- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the MMAE graduate program director for further information.

Degree Requirements

Required Courses
15 Total Credits

- Complete the following:
  - BME5216C - Mechanics of Biostructures I (3)
  - BME5217C - Mechanics of Biostructures II (3)
  - BME6500C - Bioinstrumentation (3)
  - BME6935 - Topics in Biomedical Engineering (3)
  - EML6211 - Continuum Mechanics (3)

Biofluids Courses
6 Total Credits

- Complete the following:
  - BME5267 - Biofluid Mechanics (3)
  - BME6268C - Applied and Computational Biofluids (3)

Representative Electives
3 Total Credits

- Complete at least 1 of the following:
  - BME5572 - Biomedical Nanotechnology (3)
  - BSC5418 - Tissue Engineering (3)
  - EEE5265 - Biomedical Effects and Applications of Electromagnetic Energy (3)
  - EEL5272 - Biomedical Sensors (3)
  - EEL5690 - Medical Robotics (3)
  - EMA5060 - Polymer Science and Engineering (3)
  - EMA5584 - Biomaterials (3)
  - EMA5588 - Biocompatibility of Materials (3)
  - EML5060 - Mathematical Methods in Mechanical and Aerospace Engineering (3)
  - EML5066 - Computational Methods in Mechanical and Aerospace Engineering (3)
  - EML5237 - Intermediate Mechanics of Materials (3)
  - EML5291 - MEMS Materials (3)
  - EML5546 - Engineering Design with Composite Materials (3)
  - EML6068 - Finite Elements in Mechanical, Materials, and Aerospace Engineering II (3)
  - EML6299 - Advanced Topics on Miniaturization (3)
  - ESI5219 - Engineering Statistics (3)
  - ESI647 - Experimental Design and Taguchi Methods (3)
  - ESI6609 - Industrial Engineering Analytics for Healthcare (3)
  - IDS5127 - Foundation of Bio-Imaging Science (3)
  - IDS6252 - Biomedical Nanotechnology (3)
  - IDS6253 - Bioanalytical Technology (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following:
        - BME6971 - Thesis (99)
      - Students may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the student's program of study and the proposed thesis topic. The College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website (www.cecs.ucf.edu) and on the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date. Additionally, all students pursuing the thesis option must enroll in the following course: EML 5090 - Mechanical and Aerospace Seminar 0 Credit Hours Students must register for the seminar course a minimum of two times during their graduate career in the master's program (thesis option). The students must also complete the course with a satisfactory (S) grade in both attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.
  - Nonthesis Option
    - Earn at least 6 credits from the following types of courses:
      - Additional elective coursework as listed in Representative Elective section above

Grand Total Credits: 30
Track Details

All students must take at least 15 credit hours at the 6000 level. At least 24 credit hours of the program of study must be course work, exclusive of research and thesis hours.

All students must identify an adviser and file an official program of study prior to the completion of 9 credit hours of study. Students should consult with the MAE Graduate Program Director for assistance in filling out their program of study. The program of study must be approved by the department. Substitutions to the program of study must be approved by the student's faculty adviser and department. More information is available on the MAE departmental website (http://www.mae.ucf.edu/).

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis for the thesis option. For nonthesis students, the independent learning experience is provided by BME 6935 - Topics in Biomedical Engineering, one of the required courses.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Biomedical-Engineering-MS.pdf.
**Track Description**

The Biomechanics track in the Master of Science degree in Biomedical Engineering provides graduates with professional skills enabling them to gain employment in the biomedical engineering industry or to enter competitive Biomedical Engineering PhD research programs. Career opportunities include research, design, analysis, testing and product development in the biomedical and rehabilitation industries, in clinical engineering, and in biomedical engineering.

The current research focus is in biomechanics, developmental dysplasia of the hip, cellular mechanics and force-induced biochemical responses, image guided surgery, surgical robotics navigation and tracking, soft robotics, and biomechanics of movement rehabilitation and neural control of movement.

The Master of Science in Biomedical Engineering requires 30 credit hours at the graduate level (a combination of 5000 and 6000 level courses) and offers both thesis and nonthesis options.

Thesis students take 15 credit hours of required courses, 6 credit hours of Biomechanics courses, 3 credit hours of an approved elective, and 6 credit hours of thesis.

The nonthesis option is primarily designed to meet the needs of part-time students and requires 30 credit hours of coursework. Nonthesis students take 15 credit hours of required courses, 6 credit hours of Biomechanics courses, and 9 credit hours of approved electives.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree**

**Track Prerequisites**

A bachelor's degree in Biomedical, Mechanical or Aerospace Engineering, or a closely related discipline. A student with an undergraduate degree outside of the selected departmental discipline may be required to satisfy an articulation program.

**Prerequisites for non-engineering students applying to the program**

- Calculus with Analytic Geometry I (MAC 2311C), Calculus with Analytic Geometry II (MAC 2312), Calculus with Analytic Geometry (MAC 2313), Ordinary Differential Equations (MAP 2302)
- Engineering Analysis - Statics (EGN 3310), Engineering Analysis - Dynamics (EGN 3321), and Solid Mechanics (EGM 3601)
- Thermodynamics (EGN 3343)*
- Design and Analysis of Machine Components (EML 3500)
- Introduction to Vibrations and Controls (EML 4225)
- Modeling Methods in Mechanical and Aerospace Engineering (EML 3034C)*
- Mechanical Engineering Measurements (EML 3303C)*

* Or equivalent (see graduate adviser)

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biomedical, Mechanical or Aerospace Engineering, or a closely related discipline.
- Résumé.
- The GRE is not required for admission to this program.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the MMAE graduate program director for further information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Biomedical-Engineering-MS.pdf.

Track Description

The Biomedical Engineering MS program offers an MD/MSBME Track that enables qualified students to earn both the MD and the MSBME degrees.

For medical students, the combined MD/MSBME will run as a 5-year program where the students will complete the majority of the MSBME requirements in the third year after matriculation, prior to their clinical experiences. MD students apply and are admitted into the MSBME program in Fall. Upon successful completion of the Structure and Function and FIRE modules in their first year of medical school, students in the MD/MSBME program will receive 9 hours of credit toward the 30 credit hours required for the requirements of the MSBME degree. Medical students will complete the second year of the curriculum and take a year’s leave of absence to take most of the MSBME degree requirements.

The Biomedical Engineering MS program requires a minimum of 30 credit hours for students who choose the MD/MSBME track. In this restricted admission MD track, students complete biomedical engineering core courses, concentration courses in Biofluids or Biomechanics, and a thesis.

For MD students in this track, the combined MD/MSBME will be a five-year program, where students complete the majority of the MSBME requirements in the third year (15 credit hours of coursework and 3 credit hours of thesis), receive 9 credit hours of transfer credit from their MD program toward the 30 credit hours required for the MSBME, defend their master’s thesis and take the balance of 3 credit hours of thesis in the fifth year, and then graduate with both MD and MSBME degrees.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

Students interested in pursuing both the MD and MSBME degrees must apply and be accepted into medical school and the Biomedical Engineering MS program. Separate applications are required, but students wishing to pursue this joint degree program should indicate this and state their reasons on both applications. Information regarding admission and application to UCF’s MD program can be found at https://med.ucf.edu/administrative-offices/student-affairs/admissions/.

A bachelor's degree in Biomedical, Mechanical or Aerospace Engineering, or a closely related discipline is required. A student with an undergraduate degree outside of the selected departmental discipline may be required to satisfy an articulation program.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Students interested in pursuing both the MD and MSBME degrees must apply and be accepted into medical school and the Biomedical Engineering MS program. Program Description

The Civil Engineering MS degree program reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society. The program offers tracks in Smart Cities, Structural and Geotechnical Engineering, Transportation Systems Engineering, and Water Resources Engineering. Course work includes structural analysis and design, geotechnical engineering and foundations, transportation planning and operations, traffic engineering, construction engineering, and water resources engineering. Please scroll to the bottom of this page for further details on these tracks.

Faculty research interests include geotechnical studies of subsurface conditions, soil testing “superpave” mix design, intelligent transportation systems, traffic safety, structural dynamics, nonlinear structural analysis and software development, reinforced concrete, construction engineering, hydraulic modeling, coastal ocean modeling, stormwater management, and watershed management. Students completing the program find positions in consulting firms, construction, and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

The MS degree offers both thesis and nonthesis options with each requiring 30 credit hours of acceptable graduate work. The thesis option requires a 6 credit hour thesis project and the nonthesis option requires an additional 6 credit hours of electives and an end-of-program portfolio submission.

Individual, independent research studies may be required in one or more courses. The research study and report will focus on reviewing and analyzing contemporary research in a student's particular specialization within the profession in order to help students acquire knowledge and skills pertaining to research-based best practices in that specialization area. In addition, students may engage in six credit hours of independent study during their studies.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Is this track available 100% online?
Yes

UCF Online

Please Note: Civil Engineering MS, Smart Cities Track may be completed fully online although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Civil-Engineering-MS.pdf.
**Track Description**

In 2017, FUTURe CIty initiative was launched by the College of Engineering and Computer Science (CECS) and Civil, Environmental, and Construction Engineering (CECE) Department. FUTURe CIty initiative at UCF brings together a group of researchers and educators with a vision to synergistically explore the wide-ranging technological advances towards better serving urban residents. The initiative is a pioneering effort in the state and country. It is geared toward many aspects of CECE including: Smart transportation, Smart and resilient infrastructure, Smart and technological advancements in environmental engineering, and water resources.

The track is designed to help future Civil and Environmental Engineers to learn and adapt to the new challenges in the field of Smart Cities and be prepared for their professional roles through a state-of-the-art education. Elements of the track will bridge some of the gaps with other engineering disciplines and open the door for students to collaborate on research and education that are relevant to the cities of the future.

The Smart City Track in the Civil Engineering MS program is for students with appropriate science or engineering baccalaureate backgrounds. Both thesis and non-thesis options are available with each requiring 30 credit hours. The thesis option requires 3 credit hours of required course work, 9 credit hours of Core courses, 12 credit hours of elective graduate course work exclusive of thesis and research, and a thesis (6 credit hours). The non-thesis option requires 3 credit hours of required course work, 15 credit hours of required graduate Core courses, 12 credit hours of electives, and submission of an end-of-program portfolio. Each student must have an individual program of study approved by his/her faculty committee and have completed all required articulation course work as described below. At least one-half of the required credits must be taken at the 6000 level.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor’s Degree**

**Track Prerequisites**

A Bachelor of Science degree in civil engineering or another closely related engineering degree. Applicants who are applying to the programs without a directly related undergraduate degree should closely check the prerequisites. Additional undergraduate courses may be required.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in civil engineering or another closely related engineering degree.
- The GRE is not required for admission to this program.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

The MS degrees in specialized options are designed for students with appropriate baccalaureate backgrounds. Applicants who are applying to the programs without a directly related undergraduate degree should closely check the prerequisites. Additional undergraduate courses may be required.

Degree Requirements

Required Course
3 Total Credits

- Complete the following:
  - CGN5341 - Interdisciplinary Introduction to Smart Cities' Applications (3)

Core Courses
9 Total Credits

- Complete at least 3 of the following:
  - CCE5220 - Sustainable Infrastructure Systems (3)
  - CEG6610 - Smart Underground Structures: Tunnels and Shafts (3)
  - CES6876 - Smart City Built Infrastructure (3)
  - CGN5617 - Infrastructure Systems Optimization and Identification (3)
  - CGN6342 - Modeling Human Behavior with Emerging Data (3)
  - CGN6343 - Cyber-Physical Systems and Smart Cities (3)
  - ENV6129 - Smart Water and Wastewater Management (3)
  - STA5703 - Data Mining Methodology I (3)
  - TTE6531 - Active Mobility and Technologies: Synergy and Challenges (3)
  - TTE6562 - Policy Aspects of Smart City Transportation (3)
  - TTE6553 - Mobility in Smart Cities: Technologies and Application Areas (3)
  - TTE6627 - Connected and Autonomous Vehicles (3)
  - TTE6608 - Algorithms and Models for Smart Cities (3)
  - CGN5340 - Internet of Things: Applications in Smart Cities (3)

Elective Courses
12 Total Credits

- Complete at least 4 of the following:
  - CAP5415 - Computer Vision (3)
  - CAP5610 - Machine Learning (3)
  - CAP5738 - Visualization Techniques for Data Analysis (3)
  - CEN5016 - Software Engineering (3)
  - CGN6655 - Regional Planning, Design, and Development (3)
  - EEL5825 - Pattern Recognition and Learning from Big Data (3)
  - EEL6026 - Optimization of Engineering Systems (3)
  - EEL6671 - Modern and Optimal Control Systems (3)
  - EMA5104 - Intermediate Structure and Properties of Materials (3)
  - EMA5504 - Modern Characterization of Materials (3)
  - EMA6626 - Mechanical Behavior of Materials (3)
  - EMA6626 - Mechanical Behavior of Materials (3)
  - HMG6449 - Smart Travel and Tourism (3)
  - PAD5337 - Urban Design (3)
  - PAD5930 - Global Cities (3)
  - PAD5356 - Managing Community and Economic Development (3)
  - PAD6399 - Housing Development and Planning (3)
  - PAD6387 - Transportation Policy (3)
  - PAD6716 - Information Systems for Public Managers and Planners (3)
  - STA5104 - Advanced Computer Processing of Statistical Data (3)
  - STA5206 - Statistical Analysis (3)
  - STA5825 - Stochastic Processes and Applied Probability Theory (3)
Thesis/Nonthesis Option

6 Total Credits

♦ Complete 1 of the following

Thesis Option
- Earn at least 6 credits from the following types of courses:
  XXX 6971 - Thesis A successful defense of the thesis is required. In addition, the College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.

Nonthesis Option
- Complete all of the following
  ■ Earn at least 6 credits from the following types of courses:
    Nonthesis students must complete at least 6 additional credit hours of electives from either the list above or other courses as approved by the student's adviser.
  ■ Portfolio Requirement Students are required to complete a culminating experience. The culminating experience for nontesis MS students is submission of an end-of-program portfolio. The portfolio requirements are listed on the CECE website.

Grand Total Credits: 30

Track Details

Research studies or projects are required in one or more courses. The research study or project will focus on reviewing and analyzing contemporary research or engineering issues in a student's particular specialization within the profession in order to help students acquire knowledge and skills pertaining to research-based best practices in that specialization area.

Equipment Fee

Students in the Civil Engineering MS program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning

A research or design project serves as the independent learning experience for thesis students. Non-thesis students are required to take at least one of the courses marked with an asterisk (*), denoting an independent learning experience, and submission of an end-of-program portfolio.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Civil-Engineering-MS.pdf.
Track Description

The Structural and Geotechnical Engineering Accelerated BS to MS track in the Civil Engineering MS program reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the structural and geotechnical infrastructure of society.

The program allows highly qualified undergraduate majors in Civil Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program.

The program's course work focuses on structural analysis and design, and geotechnical engineering and foundations, but may include electives in transportation planning and operations, traffic engineering, construction engineering, and water resources engineering.

Faculty research interests include geotechnical studies of subsurface conditions, soil testing "superpave" mix design, intelligent transportation systems, traffic safety, structural dynamics, nonlinear structural analysis and software development, reinforced concrete, construction engineering, hydraulic modeling, coastal ocean modeling, stormwater management, and watershed management. Students completing the program find positions in consulting firms, construction, and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

The department offers a Structural and Geotechnical Engineering Accelerated BS to MS track in the Civil Engineering MS program to students with appropriate science or engineering baccalaureate backgrounds. See undergraduate engineering major requirements in the Undergraduate Catalog. Both a thesis option and a nonthesis option are available with each requiring 30 credit hours. The thesis option requires 12 credit hours of required courses, 12 credit hours of elective graduate course work (exclusive of thesis and research), and 6 credit hours of thesis. The nonthesis option requires 12 credit hours of required courses and 18 credit hours of elective graduate course work. The nonthesis option also requires submission of an end-of-program portfolio. The student must develop an individual program of study with a faculty adviser and must have background or articulation course work as described below. At least one-half of the required credits must be taken at the 6000 level.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A Bachelor of Science degree in civil engineering or another closely related engineering degree from UCF.

Prerequisites (Articulation)

- EGN 3310 - Engineering Analysis—Statics 3 Credit Hours
- EGN 3321 - Engineering Analysis—Dynamics 3 Credit Hours
- EGN 3331 - Mechanics of Materials 3 Credit Hours
- CEG 4011C - Geotechnical Engineering I 4 Credit Hours
- CES 4100 - Structural Analysis 4 Credit Hours
- CES 4605 - Steel Structures 3 Credit Hours or
- CES 4702 - Reinforced Concrete Structures 3 Credit Hours

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Accelerated BS to MS program in Structural and Geotechnical Engineering allows highly qualified University of Central Florida undergraduate majors in Civil Engineering to begin taking graduate level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline but was not previously part of this accelerated program, then they should apply to the Structural and Geotechnical Engineering track.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in civil engineering or another closely related engineering degree.
- The GRE is not required for admission to this program.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

Degree Requirements

Required Courses
12 Total Credits

- Complete all of the following
  Geotechnical Engineering
  - Complete at least 2 of the following:
    - CEG6065 - Soil Dynamics (3)
    - CEG6115 - Foundation Engineering (3)
    - CEG6317 - Advanced Geotechnical Engineering (3)
    - Course Not Found
    - TTE5835 - Pavement Engineering (3)
    - CGN5506 - Advanced Pavement and Civil Engineering Materials (3)

- Structural Engineering
  - Complete at least 2 of the following:
    - CES5144 - Matrix Methods for Structural Analysis (3)
    - CES5606 - Advanced Steel Structures (3)
    - CES5706 - Advanced Reinforced Concrete (3)
    - CES5821 - Masonry and Timber Design (3)
    - CES6010 - Structural Reliability (3)
    - CES6116 - Finite Element Structural Analysis (3)
    - CES6209 - Dynamics of Structures (3)
    - CES6220 - Wind and Earthquake Engineering (3)
    - CES6230 - Advanced Structural Mechanics (3)
    - CES6527 - Nonlinear Structural Analysis (3)
    - CES6715 - Prestressed Concrete Structures (3)

Non Thesis Students - Required Course Selection
0 Total Credits

- The following courses represent those with specific independent learning experiences and ALL NONTHESIS STUDENTS MUST
  CHOOSE ONE of the courses from each group: Geotechnical Engineering CEG 5700 - Geo-Environmental Engineering CEG 6115
  - Foundation Engineering CES 6170 Structural Engineering CES 5606 - Advanced Steel Structures CES 5706 - Advanced
  Reinforced Concrete CES 6715 - Prestressed Concrete Structures

Elective Courses
12 Total Credits

- Complete all of the following
  - Complete at least 4 of the following:
    - CCE5205 - Decision Support for Infrastructure Projects (3)
    - CCE5006 - Infrastructure Systems Management (3)
    - CCE5220 - Sustainable Infrastructure Systems (3)
    - CCE6036 - Advanced Construction Planning and Control (3)
    - CCE6211 - Design and Monitoring of Construction Processes (3)
    - CCE6045 - Cost Analysis of Sustainable Infrastructure Systems (3)

- All students, both thesis and nonthesis, must complete at least 12 credit hours of approved electives (primarily from
  the above two required course groups but also from the list above or other courses as approved by the student’s
  adviser). Please note that Directed Research (XXX 6918) is not permitted in the MS program of study.

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - XXX 6971 - Thesis A successful defense of the thesis is required. In addition, the College of Engineering and
        Computer Science requires that all thesis defense announcements be approved by the student’s adviser and posted on
        the college’s website and on the university-wide Events Calendar at the College of Graduate Studies website at least two
        weeks before the defense date.
      - Nonthesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following types of courses:
        - Nonthesis students must complete at least 6 additional credit hours of electives from the lists above or other
          courses as approved by the student’s adviser. Please note that at least one course in the nonthesis program of
          study must be one of the courses in the "Non Thesis Students - Required Course Selection" above, which
          denotes that this course provides an independent learning experience for the student.
        - Portfolio Requirement Students are required to complete a culminating experience. The culminating
          experience for nonthesis MS students is submission of an end-of-program portfolio. the portfolio requirements
          are listed on the CECE website.

Grand Total Credits: 30
**Track Details**

Research studies or projects are required in one or more courses. The research study or project will focus on reviewing and analyzing contemporary research or engineering issues in a student's particular specialization within the profession in order to help students acquire knowledge and skills pertaining to research-based best practices in that specialization area.

**Equipment Fee**

Students in the Civil Engineering MS program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

**Independent Learning**

A research or design project serves as the independent learning experience for thesis students. Nonthesis students are required to take at least one of the courses designated in the "Non Thesis Students - Required Course Selection" section above, denoting an independent learning experience, and submission of an end-of-program portfolio.

**Financial Information**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Civil-Engineering-MS.pdf.

Track Description

The Structural and Geotechnical Engineering track in the Civil Engineering MS program focuses on the engineering, analysis, design, and construction of the built infrastructure. The track emphasizes on both: the above-ground engineering (primarily structures), the below-ground engineering (primarily geotechnical), as well as the interaction between the two systems. The program's course work focuses on structural analysis and design, mechanics and materials, foundations, characterization of soils and geomaterials, and computational modeling in structural and geotechnical engineering. Faculty research interests include geotechnical studies of subsurface conditions, soil characterization and testing, pavement design, retaining structures, structural dynamics, nonlinear structural analysis and software development, reinforced and prestressed concrete design, bridge engineering and pavements. Students completing the program find positions in consulting firms, design companies, construction and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

The department offers a Structural and Geotechnical Engineering track in the Civil Engineering MS program to students with appropriate science or engineering baccalaureate backgrounds. Both a thesis option and a nonthesis option are available with each requiring 30 credit hours. The thesis option requires 12 credit hours of required courses, 12 credit hours of elective graduate course work (exclusive of thesis and research), and 6 credit hours of thesis. The nonthesis option requires 12 credit hours of required courses and 18 credit hours of elective graduate course work. The nonthesis option also requires submission of an end-of-program portfolio. The student must develop an individual program of study with a faculty adviser and must have background or articulation course work as described below. At least one-half of the required credits must be taken at the 6000 level.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A Bachelor of Science degree in civil engineering or another closely related engineering degree. Applicants who are applying to the programs without a directly related undergraduate degree should closely check the prerequisites. Additional undergraduate courses may be required.

Prerequisites (Articulation)

- EGN 3310 - Engineering Analysis—Statics 3 Credit Hours
- EGN 3321 - Engineering Analysis—Dynamics 3 Credit Hours
- EGN 3331 - Mechanics of Materials 3 Credit Hours
- CEG 4011C - Geotechnical Engineering 4 Credit Hours
- CES 4100 - Structural Analysis 4 Credit Hours
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in civil engineering or another closely related engineering degree.
- The GRE is not required for admission to this program.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

The MS degrees in specialized options are designed for students with appropriate baccalaureate backgrounds. Applicants who are applying to the programs without a directly related undergraduate degree should closely check the prerequisites. Additional undergraduate courses may be required.

  Structural Engineering
    - CES5144 - Matrix Methods for Structural Analysis (3)
    - CES5606 - Advanced Steel Structures (3)
    - CES5706 - Advanced Reinforced Concrete (3)
    - CES5821 - Masonry and Timber Design (3)
    - CES6010 - Structural Reliability (3)
    - CES6116 - Finite Element Structural Analysis (3)
    - CES6209 - Dynamics of Structures (3)
    - CES6220 - Wind and Earthquake Engineering (3)
    - CES6230 - Advanced Structural Mechanics (3)
    - CES6527 - Nonlinear Structural Analysis (3)
    - CES6715 - Prestressed Concrete Structures (3)

Non Thesis Students - Required Course Selection
0 Total Credits

- The following courses represent those with specific independent learning experiences and ALL NONTHESIS STUDENTS MUST CHOOSE ONE of the courses from each group: Geotechnical Engineering CEG 5700 - Geo-Environmental Engineering CEG 6115 - Foundation Engineering CES 6170 - Boundary Element Methods in Civil Engineering Structural Engineering CES 5606 - Advanced Steel Structures CES 5706 - Advanced Reinforced Concrete CES 6715 - Prestressed Concrete Structures

Elective Courses
12 Total Credits

- Complete all of the following
  - Complete at least 4 of the following:
    - CCE5205 - Decision Support for Infrastructure Projects (3)
    - CCE5006 - Infrastructure Systems Management (3)
    - CCE5220 - Sustainable Infrastructure Systems (3)
    - CCE6036 - Advanced Construction Planning and Control (3)
    - CCE6211 - Design and Monitoring of Construction Processes (3)
    - CCE6045 - Cost Analysis of Sustainable Infrastructure Systems (3)

- All students, both thesis and nonthesis, must complete at least 12 credit hours of approved electives (primarily from the above two required course groups but also from the list above or other courses as approved by the student's adviser). Please note that Directed Research (XXX 6918) is not permitted in the MS program of study.

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      XXX 6971 - Thesis A successful defense of the thesis is required. In addition, the College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
  - Nonthesis Option
    - Earn at least 6 credits from the following types of courses:
      Nonthesis students must complete at least 6 additional credit hours of electives from the lists above or other courses as approved by the student's adviser. Please note that at least one course in the nonthesis program of study must be one of the courses in the "Non Thesis Students - Required Course Selection" above, which denotes that this course provides an independent learning experience for the student.
      - Portfolio Requirement Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of an end-of-program portfolio. The portfolio requirements are listed on the CECE website.

Grand Total Credits: 30
Track Details

Research studies or projects are required in one or more courses. The research study or project will focus on reviewing and analyzing contemporary research or engineering issues in a student's particular specialization within the profession in order to help students acquire knowledge and skills pertaining to research-based best practices in that specialization area.

Equipment Fee

Students in the Civil Engineering MS program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning

A research or design project serves as the independent learning experience for thesis students. Nonthesis students are required to take at least one of the courses designated in the "Non Thesis Students - Required Course Selection" section above, denoting an independent learning experience, and submission of an end-of-program portfolio.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Civil Engineering MS - Civil Engineering MS, Transportation Systems Engineering Accelerated BS to MS Track

College

Ana Lucia Salas
Graduate Student Services Coordinator
AnaLucia.Salas@ucf.edu
Telephone: 407-823-1299
Engineering II, 211-K

Is this track available 100% online?

Yes
Please Note: Civil Engineering MS, Transportation Systems Accelerated BS to MS Track may be completed fully online although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Civil_Engineering-MS.pdf.

Track Description

The Transportation Systems Engineering Accelerated BS to MS track in the Civil Engineering MS program reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the transportation infrastructure of society. The program's course work focuses on transportation planning and operations, traffic engineering and construction engineering.

The program allows highly qualified undergraduate majors in Civil Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program.

Faculty research interests include intelligent transportation systems, traffic safety, traffic signal design, and construction engineering. Students completing the program find positions in consulting firms, construction, and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

The Transportation Systems Engineering Accelerated BS to MS track in the Civil Engineering MS program is for students with appropriate science or engineering baccalaureate backgrounds. See undergraduate engineering major requirements in the Undergraduate Catalog.

Both a thesis option and a nonthesis option are available with each requiring 30 credit hours of graduate courses. The thesis option requires 15 credit hours of required courses, 9 credit hours of elective courses (exclusive of thesis and research), and a thesis (6 credit hours). The nonthesis option requires 15 credit hours of required courses and 15 credit hours of elective graduate course work. The nonthesis option also requires submission of an end-of-program portfolio. The student must develop an individual program of study with a faculty adviser and must have background or articulation course work as described below. At least one-half of the required credits must be taken at the 6000 level.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor’s Degree

Track Prerequisites

A Bachelor of Science degree in civil engineering or another closely related engineering degree from UCF.

Prerequisites

- STA 3032 - Probability and Statistics for Engineers 3 Credit Hours
- TTE 3810 - Transportation Engineering 3 Credit Hour

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Accelerated BS to MS program in Transportation Systems Engineering allows highly qualified University of Central Florida undergraduate majors in Civil Engineering to begin taking graduate level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline but was not previously part of this accelerated program, then they should apply to the Transportation Systems Engineering track.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in civil engineering or another closely related engineering degree.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews with applicants before accepting them into their research program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Civil-Engineering-MS.pdf.

Track Description

The Water Resources Engineering Accelerated BS to MS track in the Civil Engineering MS program reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the sustainable infrastructure for society. The program's course work focuses on water resources modeling, hydraulics and hydrology.

The program allows highly qualified undergraduate majors in Civil Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program.

Water Resource faculty research interests include ecohydraulic and ecohydrologic modeling, groundwater and surface hydrology, sea level rise and other climate change impact assessments, stormwater management, tide, wind-wave and hurricane storm surge modeling, and environmental water resources management. Students completing the program find positions in consulting firms, construction and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

The Water Resources Engineering Accelerated BS to MS track in the Civil Engineering MS program is for students with appropriate science or engineering baccalaureate backgrounds. See undergraduate engineering major requirements in the Undergraduate Catalog.

Both thesis and non-thesis options are available with each requiring 30 credit hours. The thesis option requires 15 credit hours of required courses, 9 credit hours of elective graduate course work exclusive of thesis and research, and a thesis (6 credit hours). The nonthesis option requires 15 credit hours of required graduate course work, 15 credit hours of electives, and submission of an end-of-program portfolio. Each student must have an individual program of study approved by his/her faculty committee and have completed all required articulation course work as described below. At least one-half of the required credits must be taken at the 6000 level.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A Bachelor of Science degree in civil engineering or another closely related engineering degree from UCF.

Prerequisites (Articulation)

- CEG 4011C - Geotechnical Engineering | 4 Credit Hours
- CWR 4632C - Water Resources | 4 Credit Hours
- CWR 4633C - Water Resources II | 3 Credit Hours
- EGN 3613 - Engineering Economic Analysis | 2 Credit Hours
- STA 3032 - Probability and Statistics for Engineers | 3 Credit Hours

**Degree Requirements**

**Required Courses**

15 Total Credits  
- Complete at least 5 of the following:
  - CWR5125 - Groundwater Hydrology (3)  
  - CWR5205 - Hydraulic Engineering (3)  
  - CWR5515 - Numerical Methods in Civil and Environmental Engineering (3)  
  - CWR5545 - Water Resources Engineering (3)  
  - CWR5634 - Water Resources in a Changing Environment (3)  
  - CWR6102 - Advanced Hydrology (3)  
  - CWR6126 - Groundwater Modeling (3)  
  - CWR6235 - Open Channel Hydraulics (3)  
  - CWR6235 - Open Channel Hydraulics (3)  
  - CWR6535 - Modeling Water Resources Systems (3)  
  - CWR6539 - Finite Elements in Surface Water Modeling (3)

**Non Thesis Students - Required Course Selection**  
0 Total Credits  
- The following courses represent those with specific independent learning experiences and ALL NONTHERESIS STUDENTS MUST CHOOSE ONE of the courses from: CWR 6102 - Advanced Hydrology CWR 6126 - Groundwater Modeling CWR 6235 - Open Channel Hydraulics CWR 6535 - Modeling Water Resources Systems

**Elective Courses**

9 Total Credits  
- Earn at least 9 credits from the following types of courses:  
  - All students, both thesis and nonthesis, must complete at least 9 additional credit hours of approved electives from the required courses above or other courses as approved by the student's adviser. Directed Research (XXX 6918) is not permitted in the MS program of study.

**Thesis/Nonthesis Option**

6 Total Credits  
- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - CWR 6971 - Thesis A successful defense of the thesis is required. In addition, the College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
  - Nonthesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following types of courses:
        - Two additional electives, which should preferably come from the above list, although other courses may be chosen with adviser's consent.
        - Portfolio Requirement Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of an end-of-program portfolio. The portfolio requirements are listed on the CECE website.

**Grand Total Credits:** 30

### Track Details

Research studies or projects are required in one or more courses. The research study or project will focus on reviewing and analyzing contemporary research or engineering issues in a student's particular specialization within the profession in order to help students acquire knowledge and skills pertaining to research-based best practices in that specialization area.

### Equipment Fee

Students in the Civil Engineering MS program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

### Independent Learning

A research or design project serves as the independent learning experience for thesis students. Nonthesis students are required to take at least one of the courses designated in the "**Non Thesis Students - Required Course Selection**" section above, denoting an independent learning experience, and submission of an end-of-program portfolio.

2021-2022 Graduate Catalog
Financial Information
Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance
Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241
finaid@ucf.edu
http://finaid.ucf.edu

Fellowship Information
Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Is this track available 100% online?
Yes

UCF Online
Please Note: Civil Engineering MS, Water Resources Track may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.
Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Civil-Engineering-MS.pdf.

Track Description

The Water Resources Engineering track in the Civil Engineering MS program reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the sustainable infrastructure for society. The program's course work focuses on water resources modeling, hydraulics and hydrology.

Water Resource faculty research interests include ecohydraulic and ecohydrologic modeling, groundwater and surface hydrology, sea level rise and other climate change impact assessments, stormwater management, tide, wind-wave and hurricane storm surge modeling, and environmental water resources management, and stormwater management. Students completing the program find positions in consulting firms, construction and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

The Water Resources Engineering track in the Civil Engineering MS program is for students with appropriate science or engineering baccalaureate backgrounds. Both thesis and non-thesis options are available with each requiring 30 credit hours. The thesis option requires 15 credit hours of required courses, 9 credit hours of elective graduate course work exclusive of thesis and research, and a thesis (6 credit hours). The nonthesis option requires 15 credit hours of required graduate course work, 15 credit hours of electives, and submission of an end-of-program portfolio. Each student must have an individual program of study approved by his/her faculty committee and have completed all required articulation course work as described below. At least one-half of the required credits must be taken at the 6000 level.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A Bachelor of Science degree in civil engineering or another closely related engineering degree. Applicants who are applying to the programs without a directly related undergraduate degree should closely check the prerequisites.

Prerequisites (Articulation)

- CEG 4011C - Geotechnical Engineering 4 Credit Hours
- CWR 4202C - Hydraulics 4 Credit Hours
- CWR 4120 - Hydrology 3 Credit Hours
- EGN 3613 - Engineering Economic Analysis 2 Credit Hours
- STA 3032 - Probability and Statistics for Engineers 3 Credit Hours

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in civil engineering or another closely related engineering degree.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

The MS degrees in specialized options are designed for students with appropriate baccalaureate backgrounds. Applicants who are applying to the programs without a directly related undergraduate degree should closely check the prerequisites. Additional undergraduate courses may be required.

Program Description

The Master of Science in Civil Engineering degree is designed for students who have an undergraduate degree in Civil Engineering or another closely related engineering degree. Graduate work and research in civil engineering reflect the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society.

The program includes course work in structural analysis and design, geotechnical engineering and foundations, transportation planning and operations, traffic engineering, construction engineering, water resources engineering, and smart cities.

Faculty research interests include geotechnical studies of subsurface conditions, soil testing "superpave" mix design, intelligent transportation systems, traffic safety, structural dynamics, nonlinear structural analysis and software development, reinforced concrete, construction engineering, hydraulic modeling, coastal ocean modeling, stormwater management, and watershed management. Students completing the program find positions in consulting firms, construction, and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

This degree has 2 tracks: Accelerated BS to MSCE Track and Construction Engineering Accelerated BS to MSCE Track. Please scroll to the bottom of this page for further details on these Tracks.

The Civil Engineering MSCE program requires a minimum of 30 credit hours beyond the bachelor's degree, and both thesis and nonthesis options are available. The thesis option requires 24 credit hours of formal graduate-level course work and 6 credit hours of thesis. The nonthesis option requires 30 hours of formal course work and completion of a culminating experience. For nonthesis MS students, the culminating experience is submission of a portfolio that satisfies program requirements. It is strongly suggested that part-time students pursue the nonthesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

A Bachelor of Science degree in civil engineering or another closely related engineering degree.

  - TTE5531 - Active Mobility and Technologies: Synergy and Challenges (3)
  - TTE5532 - Policy Aspects of Smart City Transportation (3)
Non Thesis Students - Required Course Selection

0 Total Credits

- Nonthesis students must take at least one course where a research project is required (one course marked with an asterisk - See Program Details Section Below for asterisks).

Thesis/Nonthesis Option

6 Total Credits

- Complete 1 of the following
  - Thesis Option
  - Earn at least 6 credits from the following types of courses:
    XXX 6971 - Thesis (with the course prefix of CGN, CEG, CES, CWR or TTE) For those pursuing the thesis option, students must complete 6 credit hours of thesis and successfully defend the thesis. The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
  - Nonthesis Option
  - Complete all of the following
    - Earn at least 6 credits from the following types of courses:
      - Nonthesis students must complete at least 6 additional credit hours of electives from the lists above or other courses as approved by the student's adviser. Please note that at least one course in the nonthesis program of study must be one of the courses in the "Program Details" section below that has an asterisk, which denotes that this course provides an independent learning experience for the student.
      - Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of their portfolio of activities by the course Withdrawal date of the semester prior to their intended graduation. The portfolio requirements are listed on the CECE website.

Grand Total Credits: 30

Track Description

The Master of Science in Civil Engineering degree is designed for students who have an undergraduate degree in Civil Engineering or another closely related engineering degree. See undergraduate engineering major requirements in the Undergraduate Catalog. Graduate work and research in civil engineering reflect the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society.

The program allows highly qualified undergraduate majors in Civil Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program.

The Master of Science in Civil Engineering (MSCE), Accelerated BS to MSCE degree is designed for students who have an undergraduate degree in Civil Engineering or another closely related engineering degree. Graduate work and research in civil engineering reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society. The program includes course work in structural analysis and design, geotechnical engineering and foundations, transportation planning and operations, traffic engineering, construction engineering, and water resources engineering.

Faculty research interests include geotechnical studies of subsurface conditions, soil testing “superpave” mix design, intelligent transportation systems, traffic safety, structural dynamics, nonlinear structural analysis and software development, reinforced concrete, construction engineering, hydraulic modeling, coastal ocean modeling, stormwater management, and watershed management. Students completing the program find positions in consulting firms, construction, and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

The Civil Engineering MSCE program requires a minimum of 30 credit hours beyond the bachelor's degree, and both thesis and nonthesis options are available. The thesis option requires 24 credit hours of formal graduate-level course work and 6 credit hours of thesis. The nonthesis option requires 30 hours of formal course work and completion of a culminating experience. For nonthesis MS students, the culminating experience is submission of a portfolio that satisfies program requirements. It is strongly suggested that part-time students pursue the nonthesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A Bachelor of Science degree in civil engineering or another closely related engineering degree from UCF.

Application Requirements

The Accelerated BS to MSCE program allows highly qualified University of Central Florida undergraduate majors in Civil Engineering to begin taking graduate level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline but was not previously part of this accelerated program, then they should apply to the Civil Engineering MSCE.

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in civil engineering or another closely related engineering degree.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

Degree Requirements

Elective Courses (See Program Details For Groupings)
24 Total Credits

- Earn at least 24 credits from the following:
  - CEG6065 - Soil Dynamics (3)
  - CEG6115 - Foundation Engineering (3)
  - CEG6317 - Advanced Geotechnical Engineering (3)
  - CES5144 - Matrix Methods for Structural Analysis (3)
  - CES5325 - Bridge Engineering (3)
  - CES5606 - Advanced Steel Structures (3)
  - CES5706 - Advanced Reinforced Concrete (3)
  - CES5821 - Masonry and Timber Design (3)
  - CES6010 - Structural Reliability (3)
  - CES6116 - Finite Element Structural Analysis (3)
  - CES6209 - Dynamics of Structures (3)
  - CES6220 - Wind and Earthquake Engineering (3)
  - CES6230 - Advanced Structural Mechanics (3)
  - CES6527 - Nonlinear Structural Analysis (3)
  - CES6715 - Prestressed Concrete Structures (3)
  - Course Not Found
  - TTE5204 - Traffic Engineering (3)
  - TTE5805 - Geometric Design of Transportation Systems (3)
  - TTE5835 - Pavement Engineering (3)
  - TTE6205 - Highway Capacity (3)
  - TTE6256 - Traffic Operations (3)
  - TTE6270 - Intelligent Transportation Systems (3)
  - TTE6315 - Traffic Safety Analysis (3)
  - TTE6526 - Planning and Design of Airports (3)
  - TTE6625 - Mass Transportation Systems (3)
  - CGN6655 - Regional Planning, Design, and Development (3)
  - CWR5125 - Groundwater Hydrology (3)
  - CWR5205 - Hydraulic Engineering (3)
  - CWR5515 - Numerical Methods in Civil and Environmental Engineering (3)
  - CWR5545 - Water Resources Engineering (3)
  - CWR5634 - Water Resources in a Changing Environment (3)
  - CWR6102 - Advanced Hydrology (3)
  - CWR6126 - Groundwater Modeling (3)
  - CWR6235 - Open Channel Hydraulics (3)
  - CWR6236 - River Engineering and Sediment Transport (3)
  - CWR6535 - Modeling Water Resources Systems (3)
  - CCE5205 - Decision Support for Infrastructure Projects (3)
  - CCE5006 - Infrastructure Systems Management (3)
  - CCE5220 - Sustainable Infrastructure Systems (3)
  - CCE5937 - Special Topics (3)
  - CCE6036 - Advanced Construction Planning and Control (3)
  - CCE6211 - Design and Monitoring of Construction Processes (3)
  - CCE6045 - Cost Analysis of Sustainable Infrastructure Systems (3)

Non Thesis Students - Required Course Selection
0 Total Credits

- Nonthesis students must take at least one course where a research project is required (one course marked with an asterisk -

2021-2022 Graduate Catalog
See Program Details Section Below for asterisks).

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - XXX 6971 - Thesis (with the course prefix of CGN, CEG, CES, CWR or TTE) For those pursuing the thesis option, students must complete 6 credit hours of thesis and successfully defend the thesis. The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
  - Nonthesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following types of courses:
        - Nonthesis students must complete at least 6 additional credit hours of electives from the lists above or other courses as approved by the student's adviser. Please note that at least one course in the nonthesis program of study must be one of the courses in the "Program Details" section below that has an asterisk, which denotes that this course provides an independent learning experience for the student.
        - Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of their portfolio of activities by the course Withdrawal date of the semester prior to their intended graduation. The portfolio requirements are listed on the CECE website.

Grand Total Credits: 30

**Track Details**

Students must develop an individual plan of study with a faculty adviser by their second semester of study. At least one-half of the required credits must be taken at the 6000 level.

Research studies are required in one or more courses. The research study and report will focus on reviewing and analyzing contemporary research in a student's particular specialization within the profession in order to help students acquire knowledge and skills pertaining to research-based best practices in that specialization area. In addition, students may engage in directed independent studies, directed research or a research report during their studies. Courses with asterisks represent those with specific independent learning experiences, and all nonthesis students must choose at least one course with an asterisk.

**Geotechnical Engineering**

- CEG 6065 - Soil Dynamics 3 Credit Hours *
- CEG 6115 - Foundation Engineering 3 Credit Hours
- CEG 6317 - Advanced Geotechnical Engineering 3 Credit Hours

**Structural Engineering**

- CES 5144 - Matrix Methods for Structural Analysis 3 Credit Hours
- CES 5325 - Bridge Engineering 3 Credit Hours *
- CES 5606 - Advanced Steel Structures 3 Credit Hours
- CES 5706 - Advanced Reinforced Concrete 3 Credit Hours
- CES 5821 - Masonry and Timber Design 3 Credit Hours
- CES 6010 - Structural Reliability 3 Credit Hours
- CES 6116 - Finite Element Structural Analysis 3 Credit Hours
- CES 6209 - Dynamics of Structures 3 Credit Hours *
- CES 6220 - Wind and Earthquake Engineering 3 Credit Hours
- CES 6230 - Advanced Structural Mechanics 3 Credit Hours
- CES 6527 - Nonlinear Structural Analysis 3 Credit Hours
- CES 6715 - Prestressed Concrete Structures 3 Credit Hours *
- CES 6840 - Composite Steel Concrete Structures 3 Credit Hours *

**Transportation Engineering**

- TTE 5204 - Traffic Engineering 3 Credit Hours
- TTE 5805 - Geometric Design of Transportation Systems 3 Credit Hours
- TTE 5835 - Pavement Engineering 3 Credit Hours
- TTE 6205 - Highway Capacity 3 Credit Hours *
- TTE 6256 - Traffic Operations 3 Credit Hours
- TTE 6270 - Intelligent Transportation Systems 3 Credit Hours *
- TTE 6315 - Traffic Safety Analysis 3 Credit Hours *
- TTE 6526 - Planning and Design of Airports 3 Credit Hours
- TTE 6625 - Mass Transportation Systems 3 Credit Hours
- CGN 6655 - Regional Planning, Design, and Development 3 Credit Hours

**Water Resources Engineering**

- CWR 5125 - Groundwater Hydrology 3 Credit Hours
- CWR 5205 - Hydraulic Engineering 3 Credit Hours
- CWR 5515 - Numerical Methods in Civil and Environmental Engineering 3 Credit Hours

2021-2022 Graduate Catalog
CWR 5545 - Water Resources Engineering 3 Credit Hours
CWR 5634 - Water Resources in a Changing Environment 3 Credit Hours
CWR 6102 - Advanced Hydrology 3 Credit Hours *
CWR 6126 - Groundwater Modeling 3 Credit Hours *
CWR 6235 - Open Channel Hydraulics 3 Credit Hours
CWR 6236 - River Engineering and Sediment Transport 3 Credit Hours
CWR 6535 - Modeling Water Resources Systems 3 Credit Hours *

Construction Engineering and Management

CCE 5205 - Decision Support for Infrastructure Projects 3 Credit Hours
CCE 5006 - Infrastructure Systems Management 3 Credit Hours
CCE 5220 - Sustainable Infrastructure Systems 3 Credit Hours
CCE 5937 - Construction Contracts 3 Credit Hours
CCE 6036 - Advanced Construction Planning and Control 3 Credit Hours *
CCE 6211 - Design and Monitoring of Construction Processes 3 Credit Hours *
CCE 6045 - Cost Analysis of Sustainable Infrastructure Systems 3 Credit Hours

Equipment Fee
Students in the Civil Engineering MSCE program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning
A research or design project serves as the independent learning experience for thesis students. Nonthesis students are required to take at least one course where a research project is required and submit an end-of-program portfolio.

Financial Information
Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Civil Engineering MSCE - Civil Engineering MSCE, Construction Engineering Accelerated BS to MSCE Track

College
College of Engineering and Computer Science

Department
Department of Civil, Environmental, and Construction Engineering

Track Website
http://www.cece.ucf.edu/

Track Handbook
Civil Engineering MSCE
Is this track available 100% online?

Yes

UCF Online

Please Note: Civil Engineering MSCE, Construction Engineering Accelerated BS to MSCE may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Civil-Engineering-MSCE.pdf.

Track Description

The Master of Science in Civil Engineering, Construction Engineering Accelerated BS to MSCE track is designed for students who have an undergraduate degree in Civil Engineering or another closely related engineering degree. Graduate work and research in civil engineering reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society.

Graduate work and research in civil engineering reflect the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society. The program allows highly qualified undergraduate majors in Civil Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program.

The Master of Science in Civil Engineering (MSCE), Construction Engineering Accelerated BS to MSCE Track is designed for students who have an undergraduate degree in Civil Engineering or another closely related engineering degree. Graduate work and research in civil engineering reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society. The program includes course work in structural analysis and design, geotechnical engineering and foundations, transportation planning and operations, traffic engineering, construction engineering, and water resources engineering.

Faculty research interests include geotechnical studies of subsurface conditions, soil testing “superpave” mix design, intelligent transportation systems, traffic safety, structural dynamics, nonlinear structural analysis and software development, reinforced concrete, construction engineering, hydraulic modeling, coastal ocean modeling, stormwater management, and watershed management. Students completing the program find positions in consulting firms, construction, and construction-related industries, in city, county, state, and federal government agencies, and academic institutions.

The Civil Engineering MSCE, Construction Engineering Accelerated BS to MSCE Track program requires a minimum of 30 credit hours beyond the bachelor's degree, and both thesis and nonthesis options are available. The thesis option requires 24 credit hours of formal graduate-level course work and 6 credit hours of thesis. The nonthesis option requires 30 hours of formal course work and completion of a culminating experience. For nonthesis MS students, the culminating experience is submission of a portfolio that satisfies program requirements. It is strongly suggested that part-time students pursue the nonthesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A Bachelor of Science degree in civil engineering or another closely related engineering degree from UCF.

2021-2022 Graduate Catalog
Application Requirements

The Accelerated BS to MSCE track in Construction Engineering allows highly qualified University of Central Florida undergraduate majors in Civil Engineering to begin taking graduate level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline but was not previously part of this accelerated program, then they should apply to the Civil Engineering MSCE.

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in civil engineering or another closely related engineering degree.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Civil-Engineering-PhD.pdf

2021-2022 Graduate Catalog
**Program Description**

The Civil Engineering PhD program reflects the very broad nature of the field, which encompasses the design, construction, and enhancement of the infrastructure of society. The Civil Engineering PhD program includes courses and research in structural analysis and design, geotechnical engineering and foundations, transportation planning and operations, traffic engineering, construction engineering, water resources engineering, and smart cities. The degree will prepare students for roles in consulting firms, civil and construction-related industries, academic institutions, and city, county, state and federal government agencies.

Faculty research interests include subsurface conditions and soil testing, geotechnical materials, soil and structural dynamics, intelligent transportation systems, traffic safety, nonlinear structural analysis, reinforced concrete, structural health monitoring, sensors and data analytics for infrastructure, construction engineering, hydraulic modeling, coastal ocean modeling, stormwater management, and watershed management.

The PhD in Civil Engineering is a research-oriented degree that requires course work combined with intensive research. The program requires a minimum of 72 credit hours beyond the bachelor's degree. Thirty of the 72 credit hours can be met with either a nonthesis or thesis MS in Civil Engineering. This leaves 42 credit hours, of which 18 credit hours must be Dissertation Research and a minimum of 15 credit hours must be formal course work. A maximum of 9 credit hours of Doctoral Research hours can be used in the doctoral program, which could be replaced by additional formal course work.

For students not having an MS degree who directly enter the PhD program (BS to PhD), there will be a minimum of 45 hours formal course work (i.e., 30 credit hours identical to the course work for a nonthesis MS in any of the Civil Engineering focus areas plus a minimum of 15 credit hours course work past the MS). In addition, these students can enroll for Doctoral Research credit hours during or after their first semester in the program. The 27 credit hours required in addition to the 45 credit hours course work will be 18 credit hours in Dissertation Research, and a maximum of 9 credit hours in Doctoral Research. Up to 9 credit hours of Doctoral Research can be replaced by additional formal course work subject to the approval of the PhD adviser and the advisory committee.

For both MS to PhD and BS to PhD students, the program of study must be developed with an advisory committee and meet with departmental approval at the beginning of the PhD program, at which time transfer credit will be evaluated on a course-by-course basis.

**Total Credit Hours Required:** 72 Credit Hours Minimum beyond the Bachelor's Degree 42 Credit Hours Minimum beyond the Master's Degree

**Program Prerequisites**

Master's or bachelor's degree in Civil Engineering or a closely related discipline.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Master's or bachelor's degree in Civil Engineering or a closely related discipline.
- The GRE is not required for admission to this program.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting applicants into their research program.

Dissertation
18 Total Credits

- Earn at least 18 credits from the following types of courses:
  XXX 7980 (where XXX can be CGN, CCE, CEG, CES, CWR, or TTE; 18 credit hours)

Examinations
0 Total Credits

- The student must pass three examinations.

Qualifying Examination
0 Total Credits

- The first is the PhD Qualifying Examination in one of the departmental disciplines. This written examination must be taken within the first year of admission into the PhD program. It may be attempted no more than twice.

Candidacy Examination
0 Total Credits

- The student must pass a Candidacy Examination, normally taken near the end of the course work. It consists of a written and oral presentation of a research proposal, and may include additional written or oral questioning by the committee. A copy of the written examination will be kept as part of the student's official record.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours. Evidence that items have been completed must be received by the College of Graduate Studies on the Friday before the first day of classes for those who wish to enroll in dissertation hours in that semester: Completion of all but 6 hours or less of course work, except for dissertation hours. Successful completion of the candidacy examination. Successful defense of the written dissertation proposal. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Dissertation Defense Examination
0 Total Credits

- The Dissertation Defense Examination is an oral examination taken as defense of the written dissertation. The College of Engineering and Computer Science requires that all dissertation defense announcements be approved by the student's adviser and posted on the college's website and on the College of Graduate Studies Events Calendar at least two weeks before the defense date.

Grand Total Credits: 72

Program Details

Elective Courses
To be approved by a faculty adviser and the graduate coordinator.

At least 27 credit hours of formal course work is required, exclusive of research and independent study. For students entering the program with a completed master's degree, at least 15 of the 27 credit hours (exclusive of independent study and research) must be taken at UCF after the master's program from approved formal courses. For students entering the program without a master's degree in Civil Engineering or a closely related discipline, at least 45 credit hours of formal course work are required.

Doctoral Research (XXX 7919) - 9 credit hours maximum (more than 9 research credit hours can be taken, but only a maximum of 9 credit hours will be counted toward the program of study).

Independent Study (XXX 6908) - 3 credit hours maximum

No more than a total of 12 credit hours of doctoral research plus independent study will be included in a program of study.

Directed Research (XXX 6918) is not permitted in a PhD program of study.

Students can choose among the following courses with the consent of the academic adviser. Students that have no MS degree should complete the core courses for the MS degree in the respective focus area. These focus areas are: Structural and Geotechnical Engineering, Transportation Systems Engineering, Water Resources Engineering, and Smart Cities. For each one of these areas there is a suggested list of core courses.

Suggested elective courses include:

**Geotechnical Engineering**
- CEG 5405 - Seepage in Soils 3 Credit Hours
- CEG 6065 - Soil Dynamics 3 Credit Hours
- CEG 6115 - Foundation Engineering 3 Credit Hours
- CEG 6317 - Advanced Geotechnical Engineering 3 Credit Hours
- CEG 6515 - Retaining Structures and Slope Stability 3 Credit Hours
- CEG 6610 - Smart Underground Structures: Tunnels and Shafts 3 Credit Hours
- CES 6170 - Boundary Element Methods in Civil Engineering 3 Credit Hours
- CGN 5506 - Advanced Pavement and Civil Engineering Materials 3 Credit Hours
- TTE 5835 - Pavement Engineering 3 Credit Hours

**Structural Engineering**
- CES 5144 - Matrix Methods for Structural Analysis 3 Credit Hours
- CES 5325 - Bridge Engineering 3 Credit Hours
- CES 5606 - Advanced Steel Structures 3 Credit Hours
- CES 5706 - Advanced Reinforced Concrete 3 Credit Hours
- CES 5821 - Masonry and Timber Design 3 Credit Hours
- CES 6010 - Structural Reliability 3 Credit Hours
- CES 6116 - Finite Element Structural Analysis 3 Credit Hours
- CES 6209 - Dynamics of Structures 3 Credit Hours
- CES 6220 - Wind and Earthquake Engineering 3 Credit Hours
- CES 6230 - Advanced Structural Mechanics 3 Credit Hours
- CES 6527 - Nonlinear Structural Analysis 3 Credit Hours
- CES 6715 - Prestressed Concrete Structures 3 Credit Hours
- CES 6840 - Composite Steel Concrete Structures 3 Credit Hours

**Transportation Systems Engineering**
- CGN 6655 - Regional Planning, Design, and Development 3 Credit Hours
- ESI 5219 - Engineering Statistics 3 Credit Hours
- STA 5206 - Statistical Analysis 3 Credit Hours or
- TTE 5204 - Traffic Engineering 3 Credit Hours
- TTE 5805 - Geometric Design of Transportation Systems 3 Credit Hours
- TTE 5835 - Pavement Engineering 3 Credit Hours
- TTE 6205 - Highway Capacity 3 Credit Hours
- TTE 6256 - Traffic Operations 3 Credit Hours
- TTE 6270 - Intelligent Transportation Systems 3 Credit Hours
- TTE 6275 - Connected and Autonomous Vehicles 3 Credit Hours
- TTE 6315 - Traffic Safety Analysis 3 Credit Hours
- TTE 6526 - Planning and Design of Airports 3 Credit Hours
- TTE 6625 - Mass Transportation Systems 3 Credit Hours
- TTE 6667 - Discrete Choice Modeling in Transportation 3 Credit Hours

**Water Resources Engineering**
- CWR 5125 - Groundwater Hydrology 3 Credit Hours
- CWR 5205 - Hydraulic Engineering 3 Credit Hours
- CWR 5515 - Numerical Methods in Civil and Environmental Engineering 3 Credit Hours
- CWR 5545 - Water Resources Engineering 3 Credit Hours
- CWR 5634 - Water Resources in a Changing Environment 3 Credit Hours
- CWR 5935 - Water First Seminar Series 0 Credit Hours
- CWR 5999 - Coastal Systems Analysis 3 Credit Hours
- CWR 6007 - Ecohydraulics 3 Credit Hours
- CWR 6102 - Advanced Hydrology 3 Credit Hours

2021-2022 Graduate Catalog
CWR 6126 - Groundwater Modeling 3 Credit Hours
CWR 6235 - Open Channel Hydraulics 3 Credit Hours
CWR 6236 - River Engineering and Sediment Transport 3 Credit Hours
CWR 6535 - Modeling Water Resources Systems 3 Credit Hours
CWR 6539 - Finite Elements in Surface Water Modeling 3 Credit Hours
CWR 6606 - Stochastic River Network Hydro-Geomorphology 3 Credit Hours
CWR 6660 - Water Policy, Planning and Governance 3 Credit Hours

Construction Engineering and Management

Students are also allowed to take courses from other specialization areas. Students can take courses from Civil Engineering or Environmental Engineering and other departments, including but not limited to Statistics, Mathematics, and Industrial, Mechanical, and/or Electrical Engineering, and Computer Science, with the consent of the academic adviser.

- CCE 5006 - Infrastructure Systems Management 3 Credit Hours
- CCE 5205 - Decision Support for Infrastructure Projects 3 Credit Hours
- CCE 5220 - Sustainable Infrastructure Systems 3 Credit Hours
- CCE 6036 - Advanced Construction Planning and Control 3 Credit Hours
- CCE 6045 - Cost Analysis of Sustainable Infrastructure Systems 3 Credit Hours
- CCE 6211 - Design and Monitoring of Construction Processes 3 Credit Hours
- CCE 6817 - Dynamics of Sustainable Systems 3 Credit Hours

Smart Cities

- CCE 5220 - Sustainable Infrastructure Systems 3 Credit Hours
- CEG 6610 - Smart Underground Structures: Tunnels and Shafts 3 Credit Hours
- CES 6876 - Smart City Built Infrastructure 3 Credit Hours
- CGN 5340 - Internet of Things: Applications in Smart Cities 3 Credit Hours
- CGN 5341 - Interdisciplinary Introduction to Smart Cities’ Applications 3 Credit Hours
- CGN 5617 - Infrastructure Systems Optimization and Identification 3 Credit Hours
- CGN 6342 - Modeling Human Behavior with Emerging Data 3 Credit Hours
- CGN 6343 - Cyber-Physical Systems and Smart Cities 3 Credit Hours
- ENV 6128 - Smart Air Quality Monitoring and Air Pollution Control 3 Credit Hours
- ENV 6533 - Smart Water and Wastewater Management 3 Credit Hours
- STA 5703 - Data Mining Methodology 3 Credit Hours
- TTE 5531 - Active Mobility and Technologies: Synergy and Challenges 3 Credit Hours
- TTE 5532 - Policy Aspects of Smart City Transportation 3 Credit Hours
- TTE 6275 - Connected and Autonomous Vehicles 3 Credit Hours
- TTE 6533 - Mobility in Smart Cities: Technologies and Application Areas 3 Credit Hours
- TTE 6608 - Algorithms and Models for Smart Cities 3 Credit Hours

Equipment Fee

Students in the Civil Engineering PhD program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning

The Independent Learning Requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

No

Licensure Disclosure
This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Computer-Engineering-MS.pdf.

Program Description
The Computer Engineering MSCpE degree offers programs in a number of technical (research) areas, such as Computer Networks and Computer Security (CNCS), Computer Systems and VLSI Design (CS/VLSI), Intelligent Systems and Machine Learning (ISML), and Software Systems and Algorithms (SSA).

All programs offer a thesis option and a nonthesis option, as well as an Accelerated BS to MS program. Please scroll to the bottom of this page for further details on the Accelerated Track.

Students in the program receive a broad background in the various technical areas while specializing in a research area of their interest.

The specific research areas that each one of the EE faculty focuses on can be found at the Department of Electrical Engineering website (www.ece.ucf.edu/).

The master's program offers both thesis and nonthesis options in four technical specialization areas. The thesis option requires 30 credit hours of courses that includes 24 credit hours of formal coursework, exclusive of thesis and research, plus 6 credit hours of thesis. The nonthesis option requires 30 credit hours of coursework with at least 24 credit hours of formal coursework and a possibility of 6 credit hours of Independent Study (XXX 6908) based on the availability of interested faculty.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree
Program Prerequisites

A bachelor's degree in computer engineering or a closely related discipline.

Articulation Courses

Undergraduate articulation courses are required for students with bachelor's degrees in fields other than Computer Engineering. In general, all students must have completed the following undergraduate courses (or their equivalents in an accredited BSCpE program) before admission to our graduate program. Students who have taken these courses must complete the articulation courses listed below, plus all prerequisites, that they require. Grades of "B" or higher must be obtained in each articulation course. Articulation courses are not eligible for inclusion on a student's Graduate Program of Study.

- EEE 3342C: Digital Systems
- EEL 3801: Computer Organization
- COP 3502: Computer Science I
- COP 3503: Computer Science II

Plus choose ONE of the following:

- COP 4331: Processes for Object-Oriented Development
- EEL 4768C: Computer Architecture
- EEL 4781: Computer Communications Networks

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in computer engineering or a closely related discipline.
- The GRE is not required for admission to this program.
- Two letters of recommendation.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting applicants into their research program. Additional courses may also be required to correct any course deficiencies. Students should contact the graduate program director for further information.

Application Deadlines Notes

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.
Elective Courses
24 Total Credits

- There are no required courses within a specialization area. However, all students (thesis and nonthesis) must choose at least 24 credit hours of formal courses, excluding research-related courses and independent study (XXX 6908), which emphasize their specialization area. Courses from outside specialization areas could also be chosen if the student's adviser approves such a Program of Study. The Program of Study (POS) form must be approved by an adviser in the selected specialization area no later than the end of the second semester after admission. The program of study must meet all the university requirements specified in the graduate catalog and must also receive departmental-level and college-level approval.

Specialization Areas
24 Total Credits

- Complete 1 of the following
  - The Computer Engineering Program supports a number of specialization areas. These specialization areas are (in alphabetical order): Computer Networks and Computer Security (CNCS), Computer Systems and VLSI Design (CS/VLSI), Intelligent Systems and Machine Learning (ISML), and Software Systems and Algorithms (SSA). In each one of these areas there is a suggested list of courses. Students are also allowed to take courses from the suggested list of courses in areas other than their specialization area, but the majority of their courses should be chosen from courses in their specialization area.
  - Computer Networks and Computer Security (CNCS)
    - Earn at least 24 credits from the following:
      - CDA5106 - Advanced Computer Architecture (3)
      - CDA5110 - Parallel Architecture and Algorithms (3)
      - CDA6530 - Performance Models of Computers and Networks (3)
      - CGS5131 - Computer Forensics I: Seizure and Examination of Computer Systems (3)
      - CNT5008 - Computer Communication Networks Architecture (3)
      - CNT6418 - Computer Forensics II (3)
      - CNT6519 - Wireless Security and Forensics (3)
      - CNT6707 - Advanced Computer Networks (3)
      - COP5537 - Network Optimization (3)
      - COP5611 - Operating Systems Design Principles (3)
      - CAP6133 - Advanced Topics in Computer Security and Computer Forensics (3)
      - CAP6135 - Malware and Software Vulnerability Analysis (3)
      - COT5405 - Design and Analysis of Algorithms (3)
      - EEE5542 - Random Processes I (3)
      - EEL5780 - Wireless Networks (3)
      - EEL6762 - Performance Analysis of Computer and Communication Systems (3)
      - EEL6785 - Computer Network Design (3)
      - EEL6788 - Advanced Topics in Computer Networks (3)
      - EEL6883 - Software Engineering II (3)
  - Computer Systems and Very Large Scale Integration (CS/VLSI)
    - Earn at least 24 credits from the following:
      - CDA5106 - Advanced Computer Architecture (3)
      - CDA5110 - Parallel Architecture and Algorithms (3)
      - CDA6107 - Parallel Computer Architecture (3)
      - CDA6938 - Special Topics (3)
      - COP5537 - Network Optimization (3)
      - EEE5390C - Full-Custom VLSI Design (3)
      - EEL5722C - Field-Programmable Gate Array (FPGA) Design (3)
Intelligent Systems and Machine Learning (ISML)

- Earn at least 24 credits from the following:
  - CAP5055 - AI for Game Programming (3)
  - CAP5512 - Evolutionary Computation (3)
  - CAP5610 - Machine Learning (3)
  - CAP5636 - Advanced Artificial Intelligence (3)
  - CAP6545 - Machine Learning Methods for Biomedical Data (3)
  - CAP6616 - Neuroevolution and Generative and Developmental Systems (3)
  - CAP6640 - Computer Understanding of Natural Language (3)
  - CAP6671 - Intelligent Systems: Robots, Agents, and Humans (3)
  - CAP6675 - Complex Adaptive Systems (3)
  - CAP6676 - Knowledge Representation (3)
  - EEL5825 - Pattern Recognition and Learning from Big Data (3)
  - EEL5874 - Expert Systems and Knowledge Engineering (3)
  - EEL6812 - Introduction to Neural Networks (3)
  - EEL6875 - Autonomous Agents (3)
  - EEL6878 - Modeling and Artificial Intelligence (3)

Software Systems and Algorithms (SSA)

- Earn at least 24 credits from the following:
  - CAP6515 - Algorithms in Computational Biology (3)
  - CGS5131 - Computer Forensics I: Seizure and Examination of Computer Systems (3)
  - CNT6418 - Computer Forensics II (3)
  - CAP5510 - Bioinformatics (3)
  - CAP6133 - Advanced Topics in Computer Security and Computer Forensics (3)
  - CAP6545 - Machine Learning Methods for Biomedical Data (3)
  - CEN5016 - Software Engineering (3)
  - CEN6075 - Formal Specification of Software Systems (3)
  - COP5021 - Program Analysis (3)
  - COP5711 - Parallel and Distributed Database Systems (3)
  - COP6730 - Transaction Processing (3)
  - COP6731 - Advanced Database Systems (3)
  - COT5405 - Design and Analysis of Algorithms (3)
  - COT6410 - Computational Complexity (3)
  - COT6417 - Algorithms on Strings and Sequences (3)
  - COT5600 - Quantum Computing (3)
  - COT6602 - Introduction to Quantum Information Theory (3)
  - EEL6883 - Software Engineering II (3)

Thesis/Nonthesis Option

6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - EEL 6971 Thesis The thesis option requires 24 credit hours of formal coursework in one of the specialization areas and the completion of 6 credit hours of thesis. Additional requirements are as follows: - Courses must be chosen from the suggested list of courses for the student's chosen specialization area - No more than 6 credits of thesis (XXX 6971) will be counted toward the degree requirement - Fifteen credit hours (including EEL 6971 Thesis) must be 6000-level courses - Thesis students who are full time must continue to enroll in three credit hours of thesis coursework each semester until the thesis requirement is satisfied, even if they take more than the required 6 credit hours of thesis. However, only 6 credit hours of thesis will count toward the degree requirement. The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
      - Nonthesis Option
    - Earn at least 6 credits from the following types of courses:
      - Additional Electives from the list above. The nonthesis option is especially suitable for part-time students. Nonthesis students must complete 6 credit hours of electives in addition to the 24 credit hours of formal coursework described above. If desired by the student and approved by the student's adviser a total of 6 credit hours can be Independent Study (XXX 6908).

Portfolio Requirement

0 Total Credits

- Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of their portfolio of activities by the course Withdrawal Date of the semester prior to their intended graduation. The portfolio requirements are listed on the EECS website at www.eecs.ucf.edu.

Grand Total Credits: 30
Program Details

Transfer Credits

Graduate students with a bachelor's degree in Computer Engineering from UCF may transfer up to 9 credit hours of 5000-level or higher coursework, with grades of "B" or higher, toward the MSCpE degree. Alternatively, a maximum of 9 credit hours may be transferred of graduate work conducted elsewhere from an accredited institution.

Equipment Fee

Students in the Computer Engineering MSCpE program pay a $28 equipment fee each semester that they are enrolled. Part-time students pay $14 per semester.

Independent Learning

The independent learning requirement is met by successful completion of a master's thesis or an approved portfolio of activities for nonthesis students.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

- EEL 4781: Computer Communications Networks

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in computer engineering or a closely related discipline. This track is available to University of Central Florida undergraduates.
- The GRE is not required for admission to this program.
- Two letters of recommendation.
- Résumé.
- Statement of educational, research, and professional career objectives.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting applicants into their research program.

Additional courses may also be required to correct any course deficiencies. Students should contact the graduate program director for further information.

Application Deadlines Notes

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.
There are no required courses within a specialization area. However, all students (thesis and non-thesis) must choose at least 24 credit hours of formal courses, excluding research-related courses and independent study (XXX 6908), which emphasize their specialization area. Courses from outside specialization areas could also be chosen if the student's advisor approves such a Program of Study. The Program of Study (POS) form must be approved by an advisor in the selected specialization area no later than the end of the second semester after admission. The program of study must meet all the university requirements specified in the graduate catalog and must also receive departmental-level and college-level approval.

Specialization Areas
24 Total Credits

- Complete 1 of the following

  - The Computer Engineering Program supports a number of specialization areas. These specialization areas are (in alphabetical order): Computer Networks and Computer Security (CNCS), Computer Systems and VLSI Design (CS/VLSI), Intelligent Systems and Machine Learning (ISML), and Software Systems and Algorithms (SSA). In each one of these areas there is a suggested list of courses. Students are also allowed to take courses from the suggested list of courses in areas other than their specialization area, but the majority of their courses should be chosen from courses in their specialization area.

  - Computer Networks and Computer Security (CNCS)

  - Earn at least 24 credits from the following:

    - CDA5106 - Advanced Computer Architecture (3)
    - CDA5110 - Parallel Architecture and Algorithms (3)
    - CDA6530 - Performance Models of Computers and Networks (3)
    - CGS5131 - Computer Forensics I: Seizure and Examination of Computer Systems (3)
    - CNT5008 - Computer Communication Networks Architecture (3)
    - CNT6418 - Computer Forensics II (3)
    - CNT6519 - Wireless Security and Forensics (3)
    - CNT6707 - Advanced Computer Networks (3)
    - COP5537 - Network Optimization (3)
    - COT5405 - Design and Analysis of Algorithms (3)
    - EEE5542 - Random Processes I (3)
    - EEL5780 - Wireless Networks (3)
    - EEL6762 - Performance Analysis of Computer and Communication Systems (3)
    - EEL6785 - Computer Network Design (3)
    - EEL6788 - Advanced Topics in Computer Networks (3)
    - EEL6883 - Software Engineering II (3)

  - Computer Systems and Very Large Scale Integration (CS/VLSI)

  - Earn at least 24 credits from the following:

    - CDA5106 - Advanced Computer Architecture (3)
    - CDA5110 - Parallel Architecture and Algorithms (3)
    - CDA6107 - Parallel Computer Architecture (3)
    - CDA6938 - Special Topics (3)
    - COP5537 - Network Optimization (3)
    - EEE5390C - Full-Custom VLSI Design (3)
    - EEL5722C - Field-Programmable Gate Array (FPGA) Design (3)
- EEL6762 - Performance Analysis of Computer and Communication Systems (3)
- EEE6327 - Design of Video Coding Systems (3)
- ECM6308 - Current Topics in Parallel Processing (3)

Intelligent Systems and Machine Learning (ISML)
- Earn at least 24 credits from the following:
  - CAP5055 - AI for Game Programming (3)
  - CAP5512 - Evolutionary Computation (3)
  - CAP5610 - Machine Learning (3)
  - CAP5636 - Advanced Artificial Intelligence (3)
  - CAP6545 - Machine Learning Methods for Biomedical Data (3)
  - CAP6616 - Neuroevolution and Generative and Developmental Systems (3)
  - CAP6640 - Computer Understanding of Natural Language (3)
  - CAP6671 - Intelligent Systems: Robots, Agents, and Humans (3)
  - CAP6675 - Complex Adaptive Systems (3)
  - CAP6676 - Knowledge Representation (3)
  - EEL5825 - Pattern Recognition and Learning from Big Data (3)
  - EEL5874 - Expert Systems and Knowledge Engineering (3)
  - EEL6812 - Introduction to Neural Networks (3)
  - EEL6875 - Autonomous Agents (3)
  - EEL6878 - Modeling and Artificial Intelligence (3)

Software Systems and Algorithms (SSA)
- Earn at least 24 credits from the following:
  - CAP6515 - Algorithms in Computational Biology (3)
  - CGS5131 - Computer Forensics I: Seizure and Examination of Computer Systems (3)
  - CNT6418 - Computer Forensics II (3)
  - CAP5510 - Bioinformatics (3)
  - CAP6133 - Advanced Topics in Computer Security and Computer Forensics (3)
  - CAP6545 - Machine Learning Methods for Biomedical Data (3)
  - CEN5016 - Software Engineering (3)
  - CEN6075 - Formal Specification of Software Systems (3)
  - COP5021 - Program Analysis (3)
  - COP5711 - Parallel and Distributed Database Systems (3)
  - COP6730 - Transaction Processing (3)
  - COP6731 - Advanced Database Systems (3)
  - COT5405 - Design and Analysis of Algorithms (3)
  - COT6410 - Computational Complexity (3)
  - COT6417 - Algorithms on Strings and Sequences (3)
  - COT5600 - Quantum Computing (3)
  - COT6602 - Introduction to Quantum Information Theory (3)
  - EEL6883 - Software Engineering II (3)

Thesis/Nonthesis Option
6 Total Credits
- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - EEL 6971 Thesis The thesis option requires 24 credit hours of formal coursework in one of the specialization areas and the completion of 6 credit hours of thesis. Additional requirements are as follows: - Courses must be chosen from the suggested list of courses for the student's chosen specialization area - No more than 6 credits of thesis (XXX 6971) will be counted toward the degree requirement - Fifteen credit hours (including EEL 6971 Thesis) must be 6000-level courses - Thesis students who are full time must continue to enroll in three credit hours of thesis coursework each semester until the thesis requirement is satisfied, even if they take more than the required 6 credit hours of thesis. However, only 6 credit hours of thesis will count toward the degree requirement. The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
    - Nonthesis Option
      - Earn at least 6 credits from the following types of courses:
        - Additional Electives from the list above. The nonthesis option is especially suitable for part-time students. Nonthesis students must complete 6 credit hours of electives in addition to the 24 credit hours of formal coursework described above. If desired by the student and approved by the student's adviser a total of 6 credit hours can be Independent Study (XXX 6908).

Portfolio Requirement
0 Total Credits
- Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of their portfolio of activities by the course Withdrawal Date of the semester prior to their intended graduation. The portfolio requirements are listed on the EECS website at www.eecs.ucf.edu.

Grand Total Credits: 30
**Track Details**

The master's program offers both thesis and nonthesis options in four technical specialization areas. The thesis option requires 30 credit hours of courses that includes 24 credit hours of formal coursework, exclusive of thesis and research, plus 6 credit hours of thesis. The nontesis option requires 30 credit hours of coursework with at least 24 credit hours of formal coursework and a possibility of 6 credit hours of Independent Study (XXX 6908) based on the availability of interested faculty.

**Transfer Credits**

Graduate students with a bachelor's degree in Computer Engineering from UCF may transfer up to 9 credit hours of 5000-level or higher coursework, with grades of "B" or higher, toward the MSCpE degree. Alternatively, a maximum of 9 credit hours may be transferred of graduate work conducted elsewhere from an accredited institution.

**Equipment Fee**

Students in the Computer Engineering MSCpE program pay a $28 equipment fee each semester that they are enrolled. Part-time students pay $14 per semester.

**Independent Learning**

The independent learning requirement is met by successful completion of a master's thesis or an approved portfolio of activities for nontesis students.

**Financial Information**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**UCF Student Financial Assistance**

2021-2022 Graduate Catalog
Is this program available 100% online?

No

Program Description

The Computer Engineering PhD prepares students for careers in research or academia with a potential focus in computer systems and VLSI design, software engineering and algorithms, intelligent systems and Machine Learning, computer networks and computer security, as well as simulation systems.

The doctoral program in Computer Engineering is primarily intended for students with a master's degree in Computer Engineering or a closely related discipline wishing to pursue a career in research or academia. Specializations include computer systems and VLSI design, software engineering and algorithms, intelligent systems and Machine Learning, computer networks and computer security and simulation systems.

Research interests of the Computer Engineering faculty include computer architecture, software engineering, artificial intelligence, expert systems, modeling and simulation, computer networking and ubiquitous computing, computer security, and very large-scale integration (VLSI) systems.

The specific research that each one of the EECS faculty conduct can be found at the School of EECS website (www.eecs.ucf.edu).

The Computer Engineering PhD degree requires a minimum of 72 credit hours beyond the bachelor's degree. Of these 72 hours, a minimum of 36 credit hours must be formal coursework, exclusive of independent study coursework. A minimum of 15 credit hours with up to a maximum of 24 credit hours of dissertation hours can be credited toward the degree. No more than 12 credit hours of Independent Study are allowed. The remaining hours can be a combination of formal coursework and/or pre-candidacy doctoral research. Details about this program can be found in the Computer Engineering PhD Handbook, linked in the Program Handbook Section of this page.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Master's or bachelor's degree in Computer Engineering or a closely related discipline.

Articulation Courses

Undergraduate articulation courses are required to be completed prior to admission for students who do not hold a Bachelor of Science degree in Computer Engineering. In particular, the articulation courses specified below, plus all of the prerequisite string which any of them require, must be completed prior to admission. Grades of "B" or higher must be obtained in each articulation course specified below. Articulation courses are not eligible for inclusion on a graduate Program of Study.

- EEE 3342C Digital Systems
- EEL 3801 Computer Organization
- COP 3502 Computer Science I
- COP 3503 Computer Science II

In addition, choose one of the following:

- COP 4331 Processes for Object-Oriented Development
- EEL 4768C Computer Architecture
- EEL 4781 Computer Communications Networks

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Master's or bachelor's degree in Computer Engineering or a closely related discipline.
- Résumé
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may also be required to correct any course deficiencies. Students should contact the graduate program director for further information.

Degree Requirements

Required Courses  
36 Total Credits

- Complete 1 of the following
  - The Computer Engineering Program supports a number of specialization areas. These specialization areas are (in alphabetical order): Computer Networks and Computer Security (CNCS), Computer Systems and Reconfigurable Hardware (CS/RH), Intelligent Systems and Machine Learning (ISML), and Software Systems and Algorithms (SSA). Please contact your graduate program assistant at 407-823-0378 for a list of faculty within each specialization area. For each one of these areas there is a suggested list of courses stated below. Students are also allowed to take courses from other specialization areas, but the majority of their courses should be chosen from courses in their specialization area.
  - Computer Networks and Computer Security (CNCS)
    - Earn at least 36 credits from the following:
      - CDA5106 - Advanced Computer Architecture (3)
      - CDA5110 - Parallel Architecture and Algorithms (3)
      - CDA6530 - Performance Models of Computers and Networks (3)
      - CDA6938 - Special Topics (3)
      - CGS5131 - Computer Forensics I: Seizure and Examination of Computer Systems (3)
      - CNT5008 - Computer Communication Networks Architecture (3)
      - CNT6418 - Computer Forensics II (3)
      - CNT6519 - Wireless Security and Forensics (3)
      - CNT6707 - Advanced Computer Networks (3)
      - COP5537 - Network Optimization (3)
      - COP5611 - Operating Systems Design Principles (3)
      - CAP6133 - Advanced Topics in Computer Security and Computer Forensics (3)
      - CAP6135 - Malware and Software Vulnerability Analysis (3)
      - COT5405 - Design and Analysis of Algorithms (3)
      - EEE5542 - Random Processes I (3)
      - EEL5780 - Wireless Networks (3)
      - EEL6762 - Performance Analysis of Computer and Communication Systems (3)
      - EEL6785 - Computer Network Design (3)
      - EEL6788 - Advanced Topics in Computer Networks (3)
      - EEL6883 - Software Engineering II (3)
  - Computer Systems and Reconfigurable Hardware (CS/RH)
    - Earn at least 36 credits from the following:
      - CDA5106 - Advanced Computer Architecture (3)
- CDAS110 - Parallel Architecture and Algorithms (3)
- CDAS6107 - Parallel Computer Architecture (3)
- CDAS6938 - Special Topics (3)
- COP5537 - Network Optimization (3)
- EEE5390C - Full-Custom VLSI Design (3)
- EEL5722C - Field-Programmable Gate Array (FPGA) Design (3)
- EEL6762 - Performance Analysis of Computer and Communication Systems (3)
- ECM6308 - Current Topics in Parallel Processing (3)

**Intelligent Systems and Machine Learning (ISML)**
- Earn at least 36 credits from the following:
  - CAP5055 - AI for Game Programming (3)
  - CAP5512 - Evolutionary Computation (3)
  - CAP5610 - Machine Learning (3)
  - CAP5636 - Advanced Artificial Intelligence (3)
  - CAP6545 - Machine Learning Methods for Biomedical Data (3)
  - CAP6616 - Neuroevolution and Generative and Developmental Systems (3)
  - CAP6640 - Computer Understanding of Natural Language (3)
  - CAP6671 - Intelligent Systems: Robots, Agents, and Humans (3)
  - CAP6675 - Autonomous Agents (3)
  - CAP6677 - Complex Adaptive Systems (3)
  - CAP6678 - Modeling and Artificial Intelligence (3)

**Software Systems and Algorithms (SSA)**
- Earn at least 36 credits from the following:
  - CAP6515 - Algorithms in Computational Biology (3)
  - CGS5131 - Computer Forensics I: Seizure and Examination of Computer Systems (3)
  - CNT6418 - Computer Forensics II (3)
  - CAP5510 - Bioinformatics (3)
  - CAP6133 - Advanced Topics in Computer Security and Computer Forensics (3)
  - CAP6545 - Machine Learning Methods for Biomedical Data (3)
  - CEN5016 - Software Engineering (3)
  - CEN6075 - Formal Specification of Software Systems (3)
  - COP5021 - Program Analysis (3)
  - COP5711 - Parallel and Distributed Database Systems (3)
  - COP6730 - Transaction Processing (3)
  - COP6731 - Advanced Database Systems (3)
  - COT5405 - Design and Analysis of Algorithms (3)
  - COT6410 - Computational Complexity (3)
  - COT6417 - Algorithms on Strings and Sequences (3)
  - COT5600 - Quantum Computing (3)
  - COT6602 - Introduction to Quantum Information Theory (3)
  - EEL6883 - Software Engineering II (3)

**Elective Courses**

**21 Total Credits**
- Earn at least 21 credits from the following types of courses:
  - Additional elective courses listed above. May include formal coursework, directed research hours, doctoral research hours, dissertation research, and no more than 12 credit hours of Independent Study.

**Dissertation**

**15 Total Credits**
- Earn at least 15 credits from the following types of courses:
  - XXX 7980 Dissertation Research (15 credit hours minimum). The program will only allow students to complete up to 24 hours of dissertation coursework in XXX 7980. The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website at least two weeks before the defense date.

**Qualifying Review**

**0 Total Credits**
- The Qualifying Review relies on annual appraisals of the student's progress conducted by the student's research/academic adviser and advisory committee, once formed. The student's appraisal template that the adviser completes will assess the student's academic performance (course performance) and research performance. On an annual basis, and based on the completed PhD Student Annual Review template, as well as additional student documentation attached with approval of the adviser, the EECS Graduate Committee will rate the student's performance as "Above Expectation," "At Expectation," or "Below Expectation" toward the completion of the PhD degree. Students must pass the Qualifying Review no later than the deadline, which is the semester in which they complete 24 credit hours after admission or within two calendar years after admission, whichever occurs later. If a student has passed the Qualifying Review, then the student is eligible to continue PhD.
studies. However, a student who does not pass the Qualifying Review by the deadline will be dismissed from the degree program and will be given the opportunity to complete a master’s degree (if applicable).

Dissertation Committee

0 Total Credits

- PhD dissertation committees for this degree program must have all of the below characteristics: - consist of at least five committee members including the committee chair - the committee chair must be either a Regular Appointment faculty member in EECS or a Secondary-Joint Appointment faculty member in EECS - at least 50% of committee members (when tabulated including the chair) must be EECS regular faculty - the majority of committee members must vote in favor of passing for the student to Pass - in addition to the above, all college and university requirements (such as one member outside of EECS) must be met. Joint faculty members may serve as committee chairs, but graduate faculty scholars may not serve as committee chairs.

Candidacy Examination

0 Total Credits

- After passing the Qualifying Review, students are required to successfully complete the candidacy examination in order to demonstrate readiness for preliminary research in a chosen field of study. This exam is administered by the student's dissertation advisory committee. Preparedness for taking the candidacy examination requires that the student must demonstrate his/her readiness for the PhD program in Computer Engineering by authoring an accepted journal article or high-quality conference paper. The student must be the first author on this paper and the research advisor must also be an author on this paper to be used for Candidacy. The publication should reflect the work related to the student’s PhD research. Candidacy is normally attempted at the completion of required coursework and must be passed before registering for doctoral dissertation hours (EEL 7980). Continuous enrollment in at least 3 hours of doctoral dissertation hours is required once a student starts taking dissertation credits.

Admission to Candidacy

0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours. - Completion of all required formal coursework, except for dissertation hours. - Successful completion of the candidacy examination. - The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. - Submittal of an approved program of study. Signed and well-formed Doctoral Committee Candidacy Status form and associated paperwork must be submitted to the Electrical and Computer Engineering Graduate Office for processing on or before the last day to defend Dissertation during the semester prior to enrolling in dissertation credits.

Dissertation Proposal Exam

0 Total Credits

- After passing the candidacy examination, the student will write a dissertation proposal and present it to the dissertation advisory committee for approval. The proposal must include a description of the research performed to date and the research planned to be completed for the dissertation. The presentation of a written dissertation proposal must be deemed as passing requirements by the majority of the dissertation committee.

Grand Total Credits: 72

Program Details

Formal coursework required is 36 credit hours, exclusive of independent study and research. A minimum of 15 credit hours of dissertation are required. All other credit hours will be determined with a faculty adviser. Students admitted with an earned master’s degree may request to have up to 30 of those credit hours counted toward their doctoral program. The student's doctoral adviser in conjunction with the graduate office will determine the precise number of hours to be counted subject to Graduate Studies regulations.

The Program of Study (POS) form must be approved by an adviser in the selected specialization area no later than the end of the second semester after admission. The program of study must meet all the university requirements specified in the graduate catalog.

Equipment Fee

Students in the Computer Engineering PhD program pay a $28 equipment fee each semester that they are enrolled. Part-time students pay $14 per semester.

Independent Learning

The Independent Learning requirement is met by successful completion of the student's candidacy and dissertation defense examinations.
Financial Information
Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Program Description
The Graduate Certificate in Computer Forensics provides a unique graduate training opportunity for those who deal directly or indirectly with digital evidence.

The National Center for Forensic Science (NCFS), the School of Electrical Engineering and Computer Science, and the Department of Chemistry jointly sponsor an interdisciplinary Graduate Certificate in Computer Forensics. This web-assisted certificate program provides a unique opportunity for graduate training to professionals and paraprofessionals who deal directly or indirectly with digital evidence, including law enforcement investigators, forensic laboratory analysts, lawyers and judges, and corporate computer security specialists. In addition, the Interdisciplinary Studies Program offers a Master of Science degree in Interdisciplinary Studies with a concentration in Computer Forensics, and the recently approved Master of Science degree in Digital Forensics provides further graduate work in digital forensics.

This certificate has 1 track: Computer Forensics, Out of State Cohort Track Graduate Certificate. Please scroll to the bottom of this page for further details on this track.

The Computer Forensics certificate requires four graduate courses (12 credit hours) in forensics study.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree
Application Requirements

Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Admission to the program is competitive on a space-available basis. Final admission is based on evaluation of the applicant's abilities, past performance and the applicant's potential for completing the certificate. Students interested in the Out of State Cohort/Track, must contact the program director, Sheau-Dong Lang, PhD, prior to applying.

HEC 243

**Is this track available 100% online?**  
No

**Track Description**

This program track has been temporarily suspended effective Fall 2016.

The Graduate Certificate in Computer Forensics provides a unique graduate training opportunity for those who deal directly or indirectly with digital evidence.

The National Center for Forensic Science (NCFS), the School of Electrical Engineering and Computer Science, and the Department of Chemistry jointly sponsor an interdisciplinary Graduate Certificate in Computer Forensics. This out-of-state cohort track provides online training to professionals and paraprofessionals who deal directly or indirectly with digital evidence, including law enforcement investigators, forensic laboratory analysts, lawyers and judges, and corporate computer security specialists. Students in the out-of-state cohort program pay less than half of the regular out-of-state tuition.

The Computer Forensics certificate requires four graduate courses (12 credit hours) in forensics study.

**Total Credit Hours Required: 15 Credit Hours Minimum beyond the Bachelor's Degree**

**Application Requirements**

Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Admission to the program is competitive on a space-available basis. Final admission is based on evaluation of the applicant's abilities, past performance and the applicant's potential for completing the certificate. Students interested in the Out of State Cohort/Track, must contact the program director, Sheau-Dong Lang, PhD, prior to applying.

Degree Requirements

Required Courses
12 Total Credits

- Complete at least 4 of the following:
  - CHS5504 - Topics in Forensic Science (3)
  - CHS5518 - The Forensic Collection and Examination of Digital Evidence (3)
  - CHS5596 - The Forensic Expert in the Courtroom (3)
  - CGS5131 - Computer Forensics I: Seizure and Examination of Computer Systems (3)
  - CNT6418 - Computer Forensics II (3)

Elective Courses
3 Total Credits

- Complete at least 1 of the following:
  - CIS6207 - The Practice of Digital Forensics (3)
  - CAP6133 - Advanced Topics in Computer Security and Computer Forensics (3)

Grand Total Credits: 15

Program Description

The Master of Science in Computer Science program produces graduates with a high level of competency in understanding, applying, and enunciating the modern concepts, principles, methods, and theories necessary for the design and implementation of computing systems.

The Master of Science in Computer Science program provides students with an in-depth education geared toward meeting the needs of business and industry in Florida and throughout the United States. The program's goal is to produce graduates with a high level of competency in understanding, applying, and enunciating the modern concepts, principles, methods, and theories necessary for the design and implementation of computing systems.

Students in the program receive a broad background in the areas of programming systems and languages, computer architecture, and computer science theory while specializing in a research area. Research interests of the computer science faculty include affective computing, applied perception, bioinformatics, computational biology, computational geometry, computer and network security, computer architecture, computer forensics, computer graphics, computer networks, image processing, computer vision, cryptography, data compression, database management systems, data mining, design and analysis of algorithms, evolutionary computation, genetic algorithms, graph theory, hardware/software co-design, machine learning, mixed and virtual reality, mobile computing, modeling and simulation, multimedia systems, natural language processing, neural networks, parallel and distributed processing, performance evaluation, programming languages, quantum computing, semantic web, software agents, software engineering, and VLSI systems. The program has a long and respected history, having conferred MS degrees since 1968.

Students successfully completing this program will have exhibited breadth as well as depth of capability involving both theoretical aspects of computer science and practical considerations of computing.

This degree has 1 track: Accelerated BS to MS Track. Please scroll to the bottom of this page for further details on this Track.

The Computer Science MS program offers both a thesis and nonthesis option with each option requiring a minimum of 30 credit hours beyond the bachelor's degree. At least half of these hours must be at the 6000-level. Both options require 12 credit hours of required core courses and thesis students must take 12 credit hours of electives and a minimum of 6 credit hours of thesis. Nonthesis students must take 18 credit hours of electives and complete a culminating experience as determined by the program's graduate committee.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

An undergraduate degree in Computer Science is desirable but not required. Applicants without a strong undergraduate background in Computer Science must demonstrate an understanding of the material covered in the following upper-division undergraduate courses:

- EEL 4768C Computer Architecture
- COP 4020 Programming Languages I
- COP 4600 Operating Systems
- COT 4210 Discrete Computational Structures

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Resume
- 2 Letters of recommendation

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

All application materials must be submitted by the appropriate deadline listed below.

Degree Requirements

Required Courses
12 Total Credits

- Complete all of the following
  - Complete the following:
    - CDA5106 - Advanced Computer Architecture (3)
    - COT5405 - Design and Analysis of Algorithms (3)
  - Both CDA 5106 and COT 5405 must be completed with a B or better. Students earning a B- or below will have to repeat the course(s) until they earn a B or better.

Research Pair
6 Total Credits

- Earn at least 6 credits from the following types of courses:
  - Any approved pair of Computer Science courses from a single research area that includes at least one 6000-level course (See Program Details below for Examples of Approved Pairs)

Elective Courses
12 Total Credits

- Earn at least 12 credits from the following types of courses:
  - All students, both thesis and nonthesis, are required to complete 12 credit hours of electives that are selected after consultation with the student's adviser.

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - XXX 6971 Thesis (prefix determined by disciplinary area of your thesis adviser, e.g., CAP, CDA, CEN, COP or COT 6971)
        - Six credits of thesis are required with the professor who directs the student's thesis. The thesis experience is expected to span two semesters. Thesis students who are full-time must continue to enroll in 3 credit hours of thesis coursework until the thesis requirement is satisfied, even if it goes beyond the minimum of 6 credit hours of thesis. Students are required to prepare and defend a formal thesis in accordance with university requirements.
  - Nonthesis Option
    - Earn at least 6 credits from the following types of courses:
      - Additional Elective Coursework. The nonthesis option requires at least 6 additional credit hours of electives beyond the 12 credit hours of electives described above. In addition, nonthesis students are required to engage in a culminating experience as determined by the program's graduate committee. Students in the nonthesis option may not take more than 6 credit hours of independent study (6908) and/or directed research (XXX 6918).

Additional Requirements
0 Total Credits

- At least half of the credit hours of both thesis and nonthesis students must be at the 6000 level. Furthermore, at least two 6000-level Computer Science formal courses (6 credit hours) must be taught by EECS faculty, exclusive of independent study and directed research and a total of 24 credit hours of formal courses must be earned exclusive of thesis. Approval may be granted for no more than 6 credit hours of electives to be taken outside of Computer Science, and such approval must occur prior to taking these outside courses.

Grand Total Credits: 30

2021-2022 Graduate Catalog
Program Details

Examples of approved pairs include (but not limited to):

- Operating Systems (OS) area (COP 5611 and COP 6614)
- Computer Graphics area (CAP 5725 and CAP 6721)
- Machine Learning area (CAP 5610 or CAP 5512 and CAP 6616 or CAP 6545)
- Artificial Intelligence (AI) area (CAP 5636 and CAP 6640 or CAP 6676)
- Computer Vision area (CAP 5415 and CAP 6411 or CAP 6412 or CAP 6419 or CAP 6835)
- Computer Architecture area (CDA 5110 and/or CDA 5106 and CDA 6107)
- Networking area (CNT 5008 and CNT 6707)
- Software Engineering area (CEN 5016 and CEN 6081)
- Database area (COP 5711 and COP 6731), etc.
- Mixed Reality Engineering area (CAP 5115 and CAP 6110)
- Theory area (COT 5405 and COT 6410)
- Computer Security area (CAP 5150 and 1 or more 6000-level classes from Cyber Security and Privacy program)
- Quantum Computing area (COT 5600 and COT 6602)
- Bioinformatics area (CAP 5510 and CAP 6517)

The above list is only meant to provide some examples and is not comprehensive.

Equipment Fee

Students in the Computer Science MS program pay a $34 equipment fee each semester that they are enrolled. Part-time students pay $17 per semester.

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis or an approved set of research-based classes for nonthesis students.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

No

Track Description
The Accelerated BS to MS program in Computer Science allows highly qualified UCF undergraduate majors in Computer Science to take graduate-level courses that will count toward their MS degree while completing their BS degree program.

Up to 12 credit hours of 5000- and 6000-level courses with a grade of "B" (3.0) or better may be counted toward the accelerated BS to MS program. Two additional requirements for the students in this program are:

- Students must earn at least a "B" (3.0) in each undergraduate- or graduate-level course counted for the program.
- Students must opt for this program no later than the beginning of their junior year.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites
This track is available to University of Central Florida undergraduate majors in Computer Science only.

Application Requirements
For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Accelerated BS to MS program in Computer Science allows highly qualified University of Central Florida undergraduate majors in Computer Science to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline but were not previously part of this accelerated program, then they should apply to the Computer Science Program without a track selection. Additional information about this track may be located at: http://www.cecs.ucf.edu/current-students/bs-ms-program/.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Resume
- 2 Letters of recommendation

- Computer Security area (CAP 5150 and 1 or more 6000-level classes from Cyber Security and Privacy program)
- Quantum Computing area (COT 5600 and COT 6602)
- Bioinformatics area (CAP 5510 and CAP 6517)

The above list is only meant to provide some examples and is not comprehensive.

**Plan of Study**

The Plan of Study is an agreement between the student, the program and the University that lists the coursework taken to satisfy the requirements for completing the degree. The Plan of Study for student is flexible and unique to each student. However, it must meet university, college and department requirements.

All graduate students must have a Plan of Study on file, approved by the adviser and graduate coordinator, by the completion of 9 credit hours after entering the program. The College of Graduate Studies automatically places a "hold" on future registration for noncompliance. The default adviser for nonthesis MS students is the Graduate Coordinator.

**Equipment Fee**

Students in the Computer Science MS program pay a $34 equipment fee each semester that they are enrolled. Part-time students pay $17 per semester.

**Independent Learning**

The Independent Learning Requirement is met by successful completion of a master's thesis or an approved set of research-based classes for nonthesis students.

**Financial Information**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Program Description
The Computer Science PhD program prepares students in the highest level of theory and practice of Computer Science, aiding with the development of research and instruction skills for positions in academia, industry and government sectors.

The Computer Science PhD program produces professionals trained at the highest possible academic level in the theory and practice of Computer Science in order to meet current and projected market demands for Computer Science experts. Students graduate with proven abilities in research and instruction and have expertise suitable for positions in industry, academia and government.

Students in the program receive a broad background in the areas of programming systems and languages, computer architecture and computer science theory while specializing in a research area. Research interests of the computer science faculty include affective computing, applied perception, bioinformatics, computational biology, computational geometry, computer and network security, computer architecture, computer forensics, computer graphics, computer networks, computer vision, cryptography, data compression, database management systems, data mining, design and analysis of algorithms, evolutionary computation, genetic algorithms, graph theory, hardware/software co-design, image processing, machine learning, mixed and virtual reality, mobile computing, modeling and simulation, multimedia systems, natural language processing, neural networks, parallel and distributed processing, performance evaluation, programming languages, quantum computing, semantic web, software agents, software engineering and VLSI systems.

The Computer Science PhD program prepares students in the highest level of theory and practice of Computer Science, aiding with the development of research and instruction skills for positions in academia, industry and government sectors.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites
An undergraduate degree in Computer Science is desirable but not required. Applicants without a strong undergraduate background in Computer Science must demonstrate an understanding of the material covered in the following upper-division undergraduate courses:

- EEL 4768C Computer Architecture 3 Credit Hours
- COP 4020 Programming Languages I 3 Credit Hours
- COP 4600 Operating System 3 Credit Hours
- COT 4210 Discrete Computational Structures 3 Credit Hours
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Outstanding students with a bachelor's degree are encouraged to apply directly to the doctoral program. Admission to the PhD program is formalized by the university upon the recommendation of the Computer Science Graduate Coordinator.

An undergraduate degree in Computer Science is desirable but not required. Applicants without a strong undergraduate background in Computer Science must demonstrate an understanding of the material covered in upper-division undergraduate courses listed under the Articulation Section of the Curriculum Information. Applicants may choose to demonstrate their knowledge of these courses by taking these courses as non-degree seeking and scoring "B" or better in all of them.

Degree Requirements

Required Courses
9 Total Credits

- Complete all of the following
  - Complete the following:
    - CDAS106 - Advanced Computer Architecture (3)
    - COT5405 - Design and Analysis of Algorithms (3)
    - COT6410 - Computational Complexity (3)
  - Students must earn a B or better in CDA 5106, COT 5405, and COT 6410. Students earning a B- or below in this course work, will have to repeat the course work until they earn a B or better.

Elective Courses
48 Total Credits
Earn at least 48 credits from the following types of courses:
- Elective Coursework - Grades must be a "C" (2.0) or better with at most 6 credit hours having grades below "B" (3.0) and an overall grade point average of 3.0 or better. - No courses below the 5000-level, with no 5000-level CGS prefix course work. - No more than 12 credit hours of independent study (6908). - Five 6000- or 7000-level courses (15 credits) with grades of "B" (3.0) or better taught by EECS faculty. None of these may be independent study or dissertation for which letter grades (not S/U) are assigned. At least 36 hours must be formal course work, exclusive of independent study or doctoral research.

Dissertation
15 Total Credits
- Earn at least 15 credits from the following types of courses:
  XXX 7980 - Dissertation

Qualifying Review
0 Total Credits
- The Qualifying Review (QR) will be offered twice a year the in Fall and the Spring semester. A student enrolled in the PhD program is required to take the QR in the third semester (excluding the Summer semesters). The Graduate Committee will meet twice a year to evaluate the results. To pass QR a student should have at least one publication with the adviser and should have passed two core classes, or passed one and be enrolled in a second one. A second QR attempt should be not later than the fifth semester; at that time the student should have passed the three core courses.

Dissertation Committee
0 Total Credits
- The Dean, through the Chairs and Directors, is responsible for committee formation, additions and deletions. The doctoral committee must consist of a minimum of four members; three must be graduate faculty members from within EECS and one must be at large from outside the EECS faculty. Joint faculty members may serve as school-faculty committee members. The Computer Science Graduate Committee may specify additional membership. The College of Graduate Studies reserves the right to review appointments to advisory committees, place a representative on any advisory committee, or appoint a co-adviser. Joint faculty members may serve as committee chairs, but graduate faculty scholars may not, although they may serve as co-chairs. All members vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal and final dissertation must be approved by a majority of the advisory committee.

Admission to Candidacy
0 Total Credits
- The following are required to be admitted to candidacy and enroll in dissertation hours. Evidence of successful completion of these requirements must be received in the College of Graduate Studies by the day before the first day of classes in which the student wishes to enroll in dissertation hours: - Completion of all course work, except for dissertation hours. - Successful completion of the candidacy examination. - The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. - Submission of an approved program of study.

Time Limitation
0 Total Credits
- Students have seven years from the beginning of regular graduate status in the PhD program to complete all requirements for the degree, although most students finish within 4 to 5 years.

Dissertation Proposal
0 Total Credits
- After passing the candidacy examination, the student will write a dissertation proposal and present it orally to the dissertation advisory committee for approval. The proposal must include a description of the research performed to date and research plans.

Dissertation and Oral Defense
0 Total Credits
- Students must write a dissertation on their research that describes a significant original contribution to the field of computer science. The oral defense of the dissertation is reviewed by the research committee. The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website and the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date. The dissertation must be approved by the dissertation adviser and committee, the school director or designee and the dean of the college or designee. Format approval from the Thesis and Dissertation Editor and final approval of satisfaction of
Program Details

A plan of study for each student must be filed within the first two weeks of the student's second semester in the program. Details about this program can be found in the Computer Science PhD Handbook.

This plan must satisfy the following:

- A minimum of 72 credit hours (including CDA 5106, COT 5405, and COT 6410 - all with a grade of "B" (3.0) or better). At most 30 credit hours can be waived from a completed MS program, exclusive of thesis, independent study, dissertation, and research. Otherwise, at most 9 external credits can be transferred.
- A 3.0 or better grade point average is required. At most 6 credit hours with "C" (2.0) are allowed.
- No courses below the 5000-level, with no 5000-level CGS prefix coursework.
- No more than 12 credit hours of independent study (6908).
- Five 6000- or 7000-level courses (15 credits) with grades of "B" (3.0) or better taught by EECS faculty. None of these may be independent study or dissertation for which letter grades (not S/U) are assigned.
- Six additional computer science graduate credits to make the total of all non-independent study (e.g., formal coursework exclusive of independent study) of at least 36 credits.
- A minimum of 15 credit hours and a maximum of 24 credit hours of PhD dissertation (CAP, CDA, CEN, CIS, CNT, COP or COT 7980).

Equipment Fee

Students in the Computer Science PhD program pay a $34 equipment fee each semester that they are enrolled. Part-time students pay $17 per semester.

Independent Learning

The Independent Learning requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Is this program available 100% online?

No

Program Description

The Master of Computer Vision Program (MSCV) aims to provide technical skills and domain knowledge to the future professionals in acquiring, processing, analyzing, and understanding images, videos, 3D data, and other types of high-dimensional data of the real world. The fast-growing interests and investments in Artificial Intelligence (AI) have to be powered by a well-prepared workforce. This program meets the need created by the United States' shortage of AI personnel.

The curriculum for this degree program includes 6 required classes (18 credit hours) which form the backbone of graduate study for the field.

The remaining 12 credit hours can be selected from the list of elective courses. Electives outside of the provided list require approval from the student's adviser and program coordinator.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

An undergraduate degree in Computer Science is desirable but not required. Applicants without a strong undergraduate background in Computer Science must demonstrate an understanding of the material covered in the following upper-division undergraduate courses:

- EEL 4768C Computer Architecture
- COP 4020 Programming Languages I
- COP 4600 Operating Systems
- COT 4210 Discrete Computational Structures

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Resume
- 1 Letter of recommendation
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

All application materials must be submitted by the appropriate deadline listed below.

Is this program available 100% online?

No
**Program Description**

The Master of Science in Cyber Security and Privacy program will provide high-quality cybersecurity graduate education, advance cyber security and privacy research, and address the issues of state, national and international cybersecurity.

The Master of Science in Cyber Security and Privacy program provides students with an in-depth education geared toward meeting the needs of business and industry in Florida and throughout the United States.

Students successfully completing this program will have exhibited breadth as well as depth of capability involving both theoretical aspects and practical considerations and applications of cyber security issues in software, hardware, operating system, and various networked devices.

This proposed program will be offered jointly by College of Engineering and Computer Science (CECS) (Department of Computer Science), College of Business Institute of Simulation and Training (IST), College of Sciences (Department of Psychology), College of Community Innovation and Education (Department of Criminal Justice). The degree will be housed in CECS due to its requirement for students with primarily STEM backgrounds.

The MS in Cybersecurity and Privacy program will have two tracks: TRACK 1: Technical Track and TRACK 2: Interdisciplinary Track.

Track 1 is designed for students aiming to become advanced cybersecurity and privacy professionals, who will master advanced knowledge on cybersecurity and privacy topics such as secure execution environment and malware analysis, and master knowledge on electives on networking, database, operating system, computer architecture, algorithms, machine learning and artificial intelligence (AI) and software engineering.

Track 2 is designed for students aiming to become managers or administrative personnel of cybersecurity and privacy operations. They will be required to take fundamental and core courses on cybersecurity and privacy, and can choose electives from fields including management and business, human factors, psychology and criminal justice.

The MS in Cybersecurity and Privacy program offers both a thesis and non-thesis option with each option requiring a minimum of 30 credit hours beyond the bachelor's degree. Both options require 9 credit hours of required core courses and 7 electives (21 credits). For Track 1, electives include minimum 1 course from cybersecurity/privacy topics, minimum 1 course from networking, and minimum 1 from database. The three fields from which students have to choose one course are necessary and fundamental to master advanced knowledge on cybersecurity and privacy. Students can also choose electives from operating system, computer architecture, algorithms, machine learning and artificial intelligence (AI) and software engineering to expand their horizon. For Track 2, students can freely choose electives from management and business, human factors, psychology and criminal justice, depending on their interest and professional domains. For both tracks, there is a thesis option, which is equivalent to 6 credit course hours of electives.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree**

**Program Prerequisites**

An undergraduate degree in Computer Science, Computer Engineering, Information Technology, or equivalent is desirable but not required. Applicants without a strong undergraduate background in Computer must demonstrate an understanding of the material covered in the following undergraduate courses:

- COP 3502C - Computer Science I
- COP 3503C - Computer Science II
- CIS 3360 - Security in Computing

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Resume
- 1 Letter of recommendation
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

All application materials must be submitted by the appropriate deadline listed below.

Required Courses
9 Total Credits

- Complete the following:
  - CAP5150 - Foundations of Computer Security and Privacy (3)
  - CDA5209 - Foundations of Secure Execution Environment (3)
  - CIS6614 - Advanced Software Systems Security (3)

Elective Courses
15 Total Credits

- Complete 1 of the following
  - All students, both thesis and nonthesis, are required to complete 15 credit hours of electives that are selected after consultation with the student's adviser. For Track 1: Technical Track, electives include minimum 1 course from cybersecurity/privacy topics, minimum 1 course from networking, and minimum 1 course from database. The three fields from which students have to choose one course are necessary and fundamental to master advanced knowledge on cybersecurity and privacy. Students can also choose electives from operating system, computer architecture, algorithms, machine learning and artificial intelligence (AI) and software engineering to expand their horizon. For Track 2: Interdisciplinary Track, students can freely choose electives from management and business, human factors, psychology and criminal justice, depending on their interest and professional domains.

  Track 1: Technical Track
  - Complete all of the following
    - Cybersecurity/Privacy
      - Complete at least 1 of the following:
        - CAP5151 - Internet of Things Security and Privacy (3)
        - CAP6135 - Malware and Software Vulnerability Analysis (3)
        - CDA6221 - Advanced Topics in Secure Execution Environment (3)
        - CIS6395 - Incident Response Technologies (3)
        - CNT5410L - Cyber Operations Lab (3)
        - CIS5730 - Blockchains and Smart Distributed Contracts (3)
    - Networking
      - Complete at least 1 of the following:
        - CNT5008 - Computer Communication Networks Architecture (3)
        - CNT5805 - Network Science (3)
        - CNT6707 - Advanced Computer Networks (3)
    - Database
      - Complete at least 1 of the following:
        - COP5711 - Parallel and Distributed Database Systems (3)
        - COP6731 - Advanced Database Systems (3)
  - Other Electives
    - Complete at least 2 of the following:
      - CDA5106 - Advanced Computer Architecture (3)
      - COP5611 - Operating Systems Design Principles (3)
      - COT5405 - Design and Analysis of Algorithms (3)
Track 2: Interdisciplinary Track

- Complete at least 5 of the following:
  - ISM6327 - Foundations of Cybersecurity and Privacy (3)
  - ISM6328 - Cyber Risk Assessment (3)
  - ISM6375 - Cyber Management and Leadership (3)
  - IDC5602 - Cybersecurity: A Multidisciplinary Approach (3)
  - IDC6600 - Emerging Cyber Issues (3)
  - IDC6601 - Behavioral Aspects of Cybersecurity (3)
  - EXP5256 - Human Factors I (3)
  - EXP6257 - Human Factors II (3)
  - INP6072 - Survey Research Methods and Program Evaluation in Indust. and Org. Psychology (3)
  - Course Not Found
  - SOP5059 - Advanced Social Psychology (3)
  - CCJ6073 - Data Management Systems for Crime Analysis (3)
  - CCJ6074 - Investigative and Intelligence Analysis: Theory and Methods (3)
  - CCJ6717 - CJ Theories of Crime Analysis and Prevention (3)

Thesis/Nonthesis Option

6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - XXX 6971 Thesis (prefix determined by disciplinary area of your thesis adviser, e.g., CAP, CDA, CEN, COP or COT 6971)
        Six credits of thesis are required with the professor who directs the student's thesis. The thesis experience is expected to span two semesters. Thesis students who are full-time must continue to enroll in 3 credit hours of thesis course work until the thesis requirement is satisfied, even if it goes beyond the minimum of 6 credit hours of thesis. Students are required to prepare and defend a formal thesis in accordance with university requirements.
      - Nonthesis Option
    - Earn at least 6 credits from the following types of courses:
      - Additional elective coursework. The nonthesis option requires 6 additional credit hours of any electives in both tracks beyond the 15 credit hours of electives in the intended program track described above.

Grand Total Credits: 30

Program Details

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis or an approved set of research-based classes for nonthesis students.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Is this program available 100% online?

Yes

UCF Online

Please note: Data Analytics Graduate Certificate may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description

The Graduate Certificate in Data Analytics, which is part of the Master of Science in Data Analytics program, aims to provide students with the new ability to develop algorithms and computer programs for discovery of information from large amounts of data. This includes the architecture of programs, as well as technical details of algorithm development. Students are expected to be able to write and maintain novel computer programs that make efficient use of cutting-edge computer technology.

Students in this certificate option will receive a broad background in the areas of parallel database programming, machine learning, data mining, and network science while specializing in particular areas of data analytics practice. Students successfully completing this certificate program will have exhibited an advanced ability to lead in the discovery of actionable knowledge from "big data."

The Graduate Certificate in Data Analytics requires 15 credit hours. Students must receive a grade of "B" or higher in all courses.

Total Credit Hours Required: 15 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

An undergraduate degree in computer science, statistics, computer engineering or information technology is desirable but not required. Applicants without a strong undergraduate background in computer science or statistics must demonstrate an understanding of the field. This can occur through a display of training in various programming languages, other computer science certificates, through an interview with program faculty in the application process, and/or having taken these or similar courses in the following upper division undergraduate courses:

- COP 3330 Object-Oriented Programming
- COP 3503C Computer Science II
- COP 4710 Database Systems
- STA 2023 Statistical Methods I
- Programming experience or STA 4164 Statistical Methods III

2021-2022 Graduate Catalog
Application Requirements

For information on general UCF graduate certificate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Resume/CV
- Letters of recommendation (encouraged but not required)

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

An undergraduate degree in Computer Science, Statistics, Information Technology, or Computer Engineering is desirable but not required. Applicants without a strong undergraduate background in Computer Science and Statistics must demonstrate an understanding of the material covered in upper-division undergraduate courses listed under the Articulation Section of the Curriculum Information. Applicants may choose to demonstrate their knowledge of these courses by taking these courses as non-degree seeking and scoring "B" or better in all of them.

2021-2022 Graduate Catalog
Degree Requirements

Required Courses
24 Total Credits

- Complete the following:
  - CAP5610 - Machine Learning (3)
  - CNT5805 - Network Science (3)
  - COP5711 - Parallel and Distributed Database Systems (3)
  - COP6526 - Parallel and Cloud Computation (3)
  - STA5206 - Statistical Analysis (3)
  - STA5703 - Data Mining Methodology I (3)
  - STA6704 - Data Mining Methodology II (3)
  - CAP6942 - Project in Data Analytics (3)

Restricted Elective Courses
6 Total Credits

- Complete at least 2 of the following:
  - CAP6307 - Text Mining I (3)
  - CAP6315 - Social Media and Network Analysis (3)
  - CAP6318 - Computational Analysis of Social Complexity (3)
  - CAP6545 - Machine Learning Methods for Biomedical Data (3)
  - CAP6737 - Interactive Data Visualization (3)
  - STA6714 - Data Preparation (3)

Grand Total Credits: 30

Program Details

Independent Learning

The Independent Learning Requirement is met by successful completion of a capstone project in CAP 6942 - Project in Data Analytics.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241
finaid@ucf.edu

Engineering 2, Room 312

Is this program available 100% online?
Yes

UCF Online

Please note: Design for Usability Graduate Certificate may be completed fully online although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description

This program has suspended admissions effective Fall 2020 including online.

The Graduate Certificate in Design for Usability introduces students to the methods of user-centered design and usability engineering tools that can be used to assess and assure usability throughout a product, service or system development cycle. Students in the certificate program learn how to design products that are both ergonomically sound and user-friendly, how to plan and conduct usability tests, analyze related data, and how to use the results to improve the design of a product, service or system.

For the Design for Usability certificate, students complete four required courses, for a total of 12 credit hours.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Admission is open to those with a bachelor's degree in industrial engineering or a closely related discipline from an accredited institution recognized by UCF.

Application Requirements

Admission is open to those with a bachelor's degree in industrial engineering or a closely related discipline from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition, applicants to this certificate must provide:

- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc only.

Applications are accepted for the fall and spring terms only.

Telephone: 407-823-5015
HEC 243

Is this program available 100% online?
Yes

UCF Online

Please note: Digital Forensics (MS) may be completed fully online. Most courses are either online courses or have both in-campus and online course sessions. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. It could be difficult to satisfy these requirements since many courses in this program only have online format. Please contact Program Coordinator to discuss possible admission issue.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.
Program Description

The Digital Forensics master's degree is a collaborative effort between various UCF academic departments (Computer Science, Forensic Science of Chemistry, Criminal Justice, and Legal Studies) and the National Center for Forensic Science (NCFS), which is based in the UCF College of Sciences as a forensic science research center and is housed in Orlando's Research Park, adjacent to UCF.

The mission of the MSDF degree program is to provide a quality graduate education in science and practices of digital forensics, to prepare the students for digital forensics jobs, and to prepare the students for a lifetime of learning. The objectives of the program include the following:

- To give MSDF graduates the knowledge and skills necessary to participate as an effective team member or team leader in digital evidence investigations
- To prepare MSDF graduates for professional careers in digital forensics examination, forensic tool development, tool verification and validation, security and forensics administration
- To prepare MSDF graduates with the knowledge and skills to pursue advanced studies and research in computer technology or computer crime-related disciplines
- To equip MSDF graduates with the communication skills, both oral and written, to become an effective problem solver as well as an effective communicator as an expert forensic examiner and expert witness

The Digital Forensics MS degree is comprised of 30 hours of study beyond the bachelor's degree with required, intensive specialization in topics related to digital forensics. The degree program prepares students, including working professionals, who will pursue the degree on a part-time basis to gain the knowledge and skills required to work as an examiner in the field. The program may also be taken by those who have an interest in scientific applications and research in the field, and who would like to continue to a doctoral degree program or law school after completion.

The program offers both a thesis option (6 credit hours) or an opportunity to complete two additional courses (6 credit hours) selected from the Restricted Electives. At least one-half of the credit hours must be at the 6000 level.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Undergraduate articulation courses may be required for students with BS and/or MS degrees in fields other than a computer-related field. If you are not in STEM related BS program, you need to show either you have taken some basic CS/IT courses, or have working experience in CS or IT or digital forensics field. If you want to take some prerequisite courses, you can take two to three of the following courses in UCF or equivalent courses in other places:

- Basic CS knowledge: COP 3502: Computer Science I
- Basic networking knowledge: CNT 3004 Computer Network Concepts, or CNT 4703C Design and Implementation of Computer Communication Networks, or CNT 4704 Analysis of Computer Communication Networks
- Basic Computer architecture: CDA 3103: Computer Logic and Organization
- Programming course, such as: COP 3223C Introduction to Programming with C, or COP 3330 Intro to OO Programming with Java

Courses taken to correct deficiencies cannot be used to satisfy minimum degree requirements.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Statement of educational, research, and professional career objectives.
- Résumé.
- One letter of recommendation.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

The GRE is not required for admission into this program.

    - IDC6600 - Emerging Cyber Issues (3)
    - IDC6601 - Behavioral Aspects of Cybersecurity (3)
  Criminal Justice
  - Complete at least 1 of the following:
    - CCJ5015 - The Nature of Crime (3)
    - CCJ5456 - The Administration of Justice (3)
    - CCJ6074 - Investigative and Intelligence Analysis: Theory and Methods (3)
    - CCJ6704 - Research Methods in Criminal Justice (3)
    - CCJ6706 - Data Analysis in Criminal Justice I (3)
    - CJ6688 - Cyber Crime and Criminal Justice (3)
    - CJL6568 - Law and Social Control (3)

Legal Studies and Electronic Discovery

- Complete at least 1 of the following:
  - CHS5596 - The Forensic Expert in the Courtroom (3)
  - CHS5518 - The Forensic Collection and Examination of Digital Evidence (3)
  - PLA5587 - Current Issues in Cyberlaw (3)
  - CIS6206 - Electronic Discovery for Digital Forensics Professionals (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  Thesis Option
  - Earn at least 6 credits from the following types of courses:
    - CAP 6971: Thesis The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
  Nonthesis Option
  - Earn at least 6 credits from the following types of courses:
    Students not interested in a thesis can instead take one elective course and the "CDA 6946: Internship" course, or take two electives. The electives can be any courses from the list of Restricted Electives above, or the following electives.

Grand Total Credits: 30

No

**Licensure Disclosure**

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Electrical-Engineering-MS.pdf.
Program Description

The Master of Science in Electrical Engineering students receive a broad background in areas such as electromagnetics and optics, signal processing and systems, and micro-systems and nano-systems.

The Department of Electrical Engineering (Electrical Engineering Program) supports a number of technical (research) areas in which a Master of Science student may specialize. These technical areas are: Electromagnetics and Optics (EO), Signal Processing and Systems (SPS), and Micro-Systems and Nano-Systems (MNS). The Micro-Systems and Nano-Systems area covers the typical Electrical Engineering topic areas of Electronics, Power Electronics, and Micro-Electronics, while the Signal Processing and Systems area covers the typical electrical topic areas of communications, controls, and signal processing. All MSEEE programs offer a thesis and a non-thesis option, as well as an Accelerated BS to MSEEE program. Students in the program receive a broad background in the various technical areas while specializing in a research area of their interest.

The specific research area that each one of the EE faculty conduct can be found at the Department of EE website (www.ece.ucf.edu/).

This degree has 2 tracks: Accelerated BS to MSEEE Track and Guidance Control and Dynamics Track. Please scroll to the bottom of this page for further details on these Tracks.

Program Prerequisites

Undergraduate articulation courses are required to be completed prior to admission for students who do not hold a Bachelor of Science degree in Electrical Engineering. In particular, the articulation courses specified below, plus all of the prerequisite string which any of them require, must be completed prior to admission. Grades of "B" or higher must be obtained in each articulation course specified below. Articulation courses are not eligible for inclusion on a graduate Program of Study.

- EEL 3123C - Network and Systems
- EEE 3307C - Electronics I
- EEL 3470 - Electromagnetic Fields
- EEL 3552 - Signal Analysis and Communications
- EEE 3350 - Semiconductor Devices I

In addition, choose one of the following:

- EEL 3657 - Linear Control Systems
- EEE 4309C - Electronics II
- EEL 4750 - Digital Signal Processing Fundamentals

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Electrical Engineering or a related discipline.
- GRE is not required for MSEEE applicants with a BS degree in EE or CpE and with a minor in any of following disciplines of EE, CpE or CS.
- Two letters of recommendation.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may also be required to correct any course deficiencies. Students should contact the graduate program director for further information.

</tr>
</tbody>
</table>

Application Deadlines Notes

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.
**Elective Courses**

There are no required courses within a specialization area, however, all students (thesis and non-thesis) must choose at least 24 credit hours of formal courses, excluding research-related courses and Independent Study (XXX 6908) that emphasize their specialization area. Courses from outside specialization areas could also be chosen if they are approved by the student's adviser and incorporated into the Program of Study for the student. The Program of Study (POS) form must be approved by an adviser in the selected specialization area no later than the end of the second semester after admission. The program of study must meet all the university requirements specified in the graduate catalog and must also receive departmental-level and college-level approval.

**Specialization Areas**

Complete 1 of the following:

- **Electromagnetics and Optics (EO)**
  - EEE5542 - Random Processes I (3)
  - EEE5557 - Introduction to Radar Systems (3)
  - EEL5437C - Microwave Engineering (4)
  - EEL5439C - RF and Microwave Active Circuits (4)
  - EEL5462 - Antenna Analysis and Design (3)
  - EEL5432 - Satellite Remote Sensing (3)
  - EEL6425C - RF and Microwave Measurement Techniques (4)
  - EEL6481 - Numerical Techniques in Electromagnetics (3)
  - EEL6482 - Electromagnetic Theory I (3)
  - EEL6489 - Advanced Topics in Electromagnetics and Microwaves (3)
  - EEL6504 - Communications Systems Design (3)
  - EEL6530 - Communication Theory (3)
  - MAP5426 - Special Functions (3)
  - MAP5435 - Advanced Mathematics for Engineers (3)
  - MAP6424 - Transform Methods (3)
  - OSE5041 - Introduction to Wave Optics (3)
  - OSE5414 - Fundamentals of Optoelectronic Devices (3)
  - OSE6111 - Optical Wave Propagation (3)
  - OSE6143 - Fiber Optics Communication System (3)
  - OSE6211 - Imaging and Optical Systems (3)
  - OSE6421 - Integrated Photonics (3)
  - OSE6432 - Guided Waves and Optoelectronics (3)
  - OSE6445 - Fundamentals of Ultrafast Optics (3)
  - OSE6455C - Photonics Laboratory (3)
  - OSE5525 - Laser Engineering (3)
  - OSE6615L - Optoelectronic Device Fabrication Laboratory (3)
  - OSE5525 - Laser Engineering (3)
Micro-Systems and Nano-Systems (MNS)
- Earn at least 24 credits from the following:
  - BME5572 - Biomedical Nanotechnology (3)
  - EEL5245 - Power Electronics (3)
  - EEE5332C - Thin Film Technology (3)
  - EEE5352 - Semiconductor Material and Device Characterization (3)
  - EEE5353 - Semiconductor Device Modeling and Simulation (3)
  - EEE5356C - Fabrication of Solid-State Devices (4)
  - EEE5370 - Operational Amplifiers (3)
  - EEE5378 - CMOS Analog and Digital Circuit Design (3)
  - EEE5390C - Full-Custom VLSI Design (3)
  - EEE5555 - Surface Acoustic Wave Devices and Systems (3)
  - EEE6317 - Power Semiconductor Devices and Integrated Circuits (3)
  - EEE6358 - Advanced Semiconductor Device I (3)
  - EEL6246 - Power Electronics II (3)
  - EEE6326C - MEMS Fabrication Laboratory (3)
  - EEE6338 - Advanced Topics in Microelectronics (3)

Signal Processing and Systems (SPS)
- Earn at least 24 credits from the following:
  - EEE5513 - Digital Signal Processing Applications (3)
  - EEE5542 - Random Processes I (3)
  - EEE5557 - Introduction to Radar Systems (3)
  - EEE6504 - Adaptive Digital Signal Processing (3)
  - EEL5820 - Image Processing (3)
  - EEL5825 - Pattern Recognition and Learning from Big Data (3)
  - EEL5630 - Digital Control Systems (3)
  - EEL5173 - Linear Systems Theory (3)
  - EEL6504 - Communications Systems Design (3)
  - EEL6530 - Communication Theory (3)
  - EEL6590 - Advanced Topics in Communications (3)
  - EEL6812 - Introduction to Neural Networks (3)
  - EEL6619 - Nonlinear Robust Control and Applications (3)
  - EEL6621 - Nonlinear Control Systems (3)
  - EEL6662 - Advanced Robotics (3)
  - EEL6667 - Mobile Robotic Systems (3)
  - EEL6671 - Modern and Optimal Control Systems (3)
  - EEL6674 - Optimal Estimation for Control (3)
  - EEL66616 - Adaptive Control (3)
  - EEL6683 - Cooperative Control of Networked Autonomous Systems (3)
  - EEL6669 - Introduction to Robotics and Autonomous Vehicles (3)
  - EEL6026 - Optimization of Engineering Systems (3)
  - CAP5415 - Computer Vision (3)
  - CAP6411 - Computer Vision Systems (3)
  - CAP6412 - Advanced Computer Vision (3)
  - CAP6419 - 3D Computer Vision (3)

Thesis/Nonthesis Option
6 Total Credits
- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - EEL 6971 - Thesis The thesis option requires 6 credit hours of thesis work (EEL 6971) in addition to the 24 credit hours of formal elective courses. Please note the following requirements for this option: - 24 credit hours of courses must be taken in the student's chosen specialization area. - No more than 6 credits of thesis (EEL 6971) will be counted toward the degree requirement. - At least half of the coursework, including Thesis XXX 6971, must be at the 6000-level (typically at least 15 credit hours). - Thesis students who are full time must continue to enroll in three credit hours of thesis coursework each semester until the thesis requirement is satisfied, beyond the minimum of 6 credit hours of thesis, but only 6 hours total will count toward the degree requirement. The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
  - Nonthesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following types of courses:
        - Additional Elective Coursework. The nonthesis option is especially suited for part-time students. Nonthesis students must complete 6 credit hours of electives in addition to the 24 credit hours of formal coursework described above. If approved by the student's adviser, the student may include a total of 6 credit hours as an Independent Study (XXX 6908). At least half of the coursework must be at the 6000-level (typically at least 15 credit hours).
        - Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of their portfolio of activities by the course withdrawal date of the semester prior to their intended graduation. Portfolio requirements are listed on the EECS website at http://www.eecs.ucf.edu/.
Grand Total Credits: 30

Program Details

Transfer Credits

Graduate students with a bachelor's degree in Electrical Engineering from UCF may transfer up to 9 credit hours of 5000-level or higher coursework, with grades of B or higher, toward the MSEE degree. Alternatively, a maximum of 9 credit hours may be transferred of graduate work conducted elsewhere from an accredited institution.

Equipment Fee

Students in the Electrical Engineering MSEE program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

Independent Learning

The independent learning requirement is met by successful completion of a master's thesis or an approved portfolio of activities for nonthesis students.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

For more information on how this program may prepare you in that regard, please visit [https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Electrical-Engineering-MS.pdf](https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Electrical-Engineering-MS.pdf).

**Track Description**

The accelerated undergraduate/graduate program in Electrical Engineering allows highly qualified undergraduate majors in Electrical Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program.

Students in the Electrical Engineering degree programs receive a broad background in areas such as communications, controls/robotics, digital signal processing, electromagnetics, power electronics and electronics, electro-optics/photonics, solid state and microelectronics while specializing in a research area of their interest. Research interests of the Electrical Engineering faculty include antennas, microwave and millimeter circuits and devices, communication systems, digital signal/image processing, power electronics, electronic circuits, IFF devices, electromagnetic theory, radar and microwave remote sensing, speech processing, VLSI design, spread spectrum systems, SAW and ACT devices, spectral estimation, solid state device modeling and computer-aided design (CAD) techniques, communication networks, integrated services digital networks, neural networks, systems and controls, robotics, robust control, computer control, microelectronics, semiconductors, thin films, power system stability, bipolar device modeling, solid state lasers, optical propagation, fiber optics, optical signal processing, laser-induced damage, optical testing, diffractive optics, phase conjugation, infrared detectors, Fourier optics, lens design, and nonlinear optics.

Up to 12 credit hours of approved 5000- and 6000-level courses of grades "B" (3.0) or better may be counted toward the BS and MS degrees.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree**

**Track Prerequisites**

This track is available to University of Central Florida undergraduate majors in Electrical Engineering only.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The **Accelerated BS to MS program** in Electrical Engineering allows highly qualified University of Central Florida undergraduate majors in Electrical Engineering to begin taking graduate level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline, but were not previously part of this accelerated program, then they should apply to the **Electrical Engineering MS program** without a track selection. Additional information about this track may be located at: [https://grad.cecs.ucf.edu/academic-programs/accelerated-bs-ms-program/](https://grad.cecs.ucf.edu/academic-programs/accelerated-bs-ms-program/).

In addition to the general UCF graduate admission requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Electrical Engineering or a related discipline. This track is available to University of Central Florida undergraduates only.
- Two letters of recommendation.
- Résumé.
- Statement of educational, research, and professional career objectives.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting applicants into their research program.

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.*

2021-2022 Graduate Catalog
Undergraduate Requirements
0 Total Credits

- Application must be made no earlier than the semester after completing 60 credit hours toward the bachelor's degree yet before completing 90 credit hours. A minimum GPA of 3.5 is required prior to admission.

Elective Courses
24 Total Credits

- There are no required courses within a specialization area, however, all students (thesis and nonthesis) must choose at least 24 credit hours of formal courses, excluding research-related courses and Independent Study (XXX 6908) that emphasize their specialization area. Courses from outside specialization areas could also be chosen if they are approved by the student's adviser and incorporated into the Program of Study for the student. The Program of Study (POS) form must be approved by an adviser in the selected specialization area no later than the end of the second semester after admission. The program of study must meet all the university requirements specified in the graduate catalog and must also receive departmental-level and college-level approval.

Specialization Areas
24 Total Credits

- Complete 1 of the following
  - The Electrical Engineering Program supports a number of specialization areas. These technical areas are: Electromagnetics and Optics (EO), Signal Processing and Systems (SPS), and Micro-Systems and Nano-Systems (MNS). The Micro-Systems and Nano-Systems area covers the typical Electrical Engineering topic areas of Electronics, Power Electronics and Micro-Electronics, while the Signal Processing and Systems area covers the typical electrical topic areas of communications, controls, and signal processing. For each one of these areas there is a suggested list of courses stated below. Students are also allowed to take courses from other specialization areas, but the majority of their courses should be chosen from courses in their specialization area.
  - Electromagnetics and Optics (EO)
  - Earn at least 24 credits from the following:
    - EEE5542 - Random Processes I (3)
    - EEE5557 - Introduction to Radar Systems (3)
    - EEL5437C - Microwave Engineering (4)
    - EEL5437C - Microwave Engineering (4)
    - EEL5462 - Antenna Analysis and Design (3)
    - EEL5432 - Satellite Remote Sensing (3)
    - EEL6425C - RF and Microwave Measurement Techniques (4)
    - EEL6481 - Numerical Techniques in Electromagnetics (3)
    - EEL6482 - Electromagnetic Theory I (3)
    - EEL6489 - Advanced Topics in Electromagnetics and Microwaves (3)
    - EEL6504 - Communications Systems Design (3)
    - EEL6530 - Communication Theory (3)
    - MAP5426 - Special Functions (3)
    - MAP5435 - Advanced Mathematics for Engineers (3)
    - MAP6424 - Transform Methods (3)
    - OSE5041 - Introduction to Wave Optics (3)
    - OSE5414 - Fundamentals of Optoelectronic Devices (3)
    - OSE6111 - Optical Wave Propagation (3)
    - OSE6143 - Fiber Optics Communication System (3)
    - OSE6211 - Imaging and Optical Systems (3)
    - OSE6421 - Integrated Photonics (3)
    - OSE6432 - Guided Waves and Optoelectronics (3)
OSE6445 - Fundamentals of Ultrafast Optics (3)
OSE6455C - Photonics Laboratory (3)
OSE5525 - Laser Engineering (3)
OSE6615L - Optoelectronic Device Fabrication Laboratory (3)
OSE5525 - Laser Engineering (3)

Micro-Systems and Nano-Systems (MNS)
- Earn at least 24 credits from the following:
  - BME5572 - Biomedical Nanotechnology (3)
  - EEL5245 - Power Electronics (3)
  - EEE5332C - Thin Film Technology (3)
  - EEE5352 - Semiconductor Material and Device Characterization (3)
  - EEE5353 - Semiconductor Device Modeling and Simulation (3)
  - EEE5356C - Fabrication of Solid-State Devices (4)
  - EEE5370 - Operational Amplifiers (3)
  - EEE5378 - CMOS Analog and Digital Circuit Design (3)
  - EEE5390C - Full-Custom VLSI Design (3)
  - EEE5555 - Surface Acoustic Wave Devices and Systems (3)
  - EEE6317 - Power Semiconductor Devices and Integrated Circuits (3)
  - EEE6358 - Advanced Semiconductor Device I (3)
  - EEL6246 - Power Electronics II (3)
  - EEE6326C - MEMS Fabrication Laboratory (3)
  - EEE6338 - Advanced Topics in Microelectronics (3)

Signal Processing and Systems (SPS)
- Earn at least 24 credits from the following:
  - EEE5513 - Digital Signal Processing Applications (3)
  - EEE5542 - Random Processes I (3)
  - EEE5557 - Introduction to Radar Systems (3)
  - EEE5604 - Adaptive Digital Signal Processing (3)
  - EEL5820 - Image Processing (3)
  - EEL5825 - Pattern Recognition and Learning from Big Data (3)
  - EEL5630 - Digital Control Systems (3)
  - EEL5173 - Linear Systems Theory (3)
  - EEL5604 - Communications Systems Design (3)
  - EEL5630 - Communication Theory (3)
  - EEL5690 - Advanced Topics in Communications (3)
  - EEL6812 - Introduction to Neural Networks (3)
  - EEL6619 - Nonlinear Robust Control and Applications (3)
  - EEL6621 - Nonlinear Control Systems (3)
  - EEL6662 - Advanced Robotics (3)
  - EEL6667 - Mobile Robotic Systems (3)
  - EEL6671 - Modern and Optimal Control Systems (3)
  - EEL6674 - Optimal Estimation for Control (3)
  - EEL6616 - Adaptive Control (3)
  - EEL6683 - Cooperative Control of Networked Autonomous Systems (3)
  - EEL5669 - Introduction to Robotics and Autonomous Vehicles (3)
  - EEL6026 - Optimization of Engineering Systems (3)
  - CAP5415 - Computer Vision (3)
  - CAP6411 - Computer Vision Systems (3)
  - CAP6412 - Advanced Computer Vision (3)
  - CAP6419 - 3D Computer Vision (3)

Thesis/Nonthesis Option
6 Total Credits
- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - EEL 6971 - Thesis The thesis option requires 6 credit hours of thesis work (EEL 6971) in addition to the 24 credit hours of formal elective courses. Please note the following requirements for this option: - 24 credit hours of courses must be taken in the student's chosen specialization area. - No more than 6 credits of thesis (EEL 6971) will be counted toward the degree requirement. - At least half of the coursework, including Thesis XXX 6971, must be at the 6000-level (typically at least 15 credit hours). - Thesis students who are full time must continue to enroll in three credit hours of thesis coursework each semester until the thesis requirement is satisfied, beyond the minimum of 6 credit hours of thesis, but only 6 hours total will count toward the degree requirement. The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the university-wide Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
  - Nonthesis Option
    - Earn at least 6 credits from the following types of courses:
      - Additional Elective Coursework. The nonthesis option is especially suited for part-time students. Nonthesis students must complete 6 credit hours of electives in addition to the 24 credit hours of formal coursework
described above. If approved by the student's adviser, the student may include a total of 6 credit hours as an Independent Study (XXX 6908). At least half of the coursework must be at the 6000-level (typically at least 15 credit hours).

- Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of their portfolio of activities by the course withdrawal date of the semester prior to their intended graduation. Portfolio requirements are listed on the EECS website at http://www.eecs.ucf.edu/.

Grand Total Credits: 30

**Track Details**

**Graduate Requirements**

A complete application to the master's degree program must be received before admission deadlines of the semester in which the master's enrollment will commence. Students satisfy all requirements for master's admission in order to continue in the program once the bachelor's degree is awarded. At time of application for master's admission, students must specify BSMS-Accelerated as the master's degree track at time of graduate admission application to the MSEE program.

**Equipment Fee**

Students in the Electrical Engineering MSEE program pay a $63 equipment fee each semester that they are enrolled. Part-time students pay $31 per semester.

**Independent Learning**

The Independent Learning Requirement is met by successful completion of a master's thesis or an approved portfolio of activities for nonthesis students.

**Financial Information**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**UCF Student Financial Assistance**

Millican Hall 120

**Fellowship Information**

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Is this track available 100% online?

Yes

UCF Online

Please Note: Electrical Engineering MSEE, Guidance Control and Dynamics Track may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Electrical-Engineering-MS.pdf.

Track Description

The Master of Science in Guidance, Control and Dynamics (MSEE) is designed to prepare students for careers as engineers in the Missile and Aerospace industries. The curriculum is developed with strong emphasis in courses related to guidance control and dynamics with applications in Electrical engineering.

The MSEE is awarded upon completion of a minimum of 30 credit hours, including 9 credit hours of required courses, 15 credit hours of elective courses selected from an approved list of courses, and an additional 6 credit hours in either a thesis or nonthesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor’s Degree

Track Prerequisites

Bachelor’s degree in Electrical Engineering or closely related discipline.

A student with an undergraduate degree outside of the selected departmental discipline may also be required to satisfy an articulation program. Substitutions to the program of study must meet with the approval of the adviser and the department.

Prerequisites

- MAP 2302- Differential Equations
- EEL 3123C- Linear Circuits II
- EEL 3657- Linear Control Systems

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor’s degree in Electrical Engineering or closely related discipline with a minimum GPA 3.0.
- The GRE is not required for admission to this program.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the MSEE graduate program director for further information.

  - EML5237 - Intermediate Mechanics of Materials (3)
  - EML5713 - Intermediate Fluid Mechanics (3)
  - EML6155 - Convection Heat Transfer (3)
  - EML6157 - Radiation Heat Transfer (3)
  - EML6211 - Continuum Mechanics (3)
  - EML6223 - Advanced Vibrational Systems (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - EEL 6971 - Thesis The thesis option requires 30 credit hours, at least half of which must be at the 6000 level and will include 6 credit hours of thesis credit. A student pursuing the thesis program may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the program of study and the proposed thesis topic. Students must register for the course a minimum of two times during their graduate career in the master's program (thesis option). The students must also complete the course with a satisfactory (S) grade in both attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements
  - Nonthesis Option
    - Earn at least 6 credits from the following types of courses:
      - Additional hours of elective coursework. The nonthesis option is primarily designed to meet the needs of part-time students and requires 30 credit hours of course work, at least one-half of which must be at the 6000 level. *For students who are not on campus and upon prior approval from the graduate coordinator, XXX 6908 Independent Study (3 credit hours) may be substituted as the student's learning experience. If the substitution of XXX 6908 is approved, a letter must be provided by the member of the faculty supervising the independent study.

Grand Total Credits: 30

Track Details

All students must identify an adviser and file an official degree program of study prior to the completion of 9 credit hours of study. The program of study must be approved by the department and therefore students should consult with the ECE Graduate Director for assistance in filling out their program of study.

A student with an undergraduate degree outside of the selected departmental discipline may also be required to satisfy an articulation program. Substitutions to the program of study must meet with the approval of the adviser and the department.

Equipment Fee

Students in the MSEE program pay a $90 equipment fee each semester that they are enrolled.

Licensure Disclosure
This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Engineering-Management-PhD.pdf.
Program Description

The Electrical Engineering PhD (one of the three PhD programs offered by the School of EECS) prepares students for careers in research or academia with specializations including Communications, Digital Signal Processing/Image Processing, Controls and Robotics, Electromagnetics, Electro-Optics, Photonics, Power Electronics and Electronics, Solid-State/Microelectronics, and VLSI Design.

The specific research that each one of the EECS faculty conduct can be found at the School of EECS website (www.eecs.ucf.edu).

The Doctor of Philosophy in Electrical Engineering is primarily intended for students with a master’s degree in Electrical Engineering or a closely related discipline who wish to pursue a career in research or academia. Specializations include Communications, Digital Signal Processing/Image Processing, Controls and Robotics, Electromagnetics, Electro-Optics, Photonics, Power Electronics and Electronics, and Solid-State/Microelectronics.

Research interests of the Electrical Engineering faculty include antennas, microwave and millimeter circuits/devices, communication systems, digital signal/image processing, power electronics, electronic circuits, IFF devices, electromagnetic theory, radar and microwave remote sensing, speech processing, VLSI design, spread spectrum systems, SAW and ACT devices, spectral estimation, solid state device modeling and computer-aided design (CAD) techniques, communication networks, integrated services digital networks, neural networks, systems and controls, robotics, robust control, computer control, microelectronics, semiconductors, thin films, power system stability, bipolar device modeling, solid state lasers, optical propagation, fiber optics, optical signal processing, laser-induced damage, optical testing, diffractive optics, phase conjugation, infrared detectors, Fourier optics, lens design, and nonlinear optics.

The Electrical Engineering PhD degree requires a minimum of 72 credit hours beyond the bachelor's degree. Of these 72 hours, a minimum of 36 credit hours must be formal coursework, exclusive of independent study coursework. A minimum of 15 credit hours with up to a maximum of 24 credit hours of dissertation hours can be credited toward the degree. No more than 12 credit hours of Independent Study are allowed. The remaining hours can be a combination of formal coursework and/or pre-candidacy doctoral research.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Bachelor's or Master's degree in Electrical Engineering or a closely related discipline.

Undergraduate articulation courses are required to be completed prior to admission for students who do not hold a Bachelor of Science degree in Electrical Engineering. In particular, the articulation courses specified below, plus all of the prerequisite string which any of them require, must be completed prior to admission. Grades of "B" or higher must be obtained in each articulation course specified below. Articulation courses are not eligible for inclusion on a graduate Program of Study.

- EEL 3123C Network and Systems
- EEE 3307C Electronics I
- EEL 3470 Electromagnetic Fields
- EEL 3552 Signal Analysis and Communications
- EEE 3350 Semiconductor Devices I

In addition, choose one of the following:

- EEL 3657 Linear Control Systems
- EEE 4309C Electronics II
- EEL 4750 Digital Signal Processing Fundamentals

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Résumé.
- Statement about educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting applicants into their research programs.

Additional courses may also be required to correct any course deficiencies. Students should contact the graduate program director for further information.

Degree Requirements

Required Courses
36 Total Credits

- Complete 1 of the following
  - The Electrical Engineering Program supports a number of specialization areas. These technical areas are (in alphabetical order): Electromagnetics and Optics (EO), Signal Processing and Systems (SPS), and Micro-Systems and Nano-Systems (MNS). The Micro-Systems and Nano-Systems area covers the typical Electrical Engineering topic areas of Electronics, Power Electronics and Micro-Electronics, while the Signal Processing and Systems area covers the typical electrical topic areas of communications, controls, and signal processing. Please contact your graduate program assistant Nicole Mitchell at nicole@eecs.ucf.edu or 407-823-0378 for a list of faculty within each specialization area. For each one of these areas there is a suggested list of courses stated below. Students are also allowed to take courses from other specialization areas, but the majority of their courses should be chosen from courses in their specialization area.

Electromagnetics and Optics (EO) - Suggested Courses

- Earn at least 36 credits from the following:
  - EEE5542 - Random Processes I (3)
  - EEE5557 - Introduction to Radar Systems (3)
  - EEL5437C - Microwave Engineering (4)
  - EEL5439C - RF and Microwave Active Circuits (4)
  - EEL5462 - Antenna Analysis and Design (3)
  - EEL5462 - Antenna Analysis and Design (3)
  - EEL6425C - RF and Microwave Measurement Techniques (4)
  - EEL6482 - Electromagnetic Theory I (3)
  - EEL6481 - Numerical Techniques in Electromagnetics (3)
  - EEL6489 - Advanced Topics in Electromagnetics and Microwaves (3)
  - EEL6504 - Communications Systems Design (3)
  - EEL6530 - Communication Theory (3)
  - MAP5426 - Special Functions (3)
  - MAP5435 - Advanced Mathematics for Engineers (3)
  - MAP6424 - Transform Methods (3)
  - OSE5041 - Introduction to Wave Optics (3)
  - OSE5414 - Fundamentals of Optoelectronic Devices (3)
  - OSE6111 - Optical Wave Propagation (3)
  - OSE5115 - Interference and Diffraction (3)
  - OSE6143 - Fiber Optics Communication System (3)
  - OSE6211 - Imaging and Optical Systems (3)
- OSE6445 - Fundamentals of Ultrafast Optics (3)
- OSE6455C - Photonics Laboratory (3)
- OSE6615L - Optoelectronic Device Fabrication Laboratory (3)
- OSE5525 - Laser Engineering (3)

Micro-Systems and Nano-Systems (MNS) - Suggested Courses

Earn at least 36 credits from the following:

- BME5572 - Biomedical Nanotechnology (3)
- EEL5245 - Power Electronics (3)
- EEE5332C - Thin Film Technology (3)
- EEE5352 - Semiconductor Material and Device Characterization (3)
- EEE5353 - Semiconductor Device Modeling and Simulation (3)
- EEE5356C - Fabrication of Solid-State Devices (4)
- EEE5370 - Operational Amplifiers (3)
- EEE5378 - CMOS Analog and Digital Circuit Design (3)
- EEE5390C - Full-Custom VLSI Design (3)
- EEE5555 - Surface Acoustic Wave Devices and Systems (3)
- EEE6317 - Power Semiconductor Devices and Integrated Circuits (3)
- EEE6358 - Advanced Semiconductor Device I (3)
- EEL6246 - Power Electronics II (3)
- EEE6326C - MEMS Fabrication Laboratory (3)
- EEE6338 - Advanced Topics in Microelectronics (3)

Signal Processing and Systems (SPS) - Suggested Courses

Earn at least 36 credits from the following:

- EEE5513 - Digital Signal Processing Applications (3)
- EEE5542 - Random Processes I (3)
- EEE5557 - Introduction to Radar Systems (3)
- EEE6504 - Adaptive Digital Signal Processing (3)
- EEL5173 - Linear Systems Theory (3)
- EEL5630 - Digital Control Systems (3)
- EEL5669 - Introduction to Robotics and Autonomous Vehicles (3)
- EEL5820 - Image Processing (3)
- EEL5820 - Image Processing (3)
- EEL6026 - Optimization of Engineering Systems (3)
- EEL6504 - Communications Systems Design (3)
- EEL6530 - Communication Theory (3)
- EEL6590 - Advanced Topics in Communications (3)
- EEL6619 - Nonlinear Robust Control and Applications (3)
- EEL6621 - Nonlinear Control Systems (3)
- EEL6662 - Advanced Robotics (3)
- EEL6667 - Mobile Robotic Systems (3)
- EEL6671 - Modern and Optimal Control Systems (3)
- EEL6674 - Optimal Estimation for Control (3)
- EEL6616 - Adaptive Control (3)
- EEL6683 - Cooperative Control of Networked Autonomous Systems (3)
- EEL6812 - Introduction to Neural Networks (3)
- CAP5415 - Computer Vision (3)
- CAP6419 - 3D Computer Vision (3)
- CAP6411 - Computer Vision Systems (3)
- CAP6412 - Advanced Computer Vision (3)

Elective Courses
21 Total Credits

Earn at least 21 credits from the following types of courses:

Additional elective courses listed above. May include formal coursework, directed research hours, doctoral research hours, dissertation research, and no more than 12 credit hours of Independent Study.

Dissertation
15 Total Credits

Earn at least 15 credits from the following types of courses:

XXX 7980 Dissertation Research The program will only allow students to complete up to 24 hours of dissertation coursework in XXX 7980. The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website at least two weeks before the defense date.

Qualifying Review
0 Total Credits

The Qualifying Review relies on annual appraisals of the student's progress conducted by the student's research/academic adviser and advisory committee, once formed. The student's appraisal template that the adviser completes will assess the student's academic performance (course performance) and research performance. On an annual basis, and based on the completed PhD Student Annual Review template, as well as additional student documentation attached with approval of the adviser, the EECS Graduate Committee will rate the student's performance as "Above Expectation," "At Expectation," or
"Below Expectation" toward the completion of the PhD degree. Students must pass the Qualifying Review no later than the deadline, which is the semester in which they complete 24 credit hours after admission or within two calendar years after admission, whichever occurs later. If a student has passed the Qualifying Review, then the student is eligible to continue PhD studies. However, a student who does not pass the Qualifying Review by the deadline will be dismissed from the degree program and will be given the opportunity to complete a master's degree (if applicable).

**Dissertation Committee**

0 Total Credits

- PhD Dissertation Committees for this degree program must have all of the below characteristics:
  - consist of at least five committee members including the committee chair
  - the committee chair must be either a Regular Appointment faculty member in EECS or a Secondary-Joint Appointment faculty member in EECS
  - at least 50% of committee members (when tabulated including the chair) must be EECS regular faculty
  - the majority of committee members must vote in favor of passing for the student to Pass
  - in addition to the above, all college and university requirements (such as one member outside of EECS) must be met. Joint faculty members may serve as committee chairs, but graduate faculty scholars may not serve as committee chairs.

**Candidacy Examination**

0 Total Credits

- After passing the Qualifying Review, students are required to successfully complete the candidacy examination in order to demonstrate readiness for preliminary research in a chosen field of study. This exam is administered by the student's dissertation advisory committee. Preparedness for taking the candidacy examination requires that the student must demonstrate his/her readiness for the PhD program in Electrical Engineering by authoring an accepted journal article or high-quality conference paper. The student must be the first author on this paper and the research advisor must also be an author on this paper to be used for Candidacy. The publication should reflect the work related to the student's PhD research. Candidacy is normally attempted at the completion of required coursework and must be passed before registering for doctoral dissertation hours (EEL 7980). Continuous enrollment in at least 3 hours of doctoral dissertation hours is required once a student starts taking dissertation credits.

**Admission to Candidacy**

0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours:
  - Completion of all required formal coursework, except for dissertation hours.
  - Successful completion of the candidacy examination.
  - The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
  - Submission of an approved program of study. Signed and well-formed Doctoral Committee Candidacy Status form and associated paperwork (dissertation advisory committee and program of study, etc.) must be submitted to the Electrical and Computer Engineering Graduate Office for processing on or before the last day to defend Dissertation during the semester prior to enrolling in dissertation credits.

**Dissertation Proposal Exam**

0 Total Credits

- After passing the candidacy examination, the student will write a dissertation proposal and present it to the dissertation advisory committee for approval. The proposal must include a description of the research performed to date and the research planned to be completed for the dissertation. The presentation of a written dissertation proposal must be deemed as passing requirements by the majority of the dissertation committee.

Grand Total Credits: 72

**Program Details**

Formal coursework required is 36 credit hours, exclusive of independent study and research. A minimum of 15 credit hours of dissertation hours are required. All other credit hours will be determined with a faculty adviser. Students admitted with an earned master's degree may request to have up to 30 of those credit hours counted toward their doctoral program. The student's doctoral adviser in conjunction with the graduate office will determine the precise number of hours to be counted subject to Graduate Studies regulations.

The Program of Study (POS) form must be approved by an adviser in the selected specialization area no later than the end of the second semester after admission. The program of study must meet all the university requirements specified in the graduate catalog. Details about this program are located in the Electrical Engineering PhD Handbook.

**Equipment Fee**

Students in the Electrical Engineering PhD program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

**Independent Learning**

The Independent Learning Requirement is met by successful completion of the student's candidacy and dissertation defense examinations.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance
Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241
finaid@ucf.edu

Is this program available 100% online?
Yes

UCF Online

Please note: Engineering Management (MS) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Engineering-Management-MS.pdf.
Program Description

The Master of Science in Engineering Management degree in Industrial Engineering focuses on effective decision-making in engineering and technological organizations.

The degree is offered on campus and can be taken entirely through the Florida Engineering Educational Delivery System (FEEDS), which provides video-streamed versions of classes over the internet.

The Professional Engineering Management (PEM) track is designated as a Professional Science Master's (PSM) degree. Please scroll to the bottom of this page for further details on this Track.

This program can be taken entirely through the Florida Engineering Educational Delivery System (FEEDS), which provides video-streamed versions of classes over the Internet.

The Engineering Management MSEM degree requires an undergraduate degree in Engineering or a closely related discipline. Students with undergraduate degrees outside of industrial engineering may be required to take additional prerequisites. An approved program of study must be developed in consultation with the graduate program director. The total number of hours is 30 credit hours.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Prerequisites

- Mathematics through Calculus II (MAP 2312)

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended
- The GRE is not required for admission to this program.
- Résumé or Curriculum Vita
- Goal statement
  - The goal statement should discuss all relevant professional background and any previous research and/or teaching experience. The statement should explain the motivation behind the pursuit of a Master's degree in Industrial Engineering. Future educational and career goals after the completion of the applicant's master study should be discussed.
  - If the applicant is interested in completing a Master thesis, then the applicant must clearly describe the particular area of research interest. The applicant should identify at least one UCF faculty member who shares a similar research focus and is believed to be best suited to serve as a potential thesis advisor.
  - The goal statement should be between 500 and 1,000 words.
- Two letters of recommendation
  - The letters of recommendation should be from faculty members, university administrators, and employers with a supervisory role of the applicant. The letters, which must be current to the application and must not be for another degree program, should address the educational and career goals of the applicant. The letter writers should also know the applicant well enough to discuss the applicant's capacity to perform, excel and succeed in a graduate program. Letters for Master's thesis students must discuss the applicant's ability to perform graduate-level research.
  - Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Degree Requirements

Required Courses

9 Total Credits

- Complete the following:
  - EIN5140 - Project Engineering (3)
  - ESI6551 - Systems Engineering (3)
  - EIN6357 - Advanced Engineering Economic Analysis (3)

Concentration Courses

9 Total Credits

- Complete the following:
  - EINS108 - The Environment of Technical Organizations (3)
  - EIN6370 - Innovation in Engineering Design (3)
  - EIN6182 - Engineering Management (3)

Thesis/Nonthesis Option

12 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 12 credits from the following types of courses:
      - EIN 6971 - Thesis - 6 Credit Hours Additional Elective Coursework - 6 Credit Hours  
        Thesis students must complete an independent research project and then write and successfully defend their thesis.  
        Furthermore, an additional 6 credit hours of electives are required beyond the 18 credit hours of required courses described above.
  - Nonthesis Option
    - Complete all of the following
      - Earn at least 9 credits from the following types of courses:
        Additional Elective Coursework - 9 Credit Hours  
        Nonthesis students must take 9 additional credit hours of electives beyond the 21 credit hours of required courses described above.
      - Complete the following:
        - EIN6950 - Industrial and Systems Engineering Capstone (3)
      - The nonthesis option requires a capstone course. The capstone course should be completed toward the end of the student's graduate plan of study.  
        As part of the requirements of this course, the student will complete an independent capstone project on a topic relevant to the industrial and systems engineering field and approved by the instructor.  
        Students are expected to use and leverage knowledge obtained in the program to complete the project.  
        This course serves as the culminating experience for students and shows their engagement in independent learning.

Grand Total Credits: 30

Program Details

Equipment Fee

Students in the Engineering Management MSEM program pay a $90 equipment fee each semester that they are enrolled. For part-time students, the equipment fee is $45 per semester.

Independent Learning

A research project serves as the independent learning experience for thesis students. Nonthesis students are required to complete the department's capstone course toward the end of their program.

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Engineering-Management-MS.pdf.
Track Description

The Professional Project & Systems Engineering (PP&SE) Track is a cohort-based program that offers a customized and personalized approach to learning engineering management with a curriculum developed based upon the needs of industry. The PP&SE Track is designed to be a lock-step, cohort-based program that can be completed in 18 to 24 months. For information about the start of the next cohort, please contact the PP&SE Program Director Dr. Timothy Kotnour (timothy.kotnour@ucf.edu).

The PP&SE track in the Master of Science in Engineering Management (MSEM) program focuses on effective decision-making and successful project delivery of innovative solutions in engineering and technological organizations. The program is tailored to the needs of the experienced, working early and mid-career professionals.

The MSEM program requires an undergraduate degree in engineering or a closely related discipline. Students with undergraduate degrees outside of industrial engineering may be required to take additional prerequisite courses.

Research studies are required in one or more courses. The research study and report will focus on reviewing and analyzing contemporary research in the profession in order to help students acquire knowledge and skills pertaining to research-based best practices.

Courses may be substituted or added to provide domain depth based upon the student or customer's needs.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A bachelor's degree in Engineering or a closely related discipline.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Engineering or a closely related discipline.
- The GRE is not required for admission to this program.
- A letter of recommendation from the corporate sponsor.
- Résumé.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Graduate Application Deadlines

For information about the start of the next cohort, please contact the PP&SE Program Director Dr. Timothy Kotnour (timothy.kotnour@ucf.edu).

**Degree Requirements**

**Master Core Courses**
9 Total Credits

- Complete the following:
  - EIN5140 - Project Engineering (3)
  - ESI6551 - Systems Engineering (3)
  - EIN6357 - Advanced Engineering Economic Analysis (3)

**Elective Courses**
27 Total Credits

- Complete the following:
  - EIN5108 - The Environment of Technical Organizations (3)
  - EIN5117 - Management Information Systems I (3)
  - EIN6182 - Engineering Management (3)
  - EIN6326 - Technology Strategy (3)
  - EIN6370 - Innovation in Engineering Design (3)
  - ESI5219 - Engineering Statistics (3)
  - ESI6358 - Decision Analysis (3)
  - ESI6511 - Systems Integration and Testing (3)
  - ESI6552 - Systems Architecture (3)

**Comprehensive Examination**
0 Total Credits

- Students must successfully pass an oral comprehensive examination as part of a capstone exercise (usually in the form of EIN 6182 - Engineering Management) to satisfy all degree requirements. In some instances, industry might require students to participate in a capstone course to integrate the material in a specific project related to the industry sponsor's needs. Typically, this additional class is in the form of EIN 6950 - Industrial and Systems Engineering Capstone which is a 3-credit hour course. Please see the program director for cohort-specific details.

Grand Total Credits: **36**

**Track Details**

**Equipment Fee**

Students in the Engineering Management MSEM program pay a $90 equipment fee each semester that they are enrolled. For part-time students, the equipment fee is $45 per semester.

**Independent Learning**

The Independent Learning Requirement is met by successful completion of the research studies required in individual courses, EIN 6182 - Engineering Management, and the capstone project, which requires that students integrate material from all the courses in their program.

**Financial Information**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Environmental-Engineering-MS.pdf.
Program Description
The Master of Science in Environmental Engineering program is for students with science, math, or a similar background, and usually requires a number of undergraduate engineering courses as articulation to become fully prepared for graduate work in environmental engineering.

Applicants to the program are expected to be knowledgeable in topics including chemistry, process design, water resources, and air pollution. The program focuses on pollution control, pollution prevention, and the correction of pollution effects on natural and man-made environments.

The program is noted for its strong faculty research interests, and areas of study include drinking water treatment, wastewater treatment, solid and hazardous waste management, atmospheric pollution control and modeling, community noise abatement, and stormwater management. The program’s overall mission is to prepare students for careers in environmental engineering with consulting firms; within industry; within federal, state, and local governments; and/or in higher education.

The program’s overall mission is to prepare students for Environmental Engineering careers in federal, state, and local governments; higher education; consulting; and industry.

Other key objectives include:
- Producing graduates who have technical knowledge in critical areas of environmental engineering
- Providing a professional engineering education that challenges our graduates to think critically
- Forming and maintaining partnerships with industry, government agencies, and professional organizations
- Developing awareness of the changing environmental needs of society and the global environment.

This degree has 2 tracks: Accelerated BS to MS Track and Environmental Engineering Sciences Track. Please scroll to the bottom of this page for further details on these Tracks.

Application Requirements
For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

**Track Description**

The Environmental Engineering MS, Accelerated BS to MS Track is for students with science, math, or a similar background, and usually requires a number of undergraduate engineering courses as articulation to become fully prepared for graduate work in environmental engineering. See undergraduate engineering major requirements in the Undergraduate Catalog.

The program allows highly qualified undergraduate majors in Civil Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program.

Applicants to the program are expected to be knowledgeable in topics including chemistry, process design, water resources, and air pollution. The program focuses on pollution control, pollution prevention, and the correction of pollution effects on natural and man-made environments.

The program is noted for its strong faculty research interests, and areas of study include drinking water treatment, wastewater treatment, solid and hazardous waste management, atmospheric pollution control and modeling, environmental water resources, and stormwater management. The program's overall mission is to prepare students for careers in environmental engineering with consulting firms; with industry; within federal, state, and local governments; and/or in higher education.

The program's overall mission is to prepare students for Environmental Engineering careers in federal, state, and local governments; higher education; consulting; and industry.

Other key objectives include:

- Producing graduates who have technical knowledge in critical areas of environmental engineering
- Providing a professional engineering education that challenges our graduates to think critically
- Forming and maintaining partnerships with industry, government agencies, and professional organizations
- Developing awareness of the changing environmental needs of society and the global environment.

**Track Prerequisites**

A Bachelor of Science degree in civil engineering or another closely related engineering degree from UCF.

**Prerequisites (Articulation)**

The completion of prerequisite courses may be required before students can begin the program graduate coursework.

The following mathematics prerequisite requirement is for all students.

- Calculus through Differential Equations

The following prerequisites (or equivalent courses) may be required for students with appropriate science or math undergraduate degrees.

- ENV 3001 - Introduction to Environmental Engineering 3 Credit Hours
- CWR 3201 - Engineering Fluid Mechanics 3 Credit Hours
- STA 3022 - Probability and Statistics for Engineers 3 Credit Hours
- CWR 4202 - Hydraulics 3 Credit Hours
- CWR 4120 - Hydrology 3 Credit Hours
- EES 4111C - Biological Process Control 3 Credit Hours
- EES 4202C - Chemical Process Control 3 Credit Hours
- EGN 3613 - Engineering Economic Analysis 2 Credit Hours
- ENV 4120 - Air Pollution Control 3 Credit Hours
- ENV 4531 - Environmental Engineering Operations and Processes I 3 Credit Hours

**Application Requirements**

The Environmental Engineering MS, Accelerated BS to MS Track allows highly qualified University of Central Florida undergraduate majors in Civil Engineering to begin taking graduate level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline but was not previously part of this accelerated program, then they should apply to the Environmental Engineering MS.

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their graduate program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

Degree Requirements

Required Courses
12 Total Credits

- Complete all of the following
  - Complete the following:
    - ENV6016 - Biological Treatment Systems in Environmental Engineering (3)
    - ENV6015 - Physical/Chemical Treatment Systems in Environmental Engineering (3)
  - Complete at least 1 of the following:
    - ENV6519 - Aquatic Chemical Processes (3)
    - ENV6616 - Ecological Engineering and Receiving Water Impacts (3)
    - ENV5410 - Water Treatment (3)
    - EES5318 - Industrial Ecology (3)
    - ENV6558 - Industrial Waste Treatment (3)
  - Earn at least 3 credits from the following types of courses:
    Any CWR course at the 5000 or 6000 level 3 Credit Hours. See "Courses" on the left-hand menu.

Elective Courses
12 Total Credits

- Earn at least 12 credits from the following types of courses:
  All students, both thesis and nonthesis, must take 12 credit hours of elective courses. The electives should be chosen from courses with ENV or CWR prefixes although other appropriate graduate-level courses (5000 or 6000) may be allowed. All electives must be chosen with the consent of the student's adviser.

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      XXX 6971 - Thesis The thesis option requires that students conduct an approved research study, write and successfully defend a thesis. The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website and on the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
  - Nonthesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following types of courses:
        The nonthesis option requires 6 more credit hours of electives in addition to the 12 credit hours of electives described above.
        Nonthesis students are required to take at least one course with an asterisk. This criteria is fulfilled by taking the required ENV 6106 - Theory and Practice of Atmospheric Dispersion Modeling course. It is also met by the elective courses: ENV 6106 - Theory and Practice of Atmospheric Dispersion Modeling 3 Credit Hours * ENV 6126 - Design of Air Pollution Controls 3 Credit Hours * Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of an end-of-program portfolio. The portfolio requirements are listed on the CECE website.

Grand Total Credits: 30

Track Details

At least 24 credit hours of the course work must be exclusive of thesis and research, and Directed Research (XXX 6918) is not permitted in MS program of study.

The thesis option is primarily for students who can devote a full-time effort to their research and is required for all students supported on contracts and grants, as well as any student receiving department financial support. The nonthesis option is strongly recommended for part-time students and requires an end-of-program portfolio as a requirement for graduation.

Research studies or projects are required in one or more courses. The research study or project will focus on reviewing and analyzing contemporary research or engineering issues in a student's particular specialization within the profession. They are intended to help students acquire knowledge and skills pertaining to best practices in that specialization area.

Equipment Fee

Students in the Environmental Engineering MS program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning

A research or design project serves as the independent learning experience for thesis students. Nonthesis students are required to take at least one of the courses marked with an asterisk (*), denoting an independent learning experience, and an end-of-program portfolio.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Is this track available 100% online?

Yes

UCF Online

Please Note: Environmental Engineering MS may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.
Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit [https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Environmental-Engineering-MS.pdf](https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Environmental-Engineering-MS.pdf).

Track Description

The Environmental Engineering Sciences track in the Environmental Engineering MS program is for students with science, math, or a similar background, and usually requires a number of undergraduate engineering courses as articulation to become fully prepared for graduate work in environmental engineering.

Applicants to the program are expected to be knowledgeable in topics including chemistry, process design, water resources, and air pollution. The program focuses on pollution control, pollution prevention, and the correction of pollution effects on natural and man-made environments.

The program is noted for its strong faculty research interests, and areas of study include drinking water treatment, wastewater treatment, solid and hazardous waste management, atmospheric pollution control and modeling, environmental water resources, and stormwater management. The program’s overall mission is to prepare students for careers in environmental engineering with consulting firms; with industry; within federal, state, and local governments; and/or in higher education.

Other key objectives include:

- Producing graduates who have technical knowledge in critical areas of environmental engineering
- Providing a professional engineering education that challenges our graduates to think critically
- Forming and maintaining partnerships with industry, government agencies, and professional organizations
- Developing awareness of the changing environmental needs of society and the global environment.

The Environmental Engineering Sciences track offers both thesis and nonthesis options with each requiring 30 credit hours of courses beyond the baccalaureate degree. Students choosing the thesis option must take 12 credit hours of required courses, 12 credit hours of electives, and 6 thesis credit hours. Students choosing the nonthesis option must take 12 credit hours of required courses, 18 credit hours of electives, and submit an end-of-program portfolio. Students develop an individualized program of study with a faculty adviser.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor’s Degree**

Track Prerequisites

Those applying to the programs without a directly related undergraduate degree should closely check the prerequisites. For students with nontechnical undergraduate degrees, it is recommended that a second undergraduate degree in Environmental Engineering be completed before applying to graduate school.

Articulation requirements will be determined by the department as part of the admission process and may be modified after discussion with the student and the advisor.

**Prerequisites (Articulation)**

The completion of prerequisite courses may be required before students can begin the program graduate coursework.

The following mathematics prerequisite requirement is for all students.

- Calculus through Differential Equations

The following prerequisites (or equivalent courses) may be required for students with appropriate science or math undergraduate degrees.

- ENV 3001 - Introduction to Environmental Engineering 3 Credit Hours
- CWR 3201 - Engineering Fluid Mechanics 3 Credit Hours
- STA 3032 - Probability and Statistics for Engineers 3 Credit Hours
- CWR 4202 - Hydraulics 3 Credit Hours
- CWR 4120 - Hydrology 3 Credit Hours
- EES 4111C - Biological Process Control 4 Credit Hours
- EES 4202C - Chemical Process Control 4 Credit Hours
- EGN 3613 - Engineering Economic Analysis 2 Credit Hours
- ENV 4120 - Air Pollution Control 3 Credit Hours
- ENV 4531 - Environmental Engineering Operations and Processes I 3 Credit Hours
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their graduate program.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

Those applying to the programs without a directly related undergraduate degree should closely check the prerequisites. For students with nontechnical undergraduate degrees, it is recommended that a second undergraduate degree in Environmental Engineering be completed before applying to graduate school.

Program Description

The Master of Science in Environmental Engineering program was created for students who have an undergraduate degree in environmental engineering or any other closely related degree in engineering. Applicants are expected to be knowledgeable in topics including chemistry, process design, water resources, and air pollution. The program focuses on pollution control, pollution prevention, and the correction of pollution effects on natural and man-made environments.

The program is noted for its strong faculty research interests, and areas of study include drinking water treatment, wastewater treatment, solid and hazardous waste management, atmospheric pollution control and modeling, environmental water resources, and stormwater management. The program's overall mission is to prepare students for careers in environmental engineering with consulting firms; with industry; within federal, state, and local governments; and/or in higher education.

The program's overall mission is to prepare students for Environmental Engineering careers in federal, state, and local governments; higher education; consulting; and industry. Other key objectives include:

- Producing graduates who have technical knowledge in critical areas of environmental engineering
- Providing a professional engineering education that challenges our graduates to think critically
- Forming and maintaining partnerships with industry, government agencies, and professional organizations
- Developing awareness of the changing environmental needs of society and the global environment.

The Environmental Engineering MSEnvE program offers both thesis and nonthesis options with each requiring 30 credit hours of courses beyond the bachelor's degree. Prerequisites are required depending upon the discipline of a student's bachelor's degree. The thesis option is primarily for those who can devote a full-time effort to their research project and is required for all students supported by contracts and grants, as well as any student receiving department financial support. The nonthesis option is recommended strongly for part-time students and requires submission of an end-of-program portfolio as a requirement for graduation.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Those applying to the programs without a directly related undergraduate degree should closely check the prerequisites. Students with nontechnical undergraduate degrees are recommended to complete a second undergraduate degree in Environmental Engineering before applying to graduate school.

Final articulation requirements will be determined by the department after students have been admitted and after discussions with their advisers.

Prerequisites (Articulation)

The completion of prerequisite courses may be required before students can begin program course work. Please contact the program director to review your background and determine the prerequisites that you may need to take.

The following mathematics prerequisite requirement is for all students.

- Calculus through Differential Equations

The following prerequisites may be required for students with undergraduate degrees in Civil, Mechanical, or Chemical Engineering. Equivalent courses may be acceptable.

- ENV 3001 Introduction to Environmental Engineering 3 Credit Hours
- STA 3032 Probability and Statistics for Engineers 4 Credit Hours
- CWR 4202 Hydraulics 3 Credit Hours
- ENV 4120 Air Pollution Control 3 Credit Hours
- ENV 4531 Environmental Engineering Operations and Processes I 3 Credit Hours

The following prerequisites may be required for students with undergraduate degrees in other Engineering disciplines.

- ENV 3001 Introduction to Environmental Engineering 3 Credit Hours
- STA 3032 Probability and Statistics for Engineers 3 Credit Hours
- CWR 4202 Hydraulics 3 Credit Hours
- CWR 4120 Hydrology 3 Credit Hours
- EES 4111C Biological Process Control 3 Credit Hours
- EES 4202C Chemical Process Control 3 Credit Hours
- ENV 4120 Air Pollution Control 3 Credit Hours
- ENV 4531 Environmental Engineering and Processes I 3 Credit Hours
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting applicants into their research programs.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

Those applying to the programs without a directly related undergraduate degree should closely check the prerequisites. Students with nontechnical undergraduate degrees are recommended to complete a second undergraduate degree in Environmental Engineering before applying to graduate school.

Final articulation requirements will be determined by the department after students have been admitted and after discussions with their advisers.

Degree Requirements

Required Courses
12 Total Credits

- Complete all of the following
  - Complete the following:
    - ENV6015 - Physical/Chemical Treatment Systems in Environmental Engineering (3)
    - ENV6015 - Physical/Chemical Treatment Systems in Environmental Engineering (3)
  - Complete at least 1 of the following:
    - ENV6558 - Industrial Waste Treatment (3)
    - ENV5410 - Water Treatment (3)
    - EES5318 - Industrial Ecology (3)
  - Earn at least 3 credits from the following types of courses:
    Any CWR course at the 5000 or 6000 level

Non Thesis Students - Required Course Selection
0 Total Credits

- Nonthesis students are required to take at least one course that provides an independent learning experience for students, consisting of a research or design project. This requirement is fulfilled in the required course ENV 6016 above and is also fulfilled by the elective course ENV 6126 Design of Air Pollution Controls* (3 credit hours) and the elective course ENV 6106 Theory and Practice of Atmospheric Dispersion Modeling (3 credit hours).

Elective Courses
12 Total Credits

- Earn at least 12 credits from the following types of courses:
  All students, both thesis and nonthesis, are required to take 12 credit hours of elective courses. Courses that comprise the elective part of the program are selected in accordance with the general requirements of the College of Engineering and Computer Science and often include courses taken from the following two sub-discipline areas: Environmental Specialization—Any of the appropriate ENV graduate-level courses (5000 or 6000) with the consent of the student's adviser Water Resources Specialization—Any of the appropriate CWR graduate-level courses (5000 or 6000) with the consent of the student's adviser

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      XXX 6971 - Thesis Thesis students are expected to complete an independent research project and then write and successfully defend their thesis. The College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website and on the Events Calendar and on the College of Graduate Studies website at least two weeks before the defense date.
  - Nonthesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following types of courses:
        Nonthesis students must take 6 more credit hours of electives in addition to the 12 credit hours of electives described above.
        Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of an end-of-program portfolio. The portfolio requirements are listed on the CECE website.

Grand Total Credits: 30
Program Details

Students choosing the thesis option must take 12 credit hours of required credit hours of electives, and 6 thesis credit hours. Students choosing the non-thesis option must take 12 credit hours of required courses, 18 credit hours of electives, and submit a portfolio (which includes a comprehensive final examination) before graduating.

Students develop an individualized program of study with a faculty adviser. At least 24 credit hours in the program of study must be earned exclusive of thesis and research courses and Directed Research (XXX 6918) is not permitted in the MSEnvE program of study.

Research studies or projects are required in one or more courses. The research study or project will focus on reviewing and analyzing contemporary research or engineering issues in a student's particular specialization within the profession in order to help students acquire knowledge and skills pertaining to best practices in that specialization area.

Equipment Fee

Students in the Environmental Engineering MSEnvE program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning

A research or design project serves as the independent learning experience for thesis students. Non-thesis students are required to take at least one of the courses marked with an asterisk (*), denoting an independent learning experience, and submit an end-of-program portfolio.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Is this track available 100% online?

No

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Environmental-Engineering-MSVE.pdf.

Track Description

The Master of Science in Environmental Engineering, Accelerated BS to MSEnvE track was created for students who have an undergraduate degree in environmental engineering or any other closely related degree in engineering. Applicants are expected to be knowledgeable in topics including chemistry, process design, water resources, and air pollution. The program focuses on pollution control, pollution prevention, and the correction of pollution effects on natural and man-made environments.

The program allows highly qualified undergraduate majors in Civil Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program.

The program is noted for its strong faculty research interests, and areas of study include drinking water treatment, wastewater treatment, solid and hazardous waste management, atmospheric pollution control and modeling, environmental water resources, and stormwater management. The program's overall mission is to prepare students for careers in environmental engineering with consulting firms; with industry; within federal, state, and local governments; and/or in higher education.

The program's overall mission is to prepare students for Environmental Engineering careers in federal, state, and local governments; higher education; consulting; and industry. Other key objectives include:

- Producing graduates who have technical knowledge in critical areas of environmental engineering
- Providing a professional engineering education that challenges our graduates to think critically
- Forming and maintaining partnerships with industry, government agencies, and professional organizations
- Developing awareness of the changing environmental needs of society and the global environment.

The Environmental Engineering MSEnvE, Accelerated BS to MSEnvE track offers both thesis and nonthesis options with each requiring 30 credit hours of courses beyond the bachelor's degree. Prerequisites are required depending upon the discipline of a student's bachelor's degree. See undergraduate engineering major requirements in the Undergraduate Catalog.

The thesis option is primarily for those who can devote a full-time effort to their research project and is required for all students supported by contracts and grants, as well as any student receiving department financial support. The nonthesis option is recommended strongly for part-time students and requires submission of an end-of-program portfolio as a requirement for graduation.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor’s Degree**

Track Prerequisites

A Bachelor of Science degree in civil engineering or another closely related engineering degree from UCF.

Prerequisites (Articulation)

The following mathematics prerequisite requirement is for all students.

- Calculus through Differential Equations
Application Requirements

The **Accelerated BS to MSEnvE** track allows highly qualified University of Central Florida undergraduate majors in Civil Engineering to begin taking graduate level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline but was not previously part of this accelerated program, then they should apply to the Environmental Engineering MSEnvE program.

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Admissions decisions are made on the basis of a complete online application only, and not on the basis of any pre-screening. Prospective applicants who are encouraged to apply to their intended graduate program based on the information provided for their pre-screening are not assured of admission or financial assistance when they submit a complete online application. Although it is possible, it is not likely, that prospective applicants who are discouraged from formally applying to a graduate program at the pre-screening stage will be admitted if they elect to submit a complete online application anyway.

In addition to the general UCF graduate application requirements, applicants to this program must provide:
- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in civil engineering or another closely related engineering degree from UCF.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting applicants into their research programs.

The GRE is not required, however, taking the GRE is highly recommended for students wishing to pursue a thesis. In order to be considered for any fellowships, a GRE score is required.

Degree Requirements

Required Courses
12 Total Credits

- Complete all of the following
  - Complete the following:
    - ENV6015 - Physical/Chemical Treatment Systems in Environmental Engineering (3)
    - ENV6016 - Biological Treatment Systems in Environmental Engineering (3)
  - Complete at least 1 of the following:
    - ENV6558 - Industrial Waste Treatment (3)
    - ENV5410 - Water Treatment (3)
    - EES5318 - Industrial Ecology (3)
  - Earn at least 3 credits from the following types of courses:
    Any CWR course at the 5000 or 6000 level

Non Thesis Students - Required Course Selection
0 Total Credits

- Nonthesis students are required to take at least one course that provides an independent learning experience for students, consisting of a research or design project. This requirement is fulfilled in the required course ENV 6016 above and is also fulfilled by the elective course ENV 6126 Design of Air Pollution Controls* (3 credit hours) and the elective course ENV 6106 Theory and Practice of Atmospheric Dispersion Modeling (3 credit hours).

Elective Courses
12 Total Credits

- Earn at least 12 credits from the following types of courses:
  All students, both thesis and nonthesis, are required to take 12 credit hours of elective courses. Courses that comprise the elective part of the program are selected in accordance with the general requirements of the College of Engineering and Computer Science and often include courses taken from the following two sub-discipline areas: Environmental Specialization—Any of the appropriate ENV graduate-level courses (5000 or 6000) with the consent of the student's adviser Water Resources Specialization—Any of the appropriate CWR graduate-level courses (5000 or 6000) with the consent of the student's adviser

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      XXX 6971 - Thesis Thesis students are expected to complete an independent research project and then write and successfully defend their thesis. The College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website and on the Events Calendar and on the College of Graduate Studies website at least two weeks before the defense date.
  - Nonthesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following types of courses:
        Nonthesis students must take 6 more credit hours of electives in addition to the 12 credit hours of electives described above.
        Students are required to complete a culminating experience. The culminating experience for nonthesis MS students is submission of an end-of-program portfolio. The portfolio requirements are listed on the CECE website.

Grand Total Credits: 30
Track Details
Students choosing the thesis option must take 12 credit hours of required credit hours of electives, and 6 thesis credit hours. Students choosing the non-thesis option must take 12 credit hours of required courses, 18 credit hours of electives, and submit a portfolio (which includes a comprehensive final examination) before graduating.

Students develop an individualized program of study with a faculty adviser. At least 24 credit hours in the program of study must be earned exclusive of thesis and research courses and Directed Research (XXX 6918) is not permitted in the MSEnvE program of study.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Environmental-Engineering-PhD.pdf.

Program Description

The Environmental Engineering PhD program focuses on pollution control, pollution prevention, and the correction of pollution effects on natural and man-made environments preparing students for careers in environmental engineering with consulting firms; with industry; within federal, state, and local governments; and/or in higher education.

Areas of study include drinking water treatment, astute treatment, solid and hazardous waste management, atmospheric pollution control and modeling, environmental water resources, and stormwater management. The program's mission is to prepare students for careers in environmental engineering with consulting firms; with industry; within federal, state, and local governments; and/or in higher education.

The program offers an intensive, individually tailored research program suitable for the development of an academic or similar research-oriented career. Graduates of the program will have technical knowledge in critical areas of environmental engineering, critical thinking skills, formed and maintained partnerships with industry, government agencies, and professional organizations, and have developed an awareness of the changing environmental needs of society and the global environment.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree 42 Credit Hours Minimum beyond the Master's Degree

Program Prerequisites

A bachelor's and/or master's degree in Environmental Engineering or a closely related discipline.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's and/or master's degree in Environmental Engineering or a closely related discipline.
- Résumé.
- The GRE is not required for admission to this program.
- Statement of educational, research, and professional career objectives.
- Three letters of recommendation.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Final articulation requirements will be determined by the department after students have been admitted and after discussions with their advisers.

Degree Requirements

0 Total Credits

- At least 27 credit hours of formal course work is required, exclusive of research and independent study. For students entering the program with a completed master's degree, at least 15 of the 27 credit hours (exclusive of independent study and research) must be taken at UCF after the master's program, from approved formal courses. For students entering the program without a master's degree in Environmental Engineering or a closely related discipline, at least 45 credit hours of formal course work are required.

Required Courses

12 Total Credits

- Complete 4 of the following
  - All students completing the PhD program must take one course each from 4 of the 5 technical areas listed below for a total of 12 credit hours.
  - Water Process Engineering
    - Complete the following:
      - ENV6015 - Physical/Chemical Treatment Systems in Environmental Engineering (3)
  - Wastewater Process Engineering
    - Complete the following:
      - ENV6016 - Biological Treatment Systems in Environmental Engineering (3)
  - Waste Treatment/Water Treatment/Industrial Treatment
    - Complete at least 1 of the following:
      - Course Not Found
      - ENV6558 - Industrial Waste Treatment (3)
      - ENV5410 - Water Treatment (3)
      - EES5318 - Industrial Ecology (3)
  - Air Quality Modeling/Air Pollution Control
    - Complete at least 1 of the following:
      - ENV6106 - Theory and Practice of Atmospheric Dispersion Modeling (3)
      - ENV6126 - Design of Air Pollution Controls (3)
  - Water Resources
    - Complete all of the following
- Complete at least 1 of the following:
  - ENV5636 - Environmental and Water Resources Systems Analysis (3)
  - ENV6047 - Environmental Informatics and Remote Sensing (3)
  - Any CWR course at the 5000 or 6000 level may be used as well.

Elective Courses
42 Total Credits

- Complete all of the following
  - To be approved by a faculty adviser and the graduate coordinator Doctoral Research (XXX 7919) - 9 credit hours maximum (more than 9 research credit hours can be taken, but only a maximum of 9 credit hours will be counted toward the program of study). Independent Study (XXX 6908) - 3 credit hours maximum No more than a total of 12 credit hours of doctoral research plus independent study will be included in a program of study. Directed Research (XXX 6918) is not permitted in a PhD program of Study. Students can chose among the following courses with the consent of the academic adviser. Students that have no MS degree should complete the core courses for the MS degree in Environmental Engineering or Environmental Engineering Sciences. In addition, all elective courses will be 5000 or 6000 level courses. In addition, elective courses can be chosen from any of the following disciplines: Engineering: any 5000 or 6000 level course from any Engineering discipline. Typical electives come from Environmental Engineering (ENV courses), Water Resources Engineering (CWR courses), Civil Engineering, Construction Engineering, and Industrial Engineering. Non-Engineering: Statistics, Molecular Biology, Microbiology, Biochemistry, Organic Chemistry, General or Inorganic Chemistry, Biology, Math, and Physics. Suggested Elective Courses are included below

- Earn at least 42 credits from the following:
  - EES5318 - Industrial Ecology (3)
  - ENV5410 - Water Treatment (3)
  - ENV5505 - Sludge Management Operations in Environmental Engineering (3)
  - ENV5517 - Engineering Chemical and Biological Processes (3)
  - ENV5636 - Environmental and Water Resources Systems Analysis (3)
  - ENV6015 - Physical/Chemical Treatment Systems in Environmental Engineering (3)
  - ENV6016 - Biological Treatment Systems in Environmental Engineering (3)
  - ENV6046 - Membrane Mass Transfer (3)
  - ENV6030 - Environmental Biotechnology (3)
  - ENV6047 - Environmental Informatics and Remote Sensing (3)
  - ENV6106 - Theory and Practice of Atmospheric Dispersion Modeling (3)
  - ENV6126 - Design of Air Pollution Controls (3)
  - Course Not Found
  - Course Not Found
  - ENV6519 - Aquatic Chemical Processes (3)
  - ENV6558 - Industrial Waste Treatment (3)

Dissertation
18 Total Credits

- Earn at least 18 credits from the following types of courses:
  - ENV 7980

Examinations
0 Total Credits

- Students must pass three examinations. The first is the PhD qualifying examination. This examination must be taken within the first year of admission into the PhD program. It may be attempted no more than twice. In addition to the qualifying examination, students must pass the candidacy examination and the dissertation defense examination. The candidacy examination is normally taken near the end of the course work and consists of a written and oral presentation of a research proposal, and may include additional written or oral questioning by the committee. A copy of the written examination will be kept as part of the student's official record. The dissertation defense examination is an oral examination taken as defense of the written dissertation. The College of Engineering and Computer Science requires that all dissertation defense announcements be approved by the student's adviser and posted on the college's website and on the College of Graduate Studies Events Calendar at least two weeks before the defense date.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours. Evidence of meeting these requirements must be received by the College of Graduate Studies by the day before the first day of classes for the semester in which a student wishes to enroll in dissertation hours. Completion of all but 6 hours, or less, of course work, except for dissertation hours. Successful completion of the candidacy examination. Successful defense of the written dissertation proposal. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Grand Total Credits: 72
Program Details

The Environmental Engineering PhD program is research oriented and requires a minimum of 72 credit hours beyond the bachelor's degree. Thirty of the 72 credit hours can be met with either a nonthesis or thesis MS in Environmental Engineering. This leaves 42 credit hours of which 18 credit hours must be Dissertation and a minimum of 15 credit hours must be formal course work. A maximum of 9 credit hours of Doctoral Research can be used in the doctoral program, which could be replaced by additional formal coursework.

For students not having an MS degree who directly enter the PhD program (BS to PhD), there will be a minimum of 45 credit hours formal coursework (i.e., 30 credit hours identical to the coursework for a nonthesis MS in Environmental Engineering plus a minimum of 15 credit hours course work past the MS). However, unlike MS students, BS to PhD students will be required to take only 4 of the 5 required courses from the nonthesis MS in Environmental Engineering requirements. In addition, these students can enroll for Doctoral Research credit hours during or after their first semester in the program. The 27 credit hours required in addition to the 45 credit hours coursework will be 18 credit hours in Dissertation Research, and a maximum of 9 credit hours in Doctoral Research. Up to 9 credit hours of Doctoral Research can be replaced by additional formal coursework subject to the approval of the PhD adviser and the advisory committee.

For both MS to PhD and BS to PhD students, the program of study must be developed with an advisory committee and meet with departmental approval at the beginning of the PhD program, at which time transfer credit will be evaluated on a course-by-course basis.

Equipment Fee

Full-time students in the Environmental Engineering PhD program pay $16 per semester for equipment used in the laboratories. Part-time students pay $8 per semester.

Independent Learning

The Independent Learning Requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Guidance Control and Dynamics Graduate Certificate

College

College of Engineering and Computer Science

Department

Department of Mechanical and Aerospace Engineering

Program Website

http://www.mae.ucf.edu/
Is this program available 100% online?
Yes

UCF Online

Please Note: Guidance Control and Dynamics Graduate Certificate may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description

This joint graduate certificate will provide higher-level courses in the areas of guidance, navigation, control and dynamics. Students joining the program will be introduced to concepts of nonlinear dynamics, optimal control, estimation, linear and nonlinear control with the higher-level understanding. Students will learn to synthesize theory and application at the graduate level in order to produce the knowledge base necessary to make an immediate impact in the aerospace, mechanical and electrical engineering industries.

The graduate certificate in guidance control and dynamics is awarded upon completion of a minimum of 12 credit hours, including 6 credit hours of required courses, and 6 credit hours of electives.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Bachelor's degree in Electrical Engineering or closely related discipline. A student with an undergraduate degree outside of the selected departmental discipline may also be required to satisfy an articulation program.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's degree in Electrical Engineering or closely related discipline with a minimum GPA 3.0
- Résumé.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Program Description

The Healthcare Systems Engineering Graduate Certificate is a fully online degree program designed to be completed within one year. This 15-credit-hour program trains students to implement, manage and introduce systematic changes to improve patient care and enhance utilization of organizational resources. This unique program is offered in response to the growing needs of the healthcare industry.

Students will receive a Certificate, offered by the Department of Industrial Engineering and Management Sciences at the College of Engineering and Computer Science, in the Healthcare Systems Engineering Track.

This degree can help students realize their leadership potential, fuel their passion for healthcare innovation, and provide the necessary tools needed to make this systemic change a reality. Through the ideology and principles of systems engineering taught in this degree, individuals learn the specialized skills needed to foster operational change within healthcare organizations.

By completion, students will be able to help healthcare organizations to:

- Conduct analyses of large-scale social and ecological systems across the healthcare sector
- Assess and mitigate risks throughout organizational processes and relationships
- Analyze risks to individual and public health impacted by issues in the healthcare system
- Bring evidence-based thinking and analysis to process and system change
- Develop and manage a quality management system across an organizational setting
- Adapt information systems to improve management planning and control

Sampling of career opportunities include:

- Healthcare Management Engineer
- Operational Excellence Project Manager
- Systems Redesign Consultant
- Lean Specialist
- Process Improvement Consultant
- Continuous Improvement Specialist
- Healthcare Analyst

The Healthcare Systems Engineering Graduate Certificate requires 15 credit hours of courses beyond the bachelor's degree.

Total Credit Hours Required: 15 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

An undergraduate course in probability and statistics

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended
- Résumé or Curriculum Vita
- Goal statement
  - The goal statement should discuss all relevant professional background and any previous research and/or teaching experience. The statement should explain the motivation behind the pursuit of a graduate certificate in Industrial Engineering. Future educational and career goals after the completion of the applicant's certificate study should be discussed. The goal statement should be between 500 and 1,000 words.
- International Students
  - Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.
  - Given the fully online nature of this degree program, international students will not receive an F1 visa, hence you will not take this degree program in the US. International students are free to take this degree program from their home or any country besides the US.
  - Applications are accepted for the fall and spring terms only.
  - Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Degree Requirements

Required Courses  
9 Total Credits
- Complete the following:
  - EIN5115 - Engineering MIS Control Systems in Healthcare  (3)  
  - ESI6551 - Systems Engineering  (3)  
  - HSC6636 - Issues and Trends in the Health Professions  (3)

Elective Courses  
6 Total Credits
- Complete all of the following
  - Complete at least 1 of the following:
    - ESI6609 - Industrial Engineering Analytics for Healthcare  (3)  
    - EIN6358 - Engineering Economic Analysis in Health Systems  (3)
  - Complete at least 1 of the following:
    - ESI6251C - Engineering Quality in Health Systems  (3)  
    - ESI6252C - Managing Engineering Risk in Health Systems  (3)

Grand Total Credits: 15

Program Details

Cost Per Credit Hour

For both in-state and out-of-state students, the cost is $1,239.16 per credit hour which includes tuition and fees.

*Fee subject to change.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Is this program available 100% online?
Yes

UCF Online

Please note: Industrial Engineering (MS) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Industrial-Engineering-MS.pdf.

Program Description

The Master of Science programs in Industrial Engineering are designed to produce highly skilled graduates who are prepared to be industrial engineers, engineering managers or technical professionals, or leaders for the global economy, as well as preparing them for further graduate work or independent research.

Industrial Engineering, in its broad nature, focuses on the design and improvement of systems, products, and processes. A total systems approach is used to optimize the various aspects of operations in both manufacturing and service industries. Industrial engineers use many analytical approaches to improve productivity, safety, and quality of working life while reducing operating costs.

The Industrial Engineering programs are structured to support the emergence of Central Florida as a national center of high technology as well as supporting the diverse service industries in the region and throughout the nation.

In the Industrial Engineering MS programs, students are able to individually craft their programs of study and select their courses to focus on one or more of the following research areas.

Human Systems Engineering/Ergonomics
As technology has become more sophisticated, the need to design for the human user has become more difficult, yet even more important. Human engineering and ergonomics assist in ensuring that as technology advances, the abilities, limitations, and needs of humans are considered in the system design. This not only supports the needs of the user, it also optimizes the efficiency and usability of the system designed. Traditionally, ergonomics has been associated with biomechanical issues and work measurement and performance issues in physical system design, as well as occupational and industrial safety. The broader focus of human engineering encompasses those issues as well as incorporating the reaction and effectiveness of human interaction with systems, both physical systems and virtual systems such as computer-based models.

Research in the Human Systems Engineering and Ergonomics area provides students with the necessary knowledge in human engineering and ergonomics to effectively design tasks, industrial systems, and work environments that maximize human performance, safety, and overall productivity.

**Interactive Simulation and Training Systems**

The Interactive Simulation and Training Systems research within the Industrial Engineering MS program focuses on providing a fundamental understanding of significant topics relative to simulation systems and the requirements, design, development, and use of such systems for knowledge transfer in the technical environment. Courses in this area address the evolving and multiple discipline application of interactive simulation by providing a wealth of electives to support the development of individual student interests and talents. In conjunction with UCF’s Institute for Simulation and Training, industrial organizations involved in simulation in the Central Florida region, military organizations, and other governmental organizations, ISTS research in the MS program provides exposure to both military and commercial interactive simulation and training systems.

The emphasis is on the application and development of interactive simulation and training systems to meet various requirements including, but not limited to: simulators, skill trainers, organizational learning systems, computer and web-based interactive simulation systems and other novel interactive simulation efforts. Courses in the interactive simulation and training systems area prepare individuals with an undergraduate degree in engineering, science, education, psychology, mathematics or other related disciplines for careers in simulation, focusing particularly on the interactive simulation and training systems industries.

**Operations Research**

The Operations Research courses in the Industrial Engineering MS program uses mathematics and computer-based systems to model operational processes and decisions in order to develop and evaluate alternatives that will lead to gains in efficiency and effectiveness. Drawing on probability, statistics, simulation, optimization, and stochastic processes, Operations Research provides many of the analytic tools used by industrial engineers as well as by other analysts to improve processes, decision-making, and management by individuals and organizations. Research in this area is ideal for students who have an undergraduate degree in engineering, mathematics, or science. The knowledge in these courses builds on an undergraduate Engineering, Mathematics, or Science degree to develop a strong modeling and analytical capability to improve processes and decision-making.

**Quality Systems Engineering**

The Quality Systems Engineering research in the Industrial Engineering MS program focuses on providing the knowledge for improving product and process quality in manufacturing and service industries. Quality Systems Engineering provides both the quantitative tools for measuring quality and the managerial focus and organizational insight required to implement effective continuous improvement programs and incorporate the voice of the customer. The Quality Systems Engineering courses build on an undergraduate degree in industrial engineering or a closely related discipline to provide the necessary knowledge to plan, control, and improve the product assurance function in government, military, service, or manufacturing organizations.

**Simulation Modeling and Analysis**

The Simulation Modeling and Analysis research and studies in the Industrial Engineering MS program focus on providing a fundamental understanding of the functional and technical design requirements for simulation in manufacturing and service industries. Research in this area is based on a systems modeling paradigm and provides coding and development capability in the context of a broader systems framework. Significant exposure to design and analysis aspects is a core element of the track. The Simulation Modeling and Analysis research and coursework prepare individuals with an undergraduate degree in Engineering, Science, Mathematics, or a closely related discipline for careers in simulation, focusing particularly on using simulation as an analysis and design tool for the manufacturing and service industries.

**Systems Engineering**

Intelligence is being infused into everyday systems, processes and infrastructure that enable physical goods to be developed, manufactured, bought and sold. These same systems also facilitate the movement and delivery of global products and services that support worldwide markets such as finance, energy resources, and healthcare systems.

With these technological advancements, comes a new level of complexity as organizations struggle to integrate systems, processes and data feeds. As a result, the demand for systems engineering and related skills is expected to grow significantly.

Systems engineers design and implement computer systems, software, and networks, including defining complex system requirements, and determining system specifications, processes and working parameters.

The Systems Engineering studies and research in the Industrial Engineering MS program are intended for individuals of all engineering disciplines. Research and coursework focus on a systems view of engineering problems related to the management of complex industrial, military, government, and social systems.

This degree has 2 tracks: Accelerated BS to MS Track and Healthcare Systems Engineering Track. Please scroll to the bottom of this page for further details on these Tracks.

**This program can be taken entirely through the Center for Online and Virtual Education (COVE), which provides video-
streamed versions of classes over the Internet. More information about this program can be found at http://www.cecs.ucf.edu/COVE/ or (407) 823-3814.

The Industrial Engineering MS program offers both thesis and nonthesis options with each requiring 30 credit hours of courses. The program is flexible to enable students to model their plan of study to suit their needs and future work or career goals. All students must develop a plan of study with the graduate program director that meets with departmental approval. At least one-half of the courses (including thesis hours) required in the master's program of study must be at the 6000 level or higher. A cumulative grade-point average of B (3.0) must be maintained in the entire program of study.

Students on assistantships must take 9 credit hours per semester (Fall, Spring) to satisfy the university's requirement for full-time status. Most students working full time take 6 credit hours per semester. At that rate, the program can be completed in 6 semesters or less. However, students with more time available and with an early start on a thesis, if applicable, can finish the program in 3 semesters.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree**

**Program Prerequisites**

The Industrial Engineering MS program requires an undergraduate degree in engineering, mathematics, computer science, statistics, physics, quantitative management or similar field.

Outstanding students with degrees in other disciplines such as business, economics or computer/information sciences may also be considered on a case-by-case basis, provided they have significant work experience and/or very high academic standing.

Regardless of the undergraduate degree, all applicants must have completed the following prerequisites:

- Mathematics through Calculus II (MAC 2312 or equivalent)
- An undergraduate course in engineering probability and statistics.
- In addition, they are expected to be familiar with at least one programming language (such as C, FORTRAN, Java, Visual BASIC, C++, etc.) and common computer skills and tools such as word processors and spreadsheets.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Résumé or Curriculum Vita
- Goal statement
  - The goal statement should discuss all relevant professional background and any previous research and/or teaching experience. The statement should explain the motivation behind the pursuit of a Master's degree in Industrial Engineering. Future educational and career goals after the completion of the applicant's master study should be discussed.
  - If the applicant is interested in completing a Master thesis, then the applicant must clearly describe the particular area of research interest. The applicant should identify at least one UCF faculty member who shares a similar research focus and is believed to be best suited to serve as a potential thesis advisor.
  - The goal statement should between 500 and 1,000 words.
- Two letters of recommendation
  - The letters of recommendation should be from faculty members, university administrators, and employers with a supervisory role of the applicant. The letters, which must be current to the application and must not be for another degree program, should address the educational and career goals of the applicant. The letter writers should also know the applicant well enough to discuss the applicant's capacity to perform, excel and succeed in a graduate program. Letters for Master's thesis students must discuss the applicant's ability to perform graduate-level research.
  - Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applications are accepted for the fall and spring terms only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Degree Requirements

Required Courses
12 Total Credits

- Complete the following:
  - ESI5219 - Engineering Statistics (3)
  - EIN5140 - Project Engineering (3)
  - EIN6357 - Advanced Engineering Economic Analysis (3)
  - ESI6551 - Systems Engineering (3)

IEMS Electives
12 Total Credits

- All students, both thesis and nonthesis, must take 12 credit hours of electives after consultation with their adviser. The program requirements are flexible enough to allow the students to tailor the coursework according to their desired educational and career goals. With the approval of their adviser and/or the graduate program director, students may select from the following groups of courses to satisfy the needs of their research goals or career objectives. To assist the students in achieving these goals and objectives, courses are grouped below to suggest focus areas, only as a guide to assist in advising and course selection. They are not intended to restrict elective choices among specialization areas as the intent of the program is to help graduate students maintain an integrated approach to their studies. The listing of these courses does not guarantee that they will be offered by the department in a particular year or semester. In addition to the courses listed below, students may be allowed to take courses from the following disciplines at UCF, with the approval of the graduate program director, as an elective in their graduate program of study: Other Engineering programs Computer Science Mathematics Statistics Business Administration or Management

Focus Areas
12 Total Credits

- Complete 1 of the following
  - Human Systems Engineering/Ergonomics
  - Earn at least 12 credits from the following:
    - EIN5248 - Ergonomics (3)
    - EIN5251 - Usability Engineering (3)
    - EIN6258 - Human Computer Interaction (3)
    - EIN6271 - Human Reliability (3)

  - Quality and Production Systems
  - Earn at least 12 credits from the following:
    - ESI6225 - Quality Design and Control (3)
    - ESI6224 - Quality Management (3)
    - EIN6336 - Production and Inventory Control (3)
    - EIN5356 - Cost Engineering (3)
    - EIS5227 - Total Quality Improvement (3)
    - EIS6247 - Experimental Design and Taguchi Methods (3)

  - Management Systems
  - Earn at least 12 credits from the following:
    - EIN6182 - Engineering Management (3)
EIN5117 - Management Information Systems I (3)
EIN6370 - Innovation in Engineering Design (3)
EIN6339 - Operations Engineering (3)
EIN5108 - The Environment of Technical Organizations (3)

Simulation, Optimization and Modeling
- Earn at least 12 credits from the following:
  - ESI6336 - Queueing Systems (3)
  - ESI5306 - Operations Research (3)
  - ESI6418 - Linear Programming and Extensions (3)
  - ESI6532 - Object-Oriented Simulation (3)
  - ESI5531 - Discrete Systems Simulation (3)
  - EIN5255C - Interactive Simulation (3)
  - EIN5288 - Simulation Based Life Cycle Engineering (3)
  - EIN6936 - Seminar in Advanced Industrial Engineering (3)
  - ESI6217 - Statistical Aspects of Digital Simulation (3)

Systems Engineering
- Earn at least 12 credits from the following:
  - ESI6358 - Decision Analysis (3)
  - ESI5359 - Risk Assessment and Management (3)
  - EIN6215 - System Safety Engineering and Management (3)
  - EIN5346 - Engineering Logistics (3)
  - ESI6891 - IEMS Research Methods (3)
  - ESI5236 - Reliability Engineering (3)

Thesis/Nonthesis Option
6 Total Credits
- Complete 1 of the following
  - Thesis
    - Earn at least 6 credits from the following types of courses:
      EIN 6971 Thesis The thesis option requires 6 credit hours of thesis. Thesis students must complete an independent research study and write and successfully defend a thesis according to program guidelines. The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website (http://www.cecs.ucf.edu/graddefense/) and on the College of Graduate Studies Events Calendar at least two weeks before the defense date.
  - Nonthesis Option
    - Complete all of the following
      - Complete the following:
        - EIN6950 - Industrial and Systems Engineering Capstone (3)
      - Earn at least 3 credits from the following types of courses:
        Additional Elective Course. The nonthesis option requires a capstone course and an additional unrestricted elective course that supports the student's area of research and study interests. The capstone course should be completed toward the end of the student's graduate plan of study. As part of the requirements of this courses, students will complete an independent capstone project on a topic relevant to the industrial and systems engineering field and approved by the instructor. Students are expected to use and leverage knowledge obtained in the program to complete the project. This course serves as the culminating experience for students and shows their engagement in independent learning.

Grand Total Credits: 30

Program Details

Equipment Fee
Full-time students in the Industrial Engineering MSIE program pay a $58 equipment fee each semester that they are enrolled. Part-time students pay $29 each semester that they are enrolled.

Independent Learning
The Independent Learning requirement is met by successful completion of a thesis or the capstone course.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Industrial-Engineering-MS.pdf.
**Track Description**

The Healthcare Systems Engineering track is a fully online degree program designed to be completed within two years. This 30-credit-hour program trains students to implement, manage and introduce systematic changes to improve patient care and enhance utilization of organizational resources. This unique program is offered in response to the growing needs of the healthcare industry.

Students will receive a Master of Science, offered by the Department of Industrial Engineering and Management Sciences at the College of Engineering and Computer Science, in the Healthcare Systems Engineering Track.

The future of healthcare will need leaders who are passionate about implementing, managing and refining healthcare systems to improve patient care and reduce overall cost. This degree can help students realize their leadership potential, fuel their passion for healthcare innovation, and provide the necessary tools needed to make this systemic change a reality. Through the ideology and principles of systems engineering taught in this degree, individuals learn the specialized skills needed to foster operational change within healthcare organizations.

By graduation, students will be able to help healthcare organizations to:

- Conduct analyses of large-scale social and ecological systems across the healthcare sector
- Assess and mitigate risks throughout organizational processes and relationships
- Analyze risks to individual and public health impacted by issues in the healthcare system
- Bring evidence-based thinking and analysis to process and system change
- Develop and manage a quality management system across an organizational setting
- Plan and conduct change initiatives that directly impact quality and costs
- Design and build detailed computer simulations of healthcare organizations and health technology assessments
- Adapt information systems to improve management planning and control

A sampling of career opportunities include:

Healthcare Management Engineer, Operational Excellence Project Manager, Systems Redesign Consultant, Lean Specialist, Process Improvement Consultant, Continuous Improvement Specialist and Healthcare Analyst.

The Healthcare Systems Engineering (HCSE) track requires 30 credit hours of courses beyond the bachelor's degree. This program offers only the nonthesis option.

For information about the program, please contact the HSE Director Dr. Vernet Lasrado (vernet.lasrado@ucf.edu).

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree**

**Track Prerequisites**

An undergraduate course in probability and statistics

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Résumé or Curriculum Vita
  - Goal statement
    - The goal statement should discuss all relevant professional background and any previous research and/or teaching experience. The statement should explain the motivation behind the pursuit of a Master's degree in Industrial Engineering. Future educational and career goals after the completion of the applicant's master study should be discussed. The goal statement should between 500 and 1,000 words.
  - Two letters of recommendation
    - The letters of recommendation should be from faculty members, university administrators, and employers with a supervisory role of the applicant. The letters, which must be current to the application and must not be for another degree program, should address the educational and career goals of the applicant. The letter writers should also know the applicant well enough to discuss the applicant's capacity to perform, excel and succeed in a graduate program. Letters for Master's thesis students must discuss the applicant's ability to perform graduate-level research.

- International Students
  - Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.
  - Given the fully online nature of this degree program, International students will not receive an F1 visa, hence you will **not take** this degree program in the US. International students are free to take this degree program from their home or any country besides the US.
  - Applications are accepted for the fall and spring terms only.
  - Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

  - ESI6224 - Quality Management (3)  
  - ESI6609 - Industrial Engineering Analytics for Healthcare (3)  
  - EIN5140 - Project Engineering (3)

Grand Total Credits: 30

### Track Details

#### Cost Per Credit Hour

This Master of Science, both for in-state and out-of-state, costs $1,239.16 per credit hour totaling $37,174.80* for the program which includes tuition and fees.

*Fee subject to change.

### Independent Learning

The Independent Learning requirement is met by successful completion of the research studies required in individual courses and EIN 5140 - Project Engineering (Capstone). These research studies require that students integrate material from all the courses in their program.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Is this program available 100% online?
Yes

UCF Online

Please note: Industrial Engineering (MSIE) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Licensure Disclosure
This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Industrial-Engineering-MSIE.pdf.
Program Description

The Department of Industrial Engineering and Management Systems offers a Master of Science in Industrial Engineering (MSIE) degree focusing on the design and improvement of systems, products, and processes. This degree is available to those applicants with a bachelor of science degree in Industrial Engineering (BSIE) or other Engineering degree ONLY.

A total systems approach is used to optimize the various aspects of operations in both manufacturing and service industries. Industrial engineers use many analytical approaches to improve productivity, safety, and quality of working life while reducing operating costs. The MSIE curriculum builds on an undergraduate engineering degree to develop a stronger systems focus and analytical capability.

The industrial engineering graduate programs are structured to support the emergence of Central Florida as a national center of high technology as well as supporting the diverse service industries in the region and throughout the nation.

Many of the graduate courses offered by the department or required in the MSIE program are offered through the Florida Engineering Educational Delivery System (FEEDS), which provides video-streamed versions of classes over the Internet.

This program can be taken entirely through the Center for Online and Virtual Education (COVE), which provides video-streamed versions of classes over the Internet. More information about this program can be found at http://www.cecs.ucf.edu/COVE/ or (407) 823-3814.

The Industrial Engineering MSIE degree requires an undergraduate degree in Industrial Engineering or any other Engineering degree. Students with undergraduate degrees outside of industrial engineering may be required to take additional prerequisites. The program offers both thesis and nonthesis options with each requiring 30 credit hours of courses. At least half of the regular coursework must be at the 6000 level. A cumulative grade-point average of B must be maintained in the entire program of study.

Thesis Option: The thesis option requires 12 credit hours of required courses, 12 credit hours of electives and 6 thesis credit hours. Students must also write and successfully defend a thesis.

Nonthesis Option: The nonthesis option requires 12 credit hours of required courses and 18 credit hours of electives. Research studies are required in one or more courses. The research study and report will focus on reviewing and analyzing contemporary research in the profession in order to help students acquire knowledge and skills pertaining to research-based best practices. In addition, students may engage in directed independent studies, directed research or a research report during their studies. A program of study must be developed with the graduate program director and meet with departmental approval. At least one-half of the credit hours (including thesis hours) required in a master's program of study must be at the 6000 level or higher. Students on assistantships must take 9 credit hours per semester to satisfy the university’s requirement for full-time status. Most students working full time take 6 credit hours per semester. At that rate, the program can be completed in 6 semesters or less. However, students with more time available and with an early start on a thesis, if applicable, can finish the program in 3 semesters.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Students with undergraduate degrees in industrial engineering or other engineering degrees are encouraged to apply for admission. Graduates from non-engineering curricula may apply to obtain the MS degree.

All applicants are expected to have completed the following prerequisites during their undergraduate engineering education:

- Mathematics through Calculus II (MAC 2312 or equivalent)
- Undergraduate probability and statistics for engineers (STA 3032 or equivalent)
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Résumé or Curriculum Vita
- Goal statement
  - The goal statement should discuss all relevant professional background and any previous research and/or teaching experience. The statement should explain the motivation behind the pursuit of a Master's degree in Industrial Engineering. Future educational and career goals after the completion of the applicant's master study should be discussed.
  - If the applicant is interested in completing a Master thesis, then the applicant must clearly describe the particular area of research interest. The applicant should identify at least one UCF faculty member who shares a similar research focus and is believed to be best suited to serve as a potential thesis advisor.
  - The goal statement should between 500 and 1,000 words.
- Two letters of recommendation
  - The letters of recommendation should be from faculty members, university administrators, and employers with a supervisory role of the applicant. The letters, which must be current to the application and must not be for another degree program, should address the educational and career goals of the applicant. The letter writers should also know the applicant well enough to discuss the applicant's capacity to perform, excel and succeed in a graduate program. Letters for Master's thesis students must discuss the applicant's ability to perform graduate-level research.
  - Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applications are accepted for the fall and spring terms only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Degree Requirements

Required Courses  
12 Total Credits

- Complete all of the following
Complete the following:
- ESI6551 - Systems Engineering (3)
- ESI6224 - Quality Management (3)
- ESI6247 - Experimental Design and Taguchi Methods (3)

Complete at least 1 of the following:
- ESI5306 - Operations Research (3)
- ESI6418 - Linear Programming and Extensions (3)

Elective Courses
12 Total Credits

- All students, both thesis and nonthesis, must take 12 credit hours of electives after consultation with their adviser. The program requirements are flexible enough to allow the students to tailor the coursework according to their desired educational and career goals. With the approval of their adviser and/or the graduate program director, students may select from the following groups of courses to satisfy the needs of their research goals or career objectives. To assist the students in achieving these goals and objectives, courses are grouped below to suggest focus areas, only as a guide to assist in advising and course selection. They are not intended to restrict elective choices among specialization areas as the intent of the program is to help graduate students maintain an integrated approach to their studies. The listing of these courses does not guarantee that they will be offered by the department in a particular year or semester. In addition to the courses listed below, students may be allowed to take courses from the following disciplines at UCF, with the approval of the graduate program director, as an elective in their graduate program of study: Other Engineering programs Computer Science Mathematics Statistics Business Administration or Management

Focus Areas
12 Total Credits

- Complete 1 of the following
  - Human System Engineering/Ergonomics
    - Earn at least 12 credits from the following:
      - EINS248 - Ergonomics (3)
      - EINS251 - Usability Engineering (3)
      - EIN6258 - Human Computer Interaction (3)
      - EIN6271 - Human Reliability (3)
  - Quality and Production Systems
    - Earn at least 12 credits from the following:
      - ESI6225 - Quality Design and Control (3)
      - EIN6336 - Production and Inventory Control (3)
      - EINS5356 - Cost Engineering (3)
      - ESI5227 - Total Quality Improvement (3)
  - Management Systems
    - Earn at least 12 credits from the following:
      - EIN6182 - Engineering Management (3)
      - EINS5117 - Management Information Systems I (3)
      - EIN6370 - Innovation in Engineering Design (3)
      - EIN6339 - Operations Engineering (3)
      - EINS5108 - The Environment of Technical Organizations (3)
  - Simulation, Optimization and Modeling
    - Earn at least 12 credits from the following:
      - ESI6336 - Queuing Systems (3)
      - ESI6532 - Object-Oriented Simulation (3)
      - ESI5531 - Discrete Systems Simulation (3)
      - EINS5255C - Interactive Simulation (3)
      - EIN6528 - Simulation Based Life Cycle Engineering (3)
      - EIN6936 - Seminar in Advanced Industrial Engineering (3)
      - ESI6217 - Statistical Aspects of Digital Simulation (3)
  - Systems Engineering
    - Earn at least 12 credits from the following:
      - ESI6358 - Decision Analysis (3)
      - ESI5359 - Risk Assessment and Management (3)
      - EIN6215 - System Safety Engineering and Management (3)
      - ESI5236 - Reliability Engineering (3)
      - EINS346 - Engineering Logistics (3)
      - ESI6891 - IEMS Research Methods (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
EIN 6971 Thesis The thesis option requires an additional 6 credit hours of thesis. Thesis students must complete an independent research project and write and successfully defend a thesis describing the project. Students may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the program of study and the proposed thesis topic. The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website (http://www.cecs.ucf.edu/graddefense/) and on the College of Graduate Studies Events Calendar at least two weeks before the defense date.

Nonthesis Option

- Complete all of the following
  - EIN6950 - Industrial and Systems Engineering Capstone (3)
  - Earn at least 3 credits from the following types of courses:
    - Additional Elective Course. The nonthesis option requires a capstone course and an additional unrestricted elective course that supports the student's area of research and study interests. The capstone course should be completed toward the end of the student's graduate plan of study. As part of the requirements of this course, students will complete an independent capstone project on a topic relevant to the industrial and systems engineering field and approved by the instructor. Students are expected to use and leverage knowledge obtained in the program to complete the project. This course serves as the culminating experience for students and shows their engagement in independent learning.

Grand Total Credits: 30

Program Details

Equipment Fee

Full-time students in the Industrial Engineering MSIE program pay a $58 equipment fee each semester that they are enrolled. Part-time students pay $29 each semester that they are enrolled.

Independent Learning

A research project serves as the independent learning experience for thesis students. Nonthesis students are required to complete the department's capstone course toward the end of their program.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Industrial Engineering MSIE - Industrial Engineering MS, Accelerated BS to MSIE Track

College

College of Engineering and Computer Science

Department

Department of Industrial Engineering and Management Systems

Track Website

http://www.iems.ucf.edu/
**Track Handbook**

Industrial Engineering MSIE

**Track Contact Information**

Mansoor Mollaghasemi PhD
Associate Professor
mollagha@ucf.edu
Engineering 2, Room 312

**Is this track available 100% online?**

No

**Licensure Disclosure**

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Industrial-Engineering-MSIE.pdf.

**Track Description**

The accelerated undergraduate/graduate program in Industrial Engineering allows highly qualified undergraduate majors in Industrial Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate program. Participation will enable completion of the Bachelor of Science and Master of Science degrees in Industrial Engineering in five instead of six years for students enrolled in full-time course work.

Industrial Engineering focuses on the design and improvement of systems, products, and processes. A total systems approach is used to optimize the various aspects of operations in both manufacturing and service industries. Industrial engineers use many analytical approaches to improve productivity, safety, and quality of working life while reducing operating costs.

The Industrial Engineering graduate programs are structured to support the emergence of Central Florida as a national center of high technology as well as supporting the diverse service industries in the region and throughout the nation.

Additional information can be found at www.iems.ucf.edu.

**Track Prerequisites**

A bachelor's degree in Industrial Engineering from UCF.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Accelerated BS to MSIE program in Industrial Engineering allows highly qualified University of Central Florida undergraduate majors in Industrial Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline but were not previously part of this accelerated program, then they should apply to MSIE.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Industrial Engineering or other engineering ONLY.
- The GRE is not required for admission to this program.
- Two letters of recommendation from two individual who are familiar with the applicant's capabilities to enter and succeed into his/her graduate studies and to perform graduate research.
- Curriculum Vitae/resume.
- Statement of educational, research, and professional career objectives. The statement should explain the applicant's future career and educational goals, reasons behind seeking the degree, and why he/she believes that this degree best suits their interests.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Industrial-Engineering-PhD.pdf.

Program Description

The Industrial Engineering PhD program prepares students for extensive research and careers in academia, industry and government while providing a broad knowledge of industrial engineering.

The Doctor of Philosophy in Industrial Engineering is intended for a student with a bachelor's or master's degree in Industrial Engineering or a closely related discipline.

The PhD program is designed to produce highly skilled researchers with both broad knowledge of industrial engineering and in-depth knowledge of specialty fields for careers in academia, industry, and government. The program allows a candidate to thoroughly study some aspect of industrial engineering through faculty expertise in research areas such as management systems, systems simulation and modeling, operations research, quality systems engineering, interactive simulation and training systems, systems engineering, and human systems engineering, human-computer interaction, and ergonomics.

The Industrial Engineering program is structured to support the emergence of Central Florida as a national center of high technology
as well as supporting the diverse service industries in the region and throughout the nation.

In the Industrial Engineering PhD program, students may be able to individually craft their programs of study and select their courses to focus in one or more of the following research areas for their dissertations:

**Human Systems Engineering/Ergonomics:**

As technology has become more sophisticated, the need to design for the human user has become more difficult, yet even more important. Human engineering and ergonomics assist in ensuring that as technology advances, the abilities, limitations, and needs of humans are considered in the system design. This not only supports the needs of the user, it also optimizes the efficiency and usability of the system designed. Traditionally, ergonomics has been associated with biomechanical issues and work measurement and performance issues in physical system design, as well as occupational and industrial safety. The broader focus of human engineering encompasses those issues as well as incorporating the reaction and effectiveness of human interaction with systems, both physical systems and virtual systems such as computer-based models.

Research in the Human Systems Engineering and Ergonomics area provides students with the necessary knowledge in human engineering and ergonomics to effectively design tasks, industrial systems, and work environments that maximize human performance, safety, and overall productivity.

**Interactive Simulation and Training Systems:**

The Interactive Simulation and Training Systems research within the Industrial Engineering MS program focuses on providing a fundamental understanding of significant topics relative to simulation systems and the requirements, design, development, and use of such systems for knowledge transfer in the technical environment. Courses in this area address the evolving and multiple discipline application of interactive simulation by providing a wealth of electives to support development of individual student interests and talents. In conjunction with UCF’s Institute for Simulation and Training, industrial organizations involved in simulation in the Central Florida region, military organizations, and other governmental organizations, ISTS research in the MS program provides exposure to both military and commercial interactive simulation and training systems.

The emphasis is on the application and development of interactive simulation and training systems to meet various requirements including, but not limited to: simulators, skill trainers, organizational learning systems, computer and web-based interactive simulation systems and other novel interactive simulation efforts. Courses in the interactive simulation and training systems area prepare individuals with an undergraduate degree in engineering, science, education, psychology, mathematics or other related disciplines for careers in simulation, focusing particularly on the interactive simulation and training systems industries.

**Management Systems/Engineering management:**

The Management Systems/Engineering Management research focuses on providing the knowledge for improving organizational systems. Engineering Management focuses on effective decision-making and successful project delivery in engineering and technological organizations. With technological advancements comes a new level of organizational complexity. As a result new knowledge is needed to help the technical organization understand how to improve. The Management Systems/Engineering Management studies and research in the Industrial Engineering program are intended for individuals of all engineering disciplines. Research and coursework focus on a systems view of engineering problems related to the management of complex industrial, military, government, and social systems.

**Operations Research:**

The Operations Research courses in the Industrial Engineering MS program uses mathematics and computer-based systems to model operational processes and decisions in order to develop and evaluate alternatives that will lead to gains in efficiency and effectiveness. Drawing on probability, statistics, simulation, optimization, and stochastic processes, Operations Research provides many of the analytic tools used by industrial engineers as well as by other analysts to improve processes, decision-making, and management by individuals and organizations. Research in this area is ideal for students who have an undergraduate degree in engineering, mathematics, or science. The knowledge in these courses build on an undergraduate Engineering, Mathematics, or Science degree to develop a strong modeling and analytical capability to improve processes and decision-making.

**Quality Systems Engineering:**

The Quality Systems Engineering research in the Industrial Engineering MS program focuses on providing the knowledge for improving product and process quality in manufacturing and service industries. Quality Systems Engineering provides both the quantitative tools for measuring quality and the managerial focus and organizational insight required to implement effective continuous improvement programs and incorporate the voice of the customer. The Quality Systems Engineering courses builds on an undergraduate degree in industrial engineering or a closely related discipline to provide the necessary knowledge to plan, control, and improve the product assurance function in government, military, service, or manufacturing organizations.

**Simulation Modeling and Analysis:**

The Simulation Modeling and Analysis research and studies in the Industrial Engineering MS program focus on providing a fundamental understanding of the functional and technical design requirements for simulation in manufacturing and service industries. Research in this area is based on a systems modeling paradigm and provides coding and development capability in the context of a broader systems framework. Significant exposure to design and analysis aspects is a core element of the track. The Simulation Modeling and Analysis research and coursework prepare individuals with an undergraduate degree in Engineering, Science, Mathematics, or a closely related discipline for careers in simulation, focusing particularly on using simulation as an analysis and design tool for the manufacturing and service industries.

**Systems Engineering:**

Intelligence is being infused into everyday systems, processes and infrastructure that enable physical goods to be developed,
manufactured, bought and sold. These same systems also facilitate the movement and delivery of global products and services that support worldwide markets such as finance, energy resources, and healthcare systems.

With these technological advancements, comes a new level of complexity as organizations struggle to integrate systems, processes and data feeds. As a result, the demand for systems engineering and related skills is expected to grow significantly.

Systems engineers design and implement computer systems, software, and networks, including defining complex system requirements, and determining system specifications, processes and working parameters.

The Systems Engineering studies and research in the Industrial Engineering MS program are intended for individuals of all engineering disciplines. Research and coursework focus on a systems view of engineering problems related to the management of complex industrial, military, government, and social systems.

The Industrial Engineering PhD program requires a minimum of 72 credit hours beyond the bachelor's degree. If a student holds a master's degree, the student must complete at least 27 credit hours of required coursework, in addition to 15 credit hours of dissertation.

Of the total coursework taken, 27 hours must be formal course work exclusive of independent study and 15 credit hours must consist of dissertation research (EIN 7980). All remaining hours are determined with a faculty adviser and approved by the department. Details about this program are located in the Industrial Engineering PhD Handbook.

**Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor’s Degree**

**Program Prerequisites**

Bachelor's or Master's degree in Industrial Engineering or a closely related discipline.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended
- Bachelor's or Master's degree in Industrial Engineering or a closely related discipline
- An official, competitive score on the GRE taken within the last five years
- Résumé or Curriculum Vita
- Goal Statement
  - The Goal Statement should discuss all relevant professional background and any previous research experience. The statement should explain the motivation behind the pursuit of a doctoral degree in Industrial Engineering at UCF. Future career goals after the completion of the applicant's doctoral study should be discussed.
  - Most importantly, the applicant must clearly describe the particular area(s) of research interest. The applicant should identify at least one UCF faculty member who shares a similar research focus and is believed to be best suited to serve as a potential dissertation advisor.
  - The goal statement should between 500 and 1,000 words.
- Three letters of recommendation
  - The letters of recommendation should be from faculty members, university administrators and employers with a supervisory role of the applicant. The letters, which must be current to the application and must not be for another degree program, should address the educational and career goals of applicant. The letter writers should also know the applicant well enough to discuss the applicant's capacity to perform, excel and succeed in a graduate program. Letters for PhD applicants must discuss the applicant's ability to perform graduate-level research. At least two of the letters should be furnished by college or university professors who are acquainted with the applicant.

Applications are accepted for the fall and spring terms only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Fellowships and assistantships may be awarded based on the student’s GPA, GRE scores, letters of recommendation, curriculum vitae/resume, and goals statement.

Students must complete any needed articulation course work and pass a PhD Qualifying Examination in order to be admitted as a regular doctoral student. This exam is normally taken within the first year after all articulation work is completed.

2021-2022 Graduate Catalog
**Application Deadlines Notes**

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.*

**Graduate School Contact**

Jaylin Hudgen
gradadmissions@ucf.edu
Telephone: 407-823-2766
Millican Hall 230

**Mailing Address**

UCF College of Graduate Studies
Millican Hall 230
PO Box 160112
Orlando, FL 32816-0112

**Institution Codes**

GRE: 5233
GMAT: RZT-HT-58
TOEFL: 5233
ETS PPI: 5233

**Degree Requirements**

**Required Courses**

- Complete the following:
  - ESI6891 - IEMS Research Methods (3)
  - ESI6247 - Experimental Design and Taguchi Methods (3)

**Elective Courses**

- Complete all of the following:
  - At least seventeen unrestricted electives - A maximum of 30 semester credit hours from an earned master's degree may be applied toward these requirements. Waived credits are evaluated on a course-by-course basis. - A maximum of 12 hours of Independent Study and/or Doctoral research is allowed in the Ph.D. program of study. Students, with the approval of their advisers and/or the graduate program director, may select from the following groups of courses to satisfy the needs of their research goals or career objectives. To assist students in achieving their goals and objectives, courses are grouped below to suggest focus areas, only as guides for advising and course selection. The listing of these courses does not guarantee that they will be offered by the department in a particular year or semester. In addition to the courses listed below, students may be allowed to take courses from the following disciplines, with the approval of the graduate program director, as an elective in their graduate plan of study. Other Engineering Programs, Computer Science, Mathematics and Statistics, Business Administration/Management
  - Earn at least 51 credits from the following:
    - EINS248 - Ergonomics (3)
    - EINS251 - Usability Engineering (3)
    - EIN6258 - Human Computer Interaction (3)
    - EIN6271 - Human Reliability (3)
    - ESIS225 - Quality Design and Control (3)
    - ESI6224 - Quality Management (3)
    - EIN6336 - Production and Inventory Control (3)
    - EIN6336 - Production and Inventory Control (3)
    - ESI5227 - Total Quality Improvement (3)
    - EIN6182 - Engineering Management (3)
    - EINS5117 - Management Information Systems I (3)
    - EIN6370 - Innovation in Engineering Design (3)
    - EIN6399 - Operations Engineering (3)
    - EIN5108 - The Environment of Technical Organizations (3)
    - ESIS6336 - Queueing Systems (3)
    - ESI5306 - Operations Research (3)
    - ESI6418 - Linear Programming and Extensions (3)
    - ESI6532 - Object-Oriented Simulation (3)
    - ESI5531 - Discrete Systems Simulation (3)
    - EINS255C - Interactive Simulation (3)
    - EIN6528 - Simulation Based Life Cycle Engineering (3)
    - EIN6936 - Seminar in Advanced Industrial Engineering (3)
    - ESI6217 - Statistical Aspects of Digital Simulation (3)
    - ESI6358 - Decision Analysis (3)
Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  EIN 7980 Dissertation

Examinations
0 Total Credits

- At Qualifying Examination (QE) time students should know their intended direction of research but they do not necessarily know their specific topic/problem. The QE's objective is to determine whether the student's knowledge allows for a thorough understanding of methods and techniques discussed in the literature in his/her area(s) of interest. The IEMS PhD Qualifying Examination is a take-home exam designed to test the student's knowledge of fundamentals within the discipline and to assess the student's ability to conduct independent research and to think analytically, creatively, and independently. Exam questions address the student's global research awareness as well as his/her analytical thinking, research potential, and communication skills. The student must be able to understand the field's literature, as well as to summarize and discuss research findings. It is strongly recommended that students take ESI 6891 IEMS Research Methods prior to taking the Qualifying Examination. While thinking about taking the Qualifying Examination, students are strongly encouraged to evaluate their options for research and make informed decisions about their area of research interests. It is recommended that students seek advice from faculty members whose research interests match their own research areas in order for the students to properly select their electives and develop the appropriate plan of study. In addition to the Qualifying Examination, the student must pass a Candidacy Examination and a Dissertation Defense Examination. Details about these examinations and other requirements are located in the Industrial Engineering PhD Handbook. The Candidacy Examination may be taken any time after successful completion of the Qualifying Examination, but not in the same semester. The objective of the Candidacy Examination is to determine if the student has the breadth and depth of knowledge required to conduct independent research in the proposed area. The Candidacy Examination includes an oral presentation of a detailed dissertation proposal, which becomes the oral candidacy document, and the written component of the Candidacy Examination is satisfied by the proposal document, which becomes the required candidacy document. The Dissertation Defense Examination is an oral examination taken in defense of the written dissertation. The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website and on the Events Calendar of the College of Graduate Studies website at least two weeks before the defense date.

Dissertation Committee Requirement
0 Total Credits

- The doctoral committee must consist of a minimum of four members: at least three must be graduate faculty members from within the student's department, and one must be at large, from graduate faculty scholars outside the Industrial Engineering faculty. The committee chair must be a member of the graduate faculty who is approved to direct dissertations. Faculty members with joint appointments in IEMS may serve as department-faculty committee members. Adjunct faculty and off-campus experts who are graduate faculty scholars may serve as the outside-the-department person on the committee, as well as serve as co-chairs of the committee with the approval of the department Chair. The College of Graduate Studies reserves the right to review appointments to advisory committees, place a representative on any advisory committee, or appoint a co-adviser. Joint faculty members may serve as committee chairs. Off-campus experts and adjunct faculty who are graduate faculty scholars may not serve as committee chairs, but may serve as co-chairs. All committee members vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal or final dissertation must be approved by the advisory committee with no more than one dissenting vote.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours. Evidence of successful completion of these requirements must be received by the College of Graduate Studies one day prior to the start of classes for the semester in which a student wishes to enroll in dissertation hours.
  - Completion or near completion of course work, except for dissertation hours.
  - Successful completion of the candidacy examination, including successful defense of the written dissertation proposal.
  - The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars.
  - Submittal of an approved program of study.

Grand Total Credits: 72
Program Details

As a pre-doctoral student at the beginning of the PhD program, a preliminary plan of study must be developed with the graduate program director and meet with departmental approval. At this time transfer credit will be evaluated on a course-by-course basis. The student's plan of study itemizing the study plan must be approved prior to the end of the first semester of studies by the Graduate Director of the IEMS department.

After completion of the Qualifying Examination and admission as a doctoral student, the official plan of study is developed that must meet with departmental approval. The student's dissertation committee approves the final plan of study after the Candidacy Examination is passed. These steps are normally completed within the first year of study beyond the master's degree. The degree must be completed within seven years from the date of admission as a pre-doctoral student and within four years of passing the Candidacy Examination.

The Department of Industrial Engineering and Management Systems monitors student progress and may dismiss a student if performance standards or academic progress are not maintained. Satisfactory academic performance in a program includes, but is not limited to, maintaining at least a 3.0 GPA in all graduate work taken as part of (or transferred into) the plan of study. Satisfactory performance also involves maintaining the standards of academic progress and professional integrity expected in our discipline. Failure to maintain these standards may result in dismissal from the program.

Equipment Fee

Students in the Industrial Engineering PhD program pay a $58 equipment fee each semester that they are enrolled. For part-time students, the equipment fee is $29 per semester.

Independent Learning

The Independent Learning requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Is this program available 100% online?
Yes

UCF Online

Please note: Materials Science and Engineering (MSMSE) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Materials-Science-Engineering-MS.pdf.

Program Description

The Master of Science in Materials Science and Engineering program is primarily for students with bachelor's degrees in Materials Science and Engineering or a closely related discipline.

Fields of emphasis and research for materials science and engineering include crystal growth, high temperature materials and coatings, multicomponent interdiffusion, material stability and degradation, shape memory alloys, mechanical behavior, magnetic and optical and electronic materials, thin films, solar cells, sensors, ceramics, powder metallurgy, non-equilibrium processing of materials, nano synthesis and consolidation, nanomaterials including quantum dots nanowires and nanocomposites, biomaterials, and electrochemically active materials.

This degree has 1 track: Accelerated BS to MSMBE Track. Please scroll to the bottom of this page for further details on this Track.

The Materials Science and Engineering MSMSE program offers both thesis and nonthesis options with each requiring a minimum of 30 credit hours beyond the bachelor's degree. In general, the program includes 12-15 credit hours of required courses with the remaining courses being electives except for at least six credit hours of thesis work for students in the thesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

A bachelor's degree in Materials Science and Engineering or a closely related discipline.

Prerequisites (or equivalent)

- Mathematics through Differential Equations (MAP 2302)
- Structure and Properties of Materials (EGN 3365)
- Mechanics of Materials (EGN 3331) or Thermodynamics (EGN 3343)
- Experimental Techniques in Mechanics and Materials (EMA 3012C)
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Materials Science and Engineering or a closely related discipline.
- The GRE is not required for admission to this program.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the MSE graduate program director for more information.

Degree Requirements

Required Courses
15 Total Credits

- Complete all of the following
  - All students must take five required courses unless they hold a materials engineering undergraduate degree, in which case they may substitute an additional elective for EMA 5104.
  - Complete the following:
    - EMA5104 - Intermediate Structure and Properties of Materials (3)
    - EMA5106 - Metallurgical Thermodynamics (3)
    - EMA5317 - Materials Kinetics (3)

- Choose 1 Group

- Complete 1 of the following
  - Complete the following:
    - EMA6126 - Physical Metallurgy (3)
    - EMA6626 - Mechanical Behavior of Materials (3)
Complete the following:

- EMA5060 - Polymer Science and Engineering (3)
- EMA6319 - Colloids and Interface Engineering (3)

Elective Courses
9 Total Credits

- Complete all of the following
  - All students, both thesis and nonthesis, must take at least 9 credit hours of electives. Additional electives are listed below. Courses should be selected with faculty adviser approval. Elective course offering from outside EMA/EML are indicated by other course prefixes below:
  - Earn at least 9 credits from the following:

    - EMA5108 - Surface Science (3)
    - EMA5140 - Introduction to Ceramic Materials (3)
    - EMA5504 - Modern Characterization of Materials (3)
    - EMA6130 - Advanced Phase Transformations in Materials (3)
    - EMA6136 - Diffusion in Solids (3)
    - EMA5585 - Materials Science of Thin Films (3)
    - EMA6516 - X-ray Diffraction and Crystallography (3)
    - EMA5586 - Photovoltaic Solar Energy Materials (3)
    - EMA5584 - Biomaterials (3)
    - EMA6149 - Imperfections in Crystals (3)
    - EMA5505 - Scanning Electron Microscopy (3)
    - EMA5060 - Polymer Science and Engineering (3)
    - EMA6518 - Transmission Electron Microscopy (3)
    - EMA5705 - High Temperature Materials (3)
    - EMA6605 - Materials Processing Techniques (3)
    - EMA5610 - Laser Materials Processing (3)
    - EML6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
    - EMA6611 - Optoelectronics Materials Processing (3)
    - CHM5450 - Polymer Chemistry (3)
    - CHM5451C - Techniques in Polymer Science (3)
    - Course Not Found
    - CHM6711 - Chemistry of Materials (3)
    - EEE5332C - Thin Film Technology (3)
    - EEE5352 - Semiconductor Material and Device Characterization (3)
    - EEE6326C - MEMS Fabrication Laboratory (3)
    - EML5290 - Introduction to MEMS and Micromachining (3)
    - EML5291 - MEMS Materials (3)
    - OSE5312 - Light Matter Interaction (3)
    - OSE6432 - Guided Waves and Optoelectronics (3)
    - PHZ5405 - Condensed Matter Physics (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses: EMA 6971 Thesis
      - Thesis students must complete an independent research project, and write and successfully defend their thesis that describes the project. The College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website and on the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
  - Nonthesis Option
    - Complete all of the following
      - Nonthesis students are required to demonstrate their ability to perform independently in research conditions by completing either EML 6085 - Research Methods in Mechanical and Aerospace Engineering or EMA/EML 6918. In addition, they must take another elective beyond the 9 credit hours of electives described above.
      - Earn at least 3 credits from the following:
        - EML6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
        - EMA6918 - Research (1 - 99)
      - Earn at least 3 credits from the following types of courses:
        - Additional Elective Course from list above.

Grand Total Credits: 30
**Program Details**

The thesis option is primarily for those students who can devote a full-time effort to completing an independent research project that leads to a thesis. A student pursuing the thesis option may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the program of study and the proposed thesis topic.

The nonthesis option is primarily designed for part-time and online students and requires 30 credit hours of coursework. In addition, students pursuing the nonthesis option are required to take EML 6085 - Research Methods in Mechanical and Aerospace Engineering or EMA 6918 Directed Research as part of their 30-credit-hour course requirement to demonstrate their ability to perform independently in research conditions. See the MSE program director for specific details.

All students are expected to identify an adviser and file an official degree program of study prior to the completion of 9 credit hours of study. All programs of study must consist of at least 24 credit hours of required and elective courses, exclusive of thesis and research. At least half of the credit hours in a program of study must be at the 6000 level. The appropriate program of study form can be found at the program website listed above and students should consult with the MSE program director for assistance in filling out the program of study form and approval. Substitutions to the program of study must meet with the approval of the adviser and the MSE program director.

A student with an undergraduate degree outside of the materials science and engineering discipline is required to satisfy an articulation program and may have to take additional prerequisite courses.

**Equipment Fee**

Students in the Materials Science and Engineering MSMSE program pay $17 per semester for equipment each semester that they are enrolled. Part-time students pay $8.50 per semester.

**Independent Learning**

The Independent Learning Requirement is met by successful completion of a master's thesis or EML 6085 - Research Methods in Mechanical and Aerospace Engineering or EMA 6918 Directed Research for nonthesis students.

**Financial Information**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**Licensure Disclosure**

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Materials-Science-Engineering-MS.pdf.

**Track Description**

The accelerated undergraduate/graduate program in Materials Science and Engineering allows highly qualified UCF undergraduate majors in Mechanical Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program. Participation will enable completion of the Bachelor of Science and Master of Science degrees in five instead of six years for students enrolled in full-time course work.

The BSME is awarded after completing university requirements for the degree, including 128 total credit hours and completing of 71 credit hours of engineering courses. The MSMSE is awarded upon completion of the master's program. Courses designated in General Education Program and Common Program Prerequisites are usually completed in the first 60 hours (see engineering major requirements in the Undergraduate Catalog).

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree**

**Track Prerequisites**

A bachelor's degree in Materials Science and Engineering from UCF.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Accelerated BS to MS Program in Materials Science and Engineering allows highly qualified University of Central Florida undergraduate majors in Mechanical Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline but were not previously part of this accelerated program, then they should apply to the Materials Science Engineering MS Program without a track selection. Additional information about this track may be located at: https://grad.cecs.ucf.edu/academic-programs/accelerated-bs-ms-program/.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Materials Science and Engineering or a closely related discipline.
- The GRE is not required for admission to this program.
- Résumé.
- Statement of educational, research, and professional career objectives.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the Materials graduate program director for more information.

**Graduate Application Deadlines**

2021-2022 Graduate Catalog
Degree Requirements

Undergraduate Requirements
0 Total Credits
- Please see the current edition of the Undergraduate Catalog for additional information about engineering programs.

Required Courses
15 Total Credits
- Complete all of the following
  - All students must take five required courses unless they hold a materials engineering undergraduate degree, in which case they may substitute an additional elective for EMA 5104.
  - Complete the following:
    - EMA5104 - Intermediate Structure and Properties of Materials (3)
    - EMA5106 - Metallurgical Thermodynamics (3)
    - EMA5317 - Materials Kinetics (3)
- Choose 1 Group
  - Complete 1 of the following
    - Complete the following:
      - EMA6126 - Physical Metallurgy (3)
      - EMA6626 - Mechanical Behavior of Materials (3)
    - Complete the following:
      - EMA5060 - Polymer Science and Engineering (3)
      - EMA5060 - Polymer Science and Engineering (3)

Elective Courses
9 Total Credits
- Complete all of the following
  - All students, both thesis and nonthesis, must take at least 9 credit hours of electives. Additional electives are listed below. Courses should be selected with faculty adviser approval. Elective course offering from outside EMA/EML are indicated by other course prefixes below:
  - Earn at least 9 credits from the following:
    - EMA5108 - Surface Science (3)
    - EMA5140 - Introduction to Ceramic Materials (3)
    - EMA5504 - Modern Characterization of Materials (3)
    - EMA6130 - Advanced Phase Transformations in Materials (3)
    - EMA6136 - Diffusion in Solids (3)
    - EMA5585 - Materials Science of Thin Films (3)
    - EMA6516 - X-ray Diffraction and Crystallography (3)
    - EMA5586 - Photovoltaic Solar Energy Materials (3)
    - EMA5584 - Biomaterials (3)
    - EMA6149 - Imperfections in Crystals (3)
    - EMA5505 - Scanning Electron Microscopy (3)
    - EMA5060 - Polymer Science and Engineering (3)
    - EMA6518 - Transmission Electron Microscopy (3)
    - EMA5705 - High Temperature Materials (3)
    - EMA6605 - Materials Processing Techniques (3)
    - EMA5610 - Laser Materials Processing (3)
    - EMA5610 - Laser Materials Processing (3)
    - EMA6611 - Optoelectronics Materials Processing (3)
Thesis/Nonthesis Option

6 Total Credits

- Complete 1 of the following
- **Thesis Option**
  - Earn at least 6 credits from the following types of courses:
    - EMA 6971 Thesis
      - Thesis students must complete an independent research project, and write and successfully defend their thesis that describes the project. The College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website and on the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.
- **Nonthesis Option**
  - Complete all of the following
    - Nonthesis students are required to demonstrate their ability to perform independently in research conditions by completing either EML 6085 - Research Methods in Mechanical and Aerospace Engineering or EMA/EML 6918. In addition, they must take another elective beyond the 9 credit hours of electives described above.
    - Earn at least 3 credits from the following:
      - EML6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
      - EMA6918 - Research (1 - 99)
    - Earn at least 3 credits from the following types of courses:
      - Additional Elective Course from list above.

Grand Total Credits: 30

**Track Details**

The thesis option is primarily for those students who can devote a full-time effort to completing an independent research project that leads to a thesis. A student pursuing the thesis option may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the program of study and the proposed thesis topic.

The nonthesis option is primarily designed for part-time and online students and requires 30 credit hours of coursework. In addition, students pursuing the nonthesis option are required to take EML 6085 - Research Methods in Mechanical and Aerospace Engineering or EMA 6918 Directed Research as part of their 30-credit-hour course requirement to demonstrate their ability to perform independently in research conditions. See the MSE program director for specific details.

All students are expected to identify an adviser and file an official degree program of study prior to the completion of 9 credit hours of study. All programs of study must consist of at least 24 credit hours of required and elective courses, exclusive of thesis and research. At least half of the credit hours in a program of study must be at the 6000 level. The appropriate program of study form can be found at the program website listed above and students should consult with the MSE program director for assistance in filling out the program of study form and approval. Substitutions to the program of study must meet with the approval of the adviser and the MSE program director.

A student with an undergraduate degree outside of the materials science and engineering discipline is required to satisfy an articulation program and may have to take additional prerequisite courses.

**Equipment Fee**

Students in the Materials Science and Engineering MSMSE program pay $17 per semester for equipment each semester that they are enrolled. Part-time students pay $8.50 per semester.

**Independent Learning**

The Independent Learning Requirement is met by successful completion of a master's thesis or EML 6085 - Research Methods in Mechanical and Aerospace Engineering or EMA 6918 Directed Research for nonthesis students.
Financial Information
Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Licensure Disclosure
This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Materials-Science-Engineering-PhD.pdf.
**Program Description**

The Materials Science and Engineering PhD program provides students with a fundamental and applied research-based education suitable for seeking employment in industry or academia.

The Materials Science and Engineering PhD program is designed for students with a master's degree in materials science and engineering or closely related disciplines. The program provides students with a fundamental and applied research-based education suitable for seeking employment in industry or academia.

The Materials Science and Engineering PhD program requires a minimum of 72 credit hours beyond the bachelor's degree. The program requires 27 hours of formal course work exclusive of independent study and a minimum of 15 hours of dissertation research (EMA 7980). A minimum of 12 credit hours of elective coursework is required to be taken at UCF. Details of program requirements are located in the Materials Science and Engineering PhD Handbook.

**Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree**

**Program Prerequisites**

Master's and/or bachelor's degree in Materials Science and Engineering or a closely related discipline.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Master's and/or bachelor's degree in Materials Science and Engineering or a closely related discipline.
- Résumé.
- Statement about educational, research and professional career objectives should include the student's intention for full or part-time study and their desire for an assistantship or fellowship.
- Three letters of recommendation.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

**Degree Requirements**

Elective Courses
- Complete all of the following

The following core courses are used as the basis for the doctoral qualifying exam and are recommended, but not required:
- EMA 5104 - Intermediate Structure and Properties of Materials (3 Credit Hours)
- EMA 5106 - Metallurgical Thermodynamics (3 Credit Hours)
- EMA 5317 - Materials Kinetics (3 Credit Hours)
- EMA 6126 - Physical Metallurgy (3 Credit Hours) or EMA 6319 - Colloids and Interface Engineering (3 Credit Hours)

Elective courses that are commonly taught in Materials Science and Engineering being with the prefix EMA and EML. Other courses may be included in the elective hours with the approval of the student's faculty adviser and the Materials Science and Engineering graduate program director (indicated with another other prefix besides EMA/EML)

- Earn at least 57 credits from the following:
  - EMA 5104 - Intermediate Structure and Properties of Materials (3)
  - EMA 5106 - Metallurgical Thermodynamics (3)
  - EMA 5317 - Materials Kinetics (3)
  - EMA 6126 - Physical Metallurgy (3) or EMA 6319 - Colloids and Interface Engineering (3)
  - EMA 5108 - Surface Science (3)
  - EMA 5140 - Introduction to Ceramic Materials (3)
  - EMA 6130 - Advanced Phase Transformations in Materials (3)
  - EMA 6136 - Diffusion in Solids (3)
  - EMA 5585 - Materials Science of Thin Films (3)
  - EMA 6516 - X-ray Diffraction and Crystallography (3)
  - EMA 6516 - X-ray Diffraction and Crystallography (3)
  - EMA 5584 - Biomaterials (3)
  - EMA 5060 - Polymer Science and Engineering (3)
  - EMA 5186 - Transmission Electron Microscopy (3)
  - EMA 5705 - High Temperature Materials (3)
  - EMA 5610 - Laser Materials Processing (3)
  - EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
  - EMA 6149 - Imperfections in Crystals (3)
  - CHM 5450 - Polymer Chemistry (3)
  - CHM 5450 - Polymer Chemistry (3)
  - CHM 6711 - Chemistry of Materials (3)
  - EEE 5332C - Thin Film Technology (3)
  - EEE 5352 - Semiconductor Material and Device Characterization (3)
  - EEE 6326C - MEMS Fabrication Laboratory (3)
  - EML 5290 - Introduction to MEMS and Micromachining (3)
  - EML 5291 - MEMS Materials (3)
  - OSE 5312 - Light Matter Interaction (3)
  - OSE 6432 - Guided Waves and Optoelectronics (3)
  - PHZ 5405 - Condensed Matter Physics (3)

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:

  EMA 7980 The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website, www.cecs.ucf.edu/graddefense and on the Events Calendar of the College of Graduate Studies website at least two weeks before the defense date.

Examinations
0 Total Credits

- The doctoral qualifying exam is a multi-part exam. The initial written assessment will be conducted during the fall term. The following spring term a second written assessment as well as oral assessment will be conducted. Upon successful completion of the doctoral qualifying exam process, a student is qualified to continue studying in the PhD program. For more information about the qualifying exam please visit, http://mse.ucf.edu/graduate-program/. The candidacy exam should be taken in the academic semester the student completes 57 credit hours of required course work and is scheduled by mutual agreement of the student and his/her dissertation committee. The student must prepare a written description of their proposed dissertation research prior to the examination, and present that to their dissertation committee to review prior to the candidacy examination. Additionally, the student may be questioned orally during the exam by the dissertation committee on topics relevant to the proposed dissertation research.

Admission to Candidacy
0 Total Credits

- The following items are required to be admitted to candidacy and enroll in dissertation hours (enrollment in dissertation hours begins the semester following the completion of these requirements). Evidence of meeting these requirements must be received by the College of Graduate Studies by the day before the first day of classes for the semester in which a student wishes to enroll in dissertation hours. - Completion of 51 credit hours of course work, except for dissertation hours. - Successful completion of the qualifying examination. - Successful completion of the candidacy examination. - Successful defense of the written dissertation proposal. - The dissertation advisory committee is formed, consisting of approved Graduate Faculty and Graduate Faculty Scholars. - Submission of an approved program of study
All dissertations in Materials Science and Engineering must represent high-quality scientific work. Prior to scheduling the dissertation defense, the high quality of the research must be evidenced by: (1) two refereed journal publications with the doctoral candidate as first author that are in print, or formally accepted for publication, or (2) satisfaction of an alternative publication requirement as recommended by the Dissertation Advisory Committee and approved by a majority vote at a meeting of the program faculty (those having primary or secondary appointments in the MSE Department). The dissertation proposal must be successfully defended and accepted by the Dissertation Committee in a meeting convened for that purpose. The dissertation proposal must be a complete dissertation document provided to the committee at least two weeks prior to the date of defense. In addition, the high quality of the research must be evidenced by two refereed journal publications of the doctoral candidate as first author that are in print, or formally accepted for publication, prior to the dissertation defense. All members of the Dissertation Committee vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal and final dissertation must be approved by a majority of the advisory committee.

Grand Total Credits: 72

Program Details

Students entering the Materials Science and Engineering PhD program with a bachelor's degree are required to complete 72 credit hours of graduate coursework, of which 27 hours must be formal coursework, 12 credit hours must be elective courses taken at UCF and a minimum of 15 dissertation credit hours.

Students entering the Materials Science and Engineering PhD program with a master's degree are required to complete 72 credit hours of graduate coursework including up to 30 hours of credit transfer for formal courses from their master's degree. These students have to take at least 12 credit hours of formal elective courses as listed below at UCF and 27 credit hours of formal graduate coursework in total.

The rest of the hours in the PhD program can be chosen by the student in consultation with the adviser and the dissertation committee and with the approval of the program director.

Equipment Fee

Full-time students in the Materials Science and Engineering PhD program pay $17 per semester for equipment each semester that they are enrolled. Part-time students pay $8.50 per semester.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Yes

UCF Online

Please Note: Mechanical Engineering MSME may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description

The Master of Science degree in Mechanical Engineering is primarily intended for students with a bachelor's degree in Mechanical or Aerospace engineering or a closely related discipline obtained from a recognized accredited institution. The program offers Mechanical Systems, Thermofluids, Guidance Control and Dynamics, and Accelerated BS to MS tracks. Please scroll to the bottom of this page for further details on these Tracks. Each track requires 30 credit hours of courses, of which 24 credit hours must be formal course work, exclusive of thesis and research.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

No

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Mechanical-Engineering-MSME.pdf.

Track Description

The Accelerated Undergraduate/Graduate program in Mechanical Engineering allows highly qualified undergraduate majors in Mechanical Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program. Participation will enable completion of the Bachelor of Science and Master of Science degrees in five instead of six years for students enrolled in full-time course work.

The BSME is awarded after completing all university requirements, including 128 total credit hours and 71 credit hours of engineering courses. The MSME is awarded upon completion of the master's program. Courses designated in General Education Program and Common Program Prerequisites are usually completed in the first 60 hours (see engineering major requirements in the Undergraduate Catalog).

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree
**Track Prerequisites**

This track is available to University of Central Florida undergraduate majors in Mechanical Engineering only.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The **Accelerated BS to MS** program in Mechanical Engineering allows highly qualified University of Central Florida undergraduate majors in Mechanical Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the accelerated program in either their junior year or senior year. If the student has a degree in the discipline but were not previously part of this accelerated program, then they should apply to either the **Mechanical Systems Track** or **Thermofluids Track**. Additional information about this track may be located at: https://grad.cecs.ucf.edu/academic-programs/accelerated-bs-ms-program/.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- A bachelor's degree in Mechanical Engineering.
- Résumé.
- Statement of educational, research, and professional career objectives.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Applicants should contact the MMAE graduate program director for more information.

2021-2022 Graduate Catalog
Degree Requirements

Undergraduate Requirements
0 Total Credits

- Please see the current edition of the Undergraduate Catalog for additional information about this program.

Required/Track Courses
24 Total Credits

- Complete 1 of the following
  - Up to 12 credit hours of approved graduate level courses of grades "B" (3.0) or better may be counted towards the BS and MS degrees. Additional notes on the Accelerated Undergraduate and Graduate Program in Mechanical Engineering are as follows: Students who change degree programs and select this major must adopt the most current catalog. Students must earn at least a "B" (3.0) in each undergraduate and graduate engineering course for them to be counted toward the major. Accelerated Mechanical Engineering students must declare their interest in either the Mechanical Systems Track or the Thermofluids Track by completing a Program of Study with their adviser.
  - Mechanical Systems Track
    - Complete all of the following
      - EML5060 - Mathematical Methods in Mechanical and Aerospace Engineering (3)
      - EML5237 - Intermediate Mechanics of Materials (3)
      - EML5271 - Intermediate Dynamics (3)
      - EML6211 - Continuum Mechanics (3)
    - Earn at least 12 credits from the following types of courses:
      - Elective Coursework as listed on the Mechanical Systems Track Catalog Page
  - Thermofluids Track
    - Complete all of the following
      - EML5060 - Mathematical Methods in Mechanical and Aerospace Engineering (3)
      - EML5152 - Intermediate Heat Transfer (3)
      - EML5713 - Intermediate Fluid Mechanics (3)
      - EML6104 - Classical Thermodynamics (3)
    - Earn at least 12 credits from the following types of courses:
      - Elective Coursework as listed on the Thermofluids Track Catalog Page

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - EML 6971 Thesis Additionally, all student pursuing the thesis option must enroll in the following course: EML 5090 - Mechanical and Aerospace Seminar (0 credit hours) Students must register for the seminar course a minimum of two times during their graduate career in the master's program (thesis option). The students must also complete the course with a satisfactory (S) grade in both attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.
  - Nonthesis Option
    - Complete all of the following
      - Earn at least 3 credits from the following:
        - EML6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
      - For students who are not on campus and upon prior approval from the graduate coordinator, EML 6918 Directed Research (3 credit hours) may be substituted as the student's independent learning experience. In the case substitution EML 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research.
      - Earn at least 3 credits from the following types of courses:
        - Additional elective course as listed on the student's selected track catalog page

Grand Total Credits: **30**
**Track Details**

**Equipment Fee**

Students in the Mechanical Engineering MSME program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

**Independent Learning**

The Independent Learning requirement is met by successful completion of a master’s thesis for the thesis option. The nonthesis option independent learning experience is provided by the required course, EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 credit hours). For students who are not on campus and upon prior approval from the graduate coordinator, EML 6918 Directed Research (3 credit hours) may be substituted as the student’s independent learning experience. In the case substitution EML 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research certifying independent learning.

**Financial Information**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**Fellowship Information**

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Is this track available 100% online?**

Yes
**UCF Online**

**Please Note:** Mechanical Engineering MSME, Guidance Control and Dynamics Track may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

**Licensure Disclosure**

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit [https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Mechanical-Engineering-MSME.pdf](https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Mechanical-Engineering-MSME.pdf).

**Track Description**

The Master of Science in Guidance, Control and Dynamics (MSME) is designed to prepare students for careers as engineers in the aerospace industry. The curriculum is developed with strong emphasis in courses related to guidance control and dynamics with applications in aerospace engineering.

The MSME is awarded upon completion of a minimum of 30 credit hours, including 9 credit hours of required courses, 15 credit hours of elective courses selected from an approved list of courses, and an additional 6 credit hours in either a thesis or nonthesis option.

**Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree**

**Track Prerequisites**

Bachelor’s degree in Mechanical Engineering or closely related discipline. A student with an undergraduate degree outside of the selected departmental discipline may also be required to satisfy an articulation program.

**Prerequisites (or equivalent)**

- MAP 2302 - Differential Equations
- EML 3034C - Modeling Methods in Mechanical and Aerospace Engineering
- EAS 4105 - Flight Mechanics
- EAS 4134 - High-Speed Aerodynamics
- EAS 4200 - Flight Structures

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's degree in Mechanical Engineering or closely related discipline.
- The GRE is not required for admission to this program.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the MSME graduate program director for further information.

Degree Requirements

Required Courses
9 Total Credits
- Complete all of the following
  - Complete the following:
    ■ EML5271 - Intermediate Dynamics (3)
    ■ EEL5630 - Digital Control Systems (3)
  - Complete at least 1 of the following:
    ■ EEL5173 - Linear Systems Theory (3)
    ■ EML5311 - System Control (3)

Elective Courses
15 Total Credits
- Complete at least 5 of the following:
  - EAS6403C - Attitude Determination and Control (3)
  - EAS6415 - Guidance, Navigation and Control (3)
  - EEL6616 - Adaptive Control (3)
  - EEL6621 - Nonlinear Control Systems (3)
  - EML5152 - Intermediate Heat Transfer (3)
  - EML5713 - Intermediate Fluid Mechanics (3)
  - EML6211 - Continuum Mechanics (3)
  - EML6223 - Advanced Vibrational Systems (3)
  - EML5237 - Intermediate Mechanics of Materials (3)
  - EML6155 - Convection Heat Transfer (3)
  - EML6157 - Radiation Heat Transfer (3)
  - EAS6808 - Space Environment and Payload Instrumentation (3)
  - EEL5432 - Satellite Remote Sensing (3)

Thesis/Nonthesis Option
6 Total Credits
- Complete 1 of the following
  Thesis Option
  - Earn at least 6 credits from the following types of courses:
    EML 6971 Thesis
  - Additionally, all student pursuing the thesis option must enroll in the following course: EML 5090 - Mechanical and Aerospace Seminar (0 credit hours) Students must register for the seminar course a minimum of two times during their graduate career in the master's program (thesis option). The students must also complete the course with a satisfactory (S) grade in both attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.
  Nonthesis Option
  - Complete all of the following
    ■ Earn at least 3 credits from the following:
      ■ EML6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
    ■ For students who are not on campus and upon prior approval from the graduate coordinator, EML 6918 Directed Research (3 credit hours) may be substituted as the student's independent learning experience. In the case substitution EML 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research.
    ■ Earn at least 3 credits from the following types of courses:
      Additional elective course from list above.

Grand Total Credits: 30

Track Details

All students must identify an adviser and file an official degree program of study prior to the completion of 9 credit hours of study. The program of study must be approved by the department and therefore students should consult with the MSME Graduate Director for assistance in filling out their program of study. Substitutions to the program of study must meet with the approval of the adviser and the department.

Equipment Fee

Students in the Mechanical Engineering MSME program pay a $90 equipment fee each semester that they are enrolled.

Independent Learning

The independent learning requirement is met by successful completion of a master's thesis for the thesis option. The nonthesis option independent learning experience is provided by the required course, EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 credit hours). For students who are not on campus and upon prior approval from the graduate coordinator, XXX 6918 Directed Research (3 credit hours) may be substituted as the student's independent learning experience. If the substitution of XXX 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research certifying independent learning.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Mechanical-Engineering-MSME.pdf.

Track Description

The Master of Science degree in Mechanical Engineering is primarily intended for students with a bachelor's degree in Mechanical or Aerospace engineering or a closely related discipline obtained from a recognized accredited institution.

The Mechanical Systems track in the MSME program requires 30 credit hours, including 12 credit hours of required courses, 12 credit hours of elective courses selected from a list of approved courses, and 6 credit hours in a thesis or nonthesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree
**Track Prerequisites**

A bachelor's degree in Mechanical or Aerospace Engineering, or a closely related discipline. A student with an undergraduate degree outside of the selected departmental discipline may be required to satisfy an articulation program and take additional prerequisites.

**Prerequisites (or equivalent)**

- Differential Equations (MAP 2302)
- Modeling Methods in Mechanical and Aerospace Engineering (EML 3034C)
- Vibrations and Controls (EML 4225)
- Mechanical Systems Laboratory (EML 4301C)
- Machine Design and Analysis (EML 3500) or Flight and Structures (EAS 4200)

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirement, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- A bachelor's degree in Mechanical or Aerospace Engineering, or a closely related discipline.
- Résumé.
- Statement of educational, research, and professional career objectives.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Applicants should contact the MMAE graduate program director for more information.

      - Earn at least 3 credits from the following types of courses:
        - Additional elective course from list above.

Grand Total Credits: 30
Track Details

All students must identify an adviser and file an official degree program of study prior to the completion of 9 credit hours of study. Students should consult with the MMAE Graduate Program Director for assistance in completing the program of study form. The program of study must have departmental approval and must include at least 24 credit hours of formal course work, exclusive of thesis and research. Furthermore, at least half of the credit hours must be from courses at the 6000 level. Substitutions to the program of study must meet with the approval of the adviser and the department. More information is available from the MMAE departmental website listed above.

Equipment Fee

Students in the Mechanical Engineering MSME program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

Independent Learning

The Independent Learning requirement is met by successful completion of a master’s thesis for the thesis option. The independent learning experience in the nonthesis option is provided by the required course, EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 credit hours). For students who are not on campus and with prior approval from the graduate program director, EML 6918 Directed Research (3 credit hours) may be substituted as the student’s independent learning experience. If the substitution of EML 6918 is approved, a letter must be provided by the faculty member agreeing to supervise the directed research and certifying that the experience includes independent learning.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Is this program available 100% online?

No
Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Mechanical-Engineering-PhD.pdf.

Program Description

The Mechanical Engineering PhD program prepares students with an in-depth study and emphasis on research in Aerospace Systems, Mechanical Systems, or Thermofluids.

The Doctor of Philosophy degree in Mechanical Engineering is intended for students with a master's or a bachelor's degree in Mechanical or Aerospace engineering or a closely related discipline. The doctoral program is intended to allow students to study in-depth, with an emphasis on research in Aerospace Systems, Mechanical Systems, or Thermofluids.

The Mechanical Engineering PhD program requires a minimum of 72 credit hours beyond a bachelor's degree. This program requires 15 dissertation credit hours minimum and may include up to a total of 12 credit hours combined of directed (XXX 6918) or doctoral research (XXX 7919) and/or of independent study (6908) with an approved Program of Study. At least 39 hours of the program of study must consist of formal coursework, exclusive of directed research (XXX 6918), doctoral research (XXX 7919) and independent study (XXX 6908). The rest of the hours can be chosen by the student in consultation with the adviser and the dissertation committee and with the approval of the graduate program coordinator. Details about this program are located in the Mechanical Engineering PhD Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree
42 Credit hours minimum beyond the master's degree.

Program Prerequisites

Bachelor's or Master's degree in Mechanical or Aerospace Engineering or a closely related discipline.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's or Master's degree in Mechanical or Aerospace Engineering or a closely related discipline.
- The GRE is not required for admission to this program.
- Résumé.
- Statement about educational, research, and professional career objectives.
- Three letters of recommendation.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

Additional courses may be required to correct deficiencies. Students should contact the graduate program director for more information.

Degree Requirements

Seminar

0 Total Credits

- Complete all of the following
  - Earn at least 0 credits from the following:
    - EML5090 - Mechanical and Aerospace Seminar (99)
  - The MAE Graduate Seminar is a zero credit hour (S/U) course that is offered each fall and spring academic semesters. Prior to graduation, all MAE graduate students who are pursuing PhD dissertation required to register, participate, and receive a satisfactory (S) for four semesters of MAE Graduate seminar, with at least two of these taken prior to candidacy.

Elective Courses

57 Total Credits

- Earn at least 57 credits from the following types of courses:
  - May include up to a total of 12 credit hours combined of Directed (XXX 6918) or Doctoral Research (XXX 7919) and/or of Independent Study (6908) At least 45 credit hours must be formal coursework, exclusive of independent study, doctoral research and/or directed research.

Dissertation

15 Total Credits

- Earn at least 15 credits from the following types of courses:
  - EML 7980 15 Credit Hours minimum

Examinations

0 Total Credits

- In addition to the Qualifying Examination discussed above, the student must pass a Candidacy Examination and a Dissertation Defense Examination. The Candidacy Examination is taken near the end of the course work and consists of a written and oral presentation of a research proposal. The MMAE department requires that a PhD student submits his/her candidacy exam the academic semester immediately following his/her successfully passing the PhD Qualifying Exam. The Dissertation Defense Examination is an oral examination taken in defense of the written dissertation. The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student’s advisor and posted on the college's website and on the Events Calendar of the College of Graduate Studies website at least two weeks before the defense date. More information on these examinations and other requirements of the PhD program are contained in the Mechanical Engineering PhD Handbook.

Dissertation Committee

0 Total Credits

- The doctoral committee must consist of a minimum of five members: three must be graduate faculty members from within the student's department, and one must be at large from outside the Mechanical, Materials and Aerospace Engineering Department. The committee Chair must be a member of the graduate faculty approved to direct dissertations. Joint faculty members serve as department-faculty committee members as well as chairs of dissertation committees. Adjunct faculty and off-campus experts, if approved graduate faculty scholars, may serve as the outside-the-college person in the committee. Program areas may further specify additional committee membership. The UCF College of Graduate Studies reserves the right to review appointments to advisory committees, place a representative on any advisory committee, or appoint a co-adviser. All members vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal and final dissertation must be approved by a majority of the advisory committee.

Admission to Candidacy

0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours (enrollment in dissertation hours begins the semester following the completion of these requirements). Evidence of meeting these requirements must be received by the College of Graduate Studies by the day before the first day of classes for the semester in which a student wishes to enroll in dissertation hours. Completion of all course work, except for dissertation hours. Successful completion of the candidacy examination. Successful defense of the written dissertation proposal. The dissertation advisory committee is formed, consisting of approved Graduate Faculty and Graduate Faculty Scholars. Submission of an approved program of study.

Grand Total Credits: 72
Program Details

Students entering the program with a master’s degree are required to complete 42 credit hours minimum, of which 15 credit hours minimum must be formal coursework, exclusive of directed research (XXX 6918), doctoral research (XXX 7919), and independent study (XXX 6908), and 15 credit hours minimum of dissertation research (XXX 7980). No more than 12 credit hours combined of directed (XXX 6918) or doctoral research (XXX 7919) and/or independent study (XXX 6908) may be taken toward fulfilling the degree program of study coursework requirements.

Students entering the program with a bachelor’s degree are required to complete 72 credit hours minimum, of which 39 credit hours minimum must be formal coursework, exclusive of directed research (XXX 6918), doctoral research (XXX 7919), and independent study (XXX 6908), and 15 credit hours minimum of dissertation research (XXX 7980). No more than 12 credit hours combined of directed (XXX 6918) or doctoral research (XXX 7919) and/or independent study (XXX 6908) may be taken toward fulfilling the degree program of study coursework requirements.

The rest of the hours in the PhD program can be chosen by the student in consultation with the adviser and the dissertation committee and with the approval of the Graduate Coordinator. These credit hours may include doctoral directed research hours or doctoral dissertation hours.

Unless a completed (signed) program of study itemizing the study plan is approved prior to the end of the first semester of studies, the Graduate Director of the MMAE department may choose not to accept any part of the coursework (including independent studies and/or directed research) taken by the student on a program of study subsequently submitted by the student.

Admission to doctoral status requires that the student (1) pass a PhD Qualifying Examination, (2) establish a Doctoral Advisory Committee and (3) submit a departmentally approved Program of Study. These steps are normally completed within the first year of study beyond the master’s degree.

Students must register for the seminar course a minimum of four times during their graduate career in the doctoral program. Students must complete the EML 5936 seminar course twice prior to taking the candidacy exam and twice after completing the candidacy exam. The students must also complete the course with a satisfactory (S) grade in all attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.

Equipment Fee

Students in the Mechanical Engineering PhD program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

MAE Department Graduate Seminar Requirement

The MAE Graduate seminar is a zero (0) credit hour (S/U) course that is offered each fall and spring academic semesters. Prior to graduation, all MAE graduate students who are pursuing a PhD dissertation are required to register, participate, and receive a satisfactory (S) for four (4) semesters of MAE Graduate seminar, with at least two of these taken prior to candidacy.

Independent Learning

The Independent Learning Requirement is met by successful completion of the student’s candidacy and dissertation defense examinations.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241

Program Description
The Graduate Certificate in Mixed Reality Engineering aims to provide students with a comprehensive overview of virtual and augmented reality technologies culminating in the development of a mixed reality software application or system.

Total Credit Hours Required: 9 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements
Admission is open to those with a bachelor's degree in computer science or a closely related discipline from an accredited institution recognized by UCF with a minimum GPA of 3.0. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition, applicants to this certificate must provide:

Applications are accepted for the fall and spring terms only.

UCF Online

Please note: Project Engineering Graduate Certificate may be completed fully online, although not all elective options or program
prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes
may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring
semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements
for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current
information.

Program Description

The Graduate Certificate in Project Engineering is designed to meet the needs of engineers moving into management and other
leadership roles.

The certificate program compliments their technical backgrounds with the human aspects, organizational and financial issues, project
considerations, and analytical tools for effective decision making.

For the Project Engineering certificate, students complete three required courses and one elective course, for a total of 12 credit
hours.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Admission is open to those with a bachelor’s degree in industrial engineering or a closely related discipline from an accredited
institution recognized by UCF.

Program Description

The Graduate Certificate in Quality Assurance is designed to provide students with the knowledge and tools they need to help them understand how to increase process and product performance and to improve the quality and reliability of goods and services in any manufacturing, healthcare, and other service organizations.

Much of the resurgence of U.S. companies and service organizations in the global marketplace has been due to an increased emphasis on quality. Today’s consumers are offered many alternatives to meet their needs, and they have consequently become very discriminating in their purchases. In addition, companies seek to be known as a quality organization, not merely the producer of quality products. The Graduate Certificate in Quality Assurance provides students with the knowledge they need to increase process and product performance, to improve the quality and reliability of goods and services and to institute steps to make their organizations more competitive through an overall commitment to quality.

For the Quality Assurance certificate, students complete three required courses and one elective course, for a total of 12 credit hours.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Admission is open to those with a bachelor’s degree in industrial engineering or a closely related discipline from an accredited institution recognized by UCF.

Program Description

In 2017, FUTURe CIty initiative was launched by Civil, Environmental and Construction Engineering (CECE) in the College of Engineering and Computer Science (CECS). FUTURE CIty initiative at UCF brings together a group of researchers and educators with a vision to synergistically explore the wide-ranging technological advances towards better serving urban residents. Towards furthering this vision, we envision this graduate certificate in Smart Cities to provide engineers and urban planners with a background in Smart Cities.

The certificate offers a 9 credit program with flexible course options listed below.

Total Credit Hours Required: 9 Credit Hours Minimum beyond the Bachelor's Degree

Is this program available 100% online?

No

Program Description

The Graduate Certificate in Structural Engineering provides qualified engineers and students with the knowledge to analyze and design structures that will perform safely.

Structural engineering plays a significant role in the ongoing infrastructure developments in the central Florida area. Engineers continually need to update their knowledge of the state-of-the-art in research and practice in order to ensure the safety of constructed facilities. The Graduate Certificate in Structural Engineering is designed to advance the knowledge of civil and structural engineers. The Graduate Certificate is a good way for qualified students to sample the graduate programs in this area. However, because these are graduate level classes, students must have an undergraduate degree in Civil Engineering or closely related discipline in order to be admitted.

For the Structural Engineering certificate, students have the flexibility to choose four courses from a list of approved engineering courses, for a total of 12 credit hours.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Admission is open to those with a bachelor's degree in Civil or Mechanical Engineering from an accredited institution recognized by UCF.

Application Requirements

Admission is open to those with a bachelor's degree in Civil or Mechanical Engineering from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Program Description

The Graduate Certificate in “Sustainable and Resilient Energy Systems” provides students with an interdisciplinary curriculum focused on technologies and policies for future smart energy systems that are sustainable, resilient, efficient, and market-oriented. The program prepares students for holistic design and operation challenges of emerging energy systems with distributed renewable energy sources, advanced information, communication, control and optimization technologies, along with supporting economic and management policies. This graduate certificate is beneficial to individuals (professionals, engineers and researchers) who have an interest in deployment and operation of future smart energy systems, in particular the challenges from the technology and policy perspectives.

UCF Partnerships

The Sustainable and Resilient Energy Systems certificate partners with several UCF master's programs. If students complete the certificate and are accepted into a partnering program, all certificate coursework can be used toward that master's degree. Here is a list of our partnering UCF master's programs:

- Electrical Engineering MSEE
- Computer Engineering MSCpE

The Graduate Certificate in Sustainable and Resilient Energy Systems requires a total of 12 credit hours (4 courses). Nine credit hours are from the three required courses given below. The remaining three credit hours can be selected from the list of elective courses. Electives outside of the provided list require approval from the ECE graduate coordinator.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended
- Résumé or Curriculum Vitae

Yes

UCF Online

Please note: Systems Engineering Graduate Certificate may be completed fully online although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description

The Graduate Certificate in Systems Engineering focuses on introducing students to the fundamentals of systems requirements, architecture, and integration and testing. Systems Engineering is an interdisciplinary approach and means to enable the realization of successful systems. Systems Engineering integrates all the disciplines and specialty groups into a team effort forming a structured development process that proceeds from concept to production to operation. Systems Engineering considers both the business and the technical needs of all customers with the goal of providing a quality product that meets the user needs.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree
Program Prerequisites

Admission is open to those with a bachelor’s degree in engineering or a closely related discipline from an accredited institution recognized by UCF.

Application Requirements

Admission is open to those with a bachelor’s degree in engineering or a closely related discipline from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition, applicants to this certificate must provide:

- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc only.

Applications are accepted for the fall and spring terms only.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Systems-Engineering-MSSE.pdf.

Program Description

The Master of Science in Systems Engineering (MSSE) is a fully online program that focuses on applications of systems engineering in designing, developing, integrating, and evaluating complex systems through their life cycle. This unique program is offered in response to the growing needs of the industry where systems thinking, complexity, globalization, quality, and productivity are the key business drivers.

The MSSE requires 30 credit hours of courses beyond the bachelor's degree. This program offers only the non-thesis option.

This web-based online MSSE is designed to attract students with a variety of educational backgrounds and a keen interest in working as systems engineers, program/project managers, chief engineers, etc. The traditional engineer and scientist often lack preparation in the human, financial, software, and systems integration skills necessary to make project teams more productive, improve system and service quality, and promote the advancement of high technology for complex systems. Systems engineering is a practice-based discipline that focuses on developing these attributes with elements of engineering, systems, and management.

For information about the program, please contact IEMS Graduate Director Dr. Mansooreh Mollaghasemi Elshennawy (mollagha@ucf.edu).

Translating a specific design into an organizational or physical reality in the most effective manner, and with the highest quality, is the focus of the Industrial Engineering and Management Systems field. This program is tailored to meet the needs of a broad range of working professionals interested in leading systems engineering and management activities. This program was designed by industry to provide the skills needed to be successful in the defense, government, healthcare, etc., sectors that require engineers who can collect requirements, architect, and integrate human, software, and hardware elements of modern systems.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Students with undergraduate degrees in industrial or systems engineering or other engineering degrees are encouraged to apply for admission. Graduates from science or technology curricula may apply to obtain the MS degree.

All applicants are expected to have completed the following prerequisites during their undergraduate engineering education:

- Mathematics through Calculus II (MAC 2312 or equivalent)
- Undergraduate probability and statistics for engineers (STA 3032 or equivalent)
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Resume or Curriculum Vita
- Goal statement
  - The goal statement should discuss all relevant professional background and any previous research and/or teaching experience. The statement should explain the motivation behind the pursuit of an MSSE. Future educational and career goals after the completion of the applicant's master study should be discussed.
  - If the applicant is interested in completing a Master thesis, then the applicant must clearly describe the particular area of research interest. The applicant should identify at least one UCF faculty member who shares a similar research focus and is believed to be best suited to serve as a potential thesis advisor.
  - The goal statement should be between 500 and 1,000 words.
- Two letters of recommendation
  - The letters of recommendation should be from faculty members, university administrators, and employers with a supervisory role of the applicant. The letters, which must be current to the application and must not be for another degree program, should address the educational and career goals of the applicant. The letter writers should also know the applicant well enough to discuss the applicant's capacity to perform, excel and succeed in a graduate program. Letters for Master’s thesis students must discuss the applicant's ability to perform graduate-level research.
  - Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applications are accepted for the fall and spring terms only.

Faculty members may choose to conduct face-to-face or telephone interviews before accepting an applicant into their research program.

      - EIN6182 - Engineering Management (3)
      - EIN5356 - Cost Engineering (3)
      - ESI5227 - Total Quality Improvement (3)
  - Quality and Production Systems
    - Complete at least 3 of the following:
      - ESI6225 - Quality Design and Control (3)
      - EIN6336 - Production and Inventory Control (3)
      - EIN5356 - Cost Engineering (3)
      - ESI5227 - Total Quality Improvement (3)
  - Human System Integration
    - Complete at least 3 of the following:
      - EIN5248 - Ergonomics (3)
      - EIN5251 - Usability Engineering (3)
      - EIN6258 - Human Computer Interaction (3)
      - EIN6271 - Human Reliability (3)

Grand Total Credits: 30

Program Details

Independent Learning

The Independent Learning requirement is met by successful completion of the research studies required in the individual courses. Systems engineering by definition is an interdisciplinary major requiring independent learning across a wide spectrum of management, technology, and traditional engineering. These research studies require that students integrate material from all the courses in their program. The Systems Integration class, which is the fourth course in the core sequence, builds prior classes and requires independent research to describe, architecture, model, and ultimately integrate and test complex products and services.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Technologies for Smart Communities Graduate Certificate

College
College of Engineering and Computer Science

Department
Department of Electrical and Computer Engineering

Program Website
www.ece.ucf.edu

Program Contact Information

Kalpathy Sundaram PhD
Professor
eece-grad@cecs.ucf.edu
Telephone: 407-823-5326
HEC 439B

Is this program available 100% online?

No
Program Description

The Graduate Certificate in Technologies for Smart Communities provides students with an interdisciplinary curriculum focused on technologies that enable smart and connected communities of the future. The program prepares students for design and operation challenges of emerging smart and connected communities, in particular from technology perspective.

This graduate certificate is beneficial to individuals (professionals, engineers and computer scientists) who have an interest in deployment and operation of smart and connected communities, in particular the challenges that pertain to communications, sensing, and control technologies.

UCF Partnerships

The Technologies for Smart Communities certificate partners with several UCF master's programs. If students complete the certificate and are accepted into a partnering program, all certificate coursework can be used toward that master's degree. Here is a list of our partnering UCF master's programs:

- Electrical Engineering MSEE
- Computer Engineering MSCpE

The Graduate Certificate in Technologies for Smart Communities requires a total of 12 credit hours (4 courses). Six credit hours are from two required courses given below. The remaining six credit hours can be selected from the list of elective courses. Electives outside of the provided list require approval from the ECE graduate coordinator.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended
- Résumé or Curriculum Vitae

Transportation Engineering Graduate Certificate

College
College of Engineering and Computer Science

Department
Department of Civil, Environmental, and Construction Engineering

Program Website
http://www.cece.ucf.edu/graduate/
Is this program available 100% online?

No

Program Description

The Graduate Certificate in Transportation Engineering is designed for professionals who are faced with solving transportation needs. Transportation engineering is crucial for the Orlando area.

As gridlock becomes more evident, more skilled professionals will be needed.

For the Transportation Engineering certificate, students have the flexibility to choose four courses from a list of approved engineering courses, for a total of 12 credit hours.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Students must have completed an undergraduate Transportation course (such as TTE 4004) or an equivalent.

Application Requirements

Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Students must have completed an undergraduate Transportation course (such as TTE 4004) or an equivalent.

Yes

UCF Online

Please note: Travel Technology and Analytics MS may be completed fully online although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.
Program Description

The interdisciplinary Master of Science in Travel Technology and Analytics, offered jointly by the College of Engineering and Computer Science (Departments of Computer Science; Industrial Engineering and Management Systems; Civil, Environmental, and Construction Engineering) and the Rosen College of Hospitality Management (Departments of Tourism, Events, and Attractions; Hospitality Services), introduces graduate students to the technical aspects of big data analytics, including predictive analytics, algorithm design and models for SMART-cities, SMART-technologies and travel systems, and service systems quality engineering, in the specific context of global travel and tourism. The value and importance of such a program is demonstrated by travel and tourism and is the number one industry globally with immense economic, social, cultural and environmental impacts. Locally, the program promises to deliver significant value for the industry benefitting from a large number of visitors to the state and especially central Florida.

This powerful industry with $8.3 trillion in economic benefits globally, which functions at the intersection of engineering and management, is being transformed by rapidly increasing technological innovations and advances and is adapting to these changes by creating new employment opportunities to match. The dynamic nature of the industry and technological advances reveal the need for a workforce with advanced skills: fluency in data science and analytics, understanding of complex travel systems, strategic problem solving, big-picture thinking, technical knowledge, and practical skills aligned with technological advances. The changing nature of travel and tourism employment reveals emerging positions in areas of online travel agencies [OTA], global distribution systems [GDS], data analytics, data architecture, predictive analytics, mobile devices, travel apps, geolocation, data visualization, data translation, programming, interface design, virtual reality [VR], augmented reality [AR], hologram technology, travel click technology, business intelligence [BI], social media management, SMART-city design and development, and SMART-technologies and travel systems. The broader travel industry and its subsectors (transportation, lodging, and attractions) are experiencing the disruptive effects of direct and indirect distribution impacted by mobile devices, e-commerce, role of IT in distribution and dynamic pricing, and a highly perishable inventory (e.g., hotel rooms, airline seats) as well as those of artificial intelligence (AI) and machine learning and becoming increasingly more dependent on analytics as a key facet of business strategy.

Highlights:

- Academically-rich, industry-relevant interdisciplinary program
- Flexible course offerings in face-to-face, mixed and online modalities
- Offered at UCF's main campus and UCF's Rosen College of Hospitality Management campus
- Exponential industry growth locally, regionally, nationally and globally
- Cutting edge curriculum with a strong STEM foundation
- Research opportunities in both colleges
- Skills found highly desirable by industry leaders ranging from the local to the international level

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

A Bachelor's degree in a STEM-related discipline from an accredited institution.

Depending on the degree completed, one or more prerequisite courses may be required, namely: STA 2023 (Statistical methods) and STA 3032 (Probability and Statistics for Engineers) or CAP 4630 (Artificial Intelligence).

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A goal statement. This is your opportunity to outline in 500 words why you wish to join the program, what you think you will contribute to the program, and how you feel the program will enhance you both personally and professionally in the future.
- Updated résumé.
- Three letters of recommendation.
- The GRE/GMAT is not required, however, the Admissions Committee may ask for the GRE/GMAT to strengthen a candidate's application package.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

    - ESI6224 - Quality Management (3)
    - ESI6225 - Quality Design and Control (3)

Optional Elective Courses
0 Total Credits

- STA 5703 - Data Mining Methodology I 3 Credit Hours
- STA 6704 - Data Mining Methodology II 3 Credit Hours
- STA 5206 - Statistical Analysis 3 Credit Hours
- STA 6714 - Data Preparation 3 Credit Hours

Grand Total Credits: 30
Program Details

The program will be 30 credits (18 core/required and 12 electives). There will be no thesis requirement, however, a semester-long applied capstone project (involving industry and approved by the program director) will be required. The program will provide employable technical skills including the development of algorithms, discrete choice models, service systems quality engineering, machine learning, digital marketing, and big data management, and computer systems to extract insight from big data. The foregoing will be appropriately contextualized within the global travel industry and its trajectory toward increasing technological innovations that continue to drive the industry. The curriculum includes six (6) required courses that ensure that students have skills in algorithms and statistical techniques for extracting information in addition to awareness of the global travel and tourism industry including. Although courses can generally be taken in any order, the first two (2) required (co-requisite) courses serve as pre-requisites for all remaining courses in the program.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

No

Program Description

The Geographic Information Systems (GIS) Graduate Certificate provides students with the interdisciplinary background in geography and the technical skills in the application of GIS. The certificate will enhance the student’s ability to understand, visual and analyze geospatial data to address questions related to place and spatial interactions.

GIS and geospatial analyses allow students and researchers to see old problems in new ways making connections by overlaying digital maps and examining spatial networks and processes.
Application Requirements

Admission is open to those with a bachelor’s degree from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must submit an essay that describes their background and interests in relation to their desire to obtain the GIS certificate.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on an evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, the applicant’s potential for completing the certificate and openings in the program.

- Complete all of the following
  - Group A - First Core Course
    - Complete at least 1 of the following:
      - ANG5852 - GIS Methods in Anthropology (3)
      - ANG6181C - GIS Applications in Anthropology (3)
      - CCJ6079 - Crime Mapping and Analysis in Criminal Justice (3)
      - PAD6716 - Information Systems for Public Managers and Planners (3)
      - POS6743 - Geographic Tools for Political Science Research (3)
      - SYA6356 - Geographic Information Systems in Society (3)
  
  - Group B - Second Core Course
    - Complete at least 1 of the following:
      - ANG5853 - Advanced GIS Methods in Anthropology (3)
      - CCJ6077 - Advanced Crime Mapping and Analysis in Criminal Justice (3)
      - SYA6452 - GIS Applications (3)
  
  - Group C - Electives
    - Complete all of the following
      - Complete at least 2 of the following:
        - BSC5824 - Biogeography (4)
        - CAP6121 - 3D User Interfaces for Games and Virtual Reality (3)
        - CCJ6073 - Data Management Systems for Crime Analysis (3)
        - CCJ7725 - The Geography of Crime: Theory and Methods (3)
        - CWR5634 - Water Resources in a Changing Environment (3)
        - CWR6126 - Groundwater Modeling (3)
        - CWR6535 - Modeling Water Resources Systems (3)
        - EEL5432 - Satellite Remote Sensing (3)
        - EEL5820 - Image Processing (3)
        - ENG6808 - Narrative Information Visualization (3)
        - ENV6047 - Environmental Informatics and Remote Sensing (3)
        - HIS5925 - History in the Digital Age (3)
        - HIS6165 - Digital Tools for Historians (3)
        - HIS6167 - Spatial History (3)
        - HUM5396 - Place and Space (3)
        - TTE6938 - Special Topics (3)
        - SYA6458 - Advanced Topics in Geographic Information Systems in Society (3)
        - PCB6328C - Landscape Ecology (4)

- It is recommended that students take Group C courses after taking Group A and B courses. Other courses related to Geospatial Science can be used to satisfy the Group C requirement, if the specific course is approved by the Graduate Certificate faculty.

No

Program Description
The Master of Arts in Interdisciplinary Studies is a unique program designed for students who want to develop their own precision degree program by combining areas of study traditionally associated with a Master of Arts (Humanities, Social Sciences, Communication, etc.). Students have the flexibility to create an individually tailored plan by choosing two concentrations that culminate in either a thesis or nonthesis experience based on their future aspirations.

The Nonthesis Track culminates in a capstone experience that prepares students for applied, non-research oriented careers.

The Thesis Track culminates in a scholarly publication that includes original research undertaken during your time as a graduate student. This provides excellent preparation for the future pursuit of a doctoral degree or research-oriented career.

Please scroll to the bottom of this page for further details on these Tracks.

Application Requirements
For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

Is this track available 100% online?

No

Track Description

The Nonthesis Track in the Master of Arts in Interdisciplinary Studies program allows students the flexibility to develop an individually tailored plan of study using courses traditionally associated with MA degrees. This track can combine a variety of concentrations and culminates in a capstone experience. The precision program is designed to help students prepare for applied, non-research oriented careers.

This is an excellent program for a number of endeavors appropriate for the twenty-first century. By combining the knowledge from two disciplines, supported by cross-disciplinary electives, students are able to precisely define their own area of expertise. This unique option is ideal for students who have varied interests that can be connected by a common theme or goal.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Personal statement addressing the following three items: (a.) Description of the two intended concentrations, (b.) What problems or issues are addressed by combining these concentrations, and (c.) What contribution(s) can the interdisciplinary combination make to society, a field of study, etc.
- Résumé.
- Three letters of recommendation (prefer academic references).
- Proposed program of study identifying the two concentrations and potential courses the student would take if admitted.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applicants should note the minimal requirements for admission to the program, although meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Degree Requirements

Required Courses
9 Total Credits
- Complete all of the following
  - Complete the following:
    - IDS6308 - Ways of Knowing (3)
  - Earn at least 3 credits from the following types of courses:
    - A critical thinking and writing course in one of the chosen concentrations or in an area that supports the plan of study.
  - Earn at least 3 credits from the following types of courses:
    - A research methods course in one of the chosen concentrations or in an area that supports the plan of study.

Elective Courses
24 Total Credits
- Complete all of the following
  - Students take a minimum of 24 credit hours of electives, including two concentrations of 9 credit hours each of restricted electives and 6 credit hours of unrestricted electives. The unrestricted electives can be from either concentration or additional areas that support the capstone project or intended use of the degree. Students who choose one of the pre-approved concentrations such as Diversity and Inclusion or Project Management can choose courses from those course listings on our website. Those students do not need to list 2 concentrations. Course and concentration selections are done in consultation with and with approval from the program director or academic coordinator.
  - Restricted Elective Courses
    - Complete all of the following
      - Earn at least 9 credits from the following types of courses:
        - Three courses in the first concentration.
      - Earn at least 9 credits from the following types of courses:
        - Three courses in the second concentration.
  - Unrestricted Elective Courses
    - Earn at least 6 credits from the following types of courses:
      - Two additional elective courses.

Capstone
0 Total Credits
- Students choose to complete a project, an internship, or a written comprehensive examination as their capstone experience. The capstone project should reflect a combination of the two concentrations in the degree by finding an applied policy area, special topic, or issue that crosses both areas. Some examples of project types include: writing a grant proposal for an agency, program evaluation and recommendations, or a "best practices" literature review in a particular area. Students must choose three advisers for the project, one from each concentration area and one from any supporting discipline. The project will be evaluated on a pass/fail basis. Students who feel an internship will best support their plan of study and professional goals will enroll in IDS 5949 Co-op Interdisciplinary Study (0 credits) and IDS 6949 Co-op Interdisciplinary Study (3 credits) after locating an acceptable internship host site, with the approval of the program coordinator. The written examination will entail the selection of an exam committee of three faculty who will formulate questions to address both concentration areas. The student will have 48 hours to complete the take-home exam and it should be completed in their final semester of enrollment. The exam will be graded on a pass/fail basis. If the student does not pass both questions with a 70% or higher, the student will have two additional chances to retake the exam with new questions. The exam can be taken only once per semester.
- Independent Learning
  0 Total Credits
    - The program is designed to provide numerous independent learning opportunities. The required methods course will introduce students to research methodology that they will apply to independent research/capstone work. IDS 6308 acquaints students with interdisciplinarity through the use of student-driven analyses, discussions, and presentations. The required critical thinking and writing course involves students in verbal and written discussions, analyses, and critiques of work they create and from the published literature. Additionally, the completion of the capstone experience will require independent learning that will be evaluated by faculty in the specified disciplines.

Grand Total Credits: \(33\)

Track Details

The Master of Arts in Interdisciplinary Studies program is designed for students interested in an interdisciplinary precision experience who develop concentrations for their plan of study through courses traditionally associated with MA degrees.

Coursework must be selected so that at least 50 percent of credit hours in the program is taken at the 6000 level. Students must earn course grades of "B" or higher to gain credit toward their master's degree.

    - Unrestricted Elective Course
      - Earn at least 3 credits from the following types of courses:
        - Unrestricted elective.

Thesis
6 Total Credits
- Complete all of the following
  - Earn at least 6 credits from the following:
    - IDS6971 - Thesis Research (3)
  - Students should select a faculty adviser and form a thesis committee of two additional members no later than their third semester in the program. Before officially beginning work on the thesis, the student must submit a thesis proposal to the committee for approval. This proposal must cover the thesis topic and plan of approach. By the end of their degree, students will complete 6 credit hours of thesis and successfully defend their thesis. The thesis consists of a common theme with an introduction and literature review, details of the study, and results and conclusions. The thesis must be prepared and submitted in writing as well as presented and defended orally.

Independent Learning
0 Total Credits
- The thesis serves as the independent learning experience. In addition, the required methods course introduces students to research methodology that they will apply to their independent research work, and IDS 6308 acquaints them with interdisciplinarity through the use of student-driven analyses, discussions, and presentations.

- Three letters of recommendation (prefer academic references).
- Proposed program of study identifying the two concentrations and potential courses the student would take if admitted.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applicants should note the minimal requirements for admission to the program, although meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Degree Requirements

Required Courses
9 Total Credits

- Complete all of the following
  - Complete the following:
    - IDS6308 - Ways of Knowing (3)
    - IDS6351 - Critical Thinking and Writing (3)
  - Earn at least 3 credits from the following types of courses:
    A research methods course in one of the chosen concentrations

Elective Courses
24 Total Credits

- Complete all of the following
  - Students take a minimum of 24 credit hours of electives, including two concentrations of 9 credit hours each of restricted electives and 6 credit hours of unrestricted electives. The additional electives can be from either concentration or additional areas that support the capstone project or intended use of the degree. Students who choose one of the pre-approved concentrations such as Diversity and Inclusion or Project Management can choose courses from those course listings on our website. Those students do not need to list 2 concentrations. Course and concentration selections are done in consultation with and with approval from the program director or academic coordinator.
  - Restricted Elective Courses
    - Complete all of the following
      - Earn at least 9 credits from the following types of courses:
        - Three courses in the first concentration.
      - Earn at least 9 credits from the following types of courses:
        - Three courses in the second concentration.
  - Unrestricted Electives
    - Earn at least 6 credits from the following types of courses:
      - Two additional elective courses

Capstone
0 Total Credits

- Students choose to complete a project, an internship, or a written comprehensive examination as their capstone experience. The capstone project should reflect a combination of the two concentrations in the degree by finding an applied policy area, special topic, or issue that crosses both areas. Some examples of project types include: writing a grant proposal for an agency, program evaluation, and recommendations, or a "best practices" literature review in a particular area. Students must choose three advisers for the project—one from each concentration area and one from a complementary discipline. The project will be evaluated on a pass/fail basis. The written examination will entail the selection of an exam committee of three faculty that will formulate questions to address both concentration areas. The student will have 48 hours to complete the take-home exam and it should be completed in their final semester of enrollment. The exam will be graded on a pass/fail basis. If the student does not pass both questions with a 70% or higher, the student will have two additional chances to retake the exam with new questions. The exam can be taken only once per semester.

Independent Learning
0 Total Credits

- The program is designed to provide numerous independent learning opportunities. The required methods course introduces students to research methodology that they will apply to independent research/capstone work. IDS 6308 acquaints students with interdisciplinarity through the use of student-driven analyses, discussions, and presentations. IDS 6351 engages students in verbal and written discussions, analyses and critiques of work they create and from the published literature. Additionally, the completion of the capstone experience will require independent learning that will be evaluated by the faculty in the specified disciplines.

Grand Total Credits: 33

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

2021-2022 Graduate Catalog
Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

No

Track Description
The Thesis Track in the Master of Science in Interdisciplinary Studies program allows students the flexibility to develop an individually tailored plan of study using courses traditionally associated with MS degrees. This precision track can combine a variety of concentrations and culminates in a research thesis, which provides excellent preparation for a future doctoral degree or a research-oriented career.

The Master of Science in Interdisciplinary Studies is an excellent program for a number of endeavors in the twenty-first century. By combining the knowledge from two disciplines, supported by cross-disciplinary electives, students are able to precisely define their own area of expertise. This unique option is ideal for students who have varied interests that can be connected by a common theme or goal.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Personal statement addressing the following three items: (a.) Description of the two intended concentrations, (b.) What problems or issues are addressed by combining these concentrations, and (c.) What contribution(s) can the interdisciplinary combination make to society, a field of study, etc.
- Résumé.
- Three letters of recommendation (prefer academic references).
- Proposed program of study identifying the two concentrations and potential courses the student would take if admitted.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applicants should note the minimal requirements for admission to the program, although meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant’s career/academic goals, and the applicant's potential for completing the degree.

Degree Requirements

Required Courses
6 Total Credits

- Complete all of the following
  - Complete the following:
    - IDS6308 - Ways of Knowing (3)
  - Earn at least 3 credits from the following types of courses:
    - A research methods course in one of the chosen concentrations

Elective Courses
21 Total Credits

- Complete all of the following
  - Restricted Elective Courses
    - Complete all of the following
      - Students take a minimum of 18 credit hours in restricted electives, including two concentrations of 9 credit hours of courses each. Course and concentration selections are done in consultation with and with approval of the program director or academic coordinator, as well as with the student's faculty adviser and thesis committee.
      - Earn at least 9 credits from the following types of courses:
        - Three courses in the first concentration.
      - Earn at least 9 credits from the following types of courses:
        - Three courses in the second concentration.
  - Unrestricted Elective Course
    - Earn at least 3 credits from the following types of courses:
      - Unrestricted elective

Thesis
6 Total Credits

- Complete all of the following
  - Earn at least 6 credits from the following:
    - IDS6971 - Thesis Research (3)
  - Students should select a faculty adviser and form a thesis committee of two additional members by their third semester in the program. Before officially beginning work on the thesis, the student must submit a thesis proposal to the committee for approval. This proposal must cover the thesis topic and plan of approach. By the end of their degree, students will complete 6 credit hours of thesis and successfully defend their thesis. The thesis consists of a common theme with an introduction and literature review, details of the study, and results and conclusions. The thesis must be prepared and submitted in writing as well as presented and defended orally.

Independent Learning
0 Total Credits

- The thesis serves as the independent learning experience. In addition, the required methods course introduces students to research methodology that they will apply to independent research work, and IDS 6308 acquaints students with interdisciplinarity through the use of student-driven analyses, discussions and presentations.

Program Description

The UCF School of Modeling, Simulation, and Training (SMST) considers its degree programs as transdisciplinary, intended for those who wish to pursue a career in the fields of academia, government, military/defense, healthcare/medicine, entertainment, technology, education, or service/manufacturing. Most engineering or scientific fields use simulation as an exploration, modeling, or analysis technique. However, Modeling and Simulation is not limited to engineering and science, as it is also used in training, management, and concept exploration. These programs involve constructing human-centered, equipment-centered, and stand-alone computer-based models of existing and conceptual systems and processes.

UCF SMST sought feedback from industry practitioners to identify key competencies for students in our degree programs. This input has been critical to the development of our curriculum, which is designed to provide a broad overall perspective of the developing simulation industry and an awareness of the economic considerations. UCF SMST's objective is to provide education on evaluating the human, organization, equipment, and systems under study through the evaluation of output from the corresponding simulation construct. Alumni of SMST degree programs have both general and specialized skills in Modeling and Simulation.

Though not required, many students in the Modeling and Simulation M.S. program choose to focus their study and research efforts in an area of specialization. Students can base their specialization on their academic and professional goals, and seek feedback from their faculty adviser and the Modeling and Simulation graduate program director. Common areas of specialization are listed below (descriptions can be found at msgrad.ist.ucf.edu). This is not an exhaustive list, as the field continues to grow and evolve.

- Behavioral Cybersecurity
- Computer Visualization
- Human Systems
- Instructional and Training Simulation
- Interactive Simulation and Intelligent Systems
- Simulation in Government and Military
- Simulation in Healthcare and Medicine
- Simulation Infrastructure
- Simulation Management
- Simulation Modeling and Analysis

Program Prerequisites

Though UCF SMST does not have a mandated prerequisite for its graduate programs, the most successful students are those who have an academic and/or work background that has prepared them in mathematics (introductory calculus and probability and statistics) and computer literacy, preferably familiarity with at least one higher order programming language (e.g., Python, C/C++/C#, Visual Basic, Java, etc.). Students with undergraduate or graduate degrees in Engineering, Computer Science, or Mathematics will generally have this background.

Students without this background are encouraged to select the elective course IDC 5570 (Introductory Mathematics for Modeling and Simulation). This course will prepare them for the required core course COT 6571 (Mathematical Foundations of Modeling and Simulation).
**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Students who enter the Master of Science in Modeling and Simulation program are expected to have an academic and/or work background that has prepared them in mathematics (introductory calculus and probability and statistics) and computer "literacy," including proficiency with word processing, spreadsheet, and database programs, and, preferably, familiarity with at least one higher order programming language (e.g., C++). Students with undergraduate degrees in Engineering, Computer Science, or Mathematics will generally have this background.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Résumé or Curriculum Vitae
- Goal statement
  - The goal statement should discuss all relevant professional background and any previous research and/or teaching experience.
  - The statement should:
    - Explain the motivation behind the pursuit of a graduate degree in Modeling and Simulation.
    - Discuss future career goals after the completion of the applicant’s master study.
    - Clearly describe the particular area(s) of research/professional interest, including the identification of at least one UCF faculty member with a similar research focus who could serve as a potential advisor.
  - The goal statement should between 500 and 1,000 words.
- Two letters of recommendation
  - The letters of recommendation should:
    - Be from faculty members, university administrators and employers (at least one letter should be furnished by college/university faculty who are acquainted with the applicant).
    - Be current to the application.
    - Address the educational and career goals of the applicant.
    - Clearly address the applicant's ability to perform graduate-level study and research.
  - The letter writers should also know the applicant well enough to discuss the applicant's capacity to perform, excel and succeed in a graduate program.
  - Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applications are accepted for the fall and spring terms only.

**Readmission**

The UCF SMST Graduate Programs will consider applications for readmission from students who have been dismissed and/or deactivated from its degree programs. Those interested in readmission MUST consult the Modeling and Simulation Graduate Program Director prior to their application to determine their eligibility to reapply and the requirements for their application.

**Prerequisites**

Though UCF SMST does not have a mandated prerequisite for its graduate programs, the most successful students are those who have an academic and/or work background that has prepared them in mathematics (introductory calculus and probability and statistics) and computer literacy, preferably familiarity with at least one higher order programming language (e.g., Python, C/C++/C#, Visual Basic, Java, etc.). Students with undergraduate or graduate degrees in Engineering, Computer Science, or Mathematics will generally have this background.

Students without this background are encouraged to select the elective course IDC 5570 (Introductory Mathematics for Modeling and Simulation). This course will prepare them for the required core course COT 6571 (Mathematical Foundations of Modeling and Simulation).

Degree Requirements

Required Courses

15 Total Credits

- Complete all of the following
  - Complete the following:
    - COT6571 - Mathematical Foundations of Modeling and Simulation (3)
    - IDS6147 - Perspectives on Modeling and Simulation (3)
    - IDS6145 - Simulation Techniques (3)
    - IDS6267 - Understanding Humans for Modeling and Simulation (3)

Thesis/Non Thesis Option

- Complete 1 of the following
  - Thesis Option
    - Complete the following:
      - IDS6262 - Research Design for Modeling and Simulation (3)
  - Non Thesis Option
    - Complete the following:
      - IDS6916 - Simulation Research Methods and Practicum (3)

Unrestricted Electives

15 Total Credits

- Earn at least 15 credits from the following types of courses:
  All Modeling and Simulation MS students must take at least 9 credit hours of unrestricted electives that support the student's area of graduate study. Unrestricted electives must consist of at least 9 credit hours of formal courses, which may include independent study (up to 6 credit hours). The remaining credit may consist of additional thesis (for thesis option students only), directed research, and additional courses as advised appropriately by the faculty adviser and/or program director.

Thesis/Nonthesis Option

6 Total Credits

- Complete 1 of the following

  Thesis Option
  - Earn at least 6 credits from the following:
    - IDS6971 - Thesis Research (3)

  Non Thesis Option
  - Complete all of the following
    - Restricted Elective
      - Complete at least 1 of the following:
        - IDC5602 - Cybersecurity: A Multidisciplinary Approach (3)
        - IDC6601 - Behavioral Aspects of Cybersecurity (3)
        - IDC6700 - Interdisciplinary Approach to Data Visualization (3)
        - IDS5142 - Modeling and Simulation for Instructional Design (3)
        - IDS6146 - Modeling and Simulation Systems (3)
        - IDS6149 - Modeling and Simulation for Test and Evaluation (3)
        - IDS6916 - Simulation Research Methods and Practicum (3)

  Unrestricted Electives
  - Earn at least 3 credits from the following types of courses:
    Nonthesis students are required to take an additional 3 credit hours of unrestricted electives that support the student's area of graduate study.
Complete all of the following:

- In addition to successfully enrolling and completing the core courses, students are required to carefully select electives with the guidance of a faculty adviser. Elective choices should be made with the intent to strengthen a research interest and/or area of focus in order to meet the individual student's educational goals and objectives. Listed below are suggested courses in various areas of focus or specialization. These course groupings are merely guides, and are not exhaustive and are only meant to assist with advising and course selection in order to meet the individual student's educational goals and objectives. They are not intended to restrict elective choices among focus areas as we strongly encourage Modeling and Simulation students to maintain an interdisciplinary approach to their graduate studies. If a student identifies another UCF course which may be of value to his/her modeling and simulation research area, but is not already identified in a list below, he/she may request approval from the Graduate Program Director for the course to be used as an elective in the Graduate Plan of Study. All such requests must be made in advance of enrolling in the course. Those electives categorized as “General” would be appropriate for all students regardless of focus area. The remaining categories are grouped by area of research interest.

Plan of Study
0 Total Credits

- After admission to the Modeling and Simulation M.S. program and before the end of the second term of enrollment, students must submit a Graduate Plan of Study (GPS) to the Modeling and Simulation Graduate Program office. The GPS helps the student design an appropriate program of coursework to support the student's educational needs, goals, and objectives. The GPS should be developed in concert with the student's faculty adviser or (if adviser is not yet identified) program director and form a unified cohesive strategy for degree completion. All graduate program credit must be at the 5000-level or higher, with a minimum of 50% at the 6000- or 7000-level. Students are eligible to make changes to their Graduate Plan of Study at any time, with the approval of their faculty adviser and the Modeling and Simulation Graduate Program.

Culminating Experience
0 Total Credits

- Students are eligible to complete their specific culminating experience once they are within 6 credits of completing all coursework (i.e., completed at least 24 credits of coursework); have an approved up-to-date GPS on file with the graduate program; and have an advisory committee on file (thesis students, please refer to the information below; non-thesis students, the advisory committee is selected by the SMST Graduate Program). Detailed information and protocol regarding the culminating experiences can be found at msgrad.ist.ucf.edu.
Thesis Adviser and Advisory Committee

- Students are responsible for selecting an adviser from a list of faculty members authorized to direct theses to serve as the chair of their advisory committee. Then, in concert with their adviser, the student must identify and select the remaining members of the advisory committee. The advisory committee must contain a minimum of three members (chair plus two members). All committee members must hold a terminal degree and be in fields related to the student's thesis topic. At least two members, including the chair, must be classified as Modeling and Simulation graduate faculty. These faculty members should be from (or represent) at least two different colleges. At least one member must have served as a committee member on a prior SMST advisory committee. With approval from the Modeling and Simulation Graduate Program Director, a committee member may serve as a committee's co-chair. The UCF College of Graduate Studies, as well as UCF SMST, reserve the right to review appointments to advisory committees; place a representative on any advisory committee; or appoint a co-adviser.

Thesis Defense

- The thesis defense is a formal oral presentation of the written project before the student's advisory committee. All dissertation defenses are announced in advance and open to the public. Committee members vote either "Pass" or "Fail" of the written thesis and oral defense. The thesis and its defense must be approved by a majority vote, with no more than one dissenting vote. Normally, students are granted one opportunity to pass the thesis defense. In extenuating circumstances and at the discretion of the Modeling and Simulation Graduate Program Director, a student may be allowed one additional attempt to pass the thesis defense (no more than two attempts will be allowed). Non-thesis Experience An advisory committee comprised of 2-3 members of the UCF SMST Core Curriculum committee identifies a non-thesis capstone project. The current requirement is a professional portfolio, highlighting a student's educational and professional skills, reflecting the discipline in which the student plans to pursue their Modeling and Simulation career. The details and standards for the project will be presented in IDS6916, but the student has until their last semester to submit their final portfolio. Students who declare an intent to graduate with the non-thesis option will be enrolled in a portfolio webcourse and invited to participate in workshops to receive feedback prior to the announced deadline. Portfolios are graded "Pass" or "Fail." Normally, a student is granted one opportunity to pass the requirement. In extenuating circumstances and at the discretion of the Modeling and Simulation Graduate Program Director, a student may be allowed one additional attempt to pass the non-thesis project requirement (no more than two attempts will be allowed).

Time to Completion

- Students are granted 7 years (21 semesters) from the term of admission to complete their degree program. Failure to comply with the "7-Year Rule" may result in dismissal from the program, and may require reapplication to the program as well as repeating coursework and other program requirements.

Equipment Fee

- Full-time students in the Modeling and Simulation MS program pay a $27 equipment fee each semester that they are enrolled. Part-time students pay a $13.50 equipment fee each semester that they are enrolled.

Independent Learning

- A thesis serves as the independent learning experience for thesis students. Nonthesis students are required to take IDS 6916 where a research project is required and submit an end-of-program portfolio.

Grand Total Credits: **36**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

**UCF Student Financial Assistance**

Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241
finaid@ucf.edu

Fellowship Information
Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

No

Program Description
The Graduate Certificate in Modeling and Simulation of Behavioral Cybersecurity provides students with an interdisciplinary modeling and simulation approach to cybersecurity with a particular emphasis on the behavioral aspects of cybersecurity and cyber operations.

This graduate certificate is beneficial to individuals who have an interest in interdisciplinary studies and problem-solving for modeling, simulation, and behavioral aspects of cybersecurity.

UCF Partnerships
The Modeling and Simulation of Behavioral Cybersecurity certificate partners with several UCF master's programs. If students complete the certificate and are accepted into a partnering program, all certificate coursework can be used toward that master's degree. Here is a list of our partnering UCF master's programs:

- Computer Engineering MSCpE
- Industrial Engineering MS
- Modeling and Simulation MS
- Cyber Security and Privacy MS

Application Requirements
For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended
- Résumé or Curriculum Vitae

**Program Description**

**PROGRAM DISCONTINUED EFFECTIVE FALL 2019**

The Graduate Certificate in Modeling and Simulation of Technical Systems provides students with the necessary knowledge in modeling and simulation fundamentals, including modeling techniques and applications, with special emphasis on modeling and simulation in testing and evaluation.

This graduate certificate is beneficial to technical professionals involved with constructing and using simulation models of dynamic systems. All courses of the certificate program will be delivered electronically via distance education. Students are required to apply to the Out-of-State Cohort Track or the In-State Cohort Track.

**Application Requirements**
Applicants must choose a track in this program. Track(s) may have different requirements.

Program Description

The UCF School of Modeling, Simulation, and Training (SMST) considers its degree programs as transdisciplinary, intended for those who wish to pursue a career in the fields of academia, government, military/defense, healthcare/medicine, entertainment, technology, education, or service/manufacturing. Most engineering or scientific fields use simulation as an exploration, modeling, or analysis technique. However, Modeling and Simulation is not limited to engineering and science, as it is also used in training, management, and concept exploration. These programs involve constructing human-centered, equipment-centered, and stand-alone computer-based models of existing and conceptual systems and processes.

UCF SMST sought feedback from industry practitioners to identify key competencies for students in our degree programs. This input has been critical to the development of our curriculum, which is designed to provide a broad overall perspective of the developing simulation industry and an awareness of the economic considerations. UCF SMST’s objective is to provide education on evaluating the human, organization, equipment, and systems under study through the evaluation of output from the corresponding simulation construct. Alumni of SMST degree programs have both general and specialized skills in Modeling and Simulation.

Students in the Modeling and Simulation Ph.D. program are required to focus their study and research efforts in two areas of specialization. Students base their specialization on their academic and professional goals and determine these areas in consultation with their faculty adviser and the Modeling and Simulation graduate program director. Common areas of specialization are listed below (descriptions can be found at msgrad.ist.ucf.edu). This is not an exhaustive list, as the field continues to grow and evolve.

- Behavioral Cybersecurity
- Computer Visualization
- Human Systems
- Instructional and Training Simulation
- Interactive Simulation and Intelligent Systems
- Simulation in Government and Military
- Simulation in Healthcare and Medicine
- Simulation Infrastructure
- Simulation Management
- Simulation Modeling and Analysis

Program Prerequisites

Though UCF SMST does not have a mandated prerequisite for its graduate programs, the most successful students are those who have an academic and/or work background that has prepared them in mathematics (introductory calculus and probability and statistics) and computer literacy, preferably, familiarity with at least one higher order programming language (e.g., Python, C/C++, Visual Basic, Java, etc.). Students with undergraduate or graduate degrees in Engineering, Computer Science, or Mathematics will generally have this background.

Students without this background are encouraged to select the elective course IDC 5570 (Introductory Mathematics for Modeling and Simulation). This course will prepare them for the required core course COT 6571 (Mathematical Foundations of Modeling and Simulation).
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended
- An official, competitive score on the GRE taken within the last five years
- Résumé or Curriculum Vitae
- Goal statement
  - The goal statement should discuss all relevant professional background and any previous research experience.
  - The statement should:
    - Explain the motivation behind the pursuit of a Doctoral degree in Modeling and Simulation.
    - Discuss future career goals after the completion of the applicant's doctoral study.
    - Clearly describe the particular area(s) of research interest, including the identification of at least one UCF faculty member with a similar research focus who could serve as a potential advisor.
- Three letters of recommendation
  - The letters of recommendation should:
    - Be from faculty members, university administrators, and employers (at least two letters should be furnished by college/university faculty who are acquainted with the applicant).
    - Be current to the application.
    - Address the educational and career goals of the applicant.
    - Clearly address the applicant's ability to perform graduate-level study and research.
  - The letter writers should also know the applicant well enough to discuss the applicant's capacity to perform, excel and succeed in a graduate program.

Applications are accepted Fall term only.

Readmission

The UCF SMST Graduate Programs will consider applications for readmission from students who have been dismissed and/or deactivated from its degree programs. Those interested in readmission MUST consult the Modeling and Simulation Graduate Program Director prior to their application to determine their eligibility to reapply and the requirements for their application.

Prerequisites

Though UCF SMST does not have a mandated prerequisite for its graduate programs, the most successful students are those who have an academic and/or work background that has prepared them in mathematics (introductory calculus and probability and statistics) and computer literacy, preferably, familiarity with at least one higher order programming language (e.g., Python, C/C++, Visual Basic, Java, etc.). Students with undergraduate or graduate degrees in Engineering, Computer Science, or Mathematics will generally have this background.

Students without this background are encouraged to select the elective course IDC 5570 (Introductory Mathematics for Modeling and Simulation). This course will prepare them for the required core course COT 6571 (Mathematical Foundations of Modeling and Simulation).

Application Deadlines Notes

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.
**Degree Requirements**

**Core**
- Complete the following:
  - COT6571 - Mathematical Foundations of Modeling and Simulation (3)
  - IDS6147 - Perspectives on Modeling and Simulation (3)
  - IDS6145 - Simulation Techniques (3)
  - IDS6262 - Research Design for Modeling and Simulation (3)
  - IDS6267 - Understanding Humans for Modeling and Simulation (3)

**Restricted Elective**
- Complete all of the following
  - Complete at least 1 of the following:
    - IDC5602 - Cybersecurity: A Multidisciplinary Approach (3)
    - IDC6601 - Behavioral Aspects of Cybersecurity (3)
    - IDC6700 - Interdisciplinary Approach to Data Visualization (3)
    - IDS5142 - Modeling and Simulation for Instructional Design (3)
    - IDS6146 - Modeling and Simulation Systems (3)
    - IDS6149 - Modeling and Simulation for Test and Evaluation (3)
    - IDS6916 - Simulation Research Methods and Practicum (3)
- Students must select an elective course taught by the Modeling and Simulation Graduate Program. Approved courses are listed below, but others may be used with the program director's approval.

**Unrestricted Electives**
- Earn at least 39 credits from the following types of courses:
  - All Modeling and Simulation Ph.D. students must take at least 39 credits of unrestricted elective courses that reflect their two areas of specialization. Students are expected to carefully select electives with guidance from the program director and/or their faculty adviser. The UCF SMST has identified and approved over 175 courses that students may choose as unrestricted electives. This list can be found at msgrad.ist.ucf.edu. New courses are developed at the university every semester, so this list is updated once a semester. If a student identifies a course that will benefit their area of study but is not on the published list, they may request approval from the program director for inclusion in their plan of study. Unrestricted electives must consist of at least 9 credit hours of formal courses, excluding independent study. The remaining credits may consist of additional coursework, directed research, independent study, and additional dissertation as advised appropriately by faculty adviser and/or program director.

**Modeling and Simulation PhD Elective Courses**
- Complete all of the following
  - In addition to successfully completing the core courses for the M&S PhD program, students are required to carefully select electives with the guidance of a Program Director or faculty adviser. Elective choices should be made with the intent to strengthen a research interest and/or area of focus in order to meet the individual student's educational goals and objectives. Listed below are suggested courses in various areas of focus or specialization. These course groupings are mere guides, are not exhaustive and are only meant to assist with advising and course selection in order to meet the individual student's educational goals and objectives. They are not intended to restrict elective choices among focus areas as we strongly encourage Modeling and Simulation students to maintain an interdisciplinary approach to their graduate studies. If a student identifies another UCF course which may be of value to
his/her M&S research area, but is not already identified in a list below, that student may request approval from the Graduate Program Director for the course to be used as an elective in the Graduate Plan of Study. All such requests must be made in advance of enrolling in the course. Those electives categorized as “General” and “Fundamentals of Modeling and Simulation” would be appropriate for all students regardless of interest area. The remaining categories are grouped by area of interest.

Waived Credits
0 Total Credits
- The doctoral program will allow up to 30 credit hours to be waived from an earned master’s degree.

Dissertation
15 Total Credits
- Earn at least 15 credits from the following types of courses:
  Before entering the dissertation portion of the degree program, a student must successfully complete the qualifying examination and candidacy examination milestones. More information for both examinations can be found at msgrad.ist.ucf.edu. XXX 7980 - Dissertation Research 15 Credit Hours minimum

Plan of Study
0 Total Credits
- After admission to the Modeling and Simulation Ph.D. program and before the end of the third term of enrollment, students must submit a Graduate Plan of Study (GPS) to the Modeling and Simulation Graduate Program office. The GPS helps the student design an appropriate program of coursework to support the student's educational needs, goals, and objectives. The GPS should be developed in concert with the student's faculty adviser or (if adviser is not yet identified) program director and form a unified cohesive strategy for degree completion. All doctoral program credit must be at the 5000-level or higher, with a minimum of 50% at the 6000- or 7000-level. Students are eligible to make changes to their Graduate Plan of Study at any time, with the approval of their faculty adviser and the Modeling and Simulation Graduate Program.

Equipment Fee
0 Total Credits
- Full-time students in the Modeling and Simulation PhD program pay a $27 equipment fee each semester that they are enrolled. Part-time students pay a $13.50 equipment fee each semester that they are enrolled.

Milestones
In addition to their coursework, all Modeling and Simulation Ph.D. students are required to successfully complete three milestones before the award of their degree: qualifying examination; candidacy examination; and dissertation defense.

Candidacy Examination

- Students are eligible to complete the SMST Candidacy Examination (CE) requirement once they successfully complete the QE; are within 6 credits of completing all coursework (i.e., completed at least 51 credits of coursework); have an approved up-to-date GPS on file with the graduate program; and have an advisory committee (approved by the College of Graduate Studies) on file. The CE consists of: Dissertation research proposal Oral defense of the dissertation research proposal Refereed published (or accepted for publication) manuscript on the student's dissertation topic Detailed information and protocol regarding the CE can be found at msgrad.ist.ucf.edu

Dissertation Adviser and Advisory Committee

- Students are responsible for selecting an adviser from a list of faculty members authorized to direct dissertations to serve as the chair of their advisory committee. Then, in concert with their adviser, the student must identify and select the remaining members of the advisory committee. The advisory committee must contain a minimum of four members (chair plus three members). All committee members must hold a terminal degree and be in fields related to the student's dissertation topic. At least three members, including the chair, must be classified as Modeling and Simulation graduate faculty. These faculty members must be from (or represent) at least two different colleges. At least one member must have served as a committee member on a prior SMST advisory committee. With approval from the Modeling and Simulation Graduate Program Director, a committee member may serve as a committee's co-chair. The UCF College of Graduate Studies, as well as UCF SMST, reserve the right to review appointments to advisory committees; place a representative on any advisory committee; or appoint a co-adviser.

Admission to Candidacy

- Students who fulfill all the requirements for the candidacy examination and have an approved advisory committee on file will be admitted to candidacy and authorized to enroll for dissertation hours.

Dissertation Defense

- The dissertation defense is a formal oral presentation of the written dissertation before the student's advisory committee. All dissertation defenses are announced in advance and open to the public. Committee members vote either "Pass" or "Fail" of the written dissertation and oral defense. The dissertation and its defense must be approved by a majority vote, with no more than one dissenting vote. Normally, students are granted one opportunity to pass the dissertation defense. In extenuating circumstances and at the discretion of the Modeling and Simulation Graduate Program Director, a student may be allowed one additional attempt to pass the dissertation defense (no more than two attempts will be allowed).

Time to Completion

- Students are granted 7 years (21 semesters) from the term of admission to complete their degree program. Failure to comply with the "7-Year Rule" may result in dismissal from the program, and may require reapplication to the program as well as repeating coursework and other program requirement.

Independent Learning

- The dissertation is an independent project completed under the guidance of a student's faculty advisory committee. All research, data collection and analysis, and writing of the project are completed by the student, creating a challenging and fulfilling independent learning experience.

Grand Total Credits: 72

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowship Information
Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Program Description
The Master of Science in Nanotechnology program provides students with scientific knowledge and research training in nanoscience and nanotechnology. The program prepares students for seeking employment in industry and academia involved in nanotechnology research, product development and commercialization, or to pursue advanced PhD degrees in related areas.

The Nanotechnology MS program consists of 30 credit hours of study that covers Fall, Spring and Summer consecutive academic terms. Admissions to the program occur in both the Fall and Spring semester of each year, and students are expected to finish the degree in two years.

The program of study includes a balanced course offering including interdisciplinary scientific courses and research training in the field of nanotechnology. The curriculum of courses is delivered via face-to-face instruction. The program includes 3 credit hours of independent study and 6 credit hours of thesis research under the supervision of a faculty at the NanoScience Technology Center. This training will provide students with hands-on research experiences on nanomaterial synthesis, nanostructure fabrication and characterization, and application development in their interested areas.

This degree has 1 track: Non-Thesis Track. Please scroll to the bottom of this page for further details on this Track.

Program Prerequisites
Applicants should have obtained an undergraduate degree in one of the following areas: physics, chemistry, biology, or engineering.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants should have obtained an undergraduate degree in one of the following areas: physics, chemistry, biology, or engineering.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Résumé or Curriculum Vitae
- Goal Statement
  - The goal statement should discuss all relevant professional background and any previous research and/or teaching experience. The statement should explain the motivation behind the pursuit of a master’s degree in Nanotechnology. Future career goals after the completion of the applicant’s master study should be discussed.
  - The goal statement should between 500 and 1,000 words.
- Three letters of recommendation
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

The acceptance decision will be based on the assessment of the applicant’s GPA from previous college/university, past work experience, recommendation letters and the statement of interest and objectives. Additionally, the committee will evaluate other academic indicators such as having completed a senior thesis, authorship on publications, internship, involvement in scientific research projects, and/or presentations at major scientific meetings and non-academic indicators such as evidence of leadership, extracurricular activities, work or military experience, and/or volunteer activities. For applicants that already have had working experiences in STEM (Science, Technology, Engineering, Mathematics) fields, emphasis will be placed on their past experiences and recommendation letters.

Readmission

Applicants who are applying for readmission need not resubmit transcripts if the transcripts are previously on file with UCF. However, the following application requirements do need to be current for the new readmission application:

- Résumé/Curriculum Vitae
- Goal Statement
- Letters of Recommendation

Degree Requirements

Required Courses
15 Total Credits

- Complete all of the following
  Core Courses
  - Complete at least 4 of the following:
    - IDS6250 - Introduction to Nanoscience and Nanotechnology (3)
    - IDS6254 - Nanofabrication and Characterization (3)
    - IDS6252 - Biomedical Nanotechnology (3)
    - IDS6255 - Nanotechnology in Energy and Sustainability (3)
    - IDS6253 - Bioanalytical Technology (3)

- Independent Study
  - Earn at least 3 credits from the following types of courses:
    Students will take 3 credit hours of independent study, resulting in a required research report of independent learning experience. Independent Study must have a formally defined core of knowledge to be learned by the student. In accordance with the policy of the College of Graduate Studies, the core of knowledge to be learned by the student must be specified in written form and approved by the student, the instructor, and the program coordinator prior to enrollment in Independent Study.

Elective Courses
9 Total Credits

- Complete at least 3 of the following:
  - IDS6257 - Principles and Techniques of Nanobiology (3)
  - IDS6258 - Advanced Materials and Nanotechnology for Rechargeable Batteries (3)
  - IDS6260 - Electrical and Optical Properties of Nanoscale Materials and Devices (3)
  - IDS6261 - Nanotechnology for Sustainable Agriculture (3)
  - EMA5586 - Photovoltaic Solar Energy Materials (3)
  - EMA5060 - Polymer Science and Engineering (3)
  - EMA6518 - Transmission Electron Microscopy (3)
  - EMA6605 - Materials Processing Techniques (3)
  - PHY5933 - Selected topics in biophysics of macromolecules (3)
  - OSE5312 - Light Matter Interaction (3)
  - OSE6938 - ST: Infrared Detectors (3)
  - MCB5225 - Molecular Biology of Disease (3)
  - PCB5238 - Immunobiology (3)
  - PCB5236 - Cancer Biology (3)
  - CHM6710 - Applied Analytical Chemistry (3)
  - Course Not Found

Thesis
6 Total Credits

- Complete all of the following
  - Earn at least 6 credits from the following:
    - IDS6971 - Thesis Research (3)
  - Students will conduct and complete an independent thesis research project under the supervision of a NanoScience Technology Center faculty. The student will defend the thesis at the completion of the study. Students will gain hands-on research experiences on nanomaterial synthesis, nanostructure fabrication and characterization, and application development in their interested areas.

Grand Total Credits: 30

      - PCB5236 - Cancer Biology (3)
      - CHM6710 - Applied Analytical Chemistry (3)
    - Elective courses may be chosen from the following recommended course list. Core courses taken beyond the 4-core course requirement may be used to satisfy the elective course requirement. Other courses may be taken as elective courses upon the approval of your graduate program director.

Open Elective Courses
- Earn at least 9 credits from the following types of courses:
  - As part of completing programmatic requirements, student must also select an additional 9 credit hours of open elective courses in the general field of science, engineering, or business. These courses must be at the graduate level and be approved by the Program Director before registration. To be noted, one of these open electives could also be another 3 credit hours of Independent Study to continue research training under the supervision of a faculty.

2021-2022 Graduate Catalog
Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Nondegree or Transient

College
College of Graduate Studies

Department
College of Graduate Studies Dean's Office

Program Website
http://www.graduate.ucf.edu/

Is this program available 100% online?
No

Program Description

The Nondegree program is for students who have completed at least a baccalaureate degree from an accredited institution recognized by UCF in the United States and are not seeking a graduate degree. Students in this status may be interested in taking graduate courses at UCF for personal or professional enhancement, to prepare for possible admission to a graduate degree-seeking or certificate program, or to complete enrollment requirements at another university. Students who are enrolled in a graduate program at another university and want to take courses at UCF and transfer it to their home institution are considered transient students and nondegree-seeking at UCF.

Not all graduate degree programs at UCF allow students in Nondegree status to enroll in their courses. It is best to contact the program director for the graduate program that offers the course prior to applying.

Admission into Nondegree status does not guarantee admission to a graduate degree-seeking or certificate program at UCF. International students are not eligible for Nondegree status unless they hold an eligible visa. International students taking online courses from their home country are eligible to be nondegree seeking since they do not require a visa.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to completing the online application, Nondegree applicants will need to submit an official, final transcripts from an accredited institution recognized by UCF showing a conferred bachelor's degree.

Nondegree-seeking students will also be required to submit an Immunization Form prior to enrollment. Although this form is not used in the admission process, students will not be allowed to enroll at UCF without submitting the required Immunization Form.

College of Health Professions and Sciences

Aging Studies Graduate Certificate

**College**
College of Health Professions and Sciences

**Department**
School of Social Work

**Program Website**
https://healthprofessions.ucf.edu/socialwork/

**Is this program available 100% online?**
No

**Program Description**
The Graduate Certificate in Aging Studies is designed to prepare individuals presently employed in the aging field to increase their knowledge of the special needs of our elderly citizens.

Graduate students who are enrolled in health sciences, psychology, social work, nursing, communication sciences and disorders, or sociology, as well as in other areas, such as liberal arts, music education, physical education, or art education, will find the certificate valuable. The mission of the aging studies certificate is to prepare individuals from diverse disciplines to address the physiological, psychological, sociological, environmental, cultural, legal-ethical, and public policy dynamics inherent in the lives of older adults.

**This program will not be accepting applications or enrolling new students effective Fall 2010.**

**Application Requirements**
Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Is this program available 100% online?
No
**Program Description**

The Anatomical Sciences Graduate Certificate provides students with coursework to become an effective anatomist in higher education fields related to health and medical sciences. The program provides a depth of understanding of the anatomical sciences and substantial hands-on experience in the gross anatomy laboratory. The amount and level of coursework offers students the rigorous training to develop distinct expertise in anatomy knowledge, dissection technique, and instruction requisite for careers as an anatomist in health or medical science education.

**Program Prerequisites**

Admission is open to those who have completed a graduate program in Physical Therapy, Occupational Therapy, or other related health or medical science-related discipline. Alternatively, those with a Bachelor's degree from a regionally accredited institution and have earned a GPA of at least 3.5 in the following pre-requisite coursework will be considered:

- Anatomy or Anatomy and Physiology (8 credits total with labs)
- Physics (8 credits total with labs)
- Biology (6 credits minimum)
- Chemistry (6 credits minimum)

**Application Requirements**

Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Licensure Disclosure

The program is fully accredited by the Commission on Accreditation of Athletic Training Education (CAATE) through 2026-27. For information on how this program may prepare students for professional licensure, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Master-of-Athletic-Training-June2020.pdf.

Program Description

The Master of Athletic Training (MAT) program is designed to enable students to demonstrate, in the classroom and during clinical experiences, that they have achieved levels of comprehension, competency, and proficiency expected of entry-level athletic trainers.

The program's classroom component is divided into two sections: athletic training theory and practice, and clinical experiences. The courses are designed to expose students to information through multiple didactic, laboratory, and clinical experiences. These courses incorporate the Curricular Content Standards set forth by the Commission on Accreditation of Athletic Training Education (CAATE).

All students are required to complete the curriculum in the established sequence of courses.

By combining excellence in teaching, the latest technologies available in education, and outstanding clinical site affiliations, graduates of the program are fully prepared to take and pass the comprehensive Board of Certification (BOC) exam and start their careers as athletic trainers.

Mission

The Master of Athletic Training program prepares graduates to advance the quality of healthcare provided to physically active people through interdisciplinary patient-centered education. The Program is committed to providing students with enriching didactic, clinical, and research experiences that foster communication, critical thinking, leadership, and collaboration. Graduates of the Program will understand the role of the athletic trainer as a member of the healthcare team and will advocate for the advancement of the profession.

Vision

The Master of Athletic Training program aspires to be a nationally recognized leader in athletic training education where diverse students, faculty, and preceptors advance healthcare through innovation in education, research, and clinical practice.

Values

The Master of Athletic Training program faculty values initiative, integrity, compassion, inclusion, and altruism.

The MAT degree program is a two-year full-time professional master's program. The courses are taken in a prescribed sequence over 6 semesters, including 18 credit hours of clinical practice. Clinical practice occurs under the direct supervision of a certified and licensed athletic trainer.

Program Prerequisites

Completion of prerequisite coursework outlined below with a minimum grade of "C" (2.0) is required. Candidates with all prerequisites completed at the time of application may be given preference over those still completing courses. Courses older than 10 years will not be accepted.

General Bio/Biology - A minimum of 4 credits (including a lab) for science majors - Biology courses for non-science majors and non-human biology courses are not acceptable.

Human Anatomy and Physiology - A minimum of 8 credits (including two labs) for science majors - Anatomy and physiology courses for non-science majors and non-human anatomy and physiology courses are not acceptable.

Option 1: One semester of Human Anatomy with lab and one semester of Human Physiology with lab

Option 2: Two semesters of Anatomy and Physiology combined courses with a lab each (A&P-I and A&P-II)

Statistics - A minimum of 3 credit hours

Human Nutrition /Clinical Nutrition - A minimum of 3 credit hours for science or health/medicine/nursing majors

General Psychology - A minimum of 3 credit hours - Any course taken within a psychology department/unit will be acceptable.

Exercise Physiology - A minimum of 3 credit hours

Biomechanics or Kinesiology - A minimum of 3 credit hours

General Chemistry/Chemistry I - A minimum of 4 credits (including a lab) for science majors

Physics I - A minimum of 4 credits (including a lab) for science majors
**Application Requirements**

This track and its application process should be used by:

Applicants with a bachelor's degree from an institution outside of UCF

And

Students who hold or will earn a degree from UCF AND intend to apply to athletic training graduate programs at other institutions AND UCF.

UCF students who hold or will earn a degree from UCF AND only intend to apply to the UCF Masters of Athletic Training should apply through the Athletic Training MAT - UCF BS to UCF MAT Track (Track requires an application through UCF Online Graduate Application but does NOT require an application through ATCAS).

Applicants must apply to both UCF Graduate Admissions and the Athletic Training Centralized Application System (ATCAS).

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog.

The Master of Athletic Training program participates in the Athletic Training Centralized Application Service, known as ATCAS. Prospective students must apply online using the ATCAS application. In addition to the ATCAS application, applicants must also submit a UCF application for graduate admissions at https://applynow.graduate.ucf.edu/apply/. Both the ATCAS application and the UCF Graduate application must be submitted by the posted application deadline.

All application materials MUST be sent directly to ATCAS. Supporting documents (transcripts, letters, etc.) should not be sent directly to the MAT program or UCF College of Graduate Studies and will not be reviewed. To learn more about the ATCAS application process, visit http://caate.net/apply-now/.

Admission to the MAT program is competitive and applications are reviewed as they are received beginning February 1. Students may continue to apply after February 1 and will be evaluated (rolling admissions) until seats are filled. The final deadline for applications is April 1.

The following application materials must be received by ATCAS:

- Completed ATCAS application including all documents required by ATCAS.
- One official transcript from each college/university attended.
  - The transcripts must demonstrate a minimum of a 3.0 overall GPA in undergraduate coursework and completion of prerequisite coursework with a minimum grade of "C" (2.0).
  - Candidates with all prerequisites completed at the time of application may be given preference over those still completing courses.
  - The bachelor's degree may be in any discipline from an accredited institution recognized by UCF and may be in progress at the time of application. However, the degree must be awarded prior to the program's start date in the Summer C semester (mid-May).
  - Applicants who have attended a college/university outside the United States must also provide a course-by-course credential evaluation with GPA calculation.
- The GRE is not required for admission to this program.
- Proof of 50 hours of observation of an athletic trainer (BOC certified) in a high school, collegiate, and/or professional sports setting.
- Three (3) letters of recommendation with ATCAS recommendation forms, including one from an athletic trainer.
- Complete a personal statement/essay about professional goals and the discipline of athletic training.

Incomplete applications will NOT be reviewed.

- An interview, by invitation only, may be required after the initial application review process is complete.
- Admission to the program is competitive. Meeting minimum requirements does not guarantee an applicant an interview or admission to the program.
- Admissions decisions will be made only once per academic year. Incoming students must begin the program in the summer C semester (mid-May).
- Admission to the MAT program is competitive and applications are reviewed as they are received beginning February 1. Students may continue to apply after February 1 and will be evaluated (rolling admissions) until seats are filled. The final deadline for applications is April 1.

      - ATR6855L - Practicum in Athletic Training V (4)

Comprehensive Examination
0 Total Credits

- Passing a comprehensive examination with a grade of 80 percent or better is a requirement for continued progress in the Master of Athletic Training degree. This examination will be given to every student at the end of the third semester (mid-point of the program). Students must take the exam at that time and will be allowed a maximum of three (3) attempts. Failure to pass the examination in 3 attempts will result in a review by the AT Program Progression and Retention Committee and may result in dismissal from the program. Students may not enroll in fourth-semester coursework until they have successfully completed the comprehensive examination.

Grand Total Credits: 65
Program Details

Equipment Fee
Students enrolled full-time in the Master of Athletic Training degree program pay an estimated Equipment Fee of $56 each semester they are enrolled.

Additional Program Costs
Current expenses for tuition fees and other university fees are listed on the UCF Student Accounts website (https://studentaccounts.ucf.edu/tf-graduate/). Additionally, several MAT courses include Material and Supply fees which are listed in the UCF Graduate Catalog. Students in the MAT program are also expected to pay for the following: nametags, CPR/First Aid/AED certification, appropriate clinical attire, transportation costs, and background checks/fingerprinting.

Independent Learning
All students in the Master of Athletic Training program are required to engage in independent learning, a process in which individuals take the initiative, with or without the help of others, to attain knowledge, skills, and professional behaviors. Activities such as case studies, critical analysis of literature, research/capstone projects, and clinical practica provide important independent learning experiences that give students ample opportunity to demonstrate and develop independent learning skills.

Financial Information
Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

The Master of Athletic Training program aspires to be a nationally recognized leader in athletic training education where diverse students, faculty, and preceptors advance healthcare through innovation in education, research, and clinical practice.

Values

The Master of Athletic Training program faculty values initiative, integrity, compassion, inclusion, and altruism.

The MAT degree program is a two-year full-time professional master's program. The courses are taken in a prescribed sequence over 6 semesters, including 18 credit hours of clinical practice. Clinical practice occurs under the direct supervision of a certified and licensed athletic trainer.
Track Prerequisites

This track and its application process should ONLY be used by students who hold or will earn a degree from UCF AND only intend to apply to the UCF Master of Athletic Training. An application through ATCAS is ONLY required for students holding a UCF bachelor's degree if they intend to apply to athletic training graduate programs at other institutions AND UCF.

Completion of prerequisite coursework outlined below with a minimum grade of “C” (2.0) is required. Candidates with all prerequisites completed at the time of application may be given preference over those still completing courses. Courses older than 10 years will not be accepted.

General Bio/Biology - A minimum of 4 credits (including a lab) for science majors - Biology courses for non-science majors and non-human biology courses are not acceptable.

Human Anatomy and Physiology - A minimum of 8 credits (including two labs) for science majors - Anatomy and physiology courses for non-science majors and non-human anatomy and physiology courses are not acceptable.

   Option 1: One semester of Human Anatomy with lab and one semester of Human Physiology with lab

   Option 2: Two semesters of Anatomy and Physiology combined courses with a lab each (A&P-I and A&P-II)

Statistics - A minimum of 3 credit hours

Human Nutrition /Clinical Nutrition - A minimum of 3 credit hours for science or health/medicine/nursing majors

General Psychology - A minimum of 3 credit hours - Any course taken within a psychology department/unit will be acceptable.

Exercise Physiology - A minimum of 3 credit hours

Biomechanics or Kinesiology - A minimum of 3 credit hours

General Chemistry/Chemistry I - A minimum of 4 credits (including a lab) for science majors

Physics I - A minimum of 4 credits (including a lab) for science majors

Application Requirements

This track and its application process should ONLY be used by students who hold or will earn a degree from UCF AND only intend to apply to the UCF Master of Athletic Training. An application through ATCAS is ONLY required for students holding a UCF bachelor's degree if they intend to apply to athletic training graduate programs at other institutions AND UCF.

Applicants must apply to UCF Graduate Admissions.

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog.

The following application materials must be received:

- Completed application including all documents required.
- One official transcript from each college/university attended (if those courses/credits are not already included in the UCF bachelor’s degree transcript).
  - The transcripts must demonstrate a minimum of a 3.0 overall GPA in undergraduate coursework and completion of prerequisite coursework with a minimum grade of "C" (2.0).
  - Candidates with all prerequisites completed at the time of application may be given preference over those still completing courses.
  - The bachelor’s degree may be in any discipline from an accredited institution recognized by UCF and may be in progress at the time of application. However, the degree must be awarded prior to the program’s start date in the Summer C semester (mid-May).
  - Applicants who have attended a college/university outside the United States must also provide a course-by-course credential evaluation with GPA calculation.
- Proof of 50 hours of observation of an athletic trainer (BOC certified) in a high school, collegiate, and/or professional sports setting.
- Three (3) letters of recommendation, including one from an athletic trainer.
- Complete a personal statement/essay about professional goals and the discipline of athletic training.

Incomplete applications will NOT be reviewed.

- An interview, by invitation only, may be required after the initial application review process is complete.
- Admission to the program is competitive. Meeting minimum requirements does not guarantee an applicant an interview or admission to the program.
- Admissions decisions will be made only once per academic year. Incoming students must begin the program in the summer C semester (mid-May).
- Admission to the MAT program is competitive and applications are reviewed as they are received beginning February 1. Students may continue to apply after February 1 and will be evaluated (rolling admissions) until seats are filled. The final deadline for applications is April 1.

  - Summer 1 - Semester 1
    - Complete the following:
      - ATR5016 - Foundational Behaviors of Athletic Training Practice I (1)
      - ATR5106C - Prevention of Injury and Illness in Athletic Training Practice (2)
      - ATR5206C - Functional Human Anatomy for Athletic Trainers (3)
      - ATR5117C - Acute Care in Athletic Training Practice I (3)
  - Fall 1 - Semester 2
    - Complete the following:
      - ATR5017 - Foundational Behaviors of Athletic Training Practice II (1)
      - ATR5219C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice I (3)
      - ATR5306C - Therapeutic Interventions in Athletic Training Practice I (3)
      - ATR5406C - General Medical Conditions in Athletic Training Practice I (2)
      - ATR5617 - Athletic Training Research I (1)
      - ATR5815L - Practicum in Athletic Training I (2)
  - Spring 1 - Semester 3
    - Complete the following:
      - ATR5217C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice II (3)
      - ATR5307C - Therapeutic Interventions in Athletic Training Practice II (3)
      - ATR5516 - Healthcare Administration in Athletic Training Practice I (2)
      - ATR5825L - Practicum in Athletic Training II (2)
      - ATR6407C - General Medical Conditions in Athletic Training Practice II (2)
  - Summer 2 - Semester 4
    - Complete the following:
      - ATR6218C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice III (3)
      - ATR6308C - Therapeutic Interventions in Athletic Training Practice III (3)
      - ATR6618C - Athletic Training Research II (1)
      - ATR6835L - Practicum in Athletic Training III (1)
  - Fall 2 - Semester 5
    - Complete the following:
      - ATR6309C - Therapeutic Interventions in Athletic Training Practice IV (3)
      - ATR6845L - Practicum in Athletic Training IV (9)
  - Spring 2 - Semester 6
    - Complete the following:
      - ATR6517 - Healthcare Administration in Athletic Training Practice II (2)
      - ATR6505 - Athletic Training Seminar (1)
      - ATR6118L - Acute Care in Athletic Training Practice II (1)
      - ATR6619C - Athletic Training Research III (4)
      - ATR6855L - Practicum in Athletic Training V (4)

Comprehensive Exam
0 Total Credits

- Passing a comprehensive examination with a grade of 80 percent or better is a requirement for continued progress in the Master of Athletic Training degree. This examination will be given to every student at the end of the third semester (mid-point of the program). Students must take the exam at that time and will be allowed a maximum of three (3) attempts. Failure to pass the examination in 3 attempts will result in a review by the AT Program Progression and Retention Committee and may result in dismissal from the program. Students may not enroll in fourth-semester coursework until they have successfully completed the comprehensive examination.

Grand Total Credits: 65
Track Details

Equipment Fee

Students enrolled full-time in the Master of Athletic Training degree program pay an estimated Equipment Fee of $56 each semester they are enrolled.

Additional Program Costs

Current expenses for tuition fees and other university fees are listed on the UCF Student Accounts website (https://studentaccounts.ucf.edu/tf-graduate/). Additionally, several MAT courses include Material and Supply fees which are listed in the UCF Graduate Catalog. Students in the MAT program are also expected to pay for the following: nametags, CPR/First Aid/AED certification, appropriate clinical attire, transportation costs, and background checks/fingerprinting.

Independent Learning

All students in the Master of Athletic Training program are required to engage in independent learning, a process in which individuals take the initiative, with or without the help of others, to attain knowledge, skills, and professional behaviors. Activities such as case studies, critical analysis of literature, research/capstone projects, and clinical practica provide important independent learning experiences that give students ample opportunity to demonstrate and develop independent learning skills.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Licensure Disclosure

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Communication-Sciences-Disorders-MA.pdf.

Program Description

The School of Communication Sciences and Disorders offers three plans of study leading to the Master of Arts degree: the Traditional, Consortium and Accelerated programs.

Each track is intended for those interested in working with children and adults who have communication disorders and is based on the same curriculum and degree requirements but allows students to follow different plans of study. Students enrolled in each track must follow a prescribed sequence of academic and clinical courses.

Each track provides academic and clinical education experiences necessary for certification by the American Speech-Language-Hearing Association (ASHA) and the Florida Department of Education, and licensure by the state of Florida. For information on how this program may prepare students for professional licensure, please visit https://healthprofessions.ucf.edu/csd/masters/. The Council on Academic Accreditation (CAA) of the ASHA has accredited the Master of Arts Degree in Communication Sciences and Disorders since 1986.

The Communication Sciences and Disorders program strives to educate students to become successful practitioners in the field of speech-language pathology. To that end, the ASHA Code of Ethics is re-enforced throughout the academic curriculum. Students who violate the ASHA Code of Ethics may be subject to academic sanctions or dismissed from the program.

The Traditional track is a two-year, full-time face-to-face program (six consecutive semesters, including two summers) for students with undergraduate degrees in communication sciences and disorders or speech-language pathology and audiology. For students with undergraduate degrees in other majors (out-of-field), the program requires additional prerequisite coursework. Students must begin the program in the semester for which they are admitted and must enroll full-time each semester.

The Consortium track is a cooperative effort between the UCF School of Communication Sciences and Disorders and the Central Florida Public School Consortium to address the critical shortage of public school speech-language pathologists in the area. Participating school districts in the Central Florida Consortium are Brevard, Citrus, Flagler, Lake, Marion, Orange, Osceola, Seminole, Sumter, and Volusia.

The Accelerated track enables highly qualified current UCF undergraduate majors in communication sciences and disorders to achieve a master's degree in the UCF School of Communication Sciences and Disorders graduate program in one less semester than students in the Traditional track. This program is a BA/BS to MA program. Students are able to enroll in graduate-level courses while completing the bachelor's degree.

Please scroll to the bottom of this page for further details on these Tracks.

Program Prerequisites

- Applicants need to be certified to practice by the American Speech-Language-Hearing Association (ASHA), all students must have undergraduate transcript credit, which could include course work, advanced placement, CLEP, or examination equivalency, for each of the following areas: biological sciences, physical sciences, social/behavioral sciences, and statistics. Courses may consist of any number of credits and must be taken outside the discipline.
- All students must complete at least 3 credit hours in statistics with a grade of "C" or better. Undergraduate or graduate course work in statistics is a prerequisite to SPA 6805 - Research in Communicative Disorders.
- The program admits qualified in-field applicants, with an undergraduate degree in communication sciences and disorders or speech-language pathology and audiology, and out-of-field applicants, with undergraduate degrees in other majors. Out-of-field students require an additional 21 to 27 credit hours of prerequisite course work that may be completed in approximately two semesters once admitted.

Out-of-field students must complete the following undergraduate prerequisite courses or their equivalents once admitted:

- STA 2014 - Principles of Statistics 3 Credit Hours or
- STA 2023 - Statistical Methods 1 3 credit hours
- LIN 3716/3716L - Language Development and Lab 5 Credit Hours
- SPA 3101 - Physiological Bases of Speech and Hearing 3 Credit Hours
- SPA 3104 - Neural Bases of Communication 3 Credit Hours
- SPA 3112C - Basic Phonetics and Lab 4 Credit Hours
- SPA 3011 - Speech Science 3 Credit Hours
- SPA 4032 - Audiology 3 Credit Hours
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Master of Arts in Communication Sciences and Disorders program at UCF participates in the Communication Sciences and Disorders Centralized Application Service, known as CSDCAS. Prospective students applying to the Communication Sciences and Disorders MA program at UCF must apply online using the CSDCAS application in addition to the UCF online application. To learn more about the CSDCAS application process, visit http://www.capcsd.org/csdcas-student-page/

Step 1: Complete the CSDCAS application for the UCF program

- Complete CSDCAS Application (https://csdcas.liaisoncas.com/applicant-ux/#/login)
- One official transcript (in a sealed envelope) from each college/university attended. Transcripts must be sent directly to CSDCAS.
- Official, competitive GRE score (verbal, quantitative, and written) obtained within the last five years. Use GRE CODE for UCF CSDCAS: 7407. (Do not use the "Institution Code" for GRE listed to the right).
- Three (3) letters of recommendation with CSDCAS recommendation forms, preferably two from current or former faculty members. Letters of recommendation cannot be dated more than one year prior to the date of the application deadline.
- A letter of intent describing educational background, professional experiences, future goals, interest in the field, why you want to attend UCF, other related information about your qualifications, and how you will embody and uphold the ASHA Code of Ethics (http://www.asha.org/code-of-ethics/) in your professional career.
- A current resume.
- All CSDCAS supplemental questions. Question can be found on CSDCAS application.
- UCF Graduate Application (supplemental) must be submitted by the deadline in addition to CSDCAS application.

Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

All international students must meet university minimum TOEFL score requirements regardless of language in which the undergraduate program was completed.

Incomplete applications will NOT be reviewed.

All application materials MUST be sent directly to CSDCAS. Materials sent to the university or program and not to CSDCAS will not be accepted. Application materials must be received by CSDCAS no later than October 1st for Spring admission and February 1st for Fall admission.

Students are responsible for their CSDCAS application being complete and verified. FAQ's on starting your CSDCAS application can be found here: https://help.liaisonedu.com/CSDCAS_Applicant_Help_Center/Starting_Your_CSDCAS_Application

Step 2: Complete University of Central Florida’s Graduate School application

In addition to your CSDCAS application, applicants must also submit a UCF application for graduate admission at https://application.graduate.ucf.edu/. Supporting documents (i.e. transcripts, test scores, etc.) do not need to be submitted to UCF directly. University applications must also be submitted by the stated application deadlines.

Admission to the Communication Sciences and Disorders program is granted on a competitive basis. Approximately thirty-five to forty-five (35-45) students are admitted each semester. Meeting the minimum admission requirements does not guarantee admission to the program. The recent class statistics are listed on the Graduate Program Profile webpage. Additionally, the program reserves the right to deny admission or dismiss a student after admission to the program if, in the judgment of the faculty, the student fails to demonstrate and/or uphold the ASHA Code of Ethics (http://www.asha.org/code-of-ethics/) during coursework and/or practice in the field.

Required Courses
38 Total Credits

- Complete the following:
  - SPA6204 - Articulation/Phonological Dis (3)
  - SPA6211C - Voice Disorders (4)
  - SPA6225C - Fluency Disorders (4)
  - SPA6236 - Motor Speech Disorders in Adults and Children (3)
  - SPA6327 - Aural Habilitation Rehab (3)
  - SPA6410 - Aphasias and Related Disorders (3)
  - SPA6474 - Assessment and Management of Culturally and Linguistically Diverse Populations (3)
  - SPA6541 - Assessment of Language Disorders in Children and Adolescents (3)
  - SPA6542 - Intervention of Language Disorders in Children and Adolescents (3)
  - SPA6559 - Augmentative and Alternative Communication (3)
  - SPA6565 - Feeding and Swallowing Disorders (3)
  - SPA6805 - Research in Communicative Disorders (3)

Clinical Practice
25 Total Credits

- Complete all of the following
  - Complete the following:
    - SPA6551 - Foundations of Clinical Practice: Level I (1)
    - SPA6503 - Foundations of Clinical Practice Level II (1)
    - SPA6503L - Found Clinic Practice-II APP (1)
    - SPA6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology (1)
    - SPA6563L - Clinical Practice and Instrumental Diagnostics in Individuals with Dysphagia (1)
    - SPA6942 - Foundations of Clinical Practice: Level III (1)
    - SPA6942L - Found Clinic Practice-III APP (1)
    - SPA6943C - Clinical Practice Level I (3)
  - Earn at least 2 credits from the following types of courses:
    Students are required to take both SPA 6503L and SPA 6942L twice.
  - Earn at least 3 credits from the following types of courses:
    SPA 6946 - Clinical Practice: Level II
  - Earn at least 10 credits from the following types of courses:
    SPA 6946 - Clinical Practice: Level III
  - Supervised clinical practice is an integral part of the graduate program in Communication Sciences and Disorders. It provides students with an opportunity to apply classroom knowledge to the evaluation and management of individuals with a wide variety of communication disorders. Students complete three clinical practica at the UCF Communication Disorders Clinic and other affiliated facilities, as well as external rotations in schools, hospitals, rehabilitation centers, skilled nursing facilities, long-term care facilities, community clinics, and private practices. Through these practica and external rotations, students obtain a minimum of 400 clock hours of supervised clinical experience in accordance with the guidelines outlined by the American Speech-Language-Hearing Association (ASHA). Clinical practica and external rotations vary in length and do not always coincide with the academic calendar.

Thesis/Nonthesis Option
9 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following types of courses:
        SPA 6971 - Thesis
      - Earn at least 3 credits from the following types of courses:
        Elective course selected in consultation with Faculty advisor.
      - Thesis hours cannot be counted toward graduation requirements if students fail to complete or successfully defend their thesis. For additional information, thesis students and their advisory committees should refer to the thesis requirements in the UCF Graduate Catalog.
    - Nonthesis Option
      - Earn at least 9 credits from the following types of courses:
        Elective courses selected in consultation with Faculty advisor.

Comprehensive Examination
0 Total Credits

- Passing a School Comprehensive Examination is a requirement for completion of the master’s degree in Communication Sciences and Disorders.

Grand Total Credits: 72
Program Details

Equipment Fee

Students in the Communication Sciences and Disorders MA Program pay a $90 equipment fee each semester they are enrolled.

Additional Program Costs

The program requires students to pay additional fees for the required background checks, clinic uniform, and registration for the academic/clinical competencies tracking system.

Sample Plan of Study for the Traditional Program

The Traditional MA program requires a prescribed sequence of academic and clinical courses which may vary according to the semester of entry. The following is a sample plan of study.

Semester 1

- SPA 6204 - Articulation/Phonological Dis 3 Credit Hours
- SPA 6541 - Assessment of Language Disorders in Children and Adolescents 3 Credit Hours
- SPA 6542 - Intervention of Language Disorders in Children and Adolescents 3 Credit Hours
- SPA 6805 - Research in Communicative Disorders 3 Credit Hours
- SPA 6551 - Foundations of Clinical Practice: Level I 1 Credit Hours

Semester 2

- SPA 6225C - Fluency Disorders 4 Credit Hours
- SPA 6410 - Aphasia and Related Disorders 3 Credit Hours
- SPA 6559 - Augmentative and Alternative Communication 3 Credit Hours
- SPA 6503 - Foundations of Clinical Practice Level II 1 Credit Hours
- SPA 6503L - Found Clinic Practice-II APP 1 Credit Hours (X 2)

Semester 3

- SPA 6211C - Voice Disorders 4 Credit Hours
- SPA 6327 - Aural Habilitation Rehab 3 Credit Hours
- SPA 6565 - Feeding and Swallowing Disorders 3 Credit Hours
- SPA 6942 - Foundations of Clinical Practice: Level III 1 Credit Hours
- SPA 6942L - Found Clinic Practice-III APP 1 Credit Hours (X 2)
- SPA 6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology 1 Credit Hours

Semester 4

- SPA 6236 - Motor Speech Disorders in Adults and Children 3 Credit Hours
- SPA 6474 - Assessment and Management of Culturally and Linguistically Diverse Populations 3 Credit Hours
- SPA 6943C - Clinical Practice Level I 3 Credit Hours
- Elective 3 Credit Hours
- SPA 6563L - Clinical Practice and Instrumental Diagnostics in Individuals with Dysphagia 1 Credit Hours

Semester 5

- SPA 6946 - Clinical Practice: Level II 3 Credit Hours
- Elective 3 Credit Hours
- Elective 3 Credit Hours

Semester 6

- SPA 6946 - Clinical Practice: Level III 10 Credit Hours

Independent Learning

All students in the Master of Arts in Communication Sciences and Disorders program engage in independent learning through inquiry, dialogue, and practice. Experiences such as client case studies, scholarly reviews, research projects, clinical practica and external rotations provide students independent learning opportunities to attain knowledge, skills, and professional behaviors. In capstone external rotations, students bridge university classroom and clinic lessons to real-world educational and health-related settings.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Licensure Disclosure

For information on how this program may prepare students for professional licensure, please visit https://healthprofessions.ucf.edu/csd/masters/.

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Communication-Sciences-Disorders-MA.pdf.
**Track Description**

The School of Communication Sciences and Disorders offers an Accelerated BA/BS to MA Track for highly qualified UCF undergraduate majors in communication sciences and disorders that enables them to complete a master's degree in one less semester than students in the Traditional Track.

The program is intended for those interested in working with children and adults who have communication disorders. Once students complete the BA/BS, they must apply and be admitted to the master's degree program and follow a prescribed sequence of academic and clinical courses.

The Communication Sciences and Disorders program strives to educate students to become successful practitioners in the field of speech-language pathology. To that end, the American Speech-Language-Hearing Association (ASHA) Code of Ethics is re-enforced throughout the academic curriculum. Students who violate the ASHA Code of Ethics may be subject to academic sanctions or dismissed from the program.

**Track Prerequisites**

Undergraduate students enroll in up to 16 credit hours of graduate-level courses while completing the bachelor's degree. This enables students to achieve a master's degree in the UCF School of Communication Sciences and Disorders in one less semester.

Up to 16 credit hours of approved 6000-level courses, with grades of "B" (3.0) or better, may be counted toward the BA/BS and MA degrees. Additional requirements include:

- Adopting the most current catalog for students changing degree programs.
- Earning at least a "B" (3.0) in each undergraduate and graduate course to be counted toward the major.
- Being assessed tuition and fees at the graduate rate for graduate courses.

**Undergraduate Requirements**

The Shared Courses below may be used to replace:

- SPA 4400 Language Disorders Across the Life Span
- SPA 4476 Speech Disorders Across the Life Span
- SPA 4478 Multicultural Aspects of Communication Disorders and Differences
- SPA 4803 Research Methods in Communication Sciences and Disorders
- SPA 4870 Capstone Course
- one restricted elective in the undergraduate curriculum

**Shared Courses**

The following is a list of graduate courses that may be used to fulfill degree requirements for both the undergraduate and graduate programs.

- SPA 6204 - Articulation/Phonological Disorders 3 Credit Hours
- SPA 6410 - Aphasia and Related Disorders 3 Credit Hours
- SPA 6551 - Foundations of Clinical Practice: Level I 1 Credit Hours
- SPA 6805 - Research in Communicative Disorders 3 Credit Hours
- SPA 6541 - Assessment of Language Disorders in Children and Adolescents 3 Credit Hours
- SPA 6542 - Intervention of Language Disorders in Children and Adolescents 3 Credit Hours
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Accelerated B.A./B.S. to M.A. track in Communication Sciences and Disorders allows highly qualified University of Central Florida undergraduate majors in Communication Sciences and Disorders to begin taking graduate level courses that will count toward their master's degree while completing their baccalaureate degree program. Students apply for admission to the Accelerated Track either in the last semester of their sophomore year or the first semester of their junior year.

To be considered to the Accelerated B.A./B.S. to M.A. track, applicants must submit a hard copy (paper) application for the bachelor's program directly to the School of Communication Sciences and Disorders. Please contact the school for the appropriate application form and additional documents required.

Following acceptance to the Accelerated B.A./B.S. to M.A. track, an electronic application for admission to the graduate program must be submitted by the application deadline, normally during the senior year of the bachelor's program.

When completing the graduate application, student will follow general UCF graduate application requirements. Applicants to this program must also provide:

- Completed CSDCAS Application (https://csdcas.liaisoncas.com/applicant-ux/#/login)
- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score (verbal, quantitative, and written) obtained within the last five years. Use GRE CODE for UCF CSDCAS: 7407. (Do not use the "Institution Code" for GRE listed to the right).
- Three (3) letters of recommendation with CSDCAS recommendation forms, preferably two from current or former faculty members. Letters of recommendation cannot be dated more than one year prior to the date of the application deadline.
- A current résumé.
- A letter of intent describing educational background, professional experiences, future goals, interest in the field, why you want to attend UCF, other related information about your qualifications, and how you will embody and uphold the ASHA Code of Ethics (http://www.asha.org/code-of-ethics/) in your professional career.
- All CSDCAS supplemental questions. Question can be found on CSDCAS application.
- UCF Graduate Application (supplemental) must be submitted by the deadline in addition to CSDCAS application.

A formal admission decision for the master's program will be made following receipt of the graduate application. Successful completion of the bachelor's degree does not guarantee admission to the master's program. The Communication Sciences and Disorders program reserves the right to deny admission or dismiss a student after admission to the program if, in the judgment of the faculty, the student fails to demonstrate and/or uphold the ASHA Code of Ethics (http://www.asha.org/code-of-ethics/) in coursework or practice in the field. A background check is required for all new students during their first semester in the master's program.

  - Earn at least 3 credits from the following types of courses:
    - SPA 6946 - Clinical Practice: Level II
  - Earn at least 10 credits from the following types of courses:
    - SPA 6946 - Clinical Practice: Level III
  - Supervised clinical practice is an integral part of the graduate program in Communication Sciences and Disorders. It provides students with an opportunity to apply classroom knowledge to the evaluation and management of individuals with a wide variety of communication disorders. Students complete three clinical practica at the UCF Communication Disorders Clinic and other affiliated facilities, as well as external rotations in schools, hospitals, rehabilitation centers, skilled nursing facilities, long-term care facilities, community clinics, and private practices. Through these practica and external rotations, students obtain a minimum of 400 clock hours of supervised clinical experience in accordance with the guidelines outlined by the American Speech-Language-Hearing Association (ASHA). Clinical practica and external rotations vary in length and do not always coincide with the academic calendar.

Thesis/Nonthesis Option
9 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following types of courses:
        - SPA 6971 - Thesis
      - Earn at least 3 credits from the following types of courses:
        - Select one 3 credit hour elective course in consultation with Faculty Advisor.
      - Thesis hours cannot be counted toward graduation requirements if students fail to complete or successfully defend their thesis. For additional information, thesis students and their advisory committees should refer to the thesis requirements in the UCF Graduate Catalog.
  - Nonthesis Option
    - Earn at least 9 credits from the following types of courses:
      - Students will work with Faculty advisor to choose 3 electives to complete this requirement.

Comprehensive Examination
0 Total Credits

- Passing a School Comprehensive Examination is a requirement for completion of the master's degree in Communication Sciences and Disorders.

Grand Total Credits: 72
Track Details

Equipment Fee
Students in the Communication Sciences and Disorders MA Program pay a $90 equipment fee each semester they are enrolled.

Additional Program Cost
The program requires students to pay additional fees for the required background checks, clinic uniform, and registration for the academic/clinical competencies tracking system.

Financial Information
Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Licensure Disclosure
This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Communication-Sciences-Disorders-MA.pdf.
Track Description

The School of Communication Sciences and Disorders offers the Consortium track leading to the Master of Arts in Communication Sciences and Disorders.

The Consortium track is designed specifically for students with a bachelor's degree in communication sciences and disorders or speech-language pathology and audiology who currently work in participating central Florida public school districts and have been providing speech and language services for at least one semester prior to application.

The goal of this program is to address the critical shortage of public-school speech-language pathologists. It represents a cooperative effort between the UCF School of Communication Sciences and Disorders and the Central Florida Public School Consortium. Participating school districts in the Central Florida Consortium are Brevard, Citrus, Flagler, Lake, Marion, Orange, Osceola, Seminole, Sumter, and Volusia.

The Communication Sciences and Disorders program strives to educate students to become successful practitioners in the field of speech-language pathology. To that end, the American Speech-Language-Hearing Association (ASHA) Code of Ethics is re-enforced throughout the academic curriculum. Students who violate the ASHA Code of Ethics may be subject to academic sanctions or dismissed from the program.

Track Prerequisites

All students must complete at least 3 credit hours in statistics with a grade of "C" or better. Undergraduate course work in statistics is a prerequisite to SPA 6805 - Research in Communicative Disorders.

To be certified to practice by the American Speech-Language-Hearing Association (ASHA), all students must have undergraduate transcript credit, which could include course work, advanced placement, CLEP, or examination equivalency, for each of the following areas: biological sciences, physical sciences, social/behavioral sciences, and statistics. Courses may consist of any number of credits and must be taken outside the discipline.
**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Master of Arts in Communication Sciences and Disorders program at UCF participates in the Communication Sciences and Disorders Centralized Application Service, known as CSDCAS. Prospective students applying to the Communication Sciences and Disorders MA program must apply online using the CSDCAS application in addition to the UCF online application. To learn more about the CSDCAS application process, visit http://www.capcsd.org/csdcas-student-page/

**Entry Terms:** The Consortium track admits for spring term only. Please note that admission is granted for the spring term only and for this specific track. **Applicants may not change start terms or tracks after an admission decision has been made.** If the applicant determines that they cannot accept the offer of admission as presented in the admission letter, they must rescind the offer and may apply to the desired track in the next admissions cycle.

**Step 1: Complete the CSDCAS application for UCF**

Completed CSDCAS Application (https://csdcas liaisoncas.com/applicant-ux/#/login)

One official transcript (in a sealed envelope) from each college/university attended.

Official, competitive GRE score (verbal, quantitative, and written) obtained within the last five years. Use **GRE CODE for UCF CSDCAS: 7407**. (Do not use the “Institution Code” for GRE listed to the right side of this page).

Three (3) letters of recommendation with CSDCAS recommendation forms. One of the three letters of recommendation must be from the district school administrator or program specialist of the Speech-Language Program of the employing school district, one from the school principal, and one from a former professor. Letters of recommendation cannot be dated more than one year prior to the date of the application deadline.

A letter of intent describing educational background, professional experiences, future goals, and how you will embody and uphold the ASHA Code of Ethics (http://www.asha.org/code-of-ethics/) in your professional career

A current resume.

All CSDCAS supplemental questions. Question can be found on CSDCAS application.

UCF Graduate Application (supplemental) must be submitted by the deadline in addition to CSDCAS application.

Incomplete applications will NOT be reviewed.

All application materials MUST be sent directly to CSDCAS. Materials sent to the university or program will not be accepted. Application materials must be received by CSDCAS no later than February 1st for Summer admission.

**Step 2: Complete University of Central Florida’s Graduate School application**

In addition to the CSDCAS application, applicants must also submit a UCF application for graduate admission at https://application.graduate.ucf.edu/. Supporting documents (i.e. transcripts, test scores, etc.) do not need to be submitted to UCF directly. University applications must also be submitted by the stated application deadlines.

Admission to the Communication Sciences and Disorders program is granted on a competitive basis. Approximately thirty-five to forty-five (35-45) students are admitted each semester. Meeting the minimum admission requirements does not guarantee admission to the program. The recent class statistics are listed on the Graduate Program Profile webpage. Additionally, the program reserves the right to deny admission or dismiss a student after admission to the program if, in the judgment of the faculty, the student fails to demonstrate and/or uphold the ASHA Code of Ethics (http://www.asha.org/code-of-ethics/) during coursework and/or practice in the field. A background check is required for all new students during their first semester in the program. All applicants and admitted students must perform certain Essential Functions in order to participate and complete program requirements.

- Complete 1 of the following
  - Thesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following types of courses:
        SPA 6971 - Thesis
      - Earn at least 3 credits from the following types of courses:
        1 Elective course selected in consultation with Faculty advisor.
      - Thesis hours cannot be counted toward graduation requirements if students fail to complete or successfully defend the thesis. For additional information, thesis students and their advisory committees should refer to the thesis requirements in the UCF Graduate Catalog.
    - Nonthesis Option
      - Earn at least 9 credits from the following types of courses:
        Appropriate electives selected in consultation with Faculty advisor.

Comprehensive Examination
0 Total Credits

- Passing a School Comprehensive Examination is a requirement for completion of the master's degree in Communication Sciences and Disorders.

Grand Total Credits: 72
Track Details
Consortium track students typically complete one external rotation outside of the school setting. The second external rotation must be completed in a school setting that is different from the practitioner's primary employment setting.

Equipment Fee
Students in the Communication Sciences and Disorders MA Program pay a $90 equipment fee each semester that they are enrolled.

Additional Program Costs
The program requires students to pay additional fees for the required background checks, clinic uniform, and registration for the academic/clinical competencies tracking system.

Independent Learning
All students in the Master of Arts in communication sciences and disorders program engage in independent learning through inquiry, dialogue, and practice. Experiences such as client case studies, scholarly reviews, research projects, clinical practica and external rotations provide students independent learning opportunities to attain knowledge, skills and professional behaviors. In capstone external rotations, students bridge university classroom and clinic lessons to real-world educational and health-related settings.

Financial Information
Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Program Description

The Master of Science in Kinesiology provides an in-depth study of applied human physiology and how it relates to exercise, athletic performance and health and wellness across the lifespan.

The Master of Science in Kinesiology offers Non-Thesis options, a Thesis option, and an Anatomical Sciences Specialization for students. All options require a minimum of 36 credit hours, with at least 18 credit hours of coursework at the 6000 level. All students are automatically placed in the Non-Thesis option. Students wishing to pursue the Thesis option must receive approval from the graduate program director and have a commitment from a faculty member to serve as the thesis committee chair. Due to limited enrollment, students wishing to pursue the Anatomical Sciences Specialization must also receive approval from the graduate program director.

Students in the Non-Thesis option are required to participate in a practicum APK 6946 that will serve as their culminating graduate experience or take an independent learning experience ( PET 6910 - Problem Analysis - Review of Literature ) that involves a detailed literature review specific to a subject area of the student's interest under the supervision of graduate faculty.

The Anatomical Sciences Specialization provides a depth of understanding of the anatomical sciences and substantial hands-on experience in the gross anatomy laboratory. Students interested in pursuing the Anatomical Sciences Graduate Certificate (https://healthprofessions.ucf.edu/physicaltherapy/anatomical-sciences/) must gain admission to the certificate program and complete the specified electives, which may be substituted for elective courses listed below.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Personal statement discussing reasons for selecting the Kinesiology degree program, career goals, and how this degree will support the stated career goals.
- Two letters of recommendation from previous faculty or supervisors who can speak to the applicant's abilities to be successful in graduate school.
- Résumé or curriculum vitae (CV).
- Video Essay
- While not required, applicants are encouraged to submit official GRE scores taken within the last five years for potential consideration for fellowships, scholarships, and assistantships.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

    - PET6388 - Cardiovascular Physiology (3)
    - PET6395 - Program Design in Strength and Conditioning (3)
    - PET6521 - Exercise Physiology Instrumentation (3)
    - PET6690 - Exercise Prescription for Special Populations (3)
    - PET7387 - Exercise Endocrinology (3)

- All electives are selected in conjunction with the student's graduate advisor or the graduate coordinator.

- Please review the catalog page for the Anatomical Sciences Graduate Certificate for courses required in that program.

**Grand Total Credits:** 36

**Program Details**

**Equipment Fee**

Full-time students in the Kinesiology MS program pay a $28 equipment fee each semester that they are enrolled. Part-time students pay $14 each semester that they are enrolled.

**Independent Learning**

All students are required to complete a practicum, literature review, or thesis in conjunction with their coursework.

Program Description
The Kinesiology PhD program provides advanced studies in the area of kinesiology, exercise physiology, and sport science. It is offered by the School of Kinesiology and Physical Therapy, home to the Institute of Exercise Physiology and Rehabilitation Science. The degree program combines state-of-the-art research facilities using cutting-edge technology with high quality and innovative instruction and curriculum. The program welcomes students from a variety of educational backgrounds including the biological and health-related professions, exercise science, physical education, or athletic training.

PROGRAM BEGINS FALL 2022.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline. In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree in a closely related field and master's level competency in educational research and statistics.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Goal statement.
- Resumé/vita reflecting relevant experience.
- Writing sample.

  - PHT6118C - Gross Anatomy/Neuroscience II (6)

Dissertation

15 Total Credits

- Complete all of the following
  - Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee. All students must complete the candidacy examination prior to enrolling in Dissertation.
  - Earn at least 15 credits from the following types of courses:
    - PET 7980 - Dissertation Research

Candidacy

0 Total Credits

- The following are required to be admitted to candidacy for the Kinesiology Ph.D. and to enroll in dissertation hours:
  - Submission of an approved program of study.
  - Completion of all graduate course work, except for dissertation hours, with an overall 3.0 GPA.
  - Proof of current professional certification(s) demonstrating industry-relevant competencies.
  - Formation of a qualifying examination committee consisting of approved graduate faculty and graduate faculty scholars.
  - Successful completion of the qualifying examination/pre-dissertation project.
  - Formation of a dissertation advisory committee consisting of approved graduate faculty and graduate faculty scholars.
  - Successful defense of the written dissertation proposal which serves as the candidacy examination.

Grand Total Credits: 63 - 69

Program Details

Independent Learning

The dissertation satisfies the independent learning requirement.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Is this program available 100% online?

No

Program Description

This certificate program has been temporarily suspended effective Summer 2016.

The UCF School of Communication Sciences and Disorders (CSD) Graduate Certificate in Medical Speech-Language Pathology is designed to prepare speech language pathologists and students currently enrolled in the CSD program with the knowledge and skills necessary to evaluate and treat individuals with medically-related communication disorders.

Program Prerequisites

Courses from a previous graduate degree program or certificate program cannot be applied toward the completion of the Certificate in Medical Speech-Language Pathology.

Current students in UCF’s Communication Sciences and Disorders MA program may only apply SPA 6565 - Feeding and Swallowing Disorders, toward both the Medical Speech-Language Pathology Certificate and the master's degree in communication sciences and disorders. Nine credit hours will need to be taken in addition to the regular master's program course requirements.
Application Requirements

Admission is open to those with a master's degree in speech-language pathology from an accredited institution recognized by UCF and UCF graduate students currently enrolled in the Communication Sciences and Disorders MA program. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Military Social Work Graduate Certificate

College
College of Health Professions and Sciences

Department
School of Social Work

Program Website
https://healthprofessions.ucf.edu/socialwork/
Is this program available 100% online?

No

Program Description

Students pursuing a Master of Social Work degree may choose a specialization in military social work.

The Graduate Certificate in Military Social Work will prepare students to provide behavioral health services, including mental health counseling aimed at building psychological resilience; treatment of post-traumatic stress disorder, depression, anxiety, suicide risk assessment and prevention techniques; and family therapy for strengthening military, veterans and their families during and after deployment.

The Military Social Work certificate is open to current UCF MSW Traditional and Advanced Standing students and a limited number of Counselor Education students only. Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

The following courses are required for the certificate but may also be used as electives in the MSW program.

Total Credit Hours Required: 9 Credit Hours Minimum beyond the Bachelor’s Degree

Program Prerequisites

Admission is open to current students in the UCF Master of Social Work program and a limited number of students in the UCF Counselor Education master’s program. Students interested in admission to this certificate program should contact the MSW Admissions Specialist or by calling (407) 823-3474 for more information.

Application Requirements

Admission is open to current students in the UCF Master of Social Work program and a limited number of students in the UCF Counselor Education master’s program. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. Please submit all requested material by the established deadline(s):

- One official transcript from each college/university attended (Graduate Studies should already have on file from your MSW application).
- Personal statement for Military Social Work. Applicants should write a personal autobiographical statement that is no more than two double spaced pages. Questions to answer include: What reasons or experiences led you to decide to apply for the military social work certificate? In completing the certificate, why is working with this population of interest to you?
- Up to date résumé

Physical Therapy DPT

College
College of Health Professions and Sciences

Department
School of Kinesiology and Physical Therapy

Program Website
https://healthprofessions.ucf.edu/kpt/physicaltherapy/doctorate/

Program Handbook
Physical Therapy DPT Handbook
Program Description

The Doctor of Physical Therapy (DPT) program prepares students to become competent, compassionate, and ethical physical therapists able to effectively treat patients in a variety of health care settings. Graduates will be highly dedicated professionals who demonstrate clinical excellence through exceptional critical thinking, communication, patient education, advocacy, practice management and research skills.

The Doctor of Physical Therapy program is a three-year (nine consecutive semesters) professional doctoral curriculum designed to prepare entry-level therapists to practice in a variety of clinical settings. The professional curriculum is a full-time “lock-step” program. The program includes multiple clinical education experiences (internships) ranging from eight weeks to twelve weeks in duration. It also includes focused interprofessional education activities involving students from other professional disciplines as well as research training and activities.

Students who successfully complete the course of study will be granted the Doctor in Physical Therapy degree (DPT), enabling the graduate to take the national board examination leading to state licensure as a Physical Therapist. This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Doctor-of-Physical-Therapy.pdf.

The UCF Doctor of Physical Therapy program promotes lifelong learning and professional development, which is attained through active involvement in professional organizations such as the American Physical Therapy Association. UCF’s Doctor of Physical Therapy Program is fully accredited by the Commission on Accreditation of Physical Therapy Education.

Mission

The mission of the University of Central Florida’s Doctor of Physical Therapy Program is to cultivate excellence in physical therapist practice through comprehensive and focused doctoral education. The program fosters excellence through its dedication to foundational sciences, clinical skill proficiency, research and evidence-based practice, service and professional duty, and lifelong learning. The program is committed to the development and strengthening of the healthcare community in order to optimize patient care in the dynamic healthcare environment.

Vision

The Doctor of Physical Therapy Program at the University of Central Florida will be distinguished for:

- Its breadth, depth, and collaborative approach to physical therapist education
- Clinical excellence and advancement of clinical practice
- Scholarly achievements and professional recognition of students, faculty, and clinical partners
- Dedication to the health and well-being of the Central Florida community
- Professional commitment and advocacy
- Cultivation of professional development to advance the practice of physical therapy
Program Prerequisites

Each prerequisite course must be completed with a minimum grade of "C". The overall GPA for all prerequisite courses must be a 3.00 or higher to be considered for admission. The program recommends all prerequisite courses be completed at the time of application. Candidates with all prerequisites completed at the time of application may be given preference over those still completing courses. **No more than two prerequisite courses may be in progress the fall semester prior to the program's start and no more than one course may be in progress during the spring semester prior to the program’s start.** Courses older than ten years will not be accepted. Online courses are NOT accepted for the following prerequisites: anatomy courses, physiology courses, physics courses, or chemistry courses, unless taken in semesters affected by COVID-19 (see program Admissions page for additional information). Hybrid courses are only accepted for the prerequisite courses listed above if the lab component is delivered in a face-to-face format (submission of course description/syllabi may be required to verify course delivery mode). Email ptinfo@ucf.edu to request a prerequisite review.

**Anatomy and Physiology** - Two courses with labs and a minimum of 8 credit hours is required. One of two options must be met:

Option 1: One semester of Human Physiology with lab and one semester of Anatomy with lab.

Option 2: Two semesters of Anatomy/Physiology combined courses with labs.

**Biology / Biological Studies** - Two courses and a minimum of 6 credit hours is required. Labs are not required. Must be courses for science majors.

**Chemistry** - Two courses with labs and a minimum of 8 credit hours is required. Introduction and survey courses are NOT accepted.

**Physics** - Two courses with labs and a minimum of 8 credit hours is required. General Physics and Physics with Calculus are both acceptable courses.

**Psychology** - One course (3 credit hours) is required. Any psychology course that is taken within the Psychology Department will meet this requirement.

**Statistics** - One course (3 credit hours) is required.
Application Requirements

Applications are only accepted for Summer admission. The application for this program can be found at www.ptcas.org.

The Doctor of Physical Therapy program at UCF participates in the Physical Therapist Centralized Application Service, known as PTCAS. Prospective students applying to the entry-level physical therapist education program must apply online using the PTCAS application (this is in addition to the UCF Graduate Application which serves as a supplemental application). To learn more about the PTCAS application process, visit www.ptcas.org.

All application materials MUST be sent directly to PTCAS. Materials sent to the university or program and not to PTCAS will not be accepted. The following application materials must be received by PTCAS no later than October 15.

- Completed PTCAS Application (www.ptcas.org), including all documents required by PTCAS.
- One official transcript from each college/university attended.
- Official GRE scores taken within last five years. Use GRE CODE for UCF PTCAS: 3871 (Do not use the UCF "Institution Code" for GRE).
- Prerequisite courses completed within ten (10) years of anticipated matriculation.
- A minimum of 50 hours of observation/volunteer or work experience under the direct supervision of a licensed physical therapist. Hours must be verified through PTCAS by November 1st to be considered. A variety of settings is recommended.
- Applicants who have attended a college/university outside the United States must also provide a course-by-course credential evaluation with GPA calculation through WES.
- UCF Graduate Application (supplemental) must be submitted in addition to PTCAS application. Deadline to submit the supplemental application is October 15.

Incomplete applications will NOT be reviewed.

Application requirements:

- The bachelor's degree may be in any discipline from a regionally accredited institution and may be in progress at the time of application. However, the degree must be awarded prior to the program's start date in the Summer C semester (mid-May).
- Minimum GPA of 3.00 (on 4.00 scale) in the last 60 credit hours of an undergraduate degree.
- Minimum GPA of 3.00 (on 4.00 scale) for all prerequisite courses. Each prerequisite course grade must be a 'C' or higher ("C-" grades are NOT accepted).
- Submission of competitive GRE scores within last five (5) years.
- An interview, by invitation only.
- UCF Graduate Application (supplemental) MUST be completed by October 15 with supplemental application fee paid by ALL APPLICANTS.
- A resume will only be required for students who are offered an interview by the program. Once requested, the applicant will email the resume directly to the program.

Applicants not meeting these minimum requirements will not be considered for admission. Meeting minimum requirements does not guarantee an applicant an interview or admission to the program. All applicants and admitted students to the Doctor of Physical Therapy program must perform certain Essential Functions in order to participate and complete program requirements.

PTCAS will begin accepting applications in July, however, the program will not begin reviewing applications until August or September.

Admissions decisions will be made only once per academic year. Incoming students must begin the program in the summer C semester (mid-May).

Thirty-eight (38) students are admitted to the program each year. The demographics of a recent class include an average age of 22 years and a grade point average of 3.80 for upper-division coursework and 3.75 for prerequisite courses (on a 4.0 scale), and an average GRE scores of 155 / 156 / 4WA.

Admission to the program is competitive based on the above criteria, the applicant's abilities, past academic performance, work experience and match of the applicant with the program's mission and goals.

- Complete all of the following

**Summer Term 3**
- Complete the following:
  - PHT7822C - Clinical Education II (6)

**Fall Term 3**
- Complete the following:
  - PHT7721C - Integrations in Orthopedic Physical Therapy (1)
  - PHT7772C - Advanced Neurological Physical Therapy II (1)
  - PHT7780C - Advanced Geriatric Physical Therapy (1)
  - PHT7329C - Advanced Pediatric Physical Therapy (1)
  - PHT7521 - Management of Physical Therapy Services II (2)
  - PHT7823C - Clinical Education III (4)
  - PHT6070C - Radiology/Imaging for Physical Therapy (3)

**Spring Term 3**
- Complete all of the following
  - Complete the following:
    - PHT7021 - Professional Practice in Physical Therapy (2)
    - PHT7900 - Capstone Project in Physical Therapy (3)
    - PHT7829C - Clinical Education IV (4)

**PHT 7XXXC Elective Course**
- Complete 1 of the following
- Elective Course Options (student must select at least one of the following courses, pending availability). PHT 6958 Physical Therapy Study Abroad can fulfill the elective requirement and may be offered at any point in the DPT curriculum:
  - Complete at least 1 of the following:
    - PHT7778C - Advanced Manual Therapy (2)
    - PHT7764C - Advanced Neurological Treatment (2)
    - PHT7702C - Advanced Orthotics and Prosthetics (2)
    - PHT7779C - Sports Physical Therapy (2)
  - Earn at least 2 credits from the following types of courses:
    - PHT 6958 - Study Abroad

**Examinations**

**0 Total Credits**

- Each student is required to achieve a passing score on the comprehensive examination. If a student does not achieve a passing score on the first attempt, a second version of the exam will be provided. If the student does not achieve a passing score on the second examination, the student will be required to pass an oral comprehensive examination which will involve patient case scenario(s). The first two examinations will include the practice exam(s) developed by the Federation of State Boards of Physical Therapy, with passing scores required to be no less than 600 (overall scale score). If a student is required to take the oral examination, a passing score is deemed as having the majority of raters providing an overall pass score. Failure of the comprehensive examination upon this third attempt will result in review by the program faculty in accordance with its retention and advancement procedures to determine if the student will be dismissed from the program or placed on a remediation plan.

**Grand Total Credits:** 114

**Program Details**

**Equipment Fee**

Students in the Doctor of Physical Therapy program pay a $90 equipment fee each semester that they are enrolled.

**Independent Learning**

All students in the Doctor of Physical Therapy (DPT) program are required to engage in independent learning, a process in which individuals take the initiative, with or without help of others to attain knowledge, skills, and professional behaviors. Tangible assignments, such as "Grand Rounds" (i.e., patient case studies), research projects, scholarly reviews, and full-time clinical education experiences mandated by the program and provide important independent learning experiences giving students ample opportunities to develop and demonstrate independent learning skills as a result of self-inquiry and group dialogue.

Is this program available 100% online?
Yes

UCF Online

Please Note: Social Work (MSW) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. Students who apply for admission to the online part-time tracks will not be permitted to switch to the on-campus, traditional tracks and students who apply for admission to the on-campus, traditional tracks will not be permitted to switch to the online part-time tracks.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Social-Work-MSW.pdf
Program Description

The Master of Social Work (MSW) program prepares students for advanced social work practice. The program educates students for community-based clinical social work practice with individuals, families, and groups. The MSW program is accredited by the Council on Social Work Education (CSWE).

The program offers multiple tracks to allow students to progress through the required MSW curriculum on either a full-time or part-time plan of study. The Full-Time Traditional Track and Part-Time Traditional Track are available for students who do not have a BSW degree. The Full-Time Advanced Standing Track and the Part-Time Advanced Standing Track are available for students who have completed a BSW degree from a CSWE-accredited program within the last six years. More information on the plans of study and requirements for each track is given in the individual track descriptions. Please scroll to the bottom of this page for further details on these Tracks.

The curriculum draws from a generalist perspective and emphasizes critical thinking skills, empirically based accountable practice, and ethical services for clients experiencing a wide range of problems. Students learn preventive and therapeutic interventions aimed at enhancing human functioning and quality of life. Graduates of the program will have the ability to work with diverse clients in a variety of agency settings.

The MSW program strives to educate students to become successful practitioners in the field of clinical social work. To that end, the National Association of Social Workers (NASW) Code of Ethics is re-enforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

The Master of Social Work Program offers several options to students including full-time study, advanced standing admission, as well as the mixed mode and online classes to support the part-time study. Applicants must choose a track in this program. Track(s) may have different requirements.

Track Description
The Master of Social Work (MSW) Program, Full-Time Advanced Standing Track allows students with baccalaureate degrees in Social Work from a CSWE-accredited school/program who demonstrate academic potential and professional maturity to complete the MSW in three semesters of graduate study.

To be considered for advanced standing admission, the bachelor's degree must have been completed within six years of the time of initial enrollment in the master's program. The Full-Time Advanced Standing Track is offered at the main campus and may be completed in three semesters (summer, fall, and spring).

The MSW program strives to provide students with the education needed to become successful practitioners in the field of clinical social work. The National Association of Social Workers (NASW) Code of Ethics is enforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

The 32-hour MSW program is composed of 18 credit hours of required core and advanced clinical specialization courses. In addition, students complete 6 credit hours of electives and 8 credit hours of field experience. Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students.

Total Credit Hours Required: 32 Credit Hours Minimum beyond the Bachelor's Degree
**Track Prerequisites**

The Council on Social Work Education (CSWE) require that all applicants have an undergraduate degree from an accredited institution. The School of Social Work requires that applicants have successfully completed (with a grade of C or higher) at least one course in each of the following categories:

- **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion);
- **Physical and Biological Sciences** (examples: biology, chemistry, anatomy, or physiology)
- **Mathematics** (examples: calculus, college algebra, computer science, or statistics);
- **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants will be granted admission to the MSW program based on a majority approval from the Admissions Review Sub-committee.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- **One official transcript** (in a sealed envelope) from each college/university attended.
- **Successful completion** (with a grade of C or higher) at least one course in each of the following categories:
  - **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion);
  - **Physical and Biological Sciences** (examples: biology, chemistry, anatomy, or physiology)
  - **Mathematics** (examples: calculus, college algebra, computer science, or statistics);
  - **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)
- **The GRE is not required for admission to this program.**
- **Up-to-date résumé**
- **Video Essay**
- **Three letters of recommendation** that must have been written within the last academic year. Letters from co-workers, colleagues, mentors, friends, family members, clergy, etc. WILL NOT be considered. Please submit your application even if you do not have your letters of recommendation. These letters can be attached to your application once they have been received, but they still must be submitted by the application deadline. Applicants must provide a letter of recommendation from each of the following:
  - **Academic:** A professor from a previously attended college/university who taught you in a course. Letters from Field Seminar Instructors are NOT accepted as an academic letter. Recommendations from full-time faculty are strongly encouraged. For applicants who have been out of college for five or more years, the applicant may substitute an employment-based recommendation. Letters from advisors will not be considered unless indicated that they also taught you as a student. Letters from Teacher Assistants are NOT accepted.
  - **Field:** An agency field task supervisor who has directly supervised the applicant in a social work field internship setting.
  - **Employment:** Either volunteer or paid employment immediate supervisor.
- **A Professional Statement:** Applicants must answer the following questions within 3-6 pages. Please use headings for each question.
  - Without disclosing personal information, what are the reasons and experiences that led you to choose social work as a profession?
  - What are your social work career interests?
  - What are your personal strengths that you can bring to this profession? How have these strengths been demonstrated in the past?
  - Where do you see yourself 10 years from now in the field of social work?
  - What major social issue do you think that professional social workers should be concerned with? What is the role of social work in relation to this issue?
  - As a social worker, you will be expected to practice ethically according to the National Association of Social Workers (NASW) Code of Ethics. This includes working with diverse populations and clients whose values and beliefs may differ from your own. How will you incorporate and uphold the NASW Code of Ethics into your work with diverse populations?
  - The MSW program requires students to complete a clinical (600 hours) internship concurrent with their coursework. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Given the above considerations, please tell us how you plan to balance your internship hours with your coursework and personal obligations. Tell us about any challenges you may have and how you plan to overcome them.

- **Writing Sample:** Applicants must submit an individually-authored research paper or literature review written for any class in their undergraduate studies, preferably one that is related to social work. Group papers will not be accepted. The paper should be 5-10 pages in length, contain citations, and a reference list in APA format, and will be used to evaluate the applicant's ability to write professionally. The applicant must be the sole author of this paper. Submissions of papers where the applicant is co-author will not be considered. Interviews, book reviews, movie reviews, case notes, client assessments, policy analysis papers, and case studies will NOT be considered. If the applicant does not have an academic paper, then he/she must write a 5-10 page paper in APA format that addresses any social issue related to social work.
  - **Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.**

Please note: The MSW program only accepts one application from each prospective student per academic year. Applicants must
choose to apply to one track and one semester only.

The Master of Social Work program can accommodate only a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met.

Students are admitted and will begin coursework in summer semesters only.

To be retained in the program, students must attend the mandatory MSW Program Orientation that takes place the week before summer classes start. Students who fail to attend this orientation will have their offer of admission rescinded.

Students are also expected to demonstrate: initiative, dependability, social concern, self-awareness, appreciation for diversity in others, the ability to problem-solve, ease in relating with others, skill in writing and speaking, and professional ethics.

Students enrolled must perform certain essential functions in order to participate in and complete program requirements. These essential functions can be found in the MSW Handbook, and define the minimal professional, cognitive, and behavioral abilities required for successful program completion as well as entry-level social work practice.

Students admitted into the MSW Program will sign an acknowledgment that they understand they must adhere to these functions in order to be in good standing and remain in the MSW Program.

**Students unable to meet the Essential Functions requirement will have their offer of admission rescinded.**

The School of Social Work reserves the right to refuse student entrance or dismiss a student after admission to the MSW program if--in the judgment of the faculty-- the student demonstrates behavior incompatible with working in the field of social work and/or violates the National Association of Social Workers (NASW) Code of Ethics.

**Advanced Standing**

To be considered for advanced standing admission, applicants must have a baccalaureate degree in Social Work from a CSWE-accredited program and demonstrate the academic potential and professional maturity to meet the demands of the program with a 3.3 GPA in their last 60 credits. Previous baccalaureate coursework that received at least a “B-” will be reviewed to ensure content equivalency. In advanced standing admission, a maximum of 30 foundation level credits may be waived based on the content equivalency to meet foundation year MSW requirements, which consist of courses in human behavior and the social environment, policy, research, social work practice, and social work field placement.

To be considered for advanced standing admission, the bachelor's degree must have been completed within six years of the time of initial enrollment in the master's program.

Clinical Specialization

18 Total Credits

- Complete the following:
  - SOW6123 - Psychosocial Pathology (3)
  - SOW6433 - Clinical Evaluation in Social Work Practice (3)
  - SOW6324 - Clinical Practice with Groups (3)
  - SOW6348 - Clinical Practice with Individuals (3)
  - SOW6612 - Clinical Practice with Families (3)
  - SOW6424 - Theories for Evidence-Based Clinical Practice in Social Work (3)

Electives
6 Total Credits

- Complete at least 2 of the following:
  - SOW6149 - Military Culture and Social Work Practice (3)
  - SOW6109 - Violence Against Women: A Global Perspective (3)
  - SOW6155 - Human Sexuality in Social Work Practice (3)
  - SOW6603 - Social Work in Health Settings (3)
  - SOW6604 - Medications in Social Work Practice (3)
  - SOW6608 - Understanding and Managing Combat Related Behavioral and Mental Health Disorders (3)
  - SOW6610 - Clinical Practice with Military and Veteran Families or Groups (3)
  - SOW6635 - Social Work Practice in Schools (3)
  - SOW6644 - Interventions with Older Adults and Their Families (3)
  - SOW6652 - Child Welfare Services (3)
  - SOW6655 - Child Abuse: Treatment and Prevention (3)
  - SOW6655 - Child Abuse: Treatment and Prevention (3)
  - SOW6712 - Clinical Social Work Practice with Substance Addictions (3)
  - SOW6713 - Prevention and Treatment of Adolescent Substance Use and Misuse (3)
  - SOW6726 - Social Work Practice with Children from Birth to Age Five and their Families (3)
  - SOW6727 - Core Concepts of Child and Adolescent Trauma (3)
  - SOW6735 - Documentation Skills for Helping Professionals (3)
  - SOW6756 - Forensic Social Work (3)
  - SOW6846 - Spirituality in Clinical Social Work Practice (3)
  - SOW6806 - Behavioral Health Skills for Clinical Social Workers (3)

Field Experience
8 Total Credits

- Earn at least 8 credits from the following types of courses:
Field instruction is an integral part of graduate social work education. It provides the student with an opportunity to test classroom knowledge; to develop and refine both foundation and advanced practice skills. Decisions regarding field assignment are determined by the Field Director. Only agency sites approved by the School of Social Work may be used for field instruction. Clinical MSW students complete a minimum of 600 clock hours in the field. Field education includes a field seminar. Students must complete at least 50% of their field hours during the agency's normal business hours. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Consequently, field placements cannot be guaranteed to students who require evening and weekend placements. Many social work agencies have students complete background checks, including formal background checks, law enforcement finger printing, driving records, and criminal record checks. In most instances, the expense for the background check is the responsibility of the student. We urge students to seek this information prior to entering the field experience if there is sensitive information that may prevent being accepted at an agency. Students must also report any background issues on field application so that an appropriate placement can be made. The UCF School of Social Work cannot guarantee a field placement or subsequent degree completion for students who do not pass background checks.

Grand Total Credits: 32
Track Details

The MSW Advanced Standing track allows no more than one C grade or 3 credit hours (whichever is greater) to be used toward the degree requirements. Exceeding three credit hours or one C grade is grounds for dismissal from the MSW Advanced Standing track.

Previous baccalaureate coursework that received at least a "B-" will be reviewed to ensure content equivalency. In advanced standing admission, a maximum of 30 foundation-level credits may be waived based on the content equivalency to meet foundation year MSW requirements, which consist of courses in human behavior and the social environment, policy, research, social work practice, and social work field placement.

Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

Required Sequence of Curriculum

First Semester (Summer)
- SOW 6123 - Psychosocial Pathology 3 Credit Hours
- SOW 6424 - Theories for Evidence-Based Clinical Practice in Social Work 3 Credit Hours

Second Semester (Fall)
- SOW 6324 - Clinical Practice with Groups 3 Credit Hours
- SOW 6348 - Clinical Practice with Individuals 3 Credit Hours
- SOW 6612 - Clinical Practice with Families 3 Credit Hours
- SOW 6531 - Full Time MSW Clinical Field Integrative Seminar I 2 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours
  Take 2 credit hours

Third Semester (Spring)
- SOW 6433 - Clinical Evaluation in Social Work Practice 3 Credit Hours
- SOW Clinical elective
- SOW Clinical elective
- SOW 6536 - Full Time MSW Clinical Field Education and Seminar II 2 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours
  Take 2 credit hours

Transfer Credit

Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Students who have completed course work in an accredited MSW program may transfer up to 9 credit hours of non-field courses toward the 32 credit hours of the degree. Students must have received a grade of "B-" or higher in these courses. Courses will be evaluated on a course-by-course basis by the MSW Director. Field classes are not eligible for transfer.

Students seeking to transfer to the School of Social Work from another CSWE accredited social work program are required to meet the criteria for admission and follow the application procedures.

Additionally, one of the academic references must be from the MSW Program Coordinator or academic adviser in the program from which the applicant is transferring and must address the academic standing in that program. If not currently enrolled, the reference must be from the former MSW Program Coordinator or academic adviser. Syllabi are required for any social work classes being considered for transfer credit.

As per university policy, transfer credits will not be considered for the market based fully online part time tracks.

Equipment Fee

Full-time students in the MSW program pay a $35 equipment fee each semester that they are enrolled.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Licensure Disclosure
This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Social-Work-MSW.pdf.

Track Description
The Master of Social Work (MSW), Full-Time Traditional Track allows students who do not have a BSW degree to complete the MSW required curriculum in two years of full-time study at the main campus.

The first year of study in the Master of Social Work (MSW), Full-Time Traditional Track includes 24 credit hours in class work and 6 credit hours in field education. The second year of study includes 24 credit hours in class work and 8 credit hours in the field.

The MSW program strives to provide students with the education needed to become successful practitioners in the field of clinical social work. The National Association of Social Workers (NASW) Code of Ethics is enforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

The 62-hour MSW program is composed of 39 credit hours of required core and advanced clinical specialization courses. In addition, students complete 9 credit hours of electives and 14 credit hours of field experience. Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers, and internships also contribute to the self-development of our students. Students in the 62-hour program must include at least 31 hours of course work at the 6000 level in their program of study.

Total Credit Hours Required: 62 Credit Hours Minimum beyond the Bachelor's Degree
Track Prerequisites

The Council on Social Work Education (CSWE) require that all applicants have an undergraduate degree from an accredited institution. The School of Social Work requires that applicants have successfully completed (with a grade of C or higher) at least one course in each of the following categories:

- **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion);
- **Physical and Biological sciences** (examples: biology, chemistry, anatomy, or physiology)
- **Mathematics** (examples: calculus, college algebra, computer science, or statistics);
- **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants will be granted admission to the MSW program based on a majority approval from the Admissions Review Sub-committee.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- **One official transcript** (in a sealed envelope) from each college/university attended.
- **Successful completion** (with a grade of C or higher) at least one course in each of the following categories:
  - **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion);
  - **Physical and Biological Sciences** (examples: biology, chemistry, anatomy, or physiology)
  - **Mathematics** (examples: calculus, college algebra, computer science, or statistics);
  - **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)
- **The GRE is not required for admission to this program.**
- **Up-to-date résumé**
- **Video Essay**
- **Three letters of recommendation** that must have been written within the last academic year. Letters from co-workers, colleagues, mentors, friends, family members, clergy, etc. WILL NOT be considered. Please submit your application even if you do not have your letters of recommendation. These letters can be attached to your application once they have been received, but they still must be submitted by the application deadline. Applicants must provide a letter of recommendation from each of the following:
  - **Academic:** A professor from a previously attended college/university who taught you in a course. Letters from Field Seminar Instructors are NOT accepted as an academic letter. Recommendations from full-time faculty are strongly encouraged. For applicants who have been out of college for five or more years, the applicant may substitute an employment-based recommendation. Letters from advisors will not be considered unless indicated that they also taught you a student. Letters from Teacher Assistants are NOT accepted.
  - **Employment:** Either volunteer or paid employment immediate supervisor.
  - **Third Recommendation:** A second academic or employment-based recommendation should be submitted for the third recommendation.
- **A Professional Statement:** Applicants must answer the following questions within 3-6 pages. Please use headings for each question.
  - Without disclosing personal information, what are the reasons and experiences that led you to choose social work as a profession?
  - What are your social work career interests?
  - What are your personal strengths that you can bring to this profession? How have these strengths been demonstrated in the past?
  - Where do you see yourself 10 years from now in the field of social work?
  - What major social issue do you think that professional social workers should be concerned with? What is the role of social work in relation to this issue?
  - As a social worker, you will be expected to practice ethically according to the National Association of Social Workers (NASW) Code of Ethics. This includes working with diverse populations and clients whose values and beliefs may differ from your own. How will you incorporate and uphold the NASW Code of Ethics into your work with diverse populations?
  - The MSW program requires students to complete a clinical (600 hours) internship concurrent with their coursework. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Given the above considerations, please tell us how you plan to balance your internship hours with your coursework and personal obligations. Tell us about any challenges you may have and how you plan to overcome them.
  - **Writing Sample:** Applicants must submit an individually-authored research paper or literature review written for any class in their undergraduate studies, preferably one that is related to social work. **Group papers will not be accepted.** The paper should be 5-10 pages in length, contain citations, and a reference list in APA format, and will be used to evaluate the applicant’s ability to write professionally. The applicant must be the sole author of this paper. Submissions of papers where the applicant is co-author will not be considered. Interviews, book reviews, movie reviews, case notes, client assessments, policy analysis papers, and case studies will NOT be considered. If the applicant does not have an academic paper, then he/she must write a 5-10 page paper in APA format that addresses any social issue related to social work.
  - **Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation.** Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Please note: The MSW program only accepts one application from each prospective student per academic year. Applicants must
choose to apply to one track and one semester only

The Master of Social Work program can accommodate only a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met.

Students admitted will begin coursework in the fall semester only.

To be retained in the program, students must attend the mandatory MSW Program Orientation that takes place the week before fall classes start. Students who fail to attend this orientation will have their offer of admission rescinded.

To be accepted into and retained in the program, students are expected to demonstrate: initiative, dependability, social concern, self-awareness, appreciation for diversity in others, the ability to problem-solve, ease in relating with others, skill in writing and speaking, and professional ethics.

Students enrolled must perform certain essential functions in order to participate in and complete program requirements. These essential functions can be found in the MSW Handbook—which students must read prior to beginning their plan of study. These essential functions define the minimal professional, cognitive, and behavioral abilities required for successful program completion along as well as entry-level clinical social work practice. Students admitted into the MSW Program will sign an acknowledgment that they understand that they must adhere to these essential functions in order to be in good standing and remain in the MSW Program.

**Students unable to meet the Essential Functions requirement will have their offer of admission rescinded.**

The School of Social Work reserves the right to refuse student entrance or dismiss a student after admission to the MSW program if, in the judgment of the faculty, the student demonstrates behavior incompatible with working in the field of social work and/or violates the National Association of Social Workers (NASW) Code of Ethics. MSW graduates from CSWE accredited programs outside of UCF who need to complete a field placement for Florida licensure (LCSW) must apply to the MSW program as a full-time or part-time second-year clinical student.

Core  
21 Total Credits

- Complete the following:
  - SOW5107 - Human Behavior in the Social Environment (3)
  - SOW5217 - Foundations of Behavioral Health Policy and Social Work Practice (3)
  - SOW5312 - Diverse Client Populations (3)
  - SOW5235 - Social Welfare Policies and Services (3)
  - SOW5305 - Social Work Practice I: Generalist Practice (3)
SOW5306 - Social Work Practice II: Intervention Approaches (3)
SOW5404 - Social Work Research (3)

Clinical Specialization
18 Total Credits

- Complete the following:
  - SOW6123 - Psychosocial Pathology (3)
  - SOW6324 - Clinical Practice with Groups (3)
  - SOW6348 - Clinical Practice with Individuals (3)
  - SOW6612 - Clinical Practice with Families (3)
  - SOW6424 - Theories for Evidence-Based Clinical Practice in Social Work (3)
  - SOW6433 - Clinical Evaluation in Social Work Practice (3)

Electives
9 Total Credits

- Complete 1 of the following
  - One elective is required as a component of the foundation curriculum and two clinical electives are required as components of the clinical specialization. Students may choose to take clinical electives for all three required MSW electives. Clinical elective 3 Credit Hours Clinical elective 3 Credit Hours Practice/ Non-Clinical or Clinical elective 3 Credit Hours
  - All Clinical Elective Option
  - Complete at least 3 of the following:
    - SOW6149 - Military Culture and Social Work Practice (3)
    - SOW6109 - Violence Against Women: A Global Perspective (3)
    - SOW6155 - Human Sexuality in Social Work Practice (3)
    - SOW6603 - Social Work in Health Settings (3)
    - SOW6604 - Medications in Social Work Practice (3)
    - SOW6608 - Understanding and Managing Combat Related Behavioral and Mental Health Disorders (3)
    - SOW6610 - Clinical Practice with Military and Veteran Families or Groups (3)
    - SOW6635 - Social Work Practice in Schools (3)
    - SOW6644 - Interventions with Older Adults and Their Families (3)
    - SOW6652 - Child Welfare Services (3)
    - SOW6655 - Child Abuse: Treatment and Prevention (3)
    - SOW6670 - Clinical Social Work Practice with LGBTQ+ (3)
    - SOW6712 - Clinical Social Work Practice with Substance Addictions (3)
    - SOW6713 - Prevention and Treatment of Adolescent Substance Use and Misuse (3)
    - SOW6726 - Social Work Practice with Children from Birth to Age Five and their Families (3)
    - SOW6726 - Social Work Practice with Children from Birth to Age Five and their Families (3)
    - SOW6735 - Documentation Skills for Helping Professionals (3)
    - SOW6756 - Forensic Social Work (3)
    - SOW6806 - Behavioral Health Skills for Clinical Social Workers (3)
    - SOW6846 - Spirituality in Clinical Social Work Practice (3)
  - Practice/ Non-Clinical and Clinical Elective Option
    - Complete all of the following
      - SOW6383 - Social Work Administration (3)
  - Earn at least 6 credits from the following types of courses:
    - Clinical Elective Courses listed above

Field Experience
14 Total Credits

- Earn at least 14 credits from the following types of courses:
  - Generalist Field Education and Integrative Seminars 6 Credit Hours Clinical Field Education and Integrative Seminars 8 Credit Hours Field instruction is an integral part of graduate social work education. It provides the student with an opportunity to test classroom knowledge as well as to develop and refine foundation and advanced practice skills. Decisions regarding field assignment are determined by the Field Director. Only agency sites approved by the School of Social Work may be used for field instruction. Generalist MSW students complete a minimum of 400 hours in the field; clinical MSW students complete a minimum of 600 clock hours in the field. Field education includes a field seminar. Students must complete at least 50% of their field hours during the agency's normal business hours. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Consequently, field placements cannot be guaranteed to students who require evening and weekend placements. Many social work agencies have students complete background checks, including formal background checks, law enforcement fingerprinting, driving records, and criminal record checks. In most instances, the expense for the background check is the responsibility of the student. We urge students to seek this information prior to entering the field experience if there is sensitive information that may prevent being accepted at an agency. Students must also report any background issues on field application so that an appropriate placement can be made. The UCF School of Social Work cannot guarantee a field placement or subsequent degree completion for students who do not pass background checks.

Grand Total Credits: 62
**Track Details**

Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

**Required Sequence of Curriculum**

**First Semester (Fall)**
- SOW 5107 - Human Behavior in the Social Environment **3 Credit Hours**
- SOW 5132 - Diverse Client Populations **3 Credit Hours**
- SOW 5235 - Social Welfare Policies and Services **3 Credit Hours**
- SOW 5305 - Social Work Practice I: Generalist Practice **3 Credit Hours**
- SOW 5538 - Full-Time MSW Generalist Field Integrative Seminar I **1 Credit Hours**
- SOW 5940 - Generalist Field Education **VAR Credit Hours**

Take 2 credit hours

**Second Semester (Spring)**
- SOW 5306 - Social Work Practice II: Intervention Approaches **3 Credit Hours**
- SOW 5404 - Social Work Research **3 Credit Hours**
- SOW 5217 - Foundations of Behavioral Health Policy and Social Work Practice **3 Credit Hours**
- SOW Elective (Clinical or Non-Clinical)
- SOW 5539 - Full-Time MSW Generalist Field Integrative Seminar II **1 Credit Hours**
- SOW 5940 - Generalist Field Education **VAR Credit Hours**

Take 2 credit hours

**Third Semester (Summer)**
- SOW 6123 - Psychosocial Pathology **3 Credit Hours**
- SOW 6424 - Theories for Evidence-Based Clinical Practice in Social Work **3 Credit Hours**

**Fourth Semester (Fall)**
- SOW 6348 - Clinical Practice with Individuals **3 Credit Hours**
- SOW 6612 - Clinical Practice with Families **3 Credit Hours**
- SOW 6324 - Clinical Practice with Groups **3 Credit Hours**
- SOW 6531 - Full Time MSW Clinical Field Integrative Seminar I **2 Credit Hours**
- SOW 6940 - Clinical Field Education **VAR Credit Hours**

Take 2 credit hours

**Fifth Semester (Spring)**
- SOW 6433 - Clinical Evaluation in Social Work Practice **3 Credit Hours**
- SOW Clinical elective
- SOW Clinical elective
- SOW 6536 - Full Time MSW Clinical Field Education and Seminar II **2 Credit Hours**
- SOW 6940 - Clinical Field Education **VAR Credit Hours**

Take 2 credit hours

**Transfer Credit**

Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Transfer credits will be evaluated on a case by case basis by the MSW Program Director. Students must submit syllabi and have earned a grade of "B-" or better in these courses in order for them to be evaluated for transfer credit.

**Field courses taken elsewhere cannot be transferred toward satisfying the field component of the degree.**

Students seeking to transfer to the School of Social Work from another CSWE accredited social work program are required to meet the criteria for admission and follow the application procedures. Additionally, one of the academic references must be from the MSW Program Coordinator or academic adviser in the program from which the applicant is transferring and must address the academic standing in that program. If not currently enrolled, the reference must be from the former MSW Program Coordinator or academic adviser.

As per university policy, transfer credits will not be considered for the market based fully online part time tracks.

**Equipment Fee**

Full-time students in the MSW program pay a $35 equipment fee each semester that they are enrolled.

**Independent Learning**

Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as
research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students.

The field experiences and practice electives provide substantial opportunities for students to learn independently and practically about social work practice.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Yes

2021-2022 Graduate Catalog
Track Prerequisites

Please note: Social Work (MSW) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Social-Work-MSW.pdf.

Track Description

The Online Master of Social Work (MSW) Part-Time Advanced Standing Track is offered completely online and allows students with baccalaureate degrees in Social Work from a CSWE-accredited school/program who demonstrate academic potential and professional maturity to complete the MSW degree in four semesters of graduate study.

To be considered for advanced standing admission, the bachelor's degree must have been completed within six years of the time of initial enrollment in the master's program.

The MSW program strives to educate students to become successful practitioners in the field of clinical social work. To that end, the National Association of Social Workers (NASW) Code of Ethics is reinforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

Students who apply for admission to the Online Part-time Advanced Standing track will not be permitted to switch to the on-campus, face-to-face track due to the strict cohort model followed by the online program.

This track is completed entirely online and charges an enhanced tuition rate. As such, Online MSW students are not permitted to simultaneously enroll in any graduate or certificate programs through UCF. Please visit UCF Online for additional information about tuition and fees.

The 32-hour MSW program is composed of 18 credit hours of required core and advanced clinical specialization courses. In addition, students complete 6 credit hours of electives and 8 credit hours of field experience. Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students.

Total Credit Hours Required: 32 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

The Council on Social Work Education (CSWE) requires that all applicants have an undergraduate degree from an accredited institution. The School of Social Work requires that applicants have successfully completed (with a grade of C or higher) at least one course in each of the following areas:

- **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion)
- **Physical and Biological Sciences** (examples: biology, chemistry, anatomy, or physiology)
- **Mathematics** (examples: calculus, college algebra, computer science, or statistics)
- **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants will be granted admission to the MSW program based on a majority approval from the Admissions Review Sub-committee.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- **One official transcript** (in a sealed envelope) from each college/university attended.
- **Successful completion** (with a grade of C or higher) at least one course in each of the following categories:
  - **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion);
  - **Physical and Biological Sciences** (examples: biology, chemistry, anatomy, or physiology);
  - **Mathematics** (examples: calculus, college algebra, computer science, or statistics);
  - **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)
- **The GRE is not required for admission to this program.**
- **Up-to-date résumé**
- **Three letters of recommendation** that must have been written within the last academic year. Letters from co-workers, colleagues, mentors, friends, family members, clergy, etc. WILL NOT be considered. Please submit your application even if you do not have your letters of recommendation. These letters can be attached to your application once they have been received,
but they still must be submitted by the application deadline. Applicants must provide a letter of recommendation from each of the following:

- **Academic**: A professor from a previously attended college/university who taught you in a course. Letters from Field Seminar Instructors are NOT accepted as an academic letter. Recommendations from full-time faculty are strongly encouraged. For applicants who have been out of college for five or more years, the applicant may substitute an employment-based recommendation. Letters from advisors will not be considered unless indicated that they also taught you as a student. Letters from Teacher Assistants are NOT accepted.
- **Employment**: Either volunteer or paid employment immediate supervisor.
- **Field**: An agency field task supervisor who has directly supervised the applicant in a social work field internship setting.

- **A Professional Statement**: Applicants must answer the following questions within 3-6 pages. Please use headings for each question.
  - Without disclosing personal information, what are the reasons and experiences that led you to choose social work as a profession?
  - What are your social work career interests?
  - What are your personal strengths that you can bring to this profession? How have these strengths been demonstrated in the past?
  - Where do you see yourself 10 years from now in the field of social work?
  - What major social issue do you think that professional social workers should be concerned with? What is the role of social work in relation to this issue?
  - As a social worker, you will be expected to practice ethically according to the National Association of Social Workers (NASW) Code of Ethics. This includes working with diverse populations and clients whose values and beliefs may differ from your own. How will you incorporate and uphold the NASW Code of Ethics into your work with diverse populations?
  - The MSW program requires students to complete a clinical (600 hours) internship concurrent with their coursework. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Given the above considerations, please tell us how you plan to balance your internship hours with your coursework and personal obligations. Tell us about any challenges you may have and how you plan to overcome them.
  - **Writing sample.** Applicants must submit an individually authored research paper or literature review written for any class in their undergraduate studies, preferably one that is related to social work. Group papers will not be accepted. The paper should be 5-10 pages in length, contain citations, and a reference list in APA format, and will be used to evaluate the applicant's ability to write professionally. The applicant must be the sole author of this paper. Submissions of papers where the applicant is co-author will not be considered. Interviews, book reviews, movie reviews, case notes, client assessments, and case studies will not be considered. If the applicant does not have an academic paper, then they must write a 5-10 page paper on a social issue that addresses any social issue related to social work.
  - Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

*Please note:* The MSW program only accepts one application from each prospective student per academic year (Fall, Spring, Summer). Applicants must choose to apply to one track and one semester only.

The Master of Social Work program can accommodate only a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met.

Students are admitted and can begin coursework in fall semesters only. To be accepted into and retained in the program, students are expected to demonstrate initiative, dependability, social concern, self-awareness, appreciation for diversity in others, problem-solving ability, ease in relating with others, skill in writing and speaking, and professional ethics.

Students enrolled must perform certain essential functions in order to participate in and complete program requirements. These essential functions can be found in the MSW Student Handbook and define the minimal professional, cognitive, and behavioral abilities required for successful program completion as well as entry-level clinical social work practice. Students admitted into the MSW Program will sign an acknowledgment that they understand they must adhere to these functions in order to be in good standing and remain in the MSW Program.

**Students unable to meet the Essential Functions requirement will have their offer of admission rescinded.**

The School of Social Work reserves the right to refuse student entrance or dismiss a student after admission to the MSW program if, in the judgment of the faculty, the student demonstrates behaviors incongruent to working in the field of social work and/or violates the National Association of Social Workers (NASW) Code of Ethics.

**Advanced Standing**

To be considered for advanced standing admission, applicants must have a baccalaureate degree in Social Work from a CSWE-accredited program and demonstrate the academic potential and professional maturity to meet the demands of the program with a 3.3 GPA in their last 60 credits. Previous baccalaureate course work that received at least a "B-" will be reviewed to ensure content equivalency. In advanced standing admission, a maximum of 30 foundation level credits may be waived based on the content equivalency to meet foundation year MSW requirements, which consist of courses in human behavior and the social environment, policy, research, social work practice, and social work field placement.

To be considered for advanced standing admission, the bachelor's degree must have been completed within six years of the time of initial enrollment in the master's program.

Clinical Specialization
18 Total Credits

- Complete the following:
  - SOW6123 - Psychosocial Pathology (3)
  - SOW6433 - Clinical Evaluation in Social Work Practice (3)
  - SOW6324 - Clinical Practice with Groups (3)
  - SOW6348 - Clinical Practice with Individuals (3)
  - SOW6612 - Clinical Practice with Families (3)
  - SOW6424 - Theories for Evidence-Based Clinical Practice in Social Work (3)

Electives
6 Total Credits

- Complete all of the following
  - Complete at least 2 of the following:
    - SOW6644 - Interventions with Older Adults and Their Families (3)
    - SOW6806 - Behavioral Health Skills for Clinical Social Workers (3)
    - SOW6604 - Medications in Social Work Practice (3)
    - SOW6670 - Clinical Social Work Practice with LGBTQ+ (3)
  - Two clinical electives are required as components of the clinical specialization. They are selected in consultation with adviser and Online MSW coordinator.

Field Experience
8 Total Credits

- Earn at least 8 credits from the following types of courses:
  Field instruction is an integral part of graduate social work education. It provides the student with an opportunity to test classroom knowledge as well as to develop and refine foundation and advanced practice skills. Decisions regarding field assignment are determined by the Field Director. Only agency sites approved by the School of Social Work may be used for field instruction. Clinical MSW students complete a minimum of 600 clock hours in the field. Field education includes a field seminar. Students must complete at least 50 percent of their field hours during the agency's normal business hours. Evening (after 5:00 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Consequently, field placements cannot be guaranteed to students who require evening and weekend placements. Many social work agencies have students complete background checks, including formal background checks, law enforcement fingerprinting, driving records, and criminal record checks. In most instances, the expense for the background check is the responsibility of the student. We urge students to seek this information prior to entering the field experience if there is sensitive information that may prevent you from being accepted at an agency. Students must also report any background issues on field application so that an appropriate placement can be made. The UCF School of Social Work cannot guarantee a field placement or subsequent degree completion for students who do not pass background checks.

Grand Total Credits: 32
Track Details

The MSW Advanced Standing track allows no more than one C grade or 3 credit hours (whichever is greater) to be used toward the degree requirements. Exceeding three credit hours or one C grade is grounds for dismissal from the MSW Advanced Standing track.

Previous baccalaureate coursework that received at least a "B-") will be reviewed to ensure content equivalency. In advanced standing admission, a maximum of 30 foundation-level credits may be waived based on the content equivalency to meet foundation year MSW requirements, which consist of courses in human behavior and the social environment, policy, research, social work practice, and social work field placement.

Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

Required Sequence of Curriculum

*The Online MSW is primarily an asynchronous program, which means that our courses are generally not held during a fixed meeting time. However, there are some courses where synchronous, or "live" sessions are a required component of the course assignments. Because an MSW is a professional degree that allows students to engage directly with clients, synchronous sessions are put in place to support student's skills and evaluation in this area. Some of the courses that may have required live components as part of an assignment include, but are not limited to SOW 6324 Clinical Social Work Practice with Groups and SOW 6433 Clinical Evaluation in Social Work Practice. Dates and times of live sessions will be announced before the course begins, or in some courses, multiple options are provided.

First Semester (Fall)
- SOW 6123 - Psychosocial Pathology 3 Credit Hours
- SOW 6424 - Theories for Evidence-Based Clinical Practice in Social Work 3 Credit Hours

Second Semester (Spring)
- SOW 6348 - Clinical Practice with Individuals 3 Credit Hours
- SOW 6612 - Clinical Practice with Families 3 Credit Hours
- SOW 6561 - Part-Time MSW Clinical Field Integrative Seminar I 2 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours
  (2 credit hours)

Third Semester (Summer)
- SOW 6324 - Clinical Practice with Groups 3 Credit Hours
- Clinical Elective
- SOW 6562 - Part Time MSW Clinical Field Integrative Seminar II 1 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours
  (1 credit hour)

Fourth Semester (Fall)
- SOW 6433 - Clinical Evaluation in Social Work Practice 3 Credit Hours
- Clinical Elective
- SOW 6563 - Part-Time MSW Clinical Field Integrative Seminar III 1 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours
  (1 credit hour)

Transfer Credit
Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Due to the cohort nature of the track and university policy, transfer credits will not be considered for the market-based, fully online part-time Advanced Standing track.

Cost Per Credit Hour
For the Online Part-Time Social Work track in the Social Work MSW program, the cost per credit hour is $487.45.*

*Includes all university fees, which may be subject to change.

Tuition waivers are not accepted for the Online MSW.

Independent Learning
Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students. The field experiences and practice electives provide substantial opportunities for students to learn independently and practically about social work practice.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Track Description

The Online Master of Social Work (MSW) Part-Time Track is offered completely online and allows students who do not have a BSW degree to complete the MSW required curriculum online over the course of three years.

The first year of study in the Online Master of Social Work (MSW) Part-Time Track includes 18 credit hours in class work. The second year of study includes 18 credit hours in class work and 6 credit hours in the field. The third year of study includes 12 credit hours in class work and 8 credit hours in the field.

The MSW program strives to provide students with the education needed to become successful practitioners in the field of clinical social work. The National Association of Social Workers (NASW) Code of Ethics is enforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

Students who apply for admission into the Online Part-Time Track will not be permitted to switch to the on-campus, face-to-face track due to the strict cohort model the track follows.

This track is completed entirely online and charges an enhanced tuition rate. As such, Online MSW students are not permitted to simultaneously enroll in any graduate or certificate programs through UCF. Please visit UCF Online for additional information about tuition and fees.

The 62-hour MSW program is composed of 39 credit hours of required core and advanced clinical specialization courses. In addition, students complete 9 credit hours of electives and 14 credit hours of field experience. Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers, and internships also contribute to the self-development of our students.

Total Credit Hours Required: 62 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

The Council on Social Work Education (CSWE) requires that all applicants have an undergraduate degree from an accredited institution. The School of Social Work requires that applicants have successfully completed (with a grade of C or higher) at least one course in each of the following areas:

- **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion)
- **Physical and Biological Sciences** (examples: biology, chemistry, anatomy, or physiology)
- **Mathematics** (examples: calculus, college algebra, computer science, or statistics)
- **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants will be granted admission to the MSW program based on a majority approval from the Admissions Review Sub-committee.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- **One official transcript** (in a sealed envelope) from each college/university attended.
- **Successful completion** (with a grade of C or higher) at least one course in each of the following categories:
  - **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion);
  - **Physical and Biological Sciences** (examples: biology, chemistry, anatomy, or physiology);
  - **Mathematics** (examples: calculus, college algebra, computer science, or statistics);
  - **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)
- The GRE is not required for admission to this program.
- **Up-to-date résumé**
- **Three letters of recommendation** that must have been written within the last academic year. Letters from co-workers, colleagues, mentors, friends, family members, clergy, etc. WILL NOT be considered. Please submit your application even if you do not have your letters of recommendation. These letters can be attached to your application once they have been received, but they still must be submitted by the application deadline. Applicants must provide a letter of recommendation from each of the following:
  - **Academic**: A professor from a previously attended college/university who taught you in a course. Letters from Field Seminar Instructors are NOT accepted as an academic letter. Recommendations from full-time faculty are strongly encouraged. For applicants who have been out of college for five or more years, the applicant may substitute an employment-based recommendation. Letters from advisors will not be considered unless indicated that they also taught you as a student. Letters from Teacher Assistants are NOT accepted.
  - **Employment**: Letter from an immediate supervisor of either volunteer or paid work experience.
  - **Third recommendation**: A second academic or employment-based recommendation should be submitted for the third recommendation.
- **A Professional Statement**: Applicants must answer the following questions within 3-6 pages. Please use headings for each question.
Without disclosing personal information, what are the reasons and experiences that led you to choose social work as a profession?

What are your social work career interests?

What are your personal strengths that you can bring to this profession? How have these strengths been demonstrated in the past?

Where do you see yourself 10 years from now in the field of social work?

What major social issue do you think that professional social workers should be concerned with? What is the role of social work in relation to this issue?

As a social worker, you will be expected to practice ethically according to the National Association of Social Workers (NASW) Code of Ethics. This includes working with diverse populations and clients whose values and beliefs may differ from your own. How will you incorporate and uphold the NASW Code of Ethics into your work with diverse populations?

The MSW program requires students to complete a clinical (600 hours) internship concurrent with their coursework. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Given the above considerations, please tell us how you plan to balance your internship hours with your coursework and personal obligations. Tell us about any challenges you may have and how you plan to overcome them.

**Writing Sample:** Applicants must submit an individually-authored research paper or literature review written for any class in their undergraduate studies, preferably one that is related to social work. **Group papers will not be accepted.** The paper should be 5-10 pages in length, contain citations, and a reference list in APA format, and will be used to evaluate the applicant’s ability to write professionally. The applicant must be the sole author of this paper. Submissions of papers where the applicant is co-author will not be considered. Interviews, book reviews, movie reviews, case notes, client assessments, policy analysis papers, and case studies will NOT be considered. If the applicant does not have an academic paper, then he/she must write a 5-10 page paper in APA format that addresses any social issue related to social work.

**Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.**

**Please note:** The MSW program only accepts one application from each prospective student per academic year (Fall, Spring, Summer). Applicants must choose to apply to one track and one semester only.

The Master of Social Work program can accommodate only a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met.

To be accepted into and retained in the program, students are expected to demonstrate initiative, dependability, social concern, self-awareness, appreciation for diversity in others, problem-solving ability, ease in relating with others, skill in writing and speaking, and professional ethics.

Students enrolled must perform certain essential functions in order to participate in and complete program requirements. These essential functions can be found in the MSW Student Handbook and define the minimal professional, cognitive, and behavioral abilities required for successful program completion as well as entry-level clinical social work practice. Students admitted into the MSW Program will sign an acknowledgment that they understand they must adhere to these functions in order to be in good standing and remain in the MSW Program.

**Students unable to meet the Essential Functions requirement will have their offer of admission rescinded.**

The School of Social Work reserves the right to refuse student entrance or dismiss a student after admission to the MSW program if, in the judgment of the faculty, the student demonstrates behaviors incongruent to working in the field of social work and/or violates the National Association of Social Workers (NASW) Code of Ethics.

Degree Requirements

Core
21 Total Credits

- Complete the following:
  
  - SOW5107 - Human Behavior in the Social Environment (3)
  - SOW5107 - Human Behavior in the Social Environment (3)
  - SOW5217 - Foundations of Behavioral Health Policy and Social Work Practice (3)
  - SOW5235 - Social Welfare Policies and Services (3)
  - SOW5305 - Social Work Practice I: Generalist Practice (3)
  - SOW5306 - Social Work Practice II: Intervention Approaches (3)
  - SOW5404 - Social Work Research (3)

Clinical Specialization
18 Total Credits

- Complete the following:
  
  - SOW6123 - Psychosocial Pathology (3)
  - SOW6324 - Clinical Practice with Groups (3)
  - SOW6348 - Clinical Practice with Individuals (3)
  - SOW6612 - Clinical Practice with Families (3)
  - SOW6424 - Theories for Evidence-Based Clinical Practice in Social Work (3)
  - SOW6433 - Clinical Evaluation in Social Work Practice (3)

Electives
9 Total Credits

- Complete at least 3 of the following:
  
  - SOW6155 - Human Sexuality in Social Work Practice (3)
  - SOW6652 - Child Welfare Services (3)
  - SOW6603 - Social Work in Health Settings (3)
  - SOW6604 - Medications in Social Work Practice (3)
  - SOW6610 - Clinical Practice with Military and Veteran Families or Groups (3)
  - SOW6644 - Interventions with Older Adults and Their Families (3)
  - SOW6670 - Clinical Social Work Practice with LGBTQ+ (3)
  - SOW6712 - Clinical Social Work Practice with Substance Addictions (3)
  - SOW6735 - Documentation Skills for Helping Professionals (3)
  - SOW6806 - Behavioral Health Skills for Clinical Social Workers (3)

Field Experience
14 Total Credits

- Earn at least 14 credits from the following types of courses:

  Field instruction is an integral part of graduate social work education. It provides the student with an opportunity to test classroom knowledge as well as to develop and refine foundation and advanced practice skills. Decisions regarding field assignment are determined by the Field Director. Only agency sites approved by the School of Social Work may be used for field instruction. Generalist MSW students complete a minimum of 400 hours in the field; clinical MSW students complete a minimum of 600 clock hours in the field. Field education includes a field seminar. Students must complete at least 50% of their field hours during the agency's normal business hours. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Consequently, field placements cannot be guaranteed to students who require evening and weekend placements. Many social work agencies have students complete background checks, including formal background checks, law enforcement finger printing, driving records, and criminal record checks. In most instances, the expense for the background check is the responsibility of the student. We urge students to seek this information prior to entering the field experience if there is sensitive information that may prevent you from being accepted at an agency. Students must also report any background issues on field application so that an appropriate placement can be made. The UCF School of Social Work cannot guarantee a field placement or subsequent degree completion for students who do not pass background checks. Generalist Field Education and Seminars (6 credit hours) Clinical field Education and Seminars (8 credit hours)

Grand Total Credits: 62

Track Details

Students in the 62-hour program must include at least 31 hours of course work at the 6000 level in their program of study.

Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

Required Sequence of Curriculum

*The Online MSW is primarily an asynchronous program, which means that our courses are generally not held during a fixed meeting time. However, there are some courses where synchronous, or "live" sessions are a required component of the course assignments. Because an MSW is a professional degree that allows students to engage directly with clients, synchronous sessions are put in place to support student’s skills and evaluation in this area.
Some of the courses that may have required live components as a part of an assignment include, but are not limited to SOW 5306 Social Work Practice II, SOW 6324 Clinical Social Work Practice with Groups, and SOW 6433 Clinical Evaluation in Social Work Practice. Dates and times of live sessions will be announced before the course begins, or in some courses, multiple options are provided.

+Depending on the term in which you enter the Online MSW, your final year of the program may show classes in a different sequence. A Plan of Study will be provided to you prior to the beginning of classes with the correct sequence for your cohort.

**First Semester**
- Term 1.1 - SOW 5107 - Human Behavior in the Social Environment [3 Credit Hours]
- Term 1.2 - SOW 5132 - Diverse Client Populations [3 Credit Hours]

**Second Semester**
- Term 2.1 - SOW 5235 - Social Welfare Policies and Services [3 Credit Hours]
- Term 2.2 - SOW 5404 - Social Work Research [3 Credit Hours]

**Third Semester**
- Term 3.1 - SOW 5305 - Social Work Practice I: Generalist Practice [3 Credit Hours]
- Clinical Elective - Term 3.2

**Fourth Semester**
- Term 4.1 - SOW 5306 - Social Work Practice II: Intervention Approaches [3 Credit Hours]
- Term 4.2 - SOW 6433 - Clinical Evaluation in Social Work Practice [3 Credit Hours]
- SOW 5565 - Part-Time MSW Generalist Field Integrative Seminar I 1 Credit Hours
- SOW 5940 - Generalist Field Education VAR Credit Hours
  Take 1 credit hour

**Fifth Semester**
- Term 5.1 Clinical Elective
- SOW 5217 - Foundations of Behavioral Health Policy and Social Work Practice [3 Credit Hours]
- SOW 5566 - Part-Time MSW Generalist Field Integrative Seminar II 1 Credit Hours
- SOW 5940 - Generalist Field Education VAR Credit Hours
  Take 1 credit hour

**Sixth Semester**
- Term 6.1 - SOW 6123 - Psychosocial Pathology [3 Credit Hours]
- Term 6.2 - SOW 6424 - Theories for Evidence-Based Clinical Practice in Social Work [3 Credit Hours]
- SOW 5567 - Part-Time MSW Generalist Field Integrative Seminar III 1 Credit Hours
- SOW 5940 - Generalist Field Education VAR Credit Hours
  Take 1 credit hour

**Seventh Semester+**
- Term 7.1 - SOW 6348 - Clinical Practice with Individuals [3 Credit Hours]
- Term 7.2 - SOW 6612 - Clinical Practice with Families [3 Credit Hours]
- SOW 6561 - Part-Time MSW Clinical Field Integrative Seminar I 2 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours

**Eighth Semester+**
- Term 8.1 - SOW 6324 - Clinical Practice with Groups [3 Credit Hours]
- Term 8.2 Clinical Elective
- SOW 6562 - Part Time MSW Clinical Field Integrative Seminar II 1 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours

**Ninth Semester+**
- SOW 6563 - Part-Time MSW Clinical Field Integrative Seminar III 1 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours

**Transfer Credit**
Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Due to the cohort nature of the track and university policy, transfer credits will not be considered for the market-based, fully online part-time MSW track.

**Cost Per Credit Hour**
For the Online Part-Time Social Work track in the Social Work MSW program, the cost per credit hour is $487.45.*

2021-2022 Graduate Catalog
Tuition waivers are not accepted for the Online MSW.

Independent Learning

Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students. The field experiences and practice electives provide substantial opportunities for students to learn independently and practically about social work practice.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Social-Work-MSW.pdf
**Track Description**

The Master of Social Work (MSW) Program, Part-Time Advanced Standing Track allows students with baccalaureate degrees in Social Work from a CSWE-accredited school/program who demonstrate academic potential and professional maturity to complete the MSW degree at the main campus in four semesters of graduate study.

To be considered for advanced standing admission, the bachelor's degree must have been completed within six years of the time of initial enrollment in the master's program. The Part-Time Advanced Standing Track is offered at the main campus and may be completed in four semesters (summer, fall, spring, and summer).

The MSW program strives to provide students with the education needed to become successful practitioners in the field of clinical social work. The National Association of Social Workers (NASW) Code of Ethics is enforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

The 32-hour MSW program is composed of 18 credit hours of required core and advanced clinical specialization courses. In addition, students complete 6 credit hours of electives and 8 credit hours of field experience. Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students.

**Total Credit Hours Required: 32 Credit Hours Minimum beyond the Bachelor's Degree**

**Track Prerequisites**

The Council on Social Work Education (CSWE) require that all applicants have an undergraduate degree from an accredited institution. The School of Social Work requires that applicants have successfully completed (with a grade of C or higher) at least one course in each of the following categories:

- **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion);
- **Physical and Biological sciences** (examples: biology, chemistry, anatomy, or physiology)
- **Mathematics** (examples: calculus, college algebra, computer science, or statistics);
- **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants will be granted admission to the MSW program based on a majority approval from the Admissions Review Sub-committee.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- **One official transcript** (in a sealed envelope) from each college/university attended.
- **Successful completion** (with a grade of C or higher) at least one course in each of the following categories:
  - **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion);
  - **Physical and Biological Sciences** (examples: biology, chemistry, anatomy, or physiology)
  - **Mathematics** (examples: calculus, college algebra, computer science, or statistics);
  - **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)
- **Up-to-date résumé**
- **Video Essay**
- **Three letters of recommendation** that must have been written within the last academic year. Letters from co-workers, colleagues, mentors, friends, family members, clergy, etc. WILL NOT be considered. Please submit your application even if you do not have your letters of recommendation. These letters can be attached to your application once they have been received, but they still must be submitted by the application deadline. Applicants must provide a letter of recommendation from each of the following:
  - **Academic**: A professor from a previously attended college/university who taught you in a course. Letters from Field Seminar Instructors are NOT accepted as an academic letter. Recommendations from full-time faculty are strongly encouraged. For applicants who have been out of college for five or more years, the applicant may substitute an employment-based recommendation. Letters from advisors will not be considered unless indicated that they also taught you as a student. Letters from Teacher Assistants are NOT accepted.
  - **Field**: An agency field task supervisor who has directly supervised the applicant in a social work field internship setting.
  - **Employment**: Either volunteer or paid employment immediate supervisor.
- **A Professional Statement**: Applicants must answer the following questions within 3-6 pages. Please use headings for each question.
  - Without disclosing personal information, what are the reasons and experiences that led you to choose social work as a profession?
  - What are your social work career interests?
  - What are your personal strengths that you can bring to this profession? How have these strengths been demonstrated in the past?
  - Where do you see yourself 10 years from now in the field of social work?
  - What major social issue do you think that professional social workers should be concerned with? What is the role of social work in relation to this issue?
  - As a social worker, you will be expected to practice ethically according to the National Association of Social Workers...
NASW) Code of Ethics. This includes working with diverse populations and clients whose values and beliefs may differ from your own. How will you incorporate and uphold the NASW Code of Ethics into your work with diverse populations?

- The MSW program requires students to complete a clinical (600 hours) internship concurrent with their coursework. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Given the above considerations, please tell us how you plan to balance your internship hours with your coursework and personal obligations. Tell us about any challenges you may have and how you plan to overcome them.

- **Writing Sample**: Applicants must submit an individually-authored research paper or literature review written for any class in their undergraduate studies, preferably one that is related to social work. **Group papers will not be accepted. The paper should be 5-10 pages in length, contain citations, and a reference list in APA format**, and will be used to evaluate the applicant's ability to write professionally. The applicant must be the sole author of this paper. Submissions of papers where the applicant is co-author will not be considered. Interviews, book reviews, movie reviews, case notes, client assessments, policy analysis papers, and case studies will NOT be considered. If the applicant does not have an academic paper, then he/she must write a 5-10 page paper in APA format that addresses any social issue related to social work.

- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

**Please note**: The MSW program only accepts one application from each prospective student per academic year (Fall, Spring, Summer). Applicants must choose to apply to one track and one semester only.

The Master of Social Work program can accommodate only a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met.

Students are admitted and can begin coursework in summer semesters only.

To be retained in the program, a student must attend the mandatory MSW Program Orientation that takes place the week before summer classes start. Students who fail to attend this orientation will have their offer of admission rescinded.

To be accepted into and retained in the program, students are expected to demonstrate: initiative, dependability, social concern, self-awareness, appreciation for diversity in others, the ability to problem-solve, ease in relating with others, skill in writing and speaking, and professional ethics.

Students enrolled must perform certain essential functions in order to participate in and complete program requirements. These essential functions can be found in the MSW Handbook and define the minimal professional, cognitive, and behavioral abilities required for successful program completion as well as entry-level clinical social work practice. Students admitted into the MSW Program will sign an acknowledgment that they understand they must adhere to these functions in order to be in good standing and remain in the MSW Program.

**Students unable to meet the Essential Functions requirement will have their offer of admission rescinded.**

The School of Social Work reserves the right to refuse student entrance or dismiss a student after admission to the MSW program if, in the judgment of the faculty, the student demonstrates behavior incompatible with working in the field of social work and/or violates the National Association of Social Workers (NASW) Code of Ethics.

**Advanced Standing**

To be considered for advanced standing admission, applicants must have a baccalaureate degree in Social Work from a CSWE-accredited program and demonstrate the academic potential and professional maturity to meet the demands of the program with a 3.3 GPA in their last 60 credits. Previous baccalaureate course work that received at least a "B-" will be reviewed to ensure content equivalency. In advanced standing admission, a maximum of 30 foundation level credits may be waived based on the content equivalency to meet foundation year MSW requirements, which consist of courses in human behavior and the social environment, policy, research, social work practice, and social work field placement.

To be considered for advanced standing admission, the bachelor's degree must have been completed within six years of the time of initial enrollment in the master's program.

  - SOW6727 - Core Concepts of Child and Adolescent Trauma (3)
  - SOW6735 - Documentation Skills for Helping Professionals (3)
  - SOW6756 - Forensic Social Work (3)
  - SOW6806 - Behavioral Health Skills for Clinical Social Workers (3)
  - SOW6846 - Spirituality in Clinical Social Work Practice (3)

Field Experience
8 Total Credits

- Earn at least 8 credits from the following types of courses:
  Clinical Field Education and Integrative Seminars 8 Credit Hours Field instruction is an integral part of graduate social work education. It provides the student with an opportunity to test classroom knowledge as well as to develop and refine foundation and advanced practice skills. Decisions regarding field assignment are determined by the Field Director. Only agency sites approved by the School of Social Work may be used for field instruction. Clinical MSW students complete a minimum of 600 clock hours in the field. Field education includes a field seminar. Students must complete at least 50% of their field hours during the agency's normal business hours. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Consequently, field placements cannot be guaranteed to students who require evening and weekend placements. Many social work agencies have students complete background checks, including formal background checks, law enforcement finger printing, driving records, and criminal record checks. In most instances, the expense for the background check is the responsibility of the student. We urge students to seek this information prior to entering the field experience if there is sensitive information that may prevent you from being accepted at an agency. Students must also report any background issues on field application so that an appropriate placement can be made. The UCF School of Social Work cannot guarantee a field placement or subsequent degree completion for students who do not pass background checks.

Grand Total Credits: 32
Track Details

The MSW Advanced Standing track allows no more than one C grade or 3 credit hours (whichever is greater) to be used toward the degree requirements. Exceeding three credit hours or one C grade is grounds for dismissal from the MSW Advanced Standing track.

Previous baccalaureate coursework that received at least a "B-" will be reviewed to ensure content equivalency. In advanced standing admission, a maximum of 30 foundation-level credits may be waived based on the content equivalency to meet foundation year MSW requirements, which consist of courses in human behavior and the social environment, policy, research, social work practice, and social work field placement.

Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

Required Sequence of Curriculum

First Semester (Summer)
- SOW 6123 - Psychosocial Pathology 3 Credit Hours
- SOW 6424 - Theories for Evidence-Based Clinical Practice in Social Work 3 Credit Hours

Second Semester (Fall)
- SOW 6348 - Clinical Practice with Individuals 3 Credit Hours
- SOW 6612 - Clinical Practice with Families 3 Credit Hours
- SOW 6561 - Part-Time MSW Clinical Field Integrative Seminar I 2 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours
  Take 2 credit hours

Third Semester (Spring)
- SOW 6433 - Clinical Evaluation in Social Work Practice 3 Credit Hours
- SOW 6562 - Part Time MSW Clinical Field Integrative Seminar II 1 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours
  Take 1 credit hour
- SOW 6XXX Clinical Elective

Fourth Semester (Summer)
- SOW 6324 - Clinical Practice with Groups 3 Credit Hours
- SOW 6563 - Part-Time MSW Clinical Field Integrative Seminar III 1 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours
  Take 1 credit hour
- SOW 6XXX Clinical Elective

Transfer Credit

Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Students who have completed coursework in an accredited MSW program may transfer up to 9 credit hours of non-field coursework toward the 32 credit hours of the degree. Students must have received a grade of "B-" or higher in these courses. Courses will be evaluated on a course-by-course basis by the MSW Director. Field classes are not eligible for transfer. Students seeking to transfer to the School of Social Work from another CSWE accredited social work program are required to meet the criteria for admission and follow the application procedures. Additionally, one of the academic references must be from the MSW Program Coordinator or academic adviser in the program from which the applicant is transferring and must address the academic standing in that program. If not currently enrolled, the reference must be from the former MSW Program Director or academic adviser. Syllabi are required for any social work classes being considered for transfer credit.

As per university policy, transfer credits will not be considered for the market based fully online part time track.

Equipment Fee

Full-time students in the MSW program pay a $35 equipment fee each semester that they are enrolled.

Independent Learning

Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students. The field experiences and practice electives provide substantial opportunities for students to learn independently and practically about social work practice.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Social-Work-MSW.pdf.
Track Description

The Master of Social Work (MSW) Program, Part-Time Traditional Track allows students who do not have a BSW degree to complete the MSW required curriculum at the main campus.

The first year of study in the Master of Social Work (MSW) Program, Part-Time Traditional Track includes 18 credit hours in classwork. The second year of study includes 18 credit hours in classwork and 6 credit hours in the field. The third year of study includes 12 credit hours in classwork and 8 credit hours in the field.

The MSW program strives to provide students with the education needed to become successful practitioners in the field of clinical social work. The National Association of Social Workers (NASW) Code of Ethics is enforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

The 62-hour MSW program is composed of 39 credit hours of required core and advanced clinical specialization courses. In addition, students complete 9 credit hours of electives and 14 credit hours of field experience. Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students.

Total Credit Hours Required: 62 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

The Council on Social Work Education (CSWE) require that all applicants have an undergraduate degree from an accredited institution. The School of Social Work requires that applicants have successfully completed (with a grade of C or higher) at least one course in each of the following categories:

- Humanities (examples: fine arts, history, languages, literature, philosophy, or religion)
- Physical and Biological sciences (examples: biology, chemistry, anatomy, or physiology)
- Mathematics (examples: calculus, college algebra, computer science, or statistics)
- Social Sciences (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants will be granted admission to the MSW program based on a majority approval from the Admissions Review Sub-committee.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Successful completion (with a grade of C or higher) at least one course in each of the following categories:
  - Humanities (examples: fine arts, history, languages, literature, philosophy, or religion)
  - Physical and Biological sciences (examples: biology, chemistry, anatomy, or physiology)
  - Mathematics (examples: calculus, college algebra, computer science, or statistics)
  - Social Sciences (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)
- The GRE is not required for admission to this program.
- Up-to-date résumé
- Video Essay
- Three letters of recommendation that must have been written within the last academic year. Letters from co-workers, colleagues, mentors, friends, family members, clergy, etc. WILL NOT be considered. Please submit your application even if you do not have your letters of recommendation. These letters can be attached to your application once they have been received, but they still must be submitted by the application deadline. Applicants must provide a letter of recommendation from each of the following:
  - Academic: A professor from a previously attended college/university who taught you in a course. Letters from Field Seminar Instructors are NOT accepted as an academic letter. Recommendations from full-time faculty are strongly encouraged. For applicants who have been out of college for five or more years, the applicant may substitute an employment-based recommendation. Letters from advisors will not be considered unless indicated that they also taught you as a student. Letters from Teacher Assistants are NOT accepted.
  - Employment: Either volunteer or paid employment immediate supervisor.
  - Third recommendation: A second academic or employment-based recommendation should be submitted for the third recommendation.
- A Professional Statement: Applicants must answer the following questions within 3-6 pages. Please use headings for each question.
  - Without disclosing personal information, what are the reasons and experiences that led you to choose social work as a profession?
  - What are your social work career interests?
  - What are your personal strengths that you can bring to this profession? How have these strengths been demonstrated in the past?
  - Where do you see yourself 10 years from now in the field of social work?
  - What major social issue do you think that professional social workers should be concerned with? What is the role of social work in relation to this issue?
  - As a social worker, you will be expected to practice ethically according to the National Association of Social Workers (NASW) Code of Ethics. This includes working with diverse populations and clients whose values and beliefs may differ
from your own. How will you incorporate and uphold the NASW Code of Ethics into your work with diverse populations?

- The MSW program requires students to complete a clinical (600 hours) internship concurrent with their coursework. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Given the above considerations, please tell us how you plan to balance your internship hours with your coursework and personal obligations. Tell us about any challenges you may have and how you plan to overcome them.

- **Writing Sample**: Applicants must submit an individually-authored research paper or literature review written for any class in their undergraduate studies, preferably one that is related to social work. **Group papers will not be accepted. The paper should be 5-10 pages in length, contain citations, and a reference list in APA format,** and will be used to evaluate the applicant's ability to write professionally. The applicant must be the sole author of this paper. Submissions of papers where the applicant is co-author will not be considered. Interviews, book reviews, movie reviews, case notes, client assessments, policy analysis papers, and case studies will NOT be considered. If the applicant does not have an academic paper, then he/she must write a 5-10 page paper in APA format that addresses any social issue related to social work.

- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

**Please note:** The MSW program only accepts one application from each prospective student per academic year. Applicants must choose to apply to one track and one semester only.

The Master of Social Work program can accommodate only a limited number of students; therefore, there is a possibility of being denied admission even when all criteria are met.

Students admitted will begin coursework in the fall semester only.

To be retained in the program, students must attend the mandatory MSW Program Orientation that takes place the week before fall classes start. Students who fail to attend this orientation will have their offer of admission rescinded.

To be accepted into and retained in the program, students are expected to demonstrate: initiative, dependability, social concern, self-awareness, appreciation for diversity in others, the ability to problem-solve, ease in relating with others, skill in writing and speaking, and professional ethics.

Students enrolled must perform certain essential functions in order to participate in and complete program requirements. These essential functions can be found in the MSW Handbook—which students must read prior to beginning their plan of study. These essential functions define the minimal professional, cognitive, and behavioral abilities required for successful program completion, as well as entry-level clinical social work practice. Students admitted into the MSW Program will sign an acknowledgment that they understand they must adhere to these functions in order to be in good standing and remain in the MSW Program.

**Students unable to meet the Essential Functions requirement will have their offer of admission rescinded.**

The School of Social Work reserves the right to refuse student entrance or dismiss a student after admission to the MSW program if, in the judgment of the faculty, the student demonstrates behavior incompatible with working in the field of social work and/or violates the National Association of Social Workers (NASW) Code of Ethics.

MSW graduates from CSWE accredited programs outside of UCF who need to complete a field placement for Florida licensure (LCSW) must apply to the MSW program as a full-time or part-time second-year clinical student.

Degree Requirements

Core
21 Total Credits

- Complete the following:
  - SOW5107 - Human Behavior in the Social Environment (3)
  - SOW5217 - Foundations of Behavioral Health Policy and Social Work Practice (3)
  - SOW5132 - Diverse Client Populations (3)
  - SOW5235 - Social Welfare Policies and Services (3)
  - SOW5305 - Social Work Practice I: Generalist Practice (3)
  - SOW5306 - Social Work Practice II: Intervention Approaches (3)
  - SOW5404 - Social Work Research (3)

Clinical Specialization
18 Total Credits

- Complete the following:
  - SOW6123 - Psychosocial Pathology (3)
  - SOW6324 - Clinical Practice with Groups (3)
  - SOW6324 - Clinical Practice with Groups (3)
  - SOW6612 - Clinical Practice with Families (3)
  - SOW6424 - Theories for Evidence-Based Clinical Practice in Social Work (3)
  - SOW6433 - Clinical Evaluation in Social Work Practice (3)

Electives
9 Total Credits

- Complete 1 of the following
  - One elective is required as a component of the foundation curriculum and two clinical electives are required as components of the clinical specialization. Students may choose to take clinical electives for all three required MSW electives. Clinical elective 3 Credit Hours Clinical elective 3 Credit Hours Practice/ Non-Clinical or Clinical elective 3 Credit Hours
    - All Clinical Elective Option
- Complete at least 3 of the following:
  - SOW6149 - Military Culture and Social Work Practice (3)
  - SOW6109 - Violence Against Women: A Global Perspective (3)
  - SOW6149 - Military Culture and Social Work Practice (3)
  - SOW6603 - Social Work in Health Settings (3)
  - SOW6604 - Medications in Social Work Practice (3)
  - SOW6608 - Understanding and Managing Combat Related Behavioral and Mental Health Disorders (3)
  - SOW6610 - Clinical Practice with Military and Veteran Families or Groups (3)
  - SOW6635 - Social Work Practice in Schools (3)
  - SOW6644 - Interventions with Older Adults and Their Families (3)
  - SOW6652 - Child Welfare Services (3)
  - SOW6655 - Child Abuse: Treatment and Prevention (3)
  - SOW6670 - Clinical Social Work Practice with LGBTQ+ (3)
  - SOW6712 - Clinical Social Work Practice with Substance Addictions (3)
  - SOW6713 - Prevention and Treatment of Adolescent Substance Use and Misuse (3)
  - SOW6726 - Social Work Practice with Children from Birth to Age Five and their Families (3)
  - SOW6727 - Core Concepts of Child and Adolescent Trauma (3)
  - SOW6735 - Documentation Skills for Helping Professionals (3)
  - SOW6756 - Forensic Social Work (3)
  - SOW6806 - Behavioral Health Skills for Clinical Social Workers (3)

2021-2022 Graduate Catalog
- SOW6846 - Spirituality in Clinical Social Work Practice (3)

Practice/ Non-Clinical and Clinical Elective Option

Complete all of the following:

- Complete the following:
  - SOW6383 - Social Work Administration (3)
  - Earn at least 6 credits from the following types of courses:
    - Clinical Elective Courses listed above

Field Experience

14 Total Credits

- Earn at least 14 credits from the following types of courses:
  - Generalist Field Education and Integrative Seminars 6 Credit Hours
  - Clinical Field Education and Integrative Seminars 8 Credit Hours

Field instruction is an integral part of graduate social work education. It provides the student with an opportunity to test classroom knowledge as well as to develop and refine foundation and advanced practice skills. Decisions regarding field assignment are determined by the Field Director. Only agency sites approved by the School of Social Work may be used for field instruction. Generalist MSW students complete a minimum of 400 hours in the field; clinical MSW students complete a minimum of 600 clock hours in the field. Field education includes a field seminar. Students must complete at least 50% of their field hours during the agency's normal business hours. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Consequently, field placements cannot be guaranteed to students who require evening and weekend placements. Many social work agencies have students complete background checks, including formal background checks, law enforcement fingerprinting, driving records, and criminal record checks. In most instances, the expense for the background check is the responsibility of the student. We urge students to seek this information prior to entering the field experience if there is sensitive information that may prevent you from being accepted at an agency. Students must also report any background issues on field application so that an appropriate placement can be made. The UCF School of Social Work cannot guarantee a field placement or subsequent degree completion for students who do not pass background checks.

Grand Total Credits: 62

Track Details

Students in the 62-hour program must include at least 31 hours of course work at the 6000 level in their program of study.

Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE. Required Sequence of Curriculum

First Semester (Fall)

- SOW 5107 - Human Behavior in the Social Environment 3 Credit Hours
- SOW 5132 - Diverse Client Populations 3 Credit Hours

Second Semester (Spring)

- SOW 5404 - Social Work Research 3 Credit Hours
- SOW 5217 - Foundations of Behavioral Health Policy and Social Work Practice 3 Credit Hours

Third Semester (Summer)

- SOW 5305 - Social Work Practice I: Generalist Practice 3 Credit Hours
- SOW Elective (Clinical or Non-Clinical)

Fourth Semester (Fall)

- SOW 5306 - Social Work Practice II: Intervention Approaches 3 Credit Hours
- SOW 5235 - Social Welfare Policies and Services 3 Credit Hours
- SOW 5565 - Part-Time MSW Generalist Field Integrative Seminar I 1 Credit Hours

Ninth Semester (Summer)
- SOW 6324 - Clinical Practice with Groups 3 Credit Hours
- SOW 6563 - Part-Time MSW Clinical Field Integrative Seminar III 1 Credit Hours
- SOW 6940 - Clinical Field Education VAR Credit Hours
  
  Take 1 credit hour

Transfer Credit

Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Transfer credits will be evaluated on a case by case basis by the MSW Program Director. Students must submit syllabi and have earned a grade of "B-" or better in these courses in order for them to be evaluated for transfer credit.

Field courses taken elsewhere cannot be transferred toward satisfying the field component of the degree.

Students seeking to transfer to the School of Social Work from another CSWE accredited social work program are required to meet the criteria for admission and follow the application procedures. Additionally, one of the academic references must be from the MSW Program Coordinator or academic adviser in the program from which the applicant is transferring and must address the academic standing in that program. If not currently enrolled, the reference must be from the former MSW Program Director or academic adviser.

Equipment Fee

Full-time students in the MSW program pay a $35 equipment fee each semester that they are enrolled.

Independent Learning

Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students.

The field experiences and practice electives provide substantial opportunities for students to learn independently and practically about social work practice.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

No

Program Description
The Master of Science in Biomedical Sciences program is a nonthesis program for students who wish to further their knowledge in the field and prepare for professional careers in medical fields, higher education, and research. Students interested in research and thesis work should apply to the Master of Science in Biotechnology program.

This degree has 5 tracks: Cancer Biology Track, Infectious Disease Track, Integrated Medical Sciences Track, Metabolic and Cardiovascular Sciences Track, and Neuroscience Track. Please scroll to the bottom of this page for further details on these Tracks.

While many students discover that they have interests in varied disciplines at the University of Central Florida, they are not permitted to pursue two majors within the College of Medicine. College of Medicine students may declare a major and a minor within the college, or pursue a second major or minor in another academic college at UCF. Students are encouraged to meet with an academic advisor to discuss these opportunities.

Program Prerequisites
A bachelor's degree in Biological Sciences or related area.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biological Sciences or related area.
- Official, competitive GRE score (taken within the last five years) or MCAT score (taken within the last three years).
- Three letters of recommendation.
- A written statement of research experience, area of interest, and immediate and long-range goals.
- Resume or CV.

Personal interviews are helpful but not required. Applicants who do not have a competitive GPA or GRE/MCAT may occasionally be accepted if there is other convincing evidence of potential for high achievement and success.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

Degree Requirements

Required Courses
18 Total Credits

- Complete all of the following
  - Complete the following:
    - ZOO6737 - Clinically Oriented Human Anatomy (4)
    - MCB6226 - Molecular Diagnostics (3)
    - PCB6595 - Regulation of Gene Expression (3)
    - PHIS634 - Medical Ethics (3)
  - Complete at least 1 of the following:
    - BSC6407C - Laboratory Methods in Molecular Biology (3)

2021-2022 Graduate Catalog
BSC5418 - Tissue Engineering (3)

- Complete 1 of the following
  - Earn at least 2 credits from the following types of courses:
    - MCB 6938 - Seminar 1 Credit Hour (to be repeated)
  - Earn at least 2 credits from the following types of courses:
    - MCB 6938 - Seminar 1 Credit Hour
    - MCB 6314 - Industrial Perspectives Seminar 1 Credit Hours

Elective Courses
12 Total Credits

- Complete all of the following
  - Biomedical Specialization
    - Complete all of the following
      - Earn at least 6 credits from the following:
        - BSC5418 - Tissue Engineering (3)
        - MCB6226 - Molecular Diagnostics (3)
        - PCB5238 - Immunobiology (3)
        - PCB5236 - Cancer Biology (3)
        - PCB5275 - Signal Transduction Mechanics (3)
        - PCB5527 - Genetic Engineering and Biotechnology (3)
        - PCB5709C - Laboratory Virtual Simulations in Physiology (3)
        - PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism (3)
        - PCB5834C - Advanced Human Physiology (4)
        - IDS5127 - Foundation of Bio-Imaging Science (3)
        - PCB5265 - Stem Cell Biology (3)
        - GEB5516 - Technological Entrepreneurship (3)

- Others: If approved by Graduate Committee

Microbiology Specialization

- Complete all of the following
  - Earn at least 6 credits from the following:
    - MCB5205 - Infectious Processes (3)
    - MCB5505 - Molecular Virology (3)
    - MCB5208 - Cellular Microbiology: Host-Pathogen Interactions (3)
    - MCB6417C - Microbial Metabolism (3)
    - MCB5932 - Current Topics in Molecular Biology (1 - 99)
    - MCB5415 - Cellular Metabolism (3)
    - MCB5209 - Microbial Stress Response (3)
    - PCB6595 - Regulation of Gene Expression (3)
    - PCB5235 - Molecular Immunology (3)

- Others: If approved by Graduate Committee

Capstone
3 Total Credits

- Complete all of the following
  - Complete the following:
    - MCB6026 - Molecular Biology and Microbiology Capstone (3)

- An in-depth current literature research report on a relevant subject will be required for each student. The student will select a faculty adviser to chair a faculty committee of two members for the evaluation of the report. An oral presentation on the written capstone report will be used as a final examination.

Capstone Process

- Students are encouraged to contact faculty as early as possible to identify a faculty whose research focus complements the student's interest. The student and the mentor should select one additional faculty members to serve on the capstone evaluation committee. Students must submit a signed Capstone Committee and Capstone Topic form to the Program Coordinator for approval as soon as the registration for the course is complete. These forms must be submitted to the Program Office. When the student is ready to defend the Capstone project, the student must register for the capstone course (MCB 6026) for three credit hours. It is important that the student register for the capstone course with the intention of completing the project at the end of the semester.

Capstone Report

- Evaluation of the capstone project requires a written report (in the format of a mini-review manuscript) and a presentation (project defense) in front of the capstone committee. Students may ask for advice and guidance from the project mentor/chair. The average capstone report ranges from 10 to 15 single-spaced pages in a manuscript format with proper citations. The student's Committee Chair will be responsible for checking the report for plagiarism using iThenticate before the report is shared with the committee. The committee must receive the report at least one week before the time of presentation.

Capstone Defense

- Note: The defense (presentation) must be held no later than one week before the final exam week. The capstone defense and comprehensive exam evaluation is designed to assess the student's knowledge and understanding of the project and other relevant subjects in the field. Questions asked by the capstone committee to evaluate the student as competent in the field will satisfy the requirement of the comprehensive exam. The oral presentation will take place in the form of a 30-40 minute seminar and will be followed by questions and discussion. The student will be evaluated.
on performance in all three sections (written report, oral presentation, and ability to answer questions). Should the student fail, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in an Unsatisfactory (U) grade in the course and dismissal from the program.

Comprehensive Exam
0 Total Credits
- Students must pass an oral comprehensive exam to qualify for the Master of Science. The oral comprehensive exam tests the student’s understanding of the basic concepts in the field and relevant applications. The comprehensive exam will be conducted during the capstone defense and will be administered by the capstone committee. Should the student fail this exam, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in dismissal from the program.

Teaching Requirement
0 Total Credits
- Students without significant prior teaching experience, such as but not limited to, a minimum of a year in secondary schools or colleges, are required to serve as Classroom Laboratory Teaching Assistants for a minimum of one semester (one semester in at least one lab section).

Research Shadowing (Optional)
0 Total Credits
- Students are encouraged to discuss with their capstone mentor the possibility of joining the lab for research shadowing of other graduate students. Acquired lab skills should assist students with the capstone project and with future endeavors.

Independent Learning
0 Total Credits
- In the final semester of study, nonthesis students will complete a capstone course that requires an in-depth current literature research report on a relevant subject, which will serve as the independent learning experience. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

Grand Total Credits: 33

Financial Information
Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Nonthesis students are not considered for departmental graduate assistantships or tuition assistance.

UCF Student Financial Assistance
Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241
finaid@ucf.edu

Fellowship Information
Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student’s graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Is this track available 100% online?**
No

**Track Description**
The Cancer Biology Track in the Master of Science in Biomedical Sciences Program is a nonthesis plan of study for students who want to further their knowledge in the cancer biology field and who may pursue doctoral training or professional education focused on medicine and cancer biology. Students interested in research and thesis work should apply to the Master of Science in Biotechnology Program.

**Track Prerequisites**
A bachelor's degree in Biological Sciences or related area.
Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

**Application Requirements**
For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biological Sciences or related area.
- Official, competitive GRE score (taken within the last five years) or MCAT score (taken within the last three years).
- Three letters of recommendation.
- A written statement of research experience, area of interest, and immediate and long-range goals.
- Resume or CV.

Personal interviews are helpful but not required. Applicants who do not have a competitive GPA or GRE/MCAT may occasionally be accepted if there is other convincing evidence of potential for high achievement and success.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Degree Requirements

Required Courses
18 Total Credits

- Complete all of the following
  - Complete the following:
    - BMS6001 - Cellular Function and Medical Genetics (5)
    - BMS6006 - Health and Disease (5)
  - Student take one of the following three options
    - Complete 1 of the following
      Option 1
      - Complete all of the following
        - Complete the following:
          - PCB5834C - Advanced Human Physiology (4)
          - PCB5709C - Laboratory Virtual Simulations in Physiology (3)
          - Earn at least 1 credits from the following types of courses:
MCB 6938 - Seminar 1 Credit Hour or IDS 7680 - Seminar 1 Credit Hour

Option 2
- Complete all of the following
  - Complete the following:
    - PHT6115C - Gross Anatomy/Neuroscience I (6)
  - Earn at least 2 credits from the following types of courses:
    - MCB 6938 - Seminar 1 Credit Hour (can be repeated by all students) or IDS 7680 - Seminar 1 Credit Hour (can be repeated by all students)

Option 3
- Complete all of the following
  - Complete the following:
    - BSC5665 - Clinical Embryology and Congenital Malformations (3)
    - ZOO5758C - Vertebrate Histology (4)
  - Earn at least 1 credits from the following types of courses:
    - MCB 6938 - Seminar 1 Credit Hour or IDS 7680 - Seminar 1 Credit Hour

Elective Courses
12 Total Credits

- Complete all of the following
  - Biomedical Specialization
    - Earn at least 6 credits from the following:
      - MCB5225 - Molecular Biology of Disease (3)
      - MCB6226 - Molecular Diagnostics (3)
      - PCB5238 - Immunobiology (3)
      - PCB5238 - Immunobiology (3)
      - PCB5265 - Stem Cell Biology (3)
      - PCB5275 - Signal Transduction Mechanics (3)
      - PCB5527 - Genetic Engineering and Biotechnology (3)
      - PCB5709C - Laboratory Virtual Simulations in Physiology (3)
      - PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism (3)
      - PCB5834C - Advanced Human Physiology (4)
      - IDS5127 - Foundation of Bio-Imaging Science (3)
      - BSC5418 - Tissue Engineering (3)
      - GEB5516 - Technological Entrepreneurship (3)
      - ZOO5748C - Clinical Neuroanatomy (5)
      - ZOO5749C - Clinical Neuroscience (5)
    - Other courses may be substituted with approval by the graduate committee.
  - Microbiology Specialization
    - Earn at least 6 credits from the following:
      - MCB5205 - Infectious Processes (3)
      - MCB5505 - Molecular Virology (3)
      - MCB5208 - Cellular Microbiology: Host-Pathogen Interactions (3)
      - Course Not Found
      - MCB517C - Microbial Metabolism (3)
      - MCB5932 - Current Topics in Molecular Biology (1 - 99)
      - MCB5415 - Cellular Metabolism (3)
      - MCB5209 - Microbial Stress Response (3)
      - PCB5235 - Molecular Immunology (3)
    - Other courses may be substituted with approval by the graduate committee.

Capstone
3 Total Credits

- Complete all of the following
  - MCB6026 - Molecular Biology and Microbiology Capstone (3)
  - The Capstone Project for the IMS Track is customizable based on student needs. Options include the following:
    - Scholarly in-depth literature review in biomedical and/or clinical sciences (report required) Physician-Shadowing Experience (report required) Service-Learning/Volunteer Work Experience (report required) Laboratory Research (report required) Other (must be pre-approved by the program coordinator/director) (report required)
  - The Capstone Process
    - Students are encouraged to contact faculty as early as possible to identify a faculty whose research focus complements the student’s interest. The student and the mentor should select one additional faculty member to serve on the capstone evaluation committee. Students must submit a signed Capstone Committee and Capstone Topic form to the Program Coordinator for approval as soon as the registration for the course is complete. These forms must be submitted to the Program Office. When the student is ready to defend the Capstone project the student must register for the capstone course (MCB 6026) for three credit hours. It is important that the student register for the capstone course with the intention of completing the project at the end of the semester.
The Capstone Report

- Evaluation of the capstone project requires a written report (in the format of a mini-review manuscript) and a presentation (project defense) in front of the capstone committee. Students may ask for advice and guidance from the project mentor/chair. The average capstone report ranges from 10 to 15 single-spaced pages in a manuscript format with proper citations. The student's Committee Chair will be responsible for checking the report for plagiarism using iThenticate before the report is shared with the committee. The committee must receive the report at least one week before the time of presentation.

The Capstone Defense

- Note: The defense (presentation) must be held no later than one week before the final exam week. The capstone defense and comprehensive exam evaluation is designed to assess the student's knowledge and understanding of the project and other relevant subjects in the field. Questions asked by the capstone committee to evaluate the student as competent in the field will satisfy the requirement of the comprehensive exam. The oral presentation will take place in the form of a 30-40 minute seminar and will be followed by questions and discussion. The student will be evaluated on performance in all three sections (written report, oral presentation, and ability to answer questions). Should the student fail, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in an Unsatisfactory (U) grade in the course and dismissal from the program.

Comprehensive Exam

0 Total Credits

- Students must pass an oral comprehensive exam to qualify for the Master of Science. The oral comprehensive exam tests the student's understanding of the basic concepts in the field and relevant applications. The comprehensive exam will be conducted during the capstone defense and will be administered by the capstone committee. Should the student fail this exam, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in dismissal from the program.

Teaching Requirement

0 Total Credits

- Students without significant prior teaching experience, such as, but not limited to, a minimum of a year in secondary schools or colleges, are required to serve as Classroom Laboratory Teaching Assistants for a minimum of one semester (one semester in at least one lab section).

Research Shadowing (Optional)

0 Total Credits

- Students are encouraged to discuss with their capstone mentor the possibility of joining the lab for research shadowing of other graduate students. Acquired lab skills should assist students with the capstone project and with future endeavors.

Independent Learning

0 Total Credits

- In the final semester of study, students will complete a capstone course that requires an in-depth current literature research report on a relevant subject, which will serve as the independent learning experience. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

Grand Total Credits: 33

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Nonthesis students are not considered for departmental graduate assistantships or tuition assistance.

UCF Student Financial Assistance

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Is this track available 100% online?

No

**Track Description**

The Metabolic and Cardiovascular Sciences Track in the Master of Science in Biomedical Sciences Program is a nonthesis plan of study for students who want to further their knowledge in the metabolic and cardiovascular sciences field and who may pursue doctoral training or professional education focused on medicine and metabolic and cardiovascular sciences. Students interested in research and thesis work should apply to the Master of Science in Biotechnology Program.

**Track Prerequisites**

A bachelor's degree in Biological Sciences or related area.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biological Sciences or related area.
- Official, competitive GRE score (taken within the last five years) or MCAT score (taken within the last three years).
- Three letters of recommendation.
- A written statement of research experience, area of interest, and immediate and long-range goals.
- Resume or CV.

Personal interviews are helpful but not required. Applicants who do not have a competitive GPA or GRE/MCAT may occasionally be accepted if there is other convincing evidence of potential for high achievement and success.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Program Description

The Biomedical Sciences PhD program is an interdisciplinary program that combines biological and physical science. This program is intended to educate students in independent research and team collaboration within the field.

Program Prerequisites

Applicants entering the program with regular status are expected to have completed course work required for a bachelor's degree in chemistry, cell biology, biochemistry, biophysics, genetics, molecular biology or microbiology.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants entering the program with regular status are expected to have completed course work required for a bachelor's degree in chemistry, cell biology, biochemistry, biophysics, genetics, molecular biology or microbiology.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Statement of research interest and purpose, including a summary of relevant work or research experience.
- Résumé or CV.
- A personal or telephone interview.

Admission is based on an overall assessment of the qualifications submitted and the interview. All admissions to graduate status are competitive and based on availability of faculty for sponsoring research.

Degree Requirements

Required Courses
23 Total Credits

- Complete all of the following
- Complete the following:
  - BSC6432 - Biomedical Sciences I (5)
  - BSC6433 - Biomedical Sciences II (5)
  - BSC6431 - Practice of Biomedical Sciences (3)
  - IDS6694 - Experimental Design and Analysis in Biomedical Sciences (2)
- Earn at least 4 credits from the following types of courses:
  - IDS 7690 - Frontiers in Biomedical Sciences 1 Credit Hours (four semesters, 1 credit hour each semester)
- Earn at least 4 credits from the following types of courses:
Elective Courses
12 Total Credits

- Complete all of the following
  - Earn at least 12 credits from the following:
    - BSC5418 - Tissue Engineering (3)
    - BSC5436 - Biomedical Informatics: Structure Analysis (3)
    - BSC6407C - Laboratory Methods in Molecular Biology (3)
    - CAP5510 - Bioinformatics (3)
    - CHM5305 - Bioconjugate Chemistry (3)
    - CHM5450 - Polymer Chemistry (3)
    - CHM5451C - Techniques in Polymer Science (3)
    - CHS6251 - Applied Organic Synthesis (3)
    - CHS6535 - Forensic Molecular Biology (3)
    - CHS6535L - Forensic Analysis of Biological Materials (3)
    - CHS6536 - Population Genetics and Genetic Data (3)
    - CHS6536C - Population Genetics and Genetic Data (3)
    - IDS5127 - Foundation of Bio-Imaging Science (3)
    - MCB5205 - Infectious Processes (3)
    - MCB5208 - Cellular Microbiology: Host-Pathogen Interactions (3)
    - MCB5209 - Microbial Stress Response (3)
    - MCB5225 - Molecular Biology of Disease (3)
    - MCB5505 - Molecular Virology (3)
    - MCB5722C - Methods in Biotechnology (4)
    - MCB5932 - Current Topics in Molecular Biology (1-99)
    - MCB5415 - Cellular Metabolism (3)
    - MCB6226C - Molecular Diagnostics (3)
    - MCB6417C - Microbial Metabolism (3)
    - PCB5025 - Molecular and Cellular Pharmacology (3)
    - PCB5235 - Molecular Immunology (3)
    - PCB5236 - Cancer Biology (3)
    - PCB5238 - Immunobiology (3)
    - PCB5265 - Stem Cell Biology (3)
    - PCB5275 - Signal Transduction Mechanics (3)
    - PCB5527 - Genetic Engineering and Biotechnology (3)
    - PCB5596 - Biomedical Informatics: Sequence Analysis (3)
    - PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism (3)
    - PCB5838 - Cellular and Molecular Basis of Brain Functions (3)
    - PCB6528 - Plant Molecular Biology (3)
    - PCB6595 - Regulation of Gene Expression (3)
    - PCB6677 - Molecular Evolution and Phylogenetics (3)
    - ZOO5748C - Clinical Neuroanatomy (5)

- At least 12 hours of electives must be taken from the above list. Any electives not on this list must be approved by the Graduate Committee before being counted toward degree credit requirements. Directed research, doctoral research, and dissertation research may be used to satisfy requirements beyond the first 12 hours, with approval from the program director.

Unrestricted Electives
22 Total Credits

- Earn at least 22 credits from the following types of courses:
  Students should take 22 credit hours of electives, directed research, doctoral research or dissertation research, in consultation with their adviser.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  - IDS 7980 - Dissertation Research

Cumulative/Qualifying Examinations
0 Total Credits

- Cumulative examinations taken during the second year will determine if students should continue with their doctoral studies. Exams will be overseen by a cumulative exam committee. Each exam will consist of questions set by different faculty members. Questions will deal with data interpretation from the current literature and the design of experiments to test a hypothesis. A student must satisfactorily answer cumulative examination questions, displaying a knowledge base consistent with continuation in the PhD program.

Candidacy Examination
0 Total Credits

- Candidacy will consist of writing and orally defending a proposal outlining a novel research idea to the dissertation committee.
The written proposal will be prepared independently, following NIH-style grant format, and must be approved by the dissertation committee (see Biomedical Sciences PhD Program Handbook for full description of Candidacy Exam requirements and procedures). After passing the candidacy examination and meeting other requirements as specified, the student can register for dissertation hours.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Successfully complete a minimum of 48 credit hours. Successful completion of all coursework, except for dissertation hours. Successful completion of candidacy examination. Successful defense of the written dissertation proposal. Successful completion of Academic Integrity requirements. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Dissertation Defense
0 Total Credits

- The dissertation should be of significant scope and depth such that the work has made significant advances in the area of biomedical science. The Ph.D. dissertation research must generate sufficient quantity and quality data to support a minimum of two original manuscripts (first-authored by the student) in a mainstream journal in the field. One first-author original research article published or accepted for publication is required for pre-defense. In addition to meeting the pre-defense requirement for publication, a second manuscript must have been submitted and subjected to peer review before the defense. Upon completion and approval of the doctoral dissertation by all designated faculty and university offices, the student will make a formal presentation of the research findings in a seminar format to the dissertation committee and other university faculty and students. The candidate will answer questions and defend conclusions about the subject matter.

Independent Learning
0 Total Credits

- The dissertation serves as the independent learning experience.

Grand Total Credits: 72

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance
Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

No

Track Description

The College of Medicine offers an integrated MD/PhD curriculum that enables students to fulfill all requirements and earn the Doctor of Medicine and the Doctor of Philosophy.

This program provides opportunity for MD students to obtain advanced research and training experience and for PhD students to obtain medical training. The program develops physician-scientists with preparation for both academic research and teaching careers. Physician-scientists are in an excellent position to facilitate bench-to-bedside translation of applicable research findings.

Students must fulfill all requirements for both programs to earn both the MD and PhD degrees. As indicated in the curriculum description, some medical modules can be substituted for certain graduate courses and vice versa to help reduce redundancy and streamline time to completion of this integrated program. Students will be able to complete the MD/PhD program in as few as 6 years, although most students will likely require 7-8 years to fulfill all of the requirements. An MD/PhD program committee consisting of faculty from both the medical and graduate programs will serve as the oversight committee responsible for tracking and evaluating student progress in this program.

Students in the integrated MD/PhD Track in Biomedical Sciences must be accepted in the College of Medicine MD program and begin working on their PhD research project during the first two years of medical school. Students take medical courses during the first two years and must successfully pass the USMLE Step 1 exam at the end of year 2 prior to beginning full-time graduate studies in the Biomedical Sciences PhD Program. Required and elective graduate courses for the PhD program are completed in years 3-4 while the student is continuing research. Clinical clerkships that are typically completed in years 3-4 of medical school will in most cases be deferred until the student has completed the PhD program requirements, though some minimum level of ongoing clinical training will continue throughout the entire duration of the program. This ensures that the student remains connected with clinical education and training even while primarily focused on the graduate portion of the MD/PhD program.

The Biomedical Sciences PhD program requires a minimum of 72 credit hours beyond the bachelor's degree, including a minimum total of 27 hours of formal course work exclusive of independent study that are required. The 72 credit hours in the PhD program consists of 23 credit hours of core courses, 12 credit hours of electives, and a minimum of 15 credit hours of dissertation research. The remaining 22 credit hours may consist of additional electives, doctoral research and/or dissertation research. Students entering with a master’s degree may request that up to 30 semester credit hours of previous course work be waived as degree requirements with approval from the dissertation committee.

The MD curriculum can be found here: http://med.ucf.edu/academics/md-program/integrated-curriculum/.

Programmatic deficiencies expected of applicants from diverse settings will be addressed early in the program by completion of appropriate course work. Students may register for doctoral research until they have been admitted to candidacy, after which they must register for dissertation research.

New students will rotate through at least two different laboratories to identify a faculty mentor/sponsor and research area of interest for their dissertation. Finally, a sequence of required seminars will familiarize students with field-related literature and introduce them to the conceptual and technical frameworks in which they will work. All students receiving assistantships must enroll full time.

MD/PhD students are required to maintain good academic standing in both the MD and PhD components of the curriculum. Students must first satisfactorily complete the first two years of the medical school curriculum and pass the USMLE Step 1 exam before they can begin full-time PhD enrollment.

Track Prerequisites

Applicants entering the program with regular status are expected to have completed course work required for a bachelor’s degree in chemistry, cell biology, biochemistry, biophysics, genetics, molecular biology or microbiology.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants entering the program with regular status are expected to have completed course work required for a bachelor's degree in chemistry, cell biology, biochemistry, biophysics, genetics, molecular biology or microbiology.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, MCAT score taken within the last five years. To send MCAT scores electronically, please use the AAMC score reporting system.
- Three letters of recommendation.
- Statement of research interest and purpose, including a summary of relevant work or research experience.
- Résumé.
- A personal or telephone interview.
- In addition to the above requirements, students must also meet the requirements for medical school admission: http://med.ucf.edu/administrative-officers/
- Admission is based on an overall assessment of the qualifications submitted and the interview. All admissions to the MD/PhD program are competitive and based on availability of faculty for sponsoring research.

Interested applicants must first apply to the UCF medical school through AMCAS and indicate on their medical school application that they are applying for MD/PhD.

Students interested in pursuing a combined MD/PhD degree must apply and be accepted into medical school and the Biomedical Sciences PhD program. Separate applications are required, and students wishing to pursue this joint degree program should indicate this and state their reasons on both applications.

AMCAS Application

Applicants must complete an application through the online American Medical College Application Service (AMCAS) at www.aamc.org. AMCAS is the national application service that processes applications for M.D. Programs throughout the nation. Through AMCAS, an applicant may apply to most M.D. programs by completing one application and paying the appropriate fees. AMCAS provides the college with applicant information immediately upon completion of AMCAS transcript verification process.

The AMCAS application period begins in late May and terminates on or before December 15 prior to the year in which the applicant anticipates enrollment. The AMCAS Application deadline is the date when students must submit the application, all fees, original transcripts, and associated data to AMCAS.

Applicants who are selected for medical school interviews at UCF will be invited to apply through the Graduate School portal for the PhD portion of the combined program. Please note that applications that do not come through AMCAS will not be considered for MD/PhD track.

Degree Requirements

Required Courses
21 Total Credits

- Complete all of the following:
  - Complete the following:
    - BMS6001 - Cellular Function and Medical Genetics (5)
    - BSC6433 - Biomedical Sciences II (5)
    - BSC6431 - Practice of Biomedical Sciences (3)
    - IDS6694 - Experimental Design and Analysis in Biomedical Sciences (2)
  - Earn at least 2 credits from the following types of courses:
    - IDS 7690 - Frontiers in Biomedical Sciences 1 Credit Hours (two semesters, 1 credit hour each semester)
  - Earn at least 4 credits from the following types of courses:
    - IDS 7692L - Experiments in Biomedical Sciences (Lab Rotation: 3 credits/first semester, 1 credit/2nd semester)

Elective Courses
12 Total Credits

- Complete all of the following:
  - At least 12 hours of electives must be taken from the following list. Any electives not on this list must be approved by the Graduate Committee before being counted toward degree credit requirements. Directed research, doctoral research and dissertation research may be used to satisfy requirements beyond the first 12 hours, with approval from the program director. Students successfully completing the first year of medical school at UCF may substitute the following medical modules to fulfill the elective course requirement: BMS 6006 - Health and Disease 5 Credit Hours
    - BMS 6050 - Psychosocial Issues in Healthcare 4 Credit Hours
    - BMS 6631 - Hematology and Oncology 4 Credit Hours
  - Others: If approved by the Graduate Committee.
  - Earn at least 12 credits from the following:
    - BSC5418 - Tissue Engineering (3)
    - BSC5436 - Biomedical Informatics: Structure Analysis (3)
    - BSC6407C - Laboratory Methods in Molecular Biology (3)
    - CAP5510 - Bioinformatics (3)
    - CHM5305 - Bioconjugate Chemistry (3)
    - CHM5450 - Polymer Chemistry (3)

    - IDS5127 - Foundation of Bio-Imaging Science (3)
    - MCB5205 - Infectious Processes (3)
    - MCB5208 - Cellular Microbiology: Host-Pathogen Interactions (3)
    - MCB5225 - Molecular Biology of Disease (3)
    - MCB5505 - Molecular Virology (3)
    - MCB5722C - Methods in Biotechnology (4)
    - MCB5932 - Current Topics in Molecular Biology (1 - 99)
    - MCB5937 - Special Topics (1 - 99)
    - MCB6226 - Molecular Diagnostics (3)
    - MCB6417C - Microbial Metabolism (3)
    - PCB5025 - Molecular and Cellular Pharmacology (3)
    - PCB5236 - Cancer Biology (3)
    - PCB5238 - Immunobiology (3)
    - PCB5265 - Stem Cell Biology (3)
    - PCB5275 - Signal Transduction Mechanics (3)
    - PCB5527 - Genetic Engineering and Biotechnology (3)
    - PCB5596 - Biomedical Informatics: Sequence Analysis (3)
    - PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism (3)
    - PCB5838 - Cellular and Molecular Basis of Brain Functions (3)
    - PCB6528 - Plant Molecular Biology (3)
    - PCB6595 - Regulation of Gene Expression (3)
    - PCB6677 - Molecular Evolution and Phylogenetics (3)
    - ZOO5748C - Clinical Neuroanatomy (5)

Unrestricted Electives
24 Total Credits

- Earn at least 24 credits from the following types of courses:
  - Students should take 24 credit hours of electives, directed research, doctoral research or dissertation research, in consultation with their adviser.

Dissertation
15 Total Credits
Earn at least 15 credits from the following types of courses:

IDS 7980 - Dissertation Research 15 Credit Hours

Cumulative/Qualifying Examinations

0 Total Credits

- Cumulative examinations will determine if students should continue with their doctoral studies. Four exams will be given by program faculty members during the second year. Each exam will consist of four questions set by different faculty members to evaluate the student's ability to interpret data, formulate a hypothesis based on the data presented, and effectively design a series of experiments using biomedical science approaches to test their hypothesis. Performance will be evaluated by the graduate exam committee. A student must satisfactorily answer 10 cumulative questions out of 16 to be eligible to continue in the PhD program.

Candidacy Examination

0 Total Credits

- Candidacy will consist of writing and orally defending a proposal outlining a novel research idea to the dissertation committee. The written proposal will be prepared independently, following NIH-style grant format, and must be approved by the dissertation committee (see Biomedical Sciences PhD Program description for full description of Candidacy Exam requirements and procedures). After passing the candidacy examination and meeting other requirements as specified, the student can register for dissertation hours.

Admission to Candidacy

0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Successfully complete a minimum of 48 credit hours. Successful completion of Academic Integrity requirements. Successful completion of all coursework, except for dissertation hours. Successful completion of candidacy. Successful defense of the written dissertation proposal. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submission of an approved program of study.

Dissertation Defense

0 Total Credits

- The dissertation should be of significant scope and depth such that the work has made significant advances in the area of biomedical science. The Ph.D. dissertation research must generate sufficient quantity and quality data to support a minimum of two original manuscripts (first-authored by the student) in a mainstream journal in the field. One first-author original research article published or accepted for publication is required for pre-defense. In addition to meeting the pre-defense requirement for publication, a second manuscript must have been submitted and subjected to peer review before the defense. Upon completion and approval of the doctoral dissertation by all designated faculty and university offices, the student will make a formal presentation of the research findings in a seminar format to the dissertation committee and other university faculty and students. The candidate will answer questions and defend conclusions about the subject matter.

Independent Learning

0 Total Credits

- The dissertation serves as the independent learning experience.

**Program Description**
The Master of Science in Biotechnology program in the College of Medicine will prepare students to function in the industrial biotechnology environment. This program is designed to give students broad knowledge and training in the scientific and practical aspects of biotechnology.

It involves innovative, hands-on and multidisciplinary learning approaches to educate and train students in scientific aspects of biotechnology. The courses and research training required of all students in this program are designed to develop independent thinking, teamwork and communication skills, which are highly desirable in the biotechnology industry. Students will be provided an industrial perspective and an understanding of product development at the same time as they are trained in the biotechnology techniques required for such development.

What makes this program unique is the focus on practical training offered to graduate students through master's thesis research in molecular biotechnology to perform jobs in a laboratory environment that require scientific talent.

**Program Prerequisites**
A bachelor's degree in Biological Sciences or related area.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

**Application Requirements**
For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Biological Sciences or related area.
- Official, competitive GRE score (taken within the last five years) or MCAT score (taken within the last three years).
- Three letters of recommendation.
- A written statement of research experience, area of interest, and immediate and long-range goals.
- Resume or CV

Personal interviews are required. Applicants who do not have a competitive GPA, GRE, or MCAT may occasionally be accepted if there is other convincing evidence of potential for high achievement and success.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

Degree Requirements

Required Courses
21 - 22 Total Credits

- Complete all of the following
- Core
  - Complete at least 1 of the following:
    - MCB5722C - Methods in Biotechnology (4)
    - BSC6407C - Laboratory Methods in Molecular Biology (3)
  - Complete the following:
    - BSC6432 - Biomedical Sciences I (5)
    - BSC6433 - Biomedical Sciences II (5)
    - BSC6431 - Practice of Biomedical Sciences (3)
  - Complete at least 1 of the following:
    - PCB5527 - Genetic Engineering and Biotechnology (3)
    - BSC5418 - Tissue Engineering (3)
    - MCB6417C - Microbial Metabolism (3)
    - PCB5025 - Molecular and Cellular Pharmacology (3)

Graduate Seminars

- Earn at least 2 credits from the following types of courses:
  Students will participate in at least two graduate seminar courses that will prepare them for making professional presentations with an emphasis in biotechnology. The courses will involve the participation of speakers from the biotechnology industry with emphasis on an industrial perspective on biotechnology applications and product development. MCB 6314 - Industrial Perspectives Seminar 1 Credit Hours OR MCB 6938 1 Credit Hour (1 semester only)

Elective Courses
3 - 4 Total Credits

- Complete all of the following
Complete at least 1 of the following:

- BSC5418 - Tissue Engineering (3)
- BSC5436 - Biomedical Informatics: Structure Analysis (3)
- BSC6407C - Laboratory Methods in Molecular Biology (3)
- ID55127 - Foundation of Bio-Imaging Science (3)
- MCB5205 - Infectious Processes (3)
- MCB5208 - Cellular Microbiology: Host-Pathogen Interactions (3)
- MCB5209 - Microbial Stress Response (3)
- MCB5225 - Molecular Biology of Disease (3)
- MCB5415 - Cellular Metabolism (3)
- MCB5505 - Molecular Virology (3)
- MCB5722C - Methods in Biotechnology (4)
- MCB6226 - Molecular Diagnostics (3)
- MCB6417C - Microbial Metabolism (3)
- PCB5527 - Genetic Engineering and Biotechnology (3)
- PCB5025 - Molecular and Cellular Pharmacology (3)
- PCB5236 - Cancer Biology (3)
- PCB5238 - Immunobiology (3)
- PCB5596 - Biomedical Informatics: Sequence Analysis (3)
- PCB5709C - Laboratory Virtual Simulations in Physiology (3)
- PCB5834C - Advanced Human Physiology (4)
- PCB6528 - Plant Molecular Biology (3)
- PCB6595 - Regulation of Gene Expression (3)
- PCB5838 - Cellular and Molecular Basis of Brain Functions (3)
- PCB5265 - Stem Cell Biology (3)
- PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism (3)
- ZOO5745C - Neuroanatomical Pathways and their Neurotransmitters (4)
- ZOO5745C - Neuroanatomical Pathways and their Neurotransmitters (4)
- GEB5516 - Technological Entrepreneurship (3)

Student may choose: MCB 5932 - Current Topics in Molecular Biology VAR Credit Hours PCB 5937 - Special Topics: Human Endocrinology 3 Credit Hours Others: If approved by the Graduate Committee

Thesis
6 Total Credits

- Earn at least 6 credits from the following types of courses:
  MCB 6971 Students will take a minimum of six credits of thesis research (MCB 6971) to complete their research and submit their thesis specializing in biotechnology research. Students are expected to have an in-depth discussion with at least three faculty members before choosing a laboratory for thesis research. The student and the Thesis Adviser/Major Professor will jointly recommend an advisory committee comprised of at least three members. The committee composition must reflect expertise relevant to the student's thesis research and must be approved by the Graduate Committee. Students switching to change the composition of the Thesis Advisory Committee must also obtain approval from the Graduate Committee.

Thesis Proposal
0 Total Credits

- The thesis proposal defense requirement should be met and passed successfully no later than the end of the summer of the first year in the program. Students will not be allowed to register for courses for the Fall semester of their second year until this requirement is fulfilled. The Thesis Proposal requirement includes: a written 5-page thesis proposal, a thesis proposal defense in front of the thesis committee, and questions by the thesis committee to test the student's understanding of the basic concepts in the field and relevant applications. The student will be evaluated on performance in all three sections. Should the student fail, a second opportunity will be provided within 2 weeks of the first attempt. A second failure will result in dismissal from the program. An oral thesis defense is required. The defense will be in the format of: A 50-minute presentation of the thesis work, including a 5-minute introduction A 10-minute free period for the general audience to ask questions A 1-hour closed-door examination by the Thesis Advisory Committee and the program faculty present The thesis should be of significant scope and depth such that the work has made advances in the area of biotechnology. The MS thesis research must generate sufficient quantity and quality data to support the submission of a minimum of one manuscript. Approval of the final thesis will require consent from the majority of the Program Faculty who choose to review the thesis, inclusive of the Thesis Advisory Committee. Faculty members with dissenting vote on the thesis must provide written justification. Scientific journal review criteria will be used as guidelines by the faculty to evaluate the final thesis for its appropriateness for publication in the target journal. Students will be evaluated on the progress in thesis research by the thesis advisory committee for fall and spring. Two consecutive unsatisfactory evaluations will result in dismissal from the program.

Comprehensive Examination
0 Total Credits

- Students must pass a comprehensive exam to qualify for the Master of Science degree. Students must successfully pass an oral comprehensive examination to test the understanding of the basic concepts in the field and relevant applications. The Comprehensive Examination will be conducted during the thesis proposal defense. The exam will be administered by the thesis committee. Should the student fail this exam, a second opportunity will be provided within 2 weeks of the first attempt. A second failure will result in dismissal from the program.

Independent Learning
0 Total Credits
- The required thesis allows the student to engage in independent learning.

**Grand Total Credits:** 30 - 32

**Financial Information**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

All students receiving assistantships must enroll full time.

**UCF Student Financial Assistance**

**Fellowship Information**

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Licensure Disclosure**

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-COM-Medical-Doctor-MD.pdf.
Program Description

UCF’s M.D. Program allows students to prepare for careers in every discipline of medicine and to focus on an individualized area of study or research. The M.D. Program learning experience is a unique and exciting blend of state-of-the-art technology, interactions with virtual patients, clinical and laboratory experiences, research, facilitator-directed small group sessions, and interactive didactic lectures. The UCF College of Medicine is fully accredited by LCME.

Program highlights include:

Clinical experiences are embedded throughout the first two years in P-1 and P-2 Community of Practice modules. At least twice a month, students will work with community preceptors in a variety of settings to practice skills and to apply the concepts mastered in the integrated basic science curriculum to real patients.

As part of approach described by the Dean as "Keep the Dream Alive!", each student will complete a focused inquiry and research project in the I-1 and I-2 modules. The scope of the project is limited only by the student's imagination and may include bench or clinical research as well as studies of quality of care, hospitality in medicine, quality of life, legal aspects of medicine, and more. Students will work with a mentor to develop a project or area of study that focuses on the student's unique interest and career plans.

Innovative simulation and animation experiences have been designed explicitly to integrate into and reinforce the curriculum. From basic science concepts to clinical diagnoses and treatment, the human patient mannequin simulators and online interactive virtual patients enhance and complement learning.

UCF offers these joint degrees:

MD/MBA, a joint medical and business degree program focusing on developing effective problem-solving and decision-making skills.

MD/MS in Hospitality and Tourism Management, a specialized degree program for individuals interested in enhancing their management skills through studying hospitality and service-oriented business models.

MD/PhD, a College of Medicine program that prepares clinician-scientists for a career in academic medicine to become leaders in the international academic medical community.

Application Requirements

For information on applying to the MD Program, please see med.ucf.edu/admissions/ or contact the Office of Admissions at the UCF College of Medicine

Is this program available 100% online?

No
Licensure Disclosure

The curriculum prepares students for both the AGACNP board certification examination administered through the American Nurses Credentialing Center and the Acute Care Nurse Practitioner-Adult-Gerontology certification examination administered through the American Association of Critical Care Nurses. For more information on how this program may prepare you in that regard, please visit https://nursing.ucf.edu/academics/graduate-certificates/agacnp/#faqs and https://apq.ucf.edu/files/Licensure-Disclosure-Adult-Gerontology-Acute-Care-GC.pdf.

Program Description

The Adult-Gerontology Acute Care Nurse Practitioner post-master's certificate prepares the advanced practice nurse to care for patients with medically complex stable and unstable acute, critical, and chronic illnesses across care settings ranging from hospitals to subacute, ambulatory care, clinic and home care environments. The certificate provides a spectrum of care from disease prevention to acute and critical care management. The Adult-Gerontology Acute Care Nurse Practitioner graduate certificate prepares nurses who have already completed their graduate education for entry-level advanced practice in acute care. The program prepares graduates to enter the current healthcare system based on a strong scientific foundation for practice. The curriculum offers flexibility and emphasis on evidence-based practice, leadership, and organizational analysis, and provides analytic, critical thinking, and diagnostic reasoning skills to examine practice innovations. The certificate requires 23 credit hours beyond the master's or doctor of nursing practice (DNP) degree.

Total Credit Hours Required: 23 Credit Hours Minimum beyond the Master's Degree

Program Prerequisites

- NGR 5003 – Advanced Health Assessment and Diagnostic Reasoning 2 Credit Hours
- NGR 5003L – Advanced Health Assessment and Diagnostic Reasoning Lab 1 Credit Hours
- NGR 5141 – Pathophysiological Bases for Advanced Nursing Practice 3 Credit Hours
- NGR 6172 – Pharmacology for Advanced Nursing Practice 3 Credit Hours
- NGR 5638 – Health Promotion 3 Credit Hours

Admission is open to those with MSN Degrees and are licensed and nationally certified as an advanced practice registered nurse, but who are not prepared as Adult-Gerontology Acute Care Nurse Practitioners.
Application Requirements

Admission is open to those with MSN or DNP Degrees and are licensed and nationally certified as an advanced practice registered nurse, but who are not prepared as Adult-Gerontology Acute Care Nurse Practitioners.

An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN and MSN or DNP degree from an accredited institution.
- Undergraduate Statistics course.
- Licensure in the State of Florida and national certification as an advanced practice registered nurse (certified nurse practitioner, certified registered nurse anesthetist, certified nurse midwife, or certified clinical nurse specialist). (Out of state applicants must be eligible for licensure in Florida and must achieve licensure to begin clinical courses.)
- Current certification as an advanced cardiac life support (ACLS) and basic life support (BLS) provider.
- Address the following 3 items in a written essay. Responses to questions should not exceed 500 words, double-spaced, 12-point Times New Roman font, and 1-inch margins:
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals.
  - Describe the changes you would make in your personal and professional life to ensure success in your graduate nursing education.
  - Identify one significant contemporary issue or problem in U.S. healthcare and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae which reflects prior education, clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations.
- Requires 3 professional recommendations.
- An interview with faculty may also be required.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with an adviser to discuss your goals for graduate study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for post-master's preparation for advanced nursing practice.

Upon admission to the program, the student will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. Students must be able to meet clinical partner background requirements to continue in the program.

The College of Nursing uses a student information management system, LEAP*RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP*RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a "hold" service indicator will be placed to prevent future enrollment and other progression functions.

Program Description

This program has been temporarily suspended effective Spring 2014.

The post-master's Clinical Nurse Specialist Adult-Gerontology Certificate prepares nurses who already have received a master's degree in nursing for positions as Clinical Nurse Specialists.

Program Prerequisites

Students must demonstrate successful completion of the following courses:

- NGR 5003 - Advanced Health Assessment and Diagnostic Reasoning 2 Credit Hours
- NGR 5003L - Advanced Health Assessment and Diagnostic Reasoning Lab 1 Credit Hours
- NGR 5141 - Pathophysiological Bases for Advanced Nursing Practice 3 Credit Hours
- NGR 5720 - Organizational Dynamics 3 Credit Hours
- NGR 6172 - Pharmacology for Advanced Nursing Practice 3 Credit Hours
- NGR 6874 - Nursing Environment Management 3 Credit Hours

BSN and MSN degree from an accredited institution.

Undergraduate Statistics course.

Licensure as a registered nurse in the State of Florida. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)

Application Requirements

Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN and MSN degree from an accredited institution.
- Undergraduate Statistics course.
- Licensure as a registered nurse in the State of Florida. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)
- Address the following 3 items in a written essay. Total word count for all (not each) answers should be 500 words or less, double spaced, 12 point Times New Roman font, and 1 inch margins:
  - Describe how your professional experiences have prepared you for future education in the role which is the focus of your desired track.
  - Describe your plans to alter your work, professional and/or personal obligations in order to have the time needed for graduate course and clinical practice work.
  - Identify one significant contemporary issue/problem in the US Health care system and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates this can include accomplishments as a student.

Licensure Disclosure

For information on how this program may prepare you for professional licensure, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Adult-Gerontology-Primary-Care-GC.pdf.

Program Description

The post-master's Adult/Gerontology Primary Care Nurse Practitioner Graduate Certificate prepares nurses who already have received a master's degree in nursing for positions as Adult/Gerontology Primary Care Nurse Practitioners. Graduates of this program are eligible to sit for the Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) National Board Certification Examination offered by the American Academy of Nurse Practitioners Certification Board or the American Nurses Credentialing Center.

Program Objectives

- Analyze social, economic, ethical, cultural, legal and political issues influencing nursing practice and health care in a global context.
- Collaborate with leaders in nursing and other disciplines to improve the quality of professional nursing practice and the healthcare system.
- Develop and implement leadership, management and teaching strategies for the improvement of health and healthcare.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy to improve the health of communities.
- Participate in lifelong learning activities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities and nursing theories to support advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skills.
- Practice in an advanced nursing role.

The program is 18 credit hours and includes up to 660 hours of clinical practice. There are 12 credit hours of prerequisite requirements.

Total Credit Hours Required: 18 Credit Hours Minimum beyond the Master's Degree
Program Prerequisites

- BSN and MSN degree from an accredited institution.
- Undergraduate Statistics course.
- Licensure as an advanced practice registered nurse (APRN) in the State of Florida. (Out of state applicants must be eligible for licensure in Florida and must achieve licensure to begin clinical courses.)

- Students must demonstrate successful completion of the following courses:
  - NGR 5003 - Advanced Health Assessment and Diagnostic Reasoning 2 Credit Hours
  - NGR 5003L - Advanced Health Assessment and Diagnostic Reasoning Lab 1 Credit Hours (60 clinical hours)
  - NGR 5141 - Pathophysiological Bases for Advanced Nursing Practice 3 Credit Hours
  - NGR 6172 - Pharmacology for Advanced Nursing Practice 3 Credit Hours
  - NGR 5638 - Health Promotion 3 Credit Hours

Is this program available 100% online?
Yes

UCF Online

Please note: Health Care Simulation Graduate Certificate may be completed fully online with some required campus activities. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

You may pursue this UCF College of Nursing online program as long as you will be physically located in a Nurse Licensure Compact (NLC) state for the duration of your education.

UCF College of Nursing faculty are authorized to teach in NLC states. Due to nursing education restrictions imposed by non-NLC states, UCF is unable to offer courses, clinicals, or other educational services regardless of modality within non-NLC states. Should you be physically located within a non-NLC state for more than a vacation or brief visit, regardless of your legal state of residence or the type of license you have, you will be unable to apply or continue your nursing degree program at the UCF College of Nursing. This includes, but is not limited to, students accepting traveling nurse positions in a non-Nurse Licensure Compact state.

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Health-Care-Simulation-Online-GC.pdf.
Program Description
The Graduate Certificate in Health Care Simulation prepares nurses, members of other healthcare disciplines, administrators and simulation and technology professionals to design, manage and evaluate healthcare simulations for basic education and improvement of team healthcare delivery.

Program Objectives
- Analyze social, economic, ethical cultural legal and political issues influence nursing and health practice in a global context
- Collaborate with leaders in nursing and other disciplines to improve the quality of professional healthcare practice and the outcomes of care
- Develop and implement innovative applications for simulation experiences in health care
- Evaluate models of delivery of simulation in education and healthcare settings in terms of effectiveness
- Evaluate the cost-benefit of the use of simulation in healthcare and education

The certificate program requires three courses, for a total of 9 credit hours.

Total Credit Hours Required: 9 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites
- Undergraduate Statistics course.

Application Requirements
Admission is open to those with a bachelor's degree from a regionally accredited institution. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Admission to the program is competitive on a space-available basis. In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Baccalaureate degree from an accredited institution.
- Undergraduate Statistics course.
- Address the following 3 items in a written essay. Total word count for all (not each) answers should be 500 words or less, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals.
  - Describe the changes you would make in your personal and professional life to ensure success in your graduate nursing education.
  - Identify one significant contemporary issue/problem in U.S. health care and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae should reflect prior education, recent clinical/practice accomplishments, any recent scholarly work (publications, presentations, grants, research participation), awards, scholarships, additional professional certifications, volunteer activities, and membership/leadership/activities with professional organizations and community service organizations. For recent graduates, this can include accomplishments as a student.
- Requires 3 professional recommendations.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with a graduate adviser to discuss your academic goals. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for Masters-level preparation for advanced nursing practice.

The College of Nursing uses a student information management system, LEAP*RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP*RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $100 per certificate program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a "hold" service indicator will be placed to prevent future enrollment and other progression functions.

**Is this program available 100% online?**

Yes
Please note: Nursing Education Certificate may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

You may pursue this UCF College of Nursing online program as long as you will be physically located in a Nurse Licensure Compact (NLC) state for the duration of your education.

Licensure Disclosure

For information on how this program may prepare you for professional licensure, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Online-Nursing-Education-GC.pdf.

UCF College of Nursing faculty are authorized to teach in NLC states. Due to nursing education restrictions imposed by non-NLC states, UCF is unable to offer courses, clinicals, or other educational services regardless of modality within non-NLC states. Should you be physically located within a non-NLC state for more than a vacation or brief visit, regardless of your legal state of residence or the type of license you have, you will be unable to apply or continue your nursing degree program at the UCF College of Nursing. This includes, but is not limited to, students accepting traveling nurse positions in a non-Nurse Licensure Compact state.

UCF is also an approved institution of the National Council for State Authorization Reciprocity Agreement (NC-SARA). Membership in NC-SARA requires the university to disclose information regarding state licensing and certification requirements for the selected program of study when licensing and/or certification are a requirement to practice in the profession after graduation.

While licensure or certification may be available in this field of study, this program does not lead to such licensure or certification upon graduation. The professional preparation you receive in our program may still assist you in such pursuits; however, we are unable to confirm the specific licensure and certification requirements of each state, territory, or foreign entity in which professional credentialing may be possible. If you intend to pursue such credentialing in your state or elsewhere, we advise you to contact the applicable state credentialing authority to familiarize yourself with its specific requirements and determine if our program meets its academic criteria.

You are welcome to contact the College of Nursing's Assistant Dean of Students with questions in this regard, and we will do our best to assist you in your career planning.

Program Description

The Graduate Certificate in Nursing Education is designed to prepare nurses and other healthcare professionals to teach in professional health care education programs, health care agencies, and the community. The certificate program can be completed entirely online.

Program Objectives

- Analyze social, economic, ethical, cultural, legal and political issues influencing nursing practice and health care in a global context.
- Collaborate with leaders in nursing and other disciplines to improve the quality of professional nursing practice and the healthcare system.
- Develop and implement leadership, management and teaching strategies for the improvement of health and healthcare.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy to improve the health of communities.
- Participate in lifelong learning activities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities and nursing theories to support an advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skills.
- Practice in an advanced nursing role.

The certificate program requires three courses, for a total of 9 credit hours.

Total Credit Hours Required: 9 Credit Hours Minimum beyond the Master's Degree

Program Prerequisites

MSN degree earned or in progress from an accredited institution.
**Application Requirements**

Admission is open to those with a bachelor's degree from a regionally accredited institution. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Admission to the program is competitive on a space-available basis. In addition to the general UCF graduate application requirements, applicants to this program must provide:

This includes, but is not limited to, students accepting traveling nurse positions in a non-Nurse Licensure Compact state.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.
Program Description

The Master of Science in Nursing (MSN) programs build upon the student's baccalaureate nursing education and professional experience. The Master of Science in Nursing program is accredited by the Commission on Collegiate Nursing Education (CCNE).

The College of Nursing also offers admission to its master's degree programs in nursing to Registered Nurses who have completed an AS in Nursing or diploma nursing program and have bachelor's degrees in fields other than nursing. These students will need to take 9 credits of undergraduate upper-division course work as the prerequisite for graduate study in nursing. Please contact gradnurse@ucf.edu for more information.

The goal of the Master of Science in Nursing program is to prepare advanced practice nurses, nurse educators, and nursing leaders and managers to assume leadership positions in a variety of healthcare settings. Graduates of these programs are eligible to sit for national certification examinations in their respective specialties.

Program Objectives

The programs prepare students to:

- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities, and theory to support advanced nursing practice.
- Plan, evaluate, and implement the delivery of health care using critical thinking skills in an advanced nursing role.

This degree has 6 tracks: Adult-Gerontology Acute Care Nurse Practitioner Track, Adult-Gerontology Primary Care Nurse Practitioner Track, Family Nurse Practitioner Track, Leadership and Management Track, Nurse Educator Track, and Nursing and Health Care Simulation Track. Please scroll to the bottom of this page for further details on these Tracks.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Students must choose a track to apply for the MSN program. All tracks contain the same base admission requirements listed below, however, please review the Catalog entry for your track of interest and additional application requirements.

The following application information is provided for applicants who have completed a bachelor's degree. (For applicants without a bachelor's degree interested in the RN to MSN Program please contact the College of Nursing Undergraduate Office at gradnurseadvisor@ucf.edu for an advising appointment). In addition to the general UCF graduate application requirements applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution.*
- Undergraduate Statistics course.
- Florida license required for all students who will be taking clinical and practice courses in Florida health care agencies and institutions. For those students at a distance, a license is required in the state or country in which they practice.
- Address the following 3 items in a written essay. Total word count for all (not each) answers should be 500 words or less, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals.
  - Describe the changes you would make in your personal and professional life to ensure success in your graduate nursing education.
  - Identify one significant contemporary issue/problem in U.S. health care and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae should reflect prior education, recent clinical/practice accomplishments, any recent scholarly work (publications, presentations, grants, research participation), awards, scholarships, additional professional certifications, volunteer activities, and membership/leadership/activities with professional organizations and community service organizations. For recent graduates, this can include accomplishments as a student.
- Requires 3 professional recommendations.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with an MSN adviser to discuss your goals for graduate study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for Masters-level preparation for advanced nursing practice.

*Licensed RNs who have completed an accredited AS in Nursing or diploma nursing program and Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurseadvisor@ucf.edu for additional options.

Upon admission to the program students will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. A student must be able to meet clinical partner background requirement to continue in the program.

The College of Nursing uses a student information management system, LEAP®RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP®RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a “hold” service indicator will be placed to prevent future enrollment and other progression functions.

Nursing MSN - Nursing MSN, Adult-Gerontology Acute Care Nurse Practitioner Track

College
College of Nursing

Department
Department of Nursing Practice

Track Website
http://www.nursing.ucf.edu/

Track Contact Information
Christopher Blackwell PhD
Associate Professor
christopher.blackwell@ucf.edu
Telephone: 407-823-2744
UTWR 453

Is this track available 100% online?
No
Track Description

This track will not be accepting applications or enrolling new students effective Fall 2018.

The Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) Track in the Master of Science in Nursing (MSN) program prepares the advanced practice nurse to care for patients with medically complex stable and unstable acute, critical and chronic illnesses across care settings ranging from hospitals to subacute, ambulatory care, clinic and home care environments. The program provides a spectrum of care from disease prevention to acute and critical care management.

The track provides a spectrum of care from disease prevention to acute and critical care management. The curriculum prepares students for both the AGACNP board certification examination administered through the American Nurses Credentialing Center and the Acute Care Nurse Practitioner--Adult-Gerontology certification examination administered through the American Association of Critical Care Nurses.

Program Objectives

The program prepares students to:

- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities, and theory to support the advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skill in an advanced nursing role.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Official, competitive GRE score taken within the last five years.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)
- Address the following 3 items in a written essay. Total word count for all (not each) answers should be 500 words or less, double spaced, 12 point Times New Roman font, and 1 inch margins:
  - Discuss the impact of the graduate nursing education in your desired track on the evolution of your professional role
  - Describe the path you would take to ensure success in your graduate nursing education
  - Identify one significant contemporary issue of problem in US healthcare and explore how members of the nursing profession can help address that issues or solve that problem
- Curriculum Vitae: CV should reflect prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates, this can include accomplishments as a student.
- An interview with faculty may also be required.

*For Students with an RN license and a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu or 407-823-2744 for additional options.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with a MSN adviser to discuss your goals for masters study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for master-level preparation for advanced nursing practice.

Admission to the program is competitive, based on evaluations of the applicant's abilities, past performance, recommendations, FDLE/FBI finger printing and certified background checks, and the match of UCF programs with the applicant's career goals. The College of Nursing accepts most qualified students. Since enrollment is limited, not all students who apply may be accepted, even if minimum requirements are met.

Effective August 2017, the College of Nursing will be implementing a database, LEAP*RN (ProjectConcert) to manage information regarding student course work and plans of study, clinical placements, and all evaluation data. This database will assist us in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. All students will be responsible for an annual subscription of $77.40 payable directly to ProjectConcert. Holds will be placed on registration and enrollment if the subscription cost is not paid. Further information will be disseminated early in the summer.

Track Details

Progress to Degree
Students are required to maintain a 3.0 grade point average. Students who receive a grade of below "B" in any course will be reviewed by the MSN/DNP Admissions, Progression and Graduation Committee for continuation in the program. Grades of below "B" are not acceptable in the doctoral program in the College of Nursing. Students who do not maintain a 3.0 GPA will be put on probation or dismissed from the program.

Graduation Requirements
- All course work completed with a minimum grade of "B"
- Clinical performance evaluated at a satisfactory level

College of Nursing Master's Program Handbook
All master's students are required to read the College of Nursing Master's Program Handbook regarding policies for each program and for academic progression. Information about each program, particularly clinical placements and forms for appeals to the Master's APG Committee, are located in the Nursing MSN Handbook.

Equipment Fee
Full-time students in all Master of Science in Nursing Programs pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 each semester.

Independent Learning
An independent scholarly work is a requirement for the Master of Science in Nursing degree. The scholarly work consists of an evidence-based nursing project. The scholarly project that is required in NGR 6813 (completed in the final semester of study) is an evidence-based scholarly clinical paper. The evidence-based project should reflect the latest evidence for the student's MSN track. This is a formal paper that must adhere to published guidelines in the syllabus and must be presented in a public forum.

Nursing MSN - Nursing MSN, Adult-Gerontology Primary Care Nurse Practitioner Track

College
College of Nursing

Department
Department of Nursing Practice

Track Website
http://www.nursing.ucf.edu/

Is this track available 100% online?
No
**Track Description**

This track will not be accepting applications or enrolling new students effective Fall 2018.

The Master of Science in Nursing (MSN) program in the Adult/Gerontology Primary Care Nurse Practitioner Track prepares nurses for advanced primary care practice in the current healthcare environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, and leadership.

The MSN Adult/Gerontology Primary Care Nurse Practitioner Track allows students to sit for certification examinations when they have completed the list of courses required. Certification authorizes them to function in the advanced role. Enrolling in the DNP program is an option after completion of the MSN.

**Program Objectives**

The program prepares students to:

- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities, and theory to support the advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skill in an advanced nursing role.

The College of Nursing also offers admission to its master degree programs in nursing to Registered Nurses who have bachelor degrees in fields other than nursing. These students will need to take 8 credits of undergraduate upper division course work as the prerequisite for graduate study in nursing. Please contact gradnurse@ucf.edu for more information.

The College also offers an RN to MSN plan of study that provides an accelerated program for RNs who do not hold a baccalaureate degree but have met general education requirements. Students admitted under this plan of study will complete requirements for both the BSN and MSN programs. See RN to MSN program below for more information. A separate application to the graduate program will be required upon completion of the BSN degree. Admission to the MSN program is competitive and not guaranteed.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Official, competitive GRE score taken within the last five years.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)
- Address the following 3 items in a written essay. Total word count for all (not each) answers should be 500 words or less, double spaced, 12 point Times New Roman font, and 1 inch margins:
  - Discuss the impact of the graduate nursing education in your desired track on the evolution of your professional role
  - Describe the path you would take to ensure success in your graduate nursing education
  - Identify one significant contemporary issue or problem in US health care and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates this can include accomplishments as a student.
- An interview with faculty may also be required.

*For RNs with a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing at gradnurse@ucf.edu or 407-823-2744 for additional options.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office (407-823-2744) to speak with an adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice.

Admission to the program is competitive, based on evaluation of the applicant’s abilities, past performance, recommendations, FDLE/FBI finger printing and certified background checks, and the match of UCF’s master’s programs with career goals. The College of Nursing accepts the most qualified students. Since enrollment is limited, not all students who apply may be accepted, even if minimum requirements are met.

Effective August 2017, the College of Nursing will be implementing a database, LEAP*RN (ProjectConcert) to manage information regarding student course work and plans of study, clinical placements, and all evaluation data. This database will assist us in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. All students will be responsible for an annual subscription of $77.40 payable directly to ProjectConcert. Holds will be placed on registration and enrollment if the subscription cost is not paid. Further information will be disseminated early in the summer.

Progress to Degree

Students are required to maintain a 3.0 grade point average. Students who receive a grade of below B in any course will be reviewed by the MSN/DNP Admissions, Progression and Graduation Committee for continuation in the program. Grades of below B are not acceptable in the doctoral program in the College of Nursing. Students who do not maintain a 3.0 GPA will be put on probation or dismissed from the program.

Graduation Requirements

- All course work completed with a minimum grade of "B"
- Clinical performance evaluated at a satisfactory level

College of Nursing Master's Program Handbook

All master's students are required to read the College of Nursing Master's Program Handbook regarding policies for each program and for academic progression. Information about each program, particularly clinical placements and forms for appeals to the Master's APG Committee, are located in the Nursing MSN Handbook.

Equipment Fee

Full-time students in all Master of Science in Nursing Programs pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 each semester.

The evidence-based project should reflect the latest evidence for the student's MSN track. This is a formal paper that must adhere to published guidelines in the syllabus and must be presented in a public forum.

Nursing MSN - Nursing MSN, Family Nurse Practitioner Track

College

College of Nursing

Department

Department of Nursing Practice

Track Website

http://www.nursing.ucf.edu/

Is this track available 100% online?

No
**Track Description**

This track will not be accepting applications or enrolling new students effective Fall 2018.

The Master of Science in Nursing (MSN) program in the Family Nurse Practitioner Track prepares nurses for advanced primary care practice in the current healthcare environment based on a strong scientific foundation for practice, flexibility, and emphasis on evidence-based practice and leadership.

The MSN Family Nurse Practitioner Track allows students to sit for certification examinations when they have completed the list of courses required. Certification authorizes them to function in the advanced role. Enrolling in the DNP program is an option after completion of the MSN. The program can be completed in 6 semesters as a full-time student or 8 semesters as a part-time student.

**Program Objectives**

The program prepares students to:
- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities, and theory to support the advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skill in an advanced nursing role.

The College of Nursing also offers admission to its master degree programs in nursing to Registered Nurses who have bachelor degrees in fields other than nursing. **Is this track available 100% online?**

Yes
Please note: Nursing (MSN) - Leadership and Management may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. You may pursue this UCF College of Nursing online program as long as you will be physically located in a Nurse Licensure Compact (NLC) state for the duration of your education.

UCF College of Nursing faculty are authorized to teach in NLC states. Due to nursing education restrictions imposed by non-NLC states, UCF is unable to offer courses, clinicals, or other educational services regardless of modality within non-NLC states. Should you be physically located within a non-NLC state for more than a vacation or brief visit, regardless of your legal state of residence or the type of license you have, you will be unable to apply or continue your nursing degree program at the UCF College of Nursing. This includes, but is not limited to, students accepting traveling nurse positions in a non-Nurse Licensure Compact state.

NOTE FOR INTERNATIONAL STUDENTS: Please contact the College of Nursing at gradnurse@ucf.edu or 407-823-2744 prior to applying to this online program.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

Licensure Disclosure

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Nursing-MSN-Online-Leadership-and-Management.pdf.

Track Description

The Leadership and Management track of the MSN is designed to equip nurses with the managerial and leadership skills necessary to become administrative leaders in the health care industry. The program requires 36 credit hours of coursework and includes leadership practicum experiences.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

- BSN degree from an accredited institution.*
- Undergraduate Statistics course.
- RN license the state in which you practice.

*Licensed RNs who have completed an accredited AS in Nursing or diploma nursing program and Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurseadvisor@ucf.edu for additional options.

Students who are Registered Nurses and have completed an AS in Nursing or diploma nursing program and have a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of 'B' or better.

- NUR 3805 - Dimensions of Professional Practice 3 Credit Hours
- NUR 4637 - Public Health Nursing 3 Credit Hours
- NUR 3165 - Nursing Research 3 Credit Hours
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution.*
- Undergraduate Statistics course.
- The GRE is not required for admission to this program.
- RN license the state in which you practice.
- Address the following 3 items in a written essay. Total word count for all (not each) answers should be 500 words or less, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals.
  - Describe the changes you would make in your personal and professional life to ensure success in your graduate nursing education.
  - Identify one significant contemporary issue/problem in U.S. health care and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae should reflect prior education, recent clinical/practice accomplishments, any recent scholarly work (publications, presentations, grants, research participation), awards, scholarships, additional professional certifications, volunteer activities, and membership/leadership/activities with professional organizations and community service organizations. For recent graduates, this can include accomplishments as a student.
- Requires 3 professional recommendations.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with an MSN adviser to discuss your goals for graduate study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for Masters-level preparation for advanced nursing practice.

*Licensed RNs who have completed an accredited AS in Nursing or diploma nursing program and Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurseadvisor@ucf.edu for additional options.

Upon admission to the program, students will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. A student must be able to meet clinical partner background requirement to continue in the program.

The College of Nursing uses a student information management system, LEAP*RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP*RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a *hold* service indicator will be placed to prevent future enrollment and other progression functions.

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Online-Nurse-Educator-MSN.pdf.

Track Description

The Master of Science in Nursing (MSN) programs build upon the student's baccalaureate nursing education and professional experience. The Master of Science in Nursing program is accredited by the Commission on Collegiate Nursing Education (CCNE). The Nurse Educator track is delivered fully online. It prepares nurse educators for teaching positions in colleges and universities, as well as practice settings.

Program Objectives

The program prepares students to:

- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities, and theory to support advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skill in an advanced nursing role.

The Nurse Educator Track in the Nursing MSN program requires 18 credit hours of nursing courses and 17 credit hours of education courses for a total of 35 credit hours of graduate coursework.

Total Credit Hours Required: 35 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

- BSN degree from an accredited institution.*
- Undergraduate Statistics course.
- RN license the state in which you practice.

*Licensed RNs who have completed an AS in Nursing or diploma nursing program and Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurseadvisor@ucf.edu for additional options.

Students who are licensed RNs who have completed an accredited AS in Nursing or diploma nursing program and have a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of 'B' or better.

- NUR 3805 - Dimensions of Professional Practice 3 Credit Hours
- NUR 4637 - Public Health Nursing 3 Credit Hours
- NUR 3165 - Nursing Research 3 Credit Hours
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution.*
- Undergraduate Statistics course.
- The GRE is not required for admission to this program.
- RN license the state in which you practice.
- Address the following 3 items in a written essay. Total word count for all (not each) answers should be 500 words or less, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals.
  - Describe the changes you would make in your personal and professional life to ensure success in your graduate nursing education.
  - Identify one significant contemporary issue/problem in U.S. health care and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae should reflect prior education, recent clinical/practice accomplishments, any recent scholarly work (publications, presentations, grants, research participation), awards, scholarships, additional professional certifications, volunteer activities, and membership/leadership/activities with professional organizations and community service organizations. For recent graduates, this can include accomplishments as a student.
- Requires 3 professional recommendations.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with an MSN adviser to discuss your goals for graduate study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for Masters-level preparation for advanced nursing practice.

*Licensed RNs who have completed an accredited AS in Nursing or diploma nursing program and Bachelor’s degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurseadvisor@ucf.edu for additional options.

Upon admission to the program, students will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. A student must be able to meet clinical partner background requirement to continue in the program.

The College of Nursing uses a student information management system, LEAP*RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP*RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a "hold" service indicator will be placed to prevent future enrollment and other progression functions.

Track Details

College of Nursing Master’s Program Handbook

All master’s students are required to read the College of Nursing Master’s Program Handbook regarding policies for each program and for academic progression. Information about each program, particularly clinical placements and forms for appeals to the Master’s APG Committee, are located in the Nursing MSN Handbook.

Equipment Fee

Full-time students in all Master of Science in Nursing programs pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 each semester.

Independent Learning

An independent scholarly work is a requirement for the Master of Science in Nursing degree. The scholarly work consists of an evidence-based nursing project. The scholarly project that is required in NGR 6813 (completed in the last or next to last semester of study) is an evidence-based scholarly clinical paper. The evidence-based project should reflect the latest evidence for the students MSN track. This is a formal paper that must adhere to published guidelines in the syllabus and must be presented in a public forum.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Is this track available 100% online?
Yes
**UCF Online**

**Please note:** Nursing (MSN) - Nursing and Health Care Simulation may be completed fully online although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

You may pursue this UCF College of Nursing online program **as long as you will be physically located in a Nurse Licensure Compact (NLC) state for the duration of your education.**

UCF College of Nursing faculty are authorized to teach in NLC states. Due to nursing education restrictions imposed by non-NLC states, UCF is unable to offer courses, clinicals, or other educational services regardless of modality within non-NLC states. Should you be physically located within a non-NLC state for more than a vacation or brief visit, regardless of your legal state of residence or the type of license you have, you will be unable to apply or continue your nursing degree program at the UCF College of Nursing. This includes, but is not limited to, students accepting traveling nurse positions in a non-Nurse Licensure Compact state.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit [http://global.ucf.edu/](http://global.ucf.edu/). If you have questions, please consult UCF Global at 407-823-2337.

**Licensure Disclosure**

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit [https://apq.ucf.edu/files/Licensure-Disclosure-Nursing-MSN-Online-Nursing-and-Health-Care-Simulation.pdf](https://apq.ucf.edu/files/Licensure-Disclosure-Nursing-MSN-Online-Nursing-and-Health-Care-Simulation.pdf).

**Track Description**

The Master of Science in Nursing (MSN) program builds upon the student's baccalaureate nursing education and professional experience.

The MSN program is accredited by the Commission on Collegiate Nursing Education (CCNE). The Nursing and Health Care Simulation Track is delivered online with some required campus activities. It prepares simulation-based educators for positions in colleges and universities, as well as in practice settings.

**Program Objectives**

The program prepares students to:

- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities, and theory to support advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skill in an advanced nursing role.

You may pursue this UCF College of Nursing online program **as long as you will be physically located in a Nurse Licensure Compact (NLC) state for the duration of your education.**

UCF College of Nursing faculty are authorized to teach in NLC states. Due to nursing education restrictions imposed by non-NLC states, UCF is unable to offer courses, clinicals, or other educational services regardless of modality within non-NLC states. Should you be physically located within a non-NLC state for more than a vacation or brief visit, regardless of your legal state of residence or the type of license you have, you will be unable to apply or continue your nursing degree program at the UCF College of Nursing. This includes, but is not limited to, students accepting traveling nurse positions in a non-Nurse Licensure Compact state.

**Track Prerequisites**

BSN degree from an accredited institution.*

RN license the state in which you practice.

Students with a bachelor’s degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of ‘B’ or better.

- **NUR 3805 - Dimensions of Professional Practice** 3 Credit Hours
- **NUR 4637 - Public Health Nursing** 3 Credit Hours
- **NUR 3165 - Nursing Research** 3 Credit Hours

*Licensed RNs who have completed an accredited AS in Nursing or diploma nursing program and Bachelor’s degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurseadvisor@ucf.edu for additional options.*
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution.*
- Undergraduate Statistics course.
- The GRE is not required for admission to this program.
- RN license the state in which you practice.
- Address the following 3 items in a written essay. Total word count for all (not each) answers should be 500 words or less, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe your future career plans and how the program to which you are applying will help you achieve your career goals.
  - Describe the changes you would make in your personal and professional life to ensure success in your graduate nursing education.
  - Identify one significant contemporary issue/problem in U.S. health care and explore how members of the nursing profession can help address that issue or solve that problem.
- Curriculum Vitae should reflect prior education, recent clinical/practice accomplishments, any recent scholarly work (publications, presentations, grants, research participation), awards, scholarships, additional professional certifications, volunteer activities, and membership/leadership/activities with professional organizations and community service organizations. For recent graduates, this can include accomplishments as a student.
- Requires 3 professional recommendations.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with an MSN adviser to discuss your goals for graduate study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for Masters-level preparation for advanced nursing practice.

*Licensed RNs who have completed an accredited AS in Nursing or diploma nursing program and Bachelor’s degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurseadvisor@ucf.edu for additional options.

Upon admission to the program, students will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. A student must be able to meet clinical partner background requirement to continue in the program.

The College of Nursing uses a student information management system, LEAP®RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP®RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a “hold” service indicator will be placed to prevent future enrollment and other progression functions.

Track Details

College of Nursing Master’s Program Handbook

All master’s students are required to read the College of Nursing Master’s Program Handbook regarding policies for each program and for academic progression. Information about each program, particularly clinical placements and forms for appeals to the Master’s APG Committee, are located in the Nursing MSN Handbook.

Equipment Fee

Full-time students in all Master of Science in Nursing programs pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 each semester.

Independent Learning

An independent scholarly work is a requirement for the Master of Science in Nursing degree. The scholarly work consists of an evidence-based nursing project. The scholarly project that is required in NGR 6813 (completed in the final semester of study) is an evidence-based scholarly clinical paper. The evidence-based project should reflect the latest evidence for the student's MSN track. This is a formal paper that must adhere to published guidelines in the syllabus and must be presented in a public forum.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Is this program available 100% online?

No
Program Description

Nursing Nondegree students may take nursing graduate courses as a nondegree-seeking post-baccalaureate student on a space-available basis. See the Policies section of this Catalog for details on the possible use of these courses toward a degree. Completion of post-baccalaureate courses does not guarantee admission to the graduate program or their use in a degree program.

Students should choose the Nursing Nondegree option on the application to facilitate processing of files. Students may take nursing graduate classes as a nondegree-seeking post-baccalaureate student on a space-available basis. It is possible that no courses will have space available in a given semester as students in the graduate nursing programs receive priority for enrollment. Please contact the College of Nursing Graduate Office for registration assistance at gradnurseadvisor@ucf.edu.

International students are not eligible for this status unless they hold an eligible visa. International students taking online courses from their home country are eligible to be nondegree seeking since they do not require a visa.

Please Note: In general, Nursing Nondegree students are not eligible for financial aid, assistantships, or fellowships, although it is best to check with the Office of Student Financial Assistance for specific details. Nondegree-seeking students must be enrolled in 9 credit hours or more to be considered in full-time status.

Program Prerequisites

Nursing Nondegree applicants will need to have a Bachelor's Degree from an accredited institution recognized by UCF and evidence of completion of a professional nurse education program (RN).

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to completing the online application, Nursing Nondegree applicants will need to submit official, final transcripts from a regionally accredited institution showing a conferred bachelor's degree and evidence of completion of a professional nurse education program (RN).

Nursing Nondegree students will also be required to submit an Immunization Form prior to enrollment. Although this form is not used in the admission process, students will not be allowed to enroll at UCF without submitting the required Immunization Form.

Nursing PhD
Is this program available 100% online?

Yes

UCF Online

Please note: Nursing (PhD) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description

The Doctor of Philosophy program in Nursing is designed to prepare students for positions as nursing faculty members, leaders in the application of innovative technologies to nursing education and clinical care, executive leaders in healthcare systems, and scientists who contribute to the body of nursing knowledge through their research.

The PhD in Nursing program prepares nurse scholars to possess a body of knowledge about theory, processes, and methods of inquiry in the discipline of nursing. The program allows students to contribute to disciplinary and interdisciplinary knowledge in nursing and healthcare on the basis of sound conceptual, methodological, and ethical decision-making.

Program Outcomes

At the completion of the PhD in Nursing Program, graduates will be able to:

- Conduct research to generate a body of knowledge and test theories that advance nursing science.
- Develop a program of scholarship that integrates research, teaching, leadership, and service to the profession.
- Contribute to interdisciplinary solutions that advance health care in a global society.

This degree has one track: BSN to PhD Track. Please scroll to the bottom of this page for further details on this Track.

For the Nursing PhD, total graduate credit must equal or exceed 72 credit hours. Students take 39 credit hours of required courses that focus on foundation knowledge development and research methods, 15 dissertation credit hours, and 9 credit hours of electives allowing students to gain additional expertise in the area chosen for their dissertation. Details about this program are located in the Nursing PhD Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

- BSN and either MSN or Master’s degree in a related field from an accredited institution or the equivalent.
- Licensure as a Registered Nurse in the state of Florida.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN and either MSN or Master's degree in a related field from an accredited institution or the equivalent.
- Licensure as a Registered Nurse in the state of Florida.
- An essay of no more than 500 words addressing goals for doctoral study to knowledge development for Nursing.
- A personal interview.
- Research interests that match faculty expertise.
- Resume/Curriculum Vitae which reflects prior education, recent clinical accomplishments, any scholarly work (publications and presentations), and activities with professional organizations. For recent graduates, this can include accomplishments as a student.
- Three letters of recommendation evaluating the potential for doctoral study preferably by nursing instructors, nurse employers or nurses with advanced degrees.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

The College of Nursing accepts the most qualified students based on evaluations of the applicant's abilities, past performance, recommendations and match of UCF programs with the applicant's career goals. Students are admitted to the program in the summer for the program of study.

The College of Nursing uses a student information management system, LEAP*RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP*RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a "hold" service indicator will be placed to prevent future enrollment and other progression functions.

Please call the College of Nursing Graduate Office (407) 823-0133 to speak with a doctoral adviser to discuss your goals for doctoral study. It would be very advantageous to discuss the program before you write your essay in the admission application.

  - NGR7807 - Research Approaches and Designs for Nursing and Healthcare  (3)
  - NGR7812 - Advanced Study Design and Methods  (3)
  - NGR7823 - Psychometrics and Measurement for Nursing Research  (3)

- Earn at least 6 credits from the following:
  - NGR7919 - Doctoral Research  (1 - 99)

Elective Courses
9 Total Credits

- Earn at least 9 credits from the following types of courses:
  - The supporting course work is designed to permit students to gain additional expertise and knowledge in the area chosen for the dissertation. These courses may vary from student to student depending upon individual needs or objectives. Course selection should be influenced by the following criteria: Increase in understanding of the phenomenon of interest Increase in understanding of specific methodologies or analytical techniques relevant to the student's dissertation. Exposure to experiences relevant to the phenomenon of interest or methodological elements relevant to the student's dissertation. The UCF College of Nursing strongly encourages all PhD students to actively seek out interdisciplinary supporting courses including those offered by other disciplines. All supporting courses must be approved by the student's faculty adviser or dissertation committee chairperson.

Dissertation Research
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  - NGR 7980 - Dissertation Research The dissertation research addresses the design and conduct of research that advances nursing science. Students conduct the dissertation in areas of faculty interest and expertise. Students are required to complete at least 15 credit hours of dissertation and are required to register for 3 credit hours of dissertation each semester until they complete the degree requirements.

Doctoral Research
0 Total Credits

- The course NGR 7919 Doctoral Research is designed for students to gain research experience with a faculty researcher. Students must obtain permission from the faculty member before registering for this course and complete the College of Nursing doctoral research form. The purpose of this course is for students to have an experience with research in addition to that of the dissertation. This course is not to be used as a pilot study for the student's dissertation.

Admission to Candidacy and Examinations
0 Total Credits

- The process for candidacy will start with the appointment of the full dissertation advisory committee including the external member. The Candidacy Examination has both written and oral components. When these are completed successfully, the student becomes a doctoral candidate and is eligible to enroll in dissertation credits. When candidacy status is obtained, the student must enroll in at least three-semester credits of dissertation credit each semester until successful oral defense of the dissertation is made and all graduation requirements are completed. The university requires a minimum of 15 dissertation credits. Post-candidacy status is subject to the rules and regulations of the University of Central Florida Graduate Catalog. The following are required to enroll in dissertation hours. Evidence that items have been completed must be received by the UCF Graduate College on the Friday before the first day of classes for those who wish to enroll in dissertation hours in that semester. - Completion of all coursework, except for dissertation hours. - Successful completion of the candidacy examination. - The dissertation advisory committee is formed, consisting of approved graduate faculty, graduate faculty scholars, and the approved external member. - Submittal of an approved program of study (should be finalized by the student's third semester).

Grand Total Credits: 63
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Is this track available 100% online?
Yes

UCF Online

Please note: Nursing (PhD) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.
**Track Description**

The Doctor of Philosophy program in Nursing is designed to prepare students for positions as nursing faculty members, leaders in the application of innovative technologies to nursing education and clinical care, executive leaders in healthcare systems, and scientists who contribute to the body of nursing knowledge through their research. The BSN to PhD track is designed to support students in completing the PhD in a timely fashion to provide for a longer research career.

The PhD in Nursing program prepares nurse scholars to possess a body of knowledge about theory, processes, and methods of inquiry in the discipline of nursing. The program allows students to contribute to disciplinary and interdisciplinary knowledge in nursing and healthcare on the basis of sound conceptual, methodological, and ethical decision-making. Students in the BSN to PhD track will have focused support in grant writing for programs such as the National Research Service Award (NRSA). Although courses will be offered online, students are expected to actively engage in research activities with faculty, which may require on-campus time.

**Program Outcomes**

At the completion of the PhD in Nursing Program, graduates will be able to:

- Conduct research to generate a body of knowledge and test theories that advance nursing science.
- Develop a program of scholarship that integrates research, teaching, leadership, and service to the profession.
- Contribute to interdisciplinary solutions that advance health care in a global society.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit [http://global.ucf.edu/](http://global.ucf.edu/). If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to [State Restrictions](#) for current information.

**Track Prerequisites**

- A Bachelor's Degree in nursing from an accredited institution or the equivalent.
- Licensure as a Registered Nurse in the state of Florida. (Does not apply to international applicants).

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor's Degree in nursing from an accredited institution or the equivalent.
- Licensure as a Registered Nurse in the state of Florida. (Does not apply to international applicants).
- An essay of no more than 500 words addressing goals for doctoral study to knowledge development for Nursing.
- A personal interview.
- Research interests that match faculty expertise.
- Resume/Curriculum Vitae which reflects prior education, recent clinical accomplishments, any scholarly work (publications and presentations), and activities with professional organizations. For recent graduates, this can include accomplishments as a student.
- Three letters of recommendation evaluating the potential for doctoral study preferably by nursing professors, nurse employers or nurses with advanced degrees.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from [World Education Services (WES)](http://www.wes.org) or [Josef Silny and Associates, Inc.](http://www.jsaonline.com) only.

The College of Nursing accepts the most qualified students based on evaluations of the applicant's abilities, past performance, recommendations and match of UCF programs with applicant's career goals. Students are admitted to the program in the summer for the program of study.

The College of Nursing uses a student information management system, LEAP*RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP*RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at [https://secure.projectconcert.com/ucf](https://secure.projectconcert.com/ucf) and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a "hold" service indicator will be placed to prevent future enrollment and other progression functions.

Please call the College of Nursing Graduate Office (407) 823-0133 to speak with a doctoral adviser to discuss your goals for doctoral study. It would be very advantageous to discuss the program before you write your essay in the admission application.

Degree Requirements

Foundation Areas
9 Total Credits

- Complete the following:
  - NGR7952 - Scientific Writing for Nurses and Healthcare Professionals (3)
  - NGR7115 - Philosophical and Ethical Foundations of Nursing Science (3)
  - NGR7123 - Theory in Nursing Science (3)

Research Methods
33 Total Credits

- Complete all of the following
  - Complete the following:
    - NGR7807 - Research Approaches and Designs for Nursing and Healthcare (3)
    - NGR7815 - Qualitative Methods in Nursing Research and Healthcare I (3)
    - NGR7817 - Quantitative Methods for Nursing and Healthcare I (3)
    - NGR7818 - Quantitative Methods for Nursing and Healthcare II (3)
    - NGR7812 - Advanced Study Design and Methods (3)
    - NGR7823 - Psychometrics and Measurement for Nursing Research (3)
    - NGR7916 - Research Grants Process and Proposal Writing (3)
    - NGR7932 - Nursing Research Grants Process and Proposal Writing (3)
  - Earn at least 9 credits from the following:
    - NGR7919 - Doctoral Research (1 - 99)

Elective Courses
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  - Students must take three courses (9 credit hours) of supporting course work. The supporting course work is designed to permit students to gain additional expertise and knowledge in the area chosen for the dissertation. These courses may vary from student to student depending upon individual needs or objectives. Course selection should be influenced by the following criteria: Increase in understanding of the phenomenon of interest Increase in understanding of specific methodologies or analytical techniques relevant to the student's dissertation. Exposure to experiences relevant to the phenomenon of interest or methodological elements relevant to the student's dissertation. The UCF College of Nursing strongly encourages all PhD students to actively seek out interdisciplinary supporting courses including those offered by other disciplines. In addition to supporting courses, students will select two elective courses (6 credits) to broaden their knowledge in a general topical area. All elective and supporting courses must be approved by the student's faculty adviser or dissertation committee chairperson.

Dissertation Research
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  - NGR 7980 - Dissertation Research The dissertation research addresses the design and conduct of research that advances nursing science. Students conduct the dissertation in areas of faculty interest and expertise. Students are required to complete at least 15 credit hours of dissertation and are required to register for 3 credit hours of dissertation each semester until they complete the degree requirements.

Doctoral Research
0 Total Credits

- The course NGR 7919 Doctoral Research is designed for students to gain research experience with a faculty researcher. Students must obtain permission from the faculty member before registering for this course and complete the College of Nursing doctoral research form. The purpose of this course is for students to have an experience with research in addition to that of the dissertation.

Admission to Candidacy and Examinations
0 Total Credits

- The process for candidacy will start with the appointment of the dissertation advisory committee. The Candidacy Examination has both written and oral components. When these are completed successfully, the student becomes a doctoral candidate and is eligible to enroll in dissertation credits. When candidacy status is obtained, the student must enroll in at least three-semester credits of dissertation credit each semester until successful oral defense of the dissertation is made and all graduation requirements are completed. The university requires a minimum of 15 dissertation credits. Post-candidacy status is subject to the rules and regulations of the University of Central Florida Graduate Catalog. Students are required to complete the following prior to scheduling their candidacy examination: Submittal of an approved program of study (should be finalized by the student's third semester). Completion of all coursework, except for dissertation hours. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Following successful completion of the candidacy examination, the student may enroll in dissertation hours. Evidence that items have been completed must be received by the Graduate College on the Friday before the first day of classes for those who wish to enroll in dissertation hours in that semester.

Grand Total Credits: 72
**Track Details**

Students in the Nursing BSN to PhD program must complete all course work with GPA of 3.0 ("B") or better, a satisfactory dissertation and defense of dissertation.

**Equipment Fee**

Full-time students in the Nursing PhD program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 each semester.

**Independent Learning**

The dissertation satisfies the independent learning experience.

**Financial Information**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit https://apq.ucf.edu/licensure-programs/.
Program Description

The Doctor of Nursing Practice (DNP) program prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP Project.

The program offers five tracks: Adult/Gerontology Acute Care Nurse Practitioner, Adult/Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Advanced Practice DNP, and Nurse Executive DNP. Please scroll to the bottom of this page for further details on these tracks.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

Note for International Students: Please contact the College of Nursing at gradnurse@ucf.edu or 407-823-2744 prior to applying to this online program.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

Licensure Disclosure

Graduates of this program are eligible to sit for the Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) National Board Certification Examination offered by the American Nurses Credentialing Center or the Acute Care Nurse Practitioner-Adult Gerontology (ACNP-AG) National Board Certification Examination offered by the American Association of Critical Care Nurses. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Adult-Gerontology-Acute-Care-DNP.pdf.
Track Description

The Doctor of Nursing Practice (DNP) program in the Adult-Gerontology Acute Care Nurse Practitioner Track prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP project.

The Adult-Gerontology Acute Care Nurse Practitioner Track prepares the advanced practice nurse to care for patients with medically complex stable and unstable acute, critical and chronic illnesses across care settings ranging from hospitals to subacute, ambulatory care, clinic and home care environments at the DNP level, incorporating DNP essentials in practice with a culminating DNP project.

Graduates of this program are eligible to sit for the Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) National Board Certification Examination offered by the American Nurses Credentialing Center or the Acute Care Nurse Practitioner-Adult Gerontology (ACNP-AG) National Board Certification Examination offered by the American Association of Critical Care Nurses. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Adult-Gerontology-Acute-Care-DNP.pdf.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems and disseminate findings.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

The DNP Adult-Gerontology Acute Care Nurse Practitioner track requires a minimum of 76 credit hours beyond the baccalaureate degree. The curriculum includes 39 credits of core courses shared with other DNP tracks, 14 credits of APN core and 23 credits of specialty courses. A total of 1,080 practicum hours are required to earn the DNP. The program prepares nurses at the entry level for advanced practice for the current healthcare system based on a strong scientific foundation for practice; offers flexibility and emphasis on evidence-based practice, leadership and organizational analysis; and provides analytic, critical thinking and diagnostic reasoning skills to examine practice innovations involving completion of the residency project during the clinical residency courses. Details about this program are in the Advanced Practice DNP Handbook.

Total Credit Hours Required: 76 Credit Hours Minimum beyond the Bachelor’s Degree

Track Prerequisites

- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.

*For Students with an RN license and a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu or 407-823-2744 for additional options.

Students with a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of 'B' or better.

- NUR 3805 - Dimensions of Professional Practice 3 Credit Hours
- NUR 4637 - Public Health Nursing 3 Credit Hours
- NUR 3165 - Nursing Research 3 Credit Hours
**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)
- Current certification as an advanced cardiac life support (ACLS) and basic life support (BLS) provider.
- Address the following 3 items in a written essay. Responses to questions should not exceed 1 page, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe how earning a Doctor of Nursing Practice in the track to which you applied will help you achieve your personal and professional goals.
  - Explain those personal and professional experiences that have helped prepare you for doctoral study and your readiness for doctoral study at this time.
  - The final DNP project focuses on implementation of an evidence-based change that impacts healthcare outcomes through direct or indirect care from a systems or population/aggregate focus. Describe an area of interest you believe could be improved through such a project.
- Curriculum Vitae: CV should reflect prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates, this can include accomplishments as a student
- Requires 3 professional recommendations
- An interview with faculty may also be required.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

*For Students with an RN license and a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu or 407-823-2744 for additional options.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with a DNP adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice.

Upon admission to the program student will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. Students must be able to meet clinical partner background requirements to continue in the program.

The College of Nursing uses a student information management system, LEAP*RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP*RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a "hold" service indicator will be placed to prevent future enrollment and other progression functions.

  - NGR7912C - Doctoral Project 2 (3)
  - NGR7913 - Doctoral Project 3 (3)

DNP Project
0 Total Credits

- The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base. DNP projects may include but are not limited to: Translate research into practice and evaluate outcomes Quality improvement (care processes, continuity of care, patient outcomes) Implement and evaluate evidence-based practice guidelines Analyze policy: develop, implement, evaluate or revise policy Design and use databases to retrieve information for decision making, planning, evaluation Conduct financial analyses to compare care models and potential cost savings, etc. Design and evaluate new models of care Design and evaluate health promotion and disease prevention programs Assess integration of technology in care The theme that links these forms of scholarly experiences is the use of evidence to improve either practice or patient outcomes. Additional examples of DNP projects can be found on the National Organization of Nurse Practitioner Faculty (NONPF) website under Practice Doctorate Resource Center.

Grand Total Credits: 76
Track Details

Progress to Degree

Students are required to maintain a 3.0 grade point average. Students who receive a grade below "B" in any course will be reviewed by the DNP Admissions, Progression and Graduation Committee for continuation in the program. Grades of below "B" are not acceptable in the doctoral program in the College of Nursing. Students who do not maintain a 3.0 GPA will be put on probation or dismissed from the program.

Graduation Requirements

- All course work completed with a minimum grade of "B"
- A satisfactory DNP Project
- Clinical performance evaluated at a satisfactory level
- A satisfactory public presentation of the DNP Project

Independent Learning

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from clinical practice, will be developed in depth with faculty supervision.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

No

Licensure Disclosure
The DNP Adult/Gerontology Primary Care Nurse Practitioner Track prepares students to care for primary care patients from adolescence through old age in primary care and home care settings, incorporating DNP essentials in practice with a culminating DNP project. Graduates of this program are eligible to sit for the Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) National Board Certification Examination offered by the American Academy of Nurse Practitioners Certification Board or the American Nurses Credentialing Center. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Adult-Gerontology-Primary-Care-DNP.pdf.

Track Description
The Doctor of Nursing Practice (DNP) program in the Adult/Gerontology Primary Care Nurse Practitioner Track prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP project.

Program Objectives
The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems and disseminate findings
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate finding.

The DNP Adult/Gerontology Primary Care Nurse Practitioner track requires a minimum of 72 credit hours beyond the baccalaureate degree. The curriculum includes 39 credits of core courses shared with other DNP tracks, 14 credits of APN core and 19 credits of specialty courses. A total of 1,080 practicum hours are required to earn the DNP. The program prepares nurses at the entry level for advanced practice for the current healthcare system based on a strong scientific foundation for practice; offers flexibility and emphasis on evidence-based practice, leadership and organizational analysis; and provides analytic, critical thinking and diagnostic reasoning skills to examine practice innovations involving completion of the residency project during the clinical residency courses. Details about this program are located in the Advanced Practice DNP Adult-Gerontology DNP Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites
- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)

*For Students with an RN license and a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu for additional options.

Students with a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of 'B' or better.

- NUR 3805 - Dimensions of Professional Practice 3 Credit Hours
- NUR 4637 - Public Health Nursing 3 Credit Hours
- NUR 3165 - Nursing Research 3 Credit Hours
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Official, competitive GRE score taken within the last five years.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)
- Address the following 3 items in a written essay. Responses to questions should not exceed 1 page, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe how earning a Doctor of Nursing Practice in the track to which you applied will help you achieve your personal and professional goals.
  - Explain those personal and professional experiences that have helped prepare you for doctoral study and your readiness for doctoral study at this time.
  - The final DNP project focuses on implementation of an evidence-based change that impacts healthcare outcomes through direct or indirect care from a systems or population/aggregate focus. Describe an area of interest you believe could be improved through such a project.
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates, this can include accomplishments as a student.
- Requires 3 professional recommendations
- An interview with faculty may also be required.

*For Students with an RN license and a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu for additional options.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at 407-823-2744 to schedule an appointment with a DNP adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice.

Upon admission to the program, the student will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. Students must be able to meet clinical partner background requirements to continue in the program.

The College of Nursing uses a student information management system, LEAP*RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP*RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a “hold” service indicator will be placed to prevent future enrollment and other progression functions.

Yes

UCF Online

Please note: Nursing (DNP) - Advanced Practice may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

You may pursue this UCF College of Nursing online program as long as you will be physically located in a Nurse Licensure Compact (NLC) state for the duration of your education.

UCF College of Nursing faculty is authorized to teach in NLC states. Due to nursing education restrictions imposed by non-NLC states, UCF is unable to offer courses, clinicals, or other educational services regardless of modality within non-NLC states. Should you be physically located within a non-NLC state for more than a vacation or brief visit, regardless of your legal state of residence or the type of license you have, you will be unable to apply or continue your nursing degree program at the UCF College of Nursing. This includes, but is not limited to, students accepting traveling nurse positions in a non-Nurse Licensure Compact state.

Licensure Disclosure

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-DNP-Online-Advanced-Practice.pdf

Track Description

The Doctor of Nursing Practice (DNP) program prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP Project.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems and disseminate findings.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

For the Doctor of Nursing Practice (DNP), total graduate credit must equal or exceed 72 credit hours. Students take 27 credit hours of core courses, 9 hours of electives, and 6 credit hours of a DNP Project. The total clinical hours (including those hours accrued in the MSN degree) will be 1000. The core courses have been carefully constructed to incorporate the AACN competencies for DNP graduates. Details about this program are located in the Nursing DNP Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Students will take course work that incorporates The Essentials of Doctoral Education for Advanced Nursing Practice [American Association of Colleges of Nursing (AACN), 2006]. The Essentials address the following:

1. Scientific underpinning for practice
2. Organizational and systems leadership for quality improvement and systems thinking
3. Clinical scholarship and analytical methods for evidence-based practice
4. Information systems/technology and patient care technology for the improvement and transformation of health care
5. Health care policy for advocacy in health care
6. Inter-professional collaboration for improving patient and population health outcomes
7. Clinical prevention and population health for improving the nation's health
8. Advanced nursing practice

Track Prerequisites

- MSN degree in an APRN specialty role or a post-MSN certificate (NP, CNS, CRNA, CNM) from an accredited institution.
- Certification as an APRN or ability to obtain it in the first semester of enrollment is required.
- Advanced Practice Registered Nurse (APRN) licensure in the state in which you practice.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- MSN degree in an APRN specialty role or a post-MSN certificate (NP, CNS, CRNA, CNM) from an accredited institution.
- The GRE is not required for admission to this program.
- Certification as an APRN or ability to obtain it in the first semester of enrollment is required.
- Advanced Practice Registered Nurse (APRN) licensure in the state in which you practice.
- Documentation of the number of clinical hours completed during master's program. Acceptable documents are license exam application form or the attached.
- A personal interview may be required with two members of the College of Nursing Doctoral Committee.
- Address the following 3 items in a written essay. Responses to all 3 questions should not exceed 500 words, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe how earning a Doctor of Nursing Practice in the track to which you applied will help you achieve your personal and professional goals.
  - Explain those personal and professional experiences that have helped prepare you for doctoral study and your readiness for doctoral study at this time.
  - The final DNP project focuses on the implementation of an evidence-based change that impacts healthcare outcomes through direct or indirect care from a systems or population/aggregate focus. Describe an area of interest you believe could be improved through such a project.
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations.
- Requires 3 professional recommendations
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at (407) 823-2744 to schedule an appointment with a DNP adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice.

Upon admission to the program, student will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. Students must be able to meet clinical partner background requirements to continue in the program.

Documentation of the number of clinical hours completed during master’s program will need to be submitted. Acceptable documents are license exam application form completion of the Verification of Clinical Hours Form.

The College of Nursing uses a student information management system, LEAP*RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP*RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. Track Description

The Executive Track in the Doctor of Nursing Practice (DNP) program is a dynamic and engaging academic curriculum that prepares the nurse executive for the multiple dimensions of administrative responsibilities within varied healthcare environments. The Executive DNP track extends and enhances the knowledge, skill, and performance of healthcare system leaders in a wide variety of clinical and administrative environments.

The DNP Executive Track meets the unique needs and taps the talent of nurse executives through experiential learning and leadership projects in a team-centered environment. It provides enrolled executives the opportunity to interact with prominent healthcare experts who address emergent and challenging issues for nurse leaders and encourages networking with colleagues across local and state healthcare and policy organizations.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems and disseminate findings.
- Assume leadership roles in the development of clinical practice models, health policy, and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological, and other scientific data to improve individual, aggregate, and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and health care systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

The Executive Track in the Doctor of Nursing Practice program prepares nurses at the highest level of practice for the current healthcare environment based on a strong scientific foundation for practice; offers flexibility and emphasis on evidence-based practice, leadership, and organizational analysis, and provides analytic skills to examine practice innovations. Details about this program are located in the Executive DNP Handbook. For the Doctor of Nursing Practice (DNP), total graduate credit must equal or exceed 42 credit hours.

Total Credit Hours Required: 42 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

- MSN with a leadership or healthcare systems focus (e.g., Nursing Administration, Healthcare Systems, or Leadership) or Master’s Degree in a related administration field (e.g., MBA, MHA, or MPA) from an accredited institution.
- Applicants with an MSN with a non-leadership focus will be considered for conditional admission. Qualified applicants will be required to complete 9 credit hours, NGR 5720 Organizational Dynamics, NGR 6722 Financial Management and Resource Development, NGR 6723 Nursing Leadership and Management prior to beginning DNP courses. Additional practicum hours will be required.
- RN license the state in which you practice.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- MSN with a leadership or healthcare systems focus (e.g., Nursing Administration, Healthcare Systems, or Leadership) or Master's Degree in a related administration field (e.g., MBA, MHA, or MPA) from an accredited institution.
- The GRE is not required for admission to this program.
- Applicants with an MSN with a non-leadership focus will be considered for conditional admission. Qualified applicants will be required to complete 9 credit hours, NGR 5720 Organizational Dynamics, NGR 6722 Financial Management and Resource Development, NGR 6723 Nursing Leadership and Management prior to beginning DNP courses. Additional practicum hours will be required.
- RN license the state in which you practice.
- Address the following 3 items in a written essay. Responses to all 3 questions should not exceed 500 words, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe how earning a Doctor of Nursing Practice in the track to which you applied will help you achieve your personal and professional goals.
  - Explain those personal and professional experiences that have helped prepare you for doctoral study and your readiness for doctoral study at this time.
  - The final DNP project focuses on the implementation of an evidence-based change that impacts healthcare outcomes through direct or indirect care from a systems or population/aggregate focus. Describe an area of interest you believe could be improved through such a project.
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, professional certifications, and activities with professional organizations.
- Requires 3 professional recommendations.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at (407) 823-2744 to schedule an appointment with a DNP adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice.

Documentation of the number of clinical hours completed during master’s program. Acceptable documents are your license exam application form completion of the Verification of Clinical Hours Form

Upon admission to the program, the student will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. Students must be able to meet clinical partner background requirements to continue in the program.

The College of Nursing uses a student information management system, LEAP*RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP*RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a "hold" service indicator will be placed to prevent future enrollment and other progression functions.

Degree Requirements

Required Courses
27 Total Credits

- Complete the following:
  - NGR6874 - Nursing Environment Management (3)
  - NGR7673 - Epidemiology Principles in Advanced Practice Nursing (3)
  - NGR7793 - Leadership and Economics in Advanced Practice Nursing (3)
  - NGR7827 - Concepts, Measurement, and Data Management (3)
  - NGR7820 - Innovative Technologies in Healthcare (3)
  - NGR7892 - Healthcare Systems and Policy (3)
  - NGR7855C - Evidence-Based Practice Development for DNP (3)
  - NGR7779C - Program Development and Management for DNP (3)
  - NGR7778L - Advanced Leadership Selective for DNP (3)

Elective
3 Total Credits

- Earn at least 3 credits from the following types of courses:
  - Graduate Elective (chosen from an approved list)

DNP Executive Residency
3 Total Credits

- Complete all of the following
  - The DNP Residency provides an in-depth clinical experience for students. This advanced practice experience provides the opportunity to link policy making with clinical systems, translate research into practice and serve as change agents for health care.
  - Complete the following:
    - NGR7976L - Executive DNP Residency (3)

DNP Professional Practice Immersion
0 Total Credits

- DNP clinical requirements are 1000 hours post-baccalaureate. Immersion hours depend upon record review of hours completed at the master's level. NGR 7942L - DNP Professional Practice Immersion VAR Credit Hours (60-180 practice hours) Can be repeated.

DNP Project
9 Total Credits

- Complete all of the following
  - The DNP Project is the product of the culminating or comprehensive experience of an independent project that demonstrates application of advanced clinical and evidence-based practice. The DNP Project is guided and evaluated by an academic committee. It will serve as a foundation for future scholarly practice. The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base.
  - Complete the following:
    - NGR7911C - Doctoral Project 1 (3)
    - NGR7912C - Doctoral Project 2 (3)
    - NGR7913 - Doctoral Project 3 (3)

Grand Total Credits: 42
Track Details

Practicum Experience and Sponsor Requirements and Responsibilities:

Practicum experience hours in nursing leadership must be completed in the graduate educational program in accordance with current accrediting bodies. Additional practicum experience hours may be required to demonstrate executive leadership competence.

Students are required to secure a sponsor within an organization to coach, mentor and guide the student related to their learning activities. Students pursuing a DNP degree in Executive Leadership need guidance in applying their course content to executive nursing practice and planning, implementing, and evaluating an evidence-based practice project.

Practice hours for the Executive DNP are typically accrued by a student working independently in his or her organization related to course objectives or the DNP Project. The sponsor provides guidance to the student on the development of their leadership role. They also provide assistance in gaining access to resources or personnel that are needed to plan, implement, and evaluate their practice improvement project. They work with the student to identify organizational needs and priorities so the student can provide value to the organization.

Independent Learning

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from systems leadership practice, will be developed in depth with faculty supervision.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Licensure Disclosure

Upon completion of this program, students are eligible to sit for the Family Nurse Practitioner (FNP) National Board Certification Examination offered by the American Academy of Nurse Practitioners Certification Board or the American Nurses Credentialing Center. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Family-Nurse-Practitioner-DNP.pdf.

Track Description

The Doctor of Nursing Practice (DNP) program in the Family Nurse Practitioner Track prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP project.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

The DNP Family Nurse Practitioner Track allows requires a minimum of 75 credit hours beyond the baccalaureate degree. The curriculum includes 39 credit hours of core courses shared with other DNP tracks, 14 credits of APN core and 22 credits of specialty courses. A total of 1,080 practicum hours are required to earn the DNP. The program prepares nurses at the entry level for advanced practice for the current healthcare system based on a strong scientific foundation for practice; offers flexibility and emphasis on evidence-based practice, leadership and organizational analysis; and provides analytic, critical thinking and diagnostic reasoning skills to examine practice innovations involving completion of the residency project during the clinical residency courses. Details about this program are located in the Advanced Practice DNP Family Nurse DNP Handbook.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)

*For Students with an RN and a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu for additional options.

Students with a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of 'B' or better.

- NUR 3805 - Dimensions of Professional Practice 3 Credit Hours
- NUR 4637 - Public Health Nursing 3 Credit Hours
- NUR 3165 - Nursing Research 3 Credit Hours
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)
- Address the following 3 items in a written essay. Responses to questions should not exceed 1 page, double-spaced, 12 point Times New Roman font, and 1-inch margins:
  - Describe how earning a Doctor of Nursing Practice in the track to which you applied will help you achieve your personal and professional goals.
  - Explain those personal and professional experiences that have helped prepare you for doctoral study and your readiness for doctoral study at this time.
  - The final DNP project focuses on implementation of an evidence-based change that impacts healthcare outcomes through direct or indirect care from a systems or population/aggregate focus. Describe an area of interest you believe could be improved through such a project.
- Curriculum Vitae which reflects prior education, recent clinical accomplishments, any recent scholarly work (publications and presentations), awards, additional certifications, and activities with professional organizations. For recent graduates, this can include accomplishments as a student.
- Requires 3 professional recommendations
- An interview with faculty may also be required.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

*For Students with an RN and a Bachelor’s degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu for additional options.

Before submitting your application, it is recommended that applicants call the College of Nursing Graduate Office at (407) 823-2744 to schedule an appointment with a DNP adviser to discuss your goals for doctoral study. It is advantageous to discuss the program before writing the required essay because the essay must address your goals for doctoral-level preparation for advanced nursing practice.

Upon admission to the program, the student will be required to complete FDLE/FBI fingerprinting and certified background checks, and health screening. Students must be able to meet clinical partner background requirements to continue in the program.

The College of Nursing uses a student information management system, LEAP*RN (Project Concert). This database houses information regarding plans of study, clinical placements, clinical hours, logs, and evaluation data to assist in maintaining standards required for CCNE accreditation, facilitate student progression, and enhance clinical tracking. Students will need to access LEAP*RN for clinical course requirements, course evaluations, and portfolios. Upon graduation, students will continue to have no-cost access to their information. All students will be responsible for a one-time subscription of $150 per degree program payable at https://secure.projectconcert.com/ucf and due prior to registering for first semester courses. If students register for courses prior to paying the subscription, a "hold" service indicator will be placed to prevent future enrollment and other progression functions.

  - NGR6305L - Pediatric Primary Care Clinical (2)
  - NGR6334 - Women's Health for APNs (2)
  - NGR6342L - Women's Health for APNs Clinical (1)
  - NGR6248L - Family Nurse Practitioner/Adult-Gero Nurse Practitioner Practice Practicum (3)

DNP Core Courses
39 Total Credits

- Complete all of the following
  - The DNP courses serve to enhance the skill and science base of the graduate and strengthen the focus on research utilization. Safety and efficiency in health care systems is addressed and organizational and policy implications are emphasized within the context of care delivery. An emphasis is placed on evidence-based practice, state-of-the-art interventions and information fluency.
  - Complete the following:
    - NGR5800 - Theory for Advanced Practice Nursing (3)
    - NGR6801 - Research Methods (3)
    - NGR6874 - Nursing Environment Management (3)
    - NGR7065 - Advanced Clinical Management for Advanced Practice Nursing (3)
    - NGR7673 - Epidemiology Principles in Advanced Practice Nursing (3)
    - NGR7793 - Leadership and Economics in Advanced Practice Nursing (3)
    - NGR7820 - Innovative Technologies in Healthcare (3)
    - NGR7827 - Concepts, Measurement, and Data Management (3)
    - NGR7855C - Evidence-Based Practice Development for DNP (3)
    - NGR7892 - Healthcare Systems and Policy (3)
    - NGR7911C - Doctoral Project 1 (3)
    - NGR7912C - Doctoral Project 2 (3)
    - NGR7913 - Doctoral Project 3 (3)

DNP Project
0 Total Credits

- The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base. DNP projects may include but are not limited to: Translate research into practice and evaluate outcomes, Quality improvement (care processes, continuity of care, patient outcomes) Implement and evaluate evidence-based practice guidelines, Analyze policy: develop, implement, evaluate or revise the policy Design and use databases to retrieve information for decision making, planning, evaluation Conduct financial analyses to compare care models and potential cost savings, etc. Design and evaluate new models of care, Design and evaluate health promotion and disease prevention programs, Assess integration of technology in care. The theme that links these forms of scholarly experiences is the use of evidence to improve either practice or patient outcomes. Additional examples of DNP projects can be found on the National Organization of Nurse Practitioner Faculty (NONPF) website under Practice Doctorate Resource Center.

Grand Total Credits: 75
Track Details

Progress to Degree

Students are required to maintain a 3.0 grade point average. Students who receive a grade of below "B" in any course will be reviewed by the DNP Admissions, Progression and Graduation Committee for continuation in the program. Grades of below B are not acceptable in the doctoral program in the College of Nursing. Students who do not maintain a 3.0 GPA will be put on probation or dismissed from the program.

Graduation Requirements

- All course work completed with a minimum grade of "B"
- A satisfactory DNP Project
- Clinical performance evaluated at a satisfactory level
- A satisfactory public presentation of the DNP Project

Independent Learning

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from clinical practice, will be developed in depth with faculty supervision.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Is this program available 100% online?

Yes
Please note: Applied Photonics Graduate Certificate may be completed fully online although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description

The Applied Photonics Graduate Certificate is designed to provide working professionals with knowledge and training in applied photonics to enhance their career opportunities and meet their current responsibilities.

The certificate program compliments their technical backgrounds in science and engineering with the basic principles and applications of photonics engineering in fiber communication systems, lasers, medicine, and aerospace and defense photonics.

Application Requirements

Admission is open to those with a bachelor’s degree in electrical engineering, physics, or a closely related discipline from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition, applicants to this certificate must provide:

Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc only.

Applications are accepted for the fall and spring terms only.

Is this program available 100% online?
Yes

UCF Online
Please note: Optics and Photonics MS may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description
The Master of Science in Optics and Photonics program is intended for students with a bachelor's degree in optics, electrical engineering, physics, or closely related fields. The program is interdisciplinary and combines optical science and engineering.

The College of Optics and Photonics offers an interdisciplinary graduate program in optical science and engineering leading to a Master of Science in Optics and Photonics. The college has grown rapidly and now has 55 faculty members and faculty with joint appointments, 41 research scientists and 148 graduate students with research activities covering all aspects of optics, photonics, and lasers. Research expenditures are over $10 million annually, with over 20 percent of the funding coming from industrial partners, illustrating the effectiveness of the commitment to partnerships that is a foundational value of the COP.

Research activities cover all aspects of optics, photonics, and lasers, and the Center for Research and Education in Optics and Lasers (CREOL), the Florida Photonics Center of Excellence (FPCE), and the Townes Laser Institute (TLI) are integral parts of the College. Current research areas include: linear and nonlinear guided-wave optics and devices, high speed photonic telecommunications, fiber optic fabrication, fiber optic communications, solid state laser development, nonlinear optics, laser-induced damage, quantum-well optoelectronics, quantum optics, photonic information processing, infrared systems, optical diagnostics, optical system design, image analysis, virtual reality, medical imaging, diffractive optics, optical crystal growth and characterization, high intensity lasers, X-ray optics, EUV sources, optical glasses, laser materials processing, free-electron lasers, and light matter interaction.

The MS program is intended for students with a bachelor's degree in optics, electrical engineering, physics, or closely related fields. The program's mission is to:

- Provide the highest-quality education in optical science and engineering
- Conduct scholarly, fundamental, and applied research
- Aid in the development of Florida's and the nation's technology-based industries

This degree has 3 tracks: International Track, Optics Track and Photonics Track. Please scroll to the bottom of this page for further details on these Tracks.

Program Prerequisites
A bachelor's degree in Optics, Electrical Engineering, Physics, or closely related fields.

Students with degrees in related fields may be required to take undergraduate articulation courses determined by the program director on a case-by-case basis.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Optics, Electrical Engineering, Physics, or closely related fields.
- The GRE is not required for admission to this program.
- Personal Statement: a brief 1 page or less statement about educational, research, and long-term professional career objectives.
- Three letters of recommendation.
- Résumé.
- Applicants applying to this program who have attended a college/university outside the United States must provide a credential evaluation showing an equivalent bachelor's degree in the U.S. A course-by-course evaluation must be provided, with a GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Students with degrees in related fields may be required to take undergraduate articulation courses determined by the program director on a case-by-case basis.

TOEFL: 5233
ETS PPI: 5233
Degree Requirements

Required Core Courses
9 Total Credits

- Complete all of the following
  - Take the following:
    - OSE5115 - Interference and Diffraction (3)
    - OSE6111 - Optical Wave Propagation (3)
    - OSE5525 - Laser Engineering (3)
  - OSE 6536 Semiconductor Lasers may be used as a substitute for OSE 5525 Laser Engineering

Elective Courses
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section. Other courses with significant optics content may be accepted towards the Optics (OSE) course work requirement, upon approval by the Associate Dean.

Comprehensive Examination
0 Total Credits

- An oral master's comprehensive examination, based on the core courses (OSE 5115 Interference, Diffraction and Coherence, OSE 6111 Optical Wave Propagation, and OSE 5525 Laser Engineering) must be passed as a graduation requirement for the MS degree in Optics and Photonics. Students will be required to take this exam within one semester after completing the core courses. The exam may be taken twice. After failing on the second attempt, the student will be required to re-take the courses covering the areas in which the examination committee determined the student to be deficient. The retaken courses must be passed with a minimum grade of B+ in order for the student to graduate. This Comprehensive Examination requirement may be satisfied by passing the Optics and Photonics PhD Qualifying exam.

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following:
  - Thesis
    - Complete all of the following
      - Earn at least 6 credits from the following:
        - OSE6971 - Special Topics (1 - 99)
        - The thesis option requires at least 6 credit hours of thesis research. Independent study and directed research credit hours are not allowed toward the degree requirements. The student must prepare an approved program of study and form a thesis committee upon completion of nine credit hours. The MS thesis committee consists of three members, with at least two regular graduate faculty members from the College of Optics and Photonics. Students are required to write a thesis and pass an oral exam based primarily on the topics of the thesis and course work.
  - Nonthesis
    - Complete all of the following
      - Earn at least 6 credits from the following types of courses:
        A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section.
        - The nonthesis option requires an additional 6 credit hours of electives. Up to 3 credit hours of directed research (OSE 6918) or research report (OSE 6909) may be included as electives with prior approval of the College of Optics and Photonics although they are not counted toward the required 27 credit hours of formal coursework. Students must prepare an approved plan of study upon completion of nine credit hours. The research report is a written report on a subject based on research completed under the guidance of a faculty advisor who is a member of the graduate faculty in the College of Optics and Photonics. The subject matter will be determined by advisor and should be on some aspect of experimental, theoretical, or literature research in the area of optics and photonics. Normally the research and report should be completed within one semester. The written report should contain between 5,000 and 10,000 words and should roughly follow the format of a scientific journal paper. The report will be evaluated by a committee consisting of the advisor and two other faculty members. The student will be expected to present a brief oral presentation of the work to the committee, not less than 5 business days after submitting the written report to the committee and prior to the last day of classes in the semester. The report will be graded on a satisfactory/unsatisfactory basis by the advisor, based on the input from the committee.

Independent Learning
0 Total Credits

- Nonthesis students engage in directed research or research report. Thesis students enroll in 6 hours of thesis credits during the completion of their research study.

Grand Total Credits: 30
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Is this track available 100% online?

No

Track Description

NOTE: The Optics and Photonics MS program is not currently accepting applications for the International Track. For additional information, please contact 407-823-6986 or gradprog@creol.ucf.edu.

The International track in the Optics and Photonics MS program is intended for those students involved in an international exchange program with particular programs in other countries as approved by the university and the College of Optics and Photonics. The requirements for this track are the same as the general MS program.

Track Prerequisites

A bachelor's degree in Optics, Electrical Engineering, Physics, or closely related fields.

Students with degrees in related fields may be required to take undergraduate articulation courses determined by the program director on a case-by-case basis.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Optics, Electrical Engineering, Physics, or closely related fields.
- Personal Statement: a brief, 1-2 page statement about educational, research, and long-term professional career objectives.
- Three letters of recommendation.
- Résumé.
- Applicants applying to this program who have attended a college/university outside the United States must provide a credential evaluation showing an equivalent bachelor's degree in the U.S. A course-by-course evaluation must be provided, with a GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Students with degrees in related fields may be required to take undergraduate articulation courses determined by the program director on a case-by-case basis.

Degree Requirements

Required Courses

24 Total Credits

- Complete all of the following
  Core Courses
  - Complete all of the following
    - Take the following:
      - OSE5115 - Interference and Diffraction (3)
      - OSE6111 - Optical Wave Propagation (3)
      - OSE5525 - Laser Engineering (3)
    - The foundation courses are strongly recommended for all students unless they can demonstrate knowledge sufficient to waive the course in which case they will take an additional elective.
  Research Methods/Laboratory
  - Complete all of the following
    - Earn at least 6 credits from the following:
      - OSE6455C - Photonics Laboratory (3)
      - OSE6526C - Laser Engineering Laboratory (3)
      - OSE6615L - Optoelectronic Device Fabrication Laboratory (3)
    At least 6 credit hours of approved Optics and related science/engineering research methods/laboratory courses are required from the list below. At least one must be in Optics (OSE). One required laboratory may be waived if the student can demonstrate an equivalent hands-on proficiency in that laboratory specialization. These research methods/laboratory courses count toward the formal graduate course work requirement. Other graduate-related science and engineering methodology labs may be taken with approval by the College of Optics and Photonics.
  Elective Courses
  - Earn at least 9 credits from the following types of courses:
    All students are required to take a minimum of 9 credit hours of electives. Other courses with significant optics content may be accepted toward the Optics (OSE) course work requirement, upon approval by the Associate Dean. A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section

Thesis/Nonthesis Option

6 Total Credits

- Complete 1 of the following
  Thesis
  - Complete all of the following
    - Earn at least 6 credits from the following:
      - OSE6971 - Special Topics (1 - 99)
    - The thesis option requires at least 6 credit hours of thesis research. Independent study and directed research credit hours are not allowed toward the degree requirements. The student must prepare an approved program of study and form a thesis committee upon completion of nine credit hours. The MS thesis committee consists of three members, with at least two regular graduate faculty members from the College of Optics and Photonics. Students are required to write a thesis and pass an oral exam based primarily on the topics of the thesis and course work.
  Nonthesis
  - Earn at least 6 credits from the following types of courses:
    The nonthesis option requires an additional 6 credit hours of electives. Up to 3 credit hours of directed research (OSE 6918) or research report (OSE 6909) may be included with prior approval of the College of Optics and Photonics although they are not counted toward the formal course work requirement. Students must prepare an approved program of study upon completion of nine credit hours. Students are required to pass a final oral comprehensive examination based primarily on the subject matter of the courses taken. The purpose of the exam is for the student to demonstrate his or her basic knowledge of the fundamentals of optics and photonics. The nonthesis master's requires a minimum of two methods/laboratory courses as described above. These laboratory courses involve a substantial amount of independent learning on the part of the student. For example, laboratory reports must include sections on the theoretical and historical background behind the phenomena explored in laboratory experiments, and students are expected to obtain this background information on their own by researching the scientific literature. One required Optics laboratory may be waived if the student can demonstrate an equivalent hands-on proficiency in that laboratory specialization. These methodology/laboratory courses count toward the formal course work requirement.

    - OSE5525 - Laser Engineering (3)
- OSE 6536 Semiconductor Lasers may be used as a substitute for OSE 5525 Laser Engineering

Elective Courses
6 Total Credits

- Earn at least 6 credits from the following types of courses:
  All students are required to take a minimum of 6 credit hours of electives. Other courses with significant optics content may be accepted toward the Optics (OSE) course work requirement, upon approval by the Associate Dean. A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section.

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis
  - Nonthesis

  The thesis option requires at least 6 credit hours of thesis research. Independent study and directed research credit hours are not allowed toward the degree requirements. The student must prepare an approved plan of study and form a thesis committee upon completion of 9 credit hours. The MS thesis committee consists of three members, with at least two regular graduate faculty members from the College of Optics and Photonics. Students are required to write a thesis and pass an oral exam based primarily on the topics of the thesis and course work.

  The nonthesis option requires an additional 6 credit hours of courses or electives. Up to 3 credit hours of Research Report (OSE 6909) may be included. For students in a nonthesis option, a Research Report may be completed in the last term of study. The Optics or Photonics master's tracks require a research report in the nonthesis option, but this is optional in the general MS degree. The research report is a written report on a subject based on research completed under the guidance of a faculty adviser who is a member of the graduate faculty in the College of Optics and Photonics. The subject matter will be determined by the adviser and should be on some aspect of experimental, theoretical, or literature research in the area of optics and photonics. Normally, the research and report should be completed within one semester. The written report should contain between 5,000 and 10,000 words and should roughly follow the format of a scientific journal paper. The report will be evaluated by a committee consisting of the adviser and two other faculty members. The student will be expected to present a brief oral presentation of the work to the committee, not less than 5 business days after submitting the written report to the committee and prior to the last day of classes in the semester. The report will be graded on a satisfactory/unsatisfactory basis by the adviser, based on the input from the committee. Students must select an adviser from the College of Optics and Photonics faculty to serve on their Research Report. Students must prepare an approved plan of study upon completion of 9 credit hours. Students are required to pass a final oral comprehensive examination based primarily on the subject matter of the courses taken. The purpose of the exam is for the student to demonstrate his or her basic knowledge of the fundamentals of optics and photonics.

Comprehensive Examination
0 Total Credits

- An oral master's comprehensive examination, based on the core courses (OSE 5115 Interference, Diffraction and Coherence, OSE 6111 Optical Wave Propagation, and OSE 5525 Laser Engineering or OSE 6536 Semiconductor Lasers may be used as a substitute for OSE 5525 Laser Engineering) must be passed as a graduation requirement for the MS degree in Optics and Photonics. Students will be required to take this exam within one semester after completing the core courses. The exam may be taken twice. After failing on the second attempt, the student will be required to re-take the courses covering the areas in which the examination committee determined the student to be deficient. The retaken courses must be passed with a minimum grade of B+ in order for the student to graduate. This Comprehensive Examination requirement may be satisfied by passing the Optics and Photonics Ph.D. Qualifying exam.

Grand Total Credits: 30

PO Box 160112  
Orlando, FL 32816-0112

**Institution Codes**

GRE: 5233  
GMAT: RZT-HT-58  
TOEFL: 5233  
ETS PPI: 5233
**Degree Requirements**

**Required Core Courses**

18 Total Credits

- Complete all of the following
  - Take the following:
    - OSE5414 - Fundamentals of Optoelectronic Devices (3)
    - OSE5115 - Interference and Diffraction (3)
    - OSE6111 - Optical Wave Propagation (3)
    - OSE5525 - Laser Engineering (3)
    - OSE6421 - Integrated Photonics (3)
    - OSE6474 - Fundamentals Optica Fiber Communications (3)
  - OSE 6536 Semiconductor Lasers maybe used as a substitute for OSE 5525 Laser Engineering

**Elective Courses**

6 Total Credits

- Earn at least 6 credits from the following types of courses:
  - All students are required to take a minimum of 6 credit hours of electives. Other courses with significant optics content may be accepted toward the Optics (OSE) coursework requirement, upon approval by the Associate Dean. A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section.

**Thesis/Nonthesis Option**

6 Total Credits

- Complete 1 of the following
  - Thesis
    - Complete all of the following
      - Earn at least 6 credits from the following:
        - OSE6971 - Special Topics (1 - 99)
      - The thesis option requires at least 6 credit hours of thesis research. Independent study and directed research credit hours are not allowed toward the degree requirements. The student must prepare an approved plan of study and form a thesis committee upon completion of 9 credit hours. The MS thesis committee consists of three members, with at least two regular graduate faculty members from the College of Optics and Photonics. Students are required to write a thesis and pass an oral exam based primarily on the topics of the thesis and course work.
  - Nonthesis
    - Earn at least 6 credits from the following types of courses:
      - The nonthesis option requires an additional 6 credit hours of courses or electives. Up to 3 credit hours of Research Report (OSE 6909) may be included. For students in a non-thesis option, a Research Report may be completed in the last term of study. The Optics or Photonics Masters tracks require a research report in the non-thesis option, but this is optional in the general MS degree. The research report is a written report on a subject based on research completed under the guidance of a faculty advisor who is a member of the graduate faculty in the College of Optics and Photonics. The subject matter will be determined by advisor and should be on some aspect of experimental, theoretical, or literature research in the area of optics and photonics. Normally the research and report should be completed within one semester. The written report should contain between 5,000 and 10,000 words and should roughly follow the format of a scientific journal paper. The report will be evaluated by a committee consisting of the advisor and two other faculty members. The student will be expected to present a brief oral presentation of the work to the committee, not less than 5 business days after submitting the written report to the committee and prior to the last day of classes in the semester. The report will be graded on a satisfactory/unsatisfactory basis by the advisor, based on the input from the committee. Students must select an adviser from the College of Optics and Photonics Faculty to serve on their Research Report. Students must prepare an approved plan of study upon completion of 9 credit hours. Students are required to pass a final oral comprehensive examination based primarily on the subject matter of the courses taken. The purpose of the exam is for the student to demonstrate his or her basic knowledge of the fundamentals of optics and photonics.

**Comprehensive Examination**

0 Total Credits

- An oral master’s comprehensive examination, based on the core courses (OSE 5115 Interference, Diffraction and Coherence, OSE 6111 Optical Wave Propagation, and OSE 5525 Laser Engineering or OSE 6536 Semiconductor Lasers may be used as a substitute for OSE 5525 Laser Engineering) must be passed as a graduation requirement for the MS degree in Optics and Photonics. Students will be required to take this exam within one semester after completing the core courses. The exam may be taken twice. After failing on the second attempt, the student will be required to re-take the courses covering the areas in which the examination committee determined the student to be deficient. The retaken courses must be passed with a minimum grade of B+ in order for the student to graduate. This Comprehensive Examination requirement may be satisfied by passing the Optics and Photonics Ph.D. Qualifying exam.

Grand Total Credits: **30**
Track Details
Up to 9 credit hours of appropriate graduate courses from accredited universities recognized by UCF may be transferred with approval from the College of Optics and Photonics. Only courses with grades of "B" or better can be transferred.

Financial Information
Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Program Description

The Optics and Photonics PhD program provides the highest-quality education in optical science and engineering, allowing students to conduct scholarly, fundamental, and applied research, while aiding in the development of Florida's and the nation's technology-based industries.

Research activities cover all aspects of optics, photonics, and lasers, and the Center for Research and Education in Optics and Lasers (CREOL), the Florida Photonics Center of Excellence (FPCE), and the Townes Laser Institute (TLI) are integral parts of the College of Optics and Photonics. Current research areas include: linear and nonlinear guided-wave optics and devices, high speed photonic telecommunications, fiber optic fabrication, fiber optic communications, solid state laser development, nonlinear optics, laser-induced damage, quantum-well optoelectronics, quantum optics, photonic information processing, infrared systems, optical diagnostics, optical system design, image analysis, virtual reality, medical imaging, diffractive optics, optical crystal growth and characterization, high intensity lasers, x-ray optics, EUV sources, optical glasses, laser materials processing, free-electron lasers, and light matter interaction.

The College of Optics and Photonics (COP) was the first program to be offered the distinction of a college devoted to Optics in the United States. The College of Optics and Photonics has grown rapidly and now has 55 faculty members and faculty with joint appointments, 41 research scientists and 148 graduate students with research activities covering all aspects of optics, photonics, and lasers. Research expenditures are over $10 million annually, with more than 20 percent of the funding coming from industrial partners, illustrating the effectiveness of the commitment to partnerships that is a foundational value of the COP.

Program Prerequisites

Bachelor's or master's degree in Optics, Electrical Engineering, Physics or closely related discipline.

Students with degrees in related fields may be required to take undergraduate articulation courses determined by the program director on a case-by-case basis.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's or master's degree in Optics, Electrical Engineering, Physics or closely related discipline.
- The GRE is not required for admission to this program.
- Three letters of recommendation
- The College of Optics and Photonics requires a Statement of Purpose.
  - A brief, 1-2 page statement about educational, research, and long-term professional career objectives.
- Résumé
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Students with degrees in related fields may be required to take undergraduate articulation courses determined by the program director on a case-by-case basis.

Required Courses
21 Total Credits

- Complete all of the following
  - Core Courses
    - Complete all of the following:
      - Complete the following:
        - OSE6111 - Optical Wave Propagation (3)
        - OSE5115 - Interference and Diffraction (3)
        - OSE5312 - Light Matter Interaction (3)
        - OSE6211 - Imaging and Optical Systems (3)
        - OSE6474 - Fundamentals Optical Fiber Communications (3)
        - OSE5525 - Laser Engineering (3)
      - OSE 6536 Semiconductor Lasers may be used as a substitute for OSE 5525 Laser Engineering
    - Research Methods/ Laboratory Courses
    - Complete all of the following:
      - Complete at least 1 of the following:
        - OSE6234C - Applied Optics Laboratory (3)
        - OSE6455C - Photonics Laboratory (3)
        - OSE6526C - Laser Engineering Laboratory (3)
        - OSE6615L - Optoelectronic Device Fabrication Laboratory (3)
      - Other graduate science and engineering labs may be taken with college approval.

Elective Courses
36 Total Credits

- Complete all of the following
  - Restricted Electives
  - Earn at least 9 credits from the following types of courses:
    - Students will need to complete an additional 9 credit hours to meet the 30 hours of formal Optics (OSE) course work required. An additional three hours of optics coursework will be required if the student waived out of the research methods/laboratory courses above, or if the laboratory courses taken is not an OSE prefix. Other courses with significant optics content may be accepted toward the Optics (OSE) coursework requirement, upon approval by the Associate Dean. A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section.
  - Unrestricted Electives
  - Earn at least 27 credits from the following types of courses:
    - A combination of formal course work and research hours comprise the remaining unrestricted hours. At least 9 of these hours must be formal course work, which may be graduate optics, science or engineering courses. In addition to the 9 hours, 18 credits may be regular formal course work, doctoral research hours, independent study, or doctoral dissertation hours. The independent study hours are limited to a maximum of 3 credit hours. Any courses outside of the graduate optics, science or engineering disciplines must be approved by the college associate dean.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following:
  - OSE7980 - Dissertation (1 - 99)

Qualifying Examination
0 Total Credits

2021-2022 Graduate Catalog
Before students are eligible to take the candidacy examination, they must pass a written qualifying examination, which for full-time students is normally taken at the end of the first year of graduate study. The purpose of the qualifying exam is for the student to demonstrate mastery of the fundamentals of optics and photonics. The exam is administered by the doctoral qualifying examination committee, which consists of several graduate faculty members representing the appropriate disciplines, appointed by the director or designee. The committee's duties include the preparation and grading of the examination material, and it may solicit input from other interested faculty. The exam is a closed book written exam in the general areas of electromagnetic foundations of optics, interference, diffraction, coherence, linear systems imaging, and light matter interaction. Students who do not pass the qualifying examination in two attempts will not continue in the program.

Candidacy Examination
0 Total Credits

- Students are required to successfully complete the candidacy examination before admission to full doctoral status. The purpose of the candidacy exam is for the student to demonstrate his or her readiness for the PhD program through preliminary research work in the chosen field of study. The candidacy exam is comprised of written and oral portions. The exam is administered by the members of the student's dissertation advisory committee who are full faculty members of the College of Optics and Photonics. External committee members of the dissertation advisory committee are not appointed until after the student has passed the candidacy exam. The exam is normally taken near the completion of required course work. Students must pass the candidacy exam before registering for doctoral dissertation hours (OSE 7980).

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Completion of most course work, except for dissertation hours. Successful completion of the candidacy examination. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Dissertation Proposal and Defense
0 Total Credits

- Approximately one year after passing the general candidacy examination, and after the student has begun research, the student will write a dissertation proposal and present it to their dissertation advisory committee for its approval. The proposal must include the research performed to date and the research planned to complete the dissertation. The committee, which consists of three graduate faculty members from the College of Optics and Photonics, must be approved by the director or designee and will meet annually to review the student's progress. The dissertation advisory committee also administers the dissertation oral defense examination.

Independent Learning
0 Total Credits

- The dissertation satisfies the independent learning experience.

Grand Total Credits: 72

College of Sciences

Anthropology MA
Is this program available 100% online?
No

Program Description
The Department of Anthropology offers a graduate program leading to the Master of Arts degree in Anthropology. The course work in this program is conceptually three-field, with faculty strengths in archaeology, cultural anthropology, and biological anthropology. The department follows an apprenticeship model, and thus the MA student works directly under the supervision of their graduate adviser. Students are informed of who their graduate adviser is when they are admitted to the program. Visit the Faculty Page for the UCF Department of Anthropology for more information about our faculty. Students can choose to pursue a thesis or non-thesis option. Students in the program are prepared to enter doctoral programs or begin professional careers following the MA degree.

Degree-seeking students in the Anthropology MA program may elect to follow either a thesis or non-thesis plan of study. Each plan of study requires a minimum of 30 credit hours, 15 of which must be at the 6000-level. The thesis option is designed for students who plan to enter doctoral programs, while the non-thesis option is more appropriate for students entering or continuing professional careers following the MA degree.

The anthropology faculty conduct research in many geographical areas including Bolivia, Colombia, Egypt, Guatemala, Mexico, Peru, the Philippines, Turkey, the United States and various other locations in the Caribbean and Europe. The department also has multiple research facilities on the Orlando campus that including the following: an archaeology lab specializing in lithic and ceramic analysis, a forensic anthropology lab, a paleoethnobotany archaeology lab, a bioarchaeological sciences lab, and an interdisciplinary geospatial science lab. Students may have the opportunity to conduct research projects in the various countries or research facilities as part of their program.

Degree-seeking students in the Anthropology MA program may elect to follow either a thesis or a nonthesis program of study. Both thesis and non-thesis options require 30 hours of course work, of which half must be at the 6000 level.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Personal statement of intent that must include the student’s research interest, geographical area of interest, faculty they would like to work with, and future career plans (500 words).
- An academic writing sample such as a term paper or thesis chapter, usually between 2,500 and 5,000 words.
- A curriculum vitae.
- Three letters of recommendation that assess the applicant's potential as a graduate student. These letters should come from the applicant's previous professors and should not be more than 12-months old at the time of application.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.
- Contact with a potential adviser is recommended prior to application. Advisers are unable to grant admission to applicants prior to all application materials being submitted and reviewed by the department.

The applicant's record will be reviewed on an individual basis and evaluated to assess the applicant's potential for success in the program. Students will be selected for the program on a competitive basis. Supplemental course work may be recommended for students who do not have a degree in anthropology or are missing key undergraduate course work.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program to the applicant's career/academic goals, availability and match to a faculty adviser, and the applicant's potential for completing the degree. There is no automatic connection between acceptance as a non-degree-seeking student and acceptance into this degree-granting program. Please consult the graduate program director whenever questions arise.

Degree Requirements

Required Courses  
12 Total Credits

- Complete all of the following
  - Complete the following:
    - ANG5094 - Writing in Anthropology (3)
    - ANG6110 - Archaeological Theory and Method (3)
    - ANG6587 - Seminar in Biological Anthropology (3)
These courses provide an in-depth understanding of the epistemological foundations of the discipline. Students are introduced to the theory and practice of anthropology at a level of synthesis that will prepare them for future doctoral study should they wish to pursue it. These courses also establish the foundations of understanding that will prepare students for nonacademic careers that employ anthropological perspectives and knowledge.

Elective Courses
12 Total Credits

- Complete all of the following
  - A minimum of 12 additional credit hours must be selected from the list below in conjunction with the faculty adviser and/or the advisory committee members and approved by the program graduate coordinator. Additional electives may be selected as they become available or as they are added to the course curriculum. With prior approval, the student may take one elective (3 credit hours) in another department. Under special circumstances, students may enroll in a graduate-level Directed Independent Study course or a Directed Independent Research course to fulfill their non-required elective course requirements. No more than 6 hours of graduate-level courses in Directed Independent Study or Directed Independent Research may be included in a student’s program of study.
  - Earn at least 12 credits from the following:
    - ANG5166 - Problems in Maya Studies (3)
    - ANG5228 - Maya Iconography (3)
    - ANG5486 - Quantitative Research in Anthropology (3)
    - ANG5742 - Problems in Forensic Anthropology (3)
    - ANG5525C - Human Osteology (4)
    - ANG6520C - Advanced Human Osteology (3)
    - ANG6740C - Advanced Forensic Anthropology (3)
    - ANG5531 - Nutritional Anthropology (3)
    - ANG5538 - Advanced Medical Anthropology (3)
    - ANG5822 - Maya Field Research (3)
    - ANG5852 - GIS Methods in Anthropology (3)
    - ANG5853 - Advanced GIS Methods in Anthropology (3)
    - ANG6168 - The Ancient Maya (3)
    - ANG6821 - Forensic Archeology Field Methods (3)
    - ANG6181C - GIS Applications in Anthropology (3)
    - ANG6324 - Contemporary Maya (3)
    - ANG6701 - Public and Applied Anthropology (3)
    - ANG6801 - Ethnographic Research Methods (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis
    - Earn at least 6 credits from the following types of courses:
      - The thesis and oral defense are the culmination of the course work for those students who have elected the thesis option. Students electing to write a thesis must select a Thesis Advisory Committee. The student’s faculty advisor will chair the Thesis Advisory Committee. The committee will consist of three members. All members must be approved graduate faculty as cited in the most current UCF Graduate Catalog. Qualified individuals from outside the Department and also the University of Central Florida may be eligible to serve as the third member of Thesis Advisory Committees. The committee needs to be established prior to enrolling in thesis hours. When a thesis topic has been selected, students, in conjunction with their faculty advisor, will develop a thesis proposal. A proposal meeting will be scheduled with the student and advisory committee prior to enrolling in thesis hours. Students who elect to write a thesis should become familiar with the university’s requirements and deadlines for organizing and submitting the thesis. The completion of the thesis must be followed by an oral defense before the Thesis Advisory Committee. A successful format review, oral defense, and electronic submission of the thesis to the College of Graduate Studies for review completes the program requirements. Students are required to follow all procedures and timetables specified by the College of Graduate Studies.
  - Nonthesis
    - Earn at least 6 credits from the following types of courses:
      - Students selecting the nonthesis option take an additional 6 hours of elective course work for a total of 18 credit hours of electives.

Comprehensive Examination
0 Total Credits

- At the conclusion of course work, nonthesis students will be given a comprehensive examination. In consultation with the faculty adviser, two additional faculty members shall be selected to serve on the Examination Committee that will be chaired by the faculty adviser. This committee must be selected by the semester prior to the semester in which the student will take the exam. The comprehensive examination will consist of two phases. The first phase requires the student to write three (3) papers to answer a question from each member of their Examination Committee. Each paper will be 7-10 pages in length and
will be due one week (7 days) from the date the student is provided the questions. The second phase will be a 90 minute comprehensive oral examination with two formal rounds of questions from the Examination Committee. A successful comprehensive examination completes the requirements for the degree. Students are required to follow all procedures and timetables specified by the College of Graduate Studies. The examination will be based on the course work in the student's program of study. Students must notify the department's graduate program director in writing of their intent to take the exam at least one week before the date fixed for the examination. A committee composed of three faculty members will conduct the examination. The grading system for the examination is as follows: 1) Pass with Distinction, 2) Pass, 3) Conditional Pass, and 4) Fail. Students who receive a grade of Conditional Pass will be required to complete additional work as determined by the grading committee. Students who fail must retake the exam. Failure to pass the examination on the second attempt will result in dismissal from the program. Students who indicate their intent to take the examination but do not take the exam will be awarded a failing grade.

**Independent Learning**

0 Total Credits

- Students who choose the thesis option will gain independent learning experiences through their thesis research where they are expected to design and conduct their own research which culminates with the writing and defense of their thesis. Students will also gain this experience through their core course requirements as each course contains an independent research assignment. Students in the nonthesis option will gain independent learning experiences through all of their core courses, all of which contain an independent research component.

**Grand Total Credits: 30**

**Financial Information**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. **Program Handbook**

Big Data Analytics PhD
Is this program available 100% online?
No

Program Description
Big Data Analytics will train researchers with a statistics background to analyze massive, structured or unstructured data to uncover hidden patterns, unknown correlations and other useful information that can be used to make better decisions.

The program will provide a strong foundation in the major methodologies associated with Big Data Analytics such as predictive analytics, data mining, text analytics and statistical analysis with an interdisciplinary component that combines the strength of statistics and computer science. It will focus on statistical computing, statistical data mining and their application to business, social, and health problems complemented with ongoing industrial collaborations. The scope of this program is specialized to prepare data scientists and data analysts who will work with very large data sets using both conventional and newly developed statistical methods.

The Ph.D. in Big Data Analytics requires 72 hours beyond an earned Bachelor’s degree. Required coursework includes 42 credit hours of courses, 15 credit hours of restricted elective coursework, and 15 credit hours of dissertation research.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor’s Degree

Program Prerequisites
Students must have the following background and courses completed before applying to the Big Data Analytics PhD program. These courses are: MAC 2311C: Calculus with Analytic Geometry I, MAC 2312: Calculus with Analytic Geometry II, MAC 2313: Calculus with Analytic Geometry III, MAS 3105: Matrix and Linear Algebra or MAS 3106: Linear Algebra, COP 3503C - Computer Science II. These pre-required courses are basic undergraduate courses from the Math and Computer Science departments. Students without background in COP 3503C can still apply for admission but they will need to take that course sometime after admission in the PhD program. COP 3503C serves as pre-requisite for COP 5711, which is required for the qualifying exam.

Application Requirements
For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

- In addition to the general UCF graduate application requirements, applicants to this program must provide:
  - One official transcript (in a sealed envelope) from each college/university attended.
  - A personal statement identifying the area of research interest and a description of the applicant's academic and professional experiences.
  - Three letters of recommendation.
  - A Bachelor's degree or its equivalent in statistics, data analytics or a related field from a regionally accredited institution or recognized foreign institution.
  - The student should have a minimum cumulative GPA of 3.0 for all bachelor's level work completed.
  - A competitive score on the combined quantitative and verbal sections of the Graduate Record Examination (GRE) or a competitive GMAT score taken within the last five years prior to admission to the program.
  - A current curriculum vitae.

Degree Requirements

Required Courses
42 Total Credits

- Complete the following:
  - STA5104 - Advanced Computer Processing of Statistical Data (3)
  - STA5703 - Data Mining Methodology I (3)
  - STA6106 - Statistical Computing I (3)
  - STA6236 - Regression Analysis (3)
  - STA6238 - Logistic Regression (3)
  - STA6326 - Theoretical Statistics I (3)
  - STA6327 - Theoretical Statistics II (3)
  - STA6329 - Statistical Applications of Matrix Algebra (3)
  - STA6704 - Data Mining Methodology II (3)
  - STA7722 - Statistical Learning Theory (3)
  - STA7734 - Statistical Asymptotic Theory in Big Data (3)
  - STA6714 - Data Preparation (3)
  - CNT5805 - Network Science (3)
  - COP5711 - Parallel and Distributed Database Systems (3)

Restricted Electives (at least 9 credit hours must be STA coursework)
15 Total Credits

- Complete all of the following
- Other courses may be included in a Plan of Study with departmental approval. All Ph.D. students must have an approved Plan of Study (POS) developed by the student and advisor that lists the specific courses to be taken as part of the degree. Students must maintain a minimum GPA of 3.0 in their POS, as well as a "B" (3.0) in all courses completed toward the degree and since admission to the program.
- Earn at least 15 credits from the following:
  - STA6107 - Statistical Computing II (3)
  - Course Not Found
  - STA6226 - Sampling Theory and Applications (3)
  - STA6237 - Nonlinear Regression (3)
  - STA6246 - Linear Models (3)
  - STA6346 - Advanced Statistical Inference I (3)
  - STA6347 - Advanced Statistical Inference II (3)
  - STA6507 - Nonparametric Statistics (3)
  - STA6662 - Statistical Methods for Industrial Practice (3)
  - STA6705 - Data Mining Methodology III (3)
  - STA6707 - Multivariate Statistical Methods (3)
  - STA6709 - Spatial Statistics (3)
  - STA6857 - Applied Time Series Analysis (3)
  - STA7239 - Dimension Reduction in Regression (3)
  - STA7239 - Dimension Reduction in Regression (3)
  - STA7719 - Survival Analysis (3)
  - STA7935 - Current Topics in Big Data Analytics (3)
  - CAP5610 - Machine Learning (3)
  - CAP6307 - Text Mining I (3)
  - CAP6315 - Social Media and Network Analysis (3)
  - CAP6318 - Computational Analysis of Social Complexity (3)
  - CAP6737 - Interactive Data Visualization (3)
  - COP5537 - Network Optimization (3)
Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  STA 7980 - Dissertation Research

Examinations
0 Total Credits

- After passing candidacy, students will enroll into dissertation hours (STA7980) with their dissertation advisor. The dissertation can be either research- or project-based depending on the area of study, committee, and with the approval of the dissertation advisor.

Qualifying Examination
0 Total Credits

- The qualifying examination is a written examination that will be administered by the doctoral exam committee at the start of the fall term (end of the summer) once a year. The courses required to prepare for the examination are STA 5703, STA 6704, CNT 5805, STA 6326, STA 6327 and COP 5711. Students must obtain permission from the Graduate Program Coordinator to take the examination. Students normally take this exam just before the start of their third year and are expected to have completed the exam by the start of their fourth year. To be eligible to take the Ph.D. qualifying examination, the student must have a minimum grade point average of 3.0 (out of 4.0) in all the coursework for the Ph.D. The exam may be taken twice. If a student does not pass the qualifying exam after the second try, he/she will be dismissed from the program.

Candidacy Examination
0 Total Credits

- The candidacy exam is administered by the student's dissertation advisory committee and will be tailored to the student's individual program to propose either a research- or project-based dissertation. The candidacy exam involves a dissertation proposal presented in an open forum, followed by an oral defense conducted by the student's advisory committee. This committee will give a Pass/No Pass grade. In addition to the dissertation proposal, the advisory committee may incorporate other requirements for the exam. The student can attempt candidacy any time after passing the qualifying examination, after the student has begun dissertation research (STA7919, if necessary), but prior to the end of the second year following the qualifying examination. The candidacy examination can be taken no more than two times. If a student does not pass the candidacy exam after the second try, he/she will be removed from the program.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours. Completion of all coursework, except for dissertation hours Successful completion of the qualifying examination Successful completion of the candidacy examination including a written proposal and oral defense The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars Submittal of an approved program of study

Dissertation
0 Total Credits

- After passing the qualifying exam, the student must select a dissertation adviser. In consultation with the dissertation adviser, the student should form a dissertation advisory committee. The dissertation adviser will be the chair of the student's dissertation advisory committee. In consultation with the dissertation advisor and with the approval of the chair of the department, each student must secure qualified members of their dissertation committee. This committee will consist of at least four faculty members chosen by the candidate, three of whom must be from the department and one from outside the department or UCF. Graduate faculty members must form the majority of any given committee. A dissertation committee must be formed prior to enrollment in dissertation hours. The dissertation serves as the culmination of the coursework that comprises this degree. It must make a significant original theoretical, intellectual, practical, creative or research contribution to the student's area within the discipline. The dissertation can be either research- or project-based depending on the area of study, committee, and with the approval of the dissertation advisor. The dissertation will be completed through a minimum of 15 hours of dissertation research credit.

Independent Learning
0 Total Credits

- As will all graduate programs, independent learning is an important component of the Big Data Analytics doctoral program.
Students will demonstrate independent learning through research seminars and projects and the dissertation.

Grand Total Credits: 72

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Is this program available 100% online?
No
Program Description

The Master of Science in Biology program offers a broad range of research opportunities ranging from the sub-cellular to entire ecosystems. Our program offers broad-based training in a variety of disciplines including Conservation Biology, Ecology, Evolution, Physiology, Genetics, and Cell and Developmental Biology.

The Master of Science in Biology program offers a thesis option only (the non-thesis MS option is not currently accepting applications). The thesis option requires a minimum of 30 credit hours, 15 of which must be at the 6000 level. Given the thesis requirement, students who wish to pursue this degree must receive a commitment from a faculty advisor for admission into the program. The thesis option curriculum contains a minimum of 24 credit hours of coursework excluding thesis hours (note: Independent Study and Directed Research may account for a maximum of 6 of the 24 coursework credits).

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Applicants do not need to have an undergraduate degree in a biological science, but are expected to have 18 hours of biological sciences, including ecology and genetics. Courses in organic chemistry, calculus, and statistics are also recommended. After acceptance, minor deficiencies must be remedied by enrollment in the appropriate course at the first opportunity.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript from each college/university attended.
- The GRE is not required for admission to this program.
- Three letters of recommendation that addresses the applicant’s capabilities and likelihood of success as an M.S. student.
- Résumé or CV
- A personal statement. Assessment of your application is based on your academic background, analytical skills, communication skills, and research experience. A personal statement is an opportunity to convey to the selection committee your personal, academic, and/or professional experiences that have led to your desire to attend graduate school. Include your long-term career goals and how a graduate education will help you achieve these goals. It is important to dedicate a section of your statement to discuss your research interests.
- A computer-based score of 230 (or 89 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applicants do not need to have an undergraduate degree in a biological science, but are expected to have 18 hours of biological sciences, including ecology and genetics. Courses in organic chemistry, calculus, and statistics are also recommended. After acceptance, minor deficiencies must be remedied by enrollment in the appropriate course at the first opportunity.

MS applicants should first identify faculty who match their own research interests, and then contact faculty in advance to inquire about research opportunities in faculty labs and to solicit agreement that a faculty member is interested in serving as the student’s thesis advisor. Applicants who do not have a consenting thesis advisor within the department faculty will not be accepted into the program.

Applicants who do not have a competitive GPA may occasionally be accepted if there is other convincing evidence of potential for high achievement and success.

Degree Requirements

Required Courses
7 Total Credits
- Complete all of the following
  - Complete the following:
    - PCB6095 - Professional Development in Biology I (1)
    - PCB6096 - Professional Development in Biology II (1)
    - PCB6466 - Methods in Experimental Ecology (3)
  - Earn at least 2 credits from the following:
    - BSC6935 - Seminar in Biology (1)
- BSC 6935 - Seminar in Biology: Students will take 1 credit hour each of two semesters.

Thesis Option
23 Total Credits
- Earn at least 23 credits from the following types of courses:
  - BSC 6971 - Thesis 6 Credit Hours (minimum)
  - Electives - 17 Credit Hours selected with the faculty adviser and advisory committee and approved by the graduate program director.

Examinations
0 Total Credits
- A thesis proposal defense is required. The purpose of the proposal defense is to present the planned research and its foundations as a seminar to an interested audience of peers and the advisory committee. The proposal should be distributed to advisory committee members two weeks in advance of the defense, and the defense should be advertised (contact the graduate program specialist two weeks in advance). Public attendees typically have an opportunity to ask questions and comment following the seminar, after which the committee meets with the student to further discuss the proposal. The advisory committee must then vote to accept or reject the proposal. The thesis proposal defense must be passed a minimum of one semester preceding the oral thesis defense (i.e., the proposal defense and thesis defense cannot occur in the same semester). When the research is completed, the final oral thesis defense is conducted similar to the proposal defense.

Non-thesis Option (NOTE: The Biology Department is no longer accepting applications to the non-thesis program)
0 Total Credits
- In addition to the 7 credit hours of required courses listed above, nonthesis students must complete 12 credit hours of restricted electives, 19 credit hours of unrestricted electives, and a research report. Currently enrolled thesis option students interested in transferring to the nonthesis option should contact the graduate program director for information. Restricted Electives—12 Credit Hours Students take 12 credit hours of courses in at least three of the five areas below. Ecology Evolutionary Biology Genetics Physiology Cell and Developmental Biology Unrestricted Electives—19 Credit Hours Students take 19 credit hours of unrestricted electives that must be approved by the program graduate director. Research Report—2 Credit Hours BSC 6909 - Research Report 2 Credit Hours Examination Nonthesis students must take a comprehensive exam no later than the semester preceding that of graduation. If a student fails the comprehensive examination, a minimum of four weeks must elapse before reexamination. The comprehensive exam may be taken a maximum of two times.

Independent Learning
0 Total Credits
- Nonthesis students are required to complete a research report as their independent learning experience. The thesis satisfies the independent learning experience for thesis option students.

Grand Total Credits: 30

Is this program available 100% online?
No

Program Description

The Master of Science in Chemistry (MS) program prepares students for careers in the chemical industry or further graduate studies. The curriculum is designed to provide a broad overall perspective of the chemical sciences field while placing the primary emphasis upon chemistry and the application of chemical principles.

The Chemistry MS program offers both a thesis option and a nonthesis option. The thesis option requires a minimum of 30 credit hours beyond the bachelor's degree, including 16 credit hours of required courses, at least 6 credit hours of thesis research, and 8 credit hours of electives that must be approved by the student's advisory committee. The nonthesis option requires a minimum of 31 credit hours beyond the bachelor's degree, including 16 credit hours of required courses, 14 credit hours of electives that must be approved by the student's advisory committee, and 1 credit hour of independent study that culminates in a research report.

Total Credit Hours Required: 30-31 Credit Hours Minimum beyond the Bachelor's Degree
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Two letters of recommendation.
- Goal Statement
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Degree Requirements

Qualifying Examinations
0 Total Credits
- All students must satisfy qualifying (proficiency) requirements in four of the five areas (analytical chemistry, biochemistry, inorganic chemistry, organic chemistry and physical chemistry) during the first year by taking exams in four of these five subjects. Additional course work may be required if one or more of the qualifying exams are not satisfied. Satisfaction of this requirement will help ensure that all students are adequately prepared for the core courses. If students do not satisfy the proficiency exam requirements within the first year, they may be subject to dismissal from the program.

Required Courses
16 Total Credits
- Complete all of the following
  - Complete at least 4 of the following:
    - CHM6710 - Applied Analytical Chemistry (3)
    - CHS6240 - Chemical Thermodynamics (3)
    - CHS6251 - Applied Organic Synthesis (3)
    - CHM6440 - Kinetics and Catalysis (3)
BCH6740 - Advanced Biochemistry (3)

Students must take four of the above courses. If a student successfully completes all five required courses, one course will count toward fulfilling the electives requirement.

Seminar

- Complete all of the following
  - Earn at least 4 credits from the following:
    - CHM6936 - Graduate Chemistry Seminar (1)
  - CHM 6936 - Graduate Chemistry Seminar will be repeated 4 times.

Elective Courses
8 Total Credits

- Complete all of the following
  - All elective courses must be approved by the student's advisory committee.
  - Earn at least 8 credits from the following:
    - CHM5225 - Advanced Organic Chemistry (3)
    - CHM5235 - Applied Molecular Spectroscopy (3)
    - CHM5305 - Bioconjugate Chemistry (3)
    - CHM5450 - Polymer Chemistry (3)
    - CHM5451C - Techniques in Polymer Science (3)
    - CHM5580 - Advanced Physical Chemistry (3)
    - CHM6134 - Advanced Instrumental Analysis (3)
    - CHM6711 - Chemistry of Materials (3)
    - CHS6260 - Chemical Unit Operations and Separations (3)
    - CHS6613 - Current Topics in Environmental Chemistry (3)
  - CHM/CHS Special topics courses may be taken as offered.

Thesis/Nonthesis Option
6 - 7 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Complete all of the following
      - Earn at least 6 credits from the following:
        - CHM6971 - TREATISE (THESIS OR Research Report) (1 - 99)
      - The grounding in scientific research methodology provided by the thesis requirement is a central focus of the thesis option in the Chemistry MS program. Students will conduct research either on site or at the professional laboratories where they work. In either case, a member of the UCF Chemistry Department faculty will act as research adviser and approve the research topic. This research culminates in the writing and presentation of the thesis. The student will present his/her thesis for final examination (oral defense of thesis) by a committee consisting of three members including the research adviser. The committee has to be approved by the Graduate Coordinator of the Chemistry program. The thesis must be judged worthy of publication by the review committee and may not be submitted for examination until so deemed. For nonresident students, the thesis adviser will visit the student's laboratory, where their research is to be performed, before the research begins and on a regular basis until the work is complete.
  - Nonthesis Option
    - Complete all of the following
      - Earn at least 1 credits from the following:
        - CHM6908 - Directed Independent Studies (1 - 99)
      - Earn at least 6 credits from the following types of courses:
        - Additional Electives : 6 Credit Hours

Equipment Fee
0 Total Credits

- Full-time students in the Chemistry MS program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

Independent Learning
0 Total Credits

- For the thesis option, the grounding in scientific research methodology is a central focus. This research culminates in the writing and presentation of the thesis. For the nonthesis option, students take an additional 6 credit hours of approved electives and one-credit hour of Independent Study (CHM 6908), which culminates in a required report of the independent study experience.

Grand Total Credits: 30 - 31
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Program Description

The Chemistry PhD program focuses on all areas of modern chemistry with faculty actively engaged in research in the often interdisciplinary fields of Materials Chemistry, Environmental Chemistry, Forensic Science, Biochemistry and Chemical Education. The training prepares future scientists and educators for research within contemporary subjects which yield graduates that are very competitive when entering the workforce in industry, government, and academic positions.

The PhD program in Chemistry provides a doctoral education in five technical focal areas: Materials Chemistry, Environmental Chemistry, Forensic Science, Biochemistry and Chemical Education, drawing upon the strengths of the Department of Chemistry and other units, such as the College of Optics and Photonics, Advanced Materials Processing and Analysis Center, National Center of Forensic Science, Nanoscience and Technology Center, College of Medicine, College of Engineering and Computer Science, and the College of Community Innovation and Education. These areas meet the ever-pressing demand for the development of new materials, the increasing urgency of addressing crucial environmental and security problems, and new methods and understanding for STEM education. The curriculum has been formulated in collaboration with industrial, government, and academic scientists and represents a response to current and projected competencies needed by industry and the scientific community. The purpose of the program is to develop scientists and educators capable of conducting research to solve important problems in contemporary fields of the chemical sciences while preparing a highly skilled work force to ensure the technological/economic health and competitiveness in Central Florida and the nation.

The Chemistry PhD program requires 72 credit hours beyond the bachelor's degree with a minimum 18 credit hours of electives in the chosen sub-discipline, an original research project, and dissertation presentation. At least 27 hours of formal course work, exclusive of independent study, are required in order to fulfill degree requirements. This includes four core courses and four electives, three of which must be taken from Chemistry. Six credit hours of directed research are also required; additional courses may be specified by the student's research adviser.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

A Bachelor of Science degree in the Chemical Sciences or a closely related field.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A Bachelor of Science degree in the Chemical Sciences or a closely related field.
- The GRE is not required for admission to this program.
- Three letters of recommendations.
- A statement of purpose.
- Résumé.

Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Degree Requirements

Core Courses
12 Total Credits
- Complete at least 4 of the following:
  - CHM6710 - Applied Analytical Chemistry (3)
  - CHM6440 - Kinetics and Catalysis (3)
  - CHS6251 - Applied Organic Synthesis (3)
  - CHS6240 - Chemical Thermodynamics (3)
  - BCH6740 - Advanced Biochemistry (3)

Seminar
7 Total Credits
- Complete all of the following
  - Earn at least 7 credits from the following:
    - CHM6936 - Graduate Chemistry Seminar (1)
    - CHM 6936 - Graduate Chemistry Seminar: Six seminar credits must be taken prior to presenting candidacy; the seventh seminar credit will be taken the semester before anticipated graduation.

Directed Research
6 Total Credits
- Earn at least 6 credits from the following:
  - CHM6918 - Research Report (1 - 99)

Required Elective Courses
12 Total Credits
- Complete 1 of the following
  - All students who enter the program need to take four elective courses (12 credit hours). All 12 credits must come from one of the following concentrations listed below: Materials Chemistry Concentration Environmental Chemistry Concentration Forensic Science Concentration Biochemistry Concentration Student may choose four courses from the departmental offerings (Courses beginning with CHM or CHS) or three courses from the departmental offerings and one from outside of the department (Non CHM/CHS Courses). Directed research will always be within the department. Materials Chemistry Concentration
  - Earn at least 12 credits from the following types of courses:
    - CHM 5225 - Advanced Organic Chemistry 3 Credit Hours CHM 5580 - Advanced Physical Chemistry 3 Credit Hours CHS 6260 - Chemical Unit Operations and Separations 3 Credit Hours CHM 6711 - Chemistry of Materials 3 Credit Hours CHM 6620 - Solid State Inorganic Chemistry 3 Credit Hours CHM 5450 - Polymer Chemistry 3 Credit Hours CHM 5451C - Techniques in Polymer Science 3 Credit Hours CHM 5305 - Bioconjugate Chemistry 3 Credit Hours CHM 6938 - Special Topics 3 Credit Hours CHM 5235 - Applied Molecular Spectroscopy 3 Credit Hours CHM 6134 - Advanced Instrumental Analysis 3 Credit Hours CHM 7938 - Frontiers in Chemistry 1 Credit Hours (three semesters, 1 credit hour each semester) CHM 7919 - Directed Research in Materials Chemistry 6 Credit Hours Courses from outside the Chemistry Department. OSE 5203 - Geometrical Optics 3 Credit Hours OSE 6313 - Materials for Optical Systems 3 Credit Hours OSE 5414 - Fundamentals of Optoelectronic Devices 3 Credit Hours EMA 6129 - Solidification and Microstructure Evolution 3 Credit Hours EMA 6130 - Advanced Phase Transformations in Materials 3 Credit Hours EMA 6136 - Diffusion in Solids 3 Credit Hours EMA 6516 - X-ray Diffraction and Crystallography 3 Credit Hours PHY 5933 - Selected topics in biophysics of macromolecules 3 Credit Hours PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours BSC 5408L - Advanced Biology Laboratory Techniques 3 Credit Hours Environmental Chemistry Concentration
  - Earn at least 12 credits from the following types of courses:
Additional Electives
20 Total Credits

- Earn at least 20 credits from the following types of courses:
  Students who enter the program without a master's degree will be required to take 20 additional hours. These 20 hours must be in the same Concentration as the other 12 Required Electives selected above. Students and advisers need to be careful about how elective courses are selected so that at least 12 credit hours of electives must be formal course work, exclusive of independent study. Doctoral research, dissertation research, independent study and directed research may also be used to satisfy additional hours in the concentration.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  CHM 7980 - Doctoral Dissertation Within three months before defending the dissertation, the student will present a dissertation research seminar to the Department of Chemistry, registering for one credit hour of seminar.

Qualifying Examinations
0 Total Credits

- Students will be expected to satisfy qualifying (proficiency) requirements (analytical chemistry, biochemistry, inorganic chemistry, organic chemistry and physical chemistry) during the first year by taking exams in four of these five areas. Additional course work may be required if one or more of the qualifying exams is not satisfied. These exams may be waived if the entering student possesses an MS degree in the Chemical Sciences. Satisfaction of this requirement will help ensure that all students are adequately prepared for the core courses. If a student does not satisfy the proficiency exam requirements within the first year, the student may be subject to dismissal from the program.

Candidacy Examination
0 Total Credits

- By the end of the sixth semester (excluding summers), students must pass the PhD candidacy oral examination. The candidacy examination consists of writing and orally defending an original research proposal to the student’s program faculty advisory committee. The research proposal will focus on a topic not directly related to the student’s dissertation research and must be approved by the adviser and advisory committee. Failure to pass the PhD candidacy exam will result in dismissal from the program.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Completion of all required and formal elective course work, except for dissertation hours. Successful completion of the candidacy examination. Successful defense of the written dissertation proposal. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Dissertation Defense
0 Total Credits

2021-2022 Graduate Catalog
The final requirement for the PhD degree is completion of a satisfactory written dissertation of the student's research, along with successful presentation and defense of the dissertation to the advisory committee, including one doctorate-holding non-program faculty member.

Equipment Fee
0 Total Credits

- Full-time students in the Chemistry PhD program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

Independent Learning
0 Total Credits

- The grounding in scientific research methodology provided by the dissertation requirement is a central focus of the proposed program. Students will conduct research either on site or at the professional laboratories where they work. In either case, a member of the UCF Chemistry Department graduate faculty will act as research adviser and approve the research topic. This research culminates in the writing and presentation of the dissertation. The student will present his/her dissertation for examination by a committee consisting of a minimum of five members including the research adviser. One of the committee members will be from outside the Chemistry department. A majority of the program committee members will hold tenure-earning faculty appointments in the Chemistry Department. The committee has to be approved by the Graduate Coordinator of the Chemistry program and the department Chair. The dissertation must be judged worthy of publication by the dissertation committee and may not be submitted for examination until so deemed. For students performing their dissertation research off campus, the dissertation adviser will visit the student's laboratory, where their research is to be performed, before the research begins and on a regular basis until the work is complete.

Grand Total Credits: 72

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. No

Licensure Disclosure
This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-COS-Clinical-Psychology-MA.pdf.
Program Description

The Master of Arts Clinical Psychology Program is a terminal master's program offered at the UCF Sanford/Lake Mary Campus. The program consists of two tracks:

Applied Pre-Licensure/Non-Thesis Track: The Master of Arts Clinical Psychology Program is a terminal master's program offered at the UCF Sanford/Lake Mary Campus. The Applied Pre-Licensure/Non-Thesis Track is designed for students interested in delivering clinical services in a variety of settings including community agencies and private practice. After completing the program and after two years of postgraduate supervised clinical experience, graduates are eligible to become Licensed Mental Health Counselors (LMHCs) in the state of Florida.

Can you provide an overview of the Pre-licensure Track?

This track has been offered for decades. As mentioned in our catalogue description, the primary goal of this track is to train students to become licensed, master's-level clinicians. More specifically, graduates of this track are eligible to become Licensed Mental Health Counselors (LMHCs) in the State of Florida, and they will likely be eligible for master’s level licensure in most other states; however, we are unable to confirm the licensure and certification requirements of other states. Consequently, if you intend to pursue such credentialing outside of Florida, we advise you to contact the applicable state credentialing authority to familiarize yourself with its specific requirements and determine if our program meets its eligibility criteria.

Can I get into a doctoral program if I complete the pre-licensure track?

Yes! As mentioned above, most students in the pre-licensure track practice at the master’s level upon graduation. Having said that, each year we have a number of graduating students who apply to and get into Ph.D. or Psy.D. programs (usually around 2-4 students out a cohort of 15-16 students). Engagement in research may increase students’ competitiveness when applying to doctoral programs.

Can I do research if I am in the pre-licensure track?

Yes. Research is not required as part of this track; however, students in the pre-licensure track are often engaged in collaborative research with faculty. It is common for students in this track to present research at scientific conferences, and some of these students become coauthors of peer-reviewed publications in scientific journals.

Research/Thesis Track: The Master of Arts Clinical Psychology Program is a terminal master's program offered at the UCF Sanford/Lake Mary Campus. The Research/Thesis Track is designed for students who wish to focus on clinical research and/or are interested in pursuing entry into a doctoral program following the completion of their Master's degree. Students who complete this option are not eligible to become Licensed Mental Health Counselors upon graduation.

Can you provide an overview of the research/thesis Track?

The faculty developed this track for students who are interested in focusing on research and/or are interested in gaining entry into a research-focused doctoral program. This track is a great fit for students who are not particularly interested in clinical practice at the master’s level upon graduation. In addition to an empirical thesis, we encourage students in this track to engage in other research projects. Students in the thesis track have a reduced course load relative to the prelicensure track, which allows more time for engagement in research. The tradeoff is that students in this track will not be eligible for licensure at the master’s level when they graduate. We anticipate admitting no more than 5 to 6 students into the thesis track this year.

Is it possible to get clinical experience in the research/thesis track?

Yes. It is possible for students in the research/thesis track to chose to do a practicum. This experience would be approximately 10 hours/week during one spring semester.

Am I guaranteed admission into a Ph.D. program if I am in the research/thesis track?

No. The program has the potential to increase a student’s competitiveness when applying to research-focused doctoral programs; however, we cannot guarantee admission into a doctoral program.

Please scroll to the bottom of this page for further details on these Tracks.

Please visit the program’s website for more information, including a list of program faculty members, and frequently asked questions (FAQs), including additional information about each track: https://sciences.ucf.edu/psychology/graduate/ma-clinical/.

Please see the specific admission, application requirement, financial and contact information for the track in which you are interested.

2021-2022 Graduate Catalog
Program Details

At times, we have prospects who are uncertain as to which is the best track for them: Pre-Licensure or Research Thesis Track. The following information is to help you make a best decision related to your academic and professional aspirations.

Pre-licensure Track

Can you provide an overview of the Pre-licensure Track?

This track has been offered for decades. As mentioned in our catalogue description, the primary goal of this track is to train students to become licensed, master’s-level clinicians. More specifically, graduates of this track are eligible to become Licensed Mental Health Counselors (LMHCs) in the State of Florida, and they will likely be eligible for master’s level licensure in most other states. This track includes a full course load (9-12 credits/per semester) for two years. Students in this track complete a practicum (10 hours/week in the first spring in the program) and internship (20 hours/week in the fall, spring, and summer semesters in the second year in the program). A majority of the graduates of this program enter clinical practice and obtain licensure at the master’s level. We usually admit 15 to 16 students into this track each fall term.

How do I get licensed?

Students in the applied/prelicensure track meet the eligibility criteria for licensure as a Licensed Mental Health Counselor (LMHC) in the State of Florida. Please note that more details about eligibility criteria can be found on the Florida Department of Health website. In addition, our students are also eligible for similar licensure in most other states; however, we are unable to confirm the licensure and certification requirements of other states. Consequently, if you intend to pursue such credentialing outside of Florida, we advise you to contact the applicable state credentialing authority to familiarize yourself with its specific requirements and determine if our program meets its eligibility criteria.

Can I get into a doctoral program if I complete the pre-licensure track?

Yes! As mentioned above, most students in the pre-licensure track practice at the master’s level upon graduation. Having said that, each year we have a number of graduating students who apply to and get into Ph.D. or Psy.D. programs (usually around 2-4 students out a cohort of 15-16 students). Engagement in research may increase students’ competitiveness when applying to doctoral programs.

Can I do research if I am in the pre-licensure track?

Yes. Research is not required as part of this track; however, students in the pre-licensure track are often engaged in collaborative research with faculty. It is common for students in this track to present research at scientific conferences, and some of these students become coauthors of peer-reviewed publications in scientific journals.

Research/Thesis Track

Can you provide an overview of the research/thesis Track?

The faculty developed this track for students who are interested in focusing on research and/or are interested in gaining entry into a research-focused doctoral program. This track is a great fit for students who are not particularly interested in clinical practice at the master’s level upon graduation. In addition to an empirical thesis, we encourage students in this track to engage in other research projects. Students in the thesis track have a reduced course load relative to the prelicensure track, which allows more time for engagement in research. The tradeoff is that students in this track will not be eligible for licensure at the master’s level when they graduate. We anticipate admitting no more than 5 to 6 students into the thesis track this year.

Is it possible to get clinical experience in the research/thesis track?

Yes. It is possible for students in the research/thesis track to chose to do a practicum. This experience would be approximately 10 hours/week during one spring semester.

Am I guaranteed admission into a Ph.D. program if I am in the research/thesis track?

No. The program has the potential to increase a student’s competitiveness when applying to research-focused doctoral programs; however, we cannot guarantee admission into a doctoral program.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-COS-Clinical Psychology-MA.pdf.
**Track Description**

The Master of Arts Clinical Psychology Program is a terminal master's program offered at the UCF Sanford/Lake Mary Campus. The Applied Pre-Licensure/Non-Thesis Track is designed for students interested in delivering clinical services in a variety of settings including community agencies and private practice. After completing the program and after two years of postgraduate supervised clinical experience, graduates are eligible to become Licensed Mental Health Counselors (LMHCs) in the state of Florida. Please visit the program's website for more information, including a list of program faculty members and answers to frequently asked questions (FAQs): https://sciences.ucf.edu/psychology/graduate/ma-clinical/faqs/.

The Clinical Psychology Applied Pre-Licensure/Non-Thesis Track requires a minimum of 61 credit hours beyond the Bachelor's degree, including 49 credit hours of required courses and 12 clinical internship credit hours. This track is for students primarily interested in clinical practice at the Master's level upon graduation; however, some students in this track have applied to and gained admission into doctoral programs after graduation.

The primary areas of emphasis include assessment or evaluation skills and intervention or psychotherapy skills, and the program curriculum is consistent with the educational criteria for licensure as a mental health counselor in the state of Florida. Program graduates have been involved in mental health service delivery through individual, marital, family, and group psychotherapy, as well as crisis intervention and other specialized therapeutic procedures. Although research is not required in this track, students in this track do have the opportunity to engage in collaborative research with program faculty.

**Total Credit Hours Required: 61 Credit Hours Minimum beyond the Bachelor's Degree**

**Track Prerequisites**

A bachelor's degree in Psychology or a related area. A minimum of 15 semester hours of undergraduate psychology courses are required as a prerequisite for applicants with a degree in a field other than psychology. Completion of courses in abnormal psychology and research methods and/or statistics is strongly recommended. Other recommended courses include clinical psychology, developmental psychology, personality theory, physiological psychology, and psychology of diversity.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Psychology or a related area. A minimum of 15 semester hours of undergraduate psychology courses are required as a prerequisite for applicants with a degree in a field other than psychology. Completion of courses in abnormal psychology and research methods and/or statistics is strongly recommended. Other recommended courses include clinical psychology, developmental psychology, personality theory, physiological psychology, and psychology of diversity.
- The GRE is not required for admission to this program.
- Resume or Curriculum Vita.
- Personal Statement in which the applicant describes her or his experience, career goals and interests, and how this specific program is a good fit with the applicant's interests and goals. Please see program website for a list of program faculty and frequently asked questions (FAQs): https://sciences.ucf.edu/psychology/graduate/ma-clinical/
- Three letters of recommendation, with at least two furnished by instructors who are acquainted with the applicant.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Admission:

Admission into the clinical master's program is competitive and meeting minimum UCF admission criteria does not guarantee acceptance into the program. Members of the program faculty review each student's credentials and invite competitive candidates for an interview. Final admission is based on submitted materials (e.g. GPA, letters of reference, personal statement, clinical experience, research experience) and performance on the interview. More generally, the program faculty consider the applicant's abilities, past performance, match between faculty expertise and the applicant's career/academic goals, and the applicant's potential to successfully complete the program.

Students are admitted to full-time status and complete the MA program in two calendar years (including summers).

**Institution Codes**

GRE: 5233
GMAT: RZT-HT-58
TOEFL: 5233
ETS PPI: 5233
Degree Requirements

Required Courses
49 Total Credits

- Complete the following:
  - CLP5166 - Advanced Abnormal Psychology (3)
  - CLP6181 - Psychological Theories of Substance Abuse Treatment (3)
  - CLP6191 - Multicultural Psychotherapy (3)
  - CLP6195C - Introduction to Psychotherapy (3)
  - CLP6321 - Psychotherapy in Community Settings (3)
  - CLP6441C - Individual Psychological Assessment I (3)
  - CLP6457C - Group Psychotherapy (3)
  - CLP6459C - Human Sexuality, Marriage, and Sex Therapies (3)
  - CLP6461 - Cognitive-Behavioral Therapy (3)
  - CLP6449C - Career and Lifestyle Assessment (3)
  - CLP6932 - Ethical and Professional Issues in Mental Health Practices (3)
  - CYP6942 - Practicum in Psychological Counseling (3)
  - DEP5057 - Developmental Psychology (3)
  - PSY6216C - Research Methodology (4)
  - PSB5005 - Physiological Psychology (3)
  - CLP6460C - Introduction to Child, Adolescent, and Family Therapies (3)

Internship
12 Total Credits

- Complete all of the following
  - Earn at least 12 credits from the following:
    - CYP6948C - Psychology Internship (1 - 99)

  - The purpose of the internship requirement is to provide the MA candidate in Clinical Psychology with comprehensive, practical experiences under the supervision of licensed mental health professionals. A public agency or nonprofit institution with nondiscriminatory practices is the prototype. The intern is assigned to an acceptable agency for a total of 1000 hours during three consecutive academic semesters (20 hours per week for 16 weeks during fall and spring terms, and 30 hours per week for 12 weeks during the summer term). An additional commitment of three hours per week is required for the interns to meet as a group with a departmental faculty member for review, feedback, and discussions. A major portion of intern training is in the area of psychotherapy/counseling. The intern also engages in differential diagnosis and participates in a wide variety of psychological assessment procedures. It is believed that supervision by qualified and experienced personnel is the primary learning mode by which the intern develops professional expertise and augments classroom didactics. Satisfactory completion ("B" [3.0-grade point average] or better) of the following courses is required prior to internship: CLP 5166, CLP 6195C, CLP 6441C, and CYP 6942. The program director and clinical placement coordinator approve internship placements. Interns are provided with a system for maintaining accurate accounts of their activity during each week of their internship. In addition, both the intern and supervisor(s) complete an Internship Evaluation form each semester.

Comprehensive Exam and Case Presentation
0 Total Credits

- The culminating academic experience for all students in the program is successful completion of a comprehensive exam and case presentation. All students must complete the comprehensive exam their final semester. The exam covers the core professional knowledge required by state licensing agencies. Students also are required to complete a written and oral clinical case presentation. Criteria for passing the exam and presentation are provided in the program handbook.

Grand Total Credits: 61
**Track Details**

**Additional Program Requirements**

For all students in the Clinical MA program, successful completion requires demonstration of academic and clinical excellence. Students who receive grades lower than B (including B- and grades of U in courses graded satisfactory/unsatisfactory) in six semester hours or more will be dismissed from the program. It is a program requirement that all coursework with a grade lower than B be retaken and completed successfully, although both grades are still calculated in the GPA.

In addition to academic excellence, students are expected to demonstrate clinical skills and personal resources necessary to meet the demands of the program and for clinical practice. At the end of each semester, students will receive written feedback from the faculty on the extent to which they are meeting the programs requirements and performance expectations. Student progress will be rated as satisfactory or unsatisfactory. Students who receive an unsatisfactory rating will be asked to complete remediation as determined by the faculty. If the identified problems are not remedied and/or a second unsatisfactory rating is received, the student will be dismissed from the program.

**Summer Enrollment**

Summer enrollment is required for all students in this track.

**Independent Learning**

There are several independent learning experiences built into the programs of study that help to individualize the training program. Students work with the internship coordinator and academic advisor to select specific practicum and internship placements. During practicum and internship students will have the opportunity to present cases that incorporate an integration of assessment data and its interpretation, theoretical conceptualization, treatment planning, course of therapy, and available outcome data. This is done ensuring client confidentiality and the highest ethical standards. Although not required for this track, students in this track do have the opportunity to engage in collaborative research with program faculty.

**Can you provide an overview of the Pre-licensure Track? Is this the right track for me to apply to?**

This track has been offered for decades. As mentioned in our catalogue description, the primary goal of this track is to train students to become licensed, master’s-level clinicians. More specifically, graduates of this track are eligible to become Licensed Mental Health Counselors (LMHCs) in the State of Florida, and they will likely be eligible for master’s level licensure in most other states. This track includes a full course load (9-12 credits/per semester) for two years. Students in this track complete a practicum (10 hours/week in the first spring in the program) and internship (20 hours/week in the fall, spring, and summer semesters in the second year in the program). A majority of the graduates of this program enter clinical practice and obtain licensure at the master’s level. We usually admit 15 to 16 students into this track each fall term.

**How do I get licensed?**

Students in the applied/prelicensure track meet the eligibility criteria for licensure as a Licensed Mental Health Counselor (LMHC) in the State of Florida. Please note that more details about eligibility criteria can be found on the Florida Department of Health website. In addition, our students are also eligible for similar licensure in most other states; however, we are unable to confirm the licensure and certification requirements of other states. Consequently, if you intend to pursue such credentialing outside of Florida, we advise you to contact the applicable state credentialing authority to familiarize yourself with its specific requirements and determine if our program meets its eligibility criteria.

**Can I get into a doctoral program if I complete the pre-licensure track?**

Yes! As mentioned above, most students in the pre-licensure track practice at the master’s level upon graduation. Having said that, each year we have a number of graduating students who apply to and get into Ph.D. or Psy.D. programs (usually around 2-4 students out a cohort of 15-16 students). Engagement in research may increase students’ competitiveness when applying to doctoral programs.

**Can I do research if I am in the pre-licensure track?**

Yes. Research is not required as part of this track; however, students in the pre-licensure track are often engaged in collaborative research with faculty. It is common for students in this track to present research at scientific conferences, and some of these students become coauthors of peer-reviewed publications in scientific journals.

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

No

Track Description

The Master of Arts Clinical Psychology Program is a terminal master's program offered at the UCF Sanford/Lake Mary Campus. The Research/Thesis Track is designed for students who wish to focus on clinical research and/or are interested in pursuing entry into a doctoral program following the completion of their Master's degree. Students who complete this option are not eligible to become Licensed Mental Health Counselors upon graduation. Please visit the program's website for more information, including a list of program faculty members and frequently asked questions (FAQs): https://sciences.ucf.edu/psychology/graduate/ma-clinical/faqs/.

The Clinical Psychology MA Research/Thesis Track program requires a minimum of 38 credit hours beyond the bachelor's degree, including 32 credit hours of required courses, and 6 thesis hours. The curriculum emphasizes the development of research experience and skills. Further, the curriculum is designed to be flexible, with numerous elective courses to help the student pursue specific interests and to work towards specific goals. Students in this track work closely with a faculty mentor.

Note: This track is for students who wish to focus on clinical research and/or preparation for doctoral-level study upon graduation. Students who complete this track will not be license-eligible when they graduate. Completion of this track does not guarantee admissions into a doctoral program.

Total Credit Hours Required: 38 Credit Hours Minimum beyond the Bachelor's Degree
**Track Prerequisites**

A bachelor's degree in Psychology or a related area. A minimum of 15 semester hours of undergraduate psychology courses are required as a prerequisite for applicants with a degree in a field other than psychology. Completion of courses in abnormal psychology and research methods and/or statistics is strongly recommended. Other recommended courses include clinical psychology, developmental psychology, personality theory, physiological psychology, and psychology of diversity.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in Psychology or a related area. A minimum of 15 semester hours of undergraduate psychology courses are required as a prerequisite for applicants with a degree in a field other than psychology. Completion of courses in abnormal psychology and research methods and/or statistics is strongly recommended. Other recommended courses include clinical psychology, developmental psychology, personality theory, physiological psychology, and psychology of diversity.
- The GRE is not required for admission to this program.
- Resume or Curriculum Vita.
- Personal Statement in which the applicant describes her or his experience, career goals and research interests, and how this specific program is a good fit with the applicant's career interests and goals. Please see program website for a list of program faculty and their research interests and frequently asked questions (FAQs): [https://sciences.ucf.edu/psychology/graduate/ma-clinical/](https://sciences.ucf.edu/psychology/graduate/ma-clinical/)
- Three letters of recommendation, with at least two provided by instructors who are acquainted with the applicant.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from [World Education Services (WES)](http://www.wes.org) or [Josef Silny and Associates, Inc.](http://www.josefsilny.com) only.

Admission:

Admission into the clinical master's program is competitive and meeting minimum UCF admission criteria does not guarantee acceptance into the program. Members of the program faculty review each student's credentials and invite competitive candidates for an interview. Final admission is based on submitted materials (e.g. GPA, letters of reference, personal statement, clinical experience, research experience, and interview performance) and performance on the interview. More generally, the program faculty consider the applicant's abilities, past performance, match between faculty expertise/research interests and the applicant's career/academic goals, and the applicant's potential to successfully complete the program.

Students are admitted to full-time status and complete the MA program in two calendar years (including summers).

Degree Requirements

Required Courses
9 Total Credits

- Complete the following:
  - CLP5166 - Advanced Abnormal Psychology (3)
  - CLP6195C - Introduction to Psychotherapy (3)
  - CLP6932 - Ethical and Professional Issues in Mental Health Practices (3)

General Clinical Elective Courses
15 Total Credits

- Complete all of the following
  - In addition to the requirements associated with the Clinical Psychology Core, select 5 additional courses (advisor permission required)
  - Complete at least 5 of the following:
    - CLP6181 - Psychological Theories of Substance Abuse Treatment (3)
    - CLP6191 - Multicultural Psychotherapy (3)
    - CLP6321 - Psychotherapy in Community Settings (3)
    - CLP6441C - Individual Psychological Assessment I (3)
    - CLP6449C - Career and Lifestyle Assessment (3)
    - CLP6457C - Group Psychotherapy (3)
    - CLP6459C - Human Sexuality, Marriage, and Sex Therapies (3)
    - CLP6460C - Introduction to Child, Adolescent, and Family Therapies (3)
    - CLP6461 - Cognitive-Behavioral Therapy (3)
    - CYP6942 - Practicum in Psychological Counseling (3)
    - DEP5057 - Developmental Psychology (3)
    - PSB5057 - Physiological Psychology (3)

Research Courses
12 Total Credits

- Complete all of the following
  - Complete the following:
    - CLP6527C - Measurement, Research Design, and Statistical Analysis in Clinical Psychology I (4)
    - CLP6528C - Measurement, Research Design, and Statistical Analysis in Clinical Psychology II (4)
  - Earn at least 4 credits from the following:
    - PSY6971 - Thesis (1 - 99)

Grand Total Credits: 36
Track Details

Additional Program Requirements

For all students in the Clinical MA program, successful completion requires demonstration of academic and excellence. Students who receive grades lower than B (including B- and grades of U in courses graded satisfactory/unsatisfactory) in six semester hours or more will be dismissed from the program. It is a program requirement that all course work with a grade lower than B be retaken and completed successfully, although both grades are still calculated in the GPA.

In addition to academic excellence, students are expected to demonstrate skills and personal resources that are up to the demands of the program. At the end of each semester, students will receive written feedback from the faculty on the extent to which they are meeting the programs requirements and performance expectations. Student progress will be rated as satisfactory or unsatisfactory. Students who receive an unsatisfactory rating will be asked to complete remediation as determined by the faculty. If the identified problems are not remedied and/or a second unsatisfactory rating is received, the student will be dismissed from the program.

Summer Enrollment

Summer enrollment may be required for completion of the program.

Independent Learning

There are several independent learning experiences built into the programs of study that help to individualize the training program. Students who pursue the research thesis track engage in independent learning through the design and implementation of original research in collaboration with faculty. They will work closely with a faculty mentor in relation to research and selection of electives. Further, although not required, students have the opportunity to take a clinical practicum in their second year in the program to gain clinical experience.

Can you provide an overview of the research/thesis Track? Is this the right track for me to apply to?

The faculty developed this track for students who are interested in focusing on research and/or are interested in gaining entry into a research-focused doctoral program. This track is a great fit for students who are not particularly interested in clinical practice at the master’s level upon graduation. In addition to an empirical thesis, we encourage students in this track to engage in other research projects. Students in the thesis track have a reduced course load relative to the prelicensure track, which allows more time for engagement in research. The tradeoff is that students in this track will not be eligible for licensure at the master’s level when they graduate. We anticipate admitting no more than 5 to 6 students into the thesis track this year.

Is it possible to get clinical experience in the research/thesis track?

Yes. It is possible for students in the research/thesis track to chose to do a practicum. This experience would be approximately 10 hours/week during one spring semester.

Am I guaranteed admission into a Ph.D. program if I am in the research/thesis track?

No. The program has the potential to increase a student’s competitiveness when applying to research-focused doctoral programs; however, we cannot guarantee admission into a doctoral program.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Licensure Disclosure
This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-COS-Clinical-Psychology-PhD.pdf.

Program Description
The Psychology Department offers a PhD in Clinical Psychology, educating students in both the science and the practice of clinical psychology.

The Clinical Psychology track in the Psychology PhD Program emphasizes the scientist-practitioner model of training as promulgated by the American Psychological Association (APA). The doctoral program in Clinical Psychology is accredited by the American Psychological Association.

The PhD Program in Clinical Psychology at the University of Central Florida educates graduate students “to generate and integrate scientific and professional knowledge, attitudes, and skills to further psychological science, professional practice, and human welfare. Graduates are capable of functioning as a scientist and a practitioner and may function as either or both, consistent with the highest standards in psychology” (National Conference on the Education and Training of Scientist-Practitioners for the Professional Practice of Psychology, 1990). The PhD program aspires to achieve excellence in research and clinical training and to contribute to and perpetuate science and practice in the field of Clinical Psychology through faculty and graduate student involvement in scholarly and professional activities.

Consistent with the mission of a major metropolitan university, the Clinical Psychology PhD program at UCF takes advantage of and builds upon community partnerships. Our partnerships with public and private health service delivery resources in the Central Florida area provides externship training sites and research opportunities.

The Clinical Psychology track in the Psychology PhD Program is designed to be a full-time program, with some summer enrollment expected. There is a total of 86 semester hours of courses, practica, and research requirements.

Total Credit Hours Required: 86 Credit Hours Minimum beyond the Bachelor's Degree. 56 Credit Hours Minimum beyond the Master's Degree.

Program Prerequisites
Students must have obtained a baccalaureate or higher degree in Psychology, prior to the start of the term for which the student is admitted, from a regionally accredited institution or from a recognized foreign institution. Students without a baccalaureate or higher degree from an accredited institution (or equivalent) are not admitted to graduate degree programs, graduate certificate programs, or graduate nondegree status. If the baccalaureate degree does not include a major in Psychology, students must have completed at least 18 credit hours of Psychology courses at the undergraduate level or above. These courses must include Intro/General Psychology, Research Methods/Statistics, Abnormal Psychology, and Personality Theory/Psychology. The following courses are strongly encouraged: Social Psychology, Cognitive Psychology, Biological/Physiological Psychology, and Developmental Psychology. The program requires that History and Systems of Psychology is completed at the undergraduate level with a grade of at least a "B." This can either be completed prior to starting the program or as an undergraduate course during the program. Applicants who enter with a Master's degree may be eligible to waive or transfer up to 30 credit hours for credits earned from a completed Master's degree from an accredited institution recognized by UCF (as long as this number does not exceed 50% of the program's requirements). In these cases, each applicant's situation will be reviewed individually based on program standards and requirements.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Students must have obtained a baccalaureate or higher degree in Psychology, prior to the start of the term for which the student is admitted, from a regionally accredited institution or from a recognized foreign institution. Students without a baccalaureate or higher degree from an accredited institution (or equivalent) are not admitted to graduate degree programs, graduate certificate programs, or graduate nondegree status. If the baccalaureate degree does not include a major in Psychology, students must have completed at least 18 credit hours of Psychology courses at the undergraduate level or above. These courses must include Intro/General Psychology, Research Methods/Statistics, Abnormal Psychology, and Personality Theory/Psychology. The following courses are strongly encouraged: Social Psychology, Cognitive Psychology, Biological/Physiological Psychology, and Developmental Psychology. The program requires that History and Systems of Psychology is completed at the undergraduate level with a grade of at least a "B." This can either be completed prior to starting the program or as an undergraduate course during the program. Applicants who enter with a Master's degree may be eligible to waive or transfer up to 30 credit hours for credits earned from a completed Master's degree from an accredited institution recognized by UCF (as long as this number does not exceed 50% of the program's requirements). In these cases, each applicant's situation will be reviewed individually based on program standards and requirements.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript from each college/university attended.
- The GRE is not required for admission to this program.
- Curriculum Vitae.
- Three letters of recommendation, with at least two furnished by college or university professors who are acquainted with the applicant.
- A clear statement concerning the type of research the applicant wishes to pursue as a graduate student, and the Clinical Faculty member the applicant believes would be best suited to serve as the applicant's major professor and mentor.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Due to the competitive nature of the application process, strong candidates are likely to meet criteria that are more stringent than those listed here. Strong candidates are also likely to have both research and clinical experience. A department admissions committee reviews the applicants' credentials and may invite a group of candidates for an interview. Final selection is based on both submitted credentials and the interview.

In 2020, the Doctoral Program in Clinical Psychology received 230 applications for admission, and eight students were offered admission to the Ph.D. program. Accepted students had, on average, between 1.5 and 2 years prior research experience and were well matched with the Clinical Faculty's research and training interests.

Previous graduate work will be considered on a case-by-case basis (including acceptance of a previously completed Master's Thesis). Graduate students may be eligible to waive up to 30 credits earned from a completed Master's degree from an accredited institution. Each graduate student's situation is considered individually by the Clinical Faculty. Graduate students should submit a request to the Director of Clinical Training and provide a course catalog description, course syllabus, and other relevant information to enable the Clinical Faculty to make a determination of equivalency with a course in the PhD curriculum. The waived hours must come from graduate-level course work (e.g., numbered 5000 and above in the Florida SUS approach). No courses with grades less than "B" will be considered for waiver.

Graduate students who completed an empirical Master's Thesis at their former accredited institution will need to complete an additional Master's Thesis while enrolled in the program at UCF.

  - Earn at least 4 credits from the following:
    - CLP7145C - Introduction to Clinical Psychology and Psychotherapy (2)
  - CLP 7145C - 2 credit hours; taken two times at 2 credit hours each time.
  - Earn at least 3 credits from the following:
    - CLP6949 - Predoctoral Internship (1)

---

2021-2022 Graduate Catalog
CLP 6949 - 1 credit hour; taken three times at 1 credit hour each time.

Earn at least 9 credits from the following:

- CLP7943C - Clinical Practicum (1 - 12)
- CLP 7943C Clinical Practicum :taken 3 times at 3 hours each time.

Elective
6 Total Credits

- Earn at least 6 credits from the following types of courses:
  Any graduate-level course as approved by the program director.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  PSY 7980 - Doctoral Dissertation

Qualifying and Comprehensive Doctoral Examinations
0 Total Credits

No Rules

Purpose
0 Total Credits

- The purpose of the Qualifying and Comprehensive Examination is to develop and assess the competency of professional behaviors in doctoral-level graduate students in the Clinical Psychology PhD Program that are consistent with the program's professional training goals. These goals include but are not limited to the development and demonstration of skills and abilities that enable graduating students to (a) be expertly trained, empirically oriented clinicians capable of designing, implementing and assessing programs concerned with health service and mental health delivery broadly defined and (b) formulate research questions, design research studies, and write research proposals independently. The Clinical Qualifying Examination involves a demonstration of clinical skills while the Research Comprehensive Examination involves writing of a research proposal independently.

Requirements, Rationale, and Objectives
0 Total Credits

- Successful completion of Qualifying and Comprehensive Examination requirements reflects the program's desire to ensure overall breadth of training in the field of Clinical Psychology. The two professional domains outlined above are consistent with this intent.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to Candidacy and enroll in Dissertation hours: Completion of most course work, except for Dissertation hours and Supervision Practicum. Successful completion of the Qualifying and Comprehensive Examinations. The Dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study. The American Psychological Association requires that graduate students be evaluated at least annually and provide written feedback to graduate students. Because Clinical Psychology involves the provision of mental health services to the public, special care must be taken to ensure that graduate students possess the requisite interpersonal sensitivity and skill. As a result, evaluation procedures within this track will focus not only on academic performance but also on: clinical proficiency; ethical and professional conduct; response to supervision; interpersonal behavior; and interpersonal functioning. The Clinical Psychology committee reserves the right to drop from the program graduate students who continue to exhibit serious difficulties in these behavioral domains and do not respond to feedback and efforts at remediation.

Master of Science in Clinical Psychology
0 Total Credits

- Graduate students enrolled in the Clinical Psychology PhD Program earn a Master of Science in Clinical Psychology in route to their doctorate unless they are admitted with an acceptable Master's degree. This is a nonterminal Master's degree available only to students in the Clinical Psychology PhD program.

Independent Learning
0 Total Credits

- As befits the nature of graduate training and the pursuit of a doctoral degree, graduate students in Clinical Psychology are expected to engage in independent learning throughout their graduate career. The completion of the Master's Thesis and the Doctoral Dissertation are two examples of independent learning in which all graduate students participate. In addition, depending upon their career goals, other experiences, such as directed readings or additional research projects, may be undertaken by graduate students.

Grand Total Credits: 86
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Program Description

UCF's Master of Arts in Communication prepares students for a wide range of professions in academia and the public and private sectors. This program, comprised of industry-leading scholars and professionals, provides students with the knowledge to succeed as expert communicators - all within a convenient and practical curriculum.

Housed in the Nicholson School of Communication and Media, the MA in Communication is part of UCF Downtown, a 21st-century campus with access to arts, culture, nightlife, and business. While some courses are offered online, required core courses and most electives are offered in a face-to-face or mixed-mode formats, typically Monday - Thursday evenings at UCF Downtown.

The MA degree program in Communication is a four-semester program for full-time students. Part-time students make take up to seven years to complete the program. Both thesis and non-thesis options are offered and both consist of a minimum of 33 semester hours of work.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants should adhere to the application requirements outlined below. An application will not be reviewed for admission until it is verified as complete by the UCF College of Graduate Studies.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- Official transcripts
- The GRE is not required for admission to this program.
- Résumé or CV
- Statement of Purpose
- Two letters of recommendation
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on an evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

The following information is required for those who wish to be considered for funding initiated by the Nicholson School of Communication and Media, but is recommended for all applicants:

- Additional letter of recommendation (total of three)

18 Total Credits

- Complete all of the following
  - In addition to the courses listed below, special topics courses, study abroad courses, independent study, directed research, internship, and graduate-level courses taken outside the Nicholson School of Communication and Media may be counted as restricted electives, pending approval by the program director, for up to 6 credit hours total.
  - Earn at least 18 credits from the following:
    - ADV6209 - Advertising and Society (3)
    - COM5932 - Topics in Communication Theory and Research (3)
    - COM6046 - Interpersonal Communication (3)
    - COM6047 - Interpersonal Support in the Workplace (3)
    - COM6048 - Communication in Close Relationships (3)
    - COM6121 - Communication Management (3)
    - COM6145 - Organizational Communication (3)
    - COM6425 - Symbolism in Terrorism (3)
    - COM6463 - Studies in Intercultural Communication (3)
    - COM6463 - Studies in Persuasion (3)
    - COM6467 - Studies in Persuasion (3)
    - COM6468 - Communication and Conflict (3)
    - COM6535 - Communication Campaigns (3)
    - MMC6567 - New Media (3)
    - MMC6600 - Media Effects and Audience Analysis (3)
    - Course Not Found
    - MMC6612 - Communication and Government (3)
    - MMC6735 - Social Media as Mass Communication (3)
    - PUR6005 - Theories of Public Relations (3)
    - PUR6215 - Communicating Corporate Social Responsibility (3)
Thesis/Nonthesis Options
6 Total Credits

- Complete all of the following
  Thesis Option
  - Earn at least 3 credits from the following types of courses:
    COM 6971 Thesis (minimum of 3 credit hours, can be taken individually) The thesis option requires a minimum of 3 hours of thesis credit and a successful defense of a thesis. Students may enroll in thesis hours after they have successfully completed the three core courses and their thesis committee has been approved by the department, college, and Graduate Studies. The student's permanent faculty adviser will chair their committee, which will also include one additional graduate faculty member in the Nicholson School of Communication and Media. One additional member, who is also a graduate faculty member, may be added from outside the NSCM. All members of the thesis committee are selected in consultation with the student's permanent faculty adviser. When a topic has been selected, students, in conjunction with their permanent adviser, will develop a thesis proposal. Copies of the proposal will be routed to members of their thesis committee and a proposal hearing scheduled. All student must pass a proposal hearing as well as a final oral defense of their thesis. Students who elect to write a thesis should become familiar with the university's requirements and deadlines for organizing and submitting the thesis.

Nonthesis Options
- Complete 1 of the following

  Nonthesis Option 1: Comprehensive Examination
  - The nonthesis comprehensive examination option is a four-examination requirement that assesses students' coursework competency. Students who choose the comprehensive examination option must take one additional elective course (three credit hours) and successfully complete the comprehensive examinations. Upon completing their 18th hour in the program, students must select a permanent advisor and form a comprehensive exam committee. The examinations will cover research methods, communication theory, and elective areas selected together by the student with his or her comprehensive examination committee. In order to fulfill the comprehensive exam requirement, the student must earn a passing grade on all exams. If a student fails to pass any of the comprehensive exam area questions, they are allowed two additional attempts to satisfy the comprehensive exam requirement. Once an exam in an area is passed, the student does not have to sit for that exam area again. Students are allowed three attempts to satisfy the comprehensive exam requirement. Students are expected to refer to the Communication MA Graduate Program Handbook for the comprehensive examination protocol.
  - Earn at least 3 credits from the following types of courses:
    Additional Elective

  Nonthesis Option 2: Applied Professional Project
  - The nonthesis applied project option requires students to demonstrate their ability to apply the knowledge and skills learned in the graduate program to a problem/topic that integrates the range of communication theory, practice, and research presented throughout the program. Upon completing their 18th hours in the program, each student must select a permanent advisor and form an applied project committee. The student will work directly with a faculty adviser to develop a project and the adviser will supervise the project. Students and faculty advisors are encouraged to meet with committee members at the proposal and final defense stages. The grading system for the project is Pass/No Pass. Students who receive a grade of Pass will be allowed to graduate assuming all other requirements are met.
  - Earn at least 3 credits from the following:

Equipment Fee
0 Total Credits
- Full-time students in the Communication MA program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning
0 Total Credits
- Students who elect the thesis option engage in independent learning through the design and implementation of original research in the thesis process. Students who pursue the comprehensive examination option experience independent learning through their individual preparation for each of four comprehensive examinations. Students who pursue the applied project option engage in applied, original communication research in an applied setting. All students engage in independent learning in every Communication core course. A research paper or project is required in each of these classes. The papers and projects provide independent learning by requiring students to design and carry out research projects and develop analytical papers, some of which are submitted to conferences and/or journals for peer review. Internships and independent studies are also common opportunities for independent learning in the Communication MA program.

2021-2022 Graduate Catalog
Grand Total Credits: 36

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance
Millican Hall 120

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Grad Fellowships
Telephone: 407-823-0127
gradfellowship@ucf.edu
https://funding.graduate.ucf.edu

The majority of financial assistance provided by the Nicholson School of Communication and Media graduate program is granted through assistantships. The number of total Assistantships at the Master’s level is limited, and varies year-to-year. Preference will be given to applicants who complete their application for admission prior to the January 15th priority deadline. It is the applicants’ responsibility to ensure they have a complete application on file by the priority deadline. Applicants may indicate their interest in an assistantship in the application and follow up with the admission specialist or program coordinator. Students on assistantship are paid a stipend, receive tuition support, and are eligible for health insurance. For general information regarding assistantships at UCF, refer to the Assistantships (www.students.graduate.ucf.edu/assistantships) section of the College of Graduate Studies website.

The Nicholson School of Communication and Media offers primarily two types of assistantships:

- Graduate Teaching Assistants are assigned to work with faculty members and assist them with their teaching responsibilities. This includes assisting with large lecture classes, grading exams, compiling information for lectures, and working with students, as instructed, to help keep a class operating smoothly.
- Graduate Teaching Associates are graduate students who, after completing eighteen hours of their graduate program of study and the required university and department training, are assigned to teach their own sections of undergraduate courses. Typically, Graduate Teaching Associates teach SPC 1608 (Fundamentals of Oral Communication) or SPC 1603 (Fundamentals of Technical Presentation).

**Program Description**

**This certificate is no longer accepting applications effective Fall 2016.**

The Graduate Certificate in Conservation Biology provides students with an excellent opportunity for cross-discipline training in conservation theory in a classroom setting with fieldwork in the laboratory portions of Biology.

The Graduate Certificate in Conservation Biology emphasizes basic and applied conservation biology. The certificate offers an excellent opportunity for cross-discipline training that provides conservation theory in a classroom setting and valuable field work in the laboratory portions of the Biology courses. The Department of Biology provides basic courses on campus, while scientists at Walt Disney World's Animal Kingdom offer applied courses on Disney property. Practical experience dealing with small animal populations is provided within Disney's unique zoological setting.

The Conservation Biology certificate requires four graduate courses (12 credit hours) in conservation study.

**Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree**

**Application Requirements**

Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

No

Program Description
The Graduate Certificate in Corporate Communication offers industry-relevant training in creating, managing, and communicating corporate reputation. Coursework focuses on theory, research, and practical applications of principles related to corporate communication. The program is composed of three core graduate courses and three elective courses, totaling 18 credit hours, suitable for professionals working in the industry.

Housed in the Nicholson School of Communication and Media, the graduate Corporate Communication Certificate is part of UCF Downtown, a 21st-century campus with access to arts, culture, nightlife, and business. While some courses are offered online, required core courses and most electives are offered in a face-to-face or mixed-mode formats, typically Monday-Thursday evenings at UCF Downtown.

The program is composed of three required graduate courses and three elective courses that can be incorporated into a master's program of study in Communication or taken as an add-on to another graduate degree. The required and elective courses are drawn from a limited list of courses that reflect current professional development needs for corporate communication. Students must enroll in COM 6008 Pro-Seminar in Communication in their first fall semester.

Total Credit Hours Required: 18 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements
Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants to this program must provide:

- Official Transcripts
- Statement of Purpose
- CV or Resume

The Corporate Communication Certificate Program does not admit students in the summer semester. Admission to and successful completion of the Corporate Communication Certificate Program does not guarantee admission to the Communication MA program as additional requirements exist for the master's program.

Data Modeling Graduate Certificate

College

College of Sciences

Department

Department of Mathematics

Program Website

http://sciences.ucf.edu/math/graduate
Is this program available 100% online?
Yes

UCF Online

Please Note: Data Modeling Graduate Certificate may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description

The Mathematical Science Graduate Certificate on Data Modeling is designed for students to gain knowledge of mathematical modeling and analytics techniques for data extraction, and to prepare their career on data analyst and data architect.

The mathematical science graduate certificate on data modeling requires taking 4 graduate courses (12 credit hours) with letter grade B- or higher, including 9 credit hours of required courses and 3 credit hours of elective courses.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements

Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. No GRE is required. Applicants must apply online. All requested materials must be submitted by the established deadline.

Telephone: 407-823-5595
Full-time Location: CMB 203, UCF Downtown
Part-time Location: NSCM 238, UCF Main Campus

Is this program available 100% online?
No
**Program Description**

The MA program in Digital Media engages students in theoretical frameworks, methods, and critical media practice related to computational, interactive media. Through rigorous creative and research projects, the MA prepares students for continued study in a PhD program or employment within the industry. Working closely with an innovative faculty and technology partnerships in downtown Orlando, students will employ emerging technologies to communicate interactive narratives and experiences while also producing cutting-edge research in interactive media.

The Digital Media MA combines theory and practice to train the next generation of interactive media scholars and practitioners. Part of the first wave of UCF's state-of-the-art downtown campus, students in this program have unique opportunities to participate in socially impactful research and artistic production. In the first year, students gain an introduction to aesthetic, theoretical, programming, and design approaches to interactive media, while gaining valuable foundations in research and storytelling. In the second year, students either pursue a thesis or studio production path, while learning about contemporary topics and emerging Artificial Intelligence (AI) research and design. Throughout the program, students are encouraged to create portfolio-ready pieces and/or present their work at conferences, thus preparing them for future professional, artistic, and scholarly success at the forefront of interactive media.

The program focuses on the following areas:

- **Theory and Practice:** The program trains students to pair theory and practice regardless of the path they choose through the program. Students will learn to develop theoretically sophisticated creative works and to pair creativity with research. This is accomplished by providing students with a solid foundation in aesthetic, design, programming, and theoretical approaches.

- **Narrative and Experience Design:** The program also emphasizes interactive storytelling and an understanding of how to design compelling experiences specifically for interactive media. This is accomplished through coursework on these subjects, and the time allotted in the program's plan of study for students to develop in-depth creative and research projects that put the concepts learned in coursework into play.

- **Social Impact:** The MA in Digital Media also takes advantage of the creative, research, and business opportunities available through the program's downtown Orlando location to provide students with a range of real-world, socially impactful research and creative experiences. Course projects and students' own creative and research work benefit from the social, cultural, and economic context of a thriving downtown sector.

- **Professional and Scholarly Outcomes:** The MA program offers two equally in-depth and rigorous tracks—the Thesis or Studio Production paths. The required coursework provides the foundational skills and knowledge needed for students to create an exhibition or publication-ready projects.

**Total Credit Hours Required:** 36 Credit Hours Minimum beyond the Bachelor's Degree

**Program Prerequisites**

Desirable background skills for this degree include familiarity with computer coding and/or digital design, but these are not required as coursework addresses these areas.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- A written statement (1 - 2 pages) describing the student's personal goals, objectives, and research interests in seeking the degree.
- Three letters of recommendation from former professors or employers who can address applicant's ability to undertake graduate-level courses.
- For students intending to pursue the studio track, a link to a web portfolio of 2 - 5 substantial creative and/or technical works.
- For students intending to pursue the thesis track, writing sample(s) totaling 10 - 15 pages.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Desirable background skills for this degree include familiarity with computer coding and/or digital design, but these are not required as coursework addresses these areas.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, the applicant's potential for completing the degree, and the current applicant pool.

- Complete the following:
  - DIG5487 - Media Aesthetics (3)
  - DIG5508 - Programming for Digital Media (3)
  - DIG5831 - Computational Media (3)
  - DIG6136 - Design for Interactive Media (3)
  - DIG6551 - Theory and Practice of Interactive Storytelling (3)
  - DIG6647 - History and Theory of Dynamic Media (3)
  - DIG6817 - Contemporary Topics in Interactive Media (3)
  - DIG6817 - Contemporary Topics in Interactive Media (3)

Thesis/Non-Thesis Option
12 Total Credits

- Complete 1 of the following
  - Thesis Option: 6 Credit Hours of Thesis and 6 Credit Hours of Electives
  - Complete all of the following
    - Students choosing the Thesis option will take all required courses, along with two electives (one in Fall and one in Spring of their second year in a typical program of study). The electives may come from any COM, DIG, or FIL prefix or other as approved by the graduate coordinator. Many graduate-level courses in the College of Arts and Humanities can be used as electives, based on an adviser-approved plan of study. These courses must be selected to ensure that at least one-half of the courses in the student's plan of study are taken at the 6000 level. In addition, students will take 6 hours of DIG 6971: Thesis credit (3 in Fall and 3 in Spring in a typical program of study). Each candidate for the Master of Arts submits a thesis prospectus and preliminary bibliography on a topic selected in consultation with the adviser. The formal thesis is initiated by the preparation of a proposal that meets both departmental and university requirements for the thesis. Prior to enrollment into thesis credit hours, the adviser, in consultation with the student, designates a Thesis Committee to be further approved by the College Graduate of Studies. This committee is chaired by the adviser and includes two or more additional faculty members from the Nicholson School of Communication and Media. The members of the student’s thesis committee judge the proposal as the preliminary step to beginning the thesis. This committee must approve the Thesis Proposal before academic credit can accrue. The thesis is a formal written document. The introduction cites similar, related, and antecedent work. The body explains the purposes of the project, the method of its production, and any evaluation that was performed. The conclusion includes plans for future work. The thesis also includes an archival copy of the resulting creative product. Both the thesis and the creative product must be delivered in digital form, acceptable by the UCF library according to its standards for digital dissertations and theses.
    - Earn at least 6 credits from the following:
      - DIG6971 - Thesis (1 - 99)
    - Earn at least 6 credits from the following types of courses:
      - Electives
      - Thesis Defense
    - In addition to a written thesis, the final step in completing the thesis requirement is an oral defense before the thesis committee. Candidates must present their creative or research work and explain its creation in an oral defense. These presentations are made to the student's committee in a public meeting that other faculty and students may attend.

- Studio Production, Non-Thesis Option
  - Complete all of the following
    - Students selecting the Studio Production option complete 6 required credit hours: DIG 6571: Studio 1 (3 credit hours) and DIG 6909: Research Report (3 credit hours), and an additional 6 credit hours of electives. The electives may come from any COM, DIG, or FIL prefix or other as approved by the graduate coordinator. Many graduate-level courses in the College of Arts and Humanities can be used as electives, based on an adviser-approved plan of study. These courses must be selected to ensure that at least one-half of the courses in the student's plan of study are taken at the 6000 level.
    - Complete the following:
      - DIG6524 - Studio 1 (3)
    - Earn at least 3 credits from the following types of courses:
      - DIG 6909 - Research Report
    - Earn at least 6 credits from the following types of courses:
      - Electives

Grand Total Credits: 36

Program Description

The Feature Film Production MFA is a terminal degree, the highest degree awarded to filmmakers or film artists. It is a highly selective and rigorous professional film production program for visual artists and film practitioners who demonstrate exceptional artistic and intellectual prowess, evidence of significant professional promise and a commitment to the expressive potential of digital filmmaking and the exploration of non-traditional modes of distribution. The Feature Film Production MFA produces graduates with mastery of storytelling through the digital medium as it encourages the candidate to find his or her personal style. Entrepreneurial in spirit, the program emphasizes story, performance, aesthetic choice, business, and creative thinking. When participation is committed and complete, the program develops graduates who can compete in the worlds of national and international independent filmmaking.

Students will pursue a modality - narrative, documentary, or experimental - for their thesis film, or body of work, during their first two semesters in the program. All MFA candidates must take the core required courses but will choose electives that best match their modalities and interests. Upon completion of the degree, each student will have produced a microbudget digital feature film or equivalent body of work that meets standards outlined in the Program Graduate Handbook. Students will also have prepared a marketing strategy for its distribution and exhibition. Graduates in this program are responsible to funding their own thesis projects, including fundraising and soliciting investors where needed. Historically, graduates have produced feature films within the budget range of 5-25K. Budgetary needs can vary greatly depending on the scope and modality of the thesis. Consulting with the thesis committee regarding the appropriate budgetary scale is advised for all students. Budgets exceeding 50K are strongly discouraged.

We welcome innovative approaches within the digital cinema paradigm that reimagine how new technologies can create alternative performances to exploit the tension between narrative and experimental storytelling, creating a new agency for actors and new expectations for audiences.

Program Prerequisites

A BA or BFA in film production is preferred, however, degrees in the following areas are acceptable if accompanied by a strong video portfolio:

- Animation
- Art
- Cinema Studies
- Communication
- English/Creative Writing
- Game Design
- Graphic Design
- Illustration
- Journalism
- Photography
- Radio/TV

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline. Preference will be given to applicants who can demonstrate a strong production background by including evidence they have been the creative leader of completed short films.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript from each college/university attended.
- A BA or BFA in film production is preferred, however, degrees in the following areas are acceptable if accompanied by a strong video portfolio:
  - Animation
  - Art
  - Cinema Studies
  - Communication
  - English/Creative Writing
  - Game Design
  - Graphic Design
  - Illustration
  - Journalism
  - Photography
  - Radio/TV
- The GRE is not required for admission to this program.
- Personal Statement: In 750-words or less, provide an Artist’s Statement that reflects your vision for a feature film, or equivalent body of cinematic work, that explains your preliminary plans for raising funds to support your microbudget production. Please describe how the critical thinking and technical expertise acquired in our program will support the successful execution of your vision.
- Portfolio: Submit 1 - 3 complete short films (each being 15 minutes or less) that the applicant has participated in as a principle creative collaborator (i.e. as writer, director, producer, director of photography, production designer, and/or editor).
  - Provide a document with links to YouTube, Vimeo, or similar platform.
  - All submitted online links to film samples must include:
    - The film's title
    - The applicant's role in the making of the film
    - The date the film was completed
Other materials in the portfolio may include, but are not limited to:
- screenwriting samples, photography, documentation of work in other media, critical media analysis, and any other materials which reflect the applicant's experience with moving image scholarship and practice
- Writing Sample: Please submit one of the following writing samples for the film modality you wish to complete. Admitted students may change modalities ONLY during their first two semesters of the program.
  - Narrative Feature Film:
    - Provide a detailed written treatment for a proposed feature film.
    - Provide a script sample of another work that he/she has written.
      - The applicant does not have to be the author of the script that he/she plans to direct as the thesis film if accepted into the program. Students may use a script that is in the public domain and direct his/her interpretation of it, or someone else may write a script that the student will direct.
  - Documentary Feature Film:
    - Provide a detailed written treatment for a proposed feature documentary.
    - The treatment should define the subject of the film and how it addresses the following items and your professional goals:
      - Rationale/Thesis
      - Style
      - Content
      - Approach
  - Experimental Feature Film, Series of Short Films, or Body of Work:
    - The detailed written treatment/proposal should describe the subject of the film and express the filmmaker's intentions regarding approach and style. The length of the treatment/proposal should reflect the scope of the project.
      - Rationale/Thesis
        - Address why this topic was selected and why this film should be made. This portion of the treatment/proposal should demonstrate the filmmaker's knowledge and sense of context for the significance of the work. It can also state a "challenge" or question - one the project will address, explore, or attempt to answer.
      - Approach
        - The filmmaker should express the style in which the film(s) or project will be made and how this style will enhance and express the nature of the subject and the meanings, thoughts, or impressions the filmmaker intends to reveal. The filmmaker may choose to describe specific techniques with shooting on film or video, or experimenting with other forms of cinematic digital media, that will form the basis of inquiry or aesthetic and technical exploration within the thesis project.
  - Résumé
  - Provide two letters of recommendation, with at least one from an industry professional or college/university professor.
  - Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Please submit all materials, with the exception of official transcripts, electronically as part of the online application. Applicants may be asked to participate in an admissions interview.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on the evaluation of the applicant's abilities, past performance, recommendations, match of this program, and faculty expertise to the applicant's career/academic goals, the applicant's potential for completing the degree, and the current applicant pool. Applicants are encouraged to apply as early as possible due to limited cohort size. There is no guarantee qualified applicants will be admitted after the cohort has been filled.

Degree Requirements

Required Courses
30 Total Credits

- Complete all of the following
  - Complete the following:
    - FIL5406 - Theories of Film Production (3)
    - FIL5800 - Research Methods in Film and Digital Media (3)
    - FIL6454 - Microbudget Production Design (3)
    - FIL6596 - Advanced Directing Workshop for Film and Digital Media (3)
    - FIL6619 - Guerilla Marketing and Models of Distribution (3)
    - FIL6644 - Microbudget Pre-Production (3)
    - FIL6649 - Microbudget Post-Production (3)
    - FIL6673 - Arts and Media Entrepreneurship (3)
  - Earn at least 6 credits from the following:
    - FIL5924 - Graduate Seminar (1)
- Note: FIL 5924 Graduate Seminar is 1 Credit Hour to be taken each semester for a total of 6 credits.

Internal Elective Courses
9 Total Credits

- Complete all of the following
  - Students select a minimum of 9 credit hours of internal electives that reflect their mode of filmmaking interest (narrative, documentary, or experimental). More than 9 credit hours of internal electives may be taken to substitute for external electives if approved by the graduate program coordinator. Students in other graduate programs are required to receive instructor consent before enrolling.
  - Complete at least 3 of the following:
    - FIL5141C - Feature/TV Writing (3)
    - FIL5371C - Documentary Production (3)
    - FIL5419 - Developing the Film Screenplay (3)
    - FIL5419 - Developing the Film Screenplay (3)
    - FIL6146 - Screenplay Refinement (3)
- Note: FIL 5907 Independent Study and FIL 5917/5918 Directed Research may be taken for a total of no more than six credit hours each.

External Electives
12 Total Credits

- Complete all of the following
  - Students select a minimum of 12 credit hours of external electives that align with their particular interests, outside the MFA in Feature Film Production. Choice of external electives should be made after discussion with the thesis advisor or graduate coordinator. Other electives related to the thesis topic may be approved by the graduate coordinator. Not all of these courses are offered every term, prerequisites and consent of instructor may be required.
  - Complete at least 4 of the following:
    - ADV6209 - Advertising and Society (3)
    - ARH5897 - Advanced Seminar in Art History (3)
    - ART5280 - Serial Content (3)
    - ART6683 - Time Arts (3)
    - ART6911C - Studio Concentration (3)
    - COM5932 - Topics in Communication Theory and Research (3)
    - COM6046 - Interpersonal Communication (3)
Course Not Found

FIL6971 - Thesis (1 - 99)

Before undertaking the thesis project, candidates must meet with the thesis advisory committee to submit and discuss the proposed project and obtain the committee's approval. The thesis requires intensive applied learning in order to complete a feature-length project and/or body of work. The student cannot enroll in thesis hours until the thesis advisory committee has been selected and approved. Once a student has begun to take thesis hours, they must enroll in at least one thesis hour for each remaining term until graduation. Students may spread out thesis hours any way they wish but are advised to follow recommendations in the program handbook. The thesis project has a strong research component both in the initial development phase and in the creation of the distribution and marketing plan for the project. In addition to creating the feature film or body of work, the student must write an accompanying thesis paper that meets all university requirements (see ETD Requirements). The final stage of the curriculum serves as a bridge to the professional world and supports the entrepreneurial philosophy of the program. The thesis project must be reviewed by the faculty adviser throughout the production process, and meet agreed upon criteria within a stated time frame. Once the thesis project is completed, candidates must have a screening or exhibition of the work and meet with the thesis advisory committee for final approval and oral defense.

Equipment Fee

Students in the Feature Film Production MFA program pay a $90 equipment fee each semester that they are enrolled. Courses containing a production element may charge an additional materials and equipment fee.

Grand Total Credits: 63

Financial Information

Graduate students may receive financial assistance through a limited number of competitive fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Is this program available 100% online?

Yes

UCF Online

Please Note: Financial Mathematics Graduate Certificate may be completed fully online although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description

The Mathematical Science Graduate Certificate on Financial Mathematics is designed for students to gain knowledge of mathematical finance and to pursue careers in financial services industry and regulatory agency.

The mathematical science graduate certificate on financial mathematics requires taking 4 graduate courses (12 credit hours), including 9 credit hours of required courses and 3 credit hours of elective courses.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor’s Degree

Application Requirements

Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Forensic Science MS
Is this program available 100% online?

Yes

UCF Online

Please note: Forensic Science MS may be completed fully online by domestic students, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in the in-person version of this program and a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description

The Master of Science in Forensic Science program is designed to service the needs of both practicing professionals and full-time students who desire an advanced program of study in forensic science. The program is comprised of three concentrations: Forensic Analysis, Forensic Biochemistry and Forensic Professional. The Forensic Biochemistry and Forensic Analysis concentrations require the student to perform original research and defend a written thesis. The Forensic Professional concentration is a nonthesis option comprised of course work and an independent study capstone project.

Forensic Science is a highly interdisciplinary science, as reflected in the following programs of study. The interdisciplinary nature of the program makes it imperative that students seek advising from faculty members on the appropriateness of this program towards their future career as well as the content of courses to ensure that they have the appropriate background to master the course content.

Thesis Options

The grounding in scientific research methodology provided by the thesis requirement is a central focus of the thesis-based concentrations. The Forensic Analysis and Biochemistry concentrations are comprised of 32 credit hours of study beyond the BS degree. Students will conduct research either on site or at the professional laboratories where they work. In either case, a member of the UCF Forensic Science faculty will act as research adviser and approve the research topic. This research culminates in the writing and presentation of the thesis.

The student's research adviser will select the thesis examination committee, consisting of two UCF faculty members and at least one other acknowledged forensic expert in the field. The student will present his/her thesis for examination by the committee. The thesis must be judged worthy of publication by the review committee and may not be submitted for examination until approved. For students choosing to conduct research at non-UCF sites, the thesis adviser may visit the student's laboratory where the research is to be performed, before the research begins and on a regular basis until the work is complete.

- **Forensic Analysis Concentration:** The Forensic Analysis concentration emphasizes the application of modern chromatographic, spectroscopic and micro-analytical techniques to problems in forensic science.
- **Forensic Biochemistry Concentration:** The Forensic Biochemistry concentration has a strong biochemistry-DNA focus to serve the needs of supervisory personnel in DNA sections of crime laboratories. National DNA standards mandate that such personnel have advanced degrees.

Nonthesis Option

The nonthesis concentration is specifically designed for the forensic analyst who currently holds employment in an operational forensic laboratory or has previously worked for a minimum of three years in an operational forensic laboratory. Applicants who do not meet these criteria must apply for one of the thesis-based concentrations. This specialized program option is not designed for international applicants.

- **Forensic Professional Concentration:** The Forensic Professional concentration is comprised of 34 credit hours of study beyond the bachelor of science degree but does not require an original laboratory-based research project. The Forensic Professional concentration culminates in a one-credit-hour independent study capstone project performed under the direction of one of the faculty members in the program.

Program Overview

The Forensic Science MS degree is comprised of 32 or 34 credit hours of study beyond the BS degree with an intensive specialization in one of three concentrations: Forensic Analysis, Forensic Biochemistry or Forensic Professional. Full-time students should complete the degree in two years of continuous full-time study, while part-time students will generally finish the degree in four years.

The program in **Forensic Analysis** and **Forensic Biochemistry** is research-based and requires original and independent research resulting in a written thesis to be defended before a committee consisting of two UCF graduate faculty members and at least one other acknowledged forensic expert in the field. These concentrations require 32 credit hours, including 9 credit hours of required courses, 15 credit hours of concentration courses, and 8 credit hours of Thesis.

The program in **Forensic Professional** requires 34 credit hours, including 9 hours of required courses and 24 hours of elective courses and one credit hour of independent study as the capstone experience. This concentration does not require an original laboratory-based research project. Students not in residence at UCF should consult the catalog for courses with online offerings.

Students with undergraduate degrees in chemistry, biochemistry, biology, forensic science, statistics and physics are encouraged to apply. Students applying to this program with a forensic science undergraduate degree, please be aware that this program is designed for students interested in pursuing a career in forensic chemistry, forensic biology, forensic biochemistry applications.

Students interested in pursuing careers in any of the following forensic disciplines should apply to a more appropriate program:

- Forensic Psychology, you should apply to a graduate Psychology program.
- Forensic Anthropology, you should apply to a graduate Anthropology program.
- Crime Scene Investigation, you should apply to a graduate Criminal Justice program.
- Forensic Pathology or Medical Examination, you should apply to a medical school.
- Forensic Engineering, you should apply to a graduate Engineering program.

Total Credit Hours Required: 32-34 Credit Hours Minimum beyond the Bachelor's Degree
Program Prerequisites

A bachelor's degree in Chemistry, Biochemistry, Molecular Biology, Physics, Statistics, Forensic Science, or another physical science, based on at least 30 hours of college-level science subjects, which will provide the background required to be successful in this program.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- A bachelor's in Forensic Science or another physical science, based on at least 30 hours of college-level science subjects, that provides the background required to be successful in the proposed program. Acceptable non-Forensic Science BS degrees may include Chemistry, Molecular Biology, Physics and Statistics.
- Three letters of recommendation. If the applicant is employed in a forensic laboratory and wishes to continue working in that laboratory while a distance learner in the Forensic Science MS program, one letter should come from his/her supervisor and should express their willingness to allow the student to use the laboratory instrumentation for their thesis research. Otherwise, the student will be unable to complete the research component of the degree.
- Short (one-page) statement describing why the applicant wants to pursue an advanced degree in Forensic Science which also details the area of Forensic Science that most interests them.

The Forensic Science Graduate Committee will evaluate the background of potential students applying for admission into the program.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Required Courses

9 Total Credits

- Complete the following:
  - CHSS504 - Topics in Forensic Science (3)
  - CHSS596 - The Forensic Expert in the Courtroom (3)
CHS6513 - Quality Assurance for Forensic Scientists (3)

Thesis/Nonthesis Option
23 - 25 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Complete all of the following
      - Earn at least 8 credits from the following types of courses:
        CHS 6971 Thesis The Forensic Analysis and Forensic Biochemistry concentrations require the student to conduct original research and successfully defend a written thesis.
- Concentrations
  - Complete 1 of the following
    - Forensic Analysis Concentration:
      - Earn at least 15 credits from the following:
        - STA5206 - Statistical Analysis (3)
        - CHM5235 - Applied Molecular Spectroscopy (3)
        - CHM6492 - Atomic Spectroscopy (3)
        - CHS6546 - Forensic Analysis of Ignitable Liquids (3)
        - CHS6545 - Forensic Analysis of Explosives (3)
        - CHS5937 - Special Topics (3)
  - Forensic Biochemistry Concentration
    - Complete all of the following
      - STA 5206 - Statistical Analysis may be substituted for equivalent course with advisor permission

Nonthesis Option/Forensic Professional Concentration

- Complete all of the following
  - Students in the Forensic Professional concentration are required to take 24 credit hours selected from the list below with approval of their faculty adviser and complete the Capstone course.
  - Earn at least 24 credits from the following:
    - STA5206 - Statistical Analysis (3)
    - CHM5235 - Applied Molecular Spectroscopy (3)
    - CHM6492 - Atomic Spectroscopy (3)
    - CHS6546 - Forensic Analysis of Ignitable Liquids (3)
    - CHS6545 - Forensic Analysis of Explosives (3)
    - CHS6535L - Forensic Analysis of Biological Materials (3)
    - CHS6535 - Forensic Molecular Biology (3)
    - CHS6536 - Population Genetics and Genetic Data (3)
    - BCH6740 - Advanced Biochemistry (3)
    - CGS5131 - Computer Forensics I: Seizure and Examination of Computer Systems (3)
    - CNT6418 - Computer Forensics II (3)
    - CHS5518 - The Forensic Collection and Examination of Digital Evidence (3)
    - CIS6207 - The Practice of Digital Forensics (3)
    - CAP6133 - Advanced Topics in Computer Security and Computer Forensics (3)
    - CHS5937 - Special Topics (3)
    - CHM6710 - Applied Analytical Chemistry (3)
    - CHM6440 - Kinetics and Catalysis (3)
    - CHS6251 - Applied Organic Synthesis (3)
    - CHS6240 - Chemical Thermodynamics (3)
    - BCH6740 - Advanced Biochemistry (3)
    - CHM6134 - Advanced Instrumental Analysis (3)
    - CHM6938 - ST: Electrochemistry (3)

Capstone
- Earn at least 1 credits from the following types of courses:
  - CHS 6908 - Independent Study The capstone experience in the Forensic Professional concentration requires one credit hour of Independent Study, which culminates in the submission of a required report on a pre-approved topic. This study will comprise either (1) a review of the current literature on a particular forensic science research topic area, or (2) a holistic case study dealing with a particular criminal case in which forensic evidence played a significant role.

Equipment Fee
0 Total Credits

- Full-time students in the Forensic Science MS program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

2021-2022 Graduate Catalog
Independent Learning

Students in the Forensic Analysis and Forensic Biochemistry concentrations are required to conduct original research and defend a written thesis. Students in the Forensic Professional concentration complete a capstone experience that requires independent research and a report.

Program Description

A PhD degree track in Human Factors and Cognitive (HFC) Psychology, accredited by the Human Factors and Ergonomics Society, is offered to those with a baccalaureate or master's degree in psychology or an allied area. The track seeks to develop the capacity to design, conduct, and apply human factors and cognitive psychology research in a variety of professional and academic settings. It is patterned on the scientist-practitioner model of the American Psychological Association (APA) and adheres to guidelines established by the committee for Education and Training of APA's Division 21 (Applied Experimental and Engineering Psychology).

The PhD degree track in HFC Psychology seeks to develop the capacity to design, conduct, and apply applied experimental and human factors research in a variety of professional settings. Students receive training in the content and techniques of human factors psychology-including statistical and quantitative procedures, experimental design, survey methods, computer techniques, and other research methodologies. Students are encouraged to also select a concentration area, which they complete as part of their required elective coursework. Examples include human-computer interaction, human-machine-environment interface, human performance, human factors in simulation and training, cognitive neuroscience, or other areas of interest with advisor authorization. In addition to the course requirements, students must demonstrate their knowledge and skills by completing the five competency domains. Finally, a dissertation representing a significant research contribution to the field is required.

We continue to improve the curriculum to adapt to the changing professional and societal demands and to offer the best graduate education and training in human factors and cognitive psychology. In particular, we have modified our curriculum and program requirements and introduced project and outcome-based competency assessments. These changes have helped to focus students' attention on their respective programs of research while simultaneously developing the knowledge and skill sets required to be Ph.D. scientist/practitioners in human factors and cognitive psychology.

Students and graduates of the HFC program have served the local community by improving the enjoyment, comfort, and safety of Walt Disney World entertainment rides, serving as an educational professional at several local colleges and universities and consulting at several government agencies and private industries. To date, our doctoral program continues to be the largest and one of the most prominent in the nation. Both faculty and students have received numerous honors and awards from the Human Factors and Ergonomics Society.

For students who enter with a baccalaureate degree, the Human Factors and Cognitive track in the Psychology PhD program requires a minimum of 75 credit hours, and students may earn the MA degree en route to the PhD by completing all of the requirements of the PhD except for dissertation. For students who already have a master's degree in Psychology, the MA is not available. Students who enter with a master's degree in psychology may be allowed to waive up to 30 hours of graduate course work to the doctoral program with approval of the program faculty, and will also be required to complete a minimum of 60 semester hours at UCF.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

For students who already have a master's degree in psychology, the number of credit hours will depend on the number of credit hours transferred or waived. However, all students in the program must complete 15 credit hours of dissertation.

Program Prerequisites

Degree(s) should be in psychology or an allied area.

Evidence of successful completion of undergraduate courses in statistics and general areas of experimental psychology.

Students are not normally admitted to the program without having completed a minimum amount of basic preparation in content related to experimental psychology. This preparation is judged on an individual basis but typically consists of at least 18 semester hours in the following:

- Courses in research methods, computer applications, and statistical methods.
- General experimental psychology courses, e.g., learning, physiological, perception, human learning, cognition, motivation, and measurement.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Degree(s) should be in psychology or an allied area.
- The GRE is not required for admission to this program.
- Evidence of successful completion of undergraduate courses in statistics and general areas of experimental psychology.
- Résumé or Curriculum Vitae.
- A clear statement concerning the professional background, the type of research you wish to pursue as a graduate student, and the faculty member you believe would be best suited to serve as your major professor and mentor.
- Three letters of recommendation, with at least two furnished by college or university professors who are acquainted with the applicant.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Students are not normally admitted to the program without having completed a minimum amount of basic preparation in content related to experimental psychology. This preparation is judged on an individual basis but typically consists of at least 18 semester hours in the following:

- Courses in research methods, computer applications, and statistical methods.
- General experimental psychology courses, e.g., learning, physiological, perception, human learning, cognition, motivation, and measurement.

Applicants are evaluated for program prerequisites and advised of any need for additional preparation. Previous graduate work is evaluated for credit on a case-by-case basis.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree. Admission criteria are more stringent because of the competitiveness of the application process.

Degree Requirements
Required Courses
42 Total Credits

- Complete all of the following
  - Students are required to achieve a minimum grade of B- in each core curriculum course. Students who take PSB 6328 and PSB 6348 must achieve a B- in both courses. If students earn a C+ or lower in any core curriculum course, they will be placed on academic probation and they may be required to retake the course or to complete remedial work required by the HFC committee in consultation with the student's adviser. If students earn a C+ or lower in two or more core curriculum courses they will be subject to immediate review by the Program Committee and may be dismissed from the program. It is anticipated that in most cases earning a C+ or lower in two core curriculum courses will result in dismissal from the program.
  - Complete the following:
    - EXP5256 - Human Factors I (3)
    - EXP6257 - Human Factors II (3)
    - EXP6258 - Human Factors III (3)
    - EXP5208 - Sensation and Perception (3)
    - EXP6116 - Visual Performance (3)
    - EXP6255 - Human Performance (3)
    - EXP6506 - Human Cognition and Learning (3)
    - EXP6541 - Advanced Human Computer Interaction (3)
    - INP7089 - Human Factors Professional Issues (3)
    - PSB5005 - Physiological Psychology (3)
    - PSY7217C - Advanced Research Methodology I (4)
    - PSY7218C - Advanced Research Methodology II (4)
    - PSY7219C - Advanced Research Methodology III (4)

Elective Courses
18 Total Credits

- Complete all of the following
  - Students should choose electives in concentrated course groupings: for example, human-machine systems, performance measurement and evaluation, simulation and training, or quantitative methods. Other elective course groupings may be developed for the student's specific interests. Students may choose to satisfy these elective requirements by taking courses outside the Psychology Department that can serve their multidisciplinary needs. Courses outside of the Department that have already been approved as electives are contained in the list below. A student who wishes to use courses that are not included on this list may seek approval by petitioning the HFC Faculty Committee through their academic adviser. Students may take up to 12 credit hours of Directed Research, however, it is highly recommended that they take elective courses that are related to their discipline from other graduate programs or departments at UCF. Electives may include but are not limited to the following courses:
  - Complete at least 6 of the following:
    - DEP5057 - Developmental Psychology (3)
    - Course Not Found
    - DIG6432 - Transmedia Story Creation (3)
    - EINS248 - Ergonomics (3)
    - EINS251 - Usability Engineering (3)
    - EINS255C - Interactive Simulation (3)
    - EINS255C - Interactive Simulation (3)
    - EME6613 - Instructional System Design (3)
    - EME6614 - Instructional Game Design for Training and Education (3)
    - EXP5254 - Human Factors and Aging (3)
    - ID56916 - Simulation Research Methods and Practicum (3)
    - ID56146 - Modeling and Simulation Systems (3)
    - ID56147 - Perspectives on Modeling and Simulation (3)
    - DIG5875C - Introduction to Modeling and Simulation (3)
    - ID56148 - Human Systems Integration for Modeling and Simulation (3)
    - ID56149 - Modeling and Simulation for Test and Evaluation (3)
    - Course Not Found
    - INP7310 - Organizational Psychology I (3)
    - Course Not Found
    - PSB6328 - Psychophysiology (3)
    - PSB6348 - The Neuroanatomical Basis of Psychological Function (3)
    - PSB6352 - Neuroimaging Design and Analysis Methods (3)
    - PSB7349 - Advanced Topics in Cognitive Neuroscience (3)
    - SPS5605 - Building and Improving Relationship and Emotional Intelligence (3)
    - SOP5059 - Advanced Social Psychology (3)
  - EXP 6939 - Teaching Seminar - 3 Credit Hours may also be taken

Concentration in Cognitive Neuroscience (Optional)
0 Total Credits

- The Human Factors and Cognitive Psychology PhD Program offers students opportunities for both lab and course-based training in Cognitive Neuroscience. To support cognitive neuroscience research training, the Department of Psychology maintains state-of-the-art research facilities, including space and equipment for electroencephalography/event-related
potentials (EEG/ERP), functional near-infrared spectroscopy (fNIRS), eye tracking, pupillometry, heart-rate variability, respiration, and electrodermal activity, as well as external collaborations to support functional magnetic resonance imaging (fMRI). In addition, the HFC Program also offers a course-based concentration in Cognitive Neuroscience with the following curriculum: A student who elects to complete the concentration must achieve a minimum grade of B- in each course. PSB 6328 - Psychophysiology 3 Credit Hours PSB 6348 - The Neuroanatomical Basis of Psychological Function 3 Credit Hours PSB 6352 - Neuroimaging Design and Analysis Methods 3 Credit Hours PSB 7349 - Advanced Topics in Cognitive Neuroscience 3 Credit Hours Select 6 credit hours of elective courses from the list above. Note: Admission to these courses is not guaranteed, but is contingent on the decision of the department, college, and instructor of record for the course.

Program Description

The Master of Science in Industrial and Organizational Psychology program focuses on the application of psychological principles to organizations and emphasizes the major areas of selection and training of employees, applied theories of organizational behavior including models of motivation, job satisfaction, and productivity; test theory and construction; assessment center technology; statistics and experimental design and a variety of current topics. Industrial and Organizational Psychology graduates are involved in many issues of critical importance to society including fairness in the selection and treatment of employees, the creation of work environments that maximize the satisfaction and productivity of employees, and the study of technological influences on human performance.

The MS degree program in Industrial and Organizational Psychology is a four-semester program for full-time students. Both thesis and nonthesis options are offered and both consist of a minimum of 38 semester hours of work.

Total Credit Hours Required: 38 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

A bachelor's degree with a major in psychology or allied area, or a baccalaureate degree with the completion of undergraduate courses in statistics and research methods, and preference of four additional upper-division psychology courses (12 credit hours)

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended
- Official, competitive GRE score taken within the last five years
- A bachelor's degree with a major in psychology or allied area, or a baccalaureate degree with the completion of undergraduate courses in statistics and research methods, and preference of four additional upper-division psychology courses (12 credit hours)
- Résumé
- A 1-2 page Goal Statement that includes the applicant’s reasons for choosing I/O as a career, reasons for choosing this UCF program specifically, and any relevant knowledge, skills, abilities and other experiences the applicant has that might make him/her a good I/O student, practitioner, and/or researcher
- Three letters of recommendation, preferably with at least two furnished by college or university professors who are acquainted with the applicant

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant’s abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant’s potential for completing the degree.

Acceptance decisions are made only in the spring semester for admission in the fall of each year.

Program Description

The Industrial and Organizational Psychology track in the Psychology PhD program develops competency through research and training for the application of psychological principles to organizations. The degree is patterned on the scientist-practitioner model of the American Psychological Association (APA).
Program graduates are involved in many issues of critical importance to society, including fairness in the selection and treatment of employees, the creation of work environments that maximize the satisfaction and productivity of employees, and the study of technological influences on human performance.
The doctoral program provides students with training consistent with the scientist-practitioner model. A key assumption of the program is that every graduate must be a highly competent scientist who can contribute to both the science and practice of the discipline.
You can view our Industrial and Organizational Psychology Doctoral Program Handbook in the link above.
The Psychology PhD program in Industrial and Organizational Psychology (I/O) requires four to five years of full-time study beyond the baccalaureate and three to four years beyond the masters. The first few years are devoted to course work and the final year to the doctoral dissertation.
The I/O program requires a minimum of 75 credit hours of graduate study for students who enter the program with a baccalaureate degree. The nature of this study is determined by the I/O Area Program Committee.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Bachelor's or master's degree in Psychology or another allied area.

Evidence of successful completion of undergraduate courses in statistics and in the general area of experimental psychology.
**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Bachelor's or master's degree in Psychology or another allied area.
- Evidence of successful completion of undergraduate courses in statistics and in the general area of experimental psychology.
- Résumé.
- Statement outlining the student's academic and professional background and goals, along with career aspirations and goals.
- Three letters of recommendation, with at least two furnished by college or university professors who are acquainted with the applicant.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

It is preferred that applicants to the program either have a bachelor's degree with a major in psychology, or a baccalaureate degree and completion of undergraduate psychology courses in statistics and research methods; and four additional upper-division courses (12 credit hours) in the core content areas of psychology, for a minimum of 18 upper-division hours in psychology. It is up to the discretion of the I/O admissions committee whether a student accepted into the I/O Psychology PhD program, with a bachelor's degree other than psychology, will be required to take upper-division courses in the core content areas of psychology.

Applicants should note that admission to the PhD program is competitive, and successful applicants are expected to have an outstanding academic record. Admission to the program is based upon an overall assessment of the applicant's potential for completing it and for making significant contributions to the science and/or practice of I/O psychology. Admissions decisions are generally made by the second week in March and applicants are notified of their status shortly thereafter. Note that admission to the program is restricted to the fall semester of each academic year.

I/O Area Courses  
30 Total Credits

- Complete the following:
  - INP6005 - Overview of Research in Industrial and Organizational Psychology (3)  
  - INP7214 - Industrial Psychology I (3)
INP7310 - Organizational Psychology I (3)  
INP7081 - Professional Issues in Industrial and Organizational Psychology (3)  
PSY7315 - Psychometric Theory and Practice (3)  
PSY7217C - Advanced Research Methodology I (4)  
PSY7218C - Advanced Research Methodology II (4)  
PSY7219C - Advanced Research Methodology III (4)  
INP7071 - Research Methods in Industrial and Organizational Psychology (3)

Psychology Field Courses
6 Total Credits

- Complete the following:
  - SOP5059 - Advanced Social Psychology (3)  
  - EXP6506 - Human Cognition and Learning (3)

Research Courses
6 Total Credits

- Earn at least 6 credits from the following types of courses:
  - INP 6933 - Seminar in Industrial and Organizational Psychology 3 Credit Hours (taken twice) or INP 6971 - Thesis 3 Credit Hours (taken twice)

Teaching Experience
3 Total Credits

- Complete all of the following
  - Earn at least 3 credits from the following:
    - EXP6939 - Teaching Seminar (3 - 99)
  - All students must successfully teach a minimum of one undergraduate course as instructor of record prior to completing the I/O Psychology PhD degree. Fulfillment of the Teaching requirement involves first taking the UCF College of Graduate Studies online and face-to-face GTA Training and EXP 6939 - Teaching Seminar. In addition, students need to serve as instructor of record for an undergraduate class at UCF. First-time students as instructor of record must submit a syllabus, lecture notes, examinations, two course evaluations (mid and end-of-semester), as well as written feedback from the student's major professor or members of the student's doctoral committee who directly observed or viewed videotapes of at least one lecture. Students will be required to administer student evaluations to their class mid-way through the semester so that they can receive feedback and make any necessary changes. The student's adviser will provide ratings of the student's performance as instructor of record at the end of the semester. If the adviser believes that the student has not performed satisfactorily, the adviser will determine remediation specific to the student's weakness (e.g., presentation skills). This remediation is not limited to, but may include, the following: serving as a guest lecturer for another instructor of record, taking a course or seminar, or teaching another semester, as determined by the student's adviser. Fulfillment of the traditional Teaching requirement is intended to provide students with (a) additional training and opportunities to develop instructional skills consistent with university-level instruction, (b) the opportunity to receive and react to constructive comments concerning their developing instructional skills, (c) additional opportunities to learn and develop expertise in using newly developed technology and methods relevant to university-level instruction (e.g., active learning groups, computer-assisted technology, software programs that facilitate and complement traditional instructional activities), and (d) additional expertise in select areas of psychology to prepare them for future professional instructional opportunities following graduation from the university.

Elective Courses
15 Total Credits

- Complete all of the following
  - Students must select five elective courses. These courses must be approved by the student's major adviser and the program director. The courses in this set are selected by the student in conjunction with his or her adviser. Note, however, that all courses in the set must be approved by the I/O Program Committee. The available elective courses include, but are not limited to, the following:
  - Complete at least 5 of the following:
    - MAN6311 - Advanced Topics in Human Resources Management (3)  
    - MAN7207 - Organization Theory (3)  
    - MAN6385 - Strategic Human Resources Management (3)  
    - INP6605 - Training and Team Performance (3)  
    - INP6215 - Assessment Centers and Leadership (3)  
    - INP6058 - Job Analysis and Performance Appraisal (3)  
    - INP6318 - Recruitment, Placement and Selection (3)  
    - INP6933 - Seminar in Industrial and Organizational Psychology (3)  
    - INP 6933 - Seminar in Industrial and Organizational Psychology: 3 Credit Hours (may be taken up to 6 times for credit)

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  - PSY 7980 - Doctoral Dissertation
Candidacy Examination

- After completing all required courses, students must pass all four sections of the Candidacy Examination. This is a written examination covering the content of the field and are graded by the I/O faculty. Candidacy Examinations may be taken a maximum of two times. Failure to pass the examination will result in the student being dismissed from the program.

Admission to Candidacy

- The following are required to be admitted to candidacy and enroll in dissertation hours: Completion of all course work, except for dissertation hours. Successful completion of the candidacy examination. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Independent Learning

- Given the nature of graduate training and the pursuit of a doctoral degree, graduate students in industrial and organizational psychology are expected to engage in independent learning throughout their graduate career. The completion of the doctoral dissertation is an example of independent learning in which all graduate students participate. In addition, a master's thesis or other research projects will be undertaken by the students from the first year on. To facilitate this process, students are expected to attend weekly program-sponsored research presentations during the fall and spring semesters and will be required to give at least three of these presentations prior to graduation.

Grand Total Credits: 75

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. No

Program Description

The Integrative and Conservation Biology PhD program prepares students for independent research and roles within industry, nongovernmental organizations, academia, or government sectors, combining biological sciences with a range of other disciplines.

The purpose of this interdisciplinary training is to produce scientists capable of doing independent research and the ability to communicate issues of biology and conservation to policymakers, the general public, and industry.

Students will choose one of two specializations: Conservation Biology or Integrative Biology. The Conservation Biology Track is intended to provide the academic background necessary to begin work in industry, non-governmental organizations, or government in a leadership role applying cutting-edge principles to problem-solving in conservation biology. The Integrative Biology Track embraces applied and basic research concerning ecology, evolution, physiology, genetics, behavior, and conservation. Students in either track would be prepared to pursue an academic career. Please scroll to the bottom of this page for further details on these tracks.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants must choose a track in this program. Track(s) may have different requirements.

Applicants should first identify faculty who match their own research interests and then contact faculty in advance to inquire about research opportunities in faculty labs and to solicit agreement that a faculty member is interested in serving as the student’s dissertation advisor. Applicants to the PhD program who do not have a consenting dissertation advisor within the faculty will not be accepted into the program.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Is this track available 100% online?
No
**Track Description**

The Conservation Biology track in the Integrative and Conservation Biology PhD program prepares students for independent research and roles within industry, nongovernmental organizations or government sectors combining traditional biological sciences with a range of other disciplines.

The Conservation Biology track within the Integrative and Conservation Biology PhD program is intended to provide the academic background necessary to begin work in industry, nongovernmental organizations, or government in a leadership role applying cutting-edge principles to problem solving in conservation biology. Students in this track would also be prepared to pursue an academic career.

The Conservation Biology Track in the Integrative and Conservation Biology PhD program requires 72 credit hours beyond the bachelor's degree, including a minimum of 27 hours of formal coursework excluding independent study. The formal coursework includes 15 credit hours of required core courses and at least 12 credit hours of additional graduate-level courses from Biology (or other departments) selected in consultation with the advisor and the dissertation committee (at least 4 of the 12 credit hours must be offered through the Biology Department). The remaining 45 credit hours may consist of additional electives, doctoral dissertation research (PCB 7980), and a maximum of 12 credit hours of combined directed research (PCB 6918, PCB 7919, and PCB 5917) and independent study (PCB 6908). In addition, at least 15 credit hours of the remaining 45 credit hours must be comprised of doctoral dissertation research (PCB 7980).

**Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree**

**Track Prerequisites**

Students entering the graduate program with regular status are normally expected to have completed course work generally required for a bachelor's degree in biology.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript from each college/university attended.
- The GRE is not required for admission to this program.
- Three letters of recommendation.
- Résumé or CV.
- A personal statement. Assessment of your application is based on your academic background, analytical skills, communication skills, and research experience. A personal statement is an opportunity to convey to the selection committee your personal, academic, and/or professional experiences that have led to your desire to attend graduate school. Include your long-term career goals and how a graduate education will help you achieve these goals. It is important to dedicate a section of your statement to discuss your research interests. Please include a research question and approach (to the extent possible) you would like to pursue while earning your degree.
- A computer-based score of 230 (or 89 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant's degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Students entering the graduate program with regular status are normally expected to have completed course work generally required for a bachelor's degree in biology.

Applicants should first identify faculty who match their own research interests, and then contact faculty in advance to inquire about research opportunities in faculty labs and to solicit agreement that a faculty member is interested in serving as the student's dissertation advisor. Applicants to the Ph.D. program who do not have a consenting dissertation advisor within the department faculty will not be accepted into the program. Admission is competitive and based on an overall assessment of the qualifications as submitted and the availability of faculty to serve as dissertation advisor.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, the identification of a dissertation advisor, and the applicant's potential for completing the degree.

**Degree Requirements**

Required Courses  
15 Total Credits

- Complete all of the following
  - PCB6042 - Conservation Biology Theory (4)  
  - PCB6053C - Restoration Ecology (4)  
  - PCB6466 - Methods in Experimental Ecology (3)  
  - PCB6095 - Professional Development in Biology I (1)  
  - PCB6096 - Professional Development in Biology II (1)
- Earn at least 2 credits from the following:
  - BSC6935 - Seminar in Biology (1)
- BSC 6935 - Seminar in Biology: Students will take 1 credit hour each of two semesters.

Elective Courses  
12 Total Credits

- Earn at least 12 credits from the following types of courses:
  - A minimum of 12 credit hours of formal graduate-level courses from Biology, or other departments, are selected in consultation with the advisor and the dissertation committee. The goal is to tailor the program of study to the individual student’s needs while maximizing exposure to a variety of disciplines including, among others, policy, economics, sociology, engineering, chemistry, statistics, or computer science.

Dissertation  
15 Total Credits

- Complete all of the following
  - Earn at least 15 credits from the following types of courses:
    - PCB 7980 - Dissertation  
      Advisory Committee  
    - The Advisory Committee shall consist of a minimum of four members, including the dissertation advisor, with at least three members coming from the graduate faculty in the Biology Department. At least one member will be from a department other than Biology or from outside the university. The chair, or co-chair, must be a member of the program graduate faculty.

Enrollment Requirements  
0 Total Credits

- Students are required to register for 9 credit hours in fall and spring before their candidacy exam, and 6 credit hours in summer if enrolled. After being admitted to candidacy, minimum enrollment is 3 credit hours of dissertation research each semester.

Additional Electives  
30 Total Credits

---

**2021-2022 Graduate Catalog**
Earn at least 30 credits from the following types of courses:
In addition to the above required, elective, and dissertation credits, the student must enroll in an additional 30 credit hours of electives. These electives may include additional formal coursework, additional dissertation research hours (PCB 7980), and a maximum of 12 credit hours combined of independent study (PCB 6908) and directed research (PCB 6918, PCB 7919, and PCB 5917). Professional internship hours can be substituted for directed research.

Examinations
0 Total Credits

Details

Qualifying Examination
0 Total Credits

- The written qualifying examination should be completed within the first two years of the student's program. The exam seeks to cover areas of general knowledge and discipline-specific knowledge within the student's declared track. These questions could be related to the dissertation research proposal or designed to examine general knowledge and reasoning within the field. The candidate will meet with their advisory committee at least two months prior to the examination to discuss expectations. Committee members must clearly articulate in writing the general areas that may be examined. Any student failing the examination must repeat the examination within six calendar months of the date of the first examination and requires a majority vote by committee members to pass the exam. A second failed attempt will result in dismissal from the program.

Candidacy Examination
0 Total Credits

- Each student will be required to generate and orally defend a written proposal outlining their dissertation research to their dissertation advisory committee no later than 12 months after passing the Qualifying Examination. The oral Candidacy Examination will cover all areas within the scope of the student's doctoral program and requires that the student demonstrate knowledge of the theory, literature and research methodologies relevant to the proposed area of research as well as demonstrate an understanding of how their work relates to the field of biology as a whole. After passing the Candidacy Examination and meeting other requirements, the student will be deemed as having been admitted to candidacy and can register for dissertation hours. Once a student is admitted to candidacy, the focus will be on dissertation research. For most students, the research and writing of the dissertation will take two to three years after advancing to candidacy. During this time, students should remain in close contact with the dissertation advisor and advisory committee, and annual progress reports must be filed with the Graduate Program Director.

Candidacy Examination - Written Proposal
0 Total Credits

- A written dissertation proposal, already approved by the advisor, must be submitted to each committee member no later than two weeks prior to the Candidacy Examination. Typically, the proposal will be in the format described below. However, in cases where this format is not appropriate, an alternative format may be used with the approval of the dissertation advisor. The proposal should be approximately 10 to 15 pages in length not including references, single-spaced and typed in 12-point font with one-inch margins on all sides. The use of figures and tables is encouraged. With rare exceptions it is expected that dissertation research will be hypothesis-driven. Specific Aims: Describe concisely the problem(s) to be addressed and the specific goals of the dissertation research as they relate to the problem(s), including clear statements of hypotheses to be tested. Background and Significance: Review background literature relevant to the dissertation topic, indicating clearly where gaps in knowledge exist. Justify the need for the research by explaining its anticipated significance. Conclude by linking gaps in current knowledge to the proposed specific aims. Methodology: Outline carefully the study design (observations, experiments, models, statistical analysis, etc.) related to, and the methodology to be used for, each specific aim. Methodologies should be explained in sufficient detail to allow committee members to assess the validity of its use in the study. Potential outcomes and alternative approaches should be discussed. Literature Cited: References should be indicated in the main body of the proposal wherever appropriate and should follow the format of a peer-reviewed journal in a field of study appropriate to the research. This section can be as long as necessary.

Candidacy Examination - Oral Component
0 Total Credits

- At least two weeks prior to the examination, an abstract describing the proposed research will be posted in the Biological Sciences Building and circulated by e-mail among faculty and graduate students. The candidate will present the research proposal in a forum open to all faculty, students and visitors. The oral presentation should be approximately 30-45 minutes in length to be followed by a public question-and-answer period. Presentation of preliminary data is neither required nor expected, but should be provided if available and relevant. With the exception of the advisory committee and candidate, all faculty, students and visitors will leave at the conclusion of the public question-and-answer period. The committee will continue the exam in closed session with further questioning. Questions can be directed to any matter relevant to the research proposal and areas of weakness previously identified in the written (qualifying) exam. A majority vote is required to pass the examination; however, no more than one negative vote is permitted. The majority must include the dissertation advisor. Any student failing the examination must repeat the examination within six calendar months of the date of the first examination. A second failed attempt will result in dismissal from the program.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Program of study submitted and approved. Dissertation Committee formed (without external member) Successful completion of the qualifying exam.
Dissertation Defense
0 Total Credits

- The dissertation is expected to represent an original and significant contribution to the discipline. Upon completion and approval of the doctoral dissertation by all appropriate faculty and university offices, the student will make a formal presentation of the research findings in seminar format to the dissertation committee and other university faculty and students who may wish to attend. The dissertation should be in a format appropriate for publication and should be “tightened” to a readiness for submittal by use of appendixes for nonessential information. The major role of the student’s advisory committee is to offer guidance on study design and interpretation of results. A polished draft must be delivered to the advisory committee for review after the student and dissertation advisor have agreed upon editorial changes; this should occur well before the anticipated date of the final defense. Committee members have the right to reject documents that fail to meet these guidelines. Committee members should be given at least two weeks to review the draft before the student attempts to schedule the final defense. The final defense is to be scheduled only after the advisory committee agrees that the dissertation is ready for defense. Committee members should return the corrected dissertation to the student two weeks after receipt and the candidate should check with committee members to ensure they have the time to review the document. For example, if the student delivers the final draft to the committee one month prior to the proposed defense date, that would allow two weeks before the scheduled defense date for the student to make recommended changes. At least two weeks prior to the defense, an abstract describing the research conducted and conclusions reached will be posted in the Biological Sciences Building, circulated by e-mail among faculty and graduate students, and posted at the College of Graduate Studies Events Calendar. The candidate will present the research in a forum open to all faculty, students, and visitors. The oral presentation should be approximately 45-50 minutes in length to be followed by a question-and-answer period. In the presentation the candidate should focus on background information, describe the research performed, and draw attention to the significance of the conclusions reached. With the exception of the committee and candidate, all faculty, students, and visitors will leave at the conclusion of the question-and-answer period. The committee will continue the defense and the candidate will answer questions about the subject matter presented and defend the conclusions drawn. The committee will ask questions of the process used and assess the candidate’s level of competency with the research topic. A majority vote is required to pass the examination; however, no more than one negative vote is permitted. The majority must include the dissertation advisor.

Student Orientation
0 Total Credits

- An orientation for all incoming students will be scheduled one week prior to each fall semester. The orientation will include tours of the program facilities, a session on registration, university policies and procedures, and expectations of doctoral study. Further, Environmental Health and Safety will present a program on topics such as laboratory safety, chemical and fire safety, biohazard training, and radioisotope handling. Expectations for Graduate Teaching Assistants (GTA) and Graduate Research Assistants (GRA) will be fully covered. In addition, students will be required to participate in the program for GTAs offered by the UCF Faculty Teaching and Learning Center and the College of Sciences. Students are strongly encouraged to attend the university's orientation also, held approximately one week before classes begin in the Fall semester.

Independent Learning
0 Total Credits

- The dissertation satisfies the independent learning experience.

Grand Total Credits: 72

Track Details

A student is required to establish a program of study before the completion of nine credit hours of coursework, in conjunction with their dissertation advisor and advisory committee. A student's advisory committee may require the candidate to take any graduate course taught at UCF if deemed appropriate for the student's area of emphasis. Students entering with a master's degree may request up to 30 semester credit hours of previous work be waived toward the requirements for this degree with approval from the advisory committee. Students who transfer 30 credit hours must still take 2 credit hours of Biology Seminar (BSC 6935) and Professional Development I (PCB 6095) and II (PCB 6096). Students may register for dissertation research only after passing the candidacy exam.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Track Description

The Integrative Biology track in the Integrative and Conservation Biology PhD program prepares students for independent research and roles within industry, nongovernmental organizations or government sectors combining traditional biological sciences with a range of other disciplines.

The Integrative Biology track within the Integrative and Conservation Biology PhD program embraces applied and basic research concerning ecology, evolution, physiology, genetics, behavior, and conservation. Students taking this track will be prepared to pursue an academic career.

The Integrative Biology Track requires 72 credit hours beyond the bachelor's degree, including a minimum of 27 hours of formal coursework excluding independent study. The formal coursework includes 7 credit hours of required core courses and at least 20 credit hours of graduate-level courses from Biology (or other departments) selected in consultation with the advisor and the dissertation committee (at least 12 of the 20 credit hours must be offered through the Biology Department). The remaining 45 credit hours may consist of additional electives, doctoral dissertation research (PCB 7980), and a maximum of 12 credit hours of combined directed research (PCB 6917, PCB 7919, and PCB 5917) and independent study (PCB 6908). In addition, at least 15 credit hours of the remaining 45 credit hours must be comprised of doctoral dissertation research (PCB 7980).

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

Students entering the graduate program with regular status are normally expected to have completed course work generally required for a bachelor's degree in biology.
**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript from each college/university attended.
- The GRE is not required for admission to this program.
- Three letters of recommendation.
- Résumé or CV
- A personal statement. Assessment of your application is based on your academic background, analytical skills, communication skills, and research experience. A personal statement is an opportunity to convey to the selection committee your personal, academic, and/or professional experiences that have led to your desire to attend graduate school. Include your long-term career goals and how a graduate education will help you achieve these goals. It is important to dedicate a section of your statement to discuss your research interests. Please include a research question and approach (to the extent possible) you would like to pursue while earning your degree.
- A computer-based score of 230 (or 89 internet-based score) on the Test of English as a Foreign language (TOEFL) if an applicant is from a country where English is not the official language, or if an applicant’s degree is not from an accredited U.S. institution, or if an applicant did not earn a degree in a country where English is the only official language or a university where English is the only official language of instruction. Although we prefer the TOEFL, we will accept IELTS scores of 7.0.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Students entering the graduate program with regular status are normally expected to have completed course work generally required for a bachelor’s degree in biology.

Applicants should first identify faculty who match their own research interests, and then contact faculty in advance to inquire about research opportunities in faculty labs and to solicit agreement that a faculty member is interested in serving as the student’s dissertation advisor. Applicants to the Ph.D. program who do not have a consenting dissertation advisor within the department faculty will not be accepted into the program. Admission is competitive and based on an overall assessment of the qualifications as submitted and the availability of faculty to serve as dissertation advisor.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant’s abilities, past performance, recommendations, match of this program and faculty expertise to the applicant’s career/academic goals, the identification of a dissertation adviser, and the applicant’s potential for completing the degree.

The proposal should be approximately 10 to 15 pages in length not including references, single-spaced and typed in 12-point font with one-inch margins on all sides. The use of figures and tables is encouraged. With rare exceptions it is expected that dissertation research will be hypothesis-driven. Specific Aims: Describe concisely the problem(s) to be addressed and the specific goals of the dissertation research as they relate to the problem(s), including clear statements of hypotheses to be tested. Background and Significance: Review background literature relevant to the dissertation topic, indicating clearly where gaps in knowledge exist. Justify the need for the research by explaining its anticipated significance. Conclude by linking gaps in current knowledge to the proposed specific aims. Methodology: Outline carefully the study design (observations, experiments, models, statistical analysis, etc.) related to, and the methodology to be used for, each specific aim. Methodologies should be explained in sufficient detail to allow committee members to assess the validity of its use in the study. Potential outcomes and alternative approaches should be discussed. Literature Cited: References should be indicated in the main body of the proposal wherever appropriate and should follow the format of a peer-reviewed journal in a field of study appropriate to the research. This section can be as long as necessary.

Candidacy Examination - Oral Component
0 Total Credits

- At least two weeks prior to the examination, an abstract describing the proposed research will be posted in the Biological Sciences Building and circulated by e-mail among faculty and graduate students. The candidate will present the research proposal in a forum open to all faculty, students, and visitors. The oral presentation should be approximately 30-45 minutes in length to be followed by a public question-and-answer period. Presentation of preliminary data is neither required nor expected, but should be provided if available and relevant. With the exception of the advisory committee and candidate, all faculty, students and visitors will leave at the conclusion of the public question-and-answer period. The committee will continue the exam in closed session with further questioning. Questions can be directed to any matter relevant to the research proposal and areas of weakness previously identified in the written (qualifying) exam. A majority vote is required to pass the examination; however, no more than one negative vote is permitted. The majority must include the dissertation advisor. Any student failing the examination must repeat the examination within six calendar months of the date of the first examination. A second failed attempt will result in dismissal from the program.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Program of study submitted and approved. Dissertation Committee formed (without external member). Successful completion of qualifying exam. Completion of all coursework (except for dissertation hours). External member added to Dissertation Committee. Successful completion of candidacy exam.

Dissertation Defense
0 Total Credits

- The dissertation is expected to represent an original and significant contribution to the discipline. Upon completion and approval of the doctoral dissertation by all appropriate faculty and university offices, the student will make a formal presentation of the research findings in seminar format to the dissertation committee and other university faculty and
Fellowship Information

Track Details

Student Orientation
0 Total Credits

- An orientation for all incoming students will be scheduled one week prior to each fall semester. The orientation will include tours of the program facilities, a session on registration, university policies and procedures, and expectations of doctoral study. Further, Environmental Health and Safety will present a program on topics such as laboratory safety, chemical and fire safety, biohazard training, and radiisotope handling. Expectations for Graduate Teaching Assistants (GTA) and Graduate Research Assistants (GRA) will be fully covered. In addition, students will be required to participate in the program for GTAs offered by the UCF Faculty Center for Teaching and Learning and the College of Sciences. Students are strongly encouraged to attend the university orientation as well, held approximately one week prior to each fall semester.

Independent Learning
0 Total Credits

- The dissertation satisfies the independent learning experience.

Grand Total Credits: 72

Track Details

A student is required to establish a program of study before the completion of nine credit hours of coursework, in conjunction with their dissertation advisor and advisory committee. A student's advisory committee may require the candidate to take any graduate course taught at UCF if deemed appropriate for the student's area of emphasis. Students entering with a master's degree may request up to 30 semester credit hours of previous work be waived toward the requirements for this degree with approval from the advisory committee. Students who transfer 30 credit hours must still take 2 credit hours of Biology Seminar (BSC 6935) and Professional Development I (PCB 6095) and II (PCB 6096). Students may register for dissertation research only after passing the candidacy exam.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Is this program available 100% online?
No

Program Description
The Integrative Anthropological Sciences PhD emphasizes cross-disciplinary empirical research on the dynamics of transformation and change in societies past and present. The program integrates methodologies from the science and technology components of Science, Technology, Engineering, and Math (STEM) with the theoretical and analytical strengths of social science to address critical social challenges.

The curriculum is comprised of the following basic elements: 1) a core curriculum focused on methodological expertise; 2) a topical curriculum covering the dynamics of transformation in human societies; 3) professional competence in workplace skills embedded into all courses; and 4) experiential learning via independent research. The central purpose of the program is to produce graduates with the necessary methodological expertise and analytical skills to create innovative solutions to the ongoing challenges of local and global disparities, environmental and anthropogenic crises, and the resilience and vulnerability of human populations.

The Integrative Anthropological Sciences PhD requires 51 credit hours beyond an earned master's degree. Required coursework minimally includes 12 credit hours of core courses, 24 credit hours of elective courses, and 15 hours of dissertation research. If foundational or theoretical coursework is not present in the earned master's, remaining credit hours may consist of additional electives, doctoral research, and a maximum of 9 credit hours of directed research and independent study.

Total Credit Hours Required: 51 Credit Hours Minimum beyond the Master's Degree

Program Prerequisites
A master's degree or its equivalent in Anthropology or a closely related discipline.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A master's degree or its equivalent in Anthropology or a closely related discipline.
- A minimum cumulative GPA of 3.5 for all master's level work completed.
- Official, competitive GRE score taken within the last five years.
- A personal statement not to exceed 1,500 words.
- A curriculum vitae.
- A writing sample of at least 2,500 words demonstrating the ability to conduct graduate-level work.
- Three letters of recommendation.
- An on campus, by phone or virtual interview with a potential advisor.
- International applicants whose first language is not English are required to submit results of the Test of English as a Foreign Language (TOEFL) or other equivalent test approved by the Graduate College unless they hold a degree from a US accredited institution. The TOEFL is strongly preferred. The minimum TOEFL score for full admissions consideration is 90 on the Internet-based test (IBT), 232 on the computer-based test, or 575 on the paper-based test. The minimum IELTS score is 7.0. Applicants should plan to take the appropriate test no later than November to ensure consideration of their applications by the December 1 deadline.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on an evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Core
9 Total Credits

- Complete the following:
  - ANG6002 - Proseminar in Anthropology (3)
  - ANG6931 - Science, Technology, and the Transformation of Human Societies (3)
  - ANG7075 - Advanced Anthropological Topics in Geospatial Analysis (3)

2021-2022 Graduate Catalog
Research Methods
3 Total Credits

- Complete at least 1 of the following:
  - ANG6498 - Advanced Qualitative Methods in Anthropology (3)
  - ANG7496 - Advanced Quantitative Methods in Anthropology (3)

Elective Courses
24 Total Credits

- All students in the doctoral program must complete 24 hours of unrestricted electives. The unrestricted electives offer the student the opportunity to explore their interests, further advance their methodological skills, and gain interdisciplinary experience. To fulfill their unrestricted electives requirement, students may also take graduate-level courses in programs outside the department, particularly in Biology, Sociology, Political Science, History, and the College of Health and Public Affairs but, outside courses must not exceed 12 credit hours. The student's faculty advisor and the Graduate Program Coordinator must approval all graduate courses taken outside the department. The student may also use the second methods course identified in the Core requirement as an Unrestricted Elective. The departmental course options for the Unrestricted Electives include the following:

Unrestricted Electives
24 Total Credits

- Earn at least 24 credits from the following:
  - ANG5094 - Writing in Anthropology (3)
  - ANG5166 - Problems in Maya Studies (3)
  - Course Not Found
  - ANG5191 - Mortuary Archaeology (3)

  - ANG6930 - Seminar in Cultural Anthropology (3)
  - ANG6740C - Advanced Forensic Anthropology (3)
  - ANG6801 - Ethnographic Research Methods (3)

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  - ANG 7980 Dissertation Research -15 credit hours In consultation with the advisor, each student must secure qualified members of their dissertation committee. The dissertation committee will consist of a minimum four members. At least three members must be Anthropology Graduate Faculty, and the student's advisor will serve as the committee chair. One member must be from either outside the student's department or UCF. Graduate faculty members must form the majority of any given committee. A Dissertation Committee must be formed prior to enrollment in dissertation hours. A student who passes their candidacy exam (proposal defense) will begin the dissertation process. The dissertation serves as the culmination of the coursework that comprises this research-based degree. It must make a significant original theoretical, intellectual, practical, creative, or research contribution to the student's area within the discipline. Dissertations will be theoretically grounded, show
expertise in the topic area, and utilize methodologically sound analysis of either quantitative data, qualitative data or mixed-methods data. The dissertation will be completed through a minimum of 15 hours of dissertation credit, which students will use to conduct original research.

Examinations
0 Total Credits
No Rules
Qualifying Exam
0 Total Credits

- Students are expected to form their dissertation committee by the beginning of their third semester. The Qualifying Exam will consist of a collection of research statements written by the PhD student in consultation with their committee and an oral defense of the statements. The number and topics of the statements will be determined by the advisor in consultation with the student and the dissertation committee. Passing the qualifying exam is necessary before a student can schedule their Candidacy Exam.

Candidacy Examination—Written Proposal and Oral Defense
0 Total Credits

- Advancement to candidacy requires a successful defense of the student's dissertation grant proposal. This defense takes place in the semester prior to the one in which the student intends to enroll in dissertation hours, normally during the 4th semester. The proposal defense is based on a research proposal that follows the guidelines and format of a major external grant agreed upon by the dissertation committee.

Independent Learning
0 Total Credits

- As with all graduate programs, independent learning is an important component in the IAS doctoral program. Students will demonstrate independent learning through research seminars, directed research and the dissertation. Doctoral students are also expected to pursue additional independent reading beyond formal coursework relevant to their research and career direction.

Grand Total Credits: 51

Is this program available 100% online?
No

Program Description

The Graduate Certificate in Intelligence and National Security provides an interdisciplinary graduate education for people engaged in or seeking professional careers in intelligence policy with a focus on analysis of security threats or crises, both domestic and international, through use of human, electronic and public domain intelligence sources.

In addition, students will be introduced to various analytic approaches including game theory, network analysis, nonintrusive measurement, geospatial approaches and quantitative analysis.

Graduates are prepared to perform “key functions including conducting research and gathering information, identifying intelligence gaps, interpreting and evaluating information from multiple (and sometimes contradictory) sources, monitoring trends and events related to a particular country or issue, and preparing written and oral assessments.” This expectation comes from the job description for an intelligence analyst established by the federal government at www.intelligence.gov/careers-in-intelligence/analysis.html.

The certificate in Intelligence and National Security consists of 18 credit hours at the graduate level, including two required core courses and four electives.

Total Credit Hours Required: 18 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Applicants who have been admitted to a degree-seeking graduate program at UCF may apply for admission to the certificate program.

Other interested applicants must contact the Certificate Advisor to inquire about admission to the certificate program prior to applying.

Application Requirements

A bachelor's degree from an accredited institution recognized by UCF is required for admission into the graduate certificate program.

Applicants who have been admitted to a degree-seeking graduate program at UCF may apply for admission to the certificate program through the UCF graduate school online portal.

Other interested applicants must contact the Certificate Advisor to inquire about admission to the certificate program prior to applying.

Applicants must apply online. All requested material must be submitted prior to the deadline; materials received after the deadline may not be considered. Admission to this certificate program is competitive; applicants are not guaranteed admission.

All applicants to this certificate program will be required to submit:

- A current professional resume
- An academic goal statement addressing the applicant's interest in pursuing the certificate program, career goals, and any experience that he or she has had in the field.
- An official transcript from each college/university attended.

Is this program available 100% online?
No

Program Description
The Master's of Science in Interactive Entertainment at UCF’s Florida Interactive Entertainment Academy (FIEA) teaches artists, programmers, and producers the techniques, tools, and skills to succeed in the gaming industry. The program provides specific skills in the area of game design, programming, 3-D artistry, as well as essential skills such as problem solving, teamwork, and project management.

FIEA provides a team-based, industry-oriented education in a world-class facility located at the UCF Downtown campus in Orlando. Student production teams are mentored by industry trained faculty who provide instruction in game design, level design, technical design, creative collaboration, rapid prototyping, 3-D animation and modeling, technical art, motion capture, software engineering, legal and ethical issues, preproduction, and postmortems. Graduates have access to internship and venture opportunities and job interviews with game and media companies from across the country.

The Interactive Entertainment MS degree requires a minimum of 30 credit hours beyond the bachelor’s degree including 12 credit hours of core courses, 9 credit hours of specialization, a practicum and a capstone experience.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements
For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- A portfolio of prior work as it relates to their area of specialization (art, programming, production, etc.) sent directly to the Florida Interactive Entertainment Academy.
- Applicants must submit 3 personal references. These references should be willing and able to attest to your academic, professional and personal achievements. These references need to include the following info:
  - Reference Name
  - Email address
  - Phone number
  - Relationship to applicant

This program admits students in the fall semesters into production teams. Students will be selected based on the skills they possess and contributions they can make to the production team.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Because of the high volume of portfolios received, we regret that we cannot offer individual feedback on the materials that are submitted as part of the application process.

Degree Requirements

Core
12 Total Credits

- Complete all of the following
  - Complete the following:
    - DIG5529C - Production for Media (3)
    - DIG5548C - Rapid Prototype Production I (3)
    - DIG5856 - Experimentation, Application and Innovation in Games (3)
    - DIG6547C - Preproduction and Prototyping (3)
  - The foundation of the degree is the four-course core sequence that focuses on team-based learning. This sequence is designed to provide declarative, procedural, and strategic knowledge in a variety of issues related to game design. These include creative collaboration, rapid prototyping, 3-D animation and modeling, documentation, software engineering, legal and ethical issues, preproduction, and postmortems.

Specialization
9 Total Credits

- Complete 1 of the following
  - Specialization courses help prepare students in their chosen field (Art, Production or Programming) by covering the details of each discipline. Art classes help students develop aesthetic and technical skills necessary to create compelling visuals for the entertainment industry. Programming classes focus on software engineering techniques as they apply to interactive entertainment products, while production classes focus on the specifics of game design as well as project management. Students take all three courses in their chosen specialization. Courses are listed in order of term offered: Fall Spring Summer
  - Art Specialization
    - Complete the following:
      - DIG5348C - Digital Asset Creation (3)
      - DIG6559C - Advanced Digital Asset Creation (3)
      - DIG6589C - Digital Asset Portfolio Development (3)
  - Production Specialization
    - Complete the following:
      - DIG5557C - Production and Design I (3)
      - DIG6558 - Production and Design II (3)
      - DIG6099C - Media Distribution (3)
  - Programming Specialization
Complete the following:
- DIG5637 - Game Programming Fundamentals (3)
- DIG6638 - Advanced Game Programming (3)
- DIG6635 - Applied Programming Mechanics (3)

Capstone
3 Total Credits
- Complete all of the following
  - The capstone experience applies the concepts and theories learned to produce a large-scale project. The target deliverable is a playable demonstration of a game that simulates the core experience and demonstrates the key features of the project's vision. The course concludes with a special event premiering the final project to the FIEA community and invited guests.
  - Complete the following:
    - DIG6718C - Interactive Entertainment Project (3)

Practicum
6 Total Credits
- Complete all of the following
  - The practicum is supervised training supplementing theoretical and practical experiences involving new research developments or partnerships within the gaming industry. Students may participate on a research team exploring new ideas in interactive entertainment with industry partners, working at an on-site internship with a game company, developing a start-up entity, or working with a faculty member on research in an area of interest.
  - Complete at least 1 of the following:
    - DIG6944C - Game Design Practicum (6)
    - DIG6947C - Digital Venture Practicum (6)

Independent Learning
0 Total Credits
- Both the capstone course and the practicum provide independent learning experiences. The capstone experience is a project-based class that features a game demonstration. The practicum allows students to work with industry partners, in an internship, starting a new venture, or to conduct research with a faculty member.

Yes

UCF Online
Please note: Mathematical Science Graduate Certificate may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to State Restrictions for current information.

Program Description
The Graduate Certificate in Mathematical Science is designed to prepare students to teach college-level mathematics in high schools or colleges.

All required courses will be offered to accommodate distance learning by posting recorded lectures and offering scheduled online problem sessions and office hours.

The Mathematical Science certificate requires six graduate courses (18 credit hours), including 9 credit hours of required courses and 9 credit hours of elective courses.

Total Credit Hours Required: 18 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements
Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

Required Courses
9 Total Credits

- Complete at least 3 of the following:
  - MAA5210 - Topics in Advanced Calculus (3)
  - MAS5145 - Advanced Linear Algebra and Matrix Theory (3)
  - MTG5253 - Introduction to Differential Geometry (3)
  - MAA6405 - Complex Variables (3)
  - MAT5712 - Scientific Computing (3)
  - MAP5426 - Special Functions (3)

Elective Courses
9 Total Credits

- Earn at least 9 credits from the following types of courses:
  Students should take three graduate-level courses offered by the Department of Mathematics and/or the Department of Statistics at UCF, with at most two elective courses from the Department of Statistics.

Grand Total Credits: 18

Is this program available 100% online?
No

Program Description
The Master of Science in Mathematical Science provides a broad base in applied, financial and industrial mathematics.

Students in the program can specialize in one of many aspects of mathematics, including Approximation Theory, Applied and Computational Harmonic Analysis, Big Data and Mathematical Statistics, Combinatorics and Graph Theory, Commutative Algebra and Algebraic Geometry, Control and Optimization, Differential and Symplectic Geometry, Fluid and Plasma Dynamics, Functional Analysis, Inverse and Ill-posed Problems, Mathematical Biology, Mathematical Finance, Nonlinear Waves and Nonlinear Dynamics, Numerical Analysis, Orthogonal Polynomials, Partial Differential Equations, Probability and Stochastic Analysis, and Tomography and Medical Imaging.

This degree has 2 tracks: Financial Mathematics Track and Industrial Mathematics Track. Please scroll to the bottom of this page for further details on these Tracks.

The Mathematical Science MS program requires 30 credit hours minimum beyond the bachelor's degree. There are two options for the master's degree: thesis and nonthesis.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites
A working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), and maturity in the language of advanced calculus (at the level of MAA 4226).
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- A working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), and maturity in the language of advanced calculus (at the level of MAA 4226).

Students who find they are not adequately prepared in one or more of the required mathematical subject areas can select appropriate courses from the undergraduate curriculum to make up such deficiencies. Such courses, unless specially approved, will not count toward the graduate degree. Applicants not qualified for regular status may be admitted initially to the university in a nondegree-seeking status. Transfer of credits from other programs will be considered on a course-by-course basis.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant’s abilities, past performance, recommendations, match of this program and faculty expertise to the applicant’s career/academic goals, and the applicant’s potential for completing the degree.

Degree Requirements

Required Courses
12 Total Credits

- Complete the following:
  - MAA5210 - Topics in Advanced Calculus (3)
  - MAP6385 - Applied Numerical Mathematics (3)
  - MAA5145 - Advanced Linear Algebra and Matrix Theory (3)
  - MAT5712 - Scientific Computing (3)

Restricted Elective Sequences
6 Total Credits

- Complete 1 of the following
  - After the completion of the core courses, the program requires all students to complete one of the following two-semester sequences. The following shows examples of acceptable sequences using current courses. We expect that other sequences will be developed as our program grows. Note that some sequences consist of a core course plus one elective, while others consist of two electives. Thus, the credit hours in this requirement are variable (3 to 6 credit hours).
Complete the following:
- MAA6405 - Complex Variables (3)
- MAA6404 - Complex Analysis (3)

Complete the following:
- MAD5205 - Graph Theory I (3)
- MAD6309 - Graph Theory II (3)

Complete the following:
- MAP5336 - Ordinary Differential Equations and Applications (3)
- MAP6356 - Partial Differential Equations (3)

Complete the following:
- MAA6306 - Real Analysis (3)
- MAA6506 - Functional Analysis (3)

Complete the following:
- MAA6238 - Measure and Probability I (3)
- MAA6245 - Measure and Probability II (3)

Complete the following:
- MAP6111 - Mathematical Statistics (3)
- MAA7239 - Asymptotic Methods in Mathematical Statistics (3)

Complete the following:
- MASS11 - Algebra I (3)
- MAS6312 - Algebra II (3)

Complete the following:
- MTG5256 - Differential Geometry (3)
- MTG6345 - Algebraic Topology (3)

Complete the following:
- MAP6197 - Mathematical Introduction to Deep Learning (3)
- MAP6195 - Mathematical Foundations for Massive Data Modeling and Analysis (3)

Unrestricted Electives
6 Total Credits

Earn at least 6 credits from the following types of courses:
Unrestricted electives should be chosen in consultation with the graduate program director or the student's thesis adviser and may be chosen from the suggested options: Approximation Theory, Applied and Computational Harmonic Analysis, Big Data and Mathematical Statistics, Combinatorics and Graph Theory, Commutative Algebra and Algebraic Geometry, Control and Optimization, Differential and Symplectic Geometry, Fluid and Plasma Dynamics, Functional Analysis, Inverse and Ill-posed Problems, Mathematical Biology, Mathematical Finance, Nonlinear Waves and Nonlinear Dynamics, Numerical Analysis, Orthogonal Polynomials, Partial Differential Equations, Probability and Stochastic Analysis, and Tomography and Medical Imaging. A list of courses for these elective options can be obtained from the graduate program director. Approved graduate courses outside the department may also be used.

Thesis/Nonthesis Option
6 Total Credits

Complete 1 of the following
Thesis Option

Earn at least 6 credits from the following types of courses:
MAP 6971 - Thesis in this option, the MS degree requires a total of at least 30 credit hours comprised of at least 24 credit hours of course work and 6 credit hours of thesis. This includes the 15 credit hours of the core courses and 3-6 credit hours of a two-course sequence. No more than 6 credit hours of independent study or directed research may be credited toward the degree. It is strongly recommended that the student select a thesis adviser and establish a program of study by the completion of the core courses. With the help of a thesis adviser, the student will form a thesis committee of three members, of which at least two must be from the Department of Mathematics. It is recommended that the thesis topic have potential for industrial applications. An oral defense of the thesis will be required.

Nonthesis Option

Earn at least 6 credits from the following types of courses:
Nonthesis students will take an additional 6 credit hours of electives. The electives should be chosen in consultation with the graduate program director. Nonthesis students will receive independent learning experiences by taking one of the two-semester sequences, where they apply mathematical principles to independent projects. Other courses that also have substantial research projects include MAP 5117 - Mathematical Modeling, MAT 5712 - Scientific Computing and MAP 6111 - Mathematical Statistics, MAP 6195, MAP 6197, and may be taken as electives. No more than 3 credit hours of independent study may be credited toward the degree. It is strongly recommended that the student select an academic adviser and establish a program of study by the completion of the core courses. In addition, the nonthesis student must pass a comprehensive written examination (by passing the qualifying/comprehensive examination at or above the MS level) based on the core courses. Two attempts at the examination are permitted.

Independent Learning
In the Mathematical Science MS program, the thesis option provides an independent learning experience through directed research, reading published research papers, and writing and defending the thesis. The nonthesis option requires students to take one of the two-semester sequences, where they apply mathematical principles to independent projects.

Grand Total Credits: **30**

### Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

### Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

**Is this track available 100% online?**

No

**Track Description**

The Financial Mathematics track in the Mathematical Science MS program prepares graduate students to pursue careers in the finance industry by providing them with high quality professional training in of mathematics applicable to finance.

This track has three components: training in the necessary mathematics to pursue a career in financial mathematics, professional training in financial mathematics, and a required experiential component.

**Total Credit Hours Required:** **30 Credit Hours Minimum beyond the Bachelor's Degree**

**Track Prerequisites**

- Working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), proficiency in a modern computer language, elementary probability, and statistics.

The following courses are required as prerequisites to this track: Calculus with Analytic Geometry I, II, and III; Differential Equations; Linear and Matrix Algebra (or a course equivalent); proficiency in a computer language; Elementary Probability and Statistics. A summer program of two courses, which cannot be used as part of the program of study for this degree, is available for students who have deficiencies in these prerequisite areas.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), proficiency in a modern computer language, elementary probability, and statistics.

Students who are not adequately prepared in one or more of the required prerequisite subject areas can make up such deficiencies through a summer remedial program. Such courses, unless specially approved, will not count toward the graduate degree. Applicants not qualified for regular status may be admitted initially to the university in a non-degree seeking status. Transfer of credits from other programs will be considered on a course-by-course basis.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

21 Total Credits

- Complete the following:
  - MAP5606 - Differential Equations for Financial Mathematics (3)
  - MAP5612 - Computational Methods for Financial Mathematics I (3)
  - MAP5641 - Financial Mathematics I (3)
  - MAP5931 - Proseminar for Financial Mathematics (1)
  - MAP5933 - Seminar in Financial Mathematics (2)
  - MAP6616 - Computational Methods for Financial Mathematics II (3)
  - MAP6642 - Financial Mathematics II (3)
  - MAP6646 - Risk Management for Financial Mathematics (3)

Restricted Electives
6 Total Credits

- Complete at least 2 of the following:
  - FIN6406 - Strategic Financial Management (3)
  - FIN6515 - Analysis of Investment Opportunities (3)
  - MAP6207 - Optimization Theory (3)
  - STA6857 - Applied Time Series Analysis (3)
  - STA5703 - Data Mining Methodology I (3)
  - STA5825 - Stochastic Processes and Applied Probability Theory (3)

Experiential Requirement
3 Total Credits

- Earn at least 3 credits from the following types of courses:
  Students will demonstrate experience in the application of mathematics to industrial problems. This demonstration can be accomplished either through the satisfactory completion of an internship in financial mathematics (MAP 6946), or through satisfactory performance at an approved external/internal workshop in financial mathematics (MAP 6946). Students are required as part of the experiential requirement to deliver an oral presentation on the experience. Students are very strongly encouraged to fulfill this requirement through an internship experience.

Grand Total Credits: 30

Track Details

The Financial Mathematics program consists of 30 credit hours of courses and internship. Students will work with an adviser to design a program of study, which will be presented to the program director for approval. If a student has an industrial sponsor, the student's program of study will be developed in consultation with a representative from the student's sponsoring company. Students are expected to obtain hands-on experience. The capstone requirement for this track is fulfilled by students completing an experiential learning requirement (3 credit hours). At least one-half of the program courses must be taken at the 6000 level.

Program Description

The Mathematics PhD program prepares students with a broad base in pure, applied and industrial mathematics.

The Doctor of Philosophy degree in Mathematics is intended to provide a broad base in applied and industrial mathematics. The goal of the program is to produce students who will attain distinction in their fields of research. In order to achieve this, the program has required core courses as well as a set of electives providing cross-disciplinary subjects.

Students in the program can specialize in one of many aspects of mathematics, including Approximation Theory, Applied and Computational Harmonic Analysis, Big Data and Mathematical Statistics, Combinatorics and Graph Theory, Commutative Algebra and Algebraic Geometry, Control and Optimization, Differential and Symplectic Geometry, Fluid and Plasma Dynamics, Functional Analysis, Inverse and Ill-posed Problems, Mathematical Biology, Mathematical Finance, Nonlinear Waves and Nonlinear Dynamics, Numerical Analysis, Orthogonal Polynomials, Partial Differential Equations, Probability and Stochastic Analysis, and Tomography and Medical Imaging. Responding to this wide variety of interests, the program offers flexibility in the composition of the core courses as well as the candidacy examination. The program is comprehensive with opportunities for students to pursue research in a variety of disciplines.

This degree has 1 track: Financial Mathematics Track. Please scroll to the bottom of this page for further details on this Track.

The Mathematics PhD program consists of at least 75 credit hours of course work beyond the bachelor's degree, of which a minimum of 39 hours of formal course work, exclusive of independent study, and 15 credit hours of dissertation research (7980) are required. The program requires 18 credit hours of core courses, and 6 to 12 credit hours in two 2-semester sequences.

**Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree**

Program Prerequisites

Bachelor's degree in related field.

Students entering the graduate program with regular status are assumed to have a working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), and maturity in the language of advanced calculus (at the level of MAA 4226).

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's degree in related field.
- Official, competitive GRE score, taken in the last five years.
- Three letters of recommendation.
- Goal statement.
- Résumé.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of the program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Transfer of credits from other programs will be considered on a course-by-course basis. Additionally, students entering the graduate program with regular status are assumed to have a working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), and maturity in the language of advanced calculus (at the level of MAA 4226). Students who are not adequately prepared in one or more of these areas can select appropriate courses from the undergraduate curriculum to make up such deficiencies. Such courses, unless specially approved, do not count toward the graduate degree.

Degree Requirements

Required Courses
18 Total Credits

- Complete all of the following
  - All students are required to complete the following courses with grade of "B" or better.
  - Complete the following:
    - MAA5237 - Mathematical Analysis (3)
    - MAT5712 - Scientific Computing (3)
    - MAA5145 - Advanced Linear Algebra and Matrix Theory (3)
    - MAP6385 - Applied Numerical Mathematics (3)
    - MAA6306 - Real Analysis (3)
  - Complete at least 1 of the following:
    - MAA6405 - Complex Variables (3)
    - MAP5336 - Ordinary Differential Equations and Applications (3)
    - MAA6506 - Functional Analysis (3)
    - MAP6111 - Mathematical Statistics (3)

Restricted Electives
12 Total Credits

- Complete 2 of the following
  - All students are required to complete two 2-semester sequences. Sequences are pairs of related courses that give advanced knowledge in an area of mathematics. Each sequence must be approved by the dissertation adviser, dissertation committee, and the graduate program director. The following shows examples of acceptable sequences using current courses. We expect that other sequences will be developed as our program grows. Note that some sequences consist of a core course plus one elective, while others consist of two electives. Thus, the credit hours in this requirement are variable (6 to 12 credit hours). A written examination on two such sequences will be required as part of the candidacy examination (see more details in Candidacy Examination section.
  - Complete the following:
    - MAA6405 - Complex Variables (3)
    - MAA6404 - Complex Analysis (3)
  - Complete the following:
    - MAD5205 - Graph Theory I (3)
    - MAD5205 - Graph Theory I (3)
  - Complete the following:
    - MAP5336 - Ordinary Differential Equations and Applications (3)
    - MAP6356 - Partial Differential Equations (3)
  - Complete the following:
    - MAA6238 - Measure and Probability I (3)
    - MAA6245 - Measure and Probability II (3)
  - Complete the following:
    - MAP6111 - Mathematical Statistics (3)
    - MAA7239 - Asymptotic Methods in Mathematical Statistics (3)
  - Complete the following:
    - MAA6306 - Real Analysis (3)
    - MAA6506 - Functional Analysis (3)
Complete the following:
- MAP6195 - Mathematical Foundations for Massive Data Modeling and Analysis (3)
- MAP6197 - Mathematical Introduction to Deep Learning (3)

Complete the following:
- MTG5256 - Differential Geometry (3)
- MTG6345 - Algebraic Topology (3)

Unrestricted Electives
30 Total Credits
- Earn at least 30 credits from the following types of courses:
  Electives are chosen in consultation with the student's advisory committee and may be chosen from the suggested options: Discrete Mathematics, General Applied Mathematics, Mathematical Computer Tomography, Image Processing and Computer Graphics, Mathematical Finance, Mathematical Physics, Pure Mathematics, and Mathematical Statistics. A list of elective course options can be obtained from the graduate program director. Courses taken outside the Mathematics department must be approved by the adviser and graduate program director. These courses are selected in consultation with the student's advisory committee.

Dissertation
15 Total Credits
- Earn at least 15 credits from the following types of courses:
  XXXX 7980 Dissertation Research 15 Credit Hours (minimum)

Examinations
0 Total Credits
No Rules
Qualifying Examination
0 Total Credits
- The qualifying/comprehensive examination is based on the core course work (MAA 5237 and MAS 5145 - Advanced Linear Algebra and Matrix Theory). To continue in the PhD program students must pass the examination at the PhD level. Two attempts are permitted. The examination will be administered twice a year: one in the Fall semester and the other in the Spring semester. To take the examination, students must have earned a "B" or better in each core course, must have a minimum grade point average of 3.0 (out of 4.0) in the program, or must obtain permission from the graduate program director. Students will normally take the examination after taking the core courses MAA 5237 and MAS 5145, and are expected to have passed it by the end of the second year of study unless a written request for a postponement has been approved by the Graduate Committee at least two months before the examination date. The student must pass the Qualifying Examination in at most two attempts. It is strongly recommended that the student select a dissertation adviser by the completion of 18 credit hours of course work, and it is strongly recommended that the student works with the dissertation adviser to form a dissertation committee within two semesters of passing the Qualifying Examination.

Candidacy Examination
0 Total Credits
- The Candidacy Examination consists of a written examination based on the materials from two of the selected two-semester sequence courses taken by the students beyond the core courses on Mathematical Analysis and Advanced Linear Algebra (MAA 5237, MAS 5145). A committee formed or selected by the Graduate Committee or the graduate program director is responsible for preparing and grading the written examinations. After passing the candidacy examination and meeting other requirements, the student can register for Doctoral Dissertation (MAP 7980 or MAA 7980). A minimum of 15 Doctoral Dissertation credit hours are required. The Candidacy Examination can be attempted after passing the qualifying examination. The Candidacy Examination must be completed within three years after passing the qualifying examination. A student must successfully pass the Candidacy Examination within at most two attempts.

Admission to Candidacy
0 Total Credits
- The following are required to be admitted to candidacy and enroll in dissertation hours: Completion of all course work, except for dissertation hours. Successful completion of the candidacy examination. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Dissertation
0 Total Credits
No Rules
Dissertation Proposal Examination
0 Total Credits
- After passing the candidacy examination, the student will prepare a dissertation proposal and orally present it to the dissertation advisory committee for approval. The proposal will include a description of the research performed to date and an agenda for the research planned to be completed for the dissertation. In addition to standards of correctness, indicating a suitable level of mastery of the material of the area of the dissertation, and suitability of the proposed dissertation topic, the presentation must meet current standards for professional presentations within the discipline of mathematics. For the successful completion of the Dissertation Proposal Examination the presentation must be judged as passing the requirements.
for the examination by the majority of the dissertation committee. This exam must be passed within 18 months of passing the candidacy examination and not later than the end of the sixth year of graduate study. A candidate must pass this examination within at most two attempts.

Dissertation Defense
0 Total Credits

- Upon completion of a student's research, the student's committee schedules an oral defense of the dissertation. Most students complete the program within five years after obtaining their bachelor's degree. Students are expected to complete the dissertation in no more than seven years from the date of admission to the program.

Independent Learning
0 Total Credits

- The required 15 credit hours of dissertation will provide ample opportunities for students to gain the independent learning experience through studying published research papers and deriving, on their own, new and meaningful research results.

Grand Total Credits: 75

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance
Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

The department offers over 20 Graduate Teaching Assistantships every year on a competitive basis. A few Graduate Research Assistantships are also available for qualified students.

Is this track available 100% online?
No

Track Description
The Financial Mathematics track in the Mathematics PhD program is designed to prepare students for research and leadership positions in industry, government, non-governmental organizations, and academia requiring employment of financial mathematics.

The Mathematics PhD program consists of at least 75 credit hours of course work beyond the bachelor's degree, of which a minimum of 48 hours of formal course work, exclusive of independent study, are required. The program requires 36 credit hours of core courses and 15 credit hours of dissertation research (7980).

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites
Bachelor's degree in related field.

Students entering the graduate program with regular status are assumed to have a working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), boundary value problems, statistics, computer programming, and maturity in the language of advanced calculus (at the level of MAA 4226).

Application Requirements
For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Bachelor's degree in related field.
- Official, competitive GRE score, taken in the last five years.
- Three letters of recommendation.
- Goal statement.
- Résumé.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of the program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Transfer of credits from other programs will be considered on a course-by-course basis. Additionally, students entering the graduate program with regular status are assumed to have a working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), boundary value problems, statistics, computer programming, and maturity in the language of advanced calculus (at the level of MAA 4226). Students who are not adequately prepared in one or more of these areas can select appropriate courses from the undergraduate curriculum to make up such deficiencies. Such courses, unless specially approved, do not count toward the graduate degree.

Degree Requirements

Required Courses
36 Total Credits

- Complete all of the following
  - All students are required to complete the following courses with grade of "B" or better.
  - Complete the following:
    - MAA5237 - Mathematical Analysis (3)
    - MAA5237 - Advanced Linear Algebra and Matrix Theory (3)
    - MAP5641 - Financial Mathematics I (3)
    - MAP6642 - Financial Mathematics II (3)
    - MAP5612 - Computational Methods for Financial Mathematics I (3)
    - MAP6616 - Computational Methods for Financial Mathematics II (3)
    - MAP6646 - Risk Management for Financial Mathematics (3)
    - MAP6606 - Differential Equations for Financial Mathematics (3)
    - MAP6195 - Mathematical Foundations for Massive Data Modeling and Analysis (3)
    - MAP6207 - Optimization Theory (3)
    - STA6857 - Applied Time Series Analysis (3)
    - MAP5931 - Proseminar for Financial Mathematics (1)
    - MAP5933 - Seminar in Financial Mathematics (2)

- The remaining credit hours consist of additional dissertation research (7980 or 7919), at least 15 credit hours of regular classroom elective courses, and at most 12 credit hours of independent study or independent directed research. Students who pass the qualifying examination may substitute some of the core courses with the approval of the adviser and the graduate program director.

Elective Courses
24 Total Credits

- Earn at least 24 credits from the following types of courses:
  Elective courses require the approval of the adviser and the graduate program director; up to 12 credit hours of elective courses may be taken outside the department. At least one-half of the program courses must be taken at the 6000 level. At least 12 hours of elective course work must be formal course work, exclusive of independent study. Electives are chosen in consultation with the student's advisory committee and may be chosen from the suggested options: Discrete Mathematics, General Applied Mathematics, Mathematical Computer Tomography, Image Processing and Computer Graphics, Mathematical Finance, Mathematical Physics, Pure Mathematics, Data Science, and Mathematical Statistics. A list of elective course options can be obtained from the graduate program director. Courses that are taken outside the Mathematics department must be approved by both the adviser and graduate program director. These courses are selected in consultation with the student's advisory committee.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  MAP 7980 - Dissertation Research 15 Credit Hours (minimum) After passing the candidacy examination and meeting the other requirements that are required for admission to candidacy, the student can register for Doctoral Dissertation (MAP 7980). A minimum of 15 Doctoral Dissertation credit hours are required for the degree.

Is this program available 100% online?

No

Program Description

The School of Politics, Security and International Affairs, the School of Public Administration, and the Department of Computer Science, offer a Graduate Certificate in Network Analysis and Applications that consists of 12 credit hours at the graduate level. Upon completing the certificate, students will be able to analyze networks either via pre-determined network analysis programs, by implementing the analysis via packages available in libraries in a suitable programming language, or by programming the analysis from scratch.

The Graduate Certificate in Network Analysis and Applications consists of 12 credit hours at the graduate level. Of these, 3 credit-hours are acquired via the core-course, 6 credit hours must be chosen from the list of restricted electives (see below). 3 additional credit hours are elective courses that can include a) one more of the courses listed as restricted electives; b) another elective course to be approved by the program advisor; c) independent studies with an affiliated faculty member to be chosen with approval from the program advisor and the selected faculty member.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements

To be admitted to the certificate program students will need to have a Bachelor's degree from an accredited institution recognized by UCF. To be admitted students will either 1) have graduate standing at UCF, or 2) apply to the certificate by including a statement of interest and transcripts from their Bachelor's Degree. Application admissions for non-graduate students at UCF will be decided by the program coordinator. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. Students must submit all requested material by the deadline; materials received after the deadline may not be considered. Admission to this certificate program is competitive; applicants are not guaranteed admission.

All applicants to this certificate program will be required to submit:

- An academic goal statement
- A transcript

These documents, with the exception of the transcript, must be attached to the application. The academic goal statement will be used as a sample of the applicant's writing ability. While there is no set word limit, the statement should address the applicant's interest in pursuing the certificate program and fully discuss any experience that they have had in the field.

Is this program available 100% online?

No

Program Description

The University of Central Florida offers a Master of Science in Physics. Research opportunities are available in condensed matter physics, nanostructure devices, surface science, optical physics, complex systems, biophysics, atomic and molecular physics, physics education and planetary/space science.

This degree has 1 track: Planetary Sciences Track. Please scroll to the bottom of this page for further details on this Track.

The Physics MS program requires a minimum of 30 credit hours beyond the bachelor's degree and offers students a thesis and nonthesis option. All students take 12 credit hours of core courses, and then the remaining 18 credit hours consist of both electives and thesis or directed research according to the option chosen.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

The Master of Science in Physics program is flexibly designed to prepare students for the widest possible range of industrial careers or for further study at the doctoral level.

Program Prerequisites

Students entering the Physics graduate program with regular status are normally expected to have completed coursework generally required for a bachelor's degree in physics, including mechanics, electricity and magnetism, thermal and statistical physics, and quantum mechanics.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Financial support is not usually provided to MS students. Those who are interested in financial support may manifest it in their application or consider applying to the PhD program instead.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Résumé.
- Statement of goals. The final 1-2 paragraphs of each applicant's personal statement should make explicitly clear which research areas and faculty they have interest in working with within our program.
- Three letters of recommendation.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Note: Applicants to the MS Bridge Program that are admitted with a GPA below the minimum required may not exceed 50% of the total number of admitted MS students.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on an evaluation of the applicant’s abilities, past performance, recommendations, match of this program and faculty expertise to the applicant’s career/academic goals, and the applicant’s potential for completing the degree.

  - PHY5606 - Quantum Mechanics I (3)
  - PHY5346 - Electrodynamics I (3)
  - PHY5524 - Statistical Physics (3)
  - PHY6246 - Classical Mechanics (3)

**Elective Courses**

12 Total Credits

- Complete 1 of the following
  - Both thesis and nonthesis students take electives in consultation with their advisers. Out of the 18 elective credit hours at least 12 credit hours of formal course work are required and not more than 6 credit hours of 5000-level elective courses are counted toward the degree. At least 6 credit hours of thesis or 3 credit hours of directed research for the nonthesis option are required. Otherwise, elective selection is intended to be very flexible to meet student needs and interests. Electives may be chosen following one of the suggested specializations below, or a different program of study may be followed with academic adviser approval.
  - Materials Physics Specialization
  - Complete all of the following
    - Earn at least 12 credits from the following:
      - PHY6624 - Quantum Mechanics II (3)
      - PHY6347 - Electrodynamics II (3)
      - PHZ6426 - Condensed Matter Physics I (3)
      - PHZ6428 - Condensed Matter Physics II (3)
      - PHZ5505 - Plasma Physics (3)
      - PHZ5432 - Introduction to Soft Condensed Matter Physics (3)
      - PHYS515 - Physical Basis of Life (3)
      - PHY5933 - Selected topics in biophysics of macromolecules (3)
      - PHZ6420 - First Principles Computational Methods in Condensed Matter Physics (3)
      - PHY6938 - Special Topics (3)
      - EEE5396C - Fabrication of Solid-State Devices (4)
  - Other graduate courses from Physics, Math, Optics, Materials Science, Engineering require approval by the student’s adviser and the Graduate Program Director.
Optical Physics Specialization

- Complete all of the following
  - Earn at least 12 credits from the following:
    - PHY6624 - Quantum Mechanics II (3)
    - PHY6347 - Electrodynamics II (3)
    - PHY6938 - Special Topics (3)
    - OSE6111 - Optical Wave Propagation (3)
    - OSE6115 - Interference and Diffraction (3)
    - OSE6526C - Laser Engineering Laboratory (3)
    - OSE6455C - Photonics Laboratory (3)
    - OSE6347 - Quantum Optics (3)
    - OSE5312 - Light Matter Interaction (3)
  - Other graduate courses from Physics, Math, Optics, Materials Science, Engineering require approval by the student's adviser and the Graduate Program Director

Space Physics Specialization

- Complete all of the following
  - Earn at least 12 credits from the following:
    - PHY6624 - Quantum Mechanics II (3)
    - PHY6347 - Electrodynamics II (3)
    - PHZ5505 - Plasma Physics (3)
    - AST5334 - Extrasolar Planets and Brown Dwarfs (3)
    - EAS5315 - Rocket Propulsion (3)
    - EAS6405 - Advanced Flight Dynamics (3)
    - EAS6507 - Topics of Astrodynamics (3)
    - OSE5041 - Introduction to Wave Optics (3)
    - EEL5820 - Image Processing (3)
  - Other graduate courses from Physics, Math, Optics, Materials Science, Engineering require approval by the student's adviser and the Graduate Program Director.

Theory/Computational Physics Specialization

- Complete all of the following
  - Earn at least 12 credits from the following:
    - PHY6624 - Quantum Mechanics II (3)
    - PHY6347 - Electrodynamics II (3)
    - PHZ6420 - First Principles Computational Methods in Condensed Matter Physics (3)
    - PHY6938 - Special Topics (3)
    - PHZ6426 - Condensed Matter Physics I (3)
    - PHZ6428 - Condensed Matter Physics II (3)
    - PHY6667 - Quantum Field Theory I (3)
    - PHY7669 - Quantum Field Theory II (3)
    - PHZ5505 - Plasma Physics (3)
    - OSE6347 - Quantum Optics (3)
    - OSE5312 - Light Matter Interaction (3)
  - Other graduate courses from Physics, Math, Optics, Materials Science, Engineering require approval by the student's adviser and the Graduate Program Director.

Thesis/Nonthesis Option

- 6 Total Credits
  - Complete 1 of the following
    - Thesis Option
      - Earn at least 6 credits from the following types of courses:
        - PHY 6971 - Thesis Students who choose the thesis option are required to conduct a program of original scientific research or some investigation involving a creative element and to submit a written thesis detailing these investigations. An oral defense and examination of the thesis is required. These six credit hours count towards the 18 hours of required electives for the degree (12 required hours as specified above). An exit interview conducted by the Graduate Program Director is required after passing the thesis defense.
    - Nonthesis Option
      - Complete all of the following
        - Nonthesis students are required to take 15 total credit hours of electives from the list of elective specializations shown above (12 required for all students, 3 additional for Nonthesis). In addition, they must take a minimum of 3 credit hours of directed research. The three credit hours of directed research count towards the 18 hours of required electives for the degree. In the directed research course, students work on a research project under the supervision of a faculty member and are required to present a final report as well as a written comprehensive exit examination*. The Graduate Program Director will arrange this exam. The exit exam is followed by an exit interview.
        - Earn at least 3 credits from the following types of courses:
          - Additional Elective Course from their specialization
        - Earn at least 3 credits from the following:
          - PHY6918 - Directed Research (1 - 99)
  - *Note: When applicable, students in the non-thesis MS degree program may request to satisfy the MS exit exam with the completion of the Physics PhD written candidacy exam.
Students pursuing a nonthesis master's degree must take at least one directed research course as part of their elective work. In this course, students will work on a research project under the supervision of a faculty member and present a final report.

Grand Total Credits: 30

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Is this track available 100% online?
No
**Track Description**

The goal of the Planetary Sciences Track in the Physics MS program is to foster a vibrant planetary science research environment that can attract top students, researchers, and faculty and contribute significantly to the exploration of space. The Planetary Sciences track is designed to prepare students to be competitive in the global planetary sciences research community.

The Planetary Sciences track in the Physics MS program requires a minimum of 33 hours of graduate course work as directed by the student's Supervisory Committee. This must include at least 15 credit hours of required courses, 6 hours of thesis preparation, with the remainder being elective courses and directed research chosen in consultation with the Supervisory Committee. At least half of the total credits must be at the 6000 level. No more than 6 hours of independent study may be credited toward the master's degree. The master's degree in Planetary Sciences includes a thesis and its defense. There is no nonthesis master's degree in the Planetary Sciences track.

**Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree**

**Track Prerequisites**

A bachelor's degree in a closely related science field such as physics, chemistry, geology, geophysics, geochemistry, atmospheric sciences biology, mathematics or planetary sciences.

**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- A bachelor's degree in a closely related science field such as physics, chemistry, geology, geophysics, geochemistry, atmospheric sciences biology, mathematics or planetary sciences.
- The GRE is not required for admission to this program.
- Three letters of recommendation.
- Statement of goals.
- CV or Résumé.

Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applicants interested in being considered for assistantship and fellowship opportunities should apply directly to the Physics PhD program.

Additional courses may also be required to correct any course deficiencies for those applicants without full preparation in physics and astronomy. Students should contact the graduate program director for further information.

Current students in the existing Physics graduate program wishing to switch to the Planetary Sciences track must submit a letter to the Planetary Science Graduate Committee addressed to Dr. Dan Britt. The letter should include the request to join the planetary sciences track, the student's degree goal (Masters), the name of the student's planetary sciences adviser, and a brief description of their expected area of research. Upon departmental approval, a Graduate Status Change Form will be submitted to the College of Graduate Studies.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on the evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree. For information on the Planetary Sciences track contact the Planetary Sciences Graduate Advisor Dr. Dan Britt at 407-823-2600 or dbritt@ucf.edu.

TOEFL: 5233
ETS PPI: 5233
**Degree Requirements**

**Required Courses**

15 Total Credits

- Complete all of the following
  - The core is designed to give students a broad foundation in the planetary sciences and rapid training in the data analysis techniques that will be necessary for successful research and publications. Students choose 5 out of the 6 core courses listed below:
  - Complete at least 5 of the following:
    - AST5151 - Physics of Planetary Processes (3)
    - PHY6246 - Classical Mechanics (3)
    - AST5765C - Advanced Astronomical Data Analysis (3)
    - AST5263 - Advanced Observational Astronomy (3)
    - AST5154 - Advanced Planetary Geophysics (3)
    - AST6165 - Planetary Atmospheres (3)

**Elective Courses**

12 Total Credits

- Complete all of the following
  - Students may enroll in elective formal courses relevant to their program, as approved by their Supervisory Committees. Suggestions include:
  - Earn at least 12 credits from the following:
    - AST5145 - Advanced Asteroids, Comets, and Meteorites (3)
    - AST5334 - Extrasolar Planets and Brown Dwarfs (3)
    - PHY5937 - Special Topics (3)
    - AST6112 - Origin and Evolution of Planetary Systems (3)
    - AST6156 - Current Topics in Planetary Sciences (3)

**Thesis**

6 Total Credits

- Earn at least 6 credits from the following types of courses:
  - AST or PHY 6971 - Thesis

**Supervisory Committee**

0 Total Credits

- Within the first half-semester of admission to the Planetary Sciences Track, each student must select, by mutual agreement, a faculty adviser and at least two other faculty members to serve on his or her Supervisory Committee. UCF graduate faculty and self-funded research scientists who are Graduate Faculty Scholars are eligible to serve on Supervisory Committees. Changes in the membership of a Supervisory Committee must be approved by the Planetary Sciences Graduate Committee. The adviser is expected to meet regularly with the student. The full committee shall meet with the student at least once per year to review and make recommendations regarding the student's academic progress.

**Master's Defense**

0 Total Credits

- The written thesis and oral defense is the final requirement for the master's degree. The thesis is a journal-level research paper. The oral defense is in two parts: (1) A public presentation of the research contained in the paper; and (2) private questioning on the detail of the presented research as well as the topics covered in the student's preparation and coursework. The written and oral components will be administrated by the student's Supervisory Committee.

**Independent Learning**

0 Total Credits

- A thesis is required in this program.

**Grand Total Credits: 33**

**Financial Information**

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. **Is this program available 100% online?**  
No

**Program Description**

The Physics doctoral program offers research opportunities in condensed matter physics, physics of nanostructured devices, surface science, optical physics, complex systems, biophysics, atomic and molecular physics, physics education and planetary/space science. The program intends to provide a broad base in experimental and theoretical physics.

The rules and recommendations below do not apply to the Planetary Sciences track of the Physics PhD program. Please scroll to the bottom of this page for further details on this Track.

The Physics PhD program requires a total of 72 credit hours for completion. A specific set of six required core courses (18 credit hours), thirteen elective courses (39 credit hours, which may include directed research), and a minimum of 15 credit hours of dissertation are part of the 72 hours.

**Total Credit Hours Required:** 72 Credit Hours Minimum beyond the Bachelor’s Degree. 42 Credit Hours Minimum beyond the Master’s Degree.

**Program Prerequisites**

Students entering the Physics graduate program with regular status are normally expected to have completed course work generally required for a bachelor's degree in physics, including mechanics, electricity and magnetism, thermal and statistical physics, and quantum mechanics.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- The Physics Subject Test of the GRE is optional.
- Three letters of recommendation.
- Statement of goals. The final 1-2 paragraphs of each applicant's personal statement should make explicitly clear which research areas and faculty they have interest in working with within our program.
- Résumé.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Degree Requirements

Required Core Courses
18 Total Credits

- Complete the following:
  - PHY5606 - Quantum Mechanics I (3)
  - PHY6624 - Quantum Mechanics II (3)
  - PHY5346 - Electrodynamics I (3)
  - PHY6347 - Electrodynamics II (3)
  - PHY5524 - Statistical Physics (3)
  - PHY6246 - Classical Mechanics (3)

Elective Courses
39 Total Credits

- Methods Course - 3 Credit Hours Formal Course - 9 Credits Hours Remaining Electives - 27 Hours
Methods Course
3 Total Credits
- Complete at least 1 of the following:
  - PHZ5156 - Computational Physics (3)
  - AST5765C - Advanced Astronomical Data Analysis (3)
  - PHY5937 - Special Topics (3)

Formal Courses
9 Total Credits
- Complete 1 of the following
  - Students must complete three formal courses (9 credit hours) from the "List of Specialization Courses".
  - General Physics Specialization
  - Complete all of the following:
    - The General Physics Specialization emphasizes strong preparation in physics fundamentals. It is intended to prepare students for careers in theoretical physics or teaching at the college level. A few active research programs exist in the department to accommodate such students.
    - Complete at least 3 of the following:
      - COT5600 - Quantum Computing (3)
      - PHYS933 - Selected topics in biophysics of macromolecules (3)
      - PHZ5156 - Computational Physics (3)
      - PHZ6405 - Condensed Matter Physics (3)
      - PHZ6426 - Condensed Matter Physics I (3)
      - PHZ6428 - Condensed Matter Physics II (3)
      - PHY6667 - Quantum Field Theory I (3)
      - PHY7669 - Quantum Field Theory II (3)
      - PHZ5505 - Plasma Physics (3)
      - PHZ5304 - Nuclear and Particle Physics (3)
      - PHZ6234 - Atomic Physics (3)
      - PHZ6420 - First Principles Computational Methods in Condensed Matter Physics (3)
      - PHY6600C - Theory and Computations of Molecular Wavefunctions (3)
      - PHY6938 - Special Topics (3)
      - OSE5312 - Light Matter Interaction (3)
      - OSE6347 - Quantum Optics (3)
    - PHY 7919 - Doctoral Directed Research may also be used

Condensed Matter Physics Specialization
- Complete all of the following
  - The Condensed Matter Physics Specialization is intended to prepare students for careers in materials physics, nanoscale science and technology, semiconductors, and soft condensed matter physics. It emphasizes strong experimental preparation with hands-on courses in advanced materials characterization and processing instrumentation. Related research programs at UCF include magnetic nanostructures, soft condensed matter, electronic and optoelectronic devices, and nanoscale characterization.
  - Complete at least 3 of the following:
    - PHZ5405 - Condensed Matter Physics (3)
    - PHZ6426 - Condensed Matter Physics I (3)
    - PHZ6428 - Condensed Matter Physics II (3)
    - PHZ5156 - Computational Physics (3)
    - PHZ6420 - First Principles Computational Methods in Condensed Matter Physics (3)
    - Course Not Found
    - PHZ5432 - Introduction to Soft Condensed Matter Physics (3)
    - PHYS933 - Selected topics in biophysics of macromolecules (3)
    - PHY6667 - Quantum Field Theory I (3)
    - PHY7669 - Quantum Field Theory II (3)
    - COT5600 - Quantum Computing (3)
    - PHY6938 - Special Topics (3)

Optical Physics Specialization
- Complete all of the following
  - The Optics Specialization coordinator is David Hagan, PhD, College of Optics and Photonics.
  - Complete at least 1 of the following:
    - OSE6111 - Optical Wave Propagation (3)
    - OSE5115 - Interference and Diffraction (3)
  - Complete at least 1 of the following:
    - OSE6526C - Laser Engineering Laboratory (3)
    - OSE6455C - Photonics Laboratory (3)
  - Earn at least 3 credits from the following types of courses:
    - The remaining courses (up to three) may be selected from other graduate courses in Optics (see www.creol.ucf.edu).
Earn at least 27 credits from the following types of courses:
Students must complete 27 credit hours of unrestricted electives, which may consist of formal courses, research, and/or dissertation hours. Students should consult with their adviser about selections for the remaining unrestricted electives.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
PHY 7980 - Dissertation Research All students must complete a minimum of 15 credit hours of dissertation prepared in consultation with a dissertation adviser. A fifteen-page written proposal is presented orally to the student’s dissertation committee within one year after the written candidacy exam. The final oral defense of the dissertation is administered by the student's dissertation committee following completion of a written dissertation describing the student’s research.

Seminar Attendance
0 Total Credits

- Students in their fourth semester and beyond will be required to attend a major fraction of seminars and colloquia hosted by the Physics Department, as well as to make an annual presentation of their research work or independent study.

Examinations
0 Total Credits

- Details

Placement Exam
0 Total Credits

- All incoming PhD students in Physics will be required to take a diagnostic test like the Physics subject GRE. This test has placement purposes only, allowing the Graduate Program Director and academic adviser to identify possible weaknesses in the student's background and help devise a suitable plan of study. There is no passing or failure.

Candidacy Exam
0 Total Credits

- The candidacy exam consists of two parts. Part 1 is a written exam covering topics such as those listed in the Graduate Catalog for the courses PHY 5606 - Quantum Mechanics I, PHY 6624 - Quantum Mechanics II, PHY 5346 - Electrodynamics I, PHY 6347 - Electrodynamics II, PHY 5524 - Statistical Physics, and PHY 6246 - Classical Mechanics. Students are expected to show mastering of these topics at or above the undergraduate level. The written exam should be taken immediately after the core courses have been completed. After passing the written exam, the student should identify a research supervisor and a dissertation committee must be put in place with the approval of the graduate program director. Students are only allowed two attempts at passing the written part of the candidacy exam. Part 2 is an oral exam that combines an examination of the student's command of Physics and a written dissertation proposal. The oral exam should be taken no later than one year after the written exam has been satisfied.

Admission to Candidacy
0 Total Credits

- The following are required to obtain candidacy status and enroll in dissertation hours: Completion of a minimum 30 credit hours to include all required core courses, 18 credit hours of core courses, 3 credit hours of Methods Course, and 9 credit hours of formal electives. (Directed Research and Dissertation hours are not included) *Note: For students that transfer from a doctoral program post-candidacy, a minimum 9 credit hours enrollment in their first semester is required to satisfy the UCF earned non-zero GPA. Successful completion of both part I (written exam) and part II (oral exam) of the candidacy exam. The dissertation advisory committee is formed, consisting of a chair, approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study. Completion of CITI and RCR Workshops

Independent Learning
0 Total Credits

- The Physics PhD program requires a doctoral dissertation. This will provide ample opportunities for students to gain independent learning experience through studying published research papers, conducting research, and presenting their results in conferences and in peer-reviewed scientific journals.

Grand Total Credits: **72**

Track Description

The goal of the Planetary Sciences Track of the Physics PhD program is to foster a vibrant planetary science research environment that can attract top students, researchers, and faculty and contribute significantly to the exploration of space. The Planetary Sciences track is designed to prepare students to be competitive in the global planetary sciences research community.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree. 42 Credit Hours Minimum beyond the Master's Degree.

This includes completion of 6 required courses (18 credit hours), 5 elective courses (15 credit hours) of regular course work, and a minimum of 15 credit hours of dissertation. Courses must be selected so that at least 36 of the 72 hours are at 6000 level or higher. No more than 12 hours of independent study may be credited toward the PhD degree. The PhD includes a Candidacy Exam to be taken after the completion of the core and elective courses, a written dissertation, and a dissertation defense before the student's Dissertation Advisory Committee.

Track Prerequisites

Students entering the Planetary Sciences graduate track program with regular status are normally expected to have completed coursework generally required for a bachelor's degree in a closely related science field such as physics, astronomy, geology, geophysics, atmospheric sciences, chemistry, biology, mathematics or planetary sciences.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE score taken within the last five years.
- Three letters of recommendation.
- Statement of goals.
- Students entering the Planetary Sciences graduate track program with regular status are normally expected to have completed coursework generally required for a bachelor's degree in a closely related science field such as physics, astronomy, geology, geophysics, atmospheric sciences, chemistry, biology, mathematics or planetary sciences.
- CV or Résumé.

Additional courses may also be required to correct any course deficiencies for those applicants without full preparation in physics and astronomy. Students should contact the graduate program director for further information.

Current students in the existing Physics graduate program wishing to switch to the Planetary Sciences track must submit a letter to the Planetary Science Graduate Committee addressed to Dr. Dan Britt. The letter should include the request to join the Planetary sciences track, the student's degree goal (Masters or PhD), the name of the student’s planetary sciences adviser, and a brief description of their expected area of research. Upon departmental approval, a Graduate Status Change Form will be submitted to the College of Graduate Studies.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on the evaluation of the applicant’s abilities, past performance, recommendations, match of this program and faculty expertise to the applicant’s career/academic goals, and the applicant’s potential for completing the degree. For information on the Planetary Sciences track contact the Planetary Sciences Graduate Advisor Dr. Dan Britt at 407-823-2600 or dbritt@ucf.edu.

TOEFL: 5233
ETS PPI: 5233

Degree Requirements

Required Courses
18 Total Credits

- Complete all of the following
  - The core is designed to give students a broad foundation in the planetary sciences and a rapid training in the data analysis techniques that will be necessary for a successful research and publications.
  - Complete the following:
    - AST5151 - Physics of Planetary Processes (3)
Elective Courses
15 Total Credits
- Earn at least 15 credits from the following types of courses:
  Students may enroll in elective formal courses relevant to their program, as approved by their Supervisory Committees. Suggestions include: AST 5145 - Advanced Asteroids, Comets, and Meteorites 3 Credit Hours AST 5334 - Extrasolar Planets and Brown Dwarfs 3 Credit Hours AST 5937 - Astrobiology 3 Credit Hours AST 6112 - Origin and Evolution of Planetary Systems 3 Credit Hours AST 6156 - Current Topics in Planetary Sciences 3 Credit Hours

Other Electives
24 Total Credits
- Earn at least 24 credits from the following types of courses:
  This may include any form of graduate credit not used for other requirements and consistent with restrictions stated elsewhere in the program.

Dissertation
15 Total Credits
- Earn at least 15 credits from the following types of courses:
  AST or PHY 7980 - Dissertation

Supervisory Committee
0 Total Credits
- Within the first half-semester of admission to the Planetary Sciences Track, each student must select, by mutual agreement, a faculty adviser and at least two other faculty members to serve on the Supervisory Committee. UCF graduate faculty and UCF self-funded research scientists who are Graduate Faculty Scholars are eligible to serve on Supervisory Committees. Creation of and changes in the membership of a Supervisory Committee must be approved by the Planetary Sciences Graduate Committee. The adviser is expected to meet regularly with the student. The full committee shall meet with the student at least once per year to review and make recommendations regarding the student's academic progress.

Candidacy Examination
0 Total Credits
- The Planetary Sciences Track requires a Candidacy Exam to be taken after the completion of the core courses. This examination is composed of written and oral components. The written component is a journal-level research paper. The oral component has two parts: (1) A public presentation of the research contained in the paper, including the traditional question-and-answer period of a scientific presentation; and (2) private questioning on the detail of the presented research as well as the topics covered in the student's preparation, coursework and dissertation direction. The Supervisory Committee administers the Candidacy Examination.

Dissertation Advisory Committee
0 Total Credits
- After passing the Candidacy Examination, a non-UCF member shall be added to the Supervisory Committee by mutual agreement of the student and Supervisory Committee. This becomes the Dissertation Advisory Committee. The committee continues to meet with the student annually.

Dissertation Proposal
0 Total Credits
- The dissertation proposal may be presented immediately after the Candidacy Examination or in a separate meeting not more than one semester thereafter. Before substantial work is done on the Dissertation Advisory Committee must approve the proposal and must also assess whether additional coursework is necessary to begin the dissertation. Such coursework should be completed at the earliest opportunity and before substantial work is done on the dissertation. If the committee does not accept the proposal, it may be resubmitted and re-defended at any time, but no later than three months after the last attempt. If not accepted within one year of the Candidacy Examination the committee may, at its option, discontinue the student from the program.

Admission to Candidacy
0 Total Credits
- The following are required to be admitted to candidacy and enroll in dissertation hours: Completion of all required and formal elective course work, except for research hours. Successful completion of the Candidacy Examination. The Dissertation Advisory Committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study. Completion of CITI and RCR Workshops.

Dissertation Defense
0 Total Credits
- The dissertation defense is the final requirement for the PhD. It consists of a public presentation of the dissertation, typically...
lasting 45-60 minutes including the traditional question-and-answer period of a scientific presentation, followed by private questioning by the Dissertation Advisory Committee. Procedures are similar to the Candidacy Examination.

Independent Learning
0 Total Credits

- A dissertation is required.

Grand Total Credits: 72

Track Details

All courses must be selected in consultation with and with the approval of the Supervisory Committee (before candidacy) or Dissertation Advisory Committee (after candidacy).

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Is this program available 100% online?
No
Program Description

The Master of Arts in Political Science program prepares students to enter positions in government and the private sector, advance their professional careers in a variety of fields including consultation, defense, environment, and philanthropy, and pursue more advanced graduate degrees such as a PhD in which the analytical ability to comprehend, influence, and respond to policies and initiatives is critical. The program also provides a well-rounded substantive curriculum for secondary school teachers seeking higher degrees and for teachers in community colleges. As such, the Master of Arts in Political Science program is designed to accommodate a range of professional and intellectual needs.

A Program of Study in the Master of Arts in Political Science consists of the following coursework. Students have the option of completing a thesis with 27 hours of coursework or choosing the nonthesis option with 33 hours of coursework.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor’s Degree

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Three letters of reference that evaluate the applicant’s academic performance and their suitability and potential for undertaking MA level study, at least two of which were written by faculty members at the higher education institution(s) the student attended.
- A personal statement of at least 500 words identifying areas of research interest in political science, faculty with whom they would like to work, and describing the applicant's academic and professional experiences and future career goals.
- CV/Résumé.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Student wishing to enroll in graduate courses in political science must meet the SPSIA’s requirements for graduate status (either regular or conditional graduate status) or must hold regular graduate status in another program at UCF. Students who have not been accepted into a degree-seeking program at UCF may not enroll in political science graduate courses.

Meeting minimum UCF or SPSIA admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, and the applicant's potential for completing the degree.

Degree Requirements

2021-2022 Graduate Catalog
Required Core Courses
12 Total Credits

- Complete all of the following
  - Complete the following:
    - POS6736 - Conduct of Political Inquiry (3)
    - POS6746 - Quantitative Methods in Political Research (3)
  - Complete at least 2 of the following:
    - CPO6091 - Seminar in Comparative Politics (3)
    - INR6007 - Seminar in International Politics (3)
    - POS6045 - Seminar in American National Politics (3)
    - POT6007 - Seminar in Political Theory (3)

Elective Courses
15 Total Credits

- Complete all of the following
  - Students will complete 15 hours of coursework at the 5000 or 6000 level. All 5000 or 6000 level courses offered by the SPSIA can be used to meet this requirement, with the exception of those courses used to complete core course requirements. Up to 6 credit hours of 5000 and 6000 level courses coursework from other departments/schools may also be used as electives with the prior approval of the MA program coordinator. Students may use up to 6 hours of independent study and up to 6 hours of internship credit for the elective credits requirement, but no more than 6 hours total can be from coursework outside the SPSIA, independent study, or internship credit.
  - Complete at least 5 of the following:
    - CPO6038 - Political Development (3)
    - CPO6058 - Revolution and Political Violence (3)
    - CPO6206 - Comparative Politics of Africa (3)
    - CPO6307 - Issues in Latin American Politics (3)
    - CPO6729 - Global Security in the Age of Migration (3)
    - INR6039 - International Political Economy (3)
    - INR6062 - Peace Studies (3)
    - INR6065 - Seminar on War (3)
    - INR6067 - Human Rights and Security (3)
    - INR6068 - Politics of Civil Wars (3)
    - INR6108 - Seminar in American Foreign Policy (3)
    - INR6136 - Seminar in American Security Policy (3)
    - INR6137 - Terrorism and Politics (3)
    - INR6257 - International Relations of Africa (3)
    - INR6275 - International Politics of the Middle East (3)
    - INR6339 - Strategic Warning Analysis (3)
    - INR6346 - Politics of International Terrorism (3)
    - INR6352 - Global Environmental Politics (3)
    - INR6356 - Environmental Security (3)
    - INR6365 - Seminar on Intelligence (3)
    - INR6366 - The Intelligence Community (3)
    - INR6726 - Political Behavior in International Conflict (3)
    - POS6207 - Political Behavior (3)
    - POS6415 - The American Presidency (3)
    - POS6427 - Congress and the Legislative Process (3)
    - POS6686 - National Security Law (3)
    - POS6729 - Political Network Analysis (3)
    - POS6743 - Geographic Tools for Political Science Research (3)
    - POS6747 - Advanced Topics in Quantitative Political Analysis (3)
    - POS6757 - Survey Design for Political Science Research (3)
    - Course Not Found
    - PUP6208 - Environmental Politics (3)
    - PUP6247 - Contemporary Issues in Environmental Politics (3)
    - PUP6324 - Women and Public Policy (3)
    - PUP6607 - Politics of Health (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - All MA students are automatically placed in the nonthesis option. Students wishing to write a thesis must get approval to do so. POS 6971 Thesis After completion of the required coursework and the passing of comprehensive exams, the student must have a thesis committee approved by the School of Politics, Security, and International Affairs (SPSIA) and Graduate Studies. The thesis committee consists of a chair and two other faculty members from the SPSIA who are members of the Graduate Faculty. On the approval of the thesis chair and Graduate Program Director, one of the committee members (but not the chair) may come from outside the SPSIA. When a thesis topic has been selected,
students, in conjunction with their thesis committee, will develop a thesis proposal. Copies of the proposal will be sent to members of their thesis committee and a proposal hearing scheduled in the first semester the student enrolls for thesis hours. All students must pass a proposal hearing as well as a final oral defense of their thesis. Once enrolled in thesis hours, students should maintain continuous enrollment (3 credit hours) each semester up to and including the semester in which they defend the thesis. In addition to SPSIA guidelines for the thesis, students should also become familiar with the UCF’s requirements and deadlines for organizing and submitting the thesis.

Nonthesis Option

• Earn at least 6 credits from the following types of courses:
  The student must complete 6 additional credit hours of course electives in their respective areas. Thesis hours, if already taken, will not count for course credit for the 6 additional credit hours of coursework. Electives 6 Credit Hours
  Complete an independent research project/paper During the final semester of coursework, the student must have a nonthesis committee approved by the SPSIA and Graduate Studies. The nonthesis committee consists of a chair and one other faculty member from the SPSIA. On the approval of the thesis chair and Graduate Program Director, the committee member (but not the chair) may come from outside the SPSIA. The student must complete an approved article-length independent research paper. The project/paper must have a component of original, independent research; it cannot be a literature review or research design only. The project/paper can be a product of a graduate research seminar and/or independent study paper. The student will present their research publicly at a SPSIA or UCF research colloquium or another public academic forum such as an academic conference. The project/paper must be evaluated by the nonthesis committee and receive formal confirmation of completion from the committee, and the MA program coordinator. If the paper is to be presented at a SPSIA research colloquium, the student is responsible for scheduling the presentation in consultation with the nonthesis committee.

Comprehensive Examination

0 Total Credits

• All candidates for the MA degree must take a comprehensive written examination. The examination will be administered after satisfactory completion of the required course work and must be taken prior to enrollment in thesis hours. The exam is designed to demonstrate proficiency in research methods and will consist of two parts. Part I will involve the critique of an article from a political science journal. The article will be assigned by the SPSIA's Graduate Methods Committee in consultation with the student and where possible will be based on the student’s substantive areas of interest. Part II will involve questions based on data analysis using either SPSS or STATA. The examination will be offered once semester. Dates will be set by the SPSIA. Students must register to take the exam at least six weeks prior to its scheduled date and take the exam within six months after they complete POS 6736 and POS 6746. Students not passing any part of the examination may take this part a second time within nine months on the dates that comprehensive exams are regularly scheduled. However, no student will be allowed to take the examination more than twice.

Equipment Fee

0 Total Credits

• Full-time students in the Political Science MA program pay a $39 equipment fee each semester that they are enrolled. Part-time students pay $19.50 per semester.

Grand Total Credits: 33

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. **Is this program available 100% online?**
No

**Program Description**

The Graduate Certificate in Research Smarts provides students with the essential skills and critical thinking needed by today's consumers of news and information.

Increasing one's Research Smarts will provide students with the practical skills and critical thinking necessary to produce and to consume findings, facts, and information with the assurance that it was arrived at systematically. These skills are not only useful in daily life, as we wade through the mass of news and information that comes our way, but also in private business, nonprofit organizations, government agencies, and other employment opportunities. Students seeking employment, those with jobs currently, or those working toward advancement can benefit from a critical examination of how knowledge is gained and which sources of information can be trusted. This is because nearly all employers value employees who are confident in their understanding and use of scientific research skills.

Students earning the Graduate Certificate in Research Smarts will acquire the following skills:

1. Be able to define knowledge, social science research, and research methods.  
2. Summarize why understanding research methods is important.  
3. Evaluate and describe each of the major steps taken to conduct research as well as the importance of each step.  
4. Develop research questions and compare the different types of research questions.  
5. Understand why ethics are an important consideration during research.  
6. Understand a variety of ways to analyze data.  
7. Understand the relationship between research methods and data analysis.  
8. Be able to design a sound research project from developing the research question to collecting the data, to selecting the best analysis strategy to making strategic conclusions.  
9. Use the above skills to critically assess news and information as well as evaluate the claims and assertions of others.

The Research Smarts Graduate Certificate consists of three required courses.

**Total Credit Hours Required: 9 Credit Hours Minimum beyond the Bachelor’s Degree**

**Program Prerequisites**

Admission is open to those with a bachelor’s degree from an accredited institution recognized by UCF and at least one statistics course or math course.

**Application Requirements**

Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF and at least one statistics course or math course. An application to the graduate certificate program and official transcripts must be submitted. Applicants must apply online. All requested materials must be submitted by the established deadline.

HPH 302D

Is this program available 100% online?
No

Program Description
The Security Studies doctoral program is designed to produce specialists capable of analyzing and communicating security issues to policy makers, the general public, the government, and academia.

Many graduates will work in military and other governmental organizations, international corporations, and agencies that deal with security. Others will seek employment in research and teaching in institutions of higher education.

The PhD degree consists of 59 credit hours beyond the master's degree. A master's degree is required for admission to the program with at least 30 credit hours of master's level work (including both coursework and thesis hours). The 59 credit hours consist of 17 credit hours of required courses, 15 credit hours of restricted electives, 9 hours of unrestricted electives (including courses offered in other departments, research, independent study, and internship), and a minimum of 18 credit hours of dissertation work.

Total Credit Hours Required: 59 Credit Hours Minimum beyond the Master's Degree

Program Prerequisites
An earned master's degree or its equivalent in Political Science, International Politics or International Relations, or related discipline. The Graduate Program Director will evaluate the suitability and applicability of MA degrees in other disciplines for admission purposes.
**Application Requirements**

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- An earned master’s degree or its equivalent in Political Science, International Politics or International Relations, or related discipline. The Graduate Program Director will evaluate the suitability and applicability of MA degrees in other disciplines for admission purposes.
- The GRE is not required for admission to this program.
- Three letters of reference that evaluate the applicant’s academic performance and their suitability and potential for undertaking doctoral study, at least one of which must be written by a faculty member at the institution where the master’s degree was earned.
- A personal statement of 500 words identifying areas of research interest in political science, faculty with whom they would like to work, and describing the applicant's academic and professional experiences and future career goals.
- A writing sample of at least 2500 words that demonstrates the applicant’s ability to complete graduate-level research.
- Résumé.
- For international applicants whose first language is not English, a score of 90 or better on the TOEFL internet-based test (iBT); or a score of 232 or better on the TOEFL computer-based test; or a score of 575 or better on the TOEFL paper-based test; or a score of 7.0 or better on the IELTS.

Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applicants should plan to take the appropriate test no later than December to ensure consideration of their applications by the January 15 deadline.

Applicants’ records will be reviewed on an individual basis for academic deficiencies and evaluated to assess their potential for success in the program. Supplemental course work may be recommended. Consult the graduate program director whenever questions arise.

A department admissions committee that reviews the applicants’ credentials will conduct interviews with the top candidates (either in-person on campus or by phone or Skype). Final selection is based on both submitted credentials and interview.

Meeting minimum UCF admissions criteria does not guarantee program admission. Final admission is also based on evaluation of the applicant’s abilities, past performance, recommendations, match of this program to the applicant’s career/academic goals, applicant’s potential for completing the degree, and the interview.

Degree Requirements

Required Courses
17 Total Credits

- Core Courses
15 Total Credits
  - Complete the following:
    - INR7139 - Issues in Domestic Security (3)
    - INR7332 - Scientific Study of Security (3)
    - INR7337 - Issues in International Security (3)
    - POS7745 - Advanced Quantitative Methods in Political Research (3)
    - POS7707 - Advanced Qualitative Methods in Political Research (3)

Professional Development Courses
2 Total Credits
  - Complete the following:
    - POS7930 - Professional Development: Academic Careers in Security Studies (1)
    - POS7267 - Professional Development: The Practice of Security Studies (1)

Elective Course
24 Total Credits

- Restricted Electives
15 Total Credits
  - Complete all of the following
    - All students in the doctoral program must complete a minimum of 15 hours of course work in approved restricted elective graduate seminars. The choice of specific courses will be based on the research interests of students and made in conjunction with their faculty advisor. In this way, students achieve two distinct but related goals: a broad competence in the variety of methodological, theoretical, and substantive approaches to security studies and advanced proficiency in the areas that are most germane to their research interests. Approved restricted electives include:
      - Complete at least 5 of the following:
        - CPO6038 - Political Development (3)
        - CPO6058 - Revolution and Political Violence (3)
        - CPO6091 - Seminar in Comparative Politics (3)
        - CPO6206 - Comparative Politics of Africa (3)
        - CPO6307 - Issues in Latin American Politics (3)
        - CPO6407 - Comparative Politics of the Middle East (3)
        - CPO6729 - Global Security in the Age of Migration (3)
        - CPO6776 - Comparative Rising Powers (3)
        - Course Not Found
        - INR6039 - International Political Economy (3)
        - INR6062 - Peace Studies (3)
        - INR6065 - Seminar on War (3)
        - INR6067 - Human Rights and Security (3)
        - INR6068 - Politics of Civil Wars (3)
        - INR6136 - Seminar in American Security Policy (3)
        - INR6137 - Terrorism and Politics (3)
        - INR6108 - Seminar in American Foreign Policy (3)
        - INR6228 - International Politics of the Caspian Sea Region (3)
        - INR6257 - International Relations of Africa (3)
        - INR6275 - International Politics of the Middle East (3)
        - INR6339 - Strategic Warning Analysis (3)
        - INR6346 - Politics of International Terrorism (3)
        - INR6356 - Environmental Security (3)
        - INR6365 - Seminar on Intelligence (3)
        - INR6366 - The Intelligence Community (3)
        - INR6507 - International Organization (3)
        - INR6726 - Political Behavior in International Conflict (3)
        - POS6207 - Political Behavior (3)
        - POS6415 - The American Presidency (3)
        - POS6427 - Congress and the Legislative Process (3)
        - POS6686 - National Security Law (3)
        - POS6729 - Political Network Analysis (3)
        - POS6743 - Geographic Tools for Political Science Research (3)
        - POS6747 - Advanced Topics in Quantitative Political Analysis (3)
        - POS6757 - Survey Design for Political Science Research (3)
Unrestricted Electives
9 Total Credits
- Earn at least 9 credits from the following types of courses:
  The unrestricted electives provide students with an opportunity to further expand their doctoral training beyond the program's core courses and the restricted electives. Unrestricted electives may include regularly scheduled graduate courses in political science, graduate-level courses in programs outside the department, independent study courses, doctoral research courses with a highly focused student/faculty research component, and internships that enable students to gain valuable experience in a non-academic setting. Unrestricted electives may be taken at any point in the student's program of study; however, no more than a total of twelve hours of graduate course work can be from outside of the department, dissertation research, independent study, or internship combined; in addition, no more than a total of six hours can be from either independent study or internship. Students with suitable academic backgrounds may work in areas such as cyber security or science and technology taking courses in relevant departments. A student's faculty advisor and the department's Graduate Program Director must approve all graduate courses taken outside of the department as well as any internships.

Modern Language or Methods Requirement
0 Total Credits
- Prior to enrollment in dissertation hours, students are required to demonstrate proficiency in one modern language (other than English) or an additional methodological course dependent on the student's intended research area. The language requirement is two years (four semesters) of a single college-level modern language, which should normally be in an area relevant to the student's research. Students may meet the requirement by providing evidence of four semesters of enrollment or by passing a university-administered equivalent proficiency examination. The methods requirement is met by taking a methods course as part of the elective course requirements, with the approval of the Graduate Program Director.

Preliminary Advisory Committee Meeting
0 Total Credits
- No earlier than April 1 and not later than June 1, of their first year in the program, students will assemble and meet with a Preliminary Advisory Committee of no fewer than three full-time Political Science faculty members, all of whom should have Graduate Faculty or Grad Faculty Scholar Status. Prior to this meeting, the student will present committee members with a written statement of their primary research interests. During this meeting faculty members provide feedback on the student's statement of research interests and will identify key literatures that the student will be expected to be familiar with as they pursue their dissertation. During this meeting faculty members provide feedback on the student's statement of research interests and will identify key literature that the student will be expected to be familiar with as they pursue their Dissertation Advisory Committee. Note that college approval for the committee is not required at this time and that students are able to change the composition of their committee at any time (subject to program and college approval). Students will not be permitted to take Candidacy Exam C until they have conducted their Preliminary Advisory Committee Meeting.

Written Candidacy Exams
0 Total Credits
- Each student will take the following exams: 1. An exam in qualitative methods, addressing the material taught in INR 7707. 2. An exam in quantitative methods, addressing the material taught in INR 7745. 3. An exam addressing the contemporary literature in security studies. Students must pass each part of each exam prior to enrollment in dissertation hours. If they fail any part(s) of any exam, they will have a second opportunity to take that part(s). If they fail the exam a second time, the student will be dismissed from the program.

Admission to Candidacy
0 Total Credits
- The following are required to be admitted to candidacy and enroll in dissertation hours: • Completion of all coursework, except for dissertation hours • Successful completion of all written candidacy exams • Formation of a dissertation advisory committee • Submittal of an approved program of study

Dissertation
18 Total Credits
- Earn at least 18 credits from the following types of courses:
  POS 7980 - Dissertation Research The dissertation is the culmination of the coursework that comprises this research-based degree. It must make a significant theoretical, historical, intellectual, practical, creative, or research contribution to the student's area within the discipline. The dissertation will be completed through a minimum of 18 hours of dissertation credit, which students will use to accomplish original research. Students must maintain enrollment in dissertation hours until the degree is awarded. The dissertation must conform to standard disciplinary, institutional, and departmental practices. Consistent with College of Graduate Studies Policies, a dissertation can only be approved after the successful completion of a Dissertation Defense.

Grand Total Credits: 59
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

No
Program Description

The Department of Sociology offers a graduate program leading to a Master of Arts degree in Applied Sociology. Beyond a curriculum appropriate for general applied sociology, the program includes a graduate track in Domestic Violence and a graduate track in Medical Sociology as well as instruction and opportunities pertaining to the study of crime and deviance; domestic violence; medical sociology; and social inequalities. Please scroll to the bottom of this page for further details on these Tracks.

A primary focus of the program is the variety of social problems in society. Toward this objective, the program promotes the application of sociological and social psychological knowledge, principles, and research skills in a variety of organizational, community, and institutional settings. Examples of competencies in applied sociology include effective skills in program design and evaluation research; planning, feasibility and needs assessment studies; data management, analysis and presentation; and the application of general systems and social conflict theories to organizational problems, community development and planned change.

Degree seeking students in the Applied Sociology Program may elect to follow either a thesis or a non-thesis course of study. The thesis option is typically designed for students who plan to enter doctoral programs. The non-thesis option is more appropriate for students entering or continuing professional careers following the MA degree.

The degree of Master of Arts is conferred when students have fulfilled the requirements for either the thesis or non-thesis option. Both options require 30 hours of course work.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Three letters of recommendation, including at least two from academic sources familiar with the applicant's academic abilities.
- A personal statement of 250-500 words identifying areas of research interest as it connected to thematic areas of UCF Sociology, faculty with whom they would like to work, and describing the applicant's academic and professional experience and goals.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

The applicant's records will be reviewed on an individual basis for academic deficiencies and evaluated to assess their potential for success in the program. Supplemenal course work may be recommended.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program to the applicant's career/academic goals, and the applicant's potential for completing the degree. Note also that there is no automatic connection between acceptance as a non-degree-seeking student and acceptance into this degree-granting program. Consult the graduate program director whenever questions arise.

Application Deadlines Notes

*Applicants who plan to enroll full time in a degree program and who wish to be considered for university fellowships or assistantships should apply by the Fall Priority date.
**Degree Requirements**

**Required Courses**

- **12 Total Credits**
  - Complete all of the following
    - Students receive an independent learning experience in the core by completing a research study in each of the 12 hours of required courses. SYA 5625 - ProSeminar should be taken as early as possible in the program.
    - Complete the following:
      - SYA5625 - ProSeminar (3)
      - SYA6126 - Social Theory (3)
      - SYA6305 - Social Research (3)
      - SYA6455 - Research Analysis (3)

**Elective Courses**

- **12 Total Credits**
  - Earn at least 12 credits from the following types of courses:
    - Students will select a minimum of 12 credit hours of unrestricted electives in consultation with their faculty advisor. No more than 3 hours may be taken in UCF graduate programs outside the department. The department's graduate director must approve all courses taken outside the department prior to enrollment. A listing and description of courses offered by the Department of Sociology is found in the "Courses" section. Under special circumstances, students may enroll in a graduate-level Directed Independent Study course or a Directed Independent Research course to fulfill their nonrestricted elective course requirements. These courses, like most graduate seminars, require written research deliverables. Enrollment in these courses requires written approval from the student's advisor and graduate director. No more than 6 hours of graduate-level courses in Directed Independent Study or Directed Independent Research may be included in a student's program of study.
    - Nonthesis students may substitute up to 6 hours of their elective course work by completing a graduate practicum/internship (SYA 6946). The practicum must be approved by the student's permanent adviser and the department's graduate program director.

**Thesis/Nonthesis Option**

- **6 Total Credits**
  - Complete 1 of the following
    - **Thesis Option**
      - Earn at least 6 credits from the following types of courses:
        - The thesis option requires a minimum of 6 hours of thesis credit and a successful defense of a thesis. Students may enroll in thesis hours after they have successfully completed the four required courses and their thesis committee has been approved by the department, college, and Graduate Studies. The students' permanent faculty adviser will chair their committee, which also will include two additional graduate sociology faculty members in the department. The additional members of the thesis committee are selected in consultation with the student's permanent faculty adviser. When a topic has been selected, students, in conjunction with their permanent adviser, will develop a thesis proposal. Copies of the proposal will be routed to members of their thesis committee and a proposal hearing scheduled. All students must pass a proposal hearing as well as a final oral defense of their thesis. Students who elect to write a thesis should become familiar with the university's requirements and deadlines for organizing and submitting the thesis.
    - **Nonthesis Option**
      - Complete all of the following
        - The nonthesis option requires that students complete SYA 6657 - Program Design and Evaluation and 3 additional hours of SYA 6918 - Directed Research, SYA 6946 - Internship or Practicum, SYA 6909 - Research Report, or SYA 6908 - Directed Independent Studies. Both the Program Design and Evaluation course (SYA 6657) and "directed research or internship" courses require community-oriented research projects to develop research skills in sociology.
        - Complete the following:
Earn at least 3 credits from the following types of courses:
SYA 6918 Directed Research 3 Credit Hours
SYA 6946 Internship or Practicum 3 Credit Hours
SYA 6909 Research Report 3 Credit Hours
SYA 6908 Directed Independent Studies 3 Credit Hours
Applied Project

Nonthesis students must complete an applied project. The nature and implementation of each project will be determined by the student and their advisor. Before students may begin the applied project, they must earn a grade of "B" (3.0) or better in each of the five core courses. An Applied Project evaluated by a three-person committee consists of: A 1-2 page proposal describing what the project and the final product will entail. A final product approved and evaluated by the committee. A brief statement submitted with the final product indicating how the project is sociologically grounded. The grading system for the project is Pass/No Pass. Students who receive a grade of Pass will be allowed to graduate assuming all other requirements are met.

Equipment Fee
0 Total Credits
- Full-time students in the Applied Sociology MA program pay a $39 equipment fee each semester that they are enrolled. Part-time students pay $19.50 per semester.

Independent Learning
0 Total Credits
- As with all graduate programs, independent learning is an important component in the Applied Sociology master's program. Students will demonstrate independent learning through research seminars and the thesis (thesis students only).

Grand Total Credits: 30

Track Description

The Department of Sociology offers a graduate program leading to a Master of Arts degree in Applied Sociology. Beyond a curriculum appropriate for general applied sociology, the program includes a graduate track in Medical Sociology as well as instruction and opportunities pertaining to the study of crime and deviance; domestic violence; and social inequalities.

Medical Sociology is an important subfield of Sociology that was developed and recognized in 1959 by the American Sociological Association (ASA). Medical sociology identifies the processes of health, illness, and medical care as social phenomena. The American Sociological Association identifies the following research topics under the field of medical sociology: the subjective experience of health and illness, the political, economic and environmental circumstances surrounding health and illness, the societal structures and forces that constrain the medical care system, individual responses to illness, and social movements related to health and healthcare. Having a deep understanding of how social processes work to affect an individual's health allows for many different careers. Medical sociologists use their knowledge to work for governmental and non-governmental organizations centered on health. They work for federal, state, and private health insurance plans. Medical sociologists conduct research and make policy that addresses public health problems. Many students who study medical sociology enter medical school to become clinicians and teachers of medical education. Still others enter dental school, physical therapy school, or other professional programs in the allied fields of health and apply knowledge gained from Medical Sociology to improve their patients' lives.

Degree-seeking students in the Applied Sociology program may choose either the thesis or a nonthesis course of study. Both options require 30 hours of course work, at least half of which must be at the 6000 level or above.

Degree seeking students in the Applied Sociology Program may elect to follow either a thesis or a non-thesis course of study. The thesis option is typically designed for students who plan to enter doctoral programs. The non-thesis option is more appropriate for students entering or continuing professional careers following the MA degree.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- The GRE is not required for admission to this program.
- Three letters of recommendation, including at least two (where possible) from academic sources familiar with the applicant's academic abilities.
- A personal statement of 250-500 words identifying areas of research interest connecting to thematic areas within the UCF Department of Sociology, faculty with whom they would like to work, and describing the applicant's academic and professional experiences and goals.
- Applicants applying to this program who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.
- The applicant's records will be reviewed on an individual basis for academic deficiencies and evaluated to assess their potential for success in the program. Supplemental course work may be recommended.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program to the applicant's career/academic goals, and the applicant's potential for completing the degree. Note also that there is no automatic connection between acceptance as a non-degree-seeking student and acceptance into this degree-granting program. Consult the graduate program director whenever questions arise.

PO Box 160112
Orlando, FL 32816-0112

Institution Codes
GRE: 5233
GMAT: RZT-HT-S8
TOEFL: 5233
ETS PPI: 5233

Degree Requirements

Core
12 Total Credits

- Complete all of the following
  - Please note that students in the nonthesis option are required to complete a research study in each of the 12 hours of required courses to provide an independent learning experience.
  - Complete the following:
    - SYA5625 - ProSeminar (3)
    - SYA6126 - Social Theory (3)
    - SYA6305 - Social Research (3)
    - SYA6455 - Research Analysis (3)

Specialization
6 Total Credits

- Complete the following:
  - SYO6406 - Medical Sociology (3)
  - SYO6405 - Sociology of Health and Illness (3)

Elective Courses
6 Total Credits

- Complete at least 2 of the following:
  - SYD6363 - Social Inequalities and Reproductive Health (3)
  - SYP6555 - Sociology of Alcohol and Drugs (3)
  - SYP6735 - Sociology of Health and Aging (3)
  - SYO6404 - Food Insecurity and Health (3)
  - SYO6409 - Social Inequalities in Health (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis Option
    - Earn at least 6 credits from the following types of courses:
      - The thesis option requires a thesis proposal and defense, a minimum of 6 hours of thesis credit, and a written thesis along with a successful defense of a thesis. Students may enroll in thesis hours after they have successfully completed their core required courses, they have passed their thesis proposal defense, and their thesis committee has been
approved by the department and college. The student's permanent faculty advisor will chair their committee, which also will include two additional graduate faculty members. The additional members of the thesis committee are selected in consultation with the student's permanent faculty advisor, and may include faculty from related disciplines in consultation with the faculty advisor. When a topic has been selected, students, in conjunction with their permanent advisor, will develop a thesis proposal. Copies of the proposal will be routed to members of their thesis committee and a proposal defense will be scheduled. All students must pass a proposal defense as well as a final oral defense of their thesis. Students who elect to write a thesis should become familiar with the university's requirements and deadlines for organizing and submitting the thesis.

Nonthesis Option

- Complete all of the following
  - The nonthesis option requires that students complete SYA 6657 - Program Design and Evaluation and 3 additional hours of elective course work in their area of specialization. The Program Design and Evaluation course (SYA 6657) requires community-oriented research projects to develop research skills in sociology.
  - Complete the following:
    - SYA6657 - Program Design and Evaluation (3)
  - Earn at least 3 credits from the following types of courses:
    - Directed Study for Applied Project Nonthesis students must complete an applied project. The nature and implementation of each project will be determined by the student and her/his adviser. Before students may begin the applied project, they must earn a grade of "B" (3.0) or better in each of the five core courses. An Applied Project evaluated by a three-person committee consists of: A 1-2 page proposal describing what the project and the final product will entail. A final product approved and evaluated by the committee. A brief statement submitted with the final product indicating how the project is sociologically grounded. The grading system for the project is Pass/No Pass. Students who receive a grade of Pass will be allowed to graduate assuming all other requirements are met.

Equipment Fee
0 Total Credits
- Full-time students in the Applied Sociology MA program pay a $39 equipment fee each semester that they are enrolled. Part-time students pay $19.50 per semester.

Independent Learning
0 Total Credits
- As with all graduate programs, independent learning is an important component in the Applied Sociology master's program. Students will demonstrate independent learning through research seminars and the thesis (thesis students only).

Grand Total Credits: 30

Track Details

Students must earn a grade of "B" (3.0) or better in the program's core courses. Courses may be retaken to achieve a better grade; however, students must maintain a minimum GPA of 3.0 in their program of study.

By the end of their first year of course work in the program, students should select a permanent faculty advisor and determine their preliminary program of study, either in the thesis or nonthesis track. Students should maintain close contact with their faculty advisor in order to develop a viable program of study and avoid graduation delays.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

funding.graduate.ucf.edu
The Sociology PhD program provides training in the skills necessary to secure research careers in both academic and non-academic professions and emphasizes applied research in community-based settings.

The Sociology PhD program is organized around a curriculum combining grounding in the acquisition of theoretical and methodological skills with advanced study in one of the department's four areas of concentration: Crime and Deviance; Domestic Violence; Health, Families, and Communities; and Social Inequalities.

The program is one of only a few in the United States focusing on applied research. Students are trained in specific applied research skills such as data analysis, qualitative methods, quantitative methods, mixed methods, Geographic Information Systems (GIS), and/or program evaluation. Combined with course work in one of the four substantive areas, graduates will be trained for employment in the following settings: the academy, industry, business, government, and nonprofit agencies. The program provides training in the skills necessary to secure advanced careers in academic and non-academic professions and emphasizes applied research in community-based settings.

The Sociology PhD requires a minimum of 60 credit hours beyond the master's degree, with 15 credit hours coming from required core courses, three credit hours from a restricted elective in theory, and three credit hours from a restricted elective in research methods and data analysis. Students select a minimum of 12 elective credit hours in one of the department's four areas of concentration: Crime and Deviance; Domestic Violence; Health, Families and Communities; or Social Inequalities.

Total Credit Hours Required: 60 Credit Hours Minimum beyond the Master's Degree

Program Prerequisites

Master's degree in a related field from an accredited institution recognized by UCF.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Master’s degree in a related field from an accredited institution (Note: Official, preliminary transcript reflecting Master’s degree in-progress may be submitted prior to first semester of enrollment. Final, official transcripts are required post admission to document completion of master’s degree.).
- The GRE is not required for admission to this program.
- Three letters of recommendation, (where possible) at least two from academic sources regarding the applicant's potential for success in the program.
- A 250-500 word personal statement identifying the area of research interest as it relates to the thematic areas of UCF Sociology, faculty with whom they would like to work with and a description of the applicant's academic and professional experiences and goals.
- Résumé or Curriculum Vitae.
- A writing sample, at least 2,500 words demonstrating the ability to complete advanced graduate work.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

Applicant records will be reviewed on an individual basis to assess their potential for success in the program. Supplemental course work may be recommended. Consult the graduate program director whenever questions arise.

Meeting minimum UCF admissions criteria does not guarantee program admission. Final admission is also based on evaluation of the applicant's abilities, past performance, recommendations, match of this program to the applicant's career/academic goals, and applicant's potential for completing the degree.

Degree Requirements

Core
9 Total Credits

- Complete the following:
  - SYA7019 - Advanced Sociological Theory (3)
  - SYA7309 - Advanced Sociological Research Methods (3)
  - SYA7407 - Advanced Data Analysis (3)
Theory
3 Total Credits

- Complete at least 1 of the following:
  - SYA6933 - Topics in Sociological Theory (3)
  - SYA6128 - Theoretical Criminology (3)

Research Methods
3 Total Credits

- Complete at least 1 of the following:
  - SYA6315 - Qualitative Research Methods (3)
  - SYA6425 - Design and Conduct of Social Surveys (3)
  - SYA7457 - Topics in Data Analysis (3)
  - SYA6356 - Geographic Information Systems in Society (3)
  - SYA6452 - GIS Applications (3)

Major Area of Concentration Electives
12 Total Credits

- Earn at least 12 credits from the following types of courses:
  Students will select a minimum of 12 credit hours of unrestricted electives in one of the department's four areas of concentration: Crime and Deviance Domestic Violence Health, Families and Communities Social Inequalities

Unrestricted Electives
18 Total Credits

- Earn at least 18 credits from the following types of courses:
  The unrestricted electives provide students with an opportunity to expand their doctoral training beyond the program's core courses and the electives in the student's major area of concentration. Unrestricted electives may include formal course work, graduate-level courses in programs outside the Sociology Department, independent study courses with a highly focused student/faculty research component, directed research, and doctoral research. At least 9 hours from concentration electives and unrestricted electives must consist of formal course work, exclusive of independent study. Unrestricted electives may be taken at any point in the student's program of study. Courses from other departments must be approved by the student's advisor and the Graduate Director.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  SYA 7980 - Dissertation Research

Examinations
0 Total Credits

- Details:
  Section 1: Theoretical Foundations of Sociology
  0 Total Credits
  - All students will answer two of three questions. All students who take the exam in the same area of concentration in a given semester will receive the same three questions. One of the questions will require students to trace the connections between classical and contemporary sociological theories and a second question will require students to discuss the three central theoretical paradigms in sociology.

Section 2: Methods and Statistics
0 Total Credits

- All students will answer two of three questions. All students who take the exam in the same area of concentration in a given semester will receive the same three questions. One of the questions will require students to interpret statistical results in tabular form.

Section 3: Major Area of Concentration
0 Total Credits

- All students will answer three of four questions covering general information within the area of concentration. All students who take the exam in the same area of concentration in a given semester will receive the same four questions.

Committee
0 Total Credits

- The Qualifying Exams will be graded by a committee of three faculty members who teach or do research in the area of concentration. Prior to the final faculty meeting of each spring semester, four separate qualifying exam committees will be formed by faculty choosing to become a member of one or more areas of concentration. Each qualifying exam committee will create the exam to be used for the next academic year and select the three members who will be the Grading Committee.

Administration

2021-2022 Graduate Catalog
The Qualifying Exam will be offered to students twice during the academic year (once during the fall semester and once during the spring semester). Students must notify the Graduate Director and Graduate Admissions Coordinator by June 1 to take the exam in the fall semester or by October 1 to take the exam in the spring semester. They will select a major area of concentration. The exam will be distributed by the Graduate Admissions Coordinator via Webcourses. The exams typically are held the week prior to the beginning of the fall semester and the week prior to the start of the spring semester. Students will have 7 days to complete all sections of the exam and submit the exam via Webcourse. The Graduate Director will then distribute the exam to the appropriate grading committee. Students are expected to work on the Qualifying Exam alone, and all exams will be submitted to turnitin.com. Questions from students that come up during the exam should be directed to the Graduate Director who will solicit advice from the chair of the grading committee in the student’s area. Each grading committee will have three weeks to notify the Graduate Director of the student’s grade on the exam (High Pass, Pass, Conditional Pass, or Fail). A grade of conditional pass on an exam will require the student to revise and resubmit one or more questions identified as insufficient by the Grading Committee. The student will have one week to complete each question that must be rewritten. If a student fails the exam, he/she must retake the exam the next semester it is offered. If the exam is failed a second time, the student will be dismissed from the Ph.D. Program in Sociology. Accommodations for students with a documented disability will be made with advanced notice in consultation with the student and the appropriate campus office.

Candidacy Examination

0 Total Credits

- The dissertation proposal defense constitutes the program’s candidacy examination, and students who successfully pass their proposal defense along with other requirements shall be admitted to candidacy. The proposal will encompass an overview of the dissertation topic that includes an in-depth review of relevant literature, a precise statement of the research question, and specific research design (planned methodology and analysis). The student’s Dissertation Advisory Committee will supervise the preparation of the dissertation proposal and the defense hearing.

Admission to Candidacy

0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Completion of all required course work, except for dissertation hours. Successful completion of the candidacy examination. Successful defense of the dissertation proposal. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Dissertation

0 Total Credits

- A dissertation is required for completion of the Ph.D., along with an oral defense of the dissertation proposal and completed dissertation through a minimum of 15 credit hours, which students use to accomplish original research on a topic approved by their advisor and three additional committee members. One committee member must be from a relevant field outside the Department of Sociology. The dissertation must conform to standard disciplinary, institutional, and departmental practices. Students may not enroll for dissertation credit until they have completed all examinations in their program of study.

Equipment Fee

0 Total Credits

- Full-time students in the Sociology PhD program pay a $39 equipment fee each semester that they are enrolled. Part-time students pay $19.50 per semester.

Grand Total Credits: 60

Is this program available 100% online?
No

Program Description

The Master of Science in Statistics and Data Science provides a sound foundation in statistical theory, statistical methods, numerical methods in statistics, and the application of computer methodology to statistical analyses. The MS is particularly suited for individuals who have completed an undergraduate program in mathematics, statistics, or computer science, but is also available to those from other disciplines who wish to develop an expertise in statistics and data science.

This degree has 1 track: Data Science Track. Please scroll to the bottom of this page for further details on this Track.

The Statistics and Data Science MS program requires a minimum of 36 credit hours beyond the bachelor's degree. The degree in Statistics and Data Science includes 21 credit hours of required courses, 15 credit hours of restricted electives, and passing a comprehensive examination.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Students must have the following background and courses completed before applying to the Statistics & Data Science MS program. These courses are: MAC 2311C: Calculus with Analytic Geometry I, MAC 2312: Calculus with Analytic Geometry II, MAC 2313: Calculus with Analytic Geometry III, MAS 3105: Matrix and Linear Algebra or MAS 3106: Linear Algebra. These pre-required courses are basic undergraduate courses from the Math department.
Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate admission requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE or GMAT score taken within the last five years.
- Résumé.
- 3 Letters of Recommendation

Applicants not qualified for regular graduate status may be initially admitted to the university in non-degree-seeking status and later admitted to regular status once all deficiencies have been eliminated, although only nine hours of graduate course work taken as a non-degree-seeking student can count toward a graduate degree.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant’s abilities, past performance, recommendations, match of this program and faculty expertise to the applicant’s career/academic goals, and the applicant’s potential for completing the degree.

Statistics and Data Science MS - Statistics and Data Science MS, Data Science Track

College
College of Sciences

Department
Department of Statistics
Is this track available 100% online?
No

Track Description
The Master of Science in Statistics and Data Science, Data Science track focuses on data analytics and its application to business, social, and health problems.

The Data Science track in the Statistics and Data Science MS program focuses on data analytics and its application to business, social, and health problems.

The program is particularly suited for individuals who have completed an undergraduate program in mathematics, statistics, economics, business, or other related fields, and wish to pursue a career in data science. Data scientists analyze massive data sets to uncover trends and associations, and make theoretically sound decisions on, for example, business, social, and health subjects. Data scientists have one of the most coveted jobs, as the demand for them far exceeds the existing number of qualified persons in the area. Currently, the work force in the data science industry consists mainly of individuals trained with post college education. To date, very few university degree programs exist for training students for such a large and growing industry in the United States.

The Data Science track in the Statistics and Data Science MS program is composed of 24 credit hours of required courses and 12 credit hours of restricted electives. Students must also pass a comprehensive written examination.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites
Students must have the following background and courses completed before applying to the Statistics & Data Science, Data Science track MS program. These courses are: MAC 2311C: Calculus with Analytic Geometry I, MAC 2312: Calculus with Analytic Geometry II, MAC 2313: Calculus with Analytic Geometry III, MAS 3105: Matrix and Linear Algebra or MAS 3106: Linear Algebra. These pre-required courses are basic undergraduate courses from the Math department.

Application Requirements
For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

In addition to the general UCF graduate admission requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- Official, competitive GRE or GMAT score taken within the last five years.
- Résumé.
- 3 Letters of Recommendation

Applicants not qualified for regular graduate status may be initially admitted to the university in non-degree-seeking status and later admitted to regular status once all deficiencies have been eliminated, although only nine hours of graduate course work taken as a non-degree-seeking student can count toward a graduate degree.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

Degree Requirements

Required Courses
24 Total Credits

- Complete all of the following
  - Complete the following:
    - STA5104 - Advanced Computer Processing of Statistical Data (3)
    - STA6714 - Data Preparation (3)
    - STA6238 - Logistic Regression (3)
    - STA6326 - Theoretical Statistics I (3)
    - STA6327 - Theoretical Statistics II (3)
    - STA6236 - Regression Analysis (3)
    - STA5703 - Data Mining Methodology I (3)
    - STA6704 - Data Mining Methodology II (3)
  - Note: STA 5703 and STA 6704 both require research projects that fulfill the independent learning requirement for the program.

Elective Courses
12 Total Credits

- Complete all of the following
  - Select electives from the following courses. No more than one COP course can be selected.
  - Complete at least 4 of the following:
    - Course Not Found
    - COP5711 - Parallel and Distributed Database Systems (3)
    - COP6730 - Transaction Processing (3)
    - COP6731 - Advanced Database Systems (3)
    - STA5205 - Experimental Design (3)
    - STA5505 - Categorical Data Methods (3)
    - STA5825 - Stochastic Processes and Applied Probability Theory (3)
    - STA6106 - Statistical Computing I (3)
    - STA6226 - Sampling Theory and Applications (3)
    - STA6237 - Nonlinear Regression (3)
    - STA6507 - Nonparametric Statistics (3)
    - STA6707 - Multivariate Statistical Methods (3)
    - STA6857 - Applied Time Series Analysis (3)
    - STA6705 - Data Mining Methodology III (3)
    - FIN6406 - Strategic Financial Management (3)

Comprehensive Examination
0 Total Credits

- All students must take a comprehensive written examination covering the five courses STA 6326, STA 6327, STA 5104, STA 6714 and STA 6238. For full-time students, this examination will normally be taken just prior to the start of the second year of their graduate work. Students are allowed two attempts to pass the exam. Failure to pass after the second attempt will result in dismissal from the program.

Independent Learning
0 Total Credits

- STA 5703 and STA 6704 both require research projects that fulfill the independent learning requirement for the program. Both courses require students to build models for target variables of projects with very large sets of data, write a report, and then give an oral presentation on their independent learning experiences.

Grand Total Credits: 36

Track Details

All MS students must have an approved Plan of Study (POS) developed by the student and advisor that lists the specific courses to be taken as part of the degree. Students must maintain a minimum GPA of 3.0 in their POS, as well as a "B" (3.0) in all courses completed toward the degree and since admission to the program.
Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Is this program available 100% online?
No
Program Prerequisites

An earned master's degree or its equivalent in Communication or a related field. The Director of Graduate Studies will evaluate the suitability and applicability of M.A. or M.S. degrees in other related disciplines for admission purposes.

Application Requirements

For information on general UCF graduate admissions requirements that apply to all prospective students, please visit the Admissions section of the Graduate Catalog. Applicants must apply online. All requested materials must be submitted by the established deadline.

Applicants should adhere to the application requirements outlined below. An application will not be reviewed for admission until it is verified as complete by the UCF College of Graduate Studies.

Meeting minimum UCF admission criteria does not guarantee program admission. Final admission is based on an evaluation of the applicant's abilities, past performance, recommendations, match of this program and faculty expertise to the applicant's career/academic goals, and the applicant's potential for completing the degree.

In addition to the general UCF graduate application requirements, applicants to this program must provide:

- One official transcript (in a sealed envelope) from each college/university attended.
- An earned master's degree or its equivalent in Communication or a related field. The Director of Graduate Studies will evaluate the suitability and applicability of M.A. or M.S. degrees in other related disciplines for admission purposes. Applicants must have a minimum cumulative GPA of 3.0 for all graduate work and must also have a cumulative 3.0 GPA in their undergraduate degree.
- The GRE is not required for admission to this program.
- Three letters of reference that evaluate the applicant's academic performance and their suitability and potential for undertaking doctoral study, at least one of which must be written by a faculty member at the institution where the master's degree was earned, preferably the thesis advisor or Graduate Program Director.
- A personal statement of 500 words identifying areas of research interest in strategic communication, faculty with whom they would like to work, and describing the applicant's academic and professional experiences and future career goals.
- A writing sample of the applicant's work that is at least 2500 words long and demonstrates the ability to complete graduate-level research.
- Résumé.
- Applicants to this program, except those that have earned or will earn a Masters or Doctoral degree from an accredited U.S. institution recognized by UCF, who have attended a college/university outside the United States must provide a course-by-course credential evaluation with GPA calculation. Credential evaluations are accepted from World Education Services (WES) or Josef Silny and Associates, Inc. only.

International applicants whose first language is not English are required to submit results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) unless they hold a degree from a U.S. accredited institution. The TOEFL is strongly preferred. The minimum TOEFL score for full admissions consideration is 90 on the Internet-based test (IBT) and must take the speaking portion of the TOEFL and score a 26 or higher, 232 on the computer-based test, or 575 on the paper-based test. The minimum IELTS score is 7.0. Applicants should plan to take the appropriate test no later than December to ensure consideration of their applications by the January 15 deadline. Applicants' records will be reviewed on an individual basis for academic deficiencies and evaluated to assess their potential for success in the program. Supplemental course work may be recommended. Consult the graduate program director whenever questions arise. Meeting minimum UCF admissions criteria does not guarantee program admission. Final admission is also based on an evaluation of the applicant's abilities, past performance, recommendations, match of this program to the applicant's career/academic goals, applicant's potential for completing the degree, and the interview.

Selection committee: Applicants for admission into the doctoral program will be reviewed and recommended for acceptance by the NSCM Doctoral Committee. The Doctoral Committee will be chaired by the Director of Graduate Studies and comprised of five additional representatives from the graduate faculty in the Nicholson School of Communication and Media.

Degree Requirements

Colloquium  
0 Total Credits

- Complete the following:  
  - COM7920 - Doctoral Colloquium (99)

Core Requirements  
9 Total Credits

- Complete the following:  
  - COM7464 - Theory Building for Strategic Communication (3)  
  - COM7529 - Strategic Communication (3)  
  - COM7821 - Instructional Communication in Strategic Contexts (3)

Research Requirements  
12 Total Credits

- Complete the following:  
  - COM6303 - Qualitative Research Methods in Communication (3)  
  - COM6304 - Quantitative Research Methods in Communication (3)  
  - COM7325 - Seminar in Research Methods (3)  
  - SPC7685 - Rhetorical Criticism of Strategic Communication (3)

Community Engagement Requirement  
3 Total Credits

- Complete all of the following  
  - Earn at least 3 credits from the following:  
    - COM6918 - Directed Research (1 - 99)  
    - COM7528 - Communication and Community Engagement (1 - 99)  
  - COM 6946 Internship may also be taken

Restricted Elective Courses (Choose one)  
6 Total Credits

- Complete 1 of the following  
  - Concentration in Risk and Crisis Communication
Complete the following:

- COM7236 - Seminar in Risk and Crisis Communication (3)
- COM7815 - Risk Communication (3)

Concentration in Health Communication

Complete the following:

- COM7025 - Health Communication (3)
- COM7227 - Seminar in Health Communication (3)

Unrestricted Electives

15 Total Credits

- Complete all of the following:
  - Upon consultation with, and approval of the student's advisor, a student may complete up to 6 hours of elective courses from outside the NSCM (e.g., Emergency Management, Public Affairs). Note: Non-NSCM courses might not be offered on the Downtown campus and will require students to attend the course at the UCF Main campus.
  - Earn at least 15 credits from the following:
    - COM6535 - Communication Campaigns (3)
    - COM6046 - Interpersonal Communication (3)
    - COM6145 - Organizational Communication (3)
    - COM6401 - Communication Theory (3)

Is this program available 100% online?
No

Program Description
The Survey Research Certificate will prepare students for work as a professional or academic survey researcher. Course requirements ensure that students are well-trained as designers and analysts for surveys, and that they have an understanding of the use and application of survey methods.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Application Requirements
Admission is available to applicants with a bachelor's degree from an accredited institution recognized by UCF. Applicants must apply online. All requested materials must be submitted by established deadlines.

Applicants to this program must provide:

- Official Transcripts
- Statement of Purpose of 500 words or fewer
- Current CV or Resume

Admission to this certificate program is competitive; applicants are not guaranteed admission. While the program does not have specific pre-requisite courses that need to be completed prior to enrollment in the program, applicants should demonstrate their preparedness to succeed in quantitative methods courses in their application materials.
