The Taus of FTU won over Delta Beta Pi of Orlando Junior College 1022:1 to be named the 1968 Charity Marathon basketball game held last weekend at the Davis Center.

The contest began at 11 p.m. Saturday and continued without pause until 1 p.m. Sunday. The game was played to the same crowd that attended the annual Cerebral Palsy Marathon was being held next door at the Municipal Auditorium.

According to agreed upon terms, each team would donate 10 cents to the TV Marathon for each point scored against it.

With cheerleaders supporting from the stands, the teams filled the stands Saturday night, the game began. Utilizing their superior height and experience, the Taus subdued the Zetas away slowly. Once the definite lead was established, the Taus substituted freely to allow its various team members time to rest.

Delta Beta Pi team members did not fare so well in the real count, and their performance proved to be one of the key factors in the Taus' substantial victory.

As the game wore on into the early morning hours, the stands started thinning out until those remaining consisted mainly of the players themselves.

Dr. Charles Millican, President of FTU, showed his support by making an appearance shortly after 3 a.m. inspiring on the progress of the game. Players were seen trying to out duel each other in the stands while awaiting their turn on the court.

Cheerleaders Stay
The FTU cheerleaders staged a marathon of their own by giving their support throughout the whole game. At all times they could be seen and heard cheering on the Taus.

Joe Griffin, Tau service committee chairman, represented the Taus in the presentation of the money raised. Jack Smith, master of ceremonies of the TV marathon, accepted the donation and thanked both fraternities, citing the willingness of the college students to become involved in such a benefit.

Griffin then introduced Dr. Frank Richter of the FTU sports staff who presented a personal donation in behalf of Dr. Millican, master of ceremonies of the TV marathon, accepted the donation and thanked both fraternities, citing the willingness of the college students to become involved in such a benefit.

The residence staff of both the men's and women's residences have started a tutorial program for the residence students. "Operation Student Concern" is designed to provide competent student tutors for any resident that desires this service.

If you are in a position where you can be of help in this way, you should get in touch with Kathy Kersten or Tom Kearney, resident assistants in charge. Any student that would like to take advantage of this program should contact the above by campus mail, box 26,260. They will then be paired with a fellow student who will help them with their course work.

Construction on the new Science Technology Computer building will cause inconvenience for persons going from the LLRB to the Science Building for the next 18 months. The main sidewalk has been fenced off and will be torn up. The sidewalk was never originally planned since it was known that it would have to be destroyed at a later date and replaced by the poured concrete which will be working on the LLRB. The only walkway now left between the two buildings goes by the Village Center.

Few Restaurants To Be near FTU
This is the second part of an interview with Commissioner Paul Pickert, Chairman of the Orange County Board of County Commissioners.

Pickert—in zoning the properties along Alafia Trail down to Florida Tech it seems that on the surface most of the parcels along there are classified for either housing or apartments. Have any of them been set aside in the zoning regulations for commercial activity?

"Well, the land was accepted by the Board of Regents for FTU we froze the zoning all around the university to try to stop what happened in Gainesville, where you could have a row of hot dog stands if you wanted to, right next to the university. This will cause inconvenience for persons going from the LLRB to the Science Buildings goes by the Village Center.

Planning Department drew up a complete set of plans showing how much private housing we would need around the university, how much apartment housing, and also small areas of light commercial. We know we need the small restaurants and the little convenience stores, so these areas were all drawn off on a map while the zoning was completely frozen. The area was agricultural, and in this effect just stopped anything from happening.

The plan was to keep the hilly look and the hot dog stands just springing up all around the plan and mixing several areas for good, clean residential development. We have now inaugurated the university zoning and have started releasing building permits in certain areas around it but they must comply with the overall plan adopted from the Planning Department. This will keep a free, open area around the university where there can be some nice apartments and some very nice homes. Not necessarily big and expensive...just nice. And it can never close in on the university like it has done in some cities and just literally strangle it. It's impossible under this type of zoning.

Few Restaurants
FTU—But this plan does include restaurants and stores!

Pickert—The plan does include a few areas of light commercial where you can have your restaurants and the so-called hot dog stands I've referred to, and your little convenience stores. All of this sort of thing is incided as long as it's clean and not noisy.

Future—Are these within walking distance from the school or parking area?

Pickert—Yes, a short walk.

Future—Will the new library be built?

Pickert—If you mean the one that is being worked on, yes, it will be built.

Future—Are there any plans for additional parking areas on campus?

Pickert—Yes, there are plans for additional parking areas around the university.
Editorial

Frat's Frown on Constitution

There are some movements afoot by several frats on campus to stop the proposed S.G. constitution from being voted in. From what the FUtere could find out there seems to be one major complaint against the constitution, that is many people feel that the S.G. should not have the power to "dictate" or "dictate" out of any student club or organization seeking official recognition." (Article II, Section 6, Paragraph B)

In the first place, without being derogatory to S.G., the constitution doesn't say much at all. It touches lightly a few major points in each article and then skips to the next. However, this is how a constitution of this nature must be structured. If there were specific in the constitution it would never be able to please most people. Therefore it must be made of generalities so that it can be voted in by the students senator bearing signatures of at least 25 per cent of the student body.

And the logical choice is fellow students, which is the way, is the powers and duties of the student senate which will be least one senator. With a governing body like this there is no chance of see to it that your senator knows what you want and he can make an idea it will be passed.

We urge a "yes" vote from the student body but we also urge the individual students to participate in S.G. to make it work. Run for an office or help on a campaign. This is our chance, don't blow it.

Interview Cont.

(from page 1)

are they pretty far away from the campus?

PICKETT-I don't have the plan in front of me but as I recall there is no commercial of any kind within 1,250 feet, or approximately one half mile, from the campus.

FUtere—Another question that has come up in recent weeks has been the problem of adequate fire protection for FTU. Exactly what is the county's stand on this situation?

PICKETT—Unfortunately the county does not say and cannot under the law, have much of a stand; we can work with the various groups involved and try to work the thing out. The Union Park Fire Control District is a separate, legal entity set up with a charter just like a city. And, part of the campus is within the boundaries of the Union Park Fire Control District. Now they must by law serve anything within their district, and they will.

The Fantasticks' Opens at Studio Theater '68

By John Gholdston

Orange County Commissioner Paul Pickett, and we can see that they do. We cannot order the Union Park Fire Department to go outside its district on a call anymore than we could order a city fire department to leave the city limits. This is because the Union Park Fire Department is run from taxes. Only the people within the boundaries of the district pay the taxes, or pay to operate the department, and quite logically they're the only ones who should be served. We just hope that by working with them—and there are discussions going on right now with several groups involved—that we can work out an arrangement that will see that F.T.U. get adequate fire protection. But we cannot just sit in here and pass a resolution and say that they are ordered to cover the entire campus because it would be an illegal resolution. No one has that authority

Letter to the Editor

Movie Critic:

You must certainly feel qualified to review motion pictures or you would not have your reviews printed in the FUtere. However, this writer cannot understand how "Mulberry Bush" or "Oklahoma" could be called "wholesome." This is a radical departure from the sickening wholesomeness of "My Three Sons." Surely the war in Viet Nam, the riots, the spread of violence and crime, and the moral decay of an apathetic American public are much more sickening than a wholesome family television program.

If the people who write to the editor of the FUtere are actually doing it are used only "to milk a comic effect," are not the people who pay to see such comedy sicker than the wholesomeness of "My Three Sons?"

How can the unwholesomeness of peoples thoughts be separated from their desire just weakness of one of their actions? Must these unwholesome thoughts be muted by the motion picture industry? This writer say no, if not the American public will take a stand and not allow such movies to flourish.

"Belle deJour" Is a Challenge

By ROBERT E. HOLLSINGER

"Belle deJour" is an exciting new motion picture experience — a challenge. The subject matter could be considered depressing, but the treatment is so whole and so rich enough to make the film's coming-of-age believable, powerful and climactic/ resolution of the conventional motion picture.

DOPING TYPING done by Sevretta Severy, a young, sexually naive girl who has been married to a medical student (Jean Sorel) for a year. The seemingly well-to-do beauty is frankly in love with a married philosopher supplies the vital information on this existing house of prostitution. Reluctantly, either through curiosity or what might be described as a form of therapy, she becomes a member of the brother's staff. Over a period of two to five, thus she adopts the name "Belle deJour." At this point the film could have strayed to a course in abnormal psych, by way of responses to clients number one, two, three and so on; this is minimized. A gangster, Marcel (Pierre Clémenti) enters (His clothes would make the cats on 125th Street call the "mask" for money). Where he comes from, it is hard to say... he gives the picture a shot in the heart. Belle and DeJour. Marcel finds out about Belle's husband. Things deviate a little from what would be the ordinary course.

As we have said the picture is a fantasy. The viewer is supplied with many motivational hints by Severy's intrinsically constructed subconscious sexual obsessions. The erotic transactions are vividly portrayed and cinematographic devices of interpenetration (there are no obvious flash-backs like one might have seen in "Point Blank", slow motion, fast time, and so on. As the viewer accepts these in a one to one relationship that connects Severy's actions, he gets the feeling of incompleteness. It is hard to think that there are no clear-cut distinctions between what is real and what is imaginary. If this is real, then the whole film might be the husband's fantasy. In total, the film does seem to lean more heavily toward a neo-Freudian masculine fantasy. In any case, we find ourselves trying to construct the external (or real) from the internal (or imaginary).

"Belle deJour" initially might leave you sitting in amazement. It overdoes the usual Praxic statement of character and plot. The visual paradox vaguely relates to a line by Henry James from the "Author of Beltraffio": "Poor little DeJour was more than unsoftened. By now we realize a foreshadowing of more religious symbols. The Jewish people as a whole. The "space which lacks it" (the Jewish people) is an obvious by way of the world. Symbolizing gentiles is the eagle, which is present in the sky. By relating these three symbols together in a workable pattern we find that the poem "Icos" shows us that the Jewish people should be able to live freely in the world, unobstructed by the gentile's prejudices. This last interpretation should really get you in good favor with your instructor.

As you see, any poem can have any meaning you want. You just have to decide which meaning will help you the most. In this case, one more thing might be necessary in your Jewish professor's personality... a good sense of humor, or... a good sense of humor, or... a good sense of humor, or... a good sense of humor, or... a good sense of humor, or...
**Activity Calendar**

Friday, February 21, 1969

9:00 p.m. - 4:00 p.m. VOTE—Student Government Constitution, LH Lobby

8:00 p.m. - 10:00 p.m. University Movie: "Oh Dad, Poor Dad!", featuring Rosalind Russell, Robert Morse, Admission, 50 cts., Science 107.

Saturday, February 22, 1969

9:30 a.m. - 10:00 p.m. University Movie: "Oh Dad, Poor Dad!", featuring Rosalind Russell, Robert Morse, Admission, 50 cts., Science 107.

Monday, February 24, 1969

3:30 p.m. - 6:15 p.m. Meet with Miss America, Judi Ford, Village Center, Main Desk.

Wednesday, February 26, 1969

8:00 a.m. - 10:00 p.m., Special Movie: "Americanization of Emily!", featuring Julie Andrews, James Garner, free admission, Science 107.

Thursday, February 27, 1969

7:30 p.m. - 9:30 p.m., Gymnastics Exhibition, Multi-Purpose Room

Friday, February 28, 1969

8:00 a.m. - 10:00 p.m., University Movie: "Flight of the Phoenix!", featuring James Stewart, Richard Attenborough, Admission 50 cts., Science 107.

Saturday, March 1, 1969

8:00 a.m. - 10:00 p.m., University Movie: "Flight of the Phoenix!", featuring James Stewart, Richard Attenborough, Admission 50 cts., Science 107.

See the Florida Technological University exhibit at the Central Florida Fair, February 24 through March 8.

**Cherokee 140 Airplane at FTU**

A Cherokee 140 airplane will be brought on the Tech campus Monday by Pegasus' Pilots. The plane will land on Hall Road at 7:15 a.m. and taxi down Alafaya Trail, which will be temporarily closed by the Highway Patrol. The plane will be parked in the sand north of the faculty parking lot.

Members of Pegasus' Pilots will be stationed at the airplane to answer any questions. When a club member is on duty, the Cherokee 140 will be opened for public inspection.

The purpose of the display is to generate student interest in Pegasus Pilots and aviation in general.

**Housing Payment Due February 28**

Resident students planning to remain on campus for the Spring Quarter have until February 28 to complete the housing and food service payment.

Financial aid recipients must notify the Office of the Director of Housing of funds they will receive toward the housing payment.

Eligible students will be notified that their Housing costs will be released from their housing contract must also observe the February 28 date to avoid the $50.00 charge for late notification.

Residents who fail to meet the February 28 payment deadline date and desire Spring Quarter housing may have to be placed on a waiting list.

All students who have not yet voted in the Constitutional Referendum are reminded that the polls are open until 4 p.m. today.

All FTU students are invited to attend a gymnastic clinic sponsored by the Physical Education Department of FTU. The clinic will begin at 7:45 p.m. Thursday, February 27, in the Multi-Purpose Room of the Village Center.

**TEACHER PROFILE**

**Gambrell Receives Honors**

Dr. C. B. Gambrell, Jr., Vice President for Academic Affairs at Florida Technological University, recently received two high honors.

Purdue University, Lafayette, Indiana, will present the Distinguished Alumni Award to Dr. Gambrell at a special Engineering Convocation to be held at Purdue in May, and the American Institute of Industrial Engineers, Inc., has selected Dr. Gambrell for admission to the grade of Fellow of the Institute. This honor is bestowed upon members of the Institute who have made distinguished contributions to the profession and will be awarded to Dr. Gambrell at the Annual Institute Conference in Houston, Texas. May 16.

The Academic Vice President of FTU is a native of Birmingham, Alabama, and prior to joining Tech he was Professor and Chairman of the Department of Industrial Engineering at Arizona State University. He received his B.D. Degree from Clemson University, Master's Degree from the University of Florida, and Ph.D from Purdue University.

Dr. Gambrell has a background in industrial engineering and has served as consultant to some of the nation's major industrial firms, including the Advisory Group of the U.S. Army Test and Evaluation Command and the U.S. Army Scientific Advisory Panel. He has had outstanding professional experience and is a recognized author in his field.

Dr. Gambrell was appointed to the top academic post at Tech in March, 1967, and has been responsible for developing the academic, research, and continuing education programs and for selecting the deans and professors for the new university.

**Psych Club**

Dr. Sidney Hook Elects Officers

In its bi-monthly meeting last Tuesday, the Psychology Club elected officers. Tom Kerney was voted in as president while Terry Voorhees will assist him as vice president. Linda Shank was chosen secretary.

The club, sponsored by Dr. Herndon, is open to all students interested in psychology who have successfully completed the basic psychology course. The Psychology Club will meet next on February 26.
