- Analyze risks to individual and public health impacted by issues in the healthcare system
- Bring evidence-based thinking and analysis to process and system change
- Develop and manage a quality management system across an organizational setting
- Plan and conduct change initiatives that directly impact quality and costs
- Design and build detailed computer simulations of healthcare organizations and health technology assessments
- Adapt information systems to improve management planning and control

A sampling of career opportunities include:

Healthcare Management Engineer, Operational Excellence Project Manager, Systems Redesign Consultant, Lean Specialist, Process Improvement Consultant, Continuous Improvement Specialist and Healthcare Analyst.

The Healthcare Systems Engineering (HCSE) track requires 30 credit hours of courses beyond the bachelor's degree. This program offers only the nonthesis option.

For information about the program, please contact the HSE Director Dr. Vernet Lasrado (vernet.lasrado@ucf.edu).

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

An undergraduate course in probability and statistics

Is this program available 100% online?

Yes

UCF Online

Please note: Industrial Engineering (MSIE) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Industrial-Engineering-MSIE.pdf.

Program Description

The Department of Industrial Engineering and Management Systems offers a Master of Science in Industrial Engineering (MSIE) degree focusing on the design and improvement of systems, products, and processes. This degree is available to those applicants with a bachelor of science degree in Industrial Engineering (BSIE) or other Engineering degrees ONLY.

A total systems approach is used to optimize the various aspects of operations in both manufacturing and service industries. Industrial engineers use many analytical approaches to improve productivity, safety, and quality of working life while reducing operating costs. The MSIE curriculum builds on an undergraduate engineering degree to develop a stronger systems focus and analytical capability.

The industrial engineering graduate programs are structured to support the emergence of Central Florida as a national center of high technology as well as supporting the diverse service industries in the region and throughout the nation.

Many of the graduate courses offered by the department or required in the MSIE program are offered through the Florida Engineering Educational Delivery System (FEEDS), which provides video-streamed versions of classes over the Internet.

This program can be taken entirely through the Center for Online and Virtual Education (COVE), which provides video-streamed versions of classes over the Internet. More information about this program can be found at http://www.cecs.ucf.edu/COVE/ or (407) 823-3814.

The Industrial Engineering MSIE degree requires an undergraduate degree in Industrial Engineering or any other Engineering degree. Students with undergraduate degrees outside of industrial engineering may be required to take additional prerequisites. The program offers both thesis and nonthesis options with each requiring 30 credit hours of courses. At least half of the regular coursework must be at the 6000 level. A cumulative grade-point average of B must be maintained in the entire program of study.

Thesis Option: The thesis option requires 12 credit hours of required courses, 12 credit hours of electives and 6 thesis credit hours. Students must also write and successfully defend a thesis.

Nonthesis Option: The nonthesis option requires 12 credit hours of required courses and 18 credit hours of electives. Research studies are required in one or more courses. The research study and report will focus on reviewing and analyzing contemporary research in the profession in order to help students acquire knowledge and skills pertaining to research-based best practices. In addition, students may engage in directed independent studies, directed research or a research report during their studies. A program of study must be developed with the graduate program director and meet with departmental approval. At least one-half of the credit hours (including thesis hours) required in a master's program of study must be at the 6000 level or higher. Students on assistantships must take 9 credit hours per semester to satisfy the university's requirement for full-time status. Most students working full time take 6 credit hours per semester. At that rate, the program can be completed in 6 semesters or less. However, students with more time available and with an early start on a thesis, if applicable, can finish the program in 3 semesters.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Students with undergraduate degrees in industrial engineering or other engineering degrees are encouraged to apply for admission. Graduates from non-engineering curricula may apply to obtain the MS degree.

All applicants are expected to have completed the following prerequisites during their undergraduate engineering education:

- Computer programming capability. Proficiency with MS Office expected. C++, Visual BASIC, or Java recommended.
- Mathematics through Calculus II (MAC 2312 or equivalent)
- Undergraduate probability and statistics for engineers (STA 3032 or equivalent)

Degree Requirements

Required Courses
12 Total Credits

- Complete all of the following
  - Complete the following:
    - ESI6551 - Systems Engineering (3)
    - ESI6224 - Quality Management (3)
    - ESI6247 - Experimental Design and Taguchi Methods (3)
  - Complete at least 1 of the following:
    - ESI5306 - Operations Research (3)
    - ESI6418 - Linear Programming and Extensions (3)

Elective Courses
12 Total Credits

- All students, both thesis and nonthesis, must take 12 credit hours of electives after consultation with their adviser. The program requirements are flexible enough to allow the students to tailor the coursework according to their desired educational and career goals. With the approval of their adviser and/or the graduate program director, students may select from the following groups of courses to satisfy the needs of their research goals or career objectives. To assist the students in achieving these goals and objectives, courses are grouped below to suggest focus areas, only as a guide to assist in advising and course selection. They are not intended to restrict elective choices among specialization areas as the intent of the program is to help graduate students maintain an integrated approach to their studies. The listing of these courses does not guarantee that they will be offered by the department in a particular year or semester. In addition to the courses listed below, students may be allowed to take courses from the following disciplines at UCF, with the approval of the graduate program director, as an elective in their graduate program of study: Other Engineering programs Computer Science Mathematics Statistics Business Administration or Management

Focus Areas
12 Total Credits

- Complete 1 of the following
  Human System Engineering/Ergonomics
  - Earn at least 12 credits from the following:
    - EIN5248 - Ergonomics (3)
    - EIN5251 - Usability Engineering (3)
    - EIN6258 - Human Computer Interaction (3)
    - EIN6271 - Human Reliability (3)

  Quality and Production Systems
  - Earn at least 12 credits from the following:
    - ESI6225 - Quality Design and Control (3)
    - EIN6336 - Production and Inventory Control (3)

- EIN5356 - Cost Engineering (3)
- ESI5227 - Total Quality Improvement (3)

Management Systems

- Earn at least 12 credits from the following:
  - EIN6182 - Engineering Management (3)
  - EIN5117 - Management Information Systems I (3)
  - EIN6370 - Innovation in Engineering Design (3)
  - EIN6339 - Operations Engineering (3)
  - EIN5108 - The Environment of Technical Organizations (3)

Simulation, Optimization and Modeling

- Earn at least 12 credits from the following:
  - ESI6336 - Queueing Systems (3)
  - ESI6532 - Object-Oriented Simulation (3)
  - ESI5531 - Discrete Systems Simulation (3)
  - EIN5255C - Interactive Simulation (3)
  - EIN6528 - Simulation Based Life Cycle Engineering (3)
  - EIN6936 - Seminar in Advanced Industrial Engineering (3)
  - ESI6217 - Statistical Aspects of Digital Simulation (3)

Systems Engineering

- Earn at least 12 credits from the following:
  - ESI6358 - Decision Analysis (3)
  - ESI5359 - Risk Assessment and Management (3)
  - EIN6215 - System Safety Engineering and Management (3)
  - ESI5236 - Reliability Engineering (3)
  - EIN5346 - Engineering Logistics (3)
  - ESI6891 - IEMS Research Methods (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following

  Thesis Option

  - Earn at least 6 credits from the following types of courses:
    EIN 6971 Thesis The thesis option requires an additional 6 credit hours of thesis. Thesis students must complete an independent research project and write and successfully defend a thesis describing the project. Students may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the program of study and the proposed thesis topic. The College of Engineering and Computer Science requires that all thesis defense announcements are approved by the student's adviser and posted on the college's website (http://www.cecs.ucf.edu/graddefense/) and on the College of Graduate Studies Events Calendar at least two weeks before the defense date.

  Nonthesis Option

  - Complete all of the following
    - Complete the following:
      - EIN6950 - Industrial and Systems Engineering Capstone (3)
    - Earn at least 3 credits from the following types of courses:
      Additional Elective Course. The nonthesis option requires a capstone course and an additional unrestricted elective course that supports the student's area of research and study interests. The capstone course should be completed toward the end of the student's graduate plan of study. As part of the requirements of this courses, students will complete an independent capstone project on a topic relevant to the industrial and systems engineering field and approved by the instructor. Students are expected to use and leverage knowledge obtained in the program to complete the project. This course serves as the culminating experience for students and shows their engagement in independent learning.

Grand Total Credits: **30**

Program Details

Equipment Fee

Full-time students in the Industrial Engineering MSIE program pay a $58 equipment fee each semester that they are enrolled. Part-time students pay $29 each semester that they are enrolled.

Independent Learning

A research project serves as the independent learning experience for thesis students. Nonthesis students are required to complete the department's capstone course toward the end of their program.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Track Description

The accelerated undergraduate/graduate program in Industrial Engineering allows highly qualified undergraduate majors in Industrial Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate program. Participation will enable completion of the Bachelor of Science and Master of Science degrees in Industrial Engineering in five instead of six years for students enrolled in full-time course work.

Industrial Engineering focuses on the design and improvement of systems, products, and processes. A total systems approach is used to optimize the various aspects of operations in both manufacturing and service industries. Industrial engineers use many analytical approaches to improve productivity, safety, and quality of working life while reducing operating costs.

The Industrial Engineering graduate programs are structured to support the emergence of Central Florida as a national center of high technology as well as supporting the diverse service industries in the region and throughout the nation.

Additional information can be found at www.iems.ucf.edu.

Track Prerequisites

A bachelor's degree in Industrial Engineering from UCF.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Industrial-Engineering-PhD.pdf.

Program Description

The Industrial Engineering PhD program prepares students for extensive research and careers in academia, industry and government while providing a broad knowledge of industrial engineering.

The Doctor of Philosophy in Industrial Engineering is intended for a student with a bachelor's or master's degree in Industrial Engineering or a closely related discipline.

The PhD program is designed to produce highly skilled researchers with both broad knowledge of industrial engineering and in-depth knowledge of specialty fields for careers in academia, industry, and government. The program allows a candidate to thoroughly study some aspect of industrial engineering through faculty expertise in research areas such as management systems, systems simulation and modeling, operations research, quality systems engineering, interactive simulation and training systems, systems engineering, and human systems engineering, human-computer interaction, and ergonomics.

The Industrial Engineering program is structured to support the emergence of Central Florida as a national center of high technology as well as supporting the diverse service industries in the region and throughout the nation.

In the Industrial Engineering PhD program, students may be able to individually craft their programs of study and select their courses to focus in one or more of the following research areas for their dissertations:

Human Systems Engineering/Ergonomics:

As technology has become more sophisticated, the need to design for the human user has become more difficult, yet even more important. Human engineering and ergonomics assist in ensuring that as technology advances, the abilities, limitations, and needs of humans are considered in the system design. This not only supports the needs of the user, it also optimizes the efficiency and usability of the system designed. Traditionally, ergonomics has been associated with biomechanical issues and work measurement and performance issues in physical system design, as well as occupational and industrial safety. The broader focus of human engineering encompasses those issues as well as incorporating the reaction and effectiveness of human interaction with systems, both physical systems and virtual systems such as computer-based models.

Research in the Human Systems Engineering and Ergonomics area provides students with the necessary knowledge in human

engineering and ergonomics to effectively design tasks, industrial systems, and work environments that maximize human performance, safety, and overall productivity.

Management Systems/Engineering management:

The Management Systems/Engineering Management research focuses on providing the knowledge for improving organizational systems. Engineering Management focuses on effective decision-making and successful project delivery in engineering and technological organizations. With technological advancements comes a new level of organizational complexity. As a result, new knowledge is needed to help the technical organization understand how to improve. The Management Systems/Engineering Management studies and research in the Industrial Engineering program are intended for individuals of all engineering disciplines. Research and coursework focus on a systems view of engineering problems related to the management of complex industrial, military, government, and social systems.

Operations Research:

The Operations Research courses in the Industrial Engineering MS program uses mathematics and computer-based systems to model operational processes and decisions in order to develop and evaluate alternatives that will lead to gains in efficiency and effectiveness. Drawing on probability, statistics, simulation, optimization, and stochastic processes, Operations Research provides many of the analytic tools used by industrial engineers as well as by other analysts to improve processes, decision-making, and management by individuals and organizations. Research in this area is ideal for students who have an undergraduate degree in engineering, mathematics, or science. The knowledge in these courses build on an undergraduate Engineering, Mathematics, or Science degree to develop a strong modeling and analytical capability to improve processes and decision-making.

Quality Systems Engineering:

The Quality Systems Engineering research in the Industrial Engineering MS program focuses on providing the knowledge for improving product and process quality in manufacturing and service industries. Quality Systems Engineering provides both the quantitative tools for measuring quality and the managerial focus and organizational insight required to implement effective continuous improvement programs and incorporate the voice of the customer. The Quality Systems Engineering courses builds on an undergraduate degree in industrial engineering or a closely related discipline to provide the necessary knowledge to plan, control, and improve the product assurance function in government, military, service, or manufacturing organizations.

Simulation Modeling and Analysis:

The Simulation Modeling and Analysis research and studies in the Industrial Engineering MS program focus on providing a fundamental understanding of the functional and technical design requirements for simulation in manufacturing and service industries. Research in this area is based on a systems modeling paradigm and provides coding and development capability in the context of a broader systems framework. Significant exposure to design and analysis aspects is a core element of the track. The Simulation Modeling and Analysis research and coursework prepare individuals with an undergraduate degree in Engineering, Science, Mathematics, or a closely related discipline for careers in simulation, focusing particularly on using simulation as an analysis and design tool for the manufacturing and service industries.

Systems Engineering:

Intelligence is being infused into everyday systems, processes and infrastructure that enable physical goods to be developed, manufactured, bought and sold. These same systems also facilitate the movement and delivery of global products and services that support worldwide markets such as finance, energy resources, and healthcare systems.

With these technological advancements, comes a new level of complexity as organizations struggle to integrate systems, processes and data feeds. As a result, the demand for systems engineering and related skills is expected to grow significantly.

Systems engineers design and implement computer systems, software, and networks, including defining complex system requirements, and determining system specifications, processes and working parameters.

The Systems Engineering studies and research in the Industrial Engineering MS program are intended for individuals of all engineering disciplines. Research and coursework focus on a systems view of engineering problems related to the management of complex industrial, military, government, and social systems.

Interactive Simulation and Training Systems:

The Interactive Simulation and Training Systems research within the Industrial Engineering MS program focuses on providing a fundamental understanding of significant topics relative to simulation systems and the requirements, design, development, and use of such systems for knowledge transfer in the technical environment. Courses in this area address the evolving and multiple discipline application of interactive simulation by providing a wealth of electives to support development of individual student interests and talents. In conjunction with UCF's Institute for Simulation and Training, industrial organizations involved in simulation in the Central Florida region, military organizations, and other governmental organizations, ISTS research in the MS program provides exposure to both military and commercial interactive simulation and training systems.

The emphasis is on the application and development of interactive simulation and training systems to meet various requirements including, but not limited to: simulators, skill trainers, organizational learning systems, computer and web-based interactive simulation systems and other novel interactive simulation efforts. Courses in the interactive simulation and training systems area prepare individuals with an undergraduate degree in engineering, science, education, psychology, mathematics or other related disciplines for careers in simulation, focusing particularly on the interactive simulation and training systems industries.

The Industrial Engineering PhD program requires a minimum of 72 credit hours beyond the bachelor's degree. If a student holds a master's degree, the student must complete at least 27 credit hours of required coursework, in addition to 15 credit hours of dissertation.

Of the total coursework taken, 27 hours must be formal course work exclusive of independent study and 15 credit hours must consist of dissertation research (EIN 7980). All remaining hours are determined with a faculty adviser and approved by the department. Details about this program are located in the Industrial Engineering PhD Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Bachelor's and Master's degree in Industrial Engineering or a closely related discipline.

Degree Requirements

Required Courses
6 Total Credits

- Complete the following:
    - ESI6891 - IEMS Research Methods (3)
    - ESI6247 - Experimental Design and Taguchi Methods (3)

Elective Courses
51 Total Credits

- Complete all of the following
    - - At least seventeen unrestricted electives - A maximum of 30 semester credit hours from an earned master's degree may be applied toward these requirements. Waived credits are evaluated on a course-by-course basis. - A maximum of 12 hours of Independent Study and/or Doctoral research is allowed in the Ph.D. program of study. Students, with the approval of their advisers and/or the graduate program director, may select from the following groups of courses to satisfy the needs of their research goals or career objectives. To assist students in achieving their goals and objectives, courses are grouped below to suggest focus areas, only as guides for advising and course selection. The listing of these courses does not guarantee that they will be offered by the department in a particular year or semester. In addition to the courses listed below, students may be allowed to take courses from the following disciplines, with the approval of the graduate program director, as an elective in their graduate plan of study. Other Engineering Programs Computer Science Mathematics and Statistics Business Administration/Management
    - Earn at least 51 credits from the following:
        - EIN5248 - Ergonomics (3)
        - EIN5251 - Usability Engineering (3)
        - EIN6258 - Human Computer Interaction (3)
        - EIN6271 - Human Reliability (3)
        - ESI6225 - Quality Design and Control (3)
        - ESI6224 - Quality Management (3)
        - EIN6336 - Production and Inventory Control (3)
        - EIN6336 - Production and Inventory Control (3)
        - ESI5227 - Total Quality Improvement (3)
        - EIN6182 - Engineering Management (3)
        - EIN5117 - Management Information Systems I (3)
        - EIN6370 - Innovation in Engineering Design (3)
        - EIN6339 - Operations Engineering (3)
        - EIN5108 - The Environment of Technical Organizations (3)
        - ESI6336 - Queueing Systems (3)
        - ESI5306 - Operations Research (3)
        - ESI6418 - Linear Programming and Extensions (3)
        - ESI6532 - Object-Oriented Simulation (3)
        - ESI5531 - Discrete Systems Simulation (3)
        - EIN5255C - Interactive Simulation (3)
        - EIN6528 - Simulation Based Life Cycle Engineering (3)

- EIN6936 - Seminar in Advanced Industrial Engineering (3)
- ESI6217 - Statistical Aspects of Digital Simulation (3)
- ESI6358 - Decision Analysis (3)
- ESI5359 - Risk Assessment and Management (3)
- EIN6215 - System Safety Engineering and Management (3)
- ESI5236 - Reliability Engineering (3)
- EIN5346 - Engineering Logistics (3)

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  EIN 7980 Dissertation

Examinations
0 Total Credits

- At Qualifying Examination (QE) time students should know their intended direction of research but they do not necessarily know their specific topic/problem. The QE's objective is to determine whether the student's knowledge allows for a thorough understanding of methods and techniques discussed in the literature in his/her area(s) of interest. The IEMS PhD Qualifying Examination is a take-home exam designed to test the student's knowledge of fundamentals within the discipline and to assess the student's ability to conduct independent research and to think analytically, creatively, and independently. Exam questions address the student's global research awareness as well as his/her analytical thinking, research potential, and communication skills. The student must be able to understand the field's literature, as well as to summarize and discuss research findings. It is strongly recommended that students take ESI 6891 IEMS Research Methods prior to taking the Qualifying Examination. While thinking about taking the Qualifying Examination, students are strongly encouraged to evaluate their options for research and make informed decisions about their area of research interests. It is recommended that students seek advice from faculty members whose research interests match their own research areas in order for the students to properly select their electives and develop the appropriate plan of study. In addition to the Qualifying Examination, the student must pass a Candidacy Examination and a Dissertation Defense Examination. Details about these examinations and other requirements are located in the Industrial Engineering PhD Handbook. The Candidacy Examination may be taken any time after successful completion of the Qualifying Examination, but not in the same semester. The objective of the Candidacy Examination is to determine if the student has the breadth and depth of knowledge required to conduct independent research in the proposed area. The Candidacy Examination includes an oral presentation of a detailed dissertation proposal, which becomes the oral candidacy document, and the written component of the Candidacy Examination is satisfied by the proposal document, which becomes the required candidacy document. The Dissertation Defense Examination is an oral examination taken in defense of the written dissertation. The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website and on the Events Calendar of the College of Graduate Studies website at least two weeks before the defense date.

Dissertation Committee Requirement
0 Total Credits

- The doctoral committee must consist of a minimum of four members: at least three must be graduate faculty members from within the student's department, and one must be at large, from graduate faculty scholars outside the Industrial Engineering faculty. The committee chair must be a member of the graduate faculty who is approved to direct dissertations. Faculty members with joint appointments in IEMS may serve as department-faculty committee members. Adjunct faculty and off-campus experts who are graduate faculty scholars may serve as the outside-the-department person on the committee, as well as serve as co-chairs of the committee with the approval of the department Chair. The College of Graduate Studies reserves the right to review appointments to advisory committees, place a representative on any advisory committee, or appoint a co-adviser. Joint faculty members may serve as committee chairs. Off-campus experts and adjunct faculty who are graduate faculty scholars may not serve as committee chairs, but may serve as co-chairs. All committee members vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal or final dissertation must be approved by the advisory committee with no more than one dissenting vote.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours. Evidence of successful completion of these requirements must be received by the College of Graduate Studies one day prior to the start of classes for the semester in which a student wishes to enroll in dissertation hours. - Completion or near completion of course work, except for dissertation hours. - Successful completion of the candidacy examination, including successful defense of the written dissertation proposal. - The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. - Submittal of an approved program of study.

Grand Total Credits: **72**

Program Details

As a pre-doctoral student at the beginning of the PhD program, a preliminary plan of study must be developed with the graduate program director and meet with departmental approval. At this time transfer credit will be evaluated on a course-by-course basis. The student's plan of study itemizing the study plan must be approved prior to the end of the first semester of studies by the Graduate Director of the IEMS department.

After completion of the Qualifying Examination and admission as a doctoral student, the official plan of study is developed that must meet with departmental approval. The student's dissertation committee approves the final plan of study after the Candidacy Examination is passed. These steps are normally completed within the first year of study beyond the master's degree. The degree must be completed within seven years from the date of admission as a pre-doctoral student and within four years of passing the Candidacy Examination.

The Department of Industrial Engineering and Management Systems monitors student progress and may dismiss a student if performance standards or academic progress are not maintained. Satisfactory academic performance in a program includes, but is not limited to, maintaining at least a 3.0 GPA in all graduate work taken as part of (or transferred into) the plan of study. Satisfactory performance also involves maintaining the standards of academic progress and professional integrity expected in our discipline. Failure to maintain these standards may result in dismissal from the program.

Equipment Fee

Students in the Industrial Engineering PhD program pay a $58 equipment fee each semester that they are enrolled. For part-time students, the equipment fee is $29 per semester.

Independent Learning

The Independent Learning requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Is this program available 100% online?

Yes

UCF Online

Please note: Materials Science and Engineering (MSMSE) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Materials-Science-Engineering-MS.pdf.

Program Description

The Master of Science in Materials Science and Engineering program is primarily for students with bachelor's degrees in Materials Science and Engineering or a closely related discipline.

Fields of emphasis and research for materials science and engineering include crystal growth, high temperature materials and coatings, multicomponent interdiffusion, material stability and degradation, shape memory alloys, mechanical behavior, magnetic and optical and electronic materials, thin films, solar cells, sensors, ceramics, powder metallurgy, non-equilibrium processing of materials, nano synthesis and consolidation, nanomaterials including quantum dots nanowires and nanocomposites, biomaterials, and electrochemically active materials.

This degree has 1 track: Accelerated BS to MSMBE Track. Please scroll to the bottom of this page for further details on this Track.

The Materials Science and Engineering MSMSE program offers both thesis and nonthesis options with each requiring a minimum of 30 credit hours beyond the bachelor's degree. In general, the program includes 12-15 credit hours of required courses with the remaining courses being electives except for at least six credit hours of thesis work for students in the thesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

A bachelor's degree in Materials Science and Engineering or a closely related discipline.

Prerequisites (or equivalent)

- Mathematics through Differential Equations (MAP 2302)
- Structure and Properties of Materials (EGN 3365)
- Mechanics of Materials (EGN 3331) or Thermodynamics (EGN 3343)
- Experimental Techniques in Mechanics and Materials (EMA 3012C)

Degree Requirements

Required Courses
15 Total Credits

- Complete all of the following
  - All students must take five required courses unless they hold a materials engineering undergraduate degree, in which case they may substitute an additional elective for EMA 5104.
  - Complete the following:
    - EMA5104 - Intermediate Structure and Properties of Materials (3)
    - EMA5106 - Metallurgical Thermodynamics (3)
    - EMA5317 - Materials Kinetics (3)

  Choose 1 Group
  - Complete 1 of the following
    - Complete the following:
      - EMA6126 - Physical Metallurgy (3)
      - EMA6626 - Mechanical Behavior of Materials (3)
    - Complete the following:
      - EMA5060 - Polymer Science and Engineering (3)
      - EMA6319 - Colloids and Interface Engineering (3)

Elective Courses
9 Total Credits

- Complete all of the following
  - All students, both thesis and nonthesis, must take at least 9 credit hours of electives. Additional electives are listed below. Courses should be selected with faculty adviser approval. Elective course offering from outside EMA/EML are indicated by other course prefixes below:
  - Earn at least 9 credits from the following:
    - EMA5108 - Surface Science (3)
    - EMA5140 - Introduction to Ceramic Materials (3)
    - EMA5504 - Modern Characterization of Materials (3)
    - EMA6130 - Advanced Phase Transformations in Materials (3)
    - EMA6136 - Diffusion in Solids (3)
    - EMA5585 - Materials Science of Thin Films (3)
    - EMA6516 - X-ray Diffraction and Crystallography (3)
    - EMA5586 - Photovoltaic Solar Energy Materials (3)
    - EMA5584 - Biomaterials (3)
    - EMA6149 - Imperfections in Crystals (3)
    - EMA5505 - Scanning Electron Microscopy (3)
    - EMA5060 - Polymer Science and Engineering (3)
    - EMA6518 - Transmission Electron Microscopy (3)
    - EMA5705 - High Temperature Materials (3)
    - EMA6605 - Materials Processing Techniques (3)
    - EMA5610 - Laser Materials Processing (3)
    - EML6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
    - EMA6611 - Optoelectronics Materials Processing (3)
    - CHM5450 - Polymer Chemistry (3)
    - CHM5451C - Techniques in Polymer Science (3)
    - CHM6711 - Chemistry of Materials (3)
    - EEE5332C - Thin Film Technology (3)
    - EEE5352 - Semiconductor Material and Device Characterization (3)
    - EEE6326C - MEMS Fabrication Laboratory (3)
    - EML5290 - Introduction to MEMS and Micromachining (3)
    - EML5291 - MEMS Materials (3)
    - OSE5312 - Light Matter Interaction (3)
    - PHZ5405 - Condensed Matter Physics (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following

  Thesis Option
  - Earn at least 6 credits from the following types of courses:
    EMA 6971 Thesis Thesis students must complete an independent research project, and write and successfully defend their thesis that describes the project. The College of Engineering and Computer Science requires that all thesis defense announcements be approved by the student's adviser and posted on the college's website and on the Events Calendar at the College of Graduate Studies website at least two weeks before the defense date.

  Nonthesis Option
  - Complete all of the following
    - Nonthesis students are required to demonstrate their ability to perform independently in research conditions by completing either EML 6085 - Research Methods in Mechanical and Aerospace Engineering or EMA/EML 6918. In addition, they must take another elective beyond the 9 credit hours of electives described above.

- Earn at least 3 credits from the following:
  - EML6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
  - EMA6918 - Research (1 - 99)
- Earn at least 3 credits from the following types of courses:
  Additional Elective Course from list above.

Grand Total Credits: **30**

Program Details

The thesis option is primarily for those students who can devote a full-time effort to completing an independent research project that leads to a thesis. A student pursuing the thesis option may not register for thesis credit hours until an advisory committee has been appointed and the committee has reviewed the program of study and the proposed thesis topic.

The nonthesis option is primarily designed for part-time and online students and requires 30 credit hours of coursework. In addition, students pursuing the nonthesis option are required to take EML 6085 - Research Methods in Mechanical and Aerospace Engineering or EMA 6918 Directed Research as part of their 30-credit-hour course requirement to demonstrate their ability to perform independently in research conditions. See the MSE program director for specific details.

All students are expected to identify an adviser and file an official degree program of study prior to the completion of 9 credit hours of study. All programs of study must consist of at least 24 credit hours of required and elective courses, exclusive of thesis and research. At least half of the credit hours in a program of study must be at the 6000 level. The appropriate program of study form can be found at the program website listed above and students should consult with the MSE program director for assistance in filling out the program of study form and approval. Substitutions to the program of study must meet with the approval of the adviser and the MSE program director.

A student with an undergraduate degree outside of the materials science and engineering discipline is required to satisfy an articulation program and may have to take additional prerequisite courses.

Equipment Fee

Students in the Materials Science and Engineering MSMSE program pay $17 per semester for equipment each semester that they are enrolled. Part-time students pay $8.50 per semester.

Independent Learning

The Independent Learning Requirement is met by successful completion of a master's thesis or EML 6085 - Research Methods in Mechanical and Aerospace Engineering or EMA 6918 Directed Research for nonthesis students.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Track Description

The accelerated undergraduate/graduate program in Materials Science and Engineering allows highly qualified UCF undergraduate majors in Mechanical Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program. Participation will enable completion of the Bachelor of Science and Master of Science degrees in five instead of six years for students enrolled in full-time course work.

The BSME is awarded after completing university requirements for the degree, including 128 total credit hours and completing of 71 credit hours of engineering courses. The MSMSE is awarded upon completion of the master's program. Courses designated in General Education Program and Common Program Prerequisites are usually completed in the first 60 hours (see engineering major requirements in the Undergraduate Catalog).

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A bachelor's degree in Materials Science and Engineering from UCF.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Materials-Science-Engineering-PhD.pdf.

Program Description

The Materials Science and Engineering PhD program provides students with a fundamental and applied research-based education suitable for seeking employment in industry or academia.

The Materials Science and Engineering PhD program is designed for students with a master's degree in materials science and engineering or closely related disciplines. The program provides students with a fundamental and applied research-based education suitable for seeking employment in industry or academia.

The Materials Science and Engineering PhD program requires a minimum of 72 credit hours beyond the bachelor's degree. The program requires 27 hours of formal course work exclusive of independent study and a minimum of 15 hours of dissertation research (EMA 7980). A minimum of 12 credit hours of elective coursework is required to be taken at UCF. Details of program requirements are located in the Materials Science and Engineering PhD Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Master's and/or bachelor's degree in Materials Science and Engineering or a closely related discipline.

Degree Requirements

Elective Courses
57 Total Credits

- Complete all of the following
  - The following core courses are used as the basis for the doctoral qualifying exam and are recommended, but not required: - EMA 5104 - Intermediate Structure and Properties of Materials 3 Credit Hours - EMA 5106 - Metallurgical Thermodynamics 3 Credit Hours - EMA 5317 - Materials Kinetics 3 Credit Hours - EMA 6126 - Physical Metallurgy 3 Credit Hours or EMA 6319 - Colloids and Interface Engineering 3 Credit Hours Elective courses that are commonly taught in Materials Science and Engineering being with the prefix EMA and EML. Other courses may be included in the elective hours with the approval of the student's faculty adviser and the Materials Science and Engineering graduate program director (indicated with another other prefix besides EMA/EML)
  - Earn at least 57 credits from the following:
    - EMA5104 - Intermediate Structure and Properties of Materials (3)

- EMA5106 - Metallurgical Thermodynamics (3)
- EMA5317 - Materials Kinetics (3)
- EMA6626 - Mechanical Behavior of Materials (3)
- EMA5108 - Surface Science (3)
- EMA5140 - Introduction to Ceramic Materials (3)
- EMA6130 - Advanced Phase Transformations in Materials (3)
- EMA6136 - Diffusion in Solids (3)
- EMA5585 - Materials Science of Thin Films (3)
- EMA6516 - X-ray Diffraction and Crystallography (3)
- EMA5584 - Biomaterials (3)
- EMA5060 - Polymer Science and Engineering (3)
- EMA6518 - Transmission Electron Microscopy (3)
- EMA5705 - High Temperature Materials (3)
- EMA5610 - Laser Materials Processing (3)
- EML6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
- EMA6149 - Imperfections in Crystals (3)
- CHM5450 - Polymer Chemistry (3)
- CHM6711 - Chemistry of Materials (3)
- EEE5332C - Thin Film Technology (3)
- EEE5352 - Semiconductor Material and Device Characterization (3)
- EEE6326C - MEMS Fabrication Laboratory (3)
- EML5290 - Introduction to MEMS and Micromachining (3)
- EML5291 - MEMS Materials (3)
- OSE5312 - Light Matter Interaction (3)
- PHZ5405 - Condensed Matter Physics (3)

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  EMA 7980 The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's adviser and posted on the college's website, www.cecs.ucf.edu/graddefense and on the Events Calendar of the College of Graduate Studies website at least two weeks before the defense date.

Examinations
0 Total Credits

- The doctoral qualifying exam is a multi-part exam. The initial written assessment will be conducted during the fall term. The following spring term a second written assessment as well as oral assessment will be conducted. Upon successful completion of the doctoral qualifying exam process, a student is qualified to continue studying in the PhD program. For more information about the qualifying exam please visit, http://mse.ucf.edu/graduate-program/. The candidacy exam should be taken in the academic semester the student completes 57 credit hours of required course work and is scheduled by mutual agreement of the student and his/her dissertation committee. The student must prepare a written description of their proposed dissertation research prior to the examination, and present that to their dissertation committee to review prior to the candidacy examination. Additionally, the student may be questioned orally during the exam by the dissertation committee on topics relevant to the proposed dissertation research.

Admission to Candidacy
0 Total Credits

- The following items are required to be admitted to candidacy and enroll in dissertation hours (enrollment in dissertation hours begins the semester following the completion of these requirements). Evidence of meeting these requirements must be received by the College of Graduate Studies by the day before the first day of classes for the semester in which a student wishes to enroll in dissertation hours. - Completion of 51 credit hours of course work, except for dissertation hours. - Successful completion of the qualifying examination. - Successful completion of the candidacy examination. - Successful defense of the written dissertation proposal. - The dissertation advisory committee is formed, consisting of approved Graduate Faculty and Graduate Faculty Scholars. - Submission of an approved program of study

Dissertation Defense
0 Total Credits

- All dissertations in Materials Science and Engineering must represent high-quality scientific work. Prior to scheduling the dissertation defense, the high quality of the research must be evidenced by: (1) two refereed journal publications with the doctoral candidate as first author that are in print, or formally accepted for publication, or (2) satisfaction of an alternative publication requirement as recommended by the Dissertation Advisory Committee and approved by a majority vote at a meeting of the program faculty (those having primary or secondary appointments in the MSE Department). The dissertation proposal must be successfully defended and accepted by the Dissertation Committee in a meeting convened for that purpose. The dissertation proposal must be a complete dissertation document provided to the committee at least two weeks prior to the date of defense. In addition, the high quality of the research must be evidenced by two refereed journal publications of the doctoral candidate as first author that are in print, or formally accepted for publication, prior to the dissertation defense. All members of the Dissertation Committee vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal and final dissertation must be approved by a majority of the advisory committee.

Grand Total Credits: **72**

Program Details

Students entering the Materials Science and Engineering PhD program with a bachelor's degree are required to complete 72 credit hours of graduate coursework, of which 27 hours must be formal coursework, 12 credit hours must be elective courses taken at UCF and a minimum of 15 dissertation credit hours.

Students entering the Materials Science and Engineering PhD program with a master's degree are required to complete 72 credit hours of graduate coursework including up to 30 hours of credit transfer for formal courses from their master's degree. These students have to take at least 12 credit hours of formal elective courses as listed below at UCF and 27 credit hours of formal graduate coursework in total.

The rest of the hours in the PhD program can be chosen by the student in consultation with the adviser and the dissertation committee and with the approval of the program director.

Equipment Fee

Full-time students in the Materials Science and Engineering PhD program pay $17 per semester for equipment each semester that they are enrolled. Part-time students pay $8.50 per semester.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance

Is this program available 100% online?

Yes

UCF Online

Please Note: Mechanical Engineering MSME may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Program Description

The Master of Science degree in Mechanical Engineering is primarily intended for students with a bachelor's degree in Mechanical or Aerospace engineering or a closely related discipline obtained from a recognized accredited institution. The program offers Mechanical Systems, Thermofluids, Guidance Control and Dynamics, and Accelerated BS to MS tracks. Please scroll to the bottom of this page for further details on these Tracks. Each track requires 30 credit hours of courses, of which 24 credit hours must be formal course work, exclusive of thesis and research.

Track Description

The Accelerated Undergraduate/Graduate program in Mechanical Engineering allows highly qualified undergraduate majors in Mechanical Engineering to begin taking graduate-level courses that will count toward their master's degree while completing their baccalaureate degree program. Participation will enable completion of the Bachelor of Science and Master of Science degrees in five instead of six years for students enrolled in full-time course work.

The BSME is awarded after completing all university requirements, including 128 total credit hours and 71 credit hours of engineering courses. The MSME is awarded upon completion of the master's program. Courses designated in General Education Program and Common Program Prerequisites are usually completed in the first 60 hours (see engineering major requirements in the Undergraduate Catalog).

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

This track is available to University of Central Florida undergraduate majors in Mechanical Engineering only.

Degree Requirements

Undergraduate Requirements
0 Total Credits

- Please see the current edition of the Undergraduate Catalog for additional information about this program.

Required/Track Courses
24 Total Credits

- Complete 1 of the following
  - Up to 12 credit hours of approved graduate level courses of grades "B" (3.0) or better may be counted towards the BS and MS degrees. Additional notes on the Accelerated Undergraduate and Graduate Program in Mechanical Engineering are as follows: Students who change degree programs and select this major must adopt the most current catalog. Students must earn at least a "B" (3.0) in each undergraduate and graduate engineering course for them to be counted toward the major. Accelerated Mechanical Engineering students must declare their interest in either the Mechanical Systems Track or the Thermofluids Track by completing a Program of Study with their adviser.
    Mechanical Systems Track
  - Complete all of the following
    - Complete the following:
      - EML5060 - Mathematical Methods in Mechanical and Aerospace Engineering (3)
      - EML5237 - Intermediate Mechanics of Materials (3)
      - EML5271 - Intermediate Dynamics (3)
      - EML6211 - Continuum Mechanics (3)
    - Earn at least 12 credits from the following types of courses:
      Elective Coursework as listed on the Mechanical Systems Track Catalog Page

    Thermofluids Track
  - Complete all of the following
    - Complete the following:
      - EML5060 - Mathematical Methods in Mechanical and Aerospace Engineering (3)
      - EML5152 - Intermediate Heat Transfer (3)
      - EML5713 - Intermediate Fluid Mechanics (3)
      - EML6104 - Classical Thermodynamics (3)
    - Earn at least 12 credits from the following types of courses:
      Elective Coursework as listed on the Thermofluids Track Catalog Page

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  Thesis Option
  - Earn at least 6 credits from the following types of courses:
    EML 6971 Thesis Additionally, all student pursuing the thesis option must enroll in the following course: EML 5090 - Mechanical and Aerospace Seminar (0 credit hours) Students must register for the seminar course a minimum of two times during their graduate career in the master's program (thesis option). The students must also complete the course with a satisfactory (S) grade in both attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.
    Nonthesis Option
  - Complete all of the following
    - Earn at least 3 credits from the following:
      - EML6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
    - For students who work on a research topic with an MAE faculty, XXX 6918 Directed Research (3 credit hours) may be used to substitute EML6085 as the student's independent learning experience. In the case substitution XXX 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research.
    - Earn at least 3 credits from the following types of courses:
      Additional elective course as listed on the student's selected track catalog page

Grand Total Credits: **30**

Track Details

Equipment Fee

Students in the Mechanical Engineering MSME program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

Independent Learning

The Independent Learning requirement is met by successful completion of a master's thesis for the thesis option. The nonthesis option independent learning experience is provided by the required course, EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 credit hours). For students who work on a research topic with an MAE faculty, XXX 6918 Directed Research (3 credit hours) may be used to substitute EML 6085 as the student's independent learning experience. In the case substitution XXX 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research certifying independent learning.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Track Description

The Master of Science in Guidance, Control and Dynamics (MSME) is designed to prepare students for careers as engineers in the aerospace industry. The curriculum is developed with strong emphasis in courses related to guidance control and dynamics with applications in aerospace engineering.

The MSME is awarded upon completion of a minimum of 30 credit hours, including 9 credit hours of required courses, 15 credit hours of elective courses selected from an approved list of courses, and an additional 6 credit hours in either a thesis or nonthesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

Bachelor's degree in Mechanical Engineering or closely related discipline. A student with an undergraduate degree outside of the selected departmental discipline may also be required to satisfy an articulation program.

Prerequisites (or equivalent)

- MAP 2302 - Differential Equations
- EML 3034C - Modeling Methods in Mechanical and Aerospace Engineering
- EAS 4134 - High-Speed Aerodynamics
- EAS 4105 - Flight Mechanics
- EAS 4200 - Flight Structures

Required Courses
9 Total Credits

- Complete all of the following
  - Complete the following:
    - EML5271 - Intermediate Dynamics (3)
    - EEL5630 - Digital Control Systems (3)
  - Complete at least 1 of the following:
    - EEL5173 - Linear Systems Theory (3)
    - EML5311 - System Control (3)

Elective Courses
15 Total Credits

- Complete at least 5 of the following:
  - EAS6403C - Attitude Determination and Control (3)
  - EAS6415 - Guidance, Navigation and Control (3)
  - EEL6616 - Adaptive Control (3)
  - EEL6621 - Nonlinear Control Systems (3)
  - EML5152 - Intermediate Heat Transfer (3)
  - EML5713 - Intermediate Fluid Mechanics (3)
  - EML6211 - Continuum Mechanics (3)
  - EML6223 - Advanced Vibrational Systems (3)
  - EML5237 - Intermediate Mechanics of Materials (3)
  - EML6155 - Convection Heat Transfer (3)
  - EML6157 - Radiation Heat Transfer (3)
  - EAS6808 - Space Environment and Payload Instrumentation (3)
  - EEL5432 - Satellite Remote Sensing (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  Thesis Option
  - Earn at least 6 credits from the following types of courses:
    EML 6971 Thesis Additionally, all student pursuing the thesis option must enroll in the following course: EML 5090 - Mechanical and Aerospace Seminar (0 credit hours) Students must register for the seminar course a minimum of two times during their graduate career in the master's program (thesis option). In the case substitution XXX 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research.
    - Earn at least 3 credits from the following types of courses:
      Additional elective course

Grand Total Credits: **30**

Track Details

All students must identify an adviser and file an official degree program of study prior to the completion of 9 credit hours of study. The program of study must be approved by the department and therefore students should consult with the MSME Graduate Director for assistance in filling out their program of study. Substitutions to the program of study must meet with the approval of the adviser and the department.

Equipment Fee

Students in the Mechanical Engineering MSME program pay a $90 equipment fee each semester that they are enrolled.

Independent Learning

The independent learning requirement is met by successful completion of a master's thesis for the thesis option. The nonthesis option independent learning experience is provided by the required course, EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 credit hours). For students who work on a research topic with an MAE faculty, XXX 6918 Directed Research (3 credit hours) may be used to substitute EML6085 as the student's independent learning experience. If the substitution of XXX 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research certifying independent learning.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans.     - Complete all of the following
        - Earn at least 3 credits from the following:
            - EML6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
        - For students who work on a research topic with an MAE faculty, XXX 6918 Directed Research (3 credit hours) may be used to substitute EML6085 as the student's independent learning experience. In the case substitution XXX 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research.
        - Earn at least 3 credits from the following types of courses:
          Additional elective course.

Grand Total Credits: **30**

Track Details

All students must identify an adviser and file an official degree program of study prior to the completion of 9 credit hours of study. Students should consult with the MMAE Graduate Program Director for assistance in completing the program of study form. The program of study must have departmental approval and must include at least 24 credit hours of formal course work, exclusive of thesis and research. Furthermore, at least half of the credit hours must be from courses at the 6000 level. Substitutions to the program of study must meet with the approval of the adviser and the department. More information is available from the MMAE departmental website listed above.

Equipment Fee

Students in the Mechanical Engineering MSME program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

Independent Learning

The Independent Learning requirement is met by successful completion of a master's thesis for the thesis option. The independent learning experience in the nonthesis option is provided by the required course, EML 6085 - Research Methods in Mechanical and Aerospace Engineering (3 credit hours). For students who work on a research topic with an MAE faculty, XXX 6918 Directed Research (3 credit hours) may be used to substitute EML6085 as the student's independent learning experience. If the substitution of XXX 6918 is approved, a letter must be provided by the faculty member agreeing to supervise the directed research and certifying that the experience includes independent learning.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit **https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Mechanical-Engineering-MSME.pdf**.

Track Description

The Master of Science in Mechanical Engineering is primarily intended for students with a bachelor's degree in Mechanical or Aerospace engineering or a closely related discipline obtained from a recognized accredited institution.

The Thermofluids track in the MSME program requires 30 credit hours, including 12 credit hours of required courses, 12 credit hours of elective courses selected from a list of approved courses, and 6 credit hours in a thesis or nonthesis option.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A bachelor's degree in Mechanical or Aerospace Engineering, or a closely related discipline. A student with an undergraduate degree outside of the selected departmental discipline may be required to satisfy an articulation program and take additional prerequisites.

Prerequisites (or equivalent)

- Differential Equations (MAP 2302)
- Modeling Methods in Mechanical and Aerospace Engineering (EML 3034C)
- Thermodynamics of Mechanical Systems (EML 3101)
- Heat Transfer (EML 4142)
- Energy Systems Laboratory (EML 4306)

- Fluid Mechanics II (EML 4703) **or**
- Propulsion Systems (EAS 4300)

Degree Requirements

Required Courses
12 Total Credits

- Complete the following:
    - EML5060 - Mathematical Methods in Mechanical and Aerospace Engineering (3)
    - EML5152 - Intermediate Heat Transfer (3)
    - EML5713 - Intermediate Fluid Mechanics (3)
    - EML6104 - Classical Thermodynamics (3)

Elective Courses
12 Total Credits

- Complete at least 4 of the following:
    - EML5402 - Turbomachinery (3)
    - EML6155 - Convection Heat Transfer (3)
    - EML6157 - Radiation Heat Transfer (3)
    - EML6725 - Computational Fluid Dynamics and Heat Transfer I (3)
    - EML6131 - Combustion Phenomena (3)
    - EML6154 - Conduction Heat Transfer (3)
    - EAS6185 - Turbulent Flow (3)
    - EML6712 - Mechanics of Viscous Flow (3)
    - EAS6138 - Advanced Gas Dynamics (3)
    - EAS5302 - Direct Energy Conversion (3)
    - EAS5315 - Rocket Propulsion (3)
    - EML5026C - Computational Engineering Analysis (3)
    - EML5066 - Computational Methods in Mechanical and Aerospace Engineering (3)
    - EML5105 - Gas Kinetics and Statistical Thermodynamics (3)
    - EML6062 - Boundary Element Methods in Engineering (3)
    - EML6144 - Boiling and Condensation Heat Transfer (3)
    - EML6726 - Computational Fluid Dynamics and Heat Transfer II (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  Thesis Option
    - Earn at least 6 credits from the following types of courses:
      EML 6971 Thesis Additionally, all student pursuing the thesis option must enroll in the following course: EML 5090 - Mechanical and Aerospace Seminar (0 credit hours) Students must register for the seminar course a minimum of two times during their graduate career in the master's program (thesis option). The students must also complete the course with a satisfactory (S) grade in both attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.
      Nonthesis Option
    - Complete all of the following
        - Earn at least 3 credits from the following:
            - EML6085 - Research Methods in Mechanical and Aerospace Engineering (3 - 99)
        - For students who work on a research topic with an MAE faculty, XXX 6918 Directed Research (3 credit hours) may be used to substitute EML6085 as the student's independent learning experience. In the case substitution XXX 6918 is approved, a letter must be provided by the member of the faculty supervising the directed research.
        - Earn at least 3 credits from the following types of courses:
          Additional elective course.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Mechanical-Engineering-PhD.pdf.

Program Description

The Mechanical Engineering PhD program prepares students with an in-depth study and emphasis on research in Aerospace Systems, Mechanical Systems, or Thermofluids.

The Doctor of Philosophy degree in Mechanical Engineering is intended for students with a master's or a bachelor's degree in Mechanical or Aerospace engineering or a closely related discipline. The doctoral program is intended to allow students to study in-depth, with an emphasis on research in Aerospace Systems, Mechanical Systems, or Thermofluids.

The Mechanical Engineering PhD program requires a minimum of 72 credit hours beyond a bachelor's degree. This program requires 15 dissertation credit hours minimum and may include up to a total of 12 credit hours combined of directed (XXX 6918) or doctoral research (XXX 7919) and/or of independent study (6908) with an approved Program of Study. At least 39 hours of the program of study must consist of formal coursework, exclusive of directed research (XXX 6918), doctoral research (XXX 7919) and independent study (XXX 6908). The rest of the hours can be chosen by the student in consultation with the adviser and the dissertation committee and with the approval of the graduate program coordinator. Details about this program are located in the Mechanical Engineering PhD Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree42 Credit hours minimum beyond the master's degree.

Program Prerequisites

Bachelor's or Master's degree in Mechanical or Aerospace Engineering or a closely related discipline.

Degree Requirements

Seminar
0 Total Credits

- Complete all of the following
  - Earn at least 0 credits from the following:
    - EML5090 - Mechanical and Aerospace Seminar (99)
  - The MAE Graduate Seminar is a zero credit hour (S/U) course that is offered each fall and spring academic semesters. Prior to graduation, all MAE graduate students who are pursuing PhD dissertation required to register, participate, and receive a satisfactory (S) for four semesters of MAE Graduate seminar, with at least two of these taken prior to candidacy.

Elective Courses
57 Total Credits

- Earn at least 57 credits from the following types of courses:
  May include up to a total of 12 credit hours combined of Directed (XXX 6918) or Doctoral Research (XXX 7919) and/or of Independent Study (6908) At least 45 credit hours must be formal coursework, exclusive of independent study, doctoral research and/or directed research.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  EML 7980 15 Credit Hours minimum

Examinations
0 Total Credits

- In addition to the Qualifying Examination discussed above, the student must pass a Candidacy Examination and a Dissertation Defense Examination. The Candidacy Examination is taken near the end of the course work and consists of a written and oral presentation of a research proposal. The MMAE department requires that a PhD student submits his/her candidacy exam the academic semester immediately following his/her successfully passing the PhD Qualifying Exam. The Dissertation Defense Examination is an oral examination taken in defense of the written dissertation. The College of Engineering and Computer Science requires that all dissertation defense announcements are approved by the student's advisor and posted on the college's website and on the Events Calendar of the College of Graduate Studies website at least two weeks before the defense date. More information on these examinations and other requirements of the PhD program are contained in the Mechanical Engineering PhD Handbook.

Dissertation Committee
0 Total Credits

- The doctoral committee must consist of a minimum of five members: three must be graduate faculty members from within the student's department, and one must be at large from outside the Mechanical, Materials and Aerospace Engineering Department. The committee Chair must be a member of the graduate faculty approved to direct dissertations. Joint faculty members serve as department-faculty committee members as well as chairs of dissertation committees. Adjunct faculty and off-campus experts, if approved graduate faculty scholars, may serve as the outside-the-college person in the committee. Program areas may further specify additional committee membership. The UCF College of Graduate Studies reserves the right to review appointments to advisory committees, place a representative on any advisory committee, or appoint a co-adviser. All members vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal and final dissertation must be approved by a majority of the advisory committee.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours (enrollment in dissertation hours begins the semester following the completion of these requirements). Evidence of meeting these requirements must be received by the College of Graduate Studies by the day before the first day of classes for the semester in which a student wishes to enroll in dissertation hours. Completion of all course work, except for dissertation hours. Successful completion of the candidacy examination. Successful defense of the written dissertation proposal. The dissertation advisory committee is formed, consisting of approved Graduate Faculty and Graduate Faculty Scholars. Submission of an approved program of study.

Grand Total Credits: **72**

Program Details

Students entering the program with a master's degree are required to complete 42 credit hours minimum, of which 15 credit hours minimum must be formal coursework, exclusive of directed research (XXX 6918), doctoral research (XXX 7919), and independent study (XXX 6908), and 15 credit hours minimum of dissertation research (XXX 7980). No more than 12 credit hours combined of directed (XXX 6918) or doctoral research (XXX 7919) and/or independent study (XXX 6908) may be taken toward fulfilling the degree program of study coursework requirements.

Students entering the program with a bachelor's degree are required to complete 72 credit hours minimum, of which 39 credit hours minimum must be formal course work, exclusive of directed research (XXX 6918), doctoral research (XXX 7919), and independent study (XXX 6908), and 15 credit hours minimum of dissertation research (XXX 7980). No more than 12 credit hours combined of directed (XXX 6918) or doctoral research (XXX 7919) and/or independent study (XXX 6908) may be taken toward fulfilling the degree program of study coursework requirements.

The rest of the hours in the PhD program can be chosen by the student in consultation with the adviser and the dissertation committee and with the approval of the Graduate Coordinator. These credit hours may include doctoral directed research hours or doctoral dissertation hours.

Unless a completed (signed) program of study itemizing the study plan is approved prior to the end of the first semester of studies, the Graduate Director of the MMAE department may choose not to accept any part of the coursework (including independent studies and/or directed research) taken by the student on a program of study subsequently submitted by the student.

Admission to doctoral status requires that the student (1) pass a PhD Qualifying Examination, (2) establish a Doctoral Advisory Committee and (3) submit a departmentally approved Program of Study. These steps are normally completed within the first year of study beyond the master's degree.

Students must register for the seminar course a minimum of four times during their graduate career in the doctoral program. Students must complete the EML 5936 seminar course twice prior to taking the candidacy exam and twice after completing the candidacy exam. The students must also complete the course with a satisfactory (S) grade in all attempts. If the student does not complete the course with a satisfactory grade, the student will be asked to repeat the course to meet program requirements.

Equipment Fee

Students in the Mechanical Engineering PhD program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

MAE Department Graduate Seminar Requirement

The MAE Graduate seminar is a zero (0) credit hour (S/U) course that is offered each fall and spring academic semesters.**Prior to graduation**, all MAE graduate students who are pursuing a PhD dissertation are required to register, participate, and receive a satisfactory (S) for four (4) semesters of MAE Graduate seminar, with at least two of these taken prior to candidacy.

Independent Learning

The Independent Learning Requirement is met by successful completion of the student's candidacy and dissertation defense examinations.

Please note: Project Engineering Graduate Certificate may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Program Description

The Graduate Certificate in Project Engineering is designed to meet the needs of engineers moving into management and other leadership roles.

The certificate program compliments their technical backgrounds with the human aspects, organizational and financial issues, project considerations, and analytical tools for effective decision making.

For the Project Engineering certificate, students complete three required courses and one elective course, for a total of 12 credit hours.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Admission is open to those with a bachelor's degree in industrial engineering or a closely related discipline from an accredited institution recognized by UCF.

Program Description

The Graduate Certificate in Quality Assurance is designed to provide students with the knowledge and tools they need to help them understand how to increase process and product performance and to improve the quality and reliability of goods and services in any manufacturing, healthcare, and other service organizations.

Much of the resurgence of U.S. companies and service organizations in the global marketplace has been due to an increased emphasis on quality. Today's consumers are offered many alternatives to meet their needs, and they have consequently become very discriminating in their purchases. In addition, companies seek to be known as a quality organization, not merely the producer of quality products. The Graduate Certificate in Quality Assurance provides students with the knowledge they need to institute steps to make their organizations more competitive through an overall commitment to quality.

For the Quality Assurance certificate, students complete three required courses and one elective course, for a total of 12 credit hours.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Admission is open to those with a bachelor's degree in industrial engineering or a closely related discipline from an accredited institution recognized by UCF.

Program Description

In 2017, FUTURe CITy initiative was launched by Civil, Environmental and Construction Engineering (CECE) in the College of Engineering and Computer Science (CECS). FUTURe CITy initiative at UCF brings together a group of researchers and educators with a vision to synergistically explore the wide-ranging technological advances towards better serving urban residents. Towards furthering this vision, we envision this graduate certificate in Smart Cities to provide engineers and urban planners with a background in Smart Cities.

The certificate offers a 9 credit program with flexible course options listed below.

No

Program Description

The Graduate Certificate in Structural Engineering provides qualified engineers and students with the knowledge to analyze and design structures that will perform safely.

Structural engineering plays a significant role in the ongoing infrastructure developments in the central Florida area. Engineers continually need to update their knowledge of the state-of-the-art in research and practice in order to ensure the safety of constructed facilities. The Graduate Certificate in Structural Engineering is designed to advance the knowledge of civil and structural engineers. The Graduate Certificate is a good way for qualified students to sample the graduate programs in this area. However, because these are graduate level classes, students must have an undergraduate degree in Civil Engineering or closely related discipline in order to be admitted.

For the Structural Engineering certificate, students have the flexibility to choose four courses from a list of approved engineering courses, for a total of 12 credit hours.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Admission is open to those with a bachelor's degree in Civil or Mechanical Engineering from an accredited institution recognized by UCF.

Is this program available 100% online?

No

Program Description

The Graduate Certificate in "Sustainable and Resilient Energy Systems" provides students with an interdisciplinary curriculum focused on technologies and policies for future smart energy systems that are sustainable, resilient, efficient, and market-oriented. The program prepares students for holistic design and operation challenges of emerging energy systems with distributed renewable energy sources, advanced information, communication, control and optimization technologies, along with supporting economic and management policies. This graduate certificate is beneficial to individuals (professionals, engineers and researchers) who have an interest in deployment and operation of future smart energy systems, in particular the challenges from the technology and policy perspectives.

UCF Partnerships

The Sustainable and Resilient Energy Systems certificate partners with several UCF master's programs. If students complete the certificate and are accepted into a partnering program, all certificate coursework can be used toward that master's degree. Here is a list of our partnering UCF master's programs:

Electrical Engineering MSEE

Computer Engineering MSCpE

The Graduate Certificate in Sustainable and Resilient Energy Systems requires a total of 12 credit hours (4 courses). Nine credit hours are from the three required courses given below. The remaining three credit hours can be selected from the list of elective courses. Electives outside of the provided list require approval from the ECE graduate coordinator.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

UCF Online

Please note: Systems Engineering Graduate Certificate may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Program Description

The Graduate Certificate in Systems Engineering focuses on introducing students to the fundamentals of systems requirements, architecture, and integration and testing. Systems Engineering is an interdisciplinary approach and means to enable the realization of successful systems. Systems Engineering integrates all the disciplines and specialty groups into a team effort forming a structured development process that proceeds from concept to production to operation. Systems Engineering considers both the business and the technical needs of all customers with the goal of providing a quality product that meets the user needs.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Admission is open to those with a bachelor's degree in engineering from an accredited institution recognized by UCF.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CECS-Systems-Engineering-MSSE.pdf.

Program Description

The Master of Science in Systems Engineering (MSSE) is a fully online program that focuses on applications of systems engineering in designing, developing, integrating, and evaluating complex systems through their life cycle. This unique program is offered in response to the growing needs of the industry where systems thinking, complexity, globalization, quality, and productivity are the key business drivers.

The MSSE requires 30 credit hours of courses beyond the bachelor's degree. This program offers only the non-thesis option.

This web-based online MSSE is designed to attract students with a variety of engineering backgrounds and a keen interest in working as systems engineers, program/project managers, chief engineers, etc. The traditional engineer and scientist often lack preparation in the human, financial, software, and systems integration skills necessary to make project teams more productive, improve system and service quality, and promote the advancement of high technology for complex systems. Systems engineering is a practice-based discipline that focuses on developing these attributes with elements of engineering, systems, and management.

For information about the program, please contact IEMS Graduate Director Dr. Mansooreh Mollaghasemi (mollagha@ucf.edu).

Translating a specific design into an organizational or physical reality in the most effective manner, and with the highest quality, is the focus of the Industrial Engineering and Management Systems field. This program is tailored to meet the needs of a broad range of working professionals interested in leading systems engineering and management activities. This program was designed by industry to provide the skills needed to be successful in the defense, government, healthcare, etc., sectors that require engineers who can collect requirements, architect, and integrate human, software, and hardware elements of modern systems.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Students with undergraduate degrees in industrial or systems engineering or other engineering degrees are encouraged to apply for admission.

All applicants are expected to have completed the following prerequisites during their undergraduate engineering education:

- Computer programming capability. Proficiency with MS Office expected. C++, Visual BASIC, or Java recommended.
- Mathematics through Calculus II (MAC 2312 or equivalent)
- Undergraduate probability and statistics for engineers (STA 3032 or equivalent)

    - EIN6336 - Production and Inventory Control (3)
    - EIN5356 - Cost Engineering (3)
    - ESI5227 - Total Quality Improvement (3)

  Human System Integration
  - Complete at least 3 of the following:
    - EIN5248 - Ergonomics (3)
    - EIN5251 - Usability Engineering (3)
    - EIN6258 - Human Computer Interaction (3)
    - EIN6271 - Human Reliability (3)

Grand Total Credits: **30**

Program Details

Independent Learning

The Independent Learning requirement is met by successful completion of the research studies required in the individual courses. Systems engineering by definition is an interdisciplinary major requiring independent learning across a wide spectrum of management, technology, and traditional engineering. These research studies require that students integrate material from all the courses in their program. The Systems Integration class, which is the fourth course in the core sequence, builds prior classes and requires independent research to describe, architecture, model, and ultimately integrate and test complex products and services.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Yes

UCF Online

Please note: Travel Technology and Analytics MS may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Program Description

The interdisciplinary Master of Science in Travel Technology and Analytics, offered jointly by the College of Engineering and Computer Science (Departments of Computer Science; Industrial Engineering and Management Systems; Civil, Environmental, and Construction Engineering) and the Rosen College of Hospitality Management (Departments of Tourism, Events, and Attractions; Hospitality Services), introduces graduate students to the technical aspects of big data analytics, including predictive analytics, algorithm design and models for SMART-cities, SMART-technologies and travel systems, and service systems quality engineering, in the specific context of global travel and tourism. The value and importance of such a program is demonstrated by travel and tourism and is the number one industry globally with immense economic, social, cultural and environmental impacts. Locally, the program promises to deliver significant value for the industry benefitting from a large number of visitors to the state and especially central Florida.

This powerful industry with $8.3 trillion in economic benefits globally, which functions at the intersection of engineering and management, is being transformed by rapidly increasing technological innovations and advances and is adapting to these changes by creating new employment opportunities to match. The dynamic nature of the industry and technological advances reveal the need for a workforce with advanced skills: fluency in data science and analytics, understanding of complex travel systems, strategic problem solving, big-picture thinking, technical knowledge, and practical skills aligned with technological advances. The changing nature of travel and tourism employment reveals emerging positions in areas of online travel agencies [OTA], global distribution systems [GDS], data analytics, data architecture, predictive analytics, mobile devices, travel apps, geolocation, data visualization, data translation, programming, interface design, virtual reality [VR], augmented reality [AR], hologram technology, travel click technology, business intelligence [BI], social media management, SMART-city design and development, and SMART-technologies and travel systems. The broader travel industry and its subsectors (transportation, lodging, and attractions) are experiencing the disruptive effects of direct and indirect distribution impacted by mobile devices, e-commerce, role of IT in distribution and dynamic pricing, and a highly perishable inventory (e.g., hotel rooms, airline seats) as well as those of artificial intelligence (AI) and machine learning and becoming increasingly more dependent on analytics as a key facet of business strategy.

Highlights:

- Academically-rich, industry-relevant interdisciplinary program
- Flexible course offerings in face-to-face, mixed and online modalities
- Offered at UCF's main campus and UCF's Rosen College of Hospitality Management campus
- Exponential industry growth locally, regionally, nationally and globally
- Cutting edge curriculum with a strong STEM foundation
- Research opportunities in both colleges
- Skills found highly desirable by industry leaders ranging from the local to the international level

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

A Bachelor's degree in a STEM-related discipline from an accredited institution.

Depending on the degree completed, one or more prerequisite courses may be required, namely: STA 2023 (Statistical methods) and STA 3032 (Probability and Statistics for Engineers) or CAP 4630 (Artificial Intelligence).

Grand Total Credits: **30**

Program Details

The program will be 30 credits (18 core/required and 12 electives). There will be no thesis requirement, however, a semester-long applied capstone project (involving industry and approved by the program director) will be required. The program will provide employable technical skills including the development of algorithms, discrete choice models, service systems quality engineering, machine learning, digital marketing, and big data management, and computer systems to extract insight from big data. The foregoing will be appropriately contextualized within the global travel industry and its trajectory toward increasing technological innovations that continue to drive the industry. The curriculum includes six (6) required courses that ensure that students have skills in algorithms and statistical techniques for extracting information in addition to awareness of the global travel and tourism industry including. Although courses can generally be taken in any order, the first two (2) required (co-requisite) courses serve as pre-requisites for all remaining courses in the program.

Financial Information

Fellowship Information

Fellowships are awarded to highly qualified students based on academic merit. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what students should do to be considered for a fellowship.

No

Program Description

The Geographic Information Systems (GIS) Graduate Certificate provides students with the interdisciplinary background in geography and the technical skills in the application of GIS. The certificate will enhance the student's ability to understand, visual and analyze geospatial data to address questions related to place and spatial interactions.

GIS and geospatial analyses allow students and researchers to see old problems in new ways making connections by overlaying digital maps and examining spatial networks and processes.

Degree Requirements

Required Courses
12 - 14 Total Credits

- Complete all of the following
  - Group A - First Core Course
  - Complete at least 1 of the following:
    - ANG5852 - GIS Methods in Anthropology (3)
    - ANG6181C - GIS Applications in Anthropology (3)
    - CCJ6079 - Crime Mapping and Analysis in Criminal Justice (3)
    - PAD6716 - Information Systems for Public Managers and Planners (3)
    - POS6743 - Geographic Tools for Political Science Research (3)
    - SYA6356 - Geographic Information Systems in Society (3)

  Group B - Second Core Course
  - Complete at least 1 of the following:
    - ANG5853 - Advanced GIS Methods in Anthropology (3)
    - CCJ6077 - Advanced Crime Mapping and Analysis in Criminal Justice (3)
    - SYA6452 - GIS Applications (3)

  Group C - Electives
  - Complete all of the following
    - Complete at least 2 of the following:
      - BSC5824 - Biogeography (4)
      - CAP6121 - 3D User Interfaces for Games and Virtual Reality (3)
      - CCJ6073 - Data Management Systems for Crime Analysis (3)
      - CCJ7725 - The Geography of Crime: Theory and Methods (3)
      - CWR5634 - Water Resources in a Changing Environment (3)
      - CWR6126 - Groundwater Modeling (3)
      - CWR6535 - Modeling Water Resources Systems (3)
      - EEL5432 - Satellite Remote Sensing (3)
      - EEL5820 - Image Processing (3)
      - ENG6808 - Narrative Information Visualization (3)
      - ENV6047 - Environmental Informatics and Remote Sensing (3)
      - HIS5925 - History in the Digital Age (3)
      - HIS6165 - Digital Tools for Historians (3)
      - HIS6167 - Spatial History (3)
      - HUM5396 - Place and Space (3)
      - TTE6938 - Special Topics (3)
      - SYA6458 - Advanced Topics in Geographic Information Systems in Society (3)
      - PCB6328C - Landscape Ecology (4)
      - STA6709 - Spatial Statistics (3)
    - It is recommended that students take Group C courses after taking Group A and B courses.

No

Program Description

The Master of Arts in Interdisciplinary Studies is a unique program designed for students who want to develop their own precision degree program by combining areas of study traditionally associated with a Master of Arts (Humanities, Social Sciences, Communication, etc.). Students have the flexibility to create an individually tailored plan by choosing two concentrations that culminate in either a thesis or nonthesis experience based on their future aspirations.

The Nonthesis Track culminates in a capstone experience that prepares students for applied, non-research oriented careers.

The Thesis Track culminates in a scholarly publication that includes original research undertaken during your time as a graduate student. This provides excellent preparation for the future pursuit of a doctoral degree or research-oriented career.

Please scroll to the bottom of this page for further details on these Tracks.

Track Description

The Nonthesis Track in the Master of Arts in Interdisciplinary Studies program allows students the flexibility to develop an individually tailored plan of study using courses traditionally associated with a Master of Arts (Humanities, Social Sciences, Communication, etc.) This track can combine a variety of concentrations and culminates in a capstone experience. The precision program is designed to help students prepare for applied, non-research oriented careers.

This is an excellent program for a number of endeavors appropriate for the twenty-first century. By combining the knowledge from two disciplines, supported by cross-disciplinary electives, students precisely define their own area of expertise. This unique option is ideal for students who have varied interests that can be connected by a common theme or goal.

Degree Requirements

Required Courses
9 Total Credits

- Complete all of the following
  - Complete the following:
    - IDS6308 - Ways of Knowing (3)
  - Earn at least 3 credits from the following types of courses:
    A critical thinking and writing course in one of the chosen concentrations or in an area that supports the plan of study.
  - Earn at least 3 credits from the following types of courses:
    A research methods course in one of the chosen concentrations or in an area that supports the plan of study

Elective Courses
24 Total Credits

- Complete all of the following
  - Students take a minimum of 24 credit hours of electives, including two concentrations of 9 credit hours each of restricted electives and 6 credit hours of unrestricted electives. The unrestricted electives can be from either concentration or additional areas that support the capstone project or intended use of the degree. Students who choose one of the pre-approved concentrations such as Diversity and Inclusion or Project Management can choose courses from those course listings on our website. Those students do not need to list 2 concentrations. Course and concentration selections are done in consultation with and with approval from the program director or academic coordinator. Coursework must be selected so that at least 50 percent of credit hours in the program is taken at the 6000 level. Students must earn course grades of "B" or higher to gain credit toward their master's degree.
    Restricted Elective Courses
  - Complete all of the following
    - Earn at least 9 credits from the following types of courses:
      Three courses in the first concentration.
    - Earn at least 9 credits from the following types of courses:
      Three courses in the second concentration.

    Unrestricted Elective Courses
  - Earn at least 6 credits from the following types of courses:
    Two additional elective courses.

Capstone
0 Total Credits

- Students choose to complete a project, an internship, or a written comprehensive examination as their capstone experience. The capstone project should reflect a combination of the two concentrations in the degree by finding an applied policy area, special topic, or issue that crosses both areas. Some examples of project types include: writing a grant proposal for an agency, program evaluation and recommendations, or a "best practices" literature review in a particular area. Students must choose three advisers for the project, one from each concentration area and one from any supporting discipline. The project will be evaluated on a pass/fail basis. Students who feel an internship will best support their plan of study and professional goals will enroll in IDS 5949 Co-op Interdisciplinary Study (0 credits) and IDS 6949 Co-op Interdisciplinary Study (3 credits) after locating an acceptable internship host site, with the approval of the program coordinator. The written examination will entail the selection of an exam committee of three faculty who will formulate questions to address both concentration areas. The student will have 48 hours to choose 2 of the 3 questions and complete the take-home exam. The exam should be completed in the student's final semester of enrollment. The exam will be graded on a pass/fail basis. If the student does not pass both questions with a 70% or higher, the student will have two additional chances to retake the exam with new questions. The exam can be taken only once per semester. If the student must retake the exam, the student must enroll in IDS 6999 Graduation Requirement to remain active in the program.

Independent Learning
0 Total Credits

- The program is designed to provide numerous independent learning opportunities. The required methods course will introduce students to research methodology that they will apply to independent research/capstone work. IDS 6308 acquaints students with interdisciplinarity through the use of student-driven analyses, discussions, and presentations. The required critical thinking and writing course involves students in verbal and written discussions, analyses, and critiques of work they create and from the published literature. Additionally, the completion of the capstone experience will require independent learning that will be evaluated by faculty in the specified disciplines.

Grand Total Credits: **33**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Degree Requirements

Required Courses
6 Total Credits

- Complete all of the following
  - Complete the following:
    - IDS6308 - Ways of Knowing (3)
  - Earn at least 3 credits from the following types of courses:
    A research methods course in one of the chosen concentrations

Elective Courses
21 Total Credits

- Complete all of the following
  - Students take a minimum of 18 credit hours in restricted electives, including two concentrations of 9 credit hours of courses each. Course and concentration selections are done in consultation with and with approval of the program director or academic coordinator, as well as with the student's faculty adviser and thesis committee.
    Restricted Elective Courses
  - Complete all of the following
    - Earn at least 9 credits from the following types of courses:
      Electives in the first concentration.
    - Earn at least 9 credits from the following types of courses:
      Electives in the second concentration.

    Unrestricted Elective Course
  - Earn at least 3 credits from the following types of courses:
    in a discipline that complements the concentrations and further focuses the program of study.

Thesis
6 Total Credits

- Complete all of the following
  - Earn at least 6 credits from the following:
    - IDS6971 - Thesis Research (3)
  - Students should select a faculty adviser and form a thesis committee of two additional members no later than their third semester in the program. Before officially beginning work on the thesis, the student must submit a thesis proposal to the committee for approval. This proposal must cover the thesis topic and plan of approach. By the end of their degree, students will complete 6 credit hours of thesis and successfully defend their thesis. The thesis consists of a common theme with an introduction and literature review, details of the study, and results and conclusions. The thesis must be prepared and submitted in writing as well as presented and defended orally.

Independent Learning
0 Total Credits

- The thesis serves as the independent learning experience. In addition, the required methods course introduces students to research methodology that they will apply to their independent research work, and IDS 6308 acquaints them with interdisciplinarity through the use of student-driven analyses, discussions, and presentations.

Program Description

The UCF School of Modeling, Simulation, and Training (SMST) considers its degree programs as transdisciplinary, intended for those who wish to pursue a career in the fields of academia, government, military/defense, healthcare/medicine, entertainment, technology, education, or service/manufacturing. Most engineering or scientific fields use simulation as an exploration, modeling, or analysis technique. However, Modeling and Simulation is not limited to engineering and science, as it is also used in training, management, and concept exploration. These programs involve constructing human-centered, equipment-centered, and stand-alone computer-based models of existing and conceptual systems and processes.

UCF SMST sought feedback from industry practitioners to identify key competencies for students in our degree programs. This input has been critical to the development of our curriculum, which is designed to provide a broad overall perspective of the developing simulation industry and an awareness of the economic considerations. UCF SMST's objective is to provide education on evaluating the human, organization, equipment, and systems under study through the evaluation of output from the corresponding simulation construct. Alumni of SMST degree programs have both general and specialized skills in Modeling and Simulation.

Though not required, many students in the Modeling and Simulation M.S. program choose to focus their study and research efforts in an area of specialization. Students can base their specialization on their academic and professional goals, and seek feedback from their faculty adviser and the Modeling and Simulation graduate program director. Common areas of specialization are listed below (descriptions can be found at msgrad.ist.ucf.edu). This is not an exhaustive list, as the field continues to grow and evolve.

Behavioral Cybersecurity

Computer Visualization

Human Systems

Instructional and Training Simulation

Interactive Simulation and Intelligent Systems

Simulation in Government and Military

Simulation in Healthcare and Medicine

Simulation Infrastructure

Simulation Management

Simulation Modeling and Analysis

Program Prerequisites

Though UCF SMST does not have a mandated prerequisite for its graduate programs, the most successful students are those who have an academic and/or work background that has prepared them in mathematics (introductory calculus and probability and statistics) and computer literacy, preferably familiarity with at least one higher order programming language (e.g., Python, C/C++/C#, Visual Basic, Java, etc.). Students with undergraduate or graduate degrees in Engineering, Computer Science, or Mathematics will generally have this background.
Students without this background are encouraged to select the elective course IDC 5570 (Introductory Mathematics for Modeling and Simulation). This course will prepare them for the required core course COT 6571 (Mathematical Foundations of Modeling and Simulation).

Degree Requirements

Required Courses
15 Total Credits

- Complete all of the following
    - Complete the following:

- COT6571 - Mathematical Foundations of Modeling and Simulation (3)
- IDS6147 - Perspectives on Modeling and Simulation (3)
- IDS6145 - Simulation Techniques (3)
- IDS6267 - Understanding Humans for Modeling and Simulation (3)

Thesis/Non Thesis Option

- Complete 1 of the following

  Thesis Option

  - Complete the following:
    - IDS6262 - Research Design for Modeling and Simulation (3)

  Non Thesis Option

  - Complete the following:
    - IDS6916 - Simulation Research Methods and Practicum (3)

Unrestricted Electives
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  All Modeling and Simulation MS students must take at least 9 credit hours of unrestricted electives that support the student's area of graduate study. Unrestricted electives must consist of at least 9 credit hours of formal courses, which may include independent study (up to 6 credit hours). The remaining credit may consist of additional thesis (for thesis option students only), directed research, and additional courses as advised appropriately by the faculty adviser and/or program director.

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following

  Thesis Option

  - Earn at least 6 credits from the following:
    - IDS6971 - Thesis Research (3)

  Non Thesis Option

  - Complete all of the following

    Restricted Elective

    - Complete at least 1 of the following:
      - IDC5602 - Cybersecurity: A Multidisciplinary Approach (3)
      - IDC6601 - Behavioral Aspects of Cybersecurity (3)
      - IDC6700 - Interdisciplinary Approach to Data Visualization (3)
      - IDS5142 - Modeling and Simulation for Instructional Design (3)
      - IDS6146 - Modeling and Simulation Systems (3)
      - IDS6149 - Modeling and Simulation for Test and Evaluation (3)
      - IDS6916 - Simulation Research Methods and Practicum (3)

    Unrestricted Electives

    - Earn at least 3 credits from the following types of courses:
      Nonthesis students are required to take an additional 3 credit hours of unrestricted electives that support the student's area of graduate study.

Modeling and Simulation MS Electives
0 Total Credits

- Complete all of the following
  - In addition to successfully enrolling and completing the core courses, students are required to carefully select electives with the guidance of a faculty adviser. Elective choices should be made with the intent to strengthen a research interest and/or area of focus in order to meet the individual student's educational goals and objectives. Listed below are suggested courses in various areas of focus or specialization. These course groupings are mere guides, are not exhaustive and are only meant to assist with advising and course selection in order to meet the individual student's educational goals and objectives. They are not intended to restrict elective choices among focus areas as we strongly encourage Modeling and Simulation students to maintain an interdisciplinary approach to their graduate studies. If a student identifies another UCF course which may be of value to his/her modeling and simulation research area, but is not already identified in a list below, he/she may request approval from the Graduate Program Director for the course to be used as an elective in the Graduate Plan of Study. All such requests must be made in advance of enrolling in the course. Those electives categorized as "General" would be appropriate for all students regardless of focus area. The remaining categories are grouped by area of research interest.
    General
  - ESI 6247 - Experimental Design and Taguchi Methods 3 Credit Hours ESI 6891 - IEMS Research Methods 3 Credit Hours IDS 5907 Independent Study (variable) IDS 5917 Directed Research (variable) IDS 6908 Independent Study (variable) IDS 6918 Directed Research (variable) IDS 6918 Directed Research (variable) IDS 6946 Internship (variable) IDS 7919 Doctoral Research (variable) PHI 5340 - Research Methods in the Cognitive Sciences 3 Credit Hours PSY 6216C - Research Methodology 4 Credit Hours STA 5205 - Experimental Design 3 Credit Hours
    Fundamentals of Modeling and Simulation
  - EIN 6258 - Human Computer Interaction 3 Credit Hours ESI 5219 - Engineering Statistics 3 Credit Hours ESI 5531 - Discrete Systems Simulation 3 Credit Hours ESI 6217 - Statistical Aspects of Digital Simulation 3 Credit Hours ESI 6247 - Experimental Design and Taguchi Methods 3 Credit Hours ESI 6532 - Object-Oriented Simulation 3 Credit Hours IDC 6700 - Interdisciplinary Approach to Data Visualization 3 Credit Hours IDS 6145 - Simulation Techniques 3 Credit Hours

IDS 6146 - Modeling and Simulation Systems 3 Credit Hours IDS 6147 - Perspectives on Modeling and Simulation 3 Credit Hours IDS 6149 - Modeling and Simulation for Test and Evaluation 3 Credit Hours IDS 6950 - Modeling and Simulation Capstone Report Planning 1 Credit Hours

Behavioral Cybersecurity

- CAP 6133 - Advanced Topics in Computer Security and Computer Forensics 3 Credit Hours CAP 6135 - Malware and Software Vulnerability Analysis 3 Credit Hours CDA 6530 - Performance Models of Computers and Networks 3 Credit Hours CJE 6688 - Cyber Crime and Criminal Justice 3 Credit Hours CNT 5008 - Computer Communication Networks Architecture 3 Credit Hours CNT 5410L - Cyber Operations Lab 3 Credit Hours CNT 6519 - Wireless Security and Forensics 3 Credit Hours COT 5405 - Design and Analysis of Algorithms 3 Credit Hours EEL 6785 - Computer Network Design 3 Credit Hours EEL 6883 - Software Engineering II 3 Credit Hours ESI 5531 - Discrete Systems Simulation 3 Credit Hours EXP 5256 - Human Factors I 3 Credit Hours EXP 6506 - Human Cognition and Learning 3 Credit Hours IDC 5602 - Cybersecurity: A Multidisciplinary Approach 3 Credit Hours IDC 6600 - Emerging Cyber Issues 3 Credit Hours IDC 6601 - Behavioral Aspects of Cybersecurity 3 Credit Hours IDS 6916 - Simulation Research Methods and Practicum 3 Credit Hours INR 6365 - Seminar on Intelligence 3 Credit Hours INR 6366 - The Intelligence Community 3 Credit Hours PHI 6938 - ST: Digital Ethics 3 Credit Hours STA 5703 - Data Mining Methodology I 3 Credit Hours STA 5825 - Stochastic Processes and Applied Probability Theory 3 Credit Hours

Human Systems

- CAP 6515 - Algorithms in Computational Biology 3 Credit Hours CAP 6671 - Intelligent Systems: Robots, Agents, and Humans 3 Credit Hours CAP 6676 - Knowledge Representation 3 Credit Hours DIG 6432 - Transmedia Story Creation 3 Credit Hours DIG 6812 - Digital Interaction for Informal Learning 3 Credit Hours EIN 5248 - Ergonomics 3 Credit Hours EIN 5317 - Training System Design 3 Credit Hours EIN 6215 - System Safety Engineering and Management 3 Credit Hours EIN 6258 - Human Computer Interaction 3 Credit Hours EIN 6649C - Intelligent Tutoring Training System Design 3 Credit Hours EME 6458 - Virtual Teaching and the Digital Educator 3 Credit Hours EME 6507 - Multimedia for Education and Training 3 Credit Hours EME 6601 - Instructional Simulation Design for Training and Education 3 Credit Hours EME 6614 - Instructional Game Design for Training and Education 3 Credit Hours EME 6646 - Instructional Game Design for Training and Education 3 Credit Hours EXP 5208 - Sensation and Perception 3 Credit Hours EXP 5256 - Human Factors I 3 Credit Hours EXP 6255 - Human Performance 3 Credit Hours EXP 6257 - Human Factors II 3 Credit Hours EXP 6258 - Human Factors III 3 Credit Hours EXP 6506 - Human Cognition and Learning 3 Credit Hours EXP 6541 - Advanced Human Computer Interaction 3 Credit Hours IDS 6148 - Human Systems Integration for Modeling and Simulation 3 Credit Hours IDS 6149 - Modeling and Simulation for Test and Evaluation 3 Credit Hours PHI 5225 - Philosophy of Language 3 Credit Hours PHI 5325 - Topics in Philosophy of Mind 3 Credit Hours PHI 5327 - Topics in the Cognitive Sciences 3 Credit Hours PHI 5329 - Philosophy of Neuroscience 3 Credit Hours PSB 5005 - Physiological Psychology 3 Credit Hours TTE 6270 - Intelligent Transportation Systems 3 Credit Hours

Computer Visualization

- CAP 5725 - Computer Graphics I 3 Credit Hours CAP 6411 - Computer Vision Systems 3 Credit Hours CAP 6412 - Advanced Computer Vision 3 Credit Hours CAP 6676 - Knowledge Representation 3 Credit Hours CDA 5106 - Advanced Computer Architecture 3 Credit Hours COT 5405 - Design and Analysis of Algorithms 3 Credit Hours DIG 6605 - Physical Computing 3 Credit Hours DIG 6647 - History and Theory of Dynamic Media 3 Credit Hours EEL 5173 - Linear Systems Theory 3 Credit Hours EEL 5771C - Engineering Applications of Computer Graphics 3 Credit Hours EEL 5820 - Image Processing 3 Credit Hours EEL 5825 - Pattern Recognition and Learning from Big Data 3 Credit Hours EEL 5874 - Expert Systems and Knowledge Engineering 3 Credit Hours EEL 6823 - Image Processing II 3 Credit Hours EEL 6843 - Machine Perception 3 Credit Hours EIN 6258 - Human Computer Interaction 3 Credit Hours ESI 6247 - Experimental Design and Taguchi Methods 3 Credit Hours IDC 6700 - Interdisciplinary Approach to Data Visualization 3 Credit Hours MAP 6118 - Introduction to Nonlinear Dynamics 3 Credit Hours MAP 5117 - Mathematical Modeling 3 Credit Hours MAT 5712 - Scientific Computing 3 Credit Hours

Plan of Study
0 Total Credits

- After admission to the Modeling and Simulation M.S. program and before the end of the second term of enrollment, students must submit a Graduate Plan of Study (GPS) to the Modeling and Simulation Graduate Program office. The GPS helps the student design an appropriate program of coursework to support the student's educational needs, goals, and objectives. The GPS should be developed in concert with the student's faculty adviser or (if adviser is not yet identified) program director and form a unified cohesive strategy for degree completion. All graduate program credit must be at the 5000-level or higher, with a minimum of 50% at the 6000- or 7000-level.Students are eligible to make changes to their Graduate Plan of Study at any time, with the approval of their faculty adviser and the Modeling and Simulation Graduate Program.

Culminating Experience
0 Total Credits

- Students are eligible to complete their specific culminating experience once they are within 6 credits of completing all coursework (i.e., completed at least 24 credits of coursework); have an approved up-to-date GPS on file with the graduate program; and have an advisory committee on file (thesis students, please refer to the information below; non-thesis students, the advisory committee is selected by the SMST Graduate Program).Detailed information and protocol regarding the culminating experiences can be found at msgrad.ist.ucf.edu.

Thesis Adviser and Advisory Committee
0 Total Credits

- Students are responsible for selecting an adviser from a list of faculty members authorized to direct theses to serve as the chair of their advisory committee. Then, in concert with their adviser, the student must identify and select the remaining members of the advisory committee. The advisory committee must contain a minimum of three members (chair plus two members). All committee members must hold a terminal degree and be in fields related to the student's thesis topic. At least two members, including the chair, must be classified as Modeling and Simulation graduate faculty. These faculty members should be from (or represent) at least two different colleges. At least one member must have served as a committee member on a prior SMST advisory committee. With approval from the Modeling and Simulation Graduate Program Director, a committee member may serve as a committee's co-chair. The UCF College of Graduate Studies, as well as UCF SMST, reserve the right to review appointments to advisory committees; place a representative on any advisory committee; or appoint a co-adviser.

Thesis Defense
0 Total Credits

- The thesis defense is a formal oral presentation of the written project before the student's advisory committee. All dissertation defenses are announced in advance and open to the public. Committee members vote either "Pass" or "Fail" of the written thesis and oral defense. The thesis and its defense must be approved by a majority vote, with no more than one dissenting vote. Normally, students are granted one opportunity to pass the thesis defense. In extenuating circumstances and at the discretion of the Modeling and Simulation Graduate Program Director, a student may be allowed one additional attempt to pass the thesis defense (no more than two attempts will be allowed).Non-thesis Experience An advisory committee comprised of 2-3 members of the UCF SMST Core Curriculum committee identifies a non-thesis capstone project. The current requirement is a professional portfolio, highlighting a student's educational and professional skills, reflecting the discipline in which the student plans to pursue their Modeling and Simulation career. The details and standards for the project will be

presented in IDS6916, but the student has until their last semester to submit their final portfolio. Students who declare an intent to graduate with the non-thesis option will be enrolled in a portfolio webcourse and invited to participate in workshops to receive feedback prior to the announced deadline. Portfolios are graded "Pass" or "Fail." Normally, a student is granted one opportunity to pass the requirement. In extenuating circumstances and at the discretion of the Modeling and Simulation Graduate Program Director, a student may be allowed one additional attempt to pass the non-thesis project requirement (no more than two attempts will be allowed).

Time to Completion
0 Total Credits

- Students are granted 7 years (21 semesters) from the term of admission to complete their degree program. Failure to comply with the "7-Year Rule" may result in dismissal from the program, and may require reapplication to the program as well as repeating coursework and other program requirements.

Equipment Fee
0 Total Credits

- Full-time students in the Modeling and Simulation MS program pay a $27 equipment fee each semester that they are enrolled. Part-time students pay a $13.50 equipment fee each semester that they are enrolled.

Independent Learning
0 Total Credits

- A thesis serves as the independent learning experience for thesis students. Nonthesis students are required to take IDS 6916 where a research project is required and submit an end-of-program portfolio.

Grand Total Credits: **36**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance
Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241
finaid@ucf.edu
http://finaid.ucf.edu

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Program Description

The Graduate Certificate in Modeling and Simulation of Behavioral Cybersecurity provides students with an interdisciplinary modeling and simulation approach to cybersecurity with a particular emphasis on the behavioral aspects of cybersecurity and cyber operations.

This graduate certificate is beneficial to individuals who have an interest in interdisciplinary studies and problem-solving for modeling, simulation, and behavioral aspects of cybersecurity.

UCF Partnerships

The Modeling and Simulation of Behavioral Cybersecurity certificate partners with several UCF master's programs. If students complete the certificate and are accepted into a partnering program, all certificate coursework can be used toward that master's degree. Here is a list of our partnering UCF master's programs:

- Computer Engineering MSCpE
- Industrial Engineering MS
- Modeling and Simulation MS
- Cyber Security and Privacy MS

Program Description

PROGRAM DISCONTINUED EFFECTIVE FALL 2019

The Graduate Certificate in Modeling and Simulation of Technical Systems provides students with the necessary knowledge in modeling and simulation fundamentals, including modeling techniques and applications, with special emphasis on modeling and simulation in testing and evaluation.

This graduate certificate is beneficial to technical professionals involved with constructing and using simulation models of dynamic systems. All courses of the certificate program will be delivered electronically via distance education. Students are required to apply to the Out-of-State Cohort Track or the In-State Cohort Track.

No

Program Description

The UCF School of Modeling, Simulation, and Training (SMST) considers its degree programs as transdisciplinary, intended for those who wish to pursue a career in the fields of academia, government, military/defense, healthcare/medicine, entertainment, technology, education, or service/manufacturing. Most engineering or scientific fields use simulation as an exploration, modeling, or analysis technique. However, Modeling and Simulation is not limited to engineering and science, as it is also used in training, management, and concept exploration. These programs involve constructing human-centered, equipment-centered, and stand-alone computer-based models of existing and conceptual systems and processes.

UCF SMST sought feedback from industry practitioners to identify key competencies for students in our degree programs. This input has been critical to the development of our curriculum, which is designed to provide a broad overall perspective of the developing simulation industry and an awareness of the economic considerations. UCF SMST's objective is to provide education on evaluating the human, organization, equipment, and systems under study through the evaluation of output from the corresponding simulation construct. Alumni of SMST degree programs have both general and specialized skills in Modeling and Simulation.

Students in the Modeling and Simulation Ph.D. program are required to focus their study and research efforts in two areas of specialization. Students base their specialization on their academic and professional goals and determine these areas in consultation with their faculty adviser and the Modeling and Simulation graduate program director. Common areas of specialization are listed below (descriptions can be found at msgrad.ist.ucf.edu). This is not an exhaustive list, as the field continues to grow and evolve.

Behavioral Cybersecurity

Computer Visualization

Human Systems

Instructional and Training Simulation

Interactive Simulation and Intelligent Systems

Simulation in Government and Military

Simulation in Healthcare and Medicine

Simulation Infrastructure

Simulation Management

Simulation Modeling and Analysis

Program Prerequisites

Though UCF SMST does not have a mandated prerequisite for its graduate programs, the most successful students are those who have an academic and/or work background that has prepared them in mathematics (introductory calculus and probability and statistics) and computer literacy, preferably, familiarity with at least one higher order programming language (e.g., Python, C/C++, Visual Basic, Java, etc.). Students with undergraduate or graduate degrees in Engineering, Computer Science, or Mathematics will generally have this background.

Students without this background are encouraged to select the elective course IDC 5570 (Introductory Mathematics for Modeling and Simulation). This course will prepare them for the required core course COT 6571 (Mathematical Foundations of Modeling and Simulation).

Degree Requirements

Core
15 Total Credits

- Complete the following:

- COT6571 - Mathematical Foundations of Modeling and Simulation (3)
- IDS6147 - Perspectives on Modeling and Simulation (3)
- IDS6145 - Simulation Techniques (3)
- IDS6262 - Research Design for Modeling and Simulation (3)
- IDS6267 - Understanding Humans for Modeling and Simulation (3)

Restricted Elective
3 Total Credits

- Complete all of the following
  - Complete at least 1 of the following:
    - IDC5602 - Cybersecurity: A Multidisciplinary Approach (3)
    - IDC6601 - Behavioral Aspects of Cybersecurity (3)
    - IDC6700 - Interdisciplinary Approach to Data Visualization (3)
    - IDS5142 - Modeling and Simulation for Instructional Design (3)
    - IDS6146 - Modeling and Simulation Systems (3)
    - IDS6149 - Modeling and Simulation for Test and Evaluation (3)
    - IDS6916 - Simulation Research Methods and Practicum (3)
  - Students must select an elective course taught by the Modeling and Simulation Graduate Program. Approved courses are listed below, but others may be used with the program director's approval.

Unrestricted Electives
39 Total Credits

- Earn at least 39 credits from the following types of courses:
  All Modeling and Simulation Ph.D. students must take at least 39 credits of unrestricted elective courses that reflect their two areas of specialization. Students are expected to carefully select electives with guidance from the program director and/or their faculty adviser. The UCF SMST has identified and approved over 175 courses that students may choose as unrestricted electives. This list can be found at msgrad.ist.ucf.edu. New courses are developed at the university every semester, so this list is updated once a semester. If a student identifies a course that will benefit their area of study but is not on the published list, they may request approval from the program director for inclusion in their plan of study. Unrestricted electives must consist of at least 9 credit hours of formal courses, excluding independent study. The remaining credits may consist of additional coursework, directed research, independent study, and additional dissertation as advised appropriately by faculty adviser and/or program director.

Modeling and Simulation PhD Elective Courses
0 Total Credits

- Complete all of the following
  - In addition to successfully completing the core courses for the M&S PhD program, students are required to carefully select electives with the guidance of a Program Director or faculty adviser. Elective choices should be made with the intent to strengthen a research interest and/or area of focus in order to meet the individual student's educational goals and objectives. Listed below are suggested courses in various areas of focus or specialization. These course groupings are mere guides, are not exhaustive and are only meant to assist with advising and course selection in order to meet the individual student's educational goals and objectives. They are not intended to restrict elective choices among focus areas as we strongly encourage Modeling and Simulation students to maintain an interdisciplinary approach to their graduate studies. If a student identifies another UCF course which may be of value to his/her M&S research area, but is not already identified in a list below, that student may request approval from the Graduate Program Director for the course to be used as an elective in the Graduate Plan of Study. All such requests must be made in advance of enrolling in the course. Those electives categorized as "General" and "Fundamentals of Modeling and Simulation" would be appropriate for all students regardless of interest area. The remaining categories are grouped by area of interest.
    General
  - ESI 6247 - Experimental Design and Taguchi Methods 3 Credit Hours ESI 6891 - IEMS Research Methods 3 Credit Hours IDS 5907 - Independent Study Variable IDS 5917 - Directed Research Variable IDS 6908 - Independent Study Variable IDS 6918 - Directed Research Variable IDS 6946 - Internship Variable IDS 7919 - Doctoral Research Variable PHI 5340 - Research Methods in the Cognitive Sciences 3 Credit Hours PSY 6216C - Research Methodology 4 Credit Hours STA 5205 - Experimental Design 3 Credit Hours
    Fundamentals of Modeling and Simulation
  - ESI 5219 - Engineering Statistics 3 Credit Hours ESI 6217 - Statistical Aspects of Digital Simulation 3 Credit Hours ESI 6247 - Experimental Design and Taguchi Methods 3 Credit Hours ESI 6532 - Object-Oriented Simulation 3 Credit Hours IDC 6700 - Interdisciplinary Approach to Data Visualization 3 Credit Hours IDS 6146 - Modeling and Simulation Systems 3 Credit Hours IDS 6147 - Perspectives on Modeling and Simulation 3 Credit Hours IDS 6149 - Modeling and Simulation for Test and Evaluation 3 Credit Hours IDS 6950 - Modeling and Simulation Capstone Report Planning 1 Credit Hours IDS 6145 - Simulation Techniques 3 Credit Hours

Waived Credits
0 Total Credits

- The doctoral program will allow up to 30 credit hours to be waived from an earned master's degree.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  Before entering the dissertation portion of the degree program, a student must successfully complete the qualifying examination and candidacy examination milestones. More information for both examinations can be found at msgrad.ist.ucf.edu. XXX 7980 - Dissertation Research 15 Credit Hours minimum

Plan of Study
0 Total Credits

- After admission to the Modeling and Simulation Ph.D. program and before the end of the third term of enrollment, students must submit a Graduate Plan of Study (GPS) to the Modeling and Simulation Graduate Program office. The GPS helps the student design an appropriate program of coursework to support the student's educational needs, goals, and objectives. The GPS should be developed in concert with the student's faculty adviser or (if adviser is not yet identified) program director and form a unified cohesive strategy for degree completion. All doctoral program credit must be at the 5000-level or higher, with a minimum of 50% at the 6000- or 7000-level. Students are eligible to make changes to their Graduate Plan of Study at any time, with the approval of their faculty adviser and the Modeling and Simulation Graduate Program.

Equipment Fee
0 Total Credits

- Full-time students in the Modeling and Simulation PhD program pay a $27 equipment fee each semester that they are enrolled. Part-time students pay a $13.50 equipment fee each semester that they are enrolled.

Milestones
0 Total Credits

- In addition to their coursework, all Modeling and Simulation Ph.D. students are required to successfully complete three milestones before the award of their degree: qualifying examination; candidacy examination; and dissertation defense.

Candidacy Examination
0 Total Credits

- Students are eligible to complete the SMST Candidacy Examination (CE) requirement once they successfully complete the QE; are within 6 credits of completing all coursework (i.e., completed at least 51 credits of coursework); have an approved up-to-date GPS on file with the graduate program; and have an advisory committee (approved by the College of Graduate Studies) on file. The CE consists of: Dissertation research proposal Oral defense of the dissertation research proposal Refereed published (or accepted for publication) manuscript on the student's dissertation topic Detailed information and protocol regarding the CE can be found at msgrad.ist.ucf.edu

Dissertation Adviser and Advisory Committee
0 Total Credits

- Students are responsible for selecting an adviser from a list of faculty members authorized to direct dissertations to serve as the chair of their advisory committee. Then, in concert with their adviser, the student must identify and select the remaining members of the advisory committee. The advisory committee must contain a minimum of four members (chair plus three members). All committee members must hold a terminal degree and be in fields related to the student's dissertation topic. At least three members, including the chair, must be classified as Modeling and Simulation graduate faculty. These faculty members must be from (or represent) at least two different colleges. At least one member must have served as a committee member on a prior SMST advisory committee. With approval from the Modeling and Simulation Graduate Program Director, a committee member may serve as a committee's co-chair. The UCF College of Graduate Studies, as well as UCF SMST, reserve the right to review appointments to advisory committees; place a representative on any advisory committee; or appoint a co-adviser.

Admission to Candidacy
0 Total Credits

- Students who fulfill all the requirements for the candidacy examination and have an approved advisory committee on file will be admitted to candidacy and authorized to enroll for dissertation hours.

Dissertation Defense
0 Total Credits

- The dissertation defense is a formal oral presentation of the written dissertation before the student's advisory committee. All dissertation defenses are announced in advance and open to the public. Committee members vote either "Pass" or "Fail" of the written dissertation and oral defense. The dissertation and its defense must be approved by a majority vote, with no more than one dissenting vote. Normally, students are granted one opportunity to pass the dissertation defense. In extenuating circumstances and at the discretion of the Modeling and Simulation Graduate Program Director, a student may be allowed one additional attempt to pass the dissertation defense (no more than two attempts will be allowed).

Time to Completion
0 Total Credits

- Students are granted 7 years (21 semesters) from the term of admission to complete their degree program. Failure to comply with the "7-Year Rule" may result in dismissal from the program, and may require reapplication to the program as well as repeating coursework and other program requirement.

Independent Learning
0 Total Credits

- The dissertation is an independent project completed under the guidance of a student's faculty advisory committee. All research, data collection and analysis, and writing of the project are completed by the student, creating a challenging and fulfilling independent learning experience.

Grand Total Credits: **72**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Program Description

The Master of Science in Nanotechnology program provides students with scientific knowledge and research training in nanoscience and nanotechnology. The program prepares students for seeking employment in industry and academia involved in nanotechnology research, product development and commercialization, or to pursue advanced PhD degrees in related areas.

The Nanotechnology MS program consists of 30 credit hours of study that covers Fall, Spring and Summer consecutive academic terms. Admissions to the program occur in both the Fall and Spring semester of each year, and students are expected to finish the degree in two years.

The program of study includes a balanced course offering including interdisciplinary scientific courses and research training in the field of nanotechnology. The curriculum of courses is delivered via face-to-face instruction. The program includes 3 credit hours of independent study and 6 credit hours of thesis research under the supervision of a faculty at the NanoScience Technology Center. This training will provide students with hands-on research experiences on nanomaterial synthesis, nanostructure fabrication and characterization, and application development in their interested areas.

This degree has 1 track: Non-Thesis Track. Please scroll to the bottom of this page for further details on this Track.

Program Prerequisites

Applicants should have obtained an undergraduate degree in one of the following areas: physics, chemistry, biology, or engineering.

Degree Requirements

Required Courses
15 Total Credits

- Complete all of the following
  - Core Courses
  - Complete at least 4 of the following:
    - IDS6250 - Introduction to Nanoscience and Nanotechnology (3)
    - IDS6254 - Nanofabrication and Characterization (3)
    - IDS6252 - Biomedical Nanotechnology (3)
    - IDS6255 - Nanotechnology in Energy and Sustainability (3)
    - IDS6253 - Bioanalytical Technology (3)

  Independent Study
  - Earn at least 3 credits from the following types of courses:
    Students will take 3 credit hours of independent study, resulting in a required research report of independent learning experience. Independent Study must have a formally defined core of knowledge to be learned by the student. In accordance with the policy of the College of Graduate Studies, the core of knowledge to be learned by the student must be specified in written form and approved by the student, the instructor, and the program coordinator prior to enrollment in Independent Study.

Elective Courses
9 Total Credits

- Complete at least 3 of the following:
  - IDS6257 - Principles and Techniques of Nanobiology (3)
  - IDS6258 - Advanced Materials and Nanotechnology for Rechargeable Batteries (3)
  - IDS6260 - Electrical and Optical Properties of Nanoscale Materials and Devices (3)
  - IDS6261 - Nanotechnology for Sustainable Agriculture (3)
  - EMA5586 - Photovoltaic Solar Energy Materials (3)
  - EMA5060 - Polymer Science and Engineering (3)
  - EMA6518 - Transmission Electron Microscopy (3)
  - EMA6605 - Materials Processing Techniques (3)
  - PHY5933 - Selected topics in biophysics of macromolecules (3)
  - OSE5312 - Light Matter Interaction (3)
  - OSE6938 - ST: Infrared Detectors (3)
  - MCB5225 - Molecular Biology of Disease (3)
  - PCB5238 - Immunobiology (3)
  - PCB5236 - Cancer Biology (3)
  - CHM6710 - Applied Analytical Chemistry (3)
  - Course Not Found

Thesis
6 Total Credits

- Complete all of the following
  - Earn at least 6 credits from the following:
    - IDS6971 - Thesis Research (3)
  - Students will conduct and complete an independent thesis research project under the supervision of a NanoScience Technology Center faculty. The student will defend the thesis at the completion of the study. Students will gain hands-on research experiences on nanomaterial synthesis, nanostructure fabrication and characterization, and application development in their interested areas.

Independent Study
3 Total Credits

- Complete all of the following
  - Earn at least 3 credits from the following:
    - IDS6908 - Directed Independent Studies (3)
  - Students will receive basic training under the supervision of a NanoScience Technology Center faculty to conduct research, including ethical training, safety training, attending seminar presentations, conduction a literature survey, and using various instrumentation techniques for research.

Elective Courses
15 Total Credits

- Complete all of the following
  Elective Courses
  - Complete all of the following
    - Earn at least 6 credits from the following:
      - IDS6257 - Principles and Techniques of Nanobiology (3)
      - IDS6258 - Advanced Materials and Nanotechnology for Rechargeable Batteries (3)
      - IDS6260 - Electrical and Optical Properties of Nanoscale Materials and Devices (3)
      - IDS6261 - Nanotechnology for Sustainable Agriculture (3)
      - EMA5586 - Photovoltaic Solar Energy Materials (3)
      - EMA5060 - Polymer Science and Engineering (3)
      - EMA6518 - Transmission Electron Microscopy (3)
      - EMA6605 - Materials Processing Techniques (3)
      - OSE5312 - Light Matter Interaction (3)
      - MCB5225 - Molecular Biology of Disease (3)
      - PCB5238 - Immunobiology (3)
      - PCB5236 - Cancer Biology (3)
      - CHM6710 - Applied Analytical Chemistry (3)
    - Elective courses may be chosen from the following recommended course list. Core courses taken beyond the 4-core course requirement may be used to satisfy the elective course requirement. Other courses may be taken as elective courses upon the approval of your graduate program director.

  Open Elective Courses
  - Earn at least 9 credits from the following types of courses:
    As part of completing programmatic requirements, student must also select an additional 9 credit hours of open elective courses in the general field of science, engineering, or business. These courses must be at the graduate level and be approved by the Program Director before registration. To be noted, one of these open electives could also be another 3 credit hours of Independent Study to continue research training under the supervision of a faculty.

Grand Total Credits: **30**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Nondegree or Transient

College

College of Graduate Studies

Department

College of Graduate Studies Dean's Office

Program Website

http://www.graduate.ucf.edu/

Is this program available 100% online?

No

Program Description

The Nondegree program is for students who have completed at least a baccalaureate degree from an accredited institution recognized by UCF in the United States and are not seeking a graduate degree. Students in this status may be interested in taking graduate courses at UCF for personal or professional enhancement, to prepare for possible admission to a graduate degree-seeking or certificate program, or to complete enrollment requirements at another university. Students who are enrolled in a graduate program at another university and want to take courses at UCF and transfer it to their home institution are considered transient students and nondegree-seeking at UCF.

Not all graduate degree programs at UCF allow students in Nondegree status to enroll in their courses. It is best to contact the program director for the graduate program that offers the course prior to applying.

Admission into Nondegree status does not guarantee admission to a graduate degree-seeking or certificate program at UCF. International students are not eligible for Nondegree status unless they hold an eligible visa. International students taking online courses from their home country are eligible to be nondegree seeking since they do not require a visa.

Is this program available 100% online?

No

Program Description

The Anatomical Sciences Graduate Certificate provides students with coursework to become an effective anatomist in higher education fields related to health and medical sciences. The program provides a depth of understanding of the anatomical sciences and substantial hands-on experience in the gross anatomy laboratory. The amount and level of coursework offers students the rigorous training to develop distinct expertise in anatomy knowledge, dissection technique, and instruction of anatomy requisite for careers as an anatomist in health or medical science education.

Program Prerequisites

Admission is open to those who have completed a graduate program in Physical Therapy, Occupational Therapy, or other related health or medical science-related discipline. Alternatively, those with a Bachelor's degree from a regionally accredited institution with a GPA of at least 3.5 in the following pre-requisite coursework will be considered:

Pre-requisites

- Anatomy or Anatomy and Physiology (8 credits total with labs)
- Physics (8 credits total with labs)
- Biology (6 credits minimum)
- Chemistry (6 credits minimum)

Licensure Disclosure

The program is fully accredited by the Commission on Accreditation of Athletic Training Education (CAATE) through 2026-27. For information on how this program may prepare students for professional licensure, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Master-of-Athletic-Training-June2020.pdf.

Program Description

The Master of Athletic Training (MAT) program is designed to enable students to demonstrate, in the classroom and during clinical experiences, that they have achieved levels of comprehension, competency, and proficiency expected of entry-level athletic trainers.

The program's classroom component is divided into two sections: athletic training theory and practice, and clinical experiences. The courses are designed to expose students to information through multiple didactic, laboratory, and clinical experiences. These courses incorporate the Curricular Content Standards set forth by the Commission on Accreditation of Athletic Training Education (CAATE).

All students are required to complete the curriculum in the established sequence of courses.

By combining excellence in teaching, the latest technologies available in education, and outstanding clinical site affiliations, graduates of the program are fully prepared to take and pass the comprehensive Board of Certification (BOC) exam and start their careers as athletic trainers.

The MAT degree program is a two-year full-time professional master's program. The courses are taken in a prescribed sequence over 6 semesters, including 18 credit hours of clinical practice. Clinical practice occurs under the direct supervision of a certified and licensed athletic trainer.

Mission

The Master of Athletic Training program prepares graduates to advance the quality of healthcare provided to physically active people through interdisciplinary patient-centered education. The Program is committed to providing students with enriching didactic, clinical, and research experiences that foster communication, critical thinking, leadership, and collaboration. Graduates of the Program will understand the role of the athletic trainer as a member of the healthcare team and will advocate for the advancement of the profession.

Vision

The Master of Athletic Training program aspires to be a nationally recognized leader in athletic training education where diverse students, faculty, and preceptors advance healthcare through innovation in education, research, and clinical practice.

Values

The Master of Athletic Training program faculty values initiative, integrity, compassion, inclusion, and altruism.

Program Prerequisites

Completion of prerequisite coursework outlined below with a minimum grade of "C" (2.0) is required. Candidates with all prerequisites completed at the time of application may be given preference over those still completing courses. Courses older than 10 years will not be accepted.

General Bio/Biology - A minimum of 4 credits (including a lab) for science majors - Biology courses for non-science majors and non-human biology courses are not acceptable.

Human Anatomy and Physiology - A minimum of 8 credits (including two labs) for science majors - Anatomy and physiology courses for non-science majors and non-human anatomy and physiology courses are not acceptable.

Option 1: One semester of Human Anatomy with lab and one semester of Human Physiology with lab

Option 2: Two semesters of Anatomy and Physiology combined courses with a lab each (A&P-I and A&P-II)

Statistics - A minimum of 3 credit hours

Human Nutrition /Clinical Nutrition - A minimum of 3 credit hours for science or health/medicine/nursing majors

General Psychology - A minimum of 3 credit hours - Any course taken within a psychology department/unit will be acceptable.

Exercise Physiology - A minimum of 3 credit hours

Biomechanics or Kinesiology - A minimum of 3 credit hours

General Chemistry/Chemistry I - A minimum of 4 credits (including a lab) for science majors

Physics I - A minimum of 4 credits (including a lab) for science majors

- Complete all of the following
  - Summer 1 - Semester 1
  - Complete the following:
    - ATR5016 - Foundational Behaviors of Athletic Training Practice I (1)
    - ATR5106C - Prevention of Injury and Illness in Athletic Training Practice (2)
    - ATR5206C - Functional Human Anatomy for Athletic Trainers (3)
    - ATR5117C - Acute Care in Athletic Training Practice I (3)

  Fall 1 - Semester 2
  - Complete the following:
    - ATR5017 - Foundational Behaviors of Athletic Training Practice II (1)
    - ATR5219C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice I (3)
    - ATR5306C - Therapeutic Interventions in Athletic Training Practice I (3)
    - ATR5406C - General Medical Conditions in Athletic Training Practice I (2)
    - ATR5617 - Athletic Training Research I (1)
    - ATR5815L - Practicum in Athletic Training I (2)

  Spring 1 - Semester 3
  - Complete the following:
    - ATR5217C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice II (3)
    - ATR5307C - Therapeutic Interventions in Athletic Training Practice II (3)
    - ATR5516 - Healthcare Administration in Athletic Training Practice I (2)
    - ATR5825L - Practicum in Athletic Training II (2)
    - ATR6407C - General Medical Conditions in Athletic Training Practice II (2)

  Summer 2 - Semester 4
  - Complete the following:
    - ATR6218C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice III (3)
    - ATR6308C - Therapeutic Interventions in Athletic Training Practice III (3)
    - ATR6618C - Athletic Training Research II (1)
    - ATR6835L - Practicum in Athletic Training III (1)

  Fall 2 - Semester 5
  - Complete the following:
    - ATR6309C - Therapeutic Interventions in Athletic Training Practice IV (3)
    - ATR6845L - Practicum in Athletic Training IV (9)

  Spring 2 - Semester 6
  - Complete the following:
    - ATR6517 - Healthcare Administration in Athletic Training Practice II (2)
    - ATR6505 - Athletic Training Seminar (1)
    - ATR6118L - Acute Care in Athletic Training Practice II (1)
    - ATR6619C - Athletic Training Research III (4)
    - ATR6855L - Practicum in Athletic Training V (4)

Comprehensive Examination
0 Total Credits

- Passing a comprehensive examination with a grade of 80 percent or better is a requirement for continued progress in the Master of Athletic Training degree. This examination will be given to every student at the end of the third semester (mid-point of the program). Students must take the exam at that time and will be allowed a maximum of three (3) attempts. Failure to pass the examination in 3 attempts will result in a review by the AT Program Progression and Retention Committee and may result in dismissal from the program.

Grand Total Credits: **65**

Program Details

Equipment Fee
Students enrolled full-time in the Master of Athletic Training degree program pay an estimated Equipment Fee of $56 each semester they are enrolled.

Additional Program Costs
Current expenses for tuition fees and other university fees are listed on the UCF Student Accounts website(https://studentaccounts.ucf.edu/tf-graduate/). Additionally, several MAT courses include Material and Supply fees which are listed in the UCF Graduate Catalog. Students in the MAT program are also expected to pay for the following: nametags, CPR/First Aid/AED certification, appropriate clinical attire, transportation costs, and background checks/fingerprinting.
Independent Learning
All students in the Master of Athletic Training program are required to engage in independent learning, a process in which individuals take the initiative, with or without the help of others, to attain knowledge, skills, and professional behaviors. Activities such as case studies, critical analysis of literature, research/capstone projects, and clinical practica provide important independent learning experiences that give students ample opportunity to demonstrate and develop independent learning skills.

Licensure Disclosure

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Communication-Sciences-Disorders-MA.pdf.

Program Description

The MA in Communication Sciences and Disorders is intended for those interested in working with children and adults who have communication disorders. The School of Communication Sciences and Disorders offers a traditional plan of study for full-time students with undergraduate degrees in communication sciences and disorders or speech-language pathology and audiology. In addition to the traditional plan of study, three tracks in the MA in Communication Sciences and Disorders are also offered: Accelerated, Consortium and Out of Field tracks. All programs are offered face-to-face on the Orlando campus, but each has unique admission requirements and sequencing of courses based on the student's academic and professional background. Students must begin the program in the semester for which they are admitted and must follow the prescribed sequence of academic and clinical courses outlined in the catalog for that track.

Each track provides academic and clinical education experiences necessary for certification by the American Speech-Language-Hearing Association (ASHA), the Florida Department of Education, and licensure by the state of Florida. For information on how this program may prepare students for professional licensure, please visit https://healthprofessions.ucf.edu/csd/masters/.

The ASHA Council on Academic Accreditation (CAA) has accredited the Master of Arts Degree in Communication Sciences and Disorders at UCF since 1986.

The Communication Sciences and Disorders program strives to educate students to become successful practitioners in the field of speech-language pathology. To that end, the ASHA Code of Ethics is reinforced throughout the academic curriculum. Violations of the ASHA Code of Ethics are grounds for academic sanctions or dismissal from the program.

The **Traditional** program is a full-time cohort program (six consecutive semesters, including two summers) for students with undergraduate degrees in communication sciences and disorders or speech-language pathology and audiology. Students with undergraduate degrees in other majors (out of field) should apply to the Out of Field track to complete additional undergraduate prerequisite coursework.

The **Consortium** track is a part-time cohort program offered as a cooperative effort between the UCF School of Communication Sciences and Disorders and the Central Florida Public School Consortium to address the critical shortage of public school speech-language pathologists in the area. Applicants to this track must be employed in one of the following participating school districts in the Central Florida Consortium: Brevard, Citrus, Flagler, Lake, Marion, Orange, Osceola, Seminole, Sumter, and Volusia.

The **Accelerated (BA/BS to MA)** requires full-time enrollment and enables highly qualified current UCF undergraduate students in Communication Sciences and Disorders to share one semester of courses between the undergraduate and graduate degree programs. Students enroll in graduate-level courses in the final semester of their undergraduate program to satisfy the bachelor's degree requirements. If admitted to the master's program, they are allowed to use those courses toward the master's degree.

The **Out of Field** track is a full-time cohort program for students who do not have a bachelor's degree in communication sciences and disorders or a related field or those who have not completed the necessary discipline-specific undergraduate prerequisite classes. It requires two semesters of undergraduate courses in addition to the graduate curriculum requirements and is typically completed in eight consecutive semesters.

Please scroll to the bottom of this page for further details on these Tracks.

Program Prerequisites

- To be certified to practice by the American Speech-Language-Hearing Association (ASHA), all applicants must have transcript credit, which could include course work, advanced placement, CLEP, or examination equivalency, for each of the following areas at the undergraduate level: biological sciences, physical sciences, social/behavioral sciences, and statistics.
    - Courses must be taken outside the discipline.
    - Courses other than statistics may consist of any number of credits.
    - Statistics course must be at least 3 credit hours and may be at the undergraduate (i.e. STA 2014 Principles of Statistics OR STA 2023 Statistical Methods I) or graduate level.
    - Courses must be completed with a grade of "C" or better.
- This program requires an undergraduate degree in communication sciences and disorders or speech-language pathology and audiology. Applicants with undergraduate degrees in other majors (out-of-field) should apply to the **Out of Field** track which includes additional required credit hours.

Degree Requirements

Required Courses
39 Total Credits

- Complete the following:
  - SPA6204 - Articulation/Phonological Dis (3)
  - SPA6211 - Voice and Upper Airway Disorders (3)
  - SPA6225C - Fluency Disorders (3)
  - SPA6236 - Motor Speech Disorders in Adults and Children (3)
  - SPA6327 - Aural Habilitation Rehab (3)
  - SPA6410 - Aphasia and Related Disorders (3)
  - SPA6474 - Assessment and Management of Culturally and Linguistically Diverse Populations (3)
  - SPA6541 - Assessment of Language Disorders in Children and Adolescents (3)
  - SPA6542 - Intervention of Language Disorders in Children and Adolescents (3)
  - SPA6559 - Augmentative and Alternative Communication (3)
  - SPA6565 - Feeding and Swallowing Disorders (3)
  - SPA6805 - Research in Communicative Disorders (3)
  - SPA6417 - Management of Acquired Cognitive/Communication Disorders Across the Lifespan (3)

Clinical Practice
24 Total Credits

- Complete all of the following
  - Complete the following:
    - SPA6551 - Foundations of Clinical Practice: Level I (1)
    - SPA6503 - Foundations of Clinical Practice Level II (1)
    - SPA6503L - Found Clinic Practice-II APP (1)
    - SPA6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology (1)
    - SPA6563L - Clinical Practice and Instrumental Diagnostics in Individuals with Dysphagia (1)
    - SPA6942 - Foundations of Clinical Practice: Level III (1)
    - SPA6942L - Found Clinic Practice-III APP (1)
    - SPA6943 - Advanced Clinical Practice Seminar (1)
  - Earn at least 2 credits from the following types of courses:
    Students are required to take both SPA 6503L and SPA 6942L twice.
  - Earn at least 14 credits from the following types of courses:
    SPA 6946 - Clinical Practice
  - Supervised clinical practice is an integral part of the graduate program in Communication Sciences and Disorders. It provides students with an opportunity to apply classroom knowledge to the evaluation and management of individuals with a wide variety of communication disorders. Students complete three clinical practica at the UCF Communication Disorders Clinic and other affiliated facilities, as well as external rotations in schools, hospitals, rehabilitation centers, skilled nursing facilities, long-term care facilities, community clinics, and private practices. Through these practica and external rotations, students obtain a minimum of 400 clock hours of supervised clinical experience in accordance with the guidelines outlined by the American Speech-Language-Hearing Association (ASHA). Clinical practica and external rotations vary in length and do not always coincide with the academic calendar.

Thesis/Nonthesis Option
9 Total Credits

- Complete 1 of the following
  Thesis Option
  - Complete all of the following
    - Earn at least 6 credits from the following types of courses:
      SPA 6971 - Thesis
    - Earn at least 3 credits from the following types of courses:
      Elective course selected in consultation with Faculty advisor.
    - Thesis hours cannot be counted toward graduation requirements if students fail to complete or successfully defend their thesis. For additional information, thesis students and their advisory committees should refer to the thesis requirements in the UCF Graduate Catalog.

  Nonthesis Option
  - Earn at least 9 credits from the following types of courses:
    Elective courses selected in consultation with Faculty advisor.

Comprehensive Examination and Clinical Documentation
0 Total Credits

- In additional to the coursework and supervised clinical clock hour requirements listed above, satisfactory completion of a School Comprehensive Examination and submission of final clinical documentation, including demonstration of clinical competence and professionalism are required for completion of the master's degree in Communication Sciences and Disorders.

Grand Total Credits: **72**

Program Details

Equipment Fee

Students in the Communication Sciences and Disorders MA Program pay a $90 equipment fee each semester they are enrolled.

Additional Program Costs

The program requires students to pay additional fees for the required background checks, clinic uniform, and registration for the academic/clinical competencies tracking system. In addition, some courses have Material and Supply fees that are charged in the semester the course is taken.

Sample Plan of Study for the Traditional Program

The Traditional MA program requires a prescribed sequence of academic and clinical courses which may vary according to the semester of entry. The following is a sample plan of study.

Semester 1 (13 credit hours)

- SPA 6204 - Articulation/Phonological Dis 3 Credit Hours
- SPA 6541 - Assessment of Language Disorders in Children and Adolescents 3 Credit Hours
- SPA 6542 - Intervention of Language Disorders in Children and Adolescents 3 Credit Hours
- SPA 6551 - Foundations of Clinical Practice: Level I 1 Credit Hours
- SPA 6805 - Research in Communicative Disorders 3 Credit Hours

Semester 2 (15 Credit Hours)

- SPA 6211 - Voice & Upper Airway Disorders 3 Credit Hours
- SPA 6410 - Aphasia and Related Disorders 3 Credit Hours
- SPA 6417 - Management of Acquired Cognitive-Communication Disorders Across the Lifespan 3 Credit Hours
- SPA 6503 - Foundations of Clinical Practice Level II 1 Credit Hours
- SPA 6503L - Found Clinic Practice-II APP 1 Credit Hours (X 2)
- SPA 6559 - Augmentative and Alternative Communication 3 Credit Hours

Semester 3 (13 Credit Hours)

- SPA 6327 - Aural Habilitation Rehab 3 Credit Hours
- SPA 6474 - Assessment and Management of Culturally and Linguistically Diverse Populations 3 Credit Hours
- SPA 6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology 1 Credit Hours
- SPA 6565 - Feeding and Swallowing Disorders 3 Credit Hours
- SPA 6942 - Foundations of Clinical Practice: Level III 1 Credit Hours
- SPA 6942L - Found Clinic Practice-III APP 1 Credit Hours (X 2)

Semester 4

- SPA 6225C - Fluency Disorders 3 Credit Hours
- SPA 6236 - Motor Speech Disorders in Adults and Children 3 Credit Hours
- SPA 6563L - Clinical Practice and Instrumental Diagnostics in Individuals with Dysphagia 1 Credit Hours
- SPA 6943 - Clinical Practice 1 Credit Hours
- SPA 6946 - Clinical Practice*
- Elective 3 Credit Hours*

Semester 5

- SPA 6946 - Clinical Practice*
- Elective 3 Credit Hours*

Semester 6

- SPA 6946 - Clinical Practice*
- Elective 3 Credit Hours*

*A total of 14 credit hours of SPA 6946 Clinical Practice is required. Electives are selected in consultation with the clinical and academic advisors and may be completed in the fourth, fifth and/or sixth semester depending on the clinical placement credit hours each semester.

Independent Learning

All students in the Master of Arts in Communication Sciences and Disorders program engage in independent learning through inquiry, dialogue, and practice. Experiences such as client case studies, scholarly reviews, research projects, clinical practica and external rotations provide students independent learning opportunities to attain knowledge, skills, and professional behaviors. In capstone external rotations, students bridge university classroom and clinic lessons to real-world educational and health-related settings.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Track Description

The Communication Sciences and Disorders MA program is intended for those interested in working with children and adults who have communication disorders. The School of Communication Sciences and Disorders offers an Accelerated BA/BS to MA Track for highly qualified UCF undergraduate majors in communication sciences and disorders that enables them to complete a master's degree in one less semester than students in the Traditional program. Once students complete the BA/BS, they must apply and be admitted to the master's degree program. Students must begin the program in the semester for which they are admitted and must follow the prescribed sequence of academic and clinical courses outlined in the catalog for that track. The program is offered face-to-face on the Orlando campus.

The Communication Sciences and Disorders program strives to educate students to become successful practitioners in the field of speech-language pathology. To that end, the American Speech-Language-Hearing Association (ASHA) Code of Ethics is reinforced throughout the academic curriculum. Violations of the ASHA Code of Ethics are grounds for academic sanctions or dismissal from the program.

Track Prerequisites

To be certified to practice by the American Speech-Language-Hearing Association (ASHA), all applicants must have transcript credit, which could include course work, advanced placement, CLEP, or examination equivalency, for each of the following areas at the undergraduate level: biological sciences, physical sciences, social/behavioral sciences, and statistics.

- Courses must be taken outside the discipline.
- Courses other than statistics may consist of any number of credits.
- Statistics course must be at least 3 credit hours and may be at the undergraduate (i.e. STA 2014 Principles of Statistics OR STA 2023 Statistical Methods I) or graduate level.
- Courses must be completed with a grade of "C" or better.

For the Accelerated BA/BS to MA track, UCF undergraduate students enroll in up to 16 credit hours of graduate-level courses while completing the bachelor's degree. This enables students to achieve a master's degree in the UCF School of Communication Sciences and Disorders in one less semester.

Up to 16 credit hours of approved 6000-level courses as outlined below, with grades of "B" (3.0) or better, may be counted toward the BA/BS and MA degrees. Additional requirements include:

- Adopting the most current undergraduate catalog for students changing degree programs.
- Earning at least a "B" (3.0) in each undergraduate and graduate course to be counted toward the major.
- Being assessed tuition and fees at the graduate rate for graduate courses.

Undergraduate Requirements

The Shared Courses below may be used to replace:

- SPA 4400 Language Disorders Across the Life Span
- SPA 4476 Speech Disorders Across the Life Span
- SPA 4478 Multicultural Aspects of Communication Disorders and Differences
- SPA 4803 Research Methods in Communication Sciences and Disorders
- SPA 4870 Capstone Course
- one restricted elective in the undergraduate curriculum

Shared Courses

The following is a list of graduate courses that may be used to fulfill degree requirements for both the undergraduate and graduate programs.

- SPA 6204 - Articulation/Phonological Dis **3 Credit Hours**
- SPA 6410 - Aphasia and Related Disorders **3 Credit Hours**
- SPA 6551 - Foundations of Clinical Practice: Level I **1 Credit Hours**
- SPA 6541 - Assessment of Language Disorders in Children and Adolescents **3 Credit Hours**
- SPA 6542 - Intervention of Language Disorders in Children and Adolescents **3 Credit Hours**
- SPA 6805 - Research in Communicative Disorders **3 Credit Hours**

Additional Program Cost

The program requires students to pay additional fees for the required background checks, clinic uniform, and registration for the academic/clinical competencies tracking system. In addition, some courses have Material and Supply fees that are charged in the semester the course is taken.

Sample Plan of Study for the Traditional Program

The Accelerated BA/BS to MA program requires a prescribed sequence of academic and clinical courses which may vary according to the semester of entry. The following is a sample plan of study.

Semester 1 (13 credit hours) - typically completed as an undergraduate student

- SPA 6204 - Articulation/Phonological Dis 3 Credit Hours
- SPA 6541 - Assessment of Language Disorders in Children and Adolescents 3 Credit Hours
- SPA 6542 - Intervention of Language Disorders in Children and Adolescents 3 Credit Hours
- SPA 6551 - Foundations of Clinical Practice: Level I 1 Credit Hours
- SPA 6805 - Research in Communicative Disorders 3 Credit Hours

Semester 2 (15 Credit Hours)

- SPA 6211 - Voice Disorders 3 Credit Hours
- SPA 6410 - Aphasia and Related Disorders 3 Credit Hours
- SPA 6417 - Management of Acquired Cognitive/Communication Disorders Across the Lifespan 3 Credit Hours
- SPA 6503 - Foundations of Clinical Practice Level II 1 Credit Hours
- SPA 6503L - Found Clinic Practice-II APP 1 Credit Hours (X 2)
- SPA 6559 - Augmentative and Alternative Communication 3 Credit Hours

Semester 3 (13 Credit Hours)

- SPA 6327 - Aural Habilitation Rehab 3 Credit Hours
- SPA 6474 - Assessment and Management of Culturally and Linguistically Diverse Populations 3 Credit Hours
- SPA 6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology 1 Credit Hours
- SPA 6565 - Feeding and Swallowing Disorders 3 Credit Hours
- SPA 6942 - Foundations of Clinical Practice: Level III 1 Credit Hours
- SPA 6942L - Found Clinic Practice-III APP 1 Credit Hours (X 2)

Semester 4

- SPA 6225C - Fluency Disorders 3 Credit Hours
- SPA 6236 - Motor Speech Disorders in Adults and Children 3 Credit Hours
- SPA 6563L - Clinical Practice and Instrumental Diagnostics in Individuals with Dysphagia 1 Credit Hours
- SPA 6943 - Clinical Practice 1 Credit Hours
- SPA 6946 - Clinical Practice*
- Elective 3 Credit Hours*

Semester 5

- SPA 6946 - Clinical Practice*
- Elective 3 Credit Hours*

Semester 6

- SPA 6946 - Clinical Practice*
- Elective 3 Credit Hours*

*A total of 14 credit hours of SPA 6946 Clinical Practice is required. Electives are selected in consultation with the clinical and academic advisors and may be completed in the fourth, fifth and/or sixth semester depending on the clinical placement credit hours each semester.

Track Description

The MA in Communication Sciences and Disorders is intended for those interested in working with children and adults who have communication disorders. The School of Communication Sciences and Disorders offers the Consortium track which is designed specifically for students with a bachelor's degree in communication sciences and disorders or speech-language pathology and audiology who currently work in participating central Florida public school districts and have been providing speech and language services for at least one semester prior to application. The goal of this program is to address the critical shortage of public-school speech-language pathologists. It represents a cooperative effort between the UCF School of Communication Sciences and Disorders and the Central Florida Public School Consortium. Participating school districts in the Central Florida Consortium are Brevard, Citrus, Flagler, Lake, Marion, Orange, Osceola, Seminole, Sumter, and Volusia.

Students must begin the program in the semester for which they are admitted and enroll every semester, including summers, for eight semesters following a prescribed sequence of academic and clinical courses. The program is offered face-to-face on the Orlando campus.

The Communication Sciences and Disorders program strives to educate students to become successful practitioners in the field of speech-language pathology. To that end, the American Speech-Language-Hearing Association (ASHA) Code of Ethics is reinforced throughout the academic curriculum. Students who violate the ASHA Code of Ethics may be subject to academic sanctions or dismissed from the program.

Track Prerequisites

To be certified to practice by the American Speech-Language-Hearing Association (ASHA), all students must have transcript credit, which could include course work, advanced placement, CLEP, or examination equivalency, for each of the following areas at the undergraduate level: biological sciences, physical sciences, social/behavioral sciences, and statistics.

- Courses must be taken outside the discipline.
- Courses other than statistics may consist of any number of credits.
- Statistics course must be at least 3 credit hours and may be at the undergraduate (i.e. STA 2014 Principles of Statistics OR STA 2023 Statistical Methods I) or graduate level.
- Courses must be completed with a grade of "C" or better.

This track requires an undergraduate degree in communication sciences and disorders or speech-language pathology and audiology and full-time employment in one of the participating school districts listed above.

Students in the Communication Sciences and Disorders MA Program pay a $90 equipment fee each semester that they are enrolled.

Additional Program Costs

The program requires students to pay additional fees for the required background checks, clinic uniform, and registration for the academic/clinical competencies tracking system. In addition, some courses have Material and Supply fees that are charged in the semester the course is taken.

The Consortium track requires a prescribed sequence of academic and clinical courses which must be followed. The following is a sample plan of study.

Semester 1 - Spring (7 credit hours)

- SPA 6541 - Assessment of Language Disorders in Children and Adolescents 3 Credit Hours
- SPA 6542 - Intervention of Language Disorders in Children and Adolescents 3 Credit Hours
- SPA 6551 - Foundations of Clinical Practice: Level I 1 Credit Hours

Semester 2 - Summer (13 Credit Hours)

- SPA 6410 - Aphasia and Related Disorders 3 Credit Hours
- SPA 6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology 1 Credit Hours
- SPA 6559 - Augmentative and Alternative Communication 3 Credit Hours
- SPA 6565 - Feeding and Swallowing Disorders 3 Credit Hours
- SPA 6942 - Foundations of Clinical Practice: Level III 1 Credit Hours
- SPA 6942L - Found Clinic Practice-III APP 1 Credit Hours (X 2)

Semester 3 - Fall (9 Credit Hours)

- SPA 6204 - Articulation/Phonological Dis 3 Credit Hours
- SPA 6474 - Assessment and Management of Culturally and Linguistically Diverse Populations 3 Credit Hours
- SPA 6503 - Foundations of Clinical Practice Level II 1 Credit Hours
- SPA 6503L - Found Clinic Practice-II APP 1 Credit Hours (X 2)

Semester 4 - Spring (6 Credit Hours)

- SPA 6225C - Fluency Disorders 3 Credit Hours
- SPA 6236 - Motor Speech Disorders in Adults and Children 3 Credit Hours

Semester 5 - Summer

- SPA 6211 - Voice Disorders 3 Credit Hours
- SPA 6327 - Aural Habilitation Rehab 3 Credit Hours
- SPA 6943 - Clinical Practice 1 Credit Hours
- SPA 6946 - Clinical Practice*

Semester 6 - Fall (7 Credit Hours)

- SPA 6563L - Clinical Practice and Instrumental Diagnostics in Individuals with Dysphagia 1 Credit Hours
- Elective - SPA 6843 Severe Reading and Writing Disorders 3 Credit Hours
- Elective - SPA 6057 Methods of Speech Language Disorders 3 Credit Hours

Semester 7 - Spring

- SPA 6417 - Management of Acquired Cognitive-Communication Disorders Across the Lifespan 3 Credit Hours
- SPA 6805 - Research in Communicative Disorders 3 Credit Hours
- SPA 6946 - Clinical Practice*

Semester 8 - Summer

- SPA 6946 - Clinical Practice*
- Elective 3 Credit Hours*

*A total of 14 credit hours of SPA 6946 Clinical Practice is required. Electives are selected in consultation with the clinical and academic advisors.

Independent Learning

All students in the Master of Arts in communication sciences and disorders program engage in independent learning through inquiry, dialogue, and practice. Experiences such as client case studies, scholarly reviews, research projects, clinical practica and external

rotations provide students independent learning opportunities to attain knowledge, skills and professional behaviors. In capstone external rotations, students bridge university classroom and clinic lessons to real-world educational and health-related settings.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Licensure Disclosure

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Communication-Sciences-Disorders-MA.pdf.

Track Description

The MA in Communication Sciences and Disorders is intended for those interested in working with children and adults who have communication disorders. The School of Communication Sciences and Disorders offers the Out of Field track for highly-competitive students who do not hold a bachelor's degree in communication sciences and disorders or speech-language pathology and audiology and who have not completed the required undergraduate prerequisite courses. The Out of Field program requires an additional 21 credit hours of undergraduate foundation core coursework that is typically completed in the first two semesters of the graduate program prior and must be completed prior to starting graduate coursework.

Out of field students who completed undergraduate courses as part of a formal bridge program should apply to the traditional program, not the Out of Field program.

Students must begin the program in the semester for which they are admitted and must follow the prescribed sequence of academic and clinical courses outlined in the catalog for that track.

Track Prerequisites

General Program Prerequisites

To be certified to practice by the American Speech-Language-Hearing Association (ASHA), all applicants must have transcript credit, which could include course work, advanced placement, CLEP, or examination equivalency, for each of the following areas at the undergraduate level: biological sciences, physical sciences, social/behavioral sciences, and statistics. Out of field students who have not completed these courses must complete these general prerequisites prior to enrolling in graduate coursework.

- Courses must be taken outside the discipline.
- Courses other than statistics may consist of any number of credits.
- Statistics course must be at least 3 credit hours and may be at the undergraduate or graduate level (i.e. STA 2014 Principles of Statistics - OR - STA 2023 Statistical Methods I).
- Courses must be completed with a grade of "C" or better.
- A maximum of two of these may be completed after admission as an Out of Field Graduate student.

Communication Sciences and Disorders Foundation Core - 21 Credit Hours

The Communication Sciences and Disorders foundation core is designed to help prepare students who do not have an undergraduate degree in communication sciences and disorders or speech language pathology and audiology for graduate coursework in the program. Once admitted to the program, out of field students must complete the Foundation Core prior to enrolling in any graduate coursework. All undergraduate Foundation Core courses are part of the student's official graduate plan of study and all graduate policies, including low grade policy and minimum GPA policy apply.

- LIN 3716/3716L - Language Development and Lab **5 Credit Hours**
- SPA 3101 - Physiological Bases of Speech and Hearing **3 Credit Hours**
- SPA 3104 - Neural Bases of Communication **3 Credit Hours**
- SPA 3112C - Basic Phonetics and Lab **4 Credit Hours**
- SPA 3011 - Speech Science **3 Credit Hours**
- SPA 4032 - Audiology **3 Credit Hours**

Out of field students who have completed a formal bridge program should apply to the traditional Communication Sciences and Disorders program, not the Out of Field track.

Degree Requirements

Required Core Courses
39 Total Credits

- Complete the following:
  - SPA6204 - Articulation/Phonological Dis (3)
  - SPA6211 - Voice and Upper Airway Disorders (3)
  - SPA6225C - Fluency Disorders (3)
  - SPA6236 - Motor Speech Disorders in Adults and Children (3)
  - SPA6327 - Aural Habilitation Rehab (3)
  - SPA6410 - Aphasia and Related Disorders (3)
  - SPA6417 - Management of Acquired Cognitive/Communication Disorders Across the Lifespan (3)
  - SPA6474 - Assessment and Management of Culturally and Linguistically Diverse Populations (3)
  - SPA6541 - Assessment of Language Disorders in Children and Adolescents (3)
  - SPA6542 - Intervention of Language Disorders in Children and Adolescents (3)
  - SPA6559 - Augmentative and Alternative Communication (3)
  - SPA6565 - Feeding and Swallowing Disorders (3)
  - SPA6805 - Research in Communicative Disorders (3)

Clinical Practice
24 Total Credits

- Complete all of the following
  - Complete the following:
    - SPA6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology (1)
    - SPA6503 - Foundations of Clinical Practice Level II (1)
    - SPA6503L - Found Clinic Practice-II APP (1)
    - SPA6503L - Found Clinic Practice-II APP (1)
    - SPA6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology (1)
    - SPA6563L - Clinical Practice and Instrumental Diagnostics in Individuals with Dysphagia (1)
    - SPA6942L - Found Clinic Practice-III APP (1)
    - SPA6942L - Found Clinic Practice-III APP (1)
    - SPA6942L - Found Clinic Practice-III APP (1)
    - SPA6943 - Advanced Clinical Practice Seminar (1)
  - Students must complete SPA 6503L and SPA 6942L twice
  - Earn at least 14 credits from the following types of courses:
    SPA6946 Clinical Practice
  - Supervised clinical practice is an integral part of the graduate program in Communication Sciences and Disorders. It provides students with an opportunity to apply classroom knowledge to the evaluation and management of individuals with a wide variety of communication disorders. Students complete three clinical practica at the UCF Communication Disorders Clinic and other affiliated facilities, as well as external rotations in schools, hospitals, rehabilitation centers, skilled nursing facilities, long-term care facilities, community clinics, and private practices. Through these practica and external rotations, students obtain a minimum of 400 clock hours of supervised clinical experience in accordance with the guidelines outlined by the American Speech-Language-Hearing Association (ASHA). Clinical practica and external rotations vary in length and do not always coincide with the academic calendar.

Thesis/Nonthesis Option
9 Total Credits

- Complete 1 of the following
  - Complete all of the following
    - Earn at least 6 credits from the following types of courses:
      SPA 6971 - Thesis
    - Earn at least 3 credits from the following types of courses:
      Elective course selected in consultation with Faculty advisor.
  - Earn at least 9 credits from the following types of courses:
    Elective courses selected in consultation with Faculty advisor.

Comprehensive Examination and Clinical Documentation
0 Total Credits

- In additional to the coursework and supervised clinical clock hour requirements listed above, satisfactory completion of a School Comprehensive Examination and submission of final clinical documentation, including demonstration of clinical competence and professionalism are required for completion of the master's degree in Communication Sciences and Disorders.

Grand Total Credits: **72**

Track Details

Equipment Fee

Students in the Communication Sciences and Disorders MA Program pay a $90 equipment fee each semester they are enrolled.

Additional Program Costs

The program requires students to pay additional fees for the required background checks, clinic uniform, and registration for the academic/clinical competencies tracking system. In addition, some courses have Material and Supply fees that are charged in the semester the course is taken.

Sample Plan of Study for the Out of Field Track

The Out of Field track requires a prescribed sequence of academic and clinical courses, including undergraduate courses, which may vary according to the semester of entry. The following is a sample plan of study.

Semester 1 (11 credit hours)

- LIN 3716/3716L - Language Development and Lab **5 Credit Hours**
- SPA 3101 - Physiological Bases of Speech and Hearing **3 Credit Hours**
- SPA 3104 - Neural Bases of Communication **3 Credit Hours**

Semester 2 (10 credit hours)

- SPA 3112C - Basic Phonetics and Lab **4 Credit Hours**
- SPA 3011 - Speech Science **3 Credit Hours**
- SPA 4032 - Audiology **3 Credit Hours**

Semester 3 (Semester 1 of graduate coursework) (13 credit hours)

- SPA 6204 - Articulation/Phonological Dis 3 Credit Hours
- SPA 6541 - Assessment of Language Disorders in Children and Adolescents 3 Credit Hours
- SPA 6542 - Intervention of Language Disorders in Children and Adolescents 3 Credit Hours
- SPA 6551 - Foundations of Clinical Practice: Level I 1 Credit Hours
- SPA 6805 - Research in Communicative Disorders 3 Credit Hours

Semester 4 (15 credit hours)

- SPA 6211 - Voice Disorders 3 Credit Hours
- SPA 6410 - Aphasia and Related Disorders 3 Credit Hours
- SPA 6417 - Management of Acquired Cognitive-Communication Disorders Across the Lifespan 3 Credit Hours
- SPA 6503 - Foundations of Clinical Practice Level II 1 Credit Hours
- SPA 6503L - Found Clinic Practice-II APP 1 Credit Hours (X 2)
- SPA 6559 - Augmentative and Alternative Communication 3 Credit Hours

Semester 5 (13 credit hours)

- SPA 6327 - Aural Habilitation Rehab 3 Credit Hours
- SPA 6474 - Assessment and Management of Culturally and Linguistically Diverse Populations 3 Credit Hours
- SPA 6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology 1 Credit Hours
- SPA 6565 - Feeding and Swallowing Disorders 3 Credit Hours
- SPA 6942 - Foundations of Clinical Practice: Level III 1 Credit Hours
- SPA 6942L - Found Clinic Practice-III APP 1 Credit Hours (X 2)
-

Semester 6

- SPA 6225 - Fluency Disorders 3 Credit Hours
- SPA 6236 - Motor Speech Disorders in Adults and Children 3 Credit Hours
- SPA 6563L - Clinical Practice and Instrumental Diagnostics in Individuals with Dysphagia 1 Credit Hours
- SPA 6943C - Clinical Practice 1 Credit Hours
- SPA 6946 - Clinical Practice*
- Elective 3 Credit Hour*

Semester 7

- SPA 6946 - Clinical Practice*
- Elective 3 Credit Hours*

Semester 8

- SPA 6946 - Clinical Practice*
- Elective 3 Credit Hours*

*A total of 14 credit hours of SPA 6946 Clinical Practice is required. Electives are selected in consultation with the clinical and academic advisors and may be completed in the fourth, fifth and/or sixth semester depending on the clinical placement credit hours each semester.

Independent Learning

All students in the Master of Arts in Communication Sciences and Disorders program engage in independent learning through inquiry, dialogue, and practice. Experiences such as client case studies, scholarly reviews, research projects, clinical practica and external rotations provide students independent learning opportunities to attain knowledge, skills, and professional behaviors. In capstone external rotations, students bridge university classroom and clinic lessons to real-world educational and health-related settings.

Program Description

The Master of Science in Kinesiology provides an in-depth study of applied human physiology and how it relates to exercise, athletic performance and health and wellness across the lifespan.

The Master of Science in Kinesiology offers two Non-Thesis options, a Thesis option, and an Anatomical Sciences Specialization for students. All options require a minimum of 36 credit hours. All students are automatically placed in the Non-Thesis option. Students wishing to pursue the Thesis option must receive approval from the graduate program director and have a commitment from a faculty member to serve as the thesis committee chair. Due to limited enrollment, students wishing to pursue the Anatomical Sciences Specialization must also receive approval from the graduate program director.

Students in the Non-Thesis option are required to participate in APK 6946 - Graduate Internship in Kinesiology that will serve as their culminating graduate experience or take an independent learning experience (APK 6909 - Problem Analysis - Review of Literature) that involves a detailed literature review specific to a subject area of the student's interest under the supervision of graduate faculty.

The Anatomical Sciences Specialization provides a depth of understanding of the anatomical sciences and substantial hands-on experience in the gross anatomy laboratory. Students interested in pursuing the Anatomical Sciences Graduate Certificate (https://healthprofessions.ucf.edu/physicaltherapy/anatomical-sciences/) must gain admission to the certificate program prior to completing the specified electives, which may be substituted for elective courses listed below.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Applicants who hold an undergraduate degree in an unrelated field are expected to have the equivalent of 8 semester hours of anatomy and physiology.

Required Courses
12 Total Credits

- Complete the following:
  - APK6116 - Exercise Physiology I (3)
  - APK6127 - Assessment and Evaluation in Kinesiology (3)
  - APK6170 - Exercise Physiology II (3)
  - APK6713 - Research Methods in Kinesiology (3)

Thesis/Nonthesis Option
24 Total Credits

- Complete 1 of the following
  Nonthesis Route
  - Complete 1 of the following
    Nonthesis Option 1
    - Complete all of the following
      - Earn at least 3 credits from the following:
        - APK6946 - Graduate Internship in Kinesiology (6)
      - Earn at least 21 credits from the following:

- APK6102 - Functional Anatomy and Kinesiology (3)
- APK6104 - Youth Physical and Athletic Development (3)
- APK6107 - Cardiovascular Exercise Physiology (3)
- APK6124 - Environmental Exercise Physiology (3)
- PHT6161C - Neuroplasticity of Human Movement (3)
- APK6167 - Sport Nutrition and Ergogenic Aids (3)
- APK6171 - Exercise Prescription for Special Populations (3)
- APK6173C - Body Composition and Anthropometrics (3)
- APK6176 - Program Design in Strength and Conditioning (3)
- APK6235 - Kinesiology Instrumentation (3)
- APK6408 - Motivational Aspects in Athletic Performance (3)
- APK6612 - Monitoring Training and Athletic Performance (3)
- APK6703 - Statistical Methods in Kinesiology (3)
- PET6363 - Dietary and Nutritional Supplementation for Athletic Performance (3)
- APK6168 - Exercise, Nutrition and Weight Control (3)
- PET6372 - Physical Activity and Nutritional Epidemiology (3)
- APK6118C - Neuromuscular Physiology of Human Movement (3)
- PET7387 - Exercise Endocrinology (3)

- All electives are subject to course availability and selected in conjunction with the student's graduate advisor or the graduate coordinator. Up to 6 credits of APK 6946 - Graduate Internship in Kinesiology may be taken; however, 3 credits will be applied towards the other elective requirements.

Nonthesis Option 2

- Complete all of the following
  - Complete the following:
    - APK6909 - Problem Analysis - Review of Literature (3)
  - Earn at least 21 credits from the following:
    - APK6703 - Statistical Methods in Kinesiology (3)
    - APK6102 - Functional Anatomy and Kinesiology (3)
    - APK6104 - Youth Physical and Athletic Development (3)
    - APK6107 - Cardiovascular Exercise Physiology (3)
    - APK6124 - Environmental Exercise Physiology (3)
    - PHT6161C - Neuroplasticity of Human Movement (3)
    - APK6167 - Sport Nutrition and Ergogenic Aids (3)
    - APK6171 - Exercise Prescription for Special Populations (3)
    - APK6173C - Body Composition and Anthropometrics (3)
    - APK6176 - Program Design in Strength and Conditioning (3)
    - APK6235 - Kinesiology Instrumentation (3)
    - APK6408 - Motivational Aspects in Athletic Performance (3)
    - APK6612 - Monitoring Training and Athletic Performance (3)
    - PET6363 - Dietary and Nutritional Supplementation for Athletic Performance (3)
    - APK6168 - Exercise, Nutrition and Weight Control (3)
    - PET6372 - Physical Activity and Nutritional Epidemiology (3)
    - APK6118C - Neuromuscular Physiology of Human Movement (3)
    - PET7387 - Exercise Endocrinology (3)
  - All electives are subject to course availability and selected in conjunction with the student's graduate advisor or the graduate coordinator.

Thesis Option

- Complete all of the following
  - Earn at least 6 credits from the following:
    - APK6971 - Thesis (99)
  - Complete the following:
    - APK6703 - Statistical Methods in Kinesiology (3)
  - Earn at least 15 credits from the following:
    - APK6703 - Statistical Methods in Kinesiology (3)
    - APK6102 - Functional Anatomy and Kinesiology (3)
    - APK6104 - Youth Physical and Athletic Development (3)
    - APK6107 - Cardiovascular Exercise Physiology (3)
    - APK6124 - Environmental Exercise Physiology (3)
    - APK6167 - Sport Nutrition and Ergogenic Aids (3)
    - APK6171 - Exercise Prescription for Special Populations (3)
    - APK6176 - Program Design in Strength and Conditioning (3)
    - APK6235 - Kinesiology Instrumentation (3)
    - APK6173C - Body Composition and Anthropometrics (3)
    - APK6408 - Motivational Aspects in Athletic Performance (3)
    - APK6612 - Monitoring Training and Athletic Performance (3)
    - PET6363 - Dietary and Nutritional Supplementation for Athletic Performance (3)
    - APK6168 - Exercise, Nutrition and Weight Control (3)
    - PET6372 - Physical Activity and Nutritional Epidemiology (3)
    - APK6118C - Neuromuscular Physiology of Human Movement (3)
    - PET7387 - Exercise Endocrinology (3)

- PHT6161C - Neuroplasticity of Human Movement (3)
- All electives are subject to course availability and selected in conjunction with the student's graduate advisor or the graduate coordinator.

Anatomical Sciences Specialization

- Complete all of the following
  - Complete the following:
    - PHT6115C - Gross Anatomy/Neuroscience I (6)
    - PHT6118C - Gross Anatomy/Neuroscience II (6)
    - PHT6119L - Seminar in Anatomical Sciences Techniques (3)
    - PHT6510 - Administration of Anatomical Sciences Laboratory (3)
  - Earn at least 6 credits from the following:
    - APK6102 - Functional Anatomy and Kinesiology (3)
    - APK6104 - Youth Physical and Athletic Development (3)
    - APK6107 - Cardiovascular Exercise Physiology (3)
    - APK6124 - Environmental Exercise Physiology (3)
    - APK6167 - Sport Nutrition and Ergogenic Aids (3)
    - APK6171 - Exercise Prescription for Special Populations (3)
    - APK6176 - Program Design in Strength and Conditioning (3)
    - APK6235 - Kinesiology Instrumentation (3)

Program Description

The Kinesiology PhD program provides advanced studies in the area of kinesiology, exercise physiology, and sport science. It is offered by the School of Kinesiology and Physical Therapy, home to the Institute of Exercise Physiology and Rehabilitation Science in the College of Health Professions and Sciences.
The degree program combines state-of-the-art research facilities using cutting-edge technology with high quality and innovate instruction and curriculum. The program welcomes students from a variety of educational backgrounds including the biological and health-related professions, exercise science, physical education, or athletic training.

    - APK6104 - Youth Physical and Athletic Development (3)
    - APK6107 - Cardiovascular Exercise Physiology (3)
    - APK6124 - Environmental Exercise Physiology (3)
    - APK6127 - Assessment and Evaluation in Kinesiology (3)
    - APK6167 - Sport Nutrition and Ergogenic Aids (3)
    - APK6170 - Exercise Physiology II (3)
    - APK6171 - Exercise Prescription for Special Populations (3)
    - APK6176 - Program Design in Strength and Conditioning (3)
    - APK6235 - Kinesiology Instrumentation (3)
    - APK6909 - Problem Analysis - Review of Literature (3)
    - EDF7406 - Multivariate Statistics in Education (3)
    - EDF7410 - Application of Nonparametric and Categorical Data Analysis in Education (3)
    - EDF7474 - Multilevel Data Analysis In Education (3)
    - EDF7488 - Monte Carlo Simulation Research in Education (3)
    - PET6363 - Dietary and Nutritional Supplementation for Athletic Performance (3)
    - APK6168 - Exercise, Nutrition and Weight Control (3)
    - PET6372 - Physical Activity and Nutritional Epidemiology (3)
    - APK6118C - Neuromuscular Physiology of Human Movement (3)
    - PET7387 - Exercise Endocrinology (3)
    - PHT6115C - Gross Anatomy/Neuroscience I (6)
    - PHT6118C - Gross Anatomy/Neuroscience II (6)

Dissertation
15 Total Credits

- Complete all of the following
    - Doctoral students must present a prospectus for the dissertation to the doctoral adviser, prepare a proposal and present it to the dissertation committee, and defend the final research submission with the dissertation committee. All students must complete the candidacy examination prior to enrolling in Dissertation.
    - Earn at least 15 credits from the following:
        - APK7980 - Dissertation (99)

Candidacy Requirements
0 Total Credits

- The following are required to be admitted to candidacy for the Kinesiology Ph.D. and to enroll in dissertation hours: - Submission of an approved program of study. - Completion of all graduate course work, except for dissertation hours, with an overall 3.0 GPA. - Proof of current professional certification(s) demonstrating industry-relevant competencies. - Formation of a qualifying examination committee consisting of approved graduate faculty and graduate faculty scholars. - Successful completion of the qualifying examination/pre-dissertation project. - Formation of a dissertation advisory committee consisting of approved graduate faculty and graduate faculty scholars. - Successful defense of the written dissertation proposal which serves as the candidacy examination.

Qualifying Examination
0 Total Credits

- The purpose of the Qualifying Examination is to evaluate the student’s depth and breadth of knowledge in the field of study, including theory and research methodology. The Qualifying Examination is intended to be completed near the end of the second year of study and must be completed prior to taking the Candidacy Exam. Students must be enrolled in the university during the semester an examination is taken. Details about the Qualifying Exam can be found in the Kinesiology PhD Student Handbook.

Candidacy Examination
0 Total Credits

- The purpose of the Candidacy Examination is to evaluate the student’s proposed research plan for their dissertation. The Candidacy Examination is completed after the Qualifying Examination and includes both a written dissertation proposal and an oral presentation of the proposal. Details about the Qualifying Exam can be found in the Kinesiology PhD Student Handbook.

Grand Total Credits: **63**

Program Details

Independent Learning

The dissertation satisfies the independent learning requirement.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Medical Speech-Language Pathology Graduate Certificate

College

College of Health Professions and Sciences

Department

School of Communication Sciences and Disorders

Program Prerequisites

This certificate program has been temporarily suspended effective Summer 2016.

Courses from a previous graduate degree program or certificate program cannot be applied toward the completion of the Certificate in Medical Speech-Language Pathology.

Current students in UCF's Communication Sciences and Disorders MA program may only apply SPA 6565 - Feeding and Swallowing Disorders, toward both the Medical Speech-Language Pathology Certificate and the master's degree in communication sciences and disorders. Nine credit hours will need to be taken in addition to the regular master's program course requirements.

Program Description

Students pursuing a Master of Social Work degree may choose a specialization in military social work.

The Graduate Certificate in Military Social Work will prepare students to provide behavioral health services, including mental health counseling aimed at building psychological resilience; treatment of post-traumatic stress disorder, depression, anxiety, suicide risk assessment and prevention techniques; and family therapy for strengthening military, veterans, and their families during and after deployment.

The Military Social Work certificate is open to current UCF MSW Traditional and Advanced Standing students and a limited number of Counselor Education students only. Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

The following courses are required for the certificate but may also be used as electives in the MSW program.

Total Credit Hours Required: 9 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Admission is open to current students in the UCF Master of Social Work program and a limited number of students in the UCF Counselor Education master's program. Students interested in admission to this certificate program should contact the MSW Admissions Specialist or by calling (407) 823-3474 for more information.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit **https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Doctor-of-Physical-Therapy.pdf**.

Program Description

The Doctor of Physical Therapy (DPT) program educates students to become competent, compassionate, and ethical practitioners in a variety of health care settings. Graduates will be highly dedicated professionals with excellent patient care, communication, critical thinking, patient education and advocacy, management and research skills.

The Doctor of Physical Therapy program is a three-year (nine consecutive semesters) professional doctoral curriculum designed to prepare entry-level therapists to practice in a variety of clinical settings. The professional curriculum is a full-time "lock-step" program. The program includes multiple clinical education experiences (internships) ranging from eight weeks to twelve weeks in duration. It also includes focused interprofessional education activities involving students from other professional disciplines as well as research training and activities.

Students who successfully complete the course of study will be granted the Doctor in Physical Therapy degree (DPT), enabling the graduate to take the national board examination leading to state licensure as a Physical Therapist.

The UCF Doctor of Physical Therapy program promotes lifelong learning and professional development, which is attained through active involvement in professional organizations such as the American Physical Therapy Association. UCF's Doctor of Physical Therapy Program is fully accredited by the Commission on Accreditation of Physical Therapy Education.

Mission

The mission of the University of Central Florida's Doctor of Physical Therapy Program is to cultivate excellence in physical therapist practice through comprehensive and focused doctoral education. The program fosters excellence through its dedication to foundational sciences, clinical skill proficiency, research and evidence-based practice, service and professional duty, and lifelong learning. The program is committed to the development of a diverse and inclusive healthcare community in order to optimize patient care in the dynamic healthcare environment.

Vision

The Doctor of Physical Therapy Program at the University of Central Florida will be distinguished for:

- Its breadth, depth, and collaborative approach to physical therapist education
- Clinical excellence and advancement of clinical practice
- Scholarly achievements and professional recognition of students, faculty, and clinical partners
- Dedication to the health and well-being of the Central Florida community
- Professional commitment and advocacy for the advancement of the practice of physical therapy

Program Prerequisites

Each prerequisite course must be completed with a minimum grade of "C". The overall GPA for all prerequisite courses must be a 3.00 or higher to be considered for admission. The program recommends all prerequisite courses be completed at the time of application. Candidates with all prerequisites completed at the time of application may be given preference over those still completing courses. **No more than two prerequisite courses may be in progress the fall semester prior to the program's start and no more than one course may be in progress during the spring semester prior to the program's start.** Courses older than ten years will not be accepted. Email ptinfo@ucf.edu to request a prerequisite review.

Anatomy and Physiology - Two courses with labs and a minimum of 8 credit hours is required. One of two options must be met:

Option 1: One semester of Human Physiology with lab and one semester of Anatomy with lab.

Option 2: Two semesters of Anatomy/Physiology combined courses with labs.

Biology / Biological Studies - Two courses and a minimum of 6 credit hours is required. Labs are not required. Must be courses for science majors.

Chemistry - Two courses with labs and a minimum of 8 credit hours is required. Introduction and survey courses are NOT accepted.

Physics - Two courses with labs and a minimum of 8 credit hours is required. General Physics and Physics with Calculus are both acceptable courses.

Psychology - One course (3 credit hours) is required. Any psychology course that is taken within the Psychology Department will meet this requirement.

Statistics - One course (3 credit hours) is required.

Required Courses
114 Total Credits

- Complete all of the following
  - Year 1
    - Complete all of the following
      - Summer Term 1
        - Complete the following:
          - PHT5003 - Foundations of Physical Therapy (2)
          - PHT5125 - Clinical Kinesiology (2)
          - PHT5125L - Clinical Kinesiology Lab (1)
          - PHT6115C - Gross Anatomy/Neuroscience I (6)
          - PHT6156C - Applied Human Physiology for Health Sciences (3)
      - Fall Term 1
        - Complete the following:
          - PHT5240 - Physical Assessment (1)
          - PHT5240L - Physical Assessment Lab (2)
          - PHT5260 - Patient Care Skills (2)
          - PHT5260L - Patient Care Skills Lab (2)
          - PHT6118C - Gross Anatomy/Neuroscience II (6)
          - PHT6153 - Physiologic Assessment in Physical Therapy Practice (2)
          - PHT6606 - Research Methods in Physical Therapy (2)
      - Spring Term 1
        - Complete the following:
          - PHT5218C - Therapeutic Modalities in Rehabilitation (3)
          - PHT5241 - Therapeutic Exercises I (2)
          - PHT5241L - Therapeutic Exercise Lab I (2)
          - PHT6242 - Orthopedic Physical Therapy (3)
          - PHT6242L - Orthopedic Physical Therapy Lab (1)
          - PHT6306 - Pathology in Rehabilitation (2)
          - PHT6356 - Pharmacology in Rehabilitation (2)
  - Year 2
    - Complete all of the following
      - Summer Term 2
        - Complete the following:
          - PHT5718 - Neurological Physical Therapy (3)
          - PHT5718L - Neurological Physical Therapy Lab (1)
          - PHT6219C - Pain Mechanisms and Treatment in Rehabilitation (2)
          - PHT6245 - Therapeutic Exercise II (2)
          - PHT6245L - Therapeutic Exercise II Lab (1)
          - PHT7722C - Integrative Clinical Practice (2)
      - Fall Term 2
        - Complete the following:
          - PHT6521 - Management of Physical Therapy Services (2)
          - PHT6322C - Pediatric Physical Therapy (3)
          - PHT6716C - Advanced Orthopedic Physical Therapy (2)
          - PHT6805C - Clinical Education I (4)
          - PHT7742C - Acute Care Physical Therapy (2)

- PHT6702C - Orthotics and Prosthetics in Rehabilitation (1)

Spring Term 2

- Complete the following:
  - PHT6374C - Geriatric Physical Therapy (2)
  - PHT6381C - Cardiopulmonary Physical Therapy (2)
  - PHT6618 - Research Applications in Physical Therapy (2)
  - PHT6719 - Advanced Neurological Physical Therapy (2)
  - PHT6719L - Advanced Neurological Physical Therapy Lab (1)
  - PHT7134C - Physical Therapy Integration (2)
  - PHT7730C - Primary Care for the Physical Therapist (2)

Year 3

- Complete all of the following

Summer Term 3

- Complete the following:
  - PHT7822C - Clinical Education II (6)

Fall Term 3

- Complete the following:
  - PHT7721C - Integrations in Orthopedic Physical Therapy (1)
  - PHT7772C - Advanced Neurological Physical Therapy II (1)
  - PHT7780C - Advanced Geriatric Physical Therapy (1)
  - PHT7329C - Advanced Pediatric Physical Therapy (1)
  - PHT7521 - Management of Physical Therapy Services II (2)
  - PHT7823C - Clinical Education III (4)
  - PHT6070C - Radiology/Imaging for Physical Therapy (3)

Spring Term 3

- Complete all of the following
  - Complete the following:
    - PHT7021 - Professional Practice in Physical Therapy (2)
    - PHT7900 - Capstone Project in Physical Therapy (3)
    - PHT7829C - Clinical Education IV (4)

  PHT 7XXXC Elective Course
  - Complete 1 of the following
    - Elective Course Options (student must select at least one of the following courses, pending availability). PHT 6958 Physical Therapy Study Abroad can fulfill the elective requirement and may be offered at any point in the DPT curriculum:
    - Complete at least 1 of the following:
      - PHT7778C - Advanced Manual Therapy (2)
      - PHT7764C - Advanced Neurological Treatment (2)
      - PHT7702C - Advanced Orthotics and Prosthetics (2)
      - PHT7779C - Sports Physical Therapy (2)
    - Earn at least 2 credits from the following types of courses:
      PHT 6958 - Study Abroad

Examinations
0 Total Credits

- The following procedures guide the comprehensive examination for DPT Students. 1. Each student is required to pass a comprehensive examination. 2. The program utilizes the Practice Exam & Assessment Tool (PEAT) from the Federation of State Boards in Physical Therapy as the comprehensive exam. a. A scale score of 600 is deemed a passing score on the PEAT. b. Students will have the opportunity to retake the final comprehensive exam twice if they fail to earn a passing score. 3. If a student does not pass the comprehensive exam (PEAT) after their second attempt, a case-based examination will be given with a focus in areas of deficit as identified in the PEAT exams. a. In order to pass the case-based exam, students must orally defend their decision-making for the patient cases. b. The examining committee will consist of DPT core faculty with expertise in the domains of the patient cases. 4. Students must pass the examination on the third attempt in order to graduate. 5. Students who do not pass the third attempt (case study oral exam) will be assessed by the collective core faculty in accordance with Retention and Advancement proceedings to determine appropriate actions. Students could be required to undergo remediation or be dismissed. 6. Exam outcomes review will take place annually at regularly scheduled DPT faculty meetings.

Grand Total Credits: **114**

Program Details

The program is designed to enable students to demonstrate in the classroom, and later in the clinic, that they have achieved levels of comprehension and competence expected of entry-level physical therapists. Thus, the curriculum not only involves the didactic and clinical components of professional education, but also co-curricular activities which include integrated patient experiences, interprofessional education activities, and a research curriculum.

Integrated patient experiences are authentic, brief encounters with patients and patient populations through activities that are typically embedded into several DPT courses. In alignment with this requirement, the UCF DPT Program requires full participation from enrolled students. These activities may be directly aligned with DPT courses and assigned a grade, while others may be more programmatic in nature, outside of traditional coursework. All activities are designed to assist student development and understanding of various patient care issues. This will include exposure to various clinical settings and populations that will assist students in becoming more effective and safe practitioners when they enter formal clinical education or upon graduation and eventual licensure.

Interprofessional education (IPE) is an educational model that aligns with professional standards in physical therapy education accreditation. This consists of students learning in collaborative team environments that include the involvement of students from differing professional disciplines. This co-curricular thread that is embedded into the UCF DPT Program and includes participation in a collaborative IPE curriculum with various partners including but not limited to: UCF College of Medicine, UCF College of Nursing, UCF School of Social Work, UCF Counselor Education, and the UF College of Pharmacy.

The research curriculum aligns with professional standards in physical therapy education accreditation, in which the program fosters the understanding of clinical research. Areas of competency include the ability to independently locate reputable information, interpret study findings, and implement research into clinical practice. Thus, students enrolled in the UCF DPT Program will take part in research throughout their curriculum. All students are required to work in small groups and complete a research project under the mentorship of a faculty member who serves as their research advisor. These projects culminate in a written manuscript, poster and oral research presentations at UCF. Students may also have the opportunity to present their research at state, regional, and national conferences. Many UCF DPT students have gone on to have their work published in peer reviewed journals.

Equipment Fee

Students in the Doctor of Physical Therapy program pay a $90 equipment fee each semester that they are enrolled.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Is this program available 100% online?

Yes

UCF Online

Please Note: Social Work (MSW) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. Students who apply for admission to the online part-time tracks will not be permitted to switch to the campus-based tracks, and students who apply for admission to the campus-based tracks will not be permitted to switch to the online part-time tracks.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Social-Work-MSW.pdf.

Program Description

The Master of Social Work (MSW) program prepares students for advanced social work practice. The program educates students for community-based clinical social work practice with individuals, families, and groups. The MSW program is accredited by the Council on Social Work Education (CSWE).

The program offers multiple tracks to allow students to progress through the required MSW curriculum on either a full-time or part-time plan of study. The campus-based full-time and part-time tracks are available for students who do not have a BSW degree. The campus-based advanced standing full-time and the part-time tracks are available for students who have completed a BSW degree from a CSWE-accredited program within the last six years. The program also offers an online part-time Advanced Standing track for students with a BSW degree from a CSWE accredited program within the last six years and an online part-time track for students who have bachelor's degrees from programs other than the BSW. More information on the plans of study and requirements for each track is given in the individual track descriptions. Please scroll to the bottom of this page for further details on these tracks.

The curriculum draws from a generalist perspective and emphasizes critical thinking skills, empirically based accountable practice, and ethical services for clients experiencing a wide range of problems. Students learn preventive and therapeutic interventions aimed at enhancing human functioning and quality of life. Graduates of the program will have the ability to work with diverse clients in a variety of agency settings.

The MSW program strives to educate students to become successful practitioners in the field of clinical social work. To that end, the National Association of Social Workers (NASW) Code of Ethics is re-enforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

Track Description

The Master of Social Work (MSW) Program, Full-Time Advanced Standing Campus-Based Track allows students with baccalaureate degrees in Social Work from a CSWE-accredited school/program who demonstrate academic potential and professional maturity to complete the MSW in three semesters of graduate study.

To be considered for advanced standing admission, the bachelor's degree must have been completed within six years of the time of initial enrollment in the master's program. The Full-Time Advanced Standing Campus-Based Track is offered at the main campus and may be completed in three semesters (summer, fall, and spring).

The MSW program strives to provide students with the education needed to become successful practitioners in the field of clinical social work. The National Association of Social Workers (NASW) Code of Ethics is enforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

The 32-hour MSW program is composed of 18 credit hours of required core and advanced clinical specialization courses. In addition, students complete 6 credit hours of electives and 8 credit hours of field experience. Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students.

Total Credit Hours Required: 32 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

The Council on Social Work Education (CSWE) require that all applicants have an undergraduate degree from an accredited institution. The School of Social Work requires that applicants have successfully completed (with a grade of C or higher) at least one course in each of the following categories:

- **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion);
- **Physical and Biological Sciences** (examples: biology, chemistry, anatomy, or physiology);
- **Mathematics** (examples: calculus, college algebra, computer science, or statistics);
- **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology).

    - SOW6727 - Core Concepts of Child and Adolescent Trauma (3)
    - SOW6735 - Documentation Skills for Helping Professionals (3)
    - SOW6756 - Forensic Social Work (3)
    - SOW6846 - Spirituality in Clinical Social Work Practice (3)
    - SOW6806 - Behavioral Health Skills for Clinical Social Workers (3)

Field Experience
8 Total Credits

- Earn at least 8 credits from the following types of courses:
  Field instruction is an integral part of graduate social work education. It provides the student with an opportunity to test classroom knowledge; to develop and refine both foundation and advanced practice skills. Decisions regarding field assignment are determined by the Field Director. Only agency sites approved by the School of Social Work may be used for field instruction. Clinical MSW students complete a minimum of 600 clock hours in the field. Field education includes a field seminar. Students must complete at least 50% of their field hours during the agency's normal business hours. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Consequently, field placements cannot be guaranteed to students who require evening and weekend placements. Many social work agencies have students complete background checks, including formal background checks, law enforcement finger printing, driving records, and criminal record checks. In most instances, the expense for the background check is the responsibility of the student. We urge students to seek this information prior to entering the field experience if there is sensitive information that may prevent them from being accepted at an agency. Students must also report any background issues on the field application so that an appropriate placement can be made. The UCF School of Social Work cannot guarantee a field placement or subsequent degree completion for students who do not pass background checks

Grand Total Credits: **32**

Track Details

The MSW Advanced Standing track allows no more than one C grade or 3 credit hours (whichever is greater) to be used toward the degree requirements. Exceeding three credit hours or one C grade is grounds for dismissal from the MSW Advanced Standing track.

Previous baccalaureate coursework that received at least a "B-" will be reviewed to ensure content equivalency. In advanced standing admission, a maximum of 30 foundation-level credits may be waived based on the content equivalency to meet foundation year MSW requirements, which consist of courses in human behavior and the social environment, policy, research, social work practice, and social work field placement.

Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

Required Sequence of Curriculum

First Semester (Summer)

- SOW 6123 - Psychosocial Pathology **3 Credit Hours**
- SOW 6424 - Theories for Evidence-Based Clinical Practice in Social Work **3 Credit Hours**

Second Semester (Fall)

- SOW 6324 - Clinical Practice with Groups **3 Credit Hours**
- SOW 6348 - Clinical Practice with Individuals **3 Credit Hours**
- SOW 6612 - Clinical Practice with Families **3 Credit Hours**
- SOW 6531 - Full Time MSW Clinical Field Integrative Seminar I **2 Credit Hours**
- SOW 6940 - Clinical Field Education **2 Credit Hours**

Third Semester (Spring)

- SOW 6433 - Clinical Evaluation in Social Work Practice **3 Credit Hours**
- SOW Clinical elective
- SOW Clinical elective
- SOW 6536 - Full Time MSW Clinical Field Education and Seminar II **2 Credit Hours**
- SOW 6940 - Clinical Field Education **2 Credit Hours**

Transfer Credit

Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Students who have completed course work in an accredited MSW program may transfer up to 9 credit hours of **non-field coursework** toward the 32 credit hours of the degree. Students must have received a grade of "B-" or higher in these courses. Courses will be evaluated on a course-by-course basis by the MSW Director. Field classes are not eligible for transfer.

Students seeking to transfer to the School of Social Work from another CSWE accredited social work program are required to meet the criteria for admission and follow the application procedures.

Additionally, one of the academic references must be from the MSW Program Coordinator or academic adviser in the program from which the applicant is transferring and must address the academic standing in that program. If not currently enrolled, the reference must be from the former MSW Program Coordinator or academic adviser. Syllabi are required for any social work classes being considered for transfer credit.

As per university policy, transfer credits will not be considered for the market based fully online part time tracks.

Equipment Fee

Full-time students in the MSW program pay a $35 equipment fee each semester that they are enrolled.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit **https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Social-Work-MSW.pdf.**

Track Description

The Master of Social Work (MSW), Full-Time Campus-based Track allows students who do not have a BSW degree to complete the MSW required curriculum in two years of full-time study at the main campus.

The first year of study in the Master of Social Work (MSW) Full-Time Campus-based Track includes 24 credit hours in class work and 6 credit hours in field education. The second year of study includes 24 credit hours in class work and 8 credit hours in the field.

The MSW program strives to provide students with the education needed to become successful practitioners in the field of clinical social work. The National Association of Social Workers (NASW) Code of Ethics is enforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

The 62-hour MSW program is composed of 39 credit hours of required core and advanced clinical specialization courses. In addition, students complete 9 credit hours of electives and 14 credit hours of field experience. Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers, and internships also contribute to the self-development of our students. Students in the 62-hour program must include at least 31 hours of course work at the 6000 level in their program of study.

Total Credit Hours Required: 62 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

Transfer Credit

Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Transfer credits will be evaluated on a case-by-case basis by the MSW Program Director. Students must submit syllabi and have earned a grade of "B-" or better in these courses for them to be evaluated for transfer credit.

Field courses taken elsewhere cannot be transferred toward satisfying the field component of the degree.

Students seeking to transfer to the School of Social Work from another CSWE accredited social work program are required to meet the criteria for admission and follow the application procedures. Additionally, one of the academic references must be from the MSW Program Coordinator or academic adviser in the program from which the applicant is transferring and must address the academic standing in that program. If not currently enrolled, the reference must be from the former MSW Program Coordinator or academic adviser.

As per university policy, transfer credits will not be considered for the market based fully online part time tracks.

Equipment Fee

Full-time students in the MSW program pay a $35 equipment fee each semester that they are enrolled.

Independent Learning

Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students.

The field experiences and practice electives provide substantial opportunities for students to learn independently and practically about social work practice.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit **https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Social-Work-MSW.pdf**.

Track Description

The Online Master of Social Work (MSW) Part-Time Advanced Standing Track **is offered completely online** and allows students with baccalaureate degrees in Social Work from a CSWE-accredited school/program who demonstrate academic potential and professional maturity to complete the MSW degree in four semesters of graduate study.

To be considered for advanced standing admission, the bachelor's degree must have been completed within six years of the time of initial enrollment in the master's program.

The MSW program strives to educate students to become successful practitioners in the field of clinical social work. To that end, the National Association of Social Workers (NASW) Code of Ethics is reinforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

Students who apply for admission to the Online Part-time Advanced Standing track will not be permitted to switch to the on-campus track due to the strict cohort model followed by the online track.

This track is completed entirely online and charges an enhanced tuition rate. As such, Online MSW students are not permitted to simultaneously enroll in any graduate or certificate programs through UCF. Please visit UCF Online for additional information about tuition and fees.

The 32-hour MSW program is composed of 18 credit hours of required core and advanced clinical specialization courses. In addition, students complete 6 credit hours of electives and 8 credit hours of field experience. Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students.

Total Credit Hours Required: 32 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

The Council on Social Work Education (CSWE) requires that all applicants have an undergraduate degree from an accredited institution. The School of Social Work requires that applicants have successfully completed (with a grade of C or higher) at least one course in each of the following areas:

- **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion)
- **Physical and Biological Sciences** (examples: biology, chemistry, anatomy, or physiology)
- **Mathematics** (examples: calculus, college algebra, computer science, or statistics)

Grand Total Credits: **32**

Track Details

The MSW Advanced Standing tracks allow no more than one C grade or 3 credit hours (whichever is greater) to be used toward the degree requirements. Exceeding three credit hours or one C grade is grounds for dismissal from the MSW Advanced Standing track.

Previous baccalaureate coursework that received at least a "B-" will be reviewed to ensure content equivalency. In advanced standing admission, a maximum of 30 foundation-level credits may be waived based on the content equivalency to meet foundation year MSW requirements, which consist of courses in human behavior and the social environment, policy, research, social work practice, and social work field placement.

Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

Required Sequence of Curriculum

*The Online MSW is primarily an asynchronous program, which means that courses are generally not held during a fixed meeting time. However, there are some courses where synchronous, or "live" sessions are a required component of the course assignments. Because an MSW is a professional degree that allows students to engage directly with clients, synchronous sessions are put in place to support student's skills and evaluation in this area.
Some of the courses that may have required live components as a part of an assignment include, but are not limited to SOW 6324 Clinical Social Work Practice with Groups and SOW 6433 Clinical Evaluation in Social Work Practice. Dates and times of live sessions will be announced before the course begins, or in some courses, multiple options are provided.

First Semester (Fall)

- SOW 6123 - Psychosocial Pathology **3 Credit Hours**
- SOW 6424 - Theories for Evidence-Based Clinical Practice in Social Work **3 Credit Hours**

Second Semester (Spring)

- SOW 6348 - Clinical Practice with Individuals **3 Credit Hours**
- SOW 6612 - Clinical Practice with Families **3 Credit Hours**
- SOW 6561 - Part-Time MSW Clinical Field Integrative Seminar I **2 Credit Hours**
- SOW 6940 - Clinical Field Education **VAR Credit Hours**

  (2 credit hours)

Third Semester (Summer)

- SOW 6324 - Clinical Practice with Groups **3 Credit Hours**
- Clinical Elective
- SOW 6562 - Part Time MSW Clinical Field Integrative Seminar II **1 Credit Hours**
- SOW 6940 - Clinical Field Education **VAR Credit Hours**

  (1 credit hour)

Fourth Semester (Fall)

- SOW 6433 - Clinical Evaluation in Social Work Practice **3 Credit Hours**
- Clinical Elective
- SOW 6563 - Part-Time MSW Clinical Field Integrative Seminar III **1 Credit Hours**
- SOW 6940 - Clinical Field Education **VAR Credit Hours**

  (1 credit hour)

Transfer Credit

Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Due to the cohort nature of the track and university policy, transfer credits will not be considered for the market-based, fully online part-time Advanced Standing track.

Cost Per Credit Hour

For the Online Part-Time Social Work track in the Social Work MSW program, the cost per credit hour is $487.45.*

*Includes all university fees, which may be subject to change.

Tuition waivers are not accepted for the Online MSW.

Independent Learning

Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students. The field experiences and practice electives provide substantial opportunities for students to learn independently and practically about social work practice.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit **https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Social-Work-MSW.pdf**.

Track Description

The Online Master of Social Work (MSW) Part-Time Track is **offered completely online** and allows students who do not have a BSW degree to complete the MSW required curriculum online over the course of three years.

The first year of study in the Online Master of Social Work (MSW) Part-Time Track includes 18 credit hours in class work. The second year of study includes 18 credit hours in class work and 6 credit hours in the field. The third year of study includes 12 credit hours in class work and 8 credit hours in the field.

The MSW program strives to provide students with the education needed to become successful practitioners in the field of clinical social work. The National Association of Social Workers (NASW) Code of Ethics is enforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

Students who apply for admission into the Online Part-Time Track will not be permitted to switch to the on-campus, track due to the strict cohort model the online track follows.

This track is completed entirely online and charges an enhanced tuition rate. As such, Online MSW students are not permitted to simultaneously enroll in any graduate or certificate programs through UCF. Please visit UCF Online for additional information about tuition and fees.

The 62-hour MSW program is composed of 39 credit hours of required core and advanced clinical specialization courses. In addition, students complete 9 credit hours of electives and 14 credit hours of field experience. Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers, and internships also contribute to the self-development of our students.

Total Credit Hours Required: 62 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

The Council on Social Work Education (CSWE) requires that all applicants have an undergraduate degree from an accredited institution. The School of Social Work requires that applicants have successfully completed (with a grade of C or higher) at least one course in each of the following areas:

- **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion)
- **Physical and Biological Sciences** (examples: biology, chemistry, anatomy, or physiology)
- **Mathematics** (examples: calculus, college algebra, computer science, or statistics)
- **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology)

Degree Requirements

Core
21 Total Credits

- Complete the following:
    - SOW5107 - Human Behavior in the Social Environment (3)
    - SOW5107 - Human Behavior in the Social Environment (3)
    - SOW5217 - Foundations of Behavioral Health Policy and Social Work Practice (3)
    - SOW5235 - Social Welfare Policies and Services (3)
    - SOW5305 - Social Work Practice I: Generalist Practice (3)
    - SOW5306 - Social Work Practice II: Intervention Approaches (3)
    - SOW5404 - Social Work Research (3)

Clinical Specialization
18 Total Credits

- Complete the following:
    - SOW6123 - Psychosocial Pathology (3)
    - SOW6324 - Clinical Practice with Groups (3)
    - SOW6348 - Clinical Practice with Individuals (3)
    - SOW6612 - Clinical Practice with Families (3)
    - SOW6424 - Theories for Evidence-Based Clinical Practice in Social Work (3)
    - SOW6433 - Clinical Evaluation in Social Work Practice (3)

Electives
9 Total Credits

- Complete at least 3 of the following:
    - SOW6155 - Human Sexuality in Social Work Practice (3)
    - SOW6652 - Child Welfare Services (3)
    - SOW6603 - Social Work in Health Settings (3)
    - SOW6604 - Medications in Social Work Practice (3)
    - SOW6610 - Clinical Practice with Military and Veteran Families or Groups (3)
    - SOW6644 - Interventions with Older Adults and Their Families (3)
    - SOW6670 - Clinical Social Work Practice with LGBTQ+ (3)
    - SOW6712 - Clinical Social Work Practice with Substance Addictions (3)
    - SOW6735 - Documentation Skills for Helping Professionals (3)
    - SOW6806 - Behavioral Health Skills for Clinical Social Workers (3)

Field Experience
14 Total Credits

- Earn at least 14 credits from the following types of courses:
  Field instruction is an integral part of graduate social work education. It provides the student with an opportunity to test classroom knowledge as well as to develop and refine foundation and advanced practice skills. Decisions regarding field assignment are determined by the Field Director. Only agency sites approved by the School of Social Work may be used for field instruction. Generalist MSW students complete a minimum of 400 hours in the field; clinical MSW students complete a minimum of 600 clock hours in the field. Field education includes a field seminar. Students must complete at least 50% of their field hours during the agency's normal business hours. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Consequently, field placements cannot be guaranteed to students who require evening and weekend placements. Many social work agencies have students complete background checks, including formal background checks, law enforcement finger printing, driving records, and criminal record checks. In most instances, the expense for the background check is the responsibility of the student. We urge students to seek this information prior to entering the field experience if there is sensitive information that may prevent them from being accepted at an agency. Students must also report any background issues on the field application so that an appropriate placement can be made. The UCF School of Social Work cannot guarantee a field placement or subsequent degree completion for students who do not pass background checks. Generalist Field Education and Seminars (6 credit hours) Clinical field Education and Seminars (8 credit hours)

Grand Total Credits: **62**

Track Details

Students in the 62-hour program must include at least 31 hours of course work at the 6000 level in their program of study.

Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

Required Sequence of Curriculum

*The Online MSW is primarily an asynchronous program, which means that our courses are generally not held during a fixed meeting time. However, there are some courses where synchronous, or "live" sessions are a required component of the course assignments. Because an MSW is a professional degree that allows students to engage directly with clients, synchronous sessions are put in place to support student's skills and evaluation in this area.

Some of the courses that may have required live components as a part of an assignment include, but are not limited to SOW 5306 Social Work Practice II, SOW 6324 Clinical Social Work Practice with Groups, and SOW 6433 Clinical Evaluation in Social Work Practice. Dates and times of live sessions will be announced before the course begins, or in some courses, multiple options are provided.

+Depending on the term in which you enter the Online MSW, your final year of the program may show classes in a different sequence. A Plan of Study will be provided to you prior to the beginning of classes with the correct sequence for your cohort.

First Semester

- Term 1.1 - SOW 5107 - Human Behavior in the Social Environment **3 Credit Hours**
- Term 1.2 - SOW 5132 - Diverse Client Populations **3 Credit Hours**

Second Semester

- Term 2.1 - SOW 5235 - Social Welfare Policies and Services **3 Credit Hours**
- Term 2.2 - SOW 5404 - Social Work Research **3 Credit Hours**

Third Semester

- Term 3.1 - SOW 5305 - Social Work Practice I: Generalist Practice **3 Credit Hours**
- Clinical Elective - Term 3.2

Fourth Semester

- Term 4.1 - SOW 5306 - Social Work Practice II: Intervention Approaches **3 Credit Hours** *
- Term 4.2 - SOW 6433 - Clinical Evaluation in Social Work Practice **3 Credit Hours** *
- SOW 5565 - Part-Time MSW Generalist Field Integrative Seminar I **1 Credit Hours**
- SOW 5940 - Generalist Field Education **VAR Credit Hours**

  Take 1 credit hour

Fifth Semester

- Term 5.1 Clinical Elective
- SOW 5217 - Foundations of Behavioral Health Policy and Social Work Practice **3 Credit Hours** Term 5.2 -
- SOW 5566 - Part-Time MSW Generalist Field Integrative Seminar II **1 Credit Hours**
- SOW 5940 - Generalist Field Education **VAR Credit Hours**

  Take 1 credit hour

Sixth Semester

- Term 6.1 - SOW 6123 - Psychosocial Pathology **3 Credit Hours**
- Term 6. 2 - SOW 6424 - Theories for Evidence-Based Clinical Practice in Social Work **3 Credit Hours** *
- SOW 5567 - Part-Time MSW Generalist Field Integrative Seminar III **1 Credit Hours**
- SOW 5940 - Generalist Field Education **VAR Credit Hours**

  Take 1 credit hour

Seventh Semester+

- Term 7.1 - SOW 6348 - Clinical Practice with Individuals **3 Credit Hours**
- Term 7.2 - SOW 6612 - Clinical Practice with Families **3 Credit Hours**
- SOW 6561 - Part-Time MSW Clinical Field Integrative Seminar I **2 Credit Hours**
- SOW 6940 - Clinical Field Education **VAR Credit Hours**

Eighth Semester+

- Term 8.1 - SOW 6324 - Clinical Practice with Groups **3 Credit Hours**
- Term 8.2 Clinical Elective
- SOW 6562 - Part Time MSW Clinical Field Integrative Seminar II **1 Credit Hours**
- SOW 6940 - Clinical Field Education **VAR Credit Hours**

Ninth Semester+

- SOW 6563 - Part-Time MSW Clinical Field Integrative Seminar III **1 Credit Hours**
- SOW 6940 - Clinical Field Education **VAR Credit Hours**

Transfer Credit

Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Due to the cohort nature of the track and university policy, transfer credits will not be considered for the market-based, fully online part-time MSW track.

Cost Per Credit Hour

For the Online Part-Time Social Work track in the Social Work MSW program, the cost per credit hour is $487.45.*

*Includes all university fees, which may be subject to change.

Tuition waivers are not accepted for the Online MSW.

Independent Learning

Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students. The field experiences and practice electives provide substantial opportunities for students to learn independently and practically about social work practice.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-CHPS-Social-Work-MSW.pdf.

Track Description

The Master of Social Work (MSW) Program, Part-Time Advanced Standing Campus-Based Track allows students with baccalaureate degrees in Social Work from a CSWE-accredited school/program who demonstrate academic potential and professional maturity to complete the MSW degree at the main campus in four semesters of graduate study.

To be considered for advanced standing admission, the bachelor's degree must have been completed within six years of the time of initial enrollment in the master's program. The Part-Time Advanced Standing Campus-Based Track is offered at the main campus and may be completed in four semesters (summer, fall, spring, and summer).

The MSW program strives to provide students with the education needed to become successful practitioners in the field of clinical social work. The National Association of Social Workers (NASW) Code of Ethics is enforced throughout the academic curriculum. Students who violate the NASW Code of Ethics may be subject to academic sanctions or dismissed from the program.

The 32-hour MSW program is composed of 18 credit hours of required core and advanced clinical specialization courses. In addition, students complete 6 credit hours of electives and 8 credit hours of field experience. Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students.

Total Credit Hours Required: 32 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

The Council on Social Work Education (CSWE) require that all applicants have an undergraduate degree from an accredited institution. The School of Social Work requires that applicants have successfully completed (with a grade of C or higher) at least one course in each of the following categories:

- **Humanities** (examples: fine arts, history, languages, literature, philosophy, or religion);
- **Physical and Biological sciences** (examples: biology, chemistry, anatomy, or physiology);
- **Mathematics** (examples: calculus, college algebra, computer science, or statistics);
- **Social Sciences** (examples: anthropology, economics, ethnic studies, gender studies, human development, international relations, political science, psychology, social work, or sociology).

    - SOW6846 - Spirituality in Clinical Social Work Practice (3)

Field Experience
8 Total Credits

- Earn at least 8 credits from the following types of courses:
  Clinical Field Education and Integrative Seminars 8 Credit Hours Field instruction is an integral part of graduate social work education. It provides the student with an opportunity to test classroom knowledge as well as to develop and refine foundation and advanced practice skills. Decisions regarding field assignment are determined by the Field Director. Only agency sites approved by the School of Social Work may be used for field instruction. Advanced Standing MSW students complete a minimum of 600 clock hours in the field. Field education includes a field seminar. Students must complete at least 50% of their field hours during the agency's normal business hours. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Consequently, field placements cannot be guaranteed to students who require evening and weekend placements. Many social work agencies have students complete background checks, including formal background checks, law enforcement finger printing, driving records, and criminal record checks. In most instances, the expense for the background check is the responsibility of the student. We urge students to seek this information prior to entering the field experience if there is sensitive information that may prevent them from being accepted at an agency. Students must also report any background issues on the field application so that an appropriate placement can be made. The UCF School of Social Work cannot guarantee a field placement or subsequent degree completion for students who do not pass background checks.

Grand Total Credits: **32**

Track Details

The MSW Advanced Standing tracks allow no more than one C grade or 3 credit hours (whichever is greater) to be used toward the degree requirements. Exceeding three credit hours or one C grade is grounds for dismissal from the MSW Advanced Standing tracks.

Previous baccalaureate coursework that received at least a "B-" will be reviewed to ensure content equivalency. In advanced standing admission, a maximum of 30 foundation-level credits may be waived based on the content equivalency to meet foundation year MSW requirements, which consist of courses in human behavior and the social environment, policy, research, social work practice, and social work field placement.

Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

Required Sequence of Curriculum

First Semester (Summer)

- SOW 6123 - Psychosocial Pathology **3 Credit Hours**
- SOW 6424 - Theories for Evidence-Based Clinical Practice in Social Work **3 Credit Hours**

Second Semester (Fall)

- SOW 6348 - Clinical Practice with Individuals **3 Credit Hours**
- SOW 6612 - Clinical Practice with Families **3 Credit Hours**
- SOW 6561 - Part-Time MSW Clinical Field Integrative Seminar I **2 Credit Hours**
- SOW 6940 - Clinical Field Education **2 Credit Hours**

Third Semester (Spring)

- SOW 6433 - Clinical Evaluation in Social Work Practice **3 Credit Hours**
- SOW 6562 - Part Time MSW Clinical Field Integrative Seminar II **1 Credit Hours**
- SOW 6940 - Clinical Field Education **1 Credit Hour**
- SOW 6XXX Clinical Elective

Fourth Semester (Summer)

- SOW 6324 - Clinical Practice with Groups **3 Credit Hours**
- SOW 6563 - Part-Time MSW Clinical Field Integrative Seminar III **1 Credit Hours**
- SOW 6940 - Clinical Field Education **1 Credit Hours**
- SOW 6XXX Clinical Elective

Transfer Credit

Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Students who have completed coursework in an accredited MSW program may transfer up to 9 credit hours of **non-field coursework** toward the 32 credit hours of the degree. Students must have received a grade of "B-" or higher in these courses. Courses will be evaluated on a course-by-course basis by the MSW Director. Field classes are not eligible for transfer. Students seeking to transfer to the School of Social Work from another CSWE accredited social work program are required to meet the criteria for admission and follow the application procedures. Additionally, one of the academic references must be from the MSW Program Coordinator or academic adviser in the program from which the applicant is transferring and must address the academic standing in that program. If not currently enrolled, the reference must be from the former MSW Program Director or academic adviser. Syllabi are required for any social work classes being considered for transfer credit.

As per university policy, transfer credits will not be considered for the market based fully online part time tracks.

Equipment Fee

Full-time students in the MSW program pay a $35 equipment fee each semester that they are enrolled.

Independent Learning

Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students. The field experiences and practice electives provide substantial opportunities for students to learn independently and practically about social work practice.

    - SOW6603 - Social Work in Health Settings (3)
    - SOW6604 - Medications in Social Work Practice (3)
    - SOW6608 - Understanding and Managing Combat Related Behavioral and Mental Health Disorders (3)
    - SOW6610 - Clinical Practice with Military and Veteran Families or Groups (3)
    - SOW6635 - Social Work Practice in Schools (3)
    - SOW6644 - Interventions with Older Adults and Their Families (3)
    - SOW6652 - Child Welfare Services (3)
    - SOW6655 - Child Abuse: Treatment and Prevention (3)
    - SOW6670 - Clinical Social Work Practice with LGBTQ+ (3)
    - SOW6712 - Clinical Social Work Practice with Substance Addictions (3)
    - SOW6726 - Social Work Practice with Children from Birth to Age Five and their Families (3)
    - SOW6727 - Core Concepts of Child and Adolescent Trauma (3)
    - SOW6735 - Documentation Skills for Helping Professionals (3)
    - SOW6756 - Forensic Social Work (3)
    - SOW6806 - Behavioral Health Skills for Clinical Social Workers (3)
    - SOW6846 - Spirituality in Clinical Social Work Practice (3)

    Practice/ Non-Clinical and Clinical Elective Option
  - Complete all of the following
    - Complete the following:
      - SOW6383 - Social Work Administration (3)
    - Earn at least 6 credits from the following types of courses:
      Clinical Elective Courses listed above

Field Experience
14 Total Credits

- Earn at least 14 credits from the following types of courses:
  Generalist Field Education and Integrative Seminars 6 Credit Hours Clinical Field Education and Integrative Seminars 8 Credit Hours Field instruction is an integral part of graduate social work education. It provides the student with an opportunity to test classroom knowledge as well as to develop and refine foundation and advanced practice skills. Decisions regarding field assignment are determined by the Field Director. Only agency sites approved by the School of Social Work may be used for field instruction. Generalist MSW students complete a minimum of 400 hours in the field; clinical MSW students complete a minimum of 600 clock hours in the field. Field education includes a field seminar. Students must complete at least 50% of their field hours during the agency's normal business hours. Evening (after 5 p.m.) and weekend placements are extremely limited. The School of Social Work is under no obligation to provide such placements. Consequently, field placements cannot be guaranteed to students who require evening and weekend placements. Many social work agencies have students complete background checks, including formal background checks, law enforcement fingerprinting, driving records, and criminal record checks. In most instances, the expense for the background check is the responsibility of the student. We urge students to seek this information prior to entering the field experience if there is sensitive information that may prevent them from being accepted at an agency. Students must also report any background issues on the field application so that an appropriate placement can be made. The UCF School of Social Work cannot guarantee a field placement or subsequent degree completion for students who do not pass background checks.

Grand Total Credits: **62**

Track Details

Educational standards for all social work programs are established by the Council on Social Work Education (CSWE), the national accreditation body for professional social work education. Curriculum direction and content is regulated by the CSWE through its accreditation standards. The MSW program at UCF is fully accredited through CSWE.

Required Sequence of Curriculum

First Semester (Fall)

- SOW 5107 - Human Behavior in the Social Environment **3 Credit Hours**
- SOW 5132 - Diverse Client Populations **3 Credit Hours**

Second Semester (Spring)

- SOW 5404 - Social Work Research **3 Credit Hours**

- SOW 5217 - Foundations of Behavioral Health Policy and Social Work Practice **3 Credit Hours**

Third Semester (Summer)

- SOW 5305 - Social Work Practice I: Generalist Practice **3 Credit Hours**
- SOW Elective (Clinical or Non-Clinical)

Fourth Semester (Fall)

- SOW 5306 - Social Work Practice II: Intervention Approaches **3 Credit Hours**
- SOW 5235 - Social Welfare Policies and Services **3 Credit Hours**
- SOW 5565 - Part-Time MSW Generalist Field Integrative Seminar I **1 Credit Hour**
- SOW 5940 - MSW Generalist Field Education **1 Credit Hour**

Fifth Semester (Spring)

- SOW 5566 - Part-Time MSW Generalist Field Integrative Seminar II **1 Credit Hour**
- SOW 5940 - MSW Generalist Field Education **1 Credit Hour**
- SOW Clinical Elective

Sixth Semester (Summer)

- SOW 5567 - Part-Time MSW Generalist Field Integrative Seminar III **1 Credit Hour**
- SOW 5940 - Generalist Field Education **1 Credit Hour**

  Take 1 credit hour

- SOW 6424 - Theories for Evidence-Based Clinical Practice in Social Work **3 Credit Hours**
- SOW 6123 - Psychosocial Pathology **3 Credit Hours**

Seventh Semester (Fall)

- SOW 6348 - Clinical Practice with Individuals **3 Credit Hours**
- SOW 6612 - Clinical Practice with Families **3 Credit Hours**
- SOW 6561 - Part-Time MSW Clinical Field Integrative Seminar I **2 Credit Hours**
- SOW 6940 - Clinical Field Education **2 Credit Hours**

Eighth Semester (Spring)

- SOW Clinical Elective
- SOW 6433 - Clinical Evaluation in Social Work Practice **3 Credit Hours**
- SOW 6562 - Part Time MSW Clinical Field Integrative Seminar II **1 Credit Hour**
- SOW 6940 - Clinical Field Education **1 Credit Hour**

Ninth Semester (Summer)

- SOW 6324 - Clinical Practice with Groups **3 Credit Hours**
- SOW 6563 - Part-Time MSW Clinical Field Integrative Seminar III **1 Credit Hour**
- SOW 6940 - Clinical Field Education **1 Credit Hour**

Transfer Credit

Academic credit for life experience and previous work experience shall not be given, in whole or in part, in lieu of Social Work courses required to fulfill degree requirements.

Transfer credits will be evaluated on a case-by-case basis by the MSW Program Director. Students must submit syllabi and have earned a grade of "B-" or better in these courses for them to be evaluated for transfer credit.

Field courses taken elsewhere cannot be transferred toward satisfying the field component of the degree.

Students seeking to transfer to the School of Social Work from another CSWE accredited social work program are required to meet the criteria for admission and follow the application procedures. Additionally, one of the academic references must be from the MSW Program Coordinator or academic adviser in the program from which the applicant is transferring and must address the academic standing in that program. If not currently enrolled, the reference must be from the former MSW Program Director or academic adviser.

Equipment Fee

Full-time students in the MSW program pay a $35 equipment fee each semester that they are enrolled.

Independent Learning

Independent learning is demonstrated throughout the curriculum through the process of inquiry and dialogue. Projects such as research studies, clinical assessments and treatment plans, papers and internships also contribute to the self-development of our students.

The field experiences and practice electives provide substantial opportunities for students to learn independently and practically about social work practice.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance
Millican Hall 120

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

No

Program Description

The Master of Science in Biomedical Sciences program is a nonthesis program for students who wish to further their knowledge in the field and prepare for professional careers in medical fields, higher education, and research. **Students interested in research and thesis work should apply to the Master of Science in Biotechnology program.**
This degree has 5 tracks: Cancer Biology Track, Infectious Disease Track, Integrated Medical Sciences Track, Metabolic and Cardiovascular Sciences Track, and Neuroscience Track. Please scroll to the bottom of this page for further details on these Tracks.

While many students discover that they have interests in varied disciplines at the University of Central Florida, they are not permitted to pursue two majors within the College of Medicine. College of Medicine students may declare a major and a minor within the college, or pursue a second major or minor in another academic college at UCF. Students are encouraged to meet with an academic advisor to discuss these opportunities.

Program Prerequisites

A bachelor's degree in Biological Sciences or related area.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

Degree Requirements

Required Courses
18 Total Credits

- Complete all of the following
  - Complete the following:
    - ZOO6737 - Clinically Oriented Human Anatomy (4)
    - MCB6226 - Molecular Diagnostics (3)
    - PCB6595 - Regulation of Gene Expression (3)
    - PHI5634 - Medical Ethics (3)
  - Complete at least 1 of the following:
    - BSC6407C - Laboratory Methods in Molecular Biology (3)
    - BSC5418 - Tissue Engineering (3)
  - Complete 1 of the following
    - Earn at least 2 credits from the following types of courses:
      MCB 6938 - Seminar 1 Credit Hour (to be repeated)
    - Earn at least 2 credits from the following types of courses:
      MCB 6938 - Seminar 1 Credit Hour MCB 6314 - Industrial Perspectives Seminar 1 Credit Hours

Elective Courses
12 Total Credits

- Complete all of the following
  Biomedical Specialization
  - Complete all of the following
    - Earn at least 6 credits from the following:
      - BSC5418 - Tissue Engineering (3)
      - BSC5418 - Tissue Engineering (3)
      - MCB6226 - Molecular Diagnostics (3)
      - PCB5238 - Immunobiology (3)
      - PCB5236 - Cancer Biology (3)
      - PCB5275 - Signal Transduction Mechanics (3)
      - PCB5527 - Genetic Engineering and Biotechnology (3)
      - PCB5709C - Laboratory Virtual Simulations in Physiology (3)
      - PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism (3)
      - PCB5834C - Advanced Human Physiology (4)
      - IDS5127 - Foundation of Bio-Imaging Science (3)
      - PCB5265 - Stem Cell Biology (3)
      - GEB5516 - Technological Entrepreneurship (3)
    - Others: If approved by Graduate Committee

Microbiology Specialization

- Complete all of the following
  - Earn at least 6 credits from the following:
    - MCB5205 - Infectious Processes (3)
    - MCB5505 - Molecular Virology (3)
    - MCB5208 - Cellular Microbiology: Host-Pathogen Interactions (3)
    - MCB6417C - Microbial Metabolism (3)
    - MCB5932 - Current Topics in Molecular Biology (1 - 99)
    - MCB5415 - Cellular Metabolism (3)
    - MCB5209 - Microbial Stress Response (3)
    - PCB6595 - Regulation of Gene Expression (3)
    - PCB5235 - Molecular Immunology (3)
  - Others: If approved by Graduate Committee

Capstone
3 Total Credits

- Complete all of the following
  - Complete the following:
    - MCB6026 - Molecular Biology and Microbiology Capstone (3)
  - An in-depth current literature research report on a relevant subject will be required for each student. The student will select a faculty adviser to chair a faculty committee of two members for the evaluation of the report. An oral presentation on the written capstone report will be used as a final examination.
    Capstone Process
  - Students are encouraged to contact faculty as early as possible to identify a faculty whose research focus complements the student's interest. The student and the mentor should select one additional faculty members to serve on the capstone evaluation committee. Students must submit a signed Capstone Committee and Capstone Topic form to the Program Coordinator for approval as soon as the registration for the course is complete. These forms must be submitted to the Program Office. When the student is ready to defend the Capstone project, the student must register for the capstone course (MCB 6026) for three credit hours. It is important that the student register for the capstone course with the intention of completing the project at the end of the semester.
    Capstone Report
  - Evaluation of the capstone project requires a written report (in the format of a mini-review manuscript) and a presentation (project defense) in front of the capstone committee. Students may ask for advice and guidance from the project mentor/chair. The average capstone report ranges from 10 to 15 single-spaced pages in a manuscript format with proper citations. The student's Committee Chair will be responsible for checking the report for plagiarism using iThenticate before the report is shared with the committee. The committee must receive the report at least one week before the time of presentation.
    Capstone Defense
  - Note: The defense (presentation) must be held no later than one week before the final exam week. The capstone defense and comprehensive exam evaluation is designed to assess the student's knowledge and understanding of the project and other relevant subjects in the field. Questions asked by the capstone committee to evaluate the student as competent in the field will satisfy the requirement of the comprehensive exam. The oral presentation will take place in the form of a 30-40 minute seminar and will be followed by questions and discussion. The student will be evaluated on performance in all three sections (written report, oral presentation, and ability to answer questions). Should the student fail, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in an Unsatisfactory (U) grade in the course and dismissal from the program.

Comprehensive Exam
0 Total Credits

- Students must pass an oral comprehensive exam to qualify for the Master of Science. The oral comprehensive exam tests the student's understanding of the basic concepts in the field and relevant applications. The comprehensive exam will be conducted during the capstone defense and will be administered by the capstone committee. Should the student fail this exam, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in dismissal from the program.

Teaching Requirement
0 Total Credits

- Students without significant prior teaching experience, such as but not limited to, a minimum of a year in secondary schools or colleges, are required to serve as Classroom Laboratory Teaching Assistants for a minimum of one semester (one semester in at least one lab section).

Research Shadowing (Optional)
0 Total Credits

- Students are encouraged to discuss with their capstone mentor the possibility of joining the lab for research shadowing of other graduate students. Acquired lab skills should assist students with the capstone project and with future endeavors.

Independent Learning
0 Total Credits

- In the final semester of study, nonthesis students will complete a capstone course that requires an in-depth current literature

research report on a relevant subject, which will serve as the independent learning experience. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

Grand Total Credits: **33**

      Capstone Process
    - Students are encouraged to contact faculty as early as possible to identify a faculty whose research focus complements the student's interest. The student and the mentor should select one additional faculty members to serve on the capstone evaluation committee. Students must submit a signed Capstone Committee and Capstone Topic form to the Program Coordinator for approval as soon as the registration for the course is complete. These forms must be submitted to the Program Office. When the student is ready to defend the Capstone project, the student must register for the capstone course (MCB 6026) for three credit hours. It is important that the student register for the capstone course with the intention of completing the project at the end of the semester.
      Capstone Report
    - Evaluation of the capstone project requires a written report (in the format of a mini-review manuscript) and a presentation (project defense) in front of the capstone committee. Students may ask for advice and guidance from the project mentor/chair. The average capstone report ranges from 10 to 15 single-spaced pages in a manuscript format with proper citations. The student's Committee Chair will be responsible for checking the report for plagiarism using iThenticate before the report is shared with the committee. The committee must receive the report at least one week before the time of presentation.
      Capstone Defense
    - Note: The defense (presentation) must be held no later than one week before the final exam week. The capstone defense and comprehensive exam evaluation is designed to assess the student's knowledge and understanding of the project and other relevant subjects in the field. Questions asked by the capstone committee to evaluate the student as competent in the field will satisfy the requirement of the comprehensive exam. The oral presentation will take place in the form of a 30-40 minute seminar and will be followed by questions and discussion. The student will be evaluated on performance in all three sections (written report, oral presentation, and ability to answer questions). Should the student fail, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in an Unsatisfactory (U) grade in the course and dismissal from the program.

Comprehensive Examination
0 Total Credits

- Students must pass an oral comprehensive exam to qualify for the Master of Science. The oral comprehensive exam tests the student's understanding of the basic concepts in the field and relevant applications. The comprehensive exam will be conducted during the capstone defense and will be administered by the capstone committee. Should the student fail this

exam, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in dismissal from the program.

Teaching Requirement
0 Total Credits

- Students without significant prior teaching experience, such as, but not limited to, a minimum of a year in secondary schools or colleges, are required to serve as Classroom Laboratory Teaching Assistants for a minimum of one semester (one semester in at least one lab section).

Research Shadowing (Optional)
0 Total Credits

- Students are encouraged to discuss with their capstone mentor the possibility of joining the lab for research shadowing of other graduate students. Acquired lab skills should assist students with the capstone project and with future endeavors.

Independent Learning
0 Total Credits

- In the final semester of study, students will complete a capstone course that requires an in-depth current literature research report on a relevant subject, which will serve as the independent learning experience. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

Grand Total Credits: **33**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Nonthesis students are not considered for departmental graduate assistantships or tuition assistance.

UCF Student Financial Assistance
Millican Hall 120

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Track Description

The non-thesis Integrated Medical Sciences Track in the Biomedical Sciences MS program is designed to prepare students for acceptance into medical, dental, osteopathic, and/or other related professional schools of their choice by providing them with an opportunity to take two first-year medical school courses with the medical students in combination with graduate courses in biomedical sciences.

Track Prerequisites

A bachelor's degree in Biological Sciences or related area.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

Degree Requirements

Required Courses
18 Total Credits

- Complete all of the following
  - Complete the following:
    - BMS6001 - Cellular Function and Medical Genetics (5)
    - BMS6006 - Health and Disease (5)

  Student take one of the following three options
  - Complete 1 of the following

    Option 1
    - Complete all of the following
      - Complete the following:
        - PCB5834C - Advanced Human Physiology (4)
        - PCB5709C - Laboratory Virtual Simulations in Physiology (3)
      - Earn at least 1 credits from the following types of courses:
        MCB 6938 - Seminar 1 Credit Hour or IDS 7680 - Seminar 1 Credit Hour

    Option 2
    - Complete all of the following
      - Complete the following:
        - PHT6115C - Gross Anatomy/Neuroscience I (6)
      - Earn at least 2 credits from the following types of courses:
        MCB 6938 - Seminar 1 Credit Hour (can be repeated by all students) or IDS 7680 - Seminar 1 Credit Hour (can be repeated by all students)

    Option 3
    - Complete all of the following
      - Complete the following:
        - BSC5665 - Clinical Embryology and Congenital Malformations (3)
        - ZOO5758C - Vertebrate Histology (4)
      - Earn at least 1 credits from the following types of courses:
        MCB 6938 - Seminar 1 Credit Hour or IDS 7680 - Seminar 1 Credit Hour

Elective Courses
12 Total Credits

- Complete all of the following

Biomedical Specialization

- Complete all of the following
  - Earn at least 6 credits from the following:
    - MCB5225 - Molecular Biology of Disease (3)
    - MCB6226 - Molecular Diagnostics (3)
    - PCB5238 - Immunobiology (3)
    - PCB5238 - Immunobiology (3)
    - PCB5265 - Stem Cell Biology (3)
    - PCB5275 - Signal Transduction Mechanics (3)
    - PCB5527 - Genetic Engineering and Biotechnology (3)
    - PCB5709C - Laboratory Virtual Simulations in Physiology (3)
    - PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism (3)
    - PCB5834C - Advanced Human Physiology (4)
    - IDS5127 - Foundation of Bio-Imaging Science (3)
    - BSC5418 - Tissue Engineering (3)
    - GEB5516 - Technological Entrepreneurship (3)
    - ZOO5748C - Clinical Neuroanatomy (5)
    - ZOO5749C - Clinical Neuroscience (5)
  - Other courses may be substituted with approval by the graduate committee.

Microbiology Specialization

- Complete all of the following
  - Earn at least 6 credits from the following:
    - MCB5205 - Infectious Processes (3)
    - MCB5505 - Molecular Virology (3)
    - MCB5208 - Cellular Microbiology: Host-Pathogen Interactions (3)
    - MCB5654 - Applied Microbiology (3)
    - MCB6417C - Microbial Metabolism (3)
    - MCB5932 - Current Topics in Molecular Biology (1 - 99)
    - MCB5415 - Cellular Metabolism (3)
    - MCB5209 - Microbial Stress Response (3)
    - PCB5235 - Molecular Immunology (3)
  - Other courses may be substituted with approval by the graduate committee.

Capstone
3 Total Credits

- Complete all of the following
  - Complete the following:
    - MCB6026 - Molecular Biology and Microbiology Capstone (3)
  - The Capstone Project for the IMS Track is customizable based on student needs. Options include the following: Scholarly in-depth literature review in biomedical and/or clinical sciences (report required) Physician-Shadowing Experience (report required) Service-Learning/Volunteer Work Experience (report required) Laboratory Research (report required) Other (must be pre-approved by the program coordinator/director) (report required)
    The Capstone Process
  - Students are encouraged to contact faculty as early as possible to identify a faculty whose research focus complements the student's interest. The student and the mentor should select one additional faculty member to serve on the capstone evaluation committee. Students must submit a signed Capstone Committee and Capstone Topic form to the Program Coordinator for approval as soon as the registration for the course is complete. These forms must be submitted to the Program Office. When the student is ready to defend the Capstone project the student must register for the capstone course (MCB 6026) for three credit hours. It is important that the student register for the capstone course with the intention of completing the project at the end of the semester.
    The Capstone Report
  - Evaluation of the capstone project requires a written report (in the format of a mini-review manuscript) and a presentation (project defense) in front of the capstone committee. Students may ask for advice and guidance from the project mentor/chair. The average capstone report ranges from 10 to 15 single-spaced pages in a manuscript format with proper citations. The student's Committee Chair will be responsible for checking the report for plagiarism using iThenticate before the report is shared with the committee. The committee must receive the report at least one week before the time of presentation.
    The Capstone Defense
  - Note: The defense (presentation) must be held no later than one week before the final exam week. The capstone defense and comprehensive exam evaluation is designed to assess the student's knowledge and understanding of the project and other relevant subjects in the field. Questions asked by the capstone committee to evaluate the student as competent in the field will satisfy the requirement of the comprehensive exam. The oral presentation will take place in the form of a 30-40 minute seminar and will be followed by questions and discussion. The student will be evaluated on performance in all three sections (written report, oral presentation, and ability to answer questions). Should the student fail, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in an Unsatisfactory (U) grade in the course and dismissal from the program.

Comprehensive Exam
0 Total Credits

- Students must pass an oral comprehensive exam to qualify for the Master of Science. The oral comprehensive exam tests the

student's understanding of the basic concepts in the field and relevant applications. The comprehensive exam will be conducted during the capstone defense and will be administered by the capstone committee. Should the student fail this exam, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in dismissal from the program.

Track Description

The Metabolic and Cardiovascular Sciences Track in the Master of Science in Biomedical Sciences Program is a nonthesis plan of study for students who want to further their knowledge in the metabolic and cardiovascular sciences field and who may pursue doctoral training or professional education focused on medicine and metabolic and cardiovascular sciences. Students interested in research and thesis work should apply to the Master of Science in Biotechnology Program.

Track Prerequisites

A bachelor's degree in Biological Sciences or related area.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Degree Requirements

Required Courses
18 Total Credits

- Complete all of the following
  - Complete the following:
    - ZOO6737 - Clinically Oriented Human Anatomy (4)
    - PCB6595 - Regulation of Gene Expression (3)
    - PCB6595 - Regulation of Gene Expression (3)
    - PCB5837 - Cellular and Molecular Neuroscience (3)
  - Complete at least 1 of the following:
    - BSC6407C - Laboratory Methods in Molecular Biology (3)
    - BSC5418 - Tissue Engineering (3)
  - Complete 1 of the following
    - Earn at least 2 credits from the following types of courses:
      MCB 6938 - Seminar 1 Credit Hour (to be repeated)
    - Earn at least 2 credits from the following types of courses:
      MCB 6938 - Seminar 1 Credit Hour AND MCB 6314 - Industrial Perspectives Seminar 1 Credit Hours

Elective Courses
12 Total Credits

- Complete all of the following
  - Earn at least 12 credits from the following:
    - SPA6417 - Management of Acquired Cognitive/Communication Disorders Across the Lifespan (3)
    - PCB5275 - Signal Transduction Mechanics (3)
    - ZOO5748C - Clinical Neuroanatomy (5)
    - ZOO5749C - Clinical Neuroscience (5)
    - CAP6616 - Neuroevolution and Generative and Developmental Systems (3)
    - PCB5838 - Cellular and Molecular Basis of Brain Functions (3)
    - BSC5418 - Tissue Engineering (3)
    - PCB5709C - Laboratory Virtual Simulations in Physiology (3)
    - MCB5225 - Molecular Biology of Disease (3)
    - PCB5834C - Advanced Human Physiology (4)
    - EXP5254 - Human Factors and Aging (3)
    - IDS6916 - Simulation Research Methods and Practicum (3)
    - EXP5208 - Sensation and Perception (3)
    - PSB5005 - Physiological Psychology (3)
    - EXP6116 - Visual Performance (3)
    - EXP6506 - Human Cognition and Learning (3)
    - PSB6348 - The Neuroanatomical Basis of Psychological Function (3)
    - PSB6348 - The Neuroanatomical Basis of Psychological Function (3)
    - PSB6328 - Psychophysiology (3)
    - PSB6352 - Neuroimaging Design and Analysis Methods (3)
  - Other elective courses must be approved by the Program Coordinator.

Capstone
3 Total Credits

- Complete all of the following
  - Complete the following:
    - MCB6026 - Molecular Biology and Microbiology Capstone (3)

- An in-depth current literature research report on a relevant subject will be required for each student. The student will select a faculty adviser to chair a faculty committee of two members for the evaluation of the report. An oral presentation on the written capstone report will be used as a final examination.
  Capstone Process
- Students are encouraged to contact faculty as early as possible to identify a faculty whose research focus complements the student's interest. The student and the mentor should select one additional faculty members to serve on the capstone evaluation committee. Students must submit a signed Capstone Committee and Capstone Topic form to the Program Coordinator for approval as soon as the registration for the course is complete. These forms must be submitted to the Program Office. When the student is ready to defend the Capstone project, the student must register for the capstone course (MCB 6026) for three credit hours. It is important that the student register for the capstone course with the intention of completing the project at the end of the semester.
  Capstone Report
- Evaluation of the capstone project requires a written report (in the format of a mini-review manuscript) and a presentation (project defense) in front of the capstone committee. Students may ask for advice and guidance from the project mentor/chair. The average capstone report ranges from 10 to 15 single-spaced pages in a manuscript format with proper citations. The student's Committee Chair will be responsible for checking the report for plagiarism using iThenticate before the report is shared with the committee. The committee must receive the report at least one week before the time of presentation.
  Capstone Defense
- Note: The defense (presentation) must be held no later than one week before the final exam week. The capstone defense and comprehensive exam evaluation is designed to assess the student's knowledge and understanding of the project and other relevant subjects in the field. Questions asked by the capstone committee to evaluate the student as competent in the field will satisfy the requirement of the comprehensive exam. The oral presentation will take place in the form of a 30-40 minute seminar and will be followed by questions and discussion. The student will be evaluated on performance in all three sections (written report, oral presentation, and ability to answer questions). Should the student fail, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in an Unsatisfactory (U) grade in the course and dismissal from the program.

Comprehensive Examination
0 Total Credits

- Students must pass an oral comprehensive exam to qualify for the Master of Science. The oral comprehensive exam tests the student's understanding of the basic concepts in the field and relevant applications. The comprehensive exam will be conducted during the capstone defense and will be administered by the capstone committee. Should the student fail this exam, a second opportunity will be provided within two weeks of the first attempt. A second failure will result in dismissal from the program.

Teaching Requirement
0 Total Credits

- Students without significant prior teaching experience, such as, but not limited to, a minimum of a year in secondary schools or colleges, are required to serve as Classroom Laboratory Teaching Assistants for a minimum of one semester (one semester in at least one lab section).

Research Shadowing (Optional)
0 Total Credits

- Students are encouraged to discuss with their capstone mentor the possibility of joining the lab for research shadowing of other graduate students. Acquired lab skills should assist students with the capstone project and with future endeavors.

Independent Learning
0 Total Credits

- In the final semester of study students will complete a capstone course that requires an in-depth current literature research report on a relevant subject, which will serve as the independent learning experience. The student will select a faculty adviser to chair a faculty committee of two members for evaluation of the report.

Grand Total Credits: **33**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Nonthesis students are not considered for departmental graduate assistantships or tuition assistance.

Program Description

The Biomedical Sciences PhD program is an interdisciplinary program that combines biological and physical science. This program is intended to educate students in independent research and team collaboration within the field.

Program Prerequisites

Applicants entering the program with regular status are expected to have completed course work required for a bachelor's degree in chemistry, cell biology, biochemistry, biophysics, genetics, molecular biology or microbiology.

Degree Requirements

Required Courses
24 Total Credits

- Complete all of the following
  - Complete the following:
    - BSC6432 - Biomedical Sciences I (5)
    - BSC6431 - Practice of Biomedical Sciences (3)
    - IDS6694 - Experimental Design and Analysis in Biomedical Sciences (2)
    - GMS6860 - Statistics for Biomedical Scientists (3)
  - Rule Not Selected
  - Earn at least 3 credits from the following:
    - PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism (3)
    - PCB5837 - Cellular and Molecular Neuroscience (3)
    - PCB5236 - Cancer Biology (3)
    - MCB6273 - Advanced Topics in Infectious Processes (3)
  - Rule Not Selected
  - Earn at least 4 credits from the following types of courses:
    IDS 7690 - Frontiers in Biomedical Sciences 1 Credit Hours (four semesters, 1 credit hour each semester)
  - Earn at least 4 credits from the following types of courses:
    IDS 7692L - Experiments in Biomedical Sciences (Lab Rotation: 3 credits/first semester, 1 credit/2nd semester)

Elective Courses
9 Total Credits

- Complete all of the following
  - Earn at least 9 credits from the following:
    - BSC5418 - Tissue Engineering (3)
    - BSC5436 - Biomedical Informatics : Structure Analysis (3)
    - BSC6407C - Laboratory Methods in Molecular Biology (3)
    - CAP5510 - Bioinformatics (3)
    - CHM5305 - Bioconjugate Chemistry (3)
    - CHM5450 - Polymer Chemistry (3)
    - CHM5451C - Techniques in Polymer Science (3)
    - CHS6251 - Applied Organic Synthesis (3)
    - CHS6535 - Forensic Molecular Biology (3)
    - CHS6535L - Forensic Analysis of Biological Materials (3)
    - CHS6536 - Population Genetics and Genetic Data (3)
    - CHS6536 - Population Genetics and Genetic Data (3)
    - IDS5127 - Foundation of Bio-Imaging Science (3)
    - MCB5205 - Infectious Processes (3)
    - MCB5208 - Cellular Microbiology: Host-Pathogen Interactions (3)
    - MCB5209 - Microbial Stress Response (3)
    - MCB5225 - Molecular Biology of Disease (3)
    - MCB5505 - Molecular Virology (3)
    - MCB5722C - Methods in Biotechnology (4)
    - MCB5932 - Current Topics in Molecular Biology (1 - 99)
    - MCB5415 - Cellular Metabolism (3)
    - MCB6226 - Molecular Diagnostics (3)
    - MCB6417C - Microbial Metabolism (3)
    - PCB5025 - Molecular and Cellular Pharmacology (3)
    - PCB5235 - Molecular Immunology (3)

        - PCB5236 - Cancer Biology (3)
        - PCB5238 - Immunobiology (3)
        - PCB5265 - Stem Cell Biology (3)
        - PCB5275 - Signal Transduction Mechanics (3)
        - PCB5527 - Genetic Engineering and Biotechnology (3)
        - PCB5596 - Biomedical Informatics: Sequence Analysis (3)
        - PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism (3)
        - PCB5838 - Cellular and Molecular Basis of Brain Functions (3)
        - PCB6528 - Plant Molecular Biology (3)
        - PCB6595 - Regulation of Gene Expression (3)
        - PCB6677 - Molecular Evolution and Phylogenetics (3)
        - ZOO5748C - Clinical Neuroanatomy (5)
    - Rule Not Selected
    - Rule Not Selected
    - At least 9 hours of electives must be taken from the above list. Any electives not on this list must be approved by the Graduate Committee before being counted toward degree credit requirements. Directed research, doctoral research, and dissertation research may be used to satisfy requirements beyond the first 12 hours, with approval from the program director.
    - Rule Not Selected

Unrestricted Electives
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  Students should take a minimum of 13 credit hours of electives, directed research, or doctoral research in consultation with their adviser.

Dissertation
24 Total Credits

- Complete all of the following
    - Earn at least 24 credits from the following types of courses:
      IDS 7980 - Dissertation Research
    - Up to 24 credit hours can be taken. A minimum of 15 credit hours is required for students with additional unrestricted electives due to the transfer of credits.

Cumulative/Qualifying Examinations
0 Total Credits

- Cumulative examinations taken during the second year will determine if students should continue with their doctoral studies. Exams will be overseen by a cumulative exam committee. Each exam will consist of questions set by different faculty members. Questions will deal with data interpretation from the current literature and the design of experiments to test a hypothesis. A student must satisfactorily answer cumulative examination questions, displaying a knowledge base consistent with continuation in the PhD program.

Candidacy Examination
0 Total Credits

- Candidacy will consist of writing and orally defending a proposal outlining a novel research idea to the dissertation committee. The written proposal will be prepared independently, following NIH-style grant format, and must be approved by the dissertation committee (see Biomedical Sciences PhD Program Handbook for full description of Candidacy Exam requirements and procedures). After passing the candidacy examination and meeting other requirements as specified, the student can register for dissertation hours.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Successful completion of all coursework, except for dissertation hours. Successful completion of candidacy examination. Successful defense of the written dissertation proposal. Successful completion of Academic Integrity requirements The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Dissertation Defense
0 Total Credits

- The dissertation should be of significant scope and depth such that the work has made significant advances in the area of biomedical science. The Ph.D. dissertation research must generate sufficient quantity and quality data to support a minimum of two original manuscripts (first-authored by the student) in a mainstream journal in the field. One first-author original research article published or accepted for publication is required for pre-defense. In addition to meeting the pre-defense requirement for publication, a second manuscript must have been submitted and subjected to peer review before the defense. Upon completion and approval of the doctoral dissertation by all designated faculty and university offices, the student will make a formal presentation of the research findings in a seminar format to the dissertation committee and other university faculty and students. The candidate will answer questions and defend conclusions about the subject matter.

Independent Learning
0 Total Credits

- The dissertation serves as the independent learning experience.

Grand Total Credits: **72**

Track Description

The College of Medicine offers an integrated MD/PhD curriculum that enables students to fulfill all requirements and earn the Doctor of Medicine and the Doctor of Philosophy.

This program provides opportunity for MD students to obtain advanced research and training experience and for PhD students to obtain medical training. The program develops physician-scientists with preparation for both academic research and teaching careers. Physician-scientists are in an excellent position to facilitate bench-to-bedside translation of applicable research findings.

Students must fulfill all requirements for both programs to earn both the MD and PhD degrees. As indicated in the curriculum description, some medical modules can be substituted for certain graduate courses and vice versa to help reduce redundancy and streamline time to completion of this integrated program. Students will be able to complete the MD/PhD program in as few as 6 years, although most students will likely require 7-8 years to fulfill all of the requirements. An MD/PhD program committee consisting of faculty from both the medical and graduate programs will serve as the oversight committee responsible for tracking and evaluating student progress in this program.

Students in the integrated MD/PhD Track in Biomedical Sciences must be accepted in the College of Medicine MD program and begin working on their PhD research project during the first two years of medical school. Students take medical courses during the first two years and must successfully pass the USMLE Step 1 exam at the end of year 2 prior to beginning full-time graduate studies in the Biomedical Sciences PhD Program. Required and elective graduate courses for the PhD program are completed in years 3-4 while the student is continuing research. Clinical clerkships that are typically completed in years 3-4 of medical school will in most cases be deferred until the student has completed the PhD program requirements, though some minimum level of ongoing clinical training will continue throughout the entire duration of the program. This ensures that the student remains connected with clinical education and training even while primarily focused on the graduate portion of the MD/PhD program.

The Biomedical Sciences PhD program requires a minimum of 72 credit hours beyond the bachelor's degree, including a minimum total of 27 hours of formal course work exclusive of independent study that are required. The 72 credit hours in the PhD program consists of 23 credit hours of core courses, 12 credit hours of electives, and a minimum of 15 credit hours of dissertation research. The remaining 22 credit hours may consist of additional electives, doctoral research and/or dissertation research. Students entering with a master's degree may request that up to 30 semester credit hours of previous course work be waived as degree requirements with approval from the dissertation committee.

The MD curriculum can be found here: http://med.ucf.edu/academics/md-program/integrated-curriculum/.

Programmatic deficiencies expected of applicants from diverse settings will be addressed early in the program by completion of appropriate course work. Students may register for doctoral research until they have been admitted to candidacy, after which they must register for dissertation research.

New students will rotate through at least two different laboratories to identify a faculty mentor/sponsor and research area of interest for their dissertation. Finally, a sequence of required seminars will familiarize students with field-related literature and introduce them to the conceptual and technical frameworks in which they will work. All students receiving assistantships must enroll full time.

MD/PhD students are required to maintain good academic standing in both the MD and PhD components of the curriculum. Students must first satisfactorily complete the first two years of the medical school curriculum and pass the USMLE Step 1 exam before they can begin full-time PhD enrollment.

Track Prerequisites

Applicants entering the program with regular status are expected to have completed course work required for a bachelor's degree in chemistry, cell biology, biochemistry, biophysics, genetics, molecular biology or microbiology.

Degree Requirements

Required Courses
21 Total Credits

- Complete all of the following
    - Complete the following:

        - BMS6001 - Cellular Function and Medical Genetics (5)
        - BSC6433 - Biomedical Sciences II (5)
        - BSC6431 - Practice of Biomedical Sciences (3)
        - IDS6694 - Experimental Design and Analysis in Biomedical Sciences (2)
    - Earn at least 2 credits from the following types of courses:
      IDS 7690 - Frontiers in Biomedical Sciences 1 Credit Hours (two semesters, 1 credit hour each semester)
    - Earn at least 4 credits from the following types of courses:
      IDS 7692L - Experiments in Biomedical Sciences (Lab Rotation: 3 credits/first semester, 1 credit/2nd semester)

Elective Courses
12 Total Credits

- Complete all of the following
    - At least 12 hours of electives must be taken from the following list. Any electives not on this list must be approved by the Graduate Committee before being counted toward degree credit requirements. Directed research, doctoral research and dissertation research may be used to satisfy requirements beyond the first 12 hours, with approval from the program director. Students successfully completing the first year of medical school at UCF may substitute the following medical modules to fulfill the elective course requirement: BMS 6006 - Health and Disease 5 Credit Hours BMS 6050 - Psychosocial Issues in Healthcare 4 Credit Hours BMS 6631 - Hematology and Oncology 4 Credit Hours Others: If approved by the Graduate Committee.
    - Earn at least 12 credits from the following:
        - BSC5418 - Tissue Engineering (3)
        - BSC5436 - Biomedical Informatics : Structure Analysis (3)
        - BSC6407C - Laboratory Methods in Molecular Biology (3)
        - CAP5510 - Bioinformatics (3)
        - CHM5305 - Bioconjugate Chemistry (3)
        - CHM5450 - Polymer Chemistry (3)
        - CHM5451C - Techniques in Polymer Science (3)
        - CHS6251 - Applied Organic Synthesis (3)
        - CHS6535 - Forensic Molecular Biology (3)
        - CHS6535L - Forensic Analysis of Biological Materials (3)
        - CHS6536 - Population Genetics and Genetic Data (3)
        - GEB5516 - Technological Entrepreneurship (3)
        - IDS5127 - Foundation of Bio-Imaging Science (3)
        - MCB5205 - Infectious Processes (3)
        - MCB5208 - Cellular Microbiology: Host-Pathogen Interactions (3)
        - MCB5225 - Molecular Biology of Disease (3)
        - MCB5505 - Molecular Virology (3)
        - MCB5722C - Methods in Biotechnology (4)
        - MCB5932 - Current Topics in Molecular Biology (1 - 99)
        - MCB5937 - Special Topics (1 - 99)
        - MCB6226 - Molecular Diagnostics (3)
        - MCB6417C - Microbial Metabolism (3)
        - PCB5025 - Molecular and Cellular Pharmacology (3)
        - PCB5236 - Cancer Biology (3)
        - PCB5238 - Immunobiology (3)
        - PCB5265 - Stem Cell Biology (3)
        - PCB5275 - Signal Transduction Mechanics (3)
        - PCB5527 - Genetic Engineering and Biotechnology (3)
        - PCB5596 - Biomedical Informatics: Sequence Analysis (3)
        - PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism (3)
        - PCB5838 - Cellular and Molecular Basis of Brain Functions (3)
        - PCB6528 - Plant Molecular Biology (3)
        - PCB6595 - Regulation of Gene Expression (3)
        - PCB6677 - Molecular Evolution and Phylogenetics (3)

Unrestricted Electives
24 Total Credits

- Earn at least 24 credits from the following types of courses:
  Students should take 24 credit hours of electives, directed research, doctoral research or dissertation research, in consultation with their adviser.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  IDS 7980 - Dissertation Research 15 Credit Hours

Cumulative/Qualifying Examinations
0 Total Credits

- Cumulative examinations will determine if students should continue with their doctoral studies. Four exams will be given by program faculty members during the second year. Each exam will consist of four questions set by different faculty members to

evaluate the student's ability to interpret data, formulate a hypothesis based on the data presented, and effectively design a series of experiments using biomedical science approaches to test their hypothesis. Performance will be evaluated by the graduate exam committee. A student must satisfactorily answer 10 cumulative questions out of 16 to be eligible to continue in the PhD program.

Candidacy Examination
0 Total Credits

- Candidacy will consist of writing and orally defending a proposal outlining a novel research idea to the dissertation committee. The written proposal will be prepared independently, following NIH-style grant format, and must be approved by the dissertation committee (see Biomedical Sciences PhD Program description for full description of Candidacy Exam requirements and procedures). After passing the candidacy examination and meeting other requirements as specified, the student can register for dissertation hours.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Successfully complete a minimum of 48 credit hours. Successful completion of Academic Integrity requirements. Successful completion of all coursework, except for dissertation hours. Successful completion of candidacy. Successful defense of the written dissertation proposal. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submission of an approved program of study.

Dissertation Defense
0 Total Credits

- The dissertation should be of significant scope and depth such that the work has made significant advances in the area of biomedical science. The Ph.D. dissertation research must generate sufficient quantity and quality data to support a minimum of two original manuscripts (first-authored by the student) in a mainstream journal in the field. One first-author original research article published or accepted for publication is required for pre-defense. In addition to meeting the pre-defense requirement for publication, a second manuscript must have been submitted and subjected to peer review before the defense. Upon completion and approval of the doctoral dissertation by all designated faculty and university offices, the student will make a formal presentation of the research findings in a seminar format to the dissertation committee and other university faculty and students. The candidate will answer questions and defend conclusions about the subject matter.

Independent Learning
0 Total Credits

- The dissertation serves as the independent learning experience.

Program Description

The Master of Science in Biotechnology program in the College of Medicine will prepare students to function in the industrial biotechnology environment. This program is designed to give students broad knowledge and training in the scientific and practical aspects of biotechnology.

It involves innovative, hands-on and multidisciplinary learning approaches to educate and train students in scientific aspects of biotechnology. The courses and research training required of all students in this program are designed to develop independent thinking, teamwork and communication skills, which are highly desirable in the biotechnology industry. Students will be provided an industrial perspective and an understanding of product development at the same time as they are trained in the biotechnology techniques required for such development.

What makes this program unique is the focus on practical training offered to graduate students through master's thesis research in molecular biotechnology to perform jobs in a laboratory environment that require scientific talent.

Program Prerequisites

A bachelor's degree in Biological Sciences or related area.

Applicants who hold a BS degree in unrelated fields are expected to have the equivalent of 16 semester hours in biological sciences including a course in general microbiology, biochemistry or molecular biology or cell biology, plus one year of organic chemistry, one year of physics, basic university mathematics and statistics, and laboratory skills equivalent to the minimum required of our own undergraduates. Minor deficiencies may be remedied after acceptance by enrollment at the first opportunity in an appropriate course.

Degree Requirements

Required Courses
21 - 22 Total Credits

- Complete all of the following
  - Core
  - Complete all of the following
    - Complete at least 1 of the following:
      - MCB5722C - Methods in Biotechnology (4)
      - BSC6407C - Laboratory Methods in Molecular Biology (3)

- Complete the following:
  - BSC6432 - Biomedical Sciences I (5)
  - BSC6433 - Biomedical Sciences II (5)
  - BSC6431 - Practice of Biomedical Sciences (3)
- Complete at least 1 of the following:
  - PCB5527 - Genetic Engineering and Biotechnology (3)
  - BSC5418 - Tissue Engineering (3)
  - MCB6417C - Microbial Metabolism (3)
  - PCB5025 - Molecular and Cellular Pharmacology (3)

Graduate Seminars

- Earn at least 2 credits from the following types of courses:
  Students will participate in at least two graduate seminar courses that will prepare them for making professional presentations with an emphasis in biotechnology. The courses will involve the participation of speakers from the biotechnology industry with emphasis on an industrial perspective on biotechnology applications and product development. MCB 6314 - Industrial Perspectives Seminar 1 Credit Hours OR MCB 6938 1 Credit Hour (1 semester only)

Elective Courses
3 - 4 Total Credits

- Complete all of the following
  - Complete at least 1 of the following:
    - BSC5418 - Tissue Engineering (3)
    - BSC5436 - Biomedical Informatics : Structure Analysis (3)
    - BSC6407C - Laboratory Methods in Molecular Biology (3)
    - IDS5127 - Foundation of Bio-Imaging Science (3)
    - MCB5205 - Infectious Processes (3)
    - MCB5208 - Cellular Microbiology: Host-Pathogen Interactions (3)

    - PCB5025 - Molecular and Cellular Pharmacology (3)
    - PCB5236 - Cancer Biology (3)
    - PCB5238 - Immunobiology (3)
    - PCB5596 - Biomedical Informatics: Sequence Analysis (3)
    - PCB5709C - Laboratory Virtual Simulations in Physiology (3)
    - PCB5834C - Advanced Human Physiology (4)
    - PCB6528 - Plant Molecular Biology (3)
    - PCB6595 - Regulation of Gene Expression (3)
    - PCB5838 - Cellular and Molecular Basis of Brain Functions (3)
    - PCB5265 - Stem Cell Biology (3)
    - PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism (3)
    - ZOO5745C - Neuroanatomical Pathways and their Neurotransmitters (4)
    - ZOO5745C - Neuroanatomical Pathways and their Neurotransmitters (4)
    - GEB5516 - Technological Entrepreneurship (3)
  - Student may choose: MCB 5932 - Current Topics in Molecular Biology VAR Credit Hours PCB 5937 - Special Topics: Human Endocrinology 3 Credit Hours Others: If approved by the Graduate Committee

Thesis
6 Total Credits

- Earn at least 6 credits from the following types of courses:
  MCB 6971 Students will take a minimum of six credits of thesis research (MCB 6971) to complete their research and submit their thesis specializing in biotechnology research. Students are expected to have an in-depth discussion with at least three faculty members before choosing a laboratory for thesis research. The student and the Thesis Adviser/Major Professor will jointly recommend an advisory committee comprised of at least three members. The committee composition must reflect expertise relevant to the student's thesis research and must be approved by the Graduate Committee. Students switching to change the composition of the Thesis Advisory Committee must also obtain approval from the Graduate Committee.

Thesis Proposal
0 Total Credits

- The thesis proposal defense requirement should be met and passed successfully no later than the end of the summer of the first year in the program. Students will not be allowed to register for courses for the Fall semester of their second year until this requirement is fulfilled. The Thesis Proposal requirement includes: a written 5-page thesis proposal, a thesis proposal defense in front of the thesis committee, and questions by the thesis committee to test the student's understanding of the basic concepts in the field and relevant applications. The student will be evaluated on performance in all three sections. Should the student fail, a second opportunity will be provided within 2 weeks of the first attempt. A second failure will result in

dismissal from the program. An oral thesis defense is required. The defense will be in the format of: A 50-minute presentation of the thesis work, including a 5-minute introduction A 10-minute free period for the general audience to ask questions A 1-hour closed-door examination by the Thesis Advisory Committee and the program faculty present The thesis should be of significant scope and depth such that the work has made advances in the area of biotechnology. The MS thesis research must generate sufficient quantity and quality data to support the submission of a minimum of one manuscript. Approval of the final thesis will require consent from the majority of the Program Faculty who choose to review the thesis, inclusive of the Thesis Advisory Committee. Faculty members with dissenting vote on the thesis must provide written justification. Scientific journal review criteria will be used as guidelines by the faculty to evaluate the final thesis for its appropriateness for publication in the target journal. Students will be evaluated on the progress in thesis research by the thesis advisory committee for fall and spring. Two consecutive unsatisfactory evaluations will result in dismissal from the program.

Comprehensive Examination
0 Total Credits

- Students must pass a comprehensive exam to qualify for the Master of Science degree. Students must successfully pass an oral comprehensive examination to test the understanding of the basic concepts in the field and relevant applications. The Comprehensive Examination will be conducted during the thesis proposal defense. The exam will be administered by the thesis committee. Should the student fail this exam, a second opportunity will be provided within 2 weeks of the first attempt. A second failure will result in dismissal from the program.

Independent Learning
0 Total Credits

- The required thesis allows the student to engage in independent learning.

Grand Total Credits: **30 - 32**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

All students receiving assistantships must enroll full time.

UCF Student Financial Assistance
Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Licensure Disclosure

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-COM-Medical-Doctor-MD.pdf.

Program Description

UCF's M.D. Program allows students to prepare for careers in every discipline of medicine and to focus on an individualized area of study or research. The M.D. Program learning experience is a unique and exciting blend of state-of-the-art technology, interactions with virtual patients, clinical and laboratory experiences, research, facilitator-directed small group sessions, and interactive didactic lectures. The UCF College of Medicine is fully accredited by LCME.

Program highlights include:

Clinical experiences are embedded throughout the first two years in P-1 and P-2 Community of Practice modules. Students will work with community preceptors in a variety of settings to practice skills and to apply the concepts mastered in the integrated basic science curriculum to real patients.

As part of approach described by the Dean as "Keep the Dream Alive!", each student will complete a focused inquiry and research project in the I-1 and I-2 modules. The scope of the project is limited only by the student's imagination and may include bench or clinical research as well as studies of quality of care, hospitality in medicine, quality of life, legal aspects of medicine, and more. Students will work with a mentor to develop a project or area of study that focuses on the student's unique interest and career plans.

Innovative simulation and animation experiences have been designed explicitly to integrate into and reinforce the curriculum. From basic science concepts to clinical diagnoses and treatment, the human patient mannequin simulators and online interactive virtual patients enhance and complement learning.

UCF offers these joint degrees:

MD/MBA, a joint medical and business degree program focusing on developing effective problem-solving and decision-making skills.

MD/MS in Hospitality and Tourism Management, a specialized degree program for individuals interested in enhancing their management skills through studying hospitality and service-oriented business models.

MD/PhD, a College of Medicine program that prepares clinician-scientists for a career in academic medicine to become leaders in the international academic medical community.

Licensure Disclosure

The curriculum prepares students for both the AGACNP board certification examination administered through the American Nurses Credentialing Center and the Acute Care Nurse Practitioner-Adult-Gerontology certification examination administered through the American Association of Critical Care Nurses. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Adult-Gerontology-Acute-Care-GC.pdf**.**

Program Description

The Adult-Gerontology Acute Care Nurse Practitioner post-master's certificate prepares the advanced practice nurse to care for patients with medically complex stable and unstable acute, critical, and chronic illnesses across care settings ranging from hospitals to subacute, ambulatory care, clinic and home care environments. The certificate provides a spectrum of care from disease prevention to acute and critical care management. The Adult-Gerontology Acute Care Nurse Practitioner graduate certificate prepares nurses who have already completed their graduate education for entry-level advanced practice in acute care. The program prepares graduates to enter the current healthcare system based on a strong scientific foundation for practice. The curriculum offers flexibility and emphasis on evidence-based practice, leadership, and organizational analysis, and provides analytic, critical thinking, and diagnostic reasoning skills to examine practice innovations. The certificate requires 23 credit hours beyond the master's or doctor of nursing practice (DNP) degree.

Total Credit Hours Required: 23 Credit Hours Minimum beyond the Master's Degree

Program Prerequisites

- NGR 5003 – Advanced Health Assessment and Diagnostic Reasoning **2 Credit Hours**
- NGR 5003L – Advanced Health Assessment and Diagnostic Reasoning Lab **1 Credit Hours**
- NGR 5141 – Pathophysiological Bases for Advanced Nursing Practice **3 Credit Hours**
- NGR 6172 – Pharmacology for Advanced Nursing Practice **3 Credit Hours**
- NGR 5638 – Health Promotion **3 Credit Hours**

Admission is open to those with MSN Degrees and are licensed and nationally certified as an advanced practice registered nurse, but who are not prepared as Adult-Gerontology Acute Care Nurse Practitioners.

Licensure Disclosure

For information on how this program may prepare you for professional licensure, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Adult-Gerontology-Primary-Care-GC.pdf.

Program Description

The post-master's Adult/Gerontology Primary Care Nurse Practitioner Graduate Certificate prepares nurses who already have received a master's degree in nursing for positions as Adult/Gerontology Primary Care Nurse Practitioners. Graduates of this program are eligible to sit for the Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) National Board Certification Examination offered by the American Academy of Nurse Practitioners Certification Board or the American Nurses Credentialing Center.

Program Objectives

- Analyze social, economic, ethical, cultural, legal and political issues influencing nursing practice and health care in a global context.
- Collaborate with leaders in nursing and other disciplines to improve the quality of professional nursing practice and the healthcare system.
- Develop and implement leadership, management and teaching strategies for the improvement of health and healthcare.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy to improve the health of communities.
- Participate in lifelong learning activities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities and nursing theories to support advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skills.
- Practice in an advanced nursing role.

The program is 18 credit hours and includes up to 660 hours of clinical practice. There are 12 credit hours of prerequisite requirements.

Total Credit Hours Required: 18 Credit Hours Minimum beyond the Master's Degree

Program Prerequisites

- BSN and MSN degree from an accredited institution.
- Undergraduate Statistics course.
- Licensure as an advanced practice registered nurse (APRN) in the State of Florida. (Out of state applicants must be eligible for licensure in Florida and must achieve licensure to begin clinical courses.)

- Students must demonstrate successful completion of the following courses:

    - NGR 5003 - Advanced Health Assessment and Diagnostic Reasoning **2 Credit Hours**
    - NGR 5003L - Advanced Health Assessment and Diagnostic Reasoning Lab **1 Credit Hours** (60 clinical hours)
    - NGR 5141 - Pathophysiological Bases for Advanced Nursing Practice **3 Credit Hours**

https://apq.ucf.edu/files/Licensure-Disclosure-Health-Care-Simulation-Online-GC.pdf.

Program Description

The Graduate Certificate in Health Care Simulation prepares faculty, nurses, members of other healthcare disciplines, administrators and simulation and technology professionals to design, manage, evaluate healthcare simulations for basic education and improvement of team healthcare delivery.

Program Objectives

The program prepares students to:

- Analyze social, economic, ethical cultural legal and political issues influence nursing and health practice in a global context
- Collaborate with leaders in nursing and other disciplines to improve the quality of professional healthcare practice and the outcomes of care
- Develop and implement innovative applications for simulation experiences in health care
- Evaluate models of delivery of simulation in education and healthcare settings in terms of effectiveness
- Evaluate the cost-benefit of the use of simulation in healthcare and education

The certificate program requires three courses, for a total of 9 credit hours.

No

Program Description

This program's effective start date is Fall 2023.

The Hispanic Serving Healthcare Professionals certificate explores the healthcare needs of, and barriers to, the Hispanic community. It will prepare interdisciplinary learners to recognize the community's unique needs in professional allied health practices, influence change in both practice and policy to eliminate disparities and improve patient outcomes, and provide culturally congruent care through linguistically and culturally supportive resources. Qualified completing students may seek national medical translator certification.

Program Prerequisites

- An earned bachelor's degree.
- Current or future role as an allied health care provider.

UCF Online

Please note: Nursing Education Certificate may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

You may pursue this UCF College of Nursing online program **as long as you will be physically located in a Nurse Licensure Compact (NLC) state for the duration of your education.**

UCF College of Nursing faculty are authorized to teach in Nurse Licensure Compact (NLC) states. Due to nursing education restrictions imposed by non-NLC states, UCF is unable to offer courses, clinicals, or other educational services regardless of modality within non-NLC states. Should you be physically located within a non-NLC state for more than a vacation or brief visit, regardless of your legal state of residence or the type of license you have, you will be unable to apply or continue your nursing degree program at the UCF College of Nursing. This includes, but is not limited to, students accepting traveling nurse positions in a non-NLC state. Although Colorado is a NLC state, the UCF College of Nursing cannot enroll students who will complete clinical practice hours there due to Colorado statute requirements for worker's compensation insurance coverage.

Applicants may contact the College of Nursing's Assistant Dean of Students with any questions regarding non-NLC states.

UCF is also an approved institution of the National Council for State Authorization Reciprocity Agreement (NC-SARA). Membership in NC-SARA requires the university to disclose information regarding state licensing and certification requirements for the selected program of study when licensing and/or certification are a requirement to practice in the profession after graduation.

Licensure Disclosure

For information on how this program may prepare you for professional licensure, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Online-Nursing-Education-GC.pdf.

UCF College of Nursing faculty are authorized to teach in NLC states. Due to nursing education restrictions imposed by non-NLC states, UCF is unable to offer courses, clinicals, or other educational services regardless of modality within non-NLC states. Should you be physically located within a non-NLC state for more than a vacation or brief visit, regardless of your legal state of residence or the type of license you have, you will be unable to apply or continue your nursing degree program at the UCF College of Nursing. This includes, but is not limited to, students accepting traveling nurse positions in a non-Nurse Licensure Compact state.

UCF is also an approved institution of the National Council for State Authorization Reciprocity Agreement (NC-SARA). Membership in NC-SARA requires the university to disclose information regarding state licensing and certification requirements for the selected program of study when licensing and/or certification are a requirement to practice in the profession after graduation.

While licensure or certification may be available in this field of study, this program does not lead to such licensure or certification upon graduation. The professional preparation you receive in our program may still assist you in such pursuits; however, we are unable to confirm the specific licensure and certification requirements of each state, territory, or foreign entity in which professional credentialing may be possible. If you intend to pursue such credentialing in your state or elsewhere, we advise you to contact the applicable state credentialing authority to familiarize yourself with its specific requirements and determine if our program meets its academic criteria.

You are welcome to contact the College of Nursing's Assistant Dean of Students with questions in this regard, and we will do our best to assist you in your career planning.

Program Description

The Graduate Certificate in Nursing Education is designed to prepare nurses and other healthcare professionals to teach in professional health care education programs, health care agencies, and the community. The certificate program can be completed entirely online.

Program Objectives

The program prepares students to:

- Analyze social, economic, ethical, cultural, legal and political issues influencing nursing practice and health care in a global context.
- Collaborate with leaders in nursing and other disciplines to improve the quality of professional nursing practice and the healthcare system.
- Develop and implement leadership, management and teaching strategies for the improvement of health and healthcare.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy to improve the health of communities.
- Participate in lifelong learning activities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities and nursing theories to support an advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skills.
- Practice in an advanced nursing role.

The certificate program requires three courses, for a total of 9 credit hours.

Is this program available 100% online?

Yes

UCF Online

Please Note: The Nursing MSN may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

You may pursue this UCF College of Nursing online program **as long as you will be physically located in a Nurse Licensure Compact (NLC) state for the duration of your education.**

UCF College of Nursing faculty are authorized to teach in NLC states. Due to nursing education restrictions imposed by non-NLC states, UCF is unable to offer courses, clinicals, or other educational services regardless of modality within non-NLC states. Should you be physically located within a non-NLC state for more than a vacation or brief visit, regardless of your legal state of residence or the type of license you have, you will be unable to apply or continue your nursing degree program at the UCF College of Nursing. This includes, but is not limited to, students accepting traveling nurse positions in a non-Nurse Licensure Compact state.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to **State Restrictions** for current information.

Program Description

The Master of Science in Nursing (MSN) programs build upon the student's baccalaureate nursing education and professional experience. The Master of Science in Nursing program is accredited by the Commission on Collegiate Nursing Education (CCNE).

The College of Nursing also offers admission to its master's degree programs in nursing to Registered Nurses who have completed an AS in Nursing or diploma nursing program and have bachelor's degrees in fields other than nursing. These students will need to take 9 credits of undergraduate upper-division course work as the prerequisite for graduate study in nursing. Please contact gradnurse@ucf.edu for more information.

The goal of the Master of Science in Nursing program is to prepare advanced practice nurses, nurse educators, and nursing leaders and managers to assume leadership positions in a variety of healthcare settings. Graduates of these programs are eligible to sit for national certification examinations in their respective specialties.

Program Objectives

The programs prepare students to:

- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities, and theory to support advanced nursing practice.
- Plan, evaluate, and implement the delivery of health care using critical thinking skills in an advanced nursing role.

This degree has 6 tracks: Adult-Gerontology Acute Care Nurse Practitioner Track, Adult-Gerontology Primary Care Nurse Practitioner Track, Family Nurse Practitioner Track, Leadership and Management Track, Nurse Educator Track, and Nursing and Health Care Simulation Track. Please scroll to the bottom of this page for further details on these Tracks.

Track Description

This track will not be accepting applications or enrolling new students effective Fall 2018.

The Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) Track in the Master of Science in Nursing (MSN) program prepares the advanced practice nurse to care for patients with medically complex stable and unstable acute, critical and chronic illnesses across care settings ranging from hospitals to subacute, ambulatory care, clinic and home care environments. The program provides a spectrum of care from disease prevention to acute and critical care management.

The track provides a spectrum of care from disease prevention to acute and critical care management. The curriculum prepares students for both the AGACNP board certification examination administered through the American Nurses Credentialing Center and the Acute Care Nurse Practitioner--Adult-Gerontology certification examination administered through the American Association of Critical Care Nurses.

Program Objectives

The program prepares students to:

- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities, and theory to support the advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skill in an advanced nursing role.

Core Courses
24 Total Credits

- Complete the following:
  - NGR5003 - Advanced Health Assessment and Diagnostic Reasoning (2)
  - NGR5003L - Advanced Health Assessment and Diagnostic Reasoning Lab (1)
  - NGR5141 - Pathophysiological Bases for Advanced Nursing Practice (3)
  - NGR5638 - Health Promotion (3)
  - NGR5800 - Theory for Advanced Practice Nursing (3)
  - NGR6172 - Pharmacology for Advanced Nursing Practice (3)
  - NGR6801 - Research Methods (3)
  - NGR6813 - Evidence Based Nursing Practice (3)
  - NGR7913 - Doctoral Project 3 (3)

Specialty Courses
23 - 24 Total Credits

- Complete the following:
  - NGR6210 - Adult-Gerontology Acute Care Nurse Practitioner I (3)
  - NGR6230L - Diagnostics and Skills for the Critically Ill (2)
  - NGR6211 - Adult-Gerontology Acute Care Nurse Practitioner II (3)
  - NGR6211L - Adult-Gerontology Acute Care Nurse Practitioner II Clinical (3)
  - NGR6175 - Critical Care Pharmacology (3)
  - NGR6212 - Adult-Gerontology Acute Care Nurse Practitioner III (3)
  - NGR6212L - Adult-Gerontology Acute Care Nurse Practitioner III Clinical (3)
  - NGR6215L - Adult-Gerontology Acute Care Nurse Practitioner Practicum (3 - 4)

Grand Total Credits: **47 - 48**

Track Details

Progress to Degree

Students are required to maintain a 3.0 grade point average. Students who receive a grade of below "B" in any course will be reviewed by the MSN/DNP Admissions, Progression and Graduation Committee for continuation in the program. Grades of below "B" are not acceptable in the doctoral program in the College of Nursing. Students who do not maintain a 3.0 GPA will be put on probation or dismissed from the program.

Graduation Requirements

- All course work completed with a minimum grade of "B"
- Clinical performance evaluated at a satisfactory level

College of Nursing Master's Program Handbook

All master's students are required to read the College of Nursing Master's Program Handbook regarding policies for each program and for academic progression. Information about each program, particularly clinical placements and forms for appeals to the Master's APG Committee, are located in the Nursing MSN Handbook.

Equipment Fee

Full-time students in all Master of Science in Nursing Programs pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 each semester.

Independent Learning

An independent scholarly work is a requirement for the Master of Science in Nursing degree. The scholarly work consists of an evidence-based nursing project. The scholarly project that is required in NGR 6813 (completed in the final semester of study) is an evidence-based scholarly clinical paper. The evidence-based project should reflect the latest evidence for the student's MSN track. This is a formal paper that must adhere to published guidelines in the syllabus and must be presented in a public forum.

Nursing MSN - Nursing MSN, Adult-Gerontology Primary Care Nurse Practitioner Track

Track Website

Track Contact Information

TBD

Online Availability

No

Track Description

This track will not be accepting applications or enrolling new students effective Fall 2018.

The Master of Science in Nursing (MSN) program in the Adult/Gerontology Primary Care Nurse Practitioner Track prepares nurses for advanced primary care practice in the current healthcare environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, and leadership.

The MSN Adult/Gerontology Primary Care Nurse Practitioner Track allows students to sit for certification examinations when they have completed the list of courses required. Certification authorizes them to function in the advanced role. Enrolling in the DNP program is an option after completion of the MSN.

Program Objectives

The program prepares students to:

- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities, and theory to support the advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skill in an advanced nursing role.

The College of Nursing also offers admission to its master degree programs in nursing to Registered Nurses who have bachelor degrees in fields other than nursing. These students will need to take 8 credits of undergraduate upper division course work as the prerequisite for graduate study in nursing. Please contact gradnurse@ucf.edu for more information.

The College also offers an RN to MSN plan of study that provides an accelerated program for RNs who do not hold a baccalaureate degree but have met general education requirements. Students admitted under this plan of study will complete requirements for both the BSN and MSN programs. See RN to MSN program below for more information. A separate application to the graduate program will be required upon completion of the BSN degree. Admission to the MSN program is competitive and not guaranteed.

Track Description

This track will not be accepting applications or enrolling new students effective Fall 2018.

The Master of Science in Nursing (MSN) program in the Family Nurse Practitioner Track prepares nurses for advanced primary care practice in the current healthcare environment based on a strong scientific foundation for practice, flexibility, and emphasis on evidence-based practice and leadership.

The MSN Family Nurse Practitioner Track allows students to sit for certification examinations when they have completed the list of courses required. Certification authorizes them to function in the advanced role. Enrolling in the DNP program is an option after completion of the MSN. The program can be completed in 6 semesters as a full-time student or 8 semesters as a part-time student.

Program Objectives

The program prepares students to:

- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.

Track Description

The Master of Science in Nursing (MSN) programs build upon the student's baccalaureate nursing education and professional experience. The Master of Science in Nursing program is accredited by the Commission on Collegiate Nursing Education (CCNE). The Nurse Educator track is delivered fully online. It prepares nurse educators for teaching positions in colleges and universities, as well as practice settings.

Program Objectives

The program prepares students to:

- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities, and theory to support advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skill in an advanced nursing role.

The Nurse Educator Track in the Nursing MSN program requires 18 credit hours of nursing courses and 17 credit hours of education courses for a total of 35 credit hours of graduate coursework.

Total Credit Hours Required: 35 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

- BSN degree from an accredited institution.*
- Undergraduate Statistics course.
- RN license the state in which you practice.

*Licensed RNs who have completed an AS in Nursing or diploma nursing program and Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurseadvisor@ucf.edu for additional options.

Students who are licensed RNs who have completed an accredited AS in Nursing or diploma nursing program and have a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Independent Learning

An independent scholarly work is a requirement for the Master of Science in Nursing degree. The scholarly work consists of an evidence-based nursing project. The scholarly project that is required in Evidence Based Practice, NGR 6813 (completed in the last or next to last semester of study) is an evidence-based scholarly clinical paper. The evidence-based project should reflect the latest evidence for the students MSN track. This is a formal paper that must adhere to published guidelines in the syllabus and must be presented.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Licensure Disclosure

Out-of-state instructional limitations apply to this degree program. This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit **https://apq.ucf.edu/files/Licensure-Disclosure-Nursing-MSN-Online-Nursing-and-Health-Care-Simulation.pdf.**

Track Description

The Master of Science in Nursing (MSN) program builds upon the student's baccalaureate nursing education and professional experience.

The MSN program is accredited by the Commission on Collegiate Nursing Education (CCNE). The Nursing and Health Care Simulation Track is delivered online with some required campus activities. It prepares graduates for developing and leading nursing and healthcare simulation programs in academic and practice settings.

Program Objectives

The program prepares students to:

- Analyze social, economic, ethical, cultural, legal, and political issues influencing nursing practice and health care in a global context.
- Develop and implement leadership, management, and teaching strategies for the improvement of health and health care quality and safety.
- Develop practice models of evidence-based nursing practice incorporating nursing research.
- Influence health and public policy in collaboration with other disciplines to improve systems of care and health of communities.
- Participate in research and disseminate research findings through presentation and publication.
- Synthesize advanced knowledge from the sciences, humanities, and theory to support advanced nursing practice.
- Plan, evaluate and implement the delivery of health care using critical thinking skill in an advanced nursing role.

Track Prerequisites

- BSN degree from an accredited institution.*
- RN license the state in which you practice.
- Undergraduate Statistics Course

Students with a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of 'B' or better.

- NUR 3805 - Dimensions of Professional Practice **3 Credit Hours**
- NUR 4637 - Public Health Nursing **3 Credit Hours**
- NUR 3165 - Nursing Research **3 Credit Hours**

**Licensed RNs who have completed an accredited AS in Nursing or diploma nursing program and Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurseadvisor@ucf.edu for additional options.*

Required Courses
28 Total Credits

- Complete all of the following
  - Core Courses
  - Take the following:
    - NGR5141 - Pathophysiological Bases for Advanced Nursing Practice (3)
    - NGR5190 - Core Clinical Concepts for Nurse Educators (3)
    - NGR5800 - Theory for Advanced Practice Nursing (3)
    - NGR5884 - Legal and Professional Behavior in Advanced Practice Nursing (3)
    - NGR6801 - Research Methods (3)
    - NGR6813 - Evidence Based Nursing Practice (3)
    - NGR6945L - Clinical Specialty Practicum (1)

  Required Simulation Courses
  - Take the following:
    - NGR6717 - Introduction to Healthcare Simulation (3)
    - NGR6794 - Organizational Leadership and Operations in Healthcare Simulation (3)
    - NGR6978 - Healthcare Simulation Capstone Project (3)

Elective Courses
3 Total Credits

- Complete all of the following
  - May be taken in other colleges with permission of adviser and faculty presenting the course.
  - Earn at least 3 credits from the following:
    - NGR5003 - Advanced Health Assessment and Diagnostic Reasoning (2)
    - NGR5003L - Advanced Health Assessment and Diagnostic Reasoning Lab (1)
    - NGR5638 - Health Promotion (3)
    - NGR5720 - Organizational Dynamics (3)
    - NGR6722 - Financial Management and Resource Development (3)
    - NGR6713 - Curriculum Development in Nursing Education (3)
    - NGR6718 - Evaluation in Nursing Education (3)
    - NGR6791 - Teaching Strategies for Nurse Educators (3)
    - IDS6147 - Perspectives on Modeling and Simulation (3)
    - CAP6671 - Intelligent Systems: Robots, Agents, and Humans (3)
    - NGR6771L - Healthcare Simulation Practicum (1 - 99)

Grand Total Credits: **31**

Track Details

College of Nursing Master's Program Handbook

All master's students are required to read the College of Nursing Master's Program Handbook regarding policies for each program and for academic progression. Information about each program, particularly clinical placements, and forms for appeals to the Master's APG Committee, are located in the Nursing MSN Handbook.

Equipment Fee

Full-time students in all Master of Science in Nursing programs pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 each semester.

Independent Learning

An independent scholarly work is a requirement for the Master of Science in Nursing degree. The scholarly work consists of an evidence-based nursing project. The scholarly project that is required in Evidence Based Practice NGR 6813 (completed in the final semester of study) is an evidence-based scholarly clinical paper. The evidence-based project should reflect the latest evidence for the student's MSN track. This is a formal paper that must adhere to published guidelines in the syllabus and must be presented.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Program Contact Information

gradnurseadvisor@ucf.edu
Telephone: 407-823-2744
UTWR 326

Is this program available 100% online?

No

Program Description

Nursing Nondegree students may take nursing graduate courses as a nondegree-seeking post-baccalaureate student on a space-available basis. See the Policies section of this Catalog for details on the possible use of these courses toward a degree. Completion of post-baccalaureate courses does not guarantee admission to the graduate program or their use in a degree program.

Students should choose the Nursing Nondegree option on the application to facilitate processing of files. Students may take nursing graduate classes as a nondegree-seeking post-baccalaureate student on a space-available basis. It is possible that no courses will have space available in a given semester as students in the graduate nursing programs receive priority for enrollment. Please contact the College of Nursing Graduate Office for registration assistance at gradnurseadvisor@ucf.edu.

International students are not eligible for this status unless they hold an eligible visa. International students taking online courses from their home country are eligible to be nondegree seeking since they do not require a visa.

Please Note: In general, Nursing Nondegree students are not eligible for financial aid, assistantships, or fellowships, although it is best to check with the Office of Student Financial Assistance for specific details. Nondegree-seeking students must be enrolled in 9 credit hours or more to be considered in full-time status.

Program Prerequisites

Nursing Nondegree applicants will need to have a Bachelor's Degree from an accredited institution recognized by UCF and evidence of completion of a professional nurse education program (RN).

UCF Online

Please note: Nursing (PhD) may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to**State Restrictions** for current information.

Program Description

The Doctor of Philosophy program in Nursing is designed to prepare students for positions as nursing faculty members, leaders in the application of innovative technologies to nursing education and clinical care, executive leaders in healthcare systems, and scientists who contribute to the body of nursing knowledge through their research.

The PhD in Nursing program prepares nurse scholars to possess a body of knowledge about theory, processes, and methods of inquiry in the discipline of nursing. The program allows students to contribute to disciplinary and interdisciplinary knowledge in nursing and healthcare on the basis of sound conceptual, methodological, and ethical decision-making.

Program Outcomes

At the completion of the PhD in Nursing Program, graduates will be able to:

- Conduct research to generate a body of knowledge and test theories that advance nursing science.
- Develop a program of scholarship that integrates research, teaching, leadership, and service to the profession.
- Contribute to interdisciplinary solutions that advance health care in a global society.

This degree has one track: BSN to PhD Track. Please scroll to the bottom of this page for further details on this Track.

For the Nursing PhD, total graduate credit must equal or exceed 72 credit hours. Students take 39 credit hours of required courses that focus on foundation knowledge development and research methods, 15 dissertation credit hours, and 9 credit hours of electives allowing students to gain additional expertise in the area chosen for their dissertation. Details about this program are located in the Nursing PhD Handbook.

Total Credit Hours Required: 63 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

- BSN and either MSN or Master's degree in a related field from an accredited institution or the equivalent.
- Licensure as a Registered Nurse in the state of Florida.

Degree Requirements

Foundation Areas
9 Total Credits

- Complete the following:
  - NGR7115 - Philosophical and Ethical Foundations of Nursing Science (3)
  - NGR7123 - Theory in Nursing Science (3)
  - NGR7952 - Scientific Writing for Nurses and Healthcare Professionals (3)

Research Methods
30 Total Credits

- Complete all of the following
  - Complete the following:
    - NGR7815 - Qualitative Methods in Nursing Research and Healthcare I (3)
    - NGR7916 - Research Grants Process and Proposal Writing (3)
    - NGR7817 - Quantitative Methods for Nursing and Healthcare I (3)
    - NGR7818 - Quantitative Methods for Nursing and Healthcare II (3)
    - NGR7932 - Nursing Research Grants Process and Proposal Writing (3)
    - NGR7807 - Research Approaches and Designs for Nursing and Healthcare (3)
    - NGR7812 - Advanced Study Design and Methods (3)
    - NGR7823 - Psychometrics and Measurement for Nursing Research (3)
  - Earn at least 6 credits from the following:
    - NGR7919 - Doctoral Research (1 - 99)

Elective Courses
9 Total Credits

- Earn at least 9 credits from the following types of courses:
  The supporting course work is designed to permit students to gain additional expertise and knowledge in the area chosen for the dissertation. These courses may vary from student to student depending upon individual needs or objectives. Course selection should be influenced by the following criteria: Increase in understanding of the phenomenon of interest Increase in understanding of specific methodologies or analytical techniques relevant to the student's dissertation. Exposure to experiences relevant to the phenomenon of interest or methodological elements relevant to the student's dissertation. The UCF College of Nursing strongly encourages all PhD students to actively seek out interdisciplinary supporting courses including those offered by other disciplines. All supporting courses must be approved by the student's faculty adviser or dissertation committee chairperson.

Dissertation Research
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  NGR 7980 - Dissertation Research The dissertation research addresses the design and conduct of research that advances nursing science. Students conduct the dissertation in areas of faculty interest and expertise. Students are required to complete at least 15 credit hours of dissertation and are required to register for 3 credit hours of dissertation each semester until they complete the degree requirements.

Doctoral Research
0 Total Credits

- The course NGR 7919 Doctoral Research is designed for students to gain research experience with a faculty researcher. Students must obtain permission from the faculty member before registering for this course and complete the College of Nursing doctoral research form. The purpose of this course is for students to have an experience with research in addition to that of the dissertation. This course is not to be used as a pilot study for the student's dissertation.

Admission to Candidacy and Examinations
0 Total Credits

- The process for candidacy will start with the appointment of the full dissertation advisory committee including the external member. The Candidacy Examination has both written and oral components. When these are completed successfully, the student becomes a doctoral candidate and is eligible to enroll in dissertation credits. When candidacy status is obtained, the student must enroll in at least three-semester credits of dissertation credit each semester until successful oral defense of the dissertation is made and all graduation requirements are completed. The university requires a minimum of 15 dissertation credits. Post-candidacy status is subject to the rules and regulations of the University of Central Florida Graduate Catalog. The following are required to enroll in dissertation hours. Evidence that items have been completed must be received by the UCF Graduate College on the Friday before the first day of classes for those who wish to enroll in dissertation hours in that semester: - Completion of all coursework, except for dissertation hours. - Successful completion of the candidacy examination. - The dissertation advisory committee is formed, consisting of approved graduate faculty, graduate faculty scholars, and the approved external member. - Submittal of an approved program of study (should be finalized by the student's third semester).

Grand Total Credits: **63**

Track Description

The Doctor of Philosophy program in Nursing is designed to prepare students for positions as nursing faculty members, leaders in the application of innovative technologies to nursing education and clinical care, executive leaders in healthcare systems, and scientists who contribute to the body of nursing knowledge through their research. The BSN to PhD track is designed to support students in completing the PhD in a timely fashion to provide for a longer research career.

The PhD in Nursing program prepares nurse scholars to possess a body of knowledge about theory, processes, and methods of inquiry in the discipline of nursing. The program allows students to contribute to disciplinary and interdisciplinary knowledge in nursing and healthcare on the basis of sound conceptual, methodological, and ethical decision-making. Students in the BSN to PhD track will have focused support in grant writing for programs such as the National Research Service Award (NRSA). Although courses will be offered online, students are expected to actively engage in research activities with faculty, which may require on-campus time.

Program Outcomes

At the completion of the PhD in Nursing Program, graduates will be able to:

- Conduct research to generate a body of knowledge and test theories that advance nursing science.
- Develop a program of scholarship that integrates research, teaching, leadership, and service to the profession.
- Contribute to interdisciplinary solutions that advance health care in a global society.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to**State Restrictions** for current information.

Track Prerequisites

- A Bachelor's Degree in nursing from an accredited institution or the equivalent.
- Licensure as a Registered Nurse in the state of Florida. (Does not apply to international applicants).

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare students in that regard, please visit **https://apq.ucf.edu/licensure-programs/.**

Program Description

The Doctor of Nursing Practice (DNP) program prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP Project.

The program offers five tracks: Adult/Gerontology Acute Care Nurse Practitioner, Adult/Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Advanced Practice DNP, and Nurse Executive DNP. Please scroll to the bottom of this page for further details on these tracks.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

Note for International Students: Please contact the College of Nursing at gradnurse@ucf.edu or 407-823-2744 prior to applying to this online program.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Licensure Disclosure

Graduates of this program are eligible to sit for the Adult-Gerontology Acute Care Nurse Practitioner (AGACNP) National Board Certification Examination offered by the American Nurses Credentialing Center or the Acute Care Nurse Practitioner-Adult Gerontology (ACNP-AG) National Board Certification Examination offered by the American Association of Critical Care Nurses. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Adult-Gerontology-Acute-Care-DNP.pdf.

Track Description

The Doctor of Nursing Practice (DNP) program in the Adult-Gerontology Acute Care Nurse Practitioner Track prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP project.

The Adult-Gerontology Acute Care Nurse Practitioner Track prepares the advanced practice nurse to care for patients with medically complex stable and unstable acute, critical and chronic illnesses across care settings ranging from hospitals to subacute, ambulatory care, clinic and home care environments at the DNP level, incorporating DNP essentials in practice with a culminating DNP project.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems and disseminate findings.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

The DNP Adult-Gerontology Acute Care Nurse Practitioner track requires a minimum of 75 credit hours beyond the baccalaureate degree. The curriculum includes 39 credits of core courses shared with other DNP tracks, 12 credits of APN core and 24 credits of specialty courses. A total of 1,020 practicum hours are required to earn the DNP. The program prepares nurses at the entry level for advanced practice for the current healthcare system based on a strong scientific foundation for practice; offers flexibility and emphasis on evidence-based practice, leadership and organizational analysis; and provides analytic, critical thinking and diagnostic reasoning skills to examine practice innovations involving completion of the residency project during the clinical residency courses. Details about this program are in the Advanced Practice DNP Handbook.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)

*For Students with an RN license and a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu or 407-823-2744 for additional options.

Students with a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of 'B' or better.

- NUR 3805 - Dimensions of Professional Practice **3 Credit Hours**
- NUR 4637 - Public Health Nursing **3 Credit Hours**
- NUR 3165 - Nursing Research **3 Credit Hours**

    - Complete the following:
        - NGR6210 - Adult-Gerontology Acute Care Nurse Practitioner I (3)
        - NGR6230L - Diagnostics and Skills for the Critically Ill (2)
        - NGR6211 - Adult-Gerontology Acute Care Nurse Practitioner II (3)
        - NGR6211L - Adult-Gerontology Acute Care Nurse Practitioner II Clinical (3)
        - NGR6175 - Critical Care Pharmacology (3)
        - NGR6212 - Adult-Gerontology Acute Care Nurse Practitioner III (3)
        - NGR6212L - Adult-Gerontology Acute Care Nurse Practitioner III Clinical (3)
    - Earn at least 4 credits from the following:
        - NGR6215L - Adult-Gerontology Acute Care Nurse Practitioner Practicum (3 - 4)

DNP Core Courses
39 Total Credits

- Complete the following:
    - NGR5800 - Theory for Advanced Practice Nursing (3)
    - NGR6801 - Research Methods (3)
    - NGR6874 - Nursing Environment Management (3)
    - NGR7673 - Epidemiology Principles in Advanced Practice Nursing (3)
    - NGR7793 - Leadership and Economics in Advanced Practice Nursing (3)
    - NGR7827 - Concepts, Measurement, and Data Management (3)
    - NGR7820 - Innovative Technologies in Healthcare (3)
    - NGR7892 - Healthcare Systems and Policy (3)
    - NGR7855C - Evidence-Based Practice Development for DNP (3)
    - NGR7065 - Advanced Clinical Management for Advanced Practice Nursing (3)
    - NGR7911C - Doctoral Project I (3)
    - NGR7912C - Doctoral Project 2 (3)
    - NGR7913 - Doctoral Project 3 (3)

DNP Project
0 Total Credits

- The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base. DNP projects may include but are not limited to: Translate research into practice and evaluate outcomes Quality improvement (care processes, continuity of care, patient outcomes) Implement and evaluate evidence-based practice guidelines Analyze policy: develop, implement, evaluate or revise policy Design and use databases to retrieve information for decision making, planning, evaluation Conduct financial analyses to compare care models and potential cost savings, etc. Design and evaluate new models of care Design and evaluate health promotion and disease prevention programs Assess integration of technology in care The theme that links these forms of scholarly experiences is the use of evidence to improve either practice or patient outcomes. Additional examples of DNP projects can be found on the National Organization of Nurse Practitioner Faculty (NONPF) website under Practice Doctorate Resource Center.

Grand Total Credits: **75**

Track Details

Progress to Degree

Students are required to maintain a 3.0 grade point average. Students who receive a grade below "B" in any course will be reviewed by the DNP Admissions, Progression and Graduation Committee for continuation in the program. Grades of below "B" are not acceptable in the doctoral program in the College of Nursing. Students who do not maintain a 3.0 GPA will be put on probation or dismissed from the program.

Graduation Requirements

- All course work completed with a minimum grade of "B"
- A satisfactory DNP Project
- Clinical performance evaluated at a satisfactory level
- A satisfactory public presentation of the DNP Project

Independent Learning

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from clinical practice, will be developed in depth with faculty supervision.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Licensure Disclosure

Out-of-state instructional limitations apply to this degree program. This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-DNP-Online-Advanced-Practice.pdf

Track Description

The Doctor of Nursing Practice (DNP) program prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP Project.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems and disseminate findings.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

For the Doctor of Nursing Practice (DNP), total graduate credit must equal or exceed 72 credit hours. Students take 27 credit hours of core courses, 9 credit hours of electives, and 6 credit hours of a DNP Project. The total clinical hours (including those hours accrued in the MSN degree) will be 1000. The core courses have been carefully constructed to incorporate the AACN competencies for DNP graduates. Details about this program are located in the Nursing DNP Handbook.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Students will take course work that incorporates The Essentials of Doctoral Education for Advanced Nursing Practice [American Association of Colleges of Nursing (AACN), 2006] and The Essentials: Core Competencies for Professional Nursing education (AACN, 2021). The Doctoral Essentials address the following:

1. Scientific underpinning for practice
2. Organizational and systems leadership for quality improvement and systems thinking
3. Clinical scholarship and analytical methods for evidence-based practice
4. Information systems/technology and patient care technology for the improvement and transformation of health care
5. Health care policy for advocacy in health care
6. Inter-professional collaboration for improving patient and population health outcomes
7. Clinical prevention and population health for improving the nation's health
8. Advanced nursing practice

Track Prerequisites

- MSN degree in an APRN specialty role or a post-MSN certificate (NP, CNS, CRNA, CNM) from an accredited institution.
- Certification as an APRN or proof of APRN certification by the withdrawal deadline of the first semester of enrollment is required.
- Advanced Practice Registered Nurse (APRN) licensure in the state in which you practice.

Licensure Disclosure

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit **https://apq.ucf.edu/files/Licensure-Disclosure-DNP-Online-Executive.pdf.**

Track Description

The Executive Track in the Doctor of Nursing Practice (DNP) program is a dynamic and engaging academic curriculum that prepares the nurse executive for the multiple dimensions of administrative responsibilities within varied healthcare environments. The Executive DNP track extends and enhances the knowledge, skill, and performance of healthcare system leaders in a wide variety of clinical and administrative environments.

The DNP Executive Track meets the unique needs and taps the talent of nurse executives through experiential learning and leadership projects in a team-centered environment. It provides enrolled executives the opportunity to interact with prominent healthcare experts who address emergent and challenging issues for nurse leaders and encourages networking with colleagues across local and state healthcare and policy organizations.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems and disseminate findings.
- Assume leadership roles in the development of clinical practice models, health policy, and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological, and other scientific data to improve individual, aggregate, and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and health care systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

The Executive Track in the Doctor of Nursing Practice program prepares nurses at the highest level of practice for the current healthcare environment based on a strong scientific foundation for practice; offers flexibility and emphasis on evidence-based practice, leadership, and organizational analysis, and provides analytic skills to examine practice innovations. Details about this program are located in the Executive DNP Handbook. For the Doctor of Nursing Practice (DNP), total graduate credit must equal or exceed 42 credit hours.

Total Credit Hours Required: 42 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

- MSN with a leadership or healthcare systems focus (eg: Nursing Administration, Healthcare Systems, or Leadership) or Master's Degree in a related administration field (eg: MBA, MHA, or MPA) from an accredited institution.
- Applicants with an MSN with a non-leadership focus will be considered for conditional admission. Qualified applicants will be required to complete 9 credit hours, NGR 5720 Organizational Dynamics, NGR 6722 Financial Management and Resource Development, NGR 6723 Nursing Leadership and Management prior to beginning DNP courses. Additional practicum hours will be required.
- RN license the state in which you practice.

Orlando, FL 32816-0112

Institution Codes

GRE: 5233
GMAT: RZT-HT-58
TOEFL: 5233
ETS PPI: 5233

Degree Requirements

Required Courses
27 Total Credits

- Complete the following:
  - NGR6874 - Nursing Environment Management (3)
  - NGR7673 - Epidemiology Principles in Advanced Practice Nursing (3)
  - NGR7793 - Leadership and Economics in Advanced Practice Nursing (3)
  - NGR7827 - Concepts, Measurement, and Data Management (3)
  - NGR7820 - Innovative Technologies in Healthcare (3)
  - NGR7892 - Healthcare Systems and Policy (3)
  - NGR7855C - Evidence-Based Practice Development for DNP (3)
  - NGR7779C - Program Development and Management for DNP (3)
  - NGR7778L - Advanced Leadership Selective for DNP (3)

Elective
3 Total Credits

- Earn at least 3 credits from the following types of courses:
  Electives should be 5000, 6000, or 7000-level courses from the College of Nursing and should support students to achieve DNP Essentials and AONL competencies. Courses from another discipline or university may be considered. Electives must be approved by the program director.

DNP Executive Residency
3 Total Credits

- Complete all of the following
  - The DNP Residency provides an in-depth clinical experience for students. This advanced practice experience provides the opportunity to link policy making with clinical systems, translate research into practice and serve as change agents for health care.
  - Complete the following:
    - NGR7976L - Executive DNP Residency (3)

DNP Professional Practice Immersion
0 Total Credits

- DNP clinical requirements are 1000 hours post-baccalaureate. Immersion hours depend upon record review of hours completed at the master's level. NGR 7942L - DNP Professional Practice Immersion VAR Credit Hours (60-180 practice hours) Can be repeated.

DNP Project
9 Total Credits

- Complete all of the following
  - The DNP Project is the product of the culminating or comprehensive experience of an independent project that demonstrates application of advanced clinical and evidence-based practice. The DNP Project is guided and evaluated by an academic committee. It will serve as a foundation for future scholarly practice. The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base.
  - Complete the following:
    - NGR7911C - Doctoral Project I (3)
    - NGR7912C - Doctoral Project 2 (3)
    - NGR7913 - Doctoral Project 3 (3)

Grand Total Credits: **42**

Track Details

Practicum Experience and Sponsor Requirements and Responsibilities:

Practicum experience hours in nursing leadership must be completed in the graduate educational program in accordance with current accrediting bodies. Additional practicum experience hours may be required to demonstrate executive leadership competence.

Students are required to secure a sponsor within an organization to coach, mentor and guide the student related to their learning activities. Students pursuing a DNP degree in Executive Leadership need guidance in applying their course content to executive nursing practice and planning, implementing, and evaluating an evidence-based practice project.

Practice hours for the Executive DNP are typically accrued by a student working independently in his or her organization related to course objectives or the DNP Project. The sponsor provides guidance to the student on the development of their leadership role. They also provide assistance in gaining access to resources or personnel that are needed to plan, implement, and evaluate their practice improvement project. They work with the student to identify organizational needs and priorities so the student can provide value to the organization.

Independent Learning

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from systems leadership practice, will be developed in depth with faculty supervision.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Licensure Disclosure

Upon completion of this program, students are eligible to sit for the Family Nurse Practitioner (FNP) National Board Certification Examination offered by the American Academy of Nurse Practitioners Certification Board or the American Nurses Credentialing Center. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-Family-Nurse-Practitioner-DNP.pdf.

Track Description

The Doctor of Nursing Practice (DNP) program in the Family Nurse Practitioner Track prepares nurses at the highest level of practice for the current health care environment based on a strong scientific foundation for practice; flexibility and emphasis on evidence-based practice, leadership, and organizational analysis; and analysis of the DNP project.

Program Objectives

The objectives of the DNP program are to prepare graduates to:

- Critically analyze complex clinical situations and practice systems.
- Assume leadership roles in the development of clinical practice models, health policy and standards of care.
- Develop practice models that support diagnostic reasoning skills and clinical judgment through the use of the evidence-based practice.
- Analyze the social, economic, political, epidemiological and other scientific data to improve individual, aggregate and population health.
- Demonstrate information fluency and advanced communication skills to lead quality improvement initiatives to improve patient care and healthcare systems.
- Design, implement, and evaluate comprehensive care models for populations and/or systems and disseminate findings.

The DNP Family Nurse Practitioner Track requires a minimum of 75 credit hours beyond the baccalaureate degree. The curriculum includes 39 credit hours of core courses shared with other DNP tracks, 14 credits of APN core and 22 credits of specialty courses. A total of 1,080 practicum hours are required to earn the DNP. The program prepares nurses at the entry level for advanced practice for the current healthcare system based on a strong scientific foundation for practice; offers flexibility and emphasis on evidence-based practice, leadership and organizational analysis; and provides analytic, critical thinking and diagnostic reasoning skills to examine practice innovations involving completion of the residency project during the clinical residency courses. Details about this program are located in the Advanced Practice DNP Family Nurse DNP Handbook.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

- BSN degree from an accredited institution by program start date.*
- Undergraduate Statistics course.
- Licensure as a registered nurse in the State of Florida by program start date. (Out of state applicants must be eligible for licensure in Florida and must achieve RN licensure to begin clinical courses.)

*For Students with an RN and a Bachelor's degree in a discipline other than nursing, please contact the College of Nursing Graduate Office at gradnurse@ucf.edu for additional options.

Students with a bachelor's degree in a discipline other than nursing will be required to take the following courses prior to taking required program courses. Consistent with graduate nursing program policies, courses must be completed with a grade of 'B' or better.

- NUR 3805 - Dimensions of Professional Practice **3 Credit Hours**
- NUR 4637 - Public Health Nursing **3 Credit Hours**
- NUR 3165 - Nursing Research **3 Credit Hours**

Degree Requirements

Advanced Practice Core Courses
14 Total Credits

- Complete the following:
    - NGR5003 - Advanced Health Assessment and Diagnostic Reasoning (2)
    - NGR5003L - Advanced Health Assessment and Diagnostic Reasoning Lab (1)
    - NGR5141 - Pathophysiological Bases for Advanced Nursing Practice (3)
    - NGR5638 - Health Promotion (3)
    - NGR6063L - Advanced Skills for the Management of Illness and Injuries (2)
    - NGR6172 - Pharmacology for Advanced Nursing Practice (3)

Specialty Courses: Family Nurse Practitioner
22 Total Credits

- Complete the following:
    - NGR6201 - Adult I Primary Care (3)
    - NGR6240L - Adult I Clinical for APNs (3)
    - NGR6263 - Gerontologic Care for APNs (3)
    - NGR6263L - Gerontologic Care Clinical for NPs (2)
    - NGR6305 - Pediatric Primary Care (3)
    - NGR6305L - Pediatric Primary Care Clinical (2)
    - NGR6334 - Women's Health for APNs (2)
    - NGR6342L - Women's Health for APNs Clinical (1)
    - NGR6248L - Family Nurse Practitioner/Adult-Gero Nurse Practitioner Practice Practicum (3)

DNP Core Courses
39 Total Credits

- Complete all of the following
    - The DNP courses serve to enhance the skill and science base of the graduate and strengthen the focus on research utilization. Safety and efficiency in health care systems is addressed and organizational and policy implications are emphasized within the context of care delivery. An emphasis is placed on evidence-based practice, state-of-the-art interventions and information fluency.
    - Complete the following:
        - NGR5800 - Theory for Advanced Practice Nursing (3)
        - NGR6801 - Research Methods (3)
        - NGR6874 - Nursing Environment Management (3)
        - NGR7065 - Advanced Clinical Management for Advanced Practice Nursing (3)
        - NGR7673 - Epidemiology Principles in Advanced Practice Nursing (3)
        - NGR7793 - Leadership and Economics in Advanced Practice Nursing (3)
        - NGR7820 - Innovative Technologies in Healthcare (3)
        - NGR7827 - Concepts, Measurement, and Data Management (3)
        - NGR7855C - Evidence-Based Practice Development for DNP (3)
        - NGR7892 - Healthcare Systems and Policy (3)
        - NGR7911C - Doctoral Project I (3)
        - NGR7912C - Doctoral Project 2 (3)
        - NGR7913 - Doctoral Project 3 (3)

DNP Project
0 Total Credits

- The DNP Project is related to advanced nursing practice and benefits a group, population or community rather than an individual patient. It addresses identified needs and builds on an evidence base. DNP projects may include but are not limited to: Translate research into practice and evaluate outcomes Quality improvement (care processes, continuity of care, patient outcomes) Implement and evaluate evidence-based practice guidelines Analyze policy: develop, implement, evaluate or revise the policy Design and use databases to retrieve information for decision making, planning, evaluation Conduct financial analyses to compare care models and potential cost savings, etc. Design and evaluate new models of care Design and evaluate health promotion and disease prevention programs Assess integration of technology in care The theme that links these forms of scholarly experiences is the use of evidence to improve either practice or patient outcomes. Additional examples of DNP projects can be found on the National Organization of Nurse Practitioner Faculty (NONPF) website under Practice Doctorate Resource Center.

Grand Total Credits: **75**

Track Details

Progress to Degree

Students are required to maintain a 3.0 grade point average. Students who receive a grade of below "B" in any course will be reviewed by the DNP Admissions, Progression and Graduation Committee for continuation in the program. Grades of below B are not acceptable in the doctoral program in the College of Nursing. Students who do not maintain a 3.0 GPA will be put on probation or dismissed from the program.

Graduation Requirements

- All course work completed with a minimum grade of "B"
- A satisfactory DNP Project
- Clinical performance evaluated at a satisfactory level
- A satisfactory public presentation of the DNP Project

Independent Learning

A DNP Project will be completed by all students in the DNP program. A scholarly project, derived from clinical practice, will be developed in depth with faculty supervision.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Yes

UCF Online

Please note: Applied Photonics Graduate Certificate may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit **http://global.ucf.edu/**. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to **State Restrictions** for current information.

Program Description

The Applied Photonics Graduate Certificate is designed to provide working professionals with knowledge and training in applied photonics to enhance their career opportunities and meet their current responsibilities.

The certificate program compliments their technical backgrounds in science and engineering with the basic principles and applications of photonics engineering in fiber communication systems, lasers, medicine, and aerospace and defense photonics.

Program Description

The Master of Science in Optics and Photonics program is intended for students with a bachelor's degree in optics, electrical engineering, physics, or closely related fields. The program is interdisciplinary and combines optical science and engineering.

The College of Optics and Photonics offers an interdisciplinary graduate program in optical science and engineering leading to a Master of Science in Optics and Photonics. The college has grown rapidly and now has 55 faculty members and faculty with joint appointments, 41 research scientists and 148 graduate students with research activities covering all aspects of optics, photonics, and lasers. Research expenditures are over $10 million annually, with over 20 percent of the funding coming from industrial partners, illustrating the effectiveness of the commitment to partnerships that is a foundational value of the COP.

Research activities cover all aspects of optics, photonics, and lasers, and the Center for Research and Education in Optics and Lasers (CREOL), the Florida Photonics Center of Excellence (FPCE), and the Townes Laser Institute (TLI) are integral parts of the College. Current research areas include: linear and nonlinear guided-wave optics and devices, high speed photonic telecommunications, fiber optic fabrication, fiber optic communications, solid state laser development, nonlinear optics, laser-induced damage, quantum-well optoelectronics, quantum optics, photonic information processing, infrared systems, optical diagnostics, optical system design, image analysis, virtual reality, medical imaging, diffractive optics, optical crystal growth and characterization, high intensity lasers, X-ray optics, EUV sources, optical glasses, laser materials processing, free-electron lasers, and light matter interaction.

The MS program is intended for students with a bachelor's degree in optics, electrical engineering, physics, or closely related fields. The program's mission is to:

- Provide the highest-quality education in optical science and engineering
- Conduct scholarly, fundamental, and applied research
- Aid in the development of Florida's and the nation's technology-based industries

This degree has 3 tracks: International Track, Optics Track and Photonics Track. Please scroll to the bottom of this page for further details on these Tracks.

Program Prerequisites

A bachelor's degree in Optics, Electrical Engineering, Physics, or closely related fields.

Students with degrees in related fields may be required to take undergraduate articulation courses determined by the program director on a case-by-case basis.

Degree Requirements

Required Core Courses
9 Total Credits

- Complete all of the following
  - Take the following:
    - OSE5115 - Interference and Diffraction (3)
    - OSE6111 - Optical Wave Propagation (3)
    - OSE5525 - Laser Engineering (3)
  - OSE 6536 Semiconductor Lasers may be used as a substitute for OSE 5525 Laser Engineering

Elective Courses
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section. Other courses with significant optics content may be accepted towards the Optics (OSE) course work requirement, upon approval by the Associate Dean.

Comprehensive Examination
0 Total Credits

- An oral master's comprehensive examination, based on the core courses (OSE 5115 Interference, Diffraction and Coherence, OSE 6111 Optical Wave Propagation, and OSE 5525 Laser Engineering) must be passed as a graduation requirement for the MS degree in Optics and Photonics. Students will be required to take this exam within one semester after completing the core courses. The exam may be taken twice. After failing on the second attempt, the student will be required to re-take the courses covering the areas in which the examination committee determined the student to be deficient. The retaken courses must be passed with a minimum grade of B+ in order for the student to graduate. This Comprehensive Examination requirement may be satisfied by passing the Optics and Photonics PhD Qualifying exam.

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  Thesis
  - Complete all of the following
    - Earn at least 6 credits from the following:
      - OSE6971 - Special Topics (1 - 99)
    - The thesis option requires at least 6 credit hours of thesis research. Independent study and directed research credit hours are not allowed toward the degree requirements. The student must prepare an approved program of study and form a thesis committee upon completion of nine credit hours. The MS thesis committee consists of three members, with at least two regular graduate faculty members from the College of Optics and Photonics. Students are required to write a thesis and pass an oral exam based primarily on the topics of the thesis and course work.

  Nonthesis
  - Complete all of the following
    - Earn at least 6 credits from the following types of courses:
      A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section.
    - The nonthesis option requires an additional 6 credit hours of electives. Up to 3 credit hours of directed research (OSE 6918) or research report (OSE 6909) may be included as electives with prior approval of the College of Optics and Photonics although they are not counted toward the required 27 credit hours of formal coursework. Students must prepare an approved plan of study upon completion of nine credit hours. The research report is a written report on a subject based on research completed under the guidance of a faculty advisor who is a member of the graduate faculty in the College of Optics and Photonics. The subject matter will be determined by advisor and should be on some aspect of experimental, theoretical, or literature research in the area of optics and photonics. Normally the research and report should be completed within one semester. The written report should contain between 5,000 and 10,000 words and should roughly follow the format of a scientific journal paper. The report will be evaluated by a committee consisting of the advisor and two other faculty members. The student will be expected to present a brief oral presentation of the work to the committee, not less than 5 business days after submitting the written report to the committee and prior to the last day of classes in the semester. The report will be graded on a satisfactory/unsatisfactory basis by the advisor, based on the input from the committee.

Independent Learning
0 Total Credits

- Nonthesis students engage in directed research or research report. Thesis students enroll in 6 hours of thesis credits during the completion of their research study.

Grand Total Credits: **30**

    - Take the following:
      - OSE5115 - Interference and Diffraction (3)
      - OSE6111 - Optical Wave Propagation (3)
      - OSE5525 - Laser Engineering (3)
    - The foundation courses are strongly recommended for all students unless they can demonstrate knowledge sufficient to waive the course in which case they will take an additional elective.

  Research Methods/Laboratory
  - Complete all of the following
    - Earn at least 6 credits from the following:
      - OSE6455C - Photonics Laboratory (3)
      - OSE6526C - Laser Engineering Laboratory (3)
      - OSE6615L - Optoelectronic Device Fabrication Laboratory (3)
    - At least 6 credit hours of approved Optics and related science/engineering research methods/laboratory courses are required from the list below. At least one must be in Optics (OSE). One required laboratory may be waived if the student can demonstrate an equivalent hands-on proficiency in that laboratory specialization. These research methods/laboratory courses count toward the formal graduate course work requirement. Other graduate-related science and engineering methodology labs may be taken with approval by the College of Optics and Photonics.

  Elective Courses
  - Earn at least 9 credits from the following types of courses:
    All students are required to take a minimum of 9 credit hours of electives. Other courses with significant optics content may be accepted toward the Optics (OSE) course work requirement, upon approval by the Associate Dean. A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  - Thesis
  - Complete all of the following
    - Earn at least 6 credits from the following:
      - OSE6971 - Special Topics (1 - 99)
    - The thesis option requires at least 6 credit hours of thesis research. Independent study and directed research credit hours are not allowed toward the degree requirements. The student must prepare an approved program of study and form a thesis committee upon completion of nine credit hours. The MS thesis committee consists of three members, with at least two regular graduate faculty members from the College of Optics and Photonics. Students are required to write a thesis and pass an oral exam based primarily on the topics of the thesis and course work.

  Nonthesis
  - Earn at least 6 credits from the following types of courses:
    The nonthesis option requires an additional 6 credit hours of electives. Up to 3 credit hours of directed research (OSE 6918) or research report (OSE 6909) may be included with prior approval of the College of Optics and Photonics although they are not counted toward the formal course work requirement. Students must prepare an approved program of study upon completion of nine credit hours. Students are required to pass a final oral comprehensive examination based primarily on the subject matter of the courses taken. The purpose of the exam is for the student to demonstrate his or her basic knowledge of the fundamentals of optics and photonics. The nonthesis master's requires a minimum of two methods/laboratory courses as described above. These laboratory courses involve a substantial amount of independent learning on the part of the student. For example, laboratory reports must include sections on the theoretical and historical background behind the phenomena explored in laboratory experiments, and students are expected to obtain this background information on their own by researching the scientific literature. One required Optics laboratory may be waived if the student can demonstrate an equivalent hands-on proficiency in that laboratory specialization. These methodology/laboratory courses count toward the formal course work requirement.

Grand Total Credits: **30**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Track Description

The Optics Track in the Master of Science in Optics and Photonics program is intended for students with a bachelor's degree in optics, electrical engineering, physics, or closely related fields. The program is interdisciplinary and combines optical science and engineering.

Track Prerequisites

A bachelor's degree in Optics, Electrical Engineering, Physics, or closely related fields.

Students with degrees in related fields may be required to take undergraduate articulation courses determined by the program director on a case-by-case basis.

Degree Requirements

Required Core Courses
18 Total Credits

- Complete all of the following
  - Take the following:
    - OSE5115 - Interference and Diffraction (3)
    - OSE5203 - Geometrical Optics (3)
    - OSE6111 - Optical Wave Propagation (3)
    - OSE6211 - Imaging and Optical Systems (3)
    - OSE6265 - Optical Systems Design (3)
    - OSE5525 - Laser Engineering (3)
  - OSE 6536 Semiconductor Lasers may be used as a substitute for OSE 5525 Laser Engineering

Elective Courses
6 Total Credits

- Earn at least 6 credits from the following types of courses:
  All students are required to take a minimum of 6 credit hours of electives. Other courses with significant optics content may be accepted toward the Optics (OSE) course work requirement, upon approval by the Associate Dean. A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section.

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  Thesis
  - Complete all of the following
    - Earn at least 6 credits from the following:
      - OSE6971 - Special Topics (1 - 99)
    - The thesis option requires at least 6 credit hours of thesis research. Independent study and directed research credit hours are not allowed toward the degree requirements. The student must prepare an approved plan of study and form a thesis committee upon completion of 9 credit hours. The MS thesis committee consists of three members, with at least two regular graduate faculty members from the College of Optics and Photonics. Students are required to write a thesis and pass an oral exam based primarily on the topics of the thesis and course work.

  Nonthesis
  - Earn at least 6 credits from the following types of courses:
    The nonthesis option requires an additional 6 credit hours of courses or electives. Up to 3 credit hours of Research Report (OSE 6909) may be included. For students in a nonthesis option, a Research Report may be completed in the last term of study. The Optics or Photonics master's tracks require a research report in the nonthesis option, but this is optional in the general MS degree. The research report is a written report on a subject based on research completed under the guidance of a faculty adviser who is a member of the graduate faculty in the College of Optics and Photonics. The subject matter will be determined by the adviser and should be on some aspect of experimental, theoretical, or literature research in the area of optics and photonics. Normally, the research and report should be completed within one semester. The written report should contain between 5,000 and 10,000 words and should roughly follow the format of a scientific journal paper. The report will be evaluated by a committee consisting of the adviser and two other faculty members. The student will be expected to present a brief oral presentation of the work to the committee, not less than 5 business days after submitting the written report to the committee and prior to the last day of classes in the semester. The report will be graded on a satisfactory/unsatisfactory basis by the adviser, based on the input from the committee. Students must select an adviser from the College of Optics and Photonics faculty to serve on their Research Report. Students must prepare an approved plan of study upon completion of 9 credit hours. Students are required to pass a final oral comprehensive examination based primarily on the subject matter of the courses taken. The purpose of the exam is for the student to demonstrate his or her basic knowledge of the fundamentals of optics and photonics.

Comprehensive Examination
0 Total Credits

- An oral master's comprehensive examination, based on the core courses (OSE 5115 Interference, Diffraction and Coherence, OSE 6111 Optical Wave Propagation, and OSE 5525 Laser Engineering or OSE 6536 Semiconductor Lasers may be used as a substitute for OSE 5525 Laser Engineering) must be passed as a graduation requirement for the MS degree in Optics and Photonics. Students will be required to take this exam within one semester after completing the core courses. The exam may be taken twice. After failing on the second attempt, the student will be required to re-take the courses covering the areas in which the examination committee determined the student to be deficient. The retaken courses must be passed with a minimum grade of B+ in order for the student to graduate. This Comprehensive Examination requirement may be satisfied by passing the Optics and Photonics Ph.D. Qualifying exam.

Grand Total Credits: **30**

Track Details

Up to 9 credit hours of appropriate graduate courses from accredited universities recognized by UCF may be transferred with approval from the College of Optics and Photonics. Only courses with grades of "B" or better can be transferred.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Program Description

The Optics and Photonics PhD program provides the highest-quality education in optical science and engineering, allowing students to conduct scholarly, fundamental, and applied research, while aiding in the development of Florida's and the nation's technology-based industries.

Research activities cover all aspects of optics, photonics, and lasers, and the Center for Research and Education in Optics and Lasers (CREOL), the Florida Photonics Center of Excellence (FPCE), and the Townes Laser Institute (TLI) are integral parts of the College of Optics and Photonics. Current research areas include: linear and nonlinear guided-wave optics and devices, high speed photonic telecommunications, fiber optic fabrication, fiber optic communications, solid state laser development, nonlinear optics, laser-induced damage, quantum-well optoelectronics, quantum optics, photonic information processing, infrared systems, optical diagnostics, optical system design, image analysis, virtual reality, medical imaging, diffractive optics, optical crystal growth and characterization, high intensity lasers, x-ray optics, EUV sources, optical glasses, laser materials processing, free-electron lasers, and light matter interaction.

The College of Optics and Photonics (COP) was the first program to be offered the distinction of a college devoted to Optics in the United States. The College of Optics and Photonics has grown rapidly and now has 55 faculty members and faculty with joint appointments, 41 research scientists and 148 graduate students with research activities covering all aspects of optics, photonics, and lasers. Research expenditures are over $10 million annually, with more than 20 percent of the funding coming from industrial partners, illustrating the effectiveness of the commitment to partnerships that is a foundational value of the COP.

Program Prerequisites

Bachelor's or master's degree in Optics, Electrical Engineering, Physics or closely related discipline.

Students with degrees in related fields may be required to take undergraduate articulation courses determined by the program director on a case-by-case basis.

Degree Requirements

Required Courses
21 Total Credits

- Complete all of the following
  - Core Courses
    - Complete all of the following
      - Complete the following:
        - OSE6111 - Optical Wave Propagation (3)
        - OSE5115 - Interference and Diffraction (3)
        - OSE5312 - Light Matter Interaction (3)
        - OSE6211 - Imaging and Optical Systems (3)
        - OSE6474 - Fundamentals Optical Fiber Communications (3)
        - OSE5525 - Laser Engineering (3)
      - OSE 6536 Semiconductor Lasers may be used as a substitute for OSE 5525 Laser Engineering
  - Research Methods/ Laboratory Courses
    - Complete all of the following
      - Complete at least 1 of the following:
        - Course Not Found
        - OSE6455C - Photonics Laboratory (3)
        - OSE6526C - Laser Engineering Laboratory (3)
        - OSE6615L - Optoelectronic Device Fabrication Laboratory (3)
      - Other graduate science and engineering labs may be taken with college approval.

Elective Courses
36 Total Credits

- Complete all of the following
  Restricted Electives
  - Earn at least 9 credits from the following types of courses:
    Students will need to complete an additional 9 credit hours to meet the 30 hours of formal Optics (OSE) course work required. An additional three hours of optics coursework will be required if the student waived out of the research methods/laboratory courses above, or if the laboratory courses taken is not an OSE prefix. Other courses with significant optics content may be accepted toward the Optics (OSE) coursework requirement, upon approval by the Associate Dean. A listing and description of courses offered by the College of Optics and Photonics is found in the "Courses" section.
    Unrestricted Electives
  - Earn at least 27 credits from the following types of courses:
    A combination of formal course work and research hours comprise the remaining unrestricted hours. At least 9 of these hours must be formal course work, which may be graduate optics, science or engineering courses. In addition to the 9 hours, 18 credits may be regular formal course work, doctoral research hours, independent study, or doctoral dissertation hours. The independent study hours are limited to a maximum of 3 credit hours. Any courses outside of the graduate optics, science or engineering disciplines must be approved by the college associate dean.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following:
  - OSE7980 - Dissertation (1 - 99)

Qualifying Examination
0 Total Credits

- Before students are eligible to take the candidacy examination, they must first pass the qualifying examination. The purpose of the exam is for the student to demonstrate mastery of the fundamentals of optics and photonics. The qualifying exam is an oral exam that focuses on the fundamental concepts and topics covered in the following four core courses: • OSE 5115 Interference, Diffraction and Coherence • OSE 5312 Light Matter Interaction • OSE 6111 Optical Wave Propagation • OSE 6211 Imaging and Optical Systems The exam is waived for students earning an average GPA of 3.5 or higher in the four core courses. The exam is held at the end of each semester. Students are expected to take the exam at the next opportunity after all the core courses have been taken and before completing 24 credit hours in the program. Students must have a minimum GPA of 3.0 in the four core courses to take the exam. The exam is administered by the doctoral qualifying examination committee, which consists of several faculty members representing the appropriate disciplines, appointed by the graduate program director or designee. The examination committee may recommend pass, not pass or conditional pass with required remedial course work. Students have two attempts to pass the exam. Those students failing on the first attempt must retake the exam at the next attempt. Failure to take the exam at the required time will be regarded as equivalent to a failure of the exam. Students who do not pass the qualifying examination in two attempts will not continue in the program.

Candidacy Examination
0 Total Credits

- Students are required to successfully complete the candidacy examination before admission to full doctoral status. The purpose of the candidacy exam is for the student to demonstrate his or her readiness for the PhD program through preliminary research work in the chosen field of study. The candidacy exam is comprised of written and oral portions. The exam is administered by the members of the student's dissertation advisory committee who are full faculty members of the College of Optics and Photonics. External committee members of the dissertation advisory committee are not appointed until after the student has passed the candidacy exam. The exam is normally taken near the completion of required course work. Students must pass the candidacy exam before registering for doctoral dissertation hours (OSE 7980).

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Completion of most course work, except for dissertation hours. Successful completion of the candidacy examination. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Dissertation Proposal and Defense
0 Total Credits

- Approximately one year after passing the general candidacy examination, and after the student has begun research, the student will write a dissertation proposal and present it to their dissertation advisory committee for its approval. The proposal must include the research performed to date and the research planned to complete the dissertation. The committee, which consists of three graduate faculty members from the College of Optics and Photonics and one faculty member from outside the college, must be approved by the director or designee and will meet annually to review the student's progress. The dissertation advisory committee also administers the dissertation oral defense examination.

Independent Learning
0 Total Credits

- The dissertation satisfies the independent learning experience.

Grand Total Credits: **72**

Program Description

The Department of Anthropology offers a graduate program leading to the Master of Arts degree in Anthropology. The course work in this program is conceptually three-field, with faculty strengths in archaeology, cultural anthropology, and biological anthropology. The department follows an apprenticeship model, and thus the MA student works directly under the supervision of their graduate adviser. Students are informed of who their graduate adviser is when they are admitted to the program. Visit the **Faculty Page** for the UCF Department of Anthropology for more information about our faculty. Students in the program are prepared to enter doctoral programs or begin professional careers following the MA degree.

Degree-seeking students in the Anthropology MA program may elect to follow either a thesis or non-thesis plan of study. Each plan of study requires a minimum of 30 credit hours, 15 of which must be at the 6000-level. The thesis option is designed for students who plan to enter doctoral programs, while the non-thesis option is more appropriate for students entering or continuing profession careers following the MA degree.

The anthropology faculty conduct research in many geographical areas including Bolivia, Colombia, Egypt, Guatemala, Mexico, Peru, the Philippines, Turkey, the United States and various other locations in the Caribbean and Europe. The department also has multiple research facilities on the Orlando campus that including the following: an archaeology lab specializing in lithic and ceramic analysis, a forensic anthropology lab, a paleoethnobotany archaeology lab, a bioarchaeological sciences lab, and an interdisciplinary geospatial science lab. Students may have the opportunity to conduct research projects in the various countries or research facilities as part of their program.

Degree-seeking students in the Anthropology MA program may elect to follow either a thesis or a nonthesis program of study.

Both thesis and non-thesis options require 30 hours of course work, of which half must be at the 6000 level.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Degree Requirements

Required Courses
12 Total Credits

- Complete all of the following
  - Complete the following:
    - ANG5094 - Writing in Anthropology (3)
    - ANG6110 - Archaeological Theory and Method (3)
    - ANG6587 - Seminar in Biological Anthropology (3)
    - ANG6930 - Seminar in Cultural Anthropology (3)
  - These courses provide an in-depth understanding of the epistemological foundations of the discipline. Students are introduced to the theory and practice of anthropology at a level of synthesis that will prepare them for future doctoral study should they wish to pursue it. These courses also establish the foundations of understanding that will prepare students for nonacademic careers that employ anthropological perspectives and knowledge.

Elective Courses
12 Total Credits

- Complete all of the following
  - A minimum of 12 additional credit hours must be selected from the list below in conjunction with the faculty adviser and/or the advisery committee members and approved by the program graduate coordinator. Additional electives may be selected as they become available or as they are added to the course curriculum. With prior approval, the student may take one elective (3 credit hours) in another department. Under special circumstances, students may enroll in a graduate-level Directed Independent Study course or a Directed Independent Research course to fulfill their non-required elective course requirements. No more than 6 hours of graduate-level courses in Directed Independent Study or Directed Independent Research may be included in a student's program of study.
  - Earn at least 12 credits from the following:

- ANG5166 - Problems in Maya Studies (3)
- Course Not Found
- ANG5228 - Maya Iconography (3)
- ANG5486 - Quantitative Research in Anthropology (3)
- ANG5742 - Problems in Forensic Anthropology (3)
- ANG5525C - Human Osteology (4)
- ANG6520C - Advanced Human Osteology (3)
- ANG6740C - Advanced Forensic Anthropology (3)
- Course Not Found
- Course Not Found
- Course Not Found
- ANG5531 - Nutritional Anthropology (3)
- Course Not Found
- ANG5738 - Advanced Medical Anthropology (3)
- ANG5822 - Maya Field Research (3)
- ANG5852 - GIS Methods in Anthropology (3)
- ANG5853 - Advanced GIS Methods in Anthropology (3)
- ANG6168 - The Ancient Maya (3)
- ANG6821 - Forensic Archeology Field Methods (3)
- ANG6181C - GIS Applications in Anthropology (3)
- ANG6324 - Contemporary Maya (3)
- ANG6701 - Public and Applied Anthropology (3)
- ANG6801 - Ethnographic Research Methods (3)

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  Thesis
  - Earn at least 6 credits from the following types of courses:
    In the thesis option, the student must write and defend an original research thesis. The thesis will be written under the guidance of the adviser and a Thesis Advisory Committee made up of at least three members, including the adviser who will serve as chair. The committee needs to be established prior to defending the thesis proposal and enrolling in thesis hours. When a thesis topic has been selected, students, in conjunction with their faculty adviser, will develop a thesis proposal. A proposal meeting will be scheduled with the student and advisory committee prior to enrolling in thesis hours. Students who elect to write a thesis should become familiar with the university's requirements and deadlines for organizing and submitting the thesis The completion of the thesis must be followed by an oral defense before the Thesis Advisory Committee. A successful format review, oral defense, and electronic submission of the thesis to the College of Graduate Studies for review completes the program requirements. Students are required to follow all procedures and timetables specified by the College of Graduate Studies.
    Nonthesis
  - Earn at least 6 credits from the following types of courses:
    Students selecting the nonthesis option take an additional 6 hours of elective course work for a total of 18 credit hours of electives.

Comprehensive Examination
0 Total Credits

- At the conclusion of course work, nonthesis students will be given a comprehensive examination. The comprehensive examination will be administered by an Examination Committee comprised of the faculty adviser and to additional faculty members.

Independent Learning
0 Total Credits

- Students who choose the thesis option will gain independent learning experiences through their thesis research where they are expected to design and conduct their own research which culminates with the writing and defense of their thesis. Students will also gain this experience through their core course requirements as each course contains an independent research assignment. Students in the nonthesis option will gain independent learning experiences through all of their core courses, all of which contain an independent research component.

Grand Total Credits: **30**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource. For more information on how the Department of Anthropology allocates funding please visit our department website.

Is this program available 100% online?

No

Program Description

Big Data Analytics will train researchers with a statistics background to analyze massive, structured or unstructured data to uncover hidden patterns, unknown correlations and other useful information that can be used to make better decisions.

The program will provide a strong foundation in the major methodologies associated with Big Data Analytics such as predictive analytics, data mining, text analytics and statistical analysis with an interdisciplinary component that combines the strength of statistics and computer science. It will focus on statistical computing, statistical data mining and their application to business, social, and health problems complemented with ongoing industrial collaborations. The scope of this program is specialized to prepare data scientists and data analysts who will work with very large data sets using both conventional and newly developed statistical methods.

The Ph.D. in Big Data Analytics requires 72 hours beyond an earned Bachelor's degree. Required coursework includes 42 credit hours of courses, 15 credit hours of restricted elective coursework, and 15 credit hours of dissertation research.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Students must have the following background and courses completed before applying to the Big Data Analytics PhD program. These courses are: MAC 2311C: Calculus with Analytic Geometry I, MAC 2312: Calculus with Analytic Geometry II, MAC 2313: Calculus with Analytic Geometry III, MAS 3105: Matrix and Linear Algebra or MAS 3106: Linear Algebra, COP 3503C - Computer Science II. These pre-required courses are basic undergraduate courses from the Math and Computer Science departments. Students without background in COP 3503C can still apply for admission but they will need to take that course sometime after admission in the PhD program. COP 3503C serves as pre-requisite for COP 5711, which is required for the qualifying exam.

Degree Requirements

Required Courses
42 Total Credits

- Complete the following:
  - STA5104 - Advanced Computer Processing of Statistical Data (3)
  - STA5703 - Data Mining Methodology I (3)
  - STA6106 - Statistical Computing I (3)
  - STA6236 - Regression Analysis (3)
  - STA6238 - Logistic Regression (3)
  - STA6326 - Theoretical Statistics I (3)
  - STA6327 - Theoretical Statistics II (3)
  - STA6329 - Statistical Applications of Matrix Algebra (3)
  - STA6704 - Data Mining Methodology II (3)
  - STA7722 - Statistical Learning Theory (3)
  - STA7734 - Statistical Asymptotic Theory in Big Data (3)
  - STA6714 - Data Preparation (3)
  - CNT5805 - Network Science (3)
  - COP5711 - Parallel and Distributed Database Systems (3)

Restricted Electives (at least 9 credit hours must be STA coursework)
15 Total Credits

- Complete all of the following
  - Other courses may be included in a Plan of Study with departmental approval. All Ph.D. students must have an approved Plan of Study (POS) developed by the student and advisor that lists the specific courses to be taken as part of the degree. Students must maintain a minimum GPA of 3.0 in their POS, as well as a "B" (3.0) in all courses completed toward the degree and since admission to the program.
  - Earn at least 15 credits from the following:
    - STA6107 - Statistical Computing II (3)
    - STA6226 - Sampling Theory and Applications (3)
    - STA6237 - Nonlinear Regression (3)
    - STA6246 - Linear Models (3)
    - STA6346 - Advanced Statistical Inference I (3)
    - STA6347 - Advanced Statistical Inference II (3)
    - STA6507 - Nonparametric Statistics (3)
    - STA6662 - Statistical Methods for Industrial Practice (3)
    - STA6705 - Data Mining Methodology III (3)
    - STA6707 - Multivariate Statistical Methods (3)
    - STA6709 - Spatial Statistics (3)
    - STA6857 - Applied Time Series Analysis (3)
    - STA7239 - Dimension Reduction in Regression (3)
    - STA7719 - Survival Analysis (3)
    - STA7935 - Current Topics in Big Data Analytics (3)

- CAP5610 - Machine Learning (3)
- CAP6307 - Text Mining I (3)
- CAP6315 - Social Media and Network Analysis (3)
- CAP6318 - Computational Analysis of Social Complexity (3)
- CAP6737 - Interactive Data Visualization (3)
- COP5537 - Network Optimization (3)
- COP6526 - Parallel and Cloud Computation (3)
- COP6616 - Multicore Programming (3)
- COT6417 - Algorithms on Strings and Sequences (3)
- COT6505 - Computational Methods/Analysis I (3)
- ECM6308 - Current Topics in Parallel Processing (3)
- EEL5825 - Machine Learning and Pattern Recognition (3)
- EEL6760 - Data Intensive Computing (3)
- FIL6146 - Screenplay Refinement (3)
- ESI6247 - Experimental Design and Taguchi Methods (3)
- ESI6358 - Decision Analysis (3)
- ESI6418 - Linear Programming and Extensions (3)
- ESI6609 - Industrial Engineering Analytics for Healthcare (3)
- ESI6891 - IEMS Research Methods (3)
- STA5825 - Stochastic Processes and Applied Probability Theory (3)
- STA7348 - Bayesian Modeling and Computation (3)
- COP6731 - Advanced Database Systems (3)

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  STA 7980 - Dissertation Research

Examinations
0 Total Credits

- After passing candidacy, students will enroll into dissertation hours (STA7980) with their dissertation advisor. The dissertation can be either research- or project-based depending on the area of study, committee, and with the approval of the dissertation advisor.

Qualifying Examination
0 Total Credits

- The qualifying examination is a written examination that will be administered by the doctoral exam committee at the start of the fall term (end of the summer) once a year. The courses required to prepare for the examination are STA 5703, STA 6704, CNT 5805, STA 6326, STA 6327 and COP 5711. Students must obtain permission from the Graduate Program Coordinator to take the examination. Students normally take this exam just before the start of their third year and are expected to have completed the exam by the start of their fourth year. To be eligible to take the Ph.D. qualifying examination, the student must have a minimum grade point average of 3.0 (out of 4.0) in all the coursework for the Ph.D. The exam may be taken twice. If a student does not pass the qualifying exam after the second try, he/she will be dismissed from the program.

Candidacy Examination
0 Total Credits

- The candidacy exam is administered by the student's dissertation advisory committee and will be tailored to the student's individual program to propose either a research- or project-based dissertation. The candidacy exam involves a dissertation proposal presented in an open forum, followed by an oral defense conducted by the student's advisory committee. This committee will give a Pass/No Pass grade. In addition to the dissertation proposal, the advisory committee may incorporate other requirements for the exam. The student can attempt candidacy any time after passing the qualifying examination, after the student has begun dissertation research (STA7919, if necessary), but prior to the end of the second year following the qualifying examination. The candidacy examination can be taken no more than two times. If a student does not pass the candidacy exam after the second try, he/she will be removed from the program

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours. Completion of all coursework, except for dissertation hours Successful completion of the qualifying examination Successful completion of the candidacy examination including a written proposal and oral defense The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars Submittal of an approved program of study

Dissertation
0 Total Credits

- After passing the qualifying exam, the student must select a dissertation adviser. In consultation with the dissertation adviser, the student should form a dissertation advisory committee. The dissertation adviser will be the chair of the student's dissertation advisory committee. In consultation with the dissertation advisor and with the approval of the chair of the department, each student must secure qualified members of their dissertation committee. This committee will consist of at least four faculty members chosen by the candidate, three of whom must be from the department and one from outside the department or UCF. Graduate faculty members must form the majority of any given committee. A dissertation committee must

be formed prior to enrollment in dissertation hours. The dissertation serves as the culmination of the coursework that comprises this degree. It must make a significant original theoretical, intellectual, practical, creative or research contribution to the student's area within the discipline. The dissertation can be either research- or project-based depending on the area of study, committee, and with the approval of the dissertation advisor. The dissertation will be completed through a minimum of 15 hours of dissertation research credit.

Masters Along the Way
0 Total Credits

- PhD Students can obtain their Master's degree in Statistics & Data Science - Data Science Track along the way to their PhD degree. To satisfy the requirements for the MS degree, the student must complete the requirement for the MS degree.

Independent Learning
0 Total Credits

- As will all graduate programs, independent learning is an important component of the Big Data Analytics doctoral program. Students will demonstrate independent learning through research seminars and projects and the dissertation.

Grand Total Credits: **72**

No

Program Description

The Master of Science in Biology program offers a broad range of research opportunities ranging from the sub-cellular to entire ecosystems. Our program offers broad-based training in a variety of disciplines including Conservation Biology, Ecology, Evolution, Physiology, Genetics, and Cell and Developmental Biology.

The Master of Science in Biology program offers a thesis option only (the non-thesis MS option is not currently accepting applications). The thesis option requires a minimum of 30 credit hours, 15 of which must be at the 6000 level. Given the thesis requirement, students who wish to pursue this degree must receive a commitment from a faculty adviser for admission into the program. The thesis option curriculum contains a minimum of 24 credit hours of coursework excluding thesis hours (note: Independent Study and Directed Research may account for a maximum of 6 of the 24 coursework credits).

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Applicants do not need to have an undergraduate degree in a biological science, but are expected to have 18 hours of biological sciences, including ecology and genetics. Courses in organic chemistry, calculus, and statistics are also recommended. After acceptance, minor deficiencies must be remedied by enrollment in the appropriate course at the first opportunity.

Degree Requirements

Required Courses
7 Total Credits

- Complete all of the following
  - Complete the following:
    - PCB6095 - Professional Development in Biology I (1)
    - PCB6096 - Professional Development in Biology II (1)
    - PCB6466 - Methods in Experimental Ecology (3)
  - Earn at least 2 credits from the following:
    - BSC6935 - Seminar in Biology (1)
  - BSC 6935 - Seminar in Biology: Students will take 1 credit hour each of two semesters.

Thesis Option
23 Total Credits

- Earn at least 23 credits from the following types of courses:
  BSC 6971 - Thesis 6 Credit Hours (minimum) Electives - 17 Credit Hours selected with the faculty adviser and advisory committee and approved by the graduate program director.

Examinations
0 Total Credits

- A thesis proposal defense is required. The purpose of the proposal defense is to present the planned research and its foundations as a seminar to an interested audience of peers and the advisory committee. The proposal should be distributed to advisory committee members two weeks in advance of the defense, and the defense should be advertised (contact the graduate program specialist two weeks in advance). Public attendees typically have an opportunity to ask questions and comment following the seminar, after which the committee meets with the student to further discuss the proposal. The advisory committee must then vote to accept or reject the proposal. The thesis proposal defense must be passed a minimum of one semester preceding the oral thesis defense (i.e., the proposal defense and thesis defense cannot occur in the same semester). When the research is completed, the final oral thesis defense is conducted similar to the proposal defense.

Non-thesis Option (NOTE: The Biology Department is no longer accepting applications to the non-thesis program)
0 Total Credits

- In addition to the 7 credit hours of required courses listed above, nonthesis students must complete 12 credit hours of restricted electives, 19 credit hours of unrestricted electives, and a research report. Currently enrolled thesis option students interested in transferring to the nonthesis option should contact the graduate program director for information. Restricted Electives—12 Credit Hours Students take 12 credit hours of courses in at least three of the five areas below. Ecology Evolutionary Biology Genetics Physiology Cell and Developmental Biology Unrestricted Electives—19 Credit Hours Students take 19 credit hours of unrestricted electives that must be approved by the program graduate director. Research Report—2 Credit Hours BSC 6909 - Research Report 2 Credit Hours Examination Nonthesis students must take a comprehensive exam no later than the semester preceding that of graduation. If a student fails the comprehensive examination, a minimum of four weeks must elapse before reexamination. The comprehensive exam may be taken a maximum of two times.

Independent Learning
0 Total Credits

- Nonthesis students are required to complete a research report as their independent learning experience. The thesis satisfies the independent learning experience for thesis option students.

Grand Total Credits: **30**

Program Description

The Master of Science in Chemistry (MS) program prepares students for careers in the chemical industry or further graduate studies.

The curriculum is designed to provide a broad overall perspective of the chemical sciences field while placing the primary emphasis upon chemistry and the application of chemical principles.

The Chemistry MS program offers both a thesis option and a nonthesis option. The thesis option requires a minimum of 30 credit hours beyond the bachelor's degree, including 16 credit hours of required courses, at least 6 credit hours of thesis research, and 8 credit hours of electives that must be approved by the student's advisory committee. The nonthesis option requires a minimum of 31 credit hours beyond the bachelor's degree, including 16 credit hours of required courses, 14 credit hours of electives that must be approved by the student's advisory committee, and 1 credit hour of independent study that culminates in a research report.

Total Credit Hours Required: 30-31 Credit Hours Minimum beyond the Bachelor's Degree

Degree Requirements

Qualifying Examinations
0 Total Credits

- All students must satisfy qualifying (proficiency) requirements in four of the five areas (analytical chemistry, biochemistry, inorganic chemistry, organic chemistry and physical chemistry) during the first year by taking exams in four of these five subjects. Additional course work may be required if one or more of the qualifying exams are not satisfied. Satisfaction of this requirement will help ensure that all students are adequately prepared for the core courses. If students do not satisfy the proficiency exam requirements within the first year, they may be subject to dismissal from the program.

Required Courses
16 Total Credits

- Complete all of the following
  - Complete at least 4 of the following:
    - CHM6710 - Applied Analytical Chemistry (3)
    - CHS6240 - Chemical Thermodynamics (3)
    - CHS6251 - Applied Organic Synthesis (3)
    - CHM6440 - Kinetics and Catalysis (3)
    - BCH6740 - Advanced Biochemistry (3)
  - Students must take four of the above courses. If a student successfully completes all five required courses, one course will count toward fulfilling the electives requirement.
    Seminar
  - Complete all of the following
    - Earn at least 4 credits from the following:
      - CHM6936 - Graduate Chemistry Seminar (1)
    - CHM 6936 - Graduate Chemistry Seminar will be repeated 4 times.

Elective Courses
8 Total Credits

- Complete all of the following
  - All elective courses must be approved by the student's advisory committee.
  - Earn at least 8 credits from the following:
    - CHM5225 - Advanced Organic Chemistry (3)
    - CHM5235 - Applied Molecular Spectroscopy (3)
    - CHM5305 - Bioconjugate Chemistry (3)
    - CHM5450 - Polymer Chemistry (3)
    - CHM5451C - Techniques in Polymer Science (3)
    - CHM5580 - Advanced Physical Chemistry (3)
    - CHM6134 - Advanced Instrumental Analysis (3)
    - CHM6711 - Chemistry of Materials (3)
    - CHS6613 - Current Topics in Environmental Chemistry (3)
  - CHM/CHS Special topics courses may be taken as offered.

Thesis/Nonthesis Option
6 - 7 Total Credits

- Complete 1 of the following
  Thesis Option
  - Complete all of the following
    - Earn at least 6 credits from the following:

        - CHM6971 - TREATISE (THESIS OR Research Report) (1 - 99)
    - The grounding in scientific research methodology provided by the thesis requirement is a central focus of the thesis option in the Chemistry MS program. Students will conduct research either on site or at the professional laboratories where they work. In either case, a member of the UCF Chemistry Department faculty will act as research adviser and approve the research topic. This research culminates in the writing and presentation of the thesis. The student will present his/her thesis for final examination (oral defense of thesis) by a committee consisting of three members including the research adviser. The committee has to be approved by the Graduate Coordinator of the Chemistry program. The thesis must be judged worthy of publication by the review committee and may not be submitted for examination until so deemed. For nonresident students, the thesis adviser will visit the student's laboratory, where their research is to be performed, before the research begins and on a regular basis until the work is complete.

Nonthesis Option

- Complete all of the following
    - Earn at least 1 credits from the following:
        - CHM6908 - Directed Independent Studies (1 - 99)
    - Earn at least 6 credits from the following types of courses:
      Additional Electives : 6 Credit Hours

Equipment Fee
0 Total Credits

- Full-time students in the Chemistry MS program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

Independent Learning
0 Total Credits

- For the thesis option, the grounding in scientific research methodology is a central focus. This research culminates in the writing and presentation of the thesis. For the nonthesis option, students take an additional 6 credit hours of approved electives and one-credit hour of Independent Study (CHM 6908), which culminates in a required report of the independent study experience.

Grand Total Credits: **30 - 31**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Program Description

The Chemistry PhD program focuses on all areas of modern chemistry with faculty actively engaged in research in the often interdisciplinary fields of Materials Chemistry, Environmental Chemistry, Forensic Science, Biochemistry and Chemical Education. The training prepares future scientists and educators for research within contemporary subjects which yield graduates that are very competitive when entering the workforce in industry, government, and academic positions.

The PhD program in Chemistry provides a doctoral education in the following technical focal areas: Materials Chemistry, Environmental Chemistry, Forensic Science, Biochemistry and Chemical Education, drawing upon the strengths of the Department of Chemistry and other units, such as the College of Optics and Photonics, Advanced Materials Processing and Analysis Center, National Center of Forensic Science, Nanoscience and Technology Center, College of Medicine, College of Engineering and Computer Science, and the College of Community Innovation and Education. These areas meet the ever-pressing demand for the development of new materials, the increasing urgency of addressing crucial environmental and security problems, and new methods and understanding for STEM education. The curriculum has been formulated in collaboration with industrial, government, and academic scientists and represents a response to current and projected competencies needed by industry and the scientific community. The purpose of the program is to develop scientists and educators capable of conducting research to solve important problems in contemporary fields of the chemical sciences while preparing a highly skilled work force to ensure the technological/economic health and competitiveness in Central Florida and the nation.

The Chemistry PhD program requires 72 credit hours beyond the bachelor's degree with a minimum 18 credit hours of electives in the chosen sub-discipline, an original research project, and dissertation presentation. At least 27 hours of formal course work, exclusive of independent study, are required in order to fulfill degree requirements. This includes four core courses and four electives, three of which must be taken from Chemistry. Six credit hours of directed research are also required; additional courses may be specified by the student's research adviser.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

A Bachelor of Science degree in the Chemical Sciences or a closely related field.

Degree Requirements

Core Courses
12 Total Credits

- Complete at least 4 of the following:
    - CHM6710 - Applied Analytical Chemistry (3)
    - CHM6440 - Kinetics and Catalysis (3)
    - CHS6251 - Applied Organic Synthesis (3)
    - CHS6240 - Chemical Thermodynamics (3)

- BCH6740 - Advanced Biochemistry (3)

Seminar
7 Total Credits

- Complete all of the following
  - Earn at least 7 credits from the following:
    - CHM6936 - Graduate Chemistry Seminar (1)
  - CHM 6936 - Graduate Chemistry Seminar :Six seminar credits must be taken consecutively through the first 3 years in the program (excluding summer); the seventh seminar credit will be taken one semester before anticipated dissertation defense.

Directed Research
6 Total Credits

- Earn at least 6 credits from the following:
  - CHM6918 - Research Report (1 - 99)

Required Elective Courses
12 Total Credits

- Complete 1 of the following
  - All students who enter the program need to take four elective courses (12 credit hours). All 12 credits must come from one of the following concentrations listed below: Materials Chemistry Concentration Environmental Chemistry Concentration Forensic Science Concentration Biochemistry Concentration Student may choose four courses from the departmental offerings (Courses beginning with CHM or CHS) or three courses from the departmental offerings and one from outside of the department (Non CHM/CHS Courses). Directed research will always be within the department.
    Materials Chemistry Concentration
  - Earn at least 12 credits from the following types of courses:
    CHS 5110 - Radiochemistry 3 Credit Hours CHM 5937 - Bioinorganic Chemistry 3 Credit Hours CHM 5305 - Bioconjugate Chemistry 3 Credit Hours CHM 5225 - Advanced Organic Chemistry 3 Credit Hours CHM 5580 - Advanced Physical Chemistry 3 Credit Hours CHS 6260 - Chemical Unit Operations and Separations 3 Credit Hours CHM 6711 - Chemistry of Materials 3 Credit Hours CHM 6620 - Solid State Inorganic Chemistry 3 Credit Hours CHM 5450 - Polymer Chemistry 3 Credit Hours CHM 5451C - Techniques in Polymer Science 3 Credit Hours CHM 5305 - Bioconjugate Chemistry 3 Credit Hours CHM 6938 - Special Topics 3 Credit Hours CHM 5235 - Applied Molecular Spectroscopy 3 Credit Hours CHM 6134 - Advanced Instrumental Analysis 3 Credit Hours CHM 7938 - Frontiers in Chemistry 1 Credit Hours (three semesters, 1 credit hour each semester) CHM 7919 - Directed Research in Materials Chemistry 6 Credit Hours Courses from outside the Chemistry Department. IDS 6252 - Biomedical Nanotechnology 3 Credit Hours IDS 6254 - Nanofabrication and Characterization 3 Credit Hours IDS 6255 - Nanotechnology and Energy and Sustainability 3 Credit Hours IDS 6261 - Nanotechnology for Sustainable Agriculture 3 Credit Hours OSE 5203 - Geometrical Optics 3 Credit Hours OSE 6313 - Materials for Optical Systems 3 Credit Hours OSE 5414 - Fundamentals of Optoelectronic Devices 3 Credit Hours EMA 5504 - Modern Characterization of Materials 3 Credit Hours EMA 6518 - Transmission Electron Microscopy 3 Credit Hours EMA 5108 - Surface Science 3 Credit Hours EMA 6129 - Solidification and Microstructure Evolution 3 Credit Hours EMA 6130 - Advanced Phase Transformations in Materials 3 Credit Hours EMA 6136 - Diffusion in Solids 3 Credit Hours EMA 6516 - X-ray Diffraction and Crystallography 3 Credit Hours PHY 5933 - Selected topics in biophysics of macromolecules 3 Credit Hours PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours BSC 5408L - Advanced Biology Laboratory Techniques 3 Credit Hours
    Environmental Chemistry Concentration
  - Earn at least 12 credits from the following types of courses:
    CHS 5110 - Radiochemistry 3 Credit Hours CHS 6260 - Chemical Unit Operations and Separations 3 Credit Hours CHS 6613 - Current Topics in Environmental Chemistry 3 Credit Hours CHS 6508 - Advanced Mass Spectrometry for Forensic Science 3 Credit Hours CHM 5235 - Applied Molecular Spectroscopy 3 Credit Hours CHM 5580 - Advanced Physical Chemistry 3 Credit Hours CHM 6134 - Advanced Instrumental Analysis 3 Credit Hours Courses from outside the Chemistry Department. IDS 6253 - Bioanalytical Technology 3 Credit Hours IDS 6255 - Nanotechnology and Energy and Sustainability 3 Credit Hours IDS 6261 - Nanotechnology for Sustainable Agriculture 3 Credit Hours ENV 5410 - Water Treatment 3 Credit Hours ENV 6046 - Membrane Mass Transfer 3 Credit Hours ENV 6055 - Fate and Transport of Subsurface Contaminants 3 Credit Hours ENV 6106 - Theory and Practice of Atmospheric Dispersion Modeling 3 Credit Hours ENV 6126 - Design of Air Pollution Controls 3 Credit Hours ENV 6336 - Site Remediation and Hazardous Waste Treatment 3 Credit Hours ENV 6519 - Aquatic Chemical Processes 3 Credit Hours ENV 6558 - Industrial Waste Treatment 3 Credit Hours
    Forensic Science Concentration
  - Earn at least 12 credits from the following types of courses:
    CHS 5110 - Radiochemistry 3 Credit Hours CHS 6545 - Forensic Analysis of Explosives 3 Credit Hours CHS 6546 - Forensic Analysis of Ignitable Liquids 3 Credit Hours CHM 6134 - Advanced Instrumental Analysis 3 Credit Hours CHM 5451C - Techniques in Polymer Science 3 Credit Hours CHM 6938 - Special Topics 3 Credit Hours CHS 6535 - Forensic Molecular Biology 3 Credit Hours CHS 6535L - Forensic Analysis of Biological Materials 3 Credit Hours CHS 6536 - Population Genetics and Genetic Data 3 Credit Hours CHM 7938 - Frontiers in Chemistry 1 Credit Hours (three semesters, 1 credit hour each semester) CHM 7919 - Directed Research in Forensic Science 6 Credit Hours Courses from outside the Chemistry Department. IDS 6253 - Bioanalytical Technology 3 Credit Hours
    Biochemistry Concentration
  - Earn at least 12 credits from the following types of courses:
    CHS 5110 - Radiochemistry 3 Credit Hours CHM 5937 - Bioinorganic Chemistry 3 Credit Hours CHM 5305 - Bioconjugate Chemistry 3 Credit Hours CHM 5235 - Applied Molecular Spectroscopy 3 Credit Hours CHM 5225 - Advanced Organic Chemistry 3 Credit Hours CHM 5580 - Advanced Physical Chemistry 3 Credit Hours CHS 6535 - Forensic Molecular

Biology 3 Credit Hours CHS 6535L - Forensic Analysis of Biological Materials 3 Credit Hours CHS 6536 - Population Genetics and Genetic Data 3 Credit Hours CHM 7938 - Frontiers in Chemistry 1 Credit Hours (three semesters, 1 credit hour each semester) CHM 7919 - Directed Research in Biochemistry 3 Credit Hours Courses from outside the Chemistry Department. IDS 6252 - Biomedical Nanotechnology 3 Credit IDS 6253 - Bioanalytical Technology 3 Credit Hours IDS 6261 - Nanotechnology for Sustainable Agriculture 3 Credit Hours PHY 5933 - Selected topics in biophysics of macromolecules 3 Credit Hours MCB 5654 - Applied Microbiology 3 Credit Hours MCB 6417C - Microbial Metabolism 3 Credit Hours BSC 6407C - Laboratory Methods in Molecular Biology 3 Credit Hours IDS 5127 - Foundation of Bio-Imaging Science 3 Credit Hours PCB 5236 - Cancer Biology 3 Credit Hours PCB 5527 - Genetic Engineering and Biotechnology 3 Credit Hours EMA 6516 - X-ray Diffraction and Crystallography 3 Credit Hours EMA 6518 - Transmission Electron Microscopy 3 Credit Hours

Additional Electives
20 Total Credits

- Earn at least 20 credits from the following types of courses:
  Students who enter the program without a master's degree will be required to take 20 additional hours. These 20 hours must be in the same Concentration as the other 12 Required Electives selected above. Students and advisers need to be careful about how elective courses are selected so that at least 12 credit hours of electives must be formal course work, exclusive of independent study. Doctoral research, dissertation research, independent study and directed research may also be used to satisfy additional hours in the concentration.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  CHM 7980 - Doctoral Dissertation Within three months before defending the dissertation, the student will present a dissertation research seminar to the Department of Chemistry, registering for one credit hour of seminar.

Qualifying Examinations
0 Total Credits

- Students will be expected to satisfy qualifying (proficiency) requirements (analytical chemistry, biochemistry, inorganic chemistry, organic chemistry and physical chemistry) during the first year by passing exams in four of these five areas. These exams may be waived if the entering student possesses an MS degree in the Chemical Sciences. Satisfaction of this requirement will help ensure that students are adequately prepared for the core courses. If a student does not satisfy the proficiency exam requirements within the first year, the student will be subject to dismissal from the program.

Candidacy Examination
0 Total Credits

- As part of the degree requirement, all graduate students pursuing a doctoral degree in chemistry must pass a candidacy exam before the sixth semester from the start of their study in the program. The candidacy examination consists of writing and orally defending an original research proposal to the student’s faculty advisory committee. Every doctoral student must demonstrate proficiency in his/her dissertation research area, the ability to independently develop an original research topic, and the ability to communicate these ideas effectively using concise scientific writing and presentation skills. Students are required to take the candidacy exam no later than the end of the fifth semester (excluding summer) from the start of their study in the program. If a student fails to pass the exam at the first attempt, the student must retake and pass the exam before the end of the sixth semester (excluding summer) of their study. Failure to pass the PhD candidacy exam will result in dismissal from the program.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Completion of all required and formal elective course work, except for seminar credit hours and dissertation hours. Successful completion of the candidacy examination. Successful defense of the written dissertation proposal. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Dissertation Defense
0 Total Credits

- The final requirement for the PhD degree is completion of a satisfactory written dissertation of the student's research, along with successful presentation and defense of the dissertation to the advisory committee, including one doctorate-holding non-program faculty member.

Equipment Fee
0 Total Credits

- Full-time students in the Chemistry PhD program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

Independent Learning
0 Total Credits

- The grounding in scientific research methodology provided by the dissertation requirement is a central focus of the proposed program. Students will conduct research either on site or at the professional laboratories where they work. In either case, a member of the UCF Chemistry Department graduate faculty will act as research adviser and approve the research topic. This

research culminates in the writing and presentation of the dissertation. The student will present his/her dissertation for examination by a committee consisting of a minimum of five members including the research adviser. One of the committee members will be from outside the Chemistry department. A majority of the program committee members will hold tenure-earning faculty appointments in the Chemistry Department. The committee has to be approved by the Graduate Coordinator of the Chemistry program and the department Chair. The dissertation must be judged worthy of publication by the dissertation committee and may not be submitted for examination until so deemed. For students performing their dissertation research off campus, the dissertation adviser will visit the student's laboratory, where their research is to be performed, before the research begins and on a regular basis until the work is complete.

Grand Total Credits: **72**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-COS-Clinical-Psychology-MA.pdf.

Program Description

The Master of Arts Clinical Psychology Program is a terminal master's program offered at the UCF Sanford/Lake Mary Campus. The program consists of two tracks:

Applied Pre-Licensure/Non-Thesis Track: The Master of Arts Clinical Psychology Program is a terminal master's program offered at the UCF Sanford/Lake Mary Campus. The Applied Pre-Licensure/Non-Thesis Track is designed for students interested in delivering clinical services in a variety of settings including community agencies and private practice. After completing the program and after two years of postgraduate supervised clinical experience, graduates are eligible to become Licensed Mental Health Counselors (LMHCs) in the state of Florida.

Can you provide an overview of the Pre-licensure Track?

This track has been offered for decades. As mentioned in our catalogue description, the primary goal of this track is to train students to become licensed, master's-level clinicians. More specifically, graduates of this track are eligible to become Licensed Mental Health Counselors (LMHCs) in the State of Florida, and they will likely be eligible for master's level licensure in most other states. This track includes a full course load (9-12 credits/per semester) for two years. Students in this track complete a practicum (10 hours/week in the first spring in the program) and internship (20 hours/week in the fall, spring, and summer semesters in the second year in the program). A majority of the graduates of this program enter clinical practice and obtain licensure at the master's level. We usually admit 15 to 16 students into this track each fall term.

How do I get licensed?

Students in the applied/prelicensure track meet the eligibility criteria for licensure as a Licensed Mental Health Counselor (LMHC) in the State of Florida. Please note that more details about eligibility criteria can be found on the Florida Department of Health website. In addition, our students are also eligible for similar licensure in most other states; however, we are unable to confirm the licensure and certification requirements of other states. Consequently, if you intend to pursue such credentialing outside of Florida, we advise you to contact the applicable state credentialing authority to familiarize yourself with its specific requirements and determine if our program meets its eligibility criteria.

Can I get into a doctoral program if I complete the pre-licensure track?

Yes! As mentioned above, most students in the pre-licensure track practice at the master's level upon graduation. Having said that, each year we have a number of graduating students who apply to and get into Ph.D. or Psy.D. programs (usually around 2-4 students out a cohort of 15-16 students). Engagement in research may increase students' competitiveness when applying to doctoral programs.
Can I do research if I am in the pre-licensure track?

Yes. Research is not required as part of this track; however, students in the pre-licensure track are often engaged in collaborative research with faculty. It is common for students in this track to present research at scientific conferences, and some of these students become coauthors of peer-reviewed publications in scientific journals.

Research/Thesis Track: The Master of Arts Clinical Psychology Program is a terminal master's program offered at the UCF Sanford/Lake Mary Campus. The Research/Thesis Track is designed for students who wish to focus on clinical research and/or are interested in pursuing entry into a doctoral program following the completion of their Master's degree. Students who complete this option are not eligible to become Licensed Mental Health Counselors upon graduation.

Can you provide an overview of the research/thesis Track?

The faculty developed this track for students who are interested in focusing on research and/or are interested in gaining entry into a research-focused doctoral program. This track is a great fit for students who are not particularly interested in clinical practice at the master's level upon graduation. In addition to an empirical thesis, we encourage students in this track to engage in other research projects. Students in the thesis track have a reduced course load relative to the prelicensure track, which allows more time for engagement in research. The tradeoff is that students in this track will not be eligible for licensure at the mater's level when they graduate. We anticipate admitting no more than 5 to 6 students into the thesis track this year.

Is it possible to get clinical experience in the research/thesis track?

Yes. It is possible for students in the research/thesis track to chose to do a practicum. This experience would be approximately 10 hours/week during one spring semester.

Am I guaranteed admission into a Ph.D. program if I am in the research/thesis track?

No. The program has the potential to increase a student's competitiveness when applying to research-focused doctoral programs; however, we cannot guarantee admission into a doctoral program.

Please scroll to the bottom of this page for further details on these Tracks.

Please visit the program's website for more information, including a list of program faculty members, and frequently asked questions (FAQs), including additional information about each track: https://sciences.ucf.edu/psychology/graduate/ma-clinical/.

Please see the specific admission, application requirement, financial and contact information for the track in which you are interested.

Program Details

At times, we have prospects who are uncertain as to which is the best track for them: Pre-Licensure or Research Thesis Track. The following information is to help you make a best decision related to your academic and professional aspirations.

Pre-licensure Track

Can you provide an overview of the Pre-licensure Track?

This track has been offered for decades. As mentioned in our catalogue description, the primary goal of this track is to train students to become licensed, master's-level clinicians. More specifically, graduates of this track are eligible to become Licensed Mental Health Counselors (LMHCs) in the State of Florida, and they will likely be eligible for master's level licensure in most other states. This track includes a full course load (9-12 credits/per semester) for two years. Students in this track complete a practicum (10 hours/week in the first spring in the program) and internship (20 hours/week in the fall, spring, and summer semesters in the second year in the program). A majority of the graduates of this program enter clinical practice and obtain licensure at the master's level. We usually admit 15 to 16 students into this track each fall term.

How do I get licensed?

Students in the applied/prelicensure track meet the eligibility criteria for licensure as a Licensed Mental Health Counselor (LMHC) in the State of Florida. Please note that more details about eligibility criteria can be found on the Florida Department of Health website. In addition, our students are also eligible for similar licensure in most other states; however, we are unable to confirm the licensure and certification requirements of other states. Consequently, if you intend to pursue such credentialing outside of Florida, we advise you to contact the applicable state credentialing authority to familiarize yourself with its specific requirements and determine if our program meets its eligibility criteria.

Can I get into a doctoral program if I complete the pre-licensure track?

Yes! As mentioned above, most students in the pre-licensure track practice at the master's level upon graduation. Having said that, each year we have a number of graduating students who apply to and get into Ph.D. or Psy.D. programs (usually around 2-4 students out a cohort of 15-16 students). Engagement in research may increase students' competitiveness when applying to doctoral programs.

Can I do research if I am in the pre-licensure track?

Yes. Research is not required as part of this track; however, students in the pre-licensure track are often engaged in collaborative research with faculty. It is common for students in this track to present research at scientific conferences, and some of these students become coauthors of peer-reviewed publications in scientific journals.

Research/Thesis Track

Can you provide an overview of the research/thesis Track?

The faculty developed this track for students who are interested in focusing on research and/or are interested in gaining entry into a research-focused doctoral program. This track is a great fit for students who are not particularly interested in clinical practice at the master's level upon graduation. In addition to an empirical thesis, we encourage students in this track to engage in other research projects. Students in the thesis track have a reduced course load relative to the prelicensure track, which allows more time for engagement in research. The tradeoff is that students in this track will not be eligible for licensure at the mater's level when they graduate. We anticipate admitting no more than 5 to 6 students into the thesis track this year.

Is it possible to get clinical experience in the research/thesis track?

Yes. It is possible for students in the research/thesis track to chose to do a practicum. This experience would be approximately 10 hours/week during one spring semester.

Am I guaranteed admission into a Ph.D. program if I am in the research/thesis track?

No. The program has the potential to increase a student's competitiveness when applying to research-focused doctoral programs; however, we cannot guarantee admission into a doctoral program.

Licensure Disclosure

This program has potential ties to professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-COS-Clinical-Psychology-MA.pdf.

Track Description

The Master of Arts Clinical Psychology Program is a terminal master's program offered at the UCF Sanford/Lake Mary Campus. The Applied Pre-Licensure/Non-Thesis Track is designed for students interested in delivering clinical services in a variety of settings including community agencies and private practice. After completing the program and after two years of postgraduate supervised clinical experience, graduates are eligible to become Licensed Mental Health Counselors (LMHCs) in the state of Florida. Please visit the program's website for more information, including a list of program faculty members and answers to frequently asked questions (FAQs): https://sciences.ucf.edu/psychology/graduate/ma-clinical/faqs/.

The Clinical Psychology Applied Pre-Licensure/Non-Thesis Track requires a minimum of 61 credit hours beyond the Bachelor's degree, including 49 credit hours of required courses and 12 clinical internship credit hours. This track is for students primarily interested in clinical practice at the Master's level upon graduation; however, some students in this track have applied to and gained admission into doctoral programs after graduation.

The primary areas of emphasis include assessment or evaluation skills and intervention or psychotherapy skills, and the program curriculum is consistent with the educational criteria for licensure as a mental health counselor in the state of Florida. Program graduates have been involved in mental health service delivery through individual, marital, family, and group psychotherapy, as well as crisis intervention and other specialized therapeutic procedures. Although research is not required in this track, students in this track do have the opportunity to engage in collaborative research with program faculty.

Total Credit Hours Required: 61 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A bachelor's degree in Psychology or a related area. A minimum of 15 semester hours of undergraduate psychology courses are required as a prerequisite for applicants with a degree in a field other than psychology. Completion of courses in abnormal psychology and research methods and/or statistics is strongly recommended. Other recommended courses include clinical psychology, developmental psychology, personality theory, physiological psychology, and psychology of diversity.

Degree Requirements

Required Courses
49 Total Credits

- Complete the following:
  - CLP5166 - Advanced Psychopathology (3)
  - CLP6181 - Psychological Theories of Substance Abuse Treatment (3)
  - CLP6191 - Multicultural Psychotherapy (3)
  - CLP6195C - Introduction to Psychotherapy (3)
  - CLP6321 - Psychotherapy in Community Settings (3)
  - CLP6441C - Individual Psychological Assessment I (3)
  - CLP6457C - Group Psychotherapy (3)
  - CLP6459C - Human Sexuality, Marriage, and Sex Therapies (3)
  - CLP6461 - Cognitive-Behavioral Therapy (3)
  - CLP6449C - Career and Lifestyle Assessment (3)
  - CLP6932 - Ethical and Professional Issues in Mental Health Practices (3)
  - CYP6942 - Practicum in Psychological Counseling (3)
  - DEP5057 - Developmental Psychology (3)
  - PSY6216C - Research Methodology (4)
  - PSB5005 - Physiological Psychology (3)
  - CLP6460C - Introduction to Child, Adolescent, and Family Therapies (3)

Internship
12 Total Credits

- Complete all of the following
  - Earn at least 12 credits from the following:
    - CYP6948C - Psychology Internship (1 - 99)
  - The purpose of the internship requirement is to provide the MA candidate in Clinical Psychology with comprehensive, practical experiences under the supervision of licensed mental health professionals. A public agency or nonprofit institution with nondiscriminatory practices is the prototype. The intern is assigned to an acceptable agency for a total of 1000 hours during three consecutive academic semesters (20 hours per week for 16 weeks during fall and spring terms, and 30 hours per week for 12 weeks during the summer term). An additional commitment of three hours per week is required for the interns to meet as a group with a departmental faculty member for review, feedback, and discussions. A major portion of intern training is in the area of psychotherapy/counseling. The intern also engages in differential diagnosis and participates in a wide variety of psychological assessment procedures. It is believed that supervision by qualified and experienced personnel is the primary learning mode by which the intern develops professional expertise and augments classroom didactics. Satisfactory completion ("B" [3.0-grade point average] or better) of the following courses is required prior to internship: CLP 5166, CLP 6195C, CLP 6441C, and CYP 6942. The program director and clinical placement coordinator approve internship placements. Interns are provided with a system for maintaining accurate accounts of their activity during each week of their internship. In addition, both the intern and supervisor(s) complete an Internship Evaluation form each semester.

Comprehensive Exam and Case Presentation
0 Total Credits

- The culminating academic experience for all students in the program is successful completion of a comprehensive exam and case presentation. All students must complete the comprehensive exam their final semester. The exam covers the core professional knowledge required by state licensing agencies. Students also are required to complete a written and oral clinical case presentation. Criteria for passing the exam and presentation are provided in the program handbook.

Grand Total Credits: **61**

Track Details

Additional Program Requirements

For all students in the Clinical MA program, successful completion requires demonstration of academic and clinical excellence. Students who receive grades lower than B (including B- and grades of U in courses graded satisfactory/unsatisfactory) in six semester hours or more will be dismissed from the program. It is a program requirement that all coursework with a grade lower than B be retaken and completed successfully, although both grades are still calculated in the GPA.

In addition to academic excellence, students are expected to demonstrate clinical skills and personal resources necessary to meet the demands of the program and for clinical practice. At the end of each semester, students will receive written feedback from the faculty on the extent to which they are meeting the programs requirements and performance expectations. Student progress will be rated as satisfactory or unsatisfactory. Students who receive an unsatisfactory rating will be asked to complete remediation as determined by the faculty. If the identified problems are not remedied and/or a second unsatisfactory rating is received, the student will be dismissed from the program.

Summer Enrollment

Summer enrollment is required for all students in this track.

Independent Learning

There are several independent learning experiences built into the programs of study that help to individualize the training program. Students work with the internship coordinator and academic advisor to select specific practicum and internship placements. During practicum and internship students will have the opportunity to present cases that incorporate an integration of assessment data and its interpretation, theoretical conceptualization, treatment planning, course of therapy, and available outcome data. This is done ensuring client confidentiality and the highest ethical standards. Although not required for this track, students in this track do have the opportunity to engage in collaborative research with program faculty.

Can you provide an overview of the Pre-licensure Track? Is this the right track for me to apply to?

This track has been offered for decades. As mentioned in our catalogue description, the primary goal of this track is to train students to become licensed, master's-level clinicians. More specifically, graduates of this track are eligible to become Licensed Mental Health Counselors (LMHCs) in the State of Florida, and they will likely be eligible for master's level licensure in most other states. This track includes a full course load (9-12 credits/per semester) for two years. Students in this track complete a practicum (10 hours/week in the first spring in the program) and internship (20 hours/week in the fall, spring, and summer semesters in the second year in the program). A majority of the graduates of this program enter clinical practice and obtain licensure at the master's level. We usually admit 15 to 16 students into this track each fall term.

How do I get licensed?

Students in the applied/prelicensure track meet the eligibility criteria for licensure as a Licensed Mental Health Counselor (LMHC) in the State of Florida. Please note that more details about eligibility criteria can be found on the Florida Department of Health website. In addition, our students are also eligible for similar licensure in most other states; however, we are unable to confirm the licensure and certification requirements of other states. Consequently, if you intend to pursue such credentialing outside of Florida, we advise you to contact the applicable state credentialing authority to familiarize yourself with its specific requirements and determine if our program meets its eligibility criteria.

Can I get into a doctoral program if I complete the pre-licensure track?

Yes! As mentioned above, most students in the pre-licensure track practice at the master's level upon graduation. Having said that, each year we have a number of graduating students who apply to and get into Ph.D. or Psy.D. programs (usually around 2-4 students out a cohort of 15-16 students). Engagement in research may increase students' competitiveness when applying to doctoral programs.

Can I do research if I am in the pre-licensure track?

Yes. Research is not required as part of this track; however, students in the pre-licensure track are often engaged in collaborative research with faculty. It is common for students in this track to present research at scientific conferences, and some of these students become coauthors of peer-reviewed publications in scientific journals.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Track Description

The Master of Arts Clinical Psychology Program is a terminal master's program offered at the UCF Sanford/Lake Mary Campus. The Research/Thesis Track is designed for students who wish to focus on clinical research and/or are interested in pursuing entry into a doctoral program following the completion of their Master's degree. Students who complete this option are not eligible to become Licensed Mental Health Counselors upon graduation. Please visit the program's website for more information, including a list of program faculty members and frequently asked questions (FAQs): https://sciences.ucf.edu/psychology/graduate/ma-clinical/faqs/.

The Clinical Psychology MA Research/Thesis Track program requires a minimum of 38 credit hours beyond the bachelor's degree, including 32 credit hours of required courses, and 6 thesis hours. The curriculum emphasizes the development of research experience and skills. Further, the curriculum is designed to be flexible, with numerous elective courses to help the student pursue specific interests and to work towards specific goals. Students in this track work closely with a faculty mentor.

Note: This track is for students who wish to focus on clinical research and/or preparation for doctoral-level study upon graduation. Students who complete this track will not be license-eligible when they graduate. Completion of this track does not guarantee admissions into a doctoral program.

Total Credit Hours Required: 38 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A bachelor's degree in Psychology or a related area. A minimum of 15 semester hours of undergraduate psychology courses are required as a prerequisite for applicants with a degree in a field other than psychology. Completion of courses in abnormal psychology and research methods and/or statistics is strongly recommended. Other recommended courses include clinical psychology, developmental psychology, personality theory, physiological psychology, and psychology of diversity.

  - Earn at least 6 credits from the following:
    - PSY6971 - Thesis (1 - 99)

Grand Total Credits: **38**

Track Details

Additional Program Requirements

For all students in the Clinical MA program, successful completion requires demonstration of academic and excellence. Students who receive grades lower than B (including B- and grades of U in courses graded satisfactory/unsatisfactory) in six semester hours or more will be dismissed from the program. It is a program requirement that all course work with a grade lower than B be retaken and completed successfully, although both grades are still calculated in the GPA.

In addition to academic excellence, students are expected to demonstrate skills and personal resources that are up to the demands of the program. At the end of each semester, students will receive written feedback from the faculty on the extent to which they are meeting the programs requirements and performance expectations. Student progress will be rated as satisfactory or unsatisfactory. Students who receive an unsatisfactory rating will be asked to complete remediation as determined by the faculty. If the identified problems are not remedied and/or a second unsatisfactory rating is received, the student will be dismissed from the program.

Summer Enrollment

Summer enrollment may be required for completion of the program.

Independent Learning

There are several independent learning experiences built into the programs of study that help to individualize the training program. Students who pursue the research thesis track engage in independent learning through the design and implementation of original research in collaboration with faculty. They will work closely with a faculty mentor in relation to research and selection of electives. Further, although not required, students have the opportunity to take a clinical practicum in their second year in the program to gain clinical experience.

Can you provide an overview of the research/thesis Track? Is this the right track for me to apply to?

The faculty developed this track for students who are interested in focusing on research and/or are interested in gaining entry into a research-focused doctoral program. This track is a great fit for students who are not particularly interested in clinical practice at the master's level upon graduation. In addition to an empirical thesis, we encourage students in this track to engage in other research projects. Students in the thesis track have a reduced course load relative to the prelicensure track, which allows more time for engagement in research. The tradeoff is that students in this track will not be eligible for licensure at the mater's level when they graduate. We anticipate admitting no more than 5 to 6 students into the thesis track this year.

Is it possible to get clinical experience in the research/thesis track?

Yes. It is possible for students in the research/thesis track to chose to do a practicum. This experience would be approximately 10 hours/week during one spring semester.

Am I guaranteed admission into a Ph.D. program if I am in the research/thesis track?

No. The program has the potential to increase a student's competitiveness when applying to research-focused doctoral programs; however, we cannot guarantee admission into a doctoral program.

Financial Information

Licensure Disclosure

This program has potential ties to state-regulated professional licensure or certification in the field. For more information on how this program may prepare you in that regard, please visit https://apq.ucf.edu/files/Licensure-Disclosure-COS-Clinical-Psychology-PhD.pdf.

Program Description

The Psychology Department offers a PhD in Clinical Psychology, educating students in both the science and the practice of clinical psychology.

The Clinical Psychology track in the Psychology PhD Program emphasizes the scientist-practitioner model of training as promulgated by the American Psychological Association (APA). The doctoral program in Clinical Psychology is accredited by the American Psychological Association.

The PhD Program in Clinical Psychology at the University of Central Florida educates graduate students "to generate and integrate scientific and professional knowledge, attitudes, and skills to further psychological science, professional practice, and human welfare. Graduates are capable of functioning as a scientist and a practitioner and may function as either or both, consistent with the highest standards in psychology" (National Conference on the Education and Training of Scientist-Practitioners for the Professional Practice of Psychology, 1990). Our program is committed to the inclusion of students, faculty, and staff from different backgrounds. In particular, we endeavor to help change the distribution of future professionals in Clinical Psychology to better reflect the diversity (e.g., racial, ethnic, sexual orientation) found across the United States. As a part of these goals, we infuse the latest empirical knowledge related to clinical treatment, research, and pedagogy with diverse individuals in our curriculum and clinical/research experiences.

The PhD program aspires to achieve excellence in research and clinical training and to contribute to and perpetuate science and practice in the field of Clinical Psychology through faculty and graduate student involvement in scholarly and professional activities.

Consistent with the mission of a major metropolitan university, the Clinical Psychology PhD program at UCF takes advantage of and builds upon community partnerships. Our partnerships with public and private health service delivery resources in the Central Florida area provides externship training sites and research opportunities.

The Clinical Psychology track in the Psychology PhD Program is designed to be a full-time program, with some summer enrollment expected. There is a total of 86 semester hours of courses, practica, and research requirements.

Total Credit Hours Required: 86 Credit Hours Minimum beyond the Bachelor's Degree. 56 Credit Hours Minimum beyond the Master's Degree.

Program Prerequisites

Students must have obtained a baccalaureate or higher degree in Psychology, prior to the start of the term for which the student is admitted, from a regionally accredited institution or from a recognized foreign institution. Students without a baccalaureate or higher degree from an accredited institution (or equivalent) are not admitted to graduate degree programs, graduate certificate programs, or graduate nondegree status. If the baccalaureate degree does not include a major in Psychology, students must have completed at least 18 credit hours of Psychology courses at the undergraduate level or above. These courses must include Intro/General Psychology, Research Methods/Statistics, Abnormal Psychology, and Personality Theory/Psychology. The following courses are strongly encouraged: Social Psychology, Cognitive Psychology, Biological/Physiological Psychology, and Developmental Psychology. The program requires that History and Systems of Psychology is completed at the undergraduate level with a grade of at least a "B." This can either be completed prior to starting the program or as an undergraduate course during the program. Applicants who enter with a Master's degree may be eligible to waive or transfer up to 30 credit hours for credits earned from a completed Master's degree from an accredited institution recognized by UCF (as long as this number does not exceed 50% of the program's requirements). In these cases, each applicant's situation will be reviewed individually based on program standards and requirements.

    - PSY7219C - Advanced Research Methodology III (4)
  - Earn at least 6 credits from the following:
    - PSY6971 - Thesis (1 - 99)

Clinical Courses
32 Total Credits

- Complete all of the following
  - Complete the following:

        - CLP7447C - Clinical Psychological Assessment (3)
        - CLP7125 - Lifespan Psychopathology (3)
        - CLP7623 - Ethical and Professional Issues in Clinical Psychology (3)
        - CLP7494 - Empirically Supported Psychotherapies (3)
        - CLP6191 - Multicultural Psychotherapy (3)
        - CLP7942L - Supervision Practicum (1)
    - Earn at least 4 credits from the following:
        - CLP7145C - Introduction to Clinical Psychology and Psychotherapy (3)
    - CLP 7145C - 2 credit hours; taken two times at 2 credit hours each time.
    - Earn at least 3 credits from the following:
        - CLP6949 - Predoctoral Internship (1)
    - CLP 6949 - 1 credit hour; taken three times at 1 credit hour each time.
    - Earn at least 9 credits from the following:
        - CLP7943C - Clinical Practicum (1 - 12)
    - CLP 7943C Clinical Practicum :taken 3 times at 3 hours each time.

Elective
6 Total Credits

- Earn at least 6 credits from the following types of courses:
  Any graduate-level course as approved by the program director.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  PSY 7980 - Doctoral Dissertation

Qualifying and Comprehensive Doctoral Examinations
0 Total Credits
No Rules
Purpose
0 Total Credits

- The purpose of the Qualifying and Comprehensive Examination is to develop and assess the competency of professional behaviors in doctoral-level graduate students in the Clinical Psychology PhD Program that are consistent with the program's professional training goals. These goals include but are not limited to the development and demonstration of skills and abilities that enable graduating students to (a) be expertly trained, empirically oriented clinicians capable of designing, implementing and assessing programs concerned with health service and mental health delivery broadly defined and (b) formulate research questions, design research studies, and write research proposals independently. The Clinical Qualifying Examination involves a demonstration of clinical skills while the Research Comprehensive Examination involves writing of a research proposal independently.

Requirements, Rationale, and Objectives
0 Total Credits

- Successful completion of Qualifying and Comprehensive Examination requirements reflects the program's desire to ensure overall breadth of training in the field of Clinical Psychology. The two professional domains outlined above are consistent with this intent.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to Candidacy and enroll in Dissertation hours: Completion of most course work, except for Dissertation hours and Supervision Practicum. Successful completion of the Qualifying and Comprehensive Examinations. The Dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study. The American Psychological Association requires that graduate students be evaluated at least annually and provide written feedback to graduate students. Because Clinical Psychology involves the provision of mental health services to the public, special care must be taken to ensure that graduate students possess the requisite interpersonal sensitivity and skill. As a result, evaluation procedures within this track will focus not only on academic performance but also on: clinical proficiency; ethical and professional conduct; response to supervision; interpersonal behavior; and interpersonal functioning. The Clinical Psychology committee reserves the right to drop from the program graduate students who continue to exhibit serious difficulties in these behavioral domains and do not respond to feedback and efforts at remediation.

Master of Science in Clinical Psychology
0 Total Credits

- Graduate students enrolled in the Clinical Psychology PhD Program earn a Master of Science in Clinical Psychology in route to their doctorate unless they are admitted with an acceptable Master's degree. This is a nonterminal Master's degree available only to students in the Clinical Psychology PhD program.

Independent Learning
0 Total Credits

- As befits the nature of graduate training and the pursuit of a doctoral degree, graduate students in Clinical Psychology are expected to engage in independent learning throughout their graduate career. The completion of the Master's Thesis and the Doctoral Dissertation are two examples of independent learning in which all graduate students participate. In addition, depending upon their career goals, other experiences, such as directed readings or additional research projects, may be undertaken by graduate students.

Grand Total Credits: **86**

Program Description

UCF's Master of Arts in Communication prepares students for a wide range of professions in academia and the public and private sectors. This program, comprised of industry-leading scholars and professionals, provides students with the knowledge to succeed as expert communicators - all within a convenient and practical curriculum.

Housed in the Nicholson School of Communication and Media, the MA in Communication is part of UCF Downtown, a 21st-century campus with access to arts, culture, nightlife, and business. While some courses are offered online, required core courses and most electives are offered in a face-to-face or mixed-mode formats, typically Monday - Thursday evenings at UCF Downtown.

The MA degree program in Communication is a four-semester program for full-time students. Part-time students make take up to seven years to complete the program. Both thesis and nonthesis options are offered and both consist of a minimum of 33 semester hours of work.

  - All required courses must be completed with a grade of B- or higher.
  - Complete the following:
    - COM5312 - Introduction of Communication Research (3)
    - COM6008 - Proseminar in Communication (3)
    - COM6401 - Communication Theory (3)

Research Methods Concentration
3 Total Credits

- Complete at least 1 of the following:
  - COM6303 - Qualitative Research Methods in Communication (3)
  - COM6304 - Quantitative Research Methods in Communication (3)

Elective Courses
18 Total Credits

- Complete all of the following
  - In addition to the courses listed below, special topics courses, study abroad courses, independent study, directed research, internship, and graduate-level courses taken outside the Nicholson School of Communication and Media may be counted as restricted electives, pending approval by the program director, for up to 6 credit hours total.
  - Earn at least 18 credits from the following:
    - ADV6209 - Advertising and Society (3)
    - COM5932 - Topics in Communication Theory and Research (3)
    - COM6046 - Interpersonal Communication (3)
    - COM6048 - Communication in Close Relationships (3)
    - COM6121 - Communication Management (3)
    - COM6145 - Organizational Communication (3)
    - COM6463 - Studies in Intercultural Communication (3)
    - COM6463 - Studies in Intercultural Communication (3)
    - COM6467 - Studies in Persuasion (3)
    - COM6468 - Communication and Conflict (3)
    - COM6535 - Communication Campaigns (3)

- COM6525 - Communication Strategy and Planning (3)
- MMC6307 - International Communication (3)
- MMC6567 - New Media (3)
- MMC6600 - Media Effects and Audience Analysis (3)
- MMC6612 - Communication and Government (3)
- MMC6735 - Social Media as Mass Communication (3)
- PUR6005 - Theories of Public Relations (3)
- PUR6215 - Communicating Corporate Social Responsibility (3)
- PUR6403 - Crisis Public Relations (3)
- PUR6405 - Communication and Public Relations in Politics and Government (3)
- SPC6340 - Teaching Communication (3)

Thesis/Nonthesis Options
6 Total Credits

- Complete all of the following
  Thesis Option
  - Earn at least 3 credits from the following types of courses:
    COM 6971 Thesis (minimum of 3 credit hours, can be taken individually) The thesis option requires a minimum of 3 hours of thesis credit and a successful defense of a thesis. Students may enroll in thesis hours after they have successfully completed the three core courses and their thesis committee has been approved by the department, college, and Graduate Studies. The student's permanent faculty adviser will chair their committee, which also will include two additional graduate faculty members in the Nicholson School of Communication and Media. One additional member, who is also a graduate faculty member, may be added from outside the NSCM. All members of the thesis committee are selected in consultation with the student's permanent faculty adviser. When a topic has been selected, students, in conjunction with their permanent adviser, will develop a thesis proposal. Copies of the proposal will be routed to members to their thesis committee and a proposal hearing scheduled. All student must pass a proposal hearing as well as a final oral defense of their thesis. Students who elect to write a thesis should become familiar with the university's requirements and deadlines for organizing and submitting the thesis.
    Nonthesis Options
  - Complete 1 of the following
    - Students who decide not to complete a thesis may choose to complete either the comprehensive examination nonthesis option OR an applied professional project nonthesis option.
      Nonthesis Option 1: Comprehensive Examination
    - Complete all of the following
      - The nonthesis comprehensive examination option is a four-examination requirement that assesses students' coursework competency. Students who choose the comprehensive examination option must take one additional elective course (three credit hours) and successfully complete the comprehensive examinations. Upon completing their 18th hour in the program, students must select a permanent advisor and form a comprehensive exam committee. The examinations will cover research methods, communication theory, and elective areas selected together by the student with his or her comprehensive examination committee. In order to fulfill the comprehensive exam requirement, the student must earn a passing grade on all exams. If a student fails to pass any of the comprehensive exam area questions, they are allowed two additional attempts to satisfy the comprehensive exam requirement. Once an exam in an area is passed, the student does not have to sit for that exam area again. Students are allowed three attempts to satisfy the comprehensive exam requirement. Students are expected to refer to the Communication MA Graduate Program Handbook for the comprehensive examination protocol.
      - Earn at least 3 credits from the following types of courses:
        Additional Elective

    Nonthesis Option 2: Applied Professional Project
    - Complete all of the following
      - The nonthesis applied project option requires students to demonstrate their ability to apply the knowledge and skills learned in the graduate program to a problem/topic that integrates the range of communication theory, practice, and research presented throughout the program. Upon completing their 18th hours in the program, each student must select a permanent advisor and form an applied project committee. The student will work directly with a faculty adviser to develop a project and the adviser will supervise the project. Students and faculty advisors are encouraged to meet with committee members at the proposal and final defense stages. The grading system for the project is Pass/No Pass. Students who receive a grade of Pass will be allowed to graduate assuming all other requirements are met.
      - Earn at least 3 credits from the following:
        - COM6909 - Research Report (1 - 99)

Equipment Fee
0 Total Credits

- Full-time students in the Communication MA program pay a $16 equipment fee each semester that they are enrolled. Part-time students pay $8 per semester.

Independent Learning
0 Total Credits

- Students who elect the thesis option engage in independent learning through the design and implementation of original

research in the thesis process. Students who pursue the comprehensive examination option experience independent learning through their individual preparation for each of four comprehensive examinations. Students who pursue the applied project option engage in applied, original communication research in an applied setting. All students engage in independent learning in every Communication core course. A research paper or project is required in each of these classes. The papers and projects provide independent learning by requiring students to design and carry out research projects and develop analytical papers, some of which are submitted to conferences and/or journals for peer review. Internships and independent studies are also common opportunities for independent learning in the Communication MA program.

Grand Total Credits: **36**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance
Millican Hall 120
Telephone: 407-823-2827
Appointment Line: 407-823-5285
Fax: 407-823-5241
finaid@ucf.edu
http://finaid.ucf.edu

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Grad Fellowships
Telephone: 407-823-0127
gradfellowship@ucf.edu
https://funding.graduate.ucf.edu

The majority of financial assistance provided by the Nicholson School of Communication and Media graduate program is granted through assistantships. The number of total Assistantships at the Master’s level is limited, and varies year-to-year. Preference will be given to applicants who complete their application for admission prior to the January 15th priority deadline. It is the applicants' responsibility to ensure they have a complete application on file by the priority deadline. Applicants may indicate their interest in an assistantship in the application and follow up with the admission specialist or program coordinator. Students on assistantship are paid a stipend, receive tuition support, and are eligible for health insurance. For general information regarding assistantships at UCF, refer to the Assistantships (www.students.graduate.ucf.edu/assistantships) section of the College of Graduate Studies website.

The Nicholson School of Communication and Media offers primarily two types of assistantships:

- Graduate Teaching Assistants are assigned to work with faculty members and assist them with their teaching responsibilities. This includes assisting with large lecture classes, grading exams, compiling information for lectures, and working with students, as instructed, to help keep a class operating smoothly.
- Graduate Teaching Associates are graduate students who, after completing eighteen hours of their graduate program of study and the required university and department training, are assigned to teach their own sections of undergraduate courses. Typically, Graduate Teaching Associates teach SPC 1608 (Fundamentals of Oral Communication) or SPC 1603 (Fundamentals of Technical Presentation).

Program Description

This certificate is no longer accepting applications effective Fall 2016.

The Graduate Certificate in Conservation Biology provides students with an excellent opportunity for cross-discipline training in conservation theory in a classroom setting with fieldwork in the laboratory portions of Biology.
The Graduate Certificate in Conservation Biology emphasizes basic and applied conservation biology. The certificate offers an excellent opportunity for cross-discipline training that provides conservation theory in a classroom setting and valuable field work in the laboratory portions of the Biology courses. The Department of Biology provides basic courses on campus, while scientists at Walt Disney World's Animal Kingdom offer applied courses on Disney property. Practical experience dealing with small animal populations is provided within Disney's unique zoological setting.
The Conservation Biology certificate requires four graduate courses (12 credit hours) in conservation study.
Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

Program Description

The Graduate Certificate in Corporate Communication offers industry-relevant training in creating, managing, and communicating corporate reputation. Coursework focuses on theory, research, and practical applications of principles related to corporate communication. The program is composed of three core graduate courses and three elective courses, totaling 18 credit hours, suitable for professionals working in the industry.

Housed in the Nicholson School of Communication and Media, the graduate Corporate Communication Certificate is part of UCF Downtown, a 21st-century campus with access to arts, culture, nightlife, and business. While some courses are offered online, required core courses and most electives are offered in a face-to-face or mixed-mode formats, typically Monday-Thursday evenings at UCF Downtown.

The program is composed of three required graduate courses and three elective courses that can be incorporated into a master's program of study in Communication or taken as an add-on to another graduate degree. The required and elective courses are drawn from a limited list of courses that reflect current professional development needs for corporate communication. Students must enroll in COM 6008 Pro-Seminar in Communication in their first fall semester.

Digital Media MA

Program Contact Information

NSCM Graduate Student Services Coordinator
nicholsongrad@ucf.edu
Telephone: 407-823-5595
Full-time Location: CMB 203, UCF Downtown
Part-time Location: NSCM 238, UCF Main Campus

Is this program available 100% online?

No

Program Description

The MA program in Digital Media engages students in theoretical frameworks, methods, and critical media practice related to computational, interactive media. Through rigorous creative and research projects, the MA prepares students for continued study in a PhD program or employment within the industry. Working closely with an innovative faculty and technology partnerships in downtown Orlando, students will employ emerging technologies to communicate interactive narratives and experiences while also producing cutting-edge research in interactive media.

The Digital Media MA combines theory and practice to train the next generation of interactive media scholars and practitioners. Part of the first wave of UCF's state-of-the-art downtown campus, students in this program have unique opportunities to participate in socially impactful research and artistic production. In the first year, students gain an introduction to aesthetic, theoretical, programming, and design approaches to interactive media, while gaining valuable foundations in research and storytelling. In the second year, students either pursue a thesis or studio production path, while learning about contemporary topics and emerging Artificial Intelligence (AI) research and design. Throughout the program, students are encouraged to create portfolio-ready pieces and/or present their work at conferences, thus preparing them for future professional, artistic, and scholarly success at the forefront of interactive media.

The program focuses on the following areas:

- **Theory and Practice**: The program trains students to pair theory and practice regardless of the path they choose through the program. Students will learn to develop theoretically sophisticated creative works and to pair creativity with research. This is accomplished by providing students with a solid foundation in aesthetic, design, programming, and theoretical approaches.
- **Narrative and Experience Design**: The program also emphasizes interactive storytelling and an understanding of how to design compelling experiences specifically for interactive media. This is accomplished through coursework on these subjects, and the time allotted in the program's plan of study for students to develop in-depth creative and research projects that put the concepts learned in coursework into play.
- **Social Impact**: The MA in Digital Media also takes advantage of the creative, research, and business opportunities available through the program's downtown Orlando location to provide students with a range of real-world, socially impactful research and creative experiences. Course projects and students' own creative and research work benefit from the social, cultural, and economic context of a thriving downtown sector.
- **Professional and Scholarly Outcomes**: The MA program offers two equally in-depth and rigorous tracks—the Thesis or Studio Production paths. The required coursework provides the foundational skills and knowledge needed for students to create an exhibition or publication-ready projects.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Desirable background skills for this degree include familiarity with computer coding and/or digital design, but these are not required as coursework addresses these areas.

  - DIG6817 - Contemporary Topics in Interactive Media (3)
  - DIG6817 - Contemporary Topics in Interactive Media (3)

Thesis/Non-Thesis Option
12 Total Credits

- Complete 1 of the following

  Thesis Option: 6 Credit Hours of Thesis and 6 Credit Hours of Electives
  - Complete all of the following
    - Students choosing the Thesis option will take all required courses, along with two electives (one in Fall and one in Spring of their second year in a typical program of study). The electives may come from any COM, DIG, or FIL prefix or other as approved by the graduate coordinator. Many graduate-level courses in the College of Arts and Humanities can be used as electives, based on an adviser-approved plan of study. These courses must be selected to ensure that at least one-half of the courses in the student's plan of study are taken at the 6000 level. In addition, students will take 6 hours of DIG 6971: Thesis credit (3 in Fall and 3 in Spring in a typical program of study). Each candidate for the Master of Arts submits a thesis prospectus and preliminary bibliography on a topic selected in consultation with the adviser. The formal thesis is initiated by the preparation of a proposal that meets both departmental and university requirements for the thesis. Prior to enrollment into thesis credit hours, the adviser, in consultation with the student, designates a Thesis Committee to be further approved by the College Graduate of Studies. This committee is chaired by the adviser and includes two or more additional faculty members from the Nicholson School of Communication and Media. The members of the student's thesis committee judge the proposal as the preliminary step to beginning the thesis. This committee must approve the Thesis Proposal before academic credit can accrue. The thesis is a formal written document. The introduction cites similar, related, and antecedent work. The body explains the purposes of the project, the method of its production, and any evaluation that was performed. The conclusion includes plans for future work. The thesis also includes an archival copy of the resulting creative product. Both the thesis and the creative product must be delivered in digital form, acceptable by the UCF library according to its standards for digital dissertations and theses.
    - Earn at least 6 credits from the following:
      - DIG6971 - Thesis (1 - 99)
    - Earn at least 6 credits from the following types of courses:
      Electives
      Thesis Defense
    - In addition to a written thesis, the final step in completing the thesis requirement is an oral defense before the thesis committee. Candidates must present their creative or research work and explain its creation in an oral defense. These presentations are made to the student's committee in a public meeting that other faculty and students may attend.

  Studio Production, Non-Thesis Option
  - Complete all of the following
    - Students selecting the Studio Production option complete 6 required credit hours: DIG 6571: Studio 1 (3 credit hours) and DIG 6909: Research Report (3 credit hours), and an additional 6 credit hours of electives. The electives may come from any COM, DIG, or FIL prefix or other as approved by the graduate coordinator. Many graduate-level courses in the College of Arts and Humanities can be used as electives, based on an adviser-approved plan of study. These courses must be selected to ensure that at least one-half of the courses in the student's plan of study are taken at the 6000 level.
    - Complete the following:
      - DIG6524 - Studio 1 (3)
    - Earn at least 3 credits from the following types of courses:
      DIG 6909 - Research Report
    - Earn at least 6 credits from the following types of courses:
      Electives

Grand Total Credits: **36**

Feature Film Production MFA

Program Contact Information

NSCM Graduate Student Services Coordinator
nicholsongrad@ucf.edu
Telephone: 407-823-5595
Full-time Location: CMB 203, UCF Downtown
Part-time Location: NSCM 238, UCF Main Campus

Is this program available 100% online?

No

Program Description

The Feature Film Production MFA is a terminal degree, the highest degree awarded to filmmakers or film artists. It is a highly selective and rigorous professional film production program for visual artists and film practitioners who demonstrate exceptional artistic and intellectual prowess, evidence of significant professional promise and a commitment to the expressive potential of digital filmmaking and the exploration of non-traditional modes of distribution. The Feature Film Production MFA produces graduates with mastery of storytelling through the digital medium as it encourages the candidate to find his or her personal style. Entrepreneurial in spirit, the program emphasizes story, performance, aesthetic choice, business, and creative thinking. When participation is committed and complete, the program develops graduates who can compete in the worlds of national and international independent filmmaking.

Students will pursue a modality - narrative, documentary, or experimental - for their thesis film, or body of work, during their first two semesters in the program. All MFA candidates must take the core required courses but will choose electives that best match their modalities and interests. Upon completion of the degree, each student will have produced a microbudget digital feature film or equivalent body of work that meets standards outlined in the Program Graduate Handbook. Students will also have prepared a marketing strategy for its distribution and exhibition. Graduates in this program are responsible to funding their own their own thesis projects, including fundraising and soliciting investors where needed. Historically, graduates have produced feature films within the budget range of 5-25K. Budgetary needs can vary greatly depending on the scope and modality of the thesis. Consulting with the thesis committee regarding the appropriate budgetary scale is advised for all students. Budgets exceeding 50K are strongly discouraged.

We welcome innovative approaches within the digital cinema paradigm that reimagine how new technologies can create alternative performances to exploit the tension between narrative and experimental storytelling, creating a new agency for actors and new expectations for audiences.

Program Prerequisites

A BA or BFA in film production is preferred, however, degrees in the following areas are acceptable*if accompanied by a strong video portfolio:*

- Animation
- Art
- Cinema Studies
- Communication
- English/Creative Writing
- Game Design
- Graphic Design
- Illustration
- Journalism
- Photography
- Radio/TV

        - FIL6649 - Microbudget Post-Production (3)
        - FIL6673 - Arts and Media Entrepreneurship (3)

- Earn at least 6 credits from the following:
    - FIL5924 - Graduate Seminar (1)
- Note: FIL 5924 Graduate Seminar is 1 Credit Hour to be taken each semester for a total of 6 credits.

Internal Elective Courses
9 Total Credits

- Complete all of the following
    - Students select a minimum of 9 credit hours of internal electives that reflect their mode of filmmaking interest (narrative, documentary, or experimental). More than 9 credit hours of internal electives may be taken to substitute for external electives if approved by the graduate program coordinator. Students in other graduate programs are required to receive instructor consent before enrolling.
    - Complete at least 3 of the following:
        - FIL5141C - Feature/TV Writing (3)
        - FIL5371C - Documentary Production II (3)
        - FIL5419 - Developing the Film Screenplay (3)
        - FIL5419 - Developing the Film Screenplay (3)
        - FIL6146 - Screenplay Refinement (3)
    - Note: FIL 5907 Independent Study and FIL 5917/5918 Directed Research may be taken for a total of no more than six credit hours each.

External Electives
12 Total Credits

- Complete all of the following
    - Students select a minimum of 12 credit hours of external electives that align with their particular interests, outside the MFA in Feature Film Production. Choice of external electives should be made after discussion with the thesis advisor or graduate coordinator. Other electives related to the thesis topic may be approved by the graduate coordinator. Not all of these courses are offered every term, prerequisites and consent of instructor may be required.
    - Complete at least 4 of the following:
        - ADV6209 - Advertising and Society (3)
        - ARH5897 - Advanced Seminar in Art History (3)
        - ART5280 - Serial Content (3)
        - ART6683 - Time Arts (3)
        - ART6911C - Studio Concentration (3)
        - COM5932 - Topics in Communication Theory and Research (3)
        - COM6046 - Interpersonal Communication (3)
        - COM6048 - Communication in Close Relationships (3)
        - COM6121 - Communication Management (3)
        - COM6145 - Organizational Communication (3)
        - COM6463 - Studies in Intercultural Communication (3)
        - COM6467 - Studies in Persuasion (3)
        - COM6468 - Communication and Conflict (3)
        - DIG5366C - Animation and Visual Effects Production II (3)
        - DIG5378C - Editing for Animation and Visual Effects I: Theory and Production (3)
        - DIG5386C - Animation and Visual Effects Production I (3)
        - DIG5439C - Script and Story Development for Animation and Visual Effects (3)
        - DIG5487 - Media Aesthetics (3)
        - DIG5865 - The History of Animation and Visual Effects (3)
        - DIG6136 - Design for Interactive Media (3)
        - DIG6365C - Media and Music for Animation and Visual Effects (3)
        - DIG6379C - Editing for Animation and Visual Effects II: Practical Editing (3)
        - DIG6551 - Theory and Practice of Interactive Storytelling (3)
        - ENT5016 - New Venture Design (3)
        - ENT5206 - New Venture Implementation (3)
        - ENT5619 - Creativity and Entrepreneurship (3)
        - MMC6202 - Legal and Ethical Issues for Communication (3)
        - MMC6307 - International Communication (3)
        - MMC6567 - New Media (3)
        - MMC6600 - Media Effects and Audience Analysis (3)
        - MMC6612 - Communication and Government (3)
        - MMC6735 - Social Media as Mass Communication (3)
        - PUR6215 - Communicating Corporate Social Responsibility (3)
        - PUR6405 - Communication and Public Relations in Politics and Government (3)
        - SPC6340 - Teaching Communication (3)
        - Course Not Found

Thesis
12 Total Credits

- Complete all of the following
    - Earn at least 12 credits from the following:
        - FIL6971 - Thesis (1 - 99)

- Before undertaking the thesis project, candidates must meet with the thesis advisory committee to submit and discuss the proposed project and obtain the committee's approval. The thesis requires intensive applied learning in order to complete a feature-length project and/or body of work. The student cannot enroll in thesis hours until the thesis advisory committee has been selected and approved. Once a student has begun to take thesis hours, they must enroll in at least one thesis hour for each remaining term until graduation. Students may spread out thesis hours any way they wish but are advised to follow recommendations in the program handbook. The thesis project has a strong research component both in the initial development phase and in the creation of the distribution and marketing plan for the project. In addition to creating the feature film or body of work, the student must write an accompanying thesis paper that meets all university requirements (see ETD Requirements). The final stage of the curriculum serves as a bridge to the professional world and supports the entrepreneurial philosophy of the program. The thesis project must be reviewed by the faculty adviser throughout the production process, and meet agreed upon criteria within a stated time frame. Once the thesis project is completed, candidates must have a screening or exhibition of the work and meet with the thesis advisory committee for final approval and oral defense.

Equipment Fee
0 Total Credits

- Students in the Feature Film Production MFA program pay a $90 equipment fee each semester that they are enrolled. Courses containing a production element may charge an additional materials and equipment fee.

Grand Total Credits: **63**

Financial Information

Graduate students may receive financial assistance through a limited number of competitive fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance
Millican Hall 120

Yes

UCF Online

Please Note: Financial Mathematics Graduate Certificate may be completed fully online although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit **http://global.ucf.edu/**. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to**State Restrictions** for current information.

Program Description

The Mathematical Science Graduate Certificate on Financial Mathematics is designed for students to gain knowledge of mathematical finance and to pursue careers in financial services industry and regulatory agency.

The mathematical science graduate certificate on financial mathematics requires taking 4 graduate courses (12 credit hours), including 9 credit hours of required courses and 3 credit hours of elective courses.

Total Credit Hours Required: 12 Credit Hours Minimum beyond the Bachelor's Degree

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Program Description

The Master of Science in Forensic Science program is designed to service the needs of both practicing professionals and full-time students who desire an advanced program of study in forensic science. The program is comprised of three concentrations: **Forensic Analysis, Forensic Biochemistry** and **Forensic Professional**. The Forensic Biochemistry and Forensic Analysis concentrations require the student to perform original research and defend a written thesis. The Forensic Professional concentration is a nonthesis option comprised of course work and an independent study capstone project.

Forensic Science is a highly interdisciplinary science, as reflected in the following programs of study. The interdisciplinary nature of the program makes it imperative that students seek advising from faculty members on the appropriateness of this program towards their future career as well as the content of courses to ensure that they have the appropriate background to master the course content.

Thesis Options

The grounding in scientific research methodology provided by the thesis requirement is a central focus of the thesis-based concentrations. The Forensic Analysis and Biochemistry concentrations are comprised of 32 credit hours of study beyond the BS degree. Students will conduct research either on site or at the professional laboratories where they work. In either case, a member of the UCF Forensic Science faculty will act as research adviser and approve the research topic. This research culminates in the writing and presentation of the thesis.

The student's research adviser will select the thesis examination committee, consisting of two UCF faculty members and at least one other acknowledged forensic expert in the field. The student will present his/her thesis for examination by the committee. The thesis must be judged worthy of publication by the review committee and may not be submitted for examination until approved. For students choosing to conduct research at non-UCF sites, the thesis adviser may visit the student's laboratory where the research is to be performed, before the research begins and on a regular basis until the work is complete.

- **Forensic Analysis Concentration:** The Forensic Analysis concentration emphasizes the application of modern chromatographic, spectroscopic and micro-analytical techniques to problems in forensic science.
- **Forensic Biochemistry Concentration:** The Forensic Biochemistry concentration has a strong biochemistry-DNA focus to serve the needs of supervisory personnel in DNA sections of crime laboratories. National DNA standards mandate that such personnel have advanced degrees.

Nonthesis Option

The nonthesis concentration is specifically designed for the forensic analyst who currently holds employment in an operational forensic laboratory or has previously worked for a minimum of three years in an operational forensic laboratory. Applicants who do not meet these criteria must apply for one of the thesis-based concentrations. This specialized program option is not designed for international applicants.

- **Forensic Professional Concentration:** The Forensic Professional concentration is comprised of 34 credit hours of study beyond the bachelor of science degree but does not require an original laboratory-based research project. The Forensic Professional concentration culminates in a one-credit-hour independent study capstone project performed under the direction of one of the faculty members in the program.

Program Overview

The Forensic Science MS degree is comprised of 32 or 34 credit hours of study beyond the BS degree with an intensive specialization in one of three concentrations: Forensic Analysis, Forensic Biochemistry or Forensic Professional. Full-time students should complete the degree in two years of continuous full-time study, while part-time students will generally finish the degree in four years.

The program in **Forensic Analysis** and **Forensic Biochemistry** is research-based and requires original and independent research resulting in a written thesis to be defended before a committee consisting of two UCF graduate faculty members and at least one other acknowledged forensic expert in the field. These concentrations require 32 credit hours, including 9 credit hours of required courses, 15 credit hours of concentration courses, and 8 credit hours of Thesis.

The program in **Forensic Professional** requires 34 credit hours, including 9 hours of required courses and 24 hours of elective courses and one credit hour of independent study as the capstone experience. This concentration does not require an original laboratory-based research project. Students not in residence at UCF should consult the catalog for courses with online offerings.

Students with undergraduate degrees in chemistry, biochemistry, biology, forensic science, statistics and physics are encouraged to apply. Students applying to this program with a forensic science undergraduate degree, please be aware that this program is designed for students interested in pursuing a career in forensic chemistry, forensic biology, forensic biochemistry applications.

Students interested in pursuing careers in any of the following forensic disciplines should apply to a more appropriate program:

- Forensic Psychology, you should apply to a graduate Psychology program.
- Forensic Anthropology, you should apply to a graduate Anthropology program.
- Crime Scene Investigation, you should apply to a graduate Criminal Justice program.
- Forensic Pathology or Medical Examination, you should apply to a medical school.
- Forensic Engineering, you should apply to a graduate Engineering program.

Total Credit Hours Required: 32-34 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

A bachelor's degree in Chemistry, Biochemistry, Molecular Biology, Physics, Statistics, Forensic Science, or another physical science, based on at least 30 hours of college-level science subjects, which will provide the background required to be successful in this program.

Degree Requirements

Required Courses
9 Total Credits

- Complete the following:
  - CHS5504 - Topics in Forensic Science (3)
  - CHS5596 - The Forensic Expert in the Courtroom (3)
  - CHS6513 - Quality Assurance for Forensic Scientists (3)

Thesis/Nonthesis Option
23 - 25 Total Credits

- Complete 1 of the following
  Thesis Option
  - Complete all of the following
    - Earn at least 8 credits from the following types of courses:
      CHS 6971 Thesis The Forensic Analysis and Forensic Biochemistry concentrations require the student to conduct original research and successfully defend a written thesis.
      Program Concentrations
    - Complete 1 of the following
      Forensic Analysis Concentration:
      - Earn at least 15 credits from the following:
        - STA5206 - Statistical Analysis (3)
        - CHM5235 - Applied Molecular Spectroscopy (3)
        - CHM6492 - Atomic Spectroscopy (3)
        - CHS6546 - Forensic Analysis of Ignitable Liquids (3)
        - CHS6545 - Forensic Analysis of Explosives (3)
        - CHS5937 - Special Topics (3)

      Forensic Biochemistry Concentration
      - Complete all of the following
        - Complete the following:
          - STA5206 - Statistical Analysis (3)
          - CHS6535 - Forensic Molecular Biology (3)
          - CHS6535L - Forensic Analysis of Biological Materials (3)
          - CHS6536 - Population Genetics and Genetic Data (3)
          - BCH6740 - Advanced Biochemistry (3)
        - STA 5206 - Statistical Analysis may be substituted for equivalent course with advisor permission

  Nonthesis Option/Forensic Professional Concentration
  - Complete all of the following
    - Students in the Forensic Professional concentration are required to take 24 credit hours selected from the list below with approval of their faculty adviser and complete the Capstone course.
    - Earn at least 24 credits from the following:
      - STA5206 - Statistical Analysis (3)
      - CHM5235 - Applied Molecular Spectroscopy (3)
      - CHM6492 - Atomic Spectroscopy (3)

- CHS6546 - Forensic Analysis of Ignitable Liquids (3)
- CHS6545 - Forensic Analysis of Explosives (3)
- CHS6535L - Forensic Analysis of Biological Materials (3)
- CHS6535 - Forensic Molecular Biology (3)
- CHS6536 - Population Genetics and Genetic Data (3)
- BCH6740 - Advanced Biochemistry (3)
- CGS5131 - Computer Forensics I: Seizure and Examination of Computer Systems (3)
- CNT6418 - Computer Forensics II (3)
- CHS5518 - The Forensic Collection and Examination of Digital Evidence (3)
- CIS6207 - The Practice of Digital Forensics (3)
- CAP6133 - Advanced Topics in Computer Security and Computer Forensics (3)
- CHS5937 - Special Topics (3)
- CHM6710 - Applied Analytical Chemistry (3)
- CHM6440 - Kinetics and Catalysis (3)
- CHS6251 - Applied Organic Synthesis (3)
- CHS6240 - Chemical Thermodynamics (3)
- BCH6740 - Advanced Biochemistry (3)
- CHM6134 - Advanced Instrumental Analysis (3)
- CHM6938 - ST: Electrochemistry (3)

Capstone

- Earn at least 1 credits from the following types of courses:
  CHS 6908 - Independent Study The capstone experience in the Forensic Professional concentration requires one credit hour of Independent Study, which culminates in the submission of a required report on a pre-approved topic. This study will comprise either (1) a review of the current literature on a particular forensic science research topic area, or (2) a holistic case study dealing with a particular criminal case in which forensic evidence played a significant role.

Equipment Fee
0 Total Credits

- Full-time students in the Forensic Science MS program pay a $90 equipment fee each semester that they are enrolled. Part-time students pay $45 per semester.

Independent Learning
0 Total Credits

- Students in the Forensic Analysis and Forensic Biochemistry concentrations are required to conduct original research and defend a written thesis. Students in the Forensic Professional concentration complete a capstone experience that requires independent research and a report.

Grand Total Credits: **32 - 34**

Program Description

A PhD degree track in Human Factors and Cognitive (HFC) Psychology, accredited by the Human Factors and Ergonomics Society, is offered to those with a baccalaureate or master's degree in psychology or an allied area. The track seeks to develop the capacity to design, conduct, and apply human factors and cognitive psychology research in a variety of professional and academic settings. It is patterned on the scientist-practitioner model of the American Psychological Association (APA) and adheres to guidelines established by the committee for Education and Training of APA's Division 21 (Applied Experimental and Engineering Psychology).

The PhD degree track in HFC Psychology seeks to develop the capacity to design, conduct, and apply applied experimental and human factors research in a variety of professional settings. Students receive training in the content and techniques of human factors psychology-including statistical and quantitative procedures, experimental design, survey methods, computer techniques, and other research methodologies. Students are encouraged to also select a concentration area, which they complete as part of their required elective coursework. Examples include human-computer interaction, human-machine-environment interface, human performance, human factors in simulation and training, cognitive neuroscience, or other areas of interest with advisor authorization. In addition to the course requirements, students must demonstrate their knowledge and skills by completing the five competency domains. Finally, a dissertation representing a significant research contribution to the field is required.

We continue to improve the curriculum to adapt to the changing professional and societal demands and to offer the best graduate education and training in human factors and cognitive psychology. In particular, we have modified our curriculum and program requirements and introduced project and outcome-based competency assessments. These changes have helped to focus students' attention on their respective programs of research while simultaneously developing the knowledge and skill sets required to be Ph.D. scientist/practitioners in human factors and cognitive psychology.

Students and graduates of the HFC program have served the local community by improving the enjoyment, comfort, and safety of Walt Disney World entertainment rides, serving as an educational professional at several local colleges and universities and consulting at several government agencies and private industries. To date, our doctoral program continues to be the largest and one of the most prominent in the nation. Both faculty and students have received numerous honors and awards from the Human Factors and Ergonomics Society.

For students who enter with a baccalaureate degree, the Human Factors and Cognitive track in the Psychology PhD program requires a minimum of 75 credit hours, and students may earn the MA degree en route to the PhD by completing all of the requirements of the PhD except for dissertation. For students who already have a master's degree in Psychology, the MA is not available. Students who enter with a master's degree in psychology may be allowed to waive up to 30 hours of graduate course work to the doctoral program with approval of the program faculty, and will also be required to complete a minimum of 60 semester hours at UCF.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

For students who already have a master's degree in psychology, the number of credit hours will depend on the number of credit hours transferred or waived. However, all students in the program must complete 15 credit hours of dissertation.

Program Prerequisites

Degree(s) should be in psychology or an allied area.

Evidence of successful completion of undergraduate courses in statistics and general areas of experimental psychology.

Students are not normally admitted to the program without having completed a minimum amount of basic preparation in content related to experimental psychology. This preparation is judged on an individual basis but typically consists of at least 18 semester hours in the following:

- Courses in research methods, computer applications, and statistical methods.
- General experimental psychology courses, e.g., learning, physiological, perception, human learning, cognition, motivation, and measurement.

Degree Requirements

Required Courses
42 Total Credits

- Complete all of the following
  - Students are required to achieve a minimum grade of B- in each core curriculum course. Students who take PSB 6328 and PSB 6348 must achieve a B- in both courses. If students earn a C+ or lower in any core curriculum course, they will be placed on academic probation and they may be required to retake the course or to complete remedial work required by the HFC committee in consultation with the student's adviser. If students earn a C+ or lower in two or more core curriculum courses they will be subject to immediate review by the Program Committee and may be dismissed from the program. It is anticipated that in most cases earning a C+ or lower in two core curriculum courses will result in dismissal from the program.
  - Complete the following:
    - EXP5256 - Human Factors I (3)
    - EXP6257 - Human Factors II (3)
    - EXP6258 - Human Factors III (3)
    - EXP5208 - Sensation and Perception (3)
    - EXP6116 - Visual Performance (3)
    - EXP6255 - Human Performance (3)
    - EXP6506 - Human Cognition and Learning (3)
    - EXP6541 - Advanced Human Computer Interaction (3)
    - INP7089 - Human Factors Professional Issues (3)
    - PSB5005 - Physiological Psychology (3)
    - PSY7217C - Advanced Research Methodology I (4)
    - PSY7218C - Advanced Research Methodology II (4)
    - PSY7219C - Advanced Research Methodology III (4)

Elective Courses
18 Total Credits

- Complete all of the following
  - Students should choose electives in concentrated course groupings: for example, human-machine systems, performance measurement and evaluation, simulation and training, or quantitative methods. Other elective course groupings may be developed for the student's specific interests. Students may choose to satisfy these elective requirements by taking courses outside the Psychology Department that can serve their multidisciplinary needs. Courses outside of the Department that have already been approved as electives are contained in the list below. A student who wishes to use courses that are not included on this list may seek approval by petitioning the HFC Faculty Committee through their academic adviser. Students may take up to 12 credit hours of Directed Research, however, it is highly recommended that they take elective courses that are related to their discipline from other graduate programs or departments at UCF. Electives may include but are not limited to the following courses:

- Complete at least 6 of the following:
    - DEP5057 - Developmental Psychology (3)
    - Course Not Found
    - DIG6432 - Transmedia Story Creation (3)
    - EIN5248 - Ergonomics (3)
    - EIN5251 - Usability Engineering (3)
    - EIN5255C - Interactive Simulation (3)
    - EIN5255C - Interactive Simulation (3)
    - EME6613 - Instructional System Design (3)
    - EME6614 - Instructional Game Design for Training and Education (3)
    - EXP5254 - Human Factors and Aging (3)
    - IDS6916 - Simulation Research Methods and Practicum (3)
    - IDS6146 - Modeling and Simulation Systems (3)
    - IDS6147 - Perspectives on Modeling and Simulation (3)
    - DIG5875C - Introduction to Modeling and Simulation (3)
    - IDS6148 - Human Systems Integration for Modeling and Simulation (3)
    - IDS6149 - Modeling and Simulation for Test and Evaluation (3)
    - Course Not Found
    - INP7310 - Organizational Psychology I (3)
    - Course Not Found

Concentration in Cognitive Neuroscience (Optional)
0 Total Credits

- The Human Factors and Cognitive Psychology PhD Program offers students opportunities for both lab and course-based training in Cognitive Neuroscience. To support cognitive neuroscience research training, the Department of Psychology maintains state-of-the-art research facilities, including space and equipment for electroencephalography/event-related potentials (EEG/ERP), functional near-infrared spectroscopy (fNIRS), eye tracking, pupillometry, heart-rate variability, respiration, and electrodermal activity, as well as external collaborations to support functional magnetic resonance imaging (fMRI). In addition, the HFC Program also offers a course-based concentration in Cognitive Neuroscience with the following curriculum: A student who elects to complete the concentration must achieve a minimum grade of B- in each course. PSB 6328 - Psychophysiology 3 Credit Hours PSB 6348 - The Neuroanatomical Basis of Psychological Function 3 Credit Hours PSB 6352 - Neuroimaging Design and Analysis Methods 3 Credit Hours PSB 7349 - Advanced Topics in Cognitive Neuroscience 3 Credit Hours Select 6 credit hours of elective courses from the list above. Note: Admission to these courses is not guaranteed, but is contingent on the decision of the department, college, and instructor of record for the course.

Program Description

The Master of Science in Industrial and Organizational Psychology program focuses on the application of psychological principles to organizations and emphasizes the major areas of selection and training of employees, applied theories of organizational behavior including models of motivation, job satisfaction, and productivity; test theory and construction; assessment center technology; statistics and experimental design and a variety of current topics. Industrial and Organizational Psychology graduates are involved in many issues of critical importance to society including fairness in the selection and treatment of employees, the creation of work environments that maximize the satisfaction and productivity of employees, and the study of technological influences on human performance.

The MS degree program in Industrial and Organizational Psychology is a four-semester program for full-time students. Both thesis and nonthesis options are offered and both consist of a minimum of 38 semester hours of work.

Total Credit Hours Required: 38 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

A bachelor's degree with a major in psychology or allied area, or a baccalaureate degree with the completion of undergraduate courses in statistics and research methods, and preference of four additional upper-division psychology courses (12 credit hours)

Program Description

The Industrial and Organizational Psychology track in the Psychology PhD program develops competency through research and training for the application of psychological principles to organizations. The degree is patterned on the scientist-practitioner model of the American Psychological Association (APA).
Program graduates are involved in many issues of critical importance to society, including fairness in the selection and treatment of employees, the creation of work environments that maximize the satisfaction and productivity of employees, and the study of technological influences on human performance.
The doctoral program provides students with training consistent with the scientist-practitioner model. A key assumption of the program is that every graduate must be a highly competent scientist who can contribute to both the science and practice of the discipline.

You can view our Industrial and Organizational Psychology Doctoral Program Handbook in the link above.

The Psychology PhD program in Industrial and Organizational Psychology (I/O) requires four to five years of full-time study beyond the baccalaureate and three to four years beyond the masters. The first few years are devoted to course work and the final year to the doctoral dissertation.

The I/O program requires a minimum of 75 credit hours of graduate study for students who enter the program with a baccalaureate degree. The nature of this study is determined by the I/O Area Program Committee.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Bachelor's or master's degree in Psychology or another allied area.

Evidence of successful completion of undergraduate courses in statistics and in the general area of experimental psychology.

Degree Requirements

I/O Area Courses
30 Total Credits

- Complete the following:
  - INP6005 - Overview of Research in Industrial and Organizational Psychology (3)
  - INP7214 - Industrial Psychology I (3)
  - INP7310 - Organizational Psychology I (3)
  - INP7081 - Professional Issues in Industrial and Organizational Psychology (3)
  - PSY7315 - Psychometric Theory and Practice (3)
  - PSY7217C - Advanced Research Methodology I (4)

- PSY7218C - Advanced Research Methodology II (4)
- PSY7219C - Advanced Research Methodology III (4)
- INP7071 - Research Methods in Industrial and Organizational Psychology (3)

Psychology Field Courses
6 Total Credits

- Complete the following:
  - SOP5059 - Advanced Social Psychology (3)
  - EXP6506 - Human Cognition and Learning (3)

Research Courses
6 Total Credits

- Earn at least 6 credits from the following types of courses:
  INP 6933 - Seminar in Industrial and Organizational Psychology 3 Credit Hours (taken twice) or INP 6971 - Thesis 3 Credit Hours (taken twice)

Teaching Experience
3 Total Credits

- Complete all of the following
  - Earn at least 3 credits from the following:
    - EXP6939 - Teaching Seminar (3 - 99)
  - All students must successfully teach a minimum of one undergraduate course as instructor of record prior to completing the I/O Psychology PhD degree. Fulfillment of the Teaching requirement involves first taking the UCF College of Graduate Studies online and face-to-face GTA Training and EXP 6939 - Teaching Seminar. In addition, students need to serve as instructor of record for an undergraduate class at UCF. First-time students as instructor of record must submit a syllabus, lecture notes, examinations, two course evaluations (mid and end-of-semester), as well as written feedback from the student's major professor or members of the student's doctoral committee who directly observed or viewed videotapes of at least one lecture. Students will be required to administer student evaluations to their class mid-way through the semester so that they can receive feedback and make any necessary changes. The student's adviser will provide ratings of the student's performance as instructor of record at the end of the semester. If the adviser believes that the student has not performed satisfactorily, the adviser will determine remediation specific to the student's weakness (e.g., presentation skills). This remediation is not limited to, but may include, the following: serving as a guest lecturer for another instructor of record, taking a course or seminar, or teaching another semester, as determined by the student's adviser. Fulfillment of the traditional Teaching requirement is intended to provide students with (a) additional training and opportunities to develop instructional skills consistent with university-level instruction, (b) the opportunity to receive and react to constructive comments concerning their developing instructional skills, (c) additional opportunities to learn and develop expertise in using newly developed technology and methods relevant to university-level instruction (e.g., active learning groups, computer-assisted technology, software programs that facilitate and complement traditional instructional activities), and (d) additional expertise in select areas of psychology to prepare them for future professional instructional opportunities following graduation from the university.

Elective Courses
15 Total Credits

- Complete all of the following
  - Students must select five elective courses. These courses must be approved by the student's major adviser and the program director. The courses in this set are selected by the student in conjunction with his or her adviser. Note, however, that all courses in the set must be approved by the I/O Program Committee. The available elective courses include, but are not limited to, the following:
  - Complete at least 5 of the following:
    - MAN6311 - Advanced Topics in Human Resources Management (3)
    - MAN7207 - Organization Theory (3)
    - MAN6385 - Strategic Human Resources Management (3)
    - INP6605 - Training and Team Performance (3)
    - INP6215 - Assessment Centers and Leadership (3)
    - INP6058 - Job Analysis and Performance Appraisal (3)
    - INP6318 - Recruitment, Placement and Selection (3)
    - INP6933 - Seminar in Industrial and Organizational Psychology (3)
  - INP 6933 - Seminar in Industrial and Organizational Psychology: 3 Credit Hours (may be taken up to 6 times for credit)

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  PSY 7980 - Doctoral Dissertation

Candidacy Examination
0 Total Credits

- After completing all required courses, students must pass all four sections of the Candidacy Examination. This is a written

examination covering the content of the field and are graded by the I/O faculty. Candidacy Examinations may be taken a maximum of two times. Failure to pass the examination will result in the student being dismissed from the program.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Completion of all course work, except for dissertation hours. Successful completion of the candidacy examination. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Independent Learning
0 Total Credits

- Given the nature of graduate training and the pursuit of a doctoral degree, graduate students in industrial and organizational psychology are expected to engage in independent learning throughout their graduate career. The completion of the doctoral dissertation is an example of independent learning in which all graduate students participate. In addition, a master's thesis or other research projects will be undertaken by the students from the first year on. To facilitate this process, students are expected to attend weekly program-sponsored research presentations during the fall and spring semesters and will be required to give at least three of these presentations prior to graduation.

Program Description

The Integrative and Conservation Biology PhD program prepares students for independent research and roles within industry, nongovernmental organizations, academia, or government sectors, combining biological sciences with a range of other disciplines.

The purpose of this interdisciplinary training is to produce scientists capable of doing independent research and the ability to communicate issues of biology and conservation to policymakers, the general public, and industry.

Students will choose one of two specializations: Conservation Biology or Integrative Biology. The Conservation Biology Track is intended to provide the academic background necessary to begin work in industry, non-governmental organizations, or government in a leadership role applying cutting-edge principles to problem-solving in conservation biology. The Integrative Biology Track embraces applied and basic research concerning ecology, evolution, physiology, genetics, behavior, and conservation. Students in either track would be prepared to pursue an academic career. Please scroll to the bottom of this page for further details on these tracks.

Track Description

The Conservation Biology track in the Integrative and Conservation Biology PhD program prepares students for independent research and roles within industry, nongovernmental organizations or government sectors combining traditional biological sciences with a range of other disciplines.

The Conservation Biology track within the Integrative and Conservation Biology PhD program is intended to provide the academic background necessary to begin work in industry, nongovernmental organizations, or government in a leadership role applying cutting-edge principles to problem solving in conservation biology. Students in this track would also be prepared to pursue an academic career.

The Conservation Biology Track in the Integrative and Conservation Biology PhD program requires 72 credit hours beyond the bachelor's degree, including a minimum of 27 hours of formal coursework excluding independent study. The formal coursework includes 15 credit hours of required core courses and at least 12 credit hours of additional graduate-level courses from Biology (or other departments) selected in consultation with the advisor and the dissertation committee (at least 4 of the 12 credit hours must be offered through the Biology Department). The remaining 45 credit hours may consist of additional electives, doctoral dissertation research (PCB 7980), and a maximum of 12 credit hours of combined directed research (PCB 6918, PCB 7919, and PCB 5917) and independent study (PCB 6908). In addition, at least 15 credit hours of the remaining 45 credit hours must be comprised of doctoral dissertation research (PCB 7980).

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

Students entering the graduate program with regular status are normally expected to have completed course work generally required for a bachelor's degree in biology.

College of Graduate Studies Contact Information

Degree Requirements

Required Courses
15 Total Credits

- Complete all of the following
  - Complete the following:
    - PCB6042 - Conservation Biology Theory (4)
    - PCB6053C - Restoration Ecology (4)
    - PCB6466 - Methods in Experimental Ecology (3)
    - PCB6095 - Professional Development in Biology I (1)
    - PCB6096 - Professional Development in Biology II (1)
  - Earn at least 2 credits from the following:
    - BSC6935 - Seminar in Biology (1)
  - BSC 6935 - Seminar in Biology: Students will take 1 credit hour each of two semesters.

Elective Courses
12 Total Credits

- Earn at least 12 credits from the following types of courses:
  A minimum of 12 credit hours of formal graduate-level courses from Biology, or other departments, are selected in consultation with the advisor and the dissertation committee. The goal is to tailor the program of study to the individual student's needs while maximizing exposure to a variety of disciplines including, among others, policy, economics, sociology, engineering, chemistry, statistics, or computer science.

Dissertation
15 Total Credits

- Complete all of the following
  - Earn at least 15 credits from the following types of courses:
    PCB 7980 - Dissertation
    Advisory Committee
  - The Advisory Committee shall consist of a minimum of four members, including the dissertation advisor, with at least three members coming from the graduate faculty in the Biology Department. At least one member will be from a department other than Biology or from outside the university. The chair, or co-chair, must be a member of the program graduate faculty.

Enrollment Requirements
0 Total Credits

- Students are required to register for 9 credit hours in fall and spring before their candidacy exam, and 6 credit hours in summer if enrolled. After being admitted to candidacy, minimum enrollment is 3 credit hours of dissertation research each semester.

Additional Electives
30 Total Credits

- Earn at least 30 credits from the following types of courses:
  In addition to the above required, elective, and dissertation credits, the student must enroll in an additional 30 credit hours of electives. These electives may include additional formal coursework, additional dissertation research hours (PCB 7980), and a maximum of 12 credit hours combined of independent study (PCB 6908) and directed research (PCB 6918, PCB 7919, and PCB 5917). Professional internship hours can be substituted for directed research.

Examinations
0 Total Credits

- Details

Qualifying Examination
0 Total Credits

- The written qualifying examination should be completed within the first two years of the student's program. The exam seeks to cover areas of general knowledge and discipline-specific knowledge within the student's declared track. These questions could be related to the dissertation research proposal or designed to examine general knowledge and reasoning within the field. The candidate will meet with their advisory committee at least two months prior to the examination to discuss expectations. Committee members must clearly articulate in writing the general areas that may be examined. Any student failing the examination must repeat the examination within six calendar months of the date of the first examination and requires a majority vote by committee members to pass the exam. A second failed attempt will result in dismissal from the program.

Candidacy Examination
0 Total Credits

- Each student will be required to generate and orally defend a written proposal outlining their dissertation research to their dissertation advisory committee no later than 12 months after passing the Qualifying Examination. The oral Candidacy Examination will cover all areas within the scope of the student's doctoral program and requires that the student demonstrate knowledge of the theory, literature and research methodologies relevant to the proposed area of research as well as demonstrate an understanding of how their work relates to the field of biology as a whole. After passing the Candidacy Examination and meeting other requirements, the student will be deemed as having been admitted to candidacy and can register for dissertation hours. Once a student is admitted to candidacy, the focus will be on dissertation research. For most students, the research and writing of the dissertation will take two to three years after advancing to candidacy. During this time, students should remain in close contact with the dissertation advisor and advisory committee, and annual progress reports must be filed with the Graduate Program Director.

Candidacy Examination - Written Proposal
0 Total Credits

- A written dissertation proposal, already approved by the advisor, must be submitted to each committee member no later than two weeks prior to the Candidacy Examination. Typically, the proposal will be in the format described below. However, in cases where this format is not appropriate, an alternative format may be used with the approval of the dissertation advisor. The proposal should be approximately 10 to 15 pages in length not including references, single-spaced and typed in 12-point font with one-inch margins on all sides. The use of figures and tables is encouraged. With rare exceptions it is expected that dissertation research will be hypothesis-driven. Specific Aims: Describe concisely the problem(s) to be addressed and the specific goals of the dissertation research as they relate to the problem(s), including clear statements of hypotheses to be tested. Background and Significance: Review background literature relevant to the dissertation topic, indicating clearly where gaps in knowledge exist. Justify the need for the research by explaining its anticipated significance. Conclude by linking gaps in current knowledge to the proposed specific aims. Methodology: Outline carefully the study design (observations, experiments, models, statistical analysis, etc.) related to, and the methodology to be used for, each specific aim. Methodologies should be explained in sufficient detail to allow committee members to assess the validity of its use in the study. Potential outcomes and alternative approaches should be discussed. Literature Cited: References should be indicated in the main body of the proposal wherever appropriate and should follow the format of a peer-reviewed journal in a field of study appropriate to the research.

This section can be as long as necessary.

Candidacy Examination - Oral Component
0 Total Credits

- At least two weeks prior to the examination, an abstract describing the proposed research will be posted in the Biological Sciences Building and circulated by e-mail among faculty and graduate students. The candidate will present the research proposal in a forum open to all faculty, students and visitors. The oral presentation should be approximately 30-45 minutes in length to be followed by a public question-and-answer period. Presentation of preliminary data is neither required nor expected, but should be provided if available and relevant. With the exception of the advisory committee and candidate, all faculty, students and visitors will leave at the conclusion of the public question-and-answer period. The committee will continue the exam in closed session with further questioning. Questions can be directed to any matter relevant to the research proposal and areas of weakness previously identified in the written (qualifying) exam. A majority vote is required to pass the examination; however, no more than one negative vote is permitted. The majority must include the dissertation advisor. Any student failing the examination must repeat the examination within six calendar months of the date of the first examination. A second failed attempt will result in dismissal from the program.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Program of study submitted and approved. Dissertation Committee formed (without external member) Successful completion of the qualifying exam. Completion of all coursework (except for dissertation hours) External member added to Dissertation Committee. Successful completion of candidacy exam.

Dissertation Defense
0 Total Credits

- The dissertation is expected to represent an original and significant contribution to the discipline. Upon completion and approval of the doctoral dissertation by all appropriate faculty and university offices, the student will make a formal presentation of the research findings in seminar format to the dissertation committee and other university faculty and students who may wish to attend. The dissertation should be in a format appropriate for publication and should be "tightened" to a readiness for submittal by use of appendixes for nonessential information. The major role of the student's advisory committee is to offer guidance on study design and interpretation of results. A polished draft must be delivered to the advisory committee for review after the student and dissertation advisor have agreed upon editorial changes; this should occur well before the anticipated date of the final defense. Committee members have the right to reject documents that fail to meet these guidelines. Committee members should be given at least two weeks to review the draft before the student attempts to schedule the final defense. The final defense is to be scheduled only after the advisory committee agrees that the dissertation is ready for defense. Committee members should return the corrected dissertation to the student two weeks after receipt and the candidate should check with committee members to ensure they have the time to review the document. For example, if the student delivers the final draft to the committee one month prior to the proposed defense date, that would allow two weeks before the scheduled defense date for the student to make recommended changes. At least two weeks prior to the defense, an abstract describing the research conducted and conclusions reached will be posted in the Biological Sciences Building, circulated by e-mail among faculty and graduate students, and posted at the College of Graduate Studies Events Calendar. The candidate will present the research in a forum open to all faculty, students, and visitors. The oral presentation should be approximately 45-50 minutes in length to be followed by a question-and-answer period. In the presentation the candidate should focus on background information, describe the research performed, and draw attention to the significance of the conclusions reached. With the exception of the committee and candidate, all faculty, students, and visitors will leave at the conclusion of the question-and-answer period. The committee will continue the defense and the candidate will answer questions about the subject matter presented and defend the conclusions drawn. The committee will ask questions of the process used and assess the candidate's level of competency with the research topic. A majority vote is required to pass the examination; however, no more than one negative vote is permitted. The majority must include the dissertation advisor.

Student Orientation
0 Total Credits

- An orientation for all incoming students will be scheduled one week prior to each fall semester. The orientation will include tours of the program facilities, a session on registration, university policies and procedures, and expectations of doctoral study. Further, Environmental Health and Safety will present a program on topics such as laboratory safety, chemical and fire safety, biohazard training, and radioisotope handling. Expectations for Graduate Teaching Assistants (GTA) and Graduate Research Assistants (GRA) will be fully covered. In addition, students will be required to participate in the program for GTAs offered by the UCF Faculty Teaching and Learning Center and the College of Sciences. Students are strongly encouraged to attend the university's orientation also, held approximately one week before classes begin in the Fall semester.

Independent Learning
0 Total Credits

- The dissertation satisfies the independent learning experience.

Grand Total Credits: **72**

Track Details

A student is required to establish a program of study before the completion of nine credit hours of coursework, in conjunction with their dissertation advisor and advisory committee. A student's advisory committee may require the candidate to take any graduate course taught at UCF if deemed appropriate for the student's area of emphasis. Students entering with a master's degree may request up to 30 semester credit hours of previous work be waived toward the requirements for this degree with approval from the advisory committee. Students who transfer 30 credit hours must still take 2 credit hours of Biology Seminar (BSC 6935) and Professional Development I (PCB 6095) and II (PCB 6096). Students may register for dissertation research only after passing the candidacy exam.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Track Description

The Integrative Biology track in the Integrative and Conservation Biology PhD program prepares students for independent research and roles within industry, nongovernmental organizations or government sectors combining traditional biological sciences with a range of other disciplines.

The Integrative Biology track within the Integrative and Conservation Biology PhD program embraces applied and basic research concerning ecology, evolution, physiology, genetics, behavior, and conservation. Students taking this track will be prepared to pursue an academic career.

The Integrative Biology Track requires 72 credit hours beyond the bachelor's degree, including a minimum of 27 hours of formal coursework excluding independent study. The formal coursework includes 7 credit hours of required core courses and at least 20 credit hours of graduate-level courses from Biology (or other departments) selected in consultation with the advisor and the dissertation committee (at least 12 of the 20 credit hours must be offered through the Biology Department). The remaining 45 credit hours may consist of additional electives, doctoral dissertation research (PCB 7980), and a maximum of 12 credit hours of combined directed research (PCB 6918, PCB 7919, and PCB 5917) and independent study (PCB 6908). In addition, at least 15 credit hours of the remaining 45 credit hours must be comprised of doctoral dissertation research (PCB 7980).

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

Students entering the graduate program with regular status are normally expected to have completed course work generally required for a bachelor's degree in biology.

Degree Requirements

Required Courses
7 Total Credits

- Complete all of the following
  - Complete the following:
    - PCB6466 - Methods in Experimental Ecology (3)
    - PCB6095 - Professional Development in Biology I (1)
    - PCB6096 - Professional Development in Biology II (1)
  - Earn at least 2 credits from the following:
    - BSC6935 - Seminar in Biology (1)
  - BSC 6935 - Seminar in Biology: Students will take 1 credit hour each of two semesters.

Elective Courses
20 Total Credits

- Earn at least 20 credits from the following types of courses:
  A minimum of 20 credit hours of formal graduate-level courses from Biology, or other departments, are selected in consultation with the advisor and the dissertation committee. The goal is to tailor the program of study to the individual student's needs while maximizing exposure to a variety of disciplines including, among others, policy, economics, sociology, engineering, chemistry, statistics, or computer science.

Dissertation
15 Total Credits

- Complete all of the following
  - Earn at least 15 credits from the following types of courses:
    PCB 7980 - Dissertation
    Advisory Committee

- The Advisory Committee shall consist of a minimum of four members, including the dissertation advisor, with at least three members coming from the graduate faculty of the Biology Department. At least one member will be from a department other than Biology or from outside the university. The chair, or co-chair, must be a member of the program graduate faculty.

Enrollment Requirements
0 Total Credits

- Students are required to register for 9 credit hours in fall and spring before their candidacy exam, and 6 credit hours in summer if enrolled. After being admitted to candidacy, minimum enrollment is 3 credit hours of dissertation research each semester.

Additional Electives
30 Total Credits

- Earn at least 30 credits from the following types of courses:
  In addition to the above required, elective, and dissertation credits, the student must enroll in an additional 30 credit hours of electives. These electives may include additional formal coursework, additional dissertation research hours (PCB 7980), and a maximum of 12 credit hours combined of independent study (PCB 6908) and directed research (PCB 6918, PCB 7919, and PCB 5917). Professional internship hours can be substituted for directed research.

Examinations
0 Total Credits

- Details

Qualifying Examination
0 Total Credits

- The written qualifying examination should be completed within the first two years of the student's program. The exam seeks to cover areas of general knowledge and discipline-specific knowledge within the student's declared track. These questions could be related to the dissertation research proposal or designed to examine general knowledge and reasoning within the field. The candidate will meet with their advisory committee at least two months prior to the examination to discuss expectations. Committee members must clearly articulate in writing the general areas that may be examined. Any student failing the examination must repeat the examination within six calendar months of the date of the first examination and the examination requires a majority vote by committee members. A second failed attempt will result in dismissal from the program

Candidacy Examination
0 Total Credits

- Each student will be required to generate and orally defend a written proposal outlining their dissertation research to their dissertation advisory committee no later than 12 months after passing the Qualifying Examination. The oral Candidacy Examination will cover all areas within the scope of the student's doctoral program and requires that the student demonstrate knowledge of the theory, literature, and research methodologies relevant to the proposed area of research as well as demonstrate an understanding of how their work relates to the field of biology as a whole. After passing the Candidacy Examination and meeting other requirements, the student will be deemed as having been admitted to candidacy and can register for dissertation hours. Once a student is admitted to candidacy, the focus will be on dissertation research. For most students, the research and writing of the dissertation will take two to three years after advancing to candidacy. During this time, students should remain in close contact with the dissertation advisor and advisory committee and annual progress reports must be filed with the Graduate Program Director.

Candidacy Examination - Written Proposal
0 Total Credits

- A written dissertation proposal, already approved by the advisor, must be submitted to each committee member no later than two weeks prior to the Candidacy Examination. Typically, the proposal will be in the format described below. However, in cases where this format is not appropriate, an alternative format may be used with the approval of the dissertation advisor. The proposal should be approximately 10 to 15 pages in length not including references, single-spaced and typed in 12-point font with one-inch margins on all sides. The use of figures and tables is encouraged. With rare exceptions it is expected that dissertation research will be hypothesis-driven. Specific Aims: Describe concisely the problem(s) to be addressed and the specific goals of the dissertation research as they relate to the problem(s), including clear statements of hypotheses to be tested. Background and Significance: Review background literature relevant to the dissertation topic, indicating clearly where gaps in knowledge exist. Justify the need for the research by explaining its anticipated significance. Conclude by linking gaps in current knowledge to the proposed specific aims. Methodology: Outline carefully the study design (observations, experiments, models, statistical analysis, etc.) related to, and the methodology to be used for, each specific aim. Methodologies should be explained in sufficient detail to allow committee members to assess the validity of its use in the study. Potential outcomes and alternative approaches should be discussed. Literature Cited: References should be indicated in the main body of the proposal wherever appropriate and should follow the format of a peer-reviewed journal in a field of study appropriate to the research. This section can be as long as necessary.

Candidacy Examination – Oral Component
0 Total Credits

- At least two weeks prior to the examination, an abstract describing the proposed research will be posted in the Biological Sciences Building and circulated by e-mail among faculty and graduate students. The candidate will present the research proposal in a forum open to all faculty, students, and visitors. The oral presentation should be approximately 30-45 minutes in

length to be followed by a public question-and-answer period. Presentation of preliminary data is neither required nor expected, but should be provided if available and relevant. With the exception of the advisory committee and candidate, all faculty, students and visitors will leave at the conclusion of the public question-and-answer period. The committee will continue the exam in closed session with further questioning. Questions can be directed to any matter relevant to the research proposal and areas of weakness previously identified in the written (qualifying) exam. A majority vote is required to pass the examination; however, no more than one negative vote is permitted. The majority must include the dissertation advisor. Any student failing the examination must repeat the examination within six calendar months of the date of the first examination. A second failed attempt will result in dismissal from the program.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Program of study submitted and approved. Dissertation Committee formed (without external member). Successful completion of qualifying exam. Completion of all coursework (except for dissertation hours). External member added to Dissertation Committee. Successful completion of candidacy exam.

Dissertation Defense
0 Total Credits

- The dissertation is expected to represent an original and significant contribution to the discipline. Upon completion and approval of the doctoral dissertation by all appropriate faculty and university offices, the student will make a formal presentation of the research findings in seminar format to the dissertation committee and other university faculty and students who may wish to attend. The dissertation should be in a format appropriate for publication and should be "tightened" to a readiness for submittal by use of appendixes for nonessential information. The major role of the student's advisory committee is to offer guidance on study design and interpretation of results. A polished draft must be delivered to the advisory committee for review after the student and dissertation advisor have agreed upon editorial changes; this should occur well before the anticipated date of the final defense. Committee members have the right to reject documents that fail to meet these guidelines. Committee members should be given at least two weeks to review the draft before the student attempts to schedule the final defense. The final defense is to be scheduled only after the advisory committee agrees that the dissertation is ready for defense. Committee members should return the corrected dissertation to the student two weeks after receipt and the candidate should check with committee members to ensure they have the time to review the document. For example, if the student delivers the final draft to the committee one month prior to the proposed defense date, that would allow two weeks before the scheduled defense date for the student to make recommended changes. At least two weeks prior to the defense, an abstract describing the research conducted and conclusions reached will be posted in the Biological Sciences Building, circulated by e-mail among faculty and graduate students, and posted on the College of Graduate Studies Events Calendar. The candidate will present the research in a forum open to all faculty, students, and visitors. The oral presentation should be approximately 45-50 minutes in length to be followed by a question-and-answer period. In the presentation the candidate should focus on background information, describe the research performed, and draw attention to the significance of the conclusions reached. With the exception of the committee and candidate, all faculty, students, and visitors will leave at the conclusion of the question-and-answer period. The committee will continue the defense and the candidate will answer questions about the subject matter presented and defend the conclusions drawn. The committee will ask questions of the process used and assess the candidate's level of competency with the research topic. A majority vote is required to pass the examination; however, no more than one negative vote is permitted. The majority must include the dissertation advisor.

Student Orientation
0 Total Credits

- An orientation for all incoming students will be scheduled one week prior to each fall semester. The orientation will include tours of the program facilities, a session on registration, university policies and procedures, and expectations of doctoral study. Further, Environmental Health and Safety will present a program on topics such as laboratory safety, chemical and fire safety, biohazard training, and radioisotope handling. Expectations for Graduate Teaching Assistants (GTA) and Graduate Research Assistants (GRA) will be fully covered. In addition, students will be required to participate in the program for GTAs offered by the UCF Faculty Center for Teaching and Learning and the College of Sciences. Students are strongly encouraged to attend the university orientation as well, held approximately one week prior to each fall semester.

Independent Learning
0 Total Credits

- The dissertation satisfies the independent learning experience.

Grand Total Credits: **72**

Track Details

A student is required to establish a program of study before the completion of nine credit hours of coursework, in conjunction with their dissertation advisor and advisory committee. A student's advisory committee may require the candidate to take any graduate course taught at UCF if deemed appropriate for the student's area of emphasis. Students entering with a master's degree may request up to 30 semester credit hours of previous work be waived toward the requirements for this degree with approval from the advisory committee. Students who transfer 30 credit hours must still take 2 credit hours of Biology Seminar (BSC 6935) and Professional Development I (PCB 6095) and II (PCB 6096). Students may register for dissertation research only after passing the candidacy exam.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Program Description

The Integrative Anthropological Sciences PhD emphasizes cross-disciplinary empirical research on the dynamics of transformation and change in societies past and present. The program integrates methodologies from the science and technology components of Science, Technology, Engineering, and Math (STEM) with the theoretical and analytical strengths of social science to address critical social challenges.

The curriculum is comprised of the following basic elements: 1) a core curriculum focused on methodological expertise; 2) a topical curriculum covering the dynamics of transformation in human societies; 3) professional competence in workplace skills embedded into all courses; and 4) experiential learning via independent research. The central purpose of the program is to produce graduates with the necessary methodological expertise and analytical skills to create innovative solutions to the ongoing challenges of local and global disparities, environmental and anthropogenic crises, and the resilience and vulnerability of human populations.

The Integrative Anthropological Sciences PhD requires 51 credit hours beyond an earned master's degree. Required coursework minimally includes 12 credit hours of core courses, 24 credit hours of elective courses, and 15 hours of dissertation research. If foundational or theoretical coursework is not present in the earned master's, remaining credit hours may consist of additional electives, doctoral research, and a maximum of 9 credit hours of directed research and independent study.

Total Credit Hours Required: 51 Credit Hours Minimum beyond the Master's Degree

Program Prerequisites

A master's degree or its equivalent in Anthropology or a closely related discipline.

Degree Requirements

Required Courses
12 Total Credits
No Rules
Core
9 Total Credits

- Complete the following:
    - ANG6002 - Proseminar in Anthropology (3)
    - ANG6931 - Science, Technology, and the Transformation of Human Societies (3)
    - ANG7075 - Advanced Anthropological Topics in Geospatial Analysis (3)

Research Methods
3 Total Credits

- Complete at least 1 of the following:
    - ANG6498 - Advanced Qualitative Methods in Anthropology (3)
    - ANG7496 - Advanced Quantitative Methods in Anthropology (3)

Elective Courses
24 Total Credits

- All students in the doctoral program must complete 24 hours of unrestricted electives. The unrestricted electives offer the student the opportunity to explore their interests, further advance their methodological skills, and gain interdisciplinary experience. To fulfill their unrestricted electives requirement, students may also take graduate-level courses in programs outside the department, particularly in Biology, Sociology, Political Science, History, and the College of Health and Public Affairs but, outside courses must not exceed 12 credit hours. The student's faculty advisor and the Graduate Program Coordinator must approval all graduate courses taken outside the department. The student may also use the second methods course identified in the Core requirement as an Unrestricted Elective. The departmental course options for the Unrestricted Electives include the following:

Unrestricted Electives
24 Total Credits

- Earn at least 24 credits from the following:
    - ANG5094 - Writing in Anthropology (3)
    - ANG5166 - Problems in Maya Studies (3)
    - Course Not Found
    - ANG5191 - Mortuary Archaeology (3)
    - ANG5228 - Maya Iconography (3)

- Course Not Found
- ANG6168 - The Ancient Maya (3)
- ANG6181C - GIS Applications in Anthropology (3)
- ANG6184 - Advances in Archaeological Practice (3)
- ANG6324 - Contemporary Maya (3)
- ANG6405 - Food Security and Sustainability (3)
- Course Not Found
- ANG6467 - Advanced Topics in Medical Anthropology (3)
- ANG6520C - Advanced Human Osteology (3)
- ANG6536 - Advances in Bioarchaeology (3)
- ANG6587 - Seminar in Biological Anthropology (3)
- ANG6821 - Forensic Archeology Field Methods (3)
- ANG6701 - Public and Applied Anthropology (3)
- ANG6930 - Seminar in Cultural Anthropology (3)
- ANG6740C - Advanced Forensic Anthropology (3)
- ANG6801 - Ethnographic Research Methods (3)

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  ANG 7980 Dissertation Research -15 credit hours In consultation with the advisor, each student must secure qualified members of their dissertation committee. The dissertation committee will consist of a minimum four members. At least three members must be Anthropology Graduate Faculty, and the student's advisor will serve as the committee chair. One member must be from either outside the student's department or UCF. Graduate faculty members must form the majority of any given committee. A Dissertation Committee must be formed prior to enrollment in dissertation hours. A student who passes their candidacy exam (proposal defense) will begin the dissertation process. The dissertation serves as the culmination of the coursework that comprises this research-based degree. It must make a significant original theoretical, intellectual, practical, creative, or research contribution to the student's area within the discipline. Dissertations will be theoretically grounded, show expertise in the topic area, and utilize methodologically sound analysis of either quantitative data, qualitative data or mixed-methods data. The dissertation will be completed through a minimum of 15 hours of dissertation credit, which students will use to conduct original research.

Examinations
0 Total Credits
No Rules
Qualifying Exam
0 Total Credits

- Students are expected to form their dissertation committee by the beginning of their third semester. The Qualifying Exam will consist of a collection of research statements written by the PhD student in consultation with their committee and an oral defense of the statements. The number and topics of the statements will be determined by the advisor in consultation with the student and the dissertation committee. Passing the qualifying exam is necessary before a student can schedule their Candidacy Exam.

Candidacy Examination—Written Proposal and Oral Defense
0 Total Credits

- Advancement to candidacy requires a successful defense of the student's dissertation grant proposal. This defense takes place in the semester prior to the one in which the student intends to enroll in dissertation hours, normally during the 4th semester. The proposal defense is based on a research proposal that follows the guidelines and format of a major external grant agreed upon by the dissertation committee.

Independent Learning
0 Total Credits

- As with all graduate programs, independent learning is an important component in the IAS doctoral program. Students will demonstrate independent learning through research seminars, directed research and the dissertation. Doctoral students are also expected to pursue additional independent reading beyond formal coursework relevant to their research and career direction.

Grand Total Credits: **51**

No

Program Description

The Graduate Certificate in Intelligence and National Security provides an interdisciplinary graduate education for people engaged in or seeking professional careers in intelligence policy with a focus on analysis of security threats or crises, both domestic and international, through use of human, electronic and public domain intelligence sources.

In addition, students will be introduced to various analytic approaches including game theory, network analysis, nonintrusive measurement, geospatial approaches and quantitative analysis.

Graduates are prepared to perform "key functions including conducting research and gathering information, identifying intelligence gaps, interpreting and evaluating information from multiple (and sometimes contradictory) sources, monitoring trends and events related to a particular country or issue, and preparing written and oral assessments." This expectation comes from the job description for an intelligence analyst established by the federal government posted here.

The certificate in Intelligence and National Security consists of 18 credit hours at the graduate level, including two required core courses and four electives.

Total Credit Hours Required: 18 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Students who have been admitted to a degree-seeking graduate program at UCF may apply for admission to the certificate program. Other interested applicants may also apply, but must first contact the certificate advisor (Andrew Boutton) to inquire about admission to the certificate program prior to applying.

Program Description

The Master's of Science in Interactive Entertainment at UCF's Florida Interactive Entertainment Academy (FIEA) teaches artists, programmers, and producers the techniques, tools, and skills to succeed in the gaming industry. The program provides specific skills in the area of game design, programming, 3-D artistry, as well as essential skills such as problem solving, teamwork, and project management.

FIEA provides a team-based, industry-oriented education in a world-class facility located at the UCF Downtown campus in Orlando. Student production teams are mentored by industry trained faculty who provide instruction in game design, level design, technical design, creative collaboration, rapid prototyping, 3-D animation and modeling, technical art, motion capture, software engineering, legal and ethical issues, preproduction, and postmortems. Graduates have access to internship and venture opportunities and job interviews with game and media companies from across the country.

The Interactive Entertainment MS degree requires a minimum of 30 credit hours beyond the bachelor's degree including 12 credit hours of core courses, 9 credit hours of specialization, a practicum and a capstone experience.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

9 Total Credits

- Complete 1 of the following
  - Specialization courses help prepare students in their chosen field (Art, Production or Programming) by covering the details of each discipline. Art classes help students develop aesthetic and technical skills necessary to create

compelling visuals for the entertainment industry. Programming classes focus on software engineering techniques as they apply to interactive entertainment products, while production classes focus on the specifics of game design as well as project management. Students take all three courses in their chosen specialization. Courses are listed in order of term offered: Fall Spring Summer

Art Specialization

- Complete the following:
  - DIG5348C - Digital Asset Creation (3)
  - DIG6559C - Advanced Digital Asset Creation (3)
  - DIG6589C - Digital Asset Portfolio Development (3)

Production Specialization

- Complete the following:
  - DIG5557C - Production and Design I (3)
  - DIG6558 - Production and Design II (3)
  - DIG6099C - Media Distribution (3)

Programming Specialization

- Complete the following:
  - DIG5637 - Game Programming Fundamentals (3)
  - DIG6638 - Advanced Game Programming (3)
  - DIG6635 - Applied Programming Mechanics (3)

Capstone
3 Total Credits

- Complete all of the following
  - The capstone experience applies the concepts and theories learned to produce a large-scale project. The target deliverable is a playable demonstration of a game that simulates the core experience and demonstrates the key features of the project's vision. The course concludes with a special event premiering the final project to the FIEA community and invited guests.
  - Complete the following:
    - DIG6718C - Interactive Entertainment Project (3)

Practicum
6 Total Credits

- Complete all of the following
  - The practicum is supervised training supplementing theoretical and practical experiences involving new research developments or partnerships within the gaming industry. Students may participate on a research team exploring new ideas in interactive entertainment with industry partners, working at an on-site internship with a game company, developing a start-up entity, or working with a faculty member on research in an area of interest.
  - Complete at least 1 of the following:
    - DIG6944C - Game Design Practicum (6)
    - DIG6947C - Digital Venture Practicum (6)

Independent Learning
0 Total Credits

- Both the capstone course and the practicum provide independent learning experiences. The capstone experience is a project-based class that features a game demonstration. The practicum allows students to work with industry partners, in an internship, starting a new venture, or to conduct research with a faculty member.

Grand Total Credits: **30**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance
Millican Hall 120

Is this program available 100% online?

Yes

UCF Online

Please note: Mathematical Science Graduate Certificate may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Program Description

The Graduate Certificate in Mathematical Science is designed to prepare students to teach college-level mathematics in high schools or colleges.

All required courses will be offered to accommodate distance learning by posting recorded lectures and offering scheduled online problem sessions and office hours.

The Mathematical Science certificate requires six graduate courses (18 credit hours), including 9 credit hours of required courses and 9 credit hours of elective courses.

Total Credit Hours Required: 18 Credit Hours Minimum beyond the Bachelor's Degree

No

Program Description

The Master of Science in Mathematical Science provides a broad base in applied, financial and industrial mathematics.

Students in the program can specialize in one of many aspects of mathematics, including Approximation Theory, Applied and Computational Harmonic Analysis, Big Data and Mathematical Statistics, Combinatorics and Graph Theory, Commutative Algebra and Algebraic Geometry, Control and Optimization, Differential and Symplectic Geometry, Fluid and Plasma Dynamics, Functional Analysis, Inverse and Ill-posed Problems, Mathematical Biology, Mathematical Finance, Nonlinear Waves and Nonlinear Dynamics, Numerical Analysis, Orthogonal Polynomials, Partial Differential Equations, Probability and Stochastic Analysis, and Tomography and Medical Imaging.

This degree has 2 tracks: Financial Mathematics Track and Industrial Mathematics Track. Please scroll to the bottom of this page for further details on these Tracks.

The Mathematical Science MS program requires 30 credit hours minimum beyond the bachelor's degree. There are two options for the master's degree: thesis and nonthesis.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

A working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), and maturity in the language of advanced calculus (at the level of MAA 4226).

Degree Requirements

Required Courses
12 Total Credits

- Complete the following:
  - MAA5210 - Topics in Advanced Calculus (3)
  - MAP6385 - Applied Numerical Mathematics (3)
  - MAS5145 - Advanced Linear Algebra and Matrix Theory (3)
  - MAT5712 - Scientific Computing (3)

Restricted Elective Sequences
6 Total Credits

- Complete 1 of the following
  - After the completion of the core courses, the program requires all students to complete one of the following two-semester sequences. The following shows examples of acceptable sequences using current courses. We expect that other sequences will be developed as our program grows. Note that some sequences consist of a core course plus one elective, while others consist of two electives. Thus, the credit hours in this requirement are variable (3 to 6 credit hours).
  - Complete the following:
    - MAA6405 - Complex Variables (3)
    - MAA6404 - Complex Analysis (3)
  - Complete the following:
    - MAD5205 - Graph Theory I (3)
    - MAD6309 - Graph Theory II (3)
  - Complete the following:
    - MAP5336 - Ordinary Differential Equations and Applications (3)
    - MAP6356 - Partial Differential Equations (3)
  - Complete the following:

        - MAA6306 - Real Analysis (3)
        - MAA6506 - Functional Analysis (3)
    - Complete the following:
        - MAA6238 - Measure and Probability I (3)
        - MAA6245 - Measure and Probability II (3)
    - Complete the following:
        - MAP6111 - Mathematical Statistics (3)
        - MAA7239 - Asymptotic Methods in Mathematical Statistics (3)
    - Complete the following:
        - MAS5311 - Algebra I (3)
        - MAS6312 - Algebra II (3)
    - Complete the following:
        - MTG5256 - Differential Geometry (3)
        - MTG6345 - Algebraic Topology (3)
    - Complete the following:
        - MAP6197 - Mathematical Introduction to Deep Learning (3)
        - MAP6195 - Mathematical Foundations for Massive Data Modeling and Analysis (3)

Unrestricted Electives
6 Total Credits

- Earn at least 6 credits from the following types of courses:
  Unrestricted electives should be chosen in consultation with the graduate program director or the student's thesis adviser and may be chosen from the suggested options: Approximation Theory, Applied and Computational Harmonic Analysis, Big Data and Mathematical Statistics, Combinatorics and Graph Theory, Commutative Algebra and Algebraic Geometry, Control and Optimization, Differential and Symplectic Geometry, Fluid and Plasma Dynamics, Functional Analysis, Inverse and Ill-posed Problems, Mathematical Biology, Mathematical Finance, Nonlinear Waves and Nonlinear Dynamics, Numerical Analysis, Orthogonal Polynomials, Partial Differential Equations, Probability and Stochastic Analysis, and Tomography and Medical Imaging. A list of courses for these elective options can be obtained from the graduate program director. Approved graduate courses outside the department may also be used.

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following
  Thesis Option
    - Earn at least 6 credits from the following types of courses:
      MAP 6971 - Thesis n this option, the MS degree requires a total of at least 30 credit hours comprised of at least 24 credit hours of course work and 6 credit hours of thesis. This includes the 15 credit hours of the core courses and 3-6 credit hours of a two-course sequence. No more than 6 credit hours of independent study or directed research may be credited toward the degree. It is strongly recommended that the student select a thesis adviser and establish a program of study by the completion of the core courses. With the help of a thesis adviser, the student will form a thesis committee of three members, of which at least two must be from the Department of Mathematics. It is recommended that the thesis topic have potential for industrial applications. An oral defense of the thesis will be required.
      Nonthesis Option
    - Earn at least 6 credits from the following types of courses:
      Nonthesis students will take an additional 6 credit hours of electives. The electives should be chosen in consultation with the graduate program director. Nonthesis students will receive independent learning experiences by taking one of the two-semester sequences, where they apply mathematical principles to independent projects. Other courses that also have substantial research projects include MAP 5117 - Mathematical Modeling, MAT 5712 - Scientific Computing and MAP 6111 - Mathematical Statistics, MAP 6195, MAP 6197, and may be taken as electives. No more than 3 credit hours of independent study may be credited toward the degree. It is strongly recommended that the student select an academic adviser and establish a program of study by the completion of the core courses. In addition, the nonthesis student must pass a comprehensive written examination (by passing the qualifying/comprehensive examination at or above the MS level) based on the core courses. Two attempts at the examination are permitted.

Independent Learning
0 Total Credits

- In the Mathematical Science MS program, the thesis option provides an independent learning experience through directed research, reading published research papers, and writing and defending the thesis. The nonthesis option requires students to take one of the two-semester sequences, where they apply mathematical principles to independent projects.

Grand Total Credits: **30**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. Track Description

The Financial Mathematics track in the Mathematical Science MS program prepares graduate students to pursue careers in the finance industry by providing them with high quality professional training in of mathematics applicable to finance.

This track has three components: training in the necessary mathematics to pursue a career in financial mathematics, professional training in financial mathematics, and a required experiential component.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

Working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), proficiency in a modern computer language, elementary probability, and statistics.

The following courses are required as prerequisites to this track: Calculus with Analytic Geometry I, II, and III; Differential Equations; Linear and Matrix Algebra (or a course equivalent); proficiency in a computer language; Elementary Probability and Statistics. A summer program of two courses, which cannot be used as part of the program of study for this degree, is available for students who have deficiencies in these prerequisite areas.

Degree Requirements

Required Courses
21 Total Credits

- Complete the following:
  - MAP5606 - Differential Equations for Financial Mathematics (3)
  - MAP5612 - Computational Methods for Financial Mathematics I (3)
  - MAP5641 - Financial Mathematics I (3)
  - MAP5931 - Proseminar for Financial Mathematics (1)
  - MAP5933 - Seminar in Financial Mathematics (2)
  - MAP6616 - Computational Methods for Financial Mathematics II (3)
  - MAP6642 - Financial Mathematics II (3)
  - MAP6646 - Risk Management for Financial Mathematics (3)

Restricted Electives
6 Total Credits

- Complete at least 2 of the following:
  - FIN6406 - Strategic Financial Management (3)
  - FIN6515 - Analysis of Investment Opportunities (3)
  - MAP6207 - Optimization Theory (3)
  - STA6857 - Applied Time Series Analysis (3)
  - STA5703 - Data Mining Methodology I (3)
  - STA5825 - Stochastic Processes and Applied Probability Theory (3)

Experiential Requirement
3 Total Credits

- Earn at least 3 credits from the following types of courses:
  Students will demonstrate experience in the application of mathematics to industrial problems. This demonstration can be accomplished either through the satisfactory completion of an internship in financial mathematics (MAP 6946), or through satisfactory performance at an approved external/internal workshop in financial mathematics (MAP 6946). Students are required as part of the experiential requirement to deliver an oral presentation on the experience. Students are very strongly encouraged to fulfill this requirement through an internship experience.

Grand Total Credits: **30**

Track Details

The Financial Mathematics program consists of 30 credit hours of courses and internship. Students will work with an adviser to design a program of study, which will be presented to the program director for approval. If a student has an industrial sponsor, the student's program of study will be developed in consultation with a representative from the student's sponsoring company. Students are expected to obtain hands-on experience. The capstone requirement for this track is fulfilled by students completing an experiential learning requirement (3 credit hours). At least one-half of the program courses must be taken at the 6000 level.

Program Description

The Mathematics PhD program prepares students with a broad base in pure, applied and industrial mathematics.

The Doctor of Philosophy degree in Mathematics is intended to provide a broad base in applied and industrial mathematics. The goal of the program is to produce students who will attain distinction in their fields of research. In order to achieve this, the program has required core courses as well as a set of electives providing cross-disciplinary subjects.

Students in the program can specialize in one of many aspects of mathematics, including Approximation Theory, Applied and Computational Harmonic Analysis, Big Data and Mathematical Statistics, Combinatorics and Graph Theory, Commutative Algebra and Algebraic Geometry, Control and Optimization, Differential and Symplectic Geometry, Fluid and Plasma Dynamics, Functional Analysis, Inverse and Ill-posed Problems, Mathematical Biology, Mathematical Finance, Nonlinear Waves and Nonlinear Dynamics, Numerical Analysis, Orthogonal Polynomials, Partial Differential Equations, Probability and Stochastic Analysis, and Tomography and Medical Imaging. Responding to this wide variety of interests, the program offers flexibility in the composition of the core courses as well as the candidacy examination. The program is comprehensive with opportunities for students to pursue research in a variety of disciplines.

This degree has 1 track: Financial Mathematics Track. Please scroll to the bottom of this page for further details on this Track.

The Mathematics PhD program consists of at least 75 credit hours of course work beyond the bachelor's degree, of which a minimum of 39 hours of formal course work, exclusive of independent study, and 15 credit hours of dissertation research (7980) are required. The program requires 18 credit hours of core courses, and 6 to 12 credit hours in two 2-semester sequences.

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Bachelor's degree in related field.

Students entering the graduate program with regular status are assumed to have a working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), and maturity in the language of advanced calculus (at the level of MAA 4226).

Degree Requirements

Required Courses
18 Total Credits

- Complete all of the following
  - All students are required to complete the following courses with grade of "B" or better.
  - Complete the following:
    - MAA5237 - Mathematical Analysis (3)
    - MAT5712 - Scientific Computing (3)
    - MAS5145 - Advanced Linear Algebra and Matrix Theory (3)
    - MAP6385 - Applied Numerical Mathematics (3)
    - MAA6306 - Real Analysis (3)
  - Complete at least 1 of the following:
    - MAA6405 - Complex Variables (3)
    - MAP5336 - Ordinary Differential Equations and Applications (3)
    - MAA6506 - Functional Analysis (3)
    - MAP6111 - Mathematical Statistics (3)

Restricted Electives
12 Total Credits

- Complete 2 of the following
  - All students are required to complete two 2-semester sequences. Sequences are pairs of related courses that give

advanced knowledge in an area of mathematics. Each sequence must be approved by the dissertation adviser, dissertation committee, and the graduate program director. The following shows examples of acceptable sequences using current courses. We expect that other sequences will be developed as our program grows. Note that some sequences consist of a core course plus one elective, while others consist of two electives. Thus, the credit hours in this requirement are variable (6 to 12 credit hours). A written examination on two such sequences will be required as part of the candidacy examination (see more details in Candidacy Examination section

- Complete the following:
  - MAA6405 - Complex Variables (3)
  - MAA6404 - Complex Analysis (3)
- Complete the following:
  - MAD5205 - Graph Theory I (3)
  - MAD5205 - Graph Theory I (3)
- Complete the following:
  - MAP5336 - Ordinary Differential Equations and Applications (3)
  - MAP6356 - Partial Differential Equations (3)
- Complete the following:
  - MAA6238 - Measure and Probability I (3)
  - MAA6245 - Measure and Probability II (3)
- Complete the following:
  - MAP6111 - Mathematical Statistics (3)
  - MAA7239 - Asymptotic Methods in Mathematical Statistics (3)
- Complete the following:
  - MAA6306 - Real Analysis (3)
  - MAA6506 - Functional Analysis (3)
- Complete the following:
  - MAS5311 - Algebra I (3)
  - MAS6312 - Algebra II (3)
- Complete the following:
  - MAP6195 - Mathematical Foundations for Massive Data Modeling and Analysis (3)
  - MAP6197 - Mathematical Introduction to Deep Learning (3)
- Complete the following:
  - MTG5256 - Differential Geometry (3)
  - MTG6345 - Algebraic Topology (3)

Unrestricted Electives
30 Total Credits

- Earn at least 30 credits from the following types of courses:
  Electives are chosen in consultation with the student's advisory committee and may be chosen from the suggested options: Discrete Mathematics, General Applied Mathematics, Mathematical Computer Tomography, Image Processing and Computer Graphics, Mathematical Finance, Mathematical Physics, Pure Mathematics, and Mathematical Statistics. A list of elective course options can be obtained from the graduate program director. Courses taken outside the Mathematics department must be approved by the adviser and graduate program director. These courses are selected in consultation with the student's advisory committee.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  XXXX 7980 Dissertation Research 15 Credit Hours (minimum)

Examinations
0 Total Credits
No Rules
Qualifying Examination
0 Total Credits

- The qualifying/comprehensive examination is based on the core course work (MAA 5237 and MAS 5145 - Advanced Linear Algebra and Matrix Theory). To continue in the PhD program students must pass the examination at the PhD level. Two attempts are permitted. The examination will be administered twice a year: one in the Fall semester and the other in the Spring semester. To take the examination, students must have earned a "B" or better in each core course, must have a minimum grade point average of 3.0 (out of 4.0) in the program, or must obtain permission from the graduate program director. Students will normally take the examination after taking the core courses MAA 5237 and MAS 5145, and are expected to have passed it by the end of the second year of study unless a written request for a postponement has been approved by the Graduate Committee at least two months before the examination date. The student must pass the Qualifying Examination in at most two attempts. It is strongly recommended that the student select a dissertation adviser by the completion of 18 credit hours of course work, and it is strongly recommended that the student works with the dissertation adviser to form a dissertation committee within two semesters of passing the Qualifying Examination.

Candidacy Examination
0 Total Credits

- The Candidacy Examination consists of a written examination based on the materials from two of the selected two-semester sequence courses taken by the students beyond the core courses on Mathematical Analysis and Advanced Linear Algebra (MAA 5237, MAS 5145). A committee formed or selected by the Graduate Committee or the graduate program director is responsible for preparing and grading the written examinations. After passing the candidacy examination and meeting other requirements, the student can register for Doctoral Dissertation (MAP 7980 or MAA 7980). A minimum of 15 Doctoral Dissertation credit hours are required. The Candidacy Examination can be attempted after passing the qualifying examination. The Candidacy Examination must be completed within three years after passing the qualifying examination. A student must successfully pass the Candidacy Examination within at most two attempts.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Completion of all course work, except for dissertation hours. Successful completion of the candidacy examination. The dissertation advisory committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study.

Dissertation
0 Total Credits
No Rules
Dissertation Proposal Examination
0 Total Credits

- After passing the candidacy examination, the student will prepare a dissertation proposal and orally present it to the dissertation advisory committee for approval. The proposal will include a description of the research performed to date and an agenda for the research planned to be completed for the dissertation. In addition to standards of correctness, indicating a suitable level of mastery of the material of the area of the dissertation, and suitability of the proposed dissertation topic, the presentation must meet current standards for professional presentations within the discipline of mathematics. For the successful completion of the Dissertation Proposal Examination the presentation must be judged as passing the requirements for the examination by the majority of the dissertation committee. This exam must be passed within 18 months of passing the candidacy examination and not later than the end of the sixth year of graduate study. A candidate must pass this examination within at most two attempts.

Dissertation Defense
0 Total Credits

- Upon completion of a student's research, the student's committee schedules an oral defense of the dissertation. Most students complete the program within five years after obtaining their bachelor's degree. Students are expected to complete the dissertation in no more than seven years from the date of admission to the program.

Independent Learning
0 Total Credits

- The required 15 credit hours of dissertation will provide ample opportunities for students to gain the independent learning experience through studying published research papers and deriving, on their own, new and meaningful research results.

Grand Total Credits: **75**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

The department offers over 20 Graduate Teaching Assistantships every year on a competitive basis. A few Graduate Research Assistantships are also available for qualified students.

Track Description

The Financial Mathematics track in the Mathematics PhD program is designed to prepare students for research and leadership positions in industry, government, non-governmental organizations, and academia requiring employment of financial mathematics.

The Mathematics PhD program consists of at least 75 credit hours of course work beyond the bachelor's degree, of which a minimum of 48 hours of formal course work, exclusive of independent study, are required. The program requires 36 credit hours of core courses and 15 credit hours of dissertation research (7980).

Total Credit Hours Required: 75 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

Bachelor's degree in related field.

Students entering the graduate program with regular status are assumed to have a working knowledge of undergraduate calculus, differential equations, linear algebra (or matrix theory), boundary value problems, statistics, computer programming, and maturity in the language of advanced calculus (at the level of MAA 4226).

Degree Requirements

Required Courses
36 Total Credits

- Complete all of the following
  - All students are required to complete the following courses with grade of "B" or better.
  - Complete the following:
    - MAA5237 - Mathematical Analysis (3)
    - MAS5145 - Advanced Linear Algebra and Matrix Theory (3)
    - MAP5641 - Financial Mathematics I (3)
    - MAP6642 - Financial Mathematics II (3)
    - MAP5612 - Computational Methods for Financial Mathematics I (3)
    - MAP6616 - Computational Methods for Financial Mathematics II (3)
    - MAP6646 - Risk Management for Financial Mathematics (3)
    - MAP5606 - Differential Equations for Financial Mathematics (3)
    - MAP6195 - Mathematical Foundations for Massive Data Modeling and Analysis (3)
    - MAP6207 - Optimization Theory (3)
    - STA6857 - Applied Time Series Analysis (3)
    - MAP5931 - Proseminar for Financial Mathematics (1)
    - MAP5933 - Seminar in Financial Mathematics (2)
  - The remaining credit hours consist of additional dissertation research (7980 or 7919), at least 15 credit hours of regular classroom elective courses, and at most 12 credit hours of independent study or independent directed research. Students who pass the qualifying examination may substitute some of the core courses with the approval of the adviser and the graduate program director.

Elective Courses
24 Total Credits

- Earn at least 24 credits from the following types of courses:
  Elective courses require the approval of the adviser and the graduate program director; up to 12 credit hours of elective courses may be taken outside the department. At least one-half of the program courses must be taken at the 6000 level. At least 12 hours of elective course work must be formal course work, exclusive of independent study. Electives are chosen in consultation with the student's advisory committee and may be chosen from the suggested options: Discrete Mathematics, General Applied Mathematics, Mathematical Computer Tomography, Image Processing and Computer Graphics, Mathematical Finance, Mathematical Physics, Pure Mathematics, Data Science, and Mathematical Statistics. A list of elective course options can be obtained from the graduate program director. Courses that are taken outside the Mathematics department must be approved by both the adviser and graduate program director. These courses are selected in consultation with the student's advisory committee.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  MAP 7980 - Dissertation Research 15 Credit Hours (minimum) After passing the candidacy examination and meeting the other requirements that are required for admission to candidacy, the student can register for Doctoral Dissertation (MAP 7980). A minimum of 15 Doctoral Dissertation credit hours are required for the degree.

Examinations

Program Description

The School of Politics, Security and International Affairs, the School of Public Administration, and the Department of Computer Science, offer a Graduate Certificate in Network Analysis and Applications that consists of 12 credit hours at the graduate level. Upon completing the certificate, students will be able to analyze networks either via pre-determined network analysis programs, by implementing the analysis via packages available in libraries in a suitable programming language, or by programming the analysis from scratch.

The Graduate Certificate in Network Analysis and Applications consists of 12 credit hours at the graduate level. Of these, 3 credit-hours are acquired via the core-course, 6 credit hours must be chosen from the list of restricted electives (see below). 3 additional credit hours are elective courses that can include a) one more of the courses listed as restricted electives; b) another elective course to be approved by the program advisor; c) independent studies with an affiliated faculty member to be chosen with approval from the program advisor and the selected faculty member.

Program Description

The University of Central Florida offers a Master of Science in Physics. Research opportunities are available in condensed matter physics, nanostructure devices, surface science, optical physics, complex systems, biophysics, atomic and molecular physics, physics education and planetary/space science.

This degree has 1 track: Planetary Sciences Track. Please scroll to the bottom of this page for further details on this Track.

The Physics MS program requires a minimum of 30 credit hours beyond the bachelor's degree and offers students a thesis and nonthesis option. All students take 12 credit hours of core courses, and then the remaining 18 credit hours consist of both electives and thesis or directed research according to the option chosen.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

The Master of Science in Physics program is flexibly designed to prepare students for the widest possible range of industrial careers or for further study at the doctoral level.

Program Prerequisites

Students entering the Physics graduate program with regular status are normally expected to have completed coursework generally required for a bachelor's degree in physics, including classical mechanics, electricity and magnetism, thermal and statistical physics, and quantum mechanics.

Degree Requirements

Required Courses
12 Total Credits

- Complete the following:
    - PHY5606 - Quantum Mechanics I (3)
    - PHY5346 - Electrodynamics I (3)
    - PHY5524 - Statistical Physics (3)
    - PHY6246 - Classical Mechanics (3)

Elective Courses
12 Total Credits

- Complete 1 of the following
    - Both thesis and nonthesis students take electives in consultation with their advisers. Out of the 18 elective credit hours at least 12 credit hours of formal course work are required and not more than 6 credit hours of 5000-level elective courses are counted toward the degree. At least 6 credit hours of thesis or 3 credit hours of directed research for the nonthesis option are required. Otherwise, elective selection is intended to be very flexible to meet student needs and interests. Electives may be chosen following one of the suggested specializations below, or a different program of study may be followed with academic adviser approval.
      Materials Physics Specialization
    - Complete all of the following
        - Earn at least 12 credits from the following:
            - PHY6624 - Quantum Mechanics II (3)
            - PHY6347 - Electrodynamics II (3)
            - PHZ6426 - Condensed Matter Physics I (3)
            - PHZ6428 - Condensed Matter Physics II (3)
            - PHZ5505 - Plasma Physics (3)
            - PHZ5432 - Introduction to Soft Condensed Matter Physics (3)
            - PHY5715 - Physical Basis of Life (3)
            - PHY5933 - Selected topics in biophysics of macromolecules (3)

- PHZ6420 - First Principles Computational Methods in Condensed Matter Physics (3)
- PHY6938 - Special Topics (3)
- EEE5356C - Fabrication of Solid-State Devices (4)

- Other graduate courses from Physics, Math, Optics, Materials Science, Engineering require approval by the student's adviser and the Graduate Program Director.

Optical Physics Specialization

- Complete all of the following
  - Earn at least 12 credits from the following:
    - PHY6624 - Quantum Mechanics II (3)
    - PHY6347 - Electrodynamics II (3)
    - PHY6938 - Special Topics (3)
    - OSE6111 - Optical Wave Propagation (3)
    - OSE5115 - Interference and Diffraction (3)
    - OSE6526C - Laser Engineering Laboratory (3)
    - OSE6455C - Photonics Laboratory (3)
    - OSE6347 - Quantum Optics (3)
    - OSE5312 - Light Matter Interaction (3)
  - Other graduate courses from Physics, Math, Optics, Materials Science, Engineering require approval by the student's adviser and the Graduate Program Director

Space Physics Specialization

- Complete all of the following
  - Earn at least 12 credits from the following:
    - PHY6624 - Quantum Mechanics II (3)
    - PHY6347 - Electrodynamics II (3)
    - PHZ5505 - Plasma Physics (3)
    - AST5334 - Extrasolar Planets and Brown Dwarfs (3)
    - EAS5315 - Rocket Propulsion (3)
    - EAS6405 - Advanced Flight Dynamics (3)
    - EAS6507 - Topics of Astrodynamics (3)
    - OSE5041 - Introduction to Wave Optics (3)
    - EEL5820 - Image Processing (3)
  - Other graduate courses from Physics, Math, Optics, Materials Science, Engineering require approval by the student's adviser and the Graduate Program Director.

Theory/Computational Physics Specialization

- Complete all of the following
  - Earn at least 12 credits from the following:
    - PHY6624 - Quantum Mechanics II (3)
    - PHY6347 - Electrodynamics II (3)
    - PHZ6420 - First Principles Computational Methods in Condensed Matter Physics (3)
    - PHY6938 - Special Topics (3)
    - PHZ6426 - Condensed Matter Physics I (3)
    - PHZ6428 - Condensed Matter Physics II (3)
    - PHY6667 - Quantum Field Theory I (3)
    - PHY7669 - Quantum Field Theory II (3)
    - PHZ5505 - Plasma Physics (3)
    - OSE6347 - Quantum Optics (3)
    - OSE5312 - Light Matter Interaction (3)
  - Other graduate courses from Physics, Math, Optics, Materials Science, Engineering require approval by the student's adviser and the Graduate Program Director.

Thesis/Nonthesis Option
6 Total Credits

- Complete 1 of the following

Thesis Option

- Earn at least 6 credits from the following types of courses:

PHY 6971 - Thesis Students who choose the thesis option are required to conduct a program of original scientific research or some investigation involving a creative element and to submit a written thesis detailing these investigations. An oral defense and examination of the thesis is required. These six credit hours count towards the 18 hours of required electives for the degree (12 required hours as specified above). An exit interview conducted by the Graduate Program Director is required after passing the thesis defense.

Nonthesis Option

- Complete all of the following
  - Nonthesis students are required to take 15 total credit hours of electives from the list of elective specializations shown above (12 required for all students, 3 additional for Nonthesis). In addition, they must take a minimum of 3 credit hours of directed research. The three credit hours of directed research count towards the 18 hours of required electives for the degree. In the directed research course, students work on a research project under the supervision of a faculty member and are required to present a final report as well as a written comprehensive exit examination*. The Graduate Program Director will arrange this exam. The exit exam is followed by an exit interview.
  - Earn at least 3 credits from the following types of courses:

Additional Elective Course from their specialization

- Earn at least 3 credits from the following:
  - PHY6918 - Directed Research (1 - 99)
- *Note: When applicable, students in the non-thesis MS degree program may request the Graduate Program Director's approval to satisfy the MS exit exam and final report with the completion of the Physics PhD written candidacy exam.

Independent Learning
0 Total Credits

- Students pursuing a nonthesis master's degree must take at least one directed research course as part of their elective work. In this course, students will work on a research project under the supervision of a faculty member and present a final report.

Grand Total Credits: **30**

Track Description

The goal of the Planetary Sciences Track of the Physics MS program is to foster a vibrant Planetary Science research environment that can attract top students, researchers, and faculty and contribute significantly to the exploration of space. The Planetary Sciences track is designed to prepare students to be competitive in the global planetary sciences research community.

The Planetary Sciences track of the Physics MS program requires a minimum of 33 hours of graduate course work as directed by the student's Supervisory Committee. This must include at least 15 credit hours of required courses, 6 hours of thesis preparation, with the remainder being elective courses and directed research chosen in consultation with the Supervisory Committee. At least half of the total credits must be at the 6000 level. No more than 6 hours of independent study may be credited toward the master's degree. The master's degree in Planetary Sciences includes a thesis and its defense. There is no nonthesis master's degree in the Planetary Sciences track.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

A bachelor's degree in a closely related science field such as physics, chemistry, geology, geophysics, geochemistry, atmospheric sciences biology, mathematics or planetary sciences.

Degree Requirements

Required Courses
15 Total Credits

- Complete all of the following
  - The core is designed to give students a broad foundation in the planetary sciences and rapid training in the data analysis techniques that will be necessary for successful research and publications. Students choose 5 out of the 6 core courses listed below:
  - Complete at least 5 of the following:
    - AST5151 - Physics of Planetary Processes (3)
    - PHY6246 - Classical Mechanics (3)
    - AST5765C - Advanced Astronomical Data Analysis (3)
    - AST5263 - Advanced Observational Astronomy (3)
    - AST5154 - Advanced Planetary Geophysics (3)
    - AST6165 - Planetary Atmospheres (3)

Elective Courses
12 Total Credits

- Complete all of the following
  - Students may enroll in elective formal courses relevant to their program, as approved by their Supervisory Committees. Suggestions include:
  - Earn at least 12 credits from the following:
    - AST5145 - Advanced Asteroids, Comets, and Meteorites (3)
    - AST5334 - Extrasolar Planets and Brown Dwarfs (3)
    - PHY5937 - Special Topics (3)
    - AST6112 - Origin and Evolution of Planetary Systems (3)
    - AST6156 - Current Topics in Planetary Sciences (3)

Thesis
6 Total Credits

- Earn at least 6 credits from the following types of courses:
  AST or PHY 6971 - Thesis

Supervisory Committee
0 Total Credits

- Within the first half-semester of admission to the Planetary Sciences Track, each student must select, by mutual agreement, a faculty adviser and at least two other faculty members to serve on his or her Supervisory Committee. UCF graduate faculty and self-funded research scientists who are Graduate Faculty Scholars are eligible to serve on Supervisory Committees. Creation of and changes in the membership of a Supervisory Committee must be approved by the Planetary Sciences Graduate Committee. The adviser is expected to meet regularly with the student. The full committee shall meet with the student at least once per year to review and make recommendations regarding the student's academic progress.

Master's Defense
0 Total Credits

- The written thesis and oral defense is the final requirement for the master's degree. The thesis is a journal-level research paper. The oral defense is in two parts: (1) A public presentation of the research contained in the paper; and (2) private questioning on the detail of the presented research as well as the topics covered in the student's preparation and coursework. The written and oral components will be administrated by the student's Supervisory Committee.

Independent Learning
0 Total Credits

- A thesis is required in this program.

Grand Total Credits: **33**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Program Description

The Physics doctoral program offers research opportunities in condensed matter physics, physics of nanostructured devices, surface science, optical physics, complex systems, biophysics, atomic and molecular physics, physics education and planetary/space science. The program intends to provide a broad base in experimental and theoretical physics.

The rules and recommendations below do not apply to the Planetary Sciences track of the Physics PhD program. Please scroll to the bottom of this page for further details on this Track.

The Physics PhD program requires a total of 72 credit hours beyond the bachelor’s degree for completion. A specific set of six required core courses (18 credit hours), thirteen elective courses (39 credit hours, which may include directed research), and a minimum of 15 credit hours of dissertation are part of the 72 hours.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree. 42 Credit Hours Minimum beyond the Master's Degree.

Program Prerequisites

Students entering the Physics graduate program with regular status are normally expected to have completed course work generally required for a bachelor's degree in physics, including classical mechanics, electricity and magnetism, thermal and statistical physics, and quantum mechanics.

Degree Requirements

Required Core Courses
18 Total Credits

- Complete the following:
  - PHY5606 - Quantum Mechanics I (3)
  - PHY6624 - Quantum Mechanics II (3)
  - PHY5346 - Electrodynamics I (3)
  - PHY6347 - Electrodynamics II (3)
  - PHY5524 - Statistical Physics (3)
  - PHY6246 - Classical Mechanics (3)

Elective Courses
39 Total Credits

- Methods Course - 3 Credit Hours Formal Course - 9 Credits Hours Remaining Electives - 27 Hours

Methods Course
3 Total Credits

- Complete at least 1 of the following:
  - PHZ5156 - Computational Physics (3)
  - AST5765C - Advanced Astronomical Data Analysis (3)
  - PHY5937 - Special Topics (3)

Formal Courses
9 Total Credits

- Complete 1 of the following
  - Students must complete three formal courses (9 credit hours) from the "List of Specialization Courses". General Physics Specialization
  - Complete all of the following
    - The General Physics Specialization emphasizes strong preparation in physics fundamentals. It is intended to prepare students for careers in theoretical physics or teaching at the college level. Several active research programs exist in the department to accommodate such students.
    - Complete at least 3 of the following:
      - COT5600 - Quantum Computing (3)
      - PHY5933 - Selected topics in biophysics of macromolecules (3)
      - PHZ5156 - Computational Physics (3)
      - PHZ5405 - Condensed Matter Physics (3)
      - PHZ6426 - Condensed Matter Physics I (3)
      - PHZ6428 - Condensed Matter Physics II (3)
      - PHY6667 - Quantum Field Theory I (3)
      - PHY7669 - Quantum Field Theory II (3)
      - PHZ5505 - Plasma Physics (3)
      - PHZ5304 - Nuclear and Particle Physics (3)
      - PHZ6234 - Atomic Physics (3)
      - PHZ6420 - First Principles Computational Methods in Condensed Matter Physics (3)
      - PHY6600C - Theory and Computations of Molecular Wavefunctions (3)
      - PHY6938 - Special Topics (3)
      - OSE5312 - Light Matter Interaction (3)
      - OSE6347 - Quantum Optics (3)

- PHY 7919 - Doctoral Directed Research may also be used

Condensed Matter Physics Specialization

- Complete all of the following
  - The Condensed Matter Physics Specialization is intended to prepare students for careers in materials physics, nanoscale science and technology, semiconductors, and soft condensed matter physics. It emphasizes strong experimental preparation with hands-on courses in advanced materials characterization and processing instrumentation. Related research programs at UCF include magnetic nanostructures, soft condensed matter, electronic and optoelectronic devices, and nanoscale characterization.
  - Complete at least 3 of the following:
    - PHZ5405 - Condensed Matter Physics (3)
    - PHZ6426 - Condensed Matter Physics I (3)
    - PHZ6428 - Condensed Matter Physics II (3)
    - PHZ5156 - Computational Physics (3)
    - PHZ6420 - First Principles Computational Methods in Condensed Matter Physics (3)
    - PHZ5432 - Introduction to Soft Condensed Matter Physics (3)
    - PHY5933 - Selected topics in biophysics of macromolecules (3)
    - PHY6667 - Quantum Field Theory I (3)
    - PHY7669 - Quantum Field Theory II (3)
    - COT5600 - Quantum Computing (3)
    - PHY6938 - Special Topics (3)

Optical Physics Specialization

- Complete all of the following
  - The Optics Specialization coordinator is David Hagan, PhD, College of Optics and Photonics.
  - Complete at least 1 of the following:
    - OSE6111 - Optical Wave Propagation (3)
    - OSE5115 - Interference and Diffraction (3)
  - Complete at least 1 of the following:
    - OSE6526C - Laser Engineering Laboratory (3)
    - OSE6455C - Photonics Laboratory (3)
  - Earn at least 3 credits from the following types of courses:
    The remaining courses (up to three) may be selected from other graduate courses in Optics (see https://creol.ucf.edu/academics/courses/).

Remaining Electives
27 Total Credits

- Earn at least 27 credits from the following types of courses:
  Students must complete 27 credit hours of unrestricted electives, which may consist of formal courses, directed research, and/or doctoral research hours. Students should consult with their adviser about selections for the remaining unrestricted electives.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  PHY 7980 - Dissertation Research All students must complete a minimum of 15 credit hours of dissertation prepared in consultation with a dissertation adviser. A fifteen-page written proposal is presented orally to the student's dissertation committee by the summer of the student's third year in the doctoral program, after successful completion of the written candidacy exam requirement. The Department Chair may grant extensions for documented exceptional reasons. The final oral defense of the dissertation is administered by the student's dissertation committee following completion of a written dissertation describing the student's research.

Seminar Attendance
0 Total Credits

- Students in their fourth semester and beyond will be required to attend a major fraction of seminars and colloquia hosted by the Physics Department, as well as to make an annual presentation of their research work or independent study.

Examinations
0 Total Credits

- Details

Placement Exam
0 Total Credits

- All incoming Physics PhD students will be required to take a diagnostic test like the Physics subject GRE. This test has placement purposes only, allowing the Graduate Program Director and academic adviser to identify possible weaknesses in the student's background and help devise a suitable plan of study. There is no passing or failure.

Candidacy Exam
0 Total Credits

- The candidacy exam consists of two parts. Part 1 is a written exam covering 4 subjects: Quantum Mechanics,

Electromagnetism, Statistical Physics, and Classical Mechanics. Students are expected to show mastering of these topics at or above the undergraduate level. The written candidacy exam is offered at least twice per year. The exam is offered over four separate days: one subject per day. Students will be allowed to attempt each subject within two years of joining the PhD program. After passing the written exam, the student should identify a research supervisor and a dissertation committee must be put in place with the approval of the graduate program director. Part 2 is an oral exam that combines an examination of the student's command of Physics and a written dissertation proposal. The oral exam should be completed by the summer of the student's third year in the doctoral program. The Department Chair may grant extensions for documented exceptional reasons.

Admission to Candidacy
0 Total Credits

- The following are required to obtain candidacy status and enroll in dissertation hours: Students must complete the majority of all course work prior to entering Candidacy Status. This includes: 18 Credit hours of Required Core Courses, 3 credit hours of a Methods course, 9 credit hours of Formal coursework, and 27 credit hours of Remaining Electives. Students can have no more than 6 credit hours of remaining coursework (outside of Dissertation hours) when applying for Candidacy. Successful completion of both part I (written exam) and part II (oral exam) of the candidacy exam. The dissertation advisory committee is formed, consisting of a chair, approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study. Completion of CITI and RCR Workshops

Independent Learning
0 Total Credits

- The Physics PhD program requires a doctoral dissertation. This will provide ample opportunities for students to gain independent learning experience through studying published research papers, conducting research, and presenting their results in conferences and in peer-reviewed scientific journals.

Grand Total Credits: **72**

Track Description

The goal of the Planetary Sciences Track of the Physics PhD program is to foster a vibrant Planetary Science research environment that can attract top students, researchers, and faculty and contribute significantly to the exploration of space. The Planetary Sciences track is designed to prepare students to be competitive in the global planetary sciences research community.

Total Credit Hours Required: 72 Credit Hours Minimum beyond the Bachelor's Degree. 42 Credit Hours Minimum beyond the Master's Degree.

This includes completion of 6 required courses (18 credit hours), 5 elective courses (15 credit hours) of regular course work, and a minimum of 15 credit hours of dissertation. Courses must be selected so that at least 36 of the 72 hours are at 6000 level or higher. No more than 12 hours of independent study may be credited toward the PhD degree. The PhD includes a Candidacy Exam to be taken after the completion of the core and elective courses, a written dissertation, and a dissertation defense before the student's Supervisory Committee.

Track Prerequisites

Students entering the Planetary Sciences graduate track program with regular status are normally expected to have completed coursework generally required for a bachelor's degree in a closely related science field such as physics, astronomy, geology, geophysics, atmospheric sciences, chemistry, biology, mathematics or planetary sciences.

Degree Requirements

Required Courses
18 Total Credits

- Complete all of the following
  - The core is designed to give students a broad foundation in the planetary sciences and a rapid training in the data analysis techniques that will be necessary for a successful research and publications.
  - Complete the following:
    - AST5151 - Physics of Planetary Processes (3)
    - PHY6246 - Classical Mechanics (3)
    - AST5765C - Advanced Astronomical Data Analysis (3)
    - AST5263 - Advanced Observational Astronomy (3)
    - AST5154 - Advanced Planetary Geophysics (3)
    - AST6165 - Planetary Atmospheres (3)

Elective Courses
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  Students may enroll in elective formal courses relevant to their program, as approved by their Supervisory Committees. Suggestions include: AST 5145 - Advanced Asteroids, Comets, and Meteorites 3 Credit Hours AST 5334 - Extrasolar Planets and Brown Dwarfs 3 Credit Hours AST 5038 - Astrobiology 3 Credit Hours AST 6112 - Origin and Evolution of Planetary Systems 3 Credit Hours AST 6156 - Current Topics in Planetary Sciences 3 Credit Hours

Other Electives
24 Total Credits

- Earn at least 24 credits from the following types of courses:
  A range of graduate physics, chemistry, optical sciences, and mathematics courses useful for the student’s area of research can be taken as electives. Electives should be chosen with the advice and consent of the student’s advisor and Supervisory Committee.

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  AST or PHY 7980 - Dissertation

Supervisory Committee
0 Total Credits

- Within the first half-semester of admission to the Planetary Sciences Track, each student must select, by mutual agreement, a faculty adviser and at least two other faculty members to serve on the Supervisory Committee. UCF graduate faculty and UCF self-funded research scientists who are Graduate Faculty Scholars are eligible to serve on Supervisory Committees. Creation of and changes in the membership of a Supervisory Committee must be approved by the Planetary Sciences Graduate Committee. The adviser is expected to meet regularly with the student. The full committee shall meet with the student at least once per year to review and make recommendations regarding the student's academic progress.

Candidacy Examination

0 Total Credits

- The Planetary Sciences Track requires a Candidacy Exam to be taken after the completion of the core courses. This examination is composed of written and oral components. The written component is a journal-level research paper. The oral component has two parts: (1) A public presentation of the research contained in the paper, including the traditional question-and-answer period of a scientific presentation; and (2) private questioning on the detail of the presented research as well as the topics covered in the student's preparation, coursework and dissertation direction. The Supervisory Committee administers the Candidacy Examination.

Dissertation Advisory Committee
0 Total Credits

- After passing the Candidacy Examination, a non-UCF member shall be added to the Supervisory Committee by mutual agreement of the student and Supervisory Committee. This becomes the Dissertation Advisory Committee. The committee continues to meet with the student annually.

Dissertation Proposal
0 Total Credits

- The dissertation proposal may be presented immediately after the Candidacy Examination or in a separate meeting not more than one semester thereafter. Before substantial work is done on the dissertation, the Dissertation Advisory Committee must approve the proposal and must also assess whether additional coursework is necessary to begin the dissertation. Such coursework should be completed at the earliest opportunity.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: Completion of all required and formal elective course work, except for research hours. Successful completion of the Candidacy Examination. The Dissertation Advisory Committee is formed, consisting of approved graduate faculty and graduate faculty scholars. Submittal of an approved program of study. Completion of CITI and RCR Workshops.

Dissertation Defense
0 Total Credits

- The dissertation defense is the final requirement for the PhD. It consists of a public presentation of the dissertation, typically lasting 45-60 minutes including the traditional question-and-answer period of a scientific presentation, followed by private questioning by the Dissertation Advisory Committee.

Independent Learning
0 Total Credits

- A dissertation is required.

Grand Total Credits: **72**

Track Details

All courses must be selected in consultation with and with the approval of the Supervisory Committee (before candidacy) or Dissertation Advisory Committee (after candidacy).

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Program Description

The Master of Arts in Political Science program prepares students to enter positions in government and the private sector, advance their professional careers in a variety of fields including consultation, defense, environment, and philanthropy, and pursue more advanced graduate degrees such as a PhD in which the analytical ability to comprehend, influence, and respond to policies and initiatives is critical . The program also provides a well-rounded substantive curriculum for secondary school teachers seeking higher degrees and for teachers in community colleges. As such, the Master of Arts in Political Science program is designed to accommodate a range of professional and intellectual needs.

A Program of Study in the Master of Arts in Political Science consists of the following coursework. Students have the option of completing a thesis with 27 hours of coursework or choosing the nonthesis option with 33 hours of coursework.

Total Credit Hours Required: 33 Credit Hours Minimum beyond the Bachelor's Degree

Degree Requirements

Required Core Courses
12 Total Credits

- Complete all of the following
    - Complete the following:

        - POS6736 - Conduct of Political Inquiry (3)
        - POS6746 - Quantitative Methods in Political Research (3)
    - Complete at least 2 of the following:
        - CPO6091 - Seminar in Comparative Politics (3)
        - INR6007 - Seminar in International Politics (3)
        - POS6045 - Seminar in American National Politics (3)
        - POT6007 - Seminar in Political Theory (3)

Elective Courses
15 Total Credits

- Complete all of the following
    - Students will complete 15 hours of coursework at the 5000 or 6000 level. All 5000 or 6000 level courses offered by the SPSIA can be used to meet this requirement, with the exception of those courses used to complete core course requirements. Up to 6 credit hours of 5000 and 6000 level courses coursework from other departments/schools may also be used as electives with the prior approval of the MA program coordinator. Students may use up to 6 hours of independent study and up to 6 hours of internship credit for the elective credits requirement, but no more than 6 hours total can be from coursework outside the SPSIA, independent study, or internship credit.
    - Complete at least 5 of the following:
        - CPO6038 - Political Development (3)
        - CPO6058 - Revolution and Political Violence (3)
        - CPO6206 - Comparative Politics of Africa (3)
        - CPO6307 - Issues in Latin American Politics (3)
        - CPO6407 - Comparative Politics of the Middle East (3)
        - CPO6729 - Global Security in the Age of Migration (3)
        - INR6039 - International Political Economy (3)
        - INR6062 - Peace Studies (3)
        - INR6065 - Seminar on War (3)
        - INR6067 - Human Rights and Security (3)
        - INR6068 - Politics of Civil Wars (3)
        - INR6108 - Seminar in American Foreign Policy (3)
        - INR6136 - Seminar in American Security Policy (3)
        - INR6137 - Terrorism and Politics (3)
        - INR6257 - International Relations of Africa (3)
        - INR6275 - International Politics of the Middle East (3)
        - INR6339 - Strategic Warning Analysis (3)
        - INR6346 - Politics of International Terrorism (3)
        - INR6352 - Global Environmental Politics (3)
        - INR6356 - Environmental Security (3)
        - INR6365 - Seminar on Intelligence (3)
        - INR6366 - The Intelligence Community (3)
        - INR6726 - Political Behavior in International Conflict (3)
        - POS6207 - Political Behavior (3)
        - POS6415 - The American Presidency (3)
        - POS6427 - Congress and the Legislative Process (3)
        - POS6686 - National Security Law (3)
        - POS6729 - Political Network Analysis (3)
        - POS6743 - Geographic Tools for Political Science Research (3)
        - POS6747 - Advanced Topics in Quantitative Political Analysis (3)
        - POS6757 - Survey Design for Political Science Research (3)
        - Course Not Found
        - PUP6208 - Environmental Politics (3)
        - PUP6247 - Contemporary Issues in Environmental Politics (3)
        - Course Not Found
        - PUP6607 - Politics of Health (3)

Thesis\Nonthesis Option
6 Total Credits

- Complete 1 of the following

    Thesis Option
    - Earn at least 6 credits from the following types of courses:

    All MA students are automatically placed in the nonthesis option. Students wishing to write a thesis must get approval to do so. POS 6971 Thesis After completion of the required coursework and the passing of comprehensive exams, the student must have a thesis committee approved by the School of Politics, Security, and International Affairs (SPSIA)and Graduate Studies. The thesis committee consists of a chair and two other faculty members from the SPSIA who are members of the Graduate Faculty. On the approval of the thesis chair and Graduate Program Director, one of the committee members (but not the chair) may come from outside the SPSIA. When a thesis topic has been selected, students, in conjunction with their thesis committee, will develop a thesis proposal. Copies of the proposal will be sent to members of their thesis committee and a proposal hearing scheduled in the first semester the student enrolls for thesis hours. All students must pass a proposal hearing as well as a final oral defense of their thesis. Once enrolled in thesis hours, students should maintain continuous enrollment (3 credit hours) each semester up to and including the semester in which they defend the thesis. In addition to SPSIA guidelines for the thesis, students should also become

familiar with the UCF's requirements and deadlines for organizing and submitting the thesis.
Nonthesis Option

- Earn at least 6 credits from the following types of courses:
  The student must complete 6 additional credit hours of course electives in their respective areas. Thesis hours, if already taken, will not count for course credit for the 6 additional credit hours of coursework. Electives 6 Credit Hours Complete an independent research project/paper During the final semester of coursework, the student must have a nonthesis committee approved by the SPSIA and Graduate Studies. The nonthesis committee consists of a chair and one other faculty member from the SPSIA. On the approval of the thesis chair and Graduate Program Director, the committee member (but not the chair) may come from outside the SPSIA. The student must complete an approved article-length independent research paper. The project/paper must have a component of original, independent research; it cannot be a literature review or research design only. The project/paper can be a product of a graduate research seminar and/or independent study paper. The student will present their research publicly at a SPSIA or UCF research colloquium or another public academic forum such as an academic conference. The project/paper must be evaluated by the nonthesis committee and receive formal confirmation of completion from the committee, and the MA program coordinator. If the paper is to be presented at a SPSIA research colloquium, the student is responsible for scheduling the presentation in consultation with the nonthesis committee.

Comprehensive Examination
0 Total Credits

- All candidates for the MA degree must take a comprehensive written examination. The examination will be administered after satisfactory completion of the required course work and must be taken prior to enrollment in thesis hours. The exam is designed to demonstrate proficiency in research methods and will consist of two parts. Part I will involve the critique of an article from a political science journal. The article will be assigned by the SPSIA's Graduate Methods Committee in consultation with the student and where possible will be based on the student's substantive areas of interest. Part II will involve questions based on data analysis using either SPSS or STATA. The examination will be offered once semester. Dates will be set by the SPSIA. Students must register to take the exam at least six weeks prior to its scheduled date and take the exam within six months after they complete POS 6736 and POS 6746. Students not passing any part of the examination may take this part a second time within nine months on the dates that comprehensive exams are regularly scheduled. However, no student will be allowed to take the examination more than twice.

Equipment Fee
0 Total Credits

- Full-time students in the Political Science MA program pay a $39 equipment fee each semester that they are enrolled. Part-time students pay $19.50 per semester.

Grand Total Credits: **33**

Program Description

The Graduate Certificate in Research Smarts provides students with the essential skills and critical thinking needed by today's consumers of news and information.

Increasing one's Research Smarts will provide students with the practical skills and critical thinking necessary to produce and to consume findings, facts, and information with the assurance that it was arrived at systematically. These skills are not only useful in daily life, as we wade through the mass of news and information that comes our way, but also in private business, nonprofit organizations, government agencies, and other employment opportunities. Students seeking employment, those with jobs currently, or those working toward advancement can benefit from a critical examination of how knowledge is gained and which sources of information can be trusted. This is because nearly all employers value employees who are confident in their understanding and use of scientific research skills.

Students earning the Graduate Certificate in Research Smarts will acquire the following skills:

1. Be able to define knowledge, social science research, and research methods.
2. Summarize why understanding research methods is important.
3. Evaluate and describe each of the major steps taken to conduct research as well as the importance of each step.
4. Develop research questions and compare the different types of research questions.
5. Understand why ethics are an important consideration during research.
6. Understand a variety of ways to analyze data.
7. Understand the relationship between research methods and data analysis.
8. Be able to design a sound research project from developing the research question to collecting the data, to selecting the best analysis strategy to making strategic conclusions.
9. Use the above skills to critically assess news and information as well as evaluate the claims and assertions of others.

The Research Smarts Graduate Certificate consists of three required courses.

Total Credit Hours Required: 9 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Admission is open to those with a bachelor's degree from an accredited institution recognized by UCF and at least one statistics course or math course.

Program Description

The Graduate Certificate in SAS Data Mining is designed to provide students with the knowledge of using statistical, data presentation and data visualization tools needed for data mining with SAS/Enterprise Miner and SAS/Warehouse Administrator software.

The Graduate Certificate in SAS Data Mining provides students the knowledge to use statistical, data presentation, and data visualization tools needed for data mining with SAS/Enterprise Miner and SAS/Warehouse Administrator software. The program welcomes interested UCF students and those already employed full-time but wishing to advance their careers. Basic familiarity with the web and computer programming is required.

The program requires five courses and is set up so that students begin the program in the fall semester. Applicants contemplating applying for spring and summer terms should first contact the program coordinator for advisement.

Total Credit Hours Required: 15 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Basic familiarity with the web and computer programming is required.

Program Description

The Security Studies doctoral program is designed to produce specialists capable of analyzing and communicating security issues to policy makers, the general public, the government, and academia.

Many graduates will work in military and other governmental organizations, international corporations, and agencies that deal with security. Others will seek employment in research and teaching in institutions of higher education.

The PhD degree consists of 56 credit hours beyond the master's degree. A master's degree is required for admission to the program with at least 30 credit hours of master's level work (including both coursework and thesis hours). The 59 credit hours consist of 17 credit hours of required courses, 15 credit hours of restricted electives, 9 hours of unrestricted electives (including courses offered in other departments, research, independent study, and internship), and a minimum of 15 credit hours of dissertation work.

Total Credit Hours Required: 56 Credit Hours Minimum beyond the Master's Degree

Program Prerequisites

An earned master's degree or it's equivalent in Political Science, International Politics or International Relations, or related discipline. The Graduate Program Director will evaluate the suitability and applicability of MA degrees in other disciplines for admission purposes.

- Complete the following:
    - POS7930 - Professional Development: Academic Careers in Security Studies (1)
    - POS7267 - Professional Development: The Practice of Security Studies (1)

Elective Course
24 Total Credits

- Details

Restricted Electives
15 Total Credits

- Complete all of the following
    - All students in the doctoral program must complete a minimum of 15 hours of course work in approved restricted elective graduate seminars. The choice of specific courses will be based on the research interests of students and made in conjunction with their faculty advisor. In this way, students achieve two distinct but related goals: a broad competence in the variety of methodological, theoretical, and substantive approaches to security studies and advanced proficiency in the areas that are most germane to their research interests. Approved restricted electives include:
    - Complete at least 5 of the following:
        - CPO6038 - Political Development (3)
        - CPO6058 - Revolution and Political Violence (3)
        - CPO6091 - Seminar in Comparative Politics (3)
        - CPO6206 - Comparative Politics of Africa (3)
        - CPO6307 - Issues in Latin American Politics (3)
        - CPO6407 - Comparative Politics of the Middle East (3)
        - CPO6729 - Global Security in the Age of Migration (3)
        - CPO6776 - Comparative Rising Powers (3)
        - Course Not Found
        - INR6039 - International Political Economy (3)
        - INR6062 - Peace Studies (3)
        - INR6065 - Seminar on War (3)
        - INR6067 - Human Rights and Security (3)
        - INR6068 - Politics of Civil Wars (3)
        - INR6136 - Seminar in American Security Policy (3)
        - INR6137 - Terrorism and Politics (3)
        - INR6108 - Seminar in American Foreign Policy (3)
        - INR6257 - International Relations of Africa (3)
        - INR6275 - International Politics of the Middle East (3)
        - INR6339 - Strategic Warning Analysis (3)
        - INR6346 - Politics of International Terrorism (3)
        - INR6356 - Environmental Security (3)
        - INR6365 - Seminar on Intelligence (3)
        - INR6366 - The Intelligence Community (3)
        - INR6507 - International Organization (3)
        - INR6726 - Political Behavior in International Conflict (3)
        - POS6207 - Political Behavior (3)
        - POS6415 - The American Presidency (3)
        - POS6427 - Congress and the Legislative Process (3)
        - POS6686 - National Security Law (3)
        - POS6729 - Political Network Analysis (3)
        - POS6743 - Geographic Tools for Political Science Research (3)
        - POS6747 - Advanced Topics in Quantitative Political Analysis (3)
        - POS6757 - Survey Design for Political Science Research (3)
        - POS6938 - Special Topics/Political Analysis (3)
        - CPO6056 - Politics of Authoritarian Regimes (3)
        - INR6007 - Seminar in International Politics (3)
        - INR6352 - Global Environmental Politics (3)
        - POS6747 - Advanced Topics in Quantitative Political Analysis (3)
        - POS6174 - Seminar in Southern Politics (3)
        - POS6736 - Conduct of Political Inquiry (3)
        - POS6045 - Seminar in American National Politics (3)
        - POS6079 - The Politics of Race, Ethnicity, Gender, and Class in the United States (3)

Unrestricted Electives
9 Total Credits

- Earn at least 9 credits from the following types of courses:
  The unrestricted electives provide students with an opportunity to further expand their doctoral training beyond the program's core courses and the restricted electives. Unrestricted electives may include regularly scheduled graduate courses in political science, graduate-level courses in programs outside the department, independent study courses, doctoral research courses

with a highly focused student/faculty research component, and internships that enable students to gain valuable experience in a non-academic setting. Unrestricted electives may be taken at any point in the student's program of study; however, no more than a total of twelve hours of graduate course work can be from outside of the department, dissertation research, independent study, or internship combined; in addition, no more than a total of six hours can be from either independent study or internship. Students with suitable academic backgrounds may work in areas such as cyber security or science and technology taking courses in relevant departments. A student's faculty advisor and the department's Graduate Program Director must approve all graduate courses taken outside of the department as well as any internships.

Modern Language or Methods Requirement
0 Total Credits

- Prior to enrollment in dissertation hours, students are required to demonstrate proficiency in one modern language (other than English) or an additional methodological course dependent on the student's intended research area. The language requirement is two years (four semesters) of a single college-level modern language, which should normally be in an area relevant to the student's research. Students may meet the requirement by providing evidence of four semesters of enrollment or by passing a university-administered equivalent proficiency examination. The methods requirement is met by taking a methods course as part of the elective course requirements, with the approval of the Graduate Program Director.

Preliminary Advisory Committee Meeting
0 Total Credits

- No earlier than April 1 and not later than June 1, of their first year in the program, students will assemble and meet with a Preliminary Advisory Committee of no fewer than three full-time Political Science faculty members, all of whom should have Graduate Faculty or Grad Faculty Scholar Status. Prior to this meeting, the student will present committee members with a written statement of their primary research interests. During this meeting faculty members provide feedback on the student's statement of research interests and will identify key literatures that the student will be expected to be familiar with as they pursue their dissertation. During this meeting faculty members provide feedback on the student's statement of research interests and will identify key literature that the student will be expected to be familiar with as they pursue their Dissertation Advisory Committee. Note that college approval for the committee is not required at this time and that students are able to change the composition of their committee at any time (subject to program and college approval). Students will not be permitted to take Candidacy Exam C until they have conducted their Preliminary Advisory Committee Meeting.

Written Candidacy Exams
0 Total Credits

- Each student will take the following exams: 1. An exam in qualitative methods, addressing the material taught in INR 7707. 2. An exam in quantitative methods, addressing the material taught in INR 7745. 3. An exam addressing the contemporary literature in security studies. Students must pass each part of each exam prior to enrollment in dissertation hours. If they fail any part(s) of any exam, they will have a second opportunity to take that part(s). If they fail the exam a second time, the student will be dismissed from the program.

Admission to Candidacy
0 Total Credits

- The following are required to be admitted to candidacy and enroll in dissertation hours: • Completion of all coursework, except for dissertation hours • Successful completion of all written candidacy exams • Formation of a dissertation advisory committee • Submittal of an approved program of study

Dissertation
15 Total Credits

- Earn at least 15 credits from the following types of courses:
  POS 7980 - Dissertation Research The dissertation is the culmination of the coursework that comprises this research-based degree. It must make a significant theoretical, historical, intellectual, practical, creative, or research contribution to the student's area within the discipline. The dissertation will be completed through a minimum of 15 hours of dissertation credit, which students will use to accomplish original research. Students must maintain enrollment in dissertation hours until the degree is awarded. The dissertation must conform to standard disciplinary, institutional, and departmental practices. Consistent with College of Graduate Studies Policies, a dissertation can only be approved after the successful completion of a Dissertation Defense.

Grand Total Credits: **56**

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. No

Program Description

The Department of Sociology offers a graduate program leading to a Master of Arts degree in Applied Sociology. Beyond a curriculum appropriate for general applied sociology, the program includes a graduate track in Domestic Violence and a graduate track in Medical Sociology as well as instruction and opportunities pertaining to the study of crime and deviance; domestic violence; medical sociology; and social inequalities. Please scroll to the bottom of this page for further details on these Tracks.

A primary focus of the program is the variety of social problems in society. Toward this objective, the program promotes the application of sociological and social psychological knowledge, principles, and research skills in a variety of organizational, community, and institutional settings. Examples of competencies in applied sociology include effective skills in program design and evaluation research; planning, feasibility and needs assessment studies; data management, analysis and presentation; and the application of general systems and social conflict theories to organizational problems, community development and planned change.

Degree seeking students in the Applied Sociology Program may elect to follow either a thesis or a non-thesis course of study. The thesis option is typically designed for students who plan to enter doctoral programs. The non-thesis option is more appropriate for students entering or continuing professional careers following the MA degree.

The degree of Master of Arts is conferred when students have fulfilled the requirements for either the thesis or non-thesis option. Both options require 30 hours of course work.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Degree Requirements

Required Courses
12 Total Credits

- Complete all of the following
  - Students receive an independent learning experience in the core by completing a research study in each of the 12 hours of required courses. SYA 5625 - ProSeminar Should be taken as early as possible in the program.
  - Complete the following:
    - SYA5625 - ProSeminar (3)
    - SYA6126 - Social Theory (3)
    - SYA6305 - Quantitative Social Research Methods (3)
    - SYA6455 - Research Analysis (3)

Elective Courses
12 Total Credits

- Earn at least 12 credits from the following types of courses:
  Students will select a minimum of 12 credit hours of unrestricted electives in consultation with their faculty advisor. No more than 3 hours may be taken in UCF graduate programs outside the department. The department's graduate director must approve all courses taken outside the department prior to enrollment. A listing and description of courses offered by the Department of Sociology is found in the "Courses"" section. Under special circumstances, students may enroll in a graduate-level Directed Independent Study course or a Directed Independent Research course to fulfill their nonrestricted elective course requirements. These courses, like most graduate seminars, require written research deliverables. Enrollment in these courses requires written approval from the student's advisor and graduate director. No more than 6 hours of graduate-level courses in Directed Independent Study or Directed Independent Research may be included in a student's program of study. Nonthesis students may substitute up to 6 hours of their elective course work by completing a graduate practicum/internship (SYA 6946). The practicum must be approved by the student's permanent adviser and the department's graduate program director.

Thesis\Nonthesis Option
6 Total Credits

- Complete 1 of the following
  Thesis Option
  - Earn at least 6 credits from the following types of courses:
    The thesis option requires a minimum of 6 hours of thesis credit and a successful defense of a thesis. Students may enroll in thesis hours after they have successfully completed the four required courses and their thesis committee has been approved by the department, college, and Graduate Studies. The students' permanent faculty adviser will chair their committee, which also will include two additional graduate sociology faculty members in the department. The additional members of the thesis committee are selected in consultation with the student's permanent faculty adviser. When a topic has been selected, students, in conjunction with their permanent adviser, will develop a thesis proposal. Copies of the proposal will be routed to members of their thesis committee and a proposal hearing scheduled. All students must pass a proposal hearing as well as a final oral defense of their thesis. Students who elect to write a thesis should become familiar with the university's requirements and deadlines for organizing and submitting the thesis.
    Nonthesis Option
  - Complete all of the following
    - The nonthesis option requires that students complete SYA 6657 - Program Design and Evaluation and 3 additional hours of SYA 6918 - Directed Research, SYA 6946 - Internship or Practicum, SYA 6909 - Research Report, or SYA 6908 - Directed Independent Studies. Both the Program Design and Evaluation course (SYA 6657) and "directed research or internship" courses require community-oriented research projects to develop research skills in sociology.
    - Complete the following:

        - SYA6657 - Program Design and Evaluation (3)
    - Earn at least 3 credits from the following types of courses:
      SYA 6918 Directed Research 3 Credit Hours SYA 6946 Internship or Practicum 3 Credit Hours SYA 6909 Research Report 3 Credit Hours SYA 6908 Directed Independent Studies 3 Credit Hours
      Applied Project
    - Nonthesis students must complete an applied project. The nature and implementation of each project will be determined by the student and their advisor. Before students may begin the applied project, they must earn a grade of "B" (3.0) or better in each of the five core courses. An Applied Project evaluated by a three-person committee consists of: A 1-2 page proposal describing what the project and the final product will entail. A final product approved and evaluated by the committee. A brief statement submitted with the final product indicating how the project is sociologically grounded. The grading system for the project is Pass/No Pass. Students who receive a grade of Pass will be allowed to graduate assuming all other requirements are met.

Equipment Fee
0 Total Credits

- Full-time students in the Applied Sociology MA program pay a $39 equipment fee each semester that they are enrolled. Part-time students pay $19.50 per semester.

Independent Learning
0 Total Credits

- As with all graduate programs, independent learning is an important component in the Applied Sociology master's program. Students will demonstrate independent learning through research seminars and the thesis (thesis students only).

Grand Total Credits: **30**

    Nonthesis Option
    - Complete all of the following
        - The nonthesis option requires that students complete SYA 6657 - Program Design and Evaluation and 3 additional hours of elective course work in their area of specialization. The Program Design and Evaluation course (SYA 6657) requires community-oriented research projects to develop research skills in sociology.
        - Complete the following:
            - SYA6657 - Program Design and Evaluation (3)
        - Earn at least 3 credits from the following types of courses:
          Directed Study for Applied Project Nonthesis students must complete an applied project. The nature and implementation of each project will be determined by the student and her/his adviser. Before students may begin the applied project, they must earn a grade of "B" (3.0) or better in each of the five core courses. The grading system for the project is Pass/No Pass. Students who receive a grade of Pass will be allowed to graduate assuming all other requirements are met. An Applied Project evaluated by a three-person committee consists of: A 1-2 page proposal describing what the project and the final product will entail. A final product approved and evaluated by the committee. A brief statement submitted with the final product indicating how the project is sociologically grounded.

Equipment Fee
0 Total Credits

- Full-time students in the Applied Sociology MA program pay a $39 equipment fee each semester that they are enrolled. Part-time students pay $19.50 per semester.

Independent Learning
0 Total Credits

- As with all graduate programs, independent learning is an important component in the Applied Sociology master's program. Students will demonstrate independent learning through research seminars and the thesis (thesis students only).

Grand Total Credits: **30**

Track Details

Students must earn a grade of "B" (3.0) or better in the program's core courses. Courses may be retaken to achieve a better grade; however, students must maintain a minimum GPA of 3.0 in their program of study.

By the end of their first year of course work in the program, students should select a permanent faculty advisor and determine their preliminary program of study, either in the thesis or nonthesis track. Students should maintain close contact with their faculty advisor in order to develop a viable program of study and avoid graduation delays.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

Track Description

The Department of Sociology offers a graduate program leading to a Master of Arts degree in Applied Sociology. Beyond a curriculum appropriate for general applied sociology, the program includes a graduate track in Medical Sociology as well as instruction and opportunities pertaining to the study of crime and deviance; domestic violence; and social inequalities.

Medical Sociology is an important subfield of Sociology that was developed and recognized in 1959 by the American Sociological Association (ASA). Medical sociology identifies the processes of health, illness, and medical care as social phenomena. The American Sociological Association identifies the following research topics under the field of medical sociology: the subjective experience of health and illness, the political, economic and environmental circumstances surrounding health and illness, the societal structures and forces that constrain the medical care system, individual responses to illness, and social movements related to health and healthcare. Having a deep understanding of how social processes work to affect an individual's health allows for many different careers. Medical sociologists use their knowledge to work for governmental and non-governmental organizations centered on health. They work for federal, state, and private health insurance plans. Medical sociologists conduct research and make policy that addresses public health problems. Many students who study medical sociology enter medical school to become clinicians and teachers of medical education. Still others enter dental school, physical therapy school, or other professional programs in the allied fields of health and apply knowledge gained from Medical Sociology to improve their patients' lives.

Degree-seeking students in the Applied Sociology program may choose either the thesis or a nonthesis course of study. Both options require 30 hours of course work, at least half of which must be at the 6000 level or above.

Degree seeking students in the Applied Sociology Program may elect to follow either a thesis or a non-thesis course of study. The thesis option is typically designed for students who plan to enter doctoral programs. The non-thesis option is more appropriate for students entering or continuing professional careers following the MA degree.

Total Credit Hours Required: 30 Credit Hours Minimum beyond the Bachelor's Degree

Degree Requirements

Core
12 Total Credits

- Complete all of the following
  - Please note that students in the nonthesis option are required to complete a research study in each of the 12 hours of required courses to provide an independent learning experience.
  - Complete the following:
    - SYA5625 - ProSeminar (3)
    - SYA6126 - Social Theory (3)
    - SYA6305 - Quantitative Social Research Methods (3)
    - SYA6455 - Research Analysis (3)

Specialization
6 Total Credits

- Complete the following:
  - SYO6406 - Medical Sociology (3)
  - SYO6405 - Sociology of Health and Illness (3)

Elective Courses
6 Total Credits

- Complete at least 2 of the following:
  - SYD6363 - Social Inequalities and Reproductive Health (3)
  - SYP6555 - Sociology of Alcohol and Drugs (3)
  - SYP6735 - Sociology of Health and Aging (3)
  - SYO6404 - Food Insecurity and Health (3)

- SYO6409 - Social Inequalities in Health (3)

Thesis\Nonthesis Option
6 Total Credits

- Complete 1 of the following
  Thesis Option
  - Earn at least 6 credits from the following types of courses:
    The thesis option requires a thesis proposal and defense, a minimum of 6 hours of thesis credit, and a written thesis along with a successful defense of a thesis. Students may enroll in thesis hours after they have successfully completed their core required courses, they have passed their thesis proposal defense, and their thesis committee has been approved by the department and college. The student's permanent faculty advisor will chair their committee, which also will include two additional graduate faculty members. The additional members of the thesis committee are selected in consultation with the student's permanent faculty advisor, and may include faculty from related disciplines in consultation with the faculty advisor. When a topic has been selected, students, in conjunction with their permanent advisor, will develop a thesis proposal. Copies of the proposal will be routed to members of their thesis committee and a proposal defense will be scheduled. All students must pass a proposal defense as well as a final oral defense of their thesis. Students who elect to write a thesis should become familiar with the university's requirements and deadlines for organizing and submitting the thesis.
    Nonthesis Option
  - Complete all of the following
    - The nonthesis option requires that students complete SYA 6657 - Program Design and Evaluation and 3 additional hours of elective course work in their area of specialization. The Program Design and Evaluation course (SYA 6657) requires community-oriented research projects to develop research skills in sociology.
    - Complete the following:
      - SYA6657 - Program Design and Evaluation (3)
    - Earn at least 3 credits from the following types of courses:
      Directed Study for Applied Project Nonthesis students must complete an applied project. The nature and implementation of each project will be determined by the student and her/his adviser. Before students may begin the applied project, they must earn a grade of "B" (3.0) or better in each of the five core courses. An Applied Project evaluated by a three-person committee consists of: A 1-2 page proposal describing what the project and the final product will entail. A final product approved and evaluated by the committee. A brief statement submitted with the final product indicating how the project is sociologically grounded. The grading system for the project is Pass/No Pass. Students who receive a grade of Pass will be allowed to graduate assuming all other requirements are met.

Equipment Fee
0 Total Credits

- Full-time students in the Applied Sociology MA program pay a $39 equipment fee each semester that they are enrolled. Part-time students pay $19.50 per semester.

Independent Learning
0 Total Credits

- As with all graduate programs, independent learning is an important component in the Applied Sociology master's program. Students will demonstrate independent learning through research seminars and the thesis (thesis students only).

Grand Total Credits: **30**

Track Details

Students must earn a grade of "B" (3.0) or better in the program's core courses. Courses may be retaken to achieve a better grade; however, students must maintain a minimum GPA of 3.0 in their program of study.

By the end of their first year of course work in the program, students should select a permanent faculty advisor and determine their preliminary program of study, either in the thesis or nonthesis track. Students should maintain close contact with their faculty advisor in order to develop a viable program of study and avoid graduation delays.

Is this program available 100% online?

No

Program Description

The Master of Science in Statistics and Data Science provides a sound foundation in statistical theory, statistical methods, numerical methods in statistics, and the application of computer methodology to statistical analyses. The MS is particularly suited for individuals who have completed an undergraduate program in mathematics, statistics, or computer science, but is also available to those from other disciplines who wish to develop an expertise in statistics and data science.

This degree has 1 track: Data Science Track. For further details on the Data Science Track, please see the Statistics and Data Science MS, Data Science Track Catalog at the bottom of this page for further details on this Track.

The Statistics and Data Science MS program requires a minimum of 36 credit hours beyond the bachelor's degree. The degree in Statistics and Data Science includes 21 credit hours of required courses, 15 credit hours of restricted electives, and passing a comprehensive examination.

Students must maintain a minimum GPA of 3.0, as well as a "B" (3.0) in all courses completed toward the certificate and since admission to the program.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Program Prerequisites

Students must have the following background and courses completed before applying to the Statistics & Data Science MS program. These courses are: MAC 2311C: Calculus with Analytic Geometry I, MAC 2312: Calculus with Analytic Geometry II, MAC 2313: Calculus with Analytic Geometry III, MAS 3105: Matrix and Linear Algebra or MAS 3106: Linear Algebra. These pre-required courses are basic undergraduate courses from the Math department.

Degree Requirements

0 Total Credits

- All MS students must have an approved Plan of Study (POS) developed by the student and advisor that lists the specific courses to be taken as part of the degree. Students must maintain a minimum GPA of 3.0 in their POS, as well as a "B" (3.0) in all courses completed toward the degree and since admission to the program.

Required Courses
21 Total Credits

- Complete all of the following
  - Complete the following:
    - STA5205 - Experimental Design (3)
    - STA6106 - Statistical Computing I (3)
    - STA6236 - Regression Analysis (3)
    - STA6326 - Theoretical Statistics I (3)
    - STA6327 - Theoretical Statistics II (3)
    - STA6329 - Statistical Applications of Matrix Algebra (3)
  - Note: STA 6106 provides an independent learning experience for the program. It requires a research project that results in a written report or oral presentation.
  - Complete at least 1 of the following:
    - STA6246 - Linear Models (3)
    - STA6707 - Multivariate Statistical Methods (3)

Elective Courses
15 Total Credits

- Complete all of the following
  - Earn at least 15 credits from the following:
    - STA5505 - Categorical Data Methods (3)
    - STA5825 - Stochastic Processes and Applied Probability Theory (3)
    - STA6107 - Statistical Computing II (3)
    - STA6226 - Sampling Theory and Applications (3)
    - STA6224 - Bayesian Survey Methods (3)
    - STA6237 - Nonlinear Regression (3)
    - STA6346 - Advanced Statistical Inference I (3)
    - STA6347 - Advanced Statistical Inference II (3)
    - STA6507 - Nonparametric Statistics (3)
    - STA6662 - Statistical Methods for Industrial Practice (3)
    - STA6709 - Spatial Statistics (3)
    - STA6857 - Applied Time Series Analysis (3)
    - STA5104 - Advanced Computer Processing of Statistical Data (3)
    - STA5703 - Data Mining Methodology I (3)
    - STA6704 - Data Mining Methodology II (3)
    - STA6705 - Data Mining Methodology III (3)
    - STA6714 - Data Preparation (3)
    - Course Not Found
    - COP5711 - Parallel and Distributed Database Systems (3)
    - COP6730 - Transaction Processing (3)
    - COP6731 - Advanced Database Systems (3)
    - STA6238 - Logistic Regression (3)
    - STA7722 - Statistical Learning Theory (3)
    - STA7734 - Statistical Asymptotic Theory in Big Data (3)
    - Course Not Found
    - STA5738 - Data and Analytical Methodology for Metropolitan and Regional Areas (3)
  - Students can also choose elective courses from these STA 7xxx courses.
  - STA7239 - Dimension Reduction in Regression (3) STA7348 - Bayesian Modeling and Computation (3) STA7719 - Survival Analysis (3) STA7935 - Current Topics in Big Data Analytics (3)

Thesis/Nonthesis Option
0 Total Credits

- Complete all of the following
  - • Complete 1 of the following
  - Thesis Option o Earn at least 6 credits from the following types of courses: STA 6971 - Thesis
  - o Earn at least 6 credits from the following types of courses: STA 6971 - Thesis For this option, the MS degree requires a total of at least 36 credit hours comprised of at least 30 credit hours of course work and 6 credit hours of thesis. This includes the 21 credit hours of the core courses, 9 credit hours of `Elective' courses, and 3-6 credit hours of a two-course sequence. No more than 6 credit hours of independent study or directed research may be credited toward the degree. It is strongly recommended that the student select a thesis adviser and establish a program of study by the completion of the core courses. With the help of a thesis adviser, the student will form a thesis committee of three members, of which at least two must be from the Department of Statistics. An oral defense of the thesis is required.
  - Nonthesis Option o Earn at least 6 credits from the following types of courses: Nonthesis students will take an additional 6 credit hours of electives. The electives should be chosen in consultation with the graduate program director. This will consist of 21 credit hours of the core courses and 15 credit hours of elective courses. It is strongly recommended that the student select an academic adviser and establish a program of study by the completion of the core courses. In addition, students in the nonthesis option are required to complete the research project/comprehensive written examination (by passing the qualifying/comprehensive examination at or above the MS level) based on the core courses. Two attempts at the examination are permitted.

Comprehensive Examination
0 Total Credits

- All nonthesis option students must take a comprehensive written examination covering the four courses STA 6326, STA 6327, STA 6236, and STA 5205. For full-time students, this examination will normally be taken just prior to the start of the second year of their graduate work. Students are allowed two attempts to pass the exam. Failure to pass after the second attempt will result in dismissal from the program.

Independent Learning
0 Total Credits

- STA 6106 provides the independent learning experience for the program. It requires a research project that results in a written report or oral presentation.

Grand Total Credits: **36**

Program Details

Students who have a sufficient background in statistics, subject to the approval of the graduate program director, can take a higher-level course such as **STA 6236 - Regression Analysis** instead of **STA 5206 - Statistical Analysis**.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. Track Description

The Master of Science in Statistics and Data Science, Data Science track focuses on data analytics and its application to business, social, and health problems.

The Data Science track in the Statistics and Data Science MS program focuses on data analytics and its application to business, social, and health problems.

The program is particularly suited for individuals who have completed an undergraduate program in mathematics, statistics, economics, business, or other related fields, and wish to pursue a career in data science. Data scientists analyze massive data sets to uncover trends and associations, and make theoretically sound decisions on, for example, business, social, and health subjects. Data scientists have one of the most coveted jobs, as the demand for them far exceeds the existing number of qualified persons in the area. Currently, the work force in the data science industry consists mainly of individuals trained with post college education. To date, very few university degree programs exist for training students for such a large and growing industry in the United States.

The Data Science track in the Statistics and Data Science MS program is composed of 24 credit hours of required courses and 12 credit hours of restricted electives. Students must also pass a comprehensive written examination.

Total Credit Hours Required: 36 Credit Hours Minimum beyond the Bachelor's Degree

Track Prerequisites

Students must have the following background and courses completed before applying to the Statistics & Data Science, Data Science track MS program. These courses are: MAC 2311C: Calculus with Analytic Geometry I, MAC 2312: Calculus with Analytic Geometry II, MAC 2313: Calculus with Analytic Geometry III, MAS 3105: Matrix and Linear Algebra or MAS 3106: Linear Algebra. These pre-required courses are basic undergraduate courses from the Math department.

    - FIN6406 - Strategic Financial Management (3)
    - STA6107 - Statistical Computing II (3)
    - STA6329 - Statistical Applications of Matrix Algebra (3)
    - STA6246 - Linear Models (3)
    - STA6346 - Advanced Statistical Inference I (3)
    - STA6347 - Advanced Statistical Inference II (3)
    - STA6662 - Statistical Methods for Industrial Practice (3)
    - STA6709 - Spatial Statistics (3)
    - STA7722 - Statistical Learning Theory (3)

        - STA7734 - Statistical Asymptotic Theory in Big Data (3)
        - Course Not Found
        - STA5738 - Data and Analytical Methodology for Metropolitan and Regional Areas (3)
    - Students can also choose elective courses from these STA 7xxx courses.
    - STA7239 - Dimension Reduction in Regression (3) STA7348 - Bayesian Modeling and Computation (3) STA7719 - Survival Analysis (3) STA7935 - Current Topics in Big Data Analytics (3)

Thesis/Nonthesis Option
0 Total Credits

- Complete all of the following
    - 6 Total Credits • Complete 1 of the following Thesis Option o Earn at least 6 credits from the following types of courses: STA 6971 - Thesis For this option, the MS degree requires a total of at least 36 credit hours comprised of at least 30 credit hours of course work and 6 credit hours of thesis. This includes the 24 credit hours of the core courses, 6 credit hours of `Elective' courses, and 3-6 credit hours of a two-course sequence. No more than 6 credit hours of independent study or directed research may be credited toward the degree. It is strongly recommended that the student select a thesis adviser and establish a program of study by the completion of the core courses. With the help of a thesis adviser, the student will form a thesis committee of three members, of which at least two must be from the Department of Statistics and Data Science. An oral defense of the thesis is required.
    - Nonthesis Option o Earn at least 6 credits from the following types of courses: Nonthesis students will take an additional 6 credit hours of electives. The electives should be chosen in consultation with the graduate program director. This will consist of 24 credit hours of the core courses and 12 credit hours of elective courses. It is strongly recommended that the student contacts the academic adviser, Graduate Coordinator, and establish a program of study by the completion of the core courses. In addition, students in the nonthesis option are required to complete the research project/comprehensive written examination (by passing the qualifying/comprehensive examination at or above the MS level) based on the core courses. Two attempts at the examination are permitted.

Comprehensive Examination
0 Total Credits

- All students must take a comprehensive written examination covering the five courses STA 6326, STA 6327, STA 5104, STA 6714 and STA 6238. For full-time students, this examination will normally be taken just prior to the start of the second year of their graduate work. Students are allowed two attempts to pass the exam. Failure to pass after the second attempt will result in dismissal from the program.

Independent Learning
0 Total Credits

- STA 5703 and STA 6704 both require research projects that fulfill the independent learning requirement for the program. Both courses require students to build models for target variables of projects with very large sets of data, write a report, and then give an oral presentation on their independent learning experiences

Grand Total Credits: **36**

Track Details

All MS students must have an approved **Plan of Study (POS)** developed by the student and advisor that lists the specific courses to be taken as part of the degree. Students must maintain a minimum GPA of 3.0 in their POS, as well as a "B" (3.0) in all courses completed toward the degree and since admission to the program.

No

Program Description

The PhD in Strategic Communication offers advanced instruction in health communication, instructional emergency risk communication, and crisis communication; it prepares students with the necessary knowledge and skills to pursue a successful, advanced career in communication and related fields in both academic and applied settings.

Strategic communication, one of the fastest-growing areas situated within the broader field of communication, is an innovative and unique subfield. It is distinct from other communication subfields in that it is intentionally goal-driven communication wherein communication scholars work in partnership with professionals in the public and private sectors to solve real-world problems.

The Nicholson School of Communication and Media's communication and digital media programs joined the Florida Interactive Entertainment Academy (FIEA) at UCF Downtown, a 21st-century campus with access to arts, culture, nightlife, and business.

The Strategic Communication PhD requires a minimum of 60 credit hours beyond the master's degree. The zero-hour Doctoral Colloquium will be required in the fall semesters of the first year. This course will introduce students to professional standards and practices associated with doctoral-level training in the field of Strategic Communication.

Total Credit Hours Required: 60 Credit Hours Minimum beyond the Master's Degree

Program Prerequisites

An earned master's degree or its equivalent in Communication or a related field. The Director of Graduate Studies will evaluate the suitability and applicability of M.A. or M.S. degrees in other related disciplines for admission purposes.

Degree Requirements

Required Courses
12 - 13 Total Credits

- In order to complete the certificate, students must complete one course in survey research methodology (Group 1), one course in research design (Group 2), an eligible advanced research methods course (Group 3), and an eligible course in which survey research is the principal mode of empirical inquiry (Group 4). Because survey research training is available in different departments, students may choose to fulfill these requirements using courses offered by a single department or by using courses offered by multiple departments (subject to availability). Certificate-only students will consult with the certificate program advisor in selecting their courses.

Group 1: Survey Research Methods Course
3 Total Credits

- Complete at least 1 of the following:
  - INP6072 - Survey Research Methods and Program Evaluation in Indust. and Org. Psychology (3)
  - POS6757 - Survey Design for Political Science Research (3)
  - STA6223 - Conventional Survey Methods (3)
  - SYA6425 - Design and Conduct of Social Surveys (3)

Group 2: Quantitative Research Course
3 - 4 Total Credits

- Complete at least 1 of the following:
  - CCJ6706 - Data Analysis in Criminal Justice I (3)
  - COM6304 - Quantitative Research Methods in Communication (3)
  - POS6746 - Quantitative Methods in Political Research (3)
  - POS7745 - Advanced Quantitative Methods in Political Research (3)
  - PSY6216C - Research Methodology (4)
  - STA5206 - Statistical Analysis (3)
  - SYA6305 - Quantitative Social Research Methods (3)

Group 3: Advanced Methodological Course
3 Total Credits

- Complete at least 1 of the following:
  - POS6729 - Political Network Analysis (3)
  - POS6743 - Geographic Tools for Political Science Research (3)
  - POS6747 - Advanced Topics in Quantitative Political Analysis (3)
  - STA6224 - Bayesian Survey Methods (3)
  - STA6226 - Sampling Theory and Applications (3)
  - SYA6452 - GIS Applications (3)
  - SYA7309 - Advanced Sociological Research Methods (3)
  - SYA7407 - Advanced Quantitative Data Analysis (3)

Survey Research in Context
3 Total Credits

- Complete at least 1 of the following:
  - MMC6567 - New Media (3)
  - MMC6600 - Media Effects and Audience Analysis (3)
  - MMC6735 - Social Media as Mass Communication (3)
  - POS6045 - Seminar in American National Politics (3)
  - POS6079 - The Politics of Race, Ethnicity, Gender, and Class in the United States (3)
  - POS6207 - Political Behavior (3)
  - SYD6705 - Seminar in Race and Ethnicity (3)
  - SYD6809 - Seminar in Gender Issues (3)
  - SYP5566 - Seminar on Domestic Violence: Theory, Research and Social Policy (3)

Grand Total Credits: **12 - 13**

UCF Online

Please note: Destination Marketing and Management Graduate Certificate may be completed fully online, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at 407-823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Program Description

The Graduate Certificate in Destination Marketing and Management provides knowledge and information that facilitates the effective marketing and management of tourist destinations. The certificate covers the strategies for creating integrated destination marketing and management systems, critically reviews those issues and techniques of international tourism management with a particular focus on the economic, socio-cultural and environmental impacts of tourist development at destinations, and analyzes the quantitative impact of tourism as an industry both within and beyond tourist destinations.

Students learn to synthesize theory and application at the graduate level in order to produce the knowledge base necessary to fully utilize available techniques and strategies for the effective marketing and management of tourist destinations. Students successfully completing this certificate may already be in destination marketing or management positions or seeking such roles in this exciting and growing field.

Yes

UCF Online

Please note: Event Leadership (MS) is a fully-online program. All courses are currently online courses. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students studying outside of the USA do not require a visa to complete this program. Fully online programs are not eligible for an F-1 or J-1 student visa. Please contact the Program Coordinator to discuss admission.

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Program Description

The Master of Science in Event Leadership enables students to build on their strengths and interests, broaden their knowledge of the event industry, sharpen their management, leadership, and analytical skills, and incorporate their professional and extracurricular experiences.

This program prepares students for an industry that continues to evolve. From an industry traditionally focused on logistics to one requiring a broad range of leadership and managerial skills, including strategy formulation, relationship management, marketing, and risk management, this graduate degree program is designed with this paradigm in mind. It will prepare graduates for an ever-changing and challenging field that provides tremendous economic and social benefits to communities of all sizes.

The typical Event Leadership MS candidate:

- Is a professional working in a management or leadership position related to events.
- Holds an undergraduate degree in event management, hospitality management, business management, or a related discipline.
- Wishes to acquire advanced educational training to be competitive in the thriving event industry.

The Rosen College of Hospitality Management aims to provide students with an outstanding graduate educational experience and serve other stakeholders with continuing education, research, and service. The College is committed to UCF's goals by providing intellectual leadership through quality graduate education and international prominence by means of educational and research programs nurturing inclusiveness and diversity, with a global perspective, and partnerships with local, national, and international constituencies.

Program Prerequisites

There are no undergraduate course prerequisites for this program, provided candidates have a degree in event management, hospitality management, business management, or a related discipline. Prospective students should have at least 3-5 years of experience within the event industry and interest in achieving senior-level leadership positions within the field.

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Program Description

The Graduate Certificate in Event Management provides knowledge and information that facilitates the effective organization and management of events in the public, private and third sector contexts.

The certificate covers the administration of events (e.g. promotion, budgeting, marketing, production, legal issues, customer service, ticketing and concession), the selling and marketing of conventions and conferences, and the organization and administration of mega-events. Events are such an integral component of many industries today that although with a strong focus on tourism and hospitality, the certificate incorporates a number of perspectives with event legacies being a particularly pertinent issue for all coursework.

Students learn to synthesize theory and application at the graduate level in order to produce the knowledge base necessary to fully utilize available techniques and strategies for the effective organization, marketing, and management of events, conventions, and conferences. Students successfully completing this certificate may already be in event management positions or seeking such roles in the public, private or third sectors.

UCF Online

Please note: Hospitality and Tourism Management (MS) may be completed fully online However, the thesis option is not available to students who study fully online, and not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer toState Restrictions for current information.

Program Description

The Master of Science in Hospitality and Tourism Management enables students to build on their strengths and interests, broadens their knowledge of the industry, sharpens their management skills, and incorporates their professional and extracurricular experiences. The Rosen College of Hospitality Management candidates are especially attractive hires for hospitality and tourism organizations around the globe.

The typical Hospitality and Tourism Management MS candidate:

- Is a professional working in a position related to hospitality, tourism, or events.
- Holds an undergraduate degree in hospitality, business management, or a related discipline.
- Understands that advanced educational training is required to be competitive in the thriving hospitality, tourism, and event industry.

The program offers thesis and non-thesis options. The thesis option is intended for students who are interested in the scientific study of the various aspects of the hospitality and tourism industry and who may anticipate pursuing a doctoral degree or a professional research position. The non-thesis option is intended for students who anticipate a managerial and leadership position in the hospitality and tourism industry. The emphasis of the non-thesis option is on coursework, practical experience, and real-world insight. You can complete your degree either fully online, face-to-face, or customize it through a mix of both to fit your schedule and budget, although the thesis option is not available to students who study fully online. A maximum of three credit hours of restricted elective may be taken as an independent study.

The Rosen College of Hospitality Management aims to provide students with an outstanding graduate hospitality management educational experience and serve other stakeholders with continuing education, research, and service. The College is committed to UCF's goals by providing intellectual leadership through quality hospitality education, international prominence by means of educational and research programs, promotion of a global perspective, nurturing inclusiveness and diversity, and partnerships with local, national, and international hospitality and tourism constituencies.

The MD Track is designed to accommodate UCF medical students who wish to pursue a Hospitality and Tourism MS concurrently while pursuing their medical degree. Please scroll to the bottom of this page for further details on this Track.

Program Prerequisites

For students with undergraduate majors in Hospitality Management or Business Administration, there will be no undergraduate course prerequisites, provided they have successfully completed an undergraduate course in statistics or applied quantitative analysis with a grade of "C" or higher.

For industry professionals with an undergraduate degree in a discipline other than Hospitality Management or Business Administration, the following two undergraduate courses "may" be required to be completed with a grade of "B" or higher within the first year of course work in the program (decisions are made at the discretion of the Graduate Recruitment Team).

- HFT 2401 - Hospitality Industry Financial Accounting
- HFT 3431 - Hospitality Industry Managerial Accounting

Students would also have to have successfully completed an undergraduate course in statistics or applied quantitative analysis with a grade of "C" or higher within the first year of course work in the program. The following undergraduate courses "may" be required to be completed with a grade of "B" or higher within the first year of course work in the program (decisions are made at the discretion of the Graduate Recruitment Team).

- STA 2401 or STA 2023 or
- HFT 3465 Applied Quantitative Analysis for the Hospitality and Tourism Industry

    - HMG6596 - Strategic Marketing in Hospitality and Tourism (3)
    - HMG6296 - Hospitality/Tourism Strategic Issues (3)

Thesis Option/Nonthesis Option
15 Total Credits

- Complete 1 of the following
    Thesis Option
    - Complete all of the following
        - An appropriate culminating academic experience is required of all master's degree candidates. For those students in the thesis option, a thesis defense is required. Thesis defenses will be approved by a majority vote of the thesis advisory committee. Further approval is required by the Dean of the Rosen College of Hospitality Management and the UCF College of Graduate Studies before final acceptance of the thesis in fulfilling degree requirements.
        - Complete the following:
            - HMG6586 - Research Methods in Hospitality and Tourism (3)
        - Earn at least 6 credits from the following:
            - HMG6971 - Treatise (Thesis OF Research Report) (1 - 99)
        - Earn at least 6 credits from the following:
            - FSS6365 - Management of Food Service Operations (3)
            - HMG6227 - Advanced Training and Development in the Hospitality Industry (3)
            - HMG6251 - International Lodging Accommodations Analysis (3)

- HMG6267 - Case Studies in Restaurant Management (3)
- HMG6291 - Hospitality Entrepreneurship: Concept Creation to Capitalization (3)
- HMG6347 - Contemporary Issues in the Resort Industry (3)
- HMG6446 - Hospitality/Tourism Information Technology (3)
- HMG6476 - Feasibility Studies for the Hospitality/Tourism Enterprises (3)
- HMG6528 - Convention and Conference Sales and Services (3)
- HMG6529 - Contemporary Issues in Resort Sales Management (3)
- HMG6533 - Hospitality/Tourism Industry Brand Management (3)
- HMG6556 - Digital Marketing and Big Data Management for Hospitality and Tourism (3)
- HMG6565 - Social Media in Hospitality and Tourism (3)
- HMG6566 - Principles of Destination Marketing and Management (3)
- HMG6710 - International Tourism Management (3)
- HMG6738 - Tourism Industry Analysis (3)
- HMG6756 - Mega-Events (3)
- HMG6797 - Event Administration (3)
- HMG6466 - Applied Revenue Management Techniques in Hospitality (3)
- HMG6229 - Corporate Social Responsibility and Ethics in the Hospitality and Tourism Industry (3)
- HMG6449 - Smart Travel and Tourism (3)
- HMG6757 - Advanced Theme Park and Attraction Management (3)
- HMG6810 - Food Supply Chain Management (3)
- HMG6811 - Beverage Supply Chain Management (3)
- HMG6224 - Leadership in Hospitality and Tourism (3)
- HMG6223 - Leading Innovation and Change in Hospitality and Tourism (3)
- HMG6299 - Contemporary Issues in Hospitality and Tourism Leadership (3)

Nonthesis Option

- Complete all of the following
  - An appropriate culminating academic experience is required of all master's degree candidates. For students in the non-thesis option, an appropriate culminating academic experience is the successful completion of HMG 6296 - Hospitality/Tourism Strategic Issues, a required course in the curriculum that is designated as a capstone course. This capstone course acquaints students with the principles of strategic decision-making in various sectors of the tourism and hospitality industry. Students are required to apply skills, knowledge, and understanding in order to identify areas of concern encountered by managers responsible for formulating and implementing operational strategies.
  - Earn at least 15 credits from the following:
    - FSS6365 - Management of Food Service Operations (3)
    - HMG6227 - Advanced Training and Development in the Hospitality Industry (3)
    - HMG6251 - International Lodging Accommodations Analysis (3)
    - HMG6267 - Case Studies in Restaurant Management (3)

Independent Learning
0 Total Credits

- Candidates for the MS degree are constantly challenged with numerous requirements to engage in independent learning during the program of study through special projects and papers. For students in the non-thesis option, an appropriate culminating academic experience is the successful completion of HMG 6296 - Hospitality/Tourism Strategic Issues , a required course in the curriculum that is designated as a capstone course. HMG 6296 should be taken during the final term of study, and enrollment is based on approval. This capstone course acquaints students with the principles of strategic decision-making in various sectors of the tourism and hospitality industry. Students are required to apply skills, knowledge, and understanding in order to identify areas of concern encountered by managers responsible for formulating and implementing operational

strategies.

Track Description

The Master of Science in Hospitality and Tourism Management enables students to build on their strengths and interests; broadens their knowledge of the industry; sharpens their management skills; and incorporates their professional and extracurricular experiences.

The MD Track is designed to accommodate UCF medical students who wish to pursue a Hospitality and Tourism MS concurrently while pursuing their medical degree. Students enrolled in the MD track will witness and experience adaptable elements to effect a cultural change in the practice of medicine vis-a-vis the concept of hospitality and service-oriented business models.

Track Prerequisites

For students with undergraduate majors in Hospitality Management or Business Administration, there will be no undergraduate course prerequisites, provided they have successfully completed an undergraduate course in statistics or applied quantitative analysis with a grade of "C" or higher.

For industry professionals with an undergraduate degree in a discipline other than Hospitality Management or Business Administration, the following two undergraduate courses "may" be required to be completed with a grade of "B" or higher within the first year of course work in the program (decisions are made at the discretion of the Graduate Recruitment Team).

- STA 2014 - Principles of Statistics or STA 2023 Statistical Methods or
- HFT 3930 - Applied Quantitative Analysis for the Hospitality and Tourism Industry

Students would also have to have successfully completed an undergraduate course in statistics or applied quantitative analysis with a grade of "C" or higher within the first year of course work in the program. The following undergraduate courses "may" be required to be completed with a grade of "B" or higher within the first year of course work in the program (decisions are made at the discretion of the Graduate Recruitment Team).

- STA 2401 or STA 2023 Principles of Statistics or
- HFT 3930 Applied Quantitative Analysis for the Hospitality and Tourism Industry

Grand Total Credits: **33**

Track Details

Candidates for the MS degree are constantly challenged with numerous requirements to engage in independent learning during the program of study through special projects and papers. For example, the capstone course (i.e., the last one that you complete prior to graduation), HMG 6296 - Hospitality/Tourism Strategic Issues, requires a critical strategic audit project and a reflective paper. The project demonstrates a range of cross-discipline knowledge and analytical skills to perform an executive-level analysis of an enterprise. The reflective paper has guiding questions that are subjective in nature and successful completion requires a thorough, insightful, and well-articulated document that describes the learner's value proposition to industry and society.

Financial Information

Graduate students may receive financial assistance through fellowships, assistantships, tuition support, or loans. For more information, see the College of Graduate Studies Funding website, which describes the types of financial assistance available at UCF and provides general guidance in planning your graduate finances. The Financial Information section of the Graduate Catalog is another key resource.

UCF Student Financial Assistance
Millican Hall 120

Fellowship Information

Fellowships are awarded based on academic merit to highly qualified students. They are paid to students through the Office of Student Financial Assistance, based on instructions provided by the College of Graduate Studies. Fellowships are given to support a student's graduate study and do not have a work obligation. For more information, see UCF Graduate Fellowships, which includes descriptions of university fellowships and what you should do to be considered for a fellowship.

Is this program available 100% online?

Yes

UCF Online

Please note: Hospitality and Tourism Technologies Graduate Certificate, although not all elective options or program prerequisites may be offered online. Newly admitted students choosing to complete this program exclusively via UCF online classes may enroll with a reduction in campus-based fees. See **http://ucf.edu/online** for more information.

International students (F or J visa) are required to enroll in a full-time course load of 9 credit hours during the fall and spring semesters. Only 3 of the 9 credit hours may be taken in a completely online format. For a detailed listing of enrollment requirements for international students, please visit http://global.ucf.edu/. If you have questions, please consult UCF Global at (407) 823-2337.

UCF is not authorized to provide online courses or instruction to students in some states. Refer to**State Restrictions** for current information.

Program Description

The Graduate Certificate in Hospitality and Tourism Technologies provides knowledge and information that facilitates the effective use of existing and emerging technologies in the marketing and management of hospitality and tourism products, services, experiences and electronic channels of distribution. The certificate covers the development, use, and future of hospitality and tourism technologies, the critical role played by social media as a strategy for differentiation, business development and new product/ experience development, and the major perspectives and concepts associated with digital marketing and big data management.

Students learn to synthesize theory and application at the graduate level in order to produce the knowledge base necessary to fully utilize available technological and social media techniques and strategies in the hospitality and tourism industries. Students successfully completing this certificate are likely to be employed in any area of hospitality and tourism that incorporates online booking and reservation systems, e-intermediaries, online travel agencies, digital marketing agencies, social media organizations, destination marketing, hospitality marketing etc.

BCH6740 - Advanced Biochemistry
Course Title

Advanced Biochemistry

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Must meet proficiency requirement as determined by the Chemistry department or C.I.

Course Description

Biochemistry focusing on enzymology, regulation of the activity of enzymes and cellular chemical activity, and biochemical methods to study proteins.

College

College of Sciences

Department

Department of Chemistry

Terms of Offering

Occasional

BME - Biomedical Engineering

BME5140 - Materials Science of Instrumentation for Clinical Applications
Course Title

Materials Science of Instrumentation for Clinical Applications

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

General graduate standing in Engineering, Biomedical Science, Biotechnology, Chemistry or related disciplines or C.I. Study of engineering and materials concepts behind the clinical diagnostics currently used and under development, as well as technologies utilized in fabrication and characterization of these devices.

College

College of Engineering and Computer Science

Department of Materials Science and Engineering

Terms of Offering

Odd Fall

BME5216C - Mechanics of Biostructures I
Course Title

Mechanics of Biostructures I

Credits Hours

3

Lab/Studio/Field Work Hours

2

Prerequisites

- Graduate standing or C.I.

Course Description

Part I of a two semester course. Mechanical analysis of hard and soft tissues and prosection lab on human anatomy and physiology.

College

College of Engineering and Computer Science

Department

Department of Mechanical and Aerospace Engineering

Terms of Offering

Fall

BME5217C - Mechanics of Biostructures II
Course Title

Mechanics of Biostructures II

Credits Hours

3

Lab/Studio/Field Work Hours

1

Prerequisites

- 5216C or C.I.

Course Description

Part II of a two semester course. Cell physiology and engineering principles applied to analysis of cellular processes and prosection anatomy lab on human anatomy and physiology.

College

College of Engineering and Computer Science

Department

Department of Mechanical and Aerospace Engineering

Terms of Offering

Spring

BME5267 - Biofluid Mechanics
Course Title

Biofluid Mechanics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EML 3701 and EGM 3601 or C.I.

Course Description

This course will cover the physical and mathematical principals of fluid mechanics and its application and relevance to human physiology and pathology.

College

College of Engineering and Computer Science

Department

Department of Mechanical and Aerospace Engineering

Terms of Offering

Fall

BME5572 - Biomedical Nanotechnology
Course Title

Biomedical Nanotechnology

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 3123C with a "C" (2.0) or better grade.

Course Description

Human Physiology, Bioelectric Phenomena and Neurons, Nanoelectronics for fabrication of biochips for human biomedical applications, self-assembly, bioelectronics, moral and ethical issues.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

BME5742C - Modeling Techniques and Methodologies in Bioengineering
Course Title

Modeling Techniques and Methodologies in Bioengineering

Credits Hours

3

Lab/Studio/Field Work Hours

1

Prerequisites

- EGN 3034, PHY 2048C, or C.I.

Course Description

Model identification and simulation implementation for physiological systems (e.g., cardiovasular, respiratory, neural, and muscular systems)

College

College of Engineering and Computer Science

Department

Department of Mechanical and Aerospace Engineering

Terms of Offering

Fall

BME6215 - Advanced Biomechanics
Course Title

Advanced Biomechanics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- BME 5216C or C.I.

Course Description

The objectives of this course are to understand the basic concepts and biomedical applications of medical robotics, human motion mechanics and neuro-mechanics.

College

College of Engineering and Computer Science

Department

Department of Mechanical and Aerospace Engineering

Terms of Offering

Spring

BME6231 - Continuum Biomechanics
Course Title

Continuum Biomechanics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EGM 3601.

Course Description

Material laws for biological tissues, with / without microstructure and/or an incompressibility constraint. Models of damage, growth, remodeling, and elctro-mechanical coupling. Introduction to multiscale modeling.

College

College of Engineering and Computer Science

Department

Department of Mechanical and Aerospace Engineering

Terms of Offering

Spring

BME6268C - Applied and Computational Biofluids
Course Title

Applied and Computational Biofluids

Credits Hours

3

Lab/Studio/Field Work Hours

2

Prerequisites

- EML 3701, EGM 3601, BME 5267, or C.I.

Course Description

Principles and foundations of applied fluid mechanics and computational methods to the human circulation.

College

College of Engineering and Computer Science

Department

Department of Mechanical and Aerospace Engineering

Terms of Offering

Spring

BME6500C - Bioinstrumentation
Course Title

Bioinstrumentation

Credits Hours

3

Lab/Studio/Field Work Hours

2

Course Description

An introduction to the fundamental theory and experimental techniques needed for performing bioengineering measurements, designing related experiments, and analyzing experimental results.

College

College of Engineering and Computer Science

Department

Department of Mechanical and Aerospace Engineering

Terms of Offering

Fall

BME6525 - Methods in Neural-Machine Interfaces
Course Title

Methods in Neural-Machine Interfaces

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- PHY 2048C and EML 4225, or C.I.

Course Description

Signal processing techniques for interpreting human intention from electromyography (EMG) and Electroencephalography (EEG) signals and human-safe control algorithms will be discussed and practiced.

College

College of Engineering and Computer Science

Department

Department of Mechanical and Aerospace Engineering

Terms of Offering

Spring

BME6908 - Independent Study
Course Title

Independent Study

Credits Hours

1 - 99

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing.

Course Description

Independent study on a topic taken to supplement current coursework.

College

College of Engineering and Computer Science

Department

Department of Mechanical and Aerospace Engineering

Terms of Offering

Occasional

BME6918 - Directed Research
Course Title

Directed Research

Credits Hours

1 - 99

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing.

Course Description

Student research under the direction of a BME faculty member.

College

College of Engineering and Computer Science

Department of Mechanical and Aerospace Engineering

Terms of Offering

Occasional

BME6935 - Topics in Biomedical Engineering
Course Title

Topics in Biomedical Engineering

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EML 3701 and EGM 3601 and graduate standing or C.I.

Course Description

In this course students will explore research topics in biomedical engineering (BME) guided by BME faculty. This team-taught course will involve seminars and presentations of research and case studies by faculty engaged in BME research as well as regional medical professionals.

College

College of Engineering and Computer Science

BMS - Basic Medical Sciences

BMS6001 - Cellular Function and Medical Genetics
Course Title

Cellular Function and Medical Genetics

Credits Hours

5

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation in the College of Medicine M.D. Program.

Course Description

Cellular Function and Medical Genetics is an integrated, multidisciplinary, review of the basic sciences of biochemistry, molecular biology; genetic, nutrition, pharmacology and cell biology underpinning modern medicine.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Fall

BMS6002 - Structure and Function
Course Title

Structure and Function

Credits Hours

11

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation in the College of Medicine M.D. program.

Course Description

An integrated module with a curriculum that includes Clinical Anatomy, Embryology, Microanatomy, Physiology, and Neurosciences using medical imaging, clinical presentations, lectures, small-group sessions, team-based learning sessions.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Fall

BMS6006 - Health and Disease
Course Title

Health and Disease

Credits Hours

5

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation in the College of Medicine M.D. program.

Course Description

Eight week module of the first year basic-science curriculum that integrates the following disciplines: immunology, microbiology, virology, pharmacology, and pathology.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Spring

BMS6015 - Practice of Medicine I
Course Title

Practice of Medicine I

Credits Hours

7

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation in the College of Medicine M.D. program.

Course Description

Extending throughout the first year of medical school, this module includes skills training in medical interviewing and physical examination while also addressing the context of the medical practice.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Spring
Fall

BMS6016 - Practice of Medicine II
Course Title

Practice of Medicine II

Credits Hours

8

Lab/Studio/Field Work Hours

0

Prerequisites

- Completion of M-1 Term.

Course Description

P-2: Practice of Medicine is a year long module which teaches advanced clinical examination techniques and clinical reasoning skills integrated with organ systems modules.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Spring
Fall

BMS6050 - Psychosocial Issues in Healthcare
Course Title

Psychosocial Issues in Healthcare

Credits Hours

4

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation in the College of Medicine M.D. program. This module covers the role of psychosocial factors in health and illness, emphasizing communication skills, cultural differences, human sexuality, domestic violence, and alcohol misuse.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Spring

BMS6123 - Human Anatomy and Embryology
Course Title

Human Anatomy and Embryology

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Matriculation into the M.S. Genetic Counseling Program. An overview of the human body structure and development through lecture, group discussions, problem-solving, self-learning modules, team based learning, and clinical case studies.

College

College of Medicine

Department

Clinical Sciences

Terms of Offering

Fall

BMS6631 - Hematology and Oncology
Course Title

Hematology and Oncology

Credits Hours

4

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation in the College of Medicine M.D. Program.

Course Description

Overview of major hematologic diseases: coagulation, and basic neoplasia. Pathology, pharmacology, laboratory and clinical medicine disciplines, emphasizing disease classification, differential diagnosis, and current treatments.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Spring

BMS6632 - Endocrine and Reproductive Systems
Course Title

Endocrine and Reproductive Systems

Credits Hours

5

Lab/Studio/Field Work Hours

0

Prerequisites

- Completion of M-1 Term.

Course Description

The S-2 module is an integrated overview of diseases of the endocrine, reproductive, and genital systems. Pathology, pathophysiology, pharmacology, and clinical medicine disciplines are included.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Fall

BMS6633 - Cardiovascular and Pulmonary Systems
Course Title

Cardiovascular and Pulmonary Systems

Credits Hours

5

Lab/Studio/Field Work Hours

0

Prerequisites

- Completion of M-1 Term.

Course Description

The Cardio/Pulmonary module is an integrated, multidisciplinary, overview of medically-relevant cardiovascular and pulmonary conditions.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Fall

BMS6634 - Gastrointestinal and Renal Systems
Course Title

Gastrointestinal and Renal Systems

Credits Hours

5

Lab/Studio/Field Work Hours

0

Prerequisites

- Completion of M-1 Term.

Course Description

The module is one of six organ-system based modules scheduled for the M2 and end of M1 years. The module provides overview of diseases of the gastro and renal systems.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Fall

BMS6635 - Skin and Musculoskeletal Systems
Course Title

Skin and Musculoskeletal Systems

Credits Hours

4

Lab/Studio/Field Work Hours

0

Prerequisites

- Completion of M-1 Term.

Course Description

The module is an integrated overview of diseases and disorders affecting the skin, connective tissues, and musculoskeletal systems.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Spring
Fall

BMS6636 - Brain and Behavior
Course Title

Brain and Behavior

Credits Hours

6

Lab/Studio/Field Work Hours

0

Prerequisites

- Completion of M-1 Term.

Course Description

This module integrates foundational principles of basic clinical neuroscience relevant for understanding normal nervous system function and the pathophysiologic basis of nervous system disorders.

College

College of Medicine

Department

College of Medicine MD Program

Terms of Offering

Spring

BMS6760 - Introduction to Genetic Counseling 1
Course Title

Introduction to Genetic Counseling 1

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation into the M.S. Genetic Counseling Program.

Course Description

An introduction of the basic principles of genetic counseling.

College

College of Medicine

Department

Clinical Sciences

Terms of Offering

Fall

BMS6761 - Introduction to Genetic Counseling 2
Course Title

Introduction to Genetic Counseling 2

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation into the M.S. Genetic Counseling Program.

Course Description

This course is a continuation of the basic principles of Genetic Counseling.

College

College of Medicine

Department

Clinical Sciences

Terms of Offering

Spring

BMS6762 - Advanced Genetic Counseling 1
Course Title

Advanced Genetic Counseling 1

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation into the M.S. Genetic Counseling Program.

Course Description

An overview of the advanced principles of genetic counseling; understanding the importance of pedigree, how to build a rapport with patients, and prepare for interactions with clients.

College

College of Medicine

Department

Clinical Sciences

Terms of Offering

Fall

BMS6763 - Advanced Genetic Counseling 2
Course Title

Advanced Genetic Counseling 2

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation into M.S. Genetic Counseling Program.

Course Description

Overview to continue the advanced principles of genetic counseling 2; the history of genetic counseling, the professional organizations, practice guidelines, and code of ethics.

College

College of Medicine

Department

Clinical Sciences

Terms of Offering

Spring

BMS6764 - Medical Biochemistry and Physiology For Genetic Counselors
Course Title

Medical Biochemistry and Physiology For Genetic Counselors

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation into the M.S. Genetic Counseling Program.

Course Description

An overview of the fundamentals of medical biochemistry and physiology for genetic counselors.

College

College of Medicine

Department

Clinical Sciences

Terms of Offering

Spring

BMS6765 - Genetic Diseases of Human Organ Systems
Course Title

Genetic Diseases of Human Organ Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation into the M.S. Genetic Counseling Program.

Course Description

The Genetic Diseases of Human Organ Systems course provides an overview of genetic disease affecting the human organ systems through lecture, group discussions and problem solving, self-learning modules, team based learning, and clinical case studies.

College

College of Medicine

Department

Clinical Sciences

Terms of Offering

Spring

BMS6766 - Inborn Errors of Metabolism
Course Title

Inborn Errors of Metabolism

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation into the M.S. Genetic Counseling Program.

Course Description

Overview of the fundamentals of genetic diseases associated with inborn errors of metabolism.

College

College of Medicine

Department

Clinical Sciences

Terms of Offering

Summer

BMS6767 - Molecular Diagnostics
Course Title

Molecular Diagnostics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation into the M.S. Genetic Counseling Program.

Course Description

An overview of basic laboratory skills used in molecular genetic clinical diagnostic laboratories for detecting genetic diseases.

College

College of Medicine

Department

Clinical Sciences

Terms of Offering

Fall

BMS6821 - Healthcare Ethics
Course Title

Healthcare Ethics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Matriculation into the M.S. Genetic Counseling Program.

Course Description

An overview on the ethical issues in healthcare, and also discuss influences on ethical decisions made by healthcare providers and patients.

College

College of Medicine

Department

Clinical Sciences

Terms of Offering

Fall

BMS6902 - Journal Club
Course Title

Journal Club

Credits Hours

1

Lab/Studio/Field Work Hours

0

Course Description

Matriculation into the M.S. Genetic Counseling Program. Students will review and discuss current literature relating to the practice of genetic counseling.

College

College of Medicine

Department

Clinical Sciences

Terms of Offering

CAP - Computer Applications

CAP5055 - AI for Game Programming
Course Title

AI for Game Programming

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- CS Foundation Exam or EEL 4851C or C.I.

Course Description

Surveys cutting-edge AI techniques for video games and board games and contrasts them with more traditional approaches.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Spring

CAP5100 - Human-Computer Interface Design
Course Title

Human-Computer Interface Design

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- COP 4331C, graduate standing and/or approval of the Director of the Software Engineering Certificate Program.

Course Description

Focuses on dynamics of human-computer interaction. Provides a comprehensive overview of HCI design as a software discipline. Features a user-centered approach to Web-based application design.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Fall

CAP5115 - Virtual Reality Engineering
Course Title

Virtual Reality Engineering

Credits Hours

3

Lab/Studio/Field Work Hours

1

Prerequisites

- MAS 3105 or C.I.

Course Description

Virtual reality, scene graphs and computer graphics, development of travel, selection, manipulation, system control, animation-based, and physics-based interaction techniques, implementation of 360° videos.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

CAP5415 - Computer Vision

Course Title

Computer Vision

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- COP 3503C, MAC 2312 and COT 3960.

Course Description

Image formation, binary vision, region growing and edge detection, shape representation, dynamic scene analysis, texture, stereo and range images, and knowledge representation.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Fall

CAP5510 - Bioinformatics

Course Title

Bioinformatics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Background in programing language or molecular biology.

Course Description

This course introduces problems, concepts, algorithms, and applications in Bioinformatics. It covers essential topics such as sequence alignment and prediction of gene and protein structure.

College

College of Engineering and Computer Science

Department of Computer Science

Terms of Offering

Spring

CAP5610 - Machine Learning
Course Title

Machine Learning

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- CAP 4630 or C.I.

Course Description

Origin/evaluation of machine intelligence; machine learning concepts and their applications in problem solving, planning and "expert systems" symbolic role of human and computers.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Occasional

CAP5619 - Artificial Intelligence for FinTech
Course Title

Artificial Intelligence for FinTech

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- COT 5840.

Course Description

Fundamentals of machine learning; deep learning; reinforcement learning; applications to customer service automation, personalization, biometrics, process automation, and fraud prevention.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Fall

CAP5636 - Advanced Artificial Intelligence

Course Title

Advanced Artificial Intelligence

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- CAP 4630.

Course Description

Al theory of knowledge representation, "expert systems", memory organization, problem solving, learning, planning, vision, and natural language.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Fall

CAP5725 - Computer Graphics I

Course Title

Computer Graphics I

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Architecture of graphics processors; display hardware; principles of programming and display software; problems and applications of graphic systems.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Spring

CAP5727 - Realistic Real-time Rendering
Course Title

Realistic Real-time Rendering

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Topics in interactive computer graphics, software, hardware, perception, physics of light, lighting models, indirect lighting, other natural phenomena and how to simulate them in realtime.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Fall

CAP5738 - Visualization Techniques for Data Analysis
Course Title

Visualization Techniques for Data Analysis

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

COP 3330, COP 3502C. Techniques for visualization that are useful for analyzing and presenting quantitative information are covered. Projects analyze one or more real-world publicly-available datasets. Understanding the data, visualizing it, creating hypotheses, and visually exploring them. Application of statistical techniques to test hypotheses about data trends and visualize how well their hypotheses match with their analysis.

CAP6105 - Pen-Based User Interfaces
Course Title

Pen-Based User Interfaces

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- CAP 5610 or C.I.

Course Description

Designed to give students a thorough understanding of the techniques, algorithms, and evaluation methodologies used in designing and developing pen-, sketch-, and gesture-based user interfaces.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Fall

CAP6110 - Augmented Reality Engineering
Course Title

Augmented Reality Engineering

Credits Hours

3

Lab/Studio/Field Work Hours

1

Prerequisites

- CAP 5115.

Course Description

Augmented reality, tracking, situated visualization, simultaneous localization and mapping, AR interactions, calibration, registration, occlusion, photometric registration, common illumination, diminished reality, viewpoint guidance, multiple perspectives, collaboration.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Spring

CAP6545 - Machine Learning Methods for Biomedical Data
Course Title

Machine Learning Methods for Biomedical Data

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- CAP 5510 or C.I.

Course Description

Summarize computational techniques for bridging two fields: machine learning and biomedical science to illustrate successful data mining and knowledge discovery in an interdisciplinary context.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Occasional

CAP6614 - Current Topics in Machine Learning
Course Title

Current Topics in Machine Learning

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- CAP 5610 or C.I.

Course Description

Machine learning, the study of algorithms that allow computer programs to learn from experience, is a rapidly changing area. This course will be a deep dive into current topics in machine learning, collected from papers appearing at recent machine learning conferences.

College

College of Engineering and Computer Science

Department

CAP6616 - Neuroevolution and Generative and Developmental Systems
Course Title

Neuroevolution and Generative and Developmental Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- COP 3503C or C.I.

Course Description

Focuses on evolving neural networks for difficult sequential decision and control tasks and associated issues in efficient encoding and representation.

College

College of Engineering and Computer Science

Department

Department of Computer Science

Terms of Offering

Occasional

CAP6640 - Computer Understanding of Natural Language
Course Title

Computer Understanding of Natural Language

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- CAP 5636.

Course Description

A study of the different approaches to build programs to understand natural language. The theory of parsing, knowledge representation, memory, and inference will be studied.

College

College of Engineering and Computer Science

Department

Department of Computer Science

CCJ6027 - Criminal Justice Responses to Terrorism
Course Title

Criminal Justice Responses to Terrorism

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to the Criminal Justice graduate program or C.I. Critically examines phenomena of domestic and international terrorism to give students a solid grounding of salient issues in developing crime control strategies to prevent terrorism and mount appropriate responses to incidents.

Department of Criminal Justice

Terms of Offering

Spring

CCJ6106 - Policy Analysis in Criminal Justice
Course Title

Policy Analysis in Criminal Justice

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to Criminal Justice graduate program, graduate certificate, or C.I.

Course Description

This course is designed to familiarize students with the causes and consequences of public policy with an emphasis on criminal justice policy.

College

College of Community Innovation and Education

Department

Department of Criminal Justice

CCJ6118 - Criminal Justice Organizations
Course Title

Criminal Justice Organizations

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing or C.I.

Course Description

Theory and research on complex organizations are applied in criminal justice settings. Alternative organizational goals, structures, staffing patterns, management styles and planning strategies are examined.

CES - Civil Engineering Structure

CES5144 - Matrix Methods for Structural Analysis
Course Title

Matrix Methods for Structural Analysis

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- CES 4100C or C.I.

Course Description

Implementation of the matrix methods for structural analysis that are commonly and currently used in practice and in research, special topics such as finite element formulations, special analysis procedures, and use of software packages.

DIG5637 - Game Programming Fundamentals

Course Title

Game Programming Fundamentals

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to FIEA M.S. in Interactive Entertainment program or C.I.

Course Description

Introduction to real-time game programming fundamentals, including computer architecture and low-level programming and optimization. Focus on game consoles and cross-platform software development.

College

College of Sciences

Department

Nicholson School of Communication and Media

Terms of Offering

Fall

DIG5831 - Computational Media
Course Title

Computational Media

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- DIG 5508 Programming for Digital Media.

Course Description

Computational media techniques used in interactive media, focusing on authorship and creative applications. Topics include style transfer, voice recognition, and synthesis and text generation.

College

College of Sciences

Department

Nicholson School of Communication and Media

Terms of Offering

Spring

DIG5856 - Experimentation, Application and Innovation in Games
Course Title

Experimentation, Application and Innovation in Games

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- DIG 5529C or C.I.

Course Description

Survey and development of games being used in non-traditional applications, such as medical simulation, education and research.

College

College of Sciences

Department

Nicholson School of Communication and Media

Terms of Offering

Spring

DIG5865 - The History of Animation and Visual Effects
Course Title

The History of Animation and Visual Effects

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Emerging Media MFA - Animation and Visual Effects track student or C.I. History of animation and visual effects from beginning to present covering a wide-range of narrative, independent, commercial, and experimental projects produced throughout the world.

College

College of Arts and Humanities

Department

School of Visual Arts and Design

Terms of Offering

Fall

DIG5875C - Introduction to Modeling and Simulation
Course Title

Introduction to Modeling and Simulation

Credits Hours

3

Prerequisites

- STA 2023 or equivalent

Course Description

Introduction to the theory and practice of modeling and simulation with emphasis on multidisciplinary scientific underpinnings.

College

College of Graduate Studies

DIG6099C - Media Distribution
Course Title

Media Distribution

Credits Hours

3

Lab/Studio/Field Work Hours

3

Prerequisites

- DIG 6558 or C.I.

Course Description

Theory and practical application of videogame messaging, advertisement and distribution.

College

College of Sciences

Department

Nicholson School of Communication and Media

Terms of Offering

Summer

DIG6136 - Design for Interactive Media
Course Title

Design for Interactive Media

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- DIG 5508: Programming for Digital Media, or C.I.

Course Description

This studio course gives students tangible experience with the design principles, methodologies, and processes used for interactive media.

College

College of Sciences

Department

Nicholson School of Communication and Media

Terms of Offering

Spring

DIG6365C - Media and Music for Animation and Visual Effects
Course Title

Media and Music for Animation and Visual Effects

Credits Hours

3

Lab/Studio/Field Work Hours

1

Course Description

Course will examine the use and effect of music/sound effects in various forms of media: film, games, commercials, and other forms of multimedia.

College

College of Arts and Humanities

Department

School of Visual Arts and Design

Terms of Offering

Spring

DIG6377C - Visual Effects for Animation and Live Action II
Course Title

Visual Effects for Animation and Live Action II

Credits Hours

3

Lab/Studio/Field Work Hours

2

Course Description

DIG 5385C Visual Effects for Animation and Live Action I or C.I. Integration of digital elements and live action footage and the aesthetic critique of those results.

College

College of Arts and Humanities

Department

School of Visual Arts and Design

Terms of Offering

Spring

DIG6379C - Editing for Animation and Visual Effects II: Practical Editing

Course Title

Editing for Animation and Visual Effects II: Practical Editing

Credits Hours

3

Lab/Studio/Field Work Hours

2

Prerequisites

- DIG 5378C or C.I.

Course Description

Students will apply practical editing solutions and incorporate audio to their own animation or visual effects material.

College

College of Arts and Humanities

Department

School of Visual Arts and Design

Terms of Offering

Fall

DIG6384C - Directing for Animation and Visual Effects

Course Title

Directing for Animation and Visual Effects

Credits Hours

3

Lab/Studio/Field Work Hours

2

Course Description

Emerging Media MFA - Animation and Visual Effects track student or C.I. Topics in production planning and adaptation of live action directing techniques to unique problems in Animation and Visual Effects.

College

College of Arts and Humanities

Department

School of Visual Arts and Design

Terms of Offering

Fall

DIG6388C - Animation and Visual Effects Production III
Course Title

Animation and Visual Effects Production III

Credits Hours

3

Lab/Studio/Field Work Hours

2

Prerequisites

- DIG 5366C or C.I.

Course Description

Preproduction (including storyboards, visual development, and character and environmental design) for individual MFA thesis project created and presented for faculty approval.

College

College of Arts and Humanities

Department

School of Visual Arts and Design

Terms of Offering

Fall

DIG6389C - Animation and Visual Effects Production IV
Course Title

Animation and Visual Effects Production IV

Credits Hours

3

Lab/Studio/Field Work Hours

2

Prerequisites

- DIG 6388C or C.I.

Course Description

Research and production of an initial animation test demonstrating the visual look and process strategy for final MFA thesis project and presentation for faculty approval.

College

College of Arts and Humanities

Department

School of Visual Arts and Design

Terms of Offering

Spring

DIG6432 - Transmedia Story Creation
Course Title

Transmedia Story Creation

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Film and digital media majors or C.I.

Course Description

Repurposing of traditional stories: creation of authentic environments and the emergence of new authoring scenarios.

College

Fall

DIG6436 - Ethnographic Storytelling and New Media
Course Title

Ethnographic Storytelling and New Media

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing.

Course Description

Theories and practices related to ethnographic storytelling using new media.

College

College of Arts and Humanities

Department

College of Arts and Humanities Dean's Office

Terms of Offering

Odd Fall

DIG6524 - Studio 1
Course Title

Studio 1

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing.

Course Description

Studio project management, conceptualization, and prototyping for intensive digital projects. Create project proposal and timeline, concept and design documentation, and prototype, and participate in critiques.

College

College of Sciences

Department

Nicholson School of Communication and Media

Terms of Offering

Fall

DIG6528 - Studio 2
Course Title

Studio 2

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing.

Course Description

Continuing studio sequence for students producing a culminating digital project. Students produce a polished final project for public showcase and/or exhibition.

College

College of Sciences

Department

Nicholson School of Communication and Media

Terms of Offering

Spring

DIG6546 - Previsualization and Concept Development
Course Title

Previsualization and Concept Development

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Film and digital medial majors, DIG 6136, or C.I.

Course Description

Skills and knowledge for planning and developing a new feature length film or digital media project.

College

College of Sciences

EEE5323 - Radio Frequency Integrated Circuit Design

Course Title

Radio Frequency Integrated Circuit Design

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 3307C and EEL 3470.

Course Description

This course introduce the principles, analysis, and design of Radio frequency (RF) integrated circuits for wireless communication systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Fall

EEE5332C - Thin Film Technology
Course Title

Thin Film Technology

Credits Hours

3

Lab/Studio/Field Work Hours

3

Prerequisites

- EEE 3350 or equivalent.

Course Description

Presents the various thin film deposition techniques for the fabrication of microelectronic, semiconductor, and optical devices.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

Current Fee Per Student

$70.00

EEE5352 - Semiconductor Material and Device Characterization
Course Title

Semiconductor Material and Device Characterization

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 3350 or C.I.

Course Description

Semiconductor material characterization resistivity, mobility, doping carrier lifetime, device properties, threshold voltage, interface charge of MOS devices, optical and surface characterization of films.

College

College of Engineering and Computer Science

Department

Terms of Offering

Odd Fall

EEE5353 - Semiconductor Device Modeling and Simulation

Course Title

Semiconductor Device Modeling and Simulation

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 3307C.

Course Description

Large signal and small signal model development for semiconductor diodes, BJTs, and MOSFETs. Parameter extraction, numerical algorithm, and SPICE simulation are included.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEE5356C - Fabrication of Solid-State Devices

Course Title

Fabrication of Solid-State Devices

Credits Hours

4

Lab/Studio/Field Work Hours

3

Prerequisites

- EEE 3350.

Course Description

Fabrication of microelectronic devices, processing technology, ion implantation and diffusion, device design, and layout. Laboratory includes device processing technology.

EEE5378 - CMOS Analog and Digital Circuit Design
Course Title

CMOS Analog and Digital Circuit Design

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 4309C.

Course Description

Advanced principles and design techniques for CMOS ICs including most recent published results.

College

College of Engineering and Computer Science

Department

Terms of Offering

Fall

EEE5390C - Full-Custom VLSI Design

Course Title

Full-Custom VLSI Design

Credits Hours

3

Lab/Studio/Field Work Hours

3

Course Description

EEE 3307C and EEE 3342C with a "C" (2.0) or better grade. Provide background in integrated devices, circuits, and digital subsystems needed for design and implementation of silicon logic chips.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEE5445 - Terahertz (THz) Integrated Systems

Course Title

Terahertz (THz) Integrated Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4436.

Course Description

High-frequency nonlinear electronic devices, millimeter-wave and THz integrated circuits, broadband time- and frequency-domain signal generation and sampling techniques, on-chip antennas.

College

College of Engineering and Computer Science

Department

Terms of Offering

Fall

EEE5513 - Digital Signal Processing Applications
Course Title

Digital Signal Processing Applications

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4750.

Course Description

The design and practical consideration for implementing Digital Signal Processing Algorithms including Fast Fourier Transform techniques, and some useful applications.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEE5542 - Random Processes I
Course Title

Random Processes I

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 3552C and STA 3032.

Course Description

Elements of probability theory, random variables, and stochastic processes.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring
Fall

EEE5555 - Surface Acoustic Wave Devices and Systems
Course Title

Surface Acoustic Wave Devices and Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 3552C.

Course Description

Course discusses SAW technology which includes the physical phenomenon, transducer design and synthesis, filter design and performance parameters. Actual devices and communication systems are presented.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEE5557 - Introduction to Radar Systems
Course Title

Introduction to Radar Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 3552C.

Course Description

Introduction to Pulse and CW Radar Systems. Chirp Radar Systems. Tracking Radar. Noise in Radar Systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEE5781 - Cyber-Physical Technologies for Smart Communities
Course Title

Cyber-Physical Technologies for Smart Communities

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate Standing, EEL 4781 or EEL 4515C or C.I.

Course Description

Introducing technologies that enable smart and connected communities; technologies include sensing, computing, communications, and device technologies related to smart grid, smart infrastructure, and intelligent transportation systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Fall

EEE5790 - Introduction to Secure Architectures
Course Title

Introduction to Secure Architectures

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4768.

Course Description

This course will provide the students with basic understanding of the state-of-the-art support for implementing security primitives in commodity processors. Specifically, the course focus on Intel's Safe-Guard Extension(SGX), ARM's TrustZone and AMD's SME and SEV.

College

EEE6317 - Power Semiconductor Devices and Integrated Circuits
Course Title

Power Semiconductor Devices and Integrated Circuits

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 3350 or equivalent or C.I.

Course Description

Fundamental understanding of modern power semiconductor devices and integrated circuits (ICs) in relation to their applications in power electronics systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEE6326C - MEMS Fabrication Laboratory
Course Title

MEMS Fabrication Laboratory

Credits Hours

3

Lab/Studio/Field Work Hours

2

Prerequisites

- C.I.

Course Description

Silicon Nitride and Poly-silicon Depositions, Photolithography, Dry and Wet etching processes, Metal depositions and etching, MEMS device design and fabrication.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEE6327 - Design of Video Coding Systems
Course Title

Design of Video Coding Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4768C and EEL 4750.

Course Description

VLSI architectures and image/video coding algorithms, image/video coding standards, and architectural issues related with area/power/performance.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEE6338 - Advanced Topics in Microelectronics
Course Title

Advanced Topics in Microelectronics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- C.I.

Course Description

Covers advanced topics in microelectronics such as semiconductor device physics, semiconductor device fabrication, and semiconductor device modeling.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEE6347 - Trustworthy Hardware
Course Title

Trustworthy Hardware

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

EEE 5390C or EEL 5704 or C.I. Introduce the concept of trustworthy hardware. Review scientific publications in the area of trustworthy hardware. Design, analyze, and evaluate trustworthy embedded systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEE6358 - Advanced Semiconductor Device I
Course Title

Advanced Semiconductor Device I

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 3350.

Course Description

First course in advanced semiconductor device physics and modeling. Main stream devices including junctions diale, bipolar transistor, and metal-oxide field-effect transistor.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEE6406 - Modern EDA Algorithms in VLSI
Course Title

Modern EDA Algorithms in VLSI

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4783.

Course Description

This course covers all of the most important aspects of modern Electronic Design Automation (EDA) software: logic synthesis, circuit placement, and routing algorithms. Students will not only learn theory but also gain hands-on experience by doing a software project.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEE6475 - CMOS Analog and Digital Integrated Circuit Design
Course Title

CMOS Analog and Digital Integrated Circuit Design

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 4309C or C.I.

Course Description

The objective of this class is to teach the graduate students the principle and techniques of CMOS IC design for high performance, low power, and RF applications.

College

College of Engineering and Computer Science

Department

Terms of Offering

Fall

EEE6504 - Adaptive Digital Signal Processing
Course Title

Adaptive Digital Signal Processing

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 5513 or C.I.

Course Description

Weiner filtering, Least Mean Square and Recursive Least Squares based algorithms, adaptive prediction and identification with applications such as echo cancellation, etc.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEE6505 - Multidimensional Digital Processing
Course Title

Multidimensional Digital Processing

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

EEE 5513 or C.I. Multidimensional signals and systems. Two-dimensional transforms and filters. Image processing applications.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEE6527 - Compressive Sensing
Course Title

Compressive Sensing

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

EEE 5542. This course offers a broad coverage of the emerging topic of compressive sensing. The focus of the course is on describing the ideas and techniques that have been developed in this field with emphasis on theoretical foundations, algorithm developments, and applications.

College

College of Engineering and Computer Science

Department

Terms of Offering

Fall

EEE6543 - Random Processes II
Course Title

Random Processes II

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 5542.

Course Description

Stochastic processes. Mean-squared estimation. Queueing theory. Spectral estimation. Applications to communications and radar systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEE6558 - Advanced Radar Systems
Course Title

Advanced Radar Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 5557.

Course Description

Advanced radar concepts: electromagnetic propagation and target scattering and fading; radar signal processing - target parameter estimation and information extraction, and radar system design.

College

College of Engineering and Computer Science

Department

EEE6712 - Modeling and Analysis of Networked Cyber-Physical Systems
Course Title

Modeling and Analysis of Networked Cyber-Physical Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing and (EEL 4781 or EEL 4515C) or C.I.

Course Description

Analysis, modeling and design of networked cyber-physical systems such as intelligent transportation systems and industrial control networks; stochastic hybrid systems, continuous and discrete system modeling approaches; industry standards in transportation, smart grid, industrial control, and their use and implication in design of distributed systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEE6721 - Evolvable Hardware
Course Title

Evolvable Hardware

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

EEL 5722C or C.I. Evolvable digital and analog computing hardware, including intrinsic and extrinsic reconfigurable architectures, self-adapting circuits, and autonomous computing architectures.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEE6780 - Advanced Topics in Real-Time Cyber Physical Systems
Course Title

Advanced Topics in Real-Time Cyber Physical Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5862/4862.

Course Description

This course will provide students recent research in real-time and cyber-physical systems by exploring important papers in selected topics.

EEL5173 - Linear Systems Theory
Course Title

Linear Systems Theory

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 3657.

Course Description

Models and properties of linear systems, transformation, controllability and observability, control and observer designs, MFD, and realization theory.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEL5185 - System Identification
Course Title

System Identification

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 3657 or C.I.

Course Description

Dynamic systems, models of time-invariant linear, time-varying and nonlinear systems, nonparametric frequency- and time-domain identification methods, kernel expansion techniques, parameter estimation methods, experiment design, and applications.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEL5245 - Power Electronics
Course Title

Power Electronics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 4309C.

Course Description

Principles of power electronics, power semiconductor devices, inverter topologies, switch-mode and resonant dc-to-dc converters, cyclo-converters, applications.

College

College of Engineering and Computer Science

Department

Terms of Offering

Fall

EEL5250 - Power System Detection and Estimation
Course Title

Power System Detection and Estimation

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4216 or C.I.

Course Description

This is an advanced course to power engineering, designed to provide students with the knowledge of stability and outage detection and state estimation methods.

Course Title

RF and Microwave Active Circuits

Credits Hours

4

Lab/Studio/Field Work Hours

3

Prerequisites

- EEL 4436C or EEL 5437C or equivalent.

Course Description

Transmission line, microwave network theory, impedance matching, noise, power gain amplifier, low noise amplifier, power amplifier, oscillator, mixer and microwave communication system.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

Current Fee Per Student

$40.00

EEL5462 - Antenna Analysis and Design
Course Title

Antenna Analysis and Design

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 3470 or equivalent.

Course Description

Fundamentals of antennas; dipoles, loops, arrays, apertures, and horns. Analysis and design of various antennas.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEL5582 - Fundamentals of Wireless Communications
Course Title

Fundamentals of Wireless Communications

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4515C and EEL 3021 Introduction to Randomness.

Course Description

Large and small scale radio propagation effects, performance of digital modulation over wireless channels, capacity analysis of wireless channels, signal processing techniques to mitigate fading effects and improve performance of wireless systems (diversity techniques, adaptive modulation, multiple antenna and MIMO systems).

College

College of Engineering and Computer Science

Department

Fall

EEL5690 - Medical Robotics
Course Title

Medical Robotics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 3657 or Medical students in their second year or later.

Course Description

Medical robots for minimally invasive surgery, kinematics, constrained workspace and dexterity, haptics, tele-operation and network based control, basics of laparoscopic surgery.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL5706 - Resilient Computer System Design
Course Title

Resilient Computer System Design

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

EEL 4768 or CDA 5106 or EEL 5708, or C.I. Advanced concepts in hardware/software fault tolerance: fault models, coding in computer systems, module and system level fault detection mechanisms, such as TMR, rollback, and recovery.

Terms of Offering

Occasional

EEL5722C - Field-Programmable Gate Array (FPGA) Design
Course Title

Field-Programmable Gate Array (FPGA) Design

Credits Hours

3

Lab/Studio/Field Work Hours

3

Prerequisites

- EEE 3342C with a "C" (2.0) or better grade.

Course Description

FPGA architectures, design flow, technology mapping, placement, routing, reconfigurable computing applications, and evolvable hardware.

College

College of Engineering and Computer Science

Department

Terms of Offering

Fall

EEL5780 - Wireless Networks
Course Title

Wireless Networks

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4781 or C.I.

Course Description

The wireless networking topics include: cellular networks, multiple access protocols, channel assignment and resource allocation, mobility and location management, handoffs, routing, authentication, call admission control and QoS provisioning, network layer issues, wireless data networking (WAP, GSM, GPRS, CDMA, WCDMA.).

College

Even Spring

EEL5789 - Software-Defined Networking
Course Title

Software-Defined Networking

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4781.

Course Description

Fundamentals of software-defined networking (SDN). Control, data, and management plane separation. Northbound and southbound APIs. Network function virtualization (NFV), network orchestration, service chaining. SDN and NFV protocols and controllers such as OpenFlow, OpenDaylight, Floodlight, and Open Network Operating System (ONOS).

EEL5820 - Image Processing

Course Title

Image Processing

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- MAP 2302, EEL 4750 or C.I.

Course Description

Two-dimensional signal processing techniques; pictorial image representation; spatial filtering; image enhancement and encoding; segmentation and feature extraction; introduction to image understanding techniques.

College

College of Engineering and Computer Science

Department

Terms of Offering

Odd Spring

EEL5825 - Machine Learning and Pattern Recognition
Course Title

Machine Learning and Pattern Recognition

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 3021 or STA 3032 or similar course in probability.

Course Description

Preliminaries of machine learning and pattern recognition, classification and regression, Neural Networks, decision tree classifiers, unsupervised learning, and other state-of-the-art topics.

College

College of Engineering and Computer Science

Department

Department of Electrical and Computer Engineering

EEL5862 - Real-Time Systems
Course Title

Real-Time Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- COP 4600 or EEL 4768 or EEL 4742C.

Course Description

Introduction to specification, analysis, design, and validation techniques for real-time (operating) systems with an emphasis on real-time scheduling theory.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEL5874 - Expert Systems and Knowledge Engineering
Course Title

Expert Systems and Knowledge Engineering

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4872 or CAP 4630 C.I.

Course Description

Introduction to expert systems in engineering. Expert systems tools and interviewing techniques. This course is hands-on and project oriented.

College

College of Engineering and Computer Science

Department

Terms of Offering

Department of Electrical and Computer Engineering

Terms of Offering

Fall

EEL5937ST1 - Introduction to Electronic Design Automation
Course Title

Introduction to Electronic Design Automation

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Introduction to electronic design automation (EDA) for the synthesis of circuits based on transistor and memristor technology with a focus on algorithms and data structures.

EEL5937ST2 - Real-Time Systems
Course Title

Real-Time Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Introduction to specification, analysis, design, and validation techniques for real-time (operating) systems with an emphasis on real-time scheduling theory.

EEL5937ST3 - Attacks and Defenses in Secure Architectures
Course Title

Attacks and Defenses in Secure Architectures

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

The course will bring students insights on the cutting-edge research in processor security with the understanding of the interactions between software and the underlying hardware.

EEL5937ST4 - Power System Dynamics and Stability
Course Title

Power System Dynamics and Stability

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

This is an advanced course to power systems engineering designed to provide students with the knowledge of power system dynamics and stability.

EEL5937ST5 - Future Computing Systems for Emerging Workloads
Course Title

Future Computing Systems for Emerging Workloads

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Introduction to future computing systems based on emerging technology and its application to emerging workloads as artificial intelligence and big data.

EEL6026 - Optimization of Engineering Systems

Course Title

Optimization of Engineering Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing and C.I.

Course Description

A unified treatment of optimization methods often used to solve problems in engineering and applied sciences. Software packages are used when appropriate.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6208 - Advanced Machines

Course Title

Advanced Machines

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4205.

Course Description

Theory of electric machines using reference frame transformations: Basic principles of dc and ac machines, including induction and synchronous, are included. Simulation techniques for steady state and dynamic performance analysis will be used to analyze operation of electric machines with solid state drives.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6246 - Power Electronics II
Course Title

Power Electronics II

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5245.

Course Description

Advanced topics in power electronics, soft-switching techniques, small-signal modeling of PWM and resonant converters, control techniques, power factor correction circuits.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6253 - Power System Resilience
Course Title

Power System Resilience

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5255.

Course Description

This is an advanced course to power systems engineering, designed to provide students with the knowledge of power system resilience.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6254 - Power Systems Reliability
Course Title

Power Systems Reliability

Credits Hours

3

Prerequisites

- EEL 4216

Course Description

Advanced course to power systems engineering, designed to provide a student with a comprehensive understanding of quantitative reliability evaluation of modern power systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Even Fall

EEL6257 - Data Analytics in Energy Systems
Course Title

Data Analytics in Energy Systems

Credits Hours

3

Lab/Studio/Field Work Hours

2

Prerequisites

- EEL 5255 or equivalent with a grade "C" or above, or C.I.

Course Description

Graduate level course. Introductions of data analytical methods for power system applications. Topics include energy forecasting, state estimation, demand response, load disaggregation, asset management, power system cybersecurity, grid-interactive buildings, and solar energy.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEL6266 - Power System Optimization
Course Title

Power System Optimization

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5255.

Course Description

This is an advanced course to power systems engineering designed to provide students with the knowledge of optimization technologies and their applications in power systems.

College

College of Engineering and Computer Science

EEL6269 - Advanced Topics in Power Engineering
Course Title

Advanced Topics in Power Engineering

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 6255.

Course Description

A current topic will be discussed such as power system transients, system protection, TandD, and dielectric engineering.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6272 - Smart Power Grids Protection
Course Title

Smart Power Grids Protection

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 4216 or C.I.

Course Description

Different aspects of protection of smart grids. Provides a comprehensive understanding of protection of modern power systems including protection of renewable energies and protection of automated power systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEL6278 - Attacks and Defenses in Secure Cyber-Physical Systems
Course Title

Attacks and Defenses in Secure Cyber-Physical Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL4294 Introduction to Smart Grid or equivalent or C.I.

Course Description

Topics to include basics of cyber-physical systems (CPSs), security challenges and issues for CPSs, and defense approaches to enhance their security.

College

College of Engineering and Computer Science

Department

Department of Electrical and Computer Engineering

Terms of Offering

$40.00

EEL6481 - Numerical Techniques in Electromagnetics
Course Title

Numerical Techniques in Electromagnetics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 6488 or C.I.

Course Description

Applications of finite difference methods (FDTD), finite element method, integral equation method (method of moments) to electromagnetics.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6482 - Electromagnetic Theory I
Course Title

Electromagnetic Theory I

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5439C or C.I.

Course Description

Maxwell's equations, boundary conditions, propagation and reflection, electromagnetic theorems and principles, guided waves and scattering.

College

College of Engineering and Computer Science

Department

Terms of Offering

Fall

EEL6489 - Advanced Topics in Electromagnetics and Microwaves
Course Title

Advanced Topics in Electromagnetics and Microwaves

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- C.I.

Course Description

Advanced and current topics in EM fields, antennas, and microwaves.

College

College of Engineering and Computer Science

Department of Electrical and Computer Engineering

Terms of Offering

Occasional

EEL6504 - Communications Systems Design
Course Title

Communications Systems Design

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 6530.

Course Description

Information and coding theory. Modem design. Binary and M-ary modulations. Intersymbol interference and pulse shaping. DS and FS spread-spectrum systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Fall

EEL6530 - Communication Theory
Course Title

Communication Theory

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 5542 or C.I.

Course Description

Communication in the presence of noise; analog and pulse modulation; use of phase-locked loops, synthesizers, VCOs, system implementations.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEL6532 - Information Theory and Coding
Course Title

Information Theory and Coding

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 5542 or C.I.

Course Description

Concepts regarding information: Covers entropy, channel capacity, Shannon's theorems, Fano's inequality, coding theory, linear, Hamming, and cyclic codes, Hamming, Singleton, Gilbert-Varshamov, and Plotkin Bounds.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEL6537 - Detection and Estimation
Course Title

Detection and Estimation

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

EEE 5542. Use of hypothesis testing (Bayes, Minimax, Neyman-Pearson) and estimation theory (Bayes, Maximum-likelihood) for detecting or estimating signals in noise. Application in communications and radar.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6590 - Advanced Topics in Communications
Course Title

Advanced Topics in Communications

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- C.I.

Course Description

Advanced and current topics in communications, such as coding theory, information theory, spread spectrum, etc.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6616 - Adaptive Control
Course Title

Adaptive Control

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5173.

Course Description

System identification and adaptive control design, including identification algorithms, MRAC, STR, and stochastic adaptive control. Lyapunov stability and input-output stability.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6618 - Probabilistic Methods for Neural Coding and Control
Course Title

Probabilistic Methods for Neural Coding and Control

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEE 5542 and EEL 5173, both with a C or better or C.I.

Course Description

This course provides an overview of advanced, state-of-the-art probabilistic methods used in the encoding/decoding of neural signals and control of neural systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Fall

EEL6619 - Nonlinear Robust Control and Applications
Course Title

Nonlinear Robust Control and Applications

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5173 and EEL 6621.

Course Description

Stability, performance and robustness of nonlinear systems with uncertainties, Lyapunov-based designs, recursive designs and nonlinear optimal designs.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6621 - Nonlinear Control Systems
Course Title

Nonlinear Control Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5173.

Course Description

Phase plane descriptions of nonlinear phenomena, limit cycles, jump conditions, stability, describing functions, Liapunov and Popov theory, time and frequency domain analysis for nonlinear systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Even Fall

EEL6662 - Advanced Robotics
Course Title

Advanced Robotics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5559 or C.I.

Course Description

Geometric Nonlinear Control, Control of Redundant Robots, Computer Vision and Vision-based control, Formation Control, and Cooperative Rules and Behaviors of Robotic Vehicles.

EEL6667 - Mobile Robotic Systems
Course Title

Mobile Robotic Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5173 or EEL 5630 .

Course Description

Non-holonomic systems, kinematics and dynamics, trajectory planning and obstacle avoidance, canonical terms, control design, stability, performance, and robustness.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6671 - Modern and Optimal Control Systems
Course Title

Modern and Optimal Control Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5173.

Course Description

The optimal control problem. Necessary conditions for constrained minimums in finite dimensional space. Application to discrete time control problems. Pontryagin conditions and Hamilton-Jacobi equations. Computational considerations.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6674 - Optimal Estimation for Control
Course Title

Optimal Estimation for Control

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5173 or C.I.

Course Description

Optimal filtering, smoothing, and prediction methods are analyzed with applications to a number of linear and nonlinear dynamic systems.

College

College of Engineering and Computer Science

Department

Terms of Offering

Occasional

EEL6675 - Stochastic Control
Course Title

Stochastic Control

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 3657 and EEL 4612C.

Course Description

Models and solution techniques for decision-making problems in the presence of uncertainty; optimal control of systems with stochastic dynamics with perfect and imperfect state information.

College

College of Engineering and Computer Science

Department

Terms of Offering

Spring

EEL6683 - Cooperative Control of Networked Autonomous Systems

Course Title

Cooperative Control of Networked Autonomous Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL5173 or consent of instructor.

Course Description

Fundamentals of cooperative control theory for autonomous vehicles and agents, with emphasis on consensus, effects of intermittent and delayed communication/sensing network, and cooperative control designs.

College

College of Engineering and Computer Science

Department

Terms of Offering

Odd Fall

EEL6723 - Reconfigurable Logic Applications

Course Title

Reconfigurable Logic Applications

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EEL 5722C or C.I.

Course Description

Field-programmable gate array (FPGA) architectures, reconfigurable computing applications, and emerging central processing unit CPU+FPGA hybrid platform. The overall objective is to investigate the state-of-the-art FPGA-based reconfigurable computing both from a hardware and software perspective.

Course Description

Research reveals that students often face challenges engaging in effective processes for successful learning, leading to the development of advanced learning technologies (ALTs), which aim to foster the use of effective problem solving, metacognitive monitoring, decision making during learning. There are multiple types of data that can be used for assessing how students learn with these ALTs. However, some data channels may not capture all processes a learner uses. Thus, using a combination of data channels will provide more detailed information about how learners are progressing through a task they are given. Depending on the context and research goals, some data channels will be more appropriate than others. The goal of this graduate seminar is to explore and critically examine theoretical, methodological, and analytical approaches for using multimodal data to assess learning with advanced learning technologies. This will include: (1) reading key publications in the fields of learning sciences, self-regulated learning, affective computing, and computer science and generating thought-provoking questions; (2) integrating key challenges in the literature and leading class discussions to examine these challenges (3) selecting the most appropriate data channels to investigate learning processes ; (4) understanding the types of variables data channels can generate; and (5) presenting an idea for developing a new advanced learning technology. In this seminar, we will address how we can use multimodal data to examine learning processes, how advanced learning technologies can be developed to foster the use of these processes, and how studies have been conducted to examine learning and performance with these different types of advanced learning technologies. The course outcomes align with the 5 goals of the seminar outlined above. Specifically, you will be able to: Read and critique academic papers in various disciplines Run stimulating class discussions about key issues in learning sciences Understand, apply, and critique the use of multimodal data Propose how to best use different types of data for assessing learning with an ALT Generate ideas for developing a new advanced learning technology

Research reveals that students often face challenges engaging ineffective processes for successful learning, leading to the development of advanced learning technologies (ALTs), which aim to foster the use of effective problem solving, metacognitive monitoring, decision making during learning. There are multiple types of data that can be used for assessing how students learn with these ALTs. However, some data channels may not capture all the processes a learner uses. Thus, using a combination of data channels will provide more detailed information about how learners are progressing through a task they are given. Depending on the context and research goals, some data channels will be more appropriate than others. The goal of this graduate seminar is to explore and critically examine theoretical, methodological, and analytical approaches for using multimodal data to assess learning with advanced learning technologies. This will include: (1) reading key publications in the fields of learning sciences, self-regulated learning, affective computing, and computer science and generating thought-provoking questions; (2) integrating key challenges in the literature and leading class discussions to examine these challenges (3) selecting the most appropriate data channels to investigate learning processes ; (4) understanding the types of variables data channels can generate; and (5) presenting an idea for developing a new advanced learning technology. In this seminar, we will address how we can use multimodal data to examine learning processes, how advanced learning technologies can be developed to foster the use of these processes, and how studies have been conducted to examine learning and performance with these different types of advanced learning technologies. The course outcomes align with the 5 goals of the seminar outlined above. Specifically, you will be able to: Read and critique academic papers in various disciplines Run stimulating class discussions about key issues in learning sciences Understand, apply, and critique the use of multimodal data Propose how to best use different types of data for assessing learning with an ALT Generate ideas for developing a new advanced learning technology

EME6938ST3 - ST: Metacognition
Course Title

ST: Metacognition

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

The goal of this graduate seminar is to critically examine contemporary interdisciplinary research in the area of metacognition.

EME6938ST4 - ST: Story Design for Instruction
Course Title

ST: Story Design for Instruction

Credits Hours

3

Lab/Studio/Field Work Hours

3

Course Description

The course considers story as an instructional approach for knowledge transfer to meet learning outcomes through instructional design. Stories can enhance instruction, training, and communication.

EME6940 - Theory into Practice in Educational Technology
Course Title

Theory into Practice in Educational Technology

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Completion of all core courses in educational technology.

Course Description

Practicum in facilitating the utilization of instructional media and information technologies.

College

College of Community Innovation and Education

- Admission to the graduate college.

Course Description

This course provides students with an opportunity to achieve new venture development milestones, demonstrate specific entrepreneurial competencies associated with those milestones, and connect with community experts tasked with assessing their efforts. It emphasizes entrepreneurship as practice, and rewards students for making tangible progress on connecting with customers, developing solutions, and organizing startup ventures.

ENV - Engineering: Environmental

ENV5410 - Water Treatment
Course Title

Water Treatment

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- EES 4202C or ENV 5517 or C.I.

Course Description

Potable water regulations, standards, chemical reactors, oxidation, disinfection, disinfection by-products, ultraviolet irradiation. Internal corrosion and microbial control in municipal and industrial water distribution systems.

ENV5517 - Engineering Chemical and Biological Processes
Course Title

Engineering Chemical and Biological Processes

Credits Hours

3

Lab/Studio/Field Work Hours

0

Corequisites

- ENV 4561(or equivalent) or C.I.

Course Description

Coverage of equilibrium/aquatic chemistry, softening and coagulation, and disinfection of water. Microbiology and biochemistry as applied to activated sludge system design.

College

College of Engineering and Computer Science

Department

Department of Civil, Environmental, and Construction Engineering

Terms of Offering

Fall

ENV5636 - Environmental and Water Resources Systems Analysis
Course Title

Environmental and Water Resources Systems Analysis

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- ENV 3001 or C.I.

Course Description

Discussion of environmental and water resources systems with the emphasis on cost-effectiveness, pollution prevention, and sustainability to aid in environmental engineering decision-making.

Department

School of Teacher Education

Terms of Offering

Fall

IDS6938ST1 - Hardware Prototyping for Modeling and Simulation
Course Title

Hardware Prototyping for Modeling and Simulation

Credits Hours

3

Course Description

Introduction to 3D design and printing, microcontroller programming, and circuit board construction. Additionally, IoT and MQTT protocols to manage data, and IP protection topics.

IDS6938ST2 - Stereoscopy for Art and Science Using 3D Applications
Course Title

Stereoscopy for Art and Science Using 3D Applications

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Hands-on use of large 3D applications, such as MAYA and NUKE, to explore how stereoscopic 3D (S3D) can further enhance engineering-related problems and scientific query. Additionally, the emerging field of stereoscopic art is addressed.

IDS6938ST3 - ST: Interdisciplinary Approaches to Research
Course Title

ST: Interdisciplinary Approaches to Research

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Explores methods/assumptions/challenges experienced in interdisciplinary research. Includes practice integrating discipline-based research methods with reflexive/dialogic methods; helps prepare students for capstone project or thesis.

IDS6938ST4 - ST: Usable Security & Privacy
Course Title

ST: Usable Security & Privacy

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Introduces usability problems in security and privacy methods, tools, and software and overviews prominent examples of both failures and successes in usable security and privacy.

IDS6938ST5 - ST: Nonlinear Dynamics in the Cognitive and Behavioral Sciences
Course Title

ST: Nonlinear Dynamics in the Cognitive and Behavioral Sciences

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Theoretical and practical aspects of research applying nonlinear dynamical systems methodologies as they relate to human-centered Modeling and Simulation.

IDS6939 - Reforming Curriculum in Mathematics and Science Education
Course Title

Reforming Curriculum in Mathematics and Science Education

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing and valid Florida Teaching Certificate or C.I. Emphasizes the reform movement including technology, history of curriculum, curriculum theory, and standards documents.

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to a doctoral program in Nursing or C.I.

Course Description

This course examines the foundations and application of theory in nursing science.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Fall

NGR7163 - Illness as a Social Construct
Course Title

Illness as a Social Construct

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- NGR 7818 or C.I.

Course Description

Focused examination of concepts, theories, and research related to physical expression of disease and its link to individual psychosocial responses, beliefs, relationships and social environment. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing

Terms of Offering

Occasional

NGR7661 - Healthcare for Vulnerable Populations

Course Title

Healthcare for Vulnerable Populations

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Doctoral standing in the College of Nursing or C.I.

Course Description

Health and healthcare issues of vulnerable populations and the influence of social, cultural, political and economic factors. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Fall

NGR7673 - Epidemiology Principles in Advanced Practice Nursing

Course Title

Epidemiology Principles in Advanced Practice Nursing

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to Doctor of Nursing Practice program or C.I.

Course Description

Advanced application of epidemiological concepts in community and public health practice, including disease surveillance, prevalence, prevention and statistical management of patient aggregate data. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Fall

NGR7748L - Advanced Clinical Practice Selective for Advanced Practice Nursing
Course Title

Advanced Clinical Practice Selective for Advanced Practice Nursing

Credits Hours

1 - 3

Lab/Studio/Field Work Hours

3-Jan

Prerequisites

- NGR 7176

Corequisites

- NGR 7065.

Course Description

Clinical management of clients with complex health maintenance, health promotion and illness management needs. Graded S/U. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Practice

Terms of Offering

Fall

NGR7778L - Advanced Leadership Selective for DNP
Course Title

Advanced Leadership Selective for DNP

Credits Hours

3

Lab/Studio/Field Work Hours

3

Prerequisites

- Admission to the Doctor of Nursing Practice, Executive Doctor of Nursing Practice track or C.I.

Course Description

Application of evidence-based management processes to support decision making in the health care environment. Graded S/U. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Fall

NGR7779C - Program Development and Management for DNP
Course Title

Program Development and Management for DNP

Credits Hours

3

Lab/Studio/Field Work Hours

2

Prerequisites

- Admission to the Doctor of Nursing Practice, Executive Doctor of Nursing Practice track or C.I.

Course Description

Application of inquiry, critical thinking and strategic planning skills related to project planning, management, evaluation and dissemination. Graded S/U. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Fall

NGR7793 - Leadership and Economics in Advanced Practice Nursing
Course Title

Leadership and Economics in Advanced Practice Nursing

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- NGR 7891.

Course Description

Advanced analysis of change management, leadership theories/strategies, finance and resource management and the health care systems and economic structures in Advanced Practice Nursing.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Summer

NGR7805 - Doctoral Scholarship
Course Title

Doctoral Scholarship

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to the Ph.D. track or C.I.

Course Description

An introduction to doctoral scholarship in support of beginning a program of research. Includes responsible conduct of science and research ethics consideration. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Every Semester

NGR7806 - Doctoral Scholarship II
Course Title

Doctoral Scholarship II

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- NGR 7805 or C.I.

Course Description

A continuation of Doctoral Scholarship with an emphasis on synthesizing the research and theoretical literature related to the students area of research. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Summer

NGR7807 - Research Approaches and Designs for Nursing and Healthcare
Course Title

Research Approaches and Designs for Nursing and Healthcare

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Doctoral standing in the College of Nursing or C.I.

Course Description

Quantitative and qualitative approaches to studying nursing and health related phenomena; ethical issues; internal and external validity; comparison of designs. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Fall

NGR7808 - Qualitative Methods in Nursing and Healthcare II
Course Title

Qualitative Methods in Nursing and Healthcare II

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- NGR 7815 Qualitative Methods I or equivalent or C.I.

Course Description

Application of qualitative methodologies for in-depth study of nursing and health-related phenomena; hands-on experience with data collection, analysis, and interpretation. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Fall

NGR7812 - Advanced Study Design and Methods
Course Title

Advanced Study Design and Methods

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- NGR 7807; NGR 7817; NGR 7815; and NGR 7818 or NGR 7808; or C.I.

Course Description

Identify and discuss evolving trends in advanced research design and methods as they apply to the development of nursing research programs.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Spring

NGR7815 - Qualitative Methods in Nursing Research and Healthcare I
Course Title

Qualitative Methods in Nursing Research and Healthcare I

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Doctoral standing in the College of Nursing or C.I.

Course Description

Knowledge of qualitative research designs and methods for studying nursing and health-related phenomena. Course may be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Fall

NGR7817 - Quantitative Methods for Nursing and Healthcare I
Course Title

Quantitative Methods for Nursing and Healthcare I

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- NGR 7807 or C.I.

Course Description

Designing quantitative studies and related statistical analysis; maximizing statistical power; ethical issues related to nursing research. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Fall

NGR7818 - Quantitative Methods for Nursing and Healthcare II
Course Title

Quantitative Methods for Nursing and Healthcare II

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- NGR 7817 Quant Methods I or its equivalent or C.I.

Course Description

Advanced research designs; multivariate and biostatistical data analysis in nursing and health related research. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Spring

NGR7820 - Innovative Technologies in Healthcare
Course Title

Innovative Technologies in Healthcare

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Doctoral standing in the College of Nursing or C.I.

Course Description

Application of innovative technologies in healthcare to research, teaching and practice. Legal, ethical and cultural issues related to technology transfer. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Summer

NGR7823 - Psychometrics and Measurement for Nursing Research
Course Title

Psychometrics and Measurement for Nursing Research

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- NGR 7817, NGR 7815, or C.I.

Course Description

Developing, testing and applying measurement theory in physiological and psycho social research analysis of psychometric properties of instruments and methods appropriate to theoretical perspectives and scientific rigor. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Fall

NGR7827 - Concepts, Measurement, and Data Management
Course Title

Concepts, Measurement, and Data Management

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to Doctor of Nursing Practice program, NGR 6813 or equivalent, C.I.

Course Description

Identification, analysis, and measurement of concepts; analysis and management of clinical data. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Spring

NGR7855C - Evidence-Based Practice Development for DNP
Course Title

Evidence-Based Practice Development for DNP

Credits Hours

3

Lab/Studio/Field Work Hours

1

Prerequisites

- Admission to the Doctor of Nursing Practice, Executive Doctor of Nursing Practice track or C.I.

Course Description

Critique and synthesis of evidence for practice related questions. Includes analysis of the context where evidence will be applied. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Practice

Terms of Offering

Spring
Fall

NGR7892 - Healthcare Systems and Policy
Course Title

Healthcare Systems and Policy

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Doctoral standing in the College of Nursing or C.I.

Course Description

Underpinnings of healthcare policy; healthcare policy formation and change agency; influences on healthcare systems; related analysis and research. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Spring

NGR7911C - Doctoral Project I
Course Title

Doctoral Project I

Credits Hours

3

Lab/Studio/Field Work Hours

1

Prerequisites

- Doctoral standing in the College of Nursing or C.I.

Course Description

Identification of a practice-based problem, integration of existing evidence to propose a project to address the problem. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Fall

NGR7912C - Doctoral Project 2
Course Title

Doctoral Project 2

Credits Hours

3

Lab/Studio/Field Work Hours

2

Prerequisites

- NGR 7911C - Doctoral Project I, Doctoral standing in the College of Nursing or C.I.

Course Description

Implementation of a DNP Committee approved practice based project to address a health care problem. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Spring

NGR7913 - Doctoral Project 3
Course Title

Doctoral Project 3

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- NGR 7912C - Doctoral Project 2, Doctoral standing in the College of Nursing or C.I.

Course Description

Completion of implementation, analysis of data, final paper approval and public presentation of DNP project.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Every Semester

NGR7916 - Research Grants Process and Proposal Writing
Course Title

Research Grants Process and Proposal Writing

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Doctoral standing or C.I.

Course Description

Grants process include writing elements of research proposal for HIH R-series applications and strategies for successful proposal preparation. May be used in the degree program a maximum of 2 times.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Department

Department of Nursing Systems

NGR7942L - DNP Professional Practice Immersion
Course Title

DNP Professional Practice Immersion

Credits Hours

1 - 99

Lab/Studio/Field Work Hours

Jan-99

Course Description

Doctoral standing in the College of Nursing or C.I. Sponsored student immersion in a professional practice setting to promote advanced nursing leadership needs assessment, evaluation of public policy and design of care delivery models.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Every Semester

NGR7948L - Doctor of Nursing Practice Residency
Course Title

Doctor of Nursing Practice Residency

Credits Hours

1 - 99

Lab/Studio/Field Work Hours

Jan-99

Prerequisites

- NGR 7065; NGR 7748L.

Course Description

Clinical management of clients with complex health maintenance, health promotion and illness management needs focusing on a continuum of care within health care systems or organizations. There is a 6 hour requirement.

College

College of Nursing

Department

Department of Nursing Practice

Terms of Offering

Summer
Spring

NGR7952 - Scientific Writing for Nurses and Healthcare Professionals
Course Title

Scientific Writing for Nurses and Healthcare Professionals

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Admission to Graduate Nursing or Healthcare related discipline. Identify, discuss, and practice effective scientific writing elements as they apply to nursing and healthcare related disciplines; prepare a scientific manuscript for publication.

College

College of Nursing

Department

Department of Nursing Systems

Terms of Offering

Course Title

Geometrical Optics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Admitted to a graduate program in Optics, Physics or Electrical Engineering, or C.I.

Course Description

Fundamentals of Geometrical Optics, Geometrical Theory of Image Formation and Aberrations.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring
Fall

OSE5312 - Light Matter Interaction
Course Title

Light Matter Interaction

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing or C.I.

Course Description

Microscopic theory of absorption, dispersion, and refraction of materials; classical and quantum mechanical description of optical properties.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring
Fall

OSE5414 - Fundamentals of Optoelectronic Devices
Course Title

Fundamentals of Optoelectronic Devices

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing or C.I.

Course Description

Operation, methods of fabrication, applications, and limitations of various optoelectronic devices including quantum well semiconductor devices.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Fall

OSE5525 - Laser Engineering
Course Title

Laser Engineering

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing or C.I.

Course Description

Principles of laser amplification and oscillations; design of lasers; general characteristics of excitation systems.

College

College of Optics and Photonics

College of Optics and Photonics

OSE6111 - Optical Wave Propagation
Course Title

Optical Wave Propagation

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing or C.I.

Course Description

Optical propagation of light waves as applied to isotropic, anisotropic, and inhomogeneous media, guided waves and Gaussian beams.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring
Fall

OSE6120 - Theoretical Foundations of Optics

Course Title

Theoretical Foundations of Optics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing or C.I.

Course Description

Mathematical concepts used in Optics. Topics covered include linear algebra, orthogonal expansions of functions, Fourier transforms, ordinary differential equations, and partial differential equations.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Fall

OSE6125 - Computational Photonics

Course Title

Computational Photonics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing, OSE 6111 or C.I.

Course Description

Computational methods for photonic guided wave structures, periodic structures, and integrated photonic structures and devices.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring

OSE6143 - Fiber Optics Communication System
Course Title

Fiber Optics Communication System

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing and OSE 6111 and OSE 6474 or C.I.

Course Description

Use of fiber optics as a communication channel. Principles of fiber optics. Mode theory, transmitters, modulators, sensors detectors and demodulators.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring

OSE6211 - Imaging and Optical Systems
Course Title

Imaging and Optical Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Admitted to a graduate program in Optics, Physics or Electrical Engineering, or C.I.

Course Description

Linear systems theory of discrete and continuous one- and two-dimensional systems. Applications to optical polarization, pulse propagation, and image formation.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring
Fall

OSE6242 - Infrared Systems
Course Title

Infrared Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- GS in Electrical Engineering, or GS in Optics and Photonics, or C.I.

Course Description

This course provides the background, theory, and practice of how to design, analyze, and test high performance infrared imaging systems.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Fall

OSE6265 - Optical Systems Design
Course Title

Optical Systems Design

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate Standing and OSE 5203 or C.I.

Course Description

Design principles of lens and mirror optical systems; evaluation of designs using computer techniques.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Occasional

OSE6313 - Materials for Optical Systems
Course Title

Materials for Optical Systems

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing or C.I.

Course Description

Course reviews attributes of optical materials, physical properties and structural origin to predict performance and limitations of optical materials devices and components in optical systems.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Occasional

OSE6334C - Nonlinear Optics
Course Title

Nonlinear Optics

Credits Hours

3

Lab/Studio/Field Work Hours

0.5

Prerequisites

- Graduate standing and OSE 6111 or C.I.

Course Description

Maxwell's equations in nonlinear media, frequency conversion techniques (SHG, SFG, OPO), stimulated scattering, phase conjugation, wave-guided optics, nonlinear crystals.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring

OSE6335 - Nonlinear Guided Wave Optics
Course Title

Nonlinear Guided Wave Optics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing and OSE 6334C or C.I.

Course Description

The physics and applications of nonlinear optical interactions in fibers and planar waveguides is discussed, including parametric processes, all-optical effects and solutions.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Even Fall

OSE6347 - Quantum Optics
Course Title

Quantum Optics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing and OSE 5312 or C.I.

Course Description

Semiclassical treatment of light/matter interactions (quantized atomic states plus Maxwell's equations). Density matrix theory, coherent optical transients, pulse propagation.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Even Spring

OSE6349 - Applied Quantum Mechanics for Optics and Engineering

Course Title

Applied Quantum Mechanics for Optics and Engineering

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing or C.I.

Course Description

Presents the elements of quantum mechanics that are essential for understanding many areas in modern optics and photonics.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Fall

OSE6416 - Organic Photonics

Course Title

Organic Photonics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Graduate standing, C.I. The course reviews optic and electronic properties inorganic molecules and polymers that are critical for photonic and opto-electronic applications.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring

OSE6421 - Integrated Photonics
Course Title

Integrated Photonics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing, OSE 6111 or C.I.

Course Description

Reviews working principle, system functionality and design and fabrication issues of semiconductor integrated photonic devices and circuits for optical telecommunication and interconnect applications.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring

OSE6445 - Fundamentals of Ultrafast Optics
Course Title

Fundamentals of Ultrafast Optics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing, and OSE 6111 or PHY 5346, and OSE 5525, or C.I.

Course Description

Introductory concepts: Ultrafast Optical Signal Generation, Ultrafast Signal Detection, Ultrafast Optical Signal Transmission, and Ultrafast Optical Signal Processing.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring

OSE6447 - Attosecond Optics
Course Title

Attosecond Optics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Graduate standing, and OSE 6349 or PHY 5606, and OSE 6111 or PHY 5346 or OSE 5525, or C.I. Introduction of the forefront of attosecond optics research. Topics include the fundamental theories and latest journal publications.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

OSE6526C - Laser Engineering Laboratory
Course Title

Laser Engineering Laboratory

Credits Hours

3

Lab/Studio/Field Work Hours

3

Prerequisites

- Graduate standing and OSE 5525 or C.I.

Course Description

Designing and device implementation of diode pumped solid-state lasers, nonlinear frequency conversion, Q-switching, mode locking, and pulse second harmonic generation.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Summer

OSE6527 - Fiber Lasers
Course Title

Fiber Lasers

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

GS and OSE 5525, and OSE 6432 or OSE 6474. This course combines an introduction to fiber lasers with detailed technical discussions based on reviews of recent progress and latest developments in fiber laser research.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Even Fall

OSE6536 - Semiconductor Lasers
Course Title

Semiconductor Lasers

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing and OSE 5414 or C.I.

Course Description

Light-matter interaction, thermal physics and solid state physics to understand, analyze, and engineer semiconductor lasers with different active region dimensionalities.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring

OSE6615L - Optoelectronic Device Fabrication Laboratory

Course Title

Optoelectronic Device Fabrication Laboratory

Credits Hours

3

Lab/Studio/Field Work Hours

6

Prerequisites

- Graduate standing or C.I.

Course Description

Design and micro-fabrication of semiconductor optoelectronics devices including passive waveguides, light emitting diodes (LEDs), laser diodes (LDs), photodetectors and electro-optic modulators.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

OSE6650 - Optical Properties of Nanostructured Materials

Course Title

Optical Properties of Nanostructured Materials

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing OSE 6111, OSE 5312, or C.I.

Course Description

Theory and application of nanostructured optical materials: Effective medium theory, nanostructured surfaces, plasmon waveguides, nanophotonic circuits, metallic near-field lenses, collective modes in nanoparticle arrays, metamaterials.

College

College of Optics and Photonics

Department

College of Optics and Photonics

Terms of Offering

Spring

OSE6820 - Flat Panel Displays
Course Title

Flat Panel Displays

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing or C.I.

Course Description

Liquid crystal display, projection display, micro display, plasma display, light emitting diodes, organic light emitting display, and field emission display.

- PCB 5834C

Course Description

Advanced Human Physiology. Conduct experiments in physiology that enhance the ability to design, collect, analyze data and report results in a scientific manner.

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

Terms of Offering

Occasional

PCB5815 - Molecular Aspects of Obesity, Diabetes and Metabolism
Course Title

Molecular Aspects of Obesity, Diabetes and Metabolism

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- PCB 3522 or BCH 4053 or BSC 6432.

Course Description

Biochemical, molecular and physiological aspects of obesity, diabetes and metabolic diseases and how scientific findings can be translated towards prevention and treatment.

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

Terms of Offering

Odd Spring

PCB5834C - Advanced Human Physiology
Course Title

Advanced Human Physiology

Credits Hours

4

Lab/Studio/Field Work Hours

2

Prerequisites

- Graduate standing or C.I.

Course Description

Designed to provide graduate students advanced knowledge of physiological processes at the cellular, molecular and system levels.

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

Terms of Offering

Fall

PCB5837 - Cellular and Molecular Neuroscience
Course Title

Cellular and Molecular Neuroscience

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Graduate standing. An advanced and thorough course providing understanding of the cellular components and molecular signaling pathways involved in the nervous system function.

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

Terms of Offering

Every Semester

PCB5838 - Cellular and Molecular Basis of Brain Functions
Course Title

Cellular and Molecular Basis of Brain Functions

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate Standing or C.I.

Course Description

Designed to provide graduate students the concepts required to understand the physiological basis of brain functions at the molecular, cellular and system levels.

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

Terms of Offering

Fall

PCB5917 - Directed Research
Course Title

Directed Research

Credits Hours

1 - 99

College

College of Sciences

Department

Department of Biology

PCB5935 - Population Genetics
Course Title

Population Genetics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Course Description

Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I. Population genetics and the study of the various forces that result in evolutionary changes through time.

College

College of Sciences

Department

Department of Biology

PCB5937 - ST: Advanced Inferences in Conservation Biology
Course Title

ST: Advanced Inferences in Conservation Biology

Credits Hours

1 - 99

Lab/Studio/Field Work Hours

1

Prerequisites

- PCB 6466 or Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I.

Course Description

An Introduction to fundamental concepts of processing high-dimensional data in an applied conservation biology context. The course includes lectures, discussions, and computer lab modules.

College

College of Sciences

Department

Department of Biology

PCB6041 - Ecological Modeling
Course Title

Ecological Modeling

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- PCB 6466, or C.I.

Course Description

Mathematical models used in ecology and offers tools for process-based model development in ecology.

College

College of Sciences

Department

Department of Biology

Terms of Offering

Spring

PCB6042 - Conservation Biology Theory
Course Title

Conservation Biology Theory

Credits Hours

4

Lab/Studio/Field Work Hours

0

Course Description

Graduate standing in Biology or C.I. Review and analysis of the literature of conservation biology.

College

College of Sciences

Department

Department of Biology

PCB6046 - Advanced Ecology
Course Title

Advanced Ecology

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate standing in Biology, admission to Certificate in Conservation Biology, or C.I.

Course Description

Population and community ecology with emphasis on growth, regulation, species interactions, succession, and community classification.

College

College of Sciences

Department

Department of Biology

Terms of Offering

Occasional

PCB6047 - Advances in Plant Ecological Research
Course Title

Advances in Plant Ecological Research

Credits Hours

1

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to the M.S. in Biology, Ph.D. in Conservation Biology, or Certificate in Conservation Biology, or C.I.

Course Description

Current methodological and conceptual developments in plant ecological research. Examination of newly published and on-going research through presentations and group discussions. Graded S/U. May be used in the degree program a maximum of 2 times.

College

College of Sciences

Department

Department of Biology

Terms of Offering

$70.00

PCB6068 - Cellular Function & Medical Genetics
Course Title

Cellular Function & Medical Genetics

Credits Hours

5

Lab/Studio/Field Work Hours

0

Prerequisites

- Admitted to a program offered by College of Medicine Burnett School of Biomedical Sciences

Course Description

Relates cellular biology, biochemistry, and medical genetics to the normal cellular processes which comprise human body functions as well as pathologic or disease-causing processes.

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

Terms of Offering

Fall

PCB6095 - Professional Development in Biology I
Course Title

Professional Development in Biology I

Credits Hours

1

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to the M.S. in Biology, Ph.D. in Conservation Biology, or Certificate in Conservation Biology, or C.I.

Course Description

Methods in experimental design, research, and the ethics of animal research.

College

College of Sciences

PCB6124 - Structure Bioinformatics

Course Title

Structure Bioinformatics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- PCB 5596 or equivalent.

Course Description

Focus on tools and resources in RNA and protein structure analyses.

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

Terms of Offering

Occasional

PCB6328C - Landscape Ecology

Course Title

Landscape Ecology

Credits Hours

4

Lab/Studio/Field Work Hours

2

Prerequisites

- Admission to the M.S. in Biology, Ph.D. in Conservation Biology, PSM in Conservation Biology, or Certificate in Conservation Biology, or C.I.

Course Description

Influence of spatial heterogeneity on ecological processes. Emphasizes quantitative methods (e.g., GIS, remote sensing and modeling) to characterize landscape patterns and dynamics.

PHT - Physical Therapy

PHT5003 - Foundations of Physical Therapy
Course Title

Foundations of Physical Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to the Physical Therapy program.

Course Description

Introduction to the profession of physical therapy.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Summer

PHT5125 - Clinical Kinesiology
Course Title

Clinical Kinesiology

Credits Hours

2

Lab/Studio/Field Work Hours

0

Corequisites

- PHT 5125L.

Course Description

Investigates the mechanical aspects of human movement, joint mechanics of the upper and lower extremity, the vertebral column and tissue mechanics of relevant human tissues.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Summer

PHT5125L - Clinical Kinesiology Lab
Course Title

Clinical Kinesiology Lab

Credits Hours

1

Lab/Studio/Field Work Hours

2

Corequisites

- PHT 5125.

Course Description

Graduate level study of human musculoskeletal movement with an emphasis on joint mechanics and clinical applications.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Summer

Current Fee Per Student

$35.00

PHT5218C - Therapeutic Modalities in Rehabilitation
Course Title

Therapeutic Modalities in Rehabilitation

Credits Hours

3

Lab/Studio/Field Work Hours

2

Prerequisites

- Admission to the Doctor of Physical Therapy Program.

Course Description

Theories of physical agents, heat, light, cold, water, sound, and massage; problem solving rationale and selection of interventions for inflammation, pain, edema, and weakness.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

Current Fee Per Student

$30.00

PHT5240 - Physical Assessment
Course Title

Physical Assessment

Credits Hours

1

Lab/Studio/Field Work Hours

0

Prerequisites

- Physical Assessment Lab. Extensive theory and practice in the examination of the patient.

Course Description

Incorporate a systems approach, utilizing screening, and patient problem solving.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT5240L - Physical Assessment Lab
Course Title

Physical Assessment Lab

Credits Hours

2

Lab/Studio/Field Work Hours

4

Corequisites

- Physical Assessment.

Course Description

Lab course emphasizing the examinations required to perform an evaluation of physical therapy patient.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

Current Fee Per Student

$45.00

PHT5241 - Therapeutic Exercises I
Course Title

Therapeutic Exercises I

Credits Hours

2

Lab/Studio/Field Work Hours

0

Corequisites

- Therapeutic Exercises I Lab.

Course Description

Theory of developing, implementing, and evaluating a therapeutic exercise program for patients with musculoskeletal dysfunction.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

PHT5241L - Therapeutic Exercise Lab I
Course Title

Therapeutic Exercise Lab I

Credits Hours

2

Lab/Studio/Field Work Hours

4

Prerequisites

- Therapeutic Exercise I.

Course Description

Lab course emphasizing therapeutic exercise skills for the treatment of patients with musculoskeletal dysfunction.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

Current Fee Per Student

$20.00

PHT5260 - Patient Care Skills
Course Title

Patient Care Skills

Credits Hours

2

Lab/Studio/Field Work Hours

0

Corequisites

- Patient Care Skills Lab.

Course Description

Affective, cognitive, and psychomotor skills, regarding patient care. Basic skills of patient care, transfers, mobility skills, draping, gait training.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT5260L - Patient Care Skills Lab
Course Title

Patient Care Skills Lab

Credits Hours

2

Lab/Studio/Field Work Hours

4

Corequisites

- PHT 5260

Course Description

Skills of patient care, transfers, mobility skills.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

Current Fee Per Student

$30.00

PHT5718 - Neurological Physical Therapy
Course Title

Neurological Physical Therapy

Credits Hours

3

Lab/Studio/Field Work Hours

0

Corequisites

-

Course Description

Analysis of selected neuromotor theories and their clinical applications. Examinations and interventions for the evaluation and treatment of neurological patients presented.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Summer

PHT5718L - Neurological Physical Therapy Lab
Course Title

Neurological Physical Therapy Lab

Credits Hours

1

Lab/Studio/Field Work Hours

2

Corequisites

- Neurological Physical Therapy.

Course Description

Lab Course emphasizing the clinical application of selected neuromotor theories.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

PHT6070C - Radiology/Imaging for Physical Therapy
Course Title

Radiology/Imaging for Physical Therapy

Credits Hours

3

Lab/Studio/Field Work Hours

1

Prerequisites

- Admission to DPT program.

Course Description

A diagnostic imaging course focusing on clinical implications in rehabilitation. The focus will be on patients with neurological and orthopedic disorders.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT6115C - Gross Anatomy/Neuroscience I
Course Title

Gross Anatomy/Neuroscience I

Credits Hours

6

Lab/Studio/Field Work Hours

6

Prerequisites

- Admission to DPT program.

Course Description

Study of human anatomy via lecture and cadaver dissection emphasizing upper and lower extremity, muscoloskeletal, peripheral vascular and peripheral nervous systems, thoracic and abdominopelvic cavities.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Summer

Current Fee Per Student

$70.00

PHT6118C - Gross Anatomy/Neuroscience II
Course Title

Gross Anatomy/Neuroscience II

Credits Hours

6

Lab/Studio/Field Work Hours

6

Prerequisites

- Gross Anatomy/Neuroscience I.

Course Description

Comprehensive study of anatomy and physiology of the nervous system to develop DPT students' improved treatment strategies for patients with neurological problems.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

Current Fee Per Student

$70.00

PHT6119L - Seminar in Anatomical Sciences Techniques
Course Title

Seminar in Anatomical Sciences Techniques

Credits Hours

3

Lab/Studio/Field Work Hours

6

Prerequisites

- Admission to the Anatomical Sciences Graduate Certificate.

Course Description

Development of skills as an anatomist with an emphasis on integrating a diverse repertoire of scientific technique.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Occasional

PHT6153 - Physiologic Assessment in Physical Therapy Practice
Course Title

Physiologic Assessment in Physical Therapy Practice

Credits Hours

2

Lab/Studio/Field Work Hours

2

Prerequisites

- PHT 6156C.

Course Description

Course provides clinical applications and laboratory demonstrations of human musculoskeletal, neurological, cardiovascular, hemopoietic, respiratory, gastrointestinal, and renal systems.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT6156 - Applied Human Physiology for Health Sciences
Course Title

Applied Human Physiology for Health Sciences

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to the Doctor of Physical Therapy program.

Course Description

Course provides in-depth study of human cardiovascular, hemopoietic, respiratory, gastrointestinal, renal and reproductive systems with emphasis on mechanisms responsible for maintaining homeostasis.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Summer

Current Fee Per Student

$25.00

PHT6156C - Applied Human Physiology for Health Sciences
Course Title

Applied Human Physiology for Health Sciences

Credits Hours

3

Prerequisites

- Admission to the Doctor of Physical Therapy program.

Course Description

Course provides in-depth study of human cardiovascular, hemopoietic, respiratory, gastrointestinal, renal and reproductive systems with emphasis on mechanisms responsible for maintaining homeostasis.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Rehabilitation Sciences

Terms of Offering

Summer

Current Fee Per Student

$25.00

PHT6161C - Neuroplasticity of Human Movement
Course Title

Neuroplasticity of Human Movement

Credits Hours

3

Lab/Studio/Field Work Hours

1

Prerequisites

- Completeat least 2 courses of the following types:
  Anatomy at the undergraduate or graduate level.

Course Description

Anatomical foundation of brain function as it pertains to normal body movements and the neuroplasticity that occurs during the process of rehabilitation after injury.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Rehabilitation Sciences

Terms of Offering

Even Spring
Odd Spring

Current Fee Per Student

70

PHT6219C - Pain Mechanisms and Treatment in Rehabilitation
Course Title

Pain Mechanisms and Treatment in Rehabilitation

Credits Hours

2

Lab/Studio/Field Work Hours

2

Prerequisites

- Admission to Doctor of Physical Therapy program.

Course Description

This course will cover current concepts in pain science, including theoretical models for the basis of pain and the multidimensional nature of pain.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Summer

Current Fee Per Student

$45.00

PHT6242 - Orthopedic Physical Therapy
Course Title

Orthopedic Physical Therapy

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- NGR 6210, NGR 6230L.

Corequisites

- PHT 6242L

Course Description

Examination and interventions for the evaluation and treatment of specific orthopedic cases and injuries presented.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT6242L - Orthopedic Physical Therapy Lab
Course Title

Orthopedic Physical Therapy Lab

Credits Hours

1

Lab/Studio/Field Work Hours

2

Corequisites

- Orthopedic Physical Therapy.

Course Description

Lab course emphasizing the examinations and interventions for the evaluation and treatment of specific orthopedic cases and injuries.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

Current Fee Per Student

$40.00

PHT6245 - Therapeutic Exercise II
Course Title

Therapeutic Exercise II

Credits Hours

2

Lab/Studio/Field Work Hours

0

Prerequisites

- PHT 5218 and PHT 5218L

Corequisites

- PHT 6245L

Course Description

Exploration of the various therapeutic exercise modalities, and their application to the rehabilitation course of treatment.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT6245L - Therapeutic Exercise II Lab
Course Title

Therapeutic Exercise II Lab

Credits Hours

1

Lab/Studio/Field Work Hours

2

Prerequisites

- Therapeutic Exercise I and Lab

Corequisites

- Therapeutic Exercise II.

Course Description

Lab course emphasizing the use of the various therapeutic exercise modalities.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

Current Fee Per Student

$15.00

PHT6306 - Pathology in Rehabilitation
Course Title

Pathology in Rehabilitation

Credits Hours

2

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to Doctor of Physical Threapy program.

Course Description

Organized seminars on the pathophysiology and clinical manifestations and treatments of various medical conditions as they relate to medical management in rehabilitation.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

PHT6322C - Pediatric Physical Therapy
Course Title

Pediatric Physical Therapy

Credits Hours

3

Lab/Studio/Field Work Hours

2

Prerequisites

- Admission to DPT program.

Course Description

Study of the normal neurodevelopmental sequences for pediatric clinical assessment and physical therapy intervention provided to clients with abnormal diseases and dysfunction.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT6356 - Pharmacology in Rehabilitation
Course Title

Pharmacology in Rehabilitation

Credits Hours

2

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to the Doctor of Physical Therapy program.

Course Description

Mechanisms of drug action, dose-response relations, pharmacokinetics, drug delivery systems, drug metabolism, toxicity of pharmacological agents, and drug interaction as it relates to rehabilitation.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

PHT6374C - Geriatric Physical Therapy
Course Title

Geriatric Physical Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

1

Prerequisites

- Admission to the Doctor of Physical Therapy program.

Course Description

This course provides an introduction to physiological aging and physical therapy management of the older adult. Includes examination, evaluation, and development of intervention programs focusing on exercise, prevention, education, and modification programs.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

PHT6381C - Cardiopulmonary Physical Therapy
Course Title

Cardiopulmonary Physical Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

1

Prerequisites

- Admission to DPT program.

Course Description

Examinations and interventions for the management of chronic and acute cardiopulmonary problems. Teaching patient strategies for preventing/managing dysfunction.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

Current Fee Per Student

$15.00

PHT6510 - Administration of Anatomical Sciences Laboratory
Course Title

Administration of Anatomical Sciences Laboratory

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Graduate or professional level gross human cadaver dissection course.

Course Description

Developing administrative skills for educators in the anatomical sciences with an emphasis on laboratory safety, health concerns, and cadaver procurement and storage to prepare educators for graduate and professional programs.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Summer

PHT6521 - Management of Physical Therapy Services
Course Title

Management of Physical Therapy Services

Credits Hours

2

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to DPT program.

Course Description

Planning, organizing, delivering and evaluating physical therapy services within a health care system, including quality management, third party payers, DRG's and legislative impact.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

PHT6606 - Research Methods in Physical Therapy
Course Title

Research Methods in Physical Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to DPT program.

Course Description

Methods of research applied to clinical environment of physical therapy. Coverage of the language, logic, design and analysis of clinical research.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

PHT6618 - Research Applications in Physical Therapy
Course Title

Research Applications in Physical Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

0

Prerequisites

- Research methods in Physical Therapy - PHT 6606.

Course Description

To evaluate research studies, focus on evidence-based practice. SPSS and principles of epidemiology will be introduced.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT6702C - Orthotics and Prosthetics in Rehabilitation
Course Title

Orthotics and Prosthetics in Rehabilitation

Credits Hours

1

Lab/Studio/Field Work Hours

1

Prerequisites

- Admitted to PTDPT

Course Description

Integration of orthotic and prosthetic devices into rehabilitation with additional focus on device functions, indications for use, and integration into patient care in physical rehabilitation.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Rehabilitation Sciences

Terms of Offering

Fall

PHT6716C - Advanced Orthopedic Physical Therapy
Course Title

Advanced Orthopedic Physical Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

1

Prerequisites

- Orthopedic Physical Therapy

Corequisites

- Advanced Orthopedic Physical Therapy Lab.

Course Description

Specific rehabilitative protocols regarding particular orthopedic injuries and illnesses are presented. Focus on the previous course work in therapeutic modalities, anatomy, physiology, and therapeutic exercises incorporated.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

Current Fee Per Student

$25.00

PHT6719 - Advanced Neurological Physical Therapy
Course Title

Advanced Neurological Physical Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

0

Prerequisites

- PHT 5718

Corequisites

- PHT 6719L.

Course Description

Examinations and interventions for the evaluation and treatment of the neurological patient. Emphasis on patients with spinal cord injury and neurological diseases.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT6719L - Advanced Neurological Physical Therapy Lab
Course Title

Advanced Neurological Physical Therapy Lab

Credits Hours

1

Lab/Studio/Field Work Hours

2

Prerequisites

- PHT 5718L

Corequisites

- PHT 6719.

Course Description

Course Emphasizing examinations and interventions for the evaluation and treatment of patients with neurological disease. Emphasis on patients with spinal cord injury and neurological disease.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

Current Fee Per Student

$25.00

PHT6720 - Integumentary Physical Therapy
Course Title

Integumentary Physical Therapy

Credits Hours

1

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to Physical Therapy program.

Course Description

Instruction in contemporary issues and specialized care of the integumentary system provided by physical therapists.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

Current Fee Per Student

$45.00

PHT6805C - Clinical Education I
Course Title

Clinical Education I

Credits Hours

4

Lab/Studio/Field Work Hours

20

Prerequisites

- Admission to DPT program.

Course Description

Collaborative course where students meet to analyze, synthesize and discuss current professional, ethical and moral decision-making in physical therapy setting, culminating in a six-week clinical internship.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

Current Fee Per Student

$12.50

PHT6909 - Research Report
Course Title

Research Report

Credits Hours

1 - 99

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

PHT6918 - Directed Research
Course Title

Directed Research

Credits Hours

0 - 99

College

Course Title

ST: Seminar in Anatomical Sciences Techniques

Credits Hours

2

Lab/Studio/Field Work Hours

0

Course Description

Development of skills as an anatomist with an emphasis on integrating a diverse repertoire of scientific technique.

PHT6938ST2 - ST: Administration of Anatomical Sciences Laboratory
Course Title

ST: Administration of Anatomical Sciences Laboratory

Credits Hours

1

Lab/Studio/Field Work Hours

0

Course Description

The course focuses on developing administrative skills as an educator in the anatomical sciences emphasizing laboratory safety, health concerns, and cadaver procurement and storage.

PHT6958 - Study Abroad
Course Title

Study Abroad

Credits Hours

0 - 99

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

PHT7021 - Professional Practice in Physical Therapy
Course Title

Professional Practice in Physical Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

0

Prerequisites

- Foundations of Physical Therapy.

Course Description

Professional development, ethics and strategies to address cultural diversity issues, communication skills and different styles of learning to prepare for clinical practice as a doctoring healthcare professional in physical therapy.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

PHT7134C - Physical Therapy Integration
Course Title

Physical Therapy Integration

Credits Hours

2

Lab/Studio/Field Work Hours

1

Prerequisites

- PHT 7722C

Course Description

This course integrates foundational knowledge of physiology and pathology to develop physical therapy skills for examinations and interventions of medically complex patients and special populations.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

Current Fee Per Student

$15.00

PHT7329C - Advanced Pediatric Physical Therapy
Course Title

Advanced Pediatric Physical Therapy

Credits Hours

1

Lab/Studio/Field Work Hours

1

Prerequisites

- Admission to DPT program.

Course Description

Course provides an advanced look into abnormal motor development, neurological and orthopedic diseases/conditions, interventions, examinations and other aspects of the patient/client management model for the pediatric population.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT7521 - Management of Physical Therapy Services II
Course Title

Management of Physical Therapy Services II

Credits Hours

2

Lab/Studio/Field Work Hours

0

Prerequisites

- PHT 6521.

Course Description

Application of management, finance and economic health-related principles for strategy development, implementation and assessment for the physical therapy manager.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT7702C - Advanced Orthotics and Prosthetics
Course Title

Advanced Orthotics and Prosthetics

Credits Hours

2

Lab/Studio/Field Work Hours

1

Prerequisites

- PHT 6245, PHT 6245L.

Course Description

Advanced considerations for the amputee patient with regards to rehabilitation. Students will review the primary focal issues surrounding rehabilitation after an amputation and how prosthetics may assist with functional return.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

PHT7721C - Integrations in Orthopedic Physical Therapy
Course Title

Integrations in Orthopedic Physical Therapy

Credits Hours

1

Lab/Studio/Field Work Hours

1

Prerequisites

- PHT 6716C.

Course Description

Designed to correlate all previous coursework in curriculum in study presentations. Advanced evaluation procedures included. Advanced knowledge of differential diagnosis in the orthopedic patient covered.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT7722C - Integrative Clinical Practice
Course Title

Integrative Clinical Practice

Credits Hours

2

Lab/Studio/Field Work Hours

1

Prerequisites

- Admission to DPT program.

Course Description

This course emphasizes the synthesis of clinical and differential diagnostic skills required of a physical therapist in order to enter clinical practice.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Summer

Current Fee Per Student

$15.00

PHT7730C - Primary Care for the Physical Therapist
Course Title

Primary Care for the Physical Therapist

Credits Hours

2

Lab/Studio/Field Work Hours

2

Prerequisites

- Admission to DPT program.

Course Description

Students learn higher level diagnostic screening skills to make clinical decisions. The course takes a system approach including system review, clinical signs and symptoms and case studies.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT7742C - Acute Care Physical Therapy
Course Title

Acute Care Physical Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

1

Prerequisites

- PHT 6306

Course Description

Considerations and evidence-based evaluation, treatment, and management of patients in various settings within acute care.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT7764C - Advanced Neurological Treatment
Course Title

Advanced Neurological Treatment

Credits Hours

2

Lab/Studio/Field Work Hours

1

Prerequisites

- PHT 6719, PHT 6719L, PHT 7772C.

Course Description

This course can provide third year students with the opportunity to further explore evidence-based neurological intervention.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

PHT7772C - Advanced Neurological Physical Therapy II
Course Title

Advanced Neurological Physical Therapy II

Credits Hours

1

Lab/Studio/Field Work Hours

1

Prerequisites

- PHT 6719 and PHT 6719L.

Course Description

Problem-based learning provides a team based interdisciplinary problem-solving environment where students devise solutions and approaches to problems encountered by physical therapists treating patients with neurological problems.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT7778C - Advanced Manual Therapy
Course Title

Advanced Manual Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

1

Prerequisites

- PHT 6716C, PHT 7721C.

Course Description

Concepts associated with advanced manipulative interventions in the context of physical therapy care. Indications and contra-indications will be reviewed and applied in a clinical context.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

PHT7779C - Sports Physical Therapy
Course Title

Sports Physical Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

1

Prerequisites

- Admission to the Doctor of Physical Therapy program.

Course Description

Considerations and evidence-based evaluation, treatment, and management of patients with sport-related injuries.

College

College of Health Professions and Sciences

PHT7780C - Advanced Geriatric Physical Therapy
Course Title

Advanced Geriatric Physical Therapy

Credits Hours

1

Lab/Studio/Field Work Hours

1

Prerequisites

- PHT 6374C.

Course Description

Advanced topics in geriatric rehabilitation.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Fall

PHT7822C - Clinical Education II
Course Title

Clinical Education II

Credits Hours

6

Lab/Studio/Field Work Hours

40

Prerequisites

- Admission to the Doctor of Physical Therapy program.

Course Description

Collaborative course for third year students to meet, analyze, synthesize and discuss current ethical, legal, and moral decision-making in physical therapy clinical setting culminating in internship.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Summer

Current Fee Per Student

$12.50

PHT7823C - Clinical Education III
Course Title

Clinical Education III

Credits Hours

4

Lab/Studio/Field Work Hours

20

Prerequisites

- PHT 7822C.

Course Description

Clinical education course to synthesize ethical, legal, and professional contemporary practice with evidence-based intervention, culminating in a full-time, 8-week clinical internship in physical therapy practice setting.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Current Fee Per Student

$12.50

PHT7829C - Clinical Education IV
Course Title

Clinical Education IV

Credits Hours

4

Lab/Studio/Field Work Hours

20

Prerequisites

- PHT 7823C.

Course Description

Clinical education course to synthesize ethical, legal, and professional contemporary practice with evidence-based intervention, culminating in a full-time, terminal 8-week clinical internship in physical therapy practice setting prior to graduation.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

Current Fee Per Student

$12.50

PHT7900 - Capstone Project in Physical Therapy
Course Title

Capstone Project in Physical Therapy

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- Admission to DPT program.

Course Description

Directed research culminating in a substantive paper related to the art or science of Physical Therapy.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Physical Therapy– Kinesiology

Terms of Offering

Spring

Current Fee Per Student

$13.09

PHT7999 - Physical Therapy Residency
Course Title

Physical Therapy Residency

Credits Hours

2

Lab/Studio/Field Work Hours

1

Course Description

Beyond the earned Doctor of Physical Therapy degree and C.I. Instruction for post-professional physical therapy residency program fostering advanced clinical practice as outlined by the American Board of Physical Therapy Specialties.

PHY5346 - Electrodynamics I
Course Title

Electrodynamics I

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- PHY 4324, and graduate status or senior standing or C.I.

Course Description

Special Relativity, Charges in Electromagnetic Fields, Electromagnetic Field Equations, Constant Fields, Electromagnetic Waves, Propagation of Light, Fields of Moving Charges, and Radiation of Electromagnetic Waves.

College

College of Sciences

Department

Department of Physics

Terms of Offering

Fall

PHY5524 - Statistical Physics
Course Title

Statistical Physics

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- PHY 3513, STA 3032, and graduate status or senior standing or C.I.

Course Description

A study of physical concepts and methods appropriate for the description of systems involving many particles. Ensemble theory, partition functions. Maxwell Boltzmann, Bose-Einstein, Fermi-Dirac statistics.

College

College of Sciences

Department

Department of Physics

Terms of Offering

Spring

PHY5606 - Quantum Mechanics I
Course Title

Quantum Mechanics I

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- PHY 4605, and graduate status or senior standing or C.I.

Course Description

Basic postulates of quantum mechanics, operators, eigenvalues, parity, potential wells, harmonic oscillator, time dependent and time independent Schrodinger equation, matrix formulation, and time independent perturbation theory.

College

STA - Statistics

STA5104 - Advanced Computer Processing of Statistical Data
Course Title

Advanced Computer Processing of Statistical Data

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- STA 4163 and knowledge of a programming language, graduate status or senior standing, or C.I.

Course Description

Use of SAS and other statistical software packages; data manipulation; graphical data presentation; data analysis; creating analytical reports.

College

College of Sciences

Department

Department of Statistics

Terms of Offering

Fall

STA5176 - Introduction to Biostatistics
Course Title

Introduction to Biostatistics

Credits Hours

0

Lab/Studio/Field Work Hours

0

Prerequisites

- STA 4163 or STA 4173, graduate status or senior standing, or C.I.

Course Description

Repeated measures design, logistic regression, survival analysis, proportional hazards model. fundamentals in study design, contingency table analysis, non-parametric methods, sample size, power analysis.

College

College of Sciences

Department

Department of Statistics

Department of Statistics

Terms of Offering

Occasional

STA6236 - Regression Analysis
Course Title

Regression Analysis

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- MAS 3105 and STA 4164.

Course Description

General linear model, model aptness and remedial measures, regression through the origin, independent and dependent indicator variables, multicollinearity, outliers, biased regression.

College

College of Sciences

Department

Department of Statistics

Terms of Offering

Fall

STA6237 - Nonlinear Regression
Course Title

Nonlinear Regression

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- STA 6236 (or knowledge of linear regression).

Course Description

Nonlinear regression: model specification, diagnostics. Estimation: nonlinear least squares, SAS, Gauss Newton algorithm. Robust regression: M-estimation adaptive robust regression. Logistic regression, Poisson regression.

College

College of Sciences

STA6246 - Linear Models
Course Title

Linear Models

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- STA 6329, STA 4164, and STA 4322.

Course Description

Theoretical development of full rank linear statistical models, least squares and maximum likelihood estimation, interval estimation, hypothesis testing, and introduction to less than full rank models.

College

College of Sciences

Department

Department of Statistics

Terms of Offering

Spring

STA6326 - Theoretical Statistics I
Course Title

Theoretical Statistics I

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- MAC 2313.

Course Description

Distribution of random variables, conditional probability and independence, some special distributions, distributions of functions of random variables, limiting distributions.

College

College of Sciences

Department

Department of Statistics

Terms of Offering

Fall

STA6327 - Theoretical Statistics II
Course Title

Theoretical Statistics II

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- STA 6326.

Course Description

Point estimation, sufficient statistics, completeness, exponential family, maximum likelihood estimators, statistical hypotheses, best tests, likelihood ratio tests, noncentral distributions.

College

College of Sciences

Department

Department of Statistics

Terms of Offering

Spring

STA6329 - Statistical Applications of Matrix Algebra
Course Title

Statistical Applications of Matrix Algebra

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites

- MAC 2313 and STA 4164 or STA 5206.

Course Description

Basic theory of determinants, inverses, generalized inverses, eigenvalues and eigenvectors, partitioned matrices. Diagonalization and decomposition theorems, least squares and statistical applications.

6

Prerequisites

- Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I.

Course Description

Introduction to the biology of the fishes, their classification, evolution, and life histories.

College

College of Sciences

Department

Department of Biology

Terms of Offering

Even Fall

ZOO5463C - Herpetology
Course Title

Herpetology

Credits Hours

4

Lab/Studio/Field Work Hours

4

Prerequisites

- Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I.

Course Description

Introduction to the biology of the amphibians and reptiles, their classification, evolution, and life histories.

College

College of Sciences

Department

Department of Biology

Terms of Offering

Odd Spring

Current Fee Per Student

$60.00

ZOO5475L - Field Ornithology
Course Title

Field Ornithology

Credits Hours

3

Lab/Studio/Field Work Hours

1

Course Description

A comprehensive introduction and appreciation for the evolutionary history, diversity, ecology, biology, and behavior of birds such as disciplines, evolutionary biology and psychology.

College

College of Sciences

Department

Department of Biology

Terms of Offering

Odd Fall

Current Fee Per Student

$30.00

ZOO5745C - Neuroanatomical Pathways and their Neurotransmitters
Course Title

Neuroanatomical Pathways and their Neurotransmitters

Credits Hours

4

Lab/Studio/Field Work Hours

3

Prerequisites

- Human/Comparative Anatomy, or Human/Animal Physiology or C.I.

Course Description

Fundamental concepts of both morphological and functional organization of the nervous system. Primary emphasis on human structure.

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

Terms of Offering

Occasional

Current Fee Per Student

$15.00

ZOO5748C - Clinical Neuroanatomy
Course Title

Clinical Neuroanatomy

Credits Hours

5

Lab/Studio/Field Work Hours

2

Prerequisites

- ZOO 3733C Human Anatomy.

Course Description

Provides the necessary knowledge to understanding the complexities of human nervous system, its normal and pathologic functions,relevant to practice of general medicine and/or neuroscientists.

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

Terms of Offering

Fall

ZOO5749C - Clinical Neuroscience
Course Title

Clinical Neuroscience

Credits Hours

5

Lab/Studio/Field Work Hours

2

Prerequisites

- ZOO 3733C and ZOO 3744, or ZOO 3733C and ZOO 4743C or ZOO 5748C, or equivalents.

Course Description

Clinically oriented teachings of neuroscience areas including selected topics in neuropathology, neuro-oncology, neuroimmunology, neuropharmacology, and neurodiagnostics.

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

Terms of Offering

Spring

ZOO5758C - Vertebrate Histology
Course Title

Vertebrate Histology

Credits Hours

4

Lab/Studio/Field Work Hours

3

Prerequisites

- Graduate standing and college-level Human Anatomy, Human Physiology or Introduction to Histology.

Course Description

Microanatomical detail plus appropriate developmental and functional considerations of major cell types, primary tissues, organs, and organ systems. Survey of modern animal-tissue microtechnique.

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

Terms of Offering

Spring

ZOO5917 - Directed Research
Course Title

Directed Research

Credits Hours

1 - 99

College

College of Sciences

Department

Department of Biology

Terms of Offering

Fall

ZOO5937 - Special Topics
Course Title

Special Topics

Credits Hours

3

College

College of Medicine

Department

College of Medicine Burnett School of Biomedical Sciences

ZOO6737 - Clinically Oriented Human Anatomy
Course Title

Clinically Oriented Human Anatomy

Credits Hours

4

Lab/Studio/Field Work Hours

6

Prerequisites

- Human Anatomy ZOO 3733 or equivalent.

Course Description

Clinically Orientated Human Anatomy (COHA) is an advanced course focusing on integrated functional anatomy by means of problem-based learning and project-based learning.

College

College of Medicine

Department
