Fortnightly Club,
WINTER PARK, FLA.
ORGANIZED, 1896.

PRESIDENT,
MR. ANDREW RICHMOND.
VICE-PRESIDENT,
MRS. CAROLINE H. ABBOTT.
SECRETARY,
MISS AMELIA ROY KENDALL.
TREASURER,
MRS. GEORGE S. DEMING.

CONSTITUTION.

ARTICLE 1. This organization shall be called the "Fortnightly Club."

ARTICLE 2. The object shall be intellectual and social culture.

ARTICLE 3. The officers shall be President, Vice-President, Secretary and Treasurer, whose duties shall be those usually pertaining to these offices.

ARTICLE 4. The name of any applicant for membership shall be announced by the Secretary.

ARTICLE 5. The number of active members shall be limited to thirty-five. The associate members shall be limited to fifteen.

ARTICLE 6. The admission fee for active members shall be twenty-five cents a year, and that of associate members fifty cents.

ARTICLE 7. The Constitution and accompanying By-Laws may be amended by a majority vote of the Club, if a written notice of the proposed amendment has been presented at a previous meeting.

I was thinking of making inquiry to your whereabouts. But as I thought of you, I must refer to W. Scott, Foreman and Walls, Winter Park, Fla., and high appreciate the winter in Blooming ford, it was about time we moved, and we are ever come this way, you.

Edwards.
Fortnightly Club, WINTER PARK, FLA.

February 5, 1904.

My dear Mr. Chase:

What a pleasure to hear from you once more. I was thinking about you the other day, and was about proceeding to make inquiry of Dr. Cook, or some person who might know as to your whereabouts. I wish I had some copies of the readers to send you. But as I have only a few old copies that I keep for reference, I must refer you to the present publishers of the books, Scott, Foresman and Company, 307-309 Wabash Ave., Chicago.

We all send you our most cordial good will, and high appreciation. Mrs. Edwards and myself are spending the winter in Bloomington this year instead of California. We thought it was about time to have the experience of an Illinois winter once more, and we are getting along remarkably well. If you should ever come this way, it would give us the sincerest pleasure to see you.

Yours most cordially,

Richard Edwards.
**As Presented by Rollins College Last Evening**

Possibly one of the finest successes ever scored by the students of Rollins College in the dramatical field was last evening when Shakespeare's, "As You Like It," was presented at Arman Hall, Winter Park, to a large and appreciative audience. Where everyone played their parts so well it would be futile for us to particularize, so we will only give the Dramatic Program which will be as follows:

**I. PROLOGUE**

Shakespeare. Being to exalt... Wm. B. Burrell, president, his brother, Deaver of his Domination.

Amidst the crowd—A. R. Rollins, H. S. Howard, J. H. B. Watson, K. W. Blackman, C. A. Webster, H. A. M. Van Sickle. "As You Like It" at Arman Hall, Winter Park, to a large and appreciative audience, where everyone played their parts so well it would be futile for us to particularize, so we will only give the Dramatic Program which will be as follows:

**II. ACT ONE**

In the same place.

Orlando they would he assured of a very satisfactory house.

**III. ACT TWO**

While a goodly number of Orlans doles attended last night's performance there are a great many who could not make it convenient, and should the talented students of Rollins decide to produce the play in Orlando they would be assured of a very satisfactory house.

**IV. ACT THREE**

A person representing Hymen... M. F. Marsch, a Peasant Girl—Emma Olmstead, Lucretia Cousen.

Rosalind, Daughter to the exiled Duke... Samuel S. Sadler.

William, a Country fellow in love with Audrey... George W. Phillips.

Adam, servant to Oliver... Samuel S. Sadler.

Corin... H. S. Howard.

Lea Bea, a Courtier Wallace Webster.

Touchstone, a Clown Berkeley Blackman.

Orlando de Bois, Lord Rowland... Frank J. Booth.

Jacques, the exile Duke, Usurper of his Dominions Wm. E. Burrell.

Amicus, Lords attending J R. H. Rowland.

Rinuccio, his brother... Wm. F. Ronald.

Lyonel, his brother... Wm. F. Ronald.

Orlando de Bois, the exile Duke... Samuel S. Sadler.

The source of the Rollins College household water supply is a deep well sunk a short time ago. It is 183 feet deep and extends 30½ feet into the limestone bed-rock, reaching into a lake or body of flowing water.

There are ten deep lakes in the Winter Park region, and the great purity of their waters is largely due to the fact that the surface water, the source of their supply, must filter through 60 to 100 or more feet of sand overlying the rock before it reaches the rock-covered reservoirs of these wells. Sand is the best natural water filter. It has been found to be the best artificial water filter, and sand filtration has come into extensive use everywhere in purifying public water supplies. A property of the water of the deep wells of this region that should not be overlooked is its moderate hardness. It contains from four to ten grains of carbonate of lime and magnesia to the gallon. The water of many limestone regions contains from twenty to forty grains of these combustibles to the gallon.

Moderate hardness is thought to be dietetically better than soft water, because the latter, by dissolving the bitter extractive matters, besides making the tea dark, destroys the aroma. It relieves thirst more effectively than soft water and does not dissolve organic matter so readily as soft water.

Hard water, however, is not so good a detergent as soft water, and requires the use of more soap than the latter does in using it for washing purposes. Respectfully, THOS. R. BAKER.
ROLLINS COLLEGE.

Wednesday, March 1, 1876.

During the last semester 167 students were in attendance at the college, as against 150 during the same period last year. Of these 73 were young men and 94 young women, the preponderance of the latter being due to the number of ladies in Winter Park and Orlando. In the departments of music and domestic arts, fourteen new students were in attendance as against 135 during the same period last year. Every room in the boys' dormitory will be occupied this year, and every room in the girls' dormitory will be occupied before the close of the last year.

The department of industrial and domestic arts has continued during the year with marked success. The instruction in sewing was given by Mrs. Blackman, who also teaches the two boys in the same room. Every room in Cloverleaf will be occupied before the close of the year.

Dear Sir,—The following is written, in compliance with your request to me, for such information as I may have, as to the depth of lakes Virginia, Osceola, and Maitland. The soundings in these lakes were taken by me, at a distance apart of one hundred feet, and along lines crossing each other, passing through centers of greatest length and width, as near as I could estimate in both respects. The averages given below do not include shore approaches, distances off shore of from two hundred to four hundred feet. Soundings taken in the narrow place, dividing Osceola into practically two lakes, nor the shoaling waters between near laying islands, nor short points in lake Maitland, but are to be taken as the average of the floors of the three lakes mentioned. The average depth of Virginia, from fifty soundings, is seventeen feet, with a maximum of twenty-five feet. The average depth of Osceola from fifty soundings, is nineteen feet, with a maximum of twenty-five, and in Maitland, the average from seventy-five soundings, is sixteen feet, with a maximum of twenty-six. I found in neither of these lakes a greater depth than twenty-six feet.

Yours truly,

J. W. Johnson.

Dear Sir:

At a Special Meeting of The Town Council held last evening
the following resolution was adopted:

Resolved, that a committee of five be appointed by the President of
the Town Council of Winter Park to confer with the owner of the Seminole
grounds and others, with reference to the rebuilding of the hotel, and
the re-adjustment of the streets adjacent to the property.

The President of the Council appointed the following committee in
accordance with the above resolution,

The Committee is requested to meet at Dr. Blackman's residence on
Saturday, March 15th, at 7.30 P.M.

Yours very truly,

H. A. Ward
Town Clerk.

Dear Sir: -The following!* written,

Dr. Pearsons will send a check for $50,000 tomorrow to President Blackman of Rollins college, Winter Park, Fl., an institution engaged in helping Cubans and the American residents in Cuba, he said. He pledged the amount a year ago while visiting in the south, on receiving that $50,000 should be raised independently. Of the additional amount other Chicagoans give $50,000. Mrs. Fred Billings of Ny, Park, following Dr. Pear

Dr. D. K. Pearsons will give $50,000.

Latest Gift Goes to Rollins College in Florida for Higher Education

Missions, and he disliked making a mistake this year.

The doctor, with a bit of poetry in the heart, said to these officers that he did not wish to hear a word from them in acceptance or rejection until the 14th of April, his birthday, when they might telegraph him on the train or route in his home. He did not let any of them know until tonight where he was, and that, in fact, he was "incog." for five weeks. He said he could not tell whether his proposition would be accepted or not, but he hoped it would, as he had become accustomed to rounding off his terms, by adding to the funds of worthy institutions, and be did not make a mistake that year.

On the trip fifty-three years ago they traveled from Selma to Mobile. Last week they were guests of a steamer on the round trip. On the same report of the aged, Mrs. Pearsons said:

"On the trip fifty-three years ago there were forty Negro slaves who got the tales of freedom from the steamer and learned other freight, as well as wood, bunk and forth. The trip last week included the eleven feature, but otherwise it was delightful. I and I have both benefited."

"On another to leave tomorrow for home," Dr. Pearsons said. "We have spent the last few weeks in traveling through the country, principally in the south, and usually for a few weeks. He said he could not tell any of them know until tonight where he.

The trip last week included the eleven feature, but otherwise it was delightful. I and I have both benefited."

The Residets Celebrate the Completion of Rollins Endowment Fund.

From Orlando Star. April 26.

Tuesday, April 26th, will long be remembered by the people of Winter Park. A large and joyous throng, women and children, took in the town in celebrating the completion of the endowment fund of $200,000 started a year ago.

Other classes were suspended and students and faculty all joined in the jubilee.

At 11 a.m. the students dedicated the new boat house on Lake Virginia (for the construction of which a friend of the college furnished the funds), and three of these seven shells were put into the water and started from the upper porch and said "I Christian Three Seminole In," whereupon a large banner was unfurled displaying the name by which the old Rogers House will hereafter be known. As the banner spread flowers in great profusion fell from its folds upon the crowd below, while the ladies served refreshments.

A grand tour of the Cuban students, Messrs. Martinez and Hierro representing Pinedura Cottage and Messrs. Fernandez and Esquio, representing Tampico Cottage held a ring tournament in front of the Inn the prize being won by Mr. Hierro for his players.

At 5 p.m. an elegant supper was served in the college dining hall under the efficient management of Miss Margaret Reynolds, after which was said by Rev. Mr. Parar of the Methodist church, to the trustees of the college and their families, the members of the faculty, the students and guests who had helped to make up the endowment fund of more than $200,000.

President Blackman said that the number of contributors to the fund was 13, besides the 93 ladies who had given through the Ladies Auxiliary Committee and that $166,600 of the amount had been contributed by women.

He spoke feelingly of the good Dr. Peirson who started the fund a year ago with $50,000 and read a letter from him in which he stated that Rollins College had done the best of all the colleges he had helped.

After this letter had been read, the entire company rose and drank a toast to the health of Dr. and Mrs. Peirson, after which the wine was yel! given with gusto by the students.

Among the guests were Mr. and Mrs. Chas. S. Mark, Mr. and Mrs. Chas. H. Hall, Mr. and Mrs. G. D. Simon, Dr. and Mrs. M. A. Henkle and Mr. Chas. H. Morse and daughter.

Post-prandial speeches were made by Mr. E. B. Brewer, Mr. Andrew Richmond, Prof. Lord and Mr. L. A. Chase.

Prof. Lord in her speech presented that in memory of the occasion $1,000 be contributed by faculty and students, to found a "Banquet Scholarship," the income of which should be assigned each year a "Banquet Day" (namely April 14, Dr. Pearson's birth day), to that student, preferably of the Sophomore class, who has made the best record during the year for attendance, department and scholarship.

Fifty-seven names were again placed on the subscription blanks on the organ covering nearly $580. It is hoped that the entire $1,000 will be raised.

As the supper closed, the college bell rang joyously, a flaming bonfire was towed into Lake Virginia, and the students formed into the masonic gymnasium, where dancing was permitted until 11 p.m.

It is understood that the college authorities will now endeavour to increase the funds of the institution to half a million dollars as soon as possible.

The day is the tilting anniversary of the birth of the town and is usually celebrated in some way.

This year the day was commemorated by an elegant supper given by the ladies of the hotel this year, Mr. E. C. Christie, of Eatonville and Mrs. Rogers, who has run the house for 21 years.

The eldest ladies were honored persons, to wit:

Chas. H. Morse and daughter, Mrs. Lee, Pres. Blackman and Mrs. Mrs. Rogers and daughter of Mrs. Rogers, Mrs. Chas. H., and Mrs. Mrs. Rose, Miss Langwill and L. A. Chase.

Mr. Chase as toastmaster presented the following: John Rogers many years ago was buried at the stake.

For the past 21 years the guests of Alfred C. and Abbie B. Rogers have been urgently near many a steak provided by them with no even a thought of nursing either them or their guests.

Response by Mr. Rogers.

The season being over, the board bills are paid, the doors will soon be closed till season opens. Huntington is done and is forever heartily given with the Chatamqua to relate to him who has done the most winter retired to our wants.

Response by Mrs. E. C. Christie, of Chatamqua.

A long time ago the great orator of Osceola had his camp on the banks of the beautiful lake that bears his name. The identical spot is today being celebrated in some way.

Mrs. R. R. Kendall led last Saturday for her old home in Massachusetts, where she will spend the summer.

Miss Pattie Hovey returned to college Saturday evening, after an absence of two months. We are all delighted to have her with us.

New students enrolling last week were Misses Clark, A. I. Blackman, President.

Winter Park, May 5, 1904.

To the Editor of the Courier:

Dear Sir:

A dispatch emanating from Chicago last night states that $1,000,000 has been subscribed for the erection of a new building at the University of Illinois, and that the subscription is to be completed by the end of the year.

RULON COLLEGE.

Facts About Rollins' College.

To the Editor of the Courier:

Dear Sir:

A dispatch emanating from Chicago last night states that $1,000,000 has been subscribed for the erection of a new building at the University of Illinois, and that the subscription is to be completed by the end of the year.

Your subscriber,

Wm. F. Blackman, President.

Winter Park, May 5, 1904.
The name of the Roger House has been changed to that of "Bemisville Inn." The college gifts of Dr. Pearson were so appreciated by the graduates that they presented to him an album of autographs which he accepted with pleasure.

There is great rejoicing on all sides at the success of the money-raising. Dr. Pearson was unable to be present for the entire campaign, but the money and the "big plum-pudding" which was promised for the celebration, his absence will be regretted by all. He has been a cordial friend of the college, and the success is an additional proof of his generosity.

The students of the music department, under the management of Mr. W. C. Temple, will make extensive repairs on his residence this summer. The college was founded in 1885, and has systematically divided its wealth among the students. The college has not only fully recovered its former condition, but has been enlarged and increased in every way, has grown in beauty, and is to be entered on the list of the institutions of the state as one of the leading colleges.

The name of the Roger House has been changed to that of "Bemisville Inn." The name of the Roger House has been changed to that of "Bemisville Inn." The college gifts of Dr. Pearson were so appreciated by the graduates that they presented to him an album of autographs which he accepted with pleasure.

Under the management of Dr. Blackman, the college has not only fully recovered its former condition, but has been enlarged and increased in every way, has grown in beauty, and is to be entered on the list of the institutions of the state as one of the leading colleges.

The new buildings on the campus are open to the public. The Rogers House, for so many years a favorite hotel, has been purchased and opened for the college, together with a fund of $10,000 to provide for an addition and its furnishing. Five hundred dollars more is on hand on condition that the subscription reaches $20,000.
On Friday afternoon, Dec. 26, occurred the closing exercises of the Winter Park Public School, before the Christmas holidays. The children of the three rooms, about 180 in number, assembled in the large gymnasium of the school house and, many of the parents and friends with them, to hear the closing exercises. About 100 people were present so that the large room was well filled.

A Christmas song, story, and poems were sung or recited by the children and a very pleasing and successful program was carried out.

The children of the upper room were singing a management of Miss Rollins, the middle room under Miss O'Neill and the primary room Miss Sorensen and all worked together harmoniously.

Christmas songs and poems celebrated the good deeds of Santa Claus.

Speeches were made to the children by Mr. Lewis A. Chase, Mr. Chubb, an Representatives of the School Board. These gentlemen have been identified with Winter Park and its interests for many years.

The announcement was welcomed by Mr. Lewis A. Chase and, as Representative of the School Board. These gentlemen have been identified with Winter Park and its interests for many years.

Professor M. C. Murray has a Christmas tree for the next children at 2 a.m.

The death of Miss L. S. on the 29th inst., was a gloom over the community. If we say, Mr. Chase, of Harvard, with the mother. Monday night. Services were held at the house Saturday at 2 p.m.

Winter Park, Dec. 29.
The Rollins College Commencement Exercises

Closed Its Nineteenth Year

Yesterday.

The Annual Commencement Exercises Occupied the Past Week. They Were Very Interesting and Largely Attended.

The commencement exercises began on Thursday of last week when Miss Elizabeth Knox of Orlando gave her graduation recital. On Saturday night Miss Mamie Dawson gave her graduation recital. Both of these ladies played before large and delighted audiences.

On Sunday Dr. Blackman preached the benedictory sermon in the Congregational church. The sermon was a most eloquent appeal to the young people to be ambitious to have a "good name."

On Monday the races were run on Lake Virginia. There were two races not run by the young ladies and the other by the young men. It so happened that both races were won by the light team. The winning crew of the young ladies was composed of Misses Morse, Frasier and Dothau, with Miss Brewer coxswain. The captain of the winning crew, the light, scored another, was Preston, the coxswain, Gibus. The race was won by the Missouri crew, the time being 3 minutes 3 seconds.

On Tuesday the School of Expression gave a recital. The symposium was crowded with an enthusiastic audience.

The annual commencement concert was given on Wednesday evening. The first part of the program was given by the graduates of the school of music assisted by a semi-choir. The second part was given by the faculty of the school of music assisted by Miss Reed of the school of expression. It was one of the finest given at the college.

After the concert President and Mrs. Blackman held a reception in the parlors of Cloverleaf Hall. This reception was largely attended by friends from Winter Park and the surrounding towns. After the reception a special train was run to Orlando.

The alumni dinner given to the invited guests.

The commencement exercises that evening were given by Bishop Wm. Crane and O'Neal. It was one of Chopin's most perfect, the four pairs of hands playing to perfect unison of time and expression.

The graduating address was given by Lewis Hinson. The address was well delivered and received hearty applause. Following it was given the following:

Acade was George Alcock, Margaret Burleigh, thirty-five, Mba; Lamson, Alice Longley, Mrs. Blackman, Helen O'Neal, Primitive Parish, Senor John, Helen Steinmetz and Raymond Ward, from the community.

The roll of graduates were Leslie Lanolin, Carl Moore, Isabella Nixon and Fred Hittman.

Mr. L. A. Chase,
Winter Park, Fla.

Dear Sir:

Replying to your letter of May 2nd. The distance from Port Tampa to Key West, according to figures furnished us by the Peninsular & Occidental S.S. Co., is 255 miles, and from Key West to Havana, 105 miles, total number of miles between Port Tampa and Havana, 360.

The time from Port Tampa to Key West, according to P & O schedules, is 18 to 20 hours, and from Port Tampa to Havana 30 hours.

Yours truly,

Division Passenger Agent.

and as it is perfect or imperfect so must the expression of the
soul be, to a great degree, perfect or imperfect. The care of
physical development is under the charge of competent direct­
ors and special attention is paid to adjusting the balance be­
tween the mental, nervous and muscular systems. All students
are required to take regular exercise and are given a physical
examination upon entering so that the director can judge what
is needed for them, and are also examined at the end of the
year and results noted. We stated that regular exercise was
required, but this feature is one of the greatest pleasures of the
student class drill and special work in the gymnastics is supple­
mented by out door sports, such as base ball, track athletics,
tennis, basket ball, bicycling, boating, swimming and golf,
which is played on the Winter Park Links, which are among
the best in the State. Boating is one of the special features of
exercise, and ample well are owned by the college, two of which are sixty
feet and one fifty feet in length and considerable healthy rivalry
is developed among the rowing teams, as to which shall carry
off the honors.

THE HEALTH

of students should be looked after not only in physical culture
but the matter of location is one which deserves the first atten­
tion. In this Rollins College need fear no rival. Its location
is an ideal one. The climate is perfect allowing for open air
exercise and study almost every day in the year. The pure
spring water of the lake adds only health to the gentle breeze
which takes up its cooling moisture and carries it through the
pines, gathering of their fragrance, and their healing balm to
the rooms of the student. The water used comes from an arte­
sian well one hundred and twenty-five feet in depth and chemi­
cal analysis shows it to be absolutely healthful. The record of
the college for the past nineteen years is that not one death has
occurred among the vast number matriculated during that time,
Winter Park being absolutely free from malaria.

PUPILS FROM THE NORTH.

Though Rollins is a College designed and conducted for
the convenience of pupils from the Southern States, it has been
largely taken advantage of by residents of the North who wish
their children to have the advantage of education where they
can also have free access of pure air at all seasons of the year
and where the dread disease of pneumonia does not set its feet.
The of the North are beginning to realize this advantage and
many of the New England, Central and Western States are rep­
resented among those who will receive the foundation of
their life’s work within Rollins College.

THE FACULTY.

Pages could be written of description and of the advantages
of location, but space will not permit, but the Faculty of an ed­
cational institution is of the first importance, and this problem
has been met by the Trustees in a manner which reflects great
credit upon their judgment.

PRESIDENT WILLIAM F. BLACKMAN,

for two years past the President of Rollins College, is a gen­

Dr. Blackman before taking up college work was for several
years pastor of important churches. He is a lover of music and
a fine singer, cultivating his voice at Berlin, Paris, and at other
places. This fact will tend greatly to increase the interest in
music and advance it among the students.

Dr. Blackman is not a stranger to Florida, as for seventeen
years he has been interested in its development owning orange
groves here, and now has large interests in the State both in
Central and Southern Florida.

A GREAT ENDOWMENT.

During the past year, under Dr. Blackman’s management
two hundred and two hundred thousand dollars have been raised
for the College, two hundred thousand of which goes for per­
manent endowment. A fine hotel property, the “Seminole Inn,”
has been donated to it and this will make quite an additional
income for the institution, as under the care of Dr. Blackman it

THE FACULTY.

Pages could be written of description and of the advantages of
location, but space will not permit, but the Faculty of an ed­
cational institution is of the first importance, and this problem
has been met by the Trustees in a manner which reflects great
credit upon their judgment.

PRESIDENT WILLIAM F. BLACKMAN,

for two years past the President of Rollins College, is a gen­
tleman of long experience and sterling worth. He has degrees
from Oberlin, Yale and Cornell, and has pursued his studies in
noted institutions of Germany and France. For nine years he
was professor of ethics and sociology in Yale University. He is
an author of note, his work, "The Making of Hawaii, a Study
in Social Evolution," has been recognized as an authority, both
in Europe and this country, on the social and moral aspects of
Hawaiian history, and as a model of sociological method.

Dr. Blackman before taking up college work was for several
years pastor of important churches. He is a lover of music and
a fine singer, cultivating his voice in Berlin, Paris, and at other
places. This fact will tend greatly to increase the interest in
music and advance it among the students.

Dr. Blackman is not a stranger to Florida, as for seventeen
years he has been interested in its development owning orange
groves here, and now has large interests in the State both in
Central and Southern Florida.

THE TRUSTEES

THE EXECUTIVE COMMITTEE

consists of William F. Blackman, Henry S. Chubb, Sullivan F. Gale, John H. Wyeth, Edwin H. Brewer, William C. Comstock and William E. O'Neal, the latter occupying the position of Secretary and Treasurer.

COURSES OF STUDY.

The courses of study have been made elective, thus allowing of the greatest liberty in choice, and no matter what future a student has marked out, an appropriate course leading up to and fitting for it can be had at Rollins.

THE EXECUTIVE COMMITTEE

consists of William F. Blackman, Henry S. Chubb, Sullivan F. Gale, John H. Wyeth, Edwin H. Brewer, William C. Comstock and William E. O'Neal, the latter occupying the position of Secretary and Treasurer.

CO-EDUCATION

is one of the features of the institution and here the daughters and the sisters can have the same advantages of a liberal education as the sons and brothers, standing side by side in the class room each is stimulated to the best endeavor by the other, and the girl becomes broader and the boy softer by the association.

CATALOGUES

giving full information can be obtained by addressing the President, William F. Blackman Ph. D., Winter Park, Florida.

STANDARD POULTRY FARM, ORLANDO.

One of the most interesting and attractive places in the State is the poultry farm of Mr. F. A. Lewter which is located in Orlando, Florida. Mr. Lewter is one of a large number who started in the poultry business in 1885, and organized an association in Orlando for the benefit of the poultrymen of this section. He is the only one who started with such bright hopes, who did not become discouraged at the first contrary wind that blew. Mr. Lewter not being used to being balked in any enterprise in which he had taken hold, clung to the business with that bull-dog tenacity which has marked his career ever since his advent into the State in 1884. While many were becoming discouraged and downhearted, he was looking for the cause of the troubles they were encountering all along the way and trying to find a remedy. Patience is always rewarded and Mr. Lewter determined to make a success of the enterprise and has been abundantly successful. Like all who start in a business of this kind, Mr. Lewter deemed it wise to commence the business on a small scale and gradually as the trade demanded to add to his stock. At the time of his commencing, his farm consisted of a lot 100 x 200 feet and a small stock of White Leghorn chickens. Small beginnings is the foundation of all large enterprises, only however when they are coupled with the necessary brains to carry them to a successful end. This Mr. Lewter has done to an astonishing degree. When one learns the fact
that governed the commencing visits the farm at this time and sees its present development, he is obliged to recognize the fact that his immense success has been attained not through any streak of fortune but by grit and perseverance against almost overwhelming odds. His stock now consists of over forty varieties of poultry, some of which cost many dollars for the first pair. Among these are his Japanese fowls which were landed in San Francisco at a cost of $35 per pair, and extra fine Ruff Orpingtons which were brought into the country from England at a cost of $60 per pair. All the other standard varieties of poultry go to fill up his pens. His Pitt Gaines are very fine stock. At one time he raised 117 of these and at three months old sold them at from $2 to $3 each. Mr. Lawer realizing that good incubators and brooders are a necessity in poultry raising has made every effort to get the best. He is now using Cypress incubators and Bellview and Cypress brooders. A large and well-kept brooder house has been added to the buildings, made according to his plans and is of immense value to the health of his little chickens. The floor is entirely of cement, several windows for light, ventilation good, and wire fencing between divisions separating varieties of chickens. In this he has raised already 2000 young chickens this season and expects to have the number swelled to 5000 before the season is over. Last season shipments were made to thirty-four States of the Union and also to Cuba. Several thousands of dollars worth of business he was obliged to turn away on account of his inability to keep up with the demand. Several large new houses will be built soon among them being another large brooder house sixteen by one hundred and twenty-five feet, and a large incubator house sixteen by fifty feet. An artesian well now furnishes water for the entire farm and the farm will some day be one of the largest and finest in the United States, for what money and perseverance can do for any enterprise will be done to accomplish this end.

It is a great advantage to Florida to have an establishment of this kind within its boundaries, for it not only enables the people of the State to obtain thorough bred fowls and eggs for hatching without such a long shipment as is required from Northern points, but it also stimulates others to engage in different branches of business and thus adds to the diversity of our product and consequently to our income. Again, the advertising which is done by Mr. Lawter, and the many complimentary notices he receives from both poultry and literary journals in the North, on account of the excellence of his farm and its appointments, not only helps bring Orlando into prominence, but also benefits the State by attracting attention of those seeking new locations, who desire to take up some special line of work. Mr. Lawter is doing good work and should have the co-operation of the people.
The Christmas spirit has already begun to manifest itself at Rollins College. On Saturday evening one of the most enjoyable entertainments of the year was given by the Choral Club. The entertainment was held at 3:30 and the Choral Class will give "Christmas Music" by Saint-Saëns.

Aged Lady Dead.

Mrs. Elizabeth Butcher, of Winter Park, died yesterday. She had reached the advanced age of ninety-four years and has resided in this place for many years. She leaves five daughters, seven sons, Mrs. E. S. Lewis, resident in this city, and one son, D. G. Lewis in Crigger.

The funeral was held in Winter Park last evening and the remains were laid to rest in the Lakeview Cemetery.

Under-taker B. L. Good has charge of the funeral.

ROLLINS SONG.

(Alt. "American")

Gladsly her children come
Back to their ancient home,
To Rollins.

Though memories are red,
Old memories are not dead,
That from the past are led,
At Rollins. 1904

Our hearts with fervor fill
For "Church and Country" still
And Rollins;

Therefore our voices rise,
Recalling student days,
And our old college a"s we are.
At Rollins.

Join in the loud acclamation
To Alma Mater's fame;
Cheer Rollins;

Long may her banner wave,
Long may her name be known;
Cherish with heart and hand
Old Rollins.

I. S. L.
Hay Fever and The Florida Heights.

A man who has just removed from the north to the little town of Winter Park, Florida, 125 miles south of Jacksonville, says that he is happier now than he has been for twenty-five years. And he is a happy man because he is a well man. He had been troubled for twenty-five years with that provokingly annoying disease, hay fever, and although he had been a member of the Bethlehem, N. H., nine hundred-band of hay fever sufferers, organized to help one another in finding relief; although he had tried every known or suggested remedy, and traveled almost the world over in search of places where the annoying trouble would not trouble him, sure and permanent relief came only after he came to this town among the Florida pines. He has not sneezed once since he came here, and no other symptoms of the disease have shown themselves.

If hay fever sufferers are immune from the disease in this place, it will become one of the blessed spots of the earth. Winter Park is part of the area in this region called the Florida Heights. This name is given to about two hundred square miles of Orange County. Its highest point is 113 feet above the sea-level, and the area forms a water-shed from which streams flow eastward into the Atlantic and westward into the Gulf of Mexico. The land is of the high pine variety; many stately and odorous pines grow on the uncultivated area, and beautiful orange groves form a conspicuous feature of the landscape.

It may be stated in this connection that Dr. Dunbar of Hamburg has been making a special study of hay fever for several years, and has reached the conclusion that it is caused by the pollen of grasses, but not by mechanical irritation. He has extracted from the pollen a poison or toxin which is readily soluble in tears, mucus of the nose, and serum of the blood, and a solution of this toxin dropped into the eye or nose produces hay fever symptoms at once.

This discovery suggested to Dr. Dunbar the serum method of treatment, and by inoculating animals with the toxin, he produced a serum which when applied to the eye or nose together with pollen toxin completely prevented the outbreak of the disease which the toxin would have caused.

Another hay fever specialist, Dr. F. E. Stowell, has concluded that the disease is caused by the actinic rays of sunlight which are so plentiful during the hay fever season, and suggests as a remedy the wearing of smoked glasses. This simple remedy proved highly efficacious in treating stubborn cases of the disease.

[Signature]
Ralph Connable, Sr., Describes the Beauties of Winter Park, Fla.

WINTER PARK, Fla., Dec. 30.

The pathos turn of his last years makes all recognition impossible. Generally of one fine residence and an element of beauty, it was a man of the 'seventies and 'eighties, but was not the kind of man to enjoy the delightful weather to be found here in the winter.

Mr. Polley is a valuable addition (before Saal went wrong), and regulates the working parts of the Inn with as little friction as the pendulum controls a government clock; while Mr. Lewis and his charming wife see that the guests do not fall asleep in the parlors, get "set in their ways," or pine away from homesickness. Eight hundred stores represent the business portion of the village; but who, that comes here for health, rest or pleasure, would part with a hundred orange or forest trees, or even as many rose bushes, to make place for the best block in Chicago? Far better to live in the pine forest and go to the city when you must, than to live in the city and go to the country when you can.

Rollins College, with its two hundred students, being located here, may perhaps have something to do with the unusually attractive social atmosphere of the place. Several times each week all the hotel guests are invited to some social gathering or entertainment, where each one is made to feel the good of his services desirable. Overborne by arduous labors in the pine away from homesickness. Eight hundred stores represent the business portion of the village; but who, that comes here for health, rest or pleasure, would part with a hundred orange or forest trees, or even as many rose bushes, to make place for the best block in Chicago? Far better to live in the pine forest and go to the city when you must, than to live in the city and go to the country when you can.

The Congregational, Episcopal and Baptist churches here suggest the query, are there three kinds of religious belief? and are they all necessary? and, if so, for what? Could they all but agree upon the kind that Christ taught by precept and example, one church would hold itself alone as the universal truth, if he had the added salary of the other two, could live fairly well with due economy.

Small as the village is, the Seminole has its electric lights, thanks to the wire that connects us with the little town that was built out west twenty years ago, and when it was all Solitude it was new and lively to see the oarsmen of our town met in a social way, and appointed a committee to organize officers. The chair appointed the following: D. L. Parker, president; Albert Dickerson, first vice-president; Dr. Wenger, librarian; W. H. Mann, treasurer; directors, W. H. Mann, Isaac Boyes and S. S. Cone. A constitution was adopted, and with a few amendments the institution till it was turned over to the town in February, 1893. Many books were donated, and liberal subscriptions given to purchase new books. In the minutes of a meeting March 7, 1894, the building was greatly enlarged at a cost of $100. I could write several pages of interesting matter in regard to persons and events in connection with the dear old library, but there is a time limit, which perhaps I have already over stepped.
FLORIDA HEIGHTS

The appropriate name given to the surprisingly beautiful lake region of about two hundred square miles in Orange County, Florida, on the west of the divide or watershed of the State from which waters flow westward to the Gulf of Mexico and eastward to the Atlantic. On this high, rolling plateau, covered with groves of magnificent southern pine, native evergreen oaks, fragrant magnolias and fruitful orange trees, and dotted with well-tended farms and clear, high-banked crystal lakes bordered by swiftly running brooks, is the beautiful town of

ROLLINS COLLEGE

WINTER PARK WAS DESIGNED by its founders to be a center of educational influence. This purpose has been steadily kept in view, and has attracted to the town, built for permanent residence and as a winter resort, intelligent and cultured people. Rollins College was incorporated under the General Laws of the State in 1885, and received a special charter from the Legislature in 1895. It has always maintained the highest standards of scholarship. Its students—now about 200 in number—are drawn from Florida, Georgia, Cuba, and the New England, Middle, and Western States.

THE FACULTY embraces more than twenty instructors. The president was for many years a professor in Yale University. The vice-president and dean are also graduates of Yale. Other instructors were formerly taught in Vassar, Smith, Wellesley, and Bryn Mawr, and were professors in three paper racing shells; its students may use the links of the Winter Park Golf Club, the best in the State, of a merely nominal cost; and it is surrounded by many miles of parent roads, delightful for walking, driving, or cycling. Some form of regular gymnastic or athletic exercise, for all students, unless excused by the president.

THE CAMPUS embraces about twenty acres, handsomely located on the northern bank of Lake Virginia, and contains eight buildings. The dormitories have attractive reception rooms, and each student has a separate, outside room. The campus and all the college buildings are lighted by electricity, and provided with heating apparatus.

THE CHARACTER of the institution is thoroughly Christian, but entirely denominational, both in spirit and control.

THE CONDITIONS OF HEALTH at Rollins College are nearly perfect. During the nineteen years of its history not a single death has occurred in the student body. Located on the "Florida Heights," it enjoys the purest of air, direct from ocean or Gulf, and impregnated with the odor of the pine; its water is drawn from an artesian well more than a hundred feet deep, and is as free from impurity as any in the world; its doors and windows are open day and night the winter through; its two physical directors and the college physicians give careful attention to the physical condition and needs of each student; and it furnishes an abundance of fruits and wholesome food in its dining hall. Winter Park is absolutely free from malaria.

ATHLETICS are encouraged at Rollins. The College has perhaps the finest and best equipped gymnasium in the South; it has the best baseball field in Florida; it has a fine boat house, and a flotilla of a dozen row boats, besides three paper racing shells; its students may use the links of the Winter Park Golf Club, the best in the State, of a merely nominal cost; and it is surrounded by many miles of parent roads, delightful for walking, driving, or cycling. Some form of regular gymnastic or athletic exercise, for all students, unless excused by the president.

EXPENSES are very moderate, varying from $650 to $900 per annum for board, room-rent, and tuition. There are thousands of parents who would spend their winters in the Sunny South if they knew that they could find there a school of the highest grade for the children whom they cannot leave behind them. Rollins offers them college from these parts and the presence of a longer and more vigorous life, together with instruction in every kind of that which they wish for anywhere else.

THERE ARE SEVERAL SCHOLARSHIPS, covering the cost of tuition, available for students of superior character and ability, who may need such assistance.

THERE ARE THOUSANDS of parents who would spend their winters in the Sunny South if they knew that they could find there a school of the highest grade for the children whom they cannot leave behind them. Rollins offers them college from these parts and the presence of a longer and more vigorous life, together with instruction in every kind of that which they wish for anywhere else.
