Students to Vote On Constitution

Florida Technological University will soon put a constitution to a student vote. The recently completed constitution will now go before a final approval by President Millican before it can be voted on by the student body.

The framework of the constitution was developed by a committee formed almost a year ago. The original committee has been eliminated, and its place is now taken by the Interfraternity Council, a group that will be elected by the student body in the future.

Secondly, the Fire Protection and Undecided at FTU

First, the Fire Protection and Undecided at FTU. In the case of the Fire Protection, the Florida Technological University Fire Protection Department, currently under the direction of Dr. Tucker's assistant, has been working closely with the Administration to bring it under control. The report is that no student government can be considered. As I understand it, the idea is to bring it under control.

Also, the Fire Protection is still under consideration, and it is being worked on. The Fire Protection is still under consideration, and it is being worked on. The report is that no student government can be considered. As I understand it, the idea is to bring it under control.

The above article appeared in the Orlando Sentinel Sunday, January 15, 1969. It was also part of the Florida Technological University, and it is being worked on. The report is that no student government can be considered. As I understand it, the idea is to bring it under control.

No Plans for Widening Alafaya

According to usually reliable sources the State Road Department does not have any information regarding the widening, or even refuting, of Alafaya Trail from the Orange-Seminole County line to Highway 418.

The plan's for refacing of Alafaya Trail, in fact, are not included in the road department's current, primary or secondary budgets, which means in effect that Orange County has not allocated any funds for widening or resurfacing Alafaya Trail within the next five years.

The only way possible for this project to be undertaken is for the Orange County Commission to propose in his annual March budget that the road be repaired. The March budget is supplementary to a five-year budget which was submitted last year to the SRD. Had the ex-commissioner requested such an undertaking in his five-year budget work might have already begun. However, as it stands at the present there is no assurance that if such an allocation is proposed in the March budget, it will be approved and carried out by the SRD.

One member of the SRS stated that "building roads now is like having 10 men dying and having only one iron lung. We simply cannot do all the work the counties request." Even if it is proposed and accepted in this upcoming March budget, there would be no possible chance of carrying out such a project until sometime late in July as the budget year for the SFR goes from July to July. Therefore even if the construction is approved the project could not be started, or plans even drawn up until after the approaching July. This means no work could be done on Alafaya Trail in Orange County until next fall at the earliest.

According to the Orlando Sentinel of Wednesday, January 15, Ralph Poe, the new Orange County commissioner, said: "I intend to get it placed on the list in the next budget." The budget which Poe was referring to is Orange County's budget which will not take effect until October 1. Which if it is so would even delay more until December. This seems a rather unusual situation since Seminole County, which backs up to the campus, was able to foretell the problem and widen and resurface their portion of Alafaya some months before school even opened. It is obvious that anyone with a little insight should have realized a major road like Alafaya (see picture above) of Alafaya would require resurfacing if any facility the size of the students commute. Therefore, no work could be done on Alafaya Trail in Orange County until next fall at the earliest.

TEACHER PROFILE
Mr. Mays Active in Theatrics

Mr. David D. Mays is in charge of theatre at FTU. Having graduated from high school, Dr. Mays attended Marietta College in Marietta, Ohio. While attending school, Dr. Mays' subjects included English, speech, radio, pre-med, history and pre-law.

In 1966, Dr. Mays transferred to Tulane University, where he received his M.A. (his thesis was on the "Group Theatre of New Orleans"). He completed his doctorate in 1963. He is a member of the American Drama Critics Association, Phi Mu Alpha Sinfonia and Alpha Psi Omega.

Mr. Mays taught for one year at North West Normal College. Then returning to Charleston, Texas, Dr. Mays accepted the position of chairman of the speech and theatre department at Austin Community College.

Mr. Mays joined the University in 1969. He has been active in directing 13 plays and produced 30.

When asked the reason for coming to FTU, Dr. Mays replied, "The reason I came to FTU was the opportunity to begin a new theatre program."

Dr. Mays' spare time is occupied in writing of a book, "Plays in English Theatre", and his family reside in Tallahassee. They find much enjoyment and relaxation in sailing.
In response to the mountain of mail which pours into the FTU office daily I dedicate this column.

It would seem that the question most often asked in all the mail, as well as in the question which is on the lips of many FTU students, is "When are some more sidewalks and grass going to be put in?" This is actually an excellent question, as I noticed that last week, just after the science building disappeared, there were several sand piles building up around the west side of the LLRB. The answer, however, is not quite so simple.

After a 20 minute interview with the head stab in charge of sand-dune control, I had a beautiful story. But when I got back to the FTU office I realized that it was written in Arabic, or French, or one of those foreign languages with which I am not too well versed.

Anyway, I will now try to relate, the best that my memory serves me, our exact words.

"Hearts stuck in sand. Must put down grass until we put walkway."

When he asked if he thought the students seemed helpful, as Miss Poor did not have enough student leaders to make an answer.

When I asked if I could interview the students, he said, "Blahfah! No, I don't think so. She just answered the question. It is not pertinent to FTU! I think the problem is we didn't tell her what she wanted to hear."

Miss Poor added, "We all appeared interested through the entire interview. We may have been noticed but we were definitely not helpful."

Mr. Turner commented, "Needless to say we are not going to walkway with the article by Peggy Poor. I disagree with her, we were not helpful and uninformed. The four of us did not always agree and we told her. But keep asking the same questions over and over, and once you answer a question, you don't like to keep repeating yourself. At least I don't.

All the students were in agreement about many facets of the Interview. For example, all agree that our low performance in certain feelings was and was not helpful when those feelings were not expressed properly. The Tech students. All agree that Miss Poor continually dwelled on the same questions, and also agreed that she was trying to compare FTU to other teams familiar to Dr. Rothberg, Faculty tennis. This was not right.

Elaine COOTE - From the Editor-in-Chief and the Associate Edition of the FTU.

We suggest, Miss Poor, that you obtain some recent facts before you attempt to write any more articles about FTU. If there are many errors about FTU, a university which is not a 20 minute drive from your office, we wonder just how factual the rest of your articles are about colleges that are harder to take and to enroll in.

It should be noted that we tried all this week to contact Miss Poor at the Sentinel informed us that Miss Poor's vacation had been extended for a few more days.

Mr. Turner added, "He seems to be taking over and over, and once you answer a question, you don't like to keep repeating yourself. At least I don't."

The Wizard of ID

WHAT ARE YOU DOING?

I'M BUILDING A PROG WALL.

IS YOUR FIRST WALL NOTen?

HOW DID YOU KNOW?

by Brent Parker & Johnny Hart

In response to the mountain of mail which pours into the FTU office daily I dedicate this column.

"Bullshit!" If you're a Steve McQueen fan you might as well bag the rest of this review. In this flick, our boy is again behind the wheel of more machinery. On this gig McQueen pilots a Mustang through a sequence that could only be a hot driver's concept of a day in San Francisco. Old fans will remember similar stints of this kind performed by Virgil Hilts and Thomas Crown.

The plot of this movie isn't much. Essentially, Lt. Frank Bullitt, is assigned to protect a mob defector. The pigeon is the prize of an ambitious politician (Robert Vaughn) who is going to guss up some quality points by producing this star witness before a Senatorial Investigating Committee. Add to this a couple of hit men, a setup, and you've almost through the film. Sensational violence becomes a snapshot and it goes something like this: hit men blast cop and pigeon, bullitt -"flee"- hit men, "Z" bullitt blasts "Z". The nature of these scenes would be similar to the National Inquirer using Kodakchrome. The viewer starts to get the message when the dead and wounded begin to look like unfortunate passy cats along the roadside. The end is marked by a small, soul-searching reflection, but it is always agree and we told her. But keep asking the same questions over and over, and once you answer a question, you don't like to keep repeating yourself. At least I don't.

S.A.C.S. To Evaluate FTU

A committee from the Southern Association of Colleges and Schools will visit the FTU campus on March 26-29 to evaluate all facets of the university on the basis of the standards of the College Delegated Assembly.

The committee's report will be used to determine whether FTU will be designated as a recognized candidate for accreditation by the 1969 annual meeting of the S.A.C.S.

Fire Protection
(Continued From Page 1)

bit of construction under way at the school. A fire is more likely to occur at a building under construction than when it's occupied.

The problem has led Union Park fire officials to request money to purchase what they feel is the necessary fire fighting equipment. As Control District Board Chairman Ernie Adams told the FutUe, "We're trying to get a commitment out of FTU so we can buy the right type of fire equipment to take care of buildings on campus."

According to Union Park Fire Chief Clarence Stecher one piece of needed equipment could cost as much as $600.

Charisma to Play Sadie Hawkins Dance

Although presently only half of the university campus area falls within the Union Park District a move is now underway to enlarge this area to include all of FTU as well as other surrounding areas.

Union Park is legally obligated to answer only calls from the section currently in their district. It should be noted, however, that none of the campus buildings fall within this boundary.

District Chairman Adams noted that he has not yet been asked to attend the Fireman's Regency's session. Adams said, "I will be glad to meet with the Board of Regents if I'm invited."

Meanwhile, students were surprised with a spot fire drill held here last Friday. According to both state and local officials, such a drill is a regular practice which schools are required by law to hold at certain times during the year.

Deaths In Home Accidents

NEW YORK—Deaths in home accidents in the United States dropped about 2 per cent, from 28,500 in 1964 to 28,000 in 1965, according to the Insurance Information Institute.
