PUBLISHED BY THE FLORIDA  
HISTORICAL SOCIETY

COVER

Phosphate, after it was discovered in 1889, became a major Florida industry. The hard-rock phosphate region was centered around the Ocala-Dunnellon area. Land-pebble deposits were to the south in Polk, Hillsborough, Manatee, and Hardee counties. This photograph, circa 1890, is enlarged from a post card manufactured by the Valentine & Sons' Publishing Company, Ltd., New York.

Correspondence concerning contributions, books for review, and all editorial matters should be addressed to the Editor, *Florida Historical Quarterly*, Box 14045, University Station, Gainesville, Florida 32604-2045.

The *Quarterly* is interested in articles and documents pertaining to the history of Florida. Sources, style, footnote form, originality of material and interpretation, clarity of thought, and interest of readers are considered. All copy, including footnotes, should be double-spaced. Footnotes are to be numbered consecutively in the text and assembled at the end of the article. Particular attention should be given to following the footnote style of the *Quarterly*. The author should submit an original and retain a carbon for security. The Florida Historical Society and the Editor of the *Florida Historical Quarterly* accept no responsibility for statements made or opinions held by authors. The *Quarterly* reviews books dealing with all aspects of Florida history. Books to be reviewed should be sent to the Editor together with price and information on how they can be ordered.
