Systems Design and Engineering (MSAE) is designed to prepare students for careers as engineers in aerospace. The program includes the fields of controls and dynamics, space environment, instrumentation and communications, structures and materials, thermal analysis, and design.

Curriculum

The MSAE is awarded upon completion of a minimum of 30 credit hours, including 12 credit hours of required courses, 12 credit hours of elective courses selected from an approved list of courses, and an additional 6 credit hours in either a thesis or nonthesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

All students must identify an adviser and file an official degree program of study prior to the completion of 9 credit hours of study. The program of study must be approved by the department and therefore students should consult with the MMAE Graduate Director for assistance in filling out their program of study.

A student with an undergraduate degree outside of the selected departmental discipline may also be required to satisfy an articulation program. Substitutions to the program of study must meet with the approval of the adviser and the department.

Prerequisites (or equivalent)

- MAP 2302 - Differential Equations
- EML 3034C - Modeling Methods in Mechanical and Aerospace Engineering
- EAS 4134 - High-Speed Aerodynamics
- EAS 4105 - Flight Mechanics or EAS 4400 - Spacecraft Attitude Dynamics
- EAS 4200 - Flight Structures or EAS 4210 Space Structural Dynamics

Required Courses—12 Credit Hours

- EML 5060 - Mathematical Methods in Mechanical and Aerospace Engineering 3 Credit Hours
- EML 5271 - Intermediate Dynamics 3 Credit Hours
- EML 5311 - System Control 3 Credit Hours

Select one of the following courses:

- EML 5152 - Intermediate Heat Transfer 3 Credit Hours
- EML 5237 - Intermediate Mechanics of Materials 3 Credit Hours
- EML 5713 - Intermediate Fluid Mechanics 3 Credit Hours

Elective Courses—12 Credit Hours

All students, both thesis and nonthesis, must complete at least 12 credit hours of electives. The following list are suggested electives to be taken in the program of study.

- EAS 6403C - Attitude Determination and Control 3 Credit Hours
- EAS 6415 - Guidance, Navigation and Control 3 Credit Hours
- EEL 6616 - Adaptive Control 3 Credit Hours
- EEL 6621 - Nonlinear Control Systems 3 Credit Hours
- EML 5152 - Intermediate Heat Transfer 3 Credit Hours
- EML 5713 - Intermediate Fluid Mechanics 3 Credit Hours
- EML 6211 - Continuum Mechanics 3 Credit Hours
- EML 6223 - Advanced Vibrational Systems 3 Credit Hours
- EML 5237 - Intermediate Mechanics of Materials 3 Credit Hours
Thesis Option—6 Credit Hours

The thesis option requires 30 credit hours, at least half of which must be at the 6000 level and will include 6 credit hours of thesis credit. A student pursuing the thesis program may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the program of study and the proposed thesis topic.

Students must register for the course a minimum of two times during their graduate career in the master's program (thesis option). The students must also complete the course with a satisfactory (S) grade in both attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.

- EAS 6971 Thesis 6 Credit Hours

Additionally, students pursuing the thesis option must enroll in the following course:

- EML 5090 - Mechanical and Aerospace Seminar 0 Credit Hours

Nonthesis Option—6 Credit Hours

The nonthesis option is primarily designed to meet the needs of part-time students and requires 30 credit hours of course work, at least one-half of which must be at the 6000 level. Students pursuing the nonthesis option are required to take one additional elective and take either EML 6085 - Research Methods in Mechanical and Aerospace Engineering (or XXX 6918 Directed Research, with approval)* as part of their 30-credit-hour course requirement.

*For students who are not on campus and upon prior approval from the graduate coordinator, XXX 6918 Directed Research (3 credit hours) may be substituted as the student's independent learning experience. If the substitution of XXX 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research certifying independent learning.

EML 6085 and XXX 6918 fulfill the independent learning requirement and either course is required for nonthesis students.

Independent Learning

The independent learning requirement is met by successful completion of a master's thesis for the thesis option. The nonthesis option independent learning experience is provided by the required course, EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 credit hours). For students who are not on campus and upon prior approval from the graduate coordinator, XXX 6918 Directed Research (3 credit hours) may be substituted as the student's independent learning experience. If the substitution of XXX 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research certifying independent learning.

Application Requirements

Aerospace Engineering MSAE, Thermofluid Aerodynamic Systems Design and Engineering Track

Track Description

The Thermofluid Aerodynamics Systems Design and Engineering track in the Aerospace Engineering MSAE program is designed to prepare students for careers as engineers in aerospace. The program includes the fields of controls and dynamics, aerodynamics, propulsion, thermal analysis, and design.

Please note: This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.
UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Curriculum

The MSAE is awarded upon completion of a minimum of 30 credit hours, including 12 credit hours of required courses, 12 credit hours of elective courses selected from an approved list of courses, and an additional 6 credit hours in either a thesis or nonthesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

All students must identify an adviser and file an official degree program of study prior to the completion of 9 credit hours of study. The program of study must be approved by the department and therefore students should consult with the MMAE Graduate Director for assistance in filling out their program of study. Both thesis and nonthesis options require 30 credit hours of courses and at least half of the credit hours in the program of study must be at the 6000 level.

A student with an undergraduate degree outside of the selected departmental discipline may be required to satisfy an articulation program. Substitutions to the program of study must meet with the approval of the adviser and the department.

Prerequisites (or equivalent)

- MAP 2302 - Differential Equations
- EML 3034C - Modeling Methods in Mechanical and Aerospace Engineering
- EAS 4134 - High-Speed Aerodynamics
- EAS 4105 - Flight Mechanics or
- EAS 4400 - Spacecraft Attitude Dynamics
- EAS 4200 - Flight Structures or
- EAS 4210 Space Structural Dynamics

Required Courses—12 Credit Hours

- EML 5060 - Mathematical Methods in Mechanical and Aerospace Engineering 3 Credit Hours
- EML 5152 - Intermediate Heat Transfer 3 Credit Hours
- EML 5713 - Intermediate Fluid Mechanics 3 Credit Hours

Select one of the following courses:

- EML 5237 - Intermediate Mechanics of Materials 3 Credit Hours
- EML 5271 - Intermediate Dynamics 3 Credit Hours
- EML 5311 - System Control 3 Credit Hours

Elective Courses—12 Credit Hours

All students, both thesis and nonthesis, must complete at least 12 hours of electives from the list below after conferring with their adviser.

- EAS 5123 - Intermediate Aerodynamics 3 Credit Hours
- EAS 6185 - Turbulent Flow 3 Credit Hours
- EAS 5315 - Rocket Propulsion 3 Credit Hours
- EML 5713 - Intermediate Fluid Mechanics 3 Credit Hours
- EML 6131 - Combustion Phenomena 3 Credit Hours
- EML 6725 - Computational Fluid Dynamics and Heat Transfer I 3 Credit Hours
- EAS 5302 - Direct Energy Conversion 3 Credit Hours
- EAS 6807C - Aerospace Measurements Instrumentation 3 Credit Hours
- EML 6124 - Two-Phase Flow 3 Credit Hours
- EML 6726 - Computational Fluid Dynamics and Heat Transfer II 3 Credit Hours
- EML 6154 - Conduction Heat Transfer 3 Credit Hours
- EML 6157 - Radiation Heat Transfer 3 Credit Hours
- EML 6211 - Continuum Mechanics 3 Credit Hours
- EML 5237 - Intermediate Mechanics of Materials 3 Credit Hours
- EML 5532C - Computer-Aided Design for Manufacture 3 Credit Hours
- EML 5546 - Engineering Design with Composite Materials 3 Credit Hours
- EML 6547 - Engineering Fracture Mechanics in Design 3 Credit Hours

Thesis Option—6 Credit Hours

The thesis option requires 6 credit hours of thesis in addition to the required and elective courses listed above. A student pursuing the thesis program may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the program of study and the proposed thesis topic.

Students must register for the seminar course a minimum of two times during their graduate career in the master's program (thesis
option). The students must also complete the course with a satisfactory (S) grade in both attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.

- EAS 6971 - Thesis 6 Credit Hours

Additionally, all students pursuing the thesis option must enroll in the following course:

- EML 5090 - Mechanical and Aerospace Seminar 0 Credit Hours

Nonthesis Option—6 Credit Hours

The nonthesis option is primarily designed to meet the needs of part-time students and requires one additional elective and EML 6085 - Research Methods in Mechanical and Aerospace Engineering (or XXX 6918 Directed Research, with approval)* as part of their 30-credit-hour course requirement.

* For students who are not on campus and upon prior approval from the graduate coordinator, XXX 6918 Directed Research (3 credit hours) may be substituted as the student's independent learning experience. If the substitution of XXX 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research.

EML 6085 (or XXX 6918) fulfills the independent learning requirement for nonthesis students.

- Elective 3 Credit Hours
- EML 6085 - Research Methods in Mechanical and Aerospace Engineering 3 Credit Hours

Equipment Fee

Students in the Aerospace Engineering MSAE program pay a $90 equipment fee each semester that they are enrolled.

Independent Learning

The independent learning requirement is met by successful completion of a master's thesis for the thesis option. The nonthesis option independent learning experience is provided by the required course EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 credit hours). For students who are not on campus and upon prior approval from the graduate coordinator, XXX 6918 Directed Research (3 credit hours) may be substituted as the student's independent learning experience. If the substitution of XXX 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research certifying independent learning.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's degree in Aerospace Engineering or closely related discipline.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.
Additional courses may be required to correct deficiencies. Students should contact the MMAE graduate program director for further information.

For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Anthropology MA

Program Description

The Department of Anthropology offers a graduate program leading to the Master of Arts degree in Anthropology. The course work in this program is conceptually four-field, with faculty strengths in archaeology, cultural anthropology, and physical anthropology. Students are admitted to the program by a graduate faculty advisor (visit the Faculty Page for the UCF Department of Anthropology) and can choose to pursue a thesis or non-thesis option. A graduate plan of study dependent on the student's interests will be individually developed with his or her graduate faculty advisor. Students in the program are prepared to enter doctoral programs or begin professional careers following the MA degree.

Degree-seeking students in the Anthropology MA program may elect to follow either a thesis or non-thesis plan of study. Each plan of study requires a minimum of 30 credit hours, 15 of which must be at the 6000-level. The thesis option is designed for students who plan to enter doctoral programs, while the non-thesis option is more appropriate for students entering or continuing profession careers following the MA degree. Students that focus on archaeology and want to become a Registered Professional Archaeologist should pursue the thesis option.

Students must receive a commitment from a graduate faculty advisor for admission into the program. The anthropology faculty conduct research in many geographical areas including Bolivia, Caribbean, Colombia, Egypt, Europe, Guatemala, Mexico, Peru, Philippines, Turkey and the United States. The department also has multiple research facilities on the Orlando campus that including the following: an archaeology lab specializing in lithic and ceramic analysis, a physical anthropology lab specializing in craniofacial 3D imaging, a forensic anthropology lab, a paleoethnobotany archaeology lab, a bioarchaeological sciences lab, and an interdisciplinary geospatial science lab. Students may have the opportunity to conduct research projects in the various countries or research facilities as part of their program.
Degree-seeking students in the Anthropology MA program may elect to follow either a thesis or a nonthesis program of study.

The thesis option is designed for students who plan to enter doctoral programs, while the nonthesis option is more appropriate for students entering or continuing professional careers following the MA degree. Both options require 30 hours of course work, of which half must be at the 6000 level.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree**

The MA degree is conferred when students have fulfilled the requirements of either the thesis or nonthesis option. No graduate credit will be given for any grade lower than a B- (2.75), but the grade will be counted toward the GPA. Courses may be retaken to achieve a better grade; however, the unsatisfactory grade will remain on the transcript since there is no grade forgiveness at the graduate level. In order to stay in good academic standing, students must maintain a minimum Graduate Status GPA of 3.0 in all coursework taken since entering graduate status and a 3.0 in their program of study.

Upon acceptance into the program, students will be assigned a faculty adviser. Together the students and their advisers will determine the student's preliminary program of study, either in the thesis or nonthesis option. Students should maintain close contact with their faculty adviser in order to develop a viable program of study and avoid graduation delays.

Research studies are required in the required courses, and at the conclusion of all coursework, an assessment of students independent research projects and papers is completed. The research study will focus on reviewing and analyzing contemporary research in a particular specialization within anthropology in order to help students acquire knowledge and skills pertaining to research-based best practices in that specialization area.

**Required Courses—12 Credit Hours**

These courses provide an in-depth understanding of the epistemological foundations of the discipline. Students are introduced to the theory and practice of anthropology at a level of synthesis that will prepare them for future doctoral study should they wish to pursue it. These courses also establish the foundations of understanding that will prepare students for nonacademic careers that employ anthropological perspectives and knowledge.

- ANG 6110 - Archaeological Theory and Method 3 Credit Hours
- ANG 6587 - Seminar in Biological Anthropology 3 Credit Hours
- ANG 6930 - Seminar in Cultural Anthropology 3 Credit Hours
- ANG 6002 - Proseminar in Anthropology 3 Credit Hours

**Elective Courses—12 Credit Hours**

A minimum of 12 additional credit hours must be selected from the list below in conjunction with the faculty advisor and/or the advisory committee members and approved by the program graduate coordinator. With prior approval, the student may take one elective (3 credit hours) in another department. Additional electives may be selected as they become available.

Under special circumstances, students may enroll in a graduate-level Directed Independent Study course or a Directed Independent Research course to fulfill their non-required elective course requirements. These courses, like most graduate seminars, require written research reports. Enrollment in these courses requires written approval from the student's adviser. No more than 6 hours of graduate-level courses in Directed Independent Study or Directed Independent Research may be included in a student's program of study.

- ANG 5166 - Problems in Maya Studies 3 Credit Hours
- ANG 5167 - Maya Hieroglyphs 3 Credit Hours
- ANG 5228 - Maya Iconography 3 Credit Hours
- ANG 5486 - Quantitative Research in Anthropology 3 Credit Hours
- ANG 5742 - Problems in Forensic Anthropology 3 Credit Hours
- ANG 5525C - Human Osteology 4 Credit Hours
- ANG 6520C - Advanced Human Osteology 3 Credit Hours
- ANG 5822 - Maya Field Research 3 Credit Hours
- ANG 5272 - Culture, Inequality and Global Development 3 Credit Hours
- ANG 5307 - Peoples and Cultures of Latin America 3 Credit Hours
- ANG 5301 - Anthropology of Tourism 3 Credit Hours
- ANG 5531 - Nutritional Anthropology 3 Credit Hours
- ANG 5620 - Language and Culture 3 Credit Hours
- ANG 5738 - Advanced Medical Anthropology 3 Credit Hours
- ANG 6168 - The Ancient Maya 3 Credit Hours
• ANG 6821 - Forensic Archeology Field Methods 3 Credit Hours
• ANG 6181C - GIS Applications in Anthropology 3 Credit Hours
• ANG 6324 - Contemporary Maya 3 Credit Hours
• ANG 6701 - Public and Applied Anthropology 3 Credit Hours
• ANG 6801 - Ethnographic Research Methods 3 Credit Hours

Thesis Option—6 Credit Hours

The thesis and oral defense are the culmination of the course work for those students who have elected the thesis option. Students electing to write a thesis must select a Thesis Advisory Committee. The student's faculty adviser will chair the Thesis Advisory Committee. The committee will consist of three members. All members must be approved graduate faculty as cited in the most current UCF Graduate Catalog. Qualified individuals from outside the Department and also the University of Central Florida may be eligible to serve as the third member of Thesis Advisory Committees. The committee needs to be established prior to enrolling in thesis hours.

Students may enroll in thesis hours after they have successfully completed the four required courses. When a topic has been selected, students, in conjunction with their faculty adviser, will develop a thesis proposal. Copies of the proposal will be routed to members of their thesis committee and a proposal hearing scheduled. All students must pass a proposal hearing as well as a final oral defense of their thesis. Students who elect to write a thesis should become familiar with the university's requirements and deadlines for organizing and submitting the thesis. The thesis option is highly recommended for students interested in graduate work beyond the Master of Arts degree.

The completion of the thesis must be followed by an oral defense before the Thesis Advisory Committee. A successful format review, oral defense, and electronic submission of the thesis to the College of Graduate Studies for review completes the program requirements. Students are required to follow all procedures and timetables specified by the College of Graduate Studies.

• ANG 6971 - Thesis 6 Credit Hours
• Successful Oral Defense of Thesis

Nonthesis Option—6 Credit Hours

Students selecting the nonthesis option take an additional 6 hours of elective course work for a total of 18 credit hours of electives.

Electives 6 Credit Hours

Comprehensive Examination

At the conclusion of course work, nonthesis students will be given a comprehensive examination. In consultation with the faculty adviser, two additional faculty members shall be selected to serve on the Examination Committee that will be chaired by the faculty adviser. This committee must be selected by the semester prior to the semester in which the student will take the exam. The comprehensive examination will consist of two phases. The first phase requires the student to write three (3) papers to answer a question from each member of their Examination Committee. Each paper will be 7-10 pages in length and will be due one week (7 days) from the date the student is provided the questions. The second phase will be a 90 minute comprehensive oral examination with two formal rounds of questions from the Examination Committee. A successful comprehensive examination completes the requirements for the degree. Students are required to follow all procedures and timetables specified by the College of Graduate Studies. The examination will be based on the course work in the student's program of study. Students must notify the department's graduate program director in writing of their intent to take the exam at least one week before the date fixed for the examination. A committee composed of three faculty members will conduct the examination. The grading system for the examination is as follows: 1) Pass with Distinction, 2) Pass, 3) Conditional Pass, and 4) Fail. Students who receive a grade of Conditional Pass will be required to complete additional work as determined by the grading committee. Students who fail must retake the exam. Failure to pass the examination on the second attempt will result in dismissal from the program. Students who indicate their intent to take the examination but do not take the exam will be awarded a failing grade.

Independent Learning

Students who choose the thesis option will gain independent learning experiences through their thesis research where they are expected to design and conduct their own research which culminates with the writing and defense of their thesis. Students will also gain this experience through their core course requirements as each course contains an independent research assignment. Students in the nonthesis option will gain independent learning experiences through all of their core courses, all of which contain an independent research component.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admission section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years. The program's preferred minimum score is 300 on the GRE revised General Test.
- Personal statement of intent that must include the student's research interest, geographical area of interest, faculty they would like to work with, and future career plans (500 words).
- Contact with a potential advisor is recommended prior to application. Advisors are unable to grant admission to applicants prior to all application materials being submitted and reviewed by the department.
- Three letters of recommendation that assess the applicant's potential as a graduate student. These letters should come from the applicant's previous professors and should not be more than 12-months old at the time of application.

The applicant's record will be reviewed on an individual basis and evaluated to assess the applicant's potential for success in the program. Students will be selected for the program on a competitive basis. Supplemental course work may be recommended for students who do not have a degree in anthropology or are missing key undergraduate course work.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program to the applicant's career/academic goals, availability and match to a faculty adviser, and the applicant's potential for completing the degree. There is no automatic connection between acceptance as a non-degree-seeking student and acceptance into this degree-granting program. Please consult the graduate program director whenever questions arise.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Applied Learning and Instruction MA ►

Program Description

The Master of Arts in Applied Learning and Instruction program is designed for students from diverse academic majors who have an interest in the application of psychological theories and research to improving learning, instruction, and training in a variety of instructional contexts.

Graduates of the program will be prepared for a wide range of professional education, government, and industry positions, and for conducting activities such as instruction, training, evaluation, and consulting.

Students are able to tailor the program to meet their particular needs and interests by choosing among a large variety of courses for their concentration, including courses in teaching, instructional design, program evaluation, and psychological foundations. Courses are available in mixed mode (M) or fully online (W). The degree can be completed in the fully online mode.

Specialization and core courses are offered in the areas of the psychology of teaching and learning, motivation, human development, measurement, and research methodology. Both a thesis and a non-thesis option are available. All students will be required to complete a comprehensive examination before completing the program.

Applications are accepted only for Fall admission. There are no Spring or Summer applicants accepted.

Please note: This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Curriculum

The Applied Learning and Instruction MA (ALIMA) program requires a minimum of 33 credit hours beyond the bachelor's degree including 15 credit hours of core courses, 12 credit hours of specialization, and 6 credit hours of a research component. The research component can be completed by choosing the thesis or nonthesis option, which requires a 6 credit hour Capstone research course. The program of study can be tailored to meet the specific needs of each student. The degree program can be completed in mixed mode (M) or fully online (W) formats.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

In addition to the course work, students are expected to meet the Continuous Attendance policy for graduate students. Please see the Continuous Attendance and Special Leave of Absence policies in the Graduate Catalog.

Required Courses—27 Credit Hours

Core—15 Credit Hours

- EDF 6481 - Fundamentals of Graduate Research in Education 3 Credit Hours
- EDP 6213 - Seminar in Applied Learning and Instruction I 3 Credit Hours
- EDP 6217 - Seminar in Applied Learning and Instruction II 3 Credit Hours
- EDF 6216 - Motivation in Learning and Performance 3 Credit Hours
- EDF 6155 - Lifespan Human Development and Learning 3 Credit Hours

Specialization—12 Credit Hours

Students have the choice of taking specialization courses in multiple areas. Specialization courses may be taken within one specialization, or from multiple specializations. The purpose of this choice is to provide course offerings which appeal to student interest, but concurrently facilitate depth of knowledge in a particular discipline.

The student, program director and student advisers together determine a course of study to meet the student's needs while simultaneously developing core knowledge in a specific area with the adviser's approval. In addition, the adviser may approve courses taken as part of a UCF certificate program for this area of the MA (up to 12 credit hours). The adviser must approve all specialization courses.
### Psychological Foundations

Other electives to be determined by adviser with program approval.

- DEP 5057 - Developmental Psychology 3 Credit Hours
- EDF 6259 - Learning Theories Applied to Leadership in Teaching Practice 3 Credit Hours
- EDF 6141 - Human Intelligence 3 Credit Hours
- SPS 6225 - Behavioral and Observational Analysis of Classroom Interactions in Schools 3 Credit Hours
- SPS 6700 - Advanced Psychoeducation and Data-Based Decision Making 3 Credit Hours
- EGC 6431 - Guiding Human Relationships I 3 Credit Hours
- EGC 6432 - Guiding Human Relationships II 3 Credit Hours

### Business/Training

Other electives to be determined by adviser with program approval.

- INP 6317 - Work Motivation and Job Attitudes 3 Credit Hours
- PSY 6216C - Research Methodology 4 Credit Hours
- MAN 6245 - Organizational Behavior and Development 3 Credit Hours
- MAN 6285 - Change Management 3 Credit Hours

### Instructional Design

Other electives to be determined by adviser with program approval.

- EME 6607 - Planned Change in Instructional Technology 3 Credit Hours
- EME 6602 - Integration of Technology into the Learning Environments 3 Credit Hours
- EME 6601 - Instructional Simulation Design for Training and Education 3 Credit Hours
- EME 6457 - Distance Education: Technology Process Product 3 Credit Hours
- EME 6613 - Instructional System Design 3 Credit Hours
- EME 6405 - Adapting and Integrating Innovative Technologies in Education 3 Credit Hours
- EME 6614 - Instructional Game Design for Training and Education 3 Credit Hours
- EME 6705 - Administration of Instructional Systems 3 Credit Hours
- EME 6055 - Current Trends in Instructional Technology 3 Credit Hours

### Teaching

Other electives to be determined by adviser with program approval.

- EDF 6237 - Principles of Learning and Introduction to Classroom Assessment 3 Credit Hours
- EDF 6727 - Critical Analysis of Social, Ethical, Legal, and Safety Issues Related to Education 3 Credit Hours
- EDG 6415 - Principles of Instruction and Classroom Management 3 Credit Hours
- EDF 6233 - Introduction to Action Research and Analysis of Classroom Practice 3 Credit Hours
- ESE 6217 - Curriculum Design 3 Credit Hours
- EME 5053 - Electronic Resources in Education 3 Credit Hours

### Program Evaluation

Other electives to be determined by adviser with program approval.

- EDF 6401 - Statistics for Educational Data 3 Credit Hours
- EDF 6432 - Measurement and Evaluation in Education 3 Credit Hours
- EDG 6285 - Evaluation of School Programs 3 Credit Hours
- ESE 6416 - Curriculum Evaluation 3 Credit Hours

### Thesis Option—6 Credit Hours

- EDF 6971 - Thesis 6 Credit Hours

### Steps for Completing a Master's Thesis

1. Submit a 2–3 page thesis prospectus and preliminary bibliography on a topic to their thesis adviser. Prior to enrollment into thesis credit hours, the student will identify a Thesis Committee to be further approved by the College Graduate Dean and the College of Graduate Studies. This committee is chaired by the adviser and includes two or more additional faculty members from the School of Teaching, Learning, and Leadership (minimum of 3 committee members required).
2. The formal thesis is initiated by the preparation of a proposal that meets both departmental and university
requirements for the thesis. The members of the student's thesis committee review the proposal as the preliminary step to beginning the thesis. Students are responsible for sending their proposal to all committee members at least three weeks before the end of the semester. This committee must approve the Thesis Proposal before academic credit can accrue.

3. Once the proposal is approved by both the committee and the UCF Institutional Review Board, students should begin collecting and analyzing their data. Students should expect to defend their proposal during the semester in which they are enrolled for thesis credits.

4. The thesis is a formal written document. The introduction cites similar, related, and antecedent work. The body explains the purposes of the project, the method of its production, and any evaluation that was performed. The conclusion includes plans for future work. The thesis also includes an archival copy of the resulting creative product. Both the thesis and the creative product must be delivered in digital form, acceptable by the College of Graduate Studies and UCF library according to standards for digital dissertations and theses.

Nonthesis Option—6 Credit Hours

Six credit hours of Capstone coursework is required to give the student a foundation in conducting research.

- EDP 6936 - Capstone in Applied Learning and Instruction 1-6 Credit Hours

Scholarly Product Requirement (Review 1)

Before the end of three years in the ALIMA program, students are required to submit evidence of their ability to conduct a scholarly examination of research in a chosen area in the field of educational psychology. They will demonstrate this ability by producing a scholarly review of literature to present a thorough overview of research surrounding a particular problem involving learning and/or instruction. As part of the review, students will present a list of research and theory-based potential solutions to the identified problem. This project will be introduced in the Seminar in Applied Learning and Instruction I and completed the following semester in Seminar in Applied Learning and Instruction II.

Comprehensive Exams (Review II)

The comprehensive exams serve as the culminating experience of the ALIMA program. The comprehensive exam must be completed no later than 30 days before the end of the semester in which the student graduates.

Nonthesis Option

For students electing not to write a thesis, the comprehensive exam will consist of three questions. The student will have one week to answer the questions in a take-home, extended essay file format. Students must cite all instances where their ideas are directly or indirectly related to outside sources. Students may not consult with other students or use Wikipedia or other online sources to complete their exams. Exams will be graded based on a pass or fail basis. Students who fail the exam marginally may be asked to rewrite specific questions. Students who fail the exam may be requested by their adviser to retake courses in areas of deficiency and will not be eligible to receive their master's degree until the exam is passed.

Thesis Option

For students electing to submit a thesis, their comprehensive exam will take place as an oral exam no less than 3 weeks after the final version of their thesis is submitted to their committee. During the course of the oral exam, students will be asked to defend their thesis, as well as respond to questions that require them to integrate and synthesize information learned in their core courses.

Independent Learning

The MA program requires the completion of a research project. Research projects are independent learning activities in which students must apply, reflect upon, and refine knowledge and skills required in the program. By the end of the fourth semester in this program, each student must satisfy a scholarly product requirement (Review I). This requirement can be met in one of two ways: students can submit a research study to a refereed journal (with faculty assistance), or submit a proposal for a presentation at an annual conference of a national or local organization (from an approved list of resources). The student must be primarily responsible for conceptualizing, carrying out, and reporting the results in both of these options. The student is responsible for obtaining approval of the product from his or her master's committee.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.
In addition to meeting the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- One page statement of professional interests and goals addressing why the applicant is interested in the degree program.
- A scholarly or professional writing sample (preferably an undergraduate academic paper).
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

**Athletic Training MAT**

**Program Description**

The Master of Athletic Training is accepting applications on August 17, 2018 via the ATCAS system.

The Athletic Training Program is designed to enable students to demonstrate, in the classroom and during clinical experiences, that they have achieved levels of comprehension, competency, and proficiency expected of entry-level athletic trainers. UCF is committed to the idea that professional education requires sound academic preparation that is enriched by clinical experiences.

The program's classroom component is divided into several components: foundational courses, athletic training theory and practice, and clinical experiences. The courses are designed to expose students to information through multiple didactic, laboratory and clinical experiences. These courses incorporate the content required to establish the foundational behaviors of professional practice and the Curricular Content Standards set forth by the Commission on Accreditation of Athletic Training Education (CAATE).

All students are required to complete the curriculum in the established sequence of courses.

Program faculty believe in providing students with enriching educational experiences that foster personal growth, communication skills, critical thinking skills and professional ethics. By combining excellence in teaching, the latest technologies available in education and outstanding clinical site affiliations, graduates of the program are fully prepared to take and pass the comprehensive Board of Certification (BOC) exam and start their careers as athletic trainers.

UCF's Athletic Training Program was established in 1998 as a baccalaureate program in the Department of Health Professions in the College of Health and Public Affairs. Accreditation was officially granted in 2002. The program continues to maintain full accreditation through the CAATE through 2026-2027.
Mission

The mission of the AT Program is to prepare students to contribute to the health and welfare of the community as competent and proficient athletic trainers. The AT Program faculty and clinical preceptors will provide students a high-quality comprehensive education in the foundational behaviors of professional practice and the Curricular Content Standards set forth by the CAATE. The Program faculty believes in providing students with enriching educational experiences which foster personal growth and leadership, communication skills, critical thinking skills, and professional ethics.

Prerequisites

Completion of prerequisite coursework outlined below with a minimum grade of "C" (2.0). Candidates with all prerequisites completed at the time of application may be given preference over those still completing courses. Courses older than seven years will not be accepted.

Online courses are not accepted for anatomy, physiology, chemistry or physics. Hybrid courses will be accepted if the lab component is delivered in a face-to-face format (submission of course description/syllabi may be required to verify lab delivery mode).

- **General Bio/Biology** - A minimum of 4 credits (including a lab) for science majors - Biology courses for non-science majors and non-human biology courses are not acceptable.
- **Human Anatomy and Physiology** – A minimum of 8 credits (including two labs) for science majors - Anatomy and physiology courses for non-science majors and non-human anatomy and physiology courses are not acceptable.
  - Option 1: One semester of Human Anatomy with lab and one semester of Human Physiology with lab
  - Option 2: Two semesters of Anatomy and Physiology combined courses with a lab each
- **Statistics** – A minimum of 3 credit hours
- **Human Nutrition /Clinical Nutrition** - A minimum of 3 credit hours for science or health/medicine/nursing majors
- **General Psychology** – A minimum of 3 credit hours - Any course taken within a psychology department/unit will be acceptable.
- **Exercise Physiology** – A minimum of 3 credit hours
- **Biomechanics or Kinesiology** – A minimum of 3 credit hours
- **General Chemistry/Chemistry I** - A minimum of 4 credits (including a lab) for science majors
- **Physics I** - A minimum of 4 credits (including a lab) for science majors

Curriculum

The MAT degree program is a two-year full-time professional master's program requiring 65 credit hours beyond the bachelor's degree. The courses are taken in a prescribed sequence over 6 semesters, including 18 credit hours of clinical practice. Clinical practice occurs under the direct supervision of a certified and licensed athletic trainer.

Total Credit Hours Required: 65 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—65 Credit Hours

**Summer 1/Semester 1—9 Credit Hours**
- ATR 5016 - Foundational Behaviors of Athletic Training Practice I 1 Credit Hour
- ATR 5106C - Prevention of Injury and Illness in Athletic Training Practice 2 Credit Hours
- ATR 5206C - Functional Human Anatomy for Athletic Trainers 3 Credit Hours
- ATR 5117C - Acute Care in Athletic Training Practice I 3 Credit Hours

**Fall 1/Semester 2—12 Credit Hours**
- ATR 5219C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice I 3 Credit Hours
- ATR 5617 - Athletic Training Research I 1 Credit Hours
- ATR 5017 - Foundational Behaviors of Athletic Training Practice II 1 Credit Hours
- ATR 5406C - General Medical Conditions in Athletic Training Practice I 2 Credit Hours
- ATR 5306C - Therapeutic Interventions in Athletic Training Practice I 3 Credit Hours
- ATR 5815L - Practicum in Athletic Training I 2 Credit Hours

**Spring 1/Semester 3—12 Credit Hours**
- ATR 5407C - General Medical Conditions in Athletic Training Practice II 2 Credit Hours
- ATR 5217C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice II 3 Credit Hours
- ATR 5307C - Therapeutic Interventions in Athletic Training Practice II 3 Credit Hours
- ATR 5516 - Healthcare Administration in Athletic Training Practice I 2 Credit Hours
• ATR 5825L - Practicum in Athletic Training II 2 Credit Hours

Summer 2/Semester 4—8 Credit Hours

• ATR 6218C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice III 3 Credit Hours
• ATR 6308C - Therapeutic Interventions in Athletic Training Practice III 3 Credit Hours
• ATR 6618C - Athletic Training Research II 1 Credit Hour
• ATR 6835L - Practicum in Athletic Training III 1 Credit Hour

Fall 2/Semester 5—12 Credit Hours

• ATR 6309C - Therapeutic Interventions in Athletic Training Practice IV 3 Credit Hours
• ATR 6845L - Practicum in Athletic Training IV 9 Credit Hours

Spring 2/Semester 6—12 Credit Hours

• ATR 6517 - Healthcare Administration in Athletic Training Practice II 2 Credit Hour
• ATR 6505 - Athletic Training Seminar 1 Credit Hours
• ATR 6118L - Acute Care in Athletic Training Practice II 1 Credit Hour
• ATR 6619C - Athletic Training Research III 4 Credit Hours
• ATR 6855L - Practicum in Athletic Training V 4 Credit Hours

Comprehensive Examination

Passing a comprehensive examination with a grade of 80 percent or better is a requirement for continued progress in the Master of Athletic Training degree. This examination will be given to every student at the end of the third semester (mid-point of the program). Students must take the exam at that time and will be allowed a total of three (3) attempts. Failure to pass the examination in 3 attempts will result in a review by the Progression and Retention Committee and may result in dismissal from the program. Students may not enroll in fourth-semester coursework until they have successfully completed the Comprehensive Examination.

Equipment Fee

Students enrolled full-time in the Master of Athletic Training degree program pay an estimated Equipment Fee of $90 each semester they are enrolled.

Additional Program Costs

Current expenses for tuition fees and other university fees are listed on the UCF Student Accounts website (https://studentaccounts.ucf.edu/tf-graduate/). Additionally, several MAT courses include Material and Supply fees which are listed in the UCF Graduate Catalog. Students in the MAT program are also expected to pay for the following: nametags, CPR/First Aid/AED certification, appropriate clinical attire, transportation costs, and background checks/fingerprinting.

Independent Learning

All students in the Master of Athletic Training Program are required to engage in independent learning, a process in which individuals take the initiative, with or without help of others, to attain knowledge, skills, and professional behaviors. Activities such as case studies, critical analysis of literature, research/capstone projects, and clinical practica provide important independent learning experiences that give students ample opportunity to demonstrate and develop independent learning skills.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Master of Athletic Training degree at UCF participates in the Athletic Training Centralized Application Service, known as ATCAS. Prospective students applying to the program must apply online using the ATCAS application. To learn more about the ATCAS application process, visit http://caate.net/apply-now/. (PLEASE NOTE: UCF will NOT be in the ATCAS system until 2018 – date to be determined.)

All application materials MUST be sent directly to ATCAS. Materials sent to the university or program and not to ATCAS will not be accepted. The following application materials must be received by ATCAS (date TBD) if they desire to begin the following summer 2019:
• Completed ATCAS application including all documents required by ATCAS.
• One official transcript from each college/university attended.
  o The transcripts must demonstrate a minimum of a 3.0 overall GPA in undergraduate coursework and completion (or enrolled in a maximum of two pre-requisites at the time of application) of prerequisite coursework with a minimum grade of "C" (2.0).
  o The bachelor's degree may be in any discipline from a regionally accredited institution and may be in progress at the time of application. However, the degree must be awarded prior to the program's start date in the Summer C semester (mid-May).
  o Applicants who have attended a college/university outside the United States must also provide a course-by-course credential evaluation with GPA calculation.
• Official GRE scores taken within last five years (if an applicant does not possess a 3.4 overall GPA)
• Proof of 50 hours of observation of an AT (BOC certified) in a high school, collegiate, and/or professional sports setting
• Completed technical standards document
• Three (3) letters of recommendation with ATCAS recommendation forms, including one from an athletic trainer
• Complete a personal statement/essay about professional goals and the discipline of athletic training
• UCF Graduate Application (supplemental) must be submitted in addition to ATCAS application. Deadline to submit the supplemental application is TBD (will be late fall/early spring prior to intended start/summer).

Incomplete applications will NOT be reviewed.

An on-campus interview, by invitation only, may be required after the initial application review process is complete.

Applicants not meeting these minimum requirements will not be considered for admission. Admission to the program is competitive. Meeting minimum requirements does not guarantee an applicant an interview or admission to the program.

Admissions decisions will be made only once per academic year. Incoming students must begin the program in the summer C semester (mid-May).

Technical Standards

The Americans with Disabilities Act (ADA) of 1990 provides comprehensive civil rights protection to people with disabilities. The ADA "prohibits all programs or activities receiving federal financial assistance from discrimination against individuals with disabilities who are 'otherwise qualified' to participate in those programs". However, there are essential requirements needed in order for a person to meet the standard of care for the athletic training profession and meet licensing/certification requirements. The Supreme Court has stated that physical qualifications could lawfully be considered as 'technical standards(s) for admission'.

The institution/program may not exclude an 'otherwise qualified' applicant due to a disability if the institution/program can reasonably modify the program or facilities to accommodate the student with the disability. The institution/program is not required to 'fundamentally alter' the program nor create an 'undue burden' on itself.

The following abilities and expectations must be met by all students admitted to and matriculating through the UCF Athletic Training Program:

• Students must possess the mental capacity (without assistance from an intermediary) to integrate, synthesize, analyze, and problem solve in order to effectively examine and treat patients with injuries and illnesses. Students must be able to perform the above quickly in an emergency situation and in a timely manner otherwise.
• Students must possess sufficient cognitive, postural and neuromuscular control, sensory function, ambulation, and coordination to perform appropriate patient examinations and interventions using accepted techniques, as well as accurately, safely, and efficiently use equipment and materials for such purposes. Students must be able to perform the above quickly in an emergency situation and in a timely manner otherwise.
• Students must annually pass examinations by external entities such as CPR for the Professional Rescuer (or similar certification) and OSHA Bloodborne Pathogens Training.
• Students must possess the ability to communicate (orally and in writing) effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds. This includes, but is not limited to, the ability to establish rapport with patients and communicate/document judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice. Students must be able to perform the above quickly in an emergency situation and in a timely manner otherwise.
Students must be able to document appropriate vaccinations applicable to healthcare professionals and maintain appropriate personal hygiene conducive to the classroom and clinical setting.

Students must have the capacity to maintain composure, exercise good judgment, and perform within the standard of care for a student of the same educational level during periods of high stress.

All students will be evaluated first with regard to their academic and program qualifications and all students will be evaluated using the same scoring system. To promote fairness and equality, the program seeks to identify a suitable candidate before discussing anyone's disability status. Once a determination is made that a candidate is 'otherwise qualified', discussions will begin regarding whether the Athletic Training Program can make reasonable accommodations to a student who has identified that they require accommodations.

The University of Central Florida's Student Disability Services will evaluate a student who states he/she could meet the Program's technical standards with accommodation(s) and confirm that the stated condition qualifies as a disability under applicable laws. A review of the following will occur: whether the accommodation(s) requested is reasonable; whether an accommodation would jeopardize clinician-patient safety; and whether the accommodation will jeopardize the educational process of the student (including all coursework, clinical experiences, and internships deemed essential to graduation).

Compliance with the Program's technical standards does not guarantee a student's eligibility for the BOC© certification exam. Students with a concern should contact the BOC© for the specific technical standards needed to take the certification examination (bocate.org).

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Biology MS

Program Description

The Master of Science in Biology program offers a broad range of training opportunities ranging from the sub-cellular to entire ecosystems.

Our program offers broad-based training in a variety of disciplines including Conservation Biology, Ecology, Evolution, Physiology, Genetics and Cell and Developmental Biology.
Curriculum

The Master of Science in Biology program offers a thesis and nonthesis option for students. The thesis option requires a minimum of 30 credit hours, 15 of which must be at the 6000 level. Students choosing the thesis option must receive a commitment from a faculty adviser for admission into the program. The nonthesis option requires a minimum of 40 credit hours, 20 of which must be at the 6000 level. Students interested in the nonthesis option should contact the program graduate coordinator before applying. Both options must contain a minimum of 24 credit hours of formal coursework excluding research.

Total Credit Hours Required: 30-40 Credit Hours Minimum beyond the Bachelor's Degree

Most graduate courses require reading and critical analysis of the primary literature in biology, and students are required to make presentations of their analysis or present proposals outlining a series of integrated experiments that would further knowledge in the field. Thesis students work with a faculty adviser and advisory committee members throughout the planning and conduct of their research. They submit a thesis proposal to the committee for approval prior to conducting the research and present a thesis defense and examination upon completion of that work. All nonthesis students are required to take a research report course (BSC 6909), where they are paired with individual faculty and organize and summarize knowledge in a research report.

Required Courses—7 Credit Hours

- BSC 6935 - Seminar in Biology 1 Credit Hours (2 credit hours; 1 credit hour each of two semesters)
- PCB 6095 - Professional Development in Biology I 1 Credit Hours
- PCB 6096 - Professional Development in Biology II 1 Credit Hours
- PCB 6466 - Methods in Experimental Ecology 3 Credit Hours

Thesis Option—23 Credit Hours

- BSC 6971 - Thesis 6 Credit Hours (minimum)
- Electives 17 Credit Hours selected with the faculty adviser and advisory committee and approved by the program graduate coordinator

Examinations

A thesis proposal defense is required. The purpose of the proposal defense is to present the planned research and its foundations as a seminar to an interested audience of peers and the advisory committee. The proposal should be distributed to advisory committee members two weeks in advance of the defense, and the defense should be advertised (contact the graduate program administrator two weeks in advance). Public attendees typically have an opportunity to ask questions and comment following the seminar, after which the committee meets with the student to further discuss the proposal. The advisory committee must then vote to accept or reject the proposal. The thesis proposal defense must be passed a minimum of one semester preceding the oral thesis defense (i.e., the proposal defense and thesis defense cannot occur in the same semester). When the research is completed, the final oral thesis defense is conducted similar to the proposal defense.

Nonthesis Option—33 Credit Hours

In addition to the 7 credit hours of required courses listed above, nonthesis students must complete 12 credit hours of restricted electives, 19 credit hours of unrestricted electives, and a research report. Students interested in the nonthesis option should contact the program graduate coordinator before applying.

Restricted Electives—12 Credit Hours

Students take 12 credit hours of courses in at least three of the five areas below.

- Ecology
- Evolutionary Biology
- Genetics
- Physiology
- Cell and Developmental Biology

Unrestricted Electives—19 Credit Hours

Students take 19 credit hours of unrestricted electives that must be approved by the program graduate coordinator.

Research Report—2 Credit Hours

- BSC 6909 - Research Report 2 Credit Hours
Examination

Nonthesis students must take the comprehensive exam no later than the semester preceding that of graduation. If a student fails the comprehensive examination, a minimum of four weeks must elapse before reexamination. The comprehensive exam may be taken a maximum of two times.

Independent Learning

Nonthesis students are required to complete a research report as their independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended
- Official, competitive GRE score taken within the last five years
- Three letters of recommendation that address the applicant's capabilities and likelihood of success as an M.S. student.
- Résumé
- A written statement of past experience and research, area of interest, and immediate and long-range goals
- A computer-based score of 230 (or 89 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.

Applicants to the thesis option should first identify faculty who match their own research interests, and then contact faculty in advance to inquire about research opportunities in faculty labs and to solicit agreement that a faculty member is interested in serving as the student's dissertation advisor. Applicants to the thesis option who do not have a consenting thesis advisor within the department faculty will not be accepted into the program. Applicants to the non-thesis option or the Conservation Biology PSM need not seek a thesis advisor.

Applicants who do not have a competitive GPA or GRE may occasionally be accepted if there is other convincing evidence of potential for high achievement and success. For U.S. applicants, GRE scores can be self-reported prior to the submission deadline if the official score cannot be received in time. Admission will be conditional upon receipt of the official score. Applicants failing to satisfy minimum program criteria should submit a GRE Subject (Advanced) Biology Test score at or above the 50th percentile.

Application Deadlines

Students applying for summer or spring admission will be considered on an ad hoc basis but must complete their applications by December 1.

Biomedical Engineering

MSBME

Program Description

The Master of Science degree in Biomedical Engineering is designed to train graduates with professional skills enabling them to gain employment in the biomedical engineering industry or to enter competitive Biomedical Engineering PhD research programs. It also offers the option to UCF College of Medicine students to enrich education and professional careers by pursuing a tailored MSBME/MD program.

Graduates will have a command of the application of engineering principles to biological and health systems. They will gain skills in modern biomedical engineering tools, understanding of relevant physiology and biology, knowledge of contemporary topics in medical technology, and ability to engage in advanced engineering studies including elements of research, analysis, design and experimentation.

Career opportunities include research, design, analysis, testing and product development in the biomedical and rehabilitation industries, in clinical engineering, and in biomedical engineering.

The MSBME degree offers the following gateways into the program:

- MSBME for students with formal training in engineering or biomedical engineering who have earned a BS degree and are seeking postbaccalaureate education and training.
- MSBME along-the-way to engineering students who are admitted into the PhD program in MAE and engaged in BME research.
- MSBME to students in the BS-to-MS track.
- MSBME to recent BS graduates potentially interested in pursuing PhD research with preference for admission to the UCF doctoral graduate program upon completion.
- A combined MD/MSBME to UCF College of Medicine MD students with engineering background and interest who can pursue the degree with one additional year sandwiched between the end of the second and beginning of the third year of medical school. This program is aimed at MD students who wish to expand on their years one and two College of Medicine FIRE (Focused Individualized Research Experience) project into an MS thesis.

The program offers thesis and nonthesis options:

- Biofluids Track - Thesis and Nonthesis options
- Biomechanics Track - Thesis and Nonthesis options
- MD/MSBME Track - Thesis only

Curriculum

The MSBME requires completion of 30 hours at the graduate level (a combination of 5000 and 6000 level classes) and will be offered with two options: (1) thesis (30 credit hours): 24 credit hours of coursework plus 6 credit hours of thesis with at least 15 credit hours at the 6000 level. (2) nonthesis options (30 credit hours): 30 credit hours of coursework with at least 15 credit hours at the 6000 level.

There are four tracks according to which the curriculum is structured within each option: Accelerated BS to MS, Biofluids, Biomechanics, and MD/MSBME.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

All students must identify an adviser and file an official degree program of study prior to the completion of 9 credit hours of study. Students should consult with the MAE Graduate Program Director for assistance in filling out their program of study. The program of study must be met with departmental approval.

A student with an undergraduate degree outside of the selected departmental discipline may be required to satisfy an articulation program. Substitutions to the program of study must meet with the approval of the adviser and the department. More information is available from the MAE departmental website listed above.
For the Accelerated BS to MS track, the BS is awarded after completion of 128 university credit hours and 71 hours of engineering courses and all other university requirements, and the MS is awarded upon completion of the Master in Biomedical Engineering program. Courses designated in General Education Program and Common Program Prerequisites are usually completed in the first 60 hours (see engineering major requirements in the Undergraduate Catalog).

**Thesis**

The thesis option requires 30 credit hours, at least half of which must be at the 6000 level and will include 6 credit hours of thesis credit. A student pursuing the thesis program may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the program of study and the proposed thesis topic.

The College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website (www.cecs.ucf.edu) and on the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.

At least 24 credit hours of the program of study must be course work, exclusive of thesis and research.

**Nonthesis**

The nonthesis option is primarily designed to meet the needs of part-time students and requires 30 credit hours of course work, at least one-half of which must be at the 6000 level.

At least 24 credit hours of the program of study must be course work, exclusive of research and thesis credit hours.

**Graduation**

Graduation requirements for the MSBME program follow the standards of the College of Engineering and Computer Science and the UCF College of Graduate Studies graduation requirements. For all tracks and options, students must maintain a minimum 3.0 graduate program GPA to be eligible to graduate. Students in the thesis option must complete 24 hours of coursework (at least half of which is at the 6000 level) and 6 hours of Thesis (6971), and present and successfully defend an thesis. Students in the nonthesis option must complete 30 hours of coursework (half of which is at the 6000 level).

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

**Financials**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**Fellowships**

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Program Tracks**

- Biomedical Engineering MSBME, Accelerated BS to MSBME Track
- Biomedical Engineering MSBME, Biofluids Track
- Biomedical Engineering MSBME, Biomechanics Track
- Biomedical Engineering MSBME, MD/MSBME Track

ENGR1 - 307
Biomedical Engineering
MSBME, Accelerated BS to MSBME Track

Track Description

The Accelerated Undergraduate/Graduate program in Biomedical Engineering allows highly qualified undergraduate majors in Mechanical Engineering and Aerospace Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program. Participation will enable completion of the Bachelor of Science and Master of Science degrees in five instead of six years for students enrolled in full-time course work.

Curriculum

The BSME or BSAE is awarded after completing all university requirements, including 128 total credit hours and 71 credit hours of engineering courses. The MSBME is awarded upon completion of the master's program. Courses designated in General Education Program and Common Program Prerequisites are usually completed in the first 60 hours (see engineering major requirements in the Undergraduate Catalog).

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Up to 12 credit hours of approved graduate level courses of grades "B" (3.0) or better may be counted toward the BS and MS degrees. Additional notes on the Accelerated Undergraduate and Graduate Program in Mechanical Engineering are as follows:

- Students who change degree programs and select this major must adopt the most current catalog.
- Students must earn at least a "B" (3.0) in each undergraduate and graduate engineering course for them to be counted toward the major.

Biofluids Track

For the Biofluids Track, qualified courses that may be selected for the Accelerated BS to MS are:

- EML 6211 - Continuum Mechanics 3 Credit Hours
- BME 5216C - Mechanics of Biostructures I 3 Credit Hours
- BME 5267 - Biofluid Mechanics 3 Credit Hours
- BME 5268C - Applied and Computational Biofluids 3 Credit Hours
- Or a technical elective approved by the graduate program director

Biomechanics Track

For the Biomechanics Track, qualified courses that may be selected for the Accelerated BS to MS are:

- EML 6211 - Continuum Mechanics 3 Credit Hours
- BME 5216C - Mechanics of Biostructures I 3 Credit Hours
- BME 5217C - Mechanics of Biostructures II 3 Credit Hours
- BME 6500C - Bioinstrumentation 3 Credit Hours
- BME 6215 - Advanced Biomechanics 3 Credit Hours
- Or a technical elective approved by the graduate program director

Representative Electives

- BME 5572 - Biomedical Nanotechnology 3 Credit Hours
- BSC 5418 - Tissue Engineering 3 Credit Hours
- EEE 5265 - Biomedical Effects and Applications of Electromagnetic Energy 3 Credit Hours
- EEE 5272 - Biomedical Sensors 3 Credit Hours
- EEL 5690 - Introduction to Medical Robotics and Tele-Operation 3 Credit Hours
- EMA 5060 - Polymer Science and Engineering 3 Credit Hours
- EMA 5584 - Biomaterials 3 Credit Hours
- EMA 5588 - Biocompatibility of Materials 3 Credit Hours
- EML 5060 - Mathematical Methods in Mechanical and Aerospace Engineering 3 Credit Hours
- EML 5066 - Computational Methods in Mechanical and Aerospace Engineering 3 Credit Hours
- EML 5237 - Intermediate Mechanics of Materials 3 Credit Hours
- EML 5291 - MEMS Materials 3 Credit Hours
- EML 5546 - Engineering Design with Composite Materials 3 Credit Hours
- EML 6068 - Finite Elements in Mechanical, Materials, and Aerospace Engineering II 3 Credit Hours
- EML 6299 - Advanced Topics on Miniaturization 3 Credit Hours
Undergraduate Requirements

Please see the current edition of the Undergraduate Catalog for additional information about this program.

Graduate Requirements

The Biomedical Engineering program requires a minimum of 30 credit hours beyond the bachelor's degree, and offers thesis and nonthesis options in two tracks, Biofluids and Biomechanics. At least 24 credit hours of course work must be taken, exclusive of thesis and research. The thesis options require 24 credit hours of formal courses, and six credit hours of thesis. Accelerated Biomedical Engineering students must declare their interest in either the Biofluids Track or the Biomechanics Track by completing a Program of Study with their adviser.

Students must register for the seminar course a minimum of two times during their graduate career in the master's program (thesis option). The students must also complete the course with a satisfactory (S) grade in both attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.

The nonthesis options require 30 credit hours of courses, including completion of BME 6935 - Topics in Biomedical Engineering.

Additionally, all students pursuing the thesis option must enroll in the following course:

- EML 5936 - Mechanical and Aerospace Seminar 0 Credit Hours

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis for the thesis option. For nonthesis students, the independent learning experience is provided by BME 6935 - Topics in Biomedical Engineering, one of the required courses.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Accelerated BS to MS program in Biomedical Engineering allows highly qualified University of Central Florida undergraduate majors in Mechanical or Aerospace Engineering to begin taking graduate level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline but was not previously part of this accelerated program, then they should apply to either the Biofluids Track or Biomechanics Track.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Résumé.
- A written statement of experience and research, areas of interest, and future career goals.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Applicants should contact the MMAE graduate program director for more information.

Biomedical Engineering
MSBME, Biofluids Track

Track Description

The Biofluids track in the Master of Science degree in Biomedical Engineering provides graduates with professional skills enabling them to gain employment in the biomedical engineering industry or to enter competitive Biomedical Engineering PhD research programs. Career opportunities include research, design, analysis, testing and product development in the biomedical and rehabilitation industries, in clinical engineering, and in biomedical engineering.

Current research focuses on translational research in multiscale computational fluid dynamics for cardiovascular treatment planning, lung cancer treatment planning, upper airways fluid mechanics, bioacoustics for patient monitoring and bedside diagnosis.

Curriculum

The Master of Science in Biomedical Engineering requires 30 credit hours at the graduate level (a combination of 5000 and 6000 level courses) and offers both thesis and non-thesis options.

Thesis students take 15 credit hours of required courses, 6 credit hours of Biofluids courses, 3 credit hours of an approved elective, and 6 credit hours of thesis.

The non-thesis option is primarily designed to meet the needs of part-time students and requires 30 credit hours of coursework. Nonthesis students take 15 credit hours of required courses, 6 credit hours of Biofluids courses, and 9 credit hours of approved electives.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

All students must take at least 15 credit hours at the 6000 level. At least 24 credit hours of the program of study must be course work, exclusive of research and thesis hours.

All students must identify an adviser and file an official program of study prior to the completion of 9 credit hours of study. Students should consult with the MAE Graduate Program Director for assistance in filling out their program of study. The program of study must be approved by the department.

A student with an undergraduate degree outside of the selected departmental discipline may be required to satisfy an articulation program. Substitutions to the program of study must be approved by the student's faculty adviser and department. More information is available on the MAE departmental website (http://www.mae.ucf.edu/).

Prerequisites for non-engineering students applying to the program

* Or equivalent (see graduate adviser)

- Calculus with Analytic Geometry I (MAC 2311C), Calculus with Analytic Geometry II (MAC 2312), Calculus with Analytic Geometry (MAC 2313), Ordinary Differential Equations (MAP 2302)
- Engineering Analysis - Statics (EGN 3310), Engineering Analysis - Dynamics (EGN 3321), and Solid Mechanics (EGM 3601)
- Thermodynamics (EGN 3343)*
- Fluid Mechanics I (EML 4702) and Fluid Mechanics II (EML 4703)
- Heat Transfer (EML 4142)
Required Courses—15 Credit Hours

- BME 5216C - Mechanics of Biostructures I 3 Credit Hours
- BME 5217C - Mechanics of Biostructures II 3 Credit Hours
- BME 6500C - Bioinstrumentation 3 Credit Hours
- BME 6935 - Topics in Biomedical Engineering 3 Credit Hours
- EML 6211 - Continuum Mechanics 3 Credit Hours

Biofluids Courses—6 Credit Hours

- BME 5267 - Biofluid Mechanics 3 Credit Hours
- BME 5268C - Applied and Computational Biofluids 3 Credit Hours

Representative Electives

- BME 5572 - Biomedical Nanotechnology 3 Credit Hours
- BSC 5418 - Tissue Engineering 3 Credit Hours
- EEE 5265 - Biomedical Effects and Applications of Electromagnetic Energy 3 Credit Hours
- EEE 5272 - Biomedical Sensors 3 Credit Hours
- EEL 5690 - Introduction to Medical Robotics and Tele-Operation 3 Credit Hours
- EMA 5060 - Polymer Science and Engineering 3 Credit Hours
- EMA 5584 - Biomaterials 3 Credit Hours
- EMA 5588 - Biocompatibility of Materials 3 Credit Hours
- EML 5060 - Mathematical Methods in Mechanical and Aerospace Engineering 3 Credit Hours
- EML 5066 - Computational Methods in Mechanical and Aerospace Engineering 3 Credit Hours
- EML 5237 - Intermediate Mechanics of Materials 3 Credit Hours
- EML 5291 - MEMS Materials 3 Credit Hours
- EML 5546 - Engineering Design with Composite Materials 3 Credit Hours
- EML 6068 - Finite Elements in Mechanical, Materials, and Aerospace Engineering II 3 Credit Hours
- EML 6299 - Advanced Topics on Miniaturization 3 Credit Hours
- ESI 5219 - Engineering Statistics 3 Credit Hours
- ESI 6247 - Experimental Design and Taguchi Methods 3 Credit Hours
- ESI 6609 - Industrial Engineering Analytics for Healthcare 3 Credit Hours
- IDS 5127 - Foundation of Bio-Imaging Science 3 Credit Hours
- IDS 6252 - Biomedical Nanotechnology 3 Credit Hours
- IDS 6253 - Bioanalytical Technology 3 Credit Hours

Thesis Option—9 Credit Hours

Students may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the student's program of study and the proposed thesis topic.

The College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website (www.cecs.ucf.edu) and on the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.

- BME 6971 - Thesis VAR Credit Hours
- Approved elective at 5000 or 6000 level 3 Credit Hours

Nonthesis Option—9 Credit Hours

- Three approved electives at 5000 or 6000 level (3 credit hours each, for a total of 9 credit hours)

MAE Department Graduate Seminar Requirement

The MAE Graduate Seminar is a zero credit hour (S/U) course that is offered each Fall and Spring academic semesters. All MAE graduate students who are pursuing the MSBME are required to register, participate in, and receive a satisfactory (S) grade for two semesters of MAE Graduate Seminar prior to graduation.

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis for the thesis option. For nonthesis students, the independent learning experience is provided by BME 6935 - Topics in Biomedical Engineering, one of the required courses.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biomedical, Mechanical or Aerospace Engineering, or a closely related discipline.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the MMAE graduate program director for further information.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Biomedical Engineering
MSBME, Biomechanics
Track

Track Description

The Biomechanics track in the Master of Science degree in Biomedical Engineering provides graduates with professional skills enabling them to gain employment in the biomedical engineering industry or to enter competitive Biomedical Engineering PhD research programs. Career opportunities include research, design, analysis, testing and product development in the biomedical and rehabilitation industries, in clinical engineering, and in biomedical engineering.

The current research focus is in biomechanics, developmental dysplasia of the hip, cellular mechanics and force-induced biochemical responses, image guided surgery, surgical robotics navigation and tracking, soft robotics, and biomechanics of movement rehabilitation and neural control of movement.

Curriculum

The Master of Science in Biomedical Engineering requires 30 credit hours at the graduate level (a combination of 5000 and 6000 level courses) and offers both thesis and nonthesis options.

Thesis students take 15 credit hours of required courses, 6 credit hours of Biomechanics courses, 3 credit hours of an approved elective, and 6 credit hours of thesis.

The nonthesis option is primarily designed to meet the needs of part-time students and requires 30 credit hours of coursework. Nonthesis students take 15 credit hours of required courses, 6 credit hours of Biomechanics courses, and 9 credit hours of approved electives.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

All students must take at least 15 credit hours at the 6000 level. At least 24 credit hours of the program of study must be coursework, exclusive of research and thesis hours.

All students must identify an adviser and file an official program of study prior to the completion of 9 credit hours of study. Students should consult with the MAE Graduate Program Director for assistance in filling out their program of study. The program of study must be approved by the department.

A student with an undergraduate degree outside of the selected departmental discipline may be required to satisfy an articulation program. Substitutions to the program of study must be approved by the student's faculty adviser and department. More information is available on the MAE departmental website (http://www.mae.ucf.edu/).

Prerequisites for non-engineering students applying to the program

- Calculus with Analytic Geometry I (MAC 2311C), Calculus with Analytic Geometry II (MAC 2312), Calculus with Analytic Geometry (MAC 2313), Ordinary Differential Equations (MAP 2302)
- Engineering Analysis - Statics (EGN 3310), Engineering Analysis - Dynamics (EGN 3321), and Solid Mechanics (EGM 3601)
- Thermodynamics (EGN 3343)*
- Design and Analysis of Machine Components (EML 3500)
- Introduction to Vibrations and Controls (EML 4225)
- Modeling Methods in Mechanical and Aerospace Engineering (EML 3034C)*
- Mechanical Engineering Measurements (EML 3303C)*

* Or equivalent (see graduate adviser)

Required Courses—15 Credit Hours

- BME 5216C - Mechanics of Biostructures I 3 Credit Hours
- BME 5217C - Mechanics of Biostructures II 3 Credit Hours
- BME 6500C - Bioinstrumentation 3 Credit Hours
- BME 6935 - Topics in Biomedical Engineering 3 Credit Hours
- EML 6211 - Continuum Mechanics 3 Credit Hours

Biomechanics Courses—6 Credit Hours

- BME 6215 - Advanced Biomechanics 3 Credit Hours
- EML 6067 - Finite Elements in Mechanical, Materials, and Aerospace Engineering I 3 Credit Hours

Representative Electives

- BME 5572 - Biomedical Nanotechnology 3 Credit Hours
- BSC 5418 - Tissue Engineering 3 Credit Hours
- EEE 5265 - Biomedical Effects and Applications of Electromagnetic Energy 3 Credit Hours
Thesis Option—9 Credit Hours

Students may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the student's program of study and the proposed thesis topic.

The College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website (www.cecs.ucf.edu) and on the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.

- EEE 5272 - Biomedical Sensors 3 Credit Hours
- EEL 5690 - Introduction to Medical Robotics and Tele-Operation 3 Credit Hours
- EMA 5060 - Polymer Science and Engineering 3 Credit Hours
- EMA 5584 - Biomaterials 3 Credit Hours
- EMA 5588 - Biocompatibility of Materials 3 Credit Hours
- EML 5060 - Mathematical Methods in Mechanical and Aerospace Engineering 3 Credit Hours
- EML 5066 - Computational Methods in Mechanical and Aerospace Engineering 3 Credit Hours
- EML 5237 - Intermediate Mechanics of Materials 3 Credit Hours
- EML 5291 - MEMS Materials 3 Credit Hours
- EML 5546 - Engineering Design with Composite Materials 3 Credit Hours
- EML 6068 - Finite Elements in Mechanical, Materials, and Aerospace Engineering II 3 Credit Hours
- EML 6299 - Advanced Topics on Miniaturization 3 Credit Hours
- ESI 5219 - Engineering Statistics 3 Credit Hours
- ESI 6247 - Experimental Design and Taguchi Methods 3 Credit Hours
- ESI 6609 - Industrial Engineering Analytics for Healthcare 3 Credit Hours
- IDS 5127 - Foundation of Bio-Imaging Science 3 Credit Hours
- IDS 6252 - Biomedical Nanotechnology 3 Credit Hours
- IDS 6253 - Bioanalytical Technology 3 Credit Hours
- BME 6971 - Thesis VAR Credit Hours
- Approved elective at 5000 or 6000 level 3 Credit Hours

Nonthesis Option—9 Credit Hours

Three approved electives at 5000 or 6000 level 3 Credit Hours each, for a total of 9 Credit Hours

MAE Department Graduate Seminar Requirement

The MAE Graduate Seminar is a zero credit hour (S/U) course that is offered each Fall and Spring academic semesters. All MAE graduate students who are pursuing the MSBME are required to register, participate in, and receive a satisfactory (S) grade for two semesters of MAE Graduate Seminar prior to graduation.

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis for the thesis option. For nonthesis students, the independent learning experience is provided by BME 6935 - Topics in Biomedical Engineering, one of the required courses.

Application Requirements

Biomedical Engineering MSBME, MD/MSBME Track

Track Description

The Biomedical Engineering MS program offers an MD/MSBME Track that enables qualified students to earn both the MD and the MSBME degrees.

For medical students, the combined MD/MSBME will run as a 5-year program where the students will complete the majority of the MSBME requirements in the third year after matriculation, prior to their clinical experiences. MD students apply and are admitted into the MSBME program in Fall. Upon successful completion of the Structure and Function and FIRE modules in their first year of medical school, students in the MD/MSBME program will receive 9 hours of credit toward the 30 credit hours required for the requirements of the MSBME degree. Medical students will complete the second year of the curriculum and take a year's leave of absence to take most of the MSBME degree requirements.

Curriculum

The Biomedical Engineering MS program requires a minimum of 30 credit hours for students who choose the MD/MSBME track. In this restricted admission MD track, students complete biomedical engineering core courses, concentration courses in Biofluids or Biomechanics, and a thesis.
For MD students in this track, the combined MD/MSBME will be a five-year program, where students complete the majority of the MSBME requirements in the third year (15 credit hours of coursework and 3 credit hours of thesis), receive 9 credit hours of transfer credit from their MD program toward the 30 credit hours required for the MSBME, defend their master's thesis and take the balance of 3 credit hours of thesis in the fifth year, and then graduate with both MD and MSBME degrees.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree**

All students must take at least 15 credit hours at the 6000 level. At least 24 credit hours of the program of study must be coursework, exclusive of research and thesis hours.

All students must identify an adviser and file an official program of study prior to the completion of 9 credit hours of study. Students should consult with the MAE Graduate Program Director for assistance in filling out their program of study. The program of study must be approved by the department.

A student with an undergraduate degree outside of the selected departmental discipline may be required to satisfy an articulation program. Substitutions to the program of study must be approved by the student's faculty adviser and department. More information is available on the MAE departmental website (http://www.mae.ucf.edu/).

### Required Courses—24 Credit Hours

#### Core Courses—18 Credit Hours

- BMS 6001 - Cellular Function and Medical Genetics 5 Credit Hours (Medical Module)
- BSC 6433 - Biomedical Sciences II 5 Credit Hours  
  - replace EML 5587C and EML 5588C (9 credit hours transferred into MS program of study)
- BME 6500C - Bioinstrumentation 3 Credit Hours
- BME 6935 - Topics in Biomedical Engineering 3 Credit Hours
- EML 6211 - Continuum Mechanics 3 Credit Hours

#### Concentration—6 Credit Hours

**Biofluids**

- BME 5267 - Biofluid Mechanics 3 Credit Hours
- BME 5268C - Applied and Computational Biofluids 3 Credit Hours

**Biomechanics**

- BME 6215 - Advanced Biomechanics 3 Credit Hours
- EML 6067 - Finite Elements in Mechanical, Materials, and Aerospace Engineering 13 Credit Hours

**Representative Electives**

- BME 5572 - Biomedical Nanotechnology 3 Credit Hours
- BSC 5418 - Tissue Engineering 3 Credit Hours
- EEE 5265 - Biomedical Effects and Applications of Electromagnetic Energy 3 Credit Hours
- EEE 5272 - Biomedical Sensors 3 Credit Hours
- EEL 5690 - Introduction to Medical Robotics and Tele-Operation 3 Credit Hours
- EMA 5060 - Polymer Science and Engineering 3 Credit Hours
- EMA 5584 - Biomaterials 3 Credit Hours
- EMA 5588 - Biocompatibility of Materials 3 Credit Hours
- EML 5060 - Mathematical Methods in Mechanical and Aerospace Engineering 3 Credit Hours
- EML 5066 - Computational Methods in Mechanical and Aerospace Engineering 3 Credit Hours
- EML 5237 - Intermediate Mechanics of Materials 3 Credit Hours
- EML 5291 - MEMS Materials 3 Credit Hours
- EML 5546 - Engineering Design with Composite Materials 3 Credit Hours
- EML 6068 - Finite Elements in Mechanical, Materials, and Aerospace Engineering II 3 Credit Hours
- EML 6299 - Advanced Topics on Miniaturization 3 Credit Hours
- ESI 5219 - Engineering Statistics 3 Credit Hours
- ESI 6247 - Experimental Design and Taguchi Methods 3 Credit Hours
- ESI 6609 - Industrial Engineering Analytics for Healthcare 3 Credit Hours
- IDS 5127 - Foundation of Bio-Imaging Science 3 Credit Hours
- IDS 6252 - Biomedical Nanotechnology 3 Credit Hours
- IDS 6253 - Bioanalytical Technology 3 Credit Hours

#### Thesis—6 Credit Hours

Students may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the student's program of study and the proposed thesis topic.
The College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website (www.cecs.ucf.edu) and on the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.

- **BME 6971 - Thesis VAR Credit Hours**

**MAE Department Graduate Seminar Requirement**

The MAE Graduate Seminar is a zero credit hour (S/U) course that is offered each Fall and Spring academic semesters. All MAE graduate students who are pursuing the MSBME are required to register, participate in, and receive a satisfactory (S) grade for two semesters of MAE Graduate Seminar prior to graduation.

**Independent Learning**

The Independent Learning Requirement is met by successful completion of a master's thesis.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Students interested in pursuing both the MD and MSBME degrees must apply and be accepted into medical school and the Biomedical Engineering MS program. Separate applications are required, but students wishing to pursue this joint degree program should indicate this and state their reasons on both applications. Information regarding admission and application to UCF's MD program can be found at https://med.ucf.edu/administrative-offices/student-affairs/admissions/

Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biomedical, Mechanical or Aerospace Engineering, or a closely related discipline.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.
- In addition to the above requirements, students must also meet the requirements for medical school admission: https://med.ucf.edu/administrative-offices/student-affairs/admissions/

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the MMAE graduate program director for further information.

**Application Deadlines**

Biomedical Sciences MS

Program Description

This program is no longer accepting applications for Fall 2018.

The Master of Science in Biomedical Sciences program is a nonthesis program for students who wish to further their knowledge in the field and prepare for professional careers in medical fields, higher education, and research. Students interested in research and thesis work should apply to the Master of Science in Biotechnology program.

Curriculum

The Biomedical Sciences nonthesis program requires a minimum of 33 credit hours of courses that includes a capstone experience. The program addresses the need of applicants who wish to pursue a teaching career in secondary schools, two-year and four-year colleges or other careers without an active research role. Nonthesis students are not considered for departmental graduate assistantships or tuition assistance.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—18 Credit Hours

- BSC 6431 - Practice of Biomedical Sciences 3 Credit Hours
- BSC 6432 - Biomedical Sciences I 5 Credit Hours
- BSC 6433 - Biomedical Sciences II 5 Credit Hours
- BSC 6407C - Laboratory Methods in Molecular Biology 3 Credit Hours
- MCB 6938 - Seminar 1 Credit Hour (to be repeated by all students) or
- IDS 7690 - Frontiers in Biomedical Sciences 1 Credit Hours (to be repeated by all students)

Elective Courses—12 Credit Hours

Nonthesis students take 12 credit hours of electives with 6 credit hours from the Biomedical Specialization and 6 credit hours from the Microbiology Specialization.

Biomedical Specialization

- BSC 5418 - Tissue Engineering 3 Credit Hours
- MCB 5225 - Molecular Biology of Disease 3 Credit Hours
- MCB 6226 - Molecular Diagnostics 3 Credit Hours
- PCB 5238 - Immunobiology 3 Credit Hours
- PCB 5236 - Cancer Biology 3 Credit Hours
- PCB 5275 - Signal Transduction Mechanics 3 Credit Hours
- PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours
- PCB 5709C - Laboratory Virtual Simulations in Physiology 3 Credit Hours
- PCB 5815 - Molecular Aspects of Obesity, Diabetes and Metabolism 3 Credit Hours
- PCB 5834C - Advanced Human Physiology 4 Credit Hours
- IDS 5127 - Foundation of Bio-Imaging Science 3 Credit Hours
- PCB 5265 - Stem Cell Biology 3 Credit Hours
- GEB 5516 - Technological Entrepreneurship 3 Credit Hours

Others: If approved by Graduate Committee

Microbiology Specialization

- MCB 5205 - Infectious Processes 3 Credit Hours
- MCB 5505 - Molecular Virology 3 Credit Hours
- MCB 5208 - Cellular Microbiology: Host-Pathogen Interactions 3 Credit Hours
- MCB 6417C - Microbial Metabolism 3 Credit Hours
- MCB 5932 - Current Topics in Molecular Biology VAR Credit Hours
- MCB 5415 - Cellular Metabolism 3 Credit Hours
- MCB 5209 - Microbial Stress Response 3 Credit Hours
- PCB 6595 - Regulation of Gene Expression 3 Credit Hours
- PCB 5235 - Molecular Immunology 3 Credit Hours

Others: If approved by Graduate Committee

Capstone—3 Credit Hours

An in-depth current literature research report on a relevant subject will be required for each student. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

An oral presentation on the written capstone report will be used as a final examination. A majority of the program faculty must be present for the final examination. Before graduation, the report should be submitted for consideration of publication as a review article in appropriate journals.

- MCB 6026 - Molecular Biology and Microbiology Capstone 3 Credit Hours (minimum)

Comprehensive Examination

Nonthesis students must pass an oral comprehensive exam to qualify for the Master of Science degree.

Students must successfully pass an oral comprehensive examination to test the understanding of the basic concepts in the field and relevant applications. The comprehensive examination will be conducted during the capstone defense and will be administered by the capstone committee. Should the student fail this exam, a second opportunity will be provided within 2 weeks of the first attempt. A second failure will result in dismissal from the program.

Teaching Requirement

Students without significant prior teaching experience, such as, but not limited to, a minimum of a year in secondary schools or colleges, are required to serve as Classroom Laboratory Assistants (CLA) for a minimum of one semester.

Independent Learning

In the final semester of study, nonthesis students will complete a capstone course that requires an in-depth current literature research report on a relevant subject, which will serve as the independent learning experience. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biological Sciences or related area.
- Official, competitive GRE score (taken within the last five years) or MCAT score (taken within the last three years).
- Three letters of recommendation.
- A written statement of research experience, area of interest, and immediate and long-range goals.
- Resume or CV.

Personal interviews are helpful but not required. Applicants who do not have a competitive GPA or GRE/MCAT may occasionally be accepted if there is other convincing evidence of potential for high achievement and success.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours of credit in the biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills.
equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

Biomedical Sciences MS, Cancer Biology Track

Track Description

This track is no longer accepting applications for Fall 2018.

The Cancer Biology Track in the Master of Science in Biomedical Sciences Program is a nonthesis plan of study for students who want to further their knowledge in the cancer biology field and who may pursue doctoral training or professional education focused on medicine and cancer biology. Students interested in research and thesis work should apply to the Master of Science in Biotechnology Program.

Curriculum

The Cancer Biology Track in the Biomedical Sciences MS program requires a minimum of 33 credit hours of courses that includes a capstone experience. Students take 18 credit hours of required core courses, 12 credit hours of elective courses relevant to cancer biology and related disciplines, a capstone project focusing on cancer biology and an oral comprehensive exam.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

Nonthesis students are not considered for departmental graduate assistantships or tuition assistance.
Required Courses—18 Credit Hours

- BSC 6432 - Biomedical Sciences I 5 Credit Hours
- BSC 6433 - Biomedical Sciences II 5 Credit Hours
- BSC 6407C - Laboratory Methods in Molecular Biology 3 Credit Hours
- PCB 5236 - Cancer Biology 3 Credit Hours
- MCB 6938 - Seminar 1 Credit Hour (to be repeated by all students) or
- IDS 7680 - Seminar 1 Credit Hour (to be repeated by all students)

Elective Courses—12 Credit Hours

- PCB 5025 - Molecular and Cellular Pharmacology 3 Credit Hours
- MCB 5415 - Cellular Metabolism 3 Credit Hours
- PCB 5235 - Molecular Immunology 3 Credit Hours
- MCB 5225 - Molecular Biology of Disease 3 Credit Hours
- PCB 6595 - Regulation of Gene Expression 3 Credit Hours
- MCB 5505 - Molecular Virology 3 Credit Hours
- PCB 5275 - Signal Transduction Mechanics 3 Credit Hours
- MCB 6226 - Molecular Diagnostics 3 Credit Hours
- IDS 5127 - Foundation of Bio-Imaging Science 3 Credit Hours
- BSC 5418 - Tissue Engineering 3 Credit Hours
- BSC 5436 - Biomedical Informatics : Structure Analysis 3 Credit Hours
- PCB 5265 - Stem Cell Biology 3 Credit Hours
- Other elective courses must be approved by the Program Coordinator.

Capstone—3 Credit Hours

An in-depth current literature research report in the area of Cancer Biology will be required for each student. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

- MCB 6026 - Molecular Biology and Microbiology Capstone 3 Credit Hours (minimum)

The Capstone Process

Students are encouraged to contact faculty as early as possible in order to identify a faculty whose research focus complements the student's interest. The student and the mentor should select two additional faculty members to serve on the capstone evaluation committee.

Students must submit a signed Capstone Committee form to the Program Coordinator for approval as soon as the registration for the course is complete. The form must be submitted to the Program Office.

When you are ready to defend your Capstone project, you must register for the capstone course (MCB 6026) for three credit hours. It is important that the student register for the capstone course with the intention of completing the project at the end of the semester.

The Capstone Report

Evaluation of the capstone project requires a written report (in the format of a mini-review manuscript) and a presentation (project defense) in front of the capstone committee. Students may ask for advice and guidance from the project mentor/chair. The average capstone report ranges from 10 to 15 single-spaced pages in a manuscript format with proper citations. The student's Committee Chair will be responsible for checking the report for plagiarism using either Turnitin or iThenticate before the report is shared with the committee. The committee must receive the report at least one week before the time of presentation.

Note: The defense (presentation) must be held no later than one week before final exam week.

The Capstone Defense/Comprehensive Exam

The capstone defense and comprehensive exam evaluation is designed to assess the student's knowledge and understanding of the project and other relevant subjects in the field. Questions asked by the capstone committee to evaluate the student as competent in the field will satisfy the requirement of the comprehensive exam. The oral presentation will take place in the form of a 30-40 minute seminar and will be followed by questions and discussion.

The student will be evaluated on performance in all three sections (written report, oral presentation and ability to answer questions).

Should the student fail, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in an Unsatisfactory (U) grade in the course and dismissal from the program.
Comprehensive Examination

Students must pass an oral comprehensive exam to qualify for the Master of Science. The oral comprehensive exam tests the student's understanding of the basic concepts in the field and relevant applications. The comprehensive exam will be conducted during the capstone defense and will be administered by the capstone committee. Should the student fail this exam, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in dismissal from the program.

Teaching Requirement

Students without significant prior teaching experience, such as, but not limited to, a minimum of a year in secondary schools or colleges, are required to serve as Classroom Laboratory Assistants (CLA) for a minimum of one semester (one semester in at least one lab section).

Research Shadowing (Optional)

Students are encouraged to discuss with their capstone mentor the possibility of joining the lab for research shadowing of other graduate students. Acquired lab skills should assist students with the capstone project and with future endeavors.

Independent Learning

In the final semester of study, students will complete a capstone course that requires an in-depth current literature research report on a relevant subject, which will serve as the independent learning experience. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biological Sciences or related area.
- Official, competitive GRE score (taken within the last five years) or MCAT score (taken within the last three years).
- Three letters of recommendation.
- A written statement of research experience, area of interest, and immediate and long-range goals.
- Resume or CV.

Personal interviews are helpful but not required. Applicants who do not have a competitive GPA or GRE/MCAT may occasionally be accepted if there is other convincing evidence of potential for high achievement and success.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours of credit in the biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.
Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Biomedical Sciences MS,
Genetic Counseling Track

Track Description

The nonthesis Genetic Counseling track in the Biomedical Sciences MS program requires a minimum of 33 credit hours of courses that includes a capstone experience. The program addresses the need of applicants who want to further their knowledge in the areas of medical genetics and genomics, and who wish to become board certified through the American Board of Genetic Counseling and enter the clinical workforce as a genetic counselor. For more information on the American Board of Genetic Counseling, click here. For additional resources and information, visit The National Society of Genetic Counselors here.

Curriculum

Students in the Genetic Counseling track take a series of required core courses, with the remaining courses and clinical rotations relevant to Genetic Counseling. All students complete a required capstone project related to clinic Genetic Counseling.

Nonthesis students are not considered for departmental graduate assistantships or tuition assistance.

Required Core Courses—19 Credit Hours

- BSC 6432 - Biomedical Sciences I 5 Credit Hours
- BSC 6433 - Biomedical Sciences II 5 Credit Hours
- PHI 5634 - Medical Ethics 3 Credit Hours
- BMS 5665 Clinical Embryology and Congenital Malformations (3 Credit Hours)
- MCB 6938 Seminar (1 Credit Hour) or
- IDS 7690 - Frontiers in Biomedical Sciences 1 Credit Hours (Taken three semesters to be repeated by all students.)

Genetic Counseling Courses—11 Credit Hours

- BMS 6760 - Introduction to Genetic Counseling 1 3 Credit Hours
- BMS 6762 - Advanced Genetic Counseling 1 3 Credit Hours
- BMS 6765 - Genetic Diseases of Human Organ Systems 3 Credit Hours (with lab)
- BMS 6766 - Inborn Errors of Metabolism 3 Credit Hours
- MDE 6170 - Core Clinical Rotation - Prenatal Genetics 1 Credit Hours
- MDE 6171 - Core Clinical Rotation - Pediatric Genetics 1 Credit Hours
- MDE 6172 - Core Clinical Rotation - Adult Oncology Genetics 1 Credit Hours

Capstone—3 Credit Hours

An in-depth current literature research report in the area of Infectious Disease will be required for each student. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

- MCB 6026 - Molecular Biology and Microbiology Capstone 3 Credit Hours

The Capstone Process

Students are encouraged to contact faculty as early as possible in order to identify a faculty whose research focus complements the student’s interest. The student and the mentor should select two additional faculty members to serve on the capstone evaluation committee.

Students without significant prior teaching experience, such as, but not limited to, a minimum of a year in secondary schools or colleges, are required to serve as Classroom Laboratory Assistants (CLA) for a minimum of one semester (one semester in at least one lab section).

Suggested Choreography

Year 1

Fall Semester—10 Credit Hours

- BSC 6432 - Biomedical Sciences I 5 Credit Hours
- MCB 6938 - Seminar 1 Credit Hour
- BMS 6760 - Introduction to Genetic Counseling 1 Credit Hours (Will include 4 half-day observational rotations.)
- PHI 5634 - Medical Ethics 3 Credit Hours

Spring Semester—9 Credit Hours

- BSC 6433 - Biomedical Sciences II 5 Credit Hours
- MCB 6938 - Seminar 1 Credit Hour
- BMS 5665 Clinical Embryology and Congenital Malformations (3 Credit Hours)
- MDE 6170 - Core Clinical Rotation - Prenatal Genetics 1 Credit Hours
  OR
- MDE 6171 - Core Clinical Rotation - Pediatric Genetics 1 Credit Hours
  OR
- MDE 6172 - Core Clinical Rotation - Adult Oncology Genetics 1 Credit Hours (Clinical Rotation 1: Six weeks in one of the following rotations: Prenatal, Pediatrics, or Adult Oncology)
- Clinical Rotation 2 (elective) - Six weeks in one of the following rotations: Prenatal, Pediatrics, Adult Oncology, or Specialty (Meeting Teaching/Professional development requirement (no credit))
Summer Semester—4 Credit Hours

- MDE 6170 - Core Clinical Rotation - Prenatal Genetics 1 Credit Hours
  - OR
- MDE 6171 - Core Clinical Rotation - Pediatric Genetics 1 Credit Hours
  - OR
- MDE 6172 - Core Clinical Rotation - Adult Oncology Genetics 1 Credit Hours (Clinical Rotation 1: Six weeks in one of the following rotations: Prenatal, Pediatrics, or Adult Oncology.)
- Clinical Rotation 2 (elective) - Six weeks in one of the following rotations: Prenatal, Pediatrics, Adult Oncology, or Specialty (Meets Teaching/Professional development requirement (no credit))
- BMS 6766 - Inborn Errors of Metabolism 3 Credit Hours

Year 2

Fall Semester—6 Credit Hours

- MDE 6170 - Core Clinical Rotation - Prenatal Genetics 1 Credit Hours
  - OR
- MDE 6171 - Core Clinical Rotation - Pediatric Genetics 1 Credit Hours
  - OR
- MDE 6172 - Core Clinical Rotation - Adult Oncology Genetics 1 Credit Hours (Clinical Rotation 3: Six weeks in one of the following rotations: Prenatal, Pediatrics, or Adult Oncology)
- BMS 6762 - Advanced Genetic Counseling 1.3 Credit Hours
- MCB 6938 - Seminar 1 Credit Hour
- BMS 6765 - Genetic Diseases of Human Organ Systems 3 Credit Hours (Will include 4 half-day observational rotations.)

Spring Semester—4 Credit Hours

- Clinical Rotation 4 (elective): Six weeks in one of the following rotations: Prenatal, Pediatrics, Adult Oncology or Specialty (Meets Teaching/Professional development requirement (no credit))
- MDE 6170 - Core Clinical Rotation - Prenatal Genetics 1 Credit Hours
  - OR
- MDE 6171 - Core Clinical Rotation - Pediatric Genetics 1 Credit Hours
  - OR
- MDE 6172 - Core Clinical Rotation - Adult Oncology Genetics 1 Credit Hours Clinical Rotation 5: Six weeks in one of the following rotations: Prenatal, Pediatrics, or Adult Oncology.
- MCB 6026 - Molecular Biology and Microbiology Capstone 3 Credit Hours

Independent Learning

In the final semester of study, students will complete a capstone course that requires an in-depth current literature research report on a relevant subject, which will serve as the independent learning experience. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score (taken within the last five years) or MCAT score (taken within the last three years). The 2017 data for students accepted into genetic counseling training programs shows an average GPA of 3.55 and GRE scores of 75% Verbal, 65 percent Non-Verbal, and 71% Analytical. The general Graduate School GPA/GRE/TOEFL requirements can be found here sciences.ucf.edu/statistics/graduate/admissions/.
- Three letters of recommendation.
- A written statement of research experience, area of interest, and immediate and long-range goals.
- An interview for admission into the program is required, please contact the program director for details.
- Resume
- Background Check*
- Drug Screen*
- Immunizations up to date*
- CPR certification
Applicants who do not have a competitive GPA or GRE/MCAT may occasionally be accepted if there is other convincing evidence of potential for high achievement and success.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours of credit in the biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

*UCF will facilitate the completion of these requirements. Please contact the College of Graduate Studies at 407-823-2766 for further information.

Suggested, but not required:

Counseling Experience: Applicants are encouraged to have some counseling experience which may be obtained in a number of ways, including, but not limited to crisis counseling, peer counseling, domestic abuse, or planned parenthood Genetic Counseling Exposure: Shadowing a genetic counselor or having a genetic counseling internship are both valuable experiences, however, we understand these any be difficult to arrange. Speaking with a genetic counselor about the field is also a valuable experience. Exposure to people with a chronic illness or a disability through volunteer work with Special Olympics or camps specific for children with disabilities. Laboratory experience Research experience Varied volunteer and work experiences

**This Program is under development. Due to recent changes by the Accreditation Council for Genetic Counseling, we do not anticipate our Inaugural Class before August 2019. This website will be updated as new information becomes available. Cathleen.McCann@ucf.edu, Program Director

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

UCF College of Medicine
Biomedical Sciences MS, Infectious Disease Track

Track Description

This track is no longer accepting applications for Fall 2018.

The Infectious Disease Track in the Master of Science in Biomedical Sciences Program is a nonthesis plan of study for students who want to further their knowledge in the infectious disease field and who may pursue doctoral training or professional education focused on medicine and infectious disease. Students interested in research and thesis work should apply to the Master of Science in Biotechnology Program.

Curriculum

The Infectious Disease Track in the Biomedical Sciences MS program requires a minimum of 33 credit hours of courses that includes a capstone experience. Students take 18 credit hours of required core courses, 12 credit hours of elective courses relevant to infectious disease, a capstone project focusing on infectious disease and an oral comprehensive exam.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

Nonthesis students are not considered for departmental graduate assistantships or tuition assistance.

Required Courses—18 Credit Hours

- BSC 6432 - Biomedical Sciences I 5 Credit Hours
- BSC 6433 - Biomedical Sciences II 5 Credit Hours
- BSC 6407C - Laboratory Methods in Molecular Biology 3 Credit Hours
- MCB 5208 - Cellular Microbiology: Host-Pathogen Interactions 3 Credit Hours
- MCB 5209 - Microbial Stress Response 3 Credit Hours
- MCB 6417C - Microbial Metabolism 3 Credit Hours
- MCB 5932 - Current Topics in Molecular Biology VAR Credit Hours
- MCB 5415 - Cellular Metabolism 3 Credit Hours
- MCB 5225 - Molecular Biology of Disease 3 Credit Hours
- PCB 6595 - Regulation of Gene Expression 3 Credit Hours
- PCB 5235 - Molecular Immunology 3 Credit Hours
- PCB 5275 - Signal Transduction Mechanics 3 Credit Hours
- MCB 5505 - Molecular Virology 3 Credit Hours
- MCB 6417C - Microbial Metabolism 3 Credit Hours
- MCB 5932 - Current Topics in Molecular Biology VAR Credit Hours
- MCB 5415 - Cellular Metabolism 3 Credit Hours
- MCB 5225 - Molecular Biology of Disease 3 Credit Hours
- PCB 6595 - Regulation of Gene Expression 3 Credit Hours
- PCB 5235 - Molecular Immunology 3 Credit Hours
- PCB 5275 - Signal Transduction Mechanics 3 Credit Hours
- MCB 5505 - Molecular Virology 3 Credit Hours

Elective Courses—12 Credit Hours

- PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours
- MCB 5205 - Infectious Processes 3 Credit Hours
- MCB 5932 - Current Topics in Molecular Biology VAR Credit Hours
- MCB 5415 - Cellular Metabolism 3 Credit Hours
- MCB 5225 - Molecular Biology of Disease 3 Credit Hours
- PCB 6595 - Regulation of Gene Expression 3 Credit Hours
- PCB 5235 - Molecular Immunology 3 Credit Hours
- PCB 5275 - Signal Transduction Mechanics 3 Credit Hours
- MCB 5505 - Molecular Virology 3 Credit Hours

Capstone—3 Credit Hours

An in-depth current literature research report in the area of Infectious Disease will be required for each student. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

- MCB 6026 - Molecular Biology and Microbiology Capstone 3 Credit Hours (minimum)

The Capstone Process

Students are encouraged to contact faculty as early as possible in order to identify a faculty whose research focus complements the student's interest. The student and the mentor should select two additional faculty members to serve on the capstone evaluation committee.

Students must submit a signed Capstone Committee form to the Program Coordinator for approval as soon as the registration for the course is complete. The form must be submitted to the Program Office.

When you are ready to defend your Capstone project, you must register for the capstone course (MCB 6026) for three credit hours. It is important that the student register for the capstone course with the intention of completing the project at the end of the semester.

The Capstone Report

Evaluation of the capstone project requires a written report (in the format of a mini-review manuscript) and a presentation (project defense) in front of the capstone committee. Students
may ask for advice and guidance from the project mentor/chair. The average capstone report ranges from 10 to 15 single-spaced pages in a manuscript format with proper citations. The student's Committee Chair will be responsible for checking the report for plagiarism using either Turnitin or iThenticate before the report is shared with the committee. The committee must receive the report at least one week before the time of presentation.

Note: The defense (presentation) must be held no later than one week before final exam week.

The Capstone Defense/Comprehensive Exam

The capstone defense and comprehensive exam evaluation is designed to assess the student's knowledge and understanding of the project and other relevant subjects in the field. Questions asked by the capstone committee to evaluate the student as competent in the field will satisfy the requirement of the comprehensive exam. The oral presentation will take place in the form of a 30-40 minute seminar and will be followed by questions and discussion.

The student will be evaluated on performance in all three sections (written report, oral presentation and ability to answer questions).

Should the student fail, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in an Unsatisfactory (U) grade in the course and dismissal from the program.

Comprehensive Examination

Students must pass an oral comprehensive exam to qualify for the Master of Science. The oral comprehensive exam tests the student's understanding of the basic concepts in the field and relevant applications. The comprehensive exam will be conducted during the capstone defense and will be administered by the capstone committee. Should the student fail this exam, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in dismissal from the program.

Teaching Requirement

Students without significant prior teaching experience, such as, but not limited to, a minimum of a year in secondary schools or colleges, are required to serve as Classroom Laboratory Assistants (CLA) for a minimum of one semester (one semester in at least one lab section).

Research Shadowing (Optional)

Students are encouraged to discuss with their capstone mentor the possibility of joining the lab for research shadowing of other graduate students. Acquired lab skills should assist students with the capstone project and with future endeavors.

Independent Learning

In the final semester of study, students will complete a capstone course that requires an in-depth current literature research report on a relevant subject, which will serve as the independent learning experience. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

Application Requirements

Biomedical Sciences MS, Integrated Medical Sciences Track

Track Description

This track is no longer accepting applications for Fall 2018.

The non-thesis Integrated Medical Sciences Track in the Biomedical Sciences MS program is designed to prepare advance students for acceptance into medical, dental, osteopathic, and/or other related professional schools of their choice by providing them with an opportunity to take two first-year medical school courses with the medical students in combination with graduate courses in biomedical sciences.

Curriculum

The Integrated Medical Sciences Track in the Biomedical Sciences MS program requires a minimum of 33 credit hours of courses that includes a capstone experience. Students take 18 credit hours of required core courses including two medical school courses (5 credits each), 12 credit hours of graduate elective courses in biomedical sciences, a capstone project focusing on integrated medical sciences, and an oral comprehensive exam on the capstone project.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

Nonthesis students are not considered for departmental graduate assistantships or tuition assistance.

Required Courses—18 Credit Hours

- BMS 6001 - Cellular Function and Medical Genetics 5 Credit Hours (HB-1, Med-Ed)
- BMS 6006 - Health and Disease 5 Credit Hours (HB-3, Med-Ed)
- MCB 6938 - Seminar 1 Credit Hour (to be repeated by all students, except those taking the 7-credit option from the list below as these students will only need 1 credit of Seminar to achieve a total of 18 credits of required course work for this track) or
- IDS 7680 - Seminar 1 Credit Hour (to be repeated by all students, except those taking the 7-credit option from the list below as these students will only need 1 credit of Seminar to achieve a total of 18 credits of required course work for this track)
Student take one of the following three options:

- PCB 5834C - Advanced Human Physiology 4 Credit Hours and
- PCB 5709C - Laboratory Virtual Simulations in Physiology 3 Credit Hours (Note: Students selecting the 7 credit option will only have to take 1 credit hour of Seminar.)

- PHT 6115C - Gross Anatomy/Neuroscience I 6 Credit Hours and
- PHT 6115L - Gross Anatomy/Neuroscience I Lab 2 Credit Hours

- BSC 5665 - Clinical Embryology and Congenital Malformations 3 Credit Hours and
- ZOO 5758C - Vertebrate Histology 4 Credit Hours (Note: Students selecting the 7 credit option will only have to take 1 credit hour of Seminar.)

Elective Courses—12 Credit Hours

Students take 12 credit hours of electives with 6 credit hours from the Biomedical Specialization and 6 credit hours from the Microbiology Specialization.

Biomedical Specialization

- MCB 5225 - Molecular Biology of Disease 3 Credit Hours
- MCB 6226 - Molecular Diagnostics 3 Credit Hours
- PCB 5238 - Immunobiology 3 Credit Hours
- PCB 5236 - Cancer Biology 3 Credit Hours
- PCB 5265 - Stem Cell Biology 3 Credit Hours
- PCB 5275 - Signal Transduction Mechanics 3 Credit Hours
- PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours
- PCB 5709C - Laboratory Virtual Simulations in Physiology 3 Credit Hours
- PCB 5815 - Molecular Aspects of Obesity, Diabetes and Metabolism 3 Credit Hours
- PCB 5834C - Advanced Human Physiology 4 Credit Hours
- IDS 5127 - Foundation of Bio-Imaging Science 3 Credit Hours
- BSC 5418 - Tissue Engineering 3 Credit Hours
- GEB 5516 - Technological Entrepreneurship 3 Credit Hours
- ZOO 5748C - Clinical Neuroanatomy 5 Credit Hours
- ZOO 5749C - Clinical Neuroscience 5 Credit Hours

Other courses may be substituted with approval by the graduate committee.

Microbiology Specialization

- MCB 5205 - Infectious Processes 3 Credit Hours
- MCB 5505 - Molecular Virology 3 Credit Hours
- MCB 5208 - Cellular Microbiology: Host-Pathogen Interactions 3 Credit Hours
- MCB 5654C - Applied Industrial Microbiology 3 Credit Hours
- MCB 6417C - Microbial Metabolism 3 Credit Hours
- MCB 5932 - Current Topics in Molecular Biology 3 Credit Hours
- MCB 5415 - Cellular Metabolism 3 Credit Hours
- MCB 5209 - Microbial Stress Response 3 Credit Hours
- PCB 5235 - Molecular Immunology 3 Credit Hours

Other courses may be substituted with approval by the graduate committee.

Capstone—3 Credit Hours

The Capstone Project for the IMS Track is customizable based on student needs. Options include the following:

- Scholarly in-depth literature review in biomedical and/or clinical sciences (report required)
- Physician-Shadowing Experience (report required)
- Service-Learning/Volunteer Work Experience (report required)
- Laboratory Research (report required)
- Other (must be pre-approved by the program coordinator/director) (report required)
- MCB 6026 - Molecular Biology and Microbiology Capstone 3 Credit Hours (minimum)

The Capstone Process

Students are encouraged to contact faculty as early as possible in order to identify a faculty whose research focus complements the student's interest. The student and the mentor should select one additional faculty member to serve on the capstone evaluation committee.

Students must submit a signed Capstone Committee form to the Program Coordinator for approval as soon as the registration for the course is complete. The form must be submitted to the Program Office.
When you are ready to defend your Capstone project, you must register for the capstone course (MCB 6026) for three credit hours. It is important that the student register for the capstone course with the intention of completing the project at the end of the semester.

The Capstone Report

Evaluation of the capstone project requires a written report (in the format of a mini-review manuscript) and a presentation (project defense) in front of the capstone committee. Students may ask for advice and guidance from the project mentor/chair. The average capstone report ranges from 10 to 15 single-spaced pages in a manuscript format with proper citations. The student's Committee Chair will be responsible for checking the report for plagiarism using either Turnitin or iThenticate before the report is shared with the committee. The committee must receive the report at least one week before the time of presentation.

Note: The defense (presentation) must be held no later than one week before final exam week.

The Capstone Defense/Comprehensive Exam

The capstone defense and comprehensive exam evaluation is designed to assess the student's knowledge and understanding of the project and other relevant subjects in the field. Questions asked by the capstone committee to evaluate the student as competent in the field will satisfy the requirement of the comprehensive exam. The oral presentation will take place in the form of a 30-40 minute seminar and will be followed by questions and discussion.

The student will be evaluated on performance in all three sections (written report, oral presentation and ability to answer questions).

Should the student fail, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in an Unsatisfactory (U) grade in the course and dismissal from the program.

Comprehensive Examination

Students must pass an oral comprehensive exam to qualify for the Master of Science. The oral comprehensive exam tests the student's understanding of the basic concepts in the field and relevant applications. The comprehensive exam will be conducted during the capstone defense and will be administered by the capstone committee. Should the student fail this exam, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in dismissal from the program.

Teaching Requirement

Students without significant prior teaching experience, such as, but not limited to, a minimum of a year in secondary schools or colleges, are required to serve as Classroom Laboratory Assistants (CLA) for a minimum of one semester (one semester in at least one lab section).

Research Shadowing (Optional)

Students are encouraged to discuss with their capstone mentor the possibility of joining the lab for research shadowing of other graduate students. Acquired lab skills should assist students with the capstone project and with future endeavors.

Independent Learning

In the final semester of study, students will complete a capstone course that requires an in-depth current literature research report on a relevant subject, which will serve as the independent learning experience. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biological Sciences or related area.
- Official, competitive GRE score (taken within the last five years) or MCAT score (taken within the last three years).
- Three letters of recommendation.
- A written statement of research experience, area of interest, and immediate and long-range goals.
- Resume

Personal interviews are helpful but not required. Applicants who do not have a competitive GPA or GRE/MCAT may
occasionally be accepted if there is other convincing evidence of potential for high achievement and success.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours of credit in the biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Biomedical Sciences MS, Metabolic and Cardiovascular Sciences Track

Track Description

This track is no longer accepting applications for Fall 2018.

The Metabolic and Cardiovascular Sciences Track in the Master of Science in Biomedical Sciences Program is a nonthesis plan of study for students who want to further their knowledge in the metabolic and cardiovascular sciences field and who may pursue doctoral training or professional education focused on medicine and metabolic and cardiovascular sciences. Students interested in research and thesis work should apply to the Master of Science in Biotechnology Program.

Curriculum

The Metabolic and Cardiovascular Sciences Track in the Master of Science in Biomedical Sciences Program is a nonthesis plan of study for students who want to further their knowledge in the metabolic and cardiovascular sciences field and who may pursue doctoral training or professional education focused on medicine and metabolic and cardiovascular sciences. Students interested in research and thesis work should apply to the Master of Science in Biotechnology Program.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

Nonthesis students are not considered for departmental graduate assistantships or tuition assistance.

Required Courses—18 Credit Hours

- BSC 6432 - Biomedical Sciences I 5 Credit Hours
- BSC 6433 - Biomedical Sciences II 5 Credit Hours
- BSC 6407C - Laboratory Methods in Molecular Biology 3 Credit Hours
• PCB 5815 - Molecular Aspects of Obesity, Diabetes and Metabolism 3 Credit Hours

• MCB 6938 - Seminar 1 Credit Hour (to be repeated by all students) or

• IDS 7680 - Seminar 1 Credit Hour (to be repeated by all students)

Elective Courses—12 Credit Hours

• MCB 5415 - Cellular Metabolism 3 Credit Hours
• PCB 5834C - Advanced Human Physiology 4 Credit Hours
• PCB 5265 - Stem Cell Biology 3 Credit Hours
• CHM 5305 - Applied Biological Chemistry 3 Credit Hours
• BSC 5436 - Biomedical Informatics: Structure Analysis 3 Credit Hours
• BSC 5418 - Tissue Engineering 3 Credit Hours
• PCB 5709C - Laboratory Virtual Simulations in Physiology 3 Credit Hours
• MCB 5225 - Molecular Biology of Disease 3 Credit Hours
• PET 6366 - Exercise, Nutrition and Weight Control 3 Credit Hours
• PET 6388 - Cardiovascular Physiology 3 Credit Hours

Other elective courses must be approved by the Program Coordinator.

Capstone—3 Credit Hours

An in-depth current literature research report in the area of Metabolic and Cardiovascular Sciences will be required for each student. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

• MCB 6026 - Molecular Biology and Microbiology Capstone 3 Credit Hours (minimum)

When you are ready to defend your Capstone project, you must register for the capstone course (MCB 6026) for three credit hours. It is important that the student register for the capstone course with the intention of completing the project at the end of the semester.

The Capstone Report

Evaluation of the capstone project requires a written report (in the format of a mini-review manuscript) and a presentation (project defense) in front of the capstone committee. Students may ask for advice and guidance from the project mentor/chair. The average capstone report ranges from 10 to 15 single-spaced pages in a manuscript format with proper citations. The student's Committee Chair will be responsible for checking the report for plagiarism using either Turnitin or iThenticate before the report is shared with the committee. The committee must receive the report at least one week before the time of presentation.

Note: The defense (presentation) must be held no later than one week before final exam week.

The Capstone Defense/Comprehensive Exam

Biomedical Sciences MS,
Neuroscience Track

Track Description

This track is no longer accepting applications for Fall 2018.

The Neuroscience Track in the Master of Science in Biomedical Sciences Program is a nonthesis plan of study for students who want to further their knowledge in the neuroscience field and who may pursue doctoral training or professional education focused on medicine and neuroscience. Students interested in research and thesis work should apply to the Master of Science in Biotechnology Program.

Curriculum

The Neuroscience Track in the Biomedical Sciences MS program requires a minimum of 33 credit hours of courses that includes a capstone experience. Students take 18 credit hours of required core courses, 12 credit hours of elective courses relevant to neuroscience, a capstone project focusing on neuroscience and an oral comprehensive exam.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

Nonthesis students are not considered for departmental graduate assistantships or tuition assistance.

Required Courses—18 Credit Hours

- BSC 6432 - Biomedical Sciences I 5 Credit Hours
- BSC 6433 - Biomedical Sciences II 5 Credit Hours
- BSC 6407C - Laboratory Methods in Molecular Biology 3 Credit Hours
- MCB 6938 - Seminar 1 Credit Hour (to be repeated by all students)
- IDS 7680 - Seminar 1 Credit Hour (to be repeated by all students)
- PCB 5837 - Cellular and Molecular Neuroscience 3 Credit Hours
- SPA 6417 - Cognitive/Communicative Disorders 3 Credit Hours
- PCB 5275 - Signal Transduction Mechanics 3 Credit Hours
- ZOO 5748C - Clinical Neuroanatomy 5 Credit Hours
- ZOO 5749C - Clinical Neuroscience 5 Credit Hours
- CAP 6616 - Neuroevolution and Generative and Developmental Systems 3 Credit Hours
- PCB 5838 - Cellular and Molecular Basis of Brain Functions 3 Credit Hours
- BSC 5418 - Tissue Engineering 3 Credit Hours
- PCB 5275 - Signal Transduction Mechanics 3 Credit Hours
- ZOO 5748C - Clinical Neuroanatomy 5 Credit Hours
- ZOO 5749C - Clinical Neuroscience 5 Credit Hours
- CAP 6616 - Neuroevolution and Generative and Developmental Systems 3 Credit Hours
- PCB 5837 - Cellular and Molecular Neuroscience 3 Credit Hours
- MCB 5225 - Molecular Biology of Disease 3 Credit Hours
- PCB 5834C - Advanced Human Physiology 4 Credit Hours
- EXP 5208 - Sensation and Perception 3 Credit Hours
- PSB 5005 - Physiological Psychology 3 Credit Hours
- EXP 6116 - Visual Performance 3 Credit Hours
- EXP 6506 - Human Cognition and Learning 3 Credit Hours
- PSB 6348 - The Neuroanatomical Basis of Psychological Function 3 Credit Hours
- PSB 6328 - Psychophysics 3 Credit Hours
- PSB 6352 - Neuroimaging Design and Analysis Methods 3 Credit Hours

Other elective courses must be approved by the Program Coordinator.

Capstone—3 Credit Hours

An in-depth current literature research report in the area of Neuroscience will be required for each student. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.
The Capstone Process

Students are encouraged to contact faculty as early as possible in order to identify a faculty whose research focus complements the student's interest. The student and the mentor should select two additional faculty members to serve on the capstone evaluation committee.

Students must submit a signed Capstone Committee form to the Program Coordinator for approval as soon as the registration for the course is complete. The form must be submitted to the Program Office.

When you are ready to defend your Capstone project, you must register for the capstone course (MCB 6026) for three credit hours. It is important that the student register for the capstone course with the intention of completing the project at the end of the semester.

The Capstone Report

Evaluation of the capstone project requires a written report (in the format of a mini-review manuscript) and a presentation (project defense) in front of the capstone committee. Students may ask for advice and guidance from the project mentor/chair. The average capstone report ranges from 10 to 15 single-spaced pages in a manuscript format with proper citations. The student's Committee Chair will be responsible for checking the report for plagiarism using either Turnitin or iThenticate before the report is shared with the committee. The committee must receive the report at least one week before the time of presentation.

Note: The defense (presentation) must be held no later than one week before final exam week.

The Capstone Defense/Comprehensive Exam

The capstone defense and comprehensive exam evaluation is designed to assess the student's knowledge and understanding of the project and other relevant subjects in the field. Questions asked by the capstone committee to evaluate the student as competent in the field will satisfy the requirement of the comprehensive exam. The oral presentation will take place in the form of a 30-40 minute seminar and will be followed by questions and discussion.

The student will be evaluated on performance in all three sections (written report, oral presentation and ability to answer questions).

Should the student fail, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in an Unsatisfactory (U) grade in the course and dismissal from the program.

Comprehensive Examination

Students must pass an oral comprehensive exam to qualify for the Master of Science. The oral comprehensive exam tests the student's understanding of the basic concepts in the field and relevant applications. The comprehensive exam will be conducted during the capstone defense and will be administered by the capstone committee. Should the student fail this exam, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in dismissal from the program.

Teaching Requirement

Students without significant prior teaching experience, such as, but not limited to, a minimum of a year in secondary schools or colleges, are required to serve as Graduate Teaching Assistants for a minimum of one semester (one semester in at least one lab section).

Research Shadowing (Optional)

Students are encouraged to discuss with their capstone mentor the possibility of joining the lab for research shadowing of other graduate students. Acquired lab skills should assist students with the capstone project and with future endeavors.

Independent Learning

In the final semester of study students will complete a capstone course that requires an in-depth current literature research report on a relevant subject, which will serve as the independent learning experience. The student will select a faculty adviser to chair a faculty committee of three members for evaluation of the report.

Application Requirements

UCF College of Medicine

**Biotechnology MS**

**Program Description**

This program is no longer accepting applications for Fall 2018.

The Master of Science in Biotechnology program in the College of Medicine will prepare students to function in the industrial biotechnology environment. This program is designed to give students broad knowledge and training in the scientific and practical aspects of biotechnology.

It involves innovative, hands-on and multidisciplinary learning approaches to educate and train students in scientific aspects of biotechnology. The courses and research training required of all students in this program are designed to develop independent thinking, teamwork and communication skills, which are highly desirable in the biotechnology industry. Students will be provided an industrial perspective and an understanding of product development at the same time as they are trained in the biotechnology techniques required for such development.
Curriculum

The Master of Science in Biotechnology program consists of a minimum of 30 semester credit hours of graduate courses offered by the Burnett School of Biomedical Sciences in the College of Medicine that includes 21 credit hours minimum of required courses, 3 credits of restricted electives, and 6 credit hours of thesis research as detailed below.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

What makes this program unique is the focus on practical training offered to graduate students through master's thesis research in molecular biotechnology to perform jobs in a laboratory environment that require scientific talent.

Required Courses—21 Credit Hours

Core—19 Credit Hours Minimum

Students must take the following courses plus at least two credit hours of graduate seminar.

- MCB 5722C - Methods in Biotechnology 4 Credit Hours or
- BSC 6407C - Laboratory Methods in Molecular Biology 3 Credit Hours
- BSC 6432 - Biomedical Sciences I 5 Credit Hours
- BSC 6433 - Biomedical Sciences II 5 Credit Hours
- BSC 6431 - Practice of Biomedical Sciences 3 Credit Hours
- PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours or
- BSC 5418 - Tissue Engineering 3 Credit Hours or
- MCB 6417C - Microbial Metabolism 3 Credit Hours or
- PC B 5025 - Molecular and Cellular Pharmacology 3 Credit Hours

Graduate Seminars—2 Credit Hours

Students will participate in at least two graduate seminar courses that will prepare them for making professional presentations with an emphasis in biotechnology. The courses will involve the participation of speakers from the biotechnology industry with emphasis on an industrial perspective on biotechnology applications and product development.

- MCB 6314 - Industrial Perspectives Seminar 1 Credit Hours
- MCB 6938 1 Credit Hour (1 semester only)

Elective Courses—3 Credit Hours

Students will select three credit hours of restricted electives from the list below.

- BSC 5418 - Tissue Engineering 3 Credit Hours
- BSC 5436 - Biomedical Informatics : Structure Analysis 3 Credit Hours
- BSC 6407C - Laboratory Methods in Molecular Biology 3 Credit Hours
- IDS 5127 - Foundation of Bio-Imaging Science 3 Credit Hours
- MCB 5205 - Infectious Processes 3 Credit Hours
- MCB 5208 - Cellular Microbiology: Host-Pathogen Interactions 3 Credit Hours
- MCB 5209 - Microbial Stress Response 3 Credit Hours
- MCB 5225 - Molecular Biology of Disease 3 Credit Hours
- MCB 5415 - Cellular Metabolism 3 Credit Hours
- MCB 5505 - Molecular Virology 3 Credit Hours
- MCB 5654 - Applied Microbiology 3 Credit Hours
- MCB 5722C - Methods in Biotechnology 4 Credit Hours
- MCB 5932 - Current Topics in Molecular Biology VAR Credit Hours
- MCB 6226 - Molecular Diagnostics 3 Credit Hours
- MCB 6417C - Microbial Metabolism 3 Credit Hours
- PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours
- PCB 5025 - Molecular and Cellular Pharmacology 3 Credit Hours
- PCB 5236 - Cancer Biology 3 Credit Hours
- PCB 5238 - Immunobiology 3 Credit Hours
- PCB 5596 - Biomedical Informatics: Sequence Analysis 3 Credit Hours
- PCB 5709C - Laboratory Virtual Simulations in Physiology 3 Credit Hours
- PCB 5834C - Advanced Human Physiology 4 Credit Hours
- PCB 5937 - Special Topics: Human Endocrinology 3 Credit Hours
- PCB 6528 - Plant Molecular Biology 3 Credit Hours
- PCB 6595 - Regulation of Gene Expression 3 Credit Hours
- PCB 5838 - Cellular and Molecular Basis of Brain Functions 3 Credit Hours
- PCB 5265 - Stem Cell Biology 3 Credit Hours
- PCB 5815 - Molecular Aspects of Obesity, Diabetes and Metabolism 3 Credit Hours
- ZOO 5745C - Essentials of Neuroanatomy 4 Credit Hours
- ZOO 5748C - Clinical Neuroanatomy 5 Credit Hours
- GEB 5516 - Technological Entrepreneurship 3 Credit Hours

Others: If approved by the Graduate Committee

**Thesis—6 Credit Hours**

Students will take a minimum of six credits of thesis research (MCB 6971) to complete their research and submit their thesis specializing in biotechnology research. Students are expected to have an in-depth discussion with at least three faculty members before choosing a laboratory for thesis research. The student and the Thesis Adviser/Major Professor will jointly recommend an advisory committee comprised of at least three members. The committee composition must reflect expertise relevant to the student's thesis research and must be approved by the Graduate Committee. Students switching to change the composition of the Thesis Advisory Committee must also obtain approval from the Graduate Committee.

**Thesis Proposal**

The thesis proposal defense requirement should be met and passed successfully no later than the end of the summer of the first year in the program. Students will not be allowed to register for courses for the Fall semester of their second year until this requirement is fulfilled. The Thesis Proposal requirement includes: a written 5-page thesis proposal, a thesis proposal defense in front of the thesis committee, and questions by the thesis committee to test the student's understanding of the basic concepts in the field and relevant applications. The student will be evaluated on performance in all three sections. Should the student fail, a second opportunity will be provided within 2 weeks of the first attempt. A second failure will result in dismissal from the program.

An oral thesis defense is required. The defense will be in the format of:

- A 50-minute presentation of the thesis work, including a 5-minute introduction
- A 10-minute free period for the general audience to ask questions
- A 1-hour closed-door examination by the Thesis Advisory Committee and the program faculty present

The thesis should be of significant scope and depth such that the work has made advances in the area of biotechnology. The MS thesis research must generate sufficient quantity and quality data to support the submission of a minimum of one manuscript. Approval of the final thesis will require consent from the majority of the Program Faculty who choose to review the thesis, inclusive of the Thesis Advisory Committee. Faculty members with dissenting vote on the thesis must provide written justification. Scientific journal review criteria will be used as guidelines by the faculty to evaluate the final thesis for its appropriateness for publication in the target journal.

Students will be evaluated on the progress in thesis research by the thesis advisory committee for fall and spring. Two consecutive unsatisfactory evaluations will result in dismissal from the program.

**Comprehensive Examination**

Students must pass a comprehensive exam to qualify for the Master of Science degree.

Students must successfully pass an oral comprehensive examination to test the understanding of the basic concepts in the field and relevant applications. The Comprehensive Examination will be conducted during the thesis proposal defense. The exam will be administered by the thesis committee. Should the student fail this exam, a second opportunity will be provided within 2 weeks of the first attempt. A second failure will result in dismissal from the program.

**Independent Learning**

The required thesis allows the student to engage in independent learning.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biological Sciences or related area.
- Official, competitive GRE score (taken within the last five years).
Three letters of recommendation.
A written statement of research experience, area of interest, and immediate and long-range goals.
Resume or CV

Personal interviews are helpful but not required. Applicants who do not have a competitive GPA or GRE may occasionally be accepted if there is other convincing evidence of potential for high achievement and success.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours of credit in the biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Biotechnology MS, Professional Science Master's Track

Track Description

The Professional Science Master's in Biotechnology in the College of Medicine will prepare students with practical training through biotechnology laboratory courses and an internship in a laboratory environment that requires understanding of scientific concepts.

The program is designed for individuals who desire to work in health and science-based professions or government careers, where workforce needs are increasing. Students have the option to obtain a Graduate Certificate in Technology Ventures.

Curriculum

Total Credit Hours Required: 42 Credit Hours Minimum beyond the Bachelor’s Degree

The Professional Science Master's (PSM) track in Biotechnology consists of 42 credit hours of graduate courses offered by the Burnett School of Biomedical Sciences in the College of Medicine, including 15 credit hours of required courses and graduate seminar, 9 credit hours of restricted
electives, 12 credit hours of professional content courses, and 6 credit hours of an internship as detailed below.

What makes this program unique is the focus on practical training offered to graduate students through biotechnology laboratory courses and internship in a laboratory environment that requires understanding of scientific concepts. The program is designed for individuals who desire to work in health and science-based professions or government careers, where workforce needs are increasing.

Students have the option to obtain a Graduate Certificate in Technology Ventures.

Required Courses—15 Credit Hours

Core—13 Credit Hours Minimum

- IDS 5127 - Foundation of Bio-Imaging Science 3 Credit Hours
- BSC 6431 - Practice of Biomedical Sciences 3 Credit Hours
- MCB 5722C - Methods in Biotechnology 4 Credit Hours
- PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours
  - or
- BSC 5418 - Tissue Engineering 3 Credit Hours
  - or
- MCB 6417C - Microbial Metabolism 3 Credit Hours
  - or
- PCB 5025 - Molecular and Cellular Pharmacology 3 Credit Hours

Graduate Seminar—2 Credit Hours

- MCB 6314 - Industrial Perspectives Seminar 1 Credit Hours
  - or
- MCB 6938 1 Credit Hour (1 semester only)

Elective Courses—9 Credit Hours

Students will select 9 credit hours of restricted electives from the list below.

- BSC 5418 - Tissue Engineering 3 Credit Hours
- BSC 5436 - Biomedical Informatics: Structure Analysis 3 Credit Hours
- CHS 6535 - Forensic Molecular Biology 3 Credit Hours
- CHS 6535L - Forensic Analysis of Biological Materials 3 Credit Hours
- CHS 6536 - Population Genetics and Genetic Data 3 Credit Hours
- GEB 5516 - Technological Entrepreneurship 3 Credit Hours
- MCB 5205 - Infectious Processes 3 Credit Hours
- MCB 5209 - Microbial Stress Response 3 Credit Hours
- MCB 5225 - Molecular Biology of Disease 3 Credit Hours
- MCB 5415 - Cellular Metabolism 3 Credit Hours
- MCB 5505 - Molecular Virology 3 Credit Hours
- MCB 5932 - Current Topics in Molecular Biology VAR Credit Hours
- MCB 6226 - Molecular Diagnostics 3 Credit Hours
- MCB 6417C - Microbial Metabolism 3 Credit Hours
- PCB 5236 - Cancer Biology 3 Credit Hours
- PCB 5238 - Immunobiology 3 Credit Hours
- PCB 5275 - Signal Transduction Mechanics 3 Credit Hours
- PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours
- PCB 5596 - Biomedical Informatics: Sequence Analysis 3 Credit Hours
- PCB 5834C - Advanced Human Physiology 4 Credit Hours
- PCB 5937 - Special Topics: Human Endocrinology 3 Credit Hours
- PCB 6528 - Plant Molecular Biology 3 Credit Hours
- PCB 5838 - Cellular and Molecular Basis of Brain Functions 3 Credit Hours
- PCB 5265 - Stem Cell Biology 3 Credit Hours
- PCB 5025 - Molecular and Cellular Pharmacology 3 Credit Hours
- PCB 5815 - Molecular Aspects of Obesity, Diabetes and Metabolism 3 Credit Hours
- ZOO 5745C - Essentials of Neuroanatomy 4 Credit Hours
- Others: If approved by Graduate Committee

Professional Courses—12 Credit Hours

Students are required to take 12 credit hours from the following courses to better equip them to administer the business aspects of biotechnology programs and laboratories.

- COM 6047 - Interpersonal Support in the Workplace 3 Credit Hours
- COM 6145 - Organizational Communication 3 Credit Hours
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biological Sciences or related area.
- Official, competitive GRE score (taken within the last five years) or MCAT score (taken within the last three years).
- Three letters of recommendation.
- A written statement of research experience, area of interest, and immediate and long-range goals.
- Resume or CV.

Personal interviews are helpful but not required. Applicants who do not have a competitive GPA or GRE/MCAT may occasionally be accepted if there is other convincing evidence of potential for high achievement and success.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours of credit in the biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

UCF College of Medicine

Business Administration
MBA

Program Description

The College of Business Administration offers a Master of Business Administration (MBA) degree with three options for study: a part-time Evening MBA offered on the main campus; a Professional Part-Time MBA and Professional Full-Time MBA at regional campuses and downtown; and an Executive MBA at the Executive Development Center in downtown Orlando. The UCF MBA degree is accredited by AACSB International.

The MBA program allows students to apply advanced theoretical concepts and knowledge from all functional areas of business through an analytical, decision-making process that focuses on solving practical problems. Students in the MBA program also learn to efficiently access, retrieve, and analyze information through technology. The program promotes the use of networking, leadership, and interpersonal competencies to develop and sustain effective relationships with peers, and to create an appreciation for the value of a diverse workforce.

Curriculum

The Master's in Business Administration requires a total of 39 credit hours, of which 30 credit hours are professional core courses and 9 credit hours are electives. Internship options are available for the Evening MBA track.

Total Credit Hours Required: 39 Credit Hours Minimum beyond the Bachelor's Degree

The MBA curriculum provides a challenging and creative learning environment in an intensive program of study that has a broad-based administrative emphasis. Recognizing that the management methods of tomorrow may bear little resemblance to techniques in current use, the program emphasizes sound general principles and decision-making techniques that provide a base for continued learning and professional development.

Foundation Preparation

To help prepare you for the start of your MBA program, UCF offers online learning modules in accounting, economics, finance, and business statistics. These are offered through McGraw-Hill's Connect online learning management system and are designed to help you build the foundational knowledge needed to succeed in your MBA program at UCF. They are available for 2 years from the date of purchase and allow you to work at your own pace. Non-business undergraduate are required to take the Initial Assessments for each of the subject areas, and possibly purchase the online learning modules depending on their Initial Assessment results. For more information on the MBA Foundation Modules, email cbagrad@ucf.edu. You may also visit the McGraw Hill website at connect.mheducation.com/class/ucf-mba-initial.

Required Courses: 30 Credit Hours

The MBA professional core consists of advanced course work that substantially extends and applies knowledge developed in the student's undergraduate degree and career. In addition to the 30 required credit hours, the MBA program also requires the student to take three elective courses (9 credit hours). The MBA program does not require a thesis or comprehensive exam.
MBA Professional Core I: Decision-Making Tools: 18 Credit Hours

* Students who wish to sit for the CPA exam may substitute appropriate coursework for these courses.

- BUL 6444 - Law and Ethics 3 Credit Hours *
- ECO 6416 - Applied Business Research Tools 3 Credit Hours
- MAN 6245 - Organizational Behavior and Development 3 Credit Hours
- ACG 6425 - Managerial Accounting Analysis 3 Credit Hours *
- ACG 6185 - Financial Statement Analysis 3 Credit Hours
- ECO 6115 - Economic Analysis of the Firm 3 Credit Hours
- MAR 6466 - Strategic Supply Chain and Operations Management 3 Credit Hours

MBA Professional Core II: Decision Applications: 12 Credit Hours

Core I is a prerequisite for Core II courses.

- MAR 6816 - Strategic Marketing Management 3 Credit Hours
- FIN 6406 - Strategic Financial Management 3 Credit Hours
- GEB 6365 - International Business Analysis 3 Credit Hours
- MAN 6721 - Applied Strategy and Business Policy 3 Credit Hours (grade of B- or better is required in this course)

MBA Electives: 9 Credit Hours

The MBA requires 9 hours of electives. Unrestricted business electives may include any 5000 or 6000 level business course. Restricted electives include a maximum of two courses or 6 credit hours taken outside the College of Business Administration with permission from the Graduate Business Programs Office prior to taking the course.

Please see individual MBA tracks for elective options.

Certain Evening MBA business elective courses may also count toward Business Certificate credit, if the student has been admitted to an appropriate certificate program.

Capstone Course

The MBA's capstone course, MAN 6721 - Applied Strategy and Business Policy, is required for all MBA students. This capstone course integrates the various functional disciplines in business administration. It focuses on the theories and frameworks in the field of strategic management. The minimum passing grade for MAN 6721 is a B-.

Additional Program Requirements

Any student enrolled in a College of Business Administration master's degree program who earns more than two final course grades below a B- will be dismissed from the program and retention plans will not be supported by the College of Business Administration.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different admission requirements, start dates and deadlines.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. Business Administration MBA, Evening Track

Track Description

The Evening MBA program allows students to apply advanced theoretical concepts and knowledge from all functional areas of business through an analytical, decision-making process that focuses on solving practical problems. Students in this program also learn to efficiently access, retrieve, and analyze information through technology.

The program promotes the use of networking, leadership, and interpersonal competencies to develop and sustain effective relationships with peers and to create an appreciation for the value of a diverse workforce.

The Evening MBA begins in the fall term only with a firm deadline of July 1. Program highlights include:

- Evening course offerings to accommodate working professionals
- Choice of up to two elective options outside of the College of Business
- Part-time only enrollment

Curriculum

Total Credit Hours Required: 39 Credit Hours Minimum beyond the Bachelor's Degree

The Evening MBA is targeted toward applicants who wish to obtain a MBA degree while continuing in their career path. This program offers evening courses. Students may attend on a part-time basis only, taking 6 credit hours per term.

Foundation Preparation

To help prepare you for the start of your MBA program, UCF offers online learning modules in accounting, economics, finance, and business statistics. These can be purchased individually or as a set and are designed to help you build the foundational knowledge needed to succeed in the MBA program at UCF. If you do not have an undergraduate degree in Business Administration or related field, or do not have a heavy quantitative background in either your undergraduate career or professional career it is highly recommended to complete the modules. They are offered through McGraw-Hill's Connect online learning management system and when purchased, are available to you for your entire tenure in the MBA program as reference material. For information on the initial assessment, learning modules and how to use McGraw-Hill's Connect online learning management system visit connect.customer.mheducation.com/student-start/ or email cbagrad@ucf.edu.

Required Courses: 30 Credit Hours

The MBA professional core consists of advanced course work that substantially extends and applies knowledge developed in the student's undergraduate degree and career, with decision-making tools courses and decision-application courses. In addition to the 30 required credit hours, the MBA program also requires the student to take three elective courses (9 credit hours). The MBA program does not require a thesis or comprehensive exam.

MBA Professional Core I: Decision-Making Tools: 18 Credit Hours

* Students who wish to sit for the CPA exam must substitute appropriate coursework for ACG 6425.

- BUL 6444 - Law and Ethics 3 Credit Hours Fall only
- ECO 6416 - Applied Business Research Tools 3 Credit Hours Fall only
- MAN 6245 - Organizational Behavior and Development 3 Credit Hours Fall only
- ACG 6425 - Managerial Accounting Analysis 3 Credit Hours * Spring only
- ECO 6115 - Economic Analysis of the Firm 3 Credit Hours Spring only
- MAR 6466 - Strategic Supply Chain and Operations Management 3 Credit Hours Spring only
MBA Professional Core II: Decision
Applications: 12 Credit Hours

Core I is a prerequisite for Core II courses. FIN 6406 and MAR 6816 must be completed prior to MAN 6721.

- MAR 6816 - Strategic Marketing Management 3 Credit Hours Fall only
- FIN 6406 - Strategic Financial Management 3 Credit Hours Fall only
- GEB 6365 - International Business Analysis 3 Credit Hours Spring only
- MAN 6721 - Applied Strategy and Business Policy 3 Credit Hours (grade of B- or better is required) Spring only

MBA Electives: 9 Credit Hours

Unrestricted business electives may include any 5000- and 6000-level business courses. Restricted electives include a maximum of two courses or 6 credit hours, taken outside the College of Business Administration with permission from the Graduate Business Programs Office prior to taking the course.

Check all elective course prerequisites in the graduate catalog at www.graduatecatalog.ucf.edu.

Additional Program Requirements

Any student enrolled in a College of Business Administration master's degree program who earns more than two final course grades below a "B-" (2.75) will be dismissed from the program and retention plans will not be supported by the College of Business Administration.

Evening MBA Schedule

All Core I courses must be completed prior to Core II courses, and the capstone course for the program (MAN 6721) must be taken after the completion of all Core I requirements and FIN 6406 and MAR 6816.

Core I courses in the first and second fall semesters can be interchanged between the two terms. Core I courses in the first and second spring semesters can be interchanged between the two terms.

Fall: ECO 6416 and MAN 6245
Spring: ECO 6115 and ACG 6425
Summer: Elective #1

Fall: BUL 6444 and Elective #2
Spring: MAR 6466 and Elective #3
Fall: MAR 6816 and FIN 6406
Spring: MAN 6721 and GEB 6365

Required courses are only offered in the terms they are listed in above. Any variance from this schedule may delay graduation.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

THE APPLICATION AND ALL SUPPORTING DOCUMENTS (this includes all transcripts, essay, three letters of recommendation, resume, TOEFL or IELTS exam scores (if applicable) and international transcript evaluation (if applicable)) MUST BE RECEIVED AND UPDATED BY THE POSTED APPLICATION DEADLINE OF JULY 1ST IN ORDER TO BE REVIEWED. Applications submitted after the deadline will be moved to the following fall semester. Supporting documents submitted after the deadline will cause an application to be considered incomplete by the deadline and denied as a result.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Three letters of recommendation. At least one recommendation must be from a current or previous supervisor. Additional letters should be from professional sources: supervisor, professor, colleagues. No personal recommendations will be accepted. Please use the online recommendation system that is part of the online application to submit this requirement.
- Prepare a goal statement that answers the following questions:
  - Describe what motivated you either professionally or personally to pursue a master's degree.
  - Describe the steps you took to select UCF and this program. Include how long you have been considering graduate school and how you learned about this program.
  - Describe a specific academic experience or professional business skill you hope to acquire through the program and how you plan to use it going forward.
• Upload your current resume to your application before submitting. You must show at least two years of full-time professional work experience, detailing your duties and responsibilities, and include start/end dates of employment.
• A computer-based score of 233 (or 91 internet-based score) on the Test of English as a Foreign Language (TOEFL) is required if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.
• Applicants applying to this program who have attended a college/university outside the United States must provide a credential evaluation showing an equivalent bachelor's degree in the U.S. A course-by-course evaluation must be provided, with a GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Prior to starting the classes in the MBA program, students may be required to complete a free online assessment in the functional areas of accounting, economics, finance, and statistics. A score of 70% or higher in each section will be required in order to enroll in the associated graduate classes. Students who do not earn a 70% or higher in each section may be required to do one of the following: complete online modules in one or more of the four functional areas of accounting, economics, statistics, and finance; or retake the assessment to achieve the required 70% score needed in each section to enroll in the associated graduate class.

### Business Administration MBA, Executive Track

#### Track Description

The UCF Executive MBA (EMBA) is accredited by AACSB International and is the college's flagship MBA program. The EMBA program is designed to prepare experienced professionals for the challenges they will face as they work and advance in their careers, teaching them skills across all functional areas of business that will make them an increasingly valuable member of their organization.

This program is a professional program with a market rate tuition and is considered a full-time program. The tuition is the same for Florida residents and nonresidents. Please visit business.ucf.edu/degree/ucf-mba/ for more information.
The program is a limited enrollment, cohort-based program that allows participants to continue their full-time careers while earning an MBA degree.

- A 19-month program offered in Downtown Orlando
- Limited class size, cohort program
- Classes meet one Friday and three Saturdays a month, 8:00 a.m.-5:00 p.m.
- Ten-day International Residency
- Minimum of five years of work experience required; the average is fifteen years
- Personal interview required for admission

Courses expose participants to new methods, concepts, and tools that will enhance their business and leadership skills. Innovative teaching methodologies such as team-based projects, interdisciplinary case studies, simulations, debate activities, and self-assessment exercises are used to enhance the learning experience. The EMBA also incorporates the interactions and backgrounds of the participants as an integral part of the learning experience.

All classes are held at the UCF Executive Development Center in Downtown Orlando. Our executive classrooms are specifically designed to provide the best in learning environments. The handicap accessible classrooms boast the latest in audio/video equipment and each seat has an electrical hookup and wireless Internet access. With newly engineered acoustics, lighting and room design, every seat has an excellent view of the speaker and presentation. The UCF Executive MBA program has created the finest combination of skilled administrators, and an executive classroom environment with leading faculty providing participants with a high level of personal attention from the moment they apply.

This program is a professional program with a market rate tuition and is considered a full-time program. The tuition is the same for Florida residents and nonresidents. Please visit business.ucf.edu/degree/ucf-mba/ for more information.

Curriculum

The UCF Executive MBA (EMBA) is the college's flagship MBA program. The EMBA program is designed to prepare executives and managers for the challenges they will face as they work and advance in their careers, teaching them skills across all functional areas of business that will make them an increasingly valuable member of their organization. Courses expose participants to new methods, concepts and tools that will enhance their business and leadership skills. The EMBA also incorporates the interactions and backgrounds of the participants as an integral part of the learning experience.

Total Credit Hours Required: 39 Credit Hours Minimum beyond the Bachelor's Degree

Foundation Preparation

To help prepare you for the start of your MBA program, UCF offers online learning modules in accounting, economics, finance, and business statistics. These can be purchased individually or as a set and are designed to help you build the foundational knowledge needed to succeed in the MBA program at UCF. They are offered through McGraw-Hill's Connect online learning management system and when purchased, are available to you for your entire tenure in the MBA program as reference material. Elective Courses: 9 Credit Hours

- FIN 6465 - Financial Analysis Seminar 3 Credit Hours
- MAN 6448 - Conflict Resolution and Negotiation 3 Credit Hours
- MAN 6296 - Executive Leadership 3 Credit Hours
International Residency

As part of the GEB 6365 - International Business Analysis course, EMBA students are required to participate in a 10 day international residency. The trip destination is determined by the students through a series of votes, and takes place during the 4th semester in the program. Typically the trip includes 2 countries with visits to local and multinational companies, and immersion into the countries culture.

Capstone Course

The MBA's capstone course, MAN 6721 - Applied Strategy and Business Policy, is required for all MBA students. This capstone course integrates the various functional disciplines in business administration. It focuses on the theories and frameworks in the field of strategic management, and requires a minimum grade of B-.

Additional Program Requirements

Any student enrolled in a College of Business Administration master's degree program who earns more than two final course grades below a B- will be dismissed from the program and retention plans will not be supported by the College of Business Administration.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GMAT is not required, however, the Admissions Committee may ask for the GMAT to strengthen a candidate's application packet.
- Three professional letters of recommendation or three e-mail addresses of recommenders.
- Prepare a goal statement that answers the following questions:
  - Describe what motivated you either professionally or personally to pursue a master's degree.
  - Describe the steps you took to select UCF and this program. Include how long you have been considering graduate school and how you learned about this program.
  - Describe a specific academic experience or professional business skill you hope to acquire through the program and how you plan to use it going forward.
  - Résumé showing a minimum of 5 years of full-time, progressive, work experience.
  - Interview. The applicant will be contacted to schedule an interview after the application is complete.
  - A computer-based score of 233 (or 91 internet-based score) on the Test of English as a Foreign language (TOEFL) is required if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.
  - Applicants applying to this program whose completed bachelor's degree is from a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Early application tuition discounts are available for this program. To view early application discount deadlines, and for more information, visit the Executive Development Center website at www.ucfmba.ucf.edu.

Prior to starting the classes in the MBA program, students may be required to complete a free online assessment in the functional areas of accounting, economics, finance, and statistics. A score of 70% or higher in each section will be required in order to enroll in the associated graduate classes. Students who do not earn a 70% or higher in each section may be required to do one of the following: complete online modules in one or more of the four functional areas of accounting, economics, statistics, and finance; or retake the assessment to achieve the required 70% score needed in each section to enroll in the associated graduate class.

Business Administration  
MBA, Professional Track

Track Description

The Professional MBA (PMBA) combines the rigor and depth of a traditional MBA program and offers two scheduling options: students can attend part-time in the evening for 24 months so as not to interrupt their full-time career, or they can attend full-time during the day for 12 months.

The 24-month part-time PMBA is offered at the Executive Development Center in Downtown Orlando each summer. It is also offered at a regional campus location on a rotational basis most fall terms providing a convenient location to working professionals in Orange, Osceola, Seminole and Volusia counties.

The 12-month full-time PMBA is offered at the Executive Development Center in Downtown Orlando each fall.

The PMBA enrolls a limited-size group of professionals from a variety of organizations and industries to come together and challenge their intellect, enhance their capabilities and broaden their perspectives while growing their professional network. The innovative curriculum equips program participants with the analytical tools, latest business techniques and skills needed to succeed in today's competitive marketplace while honing their business knowledge, teamwork, critical thinking and decision making skills. The program integrates the students' professional experience allowing them to immediately apply newly-acquired knowledge on the job. The renowned PMBA faculty members who share their expertise and provide insights on real-world business issues use consultative teaching approaches combining lectures, case studies, discussion forums and presentations to maximize learning. Participants will also find a high level of personal attention from PMBA administrators from the moment they apply.

- 24-month part-time or 12-month full-time option
- Minimum 3 years of work experience required for the part-time PMBA; minimum 1 year of work experience required for the full-time PMBA
- Minimum 1-3 years of work experience required with a letter of support from an employer for full-time PMBA, or earned graduate degree, or currently enrolled graduate student
- Limited class size, cohort program
- Innovative curriculum (consultative and case-based applied approach)
- Personal interview required for admission
This program is a professional program with a market rate tuition. The tuition is the same for Florida residents and non-residents. Please visit business.ucf.edu/degree/ucf-mba/ for more information.

Curriculum

The Professional MBA (PMBA) provides the perfect business foundation for working professionals who wish to earn an MBA degree without interrupting their full-time career. The innovative curriculum equips program participants with the analytical tools, latest business techniques and skills needed to succeed in today's competitive marketplace while honing their business knowledge, teamwork, critical thinking and decision making skills. The program seamlessly integrates their professional experience allowing them to immediately apply newly-acquired knowledge on the job.

Total Credit Hours Required: 39 Credit Hours Minimum beyond the Bachelor's Degree

Foundation Preparation

To help prepare you for the start of your MBA program, UCF offers online learning modules in accounting, economics, finance, and business statistics. These can be purchased individually or as a set and are designed to help you build the foundational knowledge needed to succeed in the MBA program at UCF. They are offered through McGraw-Hill's Connect online learning management system and when purchased, are available to you for your entire tenure in the MBA program as reference material. For information on the initial assessment, learning modules and how to use McGraw-Hill's Connect online learning management system visit connect.customer.mheducation.com/student-start/ or email cbagrad@ucf.edu.

Required Courses: 30 Credit Hours

- ECO 6115 - Economic Analysis of the Firm 3 Credit Hours
- ACG 6425 - Managerial Accounting Analysis 3 Credit Hours
- ECO 6416 - Applied Business Research Tools 3 Credit Hours
- FIN 6406 - Strategic Financial Management 3 Credit Hours
- MAN 6245 - Organizational Behavior and Development 3 Credit Hours
- MAR 6816 - Strategic Marketing Management 3 Credit Hours
- MAR 6466 - Strategic Supply Chain and Operations Management 3 Credit Hours
- BUL 6444 - Law and Ethics 3 Credit Hours
- GEB 6365 - International Business Analysis 3 Credit Hours
- MAN 6721 - Applied Strategy and Business Policy 3 Credit Hours

Elective Courses: 9 Credit Hours

- FIN 6465 - Financial Analysis Seminar 3 Credit Hours
- MAN 6448 - Conflict Resolution and Negotiation 3 Credit Hours
- MAN 6296 - Executive Leadership 3 Credit Hours

Capstone Course

The MBA's capstone course, MAN 6721 - Applied Strategy and Business Policy, is required for all MBA students. This capstone course integrates the various functional disciplines in business administration. It focuses on the theories and frameworks in the field of strategic management, and requires a minimum grade of B-.

Additional Program Requirements

Any student enrolled in a College of Business Administration master's degree program who earns more than two final course grades below a B- will be dismissed from the program and retention plans will not be supported by the College of Business Administration.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GMAT is not required, however, the Admissions Committee may ask for the GMAT to strengthen a candidate's application packet.
- Three professional and/or academic letters of recommendation or three e-mail addresses of recommenders.
• Prepare a goal statement that answers the following questions:
• Describe what motivated you either professionally or personally to pursue a master's degree.
• Describe the steps you took to select UCF and this program. Include how long you have been considering graduate school and how you learned about this program.
• Describe a specific academic experience or professional business skill you hope to acquire through the program and how you plan to use it going forward.
• Résumé showing a minimum of 1 or 3 years of full-time, progressive, work experience.
• Interview. The applicant will be contacted to schedule an interview after the application is complete.
• A computer-based score of 233 (or 91 internet-based score) on the Test of English as a Foreign language (TOEFL) is required if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.
• Applicants applying to this program whose completed bachelor's degree is from a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Early application tuition discounts are available for this program. To view early application discount deadlines, and for more information, visit the Executive Development Center website at www.ucfmba.ucf.edu.

Prior to starting the classes in the MBA program, students may be required to complete a free online assessment in the functional areas of accounting, economics, finance, and statistics. A score of 70% or higher in each section will be required in order to enroll in the associated graduate classes. Students who do not earn a 70% or higher in each section may be required to do one of the following: complete online modules in one or more of the four functional areas of accounting, economics, statistics, and finance; or retake the assessment to achieve the required 70% score needed in each section to enroll in the associated graduate class.

The Part-Time PMBA starting in Summer 2018 will be taught at the UCF Executive Development Center in downtown Orlando.

The Part-Time PMBA starting Fall 2018 will be taught on the Valencia West campus.

The Full-Time PMBA starting in Fall 2018 will be taught at the UCF Executive Development Center in downtown Orlando.

| International Applicants | - | Jan 15 | - | - |

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Career and Technical Education MA ►

Program Description

The Career and Technical Education MA program prepares students pursuing leadership and administrative positions in career and technical education (CTE) as well as talent development and corporate training. This program is designed for individuals whose goal is to teach, train, coach, and/or lead in specific disciplines located in secondary and post-secondary schools (technical centers, community colleges, and universities); corporations and industry; military; and professional organizations. The goal of this program is to improve the quality and effectiveness of talent development and instructional personnel in all industries. The Career and Technical Education MA program places emphasis on the intellectual growth of each student using research-based effective teaching techniques, scholarly learning, laboratory-field experience, and leadership development.

Please note: This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Curriculum

The Career and Technical Education MA program requires a minimum of 42-45 credit hours beyond the bachelor's degree, including 9 credit hours of education foundation core courses, 9 credit hours of career education core courses, and 21 credit hours of advisor-approved courses focused on a specialization within the field. The program also requires an internship (6 credit hours) or a research report (3 credit hours). Passing a comprehensive examination at the end of the program is a graduation requirement.

Total Credit Hours Required: 42-45 Credit Hours Minimum beyond the Bachelor's Degree

The three Career Education Core classes (Research in Career Education, History of Career Education in the United States, and Issues in Career Education) combined to provide students with an in-depth analysis of career education from its inception to future trends. The flexibility of choosing the Education Foundation courses from the list provided as well as subject matter, discipline-specific electives allows for a personalized degree program. The internship course is a learning activity that takes place in a face-to-face or web-based authentic setting in which students must apply, reflect upon, and refine knowledge and skills acquired in the program. The internship experience gives students insight and hands-on experience while being observed and mentored by a supervising teacher and UCF faculty member.

Required Courses: 18 Credit Hours

Education Foundation Core: Select 9 Credit Hours

- EDF 6727 - Critical Analysis of Social, Ethical, Legal, and Safety Issues Related to Education 3 Credit Hours
- IDS 6504 - Adult Learning 3 Credit Hours
- EDF 6155 - Lifespan Human Development and Learning 3 Credit Hours
- LAE 5337 - Literacy Strategies for Middle and Secondary Teaching 3 Credit Hours
- TSL 5085 - Teaching Language Minority Students in K-12 Classrooms 3 Credit Hours
- EDG 6415 - Principles of Instruction and Classroom Management 3 Credit Hours
- EDF 6237 - Principles of Learning and Introduction to Classroom Assessment 3 Credit Hours
- EDF 6432 - Measurement and Evaluation in Education 3 Credit Hours or
- EDF 6401 - Statistics for Educational Data 3 Credit Hours
- EDF 6886 - Multicultural Education 3 Credit Hours
- EDF 6725 - Critical Issues in the Study of High Needs Populations 3 Credit Hours
- EDF 6481 - Fundamentals of Graduate Research in Education 3 Credit Hours
- EDF 6517 - Perspectives on Education 3 Credit Hours
- EDG 6329 - Quality Teaching Practices 3 Credit Hours

Career Education Core: 9 Credit Hours

- ECT 6791 - Research in Career Education 3 Credit Hours
- ECW 6067 - History of Career Education in the United States 3 Credit Hours
- ECW 6666 - Issues in Career Education 3 Credit Hours

Elective Courses: 21 Credit Hours

CTE Specializations Courses

Students who wish to specialize in career and technical education may choose from the following list of courses (3 credit hours each).

Please note: Courses shown with an asterisk can be applied to the Local Director for Career and Technical Education Certification through the State of Florida. For more information, please review the Florida Department of Education teacher certification website. The Career and Technical Education MA program is not an initial certification program.

- ECW 5207 - Management of Vocational Programs 2-4 Credit Hours *
- ECW 6205 - Administration in Vocational Education 3 Credit Hours *
- ECW 6105 - Vocational Program Planning, Development, and Evaluation 2-4 Credit Hours *
- ECW 6895 - School/Community Relations for Vocational Education 2-4 Credit Hours *
- ECW 6206 - Supervision in Vocational Education 3 Credit Hours *
- ECW 5561 - Student Guidance in the Vocational Program 2-3 Credit Hours
- ECW 5265 - Cooperative Programs in Vocational Education 2-4 Credit Hours
- BTE 6946 Seminar in Business Education 3 Credit Hours

Internship Option: 6 Credit Hours

- ECT 6946 - Graduate Internship 6 Credit Hours

Research Report Option: 3 Credit Hours

- ECT 6909 - Research Report 2,1 Credit Hours

Co-requisites

If initial certification is desired, see adviser.

Independent Learning

The internship is an independent learning activity that takes place in face-to-face or web-based authentic settings in which students must apply, reflect upon, and refine knowledge and skills acquired in the program. The internship experience gives students full control of the operational setting where they are placed (e.g., such as primary face-to-face or web classroom teacher while being observed and mentored by a supervising teacher and UCF faculty member).

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate admission requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE exam is not required for admission.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Chemistry MS

Program Description

The Master of Science in Chemistry (MS) program prepares students for careers in the chemical industry or further graduate studies.

The curriculum is designed to provide a broad overall perspective of the chemical sciences field while placing the primary emphasis upon chemistry and the application of chemical principles.

Curriculum

The Chemistry MS program offers both a thesis option and a nonthesis option. The thesis option requires a minimum of 30 credit hours beyond the bachelor's degree, including 16 credit hours of required courses, at least 6 credit hours of thesis research, and 8 credit hours of electives that must be approved by the student's advisory committee. The nonthesis option requires a minimum of 31 credit hours beyond the bachelor's degree, including 16 credit hours of required courses, 14 credit hours of electives that must be approved by the student's advisory committee, and 1 credit hour of independent study that culminates in a research report.

Total Credit Hours Required: 30-31 Credit Hours Minimum beyond the Bachelor's Degree

Qualifying Examinations

All students must satisfy qualifying (proficiency) requirements in four of the five areas (analytical chemistry, biochemistry, inorganic chemistry, organic chemistry and physical chemistry) during the first year by taking exams in four of these five subjects. Additional course work may be required if one or more of the qualifying exams are not satisfied. Satisfaction of this requirement will help ensure that all students are adequately prepared for the core courses. If students do not satisfy the proficiency exam requirements within the first year, they may be subject to dismissal from the program.

Required Courses: 16 Credit Hours

Students must take four of the following courses. If a student successfully completes all five required courses, one course will count toward fulfilling the electives requirement.
- CHM 6710 - Applied Analytical Chemistry 3 Credit Hours
- CHS 6240 - Chemical Thermodynamics 3 Credit Hours
- CHS 6251 - Applied Organic Synthesis 3 Credit Hours
- CHM 6440 - Kinetics and Catalysis 3 Credit Hours
- BCH 6740 - Advanced Biochemistry 3 Credit Hours

**Seminar**

In addition, students must complete the following seminar.

- CHM 6936 - Graduate Chemistry Seminar 1 Credit Hours (taken four times)

**Elective Courses: 8 Credit Hours**

All students must take 8 credit hours of electives from the following list. All elective courses must be approved by the student's advisory committee.

- CHM 5225 - Advanced Organic Chemistry 3 Credit Hours
- CHM 5235 - Applied Molecular Spectroscopy 3 Credit Hours
- CHM 5305 - Applied Biological Chemistry 3 Credit Hours
- CHM 5450 - Polymer Chemistry 3 Credit Hours
- CHM 5451C - Techniques in Polymer Science 3 Credit Hours
- CHM 5580 - Advanced Physical Chemistry 3 Credit Hours
- CHM 6134 - Advanced Instrumental Analysis 3 Credit Hours
- CHM 6711 - Chemistry of Materials 3 Credit Hours
- CHS 6260 - Chemical Unit Operations and Separations 3 Credit Hours
- CHS 6261 - Chemical Process and Product Development 2 Credit Hours
- CHS 6613 - Current Topics in Environmental Chemistry 3 Credit Hours
- CHM/CHS Special topics courses

**Thesis Option: 6 Credit Hours**

The grounding in scientific research methodology provided by the thesis requirement is a central focus of the thesis option in the Chemistry MS program. Students will conduct research either on site or at the professional laboratories where they work. In either case, a member of the UCF Chemistry Department faculty will act as research adviser and approve the research topic. This research culminates in the writing and presentation of the thesis. The student will present his/her thesis for final examination (oral defense of thesis) by a committee consisting of three members including the research adviser. The committee has to be approved by the Graduate Coordinator of the Chemistry program. The thesis must be judged worthy of publication by the review committee and may not be submitted for examination until so deemed. For nonresident students, the thesis adviser will visit the student's laboratory, where their research is to be performed, before the research begins and on a regular basis until the work is complete.

- CHM 6971 - Thesis 6 Credit Hours

**Nonthesis Option: 7 Credit Hours**

Nonthesis students take an additional 7 credit hours of courses, including 6 credit hours of electives from the list above and 1 credit hour of independent study, resulting in a required research report of independent learning experience.

- Electives 6 Credit Hours
- CHM 6908 - Independent Study 1 Credit Hour

**Equipment Fee**

Full-time students in the Chemistry MS program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

**Independent Learning**

For the thesis option, the grounding in scientific research methodology is a central focus. This research culminates in the writing and presentation of the thesis. For the nonthesis option, students take an additional 6 credit hours of approved electives and one-credit hour of Independent Study (CHM 6908), which culminates in a required report of the independent study experience.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:
• One official transcript (in a sealed envelope) from each college/university attended.
• Official, competitive GRE score taken within the last five years.
• Two letters of recommendation.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Application Deadlines

All application materials must be submitted by the appropriate deadline listed below.

Civil Engineering MS

Program Description

The Civil Engineering MS degree program reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society. The program offers tracks in Structural and Geotechnical Engineering, Transportation Systems Engineering, and Water Resources Engineering. Course work includes structural analysis and design, geotechnical engineering and foundations, transportation planning and operations, traffic engineering, construction engineering, and water resources engineering.

Faculty research interests include geotechnical studies of subsurface conditions, soil testing "superpave" mix design, intelligent transportation systems, traffic safety, structural dynamics, nonlinear structural analysis and software development, reinforced concrete, construction engineering, hydraulic modeling, coastal ocean modeling, stormwater management, and watershed management. Students completing the program find positions in consulting firms, construction and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

Curriculum

The MS degree offers both thesis and nonthesis options with each requiring 30 credit hours of acceptable graduate work. The thesis option requires a 6 credit hour thesis project and the nonthesis option requires an additional 6 credit hours of electives and an end-of-program portfolio submission.
Individual, independent research studies may be required in one or more courses. The research study and report will focus on reviewing and analyzing contemporary research in a student's particular specialization within the profession in order to help students acquire knowledge and skills pertaining to research-based best practices in that specialization area. In addition, students may engage in six credit hours of independent study during their studies.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree**

**Equipment Fee**

Students in the Civil Engineering MS program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

**Independent Learning**

A research or design project serves as the independent learning experience for thesis students. Nonthesis students are required to take at least one course with a research project and submit an end-of-program portfolio.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

**Financials**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**Fellowships**

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Civil Engineering MS, Structural and Geotechnical Engineering Track**

**Track Description**

The Structural and Geotechnical Engineering track in the Civil Engineering MS program reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the structural and geotechnical infrastructure of society.

The Structural and Geotechnical Engineering track in the Civil Engineering MS program reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society. The program's course work focuses on structural analysis and design, and geotechnical engineering and foundations, but may include electives in transportation planning and operations, traffic
Faculty research interests include geotechnical studies of subsurface conditions, soil testing "superpave" mix design, intelligent transportation systems, traffic safety, structural dynamics, nonlinear structural analysis and software development, reinforced concrete, construction engineering, hydraulic modeling, coastal ocean modeling, stormwater management, and watershed management. Students completing the program find positions in consulting firms, construction and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

Curriculum

The department offers a Structural and Geotechnical Engineering track in the Civil Engineering MS program to students with appropriate science or engineering baccalaureate backgrounds. Both a thesis option and a nonthesis option are available with each requiring 30 credit hours. Both require 12 credit hours of required courses, 12 credit hours of elective graduate course work, and 6 credit hours of thesis. The nonthesis option requires 12 credit hours of required courses and 18 credit hours of elective graduate course work. The nonthesis option also requires submission of an end-of-program portfolio. The student must develop an individual program of study with a faculty adviser and must have background or articulation course work as described below. At least one-half of the required credits must be taken at the 6000 level.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Research studies or projects are required in one or more courses. The research study or project will focus on reviewing and analyzing contemporary research or engineering issues in a student's particular specialization within the profession in order to help students acquire knowledge and skills pertaining to research-based best practices in that specialization area.

Prerequisites (Artication)

- EGN 3310 - Engineering Analysis—Statics 3 Credit Hours
- EGN 3321 - Engineering Analysis—Dynamics 3 Credit Hours
- EGN 3331 - Mechanics of Materials 3 Credit Hours
- CEG 4011C - Geotechnical Engineering 14 Credit Hours
- CES 4100 - Structural Analysis 4 Credit Hours
- CES 4605 - Steel Structures 3 Credit Hours
- CES 4702 - Reinforced Concrete Structures 3 Credit Hours

Required Courses: 12 Credit Hours

Both thesis and nnonthesis students must choose two courses from each of the two following groups. Courses with asterisks represent those with specific independent learning experiences and all nonthesis students must choose at least one of the courses with an asterisk.

Geotechnical Engineering

- CEG 5700 - Geo-Environmental Engineering 3 Credit Hours *
- CEG 6065 - Soil Dynamics 3 Credit Hours
- CEG 6115 - Foundation Engineering 3 Credit Hours *
- CEG 6317 - Advanced Geotechnical Engineering 3 Credit Hours
- CES 6170 - Boundary Element Methods in Civil Engineering 3 Credit Hours *
- TTE 5835 - Pavement Engineering 3 Credit Hours
- CGN 5506 - Advanced Pavement and Civil Engineering Materials 3 Credit Hours

Structural Engineering

- CES 5144 - Matrix Methods for Structural Analysis 3 Credit Hours
- CES 5325 - Bridge Engineering 3 Credit Hours
- CES 5606 - Advanced Steel Structures 3 Credit Hours *
- CES 5706 - Advanced Reinforced Concrete 3 Credit Hours *
- CES 5821 - Masonry and Timber Design 3 Credit Hours
- CES 6010 - Structural Reliability 3 Credit Hours
- CES 6116 - Finite Element Structural Analysis 3 Credit Hours
- CES 6209 - Dynamics of Structures 3 Credit Hours
- CES 6220 - Wind and Earthquake Engineering 3 Credit Hours
- CES 6230 - Advanced Structural Mechanics 3 Credit Hours
- CES 6527 - Nonlinear Structural Analysis 3 Credit Hours
- CES 6715 - Prestressed Concrete Structures 3 Credit Hours *
- CES 6840 - Composite Steel Concrete Structures 3 Credit Hours *
Elective Courses: 12 Credit Hours

All students, both thesis and nonthesis, must complete at least 12 credit hours of approved electives (primarily from the above two groups but also from the list below or other courses as approved by the student's adviser). Please note that Directed Research (XXX 6918) is not permitted in the MS program of study.

Construction Engineering and Management

- CCE 5205 - Decision Support for Infrastructure Projects 3 Credit Hours
- CCE 5006 - Infrastructure Systems Management 3 Credit Hours
- CCE 5220 - Sustainable Infrastructure Systems 3 Credit Hours
- CCE 6036 - Advanced Construction Planning and Control 3 Credit Hours *
- CCE 6211 - Design and Monitoring of Construction Processes 3 Credit Hours
- CCE 6045 - Cost Analysis of Sustainable Infrastructure Systems 3 Credit Hours

Portfolio Requirement

Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of an end-of-program portfolio. The portfolio requirements are listed on the CECE website.

Equipment Fee

Students in the Civil Engineering MS program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning

A research or design project serves as the independent learning experience for thesis students. Nonthesis students are required to take at least one course with a research project and submit an end-of-program portfolio.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- CES 6910 - Research in Structural Engineering 3 Credit Hours
- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in civil engineering or another closely related engineering degree.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

The MS degrees in specialized options are designed for students with appropriate baccalaureate backgrounds. Applicants who are applying to the programs without a directly related undergraduate degree should closely check the prerequisites. Additional undergraduate courses may be required.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

### Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

### Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

### Civil Engineering MS,  
Transportation Systems Engineering Track

#### Track Description

The Transportation Systems Engineering track in the Civil Engineering MS program reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the transportation infrastructure of society. The program's course work focuses on transportation planning and operations, traffic engineering and construction engineering.

Faculty research interests include intelligent transportation systems, traffic safety, traffic signal design, and construction engineering. Students completing the program find positions in consulting firms, construction and construction-related...
industries, in city, county, state, and federal government agencies, and academic institutions.

Curriculum

The Transportation Systems Engineering track in the Civil Engineering MS program is for students with appropriate science or engineering baccalaureate backgrounds. Both a thesis option and a nonthesis option are available with each requiring 30 credit hours of graduate courses. The thesis option requires 15 credit hours of required courses, 9 credit hours of elective courses (exclusive of thesis and research), and a thesis (6 credit hours). The nonthesis option requires 15 credit hours of required courses and 15 credit hours of elective graduate course work. The nonthesis option also requires submission of an end-of-program portfolio. The student must develop an individual program of study with a faculty adviser and must have background or articulation course work as described below. At least one-half of the required credits must be taken at the 6000 level.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Research studies or projects are required in one or more courses. The research study or project will focus on reviewing and analyzing contemporary research or engineering issues in a student's particular specialization within the profession in order to help students independently acquire knowledge and skills pertaining to best practices in that specialization area.

Prerequisites

- STA 3032 - Probability and Statistics for Engineers 3 Credit Hours
- TTE 3810 - Transportation Engineering 3 Credit Hours

Required Courses: 15 Credit Hours

Both thesis and nonthesis students must choose five of the following courses. Courses with asterisks provide independent learning experiences. These experiences encompass research reports, design projects, and literature studies. Nonthesis students must choose at least one course with an asterisk.

- TTE 5204 - Traffic Engineering 3 Credit Hours *
- TTE 6205 - Highway Capacity 3 Credit Hours
- TTE 5805 - Geometric Design of Transportation Systems 3 Credit Hours *
- TTE 5835 - Pavement Engineering 3 Credit Hours
- TTE 6256 - Traffic Operations 3 Credit Hours *
- TTE 6270 - Intelligent Transportation Systems 3 Credit Hours
- TTE 6315 - Traffic Safety Analysis 3 Credit Hours *
- TTE 6526 - Planning and Design of Airports 3 Credit Hours *
- CGN 6655 - Regional Planning, Design, and Development 3 Credit Hours
- ESI 5219 - Engineering Statistics 3 Credit Hours or
- STA 5206 - Statistical Analysis 3 Credit Hours

Elective Courses: 9 Credit Hours

All students, both thesis and nonthesis, must complete at least 9 credit hours of approved electives from the list above or other courses as approved by the student's adviser. Directed Research (XXX 6918) is not permitted in the MS program of study.

- Electives 9 Credit Hours

Thesis Option: 6 Credit Hours

A final defense of the thesis is required. In addition, the College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's advisor and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.

- TTE 6971 - Thesis 6 Credit Hours

Nonthesis Option: 6 Credit Hours

For those pursuing the nonthesis option, two additional electives are required, which should preferably come from the above list, although other courses may be chosen with adviser's consent.

- Electives 6 Credit Hours

Portfolio Requirement

Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of an end-of-program portfolio. The portfolio requirements are listed on the CECE website.
Equipment Fee

Students in the Civil Engineering MS program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning

A research or design project serves as the independent learning experience for thesis students. Nonthesis students are required to take at least one of the courses marked with an asterisk (*), denoting an independent learning experience, and submit an end-of-program portfolio.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in civil engineering or another closely related engineering degree.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews with applicants before accepting them into their research program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

The MS degrees in specialized options are designed for students with appropriate baccalaureate backgrounds. Applicants who are applying to the programs without a directly related undergraduate degree should closely check the prerequisites. Additional undergraduate courses may be required.

Civil Engineering MS, Water Resources Engineering Track

Track Description

The Water Resources Engineering track in the Civil Engineering MS program reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the sustainable infrastructure for society. The program's course work focuses on water resources modeling, hydraulics and hydrology.

Water Resource faculty research interests include ecohydraulic and ecohydrologic modeling, groundwater and surface hydrology, sea level rise and other climate change impact assessments, stormwater management, tide, wind-wave and hurricane storm surge modeling, and environmental water resources management. Students completing the program find positions in consulting firms, construction and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

Curriculum

The Water Resources Engineering track in the Civil Engineering MS program is for students with appropriate science or engineering baccalaureate backgrounds. Both thesis and nonthesis options are available with each requiring 30 credit hours. The thesis option requires 15 credit hours of required courses, 9 credit hours of elective graduate course work exclusive of thesis and research, and a thesis (6 credit hours). The nonthesis option requires 15 credit hours of required graduate course work, 15 credit hours of electives, and submission of an end-of-program portfolio. Each student must have an individual program of study approved by his/her faculty committee and have completed all required articulation course work as described below. At least one-half of the required credits must be taken at the 6000 level.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Research studies or projects are required in one or more courses. The research study or project will focus on reviewing and analyzing contemporary research or engineering issues in a student's particular specialization within the profession in order to help students acquire knowledge and skills pertaining to research-based best practices in that specialization area.

Prerequisites (Articulation)

- CEG 4011C - Geotechnical Engineering I 4 Credit Hours
- CWR 4632C - Water Resources I 4 Credit Hours
- CWR 4633C - Water Resources II 3 Credit Hours
- EGN 3613 - Engineering Economic Analysis 2 Credit Hours
- STA 3032 - Probability and Statistics for Engineers 3 Credit Hours

Required Courses: 15 Credit Hours

Both thesis and nonthesis students must choose five CWR courses from the list below. Courses with an asterisk provide an independent learning experience that involves research and design projects. Nonthesis students are required to take at least one course with an asterisk in order to obtain an independent learning experience.

- CWR 5125 - Groundwater Hydrology 3 Credit Hours
- CWR 5205 - Hydraulic Engineering 3 Credit Hours
Elective Courses: 9 Credit Hours

All students, both thesis and nonthesis, are required to take at least 9 credit hours of approved electives. The courses may be from the list above or other courses as approved by the student's adviser. Directed Research (XXX 6918) is not permitted in the MS program of study.

- Electives 9 Credit Hours

Thesis Option: 6 Credit Hours

A successful defense of the thesis is required. In addition, the College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.

- CWR 6971 - Thesis 6 Credit Hours

Nonthesis Option: 6 Credit Hours

Nonthesis students must complete at least 6 additional credit hours of electives from either the list above or other courses as approved by the student's adviser.

- Electives 6 Credit Hours

Portfolio Requirement

Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of an end-of-program portfolio. The portfolio requirements are listed on the CECE website.

Equipment Fee

Students in the Civil Engineering MS program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning

A research or design project serves as the independent learning experience for thesis students. Nonthesis students are required to take at least one of the courses marked with an asterisk (*), denoting an independent learning experience, and submission of an end-of-program portfolio.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

Civil Engineering MSCE

Program Description

The Master of Science in Civil Engineering degree is designed for students who have an undergraduate degree in Civil Engineering or another closely related engineering degree. Graduate work and research in civil engineering reflect the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society.

The Master of Science in Civil Engineering (MSCE) degree is designed for students who have an undergraduate degree in Civil Engineering or another closely related engineering degree. Graduate work and research in civil engineering reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society. The program includes course work in structural analysis and design, geotechnical engineering and foundations, transportation planning and operations, traffic engineering, construction engineering and water resources engineering.

Faculty research interests include geotechnical studies of subsurface conditions, soil testing "superpave" mix design, intelligent transportation systems, traffic safety, structural
dynamics, nonlinear structural analysis and software development, reinforced concrete, construction engineering, hydraulic modeling, coastal ocean modeling, stormwater management, and watershed management. Students completing the program find positions in consulting firms, construction and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

Curriculum

The Civil Engineering MSCE program requires a minimum of 30 credit hours beyond the bachelor's degree, and both thesis and nonthesis options are available. The thesis option requires 24 credit hours of formal graduate-level course work and 6 credit hours of thesis. The nonthesis option requires 30 hours of formal course work and completion of a culminating experience. For nonthesis MS students, the culminating experience is submission of a portfolio that satisfies program requirements. It is strongly suggested that part-time students pursue the nonthesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Students must develop an individual plan of study with a faculty adviser by their second semester of study. At least one-half of the required credits must be taken at the 6000 level.

Research studies are required in one or more courses. The research study and report will focus on reviewing and analyzing contemporary research in a student's particular specialization within the profession in order to help students acquire knowledge and skills pertaining to research-based best practices in that specialization area. In addition, students may engage in directed independent studies, directed research or a research report during their studies. Courses with asterisks represent those with specific independent learning experiences, and all nonthesis students must choose at least one course with an asterisk.

Elective Courses: 24 Credit Hours

Thesis MS students must take a minimum of 24 credit hours of course work with at least 18 credit hours from the Civil, Environmental and Construction Engineering (CECE) Department in their program of study.

Nonthesis MS students must take at least 24 credit hours of course work from the CECE Department in their program of study. Nonthesis students must take at least one course where a research project is required (one course marked with an asterisk).

Geotechnical Engineering

- CEG 6065 - Soil Dynamics 3 Credit Hours *
- CEG 6115 - Foundation Engineering 3 Credit Hours
- CEG 6317 - Advanced Geotechnical Engineering 3 Credit Hours

Structural Engineering

- CES 5144 - Matrix Methods for Structural Analysis 3 Credit Hours
- CES 5325 - Bridge Engineering 3 Credit Hours *
- CES 5606 - Advanced Steel Structures 3 Credit Hours
- CES 5706 - Advanced Reinforced Concrete 3 Credit Hours
- CES 5821 - Masonry and Timber Design 3 Credit Hours
- CES 6010 - Structural Reliability 3 Credit Hours
- CES 6116 - Finite Element Structural Analysis 3 Credit Hours
- CES 6209 - Dynamics of Structures 3 Credit Hours *
- CES 6220 - Wind and Earthquake Engineering 3 Credit Hours
- CES 6230 - Advanced Structural Mechanics 3 Credit Hours
- CES 6527 - Nonlinear Structural Analysis 3 Credit Hours
- CES 6715 - Prestressed Concrete Structures 3 Credit Hours *
- CES 6840 - Composite Steel Concrete Structures 3 Credit Hours *
- CES 6910 - Research in Structural Engineering 3 Credit Hours

Transportation Engineering

- TTE 5204 - Traffic Engineering 3 Credit Hours
- TTE 5805 - Geometric Design of Transportation Systems 3 Credit Hours
- TTE 5835 - Pavement Engineering 3 Credit Hours
- TTE 6205 - Highway Capacity 3 Credit Hours *
- TTE 6256 - Traffic Operations 3 Credit Hours
- TTE 6270 - Intelligent Transportation Systems 3 Credit Hours *
- TTE 6315 - Traffic Safety Analysis 3 Credit Hours *
- TTE 6526 - Planning and Design of Airports 3 Credit Hours
- TTE 6625 - Mass Transportation Systems 3 Credit Hours
- CGN 6655 - Regional Planning, Design, and Development 3 Credit Hours

Water Resources Engineering
- CWR 5125 - Groundwater Hydrology 3 Credit Hours
- CWR 5205 - Hydraulic Engineering 3 Credit Hours
- CWR 5515 - Numerical Methods in Civil and Environmental Engineering 3 Credit Hours
- CWR 5545 - Water Resources Engineering 3 Credit Hours
- CWR 5634 - Water Resources in a Changing Environment 3 Credit Hours
- CWR 6102 - Advanced Hydrology 3 Credit Hours *
- CWR 6126 - Groundwater Modeling 3 Credit Hours *
- CWR 6235 - Open Channel Hydraulics 3 Credit Hours
- CWR 6236 - River Engineering and Sediment Transport 3 Credit Hours
- CWR 6535 - Modeling Water Resources Systems 3 Credit Hours *

Construction Engineering and Management
- CCE 5205 - Decision Support for Infrastructure Projects 3 Credit Hours
- CCE 5006 - Infrastructure Systems Management 3 Credit Hours
- CCE 5220 - Sustainable Infrastructure Systems 3 Credit Hours
- CCE 5937 - Construction Contracts 3 Credit Hours
- CCE 6036 - Advanced Construction Planning and Control 3 Credit Hours *
- CCE 6211 - Design and Monitoring of Construction Processes 3 Credit Hours *
- CCE 6045 - Cost Analysis of Sustainable Infrastructure Systems 3 Credit Hours

Thesis Option: 6 Credit Hours
For those pursuing the thesis option, students must complete 6 credit hours of thesis and successfully defend the thesis.

Nonthesis Option: 6 Credit Hours
Students in the nonthesis option must complete 6 credit hours of electives in addition to the 24 credit hours of formal course work described above. All totaled, the nonthesis option requires 30 credit hours of course work.
- Electives 6 Credit Hours

Portfolio Requirement
Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of their portfolio of activities by the course Withdrawal date of the semester prior to their intended graduation. The portfolio requirements are listed on the CECE website.

Equipment Fee
Students in the Civil Engineering MSCE program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning
A research or design project serves as the independent learning experience for thesis students. Nonthesis students are required to take at least one course where a research project is required and submit an end-of-program portfolio.

Application Requirements
For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided...
for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in civil engineering or another closely related engineering degree.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

### Clinical Psychology MA

### Program Description

The Master of Arts Clinical Psychology program is designed to provide training and preparation for students desiring to deliver clinical services through community agencies and in independent practice. After completing the program and a two-year postgraduate internship, graduates are eligible to become Licensed Mental Health Counselors in the state of Florida (with the possible exception of the research/thesis option as described below). The program is a terminal master's program offered at the UCF Sanford/Lake Mary Campus.
This program is designed to provide training and preparation for students desiring to deliver clinical services through community agencies and perhaps independent practice. After completing the program and a two-year postgraduate supervised clinical experience, graduates are eligible to become Licensed Mental Health Counselors in the state of Florida (see SARA statement regarding licensure). A possible exception is the research/thesis option as described below.

The master's program is concerned with the application of psychological principles to individuals. The two primary areas of emphasis include assessment or evaluation skills and intervention or psychotherapy skills, and the program curriculum is consistent with the educational criteria for licensure as a mental health counselor in the state of Florida. Master's program graduates have been involved in mental health service delivery through individual, marital, family, and group psychotherapy, as well as crisis intervention and other specialized therapeutic procedures. In addition, it is common for a number of students from each cohort to enter doctoral programs after graduating, and there are research and thesis opportunities available for students who are interested.

**Clinical Faculty**

**Steven Berman, Ph.D.**
Interests: Research and clinical interests include identity development, identity distress, existential anxiety, positive youth development, adolescent and young adult clinical psychology.
Contact: https://sciences.ucf.edu/psychology/people/berman-steven-

**Brian Fisak, Ph.D.**
Interests: Research and clinical interests include anxiety disorders, worry, prevention, evidence-based interventions, child clinical psychology.
Contact: https://sciences.ucf.edu/psychology/people/fisak-brian/

**Ed Fouty, Ph.D.**
Interests: Research and clinical interests include neuropsychology and clinical medical psychology.
Contact: https://sciences.ucf.edu/psychology/people/fouty-ed/

**Bernard Jensen, Ph.D.**
Interests: Clinical, teaching, and research interests include cognitive behavior therapy, assessment and treatment of marital dysfunction, self-efficacy and athletic performance, and variables associated with exercise behavior.
Contact: https://sciences.ucf.edu/psychology/people/jensen-bernard/

**Monique Levermore, Ph.D.**
Interests: Teaching and clinical interests include private practice, consulting, psychological assessment and clinical supervision.
Contact: https://sciences.ucf.edu/psychology/people/levermore-monique/

**Karen Mottarella, Psy.D.**
Interests: Teaching and clinical interests include adult clinical psychology, women's mental health, academic advising and career readiness.
Contact: https://sciences.ucf.edu/psychology/people/mottarella-karen/

**Megan Sherod, Ph.D.**
Interests: Teaching, clinical, and research interests include assessment, therapy, and maximizing the quality of life for neuro-atypical populations.
Web Contact: https://sciences.ucf.edu/psychology/people/sherod-megan/

**Jessica Waesche, Ph.D.**
Interests: Clinical and teaching interests include adult clinical psychology, assessment, and diagnosis of mental illness, evidence-based interventions.
Contact: https://sciences.ucf.edu/psychology/people/waesche-jessica/

**Frequently Asked Questions**

https://sciences.ucf.edu/psychology/clinical-psychology-ma-program-faqs/

**Curriculum**

The Clinical Psychology MA program requires a minimum of 61 credit hours beyond the bachelor's degree, including 43-49 credit hours of required courses, and 12 clinical internship credit hours. The program has two options: Applied Pre-Licensure/Nonthesis and Research/Thesis.

**Total Credit Hours Required: 61 Credit Hours Minimum beyond the Bachelor’s Degree**

**Option 1: Pre-Licensure/Nonthesis**

**Required Courses: 49 Credit Hours**

- CLP 5166 - Advanced Abnormal Psychology 3 Credit Hours
- CLP 6181 - Psychological Theories of Substance Abuse Treatment 3 Credit Hours
- CLP 6191 - Multicultural Psychotherapy 3 Credit Hours
- CLP 6195C - Introduction to Psychotherapy 3 Credit Hours
- CLP 6321 - Psychotherapy in Community Settings 3 Credit Hours
- CLP 6441C - Individual Psychological Assessment I 3 Credit Hours
- CLP 6457C - Group Psychotherapy 3 Credit Hours
- CLP 6459C - Human Sexuality, Marriage, and Sex Therapies 3 Credit Hours
- CLP 6460C - Introduction to Child, Adolescent, and Family Therapies 3 Credit Hours
- CLP 6461 - Cognitive-Behavioral Therapy 3 Credit Hours
- CLP 6449C - Career and Lifestyle Assessment 3 Credit Hours
- CLP 6932 - Ethical and Professional Issues in Mental Health Practices 3 Credit Hours
- CYP 6942 - Practicum in Psychological Counseling 3 Credit Hours
- DEP 5057 - Developmental Psychology 3 Credit Hours
- PSY 6216C - Research Methodology 4 Credit Hours
- MHS 6430 - Family Counseling I 3 Credit Hours

**Internship: 12 Credit Hours**

The purpose of the internship requirement is to provide the MA candidate in Clinical Psychology with comprehensive, practical-based experiences under the supervision of licensed mental health professionals. A public agency or nonprofit institution with nondiscriminatory practices is the prototype. The intern is assigned to an acceptable agency for a total of 1000 hours during three consecutive academic semesters (20 hours per week for 16 weeks during fall and spring terms, and 30 hours per week for 12 weeks during the summer term). An additional commitment of two hours per week is required for the interns to meet as a group with a departmental faculty member for review, feedback, and discussions. A major portion of intern training is in the area of psychotherapy/counseling. The intern also engages in differential diagnosis and participates in a wide variety of psychological assessment procedures.

It is believed that supervision by qualified and experienced personnel is the primary learning mode by which the intern develops professional expertise and augments the classroom material previously acquired. Satisfactory completion ("B" [3.0 grade point average] or better) of the following courses is generally required prior to internship: CLP 5166, CLP 6195C, CLP 6441C, and CYP 6942.

The program director and clinical placement coordinator approve internship placements. Interns are provided with a system for maintaining accurate accounts of their activity during each week of their internship. In addition, both the intern and supervisor(s) complete an Internship Evaluation form each semester.

- CYP 6948C - Psychology Internship VAR Credit Hours

**Option 2: Research/Thesis**

The Research/Thesis option is available only with program approval. Students who choose this option may not be license eligible depending on the restricted electives they select. It is important for students to work closely with their adviser to determine the plan of study that best meets their academic/career goals.

**Required Courses: 19 Credit Hours**

- CLP 5166 - Advanced Abnormal Psychology 3 Credit Hours
- CLP 6195C - Introduction to Psychotherapy 3 Credit Hours
- CLP 6441C - Individual Psychological Assessment I 3 Credit Hours
- CLP 6932 - Ethical and Professional Issues in Mental Health Practices 3 Credit Hours
- CYP 6942 - Practicum in Psychological Counseling 3 Credit Hours
- PSY 6216C - Research Methodology 4 Credit Hours

**Restricted Electives: 24 Credit Hours**

- CLP 6181 - Psychological Theories of Substance Abuse Treatment 3 Credit Hours
- CLP 6191 - Multicultural Psychotherapy 3 Credit Hours
- CLP 6321 - Psychotherapy in Community Settings 3 Credit Hours
- CLP 6457C - Group Psychotherapy 3 Credit Hours
- CLP 6459C - Human Sexuality, Marriage, and Sex Therapies 3 Credit Hours
- CLP 6460C - Introduction to Child, Adolescent, and Family Therapies 3 Credit Hours
- CLP 6461 - Cognitive-Behavioral Therapy 3 Credit Hours
- CLP 6449C - Career and Lifestyle Assessment 3 Credit Hours
DEP 5057 - Developmental Psychology 3 Credit Hours
MHS 6430 - Family Counseling I 3 Credit Hours

Internship: 12 Credit Hours Required

- CYP 6948C - Psychology Internship VAR Credit Hours - See Option 1 for description.

Thesis: 6 Credit Hours Required

- PSY 6971 - Thesis 6 Credit Hours

Additional Program Requirements

For all students in the Clinical MA program, successful completion requires demonstration of academic and clinical excellence. Students who receive grades lower than B (including B- and grades of U in courses graded satisfactory/unsatisfactory) in six semester hours or more will be dismissed from the program. It is a program requirement that all course work with a grade lower than B be retaken and completed successfully, although both grades are still calculated in the GPA.

In addition to academic excellence, students are expected to demonstrate clinical skills and personal resources that are up to the demands of clinical work. At the end of each semester, students will receive written feedback from the faculty on the extent to which they are meeting the programs requirements and performance expectations. Student progress will be rated as satisfactory or unsatisfactory. Students who receive an unsatisfactory rating will be asked to complete remedial assignments as determined by the faculty. If the identified problems are not remedied and/or a second unsatisfactory rating is received, the student will be dismissed from the program.

Summer Enrollment

Summer enrollment is required for all students in the program.

Comprehensive Exam and Case Presentation

The culminating academic experience for all students in the program (both options) is successful completion of a comprehensive exam and case presentation. All students must complete the comprehensive exam their final semester. The exam covers the core professional knowledge required by state licensing agencies. Students also are required to complete a written and oral clinical case presentation. Criteria for passing the exam and presentation are provided in the program handbook.

Independent Learning

There are several independent learning experiences built into the program of study that help to individualize the training program. The field experiences require that students, in consultation with the field placement supervisor and participating agencies, select practicum and internship placements, which will give them an opportunity to hone their clinical skills with supervision in an agency where they can work with specific populations of interest. Practicum and internship students will have the opportunity to present cases that incorporate an integration of assessment data and its interpretation, theoretical conceptualization, treatment planning, course of therapy, and available outcome data. This is done ensuring client confidentiality and the highest ethical standards.

All students engage in independent learning through their individual preparation for the Comprehensive Exam. Students who pursue the thesis option also engage in independent learning through the design and implementation of original research.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- A bachelor's degree in Psychology or a related area. A minimum of 15 semester hours of undergraduate psychology courses are required as a prerequisite for applicants with a degree in a field other than psychology. Competitive applicants with degrees in related areas will have completed courses in the following areas: abnormal psychology, developmental or child psychology, personality theory, learning theory, experimental psychology, and courses in research methods and statistics.
- Resume or Curriculum Vita.
- Personal Statement describing the applicant's experience, interest in psychology, and professional goals.
• Three letters of recommendation, with at least two furnished by instructors who are acquainted with the applicant.

Students are admitted to full-time or nondegree-seeking status:
• Full-time students complete the MA program in two calendar years (including summers).
• Students who do not maintain satisfactory progress towards degree completion will be dismissed from the program.
• Community professionals may be admitted to nondegree-seeking status in order to meet job or licensing requirements after consultation with the program director.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Admission into the clinical master's program is competitive, with all information that might be available to the committee (e.g., GRE scores, GPA, letters of reference, personal statement, clinical experience, research experience, and interview performance) considered in admissions decisions. Many applicants who meet minimum university requirements may not be admitted to the program. A department admissions committee reviews each student's credentials and may invite candidates for an interview. Final selection is based on both submitted credentials and the interview.

Application Deadlines

All application materials must be submitted by the appropriate deadline listed below. This program is offered at the Sanford/Lake Mary Campus.

<table>

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Communication MA ♦♦

Program Description

The Communication MA focuses on preparing students for a wide range of professions in academia and the private sector. The program focuses on principles, theories, and applications of communication research related to both mass and interpersonal contexts. Our program offers training in such areas as Health Communication, Strategic Communication, Public Relations, Social Media, Intercultural Communication, and Interpersonal Communication.
Curriculum

The MA degree program in Communication is a four-semester program for full-time students. Part-time students may take up to seven years to complete the program. Both thesis and nonthesis options are offered and both consist of a minimum of 33 semester hours of work. By the end of their first 18 hours of coursework, the student should decide whether to pursue the thesis or nonthesis option. During their first six hours of study, students are required to complete COM 6008 Proseminar in Communication and COM 5312 Introduction of Communication Research.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—9 Credit Hours

All required courses must be completed with a grade of B- or higher.

- COM 5312 - Introduction of Communication Research 3 Credit Hours
- COM 6008 - Proseminar in Communication 3 Credit Hours
- COM 6401 Communication Theory 3 Credit Hours

Research Methods Concentration—3 Credit Hours (Choose one course)

- COM 6303 - Qualitative Research Methods in Communication 3 Credit Hours
- COM 6304 - Quantitative Research Methods in Communication 3 Credit Hours

Elective Courses—18 Credit Hours

In addition to the courses listed below, special topics courses, study abroad courses, independent study, directed research, internship, and graduate-level courses taken outside the Nicholson School of Communication may be counted as restricted electives, pending approval by the program director.

- ADV 6209 - Advertising and Society 3 Credit Hours
- COM 5932 - Topics in Communication Theory and Research 3 Credit Hours
- COM 6025 - Health Communication 3 Credit Hours
- COM 6046 - Interpersonal Communication 3 Credit Hours
- COM 6047 - Interpersonal Support in the Workplace 3 Credit Hours
- COM 6048 - Communication in Close Relationships 3 Credit Hours
- COM 6121 - Communication Management 3 Credit Hours
- COM 6145 - Organizational Communication 3 Credit Hours
- COM 6425 - Symbolism in Terrorism 3 Credit Hours
- COM 6463 - Studies in Intercultural Communication 3 Credit Hours
- COM 6466 - Persuasion in the Media 3 Credit Hours
- COM 6467 - Studies in Persuasion 3 Credit Hours
- COM 6468 - Communication and Conflict 3 Credit Hours
- COM 6535 Communication Campaigns 3 Credit Hours
- COM 6525 - Communication Strategy and Planning 3 Credit Hours
- COM 6815 - Risk Communication 3 Credit Hours
- COM 6909 Research Report 3 Credit Hours
- MMC 6202 - Legal and Ethical Issues for Communication 3 Credit Hours
- MMC 6266 - Communications Convergence and Media Planning 3 Credit Hours
- MMC 6307 - International Communication 3 Credit Hours
- MMC 6407 - Visual Communication Theory 3 Credit Hours
- MMC 6567 New Media 3 Credit Hours
- MMC 6600 - Media Effects and Audience Analysis 3 Credit Hours
- MMC 6607 - Communication and Society 3 Credit Hours
- MMC 6612 - Communication and Government 3 Credit Hours
- MMC 6735 - Social Media as Mass Communication 3 Credit Hours
- PUR 6005 - Theories of Public Relations 3 Credit Hours
- PUR 6215 - Communicating Corporate Social Responsibility 3 Credit Hours
- PUR 6403 - Crisis Public Relations 3 Credit Hours
- PUR 6405 - Communication and Public Relations in Politics and Government 3 Credit Hours
- SED 6340 - Teaching Communication 3 Credit Hours
- SPC 6442 - Small Group Communication 3 Credit Hours

Thesis Option—3 Credit Hours

The thesis option requires a minimum of 3 hours of thesis credit and a successful defense of a thesis. Students may enroll in
thesis hours after they have successfully completed the three core courses and their thesis committee has been approved by the department, college, and Graduate Studies.

The student's permanent faculty adviser will chair their committee, which also will include two additional graduate faculty members in the Nicholson School of Communication. One additional member, who is also a graduate faculty member, may be added from outside the NSC. All members of the thesis committee are selected in consultation with the student's permanent faculty adviser.

When a topic has been selected, students, in conjunction with their permanent adviser, will develop a thesis proposal. Copies of the proposal will be routed to members to their thesis committee and a proposal hearing scheduled. All student must pass a proposal hearing as well as a final oral defense of their thesis. Students who elect to write a thesis should become familiar with the university's requirements and deadlines for organizing and submitting the thesis.

- COM 6971 Thesis (minimum of 3 credit hours, can be taken individually)

Nonthesis Option—3 Credit Hours

Students who decide not complete a thesis may choose to complete either the comprehensive examination nonthesis option OR an applied professional project nonthesis option.

- Nonthesis Option 1: Comprehensive Examination—3 Credit Hours

The nonthesis (comprehensive examination) option is a four-examination requirement that assesses students' coursework competency. Students who choose the comprehensive examination option must take one additional elective course (three credit hours) and successfully complete the comprehensive examinations. Upon completing their 18th hour in the program, students must select a permanent advisor and form a comprehensive exam committee. The examinations will cover research methods, communication theory, and elective areas selected together by the student with his or her comprehensive examination committee. In order to fulfill the comprehensive exam requirement, the student must earn a passing grade on all exams. If a student fails to pass any of the comprehensive exam area questions, they are allowed two additional attempts to satisfy the comprehensive exam requirement. Once an exam in an area is passed, the student does not have to sit for that exam area again. Students are allowed three attempts to satisfy the comprehensive exam requirement. Students are expected to refer to the NSC Graduate Program Handbook for the comprehensive examination protocol.

- Elective 3 Credit Hours
- Comprehensive examination
- Nonthesis Option 2: Applied Professional Project—3 Credit Hours

The nonthesis applied project option requires students to demonstrate their ability to apply the knowledge and skills learned in the graduate program to a problem/topic that integrates the range of communication theory, practice, and research presented throughout the program. Upon completing their 18th hours in the program, each student must select a permanent advisor and form an applied project panel. The student will work directly with a faculty adviser to develop a project and the adviser will supervise the project. The grading system for the project is Pass/No Pass. Students who receive a grade of Pass will be allowed to graduate assuming all other requirements are met.

Students who choose this nonthesis option will enroll in the semester the student completes the project:

- COM 6909 Research Report 3 Credit Hours

Equipment Fee

Full-time students in the Communication MA program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning

Students who elect the thesis option engage in independent learning through the design and implementation of original research in the thesis process. Students who pursue the comprehensive examination option experience independent learning through their individual preparation for each of four comprehensive examinations. All students engage in independent learning in every Communication core course. A research paper or project is required in each of these classes. The papers and projects provide independent learning by requiring students to design and carry out research projects and develop analytical papers, some of which are submitted to conferences and/or journals for peer review. Internships and independent studies are also common opportunities for independent learning in the Communication MA program.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants
must apply online. All requested materials must be submitted by the established deadline.

Applicants should adhere to the application requirements outlined below. An application will not be reviewed for admission until it is verified as complete by the UCF College of Graduate Studies.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on an evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Written statement outlining the applicant's academic and professional goals.
- Two letters of recommendation attesting to the applicant's potential for academic success.

The following information is required for those who wish to be considered for funding initiated by the Nicholson School of Communication, but is recommended for all applicants:

- Additional letter of recommendation (total of three)
- Resume or Curriculum Vita

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

**Financials**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**Fellowships**

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Assistantships**

The majority of financial assistance provided by the Nicholson School of Communication graduate program is granted through assistantships. Preference will be given to applicants who complete their application for admission prior to the January 15th priority deadline. It is the applicants' responsibility to ensure they have a complete application on file by the priority deadline. Applicants who have complete applications on file by the priority deadline will be e-mailed a separate application for assistantship. Current Communication MA degree-seeking students will also be given the opportunity to apply for assistantships at that time. Students on assistantship are paid a stipend, receive tuition support, and are eligible for health insurance. For general information regarding assistantships at UCF, refer to the Assistantships (www.students.graduate.ucf.edu/assistantships) section of the Graduate Students website.

The Nicholson School of Communication offers primarily two types of assistantships:

- Graduate Teaching Assistants are assigned to work with faculty members and assist them with their teaching responsibilities. This includes assisting with large lecture classes, grading exams, compiling information for lectures, and working with students, as instructed, to help keep a class operating smoothly.
- Graduate Teaching Associates are graduate students who, after completing eighteen hours of their graduate program
of study and the required university and department training, are assigned to teach their own sections of undergraduate courses. Typically, Graduate Teaching Associates teach SPC 1608 (Fundamentals of Oral Communication) or SPC 1603 (Fundamentals of Technical Presentation).

Communication Sciences and Disorders MA

Program Description

The Department of Communication Sciences and Disorders offers three plans of study leading to the Master of Arts degree: the Traditional, Consortium (summers mainly) and Accelerated programs.

Each track is intended for those interested in working with children and adults who have communication disorders and is based on the same curriculum and degree requirements but allows students to follow different plans of study. Students enrolled in each track must follow a prescribed sequence of academic and clinical courses.

Each track provides academic and clinical education experiences necessary for certification by the American Speech-Language-Hearing Association (ASHA) and the Florida Department of Education, and licensure by the state of Florida. For information on how this program may prepare you for professional licensure, please visit here. The Council on Academic Accreditation (CAA) of the ASHA has accredited the Master of Arts Degree in Communication Sciences and Disorders since 1986.

The Communication Sciences and Disorders program strives to educate students to become successful practitioners in the field of speech-language pathology. To that end, the ASHA Code of Ethics is re-enforced throughout the academic curriculum.

Students who violate the ASHA Code of Ethics may be subject to academic sanctions or dismissed from the program.

The College of Education also offers the Communication Sciences and Disorders PhD track in Education. For more information, please click here.

The Traditional track is a two-year, full-time program (six consecutive semesters, including two summers) for students with undergraduate degrees in communication sciences and disorders or speech-language pathology and audiology. For students with undergraduate degrees in other majors (out-of-field), the program requires additional prerequisite coursework. Students must begin the program in the semester for which they are admitted and must enroll full-time each semester.

The Consortium (summers mainly) track is a five-year program, including five consecutive summers of full-time enrollment and occasional enrollment during fall or spring semesters, with prior advisor approval from the master's program coordinator. The goal of this program is to address the critical shortage of public school speech-language pathologists and is a cooperative effort between the UCF Department of Communication Sciences and Disorders and the Central Florida Public School Consortium. Participating school districts in the Central Florida Consortium are Brevard, Citrus, Flagler, Lake, Marion, Orange, Osceola, Seminole, Sumter, and Volusia.

The Accelerated track enables highly qualified current UCF undergraduate majors in communication sciences and disorders to achieve a master's degree in the UCF Department of Communication Sciences and Disorders graduate program in one less semester than students in the Traditional track. This program is a BA/BS to MA program. Students are able to enroll in 16 credit hours of graduate-level courses while completing the bachelor's degree.

Curriculum

The Communication Sciences and Disorders MA program consists of a minimum of 72 credit hours, including 38 credit hours of core academic courses, 9 credit hours of electives, and 25 credit hours of clinical practice. Thesis students take 6 credit hours of Thesis and one elective course (3 credit hours).

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Prerequisites

To be certified to practice by the American Speech-Language-Hearing Association (ASHA), all students must have undergraduate transcript credit, which could include course
work, advanced placement, CLEP, or examination equivalency, for each of the following areas: biological sciences, physical sciences, social/behavioral sciences, and statistics. Courses may consist of any number of credits and must be taken outside the discipline.

All students must complete at least 3 credit hours in statistics with a grade of “C” or better. Undergraduate or graduate coursework in statistics is a prerequisite to SPA 6805 - Research in Communicative Disorders.

The Department admits qualified in-field applicants, with an undergraduate degree in communication sciences and disorders or speech-language pathology and audiology, and out-of-field applicants, with undergraduate degrees in other majors. Out-of-field students require an additional 32 to 35 credit hours of prerequisite coursework that may be completed in approximately two semesters once admitted.

Out-of-field students must complete the following undergraduate prerequisite courses or their equivalents once admitted:

- STA 2014C - Principles of Statistics 3 Credit Hours or STA 2023 - Statistical Methods I 3 credit hours
- LIN 3713 - Language Science 3 Credit Hours
- LIN 3716/3716L - Language Development 5 Credit Hours
- SPA 3101 - Physiological Bases of Speech and Hearing 3 Credit Hours
- SPA 3104 - Neural Bases of Communication 3 Credit Hours
- SPA 3112/3112L - Basic Phonetics and Lab 4 Credit Hours
- SPA 3011/3011L - Speech Science I: Production and Lab 4 Credit Hours
- SPA 3123/3123L - Speech Science II: Perception and Lab 4 Credit Hours
- SPA 4032 - Audiology 3 Credit Hours
- SPA 4326 - Hearing Disorders Across the Lifespan 3 credit hours
- SPA 6410 - Aphasia and Related Disorders 3 Credit Hours
- SPA 6474 - Assessment and Management of Culturally and Linguistically Diverse Populations 3 Credit Hours
- SPA 6496 - Language Disorders in Children and Adolescents 6 Credit Hours
- SPA 6559 - Augmentative and Alternative Communication 3 Credit Hours
- SPA 6565 - Feeding and Swallowing Disorders 3 Credit Hours
- SPA 6805 - Research in Communicative Disorders 3 Credit Hours

Clinical Practice: 25 Credit Hours

Supervised clinical practice is an integral part of the graduate program in communication sciences and disorders. It provides students with an opportunity to apply classroom knowledge to the evaluation and management of individuals with a wide variety of communication disorders. Students complete three clinical practica at the UCF Communication Disorders Clinic and other affiliated facilities, as well as externships in schools, hospitals, rehabilitation centers, skilled nursing facilities, long-term care facilities, community clinics, and private practices. Through these practica and externships, students obtain a minimum of 400 clock hours of supervised clinical experience in accordance with the guidelines outlined by the American Speech-Language-Hearing Association (ASHA). Clinical practica and externships vary in length and do not always coincide with the academic calendar.

- SPA 6551 - Foundations of Clinical Practice: Level I 1 Credit Hours
- SPA 6503 - Foundations of Clinical Practice Level II 1 Credit Hours
- SPA 6503L - Foundations of Clinical Practice: Level II Application 1 Credit Hours
- SPA 6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology 1 Credit Hours
- SPA 6942 - Foundations of Clinical Practice: Level III 1 Credit Hours
- SPA 6942L - Foundations of Clinical Practice: Level III Application 1 Credit Hours
- SPA 6943C - Clinical Practice Level I 3 Credit Hours
- SPA 6946 - Clinical Practice: Level II 3 Credit Hours
- SPA 6946 - Clinical Practice: Level III 10 Credit Hours
Thesis Option: 9 Credit Hours

Students who elect this option complete a thesis in Communication Sciences and Disorders for 6 credit hours and select one elective in consultation with a faculty adviser.

Thesis hours cannot be counted toward graduation requirements if students fail to complete or successfully defend their thesis. For additional information, thesis students and their advisory committees should refer to the thesis requirements in the UCF Graduate Catalog.

- SPA 6971 - Thesis  6 Credit Hours
- Elective 3 Credit Hours

Nonthesis Option: 9 Credit Hours

Students who elect this option must select three electives in consultation with a faculty adviser.

- Electives 9 Credit Hours

Comprehensive Examination

Passing a Departmental Comprehensive Examination is a requirement for completion of the master's degree in communication sciences and disorders.

Equipment Fee

Students in the Communication Sciences and Disorders MA Program pay a $90 equipment fee each semester they are enrolled.

Additional Program Costs

The program requires students to pay additional fees for the required background checks, clinic uniform, and registration for the academic/clinical competencies tracking system.

Sample Plan of Study for the Traditional Program

The Traditional MA program requires a prescribed sequence of academic and clinical courses which may vary according to the semester of entry. The following is a sample plan of study.

<table>

Independent Learning

All students in the Master of Arts in Communication Sciences and Disorders program engage in independent learning through inquiry, dialogue, and practice. Experiences such as client case studies, scholarly reviews, research projects, clinical practica and externships provide students independent learning opportunities to attain knowledge, skills, and professional behaviors. In capstone externships, students bridge university classroom and clinic lessons to real-world educational and health-related settings.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Master of Arts in Communication Sciences and Disorders program at UCF participates in the Communication Sciences and Disorders Centralized Application Service, known as CSDCAS. Prospective students applying to the Communication Sciences and Disorders MA program for the Spring 2017 entering class and beyond must apply online using the CSDCAS application. To learn more about the CSDCAS application process, visit http://www.capcsd.org/csdcas-student-page/

Entry Terms: The program only accepts one application from each prospective student per application deadline. For the February 1 deadline, applicants must choose to apply for either the Summer or Fall semester. However, applicants may apply for spring (October 1 deadline), regardless if they have applied for admission in other terms.

Step 1: Complete the CSDCAS application for the UCF program

- Completed CSDCAS Application (https://csdcas.liaisoncas.com/applicant-ux/#{login})
- One official transcripts (in a sealed envelope) from each college/university attended. 
- Official, competitive GRE score (verbal, quantitative, and written) obtained within the last five years. Use GRE CODE for UCF CSDCAS: 7407. (Do not use the "Institution Code" for GRE listed to the right).
- Three (3) letters of recommendation with CSDCAS recommendation forms, preferably two from former faculty members. Letters of recommendation cannot be dated more than one year prior to the date of the application deadline.
- A letter of intent describing educational background, professional experiences, future goals, and how you will embody and uphold the ASHA Code of Ethics (http://www.asha.org/code-of-ethics/) in your professional career
- A current resume.

Step 2: Complete University of Central Florida's Graduate School application

In addition to your CSDCAS application, applicants must also submit a UCF application for graduate admission at https://application.graduate.ucf.edu/. Supporting documents (i.e. transcripts, test scores, etc.) do not need to be submitted to UCF directly. University applications must also be submitted by the stated application deadlines.

Admission to the Communication Sciences and Disorders program is granted on a competitive basis. Approximately thirty-five (35) students are admitted each semester. Meeting the minimum admission requirements does not guarantee admission to the program. The recent class statistics are listed on the Graduate Program Profile webpage. Additionally, the program reserves the right to deny admission or dismiss a student after

Incomplete applications will NOT be reviewed.

All application materials MUST be sent directly to CSDCAS. Materials sent to the university or program will not be accepted. Application materials must be received by CSDCAS no later than October 1st for Spring admission and February 1st for Summer and Fall admission.
admission to the program if, in the judgment of the faculty, the student fails to demonstrate and/or uphold the ASHA Code of Ethics (http://www.asha.org/code-of-ethics/) during coursework and/or practice in the field.

Application Deadlines

The Traditional Track admits students three times per year in the fall, spring, and summer. The Consortium Track admits students once per year in the summer.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

The program has several options for financial assistance. Full-time students are eligible for a limited number of graduate teaching and research assistantships and for positions providing faculty assistance. In addition, there is an opportunity to be funded through a United States Department of Education (USDOE) personnel preparation grant to support students interested in acquiring knowledge and skills to prepare qualified speech-language pathologists to work with children specifically in the area of listening and spoken language who are deaf and hard of hearing and who come from culturally and linguistically diverse homes. For additional information, consult the department website at www.cohpa.ucf.edu/csd.

Communication Sciences and Disorders MA, Accelerated BA/BS to MA Track

Track Description

The Department of Communication Sciences and Disorders offers an Accelerated BA/BS to MA Track for highly qualified UCF undergraduate majors in communication sciences and disorders that enables them to complete a master's degree in one less semester than students in the Traditional Track.

The program is intended for those interested in working with children and adults who have communication disorders. Once students complete the BA/BS, they must apply and be admitted to the master's degree program and follow a prescribed sequence of academic and clinical courses.

The Communication Sciences and Disorders program strives to educate students to become successful practitioners in the field of speech-language pathology. To that end, the American Speech-Language-Hearing Association (ASHA) Code of Ethics is re-enforced throughout the academic curriculum. Students...
who violate the ASHA Code of Ethics may be subject to academic sanctions or dismissed from the program.

The College of Education also offers the Communication Sciences and Disorders track in PhD in Education. For more information, please visit the graduate catalog.

Curriculum

The Department of Communication Sciences and Disorders offers an Accelerated BA/BS to MA program for highly qualified undergraduate majors in communication sciences and disorders. Undergraduate students enroll in 16 credit hours of graduate-level courses while completing the bachelor's degree. This enables students to achieve a master's degree in the UCF Department of Communication Sciences and Disorders in one less semester.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Up to 16 credit hours of approved 6000-level courses, with grades of "B" (3.0) or better, may be counted toward the BA/BS and MA degrees. Additional requirements include:

- Adopting the most current catalog for students changing degree programs.
- Earning at least a "B" (3.0) in each undergraduate and graduate course to be counted toward the major.
- Being assessed tuition and fees at the graduate rate for graduate courses.

Required Courses: 38 Credit Hours

- SPA 6204 - Articulation/Phonological Disorders 3 Credit Hours
- SPA 6211C - Voice Disorders 4 Credit Hours
- SPA 6225C - Fluency Disorders 4 Credit Hours
- SPA 6236 - Motor Speech Disorders in Adults and Children 3 Credit Hours
- SPA 6327 - Aural Habilitation/Rehabilitation 3 Credit Hours
- SPA 6410 - Aphasia and Related Disorders 3 Credit Hours
- SPA 6474 - Assessment and Management of Culturally and Linguistically Diverse Populations 3 Credit Hours
- SPA 6496 - Language Disorders in Children and Adolescents 6 Credit Hours
- SPA 6559 - Augmentative and Alternative Communication 3 Credit Hours
- SPA 6565 - Feeding and Swallowing Disorders 3 Credit Hours
- SPA 6805 - Research in Communicative Disorders 3 Credit Hours

Clinical Practice: 25 Credit Hours

Supervised clinical practice is an integral part of the graduate program in communication sciences and disorders. It provides students with an opportunity to apply classroom knowledge to the evaluation and management of individuals with a wide variety of communication disorders. Students complete three clinical practica at the UCF Communication Disorders Clinic and other affiliated facilities, as well as externships in schools, hospitals, rehabilitation centers, skilled nursing facilities, long-term care facilities, community clinics, and private practices. Through these practica and externships, students obtain a minimum of 400 clock hours of supervised clinical experience in accordance with the guidelines outlined by the American Speech-Language-Hearing Association (ASHA). Clinical practica and externships vary in length and do not always coincide with the academic calendar.

Undergraduate Requirements

The Shared Courses below replace:

- SPA 4400 Language Disorders Across the Life Span
- SPA 4476 Speech Disorders Across the Life Span
- SPA 4478 Multicultural Aspects of Communication Disorders and Differences
- SPA 4803 Research Methods in Communication Sciences and Disorders
- SPA 4870 Capstone Course
- one restricted elective in the undergraduate curriculum

Shared Courses

- SPA 6204 - Articulation/Phonological Disorders 3 Credit Hours
- SPA 6410 - Aphasia and Related Disorders 3 Credit Hours
- SPA 6496 - Language Disorders in Children and Adolescents 6 Credit Hours
- SPA 6551 - Foundations of Clinical Practice: Level I 1 Credit Hours
- SPA 6805 - Research in Communicative Disorders 3 Credit Hours
• SPA 6503 - Foundations of Clinical Practice Level II 1 Credit Hours
• SPA 6503L - Foundations of Clinical Practice: Level II Application 1 Credit Hours
• SPA 6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology 1 Credit Hours
• SPA 6942 - Foundations of Clinical Practice: Level III 1 Credit Hours
• SPA 6942L - Foundations of Clinical Practice: Level III Application 1 Credit Hours
• SPA 6943C - Clinical Practice Level I 3 Credit Hours
• SPA 6946 - Clinical Practice: Level II 3 Credit Hours
• SPA 6946 - Clinical Practice: Level III 10 Credit Hours

**Thesis Option: 9 Credit Hours**

Students who elect this option complete a thesis in Communication Sciences and Disorders for 6 credit hours and select one elective in consultation with a faculty adviser.

Thesis hours cannot be counted toward graduation requirements if students fail to complete or successfully defend their thesis. For additional information, thesis students and their advisory committees should refer to the thesis requirements in the UCF Graduate Catalog.

- SPA 6971 - Thesis 6 Credit Hours
- Elective 3 Credit Hours

**Nonthesis Option: 9 Credit Hours**

Students who elect this option must select three electives in consultation with a faculty adviser.

- Electives 9 Credit Hours

**Comprehensive Examination**

Passing a Departmental Comprehensive Examination is a requirement for completion of the master's degree in communication sciences and disorders.

**Equipment Fee**

Students in the Communication Sciences and Disorders MA Program pay a $90 equipment fee each semester they are enrolled.

**Additional Program Cost**

The program requires students to pay additional fees for the required background checks, clinic uniform, and registration for the academic/clinical competencies tracking system.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Accelerated B.A./B.S. to M.A. track in Communication Sciences and Disorders allows highly qualified University of Central Florida undergraduate majors in Communication Sciences and Disorders to begin taking graduate level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the Accelerated Track either in the last semester of their sophomore year or the first semester of their junior year.

Applicants must submit a hard copy (paper) application for the bachelor's program directly to the Department of Communication Sciences and Disorders. Please contact the department for the appropriate application form. An electronic application for admission to the graduate program must be submitted during the senior year of the bachelor's program.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- 3.7 GPA or higher in communication sciences and disorders course work earned at the University of Central Florida.
- Official, highly competitive GRE score obtained within the last five years.
- Three letters of recommendation from faculty in the department.
- Résumé.
- A letter of intent describing educational background, professional experiences, future goals, and how you will embody and uphold the ASHA Code of Ethics (http://www.asha.org/code-of-ethics/) in your professional career.

A formal admission decision for the master's program will be made following receipt of the bachelor's degree. Successful completion of the bachelor's degree does not guarantee admission to the master's program. The Communication
The program has several options for financial assistance. Full-time students are eligible for a limited number of graduate teaching and research assistantships and for positions providing faculty assistance. In addition, there is an opportunity to be funded through a United States Department of Education (USDOE) personnel preparation grant to support students interested in acquiring knowledge and skills to prepare qualified speech-language pathologists to work with children specifically in the area of listening and spoken language who are deaf and hard of hearing and who come from culturally and linguistically diverse homes. **Communication Sciences and Disorders MA, Consortium Track**

**Track Description**

The Department of Communication Sciences and Disorders offers the Consortium track leading to the Master of Arts in Communication Sciences and Disorders.

The Consortium track is designed specifically for students with a bachelor's degree in communication sciences and disorders or speech-language pathology and audiology who currently work in participating central Florida public school districts and have been providing speech and language services for at least one semester prior to application.

The goal of this program is to address the critical shortage of public school speech-language pathologists. It represents a cooperative effort between the UCF Department of Communication Sciences and Disorders and the Central Florida Public School Consortium. Participating school districts in the Central Florida Consortium are: Brevard, Citrus, Flagler, Lake, Marion, Orange, Osceola, Seminole, Sumter, and Volusia.

The Communication Sciences and Disorders program strives to educate students to become successful practitioners in the field of speech-language pathology. To that end, the American Speech-Language-Hearing Association (ASHA) Code of Ethics
is re-enforced throughout the academic curriculum. Students who violate the ASHA Code of Ethics may be subject to academic sanctions or dismissed from the program.

Curriculum

The Consortium track in the Communication Sciences and Disorders MA program consists of a minimum of 72 credit hours, including 38 credit hours of core academic courses, 9 credit hours of thesis or electives, and 25 credit hours of clinical practice. With regard to requirements for clinical practice, Consortium track students typically complete the full-time clinical practice externship prior to the part-time externship. The full-time externship must be completed in a school setting that is different from the practitioner's primary employment setting.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Prerequisites

All students must complete at least 3 credit hours in statistics with a grade of "C" or better. Undergraduate course work in statistics is a prerequisite to SPA 6805 - Research in Communicative Disorders.

To be certified to practice by the American Speech-Language-Hearing Association (ASHA), all students must have undergraduate transcript credit, which could include course work, advanced placement, CLEP, or examination equivalency, for each of the following areas: biological sciences, physical sciences, social/behavioral sciences, and statistics. Courses may consist of any number of credits and must be taken outside the discipline.

Required Courses: 38 Credit Hours

- SPA 6204 - Articulation/Phonological Disorders 3 Credit Hours
- SPA 6211C - Voice Disorders 4 Credit Hours
- SPA 6225C - Fluency Disorders 4 Credit Hours
- SPA 6236 - Motor Speech Disorders in Adults and Children 3 Credit Hours
- SPA 6327 - Aural Habilitation/Rehabilitation 3 Credit Hours
- SPA 6410 - Aphasia and Related Disorders 3 Credit Hours
- SPA 6474 - Assessment and Management of Culturally and Linguistically Diverse Populations 3 Credit Hours
- SPA 6496 - Language Disorders in Children and Adolescents 6 Credit Hours
- SPA 6559 - Augmentative and Alternative Communication 3 Credit Hours
- SPA 6565 - Feeding and Swallowing Disorders 3 Credit Hours
- SPA 6805 - Research in Communicative Disorders 3 Credit Hours

Clinical Practice: 25 Credit Hours

Supervised clinical practice is an integral part of the graduate program in communication sciences and disorders. committees should refer to the thesis requirements in the UCF Graduate Catalog.

- SPA 6971 - Thesis 6 Credit Hours
- Elective 3 Credit Hours

Nonthesis Option: 9 Credit Hours

Students who elect this option must select three electives in consultation with a faculty adviser.

- Electives 9 Credit Hours

Comprehensive Examination

Passing a Departmental Comprehensive Examination is a requirement for completion of the master's degree in communication sciences and disorders.

Equipment Fee

Students in the Communication Sciences and Disorders MA Program pay a $90 equipment fee each semester that they are enrolled.

Additional Program Costs

The program requires students to pay additional fees for the required background checks, clinic uniform, and registration for the academic/clinical competencies tracking system.

Sample Plan of Study for the Consortium Program with a Nonthesis Option

The Consortium Track requires a prescribed sequence of academic and clinical courses that may vary. Students must meet with the Master's Program Coordinator and Consortium Coordinator to devise a program of study. The following is a sample plan of study.

Summer Semester 1

- SPA 6204 - Articulation/Phonological Disorders 3 Credit Hours
- SPA 6496 - Language Disorders in Children and Adolescents 6 Credit Hours
- SPA 6551 - Foundations of Clinical Practice: Level I 1 Credit Hours

Summer Semester 2

- SPA 6225C - Fluency Disorders 4 Credit Hours
- SPA 6410 - Aphasia and Related Disorders 3 Credit Hours
- SPA 6559 - Augmentative and Alternative Communication 3 Credit Hours
- SPA 6503 - Foundations of Clinical Practice Level II 1 Credit Hours
- SPA 6503L - Foundations of Clinical Practice: Level II Application 1 Credit Hours

Summer Semester 3

- SPA 6211C - Voice Disorders 4 Credit Hours
- SPA 6327 - Aural Habilitation/Rehabilitation 3 Credit Hours
- SPA 6565 - Feeding and Swallowing Disorders 3 Credit Hours
- SPA 6942 - Foundations of Clinical Practice: Level III 1 Credit Hours
- SPA 6942L - Foundations of Clinical Practice: Level III Application 1 Credit Hours
- SPA 6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology 1 Credit Hours

Summer Semester 4

- SPA 6236 - Motor Speech Disorders in Adults and Children 3 Credit Hours
- SPA 6474 - Assessment and Management of Culturally and Linguistically Diverse Populations 3 Credit Hours
- SPA 6943C - Clinical Practice Level I 3 Credit Hours

Semester 5 (Fall)

- SPA 6946 Clinical Practice: Level III 10 Credit Hours

Summer Semester 6

Students in the Consortium Track complete their full-time clinical practice externship in the fall after the fourth summer semester.
Please direct any questions to Dr. Linda I. Rosa-Lugo, UCF Consortium Faculty Coordinator, at (407) 823-4798 or lrosalugo@ucf.edu.

- SPA 6946 Clinical Practice: Level II 3 Credit Hours
- Elective 3 Credit Hours
- Elective 3 Credit Hours

*SPA 6553L must be taken in two semesters during either the third, fourth, or fifth semesters.

Independent Learning

All students in the master of arts in communication sciences and disorders program engage in independent learning through inquiry, dialogue, and practice. Experiences such as client case studies, scholarly reviews, research projects, clinical practica and externships provide students independent learning opportunities to attain knowledge, skills and professional behaviors. In capstone externships, students bridge university classroom and clinic lessons to real-world educational and health-related settings.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Master of Arts in Communication Sciences and Disorders program at UCF participates in the Communication Sciences and Disorders Centralized Application Service, known as CSDCAS. Prospective students applying to the Communication Sciences and Disorders MA program must apply online using the CSDCAS application. To learn more about the CSDCAS application process, visit [http://www.capsd.org/csdcas-student-page/](http://www.capsd.org/csdcas-student-page/)

### Entry Terms

The Consortium track admits for summer term only. Please note that admission is granted for the summer term only and for this specific track only. Applicants may not change start terms or tracks after an admission decision has been made. If the applicant determines that they cannot accept the offer of admission as presented in the admission letter, they must rescind the offer and may apply to the desired track in the next admissions cycle.

### Step 1: Complete the CSDCAS application for UCF

Completed CSDCAS Application
([https://csdcas liaisoncas.com/applicant-ux/#/login](https://csdcas liaisoncas.com/applicant-ux/#/login))

One official transcript (in a sealed envelop) from each college/university attended.

Official, competitive GRE score (verbal, quantitative, and written) obtained within the last five years. Use **GRE CODE for UCF CSDCAS: 7407**. (Do not use the "Institution Code" for GRE listed to the right side of this page).

Three (3) letters of recommendation with CSDCAS recommendation forms. One of the three letters of recommendation must be from the district school administrator or program specialist of the Speech-Language Program of the employing school district, one from the school principal, and one from a former professor. Letters of recommendation cannot be dated more than one year prior to the date of the application deadline.

A current resume.

Incomplete applications will NOT be reviewed.

All application materials MUST be sent directly to CSDCAS. Materials sent to the university or program will not be accepted. Application materials must be received by CSDCAS no later than February 1st for Summer admission.

### Step 2: Complete University of Central Florida's Graduate School application

In addition to the CSDCAS application, applicants must also submit a UCF application for graduate admission at [https://application.graduate.ucf.edu/](https://application.graduate.ucf.edu/). Supporting documents (i.e. transcripts, test scores, etc.) do not need to be submitted to UCF directly. **University applications must also be submitted by the stated application deadlines.**

Admission to the Communication Sciences and Disorders program is granted on a competitive basis. Approximately thirty-five (35) students are admitted each semester. Meeting the minimum admission requirements does not guarantee admission to the program. The recent class statistics are listed on the Graduate Program Profile webpage. Additionally, the program reserves the right to deny admission or dismiss a student after admission to the program if, in the judgment of the faculty, the student fails to demonstrate and/or uphold the ASHA Code of Ethics ([http://www.asha.org/code-of-ethics/](http://www.asha.org/code-of-ethics/)) during coursework and/or practice in the field. A background check is required for all new students during their first semester in the program. All applicants and admitted students must perform certain Essential
Functions in order to participate and complete program requirements.

Application Deadlines

The Traditional Track admits students three times per year in the fall, spring, and summer. The Consortium Track admits students once per year in the summer.

Computer Engineering MSCpE

Program Description

The Computer Engineering MSCpE degree offers programs in a number of technical (research) areas, such as Computer Networks and Computer Security (CNCS), Computer Systems and VLSI Design (CS/VLSI), Intelligent Systems and Machine Learning (ISML), and Software Systems and Algorithms (SSA).

All programs offer a thesis option and a nonthesis option, as well as an Accelerated BS to MS program. Students in the program receive a broad background in the various technical areas, while specializing in a research area of their interest.

The specific research areas that each one of the EE faculty focuses on can be found at the Department of Electrical Engineering website (www.ece.ucf.edu/).

Curriculum

The master's program offers both thesis and nonthesis options in four technical specialization areas. The thesis option requires 30 credit hours of courses that includes 24 credit hours of formal coursework, exclusive of thesis and research, plus 6 credit hours of thesis. The nonthesis option requires 30 credit hours of coursework with at least 24 credit hours of formal coursework and a possibility of 6 credit hours of Independent Study (XXX 6908) based on the availability of interested faculty.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree
The master's program offers both thesis and nonthesis options in four technical specialization areas. The thesis option requires 30 credit hours of courses that includes 24 credit hours of formal coursework, exclusive of thesis and research, plus 6 credit hours of thesis. The nonthesis option requires 30 credit hours of coursework with at least 24 credit hours of formal coursework and a possibility of 6 credit hours of Independent Study (XXX 6908) based on the availability of interested faculty.

Articulation Courses

Undergraduate articulation courses are required for students with bachelor's degrees in fields other than Computer Engineering. In general, all students must have completed the following undergraduate courses (or their equivalents in an accredited BScPE program) before admission to our graduate program. Students who have take these courses must complete the articulation courses listed below, plus all prerequisites, that they require. Grades of "B" or higher must be obtained in each articulation course. Articulation courses are not eligible for inclusion on a student's Graduate Program of Study.

- EEE 3342C: Digital Systems
- EEL 3801: Computer Organization
- COP 3502: Computer Science I
- COP 3503: Computer Science II

Plus choose ONE of the following:

- COP 4331: Processes for Object-Oriented Development
- EEL 4768C: Computer Architecture
- EEL 4781: Computer Communications Networks

Elective Courses: 24 Credit Hours

There are no required courses within a specialization area. However, all students (thesis and nonthesis) must choose at least 24 credit hours of formal courses, excluding research-related courses and independent study (XXX 6908), which emphasize their specialization area. Courses from outside specialization areas could also be chosen if the student's adviser approves such a Program of Study.

The Program of Study (POS) form must be approved by an adviser in the selected specialization area no later than the end of the second semester after admission. The program of study must meet all the university requirements specified in the graduate catalog and must also receive departmental-level and college-level approval.

Specialization Areas

The Computer Engineering Program supports a number of specialization areas. These specialization areas are (in alphabetical order): Computer Networks and Computer Security (CNCS), Computer Systems and VLSI Design (CS/VLSI), Intelligent Systems and Machine Learning (ISML), and Software Systems and Algorithms (SSA).

In each one of these areas there is a suggested list of courses. Students are also allowed to take courses from the suggested list of courses in areas other than their specialization area, but the majority of their courses should be chosen from courses in their specialization area.

Computer Networks and Computer Security (CNCS)

- CDA 5106 - Advanced Computer Architecture 3 Credit Hours
- CDA 5110 - Parallel Architecture and Algorithms 3 Credit Hours
- CDA 6530 - Performance Models of Computers and Networks 3 Credit Hours
- CGS 5131 - Computer Forensics I: Seizure and Examination of Computer Systems 3 Credit Hours
- CNT 5008 - Computer Communication Networks Architecture 3 Credit Hours
- CNT 6418 - Computer Forensics II 3 Credit Hours
- CNT 6519 - Wireless Security and Forensics 3 Credit Hours
- CNT 6707 - Advanced Computer Networks 3 Credit Hours
- COP 5537 - Network Optimization 3 Credit Hours
- COP 5611 - Operating Systems Design Principles 3 Credit Hours
- CAP 6133 - Advanced Topics in Computer Security and Computer Forensics 3 Credit Hours
- CAP 6135 - Malware and Software Vulnerability Analysis 3 Credit Hours
- COT 5405 - Design and Analysis of Algorithms 3 Credit Hours
- EEE 5542 - Random Processes 3 Credit Hours
- EEL 5780 - Wireless Networks 3 Credit Hours
- EEL 5881 - Software Engineering I 3 Credit Hours
- EEL 6762 - Performance Analysis of Computer and Communication Systems 3 Credit Hours
- EEL 6785 - Computer Network Design 3 Credit Hours
- EEL 6788 - Advanced Topics in Computer Networks 3 Credit Hours
- EEL 6883 - Software Engineering II 3 Credit Hours
- EEL 6897 - Software Development for Real-Time Engineering Systems 3 Credit Hours
Computer Systems and Very Large Scale Integration (CS/VLSI)

- CDA 5106 - Advanced Computer Architecture 3 Credit Hours
- CDA 5110 - Parallel Architecture and Algorithms 3 Credit Hours
- CDA 6107 - Parallel Computer Architecture 3 Credit Hours
- CDA 6938 Multi-Core Architecture and Programming 3 Credit Hours
- COP 5537 - Network Optimization 3 Credit Hours
- EEL 5704 - Computer Aided Logical Design 3 Credit Hours
- EEL 5722C - Field-Programmable Gate Array (FPGA) Design 3 Credit Hours
- EEL 6762 - Performance Analysis of Computer and Communication Systems 3 Credit Hours
- EEE 5390C - Full-Custom VLSI Design 3 Credit Hours
- EEL 6769 - Parallel Knowledge Processing Systems 3 Credit Hours
- EEL 6812 - Introduction to Neural Networks 3 Credit Hours
- EEL 6875 - Autonomous Agents 3 Credit Hours
- EEL 6876 - Current Topics in Artificial Intelligence 3 Credit Hours
- EEL 6878 - Modeling and Artificial Intelligence 3 Credit Hours

Software Systems and Algorithms (SSA)

- CAP 6515 - Algorithms in Computational Biology 3 Credit Hours
- CGS 5131 - Computer Forensics I: Seizure and Examination of Computer Systems 3 Credit Hours
- CGS 5131 - Computer Forensics I: Seizure and Examination of Computer Systems 3 Credit Hours
- CNT 6418 - Computer Forensics II 3 Credit Hours
- CAP 5510 - Bioinformatics 3 Credit Hours
- CAP 6133 - Advanced Topics in Computer Security and Computer Forensics 3 Credit Hours
- CAP 6545 - Machine Learning Methods for Biomedical Data 3 Credit Hours
- CEN 5016 - Software Engineering 3 Credit Hours
- CEN 6075 - Formal Specification of Software Systems 3 Credit Hours
- COP 5021 - Program Analysis 3 Credit Hours
- COP 5711 - Parallel and Distributed Database Systems 3 Credit Hours
- COP 6730 - Transaction Processing 3 Credit Hours
- COP 6731 - Advanced Database Systems 3 Credit Hours
- COP 6738 - Transaction Processing 3 Credit Hours
- EEL 5881 - Software Engineering I 3 Credit Hours
- EEL 6883 - Software Engineering II 3 Credit Hours

Intelligent Systems and Machine Learning (ISML)

- CAP 5055 - AI for Game Programming 3 Credit Hours
- CAP 5512 - Evolutionary Computation 3 Credit Hours
- CAP 5610 - Machine Learning 3 Credit Hours
- CAP 5636 - Advanced Artificial Intelligence 3 Credit Hours
- CAP 6545 - Machine Learning Methods for Biomedical Data 3 Credit Hours
- CAP 6616 - Neuroevolution and Generative and Developmental Systems 3 Credit Hours
- CAP 6640 - Computer Understanding of Natural Language 3 Credit Hours
- CAP 6671 - Intelligent Systems: Robots, Agents, and Humans 3 Credit Hours
- CAP 6675 - Complex Adaptive Systems 3 Credit Hours
- CAP 6676 - Knowledge Representation 3 Credit Hours
- EEL 5825 - Pattern Recognition 3 Credit Hours
- EEL 5874 - Expert Systems and Knowledge Engineering 3 Credit Hours

Thesis Option: 6 Credit Hours

- EEL 6971 Thesis 6 Credit Hours

The thesis option requires 24 credit hours of formal coursework in one of the specialization areas and the completion of 6 credit hours of thesis. Additional requirements are as follows:
• Courses must be chosen from the suggested list of courses for the student's chosen specialization area
• No more than 6 credits of thesis (XXX 6971) will be counted toward the degree requirement
• Fifteen credit hours (including EEL 6971 Thesis) must be 6000-level courses
• Thesis students who are full time must continue to enroll in three credit hours of thesis coursework each semester until the thesis requirement is satisfied, even if they take more than the required 6 credit hours of thesis. However, only 6 credit hours of thesis will count toward the degree requirement.

The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.

Nonthesis Option: 6 Credit Hours

The nonthesis option is especially suitable for part-time students. Nonthesis students must complete 6 credit hours of electives in addition to the 24 credit hours of formal coursework described above. If desired by the student and approved by the student's adviser a total of 6 credit hours can be Independent Study (XXX 6908).

• Electives 6 Credit Hours

Portfolio Requirement

Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of their portfolio of activities by the course Withdrawal Date of the semester prior to their intended graduation. The portfolio requirements are listed on the EECS website at www.eecs.ucf.edu.

Transfer Credits

Graduate students with a bachelor's degree in Computer Engineering from UCF may transfer up to 9 credit hours of 5000-level or higher coursework, with grades of "B" or higher, toward the MSCpE degree. Alternatively, a maximum of 9 credit hours may be transferred of graduate work conducted elsewhere from an accredited institution.

Equipment Fee

Students in the Computer Engineering MSCpE program pay a $28 equipment fee each semester that they are enrolled. Part-time students pay $14 per semester.

Independent Learning

The independent learning requirement is met by successful completion of a master's thesis or an approved portfolio of activities for nonthesis students.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

• One official transcript (in a sealed envelope) from each college/university attended.
• A bachelor's degree in computer engineering or a closely related discipline.
• Official, competitive GRE score taken within the last five years.
• Two letters of recommendation.
• Résumé.
• Statement of educational, research, and professional career objectives.
Faculty members may choose to conduct face-to-face or telephone interviews before accepting applicants into their research program.

Additional courses may also be required to correct any course deficiencies. Students should contact the graduate program director for further information.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

### Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

### Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

### Program Description

The Computer Engineering MSCpE degree offers programs in a number of technical (research) areas, such as Computer Networks and Computer Security (CNCS), Computer Systems and VLSI Design (CS/VLSI), Intelligent Systems and Machine Learning (ISML), and Software Systems and Algorithms (SSA).

All programs offer a thesis option and a nonthesis option, as well as an Accelerated BS to MS program. Students in the program receive a broad background in the various technical areas, while specializing in a research area of their interest.

The specific research areas that each one of the EE faculty focuses on can be found at the Department of Electrical Engineering website (www.ece.ucf.edu/).

### Curriculum

The master's program offers both thesis and nonthesis options in four technical specialization areas. The thesis option requires 30 credit hours of courses that includes 24 credit hours of formal coursework, exclusive of thesis and research, plus 6 credit hours of thesis. The nonthesis option requires 30 credit hours of coursework with at least 24 credit hours of formal coursework and a possibility of 6 credit hours of Independent Study (XXX 6908) based on the availability of interested faculty.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree**
The master's program offers both thesis and nonthesis options in four technical specialization areas. The thesis option requires 30 credit hours of courses that includes 24 credit hours of formal coursework, exclusive of thesis and research, plus 6 credit hours of thesis. The nonthesis option requires 30 credit hours of coursework with at least 24 credit hours of formal coursework and a possibility of 6 credit hours of Independent Study (XXX 6908) based on the availability of interested faculty.

Articulation Courses

Undergraduate articulation courses are required for students with bachelor's degrees in fields other than Computer Engineering. In general, all students must have completed the following undergraduate courses (or their equivalents in an accredited BSCE program) before admission to our graduate program. Students who have take these courses must complete the articulation courses listed below, plus all prerequisites, that they require. Grades of "B" or higher must be obtained in each articulation course. Articulation courses are not eligible for inclusion on a student's Graduate Program of Study.

- EEE 3342C: Digital Systems
- EEL 3801: Computer Organization
- COP 3502: Computer Science I
- COP 3503: Computer Science II

Plus choose ONE of the following:

- COP 4331: Processes for Object-Oriented Development
- EEL 4768C: Computer Architecture
- EEL 4781: Computer Communications Networks

Elective Courses: 24 Credit Hours

There are no required courses within a specialization area. However, all students (thesis and nonthesis) must choose at least 24 credit hours of formal courses, excluding research-related courses and independent study (XXX 6908), which emphasize their specialization area. Courses from outside specialization areas could also be chosen if the student's adviser approves such a Program of Study.

The Program of Study (POS) form must be approved by an adviser in the selected specialization area no later than the end of the second semester after admission. The program of study must meet all the university requirements specified in the graduate catalog and must also receive departmental-level and college-level approval.

Specialization Areas

The Computer Engineering Program supports a number of specialization areas. These specialization areas are (in alphabetical order): Computer Networks and Computer Security (CNCS), Computer Systems and VLSI Design (CS/VLSI), Intelligent Systems and Machine Learning (ISML), and Software Systems and Algorithms (SSA).

In each one of these areas there is a suggested list of courses. Students are also allowed to take courses from the suggested list of courses in areas other than their specialization area, but the majority of their courses should be chosen from courses in their specialization area.

Computer Networks and Computer Security (CNCS)

- CDA 5106 - Advanced Computer Architecture 3 Credit Hours

- EEL 6785 - Computer Network Design 3 Credit Hours
- EEL 6788 - Advanced Topics in Computer Networks 3 Credit Hours
- EEL 6883 - Software Engineering II 3 Credit Hours
• EEL 6897 - Software Development for Real-Time Engineering Systems 3 Credit Hours

Computer Systems and Very Large Scale Integration (CS/VLSI)

• CDA 5106 - Advanced Computer Architecture 3 Credit Hours
• CDA 5110 - Parallel Architecture and Algorithms 3 Credit Hours
• CDA 6107 - Parallel Computer Architecture 3 Credit Hours
• CDA 6938 Multi-Core Architecture and Programming 3 Credit Hours

Software Systems and Algorithms (SSA)

• CAP 6515 - Algorithms in Computational Biology 3 Credit Hours
• CGS 5131 - Computer Forensics I: Seizure and Examination of Computer Systems 3 Credit Hours
• CNT 6418 - Computer Forensics II 3 Credit Hours
• CAP 5510 - Bioinformatics 3 Credit Hours
• CAP 6133 - Advanced Topics in Computer Security and Computer Forensics 3 Credit Hours
• CEN 6075 - Formal Specification of Software Systems 3 Credit Hours
• CAP 6545 - Machine Learning Methods for Biomedical Data 3 Credit Hours
• CEN 5016 - Software Engineering 3 Credit Hours
• CAP 5510 - Bioinformatics 3 Credit Hours
• COP 5021 - Program Analysis 3 Credit Hours
• COP 5711 - Parallel and Distributed Database Systems 3 Credit Hours
• COP 6730 - Transaction Processing 3 Credit Hours
• COP 6731 - Advanced Database Systems 3 Credit Hours
• COT 6410 - Computational Complexity 3 Credit Hours
• COT 6417 - Algorithms on Strings and Sequences 3 Credit Hours
• COT 6600 - Quantum Computing 3 Credit Hours
• EEL 6875 - Autonomous Agents 3 Credit Hours
• EEL 6876 - Current Topics in Artificial Intelligence 3 Credit Hours
• EEL 6878 - Modeling and Artificial Intelligence 3 Credit Hours

Intelligent Systems and Machine Learning (ISML)

• CAP 5055 - AI for Game Programming 3 Credit Hours
• CAP 5512 - Evolutionary Computation 3 Credit Hours
• CAP 5610 - Machine Learning 3 Credit Hours
• CAP 5636 - Advanced Artificial Intelligence 3 Credit Hours
• CAP 6545 - Machine Learning Methods for Biomedical Data 3 Credit Hours
• CAP 6616 - Neuroevolution and Generative and Developmental Systems 3 Credit Hours
• CAP 6640 - Computer Understanding of Natural Language 3 Credit Hours
• CAP 6671 - Intelligent Systems: Robots, Agents, and Humans 3 Credit Hours
• CAP 6675 - Complex Adaptive Systems 3 Credit Hours
• CAP 6676 - Knowledge Representation 3 Credit Hours
• EEL 5825 - Pattern Recognition 3 Credit Hours
• EEL 5874 - Expert Systems and Knowledge Engineering 3 Credit Hours
• EEL 6769 - Parallel Knowledge Processing Systems 3 Credit Hours
• EEL 6812 - Introduction to Neural Networks 3 Credit Hours
• EEL 6875 - Autonomous Agents 3 Credit Hours
• EEL 6876 - Current Topics in Artificial Intelligence 3 Credit Hours
• EEL 6878 - Modeling and Artificial Intelligence 3 Credit Hours

Thesis Option: 6 Credit Hours

The thesis option requires 24 credit hours of formal coursework in one of the specialization areas and the completion of 6 credit hours of thesis. Additional requirements are as follows:
• Courses must be chosen from the suggested list of courses for the student's chosen specialization area
• No more than 6 credits of thesis (XXX 6971) will be counted toward the degree requirement
• Fifteen credit hours (including EEL 6971 Thesis) must be 6000-level courses
• Thesis students who are full time must continue to enroll in three credit hours of thesis coursework each semester until the thesis requirement is satisfied, even if they take more than the required 6 credit hours of thesis. However, only 6 credit hours of thesis will count toward the degree requirement.

The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.

• EEL 6971 Thesis 6 Credit Hours

Nonthesis Option: 6 Credit Hours

The nonthesis option is especially suitable for part-time students. Nonthesis students must complete 6 credit hours of electives in addition to the 24 credit hours of formal coursework described above. If desired by the student and approved by the student's adviser a total of 6 credit hours can be Independent Study (XXX 6908).

• Electives 6 Credit Hours

Portfolio Requirement

Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of their portfolio of activities by the course Withdrawal Date of the semester prior to their intended graduation. The portfolio requirements are listed on the EECS website at www.eecs.ucf.edu.

Transfer Credits

Graduate students with a bachelor's degree in Computer Engineering from UCF may transfer up to 9 credit hours of 5000-level or higher coursework, with grades of "B" or higher, toward the MSCpE degree. Alternatively, a maximum of 9 credit hours may be transferred of graduate work conducted elsewhere from an accredited institution.

Equipment Fee

Students in the Computer Engineering MSCpE program pay a $28 equipment fee each semester that they are enrolled. Part-time students pay $14 per semester.

Independent Learning

The independent learning requirement is met by successful completion of a master's thesis or an approved portfolio of activities for nonthesis students.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.eecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

• One official transcript (in a sealed envelope) from each college/university attended.
• A bachelor's degree in computer engineering or a closely related discipline.
• Official, competitive GRE score taken within the last five years.
• Two letters of recommendation.
• Résumé.
• Statement of educational, research, and professional career objectives.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting applicants into their research program.

Additional courses may also be required to correct any course deficiencies. Students should contact the graduate program director for further information.

Computer Science MS

Program Description

The Master of Science in Computer Science program produces graduates with a high level of competency in understanding, applying, and enunciating the modern concepts, principles, methods, and theories necessary for the design and implementation of computing systems.

The Master of Science in Computer Science program provides students with an in-depth education geared toward meeting the needs of business and industry in Florida and throughout the United States. The program's goal is to produce graduates with a high level of competency in understanding, applying, and enunciating the modern concepts, principles, methods, and theories necessary for the design and implementation of computing systems.

Students in the program receive a broad background in the areas of programming systems and languages, computer architecture, and computer science theory while specializing in a research area. Research interests of the computer science faculty include affective computing, applied perception, bioinformatics, computational biology, computational geometry, computer and network security, computer architecture, computer forensics, computer graphics, computer networks, image processing, computer vision, cryptography, data compression, database management systems, data mining, design and analysis of algorithms, evolutionary computation, genetic algorithms, graph theory, hardware/software co-design, machine learning, mixed and virtual reality, mobile computing, modeling and simulation, multimedia systems, natural language processing, neural networks, parallel and distributed processing, performance evaluation, programming languages, quantum computing, semantic web, software agents, software engineering, and VLSI systems. The program has a long and respected history, having conferred MS degrees since 1968.

Students successfully completing this program will have exhibited breadth as well as depth of capability involving both theoretical aspects of computer science and practical considerations of computing.
Curriculum

The Computer Science MS program offers both a thesis and nonthesis option with each option requiring a minimum of 30 credit hours beyond the bachelor's degree. At least half of these hours must be at the 6000 level. Both options require 12 credit hours of required core courses and thesis students must take 12 credit hours of electives and a minimum of 6 credit hours of thesis. Nonthesis students must take 18 credit hours of electives and complete a culminating experience as determined by the program's graduate committee. Students must receive a 3.0 GPA or higher in all courses.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Prerequisites

An undergraduate degree in Computer Science is desirable but not required. Applicants without a strong undergraduate background in Computer Science must demonstrate an understanding of the material covered in the following upper-division undergraduate courses:

- EEL 4768C Computer Architecture
- COP 4020 Programming Languages I
- COP 4600 Operating Systems
- COT 4210 Discrete Computational Structures

Required Courses: 12 Credit Hours

- CDA 5106 - Advanced Computer Architecture 3 Credit Hours
- COT 5405 - Design and Analysis of Algorithms 3 Credit Hours
- Any approved pair of Computer Science courses from a single research area that includes at least one 6000-level course 6 Credit Hours

Examples of approved pairs include (but not limited to):

- Operating Systems (OS) area (COP 5611 and COP 6614)
- Computer Graphics area (CAP 5725 and CAP 6701)
- Machine Learning area (CAP 5610 or CAP 5512 and CAP 6616 or CAP 6545)
- Artificial Intelligence (AI) area (CAP 5636 and CAP 6640 or CAP 6676)
- Computer Vision area (CAP 5415 and CAP 6411 or CAP 6412 or CAP 6419 or CAP 6835)
- Parallel Architecture area (CDA 5110 and CDA 6107)
- Network area (CNT 5008 and CNT 6707)
- Software Engineering area (CEN 5016 and CEN 6081)
- Database area (COP 5711 and COP 6731), etc.

The above list is only meant to provide some examples and is not comprehensive.

Elective Courses: 12 Credit Hours

All students, both thesis and nonthesis, are required to complete 12 credit hours of electives that are selected after consultation with the student's adviser.

At least half of the credit hours of both thesis and nonthesis students must be at the 6000 level. Furthermore, at least two 6000-level Computer Science formal courses (6 credit hours) must be taught by EECS faculty, exclusive of independent study and directed research and a total of 24 credit hours of formal courses must be earned exclusive of thesis. Approval may be granted for no more than 6 credit hours of electives to be taken outside of Computer Science, and such approval must occur prior to taking these outside courses.

- Electives 12 Credit Hours

Thesis Option: 6 Credit Hours

Six credits of thesis are required with the professor who directs the student's thesis. The thesis experience is expected to span two semesters. Thesis students who are full-time must continue to enroll in 3 credit hours of thesis course work until the thesis requirement is satisfied, even if it goes beyond the minimum of 6 credit hours of thesis. Students are required to prepare and defend a formal thesis in accordance with university requirements.

- XXX 6971 Thesis (6 Credit Hours; prefix determined by disciplinary area of your thesis adviser, e.g., CAP, CDA, CEN, COP or COT 6971)

Nonthesis Option: 6 Credit Hours

The nonthesis option requires at least 6 additional credit hours of electives beyond the 12 credit hours of electives described above.

In addition, nonthesis students are required to engage in a culminating experience as determined by the program's graduate committee. Students in the nonthesis option may not take more than 6 credit hours of independent study (6908) and/or directed research (XXX 6918).
Electives 6 Credit Hours

Equipment Fee

Students in the Computer Science MS program pay a $34 equipment fee each semester that they are enrolled. Part-time students pay $17 per semester.

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis or an approved set of research-based classes for nonthesis students.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Resume
- Letters of recommendation (encouraged but not required)

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Application Deadlines

All application materials must be submitted by the appropriate deadline listed below.

* Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Computer Science MS,
Accelerated BS to MS Track

Track Description

The Accelerated BS to MS program in Computer Science allows highly qualified UCF undergraduate majors in Computer Science to take graduate-level courses that will count toward their MS degree while completing their BS degree program.

Curriculum

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Up to 12 credit hours of 5000- and 6000-level courses with a grade of "B" (3.0) or better may be counted toward the accelerated BS to MS program. Two additional requirements for the students in this program are:

- Students must earn at least a "B" (3.0) in each undergraduate- or graduate-level course counted for the program.
- Students must opt for this program no later than the beginning of their junior year.

Undergraduate Requirements

See the current version of the Undergraduate Catalog and the College of Engineering and Computer Science website for additional requirements for accelerated programs.

Graduate Requirements

For the thesis option, students must take at least 18 credit hours beyond the 12 credit hours counted toward the undergraduate degree and include 6 credit hours of thesis. For both the thesis and nonthesis options, the 18 credit hours need to include:

- CDA 5106 and COT 5405, both with a grade of "B" (3.0) or better (6 credit hours)
- Any approved pair of Computer Science courses (a 5000/6000 pair) in a single area of discourse, both with a grade of "B" (3.0) or better (6 credit hours)

Plan of Study

The Plan of Study is an agreement between the student, the program and the University that lists the coursework taken to satisfy the requirements for completing the degree. The Plan of Study for student is flexible and unique to each student. However, it must meet university, college and department requirements.

All graduate students must have a Plan of Study on file, approved by the adviser and graduate coordinator, by the completion of 9 credit hours after entering the program. The College of Graduate Studies automatically places a "hold" on future registration for noncompliance. The default adviser for nonthesis MS students is the Graduate Coordinator.

Equipment Fee

Students in the Computer Science MS program pay a $34 equipment fee each semester that they are enrolled. Part-time students pay $17 per semester.

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis or an approved set of research-based classes for nonthesis students.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Accelerated BS to MS program in Computer Science allows highly qualified University of Central Florida undergraduate majors in Computer Science to begin taking graduate level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline, but were not previously part of this accelerated program, then they should apply to the Computer Science Program without a track selection. Additional information about this track may be
located at: http://www.cecs.ucf.edu/current-students/bs-ms-program/.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Resume
- Letters of recommendation (encouraged but not required)

### Counselor Education MA

#### Program Description

The College of Education and Human Performance offers CACREP accredited graduate degrees in Counselor Education (with tracks in School Counseling and Clinical Mental Health Counseling) and Marriage, Couple, and Family Therapy. The School Counseling track is designed for the student who plans to seek certification as a professional school counselor in Pre-K through post-secondary school settings. The Clinical Mental Health Counseling track prepares students for licensure in mental health counseling and to practice in agencies, private practice, and other settings. The Marriage, Couple, and Family Therapy program prepares students for licensure in marriage and family therapy and to practice in agencies, private practice, and other settings.

As part of the program's pragmatic approach to preparing counselors, in addition to classroom studies, all students

### Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

### Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

complete clinical experiences in the UCF Community Counseling and Research Center and field-based experiences in the community. The UCF Community Counseling and Research Center serves as a hub for training and research in the program, with graduate students providing services to over 1000 individuals each year through a child, adult, couples, and family counseling.

Because the programs in Counselor Education (Clinical Mental Health Counseling and School Counseling Tracks) and Marriage, Couple, and Family Therapy are CACREP accredited and prepare students for licensure and/or certification as professional counselors, students must be formally admitted to the program in order to take any program area courses. Applicants considering this certificate program should contact their State Licensure Board to verify the courses required. For information on how this program may prepare you for professional licensure, please visit the program website or contact the program coordinator. There are three exceptions to this restriction: (1) non-degree seeking students interested in exploring the program prior to admission may take MHS 5005 - Introduction to the Counseling Profession, pending available space after admitted students have been placed in the course; (2) individuals who already possess a master's degree (or above) and are taking courses toward a certificate program (e.g., Play Therapy, Marriage, Couple, and Family Therapy, or Career Counseling) may take the necessary courses upon being accepted into the appropriate certificate program; and; (3) individuals who already possess a master's degree (or above) and are taking courses toward Florida licensure in MHC or MFT may take MHS 6070 - Diagnosis and Treatment in Counseling, MHS 6450 - Addictions Counseling, and/or MHS 6470 - Human Sexuality and Relationships, pending available space after admitted students have been placed in those courses.

The Master of Arts in Counselor Education--School Counseling track is a state-approved initial teacher preparation program that is subject to any change in the Florida Administrative Code (State Board of Education Rule 6A-5.066). Students enrolled in this program should remain in close contact with their adviser to keep informed of any program changes implemented to comply with new state requirements.

Please note: that Marriage, Couple, and Family Therapy is a separate degree but still part of the Counselor Education program.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Counselor Education MA,
Clinical Mental Health Counseling Track

Track Description

The CACREP Accredited Clinical Mental Health Counseling track in the Counselor Education MA program prepares students for licensure in Clinical Mental Health Counseling and to practice in agencies, private practice, and other settings.

As part of the program's pragmatic approach to preparing counselors, in addition to classroom studies, all students complete clinical experiences in the UCF Community Counseling and Research Center and field-based experiences in the community. The UCF Community Counseling and Research Center serves as a hub for training and research in the program, with graduate students providing annual services to over 1,400 individuals, couples, and families in the central Florida community.

The CACREP Accredited Clinical Mental Health Counseling track in the Counselor Education MA program prepares students for licensure in Clinical Mental Health Counseling in order to practice in agencies, private practice, and other settings. Applicants considering this program should contact their State Licensure Board to verify the courses required. For information on how this program may prepare you for professional licensure, please visit the program website or contact the program coordinator.

Curriculum

The program requires a minimum of 63 credit hours beyond the bachelor's degree, including 6 credit hours of core courses, 39 credit hours of specialization (including a 3 credit hour elective), 12 credit hours of professional clinical experiences, and 6 credit hours of electives in either the nonthesis or thesis option.

Total Credit Hours Required: 63 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—45 Credit Hours

Core—6 Credit Hours

- EDF 6155 - Lifespan Human Development and Learning 3 Credit Hours

Specialization—39 Credit Hours

- MHS 5005 - Introduction to the Counseling Profession 3 Credit Hours
- MHS 6020 - Mental Health Care Systems 3 Credit Hours
- MHS 6070 - Diagnosis and Treatment in Counseling 3 Credit Hours
- MHS 6220 - Individual Psychoeducational Testing I 3 Credit Hours
- MHS 6400 - Theories of Counseling and Personality 3 Credit Hours
- MHS 6401 - Techniques of Counseling 3 Credit Hours
- MHS 6420 - Foundations of Multicultural Counseling 3 Credit Hours
- MHS 6450 - Addictions Counseling 3 Credit Hours
- MHS 6470 - Human Sexuality and Relationships 3 Credit Hours
- MHS 6500 - Group Procedures and Theories in Counseling 3 Credit Hours
- MHS 6702 - Ethical and Legal Issues 3 Credit Hours
- SDS 6347 - Career Development 3 Credit Hours
- Elective approved by adviser 3 Credit Hours

Thesis Option—6 Credit Hours

- EGC 6971 - Thesis 6 Credit Hours

Nonthesis Option—6 Credit Hours

- Two approved electives 6 Credit Hours

Professional Clinical Experience—12 Credit Hours

The clinical experiences are comprised of two sections, Practicum and Internship. Both are experiential in nature and are independent learning activities that take place in authentic settings in which students must apply, reflect on, and refine knowledge and skills acquired in the program to their work with actual clients and students. The practicum is conducted on campus in the UCF Community Counseling and Research Center and the internship is conducted at various schools around central Florida.

- MHS 6803 Practicum in Counselor Education 3 credit hours*
MHS 6803 Practicum in Counselor Education 3 credit hours*
MHS 6830 Counseling Internship 3 credit hours**
MHS 6830 Counseling Internship 3 credit hours**

* Prerequisites for MHS 6803 - Practicum in Counselor Education are the following: MHS 5005, MHS 6070, MHS 6400, MHS 6401, MHS 6500, and MHS 6702. A minimum of 27 credit hours are required prior to beginning the practicum.

** The prerequisites for MHS 6803 Counseling Internship is a "B" or better in all sections of MHS 6803 as well as MHS 6420.

MHS 6803 - Practicum in Counselor Education 3 Credit Hours *
SDS 6947 - Internship in Professional School Counseling 1-6 Credit Hours **
SDS 6947 - Internship in Professional School Counseling 1-6 Credit Hours **

Additional Program Requirements

- Achieve at least a GPA of 3.0 in counseling specialization courses.
- Achieve a "B" or better in MHS 5005, MHS 6401, MHS 6803 and SDS 6947.
- Complete a total of 800 hours of clinical experiences, 200 of which will be in the UCF Community Counseling and Research Center and 600 of which are field-based experiences in the community.
- Complete a portfolio and receive approval by Counselor Education faculty.
- Complete a professional exit examination.
- Given the experiential, competency, and performance-based nature of the courses taken by Counselor Education students, students are limited to taking a maximum of three (3) courses per semester. However, if students believe that they can verify a need to take more than three courses, they should consult with their academic adviser for additional guidelines. Students who have not received prior approval and who register for more than three courses per semester will be administratively dropped from any courses over the maximum allowed.

Independent Learning

Practica and internships are independent learning activities that take place in authentic settings in which students must apply, reflect on, and refine knowledge and skills acquired in the program. The internship experience provides students with the practical experience of facilitating a comprehensive, professional school counseling program in a school setting (e.g., leading classroom guidance lessons, facilitating group counseling, providing individual counseling services).

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken in the last five years.
- Three letters of recommendation.
- Résumé.
- Goal statement.

In accordance with Florida Statute 1004.4 and State Board of Education Rule 6A-5.066, admission to this graduate-level, state-approved initial teacher preparation program also requires passing all four parts of the Florida Teacher Certification Examination/General Knowledge Test (FTCE/GKT). This provision applies to all applicants to the MA program, School Counseling track.

The Master of Arts in Counselor Education-School Counseling track can accommodate only a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met.

The College of Education and Human Performance reserves the right to refuse student entrance or terminate a student after admission to the Counselor Education Program, if in the judgment of the faculty the student demonstrates unacceptable personal fitness to work in the counseling field with children, youth, and/or adults.

A formal interview is required and will be scheduled after the College of Education and Human Performance admission requirements are met. The interview dates for March and October will be posted on our Counselor Education website. Attendance at the program orientation session at 4:30 p.m. on the Thursday before classes begin, in the semester to which the student applied, is mandatory.

**Track Description**

The CACREP Accredited School Counseling track in the Master of Arts in Counselor Education is designed for the student planning to seek certification as a professional school counselor in pre-K through postsecondary school settings.

The CACREP Accredited School Counseling track in the Counselor Education MA program is designed for students who have a bachelor's degree in a discipline other than education and plan to seek certification as a professional school counselor in pre-K through postsecondary school settings.

As part of the program's pragmatic approach to preparing counselors, in addition to classroom studies, all students complete clinical experiences in the UCF Community Counseling and Research Center and field-based experiences in the community. The UCF Community Counseling and Research Center serves as a hub for training and research in the program, with graduate students providing annual services to over 1,400 individuals, couples, and families in the central Florida community.

The Master of Arts in Counselor Education-School Counseling track is a state-approved initial teacher/educator preparation program that is subject to any change in the Florida Administrative Code (State Board of Education Rule 6A-5.066). Students enrolled in Counselor Education-School Counseling should remain in close contact with their advisor to keep informed of any programmatic changes implemented to comply with new state requirements. For information on how this program may prepare you for professional licensure, please visit the program website or contact the program coordinator.

**Curriculum**

The CACREP accredited School Counseling track in the Counselor Education MA program prepares students for certification as a professional school counselor. As such, students must be formally admitted to the program in order to take any program area courses. The program requires a minimum of 60 credit hours beyond the bachelor's degree, including 6 credit hours of core courses, 30 credit hours of
specialization, 9 credit hours of DOE required certification courses, 9 credit hours of professional clinical experiences, and 6 credit hours of electives in either the nonthesis or thesis option.

Total Credit Hours Required: 60 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses: 45 Credit Hours

Core: 6 Credit Hours

- EDF 6155 - Lifespan Human Development and Learning 3 Credit Hours
- EDF 6481 - Fundamentals of Graduate Research in Education 3 Credit Hours

Specialization: 30 Credit Hours

- MHS 5005 - Introduction to the Counseling Profession 3 Credit Hours
- MHS 6220 - Individual Psychoeducational Testing I 3 Credit Hours
- MHS 6400 - Theories of Counseling and Personality 3 Credit Hours
- MHS 6401 - Techniques of Counseling 3 Credit Hours
- MHS 6420 - Foundations of Multicultural Counseling 3 Credit Hours
- MHS 6500 - Group Procedures and Theories in Counseling 3 Credit Hours
- SPS 6815 - Legal and Ethical Issues in Professional School Counseling 3 Credit Hours
- SDS 6347 - Career Development 3 Credit Hours
- SDS 6411 - Counseling with Children and Adolescents 3 Credit Hours
- SDS 6620 - Coordination of Comprehensive Professional School Counseling Programs 3 Credit Hours

DOE Certification: 9 Credit Hours

- TSL 5085 - Teaching Language Minority Students in K-12 Classrooms 3 Credit Hours
- RED 5147 - Developmental Reading 3 Credit Hours
- EDG 6415 - Principles of Instruction and Classroom Management 3 Credit Hours

Nonthesis Option: 6 Credit Hours

- Two approved electives 6 Credit Hours

Professional Clinical Experience: 9 Credit Hours

The clinical experiences are comprised of two sections, Practicum and Internship. Both are experiential in nature and are independent learning activities that take place in authentic settings in which students must apply, reflect on, and refine knowledge and skills acquired in the program to their work with actual clients and students. The practicum is conducted on campus in the UCF Community Counseling and Research Center and the internship is conducted at various schools around central Florida.

* Prerequisites for MHS 6803 - Practicum in Counselor Education are the following: MHS 5005, MHS 6400, MHS 6401, MHS 6500, and SPS 6815. MHS 6420 and SDS 6411 are also pre or co-requisites for MHS 6803. A minimum of 27 credit hours are required prior to beginning the practicum.

** The prerequisites for SDS 6947 - Internship in Professional School Counseling include SPS 6815, a "B" or better in MHS 6803, and completion of MHS 6420.

- MHS 6803 - Practicum in Counselor Education 3 Credit Hours *
- SDS 6947 - Internship in Professional School Counseling 1-6 Credit Hours **
- SDS 6947 - Internship in Professional School Counseling 1-6 Credit Hours **

Additional Program Requirements

- Achieve at least a GPA of 3.0 in counseling specialization courses.
- Achieve a "B" or better in MHS 5005, MHS 6401, MHS 6803 and SDS 6947.
- Complete a total of 700 hours of clinical experiences, 100 of which will be in the UCF Community Counseling and Research Center and 600 of which are field-based experiences in a school setting.
- Complete a portfolio and receive approval by Counselor Education faculty.
- Complete a professional exit examination.
- Given the experiential, competency, and performance-based nature of the courses taken by Counselor Education students, students are limited to taking a maximum of three (3) courses per semester. However, if students believe that
they can verify a need to take more than three courses, they should consult with their advisor for additional guidance. Students who have no received prior approval and who register for more than three courses per semester will be administratively dropped from any courses over the maximum allowed.

Independent Learning

Practica and internships are independent learning activities that take place in authentic settings in which students must apply, reflect on, and refine knowledge and skills acquired in the program. The internship experience provides students with the practical experience of facilitating a comprehensive, professional school counseling program in a school setting (e.g., leading classroom guidance lessons, facilitating group counseling, providing individual counseling services).

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken in the last five years.
- Three letters of recommendation.
- Résumé.
- Goal statement.

In accordance with Florida Statute 1004.4 and State Board of Education Rule 6A-5.066, admission to this graduate-level, state-approved initial teacher preparation program also requires passing all four parts of the Florida Teacher Certification Examination/General Knowledge Test (FTCE/GKT). This provision applies to all applicants to the MA program, School Counseling track.

**UPDATE:** In order to demonstrate mastery of general knowledge, Graduate Record Exam test administrations conducted on or after July 1, 2015, may be used as an acceptable means of demonstrating a mastery of general knowledge. A minimum passing score on a GRE subtest in an applicable general knowledge content area, as defined in the table below, will satisfy the requirement of demonstrating a mastery of general knowledge for the applicable general knowledge content area.

Counselor Education MEd

Program Description

The Master of Education in Counselor Education program prepares students to work as professional counselors in pre-K through postsecondary school settings.

The Counselor Education Master of Education (MEd) program was created for students who have a bachelor's degree in education and have completed course work for teaching certification and plan to seek certification in school counseling.

As part of the program's real-world approach to counselor education (in addition to classroom studies) all students complete clinical experiences in the UCF Community Counseling and Research Center and on-site in local schools.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Counselor Education MEd, School Counseling Track

Track Description

The CACREP Accredited School Counseling track in the Counselor Education MEd program is designed for certified educators and prepares students to work as professional school counselors in Pre-K through postsecondary school settings.

As part of the program’s pragmatic approach to preparing counselors, in addition to classroom studies, all students complete clinical experiences in the UCF Community Counseling and Research Center and field-based experiences in the community. The UCF Community Counseling and Research Center serves as a hub for training and research in the program, with graduate students providing annual services to over 1,400 individuals, couples, and families in the central Florida community.

Curriculum

The CACREP accredited School Counseling track in the Counselor Education MEd program prepares students for certification as a professional school counselor. As such, students must be formally admitted to the program in order to take any program area courses. The program requires a minimum of 51 credit hours beyond the bachelor's degree, including 6 credit hours of core courses, 30 credit hours of specialization, 9 credit hours of professional clinical or practicum experience, and 6 credit hours of electives in either the nonthesis or thesis option.

Prerequisite

Students must have or be eligible for the Florida Professional Teaching Certificate in Counselor Education.

Required Courses: 36 Credit Hours

Core: 6 Credit Hours

- EDF 6155 - Lifespan Human Development and Learning 3 Credit Hours
- EDF 6481 - Fundamentals of Graduate Research in Education 3 Credit Hours

Specialization: 30 Credit Hours

- MHS 5005 - Introduction to the Counseling Profession 3 Credit Hours
- MHS 6220 - Individual Psychoeducational Testing I 3 Credit Hours
- MHS 6400 - Theories of Counseling and Personality 3 Credit Hours
- MHS 6401 - Techniques of Counseling 3 Credit Hours
- MHS 6420 - Foundations of Multicultural Counseling 3 Credit Hours
- MHS 6500 - Group Procedures and Theories in Counseling 3 Credit Hours
- SPS 6815 - Legal and Ethical Issues in Professional School Counseling 3 Credit Hours
- SDS 6347 - Career Development 3 Credit Hours
- SDS 6411 - Counseling with Children and Adolescents 3 Credit Hours
- SDS 6620 - Coordination of Comprehensive Professional School Counseling Programs 3 Credit Hours

Thesis Option: 6 Credit Hours

- EGC 6971 - Thesis 6 Credit Hours

Nonthesis Option: 6 Credit Hours

- Two approved electives 6 Credit Hours
Professional Clinical Experience: 9 Credit Hours

The clinical experiences are comprised of two sections, Practicum and Internship. Both are experiential in nature and are independent learning activities that take place in authentic settings in which students must apply, reflect on, and refine knowledge and skills acquired in the program to their work with actual clients and students. The practicum is conducted on campus in the UCF Community Counseling and Research Center and the internship is conducted at various schools around central Florida.

*Prerequisites for MHS 6803 - Practicum in Counselor Education are the following: MHS 5005, MHS 6400, MHS 6401, MHS 6500, and SPS 6815. MHS 6420 and SDS 6411 are also pre or co-requisites for MHS 6803. A minimum of 27 credit hours are required prior to beginning the practicum.

**The prerequisites for SDS 6947 - Internship in Professional School Counseling include SPS 6815, a "B" or better in MHS 6803, and MHS 6420.

- MHS 6803 - Practicum in Counselor Education 3 Credit Hours *
- SDS 6947 - Internship in Professional School Counseling 1-6 Credit Hours **
- SDS 6947 - Internship in Professional School Counseling 1-6 Credit Hours **

Additional Program Requirements

- Achieve at least a GPA of 3.0 in counseling specialization courses.
- Achieve a "B" or better in MHS 5005, MHS 6401, MHS 6803 and SDS 6947.
- Complete a total of 700 hours of clinical experiences, 100 of which will be in the UCF Community Counseling and Research Center and 600 of which are field-based experiences in a school setting.
- Complete a portfolio and receive approval by Counselor Education faculty.
- Complete a professional exit examination.
- Given the experiential, competency, and performance-based nature of the courses taken by Counselor Education students, students are limited to taking a maximum of three (3) courses per semester. However, if students believe that they can verify a need to take more than three courses, they should consult with their academic advisor for guidance on the procedure. Students who have not received prior approval and who register for more than three courses per semester will be administratively dropped from any courses over the maximum load.

Independent Learning

Practica and internships are independent learning activities that take place in authentic settings in which students must apply, reflect on, and refine knowledge and skills acquired in the program. The internship experience provides students with the practical experience of facilitating a comprehensive, professional school counseling program in a school setting (e.g., leading classroom guidance lessons, facilitating group counseling, providing individual counseling services).

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken in the last five years.
- M.Ed. applicants must be eligible for certification or hold a current Florida Professional Teaching Certificate prior to the start of their first term. All other applicants should apply to the Counselor Education MA, School Counseling Track.
- Three letters of recommendation.
- Résumé.
- Goal statement.

Applicants who have graduated from an accredited university or college teacher certification program in another state or country, in the appropriate subject and/or grade range, may also be admitted to the MEd program at the Counselor Education-School Counseling track (MEd) at the discretion of the program director.

The Master of Education in Counselor Education-School Counseling track can accommodate only a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met.

The College of Education and Human Performance reserves the right to refuse student entrance or terminate a student after admission to the Counselor Education program, if in the judgment of the faculty the student demonstrates unacceptable
personal fitness to work in the counseling field with children, youth, and/or adults.

A formal interview is required and will be scheduled after the College of Education and Human Performance admission requirements are met. The interview dates for March and October will be posted on our Counselor Education website. Attendance at the program orientation session at 4:30 p.m. on the Thursday before classes begin, in the semester to which the student applied, is mandatory.

**Criminal Justice MS**

**Program Description**

The Master of Science in Criminal Justice is designed to meet the needs of students preparing for careers in the field of criminal justice. The curriculum focuses on the traditional issues such as management, administrative and criminal justice theory, as well as basic research methods and descriptive statistics.

The Master of Science in Criminal Justice core and elective courses focus on the complex and changing world in which criminal justice systems operate in this country and abroad. This plan of study is designed to equip future criminal justice leaders to be critical consumers of criminal justice research.

The benefits of an advanced graduate degree in criminal justice are self-evident and are being increasingly recognized by employers in central Florida and throughout the United States. Federal, state, and local criminal justice agencies benefit from an informed and innovative workforce that is aware of the complex issues and problems faced by the system regardless of geographic locale. Furthermore, graduates of the program are grounded in the latest theories and learn how these theories affect each individual or organization within the system.

International applicants should be aware the program may not offer sufficient on-campus courses for F or J visa holders. Please contact the program for more information before applying.

**Please note:** This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.
UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Curriculum

The Master of Science in Criminal Justice requires 36 credit hours, including 21 credit hours of core courses, 6 credit hours of restricted electives, 9 credit hours of general electives, and a final written examination within the Proseminar or capstone course. For students electing to complete a thesis, 6 credit hours of the general elective requirements will be thesis hours.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses: 21 Credit Hours

Core: 18 Credit Hours

- CCJ 5015 - The Nature of Crime 3 Credit Hours
- CCJ 5456 - The Administration of Justice 3 Credit Hours
- CCJ 6704 - Research Methods in Criminal Justice 3 Credit Hours
- CCJ 6706 - Data Analysis in Criminal Justice I 3 Credit Hours
- CCJ 6106 - Policy Analysis in Criminal Justice 3 Credit Hours
- CCJ 6118 - Criminal Justice Organizations 3 Credit Hours

Capstone: 3 Credit Hours

The Proseminar in Criminal Justice serves as the capstone experience for the program and the culminating learning experience.

Students must achieve a grade of "B" (3.0) or higher in every course listed under core requirements and in the capstone course (CJE 6718).

- CJE 6718 - Proseminar in Criminal Justice 3 Credit Hours

Elective Courses: 15 Credit Hours

The combined total of Restricted and Unrestricted 5000 level electives may not exceed 12 credit hours.

Restricted: 6 Credit Hours

Select two from the following courses.

- CJC 5020 - Foundations of Corrections 3 Credit Hours
- CJE 5021 - Foundations of Law Enforcement 3 Credit Hours
- CJJ 6020 - The Juvenile Justice System 3 Credit Hours
- CJL 6568 - Law and Social Control 3 Credit Hours
- CJL 6520 - American Criminal Courts 3 Credit Hours

Unrestricted: 9 Credit Hours

Students should consult with the Criminal Justice adviser for approval of general electives outside of the Criminal Justice program prior to enrolling. Criminal Justice courses at the 5000 or 6000 level, not used toward core or restricted electives, are pre-approved general electives.

- Electives 9 Credit Hours

Thesis Option: 6 Credit Hours of the general elective requirements may be thesis hours

All MSCJ students are automatically placed into the nonthesis option. Students electing to complete a thesis should consult the program adviser. The thesis option will consist of 6 hours of thesis credit and a successful defense of a thesis. Students should select a faculty adviser, form a thesis committee, and complete core/restricted elective requirements before enrolling in thesis hours. A thesis proposal must also be submitted to an approved committee before enrolling thesis hours. Students who elect to write a thesis should become familiar with the university’s requirements and deadlines for organizing and submitting the thesis.

Independent Learning

Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Tangible projects such as advanced research projects, scholarly papers, internships, practicum, and presentations at professional conferences also contribute to the self-development of our students. The culminating experience for students is completion of the CJE 6718 - Proseminar in Criminal Justice, which serves as the capstone for the program.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Statement of career goals, one or two pages indicating how the Criminal Justice MS degree will enhance the applicant's career goals and expectations of the graduate program.
- Résumé (no longer than two pages).
- Two letters of recommendation. Letters should be from professors or professional references who can attest to the applicant's ability to succeed in graduate coursework and his or her work ethic.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Students should be aware that admission to any graduate program is granted on a competitive basis. There may be cases where students meeting minimum requirements are denied admission based on such factors as program capacity or academic discretion. Applicants not meeting the minimum 3.0 GPA standards may be considered as candidates for very limited and competitive "provisional" admissions. However, only students with complete applications (final transcript, résumé, letters of recommendation and statement of career goals) will be reviewed under this special admission category. Competitive GRE scores are encouraged for this admission category.

Criminal Justice MS, Public Administration MPA Dual Degree Track ►

Track Description

The Public Administration MPA - Criminal Justice MS Dual Degree Track provides the opportunity for students to earn graduate degrees from two academic programs, the Master of Public Administration and the Master of Science in Criminal Justice, concurrently.

Students successfully completing this MPA/MS dual degree program will have the skills and analytical techniques for successful careers in both public administration and criminal justice. After successful completion of the MPA/MS dual degree program, students will receive two diplomas, one for the Public Administration MPA and one for the Criminal Justice MS.

Please note: This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit www.international.ucf.edu. If you have questions, please consult International Affairs and Global Strategies at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Curriculum

The dual degree track (Master of Criminal Justice / Master of Public Administration) consists of 51 credit hours. Each student completes a core of 11 courses (33 credit hours), two research methods and statistics courses (6 credit hours), two electives (6 credit hours), and a capstone experience of two courses (6 credit hours).

Total Credit Hours Required: 51 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses: 45 Credit Hours

Core: 33 Credit Hours

- CCJ 5015 - The Nature of Crime 3 Credit Hours
- CCJ 5456 - The Administration of Justice 3 Credit Hours
- CCJ 6106 - Policy Analysis in Criminal Justice 3 Credit Hours
- CCJ 6118 - Criminal Justice Organizations 3 Credit Hours
- PAD 6035 - Public Administration in the Policy Process 3 Credit Hours
- PAD 6037 - Public Organization Management 3 Credit Hours
- PAD 6053 - Public Administrators in the Governance Process 3 Credit Hours
- PAD 6207 - Public Financial Management 3 Credit Hours
- PAD 6227 - Public Budgeting 3 Credit Hours
- PAD 6335 - Strategic Planning and Management 3 Credit Hours
- PAD 6417 - Human Resource Management 3 Credit Hours

Research Methods/Statistics: 6 Credit Hours

Select one PAD course and one CCJ course:

- PAD 6700 - Research Methods in Public Administration 3 Credit Hours
- CCJ 6704 - Research Methods in Criminal Justice 3 Credit Hours
- PAD 6701 - Analytical Techniques for Public Administration 3 Credit Hours
- CCJ 6706 - Data Analysis in Criminal Justice 3 Credit Hours

Capstone: 6 Credit Hours

- PAD 6062 - Advanced Concepts and Applications in Public Administration 3 Credit Hours
- CJE 6718 - Proseminar in Criminal Justice 3 Credit Hours

Electives: 6 Credit Hours

Select two of the following courses:
Additional Program Requirements

Students must achieve a grade of "B" or higher in every CCJ/CJE course and a grade of "B-" or higher in every PAD course in the core courses, including the Capstone courses. Students must maintain a program of study and graduate status GPA of 3.0 or higher and can only graduate with a graduate status GPA of 3.0 or higher.

Independent Learning

Independent learning is demonstrated throughout the curriculum, through the process of inquiry and dialogue. Tangible projects, such as scholarly research, papers, internships, and the capstone experience also contribute to the self-development of students. The capstone courses, PAD 6062 and CJE 6718, provide the independent learning experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to meeting general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Three letters of recommendation specifically for the Criminal Justice MS/MPA program evaluating scholarly and professional capacity. Letters from professors from the colleges/universities attended are preferred, but if that is not feasible, letters from current or past supervisors will be accepted. The recommender must address the applicant's work ethic and ability to succeed at graduate-level academic work.
- Current professional résumé including public service experience (paid or voluntary).

Goal Statement: The goal statement is a key component of the admission review process and serves as an example of the applicant's ability to express himself or herself in writing. The goal statement must be no longer than two pages double spaced (500-800 words) and should address the following:
  - Personal background and career aspirations in public service.
  - Reason for pursuing graduate study in criminal justice and public administration, including future career goals and plans.
  - Specific areas of public administration and criminal justice that interests you.

- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.
- All international students must meet university minimum TOEFL score requirements regardless of language in which the undergraduate program was completed.

Admission to this degree is competitive; applicants meeting the minimum university and/or program application requirements are not guaranteed admission to the program.

All requested material must be submitted by the established deadline date. Materials received after the established deadline may not be considered.

Curriculum and Instruction

MEd

Program Description

The Master of Education (MEd) program in Curriculum and Instruction is designed for professionally certified and experienced educators who want to extend their influence beyond the walls of the classroom and improve their knowledge and skills in the area of leadership. Students also engage in the development of expertise in leading other educators in curriculum and instructional improvement across subject areas and grade levels.

This degree does not prepare students for initial, administrative, or supervisory certification.

The Curriculum and Instruction program addresses teacher empowerment and leadership in the expanded roles and responsibilities of teachers in schools, including data-driven assessment for school improvement, professional learning communities, applying research to practice, improving instruction and student learning outcomes, and collaboration with families and communities.

During the admission process, students may select a track in the following content areas that do not require specific certification beyond the professional teaching certificate: Curriculum Leadership, Educational Technology, Gifted Education*, and Global, International and Comparative Education*, Intervention Specialist, and Supporting High Needs Populations.

This degree does not prepare students for initial, administrative, or supervisory certification.

*These program areas also include a certificate, which must be applied for separately

This graduate program partners with the Peace Corps Paul D. Coverdell Fellows Program. If you are a returning Peace Corps volunteer, see Peace Corps Coverdell Fellows for more information about attending graduate school at UCF.

Curriculum

The Master of Education in Curriculum and Instruction program requires a minimum of 33 credit hours beyond the bachelor’s degree; minimum credit hour requirements vary by track. Students from all tracks must complete the required 15 credit hours of core courses. The Master of Education in Curriculum and Instruction requires that all students complete a Capstone Research Project. The Capstone is a course-based action research study (i.e., application and analysis of the effectiveness of research-based best practices in the classroom). Additional course requirements vary by track.

Total Credit Hours Required: 33-36 Credit Hours Minimum beyond the Bachelor’s Degree

This section describes the elements of the curriculum that are in common for all of the tracks.
Required Courses

Core: 15 Credit Hours

All students must take the Curriculum and Instruction core, regardless of their chosen specialization.

*Must be taken in first semester of program.

**Prerequisites for the Capstone course.

Students complete a Capstone Research Project at the end of the program. EDF 6635 is offered in spring semester only. Students must complete an Intent to Graduate Form the semester prior to enrolling in EDF 6635.

- EDG 6935 - Introductory Seminar in Teacher Leadership 3 Credit Hours *
- EDG 6223 - Curriculum Theory, Organization, and Policy 3 Credit Hours
- EDF 6472 - Data-Driven Decision-Making for Instruction 3 Credit Hours **
- EDF 6233 - Introduction to Action Research and Analysis of Classroom Practice 3 Credit Hours **
- EDF 6635 - Capstone: Action Research in Teacher Leadership 3 Credit Hours

Independent Learning

The MEd requires a course-based action research study and completion of a capstone experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

Curriculum and Instruction MEd, Art Education Track

Track Description

Admission to this program has been suspended effective Summer 2015.

You can however, get a MAT in Art Education: please follow the link here.

The Art Education track in the Curriculum and Instruction MEd program is designed to meet the expanding needs of the art teacher.

The MEd degree is designed to meet the expanding needs of the art teacher. Students in the program examine contemporary problems in art education, review recent curriculum developments, study innovations in art education, explore interdisciplinary concepts, and become involved in research problems specific to the art teacher. This degree requires previous certification in art.

This graduate program partners with the Peace Corps Paul D. Coverdell Fellows Program. If you are a returning Peace Corps volunteer, see Peace Corps Coverdell Fellows for more information about attending graduate school at UCF.

Curriculum

The Art Education track in the Curriculum and Instruction MEd program requires 15 credit hours of core courses, including completion of a capstone research project or thesis. In addition, students take 21 credit hours of specialization courses.

Total Credit Hours Required: 36-39 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses: 36-39 Credit Hours

Core: 15 Credit Hours

* Must be taken in first semester in the program.

**Prerequisites to the Capstone.

Student completes either a Capstone Research Project or Thesis at the end of the program. EDF 6635 is offered in spring semester only.

- EDG 6935 - Introductory Seminar in Teacher Leadership 3 Credit Hours *
- EDG 6223 - Curriculum Theory, Organization, and Policy 3 Credit Hours
- EDF 6472 - Data-Driven Decision-Making for Instruction 3 Credit Hours **
- EDF 6233 - Introduction to Action Research and Analysis of Classroom Practice 3 Credit Hours **
- EDF 6635 - Capstone: Action Research in Teacher Leadership 3 Credit Hours or
- IDS 6971 Thesis 6 Credit Hours

Specialization: 21 Credit Hours

Students take the following courses:

- ARE 6450 - K-12 Instructional Materials 3 Credit Hours
- ARE 6666 - Arts Advocacy 3 Credit Hours
- ARE 6748 - Advanced Research Seminar in Art Education 3 Credit Hours
- ARE 6747 - Assessment Seminar in Art Education 3 Credit Hours
- ARE 6905 - Research Trends in Art Education 3 Credit Hours

Choose two of the following elective courses with adviser approval:

- ARE 5251 - Art for Exceptionalities 3 Credit Hours
- ARE 5454 - Studio Experiences in Art Education 3 Credit Hours
- ARE 6195 - Teaching Art Appreciation with Interdisciplinary Strategies 3 Credit Hours
- ARE 6748 - Advanced Research Seminar in Art Education 3 Credit Hours
- ARE 6905 - Research Trends in Art Education 3 Credit Hours
- ART studio courses approved by adviser
Independent Learning

The MEd requires a course-based action research study and completion of a capstone experience (research report or thesis).

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Evidence of eligibility for a professional teaching certificate in Florida in related area and/or sustained teaching experience within schools/colleges (approved by track coordinator).
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Curriculum and Instruction
MEd, Curriculum Leadership Track

Track Description

The Curriculum Leadership track in the Curriculum and Instruction MEd program is designed to meet the advanced knowledge and skill needs of educators in curriculum planning and management.

This graduate program partners with the Peace Corps Paul D. Coverdell Fellows Program. If you are a returning Peace Corps volunteer, see Peace Corps Coverdell Fellows for more information about attending graduate school at UCF.

Curriculum

The Curriculum and Leadership track in the Master of Education (MEd) Curriculum and Instruction program requires 15 credit hours of core courses, including completion of a capstone research project. In addition, students take 18 credit hours of specialization courses.

Total Credit Hours Required: 33-36 Credit Hours Minimum beyond the Bachelor’s Degree

Required Courses: 33-36 Credit Hours

Core: 15 Credit Hours

*Must be taken in first semester of program.

**Prerequisites for the Capstone.

Students complete a Capstone Research Project at the end of the program. Students must complete an Intent to Graduate form the semester prior to enrolling in ED 6635. EDF 6635 is offered in spring semester only.

- EDG 6935 - Introductory Seminar in Teacher Leadership 3 Credit Hours *
• EDG 6223 - Curriculum Theory, Organization, and Policy 3 Credit Hours
• EDF 6472 - Data-Driven Decision-Making for Instruction 3 Credit Hours *
• EDF 6233 - Introduction to Action Research and Analysis of Classroom Practice 3 Credit Hours **
• EDF 6635 - Capstone: Action Research in Teacher Leadership 3 Credit Hours

Specialization: 18 Credit Hours

Students take the following courses:
• ESE 6217 - Curriculum Design 3 Credit Hours
• ESE 6416 - Curriculum Evaluation 3 Credit Hours
• EGI 6245 - Curriculum and Instruction for Teaching Advanced, Gifted, and Talented Learners 3 Credit Hours
• EDF 6259 - Learning Theories Applied to Leadership in Teaching Practice 3 Credit Hours

Choose two of the following elective courses with adviser approval:
• EDF 6517 - Perspectives on Education 3 Credit Hours
• EME 5050 - Fundamentals of Technology for Educators 3 Credit Hours
• EME 6602 - Integration of Technology into the Learning Environments 3 Credit Hours
• EDF 6886 - Multicultural Education 3 Credit Hours
• Other electives as approved by adviser and program coordinator (up to 6 credit hours)

Independent Learning

The MEd requires a course-based action research study and completion of a capstone experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:
• One official transcript (in a sealed envelope) from each college/university attended.
• Evidence of eligibility for a professional teaching certificate in Florida in related area and/or sustained teaching experience within schools/colleges (approved by track coordinator).
• Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Curriculum and Instruction**

**MEd, Educational Technology Track**

**Track Description**

The Educational Technology track in the Curriculum and Instruction MEd program is designed for certified and experienced educators who want to increase their technological skills and become highly skilled at successfully integrating technology into the curriculum as well as develop leadership skills necessary to become site-based technology coordinators in K-12 schools, colleges and universities.

This graduate program partners with the Peace Corps Paul D. Coverdell Fellows Program. If you are a returning Peace Corps volunteer, see Peace Corps Coverdell Fellows for more information about attending graduate school at UCF.

**Curriculum**

The Educational Technology track in the Master of Education (MEd) in Curriculum and Instruction program requires 15 credit hours of core courses, including completion of a capstone research project. In addition, students take 18 credit hours of specialization courses.

**Total Credit Hours Required: 33-36 Credit Hours Minimum beyond the Bachelor's Degree**

**Required Courses: 33-36 Credit Hours**

**Core: 15 Credit Hours**

- EDG 6935 - Introductory Seminar in Teacher Leadership 3 Credit Hours*
- EDG 6223 - Curriculum Theory, Organization, and Policy 3 Credit Hours
- EDF 6472 - Data-Driven Decision-Making for Instruction 3 Credit Hours**
- EDF 6233 - Introduction to Action Research and Analysis of Classroom Practice 3 Credit Hours**
- EDF 6635 - Capstone: Action Research in Teacher Leadership 3 Credit Hours

**Specialization—18 Credit Hours**

Students take the following courses:

- EME 5050 - Fundamentals of Technology for Educators 3 Credit Hours
- EME 5053 Electronic Resources for Education 3 Credit Hours
- EME 6405 - Adapting and Integrating Innovative Technologies in Education 3 Credit Hours
- EME 6507 - Multimedia for Education and Training 3 Credit Hours
- EME 6602 - Integration of Technology into the Learning Environments 3 Credit Hours

Choose one of the following courses:

- EME 6055 - Current Trends in Instructional Technology 3 Credit Hours
- EME 6062 - Research in Instructional Technology 3 Credit Hours
- EME 6613 - Instructional System Design 3 Credit Hours
- EME 6417 - Interactive Online and Virtual Teaching Environments 3 Credit Hours
- EME 6458 - Virtual Teaching and the Digital Educator 3 Credit Hours

**Independent Learning**

The MEd requires a course-based action research study and completion of a capstone experience.

**Application Requirements**

### Curriculum and Instruction MEd, Gifted Education Track

#### Track Description

The Gifted Education track in the Curriculum and Instruction MEd program is designed to meet the advanced knowledge and skill needs of educators who teach diverse gifted and talented students.

This graduate program partners with the Peace Corps Paul D. Coverdell Fellows Program. If you are a returning Peace Corps volunteer, see Peace Corps Coverdell Fellows for more information about attending graduate school at UCF.

#### Curriculum

The Gifted Education track in the Master of Education (MEd) in Curriculum and Instruction program requires 15 credit hours of core courses, including completion of a capstone research project. In addition, students take 18 credit hours of specialization courses.

**Total Credit Hours Required: 33-36 Credit Hours Minimum beyond the Bachelor’s Degree**

### Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.
Required Courses: 33-36 Credit Hours

Core: 15 Credit Hours

* Must be taken in first semester in the program.

** Prerequisites for enrolling in Capstone. Students complete a Capstone Research Project at the end of the program. EDF 6635 is offered in spring semester only.

- EDG 6935 - Introductory Seminar in Teacher Leadership 3 Credit Hours *
- EDG 6223 - Curriculum Theory, Organization, and Policy 3 Credit Hours
- EDF 6472 - Data-Driven Decision-Making for Instruction 3 Credit Hours **
- EDF 6233 - Introduction to Action Research and Analysis of Classroom Practice 3 Credit Hours **
- EDF 6635 - Capstone: Action Research in Teacher Leadership 3 Credit Hours

Specialization: 18 Credit Hours

- EGI 6051 - Understanding the Gifted/Talented Student 3 Credit Hours
- EGI 6245 - Curriculum and Instruction for Teaching Advanced, Gifted, and Talented Learners 3 Credit Hours
- EGI 6246 - Education of Special Populations of Gifted Students 3 Credit Hours
- EGI 6247 - Developing Advanced Programs and Services: Acceleration and Enrichment for Academically and Intellectually Gifted Learners 3 Credit Hours
- EGI 6417 - Guidance and Counseling Strategies for Teachers of Gifted and Talented Individuals 3 Credit Hours
- EGI 6305 - Theory and Development of Creativity 3 Credit Hours

Independent Learning

The MEd requires a course-based action research study and completion of a capstone experience.

Curriculum and Instruction
MEd, Global, International and Comparative Education Track

Track Description

The Global, International and Comparative Education track in the Curriculum and Instruction MEd is designed for educators who wish to expand their knowledge and skill in international and cross-cultural education setting.

This graduate program partners with the Peace Corps Paul D. Coverdell Fellows Program. If you are a returning Peace Corps volunteer, see Peace Corps Coverdell Fellows for more information about attending graduate school at UCF.

Curriculum

The Global, International and Comparative Education track in the Master of Education (MEd) in Curriculum and Instruction program requires 15 credit hours of core courses, including completion of a capstone research project. In addition, students take 21 credit hours of specialization courses.

Total Credit Hours Required: 33-36 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses: 33-36 Credit Hours

Core: 15 Credit Hours

** Prerequisites for enrolling in Capstone. Students complete a Capstone Research Project at the end of the program. EDF 6635 is offered in spring semester only.

- EDG 6935 - Introductory Seminar in Teacher Leadership 3 Credit Hours *
- EDG 6223 - Curriculum Theory, Organization, and Policy 3 Credit Hours
- EDF 6472 - Data-Driven Decision-Making for Instruction 3 Credit Hours **
- EDF 6233 - Introduction to Action Research and Analysis of Classroom Practice 3 Credit Hours **
- EDF 6635 - Capstone: Action Research in Teacher Leadership 3 Credit Hours

Specialization: 18 Credit Hours

- EDF 6809 - Introduction to Comparative and International Education 3 Credit Hours
- SSE 5391 - Global Education: Theory and Practice 3 Credit Hours
- EDF 6855 - Equitable Educational Opportunity and Life Chances: A Cross-National Analysis 3 Credit Hours
- EDS 6365 - Education and National Development 3 Credit Hours
- EDF 6886 - Multicultural Education 3 Credit Hours

Select two of the following courses:

- EDG 6775 - Exploring Global Educational Issues in International Contexts 3 Credit Hours
- EEC 6606 - Global Issues in Early Childhood 3 Credit Hours
- Other graduate courses with the program director's approval

Independent Learning

The MEd requires a course-based action research study and completion of a capstone experience.

Curriculum and Instruction
MEd, Intervention Specialist Track

Track Description

The Intervention Specialist Track in the Curriculum and Instruction MEd program provides advanced coursework for educational leaders to use school-based and classroom instructional data to meet the instructional and intervention needs of all students, including at-risk and struggling students, beyond typical, initial classroom instruction within a multi-tiered system of supports.

In addition, this track will provide an advanced multi-disciplinary theoretical approach and applied knowledge base to experienced educators. Coursework focuses on knowledge, skills and competencies for working with students within an intervention framework.

The Intervention Specialist Track is multi-disciplinary and includes coursework in exceptional student education, school psychology, reading education, and math education. The graduate courses provide an opportunity for students to complete the Intervention Specialist track, as well as a graduate certificate, with separate applications required to each program.

Curriculum

The Intervention Specialist track in the Master in Education Teacher Leadership program requires 15 credit hours of core courses, including completion of a capstone research project. In addition, students take 18 credit hours of specialization courses.
Total Credit Hours Required: 33-36 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses: 33-36 Credit Hours

Core: 15 Credit Hours

* Must be taken in first semester in the program.
**Prerequisites to the Capstone.

Students complete a Capstone Research Project at the end of the program. EDF 6635 is offered in spring semester only.

- EDG 6935 - Introductory Seminar in Teacher Leadership 3 Credit Hours
- EDG 6223 - Curriculum Theory, Organization, and Policy 3 Credit Hours
- EDF 6472 - Data-Driven Decision-Making for Instruction 3 Credit Hours
- EDF 6233 - Introduction to Action Research and Analysis of Classroom Practice 3 Credit Hours
- EDF 6635 - Capstone: Action Research in Teacher Leadership 3 Credit Hours

Specialization: 18 Credit Hours

- EEX 6218 - Diagnostic Assessment and Intervention Planning in Exceptional Education 3 Credit Hours
- MAE 6517 - Diagnosis/Remediation of Difficulties in Mathematics for the Classroom Teacher 3 Credit Hours
- RED 5517 - Classroom Diagnosis and Development of Reading Proficiencies 3 Credit Hours
- SPS 6700 - Advanced Psychoeducation and Data-Based Decision Making 3 Credit Hours
- EGI 6246 - Education of Special Populations of Gifted Students 3 Credit Hours
- Electives as approved by the program adviser 3 Credit Hours

Independent Learning

The MEd requires a course-based action research study and completion of a capstone experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Evidence of eligibility for a professional teaching certificate in Florida in related area and/or sustained teaching experience within schools/colleges (approved by track coordinator).
- One letter of recommendation.
- Goal statement.
- Resume/vita reflecting relevant experience.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Curriculum and Instruction MEd, Supporting High Needs Populations Track

Track Description

The Supporting High Needs Populations track in the Curriculum and Instruction MEd program is designed to meet the advanced knowledge and skill needs of educators who work in urban settings.

This graduate program partners with the Peace Corps Paul D. Coverdell Fellows Program. If you are a returning Peace Corps volunteer, see Peace Corps Coverdell Fellows for more information about attending graduate school at UCF.

Curriculum

The Supporting High Needs Populations track in the Master of Education (MEd) Curriculum and Instruction program requires 15 credit hours of core courses, including completion of a capstone research project. In addition, students take 18 credit hours of specialization courses.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses: 33-36 Credit Hours

Core: 15 Credit Hours

*Must be taken in first semester of program.

**Prerequisites for the Capstone.

Students complete a Capstone Research Project at the end of the program. Students must complete an Intent to Graduate form the semester prior to enrolling in ED 6635. EDF 6635 is offered in spring semester only.

- EDG 6935 - Introductory Seminar in Teacher Leadership 3 Credit Hours *
- EDG 6223 - Curriculum Theory, Organization, and Policy 3 Credit Hours
- EDF 6472 - Data-Driven Decision-Making for Instruction 3 Credit Hours **
- EDF 6233 - Introduction to Action Research and Analysis of Classroom Practice 3 Credit Hours **
- EDF 6635 - Capstone: Action Research in Teacher Leadership 3 Credit Hours

Specialization: 18 Credit Hours

Students take the following courses:

- EDF 6725 - Critical Issues in the Study of High Needs Populations 3 Credit Hours
- EDF 6155 - Lifespan Human Development and Learning 3 Credit Hours

Choose four of the following elective courses with adviser approval:

- CCJ 6485 - Issues in Justice Policy 3 Credit Hours
- ECW 6067 - History of Career Education in the United States 3 Credit Hours
- EDF 6206 - Challenges of Classroom Diversity 3 Credit Hours
- EDF 6855 - Equitable Educational Opportunity and Life Chances: A Cross-National Analysis 3 Credit Hours
- EDF 6886 - Multicultural Education 3 Credit Hours
- EDG 6636 - Impact of Social Contexts on Teaching and Learning 3 Credit Hours
- EEX 6342 - Seminar-Critical Issues in Special Education 3 Credit Hours
- EGI 6246 - Education of Special Populations of Gifted Students 3 Credit Hours
- RED 5147 - Developmental Reading 3 Credit Hours
- SPS 5605 - Building and Improving Relationship and Emotional Intelligence 3 Credit Hours
SPS 6700 - Advanced Psychoeducation and Data-Based Decision Making 3 Credit Hours

Independent Learning

The MEd requires a course-based action research study and completion of a capstone experience.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

- In addition to the general UCF graduate application requirements, applicants to this program must provide:
  - One official transcript (in a sealed envelope) from each college/university attended.
  - Evidence of eligibility for a professional teaching certificate in Florida in related area and/or sustained teaching experience within schools/colleges (approved by track coordinator).

Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Data Analytics MS

Program Description

The Master of Science in Data Analytics program provides students with the ability to develop algorithms and computer programs for discovery of information from large amounts of data. This includes the architecture of programs, as well as technical details of algorithm development. Students are expected to be able to write and maintain novel computer programs that make efficient use of cutting-edge computer technology.

Students in this nonthesis program receive a broad background in the areas of parallel programming, machine learning, data mining, and network science while specializing in particular areas of data analytics practice. Students successfully completing this program will have exhibited breadth as well as depth of capability involving discovery of knowledge from "big data."

Curriculum

The MS in Data Analytics requires 30 credit hours and includes a project, which is a culminating experience. Students must receive a grade of "B" or higher in all courses.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Prerequisites

An undergraduate degree in computer science, statistics, computer engineering or information technology is desirable but not required. Applicants without a strong undergraduate background in computer science or statistics must demonstrate an understanding of the material covered in the following upper division undergraduate courses:
• COP 3330 Object-Oriented Programming
• COP 3503C Computer Science II
• COP 4710 Database Systems
• STA 2023 Statistical Methods I
• Programming experience or STA 4164 Statistical Methods III

Required Courses: 24 Credit Hours

All students are required to take the following courses, for a total of 24 credit hours.

• CAP 5610 - Machine Learning 3 Credit Hours
• CNT 5805 - Network Science 3 Credit Hours
• COP 5711 - Parallel and Distributed Database Systems 3 Credit Hours
• COP 6526 - Parallel and Cloud Computation 3 Credit Hours
• STA 5206 - Statistical Analysis 3 Credit Hours
• STA 5703 - Data Mining Methodology I 3 Credit Hours
• STA 6704 - Data Mining Methodology II 3 Credit Hours
• CAP 6942 - Project in Data Analytics 3 Credit Hours

Restricted Elective Courses: 6 Credit Hours

All students are required to complete 6 credit hours of approved electives that are selected after consultation with the student's adviser.

• CAP 6307 - Text Mining I 3 Credit Hours
• CAP 6315 - Social Media and Network Analysis 3 Credit Hours
• CAP 6318 - Computational Analysis of Social Complexity 3 Credit Hours
• CAP 6545 - Machine Learning Methods for Biomedical Data 3 Credit Hours
• CAP 6737 - Interactive Data Visualization 3 Credit Hours
• STA 6714 - Data Preparation 3 Credit Hours

Independent Learning

The Independent Learning Requirement is met by successful completion of a capstone project in CAP 6942 - Project in Data Analytics.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

• One official transcript (in a sealed envelope) from each college/university attended.
• Official, competitive GRE score taken within the last five years.
• Resume/CV
• Letters of recommendation (encouraged but not required)

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

An undergraduate degree in Computer Science, Statistics, Information Technology, or Computer Engineering is desirable but not required. Applicants without a strong undergraduate background in Computer Science and Statistics must demonstrate an understanding of the material covered in upper-division undergraduate courses listed under the Articulation Section of the Curriculum Information. Applicants may choose to demonstrate their knowledge of these courses by taking these courses as non-degree seeking and scoring "B" or better in all of them.

Digital Forensics MS

Program Description

The Digital Forensics MS program will consider international applicants only on a case-by-case basis. Please contact the program at czou@cs.ucf.edu to determine eligibility before submitting an official application.

The Digital Forensics master's degree is a collaborative effort between various UCF academic departments (Electrical Engineering and Computer Science, Forensic Science of Chemistry, Criminal Justice, and Legal Studies) and the National Center for Forensic Science (NCFS). NCFS is both a national center, as part of the National Institute of Justice Forensic Research Network of the Department of Justice, and a state Type II Center. NCFS is based in the UCF College of Sciences as a forensic science research center and is housed in Orlando's Research Park, adjacent to UCF.

The mission of the MSDF degree program is to provide a quality graduate education in science and practices of digital forensics, to prepare the students for digital forensics jobs, and to prepare the students for a lifetime of learning. The objectives of the program include the following:

- To give MSDF graduates the knowledge and skills necessary to participate as an effective team member or team leader in digital evidence investigations
- To prepare MSDF graduates for professional careers in digital forensics examination, forensic tool development, tool verification and validation, security and forensics administration
- To prepare MSDF graduates with the knowledge and skills to pursue advanced studies and research in computer technology or computer crime-related disciplines
- To equip MSDF graduates with the communication skills, both oral and written, to become an effective problem solver as well as an effective communicator as an expert forensic examiner and expert witness

Please note: This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit
http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Curriculum

The Digital Forensics MS degree is comprised of 30 hours of study beyond the bachelor's degree with required, intensive specialization in topics related to digital forensics. The degree program prepares students, including working professionals, who will pursue the degree on a part-time basis to gain the knowledge and skills required to work as an examiner in the field. The program may also be taken by those who have an interest in scientific applications and research in the field, and who would like to continue to a doctoral degree program or law school after completion.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

The program offers both a thesis option (6 credit hours), or an opportunity to complete two additional courses (6 credit hours) selected from the Restricted Electives. At least one-half of the credit hours must be at the 6000 level.

Articulation

Undergraduate articulation courses may be required for students with BS and/or MS degrees in fields other than a computer-related field. The articulation courses will be determined by the graduate program director. Students without a computer-related degree must be versed in basic computing and networking knowledge and skills, including computer (PC) hardware, computer operating systems, and computer networking. Appropriate job- or training-related experience may be a suitable substitution, the suitability of which will be determined by the admissions committee. Courses taken to correct deficiencies cannot be used to satisfy minimum degree requirements. Some advanced elective courses require a programming background, specifically in C and C++, computer architecture, and parallel programming.

Required Courses: 12 Credit Hours

- CGS 5131 - Computer Forensics I: Seizure and Examination of Computer Systems 3 Credit Hours
- CHS 5504 - Topics in Forensic Science 3 Credit Hours
- CIS 6207 - The Practice of Digital Forensics 3 Credit Hours
- CNT 6418 - Computer Forensics II 3 Credit Hours

Restricted Elective Courses: 12 Credit Hours

Computing

Select two courses.

- CAP 6133 - Advanced Topics in Computer Security and Computer Forensics 3 Credit Hours
- CNT 6519 - Wireless Security and Forensics 3 Credit Hours
- CAP 6135 - Malware and Software Vulnerability Analysis 3 Credit Hours
- CIS 6386 - Operating Systems and File System Forensics 3 Credit Hours
- CIS 6395 - Incident Response Technologies 3 Credit Hours
- EEE 6347 - Trustworthy Hardware 3 Credit Hours

Criminal Justice and Electronic Discovery

Select one course.

Note: Students can take additional Criminal Justice courses as they fit into a student's research interest and approved Program of Study.

- CCJ 5015 - The Nature of Crime 3 Credit Hours
- CCJ 5456 - The Administration of Justice 3 Credit Hours
- CCJ 6074 - Investigative and Intelligence Analysis: Theory and Methods 3 Credit Hours
- CCJ 6704 - Research Methods in Criminal Justice 3 Credit Hours
- CCJ 6706 - Data Analysis in Criminal Justice I 3 Credit Hours
  or
- ESI 5219 - Engineering Statistics 3 Credit Hours
- CJE 6688 - Cyber Crime and Criminal Justice 3 Credit Hours
- CJL 6568 - Law and Social Control 3 Credit Hours
- CIS 6206 - Electronic Discovery for Digital Forensics Professionals 3 Credit Hours
Forensic Science and Legal Studies

Select one course.

- CHS 5596 - The Forensic Expert in the Courtroom 3 Credit Hours
- CHS 5518 - The Forensic Collection and Examination of Digital Evidence 3 Credit Hours
- PLA 5587 - Current Issues in Cyberlaw 3 Credit Hours

Thesis Option: 6 Credit Hours

The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.

- CAP 6971 Thesis 6 Credit Hours

Nonthesis Option: 6 Credit Hours

Students not interested in a thesis can instead enroll in two formal courses (6 credit hours) to fulfill the degree requirements.

- Take two electives (total of 6 credit hours) from the list of Restricted Electives above

Equipment Fee

Students in the Digital Forensics MS program pay an $82 equipment fee each semester that they are enrolled. Part-time students pay $41 per semester.

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis or completing the capstone course CIS 6207.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The College of Engineering and Computer Science strongly encourages prospective applicants to request a free pre-screening (www.cecs.ucf.edu/prescreen) of their qualifications prior to submitting an online application for graduate admission. However, a pre-screening is not required; rather, it is offered as a courtesy to all prospective applicants before they commit to submitting a complete online application and paying an application processing fee.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Statement of educational, research, and professional career objectives.
- Résumé.
- Three letters of recommendation.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program. The GRE is not required for admission into this program.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Digital Media MA

Program Description

The Master of Arts in Digital Media—Visual Language and Interactive Media builds on undergraduate knowledge to develop a mature set of conceptual, theoretical, design, and technical skills needed to communicate stories and messages in a single discipline or in an interdisciplinary environment.

This program teaches students about media theory and creative production using an interdisciplinary research framework drawn from a diverse array of academic disciplines such as art, computer science, English, film, folklore, music and psychology. The curriculum provides the theoretical and practical skills necessary to work both in individual and group settings.

The School of Visual Arts and Design faculty have extensive professional and academic experience in areas spanning film, video, multimedia, interactive and web design, human centered interactive design, exhibition and theme park design, simulation and training, game development, broadcast design and motion graphics, animation, visual language, immersive design environments, database design, e-commerce, and educational technology and community development.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog.

Applicants must apply online. All requested materials must be submitted by the established deadline.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowships

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office
of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. Digital Media MA, Visual Language and Interactive Media Track

Track Description

In the Visual Language and Interactive Media track of the Digital Media MA program students explore new media in creative and research projects that foster a unique contribution characterized as innovative in approach.

This degree program builds on undergraduate knowledge to build a mature set of conceptual, theoretical, design, and technical skills needed to communicate stories and messages in a single discipline or in an interdisciplinary environment. The program has a nonthesis and a thesis option. The thesis option requires completion of a six-hour thesis project. Work on the thesis will extend the capabilities of interfaces and measure the effectiveness of storytelling, training, and communicating in the modern world. Students may be admitted on either a full-time or part-time basis.

This MA track is embedded in a rich environment of digital media work at UCF and in the surrounding community. The following are active areas of work at UCF:

- Digital media in instructional applications
- Experience design

- Interactive performance
- Serious games for training and education
- Information architecture for the World Wide Web
- Social and collaborative media design
- Cultural heritage preservation using new media

The School of Visual Arts and Design faculty have extensive professional and academic experience in areas spanning film, video, multimedia, interactive and web design, simulation and training, game development, broadcast design and motion graphics, animation, visual language, immersive design environments, database design, e-commerce, digital storytelling and educational technology and community development.

Curriculum

During the first academic year, students take required courses as dictated by the student's plan of study and electives suggested by their adviser. The MA graduate program coordinator is the adviser for all nonthesis students. The coordinator is also the adviser for all thesis students until a Digital Media MA faculty mentor agrees to work with the student. The faculty mentor then becomes the student's graduate adviser.

In the second year, students who select the thesis option will complete core and required coursework as well as thesis research. Thesis students must be accepted by a faculty member for supervision in order to carry out the required thesis study. Thesis option students are encouraged to begin this process immediately upon entering the program by meeting faculty who work in areas of interest complementary to the students. Nonthesis option students will complete core, required coursework and electives as recommended by the MA program coordinator.

Typically, students entering or continuing professional careers following the MA should select the nonthesis option. Those who plan to enter doctoral programs should select the thesis option.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—21 Credit Hours

- DIG 6647 - Science and Technology of Dynamic Media 3 Credit Hours
- DIG 5137 - Information Architecture 3 Credit Hours
- DIG 5487 - Principles of Visual Language 3 Credit Hours
- DIG 6432 - Transmedia Story Creation 3 Credit Hours
- DIG 6136 - Design for New Media 3 Credit Hours
• DIG 6546 - Previsualization and Concept Development 3 Credit Hours
• DIG 6551 - Applied Interactive Story 3 Credit Hours

Thesis Option—15 Credit Hours

Each candidate for the Master of Arts submits a thesis prospectus and preliminary bibliography on a topic selected in consultation with the adviser. The formal thesis is initiated by the preparation of a proposal that meets both departmental and university requirements for the thesis. Prior to enrollment into thesis credit hours, the adviser, in consultation with the student, designates a Thesis Committee to be further approved by the College Graduate Dean. This committee is chaired by the adviser and includes two or more additional faculty members from the School of Visual Arts and Design.

The members of the student's thesis committee judge the proposal as the preliminary step to beginning the thesis. This committee must approve the Thesis Proposal before academic credit can accrue.

The thesis is a formal written document. The introduction cites similar, related, and antecedent work. The body explains the purposes of the project, the method of its production, and any evaluation that was performed. The conclusion includes plans for future work. The thesis also includes an archival copy of the resulting creative product. Both the thesis and the creative product must be delivered in digital form, acceptable by the UCF library according to its standards for digital dissertations and theses.

• DIG 6825 - Digital Media Research Methods 3 Credit Hours
• DIG 6918 Directed Research 3 Credit Hours
• DIG 6605 - Physical Computing 3 Credit Hours
• DIG 6971 Thesis/Research Report 6 Credit Hours

Thesis Defense

In addition to a written thesis, the final step in completing the thesis requirement is an oral defense before the thesis committee. Candidates must present their creative or research work and explain its creation in an oral defense. These presentations are made to the student's committee in a public meeting that other faculty and students may attend.

Nonthesis Option—15 Credit Hours

Students selecting the nonthesis option are required to complete 6 additional credit hours of required courses and 9 credit hours of electives:

• DIG 6812 - Digital Interaction for Informal Learning 3 Credit Hours
• DIG 5565C - Digital Asset Management Systems 3 Credit Hours
• Electives 9 Credit Hours

Comprehensive Examinations

Digital Media MA students must take a Comprehensive Examination. The process is designed to evaluate both the students' basic knowledge and competencies, and their ability to synthesize and apply what they know in depth—that is, both the breadth and depth of student learning in the Program. It is not intended to test specific course content for which students have already been evaluated and graded. The exam is designed to test the student's ability to respond and substantiate the response in a professional and educated fashion.

The Comprehensive Examination consists of two questions, for which students write approximately five-to-seven page answers. The questions differ each semester, but concern topics related to digital media study and practice (for example, interactivity).

Independent Learning

Students who elect the thesis option engage in independent learning through the design and implementation of original research in the thesis process. Students who pursue the comprehensive exam option experience independent learning through their individual preparation for comprehensive exams. All students engage in independent learning in every Digital Media core course. A research paper or project is required in each of these classes. The papers and projects provide independent learning by requiring students to design and carry out research projects and develop analytical papers, some of which are submitted to conferences and/or journals for peer review. Internships and independent studies are also common opportunities for independent learning in the Digital Media MA Program.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit
the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in a media-related creative or technical field such as art, film, animation, theater, music, digital media, computer science, English or education in the arts.
- Official, competitive GRE score taken within the last five years.
- A written statement (not to exceed 250 words) describing the student's personal goals, objectives, and research interests in seeking the degree.
- Three letters of recommendation from former professors or employers who can address applicant's ability to undertake graduate-level courses.

Desirable background skills for this degree include computer and software literacy. Examples include mastery of Macintosh and PC workstations that are configured with a diverse range of hardware and software for production and editing of images and sound for stories and messages.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, the applicant's potential for completing the degree, and the current applicant pool.

Early Childhood Development and Education MS

Program Description

The Master of Science program in Early Childhood Development and Education (ECDE) is designed to meet the needs of professionals who want to work with young children and their families. The ECDE program delivers relevant, rigorous course work and related academic experiences.

The program is designed for candidates with undergraduate degrees in a wide range of areas either related to early childhood development and education, such as child development, psychology, communication disorders, sociology, nursing, theatre, music or other degrees. The program of study includes advanced professional development in early child development and education for careers with direct and indirect services for
young children and families. Direct early education services to young children and families can include homes, schools, and other community settings, such as child care and Head Start. Indirect services can include: child assessment, program evaluation, child care resource and referral, early learning coalitions, community college instruction, and child advocacy. Graduates of this program are encouraged to serve as a bridge among schools and community agencies and to nurture leadership skills in these areas.

In addition to fostering the professional development of previously certified early childhood teachers, this program will also serve as a bridge among schools and community agencies and will provide the educational experiences to nurture educational leaders who will work within and across these areas.

Curriculum

The Early Childhood Development and Education MS program requires a minimum of 36 credit hours beyond the bachelor's degree, including 6 credit hours of core courses, 18 credit hours of specialization courses, 6 credit hours of electives, and 6 credit hours of a capstone experience in the form of a thesis or nonthesis/practicum option.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Students should initially and periodically meet with an academic adviser to plan their program of electives in relation to their desired career goals, develop a program of study and timeline for their course work completion, and plan for the capstone culminating experience.

The MS does not lead to initial teacher preparation through the state-approved program route. Students interested in certification may contact the Florida Bureau of Teacher Certification Florida Department of Education directly at www.fldoe.org/edcert/.

Required Courses: 24 Credit Hours

Core: 6 Credit Hours

- EDF 6481 - Fundamentals of Graduate Research in Education 3 Credit Hours
- EDF 6401 - Statistics for Educational Data 3 Credit Hours

Specialization: 18 Credit Hours

- EEC 5205 - Programs and Trends in Early Childhood Education 3 Credit Hours
- EEC 6269 - Play Development, Intervention, and Assessment 3 Credit Hours
- EEC 6405 - Home-School-Community Interaction in Early Childhood Education 3 Credit Hours
- EEC 6406 - Guiding and Facilitating Social Competence 3 Credit Hours
- EEC 6606 - Global Issues in Early Childhood 3 Credit Hours
- EEX 6222 - Observation and Assessment of Young Children 3 Credit Hours

Elective Courses: 6 Credit Hours

- EEC 6216 - Communicative Arts in Early Childhood Education 3 Credit Hours
- EEX 6017 - Typical and Atypical Applied Child Development 3 Credit Hours
- EEX 5702 - Planning Curriculum for Pre-Kindergarten Children with Disabilities 3 Credit Hours
- EEX 5750 - Communication with Parents and Agencies 3 Credit Hours
- MHS 6403 - Group and Family Play Therapy 3 Credit Hours
- MHS 6421 - Foundations of Play Therapy and Expressive Arts 3 Credit Hours
- SOW 6726 - Social Work Practice with Children from Birth to Age Five and their Families 3 Credit Hours
- Other courses of interest with consent of faculty

Thesis Option: 6 Credit Hours

- EEC 6971 Thesis 6 Credit Hours

Nonthesis Option: 6 Credit Hours

- EEC 6947 - Practicum in Child, Family, and Community Sciences 6 Credit Hours or 6 Credit Hours of approved electives with a written comprehensive examination

Independent Learning

A thesis, practicum, or a written comprehensive examination is required as the culminating experience for the program.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Three letters of recommendation from academic sources.
- Professional resumé.
- Essay detailing career goals.
- An interview (in person, by internet, or by phone) scheduled by the Early Childhood Graduate faculty.
- A guided 1-page written essay during the interview.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Admission materials will be scored on a rubric to quantify decision criteria.

Students who do not meet published admission requirements may be admitted provisionally and will be interviewed by a faculty program committee whose recommendations will be forwarded to the master's admission and retention committee in accordance with College of Education and Human Performance code for final admission action. Other admission factors that may be used in selecting students for provisional admission to the program are previous teaching experience or work (i.e., social service agencies) with infants and young children, pre-kindergarten or primary age children and their families.

Economics MS

Program Description

The Master of Science in Economics degree program prepares students as economists specializing in business analytics. The program provides students with the necessary theoretical and quantitative training to address current economic business problems in a thoughtful, rigorous manner.

Today's job market offers numerous opportunities to individuals who couple an advanced understanding of economic theory with well-developed skills in data analytics.

Curriculum

The Economics MS program requires a minimum of 30 credit hours beyond the bachelor's degree.

All candidates for the MS degree must complete the end-of-program requirement, ECO 6XXX Capstone in Business Analytics I and ECO Capstone in Business Analytics II.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses: 24 Credit Hours

Fall Term
- ECO 6403 - Mathematical Economics 3 Credit Hours
- ECO 6118 - Microeconomic Theory I 3 Credit Hours
- ECO 5445 - Introduction to Business Analytics 3 Credit Hours
- ESI 5306 - Operations Research 3 Credit Hours

Spring Term
- ECO 6424 - Econometrics I 3 Credit Hours
- ECO 7116 - Microeconomic Theory II 3 Credit Hours
- HIM 6217C - Health Care Database Management 4 Credit Hours
- ECO 6315 - Seminar in Contemporary Economic Issues 3 Credit Hours

End-of-Program Requirement: 6 Credit Hours

The culminating academic experience of the program consists of a two-course capstone sequence that provides students a forum in which to develop, carry out, and write up research of a well-defined problem in business analytics using the tools developed in the program.

- ECO 6935 - Capstone in Business Analytics I 3 Credit Hours
- ECO 6936 - Capstone in Business Analytics II 3 Credit Hours

Independent Learning

The capstone research project is required of all students in the program.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:
- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Résumé.
- Essay (no more than two pages; 8.5 x 11-inch stock, ten-point font, single-spaced, one-inch margins all around), explaining why candidate wants to study business analytics.
- A computer-based score of 233 (or 91 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from

Educational Leadership MA

Program Description

The online Master of Arts in Educational Leadership program is not a state-approved program for certification in Florida. The program is designed to prepare students for administrative and leadership positions in school settings and other education-related fields that specifically do NOT require certification (some examples include private school headmaster, a community college or university staff administrator, or museum administrator). The Educational Leadership MA also offers two tracks focused on higher education: Higher Education/Student Personnel and College Teaching and Leadership, both of which have different admission, enrollment, and graduation requirements.

The Higher Education/College Teaching and Leadership track is designed for individuals whose goal is to teach at the community college level. The Higher Education/Student Personnel track is designed to prepare students for leadership positions in a variety of student personnel/affairs departments on college and university campuses and education-related fields. Note, these programs have different admission, enrollment, and graduation requirements.

The Master of Arts in Educational Leadership program is designed to prepare students for administrative and leadership positions in school settings and other education-related fields that specifically do NOT require certification. The online Master of Arts in Educational Leadership is not a state-approved program for certification in Florida.

Please note: This program may be completed online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See http://ucf.edu/online for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.
Curriculum

The Educational Leadership MA program requires a minimum of 30 credit hours beyond the bachelor's degree, including 9 credit hours of research and measurement courses and 21 credit hours of administration courses. The courses may be taken in any order the student wishes but the culminating Research Report (EDA 6909) must be taken last.

Students enrolled in the Florida state-approved MEd, EdS, or Modified Core programs in educational leadership may not take these online courses for credit unless approved by their educational leadership faculty adviser.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses—30 Credit Hours

Research and Measurement—9 Credit Hours

- EDF 6481 - Fundamentals of Graduate Research in Education 3 Credit Hours
- EDF 6401 - Statistics for Educational Data 3 Credit Hours
  - OR
- EDF 6432 - Measurement and Evaluation in Education 3 Credit Hours
- EDA 6909 - Research Report 3 Credit Hours

Administration—21 Credit Hours

It is recommended that these courses be taken in the following sequence.

- EDA 6061 - Organization and Administration of Schools 3 Credit Hours
- EDS 6123 - Educational Supervisory Practices I 3 Credit Hours
- EDA 6232 - Legal Aspects of School Operation 3 Credit Hours
- EDA 6240 - Educational Financial Affairs 3 Credit Hours
- EDA 6260 - Educational Systems Planning and Management 3 Credit Hours
- EDA 6300 - Community School Administration 3 Credit Hours
- EDA 6931 - Contemporary Issues in Educational Leadership 3 Credit Hours

Independent Learning

Students are required to successfully complete a research report. For more information, contact the graduate program director.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applicants may apply to the online MA or one of the two tracks offered within the MA in Educational Leadership. The track programs are not online programs and may have different requirements.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.

Financials

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more
information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**Fellowships**

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Educational Leadership MA, Higher Education/College Teaching and Leadership Track**

**Track Description**

The Higher Education/College Teaching and Leadership track in the Educational Leadership MA program is designed for individuals planning to teach at that level and neither requires state teacher certification for admission nor prepares candidates for state teacher certification.

The program considers new applicants during fall and spring semesters only; passing a comprehensive exam at the end of the program is a graduation requirement.

**Curriculum**

**Total Credit Hours Required: 42 Credit Hours Minimum beyond the Bachelor's Degree**

The Higher Education/College Teaching and Leadership track in the Educational Leadership MA program is designed for individuals whose goal is to teach at the community college level. Every attempt is made to build the minimum required 18 hours of graduate-level content area courses into the program of study. Only six hours of independent study courses may be used to satisfy degree requirements. It is important to see an adviser if courses are difficult to schedule in the content area. Students electing this track will not meet state requirements for teacher certification in grades K-12. Successfully passing a comprehensive exam at the end of the program is a final graduation requirement.

**Required Courses—24 Credit Hours**

Students in this track should consult with the Higher Education/College Teaching and Leadership adviser regarding core requirements prior to registering for core courses.

- EDH 6053 - The Community College in America 3 Credit Hours
- EDH 6081 - Contemporary Problems in Community Colleges 3 Credit Hours
- EDH 6204 - Community College Organization, Administration, and Supervision 3 Credit Hours
- EDH 6215 - Community College Curriculum 3 Credit Hours
EDH 6305 - Teaching and Learning in the Community College 3 Credit Hours
EDF 6481 - Fundamentals of Graduate Research in Education 3 Credit Hours
IDS 6504 - Adult Learning 3 Credit Hours
EDF 6401 - Statistics for Educational Data 3 Credit Hours
EDF 6432 - Measurement and Evaluation in Education 3 Credit Hours

Elective Courses—18 Credit Hours
Courses must be approved by the student's adviser in one of the following disciplines:
- Art
- English
- English for Speakers of Other Languages (ESOL)
- Math
- Science
- Social Science (Select one: History, Sociology, Psychology, etc.)

Educational Leadership MA, Higher Education/Student Personnel Track

Track Description

The Higher Education/Student Personnel Track in the Educational Leadership MA program is designed to prepare students for leadership positions in student personnel administration in higher education and education-related fields.

Higher Education Professionals work in a variety of settings on college and university campuses, from financial aid, orientation, and residence life to athletics, international services, and student activities. They provide services and develop programs that affect all aspects of students’ lives inside and outside of the classroom.

Given the focus of the program, this master's degree does not lead to fulfillment of K-12 teacher certification requirements.

Curriculum

The Higher Education/Student Personnel track in the Educational Leadership MA program requires a minimum of 39 credit hours beyond the bachelor's degree, including six credit hours of core courses, 24 credit hours of specialization, three credit hours of electives, six credit hours of professional field experience, and passing a comprehensive exam at the end of studies.

Given the focus of the program, this master's degree does not lead to the fulfillment of K-12 teacher certification requirements.

Total Credit Hours Required: 39 Credit Hours Minimum beyond the Bachelor's Degree

Required Courses: 30 Credit Hours

Core: 6 Credit Hours

- EDF 6481 - Fundamentals of Graduate Research in Education 3 Credit Hours
- EDF 6432 - Measurement and Evaluation in Education 3 Credit Hours
- EDF 6401 - Statistics for Educational Data 3 Credit Hours

Specialization: 24 Credit Hours

Select 8 courses from the following list.

- EDH 6635 - Organization and Administration of Higher Education 3 Credit Hours
- EDH 6065 - History and Philosophy of Higher Education 3 Credit Hours
- EDH 6505 - Finance in Higher Education 3 Credit Hours
- EDH 6935 - Capstone Seminar in College Student Personnel 3 Credit Hours
- EDH 6407 - Ethical and Legal Issues in Student Personnel 3 Credit Hours
- EDH 6634 - Student Personnel Services in Higher Education 3 Credit Hours
- EDH 6044 - Career Exploration in Higher Education 3 Credit Hours
- EDH 6047 - Theories of College Student Development 3 Credit Hours
- EDH 6105 - Retention Strategies in Colleges and Universities 3 Credit Hours

Elective Courses: 3 Credit Hours

Electives approved by adviser

Professional Field Experience: 6 Credit Hours

- EDH 6946 - Internship VAR Credit Hours
- EDH 6947 - Practicum in Student Personnel 3 Credit Hours

Independent Learning

Both an internship and practicum are required for completing the degree, in addition to a capstone seminar.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:
• One official transcript (in a sealed envelope) from each college/university attended.
• Official, competitive GRE score taken within the last five years.
• Three letters of recommendation, with one being from a staff, administrator, or faculty at a college or university familiar with your involvement or engagement in postsecondary education.
• Résumé.
• Personal statement explaining your past, present, and future involvement in events or activities related to your development in College Student Personnel.

An individual and group interview may be required. The Higher Education/Student Personnel track admits in fall term only.

Application Deadlines

All application materials must be submitted by the appropriate deadline listed below.
