# THE ROLLINS SANDSPUR

70th Year No. 7

THE ROLLINS SANDSPUR, WINTER PARK, FLORIDA

February 25, 1964

## Dr. Hellwege Receives National Science Grant

At the Founders' Week dinner Saturday night, President McKean released the news that Dr. Herbert Hellwege, head of the chemistry department, is taking a leave of absence next year.

Awarded a National Science Foundation Faculty post-doctoral fellowship for next year, Dr. Hellwege will do research in the field of co-ordination chemistry at the University of Goteborg, Sweden. Dr. Hellwege will be working with Dr. David Dryssen, professor of analytical chemistry at the University of Goteborg, who first invited Dr. Hellwege to work with him two years ago, when they met at the Solvent Extraction Chemistry Symposium at Gatlinburg.

Dr. Hellwege, in his "Activities Program" submitted to the National Science Foundation for next year's research, noted that Dr. Dryssen is one of the most important persons working on the use of liquid distribution techniques to elucidate inorganic solution chemistry.

Dr. Hellwege

The National Science Foundation fellowships are awarded each year "for the improvement of college science, mathematics, and engineering teaching." In December, 1963, approximately 400 Science Faculty Fellowships were awarded to applicants requesting tenure of from three to fifteen months. The applicant, to be eligible, must have demonstrated his ability as a teacher and researcher and must intend to continue teaching.

Dr. Hellwege, in his nine years at Rollins, has introduced many new courses in the chemistry

curriculum, including Radio-chemistry and its Applications, a junior-level course, and Molecular Biology, a senior course. Dr. Hellwege optimistically hopes for a new, modern science building soon so that the chemistry curriculum can be modernized and science students can benefit from work. He contends, "We are 'straight-jacketed' by facilities."

## Bach Festival Will Feature Selected Music

On Thursday, Friday, and Saturday, Feb. 27-29, of this week, the 1964 Bach Festival will take place in the Knowles Memorial Chapel. Music of Johann Sebastian Bach and his contemporaries will be performed by the festival choir, soloists, and orchestra. At 8 p.m. on Thursday, vocal and instrumental chamber music will be heard; a *Chorale* by J. S. Bach, a musical setting of *Psalm 117* by G. P. Telemann, and a setting of *Psalm 112* by G. F. Handel. On Friday at 10:30 a.m., Mr. Paul Henry Lang will lecture on Bach and his *B Minor Mass*; at 4 p.m. the first section of the Mass will be performed; and at 8 p.m. the second half will be heard. On Saturday at 11 a.m., a performance of excerpts from the three previous concerts will be free to Rollins students. Students are also permitted to attend the morning and afternoon rehearsals in the chapel on the 25th and 26th.

Robert Hufstader, director of the Rollins Conservatory, is the musical director and conductor of the Festival. Soloists are Maria Stader (soprano), Tatiana Troyanos (mezzo-soprano), Richard Palge (tenor), Ross Rosazza (baritone and professor of voice at Rollins), and David Laurent (bass). The chairman of the Bach Festival Choir, which is formed of both townspeople and Rollins students, is Lamar Simmons; the Choir's organist is Jane Hood Smith. Instrumentalists from the Florida Symphony Orchestra (Henry Mazer, conductor) will form the Festival Orchestra; Alphonse Carlo, professor of violin at Rollins, is the concertmaster for the Festival.

Bach's *B Minor Mass*, being a Catholic mass, is sung in Latin. It is divided into the five sections of the Catholic mass: Kyrie, Gloria, Credo, Sanctus, and Agnus Dei. Although the opening "Kyrie eleison" is in B minor, the work's other movements explore several related keys, and the final movement ("Dona nobis pacem") is in D major.

The Mass is on such a grand scale that it is doubtful that Bach ever truly envisioned it as a part of a church service rather than as an independent choral work. The Kyrie and Gloria of this enormous work were sent by Bach to the Kurfurst of Saxony in 1733, and by 1738 Bach had finished the Mass.

New members of O.O.O.O. are, L to R: Tom Doolittle, Pete Hall, Danny Carr, Rusty Deming, Larry Abraham, and Jim Emerson. Hank Hencken and Gary Woodhead are not pictured.

## O.O.O.O. Taps New Members

O.O.O.O. has disclosed the names of its eight senior members, revealed each year during Founders' Week. They are Tom Doolittle, Gary Woodhead, Pete Hall, Danny Carr, Rusty Deming, Jim Emerson, Larry Abraham, and Hank Hencken.

These eight members were chosen for the secret organization at the end of their freshman year or to replace members who did not return here to school.

Doolittle is a Delta Chi from Rye, New York; Woodhead is a TKE from Collingdale, Pa.; Hall a Sigma Nu, is from Winter Park. Carr, X-Club, is also from Winter Park. Deming, Sigma Nu, and Abraham, Delta Chi, are both

from Washington, D. C. Jim Emerson is a Lambda Chi from Miami, and Hencken is a KA from Greenwich, Conn.

O.O.O.O. had its origin as an old Seminole tradition founded by Chief Osceola. First brought to Rollins by President Hamilton Holt, O.O.O.O. aims to create, preserve, and foster the ideals of Rollins College.

The secret organization announces its meetings by flying a Thunderbird from the flagpole. Time and place of meetings are not announced.

Identity of O.O.O.O. members, chosen near the end of the freshman year or later as replacements is known only to other

members until officially disclosed during Founders' Week.

Dr. Dan Thomas, who until last year was a professor of physics here, was a member of O.O.O.O. He is now Dean of Faculty at Jacksonville University.

Senior members announced last year were Ed Florey, Bob Fox, Pete Kellogg, Frank Dunnill, Ken Salmon, Don Brown, Ed Rupp, Bill Lauterbach, and Leon Hollon.

## Rollins Student Obtains Role In T.V. Production

James Ragan, a sophomore from Louisville, Kentucky, will act in Chekhov's *The Boor* on television. *The Boor* will be taped at WDBO television studio in Orlando.

Last year, Ragan played the lead in *The Boor* at Rollins, under the direction of Helen Hirth. He believes that this is the best part he has had at Rollins College. For the television production of *The Boor*, Mary MacDonald, noted Orlando actress, will be playing opposite Ragan. The play is scheduled for video taping sometime during the middle of March, but Ragan does not know when it will actually be televised.

This summer Ragan, who has received good reviews for the many parts he has played for Rollins productions, participated in a Bertold Brecht workshop at Stanford University. Next year he hopes to study abroad at a German university as part of his major in German.

## Dr. Irvin Stock Will Conduct Contemporary Theatre Study

A workshop study of contemporary theater in New York City during spring vacation is the plan of Dr. Irvin Stock of the English Department. Hoping to be able to take a group of at least twenty students, he is still working out the final details of a tour which would leave Monday, March 16th, and would return to campus Friday, March 20th, giving four days in New York City.

The travel agent, who would take care of schedule details and obtain play tickets, estimated the cost of the proposed trip, including transportation, tickets, and hotel costs, to be about \$169. Transportation would be by air, although Dr. Stock mentioned that students could reduce the cost to \$132 by travelling by train, which would require that they start a day earlier and return a day later. These figures do not include meals.

Dr. Stock hopes to arrange a tour which would include attending at least three plays, possibly a foreign film, and possibly an opera. Although the group will eat lunch and dinner together, mornings will be free. The group will stay at the Taft Hotel, which is in the heart of the theater district. An analytical discussion will follow each play, as part of this contemporary drama workshop.

Strong possibilities as plays the group will see, as mentioned by Dr. Stock, are Arthur Miller's *After the Fall*, John Osborne's *Luther* (with Albert Finney), *Six Characters in Search of an Author* (off-Broadway), and *The Trojan Women*, by Euripides, also off-Broadway and an interesting example of the contemporary production of an ancient Greek play. Dr. Stock also is considering the feasibility of adding plays of Jean Genet and Harold Pinter to the itinerary.

### SCIENCE SERIES

Dr. Raymond T. Grenchik, associate professor of physics and astronomy, and director of the planetarium at Louisiana State University, will visit Rollins on Wednesday and Thursday, Feb. 26 and 27.

Dr. Grenchik will talk informally to classes of science students at the college and will discuss opportunities for advanced study and employment in astronomy.

He will present a talk on the "Origin of the Solar System," in the Graduate Physics Lecture Series. His host at Rollins will be Dr. John S. Ross, professor of physics.

## THE 'SPUR SPEAKS

A quick look back through old numbers of the SANDSPUR: gripes, recommendations and a few personal notes. Some apply to the present, and some could never happen again.

**To the Administrators** — Let the Ad Bldg plan for the distant future, they are qualified; let students work for the present good of the college. Few of us will be around here five years from now, we hope.

**Exhortation to the Social Groups** — Stop sending freshmen and sophomores to Student Council. Most senators get their training before going to Washington.

**From Dr. Holt** — Choose the professor rather than the course, the professor may still be alive. These professors could be hired and fired on this same basis.

**To the coeds** — Order beer once in a while. Not all of these guys wallpaper their rooms in gold leaf.

**To Scholarship Students** — Don't be afraid to offer constructive criticism about the college. You have a scholarship on the basis of continued high academic achievement, athletic ability or moral integrity or any combination of all three; not for keeping ideas to yourself.

**To recent visitors of the Class of 1930** — Drinking is not a problem per se; the problem is with those who do too much of it. If your son or daughter has been well-trained at home he or she won't become one of the problems.

**From history of campus clubs** — Hang together or hang separately. Spreading student interest too thin among too many groups will quickly bury the aims of all the groups.

**To IFC and Panhell** — Either enforce your rules or write them off the books. Rushing is a dirty enough game without sub rosa deals fouling up freshman guys and gals.

**From President McKean** — A good college will attract support — without begging. But, on the same hand, money always seems to be needed to make the college good and better.

**To Dean Darrah, Dr. Stone and Dr. Vestal** — when you stop quietly putting 20-year-old philosophers in their places, this year's seniors will come back to haunt you.

## "SPURS"

Judy, who is on the **Stoke List** on Eliz. II?  
The "Baby Jock" hit a homer.  
Marie, did Henry call last night?  
Scribble, what is the story on L.D.?  
Conover, it's about Dorman.  
Where have all the P.F.'ers gone?  
There's a Gallic in the Sigma Nu house, his name is Woody Phares.  
Is Parkey really accident prone?  
Jon, how were the groves?  
Rabbit, why were you on the fire escape at 6 in the morning?  
Sally Dembitz is married.  
How many Thetas went out to dinner Sunday night?  
Will the **Blob** please make up his mind?  
Roger Hammond is turning very very **Brown** and we don't think it is a sun tan!  
There were some **cold** jokes in the Snake house.  
Don Daus who sent you that valentine?  
**Molester** is in the Kappa house again.  
Muriell, whose boyfriend did you get this week?  
Ed Maxey had quite a dinner at the Pi Phi house or was it on the house?  
Tom Terrific and Nancy Drew are "engaged".  
**Prevost** finally settled down.  
Hann, who was your date Friday night?  
While in the KA parking lot Sabra found a **Twice-used** pin.  
How is the 6:30 Chip call, **Dottie**?  
The pledge pin and the lavalier didn't work so Pokey is starting a convent.  
Penny has gone **home** to the Lambdas.  
Sally pulled three Fox Days and went to Jamaica.  
There has been peace and quiet around the Lambda Chi house since Sue Gerber had laryngitis.  
Roger, how did you like your date? Hung up, yet?  
Pinned:  
Clark Smith (KA) to Sabra Whiting (Pi Phi).  
Engaged:  
Terry Cline (KA) to Linda Peterson (Phi Mu).  
Mike Howsen (Sigma Nu) to Sunny Thomas (Kappa).  
Congratulations to the new officers of:  
Delta Chi: President: Tim Haley  
Vice President: Ed Maxey  
Secretary: Peter Cowin  
Treasurer: Ron Dryfus  
Theta:  
President: Linda Schmitt  
Vice President: Candy Northway  
Secretary: Ann Johnston  
Phi Mu:  
President: Carole Lynn  
Vice President: Malitta Knaut  
Secretary: Peggy Adams  
Treasurer: Peggy Henry

## History's Great Lovers Reveal Beauty Secrets

Will bathing in wine keep you beautiful? Will a mask of powdered deer horn add a glow to your complexion? Will a perfume of desert flowers win you a kingdom?

An old Greek recipe for a facial mask was supposedly used by Helen of Troy — either before or after Paris abducted her to Troy and started the Trojan War.

"Take two pounds of barley, two pounds of bean flour, and mix with six eggs. After drying in the sun, grind the powder, and (this is important!) add one-sixth pound of powdered hart's horn.

"Pass this through a sieve and combine with 12 narcissus bulbs pounded in a mortar, 12 ounces of gum, and 18 ounces of honey."

At any rate her beauty mask must have been successful, for — according to one historian's reckoning — when Paris became smitten with her charms and carried her to Troy, Helen was 60 years old!

**Cleopatra was not born beautiful** — but being an artist with the henna dye and the kohl pot, she made herself so. Her perfume bottle, a small clay horse with a broken head, is now in a museum still emitting the faintest trace of the fragrance of ancient desert flowers.

Both Caesar and Marc Antony were used to heady fragrances; they had it rained on them from the ceiling at parties, were rubbed down with it in the baths, and at games sniffed it from swinging censers — yet they must have particularly enjoyed Cleopatra's — to judge by later events.

**If you're tired of towering beehives and other lacquered hairdos, you'll appreciate Josephine's subtle beauty secrets.**

The lady who later became Napoleon's Empress was born into the New World, in Martinique — and she knew how to change with the times.

The "fright" wig of the old French aristocracy, which included ships in full sail and towering castles — all sculptured of hair — had been swept away forever when Josephine entered the scene. Her husband, a loyalist sympathizer, had been executed during the French Revolution — but Josephine had been saved through her friendship with a revolutionary leader.

When she met another man of the hour, Napoleon, he was captivated by her doll-like grace, her neat, smooth hair-do, her simple high-waisted gown. For Josephine's beauty secret was simply the uncanny ability to throw rivals off-balance by her own charm and simplicity.

In a court glittering with beautiful women from all corners of Europe, tiny Josephine could easily have been lost in the crowd. But when Napoleon's roving eye spied another, Josephine found out from a talkative dressmaker what kind of gown her rival was planning for the next ball. Then Josephine had the drawing room sofa changed to clash violently with her rival's gown — while she, herself, looked like an angel upon it.

She and Napoleon had many ups and downs — but he didn't annul their 13-year-marriage until politics and the need of an heir made it absolutely necessary.

**Mary, Queen of Scots** was actually born a queen, appearing as she did, six days after her father's death. Educated in France, she reigned as Queen of France for a year — until her husband's death.

Mary lived, fought, and died as a queen — and as one of the most mysterious *femmes fatales* of history. When she returned to reign over Scotland, nobles and commonfolk hardened in other, more austere ideals, preacher John Knox — who denounced her interest in music and the other courtly graces.

Mary's husbands, caught up in the web of politics and in her own charm, all died untimely deaths. Darnley, whom she married because his blood was as noble as hers, became insanely jealous of a music master — and murdered him in Mary's presence. Bothwell — who abducted Mary and (some say) murdered the jealous Darnley in order to wed this fabulous Queen, ended life insane in a Danish prison. Mary herself became a prisoner of Queen Elizabeth — and was executed after a plot by admirers to put her back on the throne came to an end.

Mary's beauty secret? To impart a glow to her skin, she bathed in rare red wine. When she was still ruling, she asked for and received a regular government allowance for wine in which to bathe!

Take old beauty secrets — mix with politics, high intrigue, a mysterious allure, a depth of purpose — and what do you have? Charm — glamour — drama. And who is to say that perfume of desert flowers, baths in red wine, the color of a sofa — had no part to play in the lives of historic beauties?

Shakespeare provided one answer when he wrote: "For where is any author in the world Teaches such beauty as a woman's eye?"

Another — and sourer — answer was provided by some English lawmakers. In 1770, they introduced into Parliament a bill for the punishment of women who "shall betray into matrimony any of His Majesty's subjects" by the use of "scents, paints, cosmetic washes" and other beauty aids. Not only would these marriages be null and void, said the bill, but the guilty females would be prosecuted for witchcraft!

## Movie Review

### "Tom Jones"

By Tom S. Chomont

**Tom Jones** has been so over-rated by now that I hesitate to discuss any of its virtues. (It is not exactly a virtuous picture.) As you probably know, the film is from a scenario by John Osborne based upon Henry Fielding's novel. It is a satire, and a rather toothless one at that, since it is a satire of English customs of nearly 200 years ago. The most distinctive thing about the film is that it is very bawdy and occasionally naughty fun.

John Osborne and Tony Richardson have been something of a writer-director team both in film and the theatre. Richardson did both the stage and screen versions of Osborne's **Look Back in Anger**, and Richardson is currently directing Osborne's **Luther** in New York with Albert Finney, who here plays Tom Jones, as Martin Luther. I have never had the opportunity to see their work in the theatre, but their cinema offerings have not always spoken of brilliance. Mr. Richardson's film of Faulkner's **Sanctuary** was pure sensationalism, and not lively sensationalism at that. **A Taste of Honey** was clever, though very conventional, and nicely preserved the play's text. His films are hardly what could be called imaginative, and yet they are more than merely competent.

In **Tom Jones**, Richardson uses a shaky or hand-held camera for many scenes. It is a very perceptive imitation of the hand-held camera which is so much in vogue in the recent "experimental" films. He also pushes the device of addressing the audience directly to amusing and startling effect, and the stop-frame is also (a bit inexplicably) used, but since all of these devices are (somewhat arbitrarily) borrowed, and since the transitional devices are creakily old-fashioned, Richardson appears more of a student than master of the cinema.

Albert Finney demonstrates a great deal of gusto as the bastart-hero. Any real look at his capabilities as an actor are more or less curtailed by the film's frenetic style, but he does seem to exhibit an appropriately tongue-in-cheek earnestness and satiric egotism. Sushanna York is lovely and charming as the virginal Sophie, Hugh Griffith is lavishly boorish as Squire Western, Edith Evans is magnificently snobbish as the Squire's "cited" sister, and Joan Greenwood is superbly catty as an aging coquette. It is Joyce Redman as Mrs. Waters who really steals the comedy for herself.

At its best, **Tom Jones** is violently funny and wildly satiric (such as the hunting sequence, the eating match, and the ensuing erotic bedlam at Upton Inn), but at its worst it is superbly photographed mush.

**TOM JONES.** Directed by Tony Richardson. Screenplay by John Osborne from the novel by Henry Fielding. With: Albert Finney, Sushanna York, Hugh Griffith, Edith Evans, Joyce Redman, Joan Greenwood.

Subscription price — \$2.00 one term, \$3.00 two terms, \$4.00 full year.

# Council Reports

By David Schechter

There seems to be an end in sight to the library question. At the Feb. 17 Legislature meeting, President Grant Jennison read a letter from Head Librarian Mrs. Hansen regarding the editorial in the Sandspur. A few excerpts from that letter follow:

"Suggestions for the improvement in the library's services . . . have received the attention of all officials and the several committees concerned."

There is "in the files of the Student Association of Rollins College an application, dated Jan. 28, 1959, requesting the opening of the library on Sunday afternoons. This received a trial period through the remainder of the academic year, and the hours have become permanent."

In November of 1962 the library schedule was extended by the request of the administration to include the dinner hour (5:00 p.m. - 7:00 p.m.) on week days, this bringing the number of hours the library is open to 80 hours, which is the number recommended for universities by the Southern Association of College and Secondary Schools and is 14 more than the 66 hours recommended for four year colleges."

To supplement the letter, Jennison had the following results of a survey of colleges and universities: Out of 1,317 schools, 28 were open less than 35 hr/wk; 198, from 35-49 hrs.; 398, from 50-64 hrs.; 479, from 65-79; 183, from 80-94 hrs.; 31, over 95 hrs/wk. The letter plus other numerous reports are now in the hands of a special committee of interested students. It is hoped that the committee will report back with recommendations in the near future.

One of the most talked about motions was one by Joe Collins to assess everyone for Fiesta, this fee to be collected as a part of the Association fee. He believes that if the Greeks are to be assessed, everyone should be. There was much discussion on both sides of the question. During this discussion, Robin Robinson said that Fiesta should be made so desirable that no one would want to miss it, and then no one would have to be assessed. Since no solution seemed to present itself, the motion was voted down and discussion deferred until next week.

Dave Schechter reported that Mr. Garland said he would put sandwiches at the start of the line occasionally as a third choice. Starting March 1, he will serve three entrees as often as possible. Schechter said that he would check into the possibility of having peanut butter and the jelly separated instead of mixed together.

To help point up the importance of attending convocations, the Legislature will march in the convocation procession.

After Mann's address, degrees were conferred, the choir sang national anthems, and Dean Darrah gave the benediction.

Rollins students and student groups are offered the chance to compete with other accredited four-year and junior colleges in Florida for the annual A. P. Phillips Achievement Trophy. Awards are given to the student or student group submitting the best presentation of an undergraduate activity which took place prior to April 1st of each school year.

Competitors' entries must be in scrapbook form with an introductory text explaining objectives and accomplishments. These scrapbooks, which are returned to entrants, must be accompanied by an attesting letter from a member of the faculty. Entries must reach the A. P. Phillips Company, Legion Place at Lake Ivanhoe, Orlando, Florida, not later than March 31.

This trophy, yearly-retainable and permanent in replica, is the privately endowed idea of the advertising company and has been an annual award since 1956. The trophy is awarded according to the following classifications: Four-year college or university with less than 3,000 students, Four-year college or university with more than 3,000 students, Junior college and Negro college.

The four 1963 winners of the trophy were "Dollars for Scholars", University of Florida; R. O. T.C., Florida Southern University; Student Government Association, St. Petersburg Junior College; and St. Leo College, St. Leo, Florida.

On Saturday, February 29, 1964, all Rollins fraternity women and local alumnae will have an opportunity to participate in a Panhellenic Leadership Conference. It has been several years since such a program has been offered at Rollins, and the Panhellenic Council is hoping to make it an annual affair. The conference, to be held in the Student Center from 2:00-5:00 P.M., is to be divided into two parts.

To start the meeting, Mrs. Louise P. Mills, the Assistant Dean of Women at the University of Miami, will talk on the importance of Panhellenic organization in the fraternity system. Mrs. Mills, a native of Chattanooga, Tennessee, received her A.B. and M.A. at the University of Miami. She is president of the Southern College Personnel Association.

After the general session, the old and new officers of the seven sororities represented at Rollins will divide into eight groups. Mrs. Lucile Carson, a past Beta Province President, past National Grand Secretary of Pi Beta Phi, and a present member of the Alumnae Advisory Committee, will lead the group of presidents. Mrs. Anne K. Ramsey, C.P.S., Florida Division Secretary of the National Secretaries Association (International), and Administrative Assistant to President Hugh F. McKean, will talk to the corresponding and recording secretaries. Mrs. Betty Johnson, a Rollins graduate and member of the Phi Mu Alumnae Advisory Committee, will lead the group of treasurers. Mrs. Margaret Husmann, an active member of the Kappa Alpha Theta Alumnae Advisory Board, will speak with the social chairmen. Mrs. DeeAnn Thomas, a past president of the Pi Beta Phi Alumnae Advisory Committee, will lead the group

of scholarship chairmen. Mrs. Mary Louise Farley of Jacksonville, the Omega Province President of Alpha Xi Delta, will talk to standards chairmen. The Rollins Dean of Women, Mrs. Helen Watson, also an Alpha Xi Delta, will lead the group of pledge trainers. The group of Panhellenic delegates will be lead by Mrs. Rose Naetzker, who is a Sigma Sigma Sigma and the president of the Orlando-Winter Park City Panhellenic Council.

A welcoming address will be given by another Alpha Xi Delta, this year's conference advisor to the Rollins chapter and a past National Third Vice-President of her sorority, Mrs. Mary Bates.

The aim of this year's conference is to train sorority leaders, thus strengthening the Rollins Panhellenic Council by having it composed of strong, working groups which can elevate the name of sororities in general.

lins Dean of Women, Mrs. Helen Watson, also an Alpha Xi Delta, will lead the group of pledge trainers. The group of Panhellenic delegates will be lead by Mrs. Rose Naetzker, who is a Sigma Sigma Sigma and the president of the Orlando-Winter Park City Panhellenic Council.

## Senior Spotlight

# Student Must Discover Interest First, Knowledge Will Increase Proportionately

By Peggy Adams  
Feature Staff

Lin Morss, a senior Phi Mu, was born in Boston, Massachusetts. During the summers of her college years she has twice attended Harvard summer school and has been employed at the Harvard School of Public Health as a medical technician. Upon graduation, she plans to be a surgical research technologist. Her major, philosophy, will help her with the research principles.

She is studying quantitative analysis this year to help her out with the technical aspects.

Lin doesn't believe in sticking to one specific field in a liberal arts college. Living by this principle, she has investigated politics, science, creative arts, athletics, and the student government, to name a few. She feels emphatically that the freshman and sophomore years at college are times in which students should do as much as possible to acquaint themselves with as many subjects as possible. The junior and senior years should be a time when students cultivate special interests, but without limiting themselves too much.

Lin believes that as the students discover their interests, their knowledge will proportionately increase. "It is a fortunate person who can cultivate a real enthusiasm for academic merit."

In criticizing Rollins, Lin said, "Too often, interest is subdued by either social pressure or professors themselves." For example, she meant that if professors would maintain more OPEN MINDS about new ideas which students have, instead of immediately coming up with criticism, then the students might produce better work. "If the students could discover their own mis-

takes, they would not lose their enthusiasm.

"If the administration and professors would take a more laissez-faire attitude toward the students and curriculum, the students themselves could better develop their own interests and thus attain a higher degree of learning." However, she feels that the con-

Lin Morss

ference plan is a necessary and helpful element in advancing students' abilities.

One of Rollins' best attributes, she feels, is in the great variety of opportunities that it offers. It is thus possible for earnest students to widen the scope of their activities. "Although Rollins is a small college, it allows the students to take part in many activities. I feel the students all have the proper motivation basically, and that it is up to the faculty to aid them in their pursuits with gentle guidance."

In looking back over her four

years at Rollins, Lin says that "although at times I had my doubts about what I was really trying to accomplish here, as all students do, I believe now that I have received many intangible benefits which no one could have predicted in earlier years."

## Mrs. Hurt Has Green Thumb

By Mary Taylor

Lakeside has gained one of the best housemothers on campus. Mrs. Lennie Hurt was housemother on the first floor of Elizabeth Hall last year and always had time for any spur-of-the-moment get-togethers or surprise parties on the floor. During exams she usually planned feasts for the girls, which were really a welcome break at the midnight hours! This year she has carried on the tradition at Lakeside.

Mrs. Hurt's green thumb has kept the dorm supplied with flowers, this being one of her main hobbies. When she was living in Virginia, she was known for her prize-winning roses.

Among other interesting things in her room, Mrs. Hurt has a print of Mont-Saint-Michael, which brought up the subject of Europe. She had purchased quite a few prints while she was there

in 1949. Her grandson having married a French woman, she was able to see Paris with an expert guide when she was there.

Among other globe-trotting ex-

Mrs. Lennie Hurt

peditions, Mrs. Hurt visited California last year. Her son, who was doing research work for M.I.T. at California Tech, lived there with his wife. This year she will be spending her summer with her family in Nantucket.

Born in southwest Virginia, Mrs. Hurt has remained a true Southerner. She told me how much she has enjoyed working with the students here at Rollins for the past two years. She participates in the cultural functions of the college and commented on the fine plays that Rollins produces. She also enjoys the Rollins Concert Series and even plays the electric organ herself.

When asked what she considered the hardest problem in respect to her job as house mother, Mrs. Hurt said, "Domesticating the girls." We know Mrs. Hurt will be as much of a success in Lakeside as she was in Elizabeth Hall.

## "Pro & Con" Will Discuss Labor Rights

The recent Supreme Court decision concerning union rights in Florida will be the subject for the March 1 WFTV "Pro and Con" program, a television discussion program presented jointly by WFTV and the Rollins Center for Practical Politics, headed by Dr. Paul Douglass.

"Has the Outlawed Agency Shop Hurt Labor?" is the title for the video-taped program, seen Sundays at 6 p.m. Guest for the affirmative will be Richard Frank, attorney for the International Teamsters Union, from Tampa. Speaking for the side of management will be Norman Burke, Orlando attorney. Student panel members, who will direct questions at the two guests, will be Lou Farelli, Lee Mingle-dorf, Carole Semmons and Catharine Card.

The speaker will be concerned with the effects of the May, 1963, unanimous decision of the Supreme Court that the Florida Constitution "right to work" clause outlaws agency shops as well as union shops. They will also discuss the Taft-Hartley provisions which allow union shops in some states and "right to work" laws in other states.

## St. Pete Mayor Speaks

Herman Goldner, the mayor of St. Petersburg, Florida, spoke at the Center for Practical Politics last week, proposing the abolition of Florida's 67 counties and their replacement by five regions as the units of local government. He stated that such a plan is necessary for the effective economic administration of a state which is soaring in population and in metropolitan regions.

According to Mayor Goldner, such a reorganization of the state's local government would:

throughout his academic career here, is from Fort Lauderdale, Florida. Both his parents are high school math teachers.

In addition to his academic achievements, Dave has been listed this year in "Who's Who in American Colleges and Universities." A member of the Sigma Nu fraternity, he is vice president of his senior class, president of Omikron Delta Kappa (national honorary service fraternity for upperclassmen), a member of the Key Society, and a Rollins Scholar.

## Parents' Clubs Elect President

The recent Parents' Weekend resulted in the election of Mr. Clarence F. Smith, father of Ruth Anne Smith, a junior music major and transfer from University of Indiana, as president of the Parents' Club organization.

The Constitution of the Parents' Association states that all parents of undergraduates are automatically members of this organization, and there are as yet no dues.

Objectives of the Association, as stated in its Constitution, include the planning of an annual Parents' Day, provision for regional parents' clubs, support of projects which will promote the interest of Rollins College, and provision of Rollins propaganda material to members who wish to help "other young people to decide to become students at Rollins College."

## Dr. Taylor Discusses Modern Poetry And Cultural Dilemma

"Modern Poetry and the Cultural Dilemma" was the subject for the Visiting Professor Series talk last Wednesday night by Dr. William E. Toyler, Humanities professor at Seton.

In tying the modern poetry movement schism to the schizoid personality of modern America, Dr. Taylor read a poem representing the "Academic" camp and a Ginsberg, evoking the spirit of the "beat" movement.

Dr. Taylor has been invited to talk on beat poetry, and to read aloud more of the same, for tonight's Literary Society meeting in Woolson House.

Rose and Dagger Insignia of the Army Intelligence and Security Branch.

## Military Intelligence Works With Our Research Facilities

The insignia of the Army Intelligence and Security Branch is a heraldic sun in gold charged with a blue rose superimposed on a dagger. Protruding from the sun are four straight and four waving rays. The straight rays symbolize the four points of the compass and indicate the global mission.

It is said that the sun symbolizes Helios, the sun god, who could see and hear everything. The sun beneath the rose—an ancient symbol for secrecy ("sub rosa")—refers to the surreptitious operations of the branch. The partially concealed unsheathed dagger alludes to aggressiveness, as well as to the elements of danger which are inherent in the branch's mission.

Students who have been in the library during the evening hours may have noticed Army personnel engaged in research activities. These men, who wear this insignia, belong to the 479th Military Intelligence Detachment (Strategic), a part of the Army Intelligence and Security Branch. Rollins College sponsors the Detachment and makes available to them reference and research material, as well as providing working space and office facilities.

The 479th Military Intelligence Detachment (Strategic) was organized in April, 1949. Dr. Hamilton Holt, then president of Rollins, signed the affiliation agreement making Rollins the Detachment's sponsor. The founder and first commanding officer was Colonel Rhea M. Smith, present head of the History Department, who

served with the 479th until his retirement in June, 1961. During the fifteen years of the detachment's existence, many Rollins students have been affiliated with it.

The 479th's mission is one of conducting basic research in an assigned geographic area, analyzing and evaluating intelligence source material, and producing intelligence for the Department of Defense.

In addition to forty-eight paid drill assemblies, detachment members perform two weeks annual active duty training with one of the Department of Defense Agencies. Persons who are interested in fulfilling their military obligation while at the same time participating in an interesting, as well as financially rewarding, activity may contact the Detachment's commanding officer, Lt. Colonel Norton O. Braxton, at 241-6732 or Sp/4 Doug Kerr, at MI4-9035.

## United Nations Director Will Speak At C.P.P.

Donald C. Dunham, Director of Public Services of the United States mission to the United Nations, will speak at the Center for Practical Politics at 4 p.m. on Wednesday, Feb. 26. The title of Dunham's speech will be, "The Organization and Program of the United States Mission to the United Nations." This talk is open to the public.

# Prof. Defines "College Student"

By Steffen Schmidt  
Feature Writer

I just found a very interesting item here inside my desk which should play an enlightening role in our understanding of not only each other, but indeed of student life as a whole. It is entitled **Changing Values in College** and was written in 1957 by Philip E. Jacob, a professor at the U. of Pennsylvania. Its thirteen points are not "useless facts," but intelligent material which every person who values serious talk and reflection will be eager to absorb.

1. The values of American college students are remarkably homogeneous.
2. Students are content in day-to-day activity and in their outlook for the future.
3. They are **self-centered**—yet expect to conform to the status quo, daring not to be individualistic.
4. They are most **tolerant**—while generally conformists themselves, American college students see little need to insist that each and every person be and behave just like themselves.
5. The traditional moral values (honesty etc.) are valued by almost all students, but they are not inclined to censor those who do not value them.
6. Students express a need or concern for religion, but it does not carry over as a guide for them in the secular world.
7. Students are dutifully responsive towards military obligations as a matter of course, but take little interest in the United Nations or politics in general.
8. American college students are generally **unconcerned** about world affairs.

9. Vocational preparation, skill, and experience in social adjustment head the rewards which students crave from higher education.

### Value—Outcomes of a College Education

1. More student homogeneity at the end of four years of college.

2. The primary impact of college is to **socialize** the individual—to refine, polish, or shape up his values.

3. After four years of college, the American college student is most concerned with status, achievement, and prestige.

4. The impetus to change values does not come primarily from the formal educational process.

## THE SLOW RUSH

Illustrated below is the membership pin of a brand-new national fraternity called Signa Phi Nothing. To join Signa Phi Nothing and get this hideous membership pin absolutely free, simply take a pair of scissors, cut out the illustration, and paste it on your chest.

Let me hasten to state that I do not recommend your joining Signa Phi Nothing. The only thing I recommend in this column is Marlboro Cigarettes, as any honest man would who likes good tobacco and a good filter, whose heart is quickened by a choice of soft pack or Flip-Top Box, and who gets paid every week for writing this column.

I am frankly hard put to think of any reason why you should join Signa Phi Nothing. Some people, of course, are joiners by nature; if you are one such, I am bound to tell you there are any number of better organizations for you to join—the Cosa Nostra, for example, or the Society for the Placing of Water Troughs in Front of Equestrian Statues.

But if you insist on joining Signa Phi Nothing, let me give you several warnings. First off, it is the only fraternity which admits girls. Second, there is no pledge period; each new member immediately goes active. Perhaps "inactive" is a more accurate word; there are no meetings, no drives, no campaigns, no sports, no games, no dues, no grip, and no house.

The only thing Signa Phi Nothing has in common with other fraternities is a fraternity hymn. In fact, two hymns were submitted to a recent meeting of the national board of directors (none of whom attended). The first hymn goes:

*Signa Phi Nothing,  
Shining star,  
How we wonder  
If you are.*

The second hymn, rather more poetic in content, is to be sung to the tune of *Also Sprach Zarathustra*:

*A Guernsey's a cow,  
A road is a lane,  
When you're eating chow,  
Remember the main.*

Pending the next meeting of the national board of directors (which will never be held) members are authorized to sing either hymn. Or, for that matter, *Frenesi*.

Perhaps you are wondering why there should be such a fraternity as Signa Phi Nothing. I can give you an answer—an answer with which you cannot possibly disagree: *Signa Phi Nothing fills a well-needed gap.*

Are you suffering from mental health? Is logic distorting your thinking? Is ambition encroaching on your native sloth? Is your long-cherished misinformation retreating before a sea of facts? In short, has education caught up with you?

If so, congratulations. But spring is upon us and the sap is rising, and the mind looks back with poignant longing to the days when it was a puddle of unreason.

If—just for a moment—you want to recapture those careless vaporings, that warm, squishy confusion, then join Signa Phi Nothing and renew your acquaintance with fecklessness. We promise nothing, and, by George, we deliver it!

© 1964 Max Shulman

\* \* \*

*We, the makers of Marlboro Cigarettes, promise smoking enjoyment, and we think you'll think we deliver it—in all fifty states of this Union. Marlboro Country is where you are.*

# Tennis Squad Opens Season

Coach Norm Copeland's Rollins College tennis squad faces its 1964 season this Thursday traveling to Tallahassee to face Florida State University. The match with the Seminoles will kick off what Copeland believes is one of the strongest schedules his netters have ever had to face.

The Rollins tennis mentor, entering his ninth season as head of the Tar netters, has lined up 17 dual matches and a state tournament for his 1964 charges.

Rollins will face such strong squads this year as Miami, Notre Dame, Georgia Tech, Florida, Pennsylvania, Duke, Clemson, and Davidson.

Heading the corps of the 1964 Rollins netters are tri-captains Duane Ackerman, Bob Balink, and Tom Doolittle. Three other lettermen returning for the upcoming campaign are Pete Cowin, Steve Ward, and Dick Weltmann.

"Last year we won 13 of 21 matches," said Coach Copeland, "and looking ahead to our strenuous schedule I'd say that we will have to work real hard this season to match 1963's record."

Three freshman performers could make Copeland's work easier for him. Bob McCannon comes from St. Petersburg Senior High School where he was a varsity player for three seasons. He has performed in numerous tournaments.

Buck Starbuck won the New York State Boys title and comes to Rollins after being ranked fifth in the East in Boys Division. A third freshman, Harry C. Pope, was captain of the Choate tennis

squad for two seasons and has looked good in early practices.

Coach Copeland and his Rollins netters have a lot of hard work ahead of them if the Tars

Norm Copeland

are to record a winning season in 1964, but Copeland is used to winning two out of every three matches his squad competes in, as is evidenced by his fine record of 94 victories against 46 defeats in the past eight seasons. This tradition should prove hard to break.

The 1964 Rollins College tennis schedule: at Florida State, Feb. 27; Florida, Feb. 29; at Florida, March 3; at Florida Southern, March 9; Pennsylvania, March 10; Georgia Tech, March 24; Notre Dame, March 25; Cumberland, March 26; Clemson, March 30; Duke, March 31; Davidson, April 1; Hope, April 2; Davidson,

April 3; Amherst, April 3; Stetson, April 15; at Stetson, April 22; State Tournament, April 24-26 at Cape Coral; Miami, April 30.

## Girls' Sport Spotlight

### Physical Education Improving Greatly

By Sally Charles  
Assistant Sports Editor

Penny Moore is a senior at Rollins this year and is known to have taken a few English courses during her college career. She has been a member of the women's R Club for three years and has varsity letters in swimming, softball, volleyball, and basketball.

Penny explained that since she has been at Rollins, the women's physical education program has improved immensely. She explained that many new sports have been added to the curriculum, such as field hockey, fence-

Penny Moore

ing and modern dancing. Also for the first time in many years, Rollins is offering horseback riding.

Penny is a member of the Lower Court and Secretary of the Student Association. You might have noticed her last weekend, busily organizing the program for Parents' Weekend. She also was chosen for "Who's Who in American Colleges and Universities" and was Rush chairman for her sorority, Kappa Kappa Gamma.

Penny is an energetic girl and is always ready to participate in softball or volleyball, her favorite sports. Last year she was captain of the winning Kappa volleyball team.

### Rollins Drops Game To Florida Southern After Strong Fight

Against a Florida Southern team with an impressive height advantage, Rollins held its own until there was 4:53 left in the first half. At this point Rollins went cold and lost their lead. The Tars were out-rebounded in the first half 17-19.

Trailing 40-33 at the start of the second half, Rollins matched the Moes basket for basket until the Tars hit a 3-minute cold streak and dropped behind 70-48. Coming back strong in the last stages, Rollins surged to within eight points of Southern, only to have time run out.

Butch Hearn and Phil Kirk led Tar scorers with 21 and 17 points respectively. In the rebound department, the teams were all tied up with 36 apiece.

# Baseball Practice Is Underway Thirty-five Games Scheduled

Baseball practice is underway at Rollins College, as Joe Justice begins his 18th season as coach of the Rollins Tars.

Thirty-five games and two tournaments comprise the Rollins 1964 schedule, with the opening dates being March 12-14, when the Tars travel to New Orleans to take part (along with Tulane, Memphis State, and L.S.U.) in the Crescent City Invitational Tournament.

Rollins will host its annual Invitational Tournament March 30-April 4, with Colby, Davidson, and Duke joining the Tars for the week of doubleheaders. Three new schools have been added to the 1964 Rollins baseball schedule. They are Colby, Susquehanna, and Valparaiso.

Coach Justice has nine lettermen returning this season, but only one of these veterans is a pitcher. The Tars will be hurting at the mound. Three of last year's starters were expected to help the Tars this season, but Terry Williams, a right hander with a 4-2 record and a .249 era last season, is the sole returning hurler.

"Lack of experience will make a great difference in our play this year," stated Justice, "but even so, we have the best-looking freshman prospects we've had in many years, and I expect Rollins to improve over last year's record of 16-19-2."

The 1964 Rollins College baseball schedule: March 12, 13, 14, Crescent City Invitational Tour-

namment, New Orleans; March 20-21, Ohio State (H); March 23-24, Amherst (H); March 25-26, Susquehanna (H); March 27-28, Valparaiso (H); March 30-April 4, Rollins Invitational Tournament (Colby Davidson, Duke, and Rollins in daily doubleheaders beginning at 12:30 and 3:30); April 10, Stetson at DeLand; April 11, Stetson (2) (H); April 17, Jacksonville (H); April 18, Jacksonville

Joe Justice

(2) at Jacksonville; April 24, Florida Southern at Lakeland; April 25, Florida Southern (2) (H); May 1, Miami (H); May 2, Miami (2) (H); May 8, Tampa (H); May 9, Tampa (2) at Tampa; May 15, Florida at Gainesville; May 16, Florida (2) (H).

## Men's Sport Spotlight

### Rollins Life Is Stimulating

By Jeffrey Leeds  
Sports Staff

Every campus needs leaders, and Rollins is fortunate in having Tom Doolittle as one. At the Choate School, Walingford, Conn., Tom was very active in sports. Besides being co-captain in baseball, he lettered in football, basketball, and tennis.

At Rollins, Tom has maintained his excellence in tennis. He

Tom Doolittle

modestly states: "One of the greatest thrills I've had is a victory against Miami, our toughest rival for the past three years." Tom has participated in club tournaments, becoming the Coveleigh Beach and Tennis Club champion for three years, and was assistant tennis pro for one summer at Westchester Country Club.

On campus, Tom has been a very active member of the Rollins family. He has been a member of the student council for all four years, president of his sophomore class, and a member of the Men's Rules Committee, In-

vestigation Committee, I.F.C., house council president, and vice president of Delta Chi. Tom is displaying his many fine capabilities and versatility by being Chairman of Lower Court, President of the "R" Club, and a varsity letterman. He is on the Student-Faculty-Trustee Committee, Orientation Committee, Standards Committee, and Chapel Staff. Because of these and other activities, he has been named for **Who's Who Among American Colleges and Universities**.

Tom's affection toward Rollins is summarized in his statement: "As far as I'm concerned, my four years here have been as informative and stimulating as could ever imagine. In general, the beneficial aspects of these years have come through faculty and the administration, as well as through student acquaintances. I feel extremely fortunate that I have had the opportunity to attend Rollins."

### I. M. Standings Are Very Close

With the close of the soccer season, men's intramural standings have taken on a different complexion. By winning the soccer championship, the Independents have moved to within 85 points of the league leading Sigma Nu. Lambda Chi, previously in third place has dropped to sixth, 235 points behind first.

Organization	Total Fall Term	Total At Present
Sigma Nu	435	610
Independents	315	525
Delta Chi	255	455
Kappa Alpha	250	415
X-Club	250	385
Lambda Chi	265	375
TKE	242½	332½

# Indies Capture Championship Of Intramural Soccer Season

By Steve Schoen  
Sports Staff

It's finally over. Despite rain, sand, postponements and injuries, intramural soccer is finished for another year. The three play-off games took place on February 15 and 16.

The first game on Saturday saw the Independents and the KA's meet for the third time. Each team had won once before. In their last meeting, KA had stopped an Indie 5-game winning streak with a 2-0 victory. The tables were turned in the play-offs as the Independents won 2-0 on goals by John Hay and Chuck Sarich. The first goal came with one second left in the first quarter. Both teams must be "commended" for an exceptionally clean game.

In the afternoon tilt, Sigma Nu met the first place Delts. Because of all the playoffs for second, third, and fourth places, Delta Chi had not played in over a week.

But they still had a strong team, especially on defense. The Sigma Nu forward wall played a particularly fine passing game, but they were unable to score. The game ended in a 0-0 tie. The Snake's kicking ace Ricky Mello won another game as he drove four shots passed the opposing goalie. As all the free kicks count as one goal, Sigma Nu won 1-0 to put them in the final game with the Independents.

The two teams, again meeting for the third time this season, were both up for the game. This writer will probably receive another letter for saying this, but the last match of the season had more than its share of fouls. The only score of the game came in the third quarter as the Independents' leading scorer, Chuck Sarich, put one in the net to give his team a 1-0 victory. The Independents, who won 7 out of their last 8 by shutouts, are the new intramural soccer champions.

# Sports Car Racing Is No. 1

Did you know that motor sports have become America's number one spectator sport? It's a fact! Latest attendance figures show that motor sports outdraw major league baseball. And motor sports are number two in participation sports—second only to bowling.

More than 5,000 sports car races were held in the U.S. last year, with total racing miles exceeding three million. According to information supplied by the "Jaguar Journal", the guiding forces behind America's big boom in auto racing include the nation's three largest organizations of active motor sports participants: the Sports Car Club of America, the U.S. Auto Club's road racing division, and the National Association for Stock Car Auto Racing.

Stock car racing accounts for more than 50 per cent of the total number of auto races held annually in the U.S., according to Bill France, Sr., President of NASCAR. This 12,000-member association supervised over 1,200 stock car races last year, which were attended by nearly ten million fans! France says the typical audience for any of the big weekend events runs from 40 to 70 thousand thrill-seekers. The number of stock car tracks across the country currently exceeds 500.

Sports car racing and formula car racing are the two other most popular contests for speed buffs. Jim Kaiser, Competition Director for the Sports Car Club of America, reports that 221 sports car races were sanctioned by the SCCA last year, comprising 90 per cent of the important sports car races in this country. These contests thrilled more than a million spectators.

Formula car racing involves single seat, open wheel (no fenders) racing cars that are custom made. The name "formula" derives from the design restrictions imposed on these cars by the FIA (Federation International de l'Automobile). These construction restrictions and specifications are so exact that, if you wanted to buy one of last year's formula race cars, you'd have to pay about \$30,000.00! Competition Director Kaiser says at the present time the U.S. does not have a regular formula racing program of professional races for the highest formula cars—but such a program will probably be instituted within the next five years.

Do you have to be a speedway racer to enjoy behind-the-wheel competition in motor sports? Not at all! By far the greatest number of motor sport participants are involved with "non-speed" events such as a rally, tour, gymkhana or "concours d'elegance"—all trials or tests of auto and driver.

Sports car clubs like the Jaguar Clubs of North America organize and execute these non-speed events—and sometimes come up with highly unusual programs like rallies which inspire blind children to master braille, or contests in which every inch of a car's finish is subjected to the unbiased scrutiny of judges' spotless white gloves!

A rally is a motor event in which driver precision and control are tested on a cross-country course. In a typical rally, the driver's navigator—the person in the passenger seat who does the "figuring" and gives the driver instructions and directions—is handed at the moment of take-off a set of sealed instructions. Check posts along the way

(some hidden, some not) clock the car's time, and any variation from the speed specified for that stretch cost points.

With turns, hills, the passing of other cars and the million other incidents that affect average speeds, it is tremendously difficult to keep exactly to the re-

it is impossible to go at any speed. The cars take it one at a time. Also growing in popularity at gymkhanas are the slalom races, often done on a cleared hillside. Here, much like skiers, cars zig-zag downhill in a tortuous course.

A tour, which may include a

U.S. AUTO CLUB speedway cars move through the 31 degree banked west turn of the world famous Daytona International Speedway at Daytona Beach, Fla. Formula car racing — so-called because of the cars' design restrictions — is limited to single seat, open wheel racing cars that are custom made.

quired averages; some teams show up with complicated devices to help them achieve the enormous accuracy rallies exact. Secrecy surrounding these devices account for much of the atmosphere of intrigue and excitement that rallies generate among enthusiasts. One driver and his navigator turned up at a rally with an electronic computer as the back seat passenger!

Many rallies offer unusual rules—such as directions hidden in a cryptogram for the driver and his navigator to figure out. But perhaps the most unusual rally is the annual event of the Tonawanda Touring Club in Western New York, which invites students from the New York State School for the Blind at Batavia to act as navigators—by reading braille maps! The president of the club, Richard Dargusch, says the rally is used as an incentive for the youngsters to read braille—and qualifying for the event is used as an aid to such scholarships. Since the Tonawanda group had the idea seven years ago, other groups around the country have followed suit.

A "concours d'elegance" is perhaps one of the statliest of motor sports. To enter one you must rebuild—or build a replica of—an antique vehicle, complete to the design of nuts and bolts. Almost all of the parts will have to be turned out on special order—and a bill for \$11,000 is not uncommon.

During the "concours d'elegance" drivers take their vehicles in a stately procession to a local showroom where they immediately don overalls and start cleaning and polishing. Judges wearing white gloves will then judge each car—and too bad for the contestant who has a spot of dust under his fender!

A gymkhana on wheels is a series of events which test driving skill. A favorite feature is the serpentine course marked by plyons through which drivers may twist and turn so tightly that

rally or other events, occurs when club regions and divisions get together and converge at an agreed-on point. The San Diego division and the Los Angeles division may drive to a certain point and then make a tour of the wine growing regions of California. In some tours, the cars get left behind—as when the Jaguar Clubs of North America sponsor a charter flight to Europe so members can attend the Le Mans, Grand Prix, and Lottery G.P. race championships.

## Golf Team Defeats Dade Jr. College Play Again Feb. 28

By Keith Briethaupt  
Sports Staff

On Saturday, February 15, the Rollins Junior Varsity golf team defeated Dade Jr. College of Miami, 15½-11½. The medalist for the day was Sam Martin with a 37 plus 36 for 73.

In the first match, Dick Haase lost to Wes Smith, 2-1 and Mike Candela tied Brian White, 1½-1½. For the best ball, Rollins lost 2-1.

In the second match, Sam Martin defeated Ken Moran, 3-0, and Al Flusser defeated Richard Nichols, 3-0. Rollins won 2½-½ for best ball.

In the third match, Joe Browning defeated Bobby Erra, 3-0, and John Hay lost to Jerry Fleisher, 3-0. Rollins lost the best ball 2½-½.

The Varsity golfers will resume their competition on Friday, February 28, against Florida Southern. The matches will take place at Lakeland.

## Sports Editorial Intramural Issues

by Steve Schoen, Sports Staff

There is probably no location in the United States which is served by only one newspaper. The advantages of a multiplicity of news coverage are quite self-evident. It would be ideal to find one of these media supporting an issue, one attempting to discredit it, and one trying to present an impartial middle viewpoint. Because of this, the SANDSPUR is not in an enviable position. Space and editorial necessity dictate that only one position may be taken.

During my 3½ years at Rollins it has become apparent that in at least one area of the news more than seven viewpoints are possible—intramural sports. No matter how objectively an article is written there will never be complete agreement. I say "never," but perhaps that is too all inclusive. Certainly, a reporter could win friends and influence people by composing an article which is overflowing with nice things to say about both teams, by ridding his mind of such nasty talk as "poor sportsmanship" and "second rate playing," by mentioning every player's name and saying how much he contributed to the team effort, etc. Yes, that would be nice. Dull perhaps, but nice.

We must face facts. There are certain aspects of the intramural sports system which many students would rather relegate to their subconscious or better yet, completely eradicate from their knowledge.

Perhaps the proverbial expression, "making a mountain out of a molehill" might apply. But this writer firmly believes that no facet of life is an entity unto itself. In the long run, this constant betrayal of one's beliefs will have its ramifications in other, more important areas. Criticism can be one of the strongest constructors of a better system. Honesty to one's beliefs must be paramount in every action.

But the printed word is not necessarily the right word. Despite my cynicism, despite my sarcasm, I am fully aware that other viewpoints exist. If what is printed in this column is not in accord with your sentiments, WRITE. Do something constructive. Refute my statements. You, all of you, participate in the activities reported upon. The "other newspapers" of Rollins are printed by the students. Insist on your rights.

## Panama Crisis Spelled Out

## Self-Interest Explains Panama

The Panama crisis of 1964 has its roots not only in the economic, social and political conditions of the nation, but to a very great extent in the "Panama Revolution" of 1903, and the role which the United States played in it. The fact that within days after the revolution a treaty was signed with the fledgling Government of Panama, by which the United States acquired the right to build the canal and to operate a Canal Zone "as it were sovereign" within it, is the keystone to an understanding of demands today that that very treaty be negotiated and revised.

It is not correct to state, as many politicians in many Latin American countries have since 1903, that the U.S. carried out the revolution, thus intervening in the domestic affairs of Colombia, of which Panama was then a province. Yet the distinction is a bit technical. The birthplace of the Republic of Panama in a sense was a room in the old Waldorf-Astoria Hotel in New York, where a French engineer, Philippe Bunau-Varilla, plotted with a few Panamanian revolutionaries to carry out a revolution. The plans were drawn, a constitution written, a flag prepared by Mme. Bunau-Varilla's busy fingers, a code for communication devised—and, most importantly—cash in the form of \$100,000 provided as a personal loan from Bunau-Varilla to the revolutionaries.

During the weeks between September and early November, 1903, the French nation-maker was often in Washington and talked with Secretary of State John Hay and President Theodore Roosevelt. There is no hard evidence that they shared in the plot in so many words, but there is no doubt that they were aware of it. The sealed orders to two U.S. naval vessels to proceed to Panama under forced steam, and to prevent Colombian troops

## Arthur Wagner Has Run Down On Broadway

Arthur Wagner, director of the Annie Russell Theatre, will give members of the Rollins Women's Association a run down of the new plays on Broadway at the next meeting of the group on March 4.

The spring meeting of the association will be held at 8:00 P.M. at the art building on campus.

All members of the Rollins Women's Association are cordially invited to attend and hear Mr. Wagner's vivid and colorful resume of what's new on Broadway this season.

from landing to quell the revolution resulted from these interviews. We recognized Panama's independence three days after the almost bloodless coup, and M. Bunau-Varilla was received within a few days as Ambassador from Panama to the U.S. As such, he negotiated and signed the Hay-Bunau-Varilla treaty on November 18, 1903, which is the bone of contention in 1964.

If the very existence of Panama is owed indirectly to U.S. policy, prosperity in Panama for the relatively few who know it also has derived for nearly sixty years from the U.S. presence in the Zone. Yet nations, like individuals, are rarely overflowing with gratitude to their benefactors. Allies in international relations are made and kept according to the utterly selfish definitions of reciprocal self-interest or national interests. We have operated a form of comfortable U.S. Main Street (sometimes Main Line) existence in the Zone for years, hard by the grinding

poverty, social inequality, and lack of economic opportunity characteristic of the masses in most countries to the south. These are some of the realities. They can be, and are being, played upon skillfully by others, of different interests and ideologies, to their own advantage. We as North Americans are reaping a legacy of envy, despair, hate, jealousy and hopelessness.

As a nation, we are in search of answers to Latin America's woes which will be more potent than the ones trumpeted by Havana and Moscow. In doing so, we as citizens as well as students need to join the quest, and to approach the entire picture of inter-American relations with clear understanding of history, realistic assessment of the opposition and problems we face (as much within Panama and other nations as from without) careful reflection, and a minimum of sentiment and emotion.

Dr. William G. Fletcher  
February 9, 1964

## High Schools Participate In State Forensics Tournament

Contestants in the District III forensics Tournament from Edgewater High, Colonial High and Cocoa High have won the right to participate in the State Forensics Tournament to be held in Gainesville at the University of Florida March 6-7.

In extemporaneous speaking, Marsha Lundberg of Colonial High won first in the girls division.

**Mrs. Drabik**  
Head of Speech Department  
ion and Debby Gluckman of Edgewater High won second. Dwight Tawney of Cocoa High won first place in the boys division and Dan Pottenger of Edgewater High won second. Award for the best debater of the Tournament was given to John DeLancett of Edgewater High and for second best debater to Linda Murdaugh of Colonial High.

The award for the school win-

ning the most debates was given to Edgewater High. Award for the school winning second place was given to Colonial High.

The debate resolution and topics for extemporaneous speaking were derived from the general area of "What should be the role of the federal government in providing medical care to the citizens of the United States?"

Judges for the tournament included Mrs. Hugh Webber, Mr. Vincent Palmer, Mrs. Tom Kirkland, Mrs. Don Randolph, Mrs. Ralph Neely, Mrs. Hilbert Sapp, Mrs. Armin Boethelt, Mrs. Dorothy Porter, and Dr. Lillian Gleason. Professor Donald Allen assisted Dr. Patricia Drabik of Rollins in organizing the Tournament. They were assisted by students from Dr. Drabik's speech classes, the Tau Kappa Epsilon fraternity, and members of the newly-established Rollins Speakers Bureau.

Five schools from District III participated: Edgewater, Colonial, Winter Park, New Smyrna Beach and Cocoa high schools.

## Mexico's First Lady Visits At Elizabeth Hall Open House

An informal reception yesterday afternoon in Elizabeth Hall was held in honor of Senora Eva Samono de Lopez Mateos, First Lady of Mexico. Many students and guests were on hand to meet and converse with Senora Mateos.

The committee which planned the Open House consisted of Mrs. Helen Watson, Dean of Women; Mrs. Milford, Elizabeth Hall Resident Head; and Miss W. Colado, "Special Services" officer.

The Elizabeth Hall Open House was another of Rollins activities emphasizing our theme country of the year — Mexico.

In conjunction with our Mexi-

can Theme, Thomas Mann, Assistant Secretary of State for Latin American Affairs, was also on the Rollins campus last week.
