Staff Council to elect officers at special meeting

Operating under a new charter, Staff Council will hold a special meeting on Tuesday, July 11, to elect officers. There will be four seats to fill: president, vice president, secretary and treasurer when the elected representatives of USFS employees gather in Room 211 of the Student Center at 9:30 a.m. Previously, there were only three officers, a chair, a vice-chair and a combined secretary-treasurer.

The new charter also changes the council's business year to start July 1, coinciding with the University's fiscal year. The new officers will be picked in time to be installed at the annual awards banquet, slated for Friday, July 14 at 7 p.m. in the University Dining Room. The regular Staff Council meeting will be held on Thursday, July 20, when new officers have the opportunity to outline a plan of action for the year.

College picks associate dean from Illinois State

A woman with more than two decades of experience in teacher education has been named associate dean of the UCF College of Education, effective with the start of the academic year in August. Dr. Mary Ann Lynn, who has been on the Illinois State University faculty in a wide range of positions since 1967, was chosen from a group of 137 candidates for the UCF post.

"She brings to the job excellent experience as an academic department chair, and a record of state and national leadership with both public school organizations and the university level of educational administration," said Dean William H. Johnson.

Lynn, who now heads the department of educational administration and foundations at ISU, will oversee four areas in the College of Education: graduate campus programs and school-UCF study, research and development, area campus programs and school-UCF partnerships.

She holds a doctorate in educational administration from ISU, a master's degree in business education from Kent State and a BS in education from Miami University.

The Remington being admired by Trevor Colbourn and Charles Gray (right) was one of many gifts that appeared during the evening of June 17 when friends of Dr. Colbourn gathered at the Peabody Orlando to pay tribute to his 11 years as president of UCF. Gray, president of the Economic Development Commission of Mid-Florida, presided at the event.

In behalf of the commission, which co-sponsored the toast and tribute with the Alumni Association and the Greater Orlando Chamber of Commerce.

France and Netherlands opening new business-study opportunities

The Office of International Studies is close to signing agreements for study programs in France and the Netherlands advantageous to Florida students who would like ocean-spanning careers.

Director Anthony Cervone said his office has 220 applications for the Paris Internship Program which began this summer and is slated to continue during the fall, spring and following summer. Students accepted are given six weeks of intensive language and civilization study at the Ecole Francaise de Attars des Prises in the center of Paris, and nine weeks of study with a company whose business and activities are related to the major or area of interest of the U.S. students.

Students from all colleges and majors at UCF are eligible to apply provided they have studied French for at least four college semesters, or the equivalent.

Business administration students in all state universities will be eligible to study at Tilburg University in the Netherlands under a program in the making to be administered jointly by UCF and FSU offices of international study. Professor Pieter Van Veen, director of Tilburg's Office of International Studies, has visited Orlando and Tallahassee twice to further the arrangements.

Cervone said that Tilburg is known for its good business curriculum and that it is centrally located for someone interested in European business. The program will be for business majors of junior standing. Classes will be given in English.

The Province of Brabant, in which Tilburg is located, has an exchange agreement with the State of Florida, and KLM airline has established a direct flight from Amsterdam to Orlando.

AWARDS BANQUET
Tickets are on sale for the Staff Council's annual awards banquet. This year's banquet will be held in the University Dining Room on Friday, July 14, at 7 p.m.
Tickets may be purchased at the Student Union Kiosk for $8.50. Advance sales end July 7.
For information call Gladys Yost at 834-1554.

### Grant Opportunities

**SECRETARY’S FUND FOR INNOVATION IN EDUCATION** (DEPT OF EDUCATION) - The Department of Education has three areas of funding for institutions of higher education: 1) Comprehensive school health education programs, to encourage the provision of comprehensive school health education for elementary and secondary students; 2) Computer-based instruction programs, to strengthen and expand computer-based education in public and private elementary and secondary schools; and 3) Innovation in education programs, which show promise of identifying and developing new and innovative educational approaches at the preschool, elementary and secondary levels. Due date July 14, 1989.

**UNIVERSITY RESEARCH INITIATIVE RESEARCH INITIATION PROGRAM** (DEPARTMENT OF DEFENSE) - The ARMY RESEARCH OFFICE is seeking proposals in the area of smart materials and structures. Research areas to be promoted under this initiative include aspects of materials science, electronics, hydrosystems, earth sciences and mathematical modeling. THE OFFICE OF NAVAL RESEARCH is soliciting proposals for research on coordination in human/robotic team decision making. Particular interest is in the identification and characterization of variables that enhance coordination and enable teams to maintain coordinated action under stress conditions characterized of tactical environments.

**THE AIR FORCE OFFICE OF SCIENTIFIC RESEARCH** is seeking proposals in the microstructural design, processing and characterization of materials. Of concern are the fundamental mechanisms controlling the microstructural (including nonstructural) basis for the mechanical, electrical, and optical properties of polymers, ceramics, glasses, composites and metals.

**THE DEFENSE ADVANCED RESEARCH PROJECTS AGENCY** is soliciting proposals in applied mathematics, especially in the area of wavelets and their applications. Applications to fractals, the fractal measure of noise, partial differential equations and signal processing of speech and images are of special interest. Due Date Sept. 14, 1989.

**INVESTIGATOR-INITIATED PROPOSALS FOR EPA** (EPA) - ENVIRONMENTAL ENGINEERING PROJECTS should address innovative toxic substance control and waste management technologies that provide cost-effective, multi-media (solid, liquid, gas) pollution control technology. Due Data Aug. 15, 1989.

**ENVIRONMENTAL AND WATER CHEMISTRY AND PHYSICS PROJECTS** should study the basic scientific tools for data stunning the levels at which pollutants occur or might occur in the environment. Due Date Aug. 15, 1989.

**ENVIRONMENTAL HEALTH PROJECTS** should seek to provide a scientific basis upon which the EPA can make regulatory decisions concerning human health risk assessment after exposure to environmental pollutants. Due Date Sept. 15, 1989.

For further information please call Grants Development at 275-2671.

### Official Memoranda

**To:** All Departments  
**From:** Mary Blamey, Payroll  
**Subject:** July 4 Holiday Payroll Schedule  
Due to the holiday on July 4, certifications for pay periods ending 7/3-9 must be in Payroll no later than 4 p.m., on Monday, July 3. Certifications to be completed may be picked up after 1:00 p.m. This Tuesday, June 7. Changes to certs can be made up to 10:00 a.m. on Friday, July 14. All Personal Action Forms and Student Recommendation Forms for this payday must be in Personnel and Financial Aid no later than Thursday, June 29. Paying will be on Friday, July 14.

---

**To:** Faculty, A&P  
**From:** Harri Engert, Chair  
**University Commencement Committee**  
**Subject:** Commencement Procession  
Commencement ceremonies are scheduled for Friday, Aug. 11, in the gymnasium.  
10 a.m. Business, Engineering, Health & Professional Studies  
2 p.m. Arts & Sciences, Education, Liberal Studies  
The procession line-up will begin 20 minutes prior to each ceremony, in Room 174 and the Eula Pepper Building. You may enter from the east side of the building or through the lobby. Directional signs will be posted.

---

**To:** All Building Managers  
**From:** Environmental Health & Safety  
**Subject:** First Aid Supplies  
This is to remind all building managers that the Department of Environmental Health & Safety (EHS) is the contact for maintaining and restocking the supplies for the first aid kits that are designated as being the first aid centers for individual buildings. Departments first aid kits do not apply. Please conduct regular inspections of your kits, and call EHS at x2605 or x3335 for refills.

---

**To:** All Employees  
**From:** Bill D. Morris, Director  
**Administrative Services**  
**Subject:** Campus Mail  
This is a reminder that University Postal Services is the official university business mail only. All mail that is received or delivered by University Postal Services will be handled in the university mail. All of our employees are responsible for judging mail on opening mail. Personal mail may inadvertently be opened. To ensure privacy, personal mail should not be sent to your university address.

---

President Trevor Colbourn was pictured as he addressed UCF students on June 19, praising them for their concerns for the martyred Chinese students of Tiananmen Square. The paper-mache statue copied the one erected by young Chinese seeking freedom of expression and smashed by soldiers who suppressed the counter-revolution with bullets and armored vehicles.
Facilities now match abilities of the faculty

Managers come back to CEBA II school in style

When executives go back to school they like to do it in style.

With the Center for Executive Development, equipped as it is in CEBA II (Center for Engineering and Business Administration) UCF can turnish style. "We have had an excellent faculty in place for years. Now the facilities match the abilities of the faculty," David J. Roberts, center director, said as he observed the first full-fledged use of the Executive Case Room, a 62-seat, tiered amphitheater and the 50-seat Executive Class Room where tables and chairs can be arranged to suit the size of the class.

Florida Bankers Association enrolled 49 executives from around the state for a week-long program that started June 12. They were the first to test the facilities.

"With these facilities we will be able to draw larger groups from a wider area. We have one of the finest facilities in the Southeastern U.S.," Roberts said. Working in industry for 40 years, Roberts entered academia seven years ago when he joined Virginia Tech as manager of their development center. He came to UCF two years ago to become director of the Management Institute, renamed the Center for Executive Development with the move from Howard Phillips Hall to CEBA II.

UCF's Management Institute was created in 1974 and many of its classes have been held off campus through the College of Extended Studies. Tuition fees are pegged to actual expenses which vary widely, Roberts said.

The center is flexible in providing services. Florida Bankers Association tapped the college's faculty, but prepared its own curriculum for most classes. The "students" stayed in UCF dormitories and ate in the campus dining rooms.

The newly-ended year 1986-87 will see approximately 100 programs run through the center, averaging three days, serving 6,000 participants who will pay $450-650 revenue to the University. The 100 programs will mean about 2,100 total training hours, involving about 90 UCF faculty, mostly from the Departments of Management and Accounting.

The annual CPA reviews will mean classes of 50, the tax conference 150 and accounting conference 200 to 250, Roberts informed.

To let a wider business community know about the new facilities and the increased service available, the center has added a manager of marketing, Walter G. (Buckie) Allen Jr., a long-time Orlando resident and business leader.

He was president of The Allen Company, a statewide wholesaler of pharmaceuticals and other health-related products, prior to the sale of his firm in 1984. He served as president of the National Wholesale Druggists Association, and is a past district governor of Rotary International. He is a graduate of the University of Florida School of Business Administration. Program Coordinator Terry Lawie has been with the program for three years. He came from the University of Tennessee at Knoxville where he was coordinator in their management development center.

Judy Ryder runs out the center's staff. She was recently promoted from secretary to program coordinator. She has worked for the University for 10 years and is also a UCF College of Business graduate.

The center is self-supporting, the fees based on what the center needs to carry out its mission.

That mission, Roberts explained, is to provide the transfer of information, knowledge and technology from the college to the business community.

With the move into CEBA II the center is on track to meet the business growth coming to the Orlando area.

Executive Case Room

Management Department's Associate Professor - Bill Callarman held the opening class for the Florida Bankers Association's annual weekend school for executives. Theirs was the first group to utilize the Center for Executive Development's new facilities in CEBA II.

Center staff

Director David J. Roberts (seated) consults with Program Coordinator Terry Lewis (center) and newly-promoted Program Coordinator Judy Ryder. Walter G. (Buckie) Allen has since been added to the staff as marketing manager.

70 minority students to attend UCF's ninth annual special summer program

Seventy high school graduates have been selected to attend this year's Equal Opportunity Program at UCF beginning July 2.

The six-week resident program, now in its ninth year, was established to provide minority students with an exposure to college with a mix of classes and campus life.

The program is designed for students who have exhibited strong potential for success in the classroom. Selection criteria include high school GPA, test scores, letters of recommendation from teachers and counselors, personal interviews, and a review of writing samples.

This summer's students will concentrate on courses in mathematics, speech and English. Dr. Robert L. Belle, director of UCF minority student services, noted that each incoming student also will be assigned a counselor to assist in academics, finances and any personal concerns.

An ethnic breakdown of the 1989 EOP group shows 95 are black, 20 Hispanic, and 11 Asian.

Faculty to meet pioneer designer of teaching ideas, Jerrold Kemp

New approaches to old problems will be addressed on Wednesday, June 28 at the College of Education by Dr. Jerrold E. Kemp, who will bring with him more than three decades of instructional design and development.

Kemp, who is a professor emeritus at San Jose State University, will review a model for designing instruction he has created which features greater flexibility for both instructor and pupil than some existing models.

He will meet with interested faculty in the Dean's Conference Room from 2-4 p.m., and follow at 6 p.m. with a public address in Room 125 of the Education Complex.

Kemp is a former president of the Association for Educational Communications and Technology, a Washington-based professional educational media group.

His visit to UCF is in conjunction with the emphasis on increased use of technology in the classroom that is a major part of the curriculum for future teachers in the UCF College of Education.
Personal relationship helps generate ideas for university to help an industry

Tony Padilla and Jerry Ventre were brought together at IST the other day to pose for a picture and during their small talk to fill in time for another research project was born.

Gerard G. Ventre, associate professor of mechanical engineering, currently a research scientist at UCF's Institution for Simulation and Training in the Central Florida Research Park, had a suggestion for Padilla: "Why not use simulated training for your company?"

Padilla listened thoughtfully and asked, "You mean the civilian products that came out of NASA?"

"Yes, exactly," Ventre responded. "The Department of Defense has been offered to prepare a presentation for a re-examination of Padilla: "The UCF College of Engineering. Coincidentally, Ventre had transferred back to the main campus.

Currently, with UCF and the Government's Energy Office, FPC is developing thermal storage heat pipes for desalination. The application is being installed at the Dall Museum in St. Petersburg, where there is a special need to lower the humidity, as well as the temperature.

FPC is funding three projects with Fred Guinnolm, associate professor of mechanical engineering. One concentrates on advanced heat pumps, another on ground coupled technology, and the third includes NASA in development phase change materials for space heating application engineering.

Through Padilla and Rod Henry, a member of the Mechanical Engineering faculty, a student, Glen Thompson, is spending the summer assigned to study hydronic heating and cooling at FPC's St. Petersburg headquarters.

"We are tapping a pool of expertise not available any place else. We pay, but it pays. We get the boniuits," Padilla said.

He showed the warehouse workshop used for mechanical engineering experiments at the campus sewage treatment plant. Gunterman's experiments, financed by FPC, had all conditioned what was to be a very hot work place in the summer.

Explaining how the heat pump worked, Padilla said he was taking 10 percent less electricity than the air-conditioner without the heat pump. "That doesn't sound like much for one unit, but systemic that would save millions and millions of dollars."

Utility companies, that used to push the sales of electricity, are now pushing conservation and efficiency, because of the extremely high cost of putting new power plants on line.

"Even as a child I knew I would be an engineer," Tony Padilla remembers.

In the summer of 1975, a month after graduation from Miami's Miami-Dade High School, Padilla enrolled at Florida Technological University, Padilla now serves as chairman of the FSEC advisory board.

Over the past five or six years Florida Power has funded research in photovoltaic (solar) production of electricity and various studies using heat pumps to make heating and air conditioning more efficient.

More recently, Florida Power has funded research projects centered at the UCF College of Engineering. Coincidentally, Ventre had transferred back to the main campus.

Currently, with UCF and the Government's Energy Office, FPC is developing thermal storage heat pipes for desalination. The application is being installed at the Dall Museum in St. Petersburg, where there is a special need to lower the humidity, as well as the temperature.

FPC is funding three projects with Fred Guinnolm, associate professor of mechanical engineering. One concentrates on advanced heat pumps, another on ground coupled technology, and the third includes NASA in development phase change materials for space heating application engineering.

Through Padilla and Rod Henry, a member of the Mechanical Engineering faculty, a student, Glen Thompson, is spending the summer assigned to study hydronic heating and cooling at FPC's St. Petersburg headquarters.

"We are tapping a pool of expertise not available any place else. We pay, but it pays. We get the boniuits," Padilla said. ISTS JERRY VENTRE (LEFT) AND FLORIDA POWER'S TONY PADILLA TRY A NEW IDEA...utility company to see if skills of simulation developed for military have civilian application
The UCF Report, Wednesday, June 28, 1989

Welcome Newcomers!

Cheryl I. Fernandez (Lab technician/II-Biology), formerly worked for Benetton and TGI Fridays. She earned a bache­lor of science degree in Biology at Stetson University. She was born at Valdosta, GA.

William Paul Englund (TV production/program specialist/instruction/Instruc­tors) last served WAFF-TV in Gadsden. A native of Cullman, AL, he made Who's Who Among Junior Colleges while earning his AA degree at Gadsden Community College. His outside pursuits include sailing, scuba diving, hot air ballooning and bluff climbing.

Francis P. Morrison (proc auto spec/II-Computer Services) is a native of Chicago and has worked for AT&T, Florida Tech, and Mobil Oil. He earned a BS at Loretta Heights College, Danver, and an MS at Lehgh University, Bethlehem, PA. She now lives at Orlando and has six grown children.

Sally Waltra (custodial worker/Building Services) is a native of Cleveland, OH, and was a housekeeper before joining UCF-Winter Haven. She and her husband, Jack, have two children, Jessica, 9, and Jackie, 5. She likes reading, swimming and sewing.

Dick Atlee (English) presented a paper entitled “Teaching and Learning About the First Writers in America; or, the College English Association meeting in April.

Beth Bemis (English) presented a paper titled “From Satiy to Satire: John Grahm’s “Satiy Upon the Assets As Nexus” at the College English Association meetings in April.

Steve Becker (English) has his novel, “Radicalism and Art in The Awakening” presented at the First International Symposium on Cognitive Linguistics in Dunblane, West Germany, presented a paper titled “On the Linguistics of Freshman Composition” at the College English Association meetings; presented a paper titled “Linguistic Evidence Against Modularity” at the Kentucky Foreign Language confer­ence; all in April, and received a National Endowment for the Humanities sum­mer stipend for 1988 to continue his work on “Linguistic Constraints for Syntactic Constraints.”

Jerry Donnelly presented a paper titled “Freedom’s Just Another Word: Tolerance and Rights in 17th Century and Contemporary Political Phrasing” at the College English Association meet­ings in April.
Employee of the Month for July 1989

James E. Uhlir, Jr.

Keeping people well in the workplace is the job of James E. (Jim) Uhlir, Jr., Employee of the Month for July 1989. Uhlir, who came from Grand Forks, ND, to take over as senior safety and health specialist on June 1, 1988, has a job that didn't exist a couple of years ago. But with the recent worldwide concern with health and safety hazards, his work schedule is being planned for him weeks in advance.

Uhlir is a 1986 chemical engineering graduate of the University of North Dakota where he worked for the Energy and Minerals Research Center for two years after he received his bachelor's degree. At UND he also knew Hugh Ivie, the university's director of environmental health and safety.

Ivie has been UCF's director for a couple of years and now Uhlir works for him. They wrote in proposing him for Employee of the Month. "His attitude of service first and foremost to employees reflects favorably upon the department, the University and himself. Mr. Uhlir is truly an outstanding USPS employee."

The two-member department assumes responsibility for occupational health, fire prevention, chemical management and radiation control on campus.

There's a work mandated by new laws interpreted by the Board of Regents staff for UCF and all state universities. Most of the impact of these laws is still to come.

Asbestos abatement has high priority and will be in evidence when actual removal begins. HVAC—the central plant where heating and air conditioning are generated for piping to most buildings—will be the first building on campus to get the treatment, Uhlir said. To neutralize the hazard of aging asbestos in all campus buildings will be a large-scale operation extending over a period of months.

The BOR has set aside funds for every building remodeling project for asbestos abatement and for fire safety code compliance as well, Uhlir noted. The Chemistry Building, Howard Philips Hall, Health and Physical Sciences, Humanities and Fine Arts and the Administration Building all are scheduled for remodeling.

Uhlir finds his study of engineering helpful in his career change. He must study building plans frequently and among the calls he receives may be one to ponder the safety of operating a lawn mower. He must work with laboratory managers and the housekeepers of the campus in safe management of chemicals.

He has one student assistant whose job is maintaining a computer inventory of all chemicals. Chemicals are now delivered to a $200,000 warehouse just completed near the Physical Plant. The warehouse was designed for maximum protection against spreading damage in case of fire or explosion. Built inside of earth bunkers, it has a fire sprinkler system as well.

Another student assistant maintains 800 existing fire extinguishers on campus.

The Staff Council has asked Uhlir to attend their monthly meetings and help them keep employees involved in safety concerns. One of those concerns is to revive the PEP Squad, the employee group that was formed years ago to help keep employees involved in safety concerns.

When he isn't on campus, Uhlir is still involved in safety concerns. "There aren't too many years left until I have to retire and I like to be involved in safety as much as possible," he said.
Reminders of UCF

Center offers CPA review, service course

A 16-week CPA review course, leading up to the state exam in October will begin on July 8 at the Center for Executive Development in the College of Business Administration. The center will also hold a two-day course entitled, "How to Design, Implement and Manage a Superior Customer Service Program," on July 10-11 from 9 a.m. to 4:30 p.m. The CPA course will be held on successive Saturdays from 9 a.m. until 5 p.m., offering Theory and Practice for $406, Business Law for $1,800, Auditing for $130, or all parts for $590. Classes end 10 days before the exams. For information on either course call Judy Ryder at x2446.

School achievers sought for UCF McKnight Society

Applications are being sought from high achievement area students from kindergarten through college who wish to be considered for induction into the McKnight Achiever's Society. Sponsored by the UCF McKnight Center of Excellence, the Society rewards academic excellence and cultural accomplishments. To be considered for selection, a student must have no less than a "B" average with no less than two "A's." No "C" grades are acceptable unless they are in advanced or honors classes.

The society has identified and provided opportunities to a significant number of Black students who, in turn, have contributed to the success of the society.

SELECTEES

Three executives leaving UCF this summer were given a joint send-off June 19 with wall plaques to remind them of their years at UCF. From left to right, Dick Scott, director of Business Services, will become assistant vice president for student services at Syracuse University; Joe Gomez, University controller, retiring after 30 years service with the SUS, and Jim DeHuy, deputy director of public safety, who will become director of public safety at East Carolina University.

NEXT ISSUE

The next issue of The UCF Report will be on Wednesday, July 12.

The deadline for submitting copy for that issue will be Thursday, July 6.

For rent

Three bedroom, two bath, 1426 square feet, $900. 1967 Harley Davidson XLCH, rebuilt motor, all original, must see to appreciate-$2,000 CBO. 407/831-8064 after 5 p.m. weekdays.

Greenhouse, 200x40 fiberglass and wood frame, heater, liquid gas tank, excellent west wall, asbestos fans, sink, wire mesh counters, all for $1,800. Call 455-4646.

Pluto, Selmer, French keys, all silver, excellent condition-$325. Swimming machine, Sears in early American pine cabinet-$175. Sherry x2357.

1979 Datsun 280Z, to miles, new clutch, battery, Frailid tires, ac, Alpine stereo, excellent cond in & out, must see-$3,650. Mork x2541.

Exercise bike—$45. Bottechesian riding bike—$75. 2 professional speakers, acoustic monitor, brand new-$1,200. Call 571-7259.

Condo on beautiful Laka Howell with private boat docks and ramp, large 2 bd, 2ba, kitchen appliances, paddle fans, screened porch, washer/dryer hookups, pool and more—$39,500, interest assumable mortgage with qualifying. Owner Lynda Kuyper Garrett (Call Terry Barker 647-9770 or 657-2056). 1978 Datsun 280Z, lo miles, new clutch, battery, Pirelli tires, ac, Alpine stereo, excellent cond in & out, must see-$3,050. Call 365-2995 or 349-9357.00.

76 VW Bug, looks distinctive, runs good, cheap transportation—Only $600. Diddv x2508.

Queen size bed, white poster with Stanley box spring & mattress, like new—$250. Cut out ballot and return to Irene Lablan, Public Affairs, AD 395J. (MARK ENVELOPE "Confidential")

May grad accepted as legislative intern

A. Scott Jenkins, a May graduate majoring in political science, has been accepted as an intern in the Florida House of Representatives Legislative Intern Program. Only 30 students from throughout Florida are selected for this highly competitive program. Jenkins will begin his internship in August, working as an research assistant to the House Children and Youth Committee. He will receive a $7,200 stipend, plus a tuition waiver for graduate work at FSU.
