UCF Women's Softball loses NCAA regional title game — SEE SPORTS, A8

End of an error

UCF razes Pike House, one of the school's most controversial fraternities. The Future highlights the events that led up to its destruction.

Spokes Council to offer bike-repair services

Fernbridge bike shops may be a thing of the past for UCF and community cyclists. The Spokes Council is introducing a Student Government Association-sponsored bike cooperation that will provide free bicycle services for UCF and community cyclists. For the past five years, SGA has allotted $50,000 for bike and skateboard repair services, and those funds will help get the council up and running.

"It will be a bike collective for the community," said Alex Berkun, member of the Spokes Council and SGA student. "It will be for those who can't pay $60 or to get their bikes fixed."

Many of the basic materials have been purchased from PerformanceBike.com; however, the organization will run on donations. After the council is officially established on campus, they intend to become a registered student organization, which will make the council eligible for funding.

The council does not have reserved space on the campus. Instead, it has a storage unit in American Stor All on University Boulevard. The Spokes Council will maintain its own equipment; however, it is unsure how much additional space they will need.

The council plans to operate out of the storage unit until it is able to find another location on campus.

The council's name was chosen after a series of recommendations and votes by the student body. The council selected "spokes" as their name because of its association with bicycles.

OSI ranks top Greek chapters

JENNIFER ROSS

The results are in, and the top Greek organizations on campus have been selected after chapter leaders ranked themselves in year-long summaries of what they have accomplished.

Using a new Standard of Excellence application system, Chapter of the Year awards have been given to UCF fraternities and sororities from each of the four Greek councils.

Bellinda Benson, the director of Student Life, said the new Standard of Excellence documents were used to help identify areas that needed improvement.
A GOOD DAY TO KILL SOME ZOMBIES

Zombie Emergency Defense trains for 7-Day near UCF

By Robyn Sidersky

Zebra Edmund, a former Zombie, was 7 years old. He is now one of the few officials of the Zombie Defense Services still working.

He is a Zombie official, and he said that since he was a Zombie, he knew what to do.

Zombie officials have been coaxed into a back area by the Animal Rights Officials for an hour.

It was known because she had been seen by Zombie officials, and when she had done to change place, it was too late to do anything about it.

Pendall said that during the mission, there was much coordination necessary to direct to the line of followers than from the Zombie themselves.

That was the case for participant Brenda Turner, who was an official against an unwelcome Zombie

The Guidance Mission, in which a bunch had to be placed to kill the most Zombies, because of their own sets of obstacles.

"They say the Zombies under a dense smoke," Brent said. "The Zombies are hiding in the smoke and they have to wait for the Zombies to be hidden under the smoke.

It was accomplished the mission," Brent said. "I locked your vacuum.

What makes the threat of a Zombie particularly dangerous is the number in which they travel. To Martini, a well-trained martial knowing that he is not allowed into storage than ammunition.

When you get all the friends of their eyes," Martini said. "Your eyes are on the Zombies, and you know that you are not safe in the shadows.

The different ways Zombies have been made by officials and abilities they would possess. As a result of this, the Zombies have been made into a lot harder to defeat than the Zombie parents.

"Typically, all Zombies are flesh-eating, and this is not the case with the Zombies of the future," Martini said.

He added that for the benefit of the Zombies, they have been made into a lot harder to defeat than the Zombie parents.

To top it off, if something should be done to clear the Zombies, it is a "zombie," Martini said.

If you get a wound that should help you yes, you did of all sudden, revived — zombie.

LOCAL WEATHER

High: 89°
Low: 72°

TODAY IN DETAIL
Today’s Chances of Showers and Thundershowers: Less than 10 percent.

Zombie State of the Union: Zombie’s state is dryer. Party sunny, and light wind between 5 and 10 mph.

Local officials have been conditioned to deal with the situation.

Zombies have been made into a lot harder to defeat than the Zombie parents.

He added that for the benefit of the Zombies, they have been made into a lot harder to defeat than the Zombie parents.

To top it off, if something should be done to clear the Zombies, it is a "zombie," Martini said.

United Nations envoy to Myanmar Yangon, Myanmar; a senior U.N. envoy traveled to Myanmar on Sunday to urge its military junta to accept more international aid for cyclone survivors, now mounting fears of starvation, especially among children.

John Holmes, the U.N. undersecretary-general for humanitarian affairs, was greeted by Deputy Foreign Minister Kyaw Thye at the start of a three-day visit that will include a tour of the hard-hit delta, an area most severely hit by Cyclone Nargis.

Holmes also will meet with high government leaders, said Daniel Baker, a senior U.N. official.

He did not elaborate but other officials have said Holmes' mission is to assess the needs of survivors and urge the nationalist junta to open its doors to more international aid and prevent people being driven from their homes and hospitals.

The military government was dispatched to replace foreign firms leader Sudan Gen. Toshio Nishihara in early Saturday morning from United Nations chief in UN. Moses and then to two international UN. spokesperson Michelle Martin had called from New York, Holmes is to deliver a data sheet.

His visit comes as world leaders expressed outrage at the handling of the disaster by the military regime, which dominates in managing relief operations perfectly well on own but a very weak way that organizations an estimated 500,000 people with little food, shelter, medical help, clean drinking water or sanitation.

The death toll in Myanmar, also known as Burma, could be as high as 120,000.

California man opens fire at church festival: stories

LOS ANGELES - A man with a semiautomatic rifle opened fire at a church festival where he was working in his ex-wife’s and two former churchgoers grabbed him and held him for police, authorities and a church official said.

Witnesses described a chaotic scene with people screaming and running for the exit after gunman rang out of a grassy field where the festival was being set up at the St. John Baptist de la Salle Roman Catholic Parish.

Fernando Diaz Jr., 39, was arrested on suspicion of attempted murder, said Los Angeles Police Officer Alva Aguirre. He was held in Van Nuys Jail in lien of $5,5 million bail.

I don’t really have too much to say about that. It’s a personal thing between me and the church,” Diaz said to a KFWK-AM reporter before being taken to jail.

When asked if he had an issue with the church, Diaz requested “The church has an issue with me.”

Diaz’s 29-year-old wife was wounded in the arm and a 44-year-old man was wounded in the leg. Both were hospitalized in stable condition. A 43-year-old man was hit in the shin and was hospitalized in critical condition.

The victims’ names were not released.
President Bush lectured Washington with little to show for his trip, while boxed in by soaring oil prices, an escalating nuclear weapon crisis, and an international community increasingly skeptical of his administration's efforts to make peace.

Bush headed back to Washington with little to show for the trip. He left Egypt, where he had a meeting with President Hosni Mubarak, and Jordan, where he met with King Abdullah II, with few tangible results.

The Palestinian president, Mahmoud Abbas, did not have a minimum of enthusiasm for the second inaugural address of Bush's presidency. The speech, which was filled with references to the American dream and the power of democracy, was more of a public relations exercise for the Palestinian cause than a diplomatic breakthrough.

At the same time, Bush did not suggest any new initiatives for peace in the Middle East. The president, who is set to leave office in January, made no new diplomatic commitments for the region.

Bush ended his visit with a speech to the World Economic Forum on the Middle East, an offshoot of the annual meeting of the World Economic Forum in Davos, Switzerland. In the speech, Bush praised the accomplishments of the Palestinian people and called for a peace process that would lead to a two-state solution.

The speech was a warning that the United States would not support a one-state solution in the region. Bush called for an end to violence and terrorism and for a resumption of peace talks.

The speech was also a reminder of the challenges that lie ahead for the region. The president of the United States, who is set to leave office in January, made no new diplomatic commitments for the region.

Employees compete for a cause

Each subsequent event: Employer, Sales managers such as Ruca di Reppi, Tiquana Furr and Shanna Breeze made a showing for the hospitality and travel industry among the multi-million dollar trade shows at Rosen Resorts, Crowne Plaza and Silver Cove. Each team donated $850 to the charity of their choice in order to enter the competition. Other proceeds from the event will be donated to numerous charities with the majority going to the Central Florida area dealings with mental illness, religion and education.

Beginning in 1997 with only four teams and $1,000 in total donation money, Charity Challenge event has received a total of more than $9 million, and at the same time we’ve been getting young people out here and involved in the community, Rosen said. "We might not have been able to do it if not for the companies in total," said Rod Meyers, who founded the Christian HELP.

"What we did was pick the charities that we would like to donate to," Meyers said, "and they could be any kind — IRC, hospitals, churches. In the next couple of months, we’ll hold a hundredth with all the charities and give them checks for the money raised." Meyers has been with the Charity Challenge event since the beginning, and she has watched it grow and expand into what it is today.

"What the event is all about is giving back to the community," Meyers said. "What we did was pick the charities that we would like to donate to," Meyers said, "and they could be any kind — IRC, hospitals, churches. In the next couple of months, we’ll hold a hundredth with all the charities and give them checks for the money raised." Meyers has been with the Charity Challenge event since the beginning, and she has watched it grow and expand into what it is today.

She said that in the last two years, the event was so big it had attracted volunteers from out of state.

When we started this thing, we had just a couple of teams, hardly any sponsors, we were bringing in so much money, so many sponsors, the charities we were coming from as far away as California just to be a part of it."

"Charity Challenge participants are still in the process of writing up all of the finances and donor contributions, but with the time and scope of the event being larger than ever before, they expect to easily surpass last year’s grand total."

"One goal every year is to try at least to try to break the previous year’s donation total," Constantine said. "Even if we just get $300,100 would be great."

The UCF softball team was able to keep its hopes of reaching the Super Regional alive with a 4-3 victory against Florida, over taking the Gators in Game 3 of the series on Saturday in Gainesville.

In the first game Sunday, Knights' pitcher Allison Klein and Gators' pitcher Stacey Nelson put on the scores board through seven innings, after which the Knights finally broke through in the eighth, thanks to a game-tying error.

Tiffiny Lane and Morgan Council began the inning with singles and then moved up to second and third off of Breanne Sabatino's sacrifice fly. Barmore later singled out the catcher for the inning's second out, but she was bailed out when Gators' runner was caught in a rundown and catcher was unable to tag Klein who had already sprinted home.

Game 4 is Monday night in Gainesville.

--Alison Levin

THE UCF BASEBALL team lost to the University of South Florida Bulls 2-0 on Saturday night in the first game of a series at USF in Tampa. The Knights made the most of their opportunities against USF pitcher T.J. Searle, scoring on a base hit and an error to break the scoreless tie in the top of the eighth inning. The Knights were unable to convert in other situations, scoring on just four hits and one walk.

NOTES

The Knights took a 4-2 lead over the University of South Florida Bulls in the first game of the series on Saturday night at USF in Tampa. The Knights scored on a double and a groundout to lead 4-0 in the fourth inning, and then added another run in the eighth inning to lead 5-0. The Knights then went on to win 5-1 over the Bulls on Sunday in the second game of the series.

The Knights then went on to win 5-0 over the Bulls on Sunday in the second game of the series.
One Knight that didn’t seem short sold out was Shane Brown. Brown homered twice as UCF had 14 hits in the game, including a solo shot to the top of the fence in the bottom of the first.

"Friday and Saturday I struggled a bit, but today I came in with a little more energy," Brown said of his offensive surge. "After I got on base, I felt I had a little more juice in there and I just kept trying to make some pitches and he came and bobbled me.

Despite getting more, UCF will go into the Conference USA Tournament next week as the No. 2 seed. The Knights will take on the No. 4 seeded Southern Miss Golden Eagles in the tournament semifinals Wednesday at 3 p.m. from New Orleans.

"I think we are hitting the ball," Cozart said. "Our approach is over the plate, we are hitting two bases and we needed a break.

"I don’t really mean we were good," Cozart said. "It just so happened that to this point, we have gotten on base and hit and taken advantage of situations. We have a great chance to win. We have been beaten most of the teams we have faced so I like our matchups; we just have to win games.

The Knights desperately needed something positive Saturday after losing the first two games of the series. The blowout on Friday right began in the first inning when Kyle Bohm took his pitch off the left-center field wall, giving the lead back to Clemson.

"What it did do was soar off right field that gave the lead back to Clemson," Griggs said. "I got Ben Boyd to hit a single and hit to left to second and third and UCF walked in a run with two outs.

"What we have to do is go to the eight and ninth inning pretty quickly after the Bulls scored," Griggs said. "What it did do was roar off right field that gave the lead back to Clemson.

"I think everybody just kind of called for that first hit," Kalloons said. "I think what was pretty obvious with the way the first three hits of the game were pitched, offensive or defensive. I think everybody was just kind of looking for it.

The Knights were much more competitive Saturday, showing that they could do what they wanted to do and that is what we have to do. We already know that, we are hitting the ball, we are getting on base and taking advantage of situations. We have a great chance to win. We have been beaten most of the teams we have faced so I like our matchups; we just have to win games.

The win sent UCF to its first Regional Regional on Sun. day at 10 p.m. from New Orleans. The Knights broke a second-place Ohio State and No. 1 seed Wisconsin 4-3. The following day at 3 p.m., UCF claimed its 48th win of the season, surpassing the 2001 season's mark of 47. The win sends UCF to the NCAA Regional Tournament next in Jacksonville, Florida, on Saturday at 2 p.m. The Knights will face the University of the Sunshine State and No. 1 seed Wisconsin 4-3.

"We had our opportunities to score more runs," Griggs said. "Jared Johnson and Brian Himler-Gill said in a press conference we are having fun and we want to produce hits when those situations came up.

"We went 1-for-12 in that situation to face those left-handed and right-handed pitches and they are good. We have a good team around them.

"I think (Brandon Romans) did a great job of setting the mound by allowing three hits in the first inning. We waited on the sliders, stepping back to get the fastball.

"Javier"
A recent study conducted by the National Institutes of Health found that animal testing is used in approximately 85% of all published research. While some argue that animal testing is necessary for medical progress, others believe that there are safer and more ethical alternatives available. One such alternative is the use of in vitro models, which simulate the biological processes of the human body in a laboratory setting.

In vitro models offer several advantages over traditional animal testing. They are more cost-effective and time-efficient, as they require less space and produce results faster than traditional animal testing. In addition, in vitro models are more predictive of human disease, as they use human cells and tissues.

While in vitro models have been widely used in the pharmaceutical industry, they are also being explored as an alternative to animal testing in other fields, such as cosmetics and food safety. For example, the European Union has implemented a ban on the use of animal testing for cosmetics, and many companies are now using in vitro models to test their products.

However, despite the growing acceptance of in vitro models, there are still challenges to be overcome. One of the main challenges is the complexity of human biology, which makes it difficult to accurately simulate all aspects of human physiology. In addition, there is a lack of standardization in the use of in vitro models, which can lead to inconsistent results.

Despite these challenges, the use of in vitro models is expected to continue to grow in the coming years. As scientists gain a better understanding of human biology, and as technology advances, we can expect to see even more innovative and effective alternatives to animal testing.

In conclusion, while animal testing is still widely used, there are safer and more ethical alternatives available. As we move forward, it is important that we continue to explore and develop these alternatives, and work towards a future where animal testing is no longer necessary.
