A variation of the technology that teaches fighter pilots how to outfly supersonic foes is being put to work at UCF to help public school teachers diagnose learning difficulties and individualize instruction so that even problem learners might take off like academic "top guns."

Researchers in UCF's Institute for Simulation and Training (IST) and College of Education are building an experimental "classroom of the future" employing such advanced computer hardware, artificial intelligence software and interactive simulation and training techniques that only the U.S. military has benefited from the technology in the past.

The equipment, according to Dr. Kent Williams, IST project manager, reduces administrative and testing burdens that consume so much teachers' time and allows them to concentrate on individual instruction tailored to any student's particular needs.

"In our experimental classroom, our technology is centered on the individual learner," says Williams, a cognitive psychologist. "We're identifying individual roadblocks to learning through continuous computerized interaction with the student. The technique can be applied to mathematics, English or any other formal academic subject in much the same manner it is used to teach officers how to fly jet aircraft and to operate submarines."

According to Williams, a prototype classroom utilizing off-the-shelf commercial hardware can be operational at UCF within the next three years. It would be the nation's first "intelligent tutoring system" designed for classroom use -- a real world equivalent of the fanciful Star Wars robots R2D2 and C3PO teaching submarine.

The UCF Report, Wednesday, May 31, 1989
Giant murals decorate walls of $10 billion Jersey complex

Two 40-foot murals by University of Central Florida art professor Walter Gaudnek have been chosen for permanent display in a $10 billion complex under construction on the Jersey City waterfront.

The art reflects the 350-year history of the area, from early Dutch settlements to the 20th century. Using stylized and colorful depictions of indians, colonial carvers and drums, steam engines, river traffic, industry, and symbols of American life in deep reds, blues, whites and yellows, Gaudnek has created canvases of striking vigor.

The Newport community, conceived and conceived by the future, will cover 500 acres. When completed in the mid-90s, it will consist of 4.1 million square feet of commercial and office space, 6,000 apartments, over one million square feet of retail space, a marina, and 1,500 room hotel and convention center.

Gaudnek's murals have been placed in the 3-story glass-walled lobby of Newport Office Center I, which looks out over the Hudson River towards the World Trade Center.

"When I conceived the idea of Newport," said the artist, "I wanted to make a statement with art as well as with brick and mortar. I turned to Mr. Gaudnek, who has created the appropriate tapestry to the new complex.

Gaudnek's murals were painted in the 3-story glass-walled lobby of Newport Office Center I, which looks out over the Hudson River towards the World Trade Center.

Pulitzer winner to read poetry at UCF June 14

Harry Taylor, whose collection entitled "The Flying Change," was awarded the 1985 Pulitzer Prize in poetry, will present a reading from those works at UCF on June 14. He will appear at noon in the Administration Building Room 110.

In "The Flying Change," Taylor dwells on ways common occurrences often reveal unexpected meanings. For the most part the meanings have to do with death, the ineffable and perception.

Taylor has taught at several universities, and currently serves as co-director of the MFA program in creative writing at The American University, where he has taught literature since 1976. In addition to the Pulitzer prize, he has twice been awarded fellowships by the National Endowment for the Arts.

His appearance at UCF is sponsored by the Atlantic Center for the Arts, New Smyrna Beach, as part of its Master Artists Outreach Program.

Welcome Aboard!

Jasmine F. Matley (administrative secretary/Dean's Office/Education) was born at Fort Ord, CA, and now lives at Titusville. Husband, Douglas, works at FSEC and they have a daughter, Marjorie, 9, who attends the Creative School. Her hobby is relaxing at home with a good book.

James T. McCully (electronic technician II/Instructional Resources) is currently out of the Air Force and attended the Community College of the Air Force. A native of Hollywood, FL, he lives at Orlando, and has a daughter, Jessica. His hobbies run to jogging, fishing and airplanes.

Jay Herring (physician's assistant/Health Center) has worked for Cigna at University Hospital of Jacksonville and he currently resides in Tallahassee. Born in Tallahassee, he earned a BA degree at Chipola Junior College, Marianna, a BS at the University of Florida and a Master of Medicine from the University of Florida. His hobbies include jogging and playing tennis.

Act quickly, think slowly...Greek proverb

Back to school

Three Physical Plant workers are better prepared to maintain safe measures on campus since completing a fire alarm systems review workshop. Michael Vess and Philip Therrien, maintenance mechanics, thank Larry Simmons, center, engineering technician III, who also attended an automatic sprinkler seminar. Both courses were sponsored by the National Fire Protection Association.

The three are shown with Anthony Blass, Physical Plant director, left, and Dick Paradise, associate director, right.

From the Journal of the Florida Senate

May 16, 1989

On motion by Senator Stuart, the rules were waived by unanimous consent and the following resolution was introduced out of order:

By Senators Stuart, Jennings and Gardner-

SR1539 - A resolution commending Trevor Colbourn for his dynamic leadership at the University of Central Florida.

WHEREAS, the University of Central Florida has just celebrated its 25th anniversary as one of Florida's nine state universities, and WHEREAS, the University of Central Florida has been designated a National Merit Scholar host institution on the strength of increasing numbers of National Merit Scholars choosing to attend its facilities, and WHEREAS, the University of Central Florida created the Central Florida Research Park which has been recognized among the ten finest research parks in the nation, and WHEREAS, the research activity of the University of Central Florida faculty has more than quadrupled under President Colbourn's leadership, and WHEREAS, the University of Central Florida has achieved national ranking in athletic programs including football, baseball, and soccer during the tenure of Dr. Colbourn's presidency, NOW, THEREFORE,

Be It Resolved by the House of Representatives of the State of Florida:

That the Florida House of Representatives commends Trevor and Beryl Colbourn for their commitment and dedicated service to the State of Florida, for their relentless quest to lead the University of Central Florida to "reach for the stars" and for their inspiration for excellence.

BE IT FURTHER RESOLVED that a copy of this resolution be presented to Dr. Trevor Colbourn and the University of Central Florida, as a tangible token of the sentiments expressed herein.

- was read the second time by title. On motion by Rep. Crotty, HR1772 was adopted.

Rep. Crotty presented Dr. Colbourn and his guests who were present in the gallery.

Be It Resolved by the House of Representatives of the State of Florida:

That Trevor Colbourn and his wife Beryl are commended for their unselfish and dedicated service to the State of Florida and their relentless quest to lead the University of Central Florida to "reach for the stars."

BE IT FURTHER RESOLVED that a copy of this resolution, with the Seal of the Senate affixed, be presented to Trevor Colbourn and his wife Beryl as a tangible token of the sentiments of the Florida Senate.

On motion by Senator Stuart, SR 1539 was read the second time in full and adopted.

Senator Stuart introduced to the Senate Dr. and Mrs. Colbourn, who were seated in the chamber.
The mystery of what the entrance of the Administration Building is going to look like is solving itself, as contractors on the $107,400 project reach the finishing out stage. The walls, with the planted embankments behind them, set off a quiet area centered by a circular garden enclosed in a circular wall that invites the visitor to campus to pause and enjoy the moment. The sides of the walls facing the circle will be bricked with 1,000 bricks, each bought by alumni for $1,000. The million dollar alumni contribution will perpetuate an Alumni Trust Merit Scholarship Fund. Two National Merit finalists were awarded the first scholarships this spring and will attend UCF in the fall.

Alumni Plaza final form emerges

The following tenure awards were approved by the Board of Regents in May 1989

College of Arts & Sciences
Finley M. Taylor
Moshe Polli
Kuppalapalle Vajravelu
Bruce Chai
Alan Miller
M. Elliot Vittes
Wendell Lawther
Joseph Rusnock

College of Business Administration
Thomas L. Martin
Robert Pennington
Sharon Graham
Lance Jarvis
Michael H. Morris
H. Roy Souder
Stephen H. Goodman

College of Education
William C. Bozeman
Jennifer Platt
Martha Hopkins
Karl Williams

College of Engineering
William F. Carroll
Glenn D. Boreman
Vimal H. Desai

Undergraduate Studies
Audrey McCool

The prudent man does not let his temper boil over lest he get into hot water.

Alumni cite achievers of their own

The Alumni Association, at the Toast and Tribute to be paid to Trevor Colbourn in June, will also pay honor to five UCF graduates of the University's five colleges.

The 1989 Professional Achievement Awards will go to:
Dr. Douglas P. Stanley, '74 BS in Physics, currently vice president of engineering for Litton Laser Systems in Orlando, College of Arts & Sciences.
Dr. Albert W. Helms II, '80, '83, '84, EdD, EdS and MEd, all Administration and Supervision; currently principal of Apopka High School, College of Education.
Raymond L. Wilson, '83, BS Engineering Technology, currently chief, ILS Data for the LOS-F-H Missile System, College of Engineering.
Wendy Sullivan, '81, BS Nursing, currently a member of the education staff at Orlando Regional Medical Center, College of Health.
Jeffrey S. Tracy of Lake Howell has maintained a weighted grade point average of 4.11 on a 4.0 scale with SAT scores of 700 on the verbal and 770 on math. He plans to major in engineering and sees space technology as his future field of work.

Both winners of Alumni Trust $1,000 scholarships are also winners of their own county mathematics contests and both are National Merit finalists. The presentation was made to them by President Trevor Colbourn at an Alumni Trust reception in April.

The Alumni Trust Merit Scholarship Fund was started in 1987 with the goal of raising $1 million through $1,000 contributions from one thousand alumni. The Alumni Plaza, under construction in front of the Administration Building, provides a place where names of alumni contributors will be memorialized on two wing walls flanking a circular, raised garden.

It is better to debate a question without settling it than to settle it without debate.

Helen B. Conley

Employee of the Month for June

Helen Conley gets to play mother to hundreds of UCF students. She loves it.

Her work as staff assistant in the College of Education records office also gives her a perspective and credentials for making a general observation about the state of the world.

"The vast majority of young people are wonderful, wonderful. They're bright. They're looking for concern in almost every aspect. We're in great shape in this country!"

That spontaneous evaluation of today's students was formulated in discussing her life for this account of the Employee of the Month for June. It was sparked by a recollection of student assistants she has worked with since joining UCF Sept. 15, 1980, particularly graduates assistants who have gone on to successful teaching careers and have come back to visit.

Even though she might be the grandmother of today's college students, Conley readily identifies with their age group and in her work functions as a problem solver, helping them meet the day's emergencies, whether it's a vital piece of data in their student record or.stack them with a bond aid for a foot blister.

Sometimes she may even be the stu-
dent along with her son in the classroom.

She takes one course a semester and still has the goal of getting a bachelor's degree, "as soon as I can make up my mind what I want to be when I grow up."

Because the third of 10 children, and the one elected to baby-sit the younger ones, prepared her to mother a flock of students year after year, hundreds at a time. She might have been a very good teacher, she thinks now. Being valedic-
tor of the Mt. Healthy, Ohio, High, class of '45, got her started on a schol-
arship at the University of Cincinnati. A possible work career took a domestic turn in her English class where she met her husband, Jerry Conley. They were married on June 7, 1947.

The Conleys came to Orlando 28 years ago and he is now retired from a career as a claims adjustor in real estate broker. He found that he likes to grocery shop and prepare dinners, while she works a full day and looks forward in die-
ning to continue to work until she gets that coveted bachelor's degree.

The chance to go back to school and rediscover the wonders of ancient Greece and Rome are rewards that she thought of and purposely pursued in landing a job at UCF. Before she worked at the state office in Winter Park. Self-satisfaction and not a better-paying job is her goal as she is the Lib-
"erial Studies degree line.

After pressing again after many years has turned out to be just as enjoy-
able as she anticipated. At the moment she is caught up in Greek and Roman history. Other pleasures she gets from working on campus are the free art ex-
hibits and free music recitals.

The Conleys have two children of their own, a son, Randall, who is pastor of a Lutheran church at Leesville, SC, and a daughter, Connie Neil, who lives at Cherryville, NC. They each have two children. So with two children, four grandchildren and lots more relatives in Ohio, the Conleys have their vacations mapped out years in advance.

Only when Helen Conley decides to retire will they have time to travel some-
where besides a family reunion.

Myrtle White, library technician, to retire with 22 years of memories

In the days when the Library was the only building on campus "Everybody knew everybody else," and everybody connected with the University in the ear-
ly days knew each other. That's what Myrtle White, library technical assist-
ant, 6,222, knows that memory and earlier times, too. She joined the first library di-
rector, Lynn Walker and his staff assist-
ant, Dorris Scott, over the drugstore" in the downtown Orlando office where the university was being organized. She was the Library's third employee.

"Everybody ordered books at first. Fi-
ally I was made a specialist in period-
cals," and that later became Serials, and the place to work for 22 years." she recalled.

Parent classes

University Behavioral Center will offer a free session for parents in June to provide professionally-led discussion of how to handle problems between par-
ents and their children.

On Thursday, June 15, Frances
Stand, PhD, will talk about successful parenting styles and will teach strate-
gies to avoid games and manipulation on the part of the child. The session will last from 7 to 9 p.m.

A nine-weeks' course called sys-
tematic training for effective parenting will begin at the hospital in Central Florida Research Park on Tuesday, June 25, at 7 p.m. and last one hour. Jane Williams, RN, program director for child and ado-
cent services at URC, is the instruc-
tor. The fee is $25 and enrollment is lim-
ited.

To attend either meeting, or for more information, call 281-7000.

On May 31 she will take those and 22 years of accumulated memories with her into what promises to be a venturesome retirement of travel, tennis, golf, gar-
cracing, housekeeping and enjoying her four grandchildren. Yes, and she also loves to read books. This summer Frank and Myrtle will begin their travels with a New England vacation. She would like to follow that with a drive across country to California, and "when I can work up the courage to fly again," to go to Europe. On an earlier European vacation her plane developed a mechanical problem and the flight limped back to New York. The pilot's repeated warnings to passengers, "Don't touch anything electronic," unnerved her. She charged pins and continued her vacation, but lost her enthusiasm for flying.

In her years at UCF Myrtle White served on the committee that wrote the first chapter for the University Staff As-
sociation (now Staff Council), served as the first president of the Library Associ-
ation (an in-house group for the warfare of Library employees) and served on the bi-annual committee planning cam-

Staff Council pursues issue of safety in the workplace

Safety in the workplace, clean air and preparation for emergencies were con-
cerns expressed by members of the Staff Council when they hosted Jim Uhir, campus safety officer, for a give and take discussion Monday May 18.

In asking for their concerns, Uhirl found the council members are alert to current news of possible radon gas as a health hazard, as well as on one side or the other in the smoking-non-smoking debate. Still further safety discussion brought a request from the council to Uhirl that he arrange for training classes related to safety for employees, the classes to range from driver training, to heavy equipment operation.

Uhirl said he was working to reactivate the PEP Squad and asked the council's help in finding volunteer members. The PEP Squad was formed to assist cam-
pus police in emergencies, notably fire drills, and when at full strength had a man and a woman on each floor of each building, trained to assist employees in evacuating by the right exit during fire drill.

Joanne Ogura, who heads up an ad-
hoc committee on salaries, said she and two others on the council, Debbie Cott and Gladys Yost, plan to take vacation time for a trip to Tahiti-hassa to meet key legislators before the budget is adopted. They will be carrying the mes-
sage that USPS employees are losing buying power to higher living costs, in-
cluding health insurance available through the state and their own fees to park on campus.
Employment Opportunities

UCF is an Equal Opportunity/Affirmative Action Employer.
For resume of current openings, call Career Opportunity Line, 275-2778.

For detailed information about any position and how to qualify, phone x2771 or ask at the Personnel Office in the Administration Building.

The following list provides job title, location, pay (biweekly, unless otherwise specified) and closing date to apply. For county positions see the SUS summary chart. vacancy announcements.

A&P
University Physician, Health Services, part-time, $716.97. 7/7/89.
Head Athletic Coach, Athletics, 2 positions, Soccer, men's & women's; Tennis, men's & women's, $774.71. 6/29/89.
Head Athletic Coach, Athletics, part-time, Track. $337.35. 6/29/89.
Specialist, Advancement, Athletics. Prefer professional fund raising experience. $1,094.64. 6/2/89.
Coordinator, Student Affairs, Undergraduate Studies, position will assist in academic advisement of students. $774.71. 6/2/89.
Athletic Trainer, Athletics, must possess or be able to obtain the National Athletic Trainer Associate Certification. $445.00. 6/2/89.
Athletic Coach, Athletics, Women's Basketball. $774.71. 6/2/89.

U.S.P.S
Staff Assistant, Postal Plant. $545.20. 6/2/89.
Assistant Personnel Officer II, Personnel Services, to function as assistant director and supervise two or three units within University Personnel Services. $913.43. 6/2/89.
Electronic Technician I, Psychology, prefers computer background. $517.56. 6/2/89.
Custodial Supervisor II, Student Center. $650.81. 6/2/89.
Piscali Assistant II, Finance & Accounting, $517.56. 6/2/89.
Administrative Secretary, Extended Studies, prefer experience in workshop planning and coordination. $517.56. 6/2/89.

The diamond cannot be polished without friction, nor the man perfected without trials.
—Benjamin Franklin

III customs and bad advice are seldom forgotten.

China prediction

Former U.S. Secretary of Defense James Schlesinger was the keynote speaker last Thursday at the ninth annual President's Circle Dinner honoring major contributors. In reviewing the rapidly changing international order, Schlesinger predicted that the Chinese student uprising would tell if the military takes a position against it. Some 19 new donors were inducted into the President's Medalion Society, whose membership is earned by an annual contribution of $10,000 or more.

CREOL's corporate affiliates share costs, benefits of research

Two internationally active corporate affiliates have joined the unique industrial affiliate program established to further research opportunities at the UCF Center for Research in Electro-Optics and Lasers (CREOL).

The two newest members—Optical Coating Laboratory, Inc., Santa Rosa, Calif.; and Pilkington Vision Care, U.S.A.—will be senior affiliates, the category reserved for those with annual sales that exceed $10 million.

The annual fee for senior members is $10,000. By affiliating with CREOL, members have the opportunity to share certain research, recruitment of UCF graduate, collaborative research, and participation in future planning.

Optical Coating is the major custom coating manufacturer worldwide, while Pilkington is the U.S. subsidiary for ophthalmic optics of the British conglomerate which in turn is probably the largest optics company in the world.

Earlier this year, two Central Florida businesses joined as industrial affiliates, JIT Crystal Company of Winter Springs, and Newport Electro Optics Systems, Inc. of Melbourne enticed under the small business category, which prescribes annual fees of $1-5,000, based on the amount of gross sales in laser and electro optics related products and services.

CREOL, which was established in 1985, has grown to more than 80 faculty, staff and students. It is located in Central Florida Research Park adjacent to the UCF campus.

Classified

This is a free service to fulltime UCF employees.
Ad forms are available at the UCF Report office, ADM 856E. A completed form is needed each time an ad runs. Deadline is Thursday before the Wednesday publication day.
