**Doctor Sarakatsannis To Solo in Pops Concert**

Dr. Leonidas Sarakatsannis, FTU's pianist-composer, will be guest soloist with the Florida Symphony Orchestra Tuesday night at the Pops Concert, in the Municipal Auditorium, Saturday, March 29 at 8:30 p.m. He will perform the Gershwin Piano Concerto in F with the orchestra.

Dr. Sarakatsannis heads the music department at the University of Florida from 1959-1963. During his tenure at the University of Florida, he was a frequent performer of Gershwin's piano concerto.

Some of his major appearances in Florida include three performances as guest soloist with orchestras at Daytona Beach and two appearances at the Delta Festival in Jacksonville, Florida. His piano compositions "Twelve Excursions for the Young Pianist" received the Florida Composers' League Composition Award in 1962.

**Fife to Join Future**

The weekly cartoon satire of Jules Feiffer begins this week in the Wednesday edition of the newspaper. Feiffer is an internationally syndicated cartoonist of Publishers-Hall Syndicate. He is the author of "The Unrigged Memoirs of Bernard" and "The Explainers." He has published a book of cartoons titled "Boy," which was published in 1961 and has since been reprinted several times.

**Fidelas Second FTU Sorority**

On February 27, 1969, Fidelas Second, FTU's sorority, was granted a charter. Fidelas is French for loyalty and a symbol for the underlying theme of the sorority.

This recognition followed several weeks of organization by the twelve charter members. The charter members are: Jan Loraine, provisional president; Helen Commander, provisional vice president; Maurita Norris, provisional secretary; Susan Hardin, treasurer; Melody Foley, program chairman; Carolyn Chamberlin, Cheryl Wulczyn, Karen Willmitch, Mary Stillman, Judy Moore, Georganne Mollison, and Kaye Cocklin, sponsored by Mrs. Lee Johnson.

Although primarily a social organization, Fidelas has undertaken such service projects as supporting Tom at the Central Palsy Basketball Marathon, and managing the FTU booth at the Central Florida Fair. Fidelas plan Rush Week for the first week of the Spring Quarter, Monday, March 24 - March 28. The week will include a series of casual on and off campus get-togethers to enable the Fidelas to meet prospective pledges.

**Circle K Gets Charter**

Circle K, a service organization at FTU, became an officially chartered member of Circle K International at its charter banquet February 27. The banquet was conducted as a joint meeting of East Orlando Kiwians and Circle K, and was preceded by Kiwian President Art Shultz and Mike O'Mara, Circle K President. Attendance at the affair were John Rhodes, Governor of Circle K-Fla. District, Hal Waiteynght, Fla. District Kiwanian Secretary, and Dr. R. K. Brown, Vice President of Student Affairs.

The founding officers of Circle K were honored preceding the installation of the present officers. Tom Koonray, Lt. Governor of Circle K-Okeechobee Division and founding president of FTU Circle K Club, installed the following officers into office: Mike O'Mara, president; Gary Hallman, vice president; Devo Heller, secretary; Burt Kelly, treasurer; Larry Dungan and Ron Turner, junior board members; and Fred Carter and Brian Skadowski, freshman board members.

**1970 Grants Show Increase**

Recently released estimates of governmental aid to students for fiscal year 1970, show a statistical increase in the amount of undergraduate students eligible for aid. Of all eligible colleges and universities the total appropriation for educational Opportunity Grants is estimated at about $175,000,000, a 61,000,000 increase over the 1969 figure. Contributions to National Student Loans are expected to drop $45,000,000 to $155,000,000 for the 1970 fiscal year while the demand for work study programs is scheduled to rise $15,000,000 to $124,000,000 for the 1970 fiscal year.

However, the minimum EOG has been raised $250, less than the 1969 minimum, the former now set at $400 and the latter at $1,000. This $250 minimum increase will add all of the additional funds for 1970 just to help the students presently receiving the aid. A similar circumstance is attached to the work-study increase; the minimum

**Bonfire To Be Held Tonight**

An election bonfire is being planned by the Center Student Activities for 7:00 tonight. Student Government election results will be announced at the bonfire. For all students, faculty and staff are encouraged to join and listen to the speeches and join in the festivities.

The FTU cheerleaders, who are planning the event, are at hand to add pep and spirit to the evening and student entertainment will be featured. All candidates are encouraged to make a clean sweep of all campaign literature and add these to the fire.

A donation in kind of any scrap lumber is encouraged to contact the Village Center. Hot dogs with all the trimmings will be served and all are encouraged to participate in the event.

In the event of inclement weather the bonfire will be held in the Village Center Patios.
Editorial

Write to Congressmen Concerning Student Aid

If student protestors had little factual basis for holding love-ins before Congress is presently preparing to make them a bed. Congressional appropriations supply the Department of Health, Education, and Welfare (HEW) with the money it allocates to colleges, for use as student loans and scholarships. Some officially unconfirmed rumors have filtered from the halls of Congress that the HEW education appropriations bill for the 1970 fiscal year will be lucky to escape with a 40% reduction.

By itself, this does not sound immensely grim. However, it means disaster for FTU's financial aid program. For the first time, Florida's junior colleges will be striving large grants. In addition to this, readers are reminded that FTU gives no scholarships now; yet the student population will double in 1970. To compound the problem, FTU has no Alumni Association to help bolster the dwindling funds.

The government has its reasons for this cut. The main argument forwarded is that congressmen feel private enterprise should have more say in the future of our youth, so banks have been urged to give federally insured loans to students. This reporter, in a brief survey of Orlando area banks, found that 50% of our capitalist institutions are unwilling to grant any student loans; 20% admitted using this technique sporadically, and only 30% were happy to grant them usually, provided that certain qualifications are met; i.e., the students or his family banks there, or he has a certain grade point average, or something else.

A money squander appears to be approaching Tech very fast. Qualifications for a student to receive FTU financial aid will be tightened, resulting in making it difficult for new students, freshmen or transfers, without having received prior aid, to get any financial aid at all.

One possible method of averting a financial catastrophe at Tech is for students and parents to write their congressmen NOW. A large write-in campaign might be effective with the freshman congressman Lou Frey and junior senator Ed Gurney. Senator Speaser Holland is on the Senate Subcommittee for educational appropriations, and he is in a particularly crucial position regarding this matter.

Residents of Orange, Seminole, and Osceola counties should address correspondence to the following representatives:

- House of Representatives:
  - Rep. Bill Chappell represents Marion, Lake and Volusia counties. Senators Ed Gurney and Speaser Holland are subject to everyone's mail.

If immediate action is not taken, students will have to reach for the star just to get a school loan.

Letters to the Editor

Crime Slammed

Dear Editor:

I am not in the habit of writing letters concerning the articles that appear in this paper. In fact, unless I can offer a valid substitution, I am reluctant to complain about anything. HOWEVER, I must express my opinion concerning a regular column of the Future.

The first edition this quarter produced a very poor movie review. Each edition, the column has gotten worse and worse. The quality of writing is not insufficent, each edition has produced a column longer than the last.

Why must Mr. Holtinger be allowed appro.

16 inches to berate us with his idea of humorous discourse? Why must he try to impress us with his idea of a pseudo-intellectual format? Can't he just review the movie? In an article that was 103 long lines, I counted only 43 that could be considered a review. Does Robert know what NATU stands for? How much of Will Durant has he read that he can make casual comments?

Above all one last remark! Every once in awhile he can write a fair line of review. I really think that if he would only stop trying to impress me, I just might go see a movie that he reviews. MAYBE!

Thank You

Florida Technological University is improperly named and therefore the name should be changed. Furthermore, there are two colleges in Central Florida commonly called Florida Tech: ours, Florida Technological University, and Florida Institute of Technology in Melbourne, a private institution. These are also two other institutions near here similarly named: Mid-Florida Tech, a vocational high school, and Florida Technical College.

The interest at FTU in technology and engineering is not great enough to merit our university to be affixed with the name "Technological". This name denotes a specialization in engineering and computers in inferiority in other areas. In a time of Engineering is the smallest of our five colleges. Our two largest colleges are the College of Education and the College of Humanities and Social Sciences.

Most people assume when told that we attend Florida Technological University, that we are engineers by majors. In most cases this is not so. People in the other areas, especially those of the humanities, would be hesitant to give money to a university which they feel is not interested in such areas.

Likewise, nobody would want to come out to Florida Technological University to see a bunch of engineers perform in a play or concert.

The name of our university has been used to extending new students. Female students feel we have nothing of interest to offer them, some men have felt the same way. We have an opportunity to show our university is not so. People in the other areas, especially those of the humanities, would be hesitant to give money to a university which they feel is not interested in such areas.

This is being done despite the fact that since the beginning of school year our university has 

- 40% of our graduates have
- 3.0% of our graduates have

The future of our capitalistic institutions are their students and parents to write their congressmen NOW. Prophet Kicked Aside For View of Protests

Student Protests—Where did they come from and where are they going? Many administrators, professors, and just plain people have announced causes for these disorders but most of these people lack one qualification—they are not students. So, kicking the prophet aside for one issue, I have decided to explore some personal observations concerning protests.

The modern American society imposes a double standard of rules for its members to live by. Our capitalistic, free enterprise system promotes the "get ahead theory" which in turn supports the basic human motivation of the ego—the will to survive. Experience and history have shown that the stronger of two contestants will prevail 99% of the time. This will to survive has been translated, in agreement with Nietzsche’s theory into a will to power; in our society the stronger you are economically the better chances for survival you have. The black power movement is a good example—if one examines its actions, one will find a larger attempt at economic autonomy than for military might.

Religion enters the situation. The Christian principles which to our government adheres teaches that all men are equal; do unto others as you would have them do unto you. This presents our society with an inherent paradox. Should you step on your neighbor to help your career or step on your career to help your neighbor? Many establishment, will continue for as long as there are people willing to do so. We learn that the vivid character portraits which in turn support the basic human motivation of the ego—the will to survive. Experience and history have shown that the stronger of two contestants will prevail 99% of the time. This will to survive has been translated, in agreement with Nietzsche’s theory into a will to power; in our society the stronger you are economically the better chances for survival you have. The black power movement is a good example—if one examines its actions, one will find a larger attempt at economic autonomy than for military might.

**Future**

**Interview Continued**

- **Future** - is there any possibility that perhaps the roadway on Alafaya will be able to be worked upon a lot sooner than previously planned?

**Pickett** - Well, there will be work done on Alafaya in calendar 1969. But it will not be completed in calendar 1969.

**Future** - Exactly what type of work?

**Pickett** - There's a considerable amount of shoulder preparation work that must be done before any paving, or what most people would call widening and resurfacing, can be done. The roadway itself must be properly prepared to hold up the cap. And this is a slow, rather drawn-out, aggravating process. But it's got to be done or the roadway won't hold, and I imagine that's all that will get done in calendar 1969.

**Future** - Is there any plan, or any possibility of a traffic signal being placed on the entrance to Alafaya Trail on Highway 50 to more adequately handle traffic and from classes?

**Pickett** - Yes. And if I had known the question was coming I could answer it more intelligently because there has been some correspondence about it. I don't know if it has actually been approved or not. We cannot put a traffic light on any state highway. We can only approve it and send the request to the State Road Board in DeLand. This has been done. We have requested it from DeLand.

**Future** - When could it be possible for such project plans to be changed?

**Pickett** - Well, the plans could be changed anytime the Board of County Commissioners met and decided they wanted to change priorities and sent it off to the State Road Board. The State Road Board does not object if we change priorities within the plan as long as the changing of the priorities involves roads where they have already completed their estimates and engineering drawings.

---

**Teacher Profile**

**Gerber Math Professor at FTU**

Homer G. Gerber, assistant professor of mathematics and teacher of Math 100 and Abstract Algebra at FTU, was born and attended school in Dalton, Ohio. After graduation from high school, he attended Bluffton College in Bluffton, Ohio. After two years there, he taught elementary school for three years and returned to Bluffton where he received a B.S. degree in Elementary Education. He then attended Bowling Green State where he was a graduate assistant in mathematics. He later worked for the government at the Defense Electronic Supply.

Gerber received another S. degree in mathematics at the University of Illinois. He then attended Florida State and was in a math education program there and a graduate assistant in math. He is presently working on his dissertation and hopes to have his Ph.D. by fall.

Before coming to FTU, Gerber taught mathematics at Tri-Way High School in Ohio. He came to FTU because he was curious about the organization of the mathematics department and because it was a new university.

Gerber and his wife Marilyn, a Young Adult Librarian at the Orlando Public Library, reside at Herndon Airport & Parke Manor Estates in Orlando. He enjoys reading, music and swimming. He is a former member of a barbershop quartet.
