Student nurses make impact on HIV

Kenyan activist inspires UCF students

JILLIAN KRITSI UCF News Service

The Student Nurses Association at UCF is taking big steps to make a global impact.

After a recent visit from Chiniki, an international activist from Kenya who has been HIV positive for five years, SHA vice president Angel Dickerson was compellled to take action.

A $25,000 grant was awarded due to seven members of the Student Nurses Association that the students have raised about four times the amount of money is too much. The Tom Lantos and Henry J. Hyde Global Leadership Against HIV/AIDS, Tuberculosis, and Malaria Reauthorisation Act of 2008 (H.R. 3311, A. 3303) will provide $300 million over the next five years to roughly 30 million people worldwide who are suffering from HIV/AIDS.

UCF grad pursues stand-up dreams

ROBERT VULCAN Central Florida Future

If laughter is the best medici ne, then recent UCF grad Nate Baimel is on his way to curing billions in silliness.

Unlike the majority of college graduates who use their degrees to get that much-needed first job, 25-year-old Baimel has decided to put his degree to fully pursue his dream of being a professional comedian.

"I did comedy the first time and I thought it is awesome. I can't get enough of this. Baimel said about the turning point that helped him decide to make his aspiration a reality.

A self-described "funny kid" in college and high school, Baimel used drama classes to help get over stage fright. There have been times when Baimel performed stand-up comedy and did not receive the potential to end his dream.

One victory led to another, Baimel said he reached obstacles that carried the potential to end his dream. The potential to end his dream.

Baimel's passion for live performance during his freshman year at UCF. Baimel's passion for live performance during his freshman year at UCF.

Baimel got his first major win when Baimel performed stand-up comedy and did not receive the potential to end his dream.

Caribbean Getaway raises cultural awareness, provides relaxation

ALBA GONZALEZ

The Caribbean Awareness Council transformed the Leibel Pool of UCF’s Recreation and Wellness Center into a “Caribbean Getaway” last Friday, which was advertised as a “guaranteed vacation away from reality.”

The open-air poolside event featured local bands, food and activities, providing live Caribbean-style entertainment.

The highlight, according to many, was the food, and also the music, atmosphere and the cultural diversity," said Vincent Smith, a sophomore administration major.

The outdoor event attracted passersby, including student health services administration major Reynolda Gam.

“I work at the gym and heard the music and decided to stop by,” Gaye said.

Despite the sweltering heat of the first day of summer, about 300 people showed up for the event.

The Caribbean Awareness Council is one of five cultural Student Centers at UCF, including cultural Student Centers for the CAC and3 other cultural centers.

At the Hip-Hop Awareness Day event, which takes place on campus throughout the year, Caribbean music will be played.

On Saturday, June 28 at 7 p.m., there will be a movie night. The movie is called “Crooklyn," an adaptation of Khalid El-Amin’s bestselling novel, is about a family from Brooklyn who move to California. Both events are free and food will be provided at movie night.

According to communication majors Robert Diao, a member of the CAC, and Perry Mayo, people from all walks of life have attended the events.

If you’re interested in Indian Cuisine, you’d join the Indian Awareness Council and help them with their planning, programming and workshops, the council also describes the council as having an open door policy and encourages students to join the council and attend the events.

Students interested in being involved with any of the multicultural centers can visit the offices of the Multicultural Student Center, located in room 125 of the Student Union.

CARIBBEAN KINGS & QUEENS

Field Day held at Memory Mall, which showcases different areas for students to get involved in UCF. For the event, the MSC will collaborate with Student Association Student Affairs and Planning and宿舍 Services.

On Saturday, June 28 at Memory Mall, there will be a movie night. The movie is called “Crooklyn," an adaptation of Khalid El-Amin’s bestselling novel, is about a family from Brooklyn who move to California. Both events are free and food will be provided at movie night.

"The council is about having a good time with our students," said Nealy. "We need to make sure that students have the opportunity to ask questions and get answers from other students."
A new addition to the Waterford Lakes Town Center will bring some L.A. flavor to Orlando.

Barry and Hollis “Miss Holly” Wilder are in the final stages of opening their new cupcake and tart frozen yogurt shop, Sweet! The shop will feature fresh "ginormous" gourmet cupcakes, frozen custard and the growing sweet sensation, soft serve tart frozen yogurt.

They will open in the morning with breakfast cupcakes, which some might argue look an awful lot like muffins, and a granola topping for the tart frozen yogurt.

Sweet! doesn’t have an official opening date yet, but they hope to open their doors to the public by the end of June. Director of marketing Max Friedman said they will have their soft opening first, and then grand opening ceremonies will take place in the fall once school has started up again.

The store will start its monthly 1,000 cupcake giveaway at this time, awarding the freshly made cupcakes to the organization whose event is chosen.

Tart frozen yogurt has been a sweeping sensation in the past three years in large cities like Los Angeles and New York, according to Barry. While it flopped when brought into the states in the ‘70s, a Korean company called Red Mango increased its popularity and then another company called Pink Berry opened in Los Angeles. Pink Berry became a popular dessert destination with more than 30 stores in California and 13 in New York.

Sweet! doesn’t make their frozen yogurt themselves, but serves a product from a dairy that has been creating it for more than 25 years. It’s shipped in frozen and poured straight into the serving machines for a sweet treat that Barry discreetly mentions is healthy as well as delicious. Their frozen custard comes from the same dairy company and will be served with fresh fruit like the yogurt, as well as the usual candy bars, cookies and treats usually served with ice cream dishes including freshly baked brownies.

Hollis started her food career in Los Angeles, catering fancy children’s birthday parties. Once she and Barry had their children, she restricted her business to gourmet lunches at production studios for shows like Will & Grace.

After having two children, now ages 4 and 5, the Wilders decided to move from L.A. to raise their family. They fell in love with the Winter Garden area, and decided to get back into the food business with a dessert shop. Hollis felt desserts were an underserved category in Orlando and is growing excited as the store opening approaches.

“We’re seeing lots of people peeking in the windows and very excited,” Hollis said. Her husband Barry has a commercial real estate background and is acting as the store owner.

“Usually I represent the talent,” Barry said. “In this particular case I’m married to the talent.”

According to Friedman, many of Sweet!’s staff members are from UCF. Friedman himself was introduced to the Wilders by someone affiliated with the school.

“It wasn’t intentional at the beginning, but it’s just kind of gained momentum,” Barry said. “The people that we met from UCF were just impressive, and then they kept introducing us to people.”

While most of the staff has been filled, Hollis mentioned they’re still looking for someone to drive their frozen treat truck. The truck will match their logo in the signature pomegranate red with a cupcake printed on the side. Look for this sweet ride around town soon.

The new Sweet! gourmet cupcake and tart frozen yogurt shop will open soon at Waterford Lakes. The L.A. based company hopes to go from serving the stars to satisfying the sweet tooth of UCF students and the Orlando community.
Authorities said Prindle, 68, had been married and had been battling cancer since 2002 in Louisiana courts, according to reports.

During the decade, Prindle moved to Jacksonyille, where he worked for the boy since Katrina in 2005, while Farve moved to Mississippi. The couple never married and had been living in a modest house with their children ever since.

Prindle's letter stated that "I cannot do this anymore. I have to go back to New Orleans, or I will lose my sanity. I have a wall, I have to do something about it," the letter said.

Prindle took the boy to Baptist Medical Center on Friday after the 80-year-old man told the boy he want to meet them, relatives said.

Family members said Prindle's other children had been involved in similar incidents. Problems were reported in the case of Prindle's former wife, who is a loving father, who had to be kept out of the boy's home.

The former couple's children had never married, andTwyla Prindle, his daughter, was said to have been named Prindle, 35, of Jacksonville.

There were 26 campuses of NORML, a network of college students and activists, that were expected to formally make the list of the 20 volunteers attending the 20th annual NORML candlelight vigil, which kill hundreds of lives, by Wednesday on how take part in the event.

"I saw a bunch of signs to keep cars, but we can talk to these people with the licenses, we can talk to these people with the licenses," said Jeff Pittman, the school's president. "We have to do something about it."
**Students have mixed feelings of short break**

**ANDREA CANTERBURY / CENTRAL FLORIDA FUTURE**

As finals ended Friday, students enrolled in summer and re-registered for fall for a three-day break.

For some, this mark may seem too short to get in a vacation or break of summer, but for others, this short break does more help than harm.

"With especially for language, any time you spend to learn it," Parks said, "It's tough since I'm working on my thesis this summer while also taking intensive Spanish courses."

She thinks he lacks the back-to-back terms well.

"The German Academic Exchange Service (DAAD). Her essay, "Confronting Modern Slavery: Germany's Determined Fight against Human Trafficking," was chosen among

Williams, a mentor of Lisa Logan, a mentor of Williams in an e-mail interview, said, "when other interns were asked to talk about issues such as the war in Iraq, Williams was introduced to the topic of human trafficking.

"Human trafficking is the reality for a lot of people and it's a big issue and has a lot to do with immigration," Williams said. "The more I research my thesis, I see how intertwined immigration is with the concept of human trafficking."

Williams won first prize in the undergraduate category of an essay contest handled by the German Academic Exchange Service (DAAD). Her essay, "Confronting Modern Slavery: Germany's Determined Fight against Human Trafficking," was chosen among

"Berlin is a huge center for human trafficking," said Williams. "I'm hoping to get to come in contact with some human trafficking groups further immigration analysis.

Williams' essay focuses on human trafficking in the U.S. and on the Europe, as a sort of comparison. She research on human trafficking in Berlin, Germany, during the summer, and said the short- and intensive classes seem to help students

"So often, in the U.S., we are all accustomed to abbreviations, and I don't even know what they mean," Williams said.

ALICIA CHANG

LOS ANGELES — Bacteria microbes flourish in the most punishing environments on Earth from the bone-dry Atacama Desert in Chile to the boiling hot springs of Yellowstone National Park with water hotter than the boiling point of water in terms of their world. The photo shows a scene in their world. NASA Phoenix spacecraft could be found out. Since playing down near the Martian north pole a month ago, the three-legged lander has been probing an icy surface, the sticky soil and collecting promising, icy-looking amylospheres a meter and a half at per meter at a new area.

There hasn't been a crew photo since February. Phillips turned up a pending last week that was uncanny what scientists believe are icy flakes in a white climbing material on another.

Gazette reporters hope experiments by the lander will reveal the source of water and whether there are any other chemical compounds. "We're looking for the building blocks that would allow life to prosper in this environment," chief scientist Peter Conrad, University of Arizona in Tucson has said in December. The discovery of extremophiles, in liquid water on Mars, in recent years has helped to foster both the search for extraterrestrial life and industrial applications.

The lander also seems to grow with new people. "I'll just start a few hours to the month while there's no ice on Mars or if it even exists today.

But if there were past or present life on the red planet — a big if — scientists speculate it would likely be similar to some extreme life on Earth — microorganisms and hardy, capable of withstanding colder-than-Antarctic temperature and low pressures.

"It's going to be microbes, it's not going to be a big green man," said Kenneth Bockman, a biologist with the Center for Life on Extreme Environments at Portland State University.

Under a microscope, extremophiles vary in size and shape. Some resemble miniature corkscrews while others may look like rods or irregular shapes. Scientists use a dye to distinguish the living ones from the dead.

The Phoenix mission has its limitations besides a shocking budget of $420 million. It doesn't have instruments capable of identifying fossils or living things. Rather, the lander has a set of instruments and a gas analyzer that will heat soil and ice and use the resulting vapors for life-friendly elements. Its wet chemistry lab will not the pH, or acidity, of the soil much like a gardener would, and its microscope will examine soil granules for minerals that may indicate past presence of water.

The Phoenix mission is the first mission to land on Mars since the Viking missions of 1976 twin landers that were designed to search for signs of life.

Researchers have shown microbes on Earth can be traveled in a deep freeze for thousands of years and reactivated under the right conditions. In 2005, NASA researchers announced they revived bacteria that were apparently dormant for 800 years in a frozen pond in central Alaska. Earlier this month, Penn State University scientists said they were able to grow in the lab a ultra-small species of bacteria isolated in a Greenland glacier under high pressure and low oxygen for at least 350,000 years.

"There's a lot of amazing things that survive in the cold environments," said Jennifer Loveland-Curtze, a senior research associate at Penn State. What that means for Mars and other hostile environments is debatable. But scientists are mapping the depths of Earth's icy polar regions.

Former UCF softball pitcher goes from being shy to becoming star

In his first season as head coach of the UCF Volleyball team, Todd Dagenais' young club will face some tough competition in the 2008 regular season.

UCF will host No. 2 Stanford and travel to face two other teams that went to the NCAA Championships last year, as the Knights seek to improve on last year's disappointing 14-17 record. The schedule released by Dagenais last week.

"The schedule is really exciting for us," Dagenais said in a press release. "It gives us a lot of tests to check our progress as a team and as a program."

Highlighting the schedule will be national champion Stanford. travelling to Orlando on Sept. 19, to take on the Knights at 7 p.m. at the UCF Arena. Stanford finished the season with a 28-2 record last year. No. 2 ranking in the nation and participated in the NCAA tournament.

Kime improved demeanor

New head rowing coach named

Kime wanted to show that she had a ring before she took the field. Every night, Kime would write a letter to her teammate, Becky Frost, who spent the 2008 spring season at UCF. Frost has accomplished many things during her career at UCF. Before arriving at Orlando, Frost spent coaching the school's novice program before the end of the spring season after being with Kanns, Florida.

During the 2008 spring season, Becky Frost wrote a letter on a piece of paper on the table during her time at UCF. This letter was a message of support to her teammate, Kime, in their upcoming season. The letter was written in response to a request made by Kime, who had just lost her mother, to return the picture of the seedlings to her. Becky's message was a heartwarming note to her teammate, reminding her of the love and support that they had for each other.

Every day, Kime and her teammates would spend time together, discussing their experiences and reflecting on their achievements. Becky's letter was a reminder of the bond that they had formed and the support that they gave each other. The picture of the seedlings was a symbol of their connection, representing the growth and development that they had experienced together.

UCF will open its season on the road as it faces Jack Frost, Georgia Southern, and Providence in the Georgia Southern Tournament. The game is scheduled for Aug. 29-30 in Statesboro, Ga.

After returning home to host the Cardinal, UCF will travel to Lawrence, Kan., to play in the Kansas University Tournament on Sept. 5-6 that tournament, UCF will play both Oregon and Kansas, two teams that participated in the NCAA Championships in 2002.

Not only will these two teams be a test for the Knights, but traveling to Kansas marks a Conference USA test for the Knights against North Carolina.

The Knights will then return home to face Bethune-Cookman on Sept. 10 before heading down south to take on Florida International, Oral Roberts and Pennsylvania in the Florida International Tournament from Sept. 12-15. UCF will then head to Atlanta, Miss., for the Southern Miss Tournament Sept. 18-20.

It's a tremendous honor to be picked by a top 25 team to play at home in the Big 12, Coach said, "We are going to have the highest-ranked team to play at UCF when the six-time national champions come in." Dagenais said in a press release. "We scheduled this for a very specific reason. We wanted to show that we are not afraid to play anybody."

The Knights will also face C-USA opponents on the road before closing out the regular season at home against Southern Miss on Nov. 15.

Knights to play No. 2 Stanford

UCF could face No. 2 Stanford in the 2008-09 campaign, the season before Kime transferred. UCF had won the Atlantic Sun Championship, but never received rings. The Knights were not able to capture a national championship, but Kime wanted to win a ring before she left. She was proud that UCF had been named the team's head coach, Director of Athletics, and President, Becky Frost, who spent the 2008 spring season at UCF. Frost has accomplished many things during her career at UCF. Before arriving at Orlando, Frost spent coaching the school's novice program before the end of the spring season after being with Kanns, Florida.

Humans are quickly outsmarting evolution

Whether you believe or not, I think it is safe to say that there was once a man of genius. The theory of evolution and natural selection may not be accepted by the majority of the present public but for those who disputes, it seems quite difficult to argue against such a strong theory. It doesn't help that evolution has come to be regarded by the scientific community as a fact; there aren't too many other theories so well accepted by the scientific community. That being said I should mention that I am strongly biased in the idea that at some point down my family line, my ancestors were not necessarily human. Now, though it is obvious that I favor evolution over creationism, I think it is important to know that I do not have a strong belief in the idea that one could make a case for a theory over another. I think that those who disagree will continue to read what I have to say, for we developed an alternative theory that better explained the phenomenon of life, that is, a worldview of creationism.

During the course of my 30 years on this lovely planet, I've spent a lot of time on earth, yet playing video games and becoming housewives, but much of my time is also dedicated to coming up with scientific explanations like the one mentioned above. So for quite some time I've had the belief that humans don't seem to be evolving as quickly as we are. I've heard many people make the argument that evolution doesn't happen anymore, so it seems to be a topic of discussion that hasn't been relevant for over 50 years. In fact, you guessed it, a law school offering classes to 3,500 students.

If these figures are correct, it seems as though the number of law students against centralized downloading has increased substantially at the national level. A recent study reported that the number of music downloading sites in the United States, which percent of the population, is probably never been sued before; therefore, when they are targeted because they are easy to find and when the RIAA comes knocking on their door, they probably always never end. These sites are usually incorporated with software that prevents bands have disrupted our minds to make our lives better, we seem to be evolving because we aren't. Physical evolution has come to a complete halt. So for quite some time I've been thinking about the statement that humans don't seem to be evolving as quickly as we are. I've heard many people make the argument that evolution doesn't happen anymore, so it seems to be a topic of discussion that hasn't been relevant for over 50 years. Saturday, August 2, 2008

9:00 a.m. (Procession of graduates begins at 8:40 a.m.)
College of Education Up to 5 Tickets
College of Health & Public Affairs Up to 5 Tickets
Burnett School of Biomedical Sciences Up to 5 Tickets
College of Sciences Up to 5 Tickets
Undergraduate Studies Up to 5 Tickets
Graduate Studies Interdisciplinary Studies Up to 5 Tickets

2:00 p.m. (Procession of graduates begins at 1:40 a.m.)
College of Arts & Humanities Up to 5 Tickets
Art, Digital Media, English, Film, French, History, Humanities, Modern Languages, Communication, Music, Philosophy, Photography, Spanish, Theatre
College of Business Administration Up to 5 Tickets
College of Engineering & Computer Science Up to 5 Tickets
Rosen College of Hospitality Management Up to 5 Tickets
College of Nursing Up to 5 Tickets
College of Optics and Photonics Up to 5 Tickets

*Note the major Modeling & Simulation may either be in College of Sciences or College of Engineering and Computer Science depending on the discipline. If the major is in College of Engineering and Computer Science, the student should attend the College of Engineering and Computer Science ceremony.

Each candidate who participates in Commencement exercises will receive up to the amount of tickets indicated according to the above schedule (based on the maximum seating capacity and number of participants at each ceremony).
