The \$3.5 million A. G. Bush Science Center, to be built on Interlachen at Fairbanks Avenue, will be the future home of much needed improvements in the science department facilities.

A. G. Bush Gives \$615,000 To Aid Science Center Plan

A gift of \$615,000 to Rollins College was announced last month by President Hugh F. McKean. The gift was made in memory of Mr. Archibald G. Bush and was presented to President McKean by Messrs. E. G. Banks and

A. G. Bush

W. E. Underweerde representing Mrs. Bush.

The funds will be used to endow a Chair of Mathematics and to supplement the building funds for the \$3.5 million A. G. Bush Science Center to be completed on Rollins' campus by 1968. During his lifetime Mr. Bush gave over \$1 million to support the College and its proposed Science Center.

The Chair will be named in honor of Mr. Archibald G. Bush, a pioneer in the development of the IBM Company, and a long-time resident of Winter Park and Trustee of Rollins College.

"My husband saw clearly the need for a great science center in Central Florida. He firmly supported Rollins' plans to fill this need, which he discussed at length with President McKean and with me. It is a genuine satisfaction for me to use funds resulting from his industry and labor to give reality to his dreams," Mrs. Bush said in commenting on the gift.

In discussing the gift President McKean said, "Mr. Archibald G. Bush was one of the first leaders of Central Florida to sense the

need for a science center in this area. He was well aware of the fact that the Science Center would extend the 'brain bank' on Rollins' campus. The A. G. Bush Science Center will be a fitting memorial to a brilliant and far-seeing man whose life is and should be an inspiration to everyone."

The \$3.5 million Science Center, to be built on Interlachen at Fairbanks Avenue, is the future home of Rollins' Departments of Chemistry, Physics, Biology and Mathematics. The building will also house the graduate Physics program and the Science Freshman Foundation Courses.

Bush's \$828,000 gift for the Center made possible additional financing for the scientific training and research facility.

The architect, James Gamble Rogers III of the firm of Rogers, Lovelock & Fritz, Winter Park, said the working drawings on the 80,000-square foot structure will be completed before February 1, 1967.

Advanced facilities in the building will include: 18 large student laboratories; 20 laboratories attached to faculty offices for private research; a 350-seat auditorium; a laboratory for self-instruction, utilizing tapes, slides and programmed materials; an area on the flat roof for astronomers' telescopes; a special science library with a 20,000-volume capacity; a tiered-lecture room seating 120 students; a center for displaying the newest of science teaching equipment on exhibit by manufacturers (first such in Central Florida); a lead-shielded storage room for radioisotopes; a precision machine shop; an electronics service center and individual study carrels located at strategic places.

The \$3.5 million figure for the building includes almost \$1 million for laboratory equipment, which includes the most advanced scientific instruments such as a research laser beam and field ion microscopes.

New Speakers Bureau Program To Interrogate Dean Howden

By Mark Billson

Provocative questions and frank answers will initiate the first of a series of probing interviews held by the Rollins Speakers' Bureau, Wednesday, 8:15 p.m., January 25, at the Alumni House.

Dean Sarah Howden will be confronted by a panel of four Bureau members. The interview, "On the Firing Line," will be modeled after the New York T.V. program of the arch-conservative William Buckley, Jr., who uses third degree methods in the interrogation of his guests. "On the Firing Line" will change Buckley's format by introducing three interrogators and a moderator (a referee). The interrogators will ask pointed questions that will mirror campus opinion and curiosity.

If successful, the Bureau will continue to offer these programs which will put prominent faculty, administration, and student leaders "on the firing line." Slated to appear in the near future are Bob Gustafson, president of the Student Association, Dean Fred Hicks, Bill Renforth, editor of the Sandspur, and Bill Blackburn, president of IFC.

One of the unique functions of "On the Firing Line" will be its ability to express and mobilize student opinion and dissatisfaction. The panel will transcend social and political ties to probe what is really happening on campus.

An objective query into the state of affairs at Rollins is needed. Those who desire an informative, enlightening, and entertaining evening should not miss "On the Firing Line."

Pres. McKean Reveals New Era Of Expansion

Rollins College is moving swiftly into a new era in which it will become a source of supply of urgently needed men and services, according to Hugh F. McKean, President.

Speaking to the Winter Park Rotary Club, he said, "Rollins has been looked on for many years as a leader in undergraduate arts and sciences education. It is now producing well trained business executives. Its pre-med, pre-engineering and pre-law programs are sending a steady stream of candidates to professional schools."

"Rollins faculty are already carrying on research for the National Science Foundation and serving as consultants to business and industry."

"But what is happening now is only a trickle compared to what will happen in the near future."

"The Crummer School of Finance and Business Administration has a capacity of 100 students in the fifth year. This graduate school is making phenomenal progress already, and is only in its second year."

"Knowles Hall, the present science building, has a capacity of 15,000 square feet. The A. G. Bush Science Center will be almost six times as large."

"The Bush Science Center, scheduled for completion in 1968, will have a total of 236 rooms, including 18 faculty research laboratories, one lecture room seating 347, and one demonstration classroom seating 94. It will have its own library with 15,000 volumes. It will have supporting areas which will include a glass-blowing room, an atomic nuclear physics counting room, an x-ray defraction room, and a chromatographic room."

"This great science center which will have the most advanced equipment possible will be one of the great developments in Central Florida. Its capacity can be imagined when it is remembered that you could march the entire College, faculty and students, into it, and everyone could sit down."

"Rollins faculty is already conducting research in such fields as Atomic Spectroscopy, on the surface distribution of atoms on tungsten, in plasmaphysics and in radio-active tracer techniques on certain compounds. The fact that significant scientific re-

search can be conducted in the present inadequate structure seems to me a clear indication of what will be accomplished when the new A. G. Bush Science Center is completed."

Much of the progress being made at Rollins is due, of course, to major grants by the Roy E. Crummer Foundation and the late Archibald G. Bush, and from those who loved Mr. Bush and respected his wishes. In addition, the support from such local far-seeing institutions as the Winter Park Federal Savings and Loan, The First National Bank of Winter Park, The Commercial Bank of Winter Park, and the Citizens National Bank of Orlando, are making significant contributions to Rollins progress.

Hugh McKean

"It is also of major importance that gifts from such national corporations as American Oil Company, Gulf Oil and the Esso Corporation, Jordan Marsh, American Can, the Chrysler Corporation, the Container Corporation of America, the Continental Can, the John Deere Farm Machinery Corporation, the Ford Motor Company, and General Motors, all contribute annually to Rollins progress."

"Rollins progress is due to the wisdom of local and national businessmen who see the rewards to themselves and to the country by supporting independent institutions like Rollins. As Rollins' potentials become more thoroughly understood, I predict that support from businesses in central Florida will make it one of the great institutions in the country."

Construction is progressing rapidly on the new Charles A. DuBois Health Center. Located at 570 Osceola Avenue, the building is the future home of all Rollins health services.

THE SPUR SPEAKS

Seniors at the University of Minnesota are helping faculty and alumni select a new college president, and other colleges around the country have procedures for student evaluations of teachers.

Undergraduates at Harvard even publish "The Confidential Guide to Courses" in which the course and the professor are evaluated for the newcomer according to a consensus from students who have had the course.

These are valid approaches to improving the education offered at an institution. The concept is that the student is the customer and he has a right to appraise the merchandise he is buying.

Actually, the grading of professors gives the faculty a break. The energetic professors who work to produce a comprehensive and interesting lecture usually receive no reward other than satisfaction for their labors. A manufacturer who consistently produces a superior product is rewarded by increased sales over his competitor. But the professor who consistently produces a superior lecture gets no more reward and no more recognition than the instructor who runs a mediocre classroom.

The only standards now in effect for evaluation of a professor's qualifications seem to be his productivity in writing and his ability to get along with his superiors in the academic hierarchy. These standards, unfortunately, are incongruous with his job. The professor with the highest production level in publications is sometimes the one left with the least time to devote to the students.

The chief argument against student evaluation of instructors is that the professors will be thrown into a popularity contest that will sacrifice educational effectiveness. However, surveys of other schools where professor evaluation has been successfully employed show that students receiving the highest grades many times gave teachers lower evaluations than those receiving poorer marks. This emphasizes the point that students, for the most part, are not out for revenge. They are fair in their judgments and are not to be underestimated as one source of teacher evaluations.

Teaching is probably the only organized function in society that has no provision for effective evaluation.

At the end of this term the Rollins Student Council took a step forward in striving to implement a program of faculty evaluation on this campus. However, the acknowledged and obvious benefits of this program will be denied if, as some faculty members have suggested, the unfavorable evaluations of some teachers are not made public.

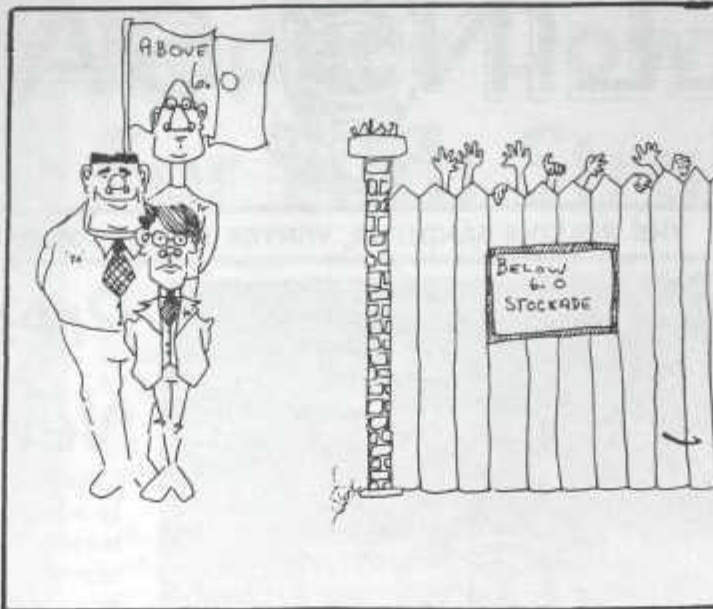

Such reasoning would be deleterious to a program of professor evaluation and inimicable to the best interests of the students.

We hope all students will give the student council the support it deserves in presenting a full and meaningful professor evaluation survey to the college.

Letters To The Editor

Dear Editor:

With the start of the new curriculum, deferred rush was adopted by the faculty and administration on the Rollins Campus. This system was adopted for two reasons. The first was to give the incoming freshmen more of a chance to direct their energies to the more stimulating curriculum. The second was to give the fraternities and sororities a better chance to look over the pledge class and visa-versa.

According to this deferred system, freshmen are not allowed to attend any upperclass activities or parties, since automobiles are illegal for them to drive, there seemed to be only one alternative for them — academics.

However, the primary reason of study did not accomplish its projected goal as effectively as planned. The Administration Building refuses to release the comparative figures of last year's first term freshmen with this year's, but it has been noticed that several more students made their 6.0 averages this year than last. This is no surprise, however, when one realizes that the Class of 1970 is the best - prepared class by far in the history of the college, according to College Board scores, high school academic records of the class and the admissions office, they are excluded from the college at a time when it is most crucial that they be included, that is, the first term of their first year at college. It's not fair to set a quarter of the student body apart from the rest of it.

Other problems, such as freshmen not being able to attend varsity athletic contests at OJC or away at other schools, because of their being forbidden to ride to them with upperclassmen, also seems absurd.

It is only fair to the freshmen then to have open rush commence after pledge Sunday, even for those who did not make their 6.0 average, instead of after Spring Vacation, as originally planned.

It's time that the freshmen should be convinced that they are part of Rollins College and not merely attending classes here.

Signed
100 Freshman

Dear Editor:

Among a number of attractive features to be noted by the prospective freshman in the 1966-67 Catalog, is the amateur radio station listed on page 56 as being in operation from October until June.

I feel that the Administration must not be sufficiently aware of the status of the station or they would have done something about the situation.

It seems a shame to have the potential value of this expensive equipment lost for the want of someone in authority to authorize just one room for a station location.

An operative station would enhance the morale of many students by permitting them to talk to their parents over the set while a Rollins amateur operated the station.

There are about 250,000 amateurs in the United States, a high percentage being high school students who will be next year's freshmen. One would be surprised at how many of these would hear of the college over the air while the station was being operated.

Amateur radio is one of the best foreign relations that we have available. We have friends that we have made in foreign countries just by radio. We have never met them personally but our son and daughter have as they received invitations to spend weekends in their homes while visiting England and Germany.

I wonder if the Administration cannot take a little time and use a little ingenuity so they may reap the potential value here?

Blair F. Fulton
K4NK1

Looks like with the new year, Jim Hardee turned over a new leaf — no more t-shirts.

Ready sororities? Get out some more dissecting kits — open rush starts in just two weeks.

Don Daus — Welcome Back! — Last fling before marriage?

Dave King — looks like his head was used for the soccer ball.

A special fund drive will be held in the union Saturday for Dave Nix in order to finance a new pin for Ann Moninger — she's wearing George Scarlets now.

A new course will be offered next term for Greg Albertson — A six credit study on "How to tell time" — Maybe Doug Hurr should take it too, along with Auto Mechanics 101.

This is the World calling Ann Wooten!

The junior member of the "Dynamic Duo," Asst. Dean Robert Kirouac is pictured in deep meditation — Is This How You "Lick" campus problems?

JOKE OF THE MONTH: Baker and Harper.

Jean Bacchiocchi: Karate au gratin.

Congratulations to Dennis Frankenberry for recently winning a "Home Beautiful Merit Award" for outstanding housekeeping.

NOTICE: The Lambda Chis will be holding another "Foreign film festival" next month — only this time you have to bring your own roast pork!

From a random selection of names of Rollins students, The Grapevine Travel & Tours Inc. has chosen Nash Broadus as the winner of a two week visit with Bob Heinemann.

Congratulations go to Chas Schoene on his recently signed bonus contract with the Joey Chitwood Thrill Driving Show. . .

How did Gregory spend celebrate her birthday?

We are happy to announce that an updated take-off of one of the late Ernest Hemingway's most famous stories is now being researched, and will soon go to press. It's called "The Old Man and the Students".

Dick Meyers has been voted "Best performance for a Saturday Night" by a panel of critics.

Under the new "Deferred deferred" rush rules, a student could rush for four years and still never make the grade — Wouldn't that be swell?

Tune in next week for another column of fact-filled, rib-tickling, knee-slapping, tear-jerking SMUT in the next edition of THE MUCKRAKERS GAZETTE.

Letters To The Editor

Editors:

Our college is well-known throughout the campus and community for presenting outstanding, famous, and occasionally, controversial national figures to speak in their respective fields. This is a laudable and enlightening function which Rollins can well be proud of.

However, there is a slight hitch here which most people probably fail to realize but which for a minority of us is proving more than slightly irritating. Why is it that almost invariably our speakers of late are of definitely democratic, even decidedly leftist leanings? Why can't we hear the other side of the story? The RIGHT side?

I am not trying to sound like a "cry-baby" or a militant rightist, but not all of us have democratic political feelings. Isn't equal representation a basic tenet of democracy? I certainly think so, and I hope that Rollins will in the future bear this out before our fine reputation becomes slightly pink.

W. E. S.

Faculty Committee Reevaluates Fiesta

What is happening to this year's Fiesta is a question on the minds of many Rollins students. Bill Renforth, chairman of Fiesta, has announced that the traditional event will definitely be held this year and that plans for a Spring Weekend are now being formed. President McKean established a faculty committee in December to study the future of the Spring Weekend. After a slow start, this faculty group has held several meetings and advanced some tentative proposals. These ideas are the joint product of faculty members, the questionnaires, and the committee.

The first step of the faculty committee was to agree that there was a need for a Spring Weekend of some kind. Most colleges have a Homecoming or some special weekend. This weekend should be a break for the students from the academic pressure of the spring term. Spring Weekend will probably begin on April 27th at noon. This weekend is following Mid-term.

This event is a chance for every member of the college to participate in social and athletic events. The Spring Weekend committee is trying to stress student participation to all students at Rollins.

The Miss Rollins Contest, Flag Football, and the Parade will probably be held again this year.

These events will be improved over last year's. Instead of just playing Stetson in football, tentative plans call for two other teams competing in a two-day championship. The parade would be moved to Saturday morning, a time when more people are available to see it. Merchants in the town have agreed to enter floats and other exhibits into the parade.

Many new events are being added to Spring Weekend. Examples are a Water Ski Show, a fireworks display, and skits by the different social groups on campus. The Water Ski Show and fireworks would be held on Lake Virginia after a picnic on Friday evening. After this, there would be a dance off campus with big name entertainment. Thursday night highlights would be the satirical skits. Following the big doubleheader in baseball with the University of Tampa, Saturday night would be another dance with big name entertainment. President McKean's ball no longer is a part of Spring Weekend.

These ideas are all tentative at the moment but the committee hopes to have a good concrete plan worked out by February 1st. If anyone has any ideas or complaints, Bill Renforth would like to hear them, for Spring Weekend is your weekend.

Alliance Francaise To Hold French Civilization Lecture

The Alliance Francaise of Rollins College will meet tonight at 8 p.m., at the Maison Provencale on the Rollins Campus. Dr. Genevieve Mazo Sutton, Lecturer in French Civilization and French Literature at Florida State University, Tallahassee, will give a lecture entitled "Therese Desqueyroux, une Heroine de Mauriac". Refreshments will follow.

Dr. Sutton received her Ph.D. in Law from the University of Paris in 1944. In 1949 - 1950 she took post-graduate courses in Social Sciences and Law at the University of Chicago. From 1953 to 1955 she studied Psychology and Sociology at the Institut de Psychologie of the University of Paris and received her diploma in June of 1955.

In 1961 - 1962 she was sitting Judge at the Court of Paris, in a criminal chamber. From June to December of 1963 she was vice President of the Court of Aix-en-Provence and from December of 1963 she was Sitting Judge at

the Court of Paris, in a civil chamber.

In 1961-1962 Dr. Sutton lectured at the Law School of the University of Paris and in 1962-1963 she taught French Language, French Literature and French Civilization at "Vanderbilt-in-France", Aix-en-Provence.

From 1964 to 1966 she gave numerous lectures on various aspects of French Civilization and appeared several times on radio and television. She has held her present position in Tallahassee since 1966.

The following report is a combination of both the December 12, 1966 and January 16, 1967 meetings of the Student Council.

Scolly Green began the committee reports by submitting changes to the Traffic Rules. Freshman with a 6.0 academic average the first term will be allowed to operate vehicles. Exceptions may be granted by the Student Deans.

Eligible freshmen will not be allowed to use Rollins parking facilities at any time and must comply with all existing traffic regulations. The proposal was passed by the Legislature and now waits the approval of the Faculty Committee.

Greg Wandke gave an extremely informative beanery report as usual. The beanery is planning to buy new table cloths, so they can replace the presently soiled cloths. Phin Fogg them struck again with his usual criticism. He suggested that the cloths be different colors.

Bill Blackburn announced that Chris Yard is the new Freshman Class President due to the ineligibility of the former President.

Chris Wilder then reported on the progress of the Faculty Evaluation Survey. There was an excellent response from the students who filled out the forms. These sheets will be processed by the school's computer as soon as Wilder rechecks the program. The final evaluation sheets for each class should be completed in a couple of weeks.

Bob Gustafson, President, then proceeded by finally asking for the long awaited Fiesta report. Dave Lord began his report by changing the name of the weekend to Spring Weekend due to the faculty's dislike if the word "Fiesta." Spring Weekend will be on the weekend of April 28 beginning Thursday at 12:00 Lord and the Spring Weekend Committee have been working on new ideas such as a fireworks display, water skiing show, and an all-

star flag football tournament involving Stetson, Tampa, one other college, and Rollins. There might also be a skit night in which each sorority and fraternity will perform. A trophy will be awarded for the best sorority and fraternity skit. The main idea is to create more participation by the student body. There will be no formal dance during the weekend. This dance will occur at another time.

Sabra Whiting's salary request as Lower Court Secretary of seventy-five dollars was approved by the Legislature.

Tom Sacha presented the proposed revisions to the Court system along with a new student code. Fred Gittes added to the presentation by explaining the new court procedure.

At the next meeting, Bill Blackburn explained fully the Reorganization Plan. The changes in organization of the Legislature and the Court System will now be presented to the faculty for ap-

proal. If these revisions are passed by the faculty, there will be then a general presentation to the Student Body upon adoption.

Dean Hill, expecting more re-vamping of these proposals, asked for a new Arbitration Committee consisting of the Executive Board and the Lower Court President, Tom Sacha.

The final agenda was a proposal by Bill Blackburn. He asked if he could have the power to change words in the proposals as long as the meaning of the sentences was not changed. This proposal was approved by the Legislature thus reducing unnecessary delay in the passage of reorganization proposal.

There being no further business the meetings were adjourned.

The Legislature would like your strong support on the new proposals of reorganization. There has been a lot of work and time put into these changes.

Bob Urges Change

This past Monday night, January 16, the Legislature of the Student Association met for over an hour and a half to consider two major proposals.

One dealt with the revision of our present judicial system, and the other was concerned with the over-all reorganization of our present student government.

Both the judicial and reorganizational revisions were automatically tabled because they are constitutional amendments which will play a great part in bringing about a new and far more powerful student governing body. I hope that the students will

take the time to carefully analyze both of these revisions, for they are major steps in advancing our goal of better communication and greater participation on the part of the student in college affairs.

This is not to say that I feel colleges should be student run, but it is a reminder to the students that they should have the right to have equal representation in college matters. This form of voice and representation is to me, a part of the education a student should experience while in college. At present, this matter of a voice in college affairs is one which has arisen all over the United States. It is a matter

which is of great importance to students as well as to faculties and administrations of colleges and universities throughout our country.

The efforts, therefore, of your Student Association here at Rollins have been to give to the students the much-needed voice and representation in administrative affairs. It is argued that we do not possess the maturity and intelligence to speak out for what we think is right. With this I must disagree. I feel that the Rollins student is fully capable of accepting the responsibility of governing himself and aiding in the administration of college policy. For this reason we have brought before the students two proposals for more effective and more powerful student government. I do not have the space to review these proposals in this column, but this coming Monday night, the members of the Student Legislature will submit these proposals to their respective groups for analysis. We hope that all fraternal as well as non-fraternal groups will invite members of the Reorganization committee to appear at their meetings in order to achieve total clarification of these proposals. It is my hope that the students will get behind their Student Association and push for a much needed revision of their judicial, executive, and legislative systems.

Sincerely,
Robert Gustafson
President, Student Assn.

Local Groups Hold Interfaith Talks

When twenty-one inter-faith community organizations agreed on one point it makes history. The problems of this or any community today are of such magnitude and are so interrelated that no one group by itself can possibly make a dent in their solution. These groups have combined forces in presenting three programs designed to give a clearer picture of the social structure of this area. These programs will not only be educational but also may point the way in which the community social services may be bettered.

The first of these programs was held last Sunday in the Woman's Club of Winter Park, 419 South Interlachen Avenue. The remainder will be held on two successive Sunday evenings at 7:00 p.m. on January 22, and 29, to which the public is invited.

Slated for January 22 will be a panel discussion entitled "The Church in A World of Social Revolution."

Dr. Paul F. Douglass, professor of History and Government and director of the Center for Practical Politics at Rollins College will act as moderator.

Dr. Douglas is Professor of Government and Director of the Center for Practical Politics at Rollins College. He is also a Trustee of the Orange County Office of Economic Opportunity, Inc., Trustee of the National Recreation and Park Association, and a member of the Committee on Housing and Urban Development of the American Bar Association.

The panel will be comprised of: Senator Beth Johnson, Mrs. Anna

Lovell, Director of Orange County Welfare, Rev. Ben Franticelli, Director of Florida Christian Ministry, Rev. Jack Davis, Executive Director, Florida Council of Churches, Monsignor John Wells, St. Margaret Mary Catholic Church, Rabbi Benno Wallach, temple of Liberal Judaism and Mr. Howard Phillips, head of the Dr. Phillips Foundation.

Organizations invited to participate by the Winter Park Methodist Church Churchwide Study Committee are:

Woman's Club of Winter Park, Council of Human Relations, Goodwill Industries of Central Florida, Inc., League of Women Voters, National Council of Jewish Women, Orlando-Winter Park Chapter of United Nations Association of the United States, Orlando-Winter Park Branch of A.A.U.W., Orange County Group Action Council, Orange County Migrants Services Association, Orange County Welfare, Rollins College, Salvation Army, St. Margaret Mary's Catholic Church, Temple of Liberal Judaism, Temple Israel-Conservative, Winter Park Ministerial Association, United Church Women of Winter Park, United Council of Churches, Orange County Council of P.T.A., Winter Park Welfare Association.

The findings of this panel will serve as guidelines in the final Discussion Period of the January 29 program when the basic and perennial question may be answered in this project "where do we go from here?"

A special invitation to attend these discussions has been extended to all Rollins Student.

McKean Appoints Professor To Graduate School Faculty

Dr. Bert D. Nelin, a Senior Research Scientist with the Martin Company of Orlando, will teach a new Statistical Theory of Communication course in Rollins College graduate physics program.

Rollins President Hugh F. McKean announced Nelin's appointment to the graduate faculty. He said the course would be taught on Monday and Wednesday evenings from 8:10-9:40 p.m., beginning January 30.

Dr. Nelin is a Senior Research Scientist with the Information Sciences Laboratory in the Research Division of the Martin Company. He was born in Sweden, pursued his undergraduate and graduate studies in electrical engineering at the

Chalmers University of Technology, and received the degrees Master of Science (1955) and Doctor of Science (1959).

At Chalmers, Dr. Nelin served as a Research Associate and as Assistant Professor of Electrical Science. After coming to the United States in 1960 he was associated with Itek Electroproduct on Monday and Wednesday evenings from 8:10-9:40 p.m., beginning January 30.

His research activities have included advanced analytical studies of non-linear networks and oscillations, the development of a new type of tunable crystal oscillator, studies on the performance of various communication systems, anti-jam techniques, and origin and measurements of oscillator instabilities and FM distortion in telemetry systems.

He is a member of IEEE and has recently been appointed to their Communication Theory Committee.

The course Dr. Nelin will teach covers probability, random variables, statistical averages, ergodicity, correlation functions, power spectrum, Gaussain and Poisson processes and random processes through linear systems.

The end of deferred rush meant a enthusiastic welcome into sorority activities for freshmen women.

Sorority Rush Ends With 70 Girls Accepting Bids

On Sunday, January 15, seventy Rollins girls were pledged by the seven sororities on this campus. This event climaxed the three days of formal rush which occurred last week. The activities of the three evenings of parties were held both on and off of campus and ranged from informal get-togethers to planned programs of entertainment.

Finally at 1:00 on Sunday afternoon the rushees received their bids. The list of sororities and pledges is:

ALPHA PHI

Paula Baldissard, Joan Britten, Maria Dubourt, Linda Manieri, Joanna Styne, Mary Weiher.

CHI OMEGA

Margaret Arnold, Ann Baird, Linda Bradley, Cynthia Burke, Mary Jane Green, Elizabeth Ingle, Rebecca Klammer, Carol Wilson.

GAMMA PHI BETA

Josephine Argeaux, Jenifer Booth, Meave Brennan, Mary Carter, Christine Colmore, Linda Hamilton, Susan Hobbie, Katharine Hubbard, Eugenia Anne

Jones, Susan Kelso, Linda La Rue.

KAPPA ALPHA THETA

Connie Anderson, Jean Briggs, Lynn Cooper, Ellen Deery, Linden Jeter, Karen Kreider, Barbara McLean, Jewel-Ann Nicony.

KAPPA KAPPA GAMMA

Vicki Anderson, Mary Aulick, Barbara Bergengren, Joanne Burroughs, Margaret Cone, Roberta Corenman, Evelyn Fidaio, Julia Frank, Jo Ann Gockenback, Susan Hartwig, Molly Heiner, Phoebe Howard, Ann Moninger, Mary Pritchett, Suzanne Vanderbeck.

PHI MU

Elizabeth Banks, Francesca Caruso, Cheri Dehner, Pat Fraunberger, Cheryl Gallipeau, Miriam Howe, Sandra Jetton, Lorraine Kyle, Nancy Wayman, Ellen Weissman.

PI BETA PHI

Karen Bachmann, Leslie Brown, Leslie Hoffmann, Leslie Johnson, Linda Long, Susan Lynch, Karen Payne, Nancy Rawls, Susan Taulbee, Jane Thompson, Suzanne Traylor, Lucia Turnbull.

Noted Organist Will Present Vespers Recital For Chapel

Willis Bodine, organist at the University of Florida, will open the annual series of Organ Vespers at Knowles Memorial Chapel on Wednesday, January 25 at 4:30 p.m.

Bodine, organist and carillonneur at the University of Florida, will present a program of Bach's famous Clavieruebung, Part Three, published in Leipzig in 1739.

This collection, the first organ music published by Bach, contains a number of chorale preludes on the melodies of the Catechism hymns sung in the Lutheran Church. They are framed by a magnificent Prelude at the beginning of the collection and a Fugue, known as the "St. Anne," at the end.

Bodine is well-known for his organ recitals in Germany and the United States. He received his Bachelor and Master of Music degrees from the University of Texas and studied in Germany under a Fulbright Grant.

The Organ Vespers will continue on a weekly basis with recitals by Catharine Crozier Gleason, organist of the Knowles Memorial Chapel and Susi Jeans, the distinguished Austrian-born organist and musicologist.

Visiting Lecturer Explains Christian Science Beliefs

God need not be a mysterious and far-away being but can be understood as a present, demonstrable help in everyday affairs, a Christian Science lecturer told Rollins College students January 17, 1967.

"Today more and more people are finding they can't accept on faith a teaching that demands blind, unreasoned loyalty. They're challenging the concept of religion as mysterious or supernatural," said Neil H. Bowles, C.S.B., of Atlanta, Georgia.

Physics Expert Visits Campus

Professor Karl Strauch, of the Department of Physics, Harvard University, Cambridge, Massachusetts, will serve as a visiting lecturer at Rollins Wednesday, January 25.

He will visit the campus under the auspices of the American Association of Physics Teachers and the American Institute of Physics as part of a broad, nationwide program to stimulate interest in physics. The program is now in its tenth year and is supported by the National Science Foundation.

The American Association of Physics Teachers is one of the seven member societies of the American Institute of Physics. Other member societies are: The American Physical Society, Optical Society of America, Acoustical Society of America, the Society of Rheology, American Crystallographic Association, and the American Astronomical Society.

Professor Strauch will give lectures, hold informal meetings with students, and assist faculty members with curriculum and research problems. Arrangements for his visit are being made by Professor John S. Ross, Chairman of the Department of Physics at Rollins College.

Karl Strauch, a leading high-energy physicist, has been Professor of Physics at Harvard University since 1962.

Professor Strauch has investigated the structure and properties of nuclei and some of the strange particles, such as mesons and hyperons, that populate the world of nuclear physics.

Professor Strauch was born in Giessen, Germany, and attended schools in Berlin and in Paris. He received the A.B. degree from the University of California at Berkeley in 1943 and spent the next two years in the U. S. Navy as an electronic technician.

In what he called this "era of only religion was strict adherence to God, divine Life, Truth, and Love."

standing of God isn't proving Mr. Bowles said Christian adequate," he declared. "Humanity is reaching out for solutions God, all derived from the Bible, to its problems. If religion really which describe God's divine nature has a product to offer it must come up with intelligent answers to the question, 'What good is religion?'"

People "want proof of religion's usefulness," he asserted, "and they're entitled to have it." He said Christian Science is largely an educational system based on the spiritual and scientific facts contained in the Bible.

Mr. Bowles spoke here under sponsorship of the campus Christian Science Organization. He is currently on tour as a member of the Board of Lectureship of The First Church of Christ, God, man, and the universe. Then Scientist, in Boston, Massachusetts, you learn how to apply your sets. Title of his lecture was "What Good Is Religion?"

"A truly enlightened religion should present a scientific and logical statement of what it asks us to strictly adhere to or worship. It should convince us by reason and proof. It should advance us humanly, intellectually, and spiritually. It should have practical usefulness every moment of every hour. It should be the basis of all our thoughts," he declared.

The lecturer affirmed that it was in the light of this understanding that Jesus accomplished what the world refers to as miracles. They were not miracles, he declared, but the result of his "applied understanding of divine Principle, God, or good, to human problems" and the solution of them. Mr. Bowles added: "His

Justice Named Baseball 'Coach Of The Year'

HOUSTON — Joe Justice, athletic director, baseball and soccer coach at Rollins was named College Division baseball "Coach of the Year" Jan. 8 at the NCAA's 61st annual convention.

The 600-plus voting members of the American Association of College Baseball selected Justice from a slate of eight district nominees. Ohio State's Marty Karow was chosen in the university division.

After guiding the Tars to a 23-9 record last spring, Justice was voted "Coach of the Year" in District 3, stretching from Virginia to Florida.

Besides registering Rollins' best record since 1959, last year's Tar baseball team won the Florida Intercollegiate Conference crown and its own Baseball Week tourney to earn trips to Ecuador and the NCAA's Atlantic Coast College Division tournament in New York City.

The honor is long overdue for Justice, whose Tars have posted a 381-218 slate against larger schools since he took over Rollins' baseball program in 1947.

During Justice's 20-year reign the Tars have captured five of 12 F.I.C. championships, reaching the NCAA post-season playoffs four times and the NAIA tournament on three occasions.

Baseball coach Joe Justice discusses prospects with Atlanta Braves scout Zack Taylor, former Tar and St. L. Brown catcher.

In 1954, in fact, Justice finished a close second to the University of Missouri's Hi Simmons in "Coach of the Year" balloting after the Tars battled to the finals of the NCAA College World Series in Omaha, Neb., before falling to Missouri in the title game.

A 1940 Rollins graduate, Justice earned All-America honors

in baseball and football, and was named to the All-State basketball team as well. As a football quarterback he returned three punts for touchdowns in a game against Tampa, a record that still stands.

After a short professional baseball career and a wartime hitch in the Navy, Justice returned to Rollins as assistant football coach in 1946 and took over the baseball program the following spring.

Since that time he has coached football, basketball, baseball, golf and soccer teams, while serving

as dean of men and athletic director.

Among Justice's contributions to sports are the introduction of speed-up baseball rules, establishment of Rollins' Baseball Week Tournament, which annually matches four top collegiate powers, and the encouragement of intercollegiate soccer in Florida. He has also coached an entry in the Collegiate Basin League two summers and served on several NCAA committees.

Seeking his 400th coaching victory this season, Justice plans to open baseball drills Jan. 30 with about 35 prospects expected to report.

The Tars lost just two 1966 letterman, pitcher Rick Shotwell and catcher Chuck Olsen. Sophomore hurlers Gale Coleman and Joe Lasorsa, both 4-1 in 1966, head a 15-man returning contingent.

Also back are pitcher Ed McNair, infielders Bob Chandler, Pedro Fonts, Don Phillips, Ken Hill, Gordy Lynch, Danny Rosen and Ed Siemer, outfielders Dorman Barron, Tom Flagg, Bob Gustafson and Bob Schabes, and catcher Jeff Burns.

Justice Invites

Baseball coach and athletic director Joe Justice extends an invitation to all Rollins men with baseball experience, asking them to contact him at the athletic office about tryouts for the Tar baseball team.

Practice does not begin until Jan. 30, but Justice talked to a number of prospects in a meeting last Monday.

Faculty-Grads Cage Favorite

By Jay Wood

Last week saw the opening of the 1967 intramural basketball season with most teams shaping up according to pre-season speculation.

With assistant basketball coach Jim Brown joining dead-eye coach Boyd Coffie, the Faculty-Grads look like the favorites in this year's race. Superior rebounding strength and the able shooting of junior Scotty Green puts X Club in the cage picture.

Although it will be tough to replace the accurate shooting of Fred Suarez, Sigma Nu features a balanced attack, the ball-handling of guard Willie Flohr and the return 1961 starter John Schollenberger to rate as another top contender.

The Deltas, who appear to have a top-notch defensive ball club, also figure to have a good shot at a playoff berth.

In games this week the Faculty-Grads downed the Deltas 64-51 and Sig Ep 60-33 with Coffie hitting for 33 and 32 points respectively. Van Lawrence paced Delta Chi with 19 markers, while Tom Eaton led the Sig Ep attack with 21.

Green and Jim Oppenheim tallied 19 and 18 apiece to push the X Club by the Indies 66-33. The Indies forfeited to Sigma Nu and KA failed to make an appearance against the Tekes.

Next week's schedule finds the Faculty-Grads in a pair of tough contests, facing X Club Monday and Sigma Nu Thursday.

INTRAMURAL BASKETBALL

McNair, Bussler Take Scoring, Passing Titles

TKE center Ed McNair grabbed three touchdown passes in TKE's 46-19 rout of the Faculty-Grads Dec. 15 to edge teammate Dave Bussler for the league scoring crown.

Bussler's six TD heaves in the championship match boosted him beyond Lambda Chi signal caller Gordy Lynch in the passing ranks, while Jim Ackerman picked off a Bussler aerial to tie the interception leadership with seven.

McNair, third in regular season standings, tallied 87 points on 14 touchdown passes and three extra points. Bussler logged 79 markers on 12 six-pointers and seven conversions.

Sigma Nu's Cliff Montgomery, Grad Chuck Olsen and Lambda Chi's Bob Gustafson round out the top five scorers with 72, 63 and 61 points respectively. Defending champion and regular season leader Chuck Thomas of

Tar Grid Stars

Fall To Stetson

DELAND — Stetson took advantage of five interceptions plus a variety of "hometown" benefits Dec. 10 to crush Rollins' intramural football all-stars 34-13 in a challenge match.

Stetson's victory evened the flag football series between the two schools at one victory apiece. A rubber game is slated during Fiesta.

The Hatter gridders jumped to a 13-0 lead midway through the second quarter on passes from quarterback John Davis to Rick Webb and Milt Culp.

Rollins cut the deficit when center Ed McNair of TKE lofted a 34-yard bomb to end Terry Law of Lambda Chi on the double pass, but Davis bolted over from the two just as the half ended to give Stetson a 19-6 edge at intermission.

After opening the third period with a 19-yard TD toss from Smith to McNamara, the Hatters permitted Rollins just one more score, a 21-yard pass from TKE signal caller Dave Bussler to McNair, while tallying a touchdown and safety themselves.

Rollins 0 6 7 0—13
Stetson 6 13 7 8—34
Stetson—Webb 33 pass from Davis (pass failed)
Stetson—Culp 50 pass from Davis (Webb pass from Davis)
Rollins—Law 34 pass from McNair (pass failed)
Stetson—Davis 2 run (pass failed)
Stetson—Smith 19 pass from McNamara (Smith run)
Rollins—McNair 21 pass from Bussler (Montgomery pass from Bussler)
Stetson—Safety (Bussler downed in end zone)
Stetson—Smith 17 pass from McNamara (pass failed)

Cagers Carry 5-5 Record On Road Trip This Weekend

Off to Rollins' best start in 11 years, the Tar cagers put their 5-5 record on the line this weekend as they invade Georgia for games with Georgia State in Atlanta Friday and Mercer University in Macon Saturday.

Coach Boyd Coffie's chargers know what to expect from Georgia State's Panthers, having beaten them twice 91-68 and 95-49 this season. Rollins has lost to Georgia State only once in eight encounters.

An annual Tar rival since 1951, Mercer's Bears moved into Wednesday night's game with Georgia Southern undefeated in six games and boasting wins over such schools as Stetson, Florida Presbyterian and Florida Southern.

A three-week holiday layoff apparently dulled Tar shooting and rebounding, so Coffie is contemplating a shakeup Friday night, possibly starting freshman Frank Valenti and Kim Kramer (6-3) instead of 6-2 forwards Ed Siemer and Mark Stewart. Junior Rick Loghry (6-3) move from guard to forward to make room for Valenti.

Although outbounded 40-33, the Tar quintet edged a smaller Biscayne College quintet last Friday. Guard Sterling Case, who hit nearly 52% of his shots before Christmas but has managed only 13 for 38 since, led the Tar attack with 19 points. Siemer and Donnie Smith contributed 14 and 12 each.

Tuesday night Stetson dominated the backboards 57-28 and led all the way to down the Tars 90-70 in a Florida Intercollegiate Conference match. The visiting Hatters jumped in front 4-0 on a four-point play at the start of the game and Rollins never got closer than four 41-37 with 18:41 left in the game.

Case again topped Tar scorers with 17 markers, while Smith and Loghry added 14 and 12 respectively.

The Tars closed their pre-Christmas schedule in Augusta (Ga.) College's Christmas Tournament Dec. 16-17. In the opening round Rollins fell to taller Belmont Abbey College 80-67. With Case and Loghry hitting 18 and 17 points apiece the Tars stayed up with the Crusaders until Belmont Abbey pulled in front to stay 46-44 with 15:08 remaining. The Crusaders opened a five point gap and Rollins never got within two again.

In the consolation game however the Tars bounced back as they canned over 50% of their floor shots to crush Georgia State 95-49. Case, who was named to the all-tournament team, and substitute Dave Pearlman pumped in 24 points each to lead the charge.

After winning their opener 93-82 over Union University in the first round of the Citrus Tournament in Lakeland, the Tars dropped successive games to Roanoke College 67-65, the University of Tampa 83-78 and Florida Presbyterian 97-70 before regaining the winning touch.

Case hit a season high of 32 markers Dec. 13 as the Tars jumped in front of Georgia State 10-8 after five minutes, then pulled away to a 91-68 win. Rollins hit nearly 60% of its shots to pile up the big margin.

The next night Rollins let 6-6 center Tom Ward tally 35 points

Front row (left to right): Dave Pearlman, Bob Chandler, Dick Morrison, Ricky Loghry, Sterling Case, Frank Valenti; back row: Rich Westfal, Kim Kramer, Ken Hill, Jim Murphey, Donnie Smith, Ed Siemer, Mark Stewart.

but salvaged a 79-71 victory over the University of the South. The Tars led by just four points, 61-57, with 6:29 left, then scored seven straight points for an 11-point gap. Case hit for 25 and Loghry recorded 17.

Next week the Tars travel to St. Petersburg for a rematch with Florida Presbyterian, then host Tampa Thursday night in a Florida Intercollegiate Conference game.

Bussler Passes TKE To Grid Title

Senior quarterback Dave Buss-Bussler tossed a pair of touchdowns, the league's top passer, fired down bombs and ran two and 24 six touchdown passes, three to scoring leader Ed McNair, and ran 27-yards for another score to lead TKE to its first intramural football championship ever.

The Tekes, who lost only to Lambda Chi 20-12 in five regular season encounters, polished off the X Club 38-19, Lambda Chi 19-14, Sigma Nu 31-12 and the Faculty-Grads enroute to the playoff title.

Against X Club Nov. 30 Bussler sparked a 19-point second half surge as TKE wiped out a 19-19 halftime tie to advance to the playoff quarterfinals. A week later he gathered in a Gale Coleman aerial late in the fourth period to give TKE a 19-14 comeback victory over Lambda Chi.

In the other quarterfinal match Dec. 8 the Faculty-Grads scored on a six-yard pass from Chuck Olsen to Pete Cowin in sudden death overtime to hand Sigma Nu its first defeat of the season 19-13.

The Faculty-Grads jumped in front on a Boyd Coffie to Jim Brown pass early in the first frame, then expanded a 7-6 lead into a 13-6 gap on a 28-yarder from Coffie to Cowin in the third quarter.

Snake flanker Cliff Montgomery, who ran for the first Sigma Nu score, hooked up with Jack Zimmerman on a 67-yard scoring toss in the final minutes, then tied the game on an end run to set up the overtime.

Jumping to a 20-6 advantage through three quarters Dec. 12, the Faculty-Grads withstood a rally in the final period to eliminate Lambda Chi 26-19.

Again the Faculty-Grads jumped to a 7-0 margin in the first frame and were never headed, although Lambda Chi signal caller Gordy Lynch passed to Bob Gustafson for one six-pointer and ran for another to tighten the count in the final frame.

Trailing 12-0 at intermission, TKE exploded for 31 points in the second Dec. 13 to bump Sigma Nu 31-12 for a title game berth.

KKG Leads Chi O In Women's Race

Defending champion Kappa Kappa Gamma holds a 40-point edge on runnerup Chi Omega in the women's intramural race on the strength of its perfect basketball season.

The Kappas, who took their fifth straight cage crown with an 8-0 record, picked up 230 points, while Chi O (7-1) could garner only 195. Kappa Alpha Theta and the Indies, both 5-3, are third with 150 markers apiece.

Girl Netters Rout St. Pete

Rollins' women's tennis team and doubles matches. The Tar girls defeated St. Pete 9-3 on the road and have also beaten Florida State 10-2.

Rollins' only losses came when Mary Ann Foniri was forced to withdraw from both her singles

Only Kathy Blake and Jane Butts were extended to three sets enroute to singles victories. Miss

Blake dumped Patty Reese 6-3, 2-6, 6-4, while Miss Butts had a tougher time bypassing Dasie Shaffer 2-6, 9-7, 6-2.

Wendy Overton, Guiliana Peterson, Nona Gandelman, Lucia Turnbull and Rheua Stakely swept to easy singles wins.

In doubles action Miss Blake and Miss Overton teamed for a two set victory over Beth Bird and Janet Vuille, but Miss Butts and Miss Turnbull, Miss Stakely and Miss Gandelman went the full distance for their wins.

Surprising Indie Booters Climb

A surprising Indie aggregation surged into the intramural soccer lead this week, defeating Lambda Chi 3-1 Friday and the Phi Delt 4-0 Wednesday.

Pre-season favorites X Club, Sigma Nu and Delta Chi are also unbeaten with 2-0 wins over Phi Delt, Sig Ep and KA respectively. TKE tied Sig Ep 1-1 in the week's only other match.

Varsity regulars Robin Leech and Pete Klimley, several other varsity substitutes and Craig Schmidt spark an Indie squad that has benefited from a number of freshmen not eligible for rush. Schmidt and Klimley are the only booters with more than one goal, tallying three and two respectively in two matches.

Key game this week is slated for 10:30 a.m. Saturday as the Indies test Sigma Nu. X Club meets the Indies Tuesday, while Sigma Nu takes on Delta Chi Wednesday in important battles.

Singles—Blake (R) d. Reese, 6-3, 2-6, 6-4; Overton (R) d. Vuille, 6-2, 6-1; Birds (S) d. Foniri, 10-3, 2-1 (forfeit); Peterson (R) d. McMasters, 6-4, 6-5; Gandelman (R) d. Honeycutt, 6-2, 6-0; Butts (R) d. Shaffer, 2-6, 9-7, 6-2; Turnbull (R) d. Farnell, 6-0, 6-4; Stakely (R) d. Kester, 6-2, 6-2.

Doubles—Overton-Blake (R) d. Bird-Vuille, 6-0, 6-2; McMasters-Reese (S) d. Foniri-Peterson, forfeit; Butts-Turnbull (R) d. Shaffer-Kester, 2-6, 6-3; Stakely-Gandelman (R) d. Honeycutt-Farnell, 2-6, 8-6, 6-1.

DEAR REB:

Composer wants to know the score on '67 compacts

DEAR REB:

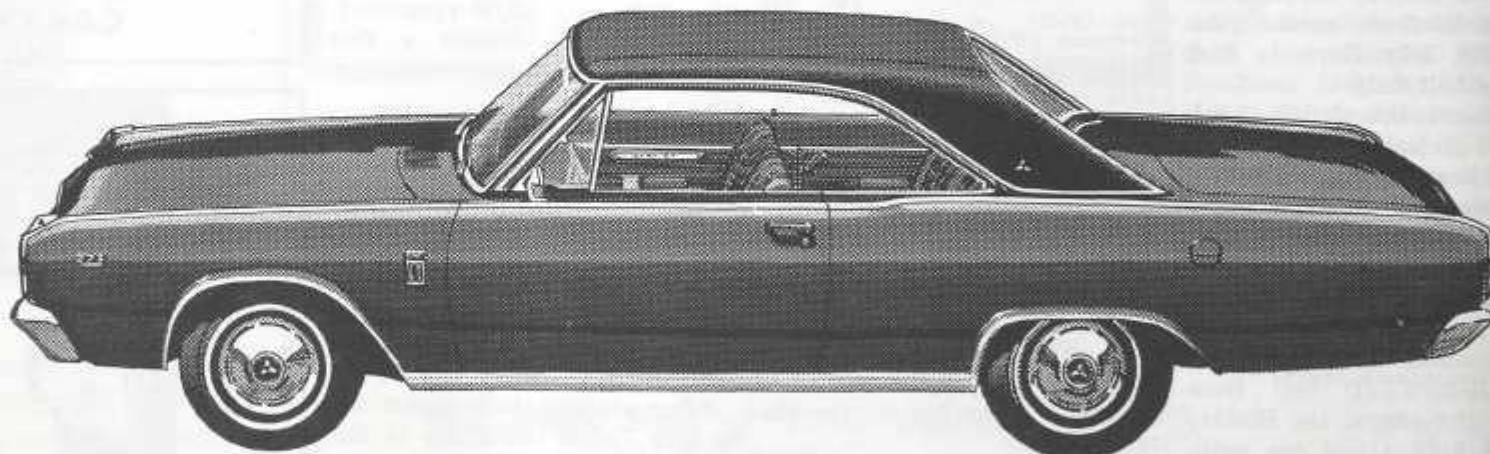

I'm a well-known composer, and I need a new car. The trouble is, I'm just too Bizet to pick one out. And what's more, many of the new cars I see are Offenbach in the garage for repairs. But I do have a good friend who is pleased with his new '67 Dodge Dart. He was given an excellent deal and Berlioz any money on it. My Bach is to the wall. Can you help me?

LUDWIG

DEAR LUDWIG:

My advice is that you let yourself Ravel in the enjoyment of driving the sporty, all-new Dart for '67. You'll find its Liszt price is a lot lower than you'd expect. And even though it's longer outside and bigger inside this year, Dart's still an easy car to Handel.

Sincerely, Reb

Here's the swinging, man-sized compact for '67 that's got three B's of its own: Bold, Brassy and Beautiful. Dart has been completely restyled this year, inside and out. It's longer, roomier, more powerful. But still at that snug compact price. Drop in at your nearest Dodge Dealer's and try it out for yourself.

Dodge
