HSC6659 - Issues in Geriatric Health Care
Course Title
Issues in Geriatric Health Care
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
Health Sciences MS or C.I.
Course Description
Emphasizes an evidence-based, interprofessional approach to examining and working through issues associated with aging and the impact of collaborative, interprofessional care for our aging population.
College
College of Health Professions and Sciences
Department
Department of Health Sciences
Terms of Offering
Occasional
Repeat for credit?
No
**HSC667 - Health Promotion Advocacy, Communication and Campaigns**

**Course Title**
Health Promotion Advocacy, Communication and Campaigns

**Credits Hours**
3

**Lab/Studio/Field Work Hours**
0

**Prerequisites**
Admission to Health Sciences MS program or C.I.

**Course Description**
Application of health promotion and marketing principles, theories, and techniques to develop effective campaigns to advocate for and communicate health promotion and disease prevention campaigns.

**College**
College of Health Professions and Sciences

**Department**
Department of Health Sciences

**Terms of Offering**
Summer

**Repeat for credit?**
No

---

**HSC6717 - Community Program Monitoring and Evaluation**

**Course Title**
Community Program Monitoring and Evaluation

**Credits Hours**
3

**Lab/Studio/Field Work Hours**
0

**Prerequisites**
HSC 6248 or C.I.

**Course Description**
Application of concepts and methodologies for monitoring and evaluating community health interventions.

**College**
College of Health Professions and Sciences

**Department**
Department of Health Sciences

**Terms of Offering**
Spring

**Repeat for credit?**
No
HSC6737 - Introduction to Clinical Trials
Course Title
Introduction to Clinical Trials
Credits Hours
3
Lab/Studio/Field Work Hours
0
Course Description
Introduction to the design, management, execution and evaluation of successful clinical trials.
College
College of Health Professions and Sciences
Department
Department of Health Sciences
Terms of Offering
Spring
Repeat for credit?
No

HSC6742 - Introduction to Clinical Research
Course Title
Introduction to Clinical Research
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
Admitted to a program offered by College of Health Professions and Sciences
Course Description
Introduction to the scientific principles, concepts and language for conducting clinical research.
College
College of Health Professions and Sciences
Department
Department of Health Sciences
Terms of Offering
Spring
Repeat for credit?
No

HUN - Human Nutrition
HUN5247 - Principles of Human Nutrition

Course Title
Principles of Human Nutrition

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Health Sciences M.S. Clinical and Lifestyle Sciences track or C.I.

Course Description
Course promotes in-depth understanding of the role of macronutrients in human nutrition and health enabling graduates to integrate knowledge into other aspects of their work.

IDC - Interdisciplinary Computing
IDC5602 - Cybersecurity: A Multidisciplinary Approach
Course Title
Cybersecurity: A Multidisciplinary Approach

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
Graduate standing or C.I. Interdisciplinary MandS fundamentals as applied to cybersecurity including operating system installation and administration for hardware, network architectures, configurations, behavioral aspects, organizational continuity planning, security management.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Fall

Repeat for credit?
No

IDC6600 - Emerging Cyber Issues
Course Title
Emerging Cyber Issues

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
Interdisciplinary discussion of emerging issues with expert speakers from industry. Preparation of topic and required resources to complete a multi-disciplinary Modeling and Simulation capstone project.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Summer

Repeat for credit?
No
IDC6601 - Behavioral Aspects of Cybersecurity

Course Title
Behavioral Aspects of Cybersecurity

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
IDS 5602 or C.I.

Course Description
Interdisciplinary human, social, and behavioral issues related to cybersecurity. Management techniques, motives for cyber crimes, risk and threat analysis, ethics, and legal issues.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Summer

Repeat for credit?
No

IDC6602 - Usable Cybersecurity and Privacy

Course Title
Usable Cybersecurity and Privacy

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate Standing or C.I.

Course Description
Introduces usability problems in security and privacy, and surveys state-of-the-art techniques and evaluation methodologies to design usable security and privacy systems.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Spring

Repeat for credit?
No
IDC6700 - Interdisciplinary Approach to Data Visualization
Course Title
Interdisciplinary Approach to Data Visualization

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
ESI 5219, STA 5206, or DIG 5876, or C.I. A hands-on, interdisciplinary perspective on basic principles and fundamentals of visualizing statistical information. Topics include: effective visualizations, perception, representation, and general principles.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Spring

Repeat for credit?
No

IDC6941 - Capstone in Modeling and Simulation of Behavioral Cybersecurity
Course Title
Capstone in Modeling and Simulation of Behavioral Cybersecurity

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
IDC 6601 and CNT 5410L

Course Description
Interdisciplinary teams of students apply modeling and simulation, cybersecurity, and psychology techniques to the analysis and prevention of emerging cybersecurity threats.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Fall

Repeat for credit?
No

IDS - Interdisciplinary Studies
IDS5127 - Foundation of Bio-Imaging Science

Course Title
Foundation of Bio-Imaging Science

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing.

Course Description
Fundamental theory, design, and practice of modern bio-imaging techniques used for basic biomedical research applications.

College
College of Medicine

Department
College of Medicine Burnett School of Biomedical Sciences

Repeat for credit?
No

IDS5142 - Modeling and Simulation for Instructional Design

Course Title
Modeling and Simulation for Instructional Design

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
Graduate standing or C.I. Interdisciplinary aspects of MandS applications for instructional design. Emphasis on domains such as aviation, space, military, healthcare, education, hospitality, entertainment, and cybersecurity.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Summer

Repeat for credit?
No
IDS5741 - Modeling Neuronal Systems

Course Title
Modeling Neuronal Systems

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate Standing or C.I.

Course Description
Brain-inspired artificial intelligence. Study in cognitive computational neuroscience, deep learning, and how the fields are ripe for convergence.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Occasional

Repeat for credit?
No

IDS5937 - ST: Data Science for Material Scientists

Course Title
ST: Data Science for Material Scientists

Credits Hours
3

Lab/Studio/Field Work Hours
1

Prerequisites
Permission of Nanoscience Technology Center.

Course Description
The course introduce basic skills of data processing, data visualization, statistical inference, and machine learning approaches on materials research topics.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Fall

Repeat for credit?
No
IDS5947 - Experiential Learning Internship

Repeat for credit?
Yes
IDS6126 - Interdisciplinarity

Course Title
Interdisciplinarity

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites
Graduate standing or C.I.

Course Description
This course examines the history and challenges of interdisciplinary teaching and scholarship. We start by posing the question, What is a discipline? Then we will explore various interdisciplinary approaches and scholarship. Our final goal is for each student to present an interdisciplinary research proposal that will guide their work on their Interdisciplinary Studies MA or MS thesis.

College
College of Graduate Studies

IDS6145 - Simulation Techniques

Course Title
Simulation Techniques

Credits Hours

3

Lab/Studio/Field Work Hours

0

Prerequisites
DIG 5876 or ESI 5219 or STA 5205 or C.I.

Course Description
Foundations, examples, hands-on tools to implement solutions to various problems using three different categories of simulation: discrete event simulation, continuous simulation, and agent-based simulation.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering

Spring

No

2023-2024 Graduate Catalog
IDS6146 - Modeling and Simulation Systems
Course Title
Modeling and Simulation Systems

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
An overview of issues, techniques and tools that impact the design, development, verification, and validation of simulation systems.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Summer
Repeat for credit?
No

IDS6147 - Perspectives on Modeling and Simulation
Course Title
Perspectives on Modeling and Simulation

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
Perspectives on the theory and practice of modeling and simulation with emphasis on specific topics of current interest.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Fall
Repeat for credit?
No
IDS6148 - Human Systems Integration for Modeling and Simulation
Course Title
Human Systems Integration for Modeling and Simulation

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
Covers general process of the human systems integration approach for modeling and simulation systems. Addresses standards, analysis tools and techniques for developing systems-level solutions.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Summer

Repeat for credit?
No

IDS6149 - Modeling and Simulation for Test and Evaluation
Course Title
Modeling and Simulation for Test and Evaluation

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing and C.I.

Course Description
Modeling and simulation for test planning, execution, and evaluation will be described, characterized, and illustrated with real-world examples and case studies.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Fall

Repeat for credit?

2023-2024 Graduate Catalog
IDS6209 - Introduction to Electrochemical Energy Conversion and Storage

Course Title
Introduction to Electrochemical Energy Conversion and Storage

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to the PSM or MS in Nanotechnology or C.I.

Course Description
Topics in nanotechnology, materials science and electrochemistry concerning renewable energy generation and storage. Electrochemical systems and their applications in renewable energy generation and storage.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Fall

Repeat for credit?
No

IDS6250 - Introduction to Nanoscience and Nanotechnology

Course Title
Introduction to Nanoscience and Nanotechnology

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to the Professional Science Master's in Nanotechnology or C.I.

Course Description
A general overview of nanomaterials and nanodevices, including their synthesis, new properties and applications.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Fall

Repeat for credit?
No
IDS6251 - Computation, Simulation and Modeling in Nanotechnology

Course Title
Computation, Simulation and Modeling in Nanotechnology

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to the Professional Science Master's in Nanotechnology and background in chemistry and computer science, or C.I.

Course Description
Modeling methods and computational approaches applicable to nanotechnology problems.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Spring

Repeat for credit?
No

IDS6252 - Biomedical Nanotechnology

Course Title
Biomedical Nanotechnology

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to the Professional Science Master's in Nanotechnology and IDS 6250, UG General and Organic Chemistry, or C.I.

Course Description
Synthesis and properties of nanomaterials related to biomedical applications, nanotechnology for in vitro and in vivo diagnostics, and therapeutics.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Spring

Repeat for credit?
No
IDS6253 - Bioanalytical Technology

Course Title
Bioanalytical Technology

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to the Professional Science Master's in Nanotechnology and IDS 6250, or C.I.

Course Description
Analytical technologies and products for biomolecular detection and analysis, nanotechnology-based medical diagnostics.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Fall

Repeat for credit?
No

IDS6254 - Nanofabrication and Characterization

Course Title
Nanofabrication and Characterization

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing.

Course Description
Admission to the Professional Science Master's in Nanotechnology and IDS 6250, or C.I. Techniques for fabrication and characterization of nanoscale materials, nanoelectronics and devices.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Spring

Repeat for credit?
No
IDS6255 - Nanotechnology in Energy and Sustainability

Course Title
Nanotechnology in Energy and Sustainability

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to the Professional Science Master's in Nanotechnology or C.I.

Course Description
Energy generation and storage, sustainability of materials and device fabrication and deployment, application of nanotechnology in improving the device efficiency in energy generation and storage.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Fall

Repeat for credit?
No

IDS6256 - Principles of Nanostructure Quantum Well, Wires, and Dots

Course Title
Principles of Nanostructure Quantum Well, Wires, and Dots

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to the PSM or MS in Nanotechnology and Intro Nanosci Nanotech, or C.I.

Course Description
Introduction to low dimensional semiconductor devices based on quantum wells, dots and wires; approximate and numerical device modeling.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Spring

Repeat for credit?
No

2023-2024 Graduate Catalog
IDS6257 - Principles and Techniques of Nanobiology

**Course Title**
Principles and Techniques of Nanobiology

**Credits Hours**
3

**Lab/Studio/Field Work Hours**
0

**Course Description**
Admission to the Nanotechnology PSM or MS program, or C.I. This course aims to integrate multi-disciplinary approaches covering physics, biology, and nanoscience to understand how living system works at the nanoscale.

**College**
College of Graduate Studies

**Department**
NanoScience Technology Center

**Terms of Offering**
Spring

**Repeat for credit?**
No

IDS6258 - Advanced Materials and Nanotechnology for Rechargeable Batteries

**Course Title**
Advanced Materials and Nanotechnology for Rechargeable Batteries

**Credits Hours**
3

**Lab/Studio/Field Work Hours**
0

**Prerequisites**
Admission to the PSM in Nanotechnology and IDS 6250 , or C.I.

**Course Description**
Build a bridge between nanomaterials and electrochemical energy storage performance and demonstrate renewable energy storage on the nanoscale.

**College**
College of Graduate Studies

**Department**
NanoScience Technology Center

**Terms of Offering**
Spring

**Repeat for credit?**
No
IDS6259 - Advanced Energy-Efficient Nanoelectronic Devices
Course Title
Advanced Energy-Efficient Nanoelectronic Devices

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to the PSM or MS in Nanotechnology or C.I.

Course Description
Discusses low power nanoelectronic devices that can meet the need of future electronics by using novel physical mechanisms of current conduction.

College
College of Graduate Studies

Department
NanoScience Technology Center

Repeat for credit?
No

IDS6260 - Electrical and Optical Properties of Nanoscale Materials and Devices
Course Title
Electrical and Optical Properties of Nanoscale Materials and Devices

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
IDS 6250 or C.I.

Course Description
Multiple topics on electrical and optical properties of nanoscale materials and devices, including size-dependent change in material properties, structural understanding by atomic-to-nanoscale characterizations, fabrication of nanoscale devices and their electrical properties, luminescent properties and applications.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Spring

Repeat for credit?
No
IDS6261 - Nanotechnology for Sustainable Agriculture
Course Title
Nanotechnology for Sustainable Agriculture

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to the PSM or MS in Nanotechnology or C.I.

Course Description
Prepares a new generation of STEM students who are equipped with necessary knowledge to adapt sustainable agricultural practices.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Fall

Repeat for credit?
No

IDS6262 - Research Design for Modeling and Simulation
Course Title
Research Design for Modeling and Simulation

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
IDS 6XXX Simulation Techniques.

Course Description
Theoretical and practical aspects of interdisciplinary research methodologies as they relate to human-centered Modeling and Simulation.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Fall

Repeat for credit?
No
IDS6264 - Biointerfaces Enabled by Micro/NanoFabrication

Course Title
Biointerfaces Enabled by Micro/NanoFabrication

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to the PSM or MS in Nanotechnology or C.I.

Course Description
Introduces students to the interfaces and devices in the biotechnology and biomedical arenas that are enabled by Micro/NanoFabrication.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering
Spring

Repeat for credit?
No

IDS6265 - Luminescent Materials and Devices

Course Title
Luminescent Materials and Devices

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
IDS 6250 or upon instructor approval.

Course Description
Fundamental and applied topics of luminescent materials and devices: Luminescent Processes; Phosphors; Scintillators; Organic Emitters; Compound Semiconductors; Quantum dots; Photoluminescence; Cathodoluminescence; Electroluminescence; Various Applications.

College
College of Graduate Studies

Department
NanoScience Technology Center

Terms of Offering

No
IDS6351 - Critical Thinking and Writing

Course Title
Critical Thinking and Writing

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
IDS 6308 and IDS 6669.

Course Description
Focus on refining critical understanding of interdisciplinary research and organization and presentation of interdisciplinary ideas, building on first two core courses.

College
College of Graduate Studies

Department
College of Graduate Studies Dean's Office

Terms of Offering
Fall

Repeat for credit?
No

IDS6503 - International Trends in Instructional Systems

Course Title
International Trends in Instructional Systems

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
EME 6613.

Course Description
International and multicultural issues and how they affect the global impact of technology in education, training, and quality management.

College
College of Community Innovation and Education

Department
Learning Sciences & Educational Research

Terms of Offering
Occasional
Summer

Repeat for credit?
No
IDS6504 - Adult Learning
Course Title
Adult Learning
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
Graduate standing.
Course Description
An examination of theory and research on adult learning with emphasis on practical applications, instruction, and technology use in educational and workplace settings.
College
College of Community Innovation and Education
Department
Learning Sciences & Educational Research
Terms of Offering
Fall
Repeat for credit?

IDS6516 - Leadership Development for Mathematics and Science Teachers

Course Title
Leadership Development for Mathematics and Science Teachers

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
Development of mathematics and science teachers' abilities to assume teacher leadership roles in their schools.

College
College of Community Innovation and Education

Department
School of Teacher Education

Terms of Offering
Even Spring

Repeat for credit?
No

IDS6606 - Approaches to Network Analysis and Applications

Course Title
Approaches to Network Analysis and Applications

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate Standing or C.I.

Course Description
This course is co-organized between social and computer scientists. It covers basic network concepts, best practices in collecting and analyzing network data and interdisciplinary/multidisciplinary applications.

College
College of Sciences

Department
School of Politics, Security, and International Affairs

Terms of Offering
Fall

Repeat for credit?
No
IDS6657 - Professional Collaboration in Language and Literacy

Course Title
Professional Collaboration in Language and Literacy

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
Interdisciplinary approach to exploring issues in language and literacy for struggling children and adolescents and development of collaboration competencies for professionals from different disciplines.

College
College of Health Professions and Sciences

Department
School of Communication Sciences and Disorders

Terms of Offering
Summer

Repeat for credit?
No

IDS6669 - Interdisciplinary Approaches to Research

Course Title
Interdisciplinary Approaches to Research

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
IDS 6308 or C.I.

Course Description
Explores methods/assumptions/challenges experienced in interdisciplinary research; includes practice integrating discipline-based research methods with reflexive/dialogic methods; helps prepare students for capstone project or thesis.

College
College of Graduate Studies

Department
College of Graduate Studies Dean's Office

Terms of Offering

IDS6694 - Experimental Design and Analysis in Biomedical Sciences
Course Title
Experimental Design and Analysis in Biomedical Sciences

Credits Hours
2

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing in biomedical sciences or C.I.

Course Description
Problem based learning graduate course focused on how to effectively design experiments and analyze data for hypothesis-driven research in biomedical sciences.

College
College of Medicine

Department
College of Medicine Burnett School of Biomedical Sciences

Terms of Offering
Spring

Repeat for credit?
No

IDS6740 - Nonlinear Dynamics in the Cognitive and Behavioral Sciences
Course Title
Nonlinear Dynamics in the Cognitive and Behavioral Sciences

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate Standing or C.I.

Course Description
Theoretical and practical aspects of research applying nonlinear dynamical systems methodologies as they relate to human-centered Modeling and Simulation.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Spring

IDS6916 - Simulation Research Methods and Practicum
Course Title
Simulation Research Methods and Practicum

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
DIG 5875C and DIG 5876 or their equivalents.

Course Description
Interdisciplinary teams of students conduct fundamental and applied research on contemporary issues in modeling, simulation, and training.

College
College of Graduate Studies

Department
School of Modeling, Simulation, and Training

Terms of Offering
Occasional

Repeat for credit?
No

IDS6933 - Seminar in Teaching Mathematics and Science
Course Title
Seminar in Teaching Mathematics and Science

Credits Hours
3 - 99

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing and valid Florida Teaching Certificate or C.I.

Course Description
This course is designed so that graduate students may study specific areas related to curriculum, instruction, and assessment in mathematics and science education. May be repeated for credit.

College
College of Community Innovation and Education

Department
School of Teacher Education

Terms of Offering
Every Semester

Repeat for credit?
Yes
IDS6937 - Teaching Mathematics and Science Using Reform-Based Practices

Course Title
Teaching Mathematics and Science Using Reform-Based Practices

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing and valid Florida Teaching Certificate or C.I.

Course Description
Focuses on the work of Dewey and Piaget as it applies to mathematics and science teaching. Emphasizes integrating math and science teaching.

College
College of Community Innovation and Education

Department
School of Teacher Education

Terms of Offering
Fall

Repeat for credit?
No

IDS6938ST1 - Hardware Prototyping for Modeling and Simulation

Course Title
Hardware Prototyping for Modeling and Simulation

Credits Hours
3

Course Description
Introduction to 3D design and printing, microcontroller programming, and circuit board construction. Additionally, IoT and MQTT protocols to manage data, and IP protection topics.

IDS6938ST2 - Stereoscopy for Art and Science Using 3D Applications

Course Title
Stereoscopy for Art and Science Using 3D Applications

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
Hands-on use of large 3D applications, such as MAYA and NUKE, to explore how stereoscopic 3D (S3D) can further enhance engineering-related problems and scientific query. Additionally, the emerging field of stereoscopic art is addressed.
IDS6938ST3 - ST: Interdisciplinary Approaches to Research
Course Title
ST: Interdisciplinary Approaches to Research

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
Explores methods/assumptions/challenges experienced in interdisciplinary research. Includes practice integrating discipline-based research methods with reflexive/dialogic methods; helps prepare students for capstone project or thesis.

IDS6938ST4 - ST: Usable Security & Privacy
Course Title
ST: Usable Security & Privacy

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
Introduces usability problems in security and privacy methods, tools, and software and overviews prominent examples of both failures and successes in usable security and privacy.

IDS6938ST5 - ST: Nonlinear Dynamics in the Cognitive and Behavioral Sciences
Course Title
ST: Nonlinear Dynamics in the Cognitive and Behavioral Sciences

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
Theoretical and practical aspects of research applying nonlinear dynamical systems methodologies as they relate to human-centered Modeling and Simulation.
IDS6939 - Reforming Curriculum in Mathematics and Science Education

Course Title
Reforming Curriculum in Mathematics and Science Education

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing and valid Florida Teaching Certificate or C.I. Emphasizes the reform movement including technology, history of curriculum, curriculum theory, and standards documents.

Seminar in Management Research

Credits Hours
1 - 99

Prerequisites
Admission to PhD program or C.I.

Course Description
Examines empirical and theoretical research in selected management topics. Specific topics may not be repeated for credit. Maximum of 15 hours toward degree. May be repeated for credit only when course content is different.

MAP - Mathematics Applied
MAP5117 - Mathematical Modeling

Course Title
Mathematical Modeling

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
STA 4321, MAP 4303, graduate standing or senior standing, or C.I.

Course Description
Introduction to modeling in industrial and scientific applications; techniques for studying statistical and deterministic models.

College
College of Sciences

Department
Department of Mathematics

Terms of Offering
Even Fall

Repeat for credit?
No

MAP5336 - Ordinary Differential Equations and Applications

Course Title
Ordinary Differential Equations and Applications

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
MAA 5228 or C.I.

Course Description
Existence and uniqueness of solutions of differential equations, systems of ordinary differential equations, autonomous systems, phase plane analysis, stability, bifurcations.

College
College of Sciences

Department
Department of Mathematics

Terms of Offering
Spring

Repeat for credit?
No
MAP5426 - Special Functions
Course Title
Special Functions
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
MAP 2302, and graduate status or senior standing or C.I.
Course Description
Series and integral representations, generating functions, recurrence relations and orthogonality properties of the special functions. Emphasis on Bessel, Legendre and hypergeometric functions.

2023-2024 Graduate Catalog
MAP6207 - Optimization Theory
Course Title
Optimization Theory

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
MAA 4226 or C.I.

Course Description
Lagrangian function and duality, Kuhn-Tucker' theorem, quadratic programming and Wolfe's theorem, Griffith and Stewar's method, search methods for unconstrained optimization.

College
College of Sciences

Department
Department of Mathematics

Terms of Offering
Occasional

Repeat for credit?

MAP6218 - Stochastic Calculus
Course Title
Stochastic Calculus

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
MAA 6245, or C.I. Stochastic integration, Stochastic Differential Equations.

College
College of Sciences

Department
Department of Mathematics

Terms of Offering
Occasional

Repeat for credit?
No
MAP6356 - Partial Differential Equations

Course Title
Partial Differential Equations

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
MAP 4341 or MAP 5435 or equivalent.

Course Description
First and second order linear equations; classification; analytical methods including Green's functions and integral representations; introduction to nonlinear equations; applications.

College
College of Sciences

Department
Department of Mathematics

Terms of Offering
Even Fall

Repeat for credit?

MAP6385 - Applied Numerical Mathematics

Course Title
Applied Numerical Mathematics

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
MAT5712 Scientific Computing, or C.I.

Course Description
Topics in solutions of linear systems, numerical linear algebra, numerical solutions of partial differential equations, linear programming and optimization.

College
College of Sciences

Department
Department of Mathematics

Terms of Offering
Spring

Repeat for credit?
No
MAP6387 - Numerical Linear Algebra

Course Title
Numerical Linear Algebra

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
MAT 5712 Scientific Computing, MAP 6385 Applied Numerical Mathematics, or C.I

Corequisites
The students should be very comfortable with applying the theorems from Calculus, Linear Algebra concepts and using MATLAB or Fortan as a programming language.

Course Description
Prepares students to understand fundamentals of numerical linear algebra and its algorithms, optimization and statistics, and machine learning algorithms with applications.

MAP6419 - Advanced Transform Methods
Course Title
Advanced Transform Methods

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
MAP 6424 or C.I.

Course Description
Fourier analysis and sliding-window Fourier transform, sampling theory and its applications in signal analysis and optics, Radon transforms, the technique of back projection.

College
College of Sciences

Department
Department of Mathematics

Terms of Offering
Occasional

Repeat for credit?
No
MAP6420 - Generalized Functions

Course Title
Generalized Functions

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
MAA 6506 or C.I.

Course Description
Spaces of test functions and their duals, calculus of distributions, convolution and tempered distributions, Fourier transforms of distributions, and applications to PDEs.

College
College of Sciences

Department
Department of Mathematics

Repeat for credit?
No

MAP6421 - Integral Equations

Course Title
Integral Equations

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
MAA 6405 or C.I.

Course Description
Successive approximations, Volterra equations, Fredholm theory, Hilbert-Schmidt theory, Newmann series, singular integral equations, the Riemann-Hilbert problem.

College
College of Sciences

Department
Department of Mathematics

Terms of Offering

MAP6438 - Mathematical Fluid-Flow Theory I

Course Title
Mathematical Fluid-Flow Theory I

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
MAP 2302, MAP 4303, MAA 4402, PHY 3220 or equivalent, or C.I.

Course Description
Mathematical theory of incompressible fluid flows along with analytical methods in solving the equations of fluid dynamics in various situations.

College
College of Sciences

Department
Department of Mathematics

Terms of Offering
Repeat for credit?
No
MAP6445 - Approximation Techniques

Course Title
Approximation Techniques

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
MAA 4227, MAA 5210 or C.I.

Course Description
Normed linear spaces; Weierstrass approximation theorem; Tchebycheff approximation by polynomials; trigonometric approximation; orthogonal expansions and least squares approximations.

College
College of Sciences

Department
Department of Mathematics

Terms of Offering

MDE8505 - Pediatrics Emergency Medicine

Course Title
Pediatrics Emergency Medicine

Credits Hours
6

Lab/Studio/Field Work Hours
0

Prerequisites
Completion of M3 Core Clerkships.

Course Description
This elective will provide students with experience assessing and caring for children in a Pediatrics Emergency Department that provides emergent and urgent care to patients aged 0-17 years old, including pregnant adolescent patients in their first trimester. Students will be exposed to a wide variety of illnesses and injuries, including critical illnesses, and primary care diagnoses. Supervision will be provided by attending physicians in Pediatrics, Emergency Medicine or Pediatrics Emergency Medicine. Students will perform an initial rapid assessment followed by a thorough history and physical examination, and then generate a differential diagnoses and preliminary management plan. All management decisions will be discussed with a senior resident or attending physician.

**Prerequisites**
Graduate standing or C.I.

**Course Description**
Optical propagation of light waves as applied to isotropic, anisotropic, and inhomogeneous media, guided waves and Gaussian beams.

**College**
College of Optics and Photonics

**Department**
College of Optics and Photonics

**Terms of Offering**
Fall
Spring

**Repeat for credit?**
No
OSE6120 - Theoretical Foundations of Optics
Course Title
Theoretical Foundations of Optics

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
Mathematical concepts used in Optics. Topics covered include linear algebra, orthogonal expansions of functions, Fourier transforms, ordinary differential equations, and partial differential equations.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Fall

Repeat for credit?
No

OSE6125 - Computational Photonics
Course Title
Computational Photonics

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing, OSE 6111 or C.I.

Course Description
Computational methods for photonic guided wave structures, periodic structures, and integrated photonic structures and devices.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Spring

Repeat for credit?
No
OSE6143 - Fiber Optics Communication System

Course Title
Fiber Optics Communication System

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing and OSE 6111 and OSE 6474 or C.I.

Course Description
Use of fiber optics as a communication channel. Principles of fiber optics. Mode theory, transmitters, modulators, sensors detectors and demodulators.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Spring

Repeat for credit?
No

OSE6211 - Imaging and Optical Systems

Course Title
Imaging and Optical Systems

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admitted to a graduate program in Optics, Physics or Electrical Engineering, or C.I.

Course Description
Linear systems theory of discrete and continuous one- and two-dimensional systems. Applications to optical polarization, pulse propagation, and image formation.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Fall
Spring

Repeat for credit?
No
OSE6242 - Infrared Systems
Course Title
Infrared Systems

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
GS in Electrical Engineering, or GS in Optics and Photonics, or C.I.

Course Description
This course provides the background, theory, and practice of how to design, analyze, and test high performance infrared imaging systems.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Fall

Repeat for credit?
No

OSE6265 - Optical Systems Design
Course Title
Optical Systems Design

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate Standing and OSE 5203 or C.I.

Course Description
Design principles of lens and mirror optical systems; evaluation of designs using computer techniques.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Occasional

Repeat for credit?
No

2023-2024 Graduate Catalog
OSE6313 - Materials for Optical Systems
Course Title
Materials for Optical Systems

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
Course reviews attributes of optical materials, physical properties and structural origin to predict performance and limitations of optical materials devices and components in optical systems.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Occasional

Repeat for credit?
No

OSE6334C - Nonlinear Optics
Course Title
Nonlinear Optics

Credits Hours
3

Lab/Studio/Field Work Hours
0.5

Prerequisites
Graduate standing and OSE 6111 or C.I.

Course Description
Maxwell's equations in nonlinear media, frequency conversion techniques (SHG, SFG, OPO), stimulated scattering, phase conjugation, wave-guided optics, nonlinear crystals.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Spring

Repeat for credit?
No
OSE6335 - Nonlinear Guided Wave Optics
Course Title
Nonlinear Guided Wave Optics

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing and OSE 6334C or C.I.

Course Description
The physics and applications of nonlinear optical interactions in fibers and planar waveguides is discussed, including parametric processes, all-optical effects and solutions.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Even Fall

Repeat for credit?
No

OSE6347 - Quantum Optics
Course Title
Quantum Optics

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing and OSE 5312 or C.I.

Course Description
Semiclassical treatment of light/matter interactions (quantized atomic states plus Maxwell's equations). Density matrix theory, coherent optical transients, pulse propagation.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Even Spring

Repeat for credit?
No
OSE6349 - Applied Quantum Mechanics for Optics and Engineering

Course Title
Applied Quantum Mechanics for Optics and Engineering

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
Presents the elements of quantum mechanics that are essential for understanding many areas in modern optics and photonics.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Fall

Repeat for credit?
No

OSE6416 - Organic Photonics

Course Title
Organic Photonics

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
Graduate standing, C.I. The course reviews optic and electronic properties inorganic molecules and polymers that are critical for photonic and opto-electronic applications.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Spring

Repeat for credit?
No
**OSE6421 - Integrated Photonics**

**Course Title**
Integrated Photonics

**Credits Hours**
3

**Lab/Studio/Field Work Hours**
0

**Prerequisites**
Graduate standing, OSE 6111 or C.I.

**Course Description**
Reviews working principle, system functionality and design and fabrication issues of semiconductor integrated photonic devices and circuits for optical telecommunication and interconnect applications.

**College**
College of Optics and Photonics

**Department**
College of Optics and Photonics

**Terms of Offering**
Spring

**Repeat for credit?**
No

---

**OSE6445 - Fundamentals of Ultrafast Optics**

**Course Title**
Fundamentals of Ultrafast Optics

**Credits Hours**
3

**Lab/Studio/Field Work Hours**
0

**Prerequisites**
Graduate standing, and OSE 6111 or PHY 5346, and OSE 5525, or C.I.

**Course Description**

**College**
College of Optics and Photonics

**Department**
College of Optics and Photonics

**Terms of Offering**
Spring

**Repeat for credit?**
No
OSE6447 - Attosecond Optics
Course Title
Attosecond Optics
Credits Hours
3
Lab/Studio/Field Work Hours
0
Course Description
Graduate standing, and OSE 6349 or PHY 5606, and OSE 6111 or PHY 5346 or OSE 5525, or C.I. Introduction of the forefront of attosecond optics research. Topics include the fundamental theories and latest journal publications.

OSE6526C - Laser Engineering Laboratory
Course Title
Laser Engineering Laboratory

Credits Hours
3

Lab/Studio/Field Work Hours
3

Prerequisites
Graduate standing and OSE 5525 or C.I.

Course Description
Designing and device implementation of diode pumped solid-state lasers, nonlinear frequency conversion, Q-switching, mode locking, and pulse second harmonic generation.

College
College of Optics and Photonics

Department
College of Optics and Photonics

Terms of Offering
Summer

Repeat for credit?
No
OSE6527 - Fiber Lasers
Course Title
Fiber Lasers
Credits Hours
3
Lab/Studio/Field Work Hours
0
Course Description
GS and OSE 5525, and OSE 6432 or OSE 6474. This course combines an introduction to fiber lasers with detailed technical discussions based on reviews of recent progress and latest developments in fiber laser research.
College
College of Optics and Photonics

OSE6536 - Semiconductor Lasers
Course Title
Semiconductor Lasers
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
Graduate standing and OSE 5414 or C.I.
Course Description
Light-matter interaction, thermal physics and solid state physics to understand, analyze, and engineer semiconductor lasers with different active region dimensionalities.
College
College of Optics and Photonics
Department
College of Optics and Photonics
Terms of Offering
Spring
Repeat for credit?
No
OSE6615L - Optoelectronic Device Fabrication Laboratory

Course Title
Optoelectronic Device Fabrication Laboratory

Credits Hours
3

Lab/Studio/Field Work Hours
6

Prerequisites
Graduate standing or C.I.

Course Description
Design and micro-fabrication of semiconductor optoelectronics devices including passive waveguides, light emitting diodes (LEDs), laser diodes (LDs), photodetectors and electro-optic modulators.

College
College of Optics and Photonics

Department
College of Optics and Photonics

PAD - Public Administration
PADS041 - Ethics and Values in Public Administration

Course Title
Ethics and Values in Public Administration

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
Examination of ethics in the public sector. Public concerns, past patterns, and individual/social aspects of ethical behavior are explored.

College
College of Community Innovation and Education

Department
School of Public Administration

Terms of Offering
Occasional

Repeat for credit?
No

PADS145 - Volunteerism in Nonprofit Management

Course Title
Volunteerism in Nonprofit Management

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Master of Nonprofit Management degree, Nonprofit certificate or C.I.

Course Description
Volunteer development in nonprofit organizations, including board selection, development and leadership, volunteer recruitment, training, retention and theories of motivation, leadership, ethical issues.

Admission to Public Affairs Ph.D. Program or C.I.

**Course Description**
Provides an overview of public affairs and is taught from an interdisciplinary perspective focused on the necessary components to effectively address community-based problems.

**College**
College of Community Innovation and Education

**Department**
School of Public Administration

**Terms of Offering**
Fall

**Repeat for credit?**
No
PAF7055 - Seminar in State and Local Government Policy Research
Course Title
Seminar in State and Local Government Policy Research
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
Admission to Public Affairs Ph.D. program or C.I.
Course Description
State and local governments explored from a comparative perspective. Focusing upon similarities and differences between states with implications for state and local policy.
College
College of Community Innovation and Education
Department
School of Public Administration
Terms of Offering
Even Spring
Repeat for credit?
No

PAF7230 - Strategic Change and Management for Public Affairs
Course Title
Strategic Change and Management for Public Affairs
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
Admission to Public Affairs Ph.D. program or C.I.
Course Description
Course deals with change in: organizations, governance relationships and communities. The course uses a "tools" approach.
College
College of Community Innovation and Education
Department
School of Public Administration
Terms of Offering
Spring
Repeat for credit?
No
PAF7317 - Social Inquiry and Public Policy

Course Title
Social Inquiry and Public Policy

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Public Affairs Ph.D. or C.I.

Course Description
Course examines the philosophical foundations of social inquiry and the importance of theory in public policy and evaluation research.

College
College of Community Innovation and Education

Department
School of Public Administration

Terms of Offering
Fall

Repeat for credit?
No

PAF7325 - Policy and Program Evaluation for Public Affairs

Course Title
Policy and Program Evaluation for Public Affairs

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Public Affairs Ph.D. PAF 7802 and PAF 7804, or C.I.

Course Description
Course is designed to use empirical information to assess the effectiveness of policies and programs in public and nonprofit settings.

College
College of Community Innovation and Education

Department
School of Public Administration

Terms of Offering
Fall

Repeat for credit?
No

No
PAF7510 - Seminar in Policy Evaluation and Performance Measurement

Course Title
Seminar in Policy Evaluation and Performance Measurement

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Public Affairs Ph.D. Program or C.I.

Course Description
Applies quantitative methods to policy evaluation and performance measurement, particularly related to national and global policy changes for human development and growth.

College
College of Community Innovation and Education

Department
School of Public Administration

Terms of Offering
Odd Fall

Repeat for credit?
No

PAF7757 - Seminar in Global Governance and Policy Research

Course Title
Seminar in Global Governance and Policy Research

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Public Affairs Ph.D. program or C.I.

Course Description
Comparative analysis in Public Affairs from global perspective examining and comparing U.S. Public Affairs and International Global areas.

College
College of Community Innovation and Education

Department
School of Public Administration

Terms of Offering
Occasional

Repeat for credit?
No
PAF7802 - Advanced Research Methodology for Public Affairs

Course Title
Advanced Research Methodology for Public Affairs

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Public Affairs Ph.D. program or C.I.

Course Description
Course focuses on the nature and process of scientific inquiries including specific methods for conducting social science research in a community setting.

College
College of Community Innovation and Education

Department
School of Public Administration

Terms of Offering
Fall

Repeat for credit?
No

PAF7804 - Advanced Statistics for Public Affairs I: Multivariate Analysis

Course Title
Advanced Statistics for Public Affairs I: Multivariate Analysis

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Public Affairs Ph.D. Program or C.I.

Course Description
An advanced statistical course that efficiently and effectively perform multivariate modeling and analyze multivariate statistical data to address critical issues in public affairs.

College
College of Community Innovation and Education

Department
School of Public Administration

Terms of Offering
Spring

Repeat for credit?
No
PAF7805 - Advanced Statistics for Public Affairs II: Survey of Statistical Methods
Course Title
Advanced Statistics for Public Affairs II: Survey of Statistical Methods

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Public Affairs Ph.D. program, PAF 7802 and PAF 7804 or C.I.

Course Description
Introduction to an array of statistical modeling techniques for different types of data and research designs. Coverage of theory and application of each technique.

College
College of Community Innovation and Education

Department
School of Public Administration

Terms of Offering
Fall

Repeat for credit?
No

PAF7820 - Qualitative Methods for Public Affairs
Course Title
Qualitative Methods for Public Affairs

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Public Affairs Ph.D. program and PAF 7802 and PAF 7804, or C.I.

Course Description
Course is an overview of qualitative research methods and their application in interdisciplinary and mixed methods community-based public affairs research.

College
College of Community Innovation and Education

Department
School of Public Administration

Terms of Offering
Fall

Repeat for credit?
No
PAF7856 - Applications of Structural Equation Modeling in Public Affairs

Course Title
Applications of Structural Equation Modeling in Public Affairs

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Public Affairs Ph.D. program or C.I.

Course Description
Course introduces advanced methods that include causal thinking, predictor tree analysis, propensity source matching and analysis, latent growth curve modeling and multilevel modeling.

College
College of Community Innovation and Education

Department
School of Public Administration

Terms of Offering
Spring

Repeat for credit?

PCB - Process Cell Biology

PCB5025 - Molecular and Cellular Pharmacology

Course Title
Molecular and Cellular Pharmacology

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing, PCB 3522.

Course Description
The cellular and molecular events that lead to disease states and the molecular basis of agents that modulate these processes will be covered.

College
College of Medicine

Department
College of Medicine Burnett School of Biomedical Sciences

Terms of Offering
Spring

Repeat for credit?
No
PCB5235 - Molecular Immunology
Course Title
Molecular Immunology
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
MCB 3020C or equivalent.
Course Description
Fundamental functions of the human immune system, focusing on cellular and molecular aspects of the innate and adaptive immune response.
College
College of Medicine
Department
College of Medicine Burnett School of Biomedical Sciences
Terms of Offering
Fall
Repeat for credit?
No

PCB5236 - Cancer Biology
Course Title
Cancer Biology
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
PCB 4524 and graduate standing.
Course Description
Current knowledge and research on molecular mechanism of tumor development, tumor progression, metastasis and therapy of cancer.
College
College of Medicine
Department
College of Medicine Burnett School of Biomedical Sciences
Terms of Offering
Occasional

PCB5362C - Wetland Ecology and Biogeochemistry

Course Title
Wetland Ecology and Biogeochemistry

Credits Hours
4

Lab/Studio/Field Work Hours
3

Prerequisites
Graduate standing in the Department of Biology or C.I.

Course Description
Examination of wetland ecosystems, laws and policy, current research, global biogeochemical cycles, and relevant field and laboratory techniques.

College
College of Sciences

Department
Department of Biology

Terms of Offering
Even Spring

Repeat for credit?
No

PCB5416 - Sensory Ecology

Course Title
Sensory Ecology

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
C.I.

Course Description
How and why animals acquire, process and use information from their environment, and how sensory systems influence evolutionary processes.

College
College of Sciences

Department
Department of Biology

Terms of Offering

Department of Biology

Repeat for credit?
Yes
PCB6041 - Ecological Modeling
Course Title
Ecological Modeling
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
PCB 6466, or C.I.
Course Description
Mathematical models used in ecology and offers tools for process-based model development in ecology.
College
College of Sciences
Department
Department of Biology
Terms of Offering
Spring
Repeat for credit?
No

PCB6042 - Conservation Biology Theory
Course Title
Conservation Biology Theory
Credits Hours
4
Lab/Studio/Field Work Hours
0
Course Description
Graduate standing in Biology or C.I. Review and analysis of the literature of conservation biology.
College
College of Sciences
Department
Department of Biology
Repeat for credit?
No
PCB6046 - Advanced Ecology
Course Title
Advanced Ecology

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing in Biology, admission to Certificate in Conservation Biology, or C.I.

Course Description
Population and community ecology with emphasis on growth, regulation, species interactions, succession, and community classification.

College
College of Sciences

Department
Department of Biology

Terms of Offering

PHT6070C - Radiology/Imaging for Physical Therapy

Course Title
Radiology/Imaging for Physical Therapy

Credits Hours
3

Lab/Studio/Field Work Hours
1

Prerequisites
Admission to DPT program.

Course Description
A diagnostic imaging course focusing on clinical implications in rehabilitation. The focus will be on patients with neurological and orthopedic disorders.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Fall

Repeat for credit?
No

PHT6115C - Gross Anatomy/Neuroscience I

Course Title
Gross Anatomy/Neuroscience I

Credits Hours
6

Lab/Studio/Field Work Hours
6

Prerequisites
Admission to DPT program.

Course Description
Study of human anatomy via lecture and cadaver dissection emphasizing upper and lower extremity, musculoskeletal, peripheral vascular and peripheral nervous systems, thoracic and abdominopelvic cavities.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Summer

Current Fee Per Student
$70.00

Repeat for credit?
No
PHT6118C - Gross Anatomy/Neuroscience II
Course Title
Gross Anatomy/Neuroscience II

Credits Hours
6

Lab/Studio/Field Work Hours
6

Prerequisites
Gross Anatomy/Neuroscience I.

Course Description
Comprehensive study of anatomy and physiology of the nervous system to develop DPT students' improved treatment strategies for patients with neurological problems.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Fall

Current Fee Per Student
$70.00

Repeat for credit?
No

PHT6119L - Seminar in Anatomical Sciences Techniques
Course Title
Seminar in Anatomical Sciences Techniques

Credits Hours
3

Lab/Studio/Field Work Hours
6

Prerequisites
Admission to the Anatomical Sciences Graduate Certificate.

Course Description
Development of skills as an anatomist with an emphasis on integrating a diverse repertoire of scientific technique.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Occasional

Repeat for credit?
No
PHT6153 - Physiologic Assessment in Physical Therapy Practice

**Course Title**
Physiologic Assessment in Physical Therapy Practice

**Credits Hours**
2

**Lab/Studio/Field Work Hours**
2

**Prerequisites**

PHT 6156C.

**Course Description**
Course provides clinical applications and laboratory demonstrations of human musculoskeletal, neurological, cardiovascular, hemopoietic, respiratory, gastrointestinal, and renal systems.

**College**
College of Health Professions and Sciences

**Department**
School of Kinesiology and Rehabilitation Sciences- Kinesiology

**Terms of Offering**
Fall

**Repeat for credit?**

No

2023-2024 Graduate Catalog
**PHT6156 - Applied Human Physiology for Health Sciences**

**Course Title**
Applied Human Physiology for Health Sciences

**Credits Hours**
3

**Lab/Studio/Field Work Hours**
0

**Prerequisites**
Admission to the Doctor of Physical Therapy program.

**Course Description**
Course provides in-depth study of human cardiovascular, hemopoietic, respiratory, gastrointestinal, renal and reproductive systems with emphasis on mechanisms responsible for maintaining homeostasis.

**College**
College of Health Professions and Sciences

**Department**
School of Kinesiology and Rehabilitation Sciences - Kinesiology

**Terms of Offering**
Summer

**Current Fee Per Student**
$25.00

**Repeat for credit?**
No

---

**PHT6156C - Applied Human Physiology for Health Sciences**

**Course Title**
Applied Human Physiology for Health Sciences

**Credits Hours**
3

**Prerequisites**
Admission to the Doctor of Physical Therapy program.

**Course Description**
Course provides in-depth study of human cardiovascular, hemopoietic, respiratory, gastrointestinal, renal and reproductive systems with emphasis on mechanisms responsible for maintaining homeostasis.

$25.00
PHT6161C - Neuroplasticity of Human Movement

Course Title
Neuroplasticity of Human Movement

Credits Hours
3

Lab/Studio/Field Work Hours
1

Prerequisites
Complete at least 2 courses of the following types:
Anatomy at the undergraduate or graduate level.

Course Description
Anatomical foundation of brain function as it pertains to normal body movements and the neuroplasticity that occurs during the process of rehabilitation after injury.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences

Terms of Offering
Even Spring
Odd Spring

Current Fee Per Student
70

Repeat for credit?
No
Course Title

Pain Mechanisms and Treatment in Rehabilitation

Credits Hours

2

Lab/Studio/Field Work Hours

2

Prerequisites

Admission to Doctor of Physical Therapy program.

Course Description

This course will cover current concepts in pain science, including theoretical models for the basis of pain and the multidimensional nature of pain.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering

Summer

Current Fee Per Student

$45.00

No
PHT6242 - Orthopedic Physical Therapy
Course Title
Orthopedic Physical Therapy

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
NGR 6210, NGR 6230L.

Corequisites
PHT 6242L

Course Description
Examination and interventions for the evaluation and treatment of specific orthopedic cases and injuries presented.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Fall

Repeat for credit?
No
PHT6242L - Orthopedic Physical Therapy Lab

Course Title
Orthopedic Physical Therapy Lab

Credits Hours
1

Lab/Studio/Field Work Hours
2

Corequisites
Orthopedic Physical Therapy.

Course Description
Lab course emphasizing the examinations and interventions for the evaluation and treatment of specific orthopedic cases and injuries.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Fall

Current Fee Per Student
$40.00

Repeat for credit?
No
PHT6245 - Therapeutic Exercise II
Course Title
Therapeutic Exercise II
Credits Hours
2
Lab/Studio/Field Work Hours
0
Prerequisites
PHT 5218 and PHT 5218L
Corequisites
PHT 6245L
Course Description
Exploration of the various therapeutic exercise modalities, and their application to the rehabilitation course of treatment.
College
College of Health Professions and Sciences
Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology
Terms of Offering
Fall
Repeat for credit?
No
PHT6245L - Therapeutic Exercise II Lab

**Course Title**
Therapeutic Exercise II Lab

**Credits Hours**
1

**Lab/Studio/Field Work Hours**
2

**Prerequisites**
Therapeutic Exercise I and Lab

**Corequisites**
Therapeutic Exercise II.

**Course Description**
Lab course emphasizing the use of the various therapeutic exercise modalities.

**College**
College of Health Professions and Sciences

**Department**
School of Kinesiology and Rehabilitation Sciences - Kinesiology

**Terms of Offering**
Fall

**Current Fee Per Student**
$15.00

**Repeat for credit?**
No
PHT6306 - Pathology in Rehabilitation

Course Title
Pathology in Rehabilitation

Credits Hours
2

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to Doctor of Physical Therapy program.

Course Description
Organized seminars on the pathophysiology and clinical manifestations and treatments of various medical conditions as they relate to medical management in rehabilitation.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Spring

Repeat for credit?
No

PHT6322C - Pediatric Physical Therapy

Course Title
Pediatric Physical Therapy

Credits Hours
3

Lab/Studio/Field Work Hours
2

Prerequisites
Admission to DPT program.

Course Description
Study of the normal neurodevelopmental sequences for pediatric clinical assessment and physical therapy intervention provided to clients with abnormal diseases and dysfunction.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Fall

Repeat for credit?
No
PHT6356 - Pharmacology in Rehabilitation

Course Title
Pharmacology in Rehabilitation

Credits Hours
2

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to the Doctor of Physical Therapy program.

Course Description
Mechanisms of drug action, dose-response relations, pharmacokinetics, drug delivery systems, drug metabolism, toxicity of pharmacological agents, and drug interaction as it relates to rehabilitation.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Spring

Repeat for credit?
No

PHT6374C - Geriatric Physical Therapy

Course Title
Geriatric Physical Therapy

Credits Hours
2

Lab/Studio/Field Work Hours
1

Prerequisites
Admission to the Doctor of Physical Therapy program.

Course Description
This course provides an introduction to physiological aging and physical therapy management of the older adult. Includes examination, evaluation, and development of intervention programs focusing on exercise, prevention, education, and modification programs.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Spring

Repeat for credit?
No
PHT6381C - Cardiopulmonary Physical Therapy
Course Title
Cardiopulmonary Physical Therapy

Credits Hours
2

Lab/Studio/Field Work Hours
1

Prerequisites
Admission to DPT program.

Course Description
Examinations and interventions for the management of chronic and acute cardiopulmonary problems. Teaching patient strategies for preventing/managing dysfunction.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Fall

Current Fee Per Student
$15.00

Repeat for credit?
No

PHT6510 - Administration of Anatomical Sciences Laboratory
Course Title
Administration of Anatomical Sciences Laboratory

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate or professional level gross human cadaver dissection course.

Course Description
Developing administrative skills for educators in the anatomical sciences with an emphasis on laboratory safety, health concerns, and cadaver procurement and storage to prepare educators for graduate and professional programs.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Summer

Repeat for credit?
No
PHT6521 - Management of Physical Therapy Services
Course Title
Management of Physical Therapy Services

Credits Hours
2

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to DPT program.

Course Description
Planning, organizing, delivering and evaluating physical therapy services within a health care system, including quality management, third party payers, DRG's and legislative impact.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences– Kinesiology

Terms of Offering
Spring

Repeat for credit?
No

PHT6606 - Research Methods in Physical Therapy
Course Title
Research Methods in Physical Therapy

Credits Hours
2

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to DPT program.

Course Description
Methods of research applied to clinical environment of physical therapy. Coverage of the language, logic, design and analysis of clinical research.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences– Kinesiology

Terms of Offering
Spring

Repeat for credit?
No
PHT6618 - Research Applications in Physical Therapy

Course Title
Research Applications in Physical Therapy

Credits Hours
2

Lab/Studio/Field Work Hours
0

Prerequisites
Research methods in Physical Therapy - PHT 6606.

Course Description
To evaluate research studies, focus on evidence-based practice. SPSS and principles of epidemiology will be introduced.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Fall

Repeat for credit?
No

PHT6702C - Orthotics and Prosthetics in Rehabilitation

Course Title
Orthotics and Prosthetics in Rehabilitation

Credits Hours
1

Lab/Studio/Field Work Hours
1

Prerequisites
Admitted to PTDPT

Course Description
Integration of orthotic and prosthetic devices into rehabilitation with additional focus on device functions, indications for use, and integration into patient care in physical rehabilitation.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences

Terms of Offering
Fall

Repeat for credit?
No
PHT6716C - Advanced Orthopedic Physical Therapy

Course Title

Advanced Orthopedic Physical Therapy

Credits Hours

2

Lab/Studio/Field Work Hours

1

Prerequisites

Orthopedic Physical Therapy

Corequisites

Advanced Orthopedic Physical Therapy Lab.

Course Description

Specific rehabilitative protocols regarding particular orthopedic injuries and illnesses are presented. Focus on the previous course work in therapeutic modalities, anatomy, physiology, and therapeutic exercises incorporated.

College

College of Health Professions and Sciences

Department

School of Kinesiology and Rehabilitation Sciences– Kinesiology

Terms of Offering

Spring

Current Fee Per Student

$25.00

Repeat for credit?

No
PHT6719 - Advanced Neurological Physical Therapy

Course Title
Advanced Neurological Physical Therapy

Credits Hours
2

Lab/Studio/Field Work Hours
0

Prerequisites
PHT 5718

Corequisites
PHT 6719L.

Course Description
Examinations and interventions for the evaluation and treatment of the neurological patient. Emphasis on patients with spinal cord injury and neurological diseases.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences– Kinesiology

Terms of Offering
Fall

Repeat for credit?
No
PHT6719L - Advanced Neurological Physical Therapy Lab

Course Title
Advanced Neurological Physical Therapy Lab

Credits Hours
1

Lab/Studio/Field Work Hours
2

Prerequisites
PHT 5718L

Corequisites
PHT 6719.

Course Description
Course Emphasizing examinations and interventions for the evaluation and treatment of patients with neurological disease. Emphasis on patients with spinal cord injury and neurological disease.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences – Kinesiology

Terms of Offering
Fall

Current Fee Per Student
$25.00

Repeat for credit?
No
PHT6720 - Integumentary Physical Therapy

**Course Title**
Integumentary Physical Therapy

**Credits Hours**
1

**Lab/Studio/Field Work Hours**
0

**Prerequisites**
Admission to Physical Therapy program.

**Course Description**
Instruction in contemporary issues and specialized care of the integumentary system provided by physical therapists.

**College**
College of Health Professions and Sciences

**Department**
School of Kinesiology and Rehabilitation Sciences - Kinesiology

**Terms of Offering**
Spring

**Current Fee Per Student**
$45.00

**Repeat for credit?**
No
PHT6805C - Clinical Education I
Course Title
Clinical Education I
Credits Hours
4
Lab/Studio/Field Work Hours
20
Prerequisites
Admission to DPT program.
Course Description
Collaborative course where students meet to analyze, synthesize and discuss current professional, ethical and moral decision-making in physical therapy setting, culminating in a six-week clinical internship.
College
College of Health Professions and Sciences
Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology
Terms of Offering
Fall
Current Fee Per Student
$12.50
Repeat for credit?
No

PHT6909 - Research Report
Course Title
Research Report
Credits Hours
1 - 99
College
College of Health Professions and Sciences
Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology
Repeat for credit?
Yes
PHT6918 - Directed Research

Course Title
Directed Research

Credits Hours

PHT6938ST1 - ST: Seminar in Anatomical Sciences Techniques

Course Title
ST: Seminar in Anatomical Sciences Techniques

Credits Hours
2

Lab/Studio/Field Work Hours
0

Course Description
Development of skills as an anatomist with an emphasis on integrating a diverse repertoire of scientific technique.
PHT6938ST2 - ST: Administration of Anatomical Sciences Laboratory
Course Title
ST: Administration of Anatomical Sciences Laboratory

Credits Hours
1

Lab/Studio/Field Work Hours
0

Course Description
The course focuses on developing administrative skills as an educator in the anatomical sciences emphasizing laboratory safety, health concerns, and cadaver procurement and storage.

PHT6958 - Study Abroad
Course Title
Study Abroad

Credits Hours
0 - 99

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Repeat for credit?
Yes

PHT7021 - Professional Practice in Physical Therapy
Course Title
Professional Practice in Physical Therapy

Credits Hours
2

Lab/Studio/Field Work Hours
0

Prerequisites
Foundations of Physical Therapy.

Course Description
Professional development, ethics and strategies to address cultural diversity issues, communication skills and different styles of learning to prepare for clinical practice as a doctoring healthcare professional in physical therapy.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Spring

Repeat for credit?
No

2023-2024 Graduate Catalog
PHT7134C - Physical Therapy Integration

Course Title
Physical Therapy Integration

Credits Hours
2

Lab/Studio/Field Work Hours
1

Prerequisites
PHT 7722C

Course Description
This course integrates foundational knowledge of physiology and pathology to develop physical therapy skills for examinations and interventions of medically complex patients and special populations.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Spring

Current Fee Per Student
$15.00

Repeat for credit?
No
PHT7329C - Advanced Pediatric Physical Therapy

Course Title
Advanced Pediatric Physical Therapy

Credits Hours
1

Lab/Studio/Field Work Hours
1

Prerequisites
Admission to DPT program.

Course Description
Course provides an advanced look into abnormal motor development, neurological and orthopedic diseases/conditions, interventions, examinations and other aspects of the patient/client management model for the pediatric population.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Fall

Repeat for credit?
No

PHT7521 - Management of Physical Therapy Services II

Course Title
Management of Physical Therapy Services II

Credits Hours
2

Lab/Studio/Field Work Hours
0

Prerequisites
PHY 6521.

Course Description
Application of management, finance and economic health-related principles for strategy development, implementation and assessment for the physical therapy manager.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Fall

Repeat for credit?
No

2023-2024 Graduate Catalog
PHT7702C - Advanced Orthotics and Prosthetics

Course Title
Advanced Orthotics and Prosthetics

Credits Hours
2

Lab/Studio/Field Work Hours
1

Prerequisites
PHT 6245, PHT 6245L.

Course Description
Advanced considerations for the amputee patient with regards to rehabilitation. Students will review the primary focal issues surrounding rehabilitation after an amputation and how prosthetics may assist with functional return.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Spring

Repeat for credit?
No

PHT7721C - Integrations in Orthopedic Physical Therapy

Course Title
Integrations in Orthopedic Physical Therapy

Credits Hours
1

Lab/Studio/Field Work Hours
1

Prerequisites
PHT 6716C.

Course Description
Designed to correlate all previous coursework in curriculum in study presentations. Advanced evaluation procedures included. Advanced knowledge of differential diagnosis in the orthopedic patient covered.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Fall

Repeat for credit?
No
PHT7722C - Integrative Clinical Practice
Course Title
Integrative Clinical Practice

Credits Hours
2

Lab/Studio/Field Work Hours
1

Prerequisites
Admission to DPT program.

Course Description
This course emphasizes the synthesis of clinical and differential diagnostic skills required of a physical therapist in order to enter clinical practice.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Summer

Current Fee Per Student
$15.00

Repeat for credit?
No

PHT7730C - Primary Care for the Physical Therapist
Course Title
Primary Care for the Physical Therapist

Credits Hours
2

Lab/Studio/Field Work Hours
2

Prerequisites
Admission to DPT program.

Course Description
Students learn higher level diagnostic screening skills to make clinical decisions. The course takes a system approach including system review, clinical signs and symptoms and case studies.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Fall

Repeat for credit?
No
PHT7742C - Acute Care Physical Therapy
Course Title
Acute Care Physical Therapy

Credits Hours
2

Lab/Studio/Field Work Hours
1

Prerequisites
PHT 6306

Course Description
Considerations and evidence-based evaluation, treatment, and management of patients in various settings within acute care.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Fall

Repeat for credit?
No

PHT7764C - Advanced Neurological Treatment
Course Title
Advanced Neurological Treatment

Credits Hours
2

Lab/Studio/Field Work Hours
1

Prerequisites
PHT 6719, PHT 6719L, PHT 7772C.

Course Description
This course can provide third year students with the opportunity to further explore evidence-based neurological intervention.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Spring

Repeat for credit?
No
PHT7772C - Advanced Neurological Physical Therapy II

Course Title
Advanced Neurological Physical Therapy II

Credits Hours
1

Lab/Studio/Field Work Hours
1

Prerequisites
PHT 6719 and PHT 6719L.

Course Description
Problem-based learning provides a team based interdisciplinary problem-solving environment where students devise solutions and approaches to problems encountered by physical therapists treating patients with neurological problems.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Fall

Repeat for credit?
No

PHT7778C - Advanced Manual Therapy

Course Title
Advanced Manual Therapy

Credits Hours
2

Lab/Studio/Field Work Hours
1

Prerequisites
PHT 6716C, PHT 7721C.

Course Description
Concepts associated with advanced manipulative interventions in the context of physical therapy care. Indications and contra-indications will be reviewed and applied in a clinical context.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Spring

Repeat for credit?
No
PHT7779C - Sports Physical Therapy
Course Title
Sports Physical Therapy
Credits Hours
2
Lab/Studio/Field Work Hours
1
Prerequisites
Admission to the Doctor of Physical Therapy program.
Course Description
Considerations and evidence-based evaluation, treatment, and management of patients with sport-related injuries.
College
College of Health Professions and Sciences
Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology
Terms of Offering
Spring
Repeat for credit?
No

PHT7780C - Advanced Geriatric Physical Therapy
Course Title
Advanced Geriatric Physical Therapy
Credits Hours
1
Lab/Studio/Field Work Hours
1
Prerequisites
PH 6374C.
Course Description
Advanced topics in geriatric rehabilitation.
College
College of Health Professions and Sciences
Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology
Terms of Offering
Fall
Repeat for credit?
No
PHT7822C - Clinical Education II

Course Title
Clinical Education II

Credits Hours
6

Lab/Studio/Field Work Hours
40

Prerequisites
Admission to the Doctor of Physical Therapy program.

Course Description
Collaborative course for third year students to meet, analyze, synthesize and discuss current ethical, legal, and moral decision-making in physical therapy clinical setting culminating in internship.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

Terms of Offering
Summer

Current Fee Per Student
$12.50

Repeat for credit?
No
PHT7823C - Clinical Education III

Course Title
Clinical Education III

Credits Hours
4

Lab/Studio/Field Work Hours
20

Prerequisites
PHT 7822C.

Course Description
Clinical education course to synthesize ethical, legal, and professional contemporary practice with evidence-based intervention, culminating in a full-time, 8-week clinical internship in physical therapy practice setting.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences - Kinesiology

No
PHT7829C - Clinical Education IV

Course Title
Clinical Education IV

Credits Hours
4

Lab/Studio/Field Work Hours
20

Prerequisites
PHT 7823C.

Course Description
Clinical education course to synthesize ethical, legal, and professional contemporary practice with evidence-based intervention, culminating in a full-time, terminal 8-week clinical internship in physical therapy practice setting prior to graduation.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences- Kinesiology

Terms of Offering
Spring

Current Fee Per Student
$12.50

Repeat for credit?
No
PHT7900 - Capstone Project in Physical Therapy

Course Title
Capstone Project in Physical Therapy

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to DPT program.

Course Description
Directed research culminating in a substantive paper related to the art or science of Physical Therapy.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences– Kinesiology

Terms of Offering
Spring

Current Fee Per Student
$13.09

Repeat for credit?
No

PHT7999 - Physical Therapy Residency

Course Title
Physical Therapy Residency

Credits Hours
2

Lab/Studio/Field Work Hours
1

Course Description
Beyond the earned Doctor of Physical Therapy degree and C.I. Instruction for post-professional physical therapy residency program fostering advanced clinical practice as outlined by the American Board of Physical Therapy Specialties.

College
College of Health Professions and Sciences

Department
School of Kinesiology and Rehabilitation Sciences– Kinesiology

SPS6946L - Practicum in School Psychology

Course Title
Practicum in School Psychology

Credits Hours
3

Lab/Studio/Field Work Hours
3

Prerequisites
Graduate admission and C.I.

Course Description
Provides each student with an orientation to public schools and experiences which broadly sample the spectrum of psychoeducational assessment and interventions for practicing school psychologists.

College
College of Community Innovation and Education

Department
Department of Counselor Education & School Psychology

Repeat for credit?
Yes

SPS6948 - School Psychology Internship

Course Title
School Psychology Internship

Credits Hours
6

Lab/Studio/Field Work Hours
6

Prerequisites
Graduate standing and C.I.

Course Description
Supervised placement in school setting. Graded S/U. May be used in the degree program a maximum of 6 times.

College
College of Community Innovation and Education

Department
Department of Counselor Education & School Psychology

Terms of Offering
Every Semester

Repeat for credit?
No

SPW6217 - Spanish American Prose I
Course Title
Spanish American Prose I

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
A study of the principal characteristics of Spanish American prose from Colonial times to post-independence.

College
College of Arts and Humanities

Department
Department of Modern Languages and Literatures

Terms of Offering
Occasional

Repeat for credit?
No
SPW6218 - Spanish American Prose II
Course Title
Spanish American Prose II

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
A study of the principal characteristics of Spanish American prose from modernism to the present.

College
College of Arts and Humanities

Department
Department of Modern Languages and Literatures

Terms of Offering
Occasional

Repeat for credit?
No

SPW6269 - Nineteenth Century Spanish Novel
Course Title
Nineteenth Century Spanish Novel

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
A study of the major writers and literary movements of the 19th century with emphasis on the novels of Valera, Perez Galdos, Clarin and Pardo Bazan.

College
College of Arts and Humanities

Department
Department of Modern Languages and Literatures

Terms of Offering
Occasional

Repeat for credit?
No
SPW6306 - Spanish American Drama

Course Title
Spanish American Drama

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission into Spanish M.A. program.

Course Description
Critically recognized Spanish American Theater texts and pre-Hispanic theatrical works.

College
College of Arts and Humanities

Department
Department of Modern Languages and Literatures

Terms of Offering
Occasional

Repeat for credit?
No

SPW6315 - Early Modern Spanish Theatre

Course Title
Early Modern Spanish Theatre

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate Standing or C.I.

Course Description
Intensive reading and analysis of selected theatrical works of Early Modern Spain.

College
College of Arts and Humanities

Department
Department of Modern Languages and Literatures

Terms of Offering
Occasional

Repeat for credit?
No
SPW6356 - Spanish American Poetry
Course Title
Spanish American Poetry

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
A study of the different movements and their contribution to Spanish American poetry.

College
College of Arts and Humanities

Department
Department of Modern Languages and Literatures

Terms of Offering
Occasional

Repeat for credit?
No

SPW6405 - Medieval Spanish Literature
Course Title
Medieval Spanish Literature

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
An intensive study of the major genres of the period. Emphasis on selected works by major writers.

College
College of Arts and Humanities

Department
Department of Modern Languages and Literatures

Terms of Offering
Occasional

Repeat for credit?
No
SPW6485 - Contemporary Peninsular Literature
Course Title
Contemporary Peninsular Literature

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
A study of the major writers and literary movements from the Generation of 1927 to the present.

College
College of Arts and Humanities

Department
Department of Modern Languages and Literatures

Terms of Offering
Occasional

Repeat for credit?
No

SPW6725 - The Generation of 1898
Course Title
The Generation of 1898

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
An analysis of the major works of writers of the Generation of 1898 such as Ganivet, Unamuno, Baroja, Azorin, and Machado.

College
College of Arts and Humanities

Department
Department of Modern Languages and Literatures

Terms of Offering

SSE - Social Studies Education
SSE5391 - Global Education: Theory and Practice

Course Title
Global Education: Theory and Practice

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
Examines the theoretical underpinnings of teaching about the world along with a variety of theoretically grounded teaching strategies for engaging students in global education.

College
College of Community Innovation and Education

Department
School of Teacher Education

Terms of Offering
Spring

Repeat for credit?
No

SSE5776 - Democracy and Education

Course Title
Democracy and Education

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
Explores the intersection of theory and practice with regard to promoting democratic life in schools. Will examine competing theories of democracy and education, investigate problem areas in schools related to democracy, and consider examples of practice.

College
College of Community Innovation and Education

STA6246 - Linear Models

Course Title
Linear Models

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate status or C.I.

Course Description
Theoretical development of linear statistical models, least squares and maximum likelihood estimation, interval estimation, hypothesis testing, and introduction to generalized linear models.

College
College of Sciences

Department
Department of Statistics and Data Science

Terms of Offering
Spring

Repeat for credit?
No

STA6326 - Theoretical Statistics I

Course Title
Theoretical Statistics I

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
MAC 2313.

Course Description
Distribution of random variables, conditional probability and independence, some special distributions, distributions of functions of random variables, limiting distributions.

College
College of Sciences

**TSL - Teaching Second Language**
TSL5085 - Teaching Language Minority Students in K-12 Classrooms

Course Title
Teaching Language Minority Students in K-12 Classrooms

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Admission to College of Education Master of Arts Program or C.I.

Course Description
Teaching K-12 limited English proficient (LEP) students. Florida standards regarding cross-cultural communication, ESOL curriculum, and materials, ESOL methodology, testing and evaluation of ESOL students, applied linguistics.

College
College of Community Innovation and Education

Department
School of Teacher Education

Terms of Offering
Repeat for credit?
No

TSL5325 - ESOL Strategies

Course Title
ESOL Strategies

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate status or senior standing or C.I.

Course Description
This course will survey cross-cultural communication and understanding, testing and evaluation, curriculum and methods of teaching ESOL to meet the needs of limited English proficient students.

College
College of Arts and Humanities

Department
Department of Modern Languages and Literatures

Terms of Offering
Occasional

Repeat for credit?

TSL5525 - ESOL Cultural Diversity

Course Title
ESOL Cultural Diversity

Credits Hours
3

Lab/Studio/Field Work Hours
0

Course Description
This course is designed to identify major cultural groups represented by the LEP population in Florida schools and to understand their special needs.

College
College of Community Innovation and Education

Department
School of Teacher Education

Terms of Offering
Summer

Repeat for credit?
No
TSL5601 - Second Language Vocabulary Learning
Course Title
Second Language Vocabulary Learning

Credits Hours
3

Lab/Studio/Field Work Hours
0

Prerequisites
Graduate standing or C.I.

Course Description
Considers lexical issues encountered by second language learners; explores best practices for learners and their teachers and examines current research for pedagogical application.

College
College of Arts and Humanities

Department
Department of Modern Languages and Literatures

TSL5940 - Issues in TEFL
Course Title
Issues in TEFL
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
Graduate status or senior standing or C.I.
Course Description
Address issues specifically related to TEFL, such as materials adaptation, teaching in multi-level classrooms, learning styles, cultural issues, and curriculum syllabus design.
College
College of Arts and Humanities
Department
Department of Modern Languages and Literatures
Terms of Offering
Spring
Repeat for credit?
No
TSL6142 - Critical Approaches to ESOL
Course Title
Critical Approaches to ESOL
Credits Hours
3
Lab/Studio/Field Work Hours
0
Course Description
Emphasis placed on current research in second language acquisition as it relates to the development of ESOL curriculum and materials.
College
College of Arts and Humanities
Department
Department of Modern Languages and Literatures
Terms of Offering
Fall
Repeat for credit?
No

TSL6143 - Curriculum and Instruction in Dual Language Programs
Course Title
Curriculum and Instruction in Dual Language Programs
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
Graduate Standing or C.I.
Course Description
This course is an introduction to methods and research in teaching of literacy to all bilingual learners, using the home language and new language.
College
College of Community Innovation and Education
Department
School of Teacher Education
Terms of Offering
Spring

WST - Women's Studies
WST5108 - Global Women in Crisis
Course Title
Global Women in Crisis
Credits Hours
3
Lab/Studio/Field Work Hours
0
Prerequisites
Graduate standing or C.I.
Course Description
Examines how crisis shapes women’s lives around the world through the lens of Feminist Theory from a global, multi-cultural perspective, combined with global feminist activism.

**Policies**

1. General University Policies

Classroom Responsibility

Students are responsible for maintaining classroom decorum appropriate to the educational environment. When the conduct of a student or group of students varies from acceptable standards and becomes disruptive to normal classroom procedures, the instructor has the authority to remove the offending party from the room and refer the student to the Office of Student Conduct (SRC 155) for disciplinary action.

Credit Hour

A credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out of class student work each week for approximately fifteen weeks for one semester or the equivalent amount of work over a different amount of time; or
2. At least an equivalent amount of work as required in paragraph (1) of this definition for academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Golden Rule

The Golden Rule is the university's policy regarding non-academic discipline of students and limited academic grievance procedures for graduate (grade appeals in individual courses, not including thesis and dissertation courses) and undergraduate students. Information concerning The Golden Rule can be found at www.goldenrule.sdes.ucf.edu. Section 11, Student Academic Behavior, addresses appeals of graduate program actions or decisions.

Non-Discrimination Statement

The University of Central Florida does not unlawfully discriminate in any of its education or employment programs and activities on the basis of an individual's race, color, ethnicity, national origin, religion (or non-religion), age, genetic information, sex (including pregnancy and parental status), gender identity or expression, sexual orientation, marital status, physical or mental disability (including learning and intellectual disabilities), political affiliations, prior conviction of a crime, protected veteran's status or membership in any other protected classes as set forth in state or federal law. The University prohibits discrimination based on these protected classes, which includes the prohibition of discriminatory harassment, sexual assault, sexual exploitation, relationship violence, stalking, sexual or gender-based harassment, and retaliation against a person for the good faith reporting of any of these forms of conduct or participation in or party to any investigation or proceeding related to a report of these forms of conduct.

Discriminatory harassment consists of verbal, physical, electronic or other conduct based upon an individual's protected class as set forth above that interferes with that individual's educational or employment opportunities, participation in a University program or activity, or receipt of legitimately-requested services under either Hostile Environment Harassment or Quid Pro Quo Harassment. Hostile Environment Harassment is discriminatory hassassment that is so severe, persistent or pervasive that it unreasonably interferes with, limits, deprives, or alters the conditions of education (e.g., admission, academic standing, grades, assignment); employment (e.g., hiring, advancement, assignment); or participation in a University program or activity (e.g., campus housing), when viewed from both a subjective and objective perspective. Quid Pro Quo Harassment is discriminatory harassment where submission to or rejection of unwelcome conduct is used, explicitly or implicitly, as the basis for decisions affecting an individuals education; employment; or participation in a University program or activity.

Sexual harassment is any unwelcome sexual advance, request for sexual favors, or other unwanted conduct of a sexual nature, whether verbal, non-verbal, graphic, physical or otherwise, when the conditions for Hostile Environment Harassment or Quid Pro Quo Harassment are present. Gender-based harassment includes harassment based on gender, sexual orientation, gender identity, or gender expression, which may include acts of aggression, intimidation, or hostility, whether verbal or non-verbal, graphic, physical, or otherwise, even if the acts do not involve conduct of a sexual nature, when the conditions for Hostile Environment Harassment or Quid Pro Quo Harassment are present. Sexual assault consists of sexual contact and/or sexual intercourse that occurs without consent. Sexual exploitation is purposely or knowingly doing or attempting to do any of the following: recording or photographing private sexual activity and/or a person's intimate parts (including genitalia, groin, breasts or buttocks) without consent; disseminating or posting images of private sexual activity and/or a person's intimate parts (including genitalia, groin, breasts or buttocks) without consent; allowing third parties to observe private sexual activity from a hidden location (e.g., closet) or through electronic means (e.g., Skype or live streaming of images); subjecting another person to human trafficking; or exposing another person to a sexually transmitted infection or virus without the other's knowledge. Relationship violence includes any act of violence or threatened act of violence that occurs between individuals who are involved or have been involved in a sexual, dating, spousal, domestic, or other intimate relationship. Stalking occurs when a person engages in a course of conduct directed at a specific person under circumstances that
would cause a reasonable person to fear for the persons safety or the safety of others, or to experience substantial emotional distress.

A student or employee determined by the University to have committed an act of discrimination as described above is subject to disciplinary action, up to and including permanent separation from the University. Third Parties who commit these acts may have their relationships with the University terminated and/or their privileges of being on University premises withdrawn.

Most University faculty and staff (including professors, lecturers, instructors, academic advisors, trainers, coaches, and resident assistants) are not confidential employees and are required to immediately report to the University’s Title IX Coordinator, Matt Ricke, phone (407) 823-1336 all relevant details (obtained directly or indirectly) about an incident of sexual assault, relationship violence and/or stalking that involves any student. Confidential employees (including Health Services employees, Counseling and Mental Health Services employees, Ombuds Office employees, Student Legal Services employees and Victim Services employees) are not required to make these reports and will not disclose information without the permission of the student (subject to limited exceptions). More information about UCF’s resources and reporting options for individuals who have experienced sexual harassment (including sexual violence) and related policies can be found at https://letsbeclear.ucf.edu/.

Employees, students, contractors, vendors, visitors, guests or third parties may obtain further information on this policy, including grievance procedures, from the Office of Institutional Equity (OIE). Nancy Myers, OIE Director, is responsible for the University's response to all forms of discrimination based on a protected class, and Matt Ricke is the Title IX Coordinator who is responsible for the University's response to reports of sex discrimination. For more information about OIE, please visit the OIE website or call (407) 823-1336.

Records

Student records submitted to the university become the property of the university and cannot be returned to or copied for the student or released to a third party. Student records are digitally scanned.

Family Educational Rights and Privacy Act (FERPA)

The procedures for protecting the confidentiality of student records are based on state regulations and the federal Family Educational Rights and Privacy Act of 1974. FERPA affords students certain rights with respect to their education records. They are:

1. The right to inspect and review the student's education records within 30 days of the day the University receives a written request for access. Students should submit to the University Registrar, dean, head of the academic department, or other appropriate officials, written requests that identify the record(s) they desire to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed;

2. The right to request the amendment of the student's education records that the student believes are inaccurate or misleading. The student may ask the University to amend a record that he or she believes is inaccurate or misleading. The student should write the University official responsible for the record to clearly identify the part of the record to be changed, and specify why the current record is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of their right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing;

3. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent. One exception that permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing their tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill their professional responsibility; and

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by a State University to comply with the requirements of FERPA. The name and address of the office that administers FERPA is Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington DC, 20202-4605.

Directory Info

FERPA authorizes the University to classify certain information concerning students as directory information, which means that it may be released to anyone upon request. In accordance with Florida Statutes Section 228.093, the University is required to release student directory information to independent vendors upon request. Directory information at UCF includes:

- name,
- current mailing address,
- telephone number,
- date of birth,
- major field of study,
- dates of attendance,
- enrollment status,
- degrees and awards received,
- participation in officially registered activities and sports, and
- athletes height and weight.
All other student information will be released in accordance with FERPA; in most cases, this requires the student’s prior written and signed consent. The University extends to students the opportunity to withhold any or all information, including directory information. Students can do this online at [https://my.ucf.edu > Student Self Service > Student Center > Personal Information > FERPA/Directory Restriction or complete the Directory Disclosure/Release Authorization form available at the Registrars Office (Millican Hall 161) or at [https://registrar.ucf.edu], requesting that this information be withheld. The Golden Rule outlines the University procedures for confidentiality. For additional information describing FERPA policy, go to the Department of Education Family Policy Compliance Office website.

Higher Education Act

Lists, descriptions, and sources of information required for disclosure under the Higher Education Act may be obtained from the Registrars Office (Millican Hall 161) or from the Registrars website (Higher Education Act).

Religious Observances

It is the policy of the University of Central Florida to reasonably accommodate the religious observances, practices, and beliefs of individuals in regard to admissions, class attendance, and the scheduling of examinations and work assignments. A student who desires to observe a religious holy day of their religious faith will notify all of their instructors and be excused from classes to observe the religious holy day.

The student will be held responsible for any material covered during the excused absence but will be permitted a reasonable amount of time to complete any work missed. Where practicable, major examinations, major assignments, and university ceremonies will not be scheduled on a major religious holy day.

Students who are absent from academic or social activities because of religious observances will not be penalized. A student who believes that they have been unreasonably denied an educational benefit due to their religious belief or practices may seek redress under the Student Grievance Procedure, located in The Golden Rule.

Sexual Harassment Policy

The University of Central Florida values diversity in the campus community. Accordingly, discrimination on the basis of race, sex, national origin, religion, age, disability, marital status, parental status, veterans status, sexual orientation, or genetic information is prohibited.

Sexual harassment, a form of sex discrimination, is defined as unwelcome sexual advances, requests for sexual favors, or verbal or physical conduct of a sexual nature including any of these three situations.

1. Submission to such conduct is made either explicitly or implicitly a term or condition of an individual's employment or enrollment.
2. Submission to or rejection of such conduct by an individual is used as the basis for employment or enrollment decisions affecting such individual.
3. Such conduct has the purpose or effect of substantially interfering with an individual's work performance or enrollment, or creating an intimidating, hostile, or offensive working or academic environment.

Sexual harassment is strictly prohibited. Occurrences will be dealt with in accordance with the guidelines above and university rules. Employees, students, or applicants for employment or admission may obtain further information on this policy, including grievance procedures, from the OIE Coordinator. The Director of the Office of Institutional Equity Programs is the campus Equity Coordinator responsible for concerns in all areas of discrimination. The office is located on the main campus, in Barbara Ying CMMS Building 81, Suite 101. The phone number is (407) 823-1336. Policies and guidelines are available online at [http://www.eeo.ucf.edu].

Student Conduct

Students are subject to federal and state laws and local ordinances as well as regulations prescribed by the University of Central Florida and the Florida Board of Governors. The breach or violation of any of these laws or regulations may result in disciplinary action. Behavioral breaches of state law, UCF requirements, or program expectations are grounds for dismissal from the program of study and the university. Detailed conduct regulations and procedures are presented in The Golden Rule.

A person applying for admission to UCF who has declared an adjudication of a violation of conduct policies at a previous college or university or a violation of the law that resulted in probation, community service, a jail sentence, or the revocation or suspension of their driver's license (including traffic violations that resulted in a fine of $200 or more) will have circumstances of the case reviewed by the Office of Student Conduct (Ferrell Commons, room 227) to consider eligibility for admission.

Student Intellectual Property
POLICY STATEMENT

As a general rule, Intellectual Property made or created by any University of Central Florida student as a work product of a course for credit will be owned by the student, and University does not claim ownership of such Intellectual Property.

Exceptions to this policy include:

1. Situation where the student uses appreciable University resources beyond the normal requirements of the course (see University Support below)
2. A limited subset of courses for credit (see Courses with certain course components, as described below)
3. Special situations where the student is presented with the opportunity to participate in projects or activities, such as company-sponsored internships, that may impact the student’s Intellectual Property rights. (see Special Situations below).

No student will be required by the University to participate in a project or activity that impacts the student’s Intellectual Property rights, and to avoid any exploitation of students for private advantage. University employees may not use students for outside activity without disclosure and approval on form AA-21 or HR-12, as applicable.

In circumstances where students are engaging in activity as university personnel, rights to Intellectual Property arising from that activity will be governed by UCF-2.209 Patents, Trademarks and Trade Secrets and UCF-2.033 Copyright and Works, wherein the University retains ownership of certain Intellectual Property made or created by University Personnel.

DEFINITIONS

Copyright. Copyright means the intangible property right granted by federal law, Title 17 of the U.S. Code, to the creator(s) of an original work of authorship fixed in a tangible form of expression from which it can be perceived, reproduced, or otherwise communicated, either directly or with the aid of a machine or device. An original work of authorship may be literary, dramatic, musical, artistic, or any other creative work, whether published or unpublished. Copyright provides the owner(s) with certain rights in a work, including the right to reproduce the work, to prepare derivative works, to distribute the work, to perform/display the work, and to prevent others from doing the same. The term also includes copyright protection that may be granted by foreign governments.

Invention. Invention includes (i) any discovery, invention, process, composition of matter, article of manufacture, know-how, design, model, technological development, biological material, strain, variety, culture of any organism, or portion, modification, translation, or extension of these items which is or may be patentable or otherwise protected under Title 35 of the United States Code, or that is or may be protected as a Trade Secret, under the Florida Uniform Trade Secrets Act, Ch. 688, Fla. Stat. or any similar act of another State, as may be relevant, (ii) any novel variety of plant that is or may be patentable or otherwise protected under the Plant Variety Protection Act (7 U.S.C. §2321 et seq.), (iii) any Trademark, and/or (iv) any directly related know-how used in connection with these items.

Student. Student means any person enrolled in one or more classes at the University, either full-time or part-time, study abroad students, online students, continuing education students, students pursuing undergraduate, graduate, or professional studies, either degree-seeking or non-degree-seeking. Persons who withdraw after allegedly violating the Rules of Conduct, or who are not officially enrolled for a particular academic term but who have a continuing relationship with the University are also “students.”

Trademark. Trademark means a name, symbol, figure, letter, word, or mark adopted and used to designate the source of goods and/or services arising from an Invention or a Work.

Trade Secret(s). Trade Secret means information, including a formula, pattern, compilation, program, device, method, technique, or process that: (i) derives independent economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by, other persons who can obtain economic value from its disclosure or use; and (ii) is the subject of efforts that are reasonable under the circumstances to maintain its secrecy.

University Personnel. University Personnel means all full-time and part-time employees of the University, whether or not they are members of a collective bargaining unit, including all faculty, staff, and post-doctoral fellows; appointees of the University who receive University Support (as defined below), including volunteers, adjuncts, and courtesy faculty; persons paid by or through the University, including contractors and consultants; and anybody working under University auspices and anybody receiving University-Support (as defined below). Students, including undergraduate, graduate, and professional students, who are encompassed within any of these categories, shall be considered University Personnel for purposes of UCF-2.029 and UCF-2.033.

University Support. University Support shall mean (i) the appreciable use of University resources, such as funds, personnel, facilities, equipment, materials, technical information, or students, (ii) course release, and/or (iii) support provided by other public or private organizations when it is arranged, administered or controlled by the University or a University direct-support organization. For the use of University resources to be appreciable, it must go beyond the resources commonly or routinely provided or made available to similarly situated employees for the performance of their assignment. For example, the routine use of resources such as the libraries; one’s office, office computer, and other University computer facilities; and office supplies, is not considered appreciable University Support. In courses for credit that are open to all students, for the use of University resources by a student to be appreciable, the resources must (i) go beyond the resources commonly or routinely provided or made available to students in the same course or program and/or (ii) be used by the student for an activity that is not required for the applicable course or program.

Work(s). Work means, in accordance with Title 17 of the U.S. Code, any original work of authorship that is or may be subject to Copyright. Work includes but is not limited to printed material (such as books, articles, memoranda, and texts), computer software or databases, audio and visual material, circuit diagrams, architectural and engineering drawings, lecture, compositions (e.g., written, musical and/or dramatic), motion pictures, multimedia works, web pages, sound recordings, choreographic works, pictorial or graphic illustrations or displays, and any creative expression of a Trademark used in connection with these items. Work does not include patentable material, which is encompassed within the definition of Invention; an Invention may also include a related Work.
PROCEDURES

Except as otherwise provided in this policy, Intellectual Property made or created by any student as a work product of a course for credit will be owned by the Student and University does not claim ownership of such Intellectual Property. No Student will be required to participate in a project or activity that impacts the Student’s Intellectual Property rights, except when registered in certain required courses specified by course component’s INT, IND, RES, PER, FLD, or OTH (Course component types are per applicable UCF curriculum handbook(s)).

GENERAL POLICY

General Rule. Intellectual Property conceived or first reduced to practice by a student at the University of Central Florida (“University”) as a work product (including without limitation homework assignments, laboratory experiments, special and independent study projects and activities, dissertations, papers, and articles) of a “for credit” course will be owned by the Student. The University does not claim ownership of such Intellectual Property.

Students do not hold these same ownership rights in Intellectual Property in circumstances where students are engaging in activity as University Personnel (common examples, when the Intellectual Property is generated from student activity as a University employee*, as part of sponsored research, whether or not the student is paid, or an activity for which there has been University Support). In limited access courses for credit, specified with course components noted herein, University resources commonly or routinely provided or made available to students may be appreciable and deemed University Support. Details of applicable categories, activities, and ownership rights to Intellectual Property generated by Students engaging as University Personnel will be governed by UCF-2.209 and UCF-2.033.

*Common examples of student employee categories are Graduate Assistants, Graduate Research Assistants, Graduate Teaching Assistants, and graduate and undergraduate student Other Personnel Services (OPS) employees.

Thesis/Dissertation License. Although the student retains copyright ownership to the student’s thesis or dissertation or other student project reports, the student grants University and its direct support organizations permission in the form of a royalty-free, non-exclusive license to use, reproduce, and publicly distribute copies of those Works, including any software developed as part of the student project.

Course Components. Course components: INT (Internship), IND (Independent Study), RES (Research), PER (Performance), FLD (Field Studies), defined in applicable UCF curriculum handbook(s), identify courses that present exceptions to standard Student Intellectual Property ownership rights, as approved by the Dean of the College of Undergraduate Studies or Dean of the College of Graduate Studies, as applicable, and the Course component: OTH (Other), may also identify a course that presents such an exception. Intellectual Property conceived or first reduced to practice in an internship, independent study, research, performance, or field study courses will be owned by the University or its designee and subject to University UCF-2.209 and UCF-2.033. Intellectual Property conceived or first reduced to practice in a course designated with the course component “Other” may implicate an exception to the Student Intellectual Property policy.

Special Situations. Situations may occur in certain courses that are not within the course component exceptions, upon approval by the Dean of the College of Undergraduate Studies or Dean of the College of Graduate Studies, as applicable, where Students are presented with the opportunity to participate in projects or activities or internships in which the ownership of any resulting Intellectual Property must be assigned to a sponsoring entity (such as a company), or in some limited situations, to the University or one of its direct support organizations, as a condition of the Student’s participation. Students are never obligated to participate in projects, activities, or internships that require the assignment of the Student’s Intellectual Property to a sponsoring entity or the University. In these situations, Students will always be presented with two options: 1) to participate in projects or activities or internships that do not require the Student to assign their Intellectual Property or 2) to participate in projects or activities or internships that require the Student to assign their Intellectual Property.

The student’s grade and/or evaluation of performance in the course will not be affected by the Student’s decision to participate or not to participate in projects or activities requiring the assignment of the student’s Intellectual Property.

Students should understand that the assignment of Intellectual Property is a binding legal agreement and that they have the right to seek independent legal advice at their own expense prior to signing any related agreement. Students may obtain free legal consultation through the Office of Student Legal Services.

In each case of assignment of Intellectual Property rights by a student to University, the student shall participate in the distribution of proceeds according to standard University policy.

Retention of Rights/Assignment of Rights

1. If students wish to retain ownership of their Intellectual Property and decline to assign their rights to any other entity, no further action is required.
2. (a) If students agree to participate in projects or activities or internships requirement assignment to a sponsoring entity all rights that they may acquire in Intellectual Property created, conceived, or first actually reduced to practice by them as a result of their participation in that project, activity, or internship, they must complete the Special Intellectual Property Agreement Form for Students – Sponsoring Entity.
   (b) When a sponsoring entity will receive student Intellectual Property as a result of a student’s participation in a project, activity, or internship sponsored by the sponsoring entity, the sponsoring entity must be required to sign the Intellectual
Property Sponsorship Acknowledgement to acknowledge: 1) the student Intellectual Property and related research results are not warranted by the University; 2) the sponsoring entity indemnifies the University; and 3) the Student Intellectual Property and related research results are not the work of the University.

3. If students agree to assign to the University all rights that they may acquire in Intellectual Property created, conceived or first actually reduced to practice by them as a result of their participation in a project, activity, or internship, they must complete the Special Intellectual Property Agreement Form for Students - University.

Special Intellectual Property Agreement Form for Students

(Company Sponsor Activity Participation)

The University of Central Florida Board of Trustees ("UCF") has entered into a contract with __________________ (hereinafter “Sponsor”) for activities related to ____________________ (hereinafter “Project”), and ____________, a UCF student (hereinafter “Student”) enrolled for credit in course ____ (hereinafter “Course”) desires to gain valuable experience through participation in the Project.

In consideration of the foregoing, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Student understands and agrees to the following:

1. Pursuant to UCF Student IP Policy ####, Intellectual Property made or created in the Course is owned by Student and UCF does not claim ownership of such Intellectual Property.

2. Student is not required to participate in the Project, and Student’s decision to participate or not participate will not affect Student’s grade and/or evaluation of performance in Course.

3. If Student elects to participate in the Project, the Sponsor will require Student to assign all ownership rights to all Intellectual Property made or created in performance of the Project, Student will not be paid for Student’s efforts under the Project, and Student will not be entitled to receive any income or royalties from the sale or licensing or use of this Intellectual Property by the Sponsor.

4. Student is not employed by Sponsor nor UCF, and Student is willing to disclose all current and prior employment to Sponsor in advance of participation in the Project, upon request of Sponsor. Notwithstanding such disclosure, Student understands it is Student’s obligation to respect any confidentiality or other restrictions Student may have agreed to with any employer.

5. Student will act in accordance with UCF confidentiality obligations in performance of the Project, as communicated to Student by UCF, and if requested, will be willing to review and, if Student and/or Student’s personal legal advisor approves of the content, to sign such non-disclosure agreement and/or otherwise confirm Student’s understanding of the UCF confidentiality obligations.

6. Immediately upon termination of participation in the Project, Student agrees to return to UCF all university software, records, project notebooks, memoranda, information, data, programs, models and equipment of any nature in Student’s possession or under Student’s control pertaining to the Project.
If Student wishes to retain ownership of Intellectual Property that may be created or made by Student, or does not understand or agree with any of the terms in this Agreement, Student should not sign this Agreement, and should request an alternative project that does not require the assignment of Student's Intellectual Property.

This agreement is effective upon the latest date of signature.

A parent or legal guardian signature is required for students younger than 18 years of age

INTELLECTUAL PROPERTY SPONSORSHIP ACKNOWLEDGEMENT

Thank you, ______________________________ (the "Company") for your interest in sponsoring student intellectual property development in connection with [Class Title and Semester Date]. As a result of your sponsorship and involvement, [graduate and/or undergraduate] students at the University of Central Florida (the "University") will be investigating and researching the issues you have presented (the "Project"). Such focused research is a key aid in developing students’ understanding of the practical application of academic research services. Company agrees to the following in relation to the sponsorship:

1. In return for Company’s sponsorship and participation in the Project, Company intends to require participating students to assign Intellectual Property such students may create, conceive or first actually reduce to practice in performance of the Project. The University will not assert rights in such Intellectual Property.

2. Prior to any commercial use or subsequent transfer of any Intellectual Property or related research results, Company must obtain the appropriate rights from the respective student owners. Intellectual Property and related research results provided to Company shall be used solely for your own internal review and analysis. Any and all rights to the Intellectual Property and related research results shall remain the rights of the individual student participants as appropriate under the law regarding rights to and ownership of Intellectual Property.

3. All research performed under the Project is to be done by University students and is not subject to peer review or independent...
verification of results. ALL INTELLECTUAL PROPERTY AND RELATED RESEARCH RESULTS ARE PROVIDED “AS IS” WITHOUT ANY REPRESENTATION OR WARRANTIES WHATSOEVER, WHETHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT NECESSARILY LIMITED TO ANY WARRANTY AS TO FITNESS FOR PARTICULAR PURPOSES, MERCHANTABILITY OR NON-INFRINGEMENT. Company hereby agree to indemnify and hold harmless University, its agents, employees, students and volunteers for any and all harm, loss, liability, claims or damages which may arise from Company’s use of the Intellectual Property and/or related research results in whatever manner or form.

4. The Intellectual Property and research results are not the work of the University and any references either internally or to third parties shall clearly identify the source of the Intellectual Property and related research results as [graduate or undergraduate] student research performed at the University without subsequent independent evaluation. Publication of any aspect of the Research Results must be approved in writing and must contain appropriate references as to the source and development of the published information.

Please acknowledge your receipt and acceptance of these terms by executing this form and returning a copy to the following address: [supervising faculty contact or administrative contact information].

Special Intellectual Property Agreement Form for Students
(For Use When Assigning Intellectual Property to the University)

UCF student ____________ (hereinafter “Student”) enrolled for credit in course ____ (hereinafter “Course”) desires to gain valuable experience through participation in a project, activity, or internship ____________________ (hereinafter “Activity”), related to Course.

In consideration of the foregoing, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Student understands and agrees to the following:

1. Pursuant to UCF Student IP Policy #####, Intellectual Property made or created in the Course is owned by Student and UCF does not claim ownership of such Intellectual Property.

2. Student is not required to participate in the Activity, and Student’s decision to participate or not participate will not affect Student’s grade and/or evaluation of performance in Course.

3. If Student elects to participate in the Activity, the University or one of its direct support organizations will require Student to assign all ownership rights to all Intellectual Property made or created in performance of the Activity, Student will not be paid for Student’s efforts under the Activity.

4. Student is not employed by University, and Student is willing to disclose all current and prior employment to University in advance of participation in the Activity, upon request. Notwithstanding such disclosure, Student understands it is Student’s obligation to respect any confidentiality or other restrictions Student may have agreed to with any employer.

5. Student will act in accordance with UCF confidentiality obligations in performance of the Activity, as communicated to Student by UCF, and if requested, will be willing to review and, if Student and/or Student’s personal legal advisor approves of the content, to sign such non-disclosure agreement and/or otherwise confirm Student’s understanding of the UCF confidentiality obligations.

2023-2024 Graduate Catalog
6. Immediately upon termination of participation in the Activity, Student agrees to return to UCF all university software, records, project notebooks, memoranda, information, data, programs, models and equipment of any nature in Student’s possession or under Student’s control pertaining to the Activity.

7. **Work for Hire** I agree as a condition of my participation in ________________________________

    [identification/description of project/activity requiring the assignment of intellectual property] [course number]

    that all Works created by me in performance of this Activity are the property of UCF and shall be considered specially ordered for UCF as a “work made for hire”. If for any reason the Works are held not to be a work for hire, I hereby assign and agree to assign all of my right, title and interest in the Works to UCF or its designee.

8. **Assignment of Rights** I agree as a condition of my participation in ________________________________

    [identification/description of project/activity requiring the assignment of intellectual property] [course number]

    to assign and do hereby assign to UCF all rights that I may acquire in inventions, discoveries or rights of patent and/or any other intellectual property that is conceived or first actually reduced to practice by me as a result of my participation in this activity.

9. I agree to inform UCF of any intellectual property that I may make or create during my participation in the Activity, and to cooperate with UCF, at UCF’s expense, to obtain a patent or patents upon any invention or discovery conceived or first reduced to practice by me, or as otherwise necessary to otherwise register the UCF’s rights.

10. **Right to Receive Royalties** I understand that by signing this Agreement, I am assigning certain intellectual property rights to UCF, and the University of Central Florida Research Foundation (UCFRF) will manage that intellectual property under current policy and will share resulting royalties, if any, with me in accordance with policy as it applies to intellectual property created by UCF employees, even though I am not acting as a UCF employee in the Activity. UCFRF shall be solely responsible for patenting, registering, and commercialization of the intellectual property, consistent with policy, as may be amended from time to time, and shall have sole right and responsibility to determine the extent of United States and foreign prosecution, maintenance, enforcement and defense relating to the intellectual property. UCF and UCFRF are under no obligation to use other than reasonable efforts currently in practice in the future evaluation, marketing, or licensing of the intellectual property.

11. **Cooperation with Patenting Process** I agree to make myself available to sign all reasonable papers, take all rightful oaths, and perform all reasonable acts which may be necessary, desirable or convenient for fulfilling the assignment set forth in this Agreement and for securing and maintaining patents and other registrations to the intellectual property in any and all countries and for vesting title thereto in UCF or its designee. I understand that these responsibilities will continue after completion of the Activity, Course and my association with the University.

If Student wishes to retain ownership of Intellectual Property that may be created or made by Student, or does not understand or agree with any of the terms in this Agreement, Student should not sign this Agreement, and should request an alternative activity that does not require the assignment of Student’s Intellectual Property.

This agreement is effective upon the latest date of signature.

University Closings

In the event of some extraordinary event (such as a natural disaster or prolonged power outage), the President shall determine whether it is necessary to cancel classes and approve administrative leave for employees in affected areas. Department chairs, in consultation with their faculty and with the college dean, shall determine the effect on final examinations and other academic matters.

University Notices

This catalog contains a description of the various policies, academic programs, degree requirements, course offerings, and related matters intended to be in effect at the University of Central Florida during the 2021/2022 academic year. However, any matter described in this catalog is subject to change. As a result, statements in this Graduate Catalog may not be regarded in the nature of binding obligations on the institution or the State of Florida, or as an irrevocable commitment from the University to the reader.

Drug-Free Workplace/Drug-Free Schools Policy Statement

Standards of conduct and disciplinary sanctions will be imposed for the unlawful possession, misuse or distribution of illicit drugs and alcohol by UCF students and employees on UCF property or as part of any of its activities. The unlawful manufacture, distribution, dispensation, possession or misuse of a controlled substance, prescription medication or the unlawful possession and use of alcohol is harmful and prohibited in and on UCF owned and controlled property or as part of any of its activities. Any UCF employee or student determined to have violated this policy shall be subject to disciplinary action for misconduct, an action which may include termination/expulsion and referral for prosecution. No employee/student is to report to work/class or attend any university activity while under the influence of illegal drugs or alcohol. Violation of these policies by an employee/student will be the reason for evaluation/treatment for drug/alcohol disorder and/or for disciplinary action up to and including termination/expulsion and/or referral for prosecution consistent with local, state and federal law.

Academic Behavior Standards

The University of Central Florida is committed to a policy of honesty in academic affairs. Examples of conduct for which students may be subject to academic and/or disciplinary penalties including expulsion are:

- **Cheating**, whereby non-permissible written, visual, or oral assistance including that obtained from another student is utilized on examinations, course assignments, or projects. The unauthorized possession or use of examination or course related material may also constitute cheating.
- **Plagiarism**, whereby another's work is deliberately used or appropriated without any indication of the source, thereby attempting to convey the impression that such work is the student's own. Any student failing to properly credit ideas or materials taken from another has plagiarized.
- **Unauthorized assistance**, which is communication to another through written, visual, or oral means where the presentation of material has not been studied or learned, but rather was obtained solely through someone else's efforts and used as part of an examination, course assignment or project. The unauthorized possession or use of examination or course related material may also constitute cheating.
- **Commercial Use of Academic Material** which is selling notes, handouts, etc. without authorization or using them for any commercial purpose without the express written permission of the university and the Instructor is a violation of this rule.

**NOTE:** A student who has assisted another in any of the aforementioned breach of standards shall be considered equally culpable. In cases of cheating or plagiarism, the instructor may take appropriate academic action ranging from loss of credit for a specific assignment, examination, or project to removal from the course with a grade of "F". Additionally, the instructor may request disciplinary action through the Office of Student Rights and Responsibilities as outlined in The Golden Rule.

Student Use of Technology

The University of Central Florida expects all students to have ready access to a personal computer and software appropriate to his or her field of study. Students can meet this expectation by purchasing or leasing a computer, sharing a computer with family or
roommates, or using a UCF computer lab.

All UCF students should expect to use a personal computer in many university activities, including course work, accessing library information, registering for classes, and e-mailing correspondence to instructors or fellow students. In addition, many UCF courses require the use of the Internet.

The University of Central Florida has developed one of the nations most advanced campus technology environments, and all UCF students are provided free e-mail accounts and Internet access. Students wishing to acquire a personal computer are strongly advised to consider a laptop equipped with a wireless networking card. Recommended configurations can be found on the university's website at www.cstore.ucf.edu.

Student Responsibility for University Communication

UCF uses e-mail as the official means of notifying students of important university business and academic information concerning registration, deadlines, financial assistance, scholarships, student accounts (including tuition and fees), academic progress and problems, and many other critical items for satisfactory completion of a UCF degree program. The university sends all business-related and academic messages to a students' Knights Email address to ensure that there is one repository for that information. Every student must register for, and maintain a Knights Email account at https://extranet.cst.ucf.edu/kmailselfsvc and check it regularly to avoid missing important and critical information from the university. Any difficulty with establishing an account or with accessing an established account must be resolved through the UCF Computer Services Service Desk so that a student receives all important messages.

Additionally, each student must have an up-to-date emergency e-mail address and cell phone number by which to be reached in case of a crisis on campus. This emergency contact information will be used only for emergency purposes. Also, both permanent and local mailing addresses must be on record, so that any physical documents that must be mailed can be delivered.

It is critical that students maintain and regularly check their Knights Email account for official announcements and notifications. Communications sent to the Knights Email address on record will be deemed adequate notice for all university communication, include issues related to academics, finances, registration, parking, and all other matters. The University does not accept responsibility if official communication fails to reach a student who has not registered for, or maintained and checked on a regular basis, their Knights Email account. Please ensure that this information is current and that any changes in contact information are made online through the myUCF portal at https://my.ucf.edu/.

Complaint Policy

The University of Central Florida supports the right of students to file grievances, lodge complaints, and make appeals in a safe environment free of fear, retaliation, or other adverse consequence. The university has a number of offices and committees that are responsible for implementing the institution’s established procedures for addressing written academic and non-academic student complaints.

In most cases, the recommended strategy for complaints of any nature is to ask the concerned individual to first contact the person or office most directly connected to the issue, unless there are compelling reasons not to do so. If the concerned individual does not want to contact a faculty or staff member directly, he or she begins with the next highest level of authority, which typically is the department chair or director. If the problem or complaint is unresolved or the individual is not satisfied with the resolution, they may file a written grievance or appeal. Specific procedures are included in specific sections of this catalog and the Golden Rule.

2. General Graduate Policies

Academic Common Market Scholars

The University of Central Florida is a participating institution in the Academic Common Market (ACM) program with other southern universities sharing unique academic programs on the undergraduate and graduate level. However, the University of Central Florida only participates at the graduate level.

The Academic Common Market offers students the opportunity to enter degree programs that are not available in their home state, while still being eligible to pay in-state tuition rates. Students taking part in this program must be admitted by a participating university (notifying that university of their planned attendance as an ACM Scholar) and will need to obtain a letter of certification from their respective ACM state coordinator.

The first step is to contact your respective state coordinator for information on how to apply for the Academic Common Market. Contact information for state coordinators can be found on the following website: http://home.sreb.org/acm/states.aspx.

After making contact with your state coordinator, if you are eligible for the ACM, you can apply to the University of Central Florida online through the website at https://applynow.graduate.ucf.edu/apply/. When filling out the Florida Residency Classification section, select the option that states "I am a Florida Resident for tuition purposes" and fills out the entire section. Before saving the page, you will need to add an explanation for your Florida residency. Please select the letter "N", which states "I am a Southern Regional Education Board’s Academic Common Market graduate student".

Upon submission of your application and your program's required admissions criteria, you will receive a decision from the program in which you have applied. If accepted, you can present that information to your state coordinator, who will then be able to provide UCF with a certification letter. With that letter, UCF will then be able to offer you Florida residency for tuition purposes.

The participating universities are located in the following states:
Academic Grievance Procedure

The UCF College of Graduate Studies allows for petitions of university requirements and their academic matters. Academic matters are those involving instruction, research, or decisions involving instruction or affecting academic freedom.

The academic grievance procedure is designed to provide a fair means of dealing with graduate student complaints regarding a specific action or decision by a faculty member, program or college, including termination from an academic program. Academic misconduct complaints associated with sponsored research will invoke procedures outlined by the Office of Research.

Students who believe they have been treated unfairly may initiate a grievance. The procedure provides several levels of review, and at each level of review, the participants are further removed and have a broader outlook than where the grievance originated. Procedures for initiating an academic grievance can be found at The Golden Rule [www.goldenrule.sdes.ucf.edu](http://www.goldenrule.sdes.ucf.edu/) (see section 11).

Petitions of Graduation Requirements Procedures

Students have the responsibility to familiarize themselves with the policies and procedures of the university, college, and program. Students are responsible for knowing the degree requirements and for following the policies that govern the academic program. However, when unusual instances arise, making it appropriate for students to request exceptions of existing graduate academic policies for graduate students, graduate students may petition the appropriate unit for an exception to this requirement. The university is always looking for the compelling reason that an exception is warranted, so this needs to be carefully described in any petition. The procedures are:

1. The graduate student completes a Graduate Petition Form and submits it to the graduate program director, specifying the requirement (either a program or university requirement) and the exception desired. The graduate student needs to provide a compelling reason for an exception to be made.
2. The graduate program director may ask the program graduate committee to examine and provide advice about the petition to the graduate program director. The graduate program director will then make a recommendation about the exception to the unit head. The unit head will then make a final recommendation.
3. The petition will then be sent to the College of Graduate Studies for a final decision. The Vice Provost and Dean of the College of Graduate Studies may ask the Appeals Committee of the Graduate Council of the Faculty Senate to examine the information provided in the petition at their next scheduled meeting and make a recommendation concerning the petition to the Vice Provost and Dean.
4. The Vice Provost and Dean of the College of Graduate Studies may consider the input of the Appeals Committee of the Graduate Council and will make a final decision about the petition for the university.

Academic Progress and Performance

Review of Academic Progress

The primary responsibility for monitoring academic performance standards rests with the degree or certificate program. However, the academic college and the UCF College of Graduate Studies will monitor a student's progress and may dismiss any student if performance standards or academic progress as specified by the program, college, or university are not maintained. Satisfactory academic performance in a program includes maintaining at least a 3.0 program GPA (defined below) in all graduate work taken since admission into the program. Satisfactory performance also involves maintaining the standards of academic progress and professional integrity expected in a particular discipline or program.

Program GPA

A Program GPA will be calculated based on the courses taken in the graduate Program of Study since admission into each degree or certificate program. Grades from courses taken at UCF prior to admission into the graduate program will also be included in Program GPA if, and only if, these courses are approved as transfer credit (see Transfer Policy). The Program GPA is used to monitor the student's progress in the program. The university requires that students maintain a Program GPA of at least 3.0 or higher in order to maintain regular graduate student status, receive financial assistance, and qualify for graduation. This GPA requirement cannot be waived.
The student’s approved Program of Study (see Program of Study Policy) will guide the student in choosing courses. If the student deviates from the approved Program of Study (e.g., due to course availability), all courses taken from the curriculum listed in the student’s catalog year will populate into the Program GPA. Courses cannot be moved in or out of the Program GPA once the student has taken them. Thus, unsatisfactory grades will be included in the Program GPA.

Probationary Status and Dismissal - Students in a Degree or Certificate Program

In order to earn a graduate degree or graduate certificate at the University of Central Florida, students must have a minimum 3.0 Program GPA. To ensure that graduate students adhere to this requirement, the College of Graduate Studies conducts GPA audits at the end of each semester. Any student not achieving this mark will be placed on Academic Probationary Status. This is a formal designation. Students may also be placed on Academic Probation or Dismissed for S/U graded courses, but the College of Graduate Studies will not conduct audits of S/U grades. See Maximum Hours of Unsatisfactory Grades for these performance requirements and Review of Academic Performance and Student Conduct for other grounds for probation or dismissal.

When Program GPA falls below a 3.0, the following occurs:

1. Impacted students will receive notice from the College of Graduate Studies.
2. The probationary status will be imprinted on the student’s advising transcript and will remain for each successive semester while on probation. This information remains as a permanent record on the transcript.
3. Students will have a maximum of 18 graduate credit hours of graded A-F course work from their Graduate Plan of Study to increase their Program GPA to 3.0 or higher.
4. Students who have fewer than 18 credit hours of course work left in their Graduate Program of Study will only have the number of remaining credit hours toward degree completion to attain the 3.0 Program GPA.
5. Students who cannot mathematically attain a 3.0 Program GPA, either through the 18 credit hours of course work or through the remaining credit hours to degree completion, will be formally dismissed without the probationary period. Exception: If a student has a 3.0 grade point average and a 1.0 average in their previous semester, the student may be placed on academic probation for one semester and the Program GPA will be recalculated to include the new grade point average. If the student does not achieve a 3.0 Program GPA, the student will be dismissed.
6. At the end of each semester, the College of Graduate Studies will continue to monitor each student on probation. If further audits reveal that it is mathematically impossible to attain a 3.0, students on probation will be dismissed from the program.
7. Once the 3.0 Program GPA is met, the student will automatically be removed from Academic Probationary Status and be notified by appropriate communication from the College of Graduate Studies.
8. Students who are placed on probation with incomplete (I) grades on their record or who earn I grades while on probation are expected to complete their work to satisfy the course requirements as soon as is possible. Once the grade has changed to an A-F letter grade, the Program GPA will be recalculated retroactively to the semester in which the I grade was earned. This updated Program GPA may cause a student to be dismissed (if it is no longer mathematically possible to earn a 3.0 in the probationary period) or removed from probation (if the 3.0 is now achieved).
9. Incomplete grades can also cause a student who was not on probation to be placed on probation retroactively to the semester of the I grade (when the updated Program GPA is now lower than a 3.0). All grades following that semester will now be part of the probationary period.
10. International students placed on Academic Probationary Status will be sent to UCF Global for advisement regarding the immigration status implications of this action.
11. Students enrolled in multiple graduate programs may be placed on probation for any program in which the Program GPA falls below a 3.0. The College of Graduate Studies will inform students about their standing in each program.

Students placed on probation are required to meet with their graduate program director to create a Probation Plan. This plan will state the maximum number of hours that the student can remain on probation (if there are fewer than 18 hours left of graded courses in the student’s Graduate Plan of Study) and may include specific direction on courses to be taken and the timing of those courses. In addition, the plan may include other conditions as necessary for the continued enrollment of the student in the program such as retaking courses, taking remedial course work in specified areas, or completing special projects to better prepare the student for success in the program. Failure to meet any of the conditions of the Probation Plan may result in dismissal without any further appeal. The plans are signed by the student and the graduate program director and submitted to the College of Graduate Studies for review and approval. The primary responsibility for monitoring the progress of the student in meeting the terms of the Probation Plan rests with the degree or certificate program, although the appropriate academic college and the College of Graduate Studies may also monitor the plans for compliance.

After dismissal for low GPA, the student may re-apply to the graduate program from which he/she was dismissed after one year of non-enrollment in that program. The student must submit a completely new application (application fee, letters of reference if applicable, AND a statement describing why the student thinks he/she is more capable now to successfully complete the program). If the program admits the student, the student will continue to have the original dismissal denoted on the transcript and will continue with the same Program GPA that the student held prior to dismissal. Also, the student is admitted on restricted status. The restriction is that the student must bring their cumulative Program GPA up to at least a 3.0 in the next 9 hours of enrollment. Graduate programs may not readmit students in cases where it is not mathematically possible to achieve a 3.0 Program GPA in the next 9 hours of enrollment.

NOTE: Individual graduate programs may have more stringent grade requirements than described above. Students must abide by the academic performance standards of their graduate program.

Maximum Hours of Unsatisfactory Grades

"C" grades (C, C+, C-), as well as D, D+, D-, F and U grades, are all considered unsatisfactory grades.

A student may apply a maximum total of six semester credit hours of "C" grades, or the "C" grade credits associated with at most two
classes, whichever is greater, to satisfy degree program requirements.

Exceeding six semester credit hours of unsatisfactory grades is grounds for dismissal for all degree-seeking and nondegree students. A course in which a student has received an unsatisfactory grade may be repeated, however, both grades will be used in computing the GPA. There is no forgiveness policy for any course taken while in graduate status.

Incomplete Grades

A grade of "I" (incomplete) is assigned by the instructor when a student is unable to complete a course due to extenuating circumstances, and when all requirements can clearly be completed in a short period of time following the close of regular classes. In all circumstances where the "I" grade is received, the student and faculty member must complete an agreement form that specifies how and when the incomplete grade will be made up. This agreement form is submitted with the instructor grade rolls at the end of the semester, and a copy of this agreement is given to the Graduate College for further follow-up. For those students on financial assistance such as loans, the incomplete "I" must be made up by the agreement date. Failure to complete course requirements by that date may, at the discretion of the instructor, result in the assignment of an "F" grade, or a "U" grade for thesis, dissertation, or research report hours. It is the student's responsibility to arrange with the instructor for the changing of the "I" grade.

Grades of "I" must be resolved within one calendar year or prior to graduation, whichever comes first. Incompletes in regular course work left unresolved will be changed to "F". If not changed in the allowed time period, and this time period may be sooner for those receiving financial assistance. The exception to this in enrollment in the thesis (XXX 6971) and dissertation (XXX 7980) hours where the incomplete grade will be allowed to continue until graduation. UCF fellowship students cannot receive fellowship funds while holding incomplete grades and have thirty days from the issuance of the Incomplete to remedy it in order to continue to receive fellowship funds.

Assistantship Opportunities

As part of a program's professional development plan for students, full-time graduate students may be offered the opportunity to gain experience as a Graduate Teaching Assistant (or Associate or Grader: GTA), Graduate Research Assistant (or Associate; GRA), or Graduate Assistant. Please visit the Financial Information section in the catalog for more information.

Assignments to these professional development activities are intended to supplement the student's academic program of study in order to give the student professional experiences that will enhance the student's development and prepare them for post-graduation employment. While these activities provide the opportunity for students to be graduate assistants, their overriding purpose is to help develop the skills, abilities, and professionalism of the student.

All graduate assistants (GTAs and GRAs) must be assigned to at least a half-time appointment (0.25 FTE assignment, approximately equivalent to 10 hours per week). However, the standard assignment for graduate assistants is a full-time appointment (0.5 FTE assignment approximately equivalent to 20 hours per week). Students who desire more than a full-time appointment during fall and spring semesters must complete a Supplemental Assignment Form. The UCF College of Graduate Studies will only grant exceptions to this policy in rare circumstances and for compelling reasons related to the student's professional development. Exceptions are granted only rarely during the first year of a student's program of study. Decisions are based on the student's academic record, the appointment FTE, the relationship of the assignments to the student's program of study, support from the graduate program director, and related factors.

Student FICA exemption

Graduate assistants who are enrolled at least part-time (5 hours in fall, 5 hours in spring, or 3 hours in summer) will be exempt from FICA/Medicare taxes during pay periods that overlap with the academic term and during breaks of less than five weeks. Breaks longer than five weeks where graduate students are on a graduate assistant appointment but not enrolled will result in withholding FICA/Medicare taxes.

Catalog Year

Degree requirements, regulations, and policy for the institution and every academic program are provided in the annual UCF Graduate catalog. The catalog year at UCF is the Fall, Spring, and Summer terms each year. The catalog year prescribes academic, internship, clinical, and/or other professional/accreditation requirements students must fulfill in order to earn that degree or certificate. The catalog year is assigned to the student's first term of enrollment in a graduate degree or certificate program. Students will adhere to that catalog year as long as continuous enrollment is maintained within that degree or certificate. Students who have been readmitted to a program are reassigned to the catalog year associated with the first term of enrollment at readmission.

When changes occur to degree or certificate requirements, they will appear in the next catalog year. In discussion with their program and by request to the College of Graduate Studies, students may switch their catalog year to the new degree requirements. When changing the catalog year, students must comply with all degree requirements listed in the newer university catalog. Students are not permitted to revert to an older catalog.

Catalog Year - Graduate Program Handbook

In addition to the requirements listed in the catalog, each graduate program has a handbook, which specifies details about graduate program policies, procedures, and behavioral expectations. All students are expected to comply with all current handbook policies. Violations of program handbook policy can result in probation or dismissal from the graduate program. Handbooks may be updated every year. When the handbook is changed, all current students should be notified by their graduate program to read and comply with the new policies, procedures, and/or expectations.
Continuous Enrollment and Active Student Status

Continuous Enrollment

Students must be enrolled for at least one semester of every three consecutive semesters in order to maintain active student status. Students who do not meet this enrollment requirement breach continuous enrollment and will be discontinued. These students must reapply for admission. Readmission is not guaranteed.

Students with extenuating circumstances that will compel them to be unenrolled for three consecutive semesters or more may complete a Special Leave of Absence Form to petition to remain in active student status. This form must be submitted no later than the end of the add/drop period of the third semester of non-enrollment. See the Special Leave of Absence section for details.

1. Because of current U.S. government regulations, international students must be enrolled every fall and spring semester. For students in this category, a Special Leave of Absence is only available for documented medical reasons.
2. A student who is discontinued for breach of continuous enrollment will lose the option of fulfilling the degree requirements originally listed in his/her official program of study already on file and will instead be subject to the degree requirements listed in the graduate catalog in effect at the time the student is readmitted to the program.

Course Category Definitions

(Please see specific policies under Master’s degree and Doctoral degree program requirements for the proper use of hours that can be applied to degrees.)

In an effort to establish a balance among the essential components of graduate degrees, the 2008-2009 Policy Committee of the Graduate Council categorized the wide variety of graduate courses offered at UCF into the three essential components of graduate education: formal course work, research and independent scholarly work, and disciplinary training. While many courses offer a combination of these elements of graduate education, most can be classified as predominantly addressing one of these components. The following definitions were established to help establish a common vocabulary for this categorization.

Courses - All enrollment hours with an official class number.
Core/Required courses - Courses that cover a certain body of knowledge that is central to a program of study. These courses must be taken to fulfill degree requirements, and may only be substituted by equivalent coursework.
Elective courses - Courses that cover a certain body of knowledge that is important, but optional for a program of study.

Formal Course Work

Formal courses - Existing UCF courses that involve standard class instruction of a defined body of disciplinary knowledge. These courses involve interactions between a formal course instructor and the students that make up the class and can be traditional, face-to-face courses, web courses, and media-enhanced courses. Such classes include both core/required courses as well as elective courses, seminar courses and independent study courses (XXX 6908), but are distinguished from the various categories of individualized research and scholarly courses.

Independent Study (XXX 6908) - A course of study created outside of the standard-format formal courses offered by the university. Independent Study must have a formally defined core of knowledge to be learned by the student(s). The core of knowledge to be learned by the student(s) must be specified in written form and approved by the student(s), the instructor, and the program coordinator prior to enrollment in Independent Study.

Research and Independent Scholarly Work

Directed Research (XXX 6918, XXX 5917) - Graduate-level research/scholarly work. Research hours are taken at the graduate level. These can include laboratory rotations in addition to standard research and scholarly endeavors directed toward completion of a project.
Doctoral Research (XXX 7919) - Doctoral-level research/scholarly work. Research hours at the doctoral level taken prior to passing candidacy. These can include laboratory rotations, preparation for candidacy exams, or standard research and scholarly endeavors directed toward completion of a project or a dissertation.

Doctoral Dissertation (XXX 7980) - Research or scholarly hours taken after advancement to candidacy and directed toward completion of a dissertation.
Thesis (XXX 6971, XXX 6973) - Research hours directed toward completion of a thesis.
Research Report (XXX 6909)

Satisfactory (S) or unsatisfactory (U) grades are used to reflect student progress in these research and scholarly work courses. Other grades may not be assigned in these courses. Should a student in a given term be given an incomplete (I), then this grade should be changed to an S or U upon completion of the work. Students who do not maintain satisfactory progress in their research, as determined by their thesis or dissertation advisory committee, may be placed on probation or dismissed should unsatisfactory progress continue.

Disciplinary Training
Internships (XXX 6946) - Courses that provide training experiences for students in their discipline. It is not a formal course, but maybe a required element of some programs.

Practica and Clinical Practice (XXX 5944 or XXX 6946)

Graduate programs must select the grading scale for these disciplinary training courses to be either on an "A-F" or Satisfactory (S)/Unsatisfactory (U) scale, but not both in any one section.

Course Requirements

Course Levels of Graduate Work 7000-Level Courses

Courses for doctoral students. Master's and nondegree students may enroll in 7000-level courses with permission from the program.

6000-Level Courses

Courses for graduate students. Nondegree students should check with the colleges about their ability to enroll in 6000-level courses. Students in accelerated undergraduate/graduate programs should check with their academic adviser before registering for 6000-level courses. Undergraduate registration in 6000-level courses is allowed only in special situations with prior approval by the college. Undergraduate students must be within nine hours of graduation, have a minimum 3.0 GPA, and not register for more than a total of twelve hours in that term. See also the catalog section on Senior Scholars.

5000-Level Courses

Courses for graduate students. Nondegree students and seniors may enroll in 5000-level courses with permission from the program.

Zero Credit Courses

Zero credit hour courses, by definition, have no impact on the overall program hours and should not be used to add fundamental discipline content. A zero credit hour course must not exceed the expected time commitment associated with one credit hour, that is, the amount of work that reasonably approximates not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester and/or the equivalent amount of work over a different amount of time (SACSCOC Credit Hours Policy Statement). A zero credit hour course can include laboratory work, internships, practica, studio work, and other academic work.

Split-Level Classes

Although generally discouraged, UCF allows departments to offer split-level undergraduate and/or graduate classes. In such cases, two courses approved for different levels of instruction (e.g., a 4000- and 5000-level course) are offered together in the same room, at the same time, and with the same instructor, but under two different course numbers. In limited cases, classes taught in split-level format may comprise undergraduate and graduate level courses. In general, split-level classes are restricted to situations where the enrollment in one of the courses would be insufficient to allow the course to be offered on a stand-alone basis. When such split-level classes are scheduled, the following conditions must be maintained:

Both the graduate and the undergraduate courses must have been approved previously through the established university process for approving courses so that there are two separate and complete syllabi for each course, and the syllabi clearly demonstrate more advanced subject matter and expectations for the graduate course than the undergraduate course. The graduate course documents submitted for approval must indicate that the course will be offered in a split-level format. Graduate split-level classes must only be assigned to faculty members who meet the university-wide minimum qualifications for teaching graduate-level courses.

Courses may not be combined into a split-level class if the course numbers of the two courses are more than one level apart. For example, 4000- and 5000-level courses may be combined into a split-level class; 4000-level courses may not be combined with 6000-level courses. Students may not take both the undergraduate and graduate levels of a split-level course for credit, except in the case of performance and seminar classes, which can be taken for credit multiple times. Graduate students must take the graduate level of a split-level course for it to count toward fulfilling graduate program requirements.

The graduate and undergraduate courses must have distinct requirements and performance expectations. Graduate students must have course requirements or assignments that require more in-depth analysis and understanding of the topics, provide broader coverage of the content area, demonstrate higher knowledge and skills, and/or show greater independence of thought and application of concepts than what is typically required of undergraduate students. The level and amount of learning by graduate students must be equivalent to what is typically expected in 5000-level or higher courses. The different requirements and expectations must be spelled out clearly in the course syllabi for the respective courses.

Documentation of split-level class offerings must be maintained in the dean's office of the academic college, in expectation of future audits. Copies of both syllabi must be provided to the Undergraduate and Graduate Deans for all classes offered in a split-level format.

Language Requirements

Foreign language requirements shall be at the option of the individual departments or appropriate units consistent with their college regulations.

Credit by Examination or Waiver

Students who believe they have mastered the content of a graduate-level course should present a portfolio to the graduate program
director documenting the learning experience. If the committee, after examining the portfolio, believes the student has mastered the content presented in a graduate-level course, the student should be allowed to demonstrate that mastery through examination. Examination credit may be used to satisfy program course requirements, but not credit hour requirements.

Correspondence Courses

Correspondence courses are not acceptable toward a graduate program of study; however, credit-bearing extension or continuing education courses may be accepted. The acceptance of courses from unaccredited agencies or institutions threatens the integrity and value of the graduate degrees awarded by UCF. Graduate-level coursework demands the mastery of skills, theories, and concepts at a much higher level than undergraduate-level coursework. Therefore, the university will not allow students to transfer coursework from professional societies, independent agencies, employees, or companies unless they are ACE (American Council on Education) certified.

Degree or Certificate Completion

Application and Certification for Graduate Degrees

Students planning to graduate in the next term must complete the Application for Graduation (Intent to Graduate available at my.ucf.edu). Students who have not applied for graduation by the last day of classes in the term preceding the graduation semester may not be listed in the Commencement Program. If the student does not graduate in that term, a new application for graduation must be filed at the beginning of registration for the term of anticipated graduation. Graduating students must be enrolled at UCF during the term of graduation. Graduates may contact the Registrar's Office for Commencement ceremony and guest ticket information.

Assuming that the student is in good standing at the university, degrees will be awarded only after successful completion of the degree requirements stated in the Graduate Catalog under which the student plans to graduate and final recommendation from the faculty and dean of the respective college.

The college of the degree program must certify through the college dean that all program and college requirements have been met. Degree certification forms (Degree Audit forms or program of study with approval signatures) are forwarded to the UCF College of Graduate Studies for a final determination that all program, college, and university requirements have been met.

Application and Certification for Graduate Certificates

In order to be processed for completion of a graduate certificate program, students must file an application for completion Graduate Certificate Completion form) with the office that offers the certificate program. The Graduate Certificate Completion form should be filed by the time that the student is registering for the final course in the certificate program, and such forms must be filed no later than the end of the semester in which the student enrolls in the last course required for the certificate program. Forms can be found on the UCF Graduate website (www.graduate.ucf.edu).

The college of the graduate certificate program must certify through the college dean that all program and college requirements have been met. Completed Graduate Certificate Completion forms (available at www.graduate.ucf.edu) are forwarded to the UCF College of Graduate Studies for final determination of program, college, and university requirements. For each certificate program, the graduate program director will certify successful completion of the program's academic requirements. The certificate is mailed to the student unless the student or the graduate program requests other arrangements. Certificate recipients are not recognized at commencement.

Thesis and Dissertation Requirements

An oral defense of an original thesis or dissertation is required with the approved thesis or dissertation being prepared in accordance with program, college, and university requirements.

The College of Graduate Studies Thesis and Dissertation Manual describes UCF's formatting requirements for theses/dissertations and outlines the steps graduate students must follow to submit their thesis or dissertation electronically. Graduate students can obtain the manual and formatting instructions from Thesis and Dissertation (ETD) on the Graduate website. Additionally, the Thesis/Dissertation Office offers workshops to inform graduate students about procedures, deadlines, and requirements associated with preparing a thesis and dissertation.

Academic dishonesty in a thesis, research report and dissertation work may result in reversion to postbaccalaureate status or termination from the degree program. Our emphasis on academic honesty requires quotations or ideas of others to be accompanied by appropriate citations.

All theses and dissertations that use research involving human subjects, including surveys, must obtain approval from an independent board, the Institutional Review Board (IRB), for this prior to starting the research. It is imperative that proper procedures are followed when using human subjects in research projects. Information about this process can be obtained from the Office of Research (www.research.ucf.edu). Failure to obtain this prior approval could jeopardize receipt of the students degree.

Students who wish to complete their degree requirements in a given semester must take their oral defense and submit the final electronic copy of their thesis or dissertation by the dates shown in the Academic Calendar. All students are required to submit their thesis or dissertation electronically.

Dual Degree Shared Credit Policy

The following policies apply to course credits that are counted toward fulfilling the requirements in two-degree programs (dual degree
shared credit). These policies do not extend to certificate programs. Policies governing credits shared between two certificate programs or between degree programs and certificate programs can be found under either the Graduate Certificate Program Policies or the Transfer of Credit Policy.

The following policies serve to supplement and extend the shared credit policies that can be found in the Transfer of Credit section.

**General Limit to Use of Credits for More Than One Degree**

No credit hours may be counted for more that two degree programs.

**Accelerated Bachelor's/Master's Programs**

Accelerated Bachelor's/Master's programs have a limit of 9 SCH shared credit for graduate degrees requiring up to 36 credit hours. For graduate degrees requiring more than 36 credit hours, accelerated Bachelor's/Master's programs have a limit of 12 SCH shared credit. Proposals for accelerated Bachelor's/Master's programs must include a strong curricular rationale that can support the streamlining of credit requirements in the two degrees. Shared credit is limited to formal course work, exclusive of independent study. Grades below a B- are not acceptable to fulfill Master's degree requirements if taken while in undergraduate status. Only outstanding students may enter accelerated Bachelor's/Master's programs (explicit requirements may be specified by the graduate program). All students in these programs must have met the undergraduate general education requirements. Students must apply and be formally admitted to the master's program following receipt of the bachelor's degree. Accelerated Bachelor's/Master's programs must be approved by the Graduate Council Curriculum Committee. Such programs must not unduly delay the completion of the bachelor's degree nor limit the breadth of the student's undergraduate experience.

**Dual Degree Programs Definition**

Dual degree programs lead to two different degree citations on the transcript and two separate diplomas. These may combine master's programs, doctoral programs, and professional degree programs. The purpose of a dual degree program is to allow students to undertake complementary programs of graduate study simultaneously through streamlined curricular arrangements that allow dual credit for a specified set of courses.

**Approval**

Proposals for all dual degree programs must include a strong curricular rationale that can support the streamlining of credit requirements in the two degrees. Internal, multi-institutional dual degree programs (prescribed curriculum designed for multiple students), and cotutelles (multi-institutional research and educational opportunities designed for single students) must be approved by the Graduate Council Program Review and Awards Committee.

**Shared Credit Limit**

A minimum of 50% of required credit hours must be unique to each degree and cannot be used for dual credit. Departments and programs may impose more stringent shared credit limits, but may not exceed the university limit.

**Student Admission**

Students may be admitted directly to a dual degree program. Upon admission, the College of Graduate Studies will place an indicator on the student's record to activate the second program of the dual degree option prior to the completion of 18 SCH in the first program. No admissions requirements established by the College of Graduate Studies or by either individual program may be waived. For example, if one dual degree program requires acceptable scores for the GRE and the other does not require it, the applicant must take the standardized exam to be considered for admission to both degrees. International students must contact UCF Global prior to applying to a dual degree program. Students that apply to the regular program without the dual degree option and later become interested in the dual degree option must contact the dual degree program director prior to completing 18 SCH in the regular program.

**Academic Requirements**

Formal proposals for dual degree programs must include:

1. a clear rationale for specifying whether a joint or distinct documents can satisfy the thesis/dissertation or capstone requirements for each of the component programs;
2. a clear rationale for specifying whether joint or distinct examinations can satisfy the requirements for each of the component programs; and
3. specifications concerning the composition of the advisory committee, with representation from both programs.

All students must have two co-advisors, with one from each program.

Should a student fail to make satisfactory academic progress and be placed on probation, the student should consult with both advisors about the future course of action. Please refer to the section on Academic Progress and Performance for options for students who are dismissed as a result of unsatisfactory academic performance. Please note that students dismissed from a dual degree program may only pursue retention and readmission options with one of the degree programs and may not be retained in or readmitted into the dual degree program.

**Student Financial Support**

Formal proposals for dual degree programs must include a clear structure for the financial arrangements for supported students.

**Other Policies**

2023-2024 Graduate Catalog
All standard policies apply.
The Program GPA minimum must be met for both programs.
Students enrolled in dual degree programs must have both degrees conferred simultaneously. No dual degrees will be awarded retroactively.
Dual degree proposals must include statements concerning the handling of grievances, intellectual property issues, and the assigning of teaching "credit" and fees.

Enrollment

Students must be enrolled in order to take exams, defend and submit their thesis or dissertation, to conduct research, or use any university resources. When students take qualifying or candidacy exams that are only offered in the summer semester, and they are not otherwise enrolled, they do not have to enroll only to take exams.

Students who have completed all graduate program requirements but failed to file an intent to Graduate may submit their Intent to Graduate the following semester without enrollment. However, students who have completed all degree requirements but are discontinued due to non-enrollment must reapply, be readmitted, file their Intent to Graduate, and enroll in at least one course (e.g., IDS 6999) during their semester of graduation.

Enrollment in Multiple Graduate Programs

Students are allowed to enroll in multiple master’s and doctoral degree programs.
Approval of the program(s) where the student is currently enrolled is not required for application to or enrollment in additional program(s).
The College of Graduate Studies shall inform the program(s) of current enrollment when a student is accepted for enrollment in a new program.
Students will be held responsible for showing academic progress in each program in which they are enrolled.

Full-time Enrollment Requirements

A full-time degree-seeking graduate student must take at least 9 credit hours in the fall and spring semesters. A half-time load is defined as enrolled in at least 4.5 credit hours in fall and spring terms. During the summer term, full-time is 6 credit hours and half-time is 3 credit hours. There are two exceptions to this policy:

1. For master's students pursuing a thesis option, full-time enrollment is defined as 3 hours per semester (including summers, of only thesis hours (XXX 6971)), after completion of all coursework and until successful completion and defense of the thesis.
Students enrolled in thesis hours simultaneously with coursework hours must be enrolled in a combined nine credit hours to be considered full time for the fall and spring semesters, or six credit hours to be enrolled full time in the summer semester.

2. For doctoral students who have passed the candidacy exam and are registered for doctoral dissertation (XXX 7980) hours only, full-time is 3 hours per semester, including summers, until successful completion and defense of the dissertation.

Special Considerations

One exception to this policy is for students pursuing the Clinical Psychology PhD program that requires a 12-month, full-time pre-doctoral internship (CLP 6949) in which registration for one hour per semester (for a total of three semesters) is also defined as full-time.

All international students on F or J visas must maintain full-time, degree-seeking status regardless of financial support received from the university. F and J visa holders should contact the UCF Global to ensure that their enrollment conforms to the full-time definition for their visa status. International students should not change their course schedule or drop classes without advisement from the UCF Global. All international students who enroll in less than 9 hours per term must submit to UCF Global a Reduced Course Load Form that explains the nature of the reduced hours and must obtain approval from UCF Global (see https://global.ucf.edu/ for Reduced Course Load Form). This requirement also applies to international students who are enrolled in less than 9 hours per term in thesis or dissertation hours.

Students who receive financial support from outside UCF and who have loan obligations are responsible for enrolling in the number of credit hours that meet the full-time or half-time criteria specified by the funding source. Enrollment certification is provided by the Registrar’s Office based upon the UCF definition of full-time graduate status.

Students who do not satisfy these full-time enrollment requirements may have to start repaying student loans and will not qualify for graduate assistantships, fellowships or tuition support. Students receiving financial aid should refer to the Program Eligibility Charts on the Office of Student Financial Assistance website under “Receiving Aid” to determine their specific enrollment requirements.

Students receiving veteran’s benefits should contact Veteran’s Affairs for additional information about course loads.

Nondegree seeking students must be enrolled in 12 credit hours or more to be considered in full-time status.
Grade System

The university uses an alphabetic system to identify student grades and other actions regarding student progress or class attendance. This system, with a grade point equivalent per semester hour, is as follows:

<table>
<thead>
<tr>
<th>Grades</th>
<th>Grade Points Per Semester Hour of Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>3.75</td>
</tr>
<tr>
<td>B+</td>
<td>3.25</td>
</tr>
<tr>
<td>B</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>2.75</td>
</tr>
<tr>
<td>C+</td>
<td>2.25</td>
</tr>
<tr>
<td>C</td>
<td>2.00</td>
</tr>
<tr>
<td>C-</td>
<td>1.75</td>
</tr>
<tr>
<td>D+</td>
<td>1.25</td>
</tr>
<tr>
<td>D</td>
<td>1.00</td>
</tr>
<tr>
<td>D-</td>
<td>0.75</td>
</tr>
<tr>
<td>F</td>
<td>0.00</td>
</tr>
<tr>
<td>NC</td>
<td>No Credit*</td>
</tr>
</tbody>
</table>

* Available only in CHM 1032, CHM 2045C, CHS 1440, ENC 1101, ENC 1102, MAC 1105H, MAC 1105, MAC 1114, MAC 1140, MAC 2147, MAC 2233, MAC 2241, MAC 2253, MAC 2281, MAC 2281H, MAC 2311, MAC 2311H, and STA 2014C. In these classes, NC replaces the use of D+, D, and D.-

Other Actions

I  Incomplete
N  No grade reported by the instructor
R* (followed by grade) Repeated course (Grade Forgiveness)
S  Satisfactory (with credit)/Satisfactory Progress (Research, Thesis, or Dissertation)
T* (followed by grade) Subsequently repeated (no credit)
U  Unsatisfactory (no credit)
W  Withdrawn
WF  Withdrawn Failing
WH  Health Form Withdrawal
WM  Medical Withdrawal
WP  Withdrawn Passing
X  Audit (no credit)

* "R* and "T* actions only apply to undergraduates.

The designation of "N" will be temporarily assigned by the Registrar's Office only in the case when a grade has not been submitted by the faculty by the grades due deadline. The designator will be replaced by the earned letter grade at the earliest opportunity in the semester that immediately follows. The "N" designator may not be assigned by faculty.

Grade changes other than medical withdrawals will be considered only during the semester immediately following the one in which the grade was assigned, except that grades assigned during the spring semester may be changed during either the following summer term or fall semester. A change in grade must be approved by the dean of the college or school. If an academic action such as dismissal or probation has been taken by the university before a grade change, the action will remain in effect regardless of the grade change. A grade will not be changed after a degree has been conferred.

Graduate Faculty and Graduate Faculty Scholars

University-Wide Qualifications for Participation in Graduate Education

Graduate education requires the participation of highly competent faculty who are willing to share their specialized skills and knowledge with graduate students. Graduate faculty teach graduate courses, serve as members of thesis and dissertation committees, and serve as faculty advisers for thesis and dissertation students and chairs of thesis and dissertation committees. The following guidelines outline the minimal credentials necessary for faculty to serve the many different roles they play in graduate education. Programs may set higher qualification standards or additional requirements. As the university is committed to encouraging, facilitating, and rewarding interdisciplinary, multi-disciplinary and cross-disciplinary educational and scholarly activities, the service of faculty and
staff members in more than one department, school, center/institute, or college is encouraged as a way to further this objective.

Faculty engaged in graduate education must possess either a terminal academic degree in, or closely related to, the discipline in which they are teaching, or expertise in a field related to the topic of the thesis or dissertation if serving on a thesis or dissertation committee. Substitution for the terminal degree may be granted with documented relevant exceptional experience and scholarly or creative activity when recommended by the graduate program committee and approved by the department chair/unit director. No graduate student at UCF may teach UCF graduate courses as the instructor of record.

For the appointment of individuals in the process of obtaining a terminal degree, the College of Graduate Studies can certify that all requirements for a degree have been met.

Members of the Graduate Faculty cannot have personal or financial (including employment) arrangements that may pose a conflict of interest with a student on whose thesis or dissertation committee they serve.

This policy has five major sections:

Section A defines the terms describing the roles played by faculty in graduate education. Section B establishes the role of the graduate program committees in the process of appointing Graduate Faculty and Graduate Faculty Scholars. Section C establishes the roles and qualifications for appointment as Graduate Faculty and Graduate Faculty Scholars. Section D establishes procedures for review, renewal, and termination of appointments to the Graduate Faculty. Section E establishes the responsibilities for the various members of the dissertation committees.

A.1: Faculty Roles in Graduate Education

Faculty involved in graduate education comprise members of the Graduate Faculty (Sections C.1-C.2) and Graduate Faculty Scholars (Section C.3). These faculty may be eligible to assume the following roles as part of their involvement in graduate education at UCF:

- Instructor of record for graduate-level courses (graduate teaching)
- Member of a thesis or dissertation committee
- Chair of a thesis or dissertation committee: In the vast majority of cases, the chair is the adviser of the scholarly activities of the student. A chair of a thesis or dissertation committee also oversees all of the administrative functions of the committee. A Graduate Faculty Scholar is not eligible to serve as a chair of a thesis or dissertation committee.
- Co-chair of a thesis or dissertation committee: A co-chair is a member of a thesis or dissertation committee who shares with the chair in the scholarly advisory activities of the student. In cases in which a Graduate Faculty Scholar oversees the day-to-day scholarly activities of the student, the Graduate Faculty Scholar may be appointed as a co-chair of the thesis or dissertation committee.
- Vice-chair of a thesis or dissertation committee: A vice-chair serves as a voice of experience in thesis and dissertation committees. A vice-chair must be appointed to committees in which the chair has no prior experience serving on thesis or dissertation committees. To be appointed as a vice-chair, the committee member must have prior experience serving on at least one thesis or dissertation committee that has successfully graduated a student.

Descriptions of the responsibilities of members and chairs of dissertation committees are detailed in Section E.

B.1: Graduate Program Committees

Each graduate program will be administered by a graduate program committee consisting of faculty members who participate in the program. An active graduate program committee is required for each graduate program in order to provide program oversight and to ensure that the qualifications of contributing individuals are appropriate for participation in graduate education. Graduate program committee members are appointed in accordance with established department/school procedures and the qualifications established in this document.

B.2: Qualifications for Serving on Graduate Program Committees

Tenured, tenure-earning or ranked faculty who are members of the Graduate Faculty may serve on graduate program committees. The graduate program director will be the chair of the graduate program committee.

C.1: The Graduate Faculty

Ranked professors (tenure, tenure-earning, clinical, research), engineers, instructors, lecturers, librarians, scientists, and scholars are eligible for appointment to the Graduate Faculty. Appointment to the Graduate Faculty begins with a nomination by the graduate program committee that is relevant to the graduate education duties of the individual faculty member. The nomination must then be approved by the department chair/unit director for review and appointment by the Dean of the College of Graduate Studies. Qualified graduate faculty members may be eligible to serve in more than one graduate program. Graduate faculty members who are outside of a student's program are eligible to serve as external members of a thesis or dissertation advisory committee.

Special graduate faculty nominations may be made to the Graduate Council at the discretion of the Dean of the College of Graduate Studies.

All graduate faculty are eligible to teach graduate courses, serve as members of thesis and dissertation committees, and serve as chairs or co-chairs of master's thesis committees.

C.2: Eligibility Criteria for Service as Chairs of Thesis and Dissertation Committees

All chairs and co-chairs must be approved by the graduate program committee of the student's program. Graduate program committees may specify additional guidelines for service as a chair or co-chair of thesis or dissertation committees.

Scholarly currency requirement to serve as a chair of a dissertation committee: For graduate faculty members to serve as a
chair or co-chair of a dissertation committee, they must demonstrate significant current involvement in scholarly research or creative productivity. Scholarship and creative activity are evidenced and recognized through publications, presentations, performances, exhibits, awards, and competitions. Other considerations include a continuing fulfillment of professional obligations through, for example, manuscript review, journal editorship, and national advisory and review panels. The criteria for scholarly currency are to be established by each graduate program and approved by the department chair/unit director. The criteria must be submitted to the Dean of the College of Graduate Studies prior to nominations for graduate faculty appointments and updated for the reappointment process.

**Required thesis or dissertation committee experience:** Graduate faculty who have not served as a member of a thesis or dissertation committee to completion may serve as the chair of a thesis or dissertation committee, but must have a vice-chair appointed to the committee who has previously served as a member of a thesis or dissertation committee to completion.

**C.3: Graduate Faculty Scholars**

Other qualified individuals may serve as graduate faculty scholars in graduate faculty roles confined to specific, well-defined graduate faculty assignments. Graduate faculty scholars play important roles in graduate education at UCF, but their status as graduate faculty scholars is distinct from that of members of the Graduate Faculty.

The appointment of graduate faculty scholars begins with a nomination by the graduate program committee that is relevant to the graduate education duties of the individual. The nomination must then be approved by the department chair/unit director for review and appointment by the Dean of the College of Graduate Studies.

Graduate faculty scholars may be designated as “Teaching-Only” if their responsibilities will be restricted solely to teaching graduate courses.

Graduate faculty scholars may serve as members of the thesis or dissertation committees for the purpose of bringing specific disciplinary knowledge to the committee. In instances deemed appropriate by the graduate program committee, graduate faculty scholars may also serve as co-chairs or vice chairs of thesis and dissertation committees, but may not serve as chairs of these committees. Graduate faculty scholars serving on thesis and dissertation committees, either as members or co-chairs, must have documented evidence of exceptional relevant experience and/or scholarly or creative productivity, as determined by the graduate program committee.

It is expected that graduate faculty scholars will attend the various committee meetings associated with serving as a member of a thesis or dissertation committee.

**D.1: Graduate Faculty Reappointments**

Individual qualifications for reappointment as a graduate faculty member will be re-evaluated by the Program Review Committee of the Graduate Council. Reappointment evaluations will be conducted at the time of the periodic university program review, or sooner, as deemed appropriate by the graduate program committee or at the request of the Dean of the College of Graduate Studies. At that time, individuals must re-submit their current credentials to the Program Review Committee of the Graduate Council if they wish to have their appointment renewed. Qualifications will be based on accomplishments since the last program review and the criteria established by the nominating graduate program.

**D.2: Non-periodic Graduate Faculty Review**

In addition to the periodic review of faculty for reappointment as Graduate Faculty (as described in D.1), individuals may be reviewed at any time, for cause, such as not maintaining scholarly currency, not providing appropriate mentorship or high-quality education to students, or violations of process, policy, or law.

Serious concerns over a Graduate Faculty's actions should be brought to the attention of the Dean of the College of Graduate Studies. The Dean of the College of Graduate Studies will evaluate the initial concern and decide whether it warrants review by the Graduate Council Program Review and Awards Committee. If a review is warranted, the Dean of the College of Graduate Studies will charge the committee with investigating the situation and compiling a written report. During the investigation, the committee will review verbal and/or written statements by the faculty member and other relevant parties in addition to other sources of information necessary to make a recommendation. The written report will include a summary of the findings and a recommendation about the individual's Graduate Faculty status, with justification for the recommendation. The recommendation may be: 1) no change in Graduate Faculty status; 2) a probationary status (in which Graduate Faculty activities are limited or closely monitored while the faculty member completes the required developmental activities); 3) suspension of Graduate Faculty status; or 4) revocation of Graduate Faculty status, with the latter two typically reserved for more egregious behaviors. The Dean of the College of Graduate Studies will review the report and, in consultation with the Dean of the academic college of the Graduate Faculty, make a decision about the individual's Graduate Faculty status. For cases of probationary status or suspension of Graduate Faculty status, this decision will include the specific terms of the probationary or suspension period, including its duration. The faculty member can appeal the decision with the Provost.

**D.3: Reinstatement of Graduate Faculty Status**

When Graduate Faculty status is not renewed (during the Periodic Faculty Reappointment process per D.1), a faculty member can request to the College Dean a one-time re-evaluation of his/her credentials. If the reappointment is not granted, then the faculty member must wait two years (or more) to request to be re-nominated. When Graduate Faculty status is revoked (based on the outcome of a Non-periodic Graduate Faculty Review per D.2), faculty members can request to the Dean of the College of Graduate Studies to be re-nominated for Graduate Faculty status two (or more) years after the decision to remove Graduate Faculty status. For reinstatement, documentation regarding the removal from Graduate Faculty status will be considered, along with the re-nomination request.

**D.4: Guidelines for a Thesis or Dissertation Committee Member Who Leaves UCF**

A thesis or dissertation committee member who leaves UCF may be eligible to continue serving on the committee as a graduate faculty member (for up to 12 months), with the approval of the graduate program committee. After 12 months, the member can serve as graduate faculty scholar.
D.5: Guidelines for a Thesis or Dissertation Committee Chair Who Leaves UCF

In the event that a chair of a thesis or dissertation committee leaves UCF:

1. With the approval of the graduate program committee, a chair of a thesis or dissertation committee who leaves UCF may continue to serve as chair and supervise the thesis or dissertation for one calendar year after leaving.
2. If one calendar year has passed since the faculty member left UCF and the advisee has not yet completed the degree requirements, the departed faculty member may continue to serve as co-chair of the thesis or dissertation committee as a graduate faculty scholar, with approval of the graduate program committee; however, a new chair from the student’s department (or college, if a college-wide program) shall be designated.

D.6.1: Faculty Emeriti

Emeritus graduate faculty members may continue to participate in graduate education as a graduate faculty scholar, without the necessity of nomination. With the approval of the graduate program committee, they may continue to serve for a specified period of time as faculty advisers and chairs of thesis and dissertation committees established prior to emeritus status. Emeriti faculty may not chair additional thesis and dissertation committees but may continue to serve on thesis and dissertation committees as a member or co-chair for as long as they remain active with the institution.

D.6.2: Retired Faculty

In the event that a chair of a thesis or dissertation committee retires from UCF:

1. With the approval of the graduate program committee, a chair of a thesis or dissertation committee who retires from UCF may continue to serve as chair and supervise the thesis or dissertation for one calendar year after leaving.
2. If one calendar year has passed since the faculty member retired and the advisee has not yet completed the degree requirements, the retired faculty member may continue to serve as co-chair of the thesis or dissertation committee as a graduate faculty scholar, with approval of the graduate program committee; however, a new chair from the student’s department (or college, if a college-wide program) shall be designated.

E.1: Responsibilities of Members of Dissertation Committees

1. To meet at regular intervals at least once per year to: (i) discuss and approve the proposed dissertation research and the plans for carrying out the research; and (ii) to assess progress towards the dissertation and give the student a yearly letter of evaluation in addition to S/U grades awarded for 7980 courses.
2. To review iThenticate results from dissertation submittals.
3. To participate in the candidacy and/or dissertation prospectus examination.
4. To participate in the dissertation defense to assure: (i) that the dissertation is acceptable as original research and a contribution to the discipline; and (ii) that it meets the standards of the University.

E.2: Responsibilities of the Chair (and co-Chair) of Dissertation Committees

1. In cooperation with the program director, to review the program of study, the research, and all other degree requirements by meeting with the student early in the program and immediately after appointment as chair/co-chair.
2. To suggest to the student possible committee members who could serve on the dissertation committee.
3. To establish timelines for the research, set expectations, and evaluate the student progress based upon these.
4. To meet at regular intervals with the student to discuss the proposed dissertation research and the plans for carrying out research.
5. To review in a timely manner all written materials submitted by the student and offer suggested revisions.
6. To meet at least once per year with the student and the dissertation committee to assess progress toward the dissertation and give the student an annual review in addition to the S/U grades awarded for 7980 courses. The chair shall send the annual review to the program director after consultation with the dissertation committee.
7. To coordinate the ongoing efforts of the committee as its chair, and to participate fully in the responsibilities of the committee members as a member of the dissertation committee.
8. To chair the candidacy and/or dissertation prospectus examinations.
9. To be physically present and chair the dissertation defense, ensure its proper conduct as described above, and submit to the program director for the student's records all necessary grades, forms and other materials.
10. In disciplines where funding is essential to the success of the thesis or dissertation work, to acquire funds (and appropriate facilities) sufficient to support the research of the student.

E.3: Responsibilities of the External Committee Member of a Dissertation Committee

1. External committee membership will entail the full responsibilities of other committee membership as specified in section E.1 above, including being present at the final defense.
2. External committee members should bring specific disciplinary knowledge or research expertise to the committee.
3. External committee members may be appointed from outside of the university or outside of the college (if the committee is for a college-wide program). The external committee member may not be affiliated in any way with the department of the committee, such as through joint or secondary joint appointments.
4. Graduate faculty scholars are external members.

E.4: Dissertation Committee Procedures

1. For on-campus defenses, no fewer than four faculty members, including all members of the dissertation committee, shall be in attendance with the student during the dissertation defense, and at least half of the committee must be physically present.
2. Graduate programs may elect to offer the option of a virtual dissertation defense (student off-campus defense) upon approval of the graduate program director, the department, and the college. If the student defends virtually, at minimum the dissertation committee chair will be present at the campus location of the public defense. No fewer than four faculty members,
including all members of the dissertation committee, shall be in attendance during the dissertation defense.

3. Only members of the dissertation committee may sign the dissertation, and a majority must approve the dissertation.

F.1: Exceptions

Exceptions may be made at the discretion of the Vice Provost and Dean of the College of Graduate Studies.

Late Withdrawal

Withdrawals are not permitted after the deadline except in extraordinary circumstances such as being the primary caretaker of an immediate family member who becomes seriously ill or injured after the withdrawal deadline. Late withdrawal must be requested during the semester in which the withdrawal is sought and as soon as the extraordinary circumstance arises. Documentation is required, showing that the extraordinary circumstance occurred after the withdrawal deadline. Unsatisfactory academic performance is not an acceptable reason for withdrawal after the deadline. Graduate students seeking to petition for a late withdrawal should consult the College of Graduate Studies (MH 230 or 407-823-2766). Late withdrawals are typically for all courses taken in the semester. Students who request a late withdrawal from selective classes must provide a compelling reason and documentation (e.g. my son's radiation treatment was at 9:00 am everyday, so I only had to stop attending my 9:00 am class).

Limited Nondegree Students Enrolling in Graduate Classes

All students who wish to enroll as limited nondegree students at the graduate level will be accepted as nondegree-seeking students at the graduate level. Students wishing to enroll should complete the online graduate application, pay the application fee, provide transcripts from previous institutions, and complete residency forms.

The UCF College of Graduate Studies will make available the nondegree graduate application form to those faculty who are meeting classes for the first time at an off-campus site or regional campus; those faculty should collect the appropriate information and forms. These materials should be returned directly to the UCF College of Graduate Studies, where they will be processed and students will be registered.

Students will be placed on hold for the following semester's registration, awaiting the transcript from a previous institution that verifies the bachelor's degree.

Ownership of Intellectual Property

The "Patent and Invention Policy" for graduate students is included here in its entirety. Departments and colleges should discuss this policy with graduate students at orientations.

PREMISE: UCF has three fundamental responsibilities with regard to graduate student research. They are to: (1) support an academic environment that stimulates the spirit of inquiry, (2) develop the intellectual property stemming from research, and (3) disseminate the intellectual property to the general public. In most cases, UCF owns the intellectual property developed using university resources. The graduate student as the inventor will agree to this policy share in the proceeds of the invention.

1. University Authority and Responsibilities: Florida Statute Section 1004.23 authorizes the University to take any action necessary to secure letters of patents, copyrights, and trademarks on any work products and to enforce its rights therein. This policy applies to graduate students who are considered University personnel.

2. Definitions: For the purposes of this policy the following definitions shall apply:
   a. Work includes any copyrightable material (other than journal articles) such as printed material, computer software or databases, audio or visual materials, circuit diagrams, mask works, architectural and engineering drawings, lectures, musical or dramatic compositions, choreographic works, pictorial or graphic works, and sculptural works.
   b. An Invention includes any discovery, invention, process, the composition of matter, article of manufacture, know-how, design, model, technological development, strain, variety, culture of any organism, or a portion, modification, translation, or improvement of these items, and any mark used in connection with these items.
   c. Instructional Technology Material includes motion pictures, film strips, photographic and other similar visual materials, live video and audio transmissions, computer programs, computer-assisted instructional coursework, programmed exhibits, and combinations of the above materials, which were prepared or produced in whole or part by a graduate student, and which are used to assist or enhance instruction.
   d. University Support includes the use of University funds, personnel, facilities, equipment, materials, or technological information, and includes such support provided by other public or private organizations when it is arranged, administered, and/or controlled by the University.
   e. Student-generated Effort means that the ideas come from the graduate student alone outside the field or discipline for which the graduate student is employed by the University, the work was not made with the use of University support, and the University is not held responsible for any opinions expressed in the effort.
   f. Research means the inquiry or examination in some field of knowledge undertaken to establish facts or principles that are true. Research, as used in this policy, does not include work done in an internship or coop setting where new knowledge in a field is not actively sought, but rather a setting that offers a real-life experience for the graduate student.

3. Work(s)
   a. Student-generated Effort - A work made solely by the graduate student, outside the field or discipline for which the graduate student is employed by the University, is the property of the graduate student, who has the right to determine the disposition of such work and the revenue derived from such work.
   b. University-supported Efforts - If the work was not made solely in the course of student-generated efforts, the work is the property of the University, and the graduate student shall share in the proceeds therefrom.
c. Disclosure -
  i. Upon creation of a work that is potentially patentable, and prior to any publication, the graduate student shall disclose to the Office of Research any work made in the course of University-supported efforts, together with an outline of the project and the conditions under which it was done.
  ii. The Office of Research shall gather information to assess the relative equities of the graduate student and the university in the work.
  iii. Within 120 days after such disclosure, the Office of Research will inform the graduate student whether the university seeks an interest in the work.
  iv. The graduate student and the university shall not commit any act which would tend to defeat the university’s or graduate student’s interest in the work and shall take any necessary steps to protect such interests.

4. Invention(s)
   a. Student-generated Efforts - All inventions made outside the field or discipline in which the graduate student is employed by the university and for which no university support has been used are the property of the graduate student.
   b. University-supported Efforts - An invention made in the field or discipline in which the graduate student is employed by the university, or receiving university support, is the property of the university and the graduate student shall share in the proceeds therefrom.

c. Disclosure
   i. A graduate student as inventor or co-inventor shall fully and completely disclose to the Office of Research and Commercialization all inventions which the inventor(s) may develop or discover while a graduate student of the University, together with an outline of the conditions under which it was done. With respect to inventions made during the course of approved outside employment, the graduate student as inventor or co-inventor may delay such disclosure, when necessary to protect the outside employers interest, until the decision has been made by the outside employer whether to seek a patent.
   ii. The Office of Research and Commercialization shall inform the graduate student as an inventor as well as all other inventors within 120 days of disclosure as to whether the University wishes to assert an ownership interest in the intellectual property.
   iii. The division of proceeds generated by the licensing or assignment of an invention shall be according to the established royalty division set forth in the patent policy of the University of Central Florida Research Foundation.
   iv. The graduate student as inventor(s) and the University shall not commit any act which would tend to defeat the University’s or inventor’s interest in the invention and shall take any necessary steps to protect such interests.

5. Release of Rights - At any stage of making the patent applications, or in the commercial application of an invention, if it has not otherwise assigned to a third party the right to pursue its interests, the Office of Research, may elect to withdraw from further involvement in the protection or commercial application of the invention. At the request of the graduate student in such case, the University shall transfer the invention rights to the inventor(s), in which case the invention shall be the inventor(s) property, and none of the costs incurred by the University or on its behalf shall be assessed against the inventor in whole or in part.

6. University Policy
   a. The University has a policy addressing the division of proceeds between graduate students and faculty when the research is done and results in a dissertation. (University Regulations, 6C7-2.029 Copyrights, and Patents). The University also has a policy addressing the division of proceeds between UCF inventor(s) and the University (see University Regulations, 6C7-2.029). It is also contained in the Patents and Copyrights Policy of the UCF Research Foundation. This same division of royalties will apply in the disbursement of royalty income to graduate students as inventor(s) unless this has been negotiated in a separate contractual agreement.
   b. All sponsored research done by graduate students enrolled at the University for and with companies must have a contractual agreement with UCF negotiated at the start of that research. Graduate students must be informed at the start of the research about any contractual agreements that would concern the future publication of their research work.
   c. Dissertation or thesis dissemination can be delayed because of patent or proprietary information concerns of a sponsor. This can occur when a prior contractual agreement has been entered into that includes provisions for a research sponsor's review between the sponsor and University. (See Proprietary and Confidential Information policy.)

Program of Study

A Program of Study is a listing of coursework agreed to by the student and the degree program specifying course degree requirements. A specific Program of Study, which may vary from student to student, must be formulated jointly by the student and the appropriate committee or adviser in the program area and approved by the college. A Program of Study form can be obtained from the graduate program director. This form should be prepared and signed by the adviser and student, then given to the graduate program director for review and filing in the student’s permanent file. It must comply with the student’s relevant catalog.

Programs of Study for students seeking a master’s or specialist degree should be on file with the College of Graduate Studies by the end of the student’s second major term (based on full-time enrollment) and must be on file by the end of the term prior to the term of expected graduation. Programs of Study for students seeking a doctoral degree should be on file with the College of Graduate Studies by the end of the third major term of enrollment (based on full-time enrollment) and must be on file prior to the change to candidacy status.

All graduate programs of study must include independent learning as part of course and other assignments. This may be accomplished by research papers and reports, evidence of reflective learning in individual portfolios, creation of original works, and/or demonstration of integration of knowledge as part of coursework in a capstone course and other requirements for the degree.
The student and their advisory committee may make changes in the program of study at any time with the approval of the graduate program director. However, once established, the program of study cannot be altered solely due to the poor academic performance of the student.

Proprietary and Confidential Information

It is the intent of the University to foster the professional development of its faculty and students. In particular, the proprietary and patent policies serve to protect the interests of UCF graduate students so that they can engage in research that will ultimately be published. In no circumstances should the University knowingly enter into an agreement with outside agencies that would prevent the ultimate publication of the graduate student's work, like a thesis or dissertation or other means. These policies also help to clarify protections for intellectual property contained in theses/dissertations for students who engage in employment outside the University.

If thesis or dissertation work is supported by a contractual agreement with an outside agency, and provision was made in the agreement to delay disclosure of the study’s results for the purpose of filing a patent or copyright, then this section describes procedures for handling the thesis/dissertation.

1. Only for those theses and dissertations where a prior written agreement was made between UCF and an outside agency or where the University wishes to pursue a copyright/patent may publication of the thesis/dissertation be delayed, or in exceptional circumstances as determined by the University on a case by case basis. Review and delay of disclosure of the thesis/dissertation may take up to 6 months.
2. The review by the outside agency or by the University for the purpose of copyright or patent will follow the oral defense of the document. If it appears that the review process will delay certification of the degree or if the delay of disclosure is exercised, the certification process will be completed but the thesis or dissertation will not be released for up to 6 months.
3. No graduate degree will be awarded when the thesis or dissertation, after a reasonable interval, is not available to the public. If the material is sensitive, classified, or will be patented, the thesis or dissertation will not be released for up to 6 months.
4. Contractual agreements that contain provisions for review and delay of disclosure shall be reviewed by the Office of Research. Exceptional cases may include a delay of disclosure for more than six months and/or review prior to the oral defense.
5. The student and the student’s Adviser shall be informed of the possibility of the delay of disclosure at the time of the appointment of the Adviser.

Readmission

To file for readmission, students must complete a new application, submit the application fee, and update their residency information and health history (if applicable). Students should apply for readmission if they were previously admitted and enrolled in a graduate program but have been absent for three consecutive semesters.

Special Leave of Absence

Students who anticipate that they may not be able to enroll continuously due to external circumstances should apply for a Special Leave of Absence. Specifically, students who are taking courses should apply for a Special Leave of Absence when they cannot enroll in more than two consecutive semesters. Students who are in thesis/dissertation hours should apply for a Special Leave of Absence when they cannot enroll in every semester (including summer).

To qualify for a Special Leave of Absence, the student must demonstrate good cause (e.g., illness, family issues, financial difficulties, personal circumstances, recent maternity/paternity, employment issues). The specific reason for the Leave of Absence request must be indicated by the student on the Leave of Absence Form. Due to current U.S. government regulations, international students must be enrolled every fall and spring semester. For students in this category, a Special Leave of Absence is only available for documented medical reasons.

A Special Leave of Absence will be granted only after approval from the Graduate Program Director for the student’s program of study and the College of Graduate Studies (and UCF Global for international students, when applicable).

For students taking classes, the Special Leave of Absence Form must be submitted no later than the end of the add/drop period of the third semester of non-enrollment. For thesis/dissertation students, the Special Leave of Absence Form must be submitted no later than the end of the add/drop period of the term of non-enrollment.

When applying for a Special Leave of Absence, students may request up to 6 semesters of non-enrollment for each program the student is pursuing. If the student is active in multiple degree programs, approved leave requests will be applied uniformly to all active programs. Time spent in a Special Leave of Absence can add a maximum of 3 terms (1 academic year) to the total time limitation for the degree (see the policy regarding Time Limitation for Degree Completion in the master's, specialist, and doctoral policies).

Specifically:
<table>
<thead>
<tr>
<th>Special Leave of Absence Structure</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 term of SLoA</td>
</tr>
<tr>
<td>1 term added to time to degree completion</td>
</tr>
<tr>
<td>2 terms of SLoA</td>
</tr>
<tr>
<td>2 terms added to time to degree completion</td>
</tr>
<tr>
<td>3+ terms of SLoA</td>
</tr>
<tr>
<td>3 terms added to time to degree completion</td>
</tr>
</tbody>
</table>

If a student fails to enroll in the semester following the last term in the approved Special Leave of Absence, the student will have failed to maintain continuous enrollment and must apply for readmission to the university.

**Student Admissions Classifications**

Students may be admitted into graduate status in the categories defined below. Classifications within a graduate status may be viewed in the Admissions section of the catalog.

**Degree-seeking Students**

A degree-seeking student is a student who has been formally admitted into a master's, specialist, or doctoral program.

**Graduate Certificate Students**

Students who have applied to and been accepted into a graduate certificate program are classified as graduate certificate students. Graduate certificate students who subsequently apply to and are accepted into a graduate degree program may, at the discretion of the program adviser, transfer the credit hours from one earned graduate certificate program into a graduate degree program.

**Nondegree Students**

Students are classified in nondegree status if they have not applied to and been accepted into a graduate degree or certificate program. Some students in this status are completing application requirements for a graduate program. Courses taken prior to acceptance to a degree program may be used to fulfill degree program requirements as transfer credits only with the approval of the program director. There are strict transfer credit limits - please see the transfer credit policy and consult with the specific program director.

**Student Responsibility for University Communication**

UCF uses email as the official means of notifying students of important university business and academic information concerning registration, deadlines, financial assistance, scholarships, student accounts (including tuition and fees), academic progress and problems, and many other critical items for satisfactory completion of a UCF degree program. The university sends all business-related and academic messages to a student's Knights Email address to ensure that there is one repository for that information. Every student must register for, and maintain a Knights Email account at https://extranet.cst.ucf.edu/kmailselfsvc and check it regularly to avoid missing important and critical information from the university. Any difficulty with establishing an account or with accessing an established account must be resolved through the UCF Computer Services Service Desk so that a student receives all important messages.

Additionally, each student must have an up-to-date emergency e-mail address and cell phone number by which to be reached in case of a crisis on campus. This emergency contact information will be used only for emergency purposes. Also, both permanent and local mailing addresses must be on the record, so that any physical documents that must be mailed can be delivered.

It is critical that students maintain and regularly check their Knights Email account for official announcements and notifications. Communications sent to the Knights Email address on record will be deemed adequate notice for all university communication, including issues related to academics, finances, registration, parking, and all other matters. The University does not accept responsibility if official communication fails to reach a student who has not registered for, or maintained and checked on a regular basis, their Knights Email account. Please ensure that this information is current and that any changes in contact information are made online through the myUCF portal at https://my.ucf.edu/.

**Student Responsibility to Keep Informed**

It is the student's responsibility to keep informed of all rules, regulations, and procedures required for graduate studies. Graduate program regulations will not be waived or exceptions granted because students plead ignorance of the regulations or claim failure of the adviser to keep them informed.

**Transfer of Credit**

Receipt of a graduate degree from UCF indicates that a student has completed most of their graduate training through classroom, research, and practical experiences at UCF and that the graduate training they received reflects current knowledge in the field. Graduate program directors have the responsibility to ensure graduate program quality by reviewing transfer credit requests, including
courses taken at external institutions or at UCF prior to admission in the graduate program. Thus, a graduate program can decide to be more restrictive than the transfer credit limits described here.

To request transfer credit, the student should submit a Plan of Study (POS) during their first semester of enrollment (i.e., their admit term). Requests must be received by the end of the semester following their admit term. Transfer credit requests are made to the Graduate Program Director, who will review the student’s transcript and the associated syllabi to decide if the transfer course(s) are equivalent to the course(s) required by the graduate program. Some syllabi may require an additional review by faculty with relevant expertise to determine equivalency. The POS must then be submitted to the College of Graduate Studies for review and approval. The following limits apply to transfer requests for degree programs (refer to the Graduate Certificate Policies for transfer of credit to graduate certificates):

1. The total number of transfer credits cannot exceed 50% of the UCF degree requirements, and at least 15 credit hours of graded (A-F) courses must be taken at UCF once admitted. The only exceptions to this rule are listed in #5 below.
2. Only graduate-level courses taken post-baccalaureate with a grade of ‘B’ or higher can be transferred. No Satisfactory/Unsatisfactory or Pass/Fail courses can transfer. Internal transfer courses (i.e., courses taken at UCF) will appear as a graded course on the transcript.
3. Transfer of international credits may be permitted with the required Josef Silny and Associates, Inc. or World Education Services (WES) transcript evaluations (see Admissions Equivalency Information). For a graduate-level course to be considered for transfer, the course should have an equivalent course in the program at UCF. To help the graduate program director decide whether a course is equivalent to the course offered at UCF, the student should provide an official transcript listing the course name and number, and a syllabus for the course to be considered for transfer. If the official transcript or syllabus are not provided by the international institution in English, the student should provide a translation performed by a certified translator at the issuing institution, government agency, or by a translator certified by the American Translators Association (https://.atanet.org/).
4. Courses older than 7 years cannot be transferred unless they have been reviewed and approved by a formal committee comprised of graduate faculty in the program. Program-level approvals must be accompanied by statements demonstrating the currency of the course content in the context of the student’s experience. The course must then be approved by the dean or department’s designee of the relevant college. Approval documentation must be attached with the transfer request to the College of Graduate Studies. All other transfer policies apply. Approved courses are valid if the student maintains continuous enrollment in the graduate program. If the student is readmitted after discontinuation or dismissal, the student must initiate a new transfer request for courses older than 7 years.
5. There are 4 exceptions to this policy as written:
   1. Unless part of an approved dual degree program, a maximum of 9 hours may be used to fulfill the requirements of 2 master’s degrees. In no case can hours be used to fulfill the requirements of more than 2 degrees.
   2. Unless part of an approved accelerated program, a maximum of 9 hours may be used by a student taking graduate courses while in the Senior Scholars program at UCF.
   3. When doctoral programs require a master’s degree for admission, credits from the required, earned master’s degree may not be used as transfer credits.
   4. To minimize disruption to the student’s research and progress to degree, graduate students recruited to transfer to UCF when their faculty supervisor is being hired by UCF from another institution may transfer up to 2/3 of the total degree requirements if all other transfer requirements are met. In this case, the student’s transfer must be requested by the faculty supervisor being hired by UCF (rather than initiated by the student). This exception still requires the student to complete the following at UCF: a minimum of 9 hours of graded coursework, the requirements for Doctoral Candidacy, and a minimum of 15 hours of dissertation.

Traveling Scholars

The Traveling Scholar status enables a UCF graduate student to take advantage of special resources available on another campus that are not available at UCF (for example, special course offerings, research opportunities, unique laboratories, and library collections). Provided the appropriate approval described below is obtained, Traveling Scholar credits are guaranteed to be accepted as earned UCF credits, as long as the grades obtained are “B” or higher.

A Traveling Scholar must be recommended by his or her own graduate adviser, who will initiate a visiting arrangement with the appropriate faculty member of the host institution. After agreement by the student’s adviser and the faculty member at the host institution, graduate deans at both institutions will be fully informed by the adviser and have the authority to approve or deny the academic arrangement. A student will register at the host institution and will pay tuition and/or registration fees according to fee schedules established at that institution. The Traveling Scholar Form must be completed by the student and approved by the UCF College of Graduate Studies before any coursework can be taken.

Each university retains its full right to accept or reject any student who wishes to study under its auspices. A Traveling Scholar will normally be limited to one term for a total of six credit hours taken as a traveling scholar at another institution.

A Traveling Scholar is not entitled to displacement allowance, mileage, or per diem payments. The home university, however, may at its option continue its financial support of the traveling scholar in the form of a fellowship or graduate assistantship with any work obligation to be discharged either at the home or at the host institution.

To obtain credit for approved Traveling Scholar courses, the student must request an official transcript be sent from the host institution to the UCF College of Graduate Studies [Millican Hall 230, P.O. Box 160112, Orlando, FL 32816-0112; Phone (407) 823-2766], and the graduate program director must complete the Transfer Request Form so that the credits can be entered into the student database. Credits earned at another institution while in Traveling Scholar status will be considered transfer credits and do not count toward the student’s Program GPA. These hours may count toward UCF residency requirements if prior approval is obtained. Graduate students are
not allowed to be traveling scholars in their final, or graduation, term except by prior approval of the UCF College of Graduate Studies.

An international graduate student who is registered at another educational institution besides UCF as a Traveling Scholar or as a transient student is required to complete a Reduced Course Load Form to satisfy SEVIS requirements of being enrolled full-time. International graduate assistants employed at UCF must be enrolled full-time at UCF.

University Admission Standards

The university seeks to enroll students of the highest quality. In addition, the university encourages applications from a diverse population and values diversity in our graduate programs. Admissions recommendations are made by the academic programs on the basis of a wide variety of information submitted as part of the students application package. Admissions committees consider factors such as students academic qualifications, research and work experiences, professional goals and skills, match with program objectives and professional qualifications, the number of openings available in the program, and the resources available to support the student. An applicants character, integrity, and general fitness to practice a particular profession may also be considered in the admission process. Admission is limited and, in most programs, not all qualified students can be admitted. While UCF supports students obtaining multiple UCF degrees at different levels or in different programs, students who have received a degree in a UCF graduate program are not eligible for admission to the same program, even if it has tracks that have substantively different curricula.

In general, graduate admission to the university requires that students must have obtained (prior to the start of the term for which the student is admitted) the equivalent of a baccalaureate degree from an accredited institution recognized by UCF or from a recognized foreign institution. Students without the equivalent of a baccalaureate degree from an accredited institution recognized by UCF or a recognized foreign institution are not admitted to graduate degree programs, graduate certificate programs, or graduate non-degree status. All applicants for graduate admission must submit official transcripts for all academic work. In addition to the above, all admitted students must submit evidence to document their attainment of the following minimum requirements.

Minimum UCF Requirement

1. This regulation applies to all students who seek to be admitted to graduate programs at the University of Central Florida.
2. Each admitted student to a graduate degree program or to a post-baccalaureate professional program must meet the following minimum requirements:
   a. Earned a bachelor’s degree or equivalent from a U.S. institution of higher education accredited by one of the following accrediting bodies or its equivalent from a foreign institution:
      i. Accrediting Commission for Community and Junior Colleges (ACCJC)
      ii. New England Commission of Higher Education (NECHE)
      iii. Higher Learning Commission (HLC)
      iv. Middle States Commission on Higher Education (MSCHE)
      v. Northwest Commission on Colleges and Universities (NWCCU)
      vi. Southern Association of Colleges and Schools Commission on Colleges (SACSCOC)
      vii. WASC Senior College and University Commission AND
   b. Earned a 3.0 GPA (or equivalent) or better in all work attempted while registered as an undergraduate student working for a baccalaureate degree, OR
   c. Earned a 3.0 GPA (or equivalent) or better in all work attempted while registered as an upper division student working for a baccalaureate degree, OR
   d. Earned a previous graduate degree or professional degree or equivalent from a U.S. institution of higher education accredited by an accrediting body listed in (2)(a) or its equivalent from a foreign institution in a field related to the discipline of the program to which the applicant is applying.
3. Each graduate program may determine other requirements for admission, consistent with the mission and purpose of their college and program beyond those listed in (2). All program admissions requirements must be published in the Graduate Catalog and are required to be reviewed and updated annually.
   a. Graduate programs must include at least 2 of the following materials to support the application:
      i. Letter(s) of reference
      ii. Resume or CV
      iii. Writing Sample
      iv. Personal, Goal, or Professional Statement
      v. Research Statement
      vi. Professional, Academic, Artistic, or Music Portfolio
      vii. Video answer to prompt
      viii. Other relevant supporting materials approved by the College of Graduate Studies
   b. Admissions criteria must not include preferences for applicants on the basis of race, color, national origin, disability, religion, or sex.
4. The requirement to submit GRE, GMAT, or MCAT scores is at the discretion of the program to which the student is applying. Please refer to the current catalog for specific program level standardized test score requirements.
   a. For programs that do not require a GRE or GMAT, all international applicants must submit a course-by-course evaluation of the student’s official transcript by a credential evaluation service recommended by UCF that shows a GPA equivalent of 3.0 from an earned degree equivalent to a U.S. bachelors degree obtained from an institution of higher education accredited by an accrediting body listed in (2)(a).
5. In addition to the above requirements, international students must show proficiency in written and spoken English in accordance with the provisions of University Regulation UCF-2.009.
6. All graduate applicants must indicate whether or not Florida residency is claimed. An application or residency affidavit
submitted by or on behalf of a student which contains false, fraudulent or incomplete statements may result in denial of admission or denial of further registration and/or invalidation of UCF credit.

7. Exceptions to the above requirements:
   a. In any academic term, up to 20 percent of the graduate students may be admitted in a given degree program as exceptions to the minimum requirements for graduate admissions as defined in paragraph (2) (b) & (c), above.
   b. Students who do not meet the admissions criteria and who wish to enroll in courses but not degree programs at the post-baccalaureate level may enroll under the classification of non-degree seeking students. Graduate programs wishing to admit these students to graduate degree programs after the students have satisfactorily completed up to nine hours of graduate course work may do so provided that the number so admitted is included as part of the 20 percent exception, as defined in paragraph (6)(a), above.

8. Applicants may appeal an admissions decision by following the university admissions appeal procedure. Information regarding this procedure is available in the Admissions section in the Graduate Catalog.

3. Doctoral Program Policies

Academic Integrity Training

Academic Integrity Training

All newly admitted graduate students must complete training designed to instill an awareness and understanding of the fundamental issues of ethics, academic integrity, and the responsible conduct of research (RCR) in a manner that is consistent with university guidelines. This required training includes:

1. For all graduate students: an online, asynchronous ethics course
2. For all doctoral students: two online, synchronous ethics/RCR workshops
3. Personal and Professional Integrity
4. Ethics and Research Integrity

Deadlines:

1. All graduate students must complete the online ethics course before the end of their first semester.
2. The synchronous ethics/RCR workshops must be completed in the student’s first two years (six semesters).

Graduate students who do not complete the online ethics course by their first semester will not be eligible to register for courses in their next semester.

A doctoral student who has not completed the required training in ethics and the responsible conduct of research within their first two years (six semesters) will not be eligible to register for courses in subsequent semesters.

Graduate programs may require additional training such as a Collaborative Institutional Training Initiative (CITI) training module in the appropriate disciplinary area.

Further information concerning the online module and workshop sessions may be found at Academic Integrity Training.

Candidacy

Admission to Candidacy

A student must demonstrate their readiness for the PhD program by successfully completing the candidacy examination before admission to full doctoral status and enrollment into dissertation hours. The Candidacy Examination should be taken when the student is nearing the end of coursework. The exam is administered by the members of the student's dissertation advisory committee or another appropriate committee appointed by the program. Admission to candidacy will be approved by the program director and the college coordinator and forwarded to the UCF College of Graduate Studies for status change. A student may only register for doctoral dissertation hours (XXX 7980) after admission to candidacy. Students must have passed candidacy and have the candidacy and dissertation advisory committee documentation received by the College of Graduate Studies by the date listed in the academic calendar to enroll in dissertation hours for that term.
Doctoral students admitted to candidacy are expected to enroll in dissertation hours and to devote full-time effort to conducting their dissertation research and writing the required dissertation document. Students in doctoral candidacy may be considered full-time if they enroll in at least three hours of dissertation coursework (XXX 7980). Students typically enroll in three hours of dissertation each semester until they have met the minimum number of dissertation hours required and have completed the dissertation. The minimum number of semesters required is two, with most dissertations requiring three to six semesters of full-time enrollment to complete. At no time may a student register for all 15 minimally required hours of dissertation (XXX 7980) in a single semester.

Candidacy Examination

The purpose of the Candidacy Examination is for the student to demonstrate a strong foundation of knowledge within the specific discipline, and the ability and preparation to conduct independent scholarly research. The committee may examine a broad range of appropriate capabilities, including theory, bibliography, research methodology, and the evaluation of preliminary research, when appropriate. The examination must have a written component; it also may include an oral defense of a written report or dissertation proposal. All written examination materials will be kept in the student's file in the program.

Conferral of Master's Degrees for Students in Doctoral Degree Programs

A student making satisfactory progress in a doctoral program may be eligible to be awarded a master's degree in the same discipline. Policies concerning these degrees can be found under Master's Program Policies.

To avoid confusion of terminology for examinations, all programs should use the following terms:

Qualifying Examination

Eligibility to continue a doctoral program should be limited to superior students who have demonstrated intellectual ability, high achievement, and adequate preparation for advanced study and research in a chosen field. The decision to allow a student continuing progress toward a doctorate is made by the graduate committee of the program area concerned on the basis of the qualifying examination (optional by programs) and/or other criteria as specified by the individual program area. This exam is normally given within the first year of the doctoral program. This is a written examination and is permanently filed in the student's records in the program. Programs have their own requirements as to how many times this exam can be repeated.

Candidacy Examination

This exam takes place prior to admission to Candidacy Status. This is a written examination and is permanently filed in the student's permanent records. It is normally taken near the end of completion of coursework and must be passed before being allowed to enroll in doctoral dissertation (XXX 7980) hours. Programs have their own requirements, which are explained in their graduate student handbooks, as to how many times this exam can be repeated.

Dissertation Proposal Examination

After passing the general Candidacy Examination, the student will write and defend a Dissertation Proposal in an oral examination. Programs have their own requirements as to how many times this exam can be repeated. All materials including the approved proposal and other agreements will be kept in the student's file in the program.

Dissertation Defense

This is an oral examination (or defense) of the dissertation.

Examination Committee

In some programs, a doctoral examination committee will be formed consisting of several faculty members representing the appropriate disciplines and approved by the Dean or college designee to administer qualifying and/or candidacy examinations. In many cases, this committee will consist of the program graduate committee. All members will evaluate and vote as to whether students have successfully completed the exams.

Course Requirements

The primary objective of doctoral study is to educate students to a point of excellence in conducting, disseminating, and applying scholarly research, with the explicit goal of making original, substantive contributions to their degree discipline. The advanced nature of doctoral education requires student participation, debate, evaluation, and discussion of diverse ideas and approaches. Careful analysis, independent research, and greater understanding and application of ideas are also expected.

The doctoral degree program requirements will consist of core and elective courses, seminars, directed and doctoral research, independent study, and dissertation research.

Each doctoral program of study will include a minimum of 72 semester hours of graduate credit beyond the baccalaureate degree or a minimum of 42 semester hours of graduate credit beyond the master's degree; these graduate credits must be taken as part of an approved graduate program of study. Some programs require considerably more than the minimum of 72 hours because of the nature of the discipline and the standards of the associated profession. All graduate credits in a doctoral program must be at 5000 level or higher.
At least one-half of the credit hours used to meet program requirements must be in 6000-level or 7000-level courses, including the allowed number of research and dissertation hours.

At least 50% of the credits offered for the degree are expected to be derived from a single field of concentration (that is, from one department). However, programs that are interdisciplinary in nature may be exempt from this policy upon approval from the Graduate Council Curriculum Committee.

Only graduate-level credit with a grade of "C-" or higher may be used to satisfy degree requirements.

A university-wide minimum of at least 27 hours of formal coursework exclusive of Independent Study (XXX 6908), dissertation and research is required for all doctoral programs; some programs require a greater number of formal coursework hours.

A university-wide minimum of at least 15 hours of dissertation credits is required for all doctoral programs, although some programs require a greater number of dissertation hours.

The dissertation hour requirements may only be satisfied by enrollment in dissertation hours.

Course Levels 6000- and 7000-Level Courses

A minimum of 36 credit hours (including courses taken in a master's program) must be in 6000-level and 7000-level courses, which are designed, respectively, for graduate students and doctoral students only. For students with waived hours from an earned master's, this amount is at least one-half of the program hours remaining after the waived hours are applied.

Dissertation Conflict of Interest (COI)

Because the purpose of the dissertation committee is to evaluate the quality of the student’s work, committee members should be unbiased and make their judgments solely on the merits of what is presented to them. Any real or perceived breach of professional ethics or the law risks undermining the integrity of the dissertation process, regardless of whether the conflict is personal, professional, or financial. As a result, any relationship that potentially creates the perception of bias among the student, major professor, and/or committee members should be avoided.

Personal relationships that may be perceived as a conflict, such as immediate family members or couples who are romantically involved, must be disclosed at the time of committee formation. Professional relationships that may be perceived as a conflict, such as a post-doctoral fellow serving on a committee chaired by his/her faculty supervisor, must also be disclosed. While both individuals in such relationships may serve on the committee, only one can be a voting member. This means that an additional member, in consultation with the student, committee chair, and graduate program director, must be appointed to the committee to meet minimal requirements.

Dissertation Requirements

Dissertations are required in all PhD programs. For EdD programs, some tracks require a dissertation, while others require a dissertation-in-practice (see the program information for a description of a dissertation-in-practice). The dissertation consists of an original and substantial research study designed, conducted, and reported by the student with the guidance of the Dissertation Committee. The written dissertation must include a common theme with an introduction and literature review, details of the study, and results and conclusions prepared in accordance with program and university requirements. The dissertation is expected to represent a significant contribution to the discipline. Since this work must be original, it is very important that care is taken in properly citing ideas and quotations of others. Failure to do so is academic dishonesty and subject to termination from the program without receiving the degree. An oral defense of the dissertation is required.

Enrollment in Dissertation Hours

The university requires all doctoral students to take a minimum of 15 credit hours of doctoral dissertation hours; however, specific programs may require more than this minimum. Dissertation research is considered to be a full-time effort, and post-candidacy enrollment in at least three doctoral dissertations (XXX 7980) credit hours constitutes full-time graduate status. Doctoral students who have passed candidacy and have begun taking doctoral dissertation hours (XXX 7980) must enroll in at least three dissertation hours each semester (including summers, without skipping a semester) and continue doing so until they complete and successfully defend the dissertation. Students wishing to enroll in fewer than 3 credit hours must have approval from their advisor. Students who need to interrupt their dissertation work for extenuating circumstances must submit a Leave of Absence Form to the College of Graduate Studies. Submission and approval of the form must be obtained prior to the first day of classes for the term of non-enrollment.

Dissertation Advisory Committee Membership

Doctoral students must have a Dissertation Advisory Committee prior to advancement to candidacy status. The Committee will consist of a minimum of four members who are approved members of the Graduate Faculty or Graduate Faculty Scholars (see Graduate Faculty). At least three members must be Graduate Faculty, one of whom must serve as the chair of the committee. One member must be from either outside the student’s department at UCF (or college, if a college-wide program) or outside the university. The Graduate Program Committee may specify additional advisory committee membership beyond the minimum of four. These additional advisory committee members must also be approved members of the Graduate Faculty or Graduate Faculty Scholars. Graduate Faculty members must form the majority of any given committee.

Committee membership must be approved by the program director and submitted to the College of Graduate Studies. All members must be in fields related to the dissertation topic. The UCF College of Graduate Studies reserves the right to review appointments to a dissertation advisory committee, place a representative on any dissertation advisory committee, or appoint a co-chair. A student may request a change in membership of the dissertation advisory committee with the approval of the program director and re-submission to the College of Graduate Studies.
All members vote on acceptance or rejection of the dissertation proposal and the final dissertation. The dissertation proposal and final dissertation must be approved by a majority of the committee.

Responsibilities of Members of Doctoral Advisory Committees

All members of the doctoral advisory committee have responsibilities. See the Graduate Faculty and Graduate Faculty Scholars Policy for this information.

Dissertation Preparation

Thesis and Dissertation (ETD) describes university requirements and formatting instructions for dissertations and outlines the steps graduate students must follow in order to submit their dissertations electronically to the UCF College of Graduate Studies. The Thesis and Dissertation Office offers online and face-to-face workshops to inform graduate students about procedures, deadlines, and requirements associated with preparing a dissertation. Students who have just passed Candidacy are strongly encouraged to visit the online workshop.

Dissertation students will submit their dissertations electronically. Electronic thesis/dissertation (ETD) submissions will be archived by the UCF library in digital format and will be more widely accessible. In addition, students may use video and audio clips as well as other formats that may be appropriate for their field of study.

All dissertations that use research involving human subjects, including surveys, must obtain approval from an independent board, the Institutional Review Board (IRB), for this prior to starting the research. Graduate students and the faculty that supervise them are required to attend training on IRB policies, so this needs to start well in advance of the research start date. It is imperative that proper procedures are followed when using human subjects in research projects. Information about this process can be obtained from the Office of Research (www.research.ucf.edu). Click on Compliance and the IRB Policy and Procedures Manual is available. In addition, should the nature of the research or the faculty supervision change since the IRB approval was obtained, then new IRB approval must be sought. Failure to obtain this prior approval could jeopardize receipt of the student's degree.

Students who wish to complete their degree requirements in a given semester must take their oral defense and submit their dissertation to the UCF College of Graduate Studies by the dates shown in the Academic Calendar.

Dissertation Defense

The dissertation defense is an oral presentation and defense of the written dissertation describing the student's research. The advisory committee will evaluate and judge the dissertation defense. Successful students must demonstrate that they are able to conduct and report original independent research that contributes substantially to the discipline in which they study. The defense is a formal academic requirement and should be accorded respect and dignity, and thus, no refreshments or other distractions should be served during the defense.

Dissertations will be approved by a majority vote of the Dissertation Advisory Committee. Further approval is required from the Dean or Dean designee and the UCF College of Graduate Studies before final acceptance of the dissertation in fulfilling degree requirements.

Graduate programs may elect to offer alternatives to face-to-face dissertation defense. Programs that choose to offer such alternatives must develop and ensure procedures for the implementation of the alternative defense process and procedures must be published in the program's handbook. These procedures should address the form and time for the student's request for an alternative defense and the process for seeking approval.

Review for Original Work

The university requires all students submitting a dissertation as part of their graduate degree requirements to first have their electronic documents submitted through iThenticate for advisement purposes and for review of originality. The dissertation chair is responsible for scheduling this submission to iThenticate and for reviewing the results from iThenticate with the student's advisory committee. The advisory committee uses the results appropriately to assist the student in the preparation of their dissertation.

Before the student may be approved for final submission to the university, the dissertation chair must indicate completion of the Review for Original Work through iThenticate by signing the Dissertation Approval Form.

Dissertation Embargo

Because it is essential for scholarly research conducted at a university to be widely disseminated, all UCF dissertations are published publicly via the Web. Under certain circumstances, students may embargo or delay the release of their work for limited periods of time. However, because embargoes suppress these works from public access, they should be used sparingly, and efforts should be taken to ensure that research conducted for a dissertation can be publicly disclosed. The assumption is that all dissertations can be released for public review upon submission.

The Dissertation Embargo Policy allows for embargoes of:

- Six (6) months (for patent purposes) or
- One (1) or two (2) years (for other proprietary or publishing reasons)

The request for a dissertation embargo must be submitted to the College of Graduate Studies no later than the filing the intent to graduate and all dissertation embargoes granted will be at the discretion of the College of Graduate Studies dean.

Students must have written permission from their dissertation advisory committee chair (as well as that of any others who have a relevant interest, e.g., funding sources) to request an embargo and submit proper justification validating the need for an embargo. Validation may include, but is not limited to, evidence of a pending patent application, evidence of the work being under review by a
peer-reviewed journal or for a conference presentation, funding agency request or non-disclosure agreement, and journal or publication policy statements prohibiting prior availability of a work.

Embargo extensions may be requested for extenuating circumstances. Embargo extension requests must be submitted to the College of Graduate Studies at least one month prior to the original embargo expiration date. Dissertations are automatically released for public dissemination upon expiration of all embargoes, after which time the work will remain permanently accessible online.

Public Access

Students, faculty, staff, and other interested parties are strongly encouraged to attend dissertation final defense sessions. Notices providing the date, time, and location of such meetings must be announced at least 2 weeks prior to the defense to all academic departments.

These sessions are educational and informative for graduate students and provide an opportunity for colleagues to observe the work of their peers with students. At the discretion of the Chair of the Committee, questions may be invited from the audience. That part of the session involving committee discussion leading to a vote on the acceptance of the work will be closed. Sessions may be recessed briefly to excuse visitors and the candidate before this stage begins.

Doctoral Admission Requirements

Eligibility for admission to a doctoral program is limited to superior students who have demonstrated intellectual ability, high achievement, and adequate preparation for advanced study and research in a chosen field.

Minimum university standards for admission can be found in the Doctoral Admissions section of the catalog. Meeting minimum university admission standards may not satisfy doctoral program admission requirements. Programs often require additional or higher criteria. See the Graduate Programs section of the catalog for specific program requirements.

Time Limitation and Continuous Enrollment

A student has seven years from the date of admission to the doctoral program to earn a doctoral degree. This is not affected by earning a master’s degree along the way.

Extenuating circumstances may arise that hinder a student’s progress towards program completion and the ability to maintain continuous enrollment. If such a need arises, the student may petition for a Special Leave of Absence. Leaves are considered for medical (e.g., illness, injury) or non-medical (e.g., family needs, military deployment) reasons.

Students should be proactive in maintaining accurate records with the university and petition for a Special Leave of Absence prior to the need. When this is not possible, students should do so promptly after the need arises. Students are required to complete and submit the Special Leave of Absence form with all relevant supporting documents.

Students may be granted a Special Leave of Absence for up to 6 consecutive academic terms (i.e. Fall, Spring, Summer). Course registration during the granted leave is not required. Time spent in a Special Leave of Absence that was granted Summer 2018 or later can add a maximum of 3 terms (1 academic year) to the total seven-year time limitation for degree completion:

**Special Leave of Absence Structure**

<table>

<td>3 terms</td>
</tr>
</tbody>
</table>

Students who do not maintain continuous enrollment without a Special Leave of Absence (see Continuous Attendance and Special Leave of Absence in the General Graduate Policies) or exceed the period allowed in the leave request must apply for readmission to the graduate program.

Readmission

Graduate students who do not maintain continuous enrollment (see Continuous Enrollment in the General Graduate Policies), must apply for readmission to the university. To do so, the student must complete a new online application. For more information about readmission, refer to the Admissions section in this catalog.

Readmission decisions are individually made, based on such factors as space in the program, reasons for the break-in graduate education, progress in the degree program, among others. Readmission is not guaranteed.
4. Education Specialist Programs Policies

Examinations

Educational Leadership majors must successfully complete one 5-hour examination in their major area and one 3-hour examination in an area of specialization. Curriculum and Instruction majors must successfully complete one 3-hour examination in their teaching specialty and one 3-hour examination in the Educational Foundations area. School Psychology (School Psychology Track) students must successfully complete one 3-hour examination during the last semester of enrollment.

Program of Study and Academic Standards

A program of study (i.e., required course work) will be specified by the student's program area and approved by the college. Minimal core requirements for the EdS degree consist of 36 hours beyond the master's degree, which must include a minimum of 12 graduate-level hours in the specialization area, 6 graduate-level hours in research/statistics, and additional core requirements that are specific to each of the EdS degrees. An approved program of study must be on file with the College of Graduate Studies by the end of the student's second major term. A Program GPA of 3.0 must be maintained in all graduate course work taken at UCF since admission into the specialist program. All academic standards which apply to master's students will also apply to specialist students.

Specialist Admission Requirements

Minimum university standards for admission can be found in the University Admissions Standards section of the catalog. Meeting minimum university admission standards may not satisfy Educational Specialist program admission requirements. Programs often require additional or higher criteria. See the Graduate Programs section of the catalog for specific program requirements.

Time Limitation and Continuous Attendance

The student has seven years from the date of admission (prerequisite, articulation, and foundation courses are exempt) to the specialist program to complete the degree. No course older than seven years, at graduation, may be used in the program of study for a specialist degree. Students who do not maintain continuous enrollment (missing enrollment at the university for a period of three consecutive semesters) must file for readmission to the university, although seven years is measured from when the student was first admitted to the program.

Readmission

Specialist students should maintain continuous enrollment in their degree program. Students who anticipate that they may not be able to enroll continuously due to external circumstances should apply for a Special Leave of Absence (see Special Leave of Absence in the General Graduate Policies section).

If specialist students do not apply for a Special Leave of Absence and do not maintain continuous enrollment (see Continuous Attendance in the General Graduate Policies section), they must file for readmission to the university. To file for readmission, the student must complete a new online Application. For more information about readmission, refer to the Admissions section of this catalog.

Readmission decisions are individually made, based on such factors as space in the program, reasons for the break in graduate education, progress in the degree program, among others. Readmission is not guaranteed.

UCF Education Specialist Programs Purpose

Education Specialist (EdS) degrees are awarded in Educational Leadership, Curriculum and Instruction, and School Psychology (which offers a track in School Counseling). The EdS degree provides an opportunity for professionals in leadership positions in an educational environment to receive in-depth academic study. This degree provides the opportunity for the development of a high level of professional proficiency in such areas as instruction, supervision, administration, curriculum, and current research literature. The primary goal of the EdS degree is teaching or acquiring professional proficiency in a specialized education-related area. Because the purpose of the EdS degree may differ from that of the EdD, credit earned in an EdS program is not automatically transferable to a doctoral program. Instead, if a holder of an EdS degree enters a doctoral program at a later date, the doctoral advisory committee will decide how much of the credit earned in the EdS program will be credited toward the doctorate. In any case, only 30 hours taken prior to doctoral status may be transferred into the doctoral program of study.
5. Master’s Program Policies

Accelerated Undergraduate and Graduate Programs

Some programs combine undergraduate and graduate course work in a more seamless educational experience for students, reducing the time spent working on both degrees and providing a challenging educational experience to outstanding undergraduates. These accelerated bachelor's and master's (4+1) programs usually will allow students to complete a bachelor's and master's degree within about five years and are intended for only the most highly qualified undergraduate students.

While students are classified as undergraduate students, they are subject to undergraduate policies. Similarly, when classified as graduate students, they are subject to graduate policies and may qualify for graduate financial support.

The undergraduate requirements listed in the Graduate Catalog for specific programs are for informational purposes only. The official requirements are detailed in the Undergraduate Catalog and take precedence over what is described here.

Advisement

Appointment of Committee or Advisor

An academic advisor and advisory committee is required when the student is enrolled in a thesis option and can be useful when there is substantial flexibility in course work. It is the responsibility of the department to appoint an advisor and advisory committee.

Conferral of Master's Degrees for Students in Doctoral Degree Programs

A student making satisfactory progress in a doctoral program may be eligible to be awarded a Master's degree in the same discipline. The Master's degree program and the College of Graduate Studies have the authority to determine whether the doctoral program credits satisfactorily fulfill the Master's degree requirements. All requirements for the Master's degree must be fulfilled, including passing all examinations and submitting a thesis, if so required. Up to a maximum of 9 graduate credit hours of substitutions are allowable, provided that the substitutions are higher-level courses for their precise lower-level counterparts, exclusive of substitutions for thesis hours.

In such cases:

1. The program requirements for the Master's degree are governed by the requirement term used for the doctoral degree program.
2. The two degrees are not considered to be part of a formal "dual degree" program and, therefore, are not subject to the policies governing dual degree programs.
3. Courses credited towards the Master's degree are not implemented as transfer credits to another program and therefore fall outside of the transfer credit policy.

The general restriction that no credit hours may be counted for more than two-degree programs applies to these Master's degrees as well. Credits from a previously earned Master's degree may not be used to fulfill the requirements of a Master's degree for a student in a doctoral degree program (a "Master's along-the-way").

Course Requirements

The program requirements for a master's degree may include core and elective courses, seminars, independent study, clinical courses, directed research, and thesis research.

A minimum of 30 semester hours of post-baccalaureate, graduate work (5000-level or higher) is required and must be taken as part of an approved graduate program of study. Some programs require more than the minimum of 30 hours because of the nature of the discipline and the standards of the associated profession.

At least half of the credit hours used to meet program requirements must be at the 6000 level.

Only graduate-level work with a grade of "C-" or higher may be used to satisfy degree requirements.

For the master's degree, at least 24 semester hours of core and elective courses must be earned exclusive of thesis and research.

In no case will the number of thesis hours in excess of the amount required by a program be counted toward degree completion.

At least 50% of the credits offered for the degree are expected to be derived from a single field of concentration (that is, from one department). However, programs that are interdisciplinary in nature may be exempt from this policy upon approval from the Graduate Council Curriculum Committee.

A research report, capstone course, comprehensive exam, or other culminating experience that demonstrates that graduate students have engaged in independent learning is required in a nonthesis option master's program. An explanation of how the
cogulating experience promotes independent learning is required in each program's curricular description. A thesis hour requirement may only be satisfied by enrollment in thesis hours. In the case where a student changes from a thesis to a nonthesis option, up to 6 thesis hours may be used to substitute for other research hours.

Independent Study Hours

Independent study (XXX 6908) may be taken for a total of no more than six semester hours.

Residence Credit

The master's degree program must include at least 21 semester credit hours taken at UCF. Residence credits may be earned through enrollment in courses physically offered on the main campus; or at the UCF regional campuses (Brevard, Daytona Beach, and Downtown); or at geographical locations where UCF courses are being taught by regular UCF faculty members. Residence credits may also include UCF courses offered through the web or courses taken as a Traveling Scholar if prior approval is obtained.

Master's Admission Requirements

Minimum university standards for admission can be found in the University Admission Standards section of the catalog. Meeting minimum university admission standards may not satisfy master's program admission requirements. Programs often require additional or higher criteria. See the Graduate Programs section of the catalog for specific program requirements.

Other Academic Requirements

Comprehensive Culminating Experience

An appropriate culminating academic experience is required of all master's degree students. It may include a thesis defense, written or oral examination, research report, capstone course, presentation and defense of a portfolio of student work, or other appropriate scholarly activity of a type that has been approved by the Graduate Council that demonstrates that graduate students have engaged in independent learning. An explanation of how the culminating experience promotes independent learning is required in each program's curricular description.

Senior Scholars

UCF undergraduates who meet departmental eligibility requirements may enroll in UCF graduate courses and use them toward their undergraduate degree and their graduate program of study upon admission to a UCF graduate program. As Senior Scholars, they are entitled to use up to nine graduate credit hours (more may apply for some accelerated programs) toward a UCF graduate degree or certificate, provided they have received advisement and written approval to do so from the graduate program director. This permission must be obtained before enrolling in the graduate courses. In addition to approval from the graduate program director, undergraduates must consult their undergraduate adviser to ensure that registration in graduate-level course work will meet their bachelor's degree requirements. The student must receive college and university approval to interrupt the residency requirement. The University Waiver Form can be obtained from the undergraduate department office. Tuition and fees for graduate-level courses are different from undergraduate courses, and it is the student's responsibility to consult with the Office of Student Financial Assistance (http://financial.ucf.edu) regarding adjustments that might be needed for Bright Futures and other scholarship funding.

Thesis Requirements

The thesis is the culminating or comprehensive experience for those who conduct an original research study as part of a thesis-option program. The thesis consists of a common theme with an introduction and literature review, details of the study, and results and conclusions. Since the work is original, it is very important that care is taken in properly citing ideas and quotations of others. Academic dishonesty in a thesis, research report, and dissertation work may result in termination from the degree program.

An oral defense of the thesis is required. The approved thesis must be written and prepared in accordance with the program, college, and university requirements. Thesis and Dissertation (ETD) describes university requirements and formatting instructions for theses and outlines the steps that graduate students must follow in order to submit their theses electronically to the UCF College of Graduate Studies.

Additionally, the Thesis and Dissertation Office offers workshops to inform graduate students about procedures, deadlines, and requirements associated with preparing a thesis.

Thesis students are required to submit their thesis electronically. Electronic thesis/dissertation (ETD) submissions are archived by the UCF library in a digital format that is widely accessible. The electronic thesis may include video and audio clips as well as other formats that are appropriate for the field of study.

2023-2024 Graduate Catalog
All theses that use research involving human subjects, including surveys, must obtain approval from an independent board, the Institutional Review Board (IRB) prior to starting the research. Graduate students and the faculty who supervise them are required to attend training on IRB policies, so this needs to start well in advance of the research start date. It is imperative that proper procedures are followed when using human subjects in research projects. Information about this process can be obtained from the Office of Research (www.research.ucf.edu). Click on “Compliance” and the IRB Policy and Procedures Manual is available. In addition, should the nature of the research or the faculty supervision change since the IRB approval was obtained, new IRB approval must be sought. Failure to obtain this prior approval could jeopardize receipt of the student's degree.

Students who wish to complete their degree requirements in a given semester must take their oral defense and submit their final electronic copy to the UCF College of Graduate Studies by the dates shown in the Academic Calendar.

Thesis Advisory Committee Membership

A student writing a thesis must have a Thesis Advisory Committee consisting of at least three members who are approved members of the Graduate Faculty. This committee will recommend to the Dean of the college regarding the student's program of study, provide continual guidance for the student, and be the principal mechanism for the evaluation of the student's thesis and performance in any general examinations. At least two members of the Thesis Advisory Committee must be Graduate Faculty, one of whom must serve as the chair of the committee. Graduate Faculty Scholars may serve as a member or co-chair of a thesis advisory committee but may not serve as the chair.

Program areas may specify additional committee membership beyond the minimum of three. These committee members must also be approved members of the Graduate Faculty or Graduate Faculty Scholars. Graduate Faculty members must form the majority of any given committee. Additional information regarding the criteria for serving as a member, co-chair, or chair of a Thesis Advisory Committee is provided in the updated Graduate Faculty policy.

Committee membership must be approved by the program director and submitted to the College of Graduate Studies. All members must be in fields related to the thesis topic. The UCF College of Graduate Studies reserves the right to review appointments to a Thesis Advisory Committee, place a representative on any Thesis Advisory Committee, or appoint a co-chair. A student may request a change in membership of the Thesis Advisory Committee with the approval of the program director and re-submission to the College of Graduate Studies.

All committee members vote on acceptance or rejection of the final thesis. The thesis proposal and final thesis must be approved by a majority of the committee.

Responsibilities of Members of Thesis Advisory Committees

All members of the doctoral advisory committee have responsibilities. See the Graduate Faculty and Graduate Faculty Scholars Policy for this information.

Enrollment in Thesis Hours

After completion of other course requirements, master's level students may be considered full-time if they enroll in at least three credit hours of thesis (XXX 6971) hours only. Students enrolled in thesis hours simultaneously with coursework hours must be enrolled in a combined nine credit hours to be considered full time for the fall and spring semesters, or six credit hours to be enrolled full time in the summer semester.

Thesis Defense

The thesis defense is an oral presentation and defense of the written thesis describing the student's research. The advisory committee will evaluate and judge the thesis defense. The defense is a formal academic requirement and should be accorded respect and dignity, and thus, no refreshments or other distractions should be served during the defense.

Thesis defenses will be approved by a majority vote of the Thesis Advisory Committee. Thesis committee members who do not approve of the thesis may choose not to sign the thesis approval sheet. Further approval is required from the Dean or Dean designee and the UCF College of Graduate Studies before final acceptance of the thesis in fulfilling degree requirements.

Graduate programs may elect to offer alternatives to face-to-face dissertation defense. Programs that choose to offer such alternatives must develop and ensure procedures for the implementation of the alternative defense process and procedures must be published in the program's handbook. These procedures should address the form and time for the student's request for an alternative defense and the process for seeking approval.

Review for Original Work

The university requires all students submitting a thesis as part of their graduate degree requirements to first have their electronic documents submitted through iThenticate for advisement purposes and for review of originality. The thesis chair is responsible for scheduling this submission to iThenticate and for reviewing the results from iThenticate with the student's advisory committee. The advisory committee uses the results appropriately to assist the student in the preparation of their thesis.

Before the student may be approved for final submission to the university, the thesis chair must indicate completion of the Review for Original Work through iThenticate by signing the Thesis Approval Form.

Thesis Dissemination

While UCF respects the wishes of students who would like to publish their work and/or apply for patents, it is essential for scholarly research conducted at a university to be available for dissemination. While several options are available for the release of an ETD, it is the goal of the university that all theses be available through the UCF Libraries catalog. Upon uploading the final ETD to the UCF Libraries ETD website, students, in some cases with their advisers, must choose one of the options for the availability of their ETD through UCF. Students with potential patent concerns are required to discuss the following options with their thesis adviser and indicate
the availability choice on the Thesis and Dissertation Release Option electronic form, which the student submits in the myUCF Student Center.

For those with no patent or copyright concerns:

Immediate worldwide dissemination with no restrictions.

For those who have patent issues dissemination options must be discussed and agreed to with your adviser. Choices are:

Pending dissemination of the entire work for six months for patent or other proprietary issues, with an additional six months extension available. Once the patent and proprietary issues are resolved, then immediate worldwide dissemination with no restrictions.

Pending dissemination of the entire work for six months for patent or other proprietary issues, with an additional six months extension available. Once the patent and proprietary issues are resolved, choosing this option allows the student to make the thesis available to the university community for the period chosen below, and then for it to be distributed via the Web beyond that time.

- one year
- three years*
- five years*

For those who have copyright concerns dissemination options are a student decision within the guidelines of individual departments that may have requirements for dissemination. If a department has no guidelines for dissemination, then students are free to choose one of the options below. In general, those in the sciences and engineering will choose one year while students in the arts and humanities may choose longer. Choosing this option allows the student to make the thesis available to the university community for the period chosen below, and then for it to be distributed via the Web beyond that time.

- one year
- three years*
- five years*

*Does not require thesis advisor signature and approval.

Public Access

Students, faculty, staff, and other interested parties are strongly encouraged to attend thesis final defense sessions. Notices providing the date, time, and location of such meetings must be announced at least 2 weeks prior to the defense to all academic departments.

These sessions are educational and informative for graduate students and provide an opportunity for colleagues to observe the work of their peers. At the discretion of the Chair of the Thesis Advisory Committee, questions may be invited from the audience. That part of the session involving committee discussion leading to a vote on the acceptance of the work will be closed. Sessions may be recessed briefly to excuse visitors and the candidate before this stage begins.

Time Limitation for Degree Completion

The student has seven years from the date of admission to the master's program to complete the degree. Students may transfer in coursework according to the Transfer of Credit policy, however, courses older than seven years at the time of admission will not be transferred into the student's Program of Study.

Students who anticipate being out for an extended period of three consecutive semesters or longer should apply for a Special Leave of Absence no later than the end of the add/drop period of the third semester of absence. Students who do not maintain continuous enrollment without a Special Leave of Absence (see Continuous Attendance and Special Leave of Absence in the General Graduate Policies) must file for readmission to the university, although seven years is measured from when the student was first admitted to the program.

Readmission

Master's students should maintain continuous enrollment in their degree program. Students who anticipate that they may not be able to enroll continuously due to external circumstances should apply for a Special Leave of Absence (see Special Leave of Absence in the General Graduate Policies).

If master's students do not maintain continuous enrollment and have not filed for a special leave of absence (see Continuous Attendance in the General Graduate Policies), they must file for readmission to the university. To file for readmission, the student must complete a new online application. For more information about readmission, refer to the Admissions section of this catalog.

Readmission decisions are individually made, based on such factors as space in the program, reasons for the break-in graduate education, progress in the degree program, among others. Readmission is not guaranteed.

6. Graduate Certificate Program Policies

1. UCF Graduate Certificate Policies Overview
BOG Regulation 8.011 (7)(b) defines a certificate program as “an organized curriculum of college credit courses offered as a distinct area of study that leads to specific educational or occupational goals, and for which the university awards a certificate, diploma, or similar form of recognition upon completion.” Similarly, SACS-COC Comprehensive Standard 3.4.4 refers to “certificates or other professional education outside a collegiate degree program.” Put more simply, graduate certificate programs are a way for universities to provide the latest disciplinary knowledge in a focused format that allows for the professional development of individuals who desire further education.

A graduate certificate program offers a short-term study that provides specialized knowledge that supplements an existing degree. Graduate certificate programs are particularly helpful to those professions where licensure and continuing professional development are required. Many of UCF’s graduate certificate programs are offered online for convenience. One of the most important benefits of graduate certificate programs is that they are taught by our graduate faculty, using regular graduate courses at the university.

Many persons in the greater Central Florida area have graduate degrees that could be enhanced with additional, specialized groups of courses; similarly, many have undergraduate degrees and work in settings where advanced knowledge in specific areas would be valuable and valued. Frequently, a package of specialized courses that forms a certificate will increase employment credentials, lead to career enhancement, and produce more income. These certificate programs should be current and provide specialized, state-of-the-art content. Often certificate programs use flexible and non-traditional delivery systems to provide the best service to the employees and employers in this metropolitan area. Distributed learning, weekend courses, evening courses, and accelerated term courses can be part of certificate programs.

Certificate programs are often ideal for nondegree-seeking graduate students who would like to sample graduate courses before committing to a graduate degree program. Certificate programs may round out a graduate degree program, providing a special emphasis that supplements a graduate degree. Frequently, a certificate program can provide an interdisciplinary focus that provides more depth and understanding to an existing graduate program.

Any academic unit may propose a graduate certificate program that encompasses graduate courses in its graduate program. If an interdisciplinary certificate program is proposed, it must be acceptable to departments and faculty offering the courses and graduate programs on which the certificate program is based.

2. General Policies Relevant to All Graduate Certificate Programs

As indicated above, certificates are conceptualized to be organized packages of courses that provide specialized instruction. To that end, certificates should entail a minimum of 9 credit hours. Certificates requiring more than 18 hours are only approved with justification. All certificate programs must have at least one course required of all students who earn the certificate. Because of the limited and focused nature of the certificate program, course substitutions are not allowed. Students must take the full number of units required for the certificate they are seeking. If there is overlap between two or more certificate programs in which a student is enrolled, the student must complete the total required hours by taking electives as approved by the certificate program.

For a certificate to be awarded, a student must have a GPA of 3.0 or better. Each certificate GPA will be computed separately from other degree program GPAs and from other certificates. Only grades of B- or better can be counted towards a certificate. Students who earn a grade below a B- may retake that course or another course (as approved by the certificate program director) from those available within the certificate program. However, grades for all courses that fall within the certificate program will be used in the calculation of the certificate GPA. Certificate program faculty may elect to dismiss a student for poor grades consistent with the policy for dismissal for poor grades in their department or graduate program. All courses used to meet certificate requirements must be taken at UCF. No courses taken any longer than 7 years before the semester of certificate conferral can be used to meet requirements of a certificate program. Grounds for graduate program-recommended probation or dismissal (e.g., plagiarism, unprofessional or unethical behavior) will be grounds for probation or dismissal from a certificate program. An exception to the two uses of a course is only allowed for three uses by Senior Scholars taking graduate courses towards their undergraduate degree program and using them towards one future graduate degree program and one graduate certificate.

3. Certificate Program Admission Requirements

Certificate Program Admission Requirements: Students currently enrolled in a graduate program

Students already enrolled in a graduate degree program must also apply for admission to each certificate program they desire, pay the application fee, and be admitted to the certificate program. Applications for admission to a certificate program can be submitted any time while the student is enrolled, even after the requirements for the certificate have already been completed. As noted above, a graduate program certificate GPA will be computed for each certificate being requested; this GPA may be different from the overall graduate degree program GPA. A graduate certificate GPA of at least 3.0 must be obtained to be awarded the certificate. All certificates must be earned and applied for while the student is still enrolled in a graduate degree program. In other words, no completed certificate can be conferred after a student has graduated, withdrawn, or been dismissed from a graduate degree program.

Certificate Program Admission Requirements: Students not currently enrolled in a graduate program

Students not currently enrolled in a graduate degree program (i.e., non-degree seeking students) are eligible to apply to graduate certificate programs. Students who are not enrolled in a graduate degree program at the time of application for graduate certificate student status do not need to meet a minimum bachelor’s degree GPA requirement. In other words, students may be admitted as graduate certificate students with undergraduate GPAs below 3.0. In addition, individuals who already have completed master’s, or doctoral degrees also are eligible to apply to a certificate program. To apply to be a “graduate certificate student,” the applicant must submit an online admissions application, pay the application fee, and submit an official transcript showing an earned bachelor’s or higher degree from an accredited institution recognized by UCF or a recognized foreign institution. On the online application, the applicant must designate the certificate program that they wish to complete. Students must submit the application and obtain formal admission to the graduate certificate program before they complete 9 hours of the certificate and, once admitted, will be classified as a “graduate certificate student.” Some graduate certificate programs have limited access, so admission is not guaranteed. Admitted students must complete the certificate requirements listed in the Graduate Catalog for their admit term in the certificate program.
Admission to a certificate program does not guarantee admission to a graduate program. However, once admitted into a master’s, specialist, or doctoral graduate program, credits from completed UCF certificate programs may be transferred into the graduate program with the consent of the program, with the caveat that courses cannot be used for more than one degree and one certificate. All other Transfer of Credit policies apply.

Non-degree students enrolled in a certificate program are generally not eligible for tuition support, assistantships, or fellowships and may not be eligible for federal financial aid. A list of programs for which tuition support or federal financial aid can be used is here.

4. Time Limitation for Certificate Completion and Readmission

The student has seven years from the date of admission (prerequisite, articulation, and foundation courses are exempt) to the certificate program to complete the certificate. In addition, no course older than seven years at the time of graduation may be used in the Program of Study for a certificate.

Students who anticipate being out for an extended period of three consecutive semesters or longer should apply for a Special Leave of Absence no later than the end of the add/drop period of the third semester of absence. Students who do not maintain continuous enrollment without a Special Leave of Absence (see Continuous Attendance and Special Leave of Absence in the General Graduate Policies) must file for readmission to the university, although seven years is measured from when the student was first admitted to the program.

Readmission

Readmission decisions are individually made, based on such factors as space in the program, reasons for the break-in graduate education, progress in the certificate program, among others. Students who are readmitted must complete the graduate certificate requirements listed in the catalog year they are readmitted. Readmission is not guaranteed.

5. Completion of Graduate Certificate

For the certificate to be conferred, students who have obtained formal admission into the graduate certificate program must file an intent to graduate with the certificate. Students may file an intent to graduate in the semester in which they are completing the final certificate course requirement or later if they are enrolled in a graduate degree program.

Students must complete the online Intent to Graduate Form by logging into myUCF and navigating to the Student Self Service > Student Center > Other Academics > Intent to Graduate: Apply. Students will only be processed for completion of a graduate certificate if they have previously submitted a certificate application form, have been formally admitted to the program, and have filed an intent to graduate.

6. Development of New Certificate Programs

Colleges, departments, programs, or other units wishing to develop new certificate programs should utilize the procedures for development of new programs within the Graduate Curriculum committee. Certificates can represent a single discipline or be interdisciplinary in nature. Each certificate program must have a director and at least one course required of everyone who obtains it.

Certificate programs will be reviewed at least every 5 years to determine interest, enrollment, and relative success. Programs that fail to confer certificates for three years or more may be subject to being discontinued. New certificate programs may apply for an extension to the review period to determine whether a certificate stays.

7. International Graduate Student Policies

English-speaking Ability for Graduate Teaching Associates and Assistants

Students who plan to serve as graduate teaching associates or assistants (GTAs) and for whom English is a second language are required to pass the Versant English test. The Versant English test evaluates an individual’s English-speaking skills. This requirement applies to all students from countries where English is not the native language; however, such students will be exempt if they have completed a previous degree from an accredited U.S. college or university recognized by UCF, from a country where English is the only official language, or from a university at which English is the only official language of instruction, or they have received a score of 26 or higher on the Speaking portion of the ibt TOEFL. Only exempted students and those who have attended the UCF GTA Training and satisfactorily passed the evaluation of their English-speaking skills may be assigned as GTAs.

For more information about this requirement and the free English-speaking training that the university provides, see English-speaking Ability for Graduate Teaching in the Assistantships section of this graduate catalog and https://graduate.ucf.edu/graduate-teaching/. See Graduate Teaching in the UCF Graduate Student Handbook for Information on registering for GTA Training and Versant English testing.

Full-time Enrollment Requirements

2023-2024 Graduate Catalog
A full-time degree-seeking graduate student must take at least 9 credit hours in the fall and spring semesters. A half-time load is defined as enrolled in at least 4.5 credit hours in fall and spring terms. During the summer term, full-time is 6 credit hours and half-time is 3 credit hours. There are two exceptions to this policy:

1. For master's students pursuing a thesis option, full-time enrollment is defined as 3 hours per semester (including summers, without skipping a semester) of thesis coursework (XXX 6971), after completion of all coursework and until graduation. Students who wish to enroll in part-time hours should consult their adviser.

2. For doctoral students who have passed the candidacy exam and are registered for doctoral dissertation (XXX 7980) hours only, full-time is 3 hours per semester until graduation. Such students must continue to enroll in at least three dissertation hours each semester (including summers, without skipping a semester) until they successfully complete the dissertation and graduate. Students who wish to enroll in part-time hours should consult their adviser.

Graduate students receiving assistantships, tuition support, and fellowships must be enrolled full-time as degree-seeking students who maintain good academic progress.

Special Considerations

All international students on F or J visas must maintain full-time, degree-seeking status regardless of financial support received from the university. F and J visa holders should contact UCF Global to ensure that their enrollment conforms to the full-time definition of their visa status. International students should not change their course schedule or drop classes without advisement from the UCF Global. All international students who enroll in less than 9 hours per term must submit to UCF Global a Reduced Course Load Form that explains the nature of the reduced hours and must obtain approval from UCF Global (see https://global.ucf.edu/ for Reduced Course Load Form). This requirement also applies to international students who are enrolled in less than 9 hours per term in thesis or dissertation hours.

Students who do not satisfy these full-time enrollment requirements will not qualify for graduate assistantships, fellowships, or tuition support.

International Student Employment

According to U.S. Citizenship and Immigration Services (USCIS) regulations, graduate students who are on an F-1 or J-1 visa may accept employment on campus without prior USCIS approval as long as students are enrolled full-time and employment does not interfere with their studies.

Graduate students who desire to engage in off-campus employment must be approved by the UCF Global for Curricular Practical Training (CPT) prior to beginning the employment. CPT is defined as employment that is an integral part of the established curriculum and can be in the form of an internship or cooperative educational experience. In order to qualify for CPT, there are several requirements that must be met. Please speak with an adviser at the UCF Global for more information on these requirements and prior to engaging in off-campus employment.

During the fall and spring semesters, on-campus employment is limited to no more than 20 hours per week while school is in session. During the summer, on-campus employment may be up to 40 hours per week. (Please note that all graduate assistants during the summer must enroll in a full-time course load.) Employment may also be up to 40 hours per week during vacation or other break periods. Please speak with an adviser at the UCF Global for clarification of these policies.

On-campus employment is not permitted after completion of the program of study unless the student is issued a Form I-20A-B to begin a new program and intends to enroll in the next regular academic term or session.

Students who received a bachelor's degree at one school and will start a master's degree or PhD at UCF are eligible to work during the summer at UCF as long as a Form I-20A-B was issued for the new masters or PhD program.

International students on an F-1 visa are eligible to apply for one year of optional practical training (OPT) after completion of their program.

For more information about the employment of international students, contact the UCF Global at (407) 823-2337 or visit the office to speak with an advisor.

International Visiting Scholars

The following policy and procedures allow departments to invite international visitors to study, teach, or participate in research activities at UCF. The policy is directed to those who do not wish to earn a degree, but who may audit courses in the postbaccalaureate, nondegree-seeking status for professional development and who normally have complete financial support provided by some outside agency. These visiting scholars will have J-1 visa status and use the Professor, Research Scholar, or Specialist category as permitted by immigration regulations. Visitors seeking degrees will use regular UCF admission procedures and must enter the United States using the F-1 or J-1 visa student category.

Visiting scholars who are required to audit courses at UCF must fill out the UCF application for admission as a nondegree student and pay the application fee. The deadline is about four months before the beginning of a term. A faculty member, as Faculty Sponsor, must accept the responsibility for recommending, advising, and directing the activities of the scholar. The procedure for extending an invitation to a prospective scholar is as follows:
1. If financial support will be provided to the visiting scholar using university resources, then the approval of the university must be obtained on all correspondence with the visiting scholar. Written arrangements should be made with the Vice President for Research for financial support prior to invitations to visiting scholars.

2. The Department Chair will submit a recommendation to the Dean specifying the Faculty Sponsor, documenting anticipated activities, and providing the following information on the Visiting Scholar:
   - Date of birth
   - City and country of birth
   - Country of residence if different from country of birth
   - Place of work (academic institution, business firm, etc.)
   - Current position held in country of residence
   - Academic background
   - Professional experience
   - Source and amount of financial support (recommended honorarium, if any)
   - English proficiency
   - Dates of visit
   - Statement of how the Visiting Scholar will participate in research and what will be accomplished
   - Office space, equipment, etc. which will be required for scholar's use

3. If arrangements are approved, the Dean will notify the Vice President for Research that the College is extending an invitation. The Chair's recommendation will be included with the notification. These will be sent to the UCF College of Graduate Studies so that the invitation and application may be placed in the visiting scholar's official university file.

4. The UCF College of Graduate Studies will then forward copies of the information to the UCF Global. Upon receipt and verification of the required documents, a Form DS-2019 for the purpose of the J-1 visa application J-1 Visa will be issued.

5. The Faculty Sponsor will then correspond with the visitor detailing the conditions of the visit, including whatever limited financial support and facilities will be provided and what is expected of the Scholar, with copies of this correspondence sent to the UCF Global and the Vice President for Research. The Scholar will be asked to write a brief report at the termination of the visit.

6. All visiting scholars should report to the UCF Global directly upon arrival at UCF to ensure that their immigration documents are in order.

During each academic term of the visit, the Visiting Scholar may be required to audit one hour of XXX 6918, Directed Research, under the direction of the Faculty Sponsor and also may be permitted (or required) to audit regular courses. The Visiting Scholar will be admitted to postbaccalaureate status and will audit courses as directed and approved by the Faculty Sponsor. The Visiting Scholar will not be permitted to take courses for credit unless formally admitted to a degree program or upon written approval from the Dean of the college in which the student is studying.

The international visiting scholar will be appointed Visiting Research Scholar or Visiting Scholar in the College and may be given a modest honorarium. Such scholars will normally not be maintained on the College payroll, but are expected to have extended financial support.

**Linkage Agreements**

The State of Florida has established various linkage agreements to assist in the development of stronger economic and social ties between Florida and strategic foreign countries. Linkage Institutes are set up throughout the state and provide out-of-state tuition exemption to scholars from the foreign countries represented by the institutes. To participate in these exemptions, students must apply to the Linkage Institute for the country in which they reside to receive an out-of-state tuition award. Students participating are required to return home after their tenure of graduate study for a length of time equal to the exemption period. Each institute develops its own criteria for selection of students and typically supports the out-of-state fees for about 20 to 30 scholars a year. The institutes established in Florida are listed below with their contact persons.

Academic Regulations and Procedures

Late Add Policy

A late add is considered when a student is unable to add a course(s) by the add deadline as outlined in the Academic Calendar. It is reserved for an unavoidable delay in adding a class or an administrative error in the registration process or advising. With instructor approval, a late add can be requested by a program representative on behalf of a student. A late add is not approved beyond the second week of classes unless there are well-documented extenuating circumstances and instructor approval.
