Lotz Wins First Prize

Steven Lotz, assistant professor of art and head of the art department at FTU, was recently awarded first prize in the Florida Invitational Art Exhibit held June 6-13 in Jacksonville. The exhibit, held at the Shemont Hotel-Club Life Building, was sponsored by the Florida Podiatry Association.

Lotz received a purchase award for his black and white drawing. His picture was placed on permanent display at the Jacksonville Art Museum. Roy Craver, Director of Galleries at the University of Florida, served as judge of the exhibits.

In addition to his prize at the Florida Invitational Art Exhibit, Lotz has won awards at local contests such as the Winter Park Art Festival and The Loch Haven Art Festival.

Entrance Marker Introduced to SG

Ralph Whittington, Summer Senator from the College of Engineering, introduced the plans for a sign to be erected at the main entrance of the Tech campus. The sign illustrated above, has an overall base of 22'x10'6". There are five steps ascending up to the actual sign, each step symbolizes one college at FTU. The sign is 10'x3' and is made of the same brick that was used on the library. The background will be gold and the letters will be raised black.

The State Seal and the School Seal along with the symbols on the accepted PTU ring and the date the school was founded will also appear on the sign.

There will be a plaque on one end of the structure where each college will be listed.

Morrison’s To Keep Food Plan

James Elter, Director of Auxiliary Services, says there will be no changes in the food contract for next year because the same food contractor, Morrison’s Cafeteria, will be used.

Plans for the coming school year do include improved service and more outside food service for the boarding student. Elter says, “Although the first concern is for the boarding student, a plan is being formulated to issue food cards to commuting students, identifying them as such, and offering them a lunch special at 89 cts. A lunch at the present time for the commuter would cost about $1.20, according to Elter.

Elter says the new cafeteria is hoped to be under construction this fall, with a completion date at the start of the fall quarter, 1970. The new cafeteria will have a seating capacity of 800, whereas the one in use now can seat only 250. Phase I construction will end with the completion of the new cafeteria.

Mr. James L. Yarborough, associated with Osburn Henning & Co. of Orlando, presents Mr. Franklin Hitt, Assistant Dean of the College of Business Administration, with a $500 scholarship check. On the left is Mr. J. William Loving, Director of Student Financial Aid, and on the right, President Charles N. Millican.

V.P. Brown Forsees FTU Greek Housing

The possibility of on campus housing for fraternities and sororities is in the “thinking” stage at FTU. No plans have been made as yet and housing in the near future appears unlikely. The matter, however, is being considered.

President Millican has appointed Vice President Brown to investigate fraternity and sorority housing on campus. Brown stated that the possibilities are being considered, but stressed the point that no conclusions have been reached and no land appropriations have been made.

Before a decision will be made,” the VP added, “there will be a great deal of study and investigation.

The repair and repaving of Alfaya Trail from State Route 50 to the Orange-Seminole County line will start late this summer, Al Davis, Assistant District Engineer for Planning of the State Road Department, stated that advertising for bids has not been conducted at this time.

A new left turn lane on the Trail at SR 50 will be constructed. The project by the fall quarter deadline. For more on the building, see page two editorial.

V.P. Brown Forsees FTU Greek Housing

The possibility of on campus housing for fraternities and sororities is in the "thinking" stage at FTU. No plans have been made as yet and housing in the near future appears unlikely. The matter, however, is being considered.

President Millican has appointed Vice President Brown to investigate fraternity and sorority housing on campus. Brown stated that the possibilities are being considered, but stressed the point that no conclusions have been reached and no land appropriations have been made.

Before a decision will be made," the VP added, "there will be a great deal of study and investigation.

There are many things to be considered before we can start to build." Brown said that all possible areas would be considered, and on the basis of a certain criteria a decision would be made. He added that we must first look into the future as much as 25 years to determine if we can spare the land. Then, if land is appropriated, we must consider its location to parking, recreation and academic areas, the design of the buildings, and financing the lodging." Brown stressed that the main consideration must be "what is best for the students and the academic community."

Jim Fay, president of TAU Fraternity feels the best way to finance the housing would be through state funds or a loan from a national fraternity. Brown, however, does not foresee the state appropriating any funds. He does agree with Fay on the possibilities of a loan from a national fraternity. According to Brown, "We have a long way to go and a lot of decisions must be made but it does look promising that we will eventually have housing for our Greek citizens at FTU."

Health Service Hours Decrease

The University Health Service will be closed from 7 a.m. Saturdays through 7 a.m. Mondays during the summer quarter.

The cut in hours is mainly due to the decreased enrollment of resident and commuting students according to Mrs. Barbara Klein, supervising nurse. Mrs. Klein added that a decrease in the budget and the request for a leave of absence from one of the nurses were also determinants in the change of hours.

Resident students should contact members of the Resident Staff if they need medical attention during the weekend. Regular twenty-four hour coverage will be maintained throughout the remainder of each week.
Editorial
Pray For A Miracle

Let's look at a few facts. First, it is a well known fact that if the Classroom Building is not completed by the middle of September (to give time to move the desks to, mount blackboards, etc.) Tech will have a super-problem. Classes will be scheduled from 8:00 a.m. to 10:00 p.m. Regular classes will be enlarged from around 20 students to well over 30, and classes will have to be held in such places as the Village Center meeting rooms. And to keep things on schedule, if the building is finished later than this, time probably will not be made up due to the problems that it would create in classrooms. So, all in all, we had to have better hope the CRB will be finished in time, but it will.

It would seem that the answer to that question depends on who you ask. For instance, in an interview with the FTUre, Fred Clayton, Director of Physical Plant, assured the reporter that the sub-basement and first floor will be ready for classes by October 7, and this myth seems to be perpetuated by most of the school's upper echelon. When we went to the source, however, we got a different story. According to three competent foremen, there is no chance of any of the building being ready for use by the end of November. As one of these men put it, it would take a miracle to finish that building on time.

At the bottom of this Editorial is a picture which ran in the October 25, 1968 issue of the FTUW. Construction started at that time. The most obvious and glaring evidence of patch-work on the campus is fast beginning to look like it's being thrown together with anything that's available.

There were a lot of jokes last fall when the school opened about how it looked. Some said the library and the dorms bore a strong resemblance to a fort. There were nice apes everywhere behind which someone could hide. And those walking into the library sometimes had the feeling that a pot of boiling oil was smoldering over their heads. This was why the campus was dubbed, unofficially of course, "Fort Milicia" by a few wags.

But these were not complaints. Even the most severe critics had to admit that campus, what there was of it, was prettily done looking and that one day soon Florida Tech would be an impressive sight.

But that was last fall. Things have changed since then.
The most obvious and glaring evidence of patch-work on the campus seems to have a master plan for everything except how the completed buildings were put together. These bricks of different colors really make the place appear to be a super-problem. Tech will have time to move the desks in, mount blackboards, etc.)

The appointment of Alexander T. Wood as Assistant Professor of English Education was recently announced by Dr. C. C. Miller, Dean of the College of Education. The appointment will become effective September 16.

Wood, a 31 year old native of Midway, South Africa, received a Teachers Diploma at Johannesburg College of Education and the B.A. Degree and M.S. Degrees in English Education from Florida State University. He is currently a candidate for the Ph.D. at FSU.

Wood will assist in developing the English Education program for prospective high school teachers. His work will include teaching supervision of student teachers, and activities related to the Department of Secondary Education.

Letter to the Editor
Report from Disneyland

Seven Florida Tech students working at Disneyland, California this summer are reported settled in various jobs at the California attraction. Ron Turner does the commentary on the jungle cruise attraction while Frank Stanley, Gary Hallman, and Jim Stringer have jobs in Autopia. They reportedly jumped on the spoons of special moving cars. FTU's Dan Trendler works in Fantasyland and Mary Lee Racheil was given a talk on the vehicle that transports guests from the parking lot to the front of the attraction.

Dero Holler, in a letter received recently, described his job as "the most complicated of all jobs; pushing buttons on the pirates of the Caribbean attraction." Chris Wilson, an engineering major at Tech is working in the Engineering Department of Disneyland.

The group is lodged at Chapman College, California. The FTU students and 18 other students from Central Florida colleges were chosen to work at the Disneyland attraction for the summer. FTU seems to have a master plan for everything except how the completed buildings were put together.

For instance, in an interview with the FTUre, Fred Clayton, Director of Physical Plant, assured the reporter that the sub-basement and first floor will be ready for classes by October 7, and this myth seems to be perpetuated by most of the school's upper echelon. When we went to the source, however, we got a different story. According to three competent foremen, there is no chance of any of the building being ready for use by the end of November. As one of these men put it, it would take a miracle to finish that building on time.

But these were not complaints. Even the most severe critics had to admit that campus, what there was of it, was prettily done looking and that one day soon Florida Tech would be an impressive sight.

Student Government says:

'You Will Speak!' Biology Head At Lejeune

By PAT JOHNSON

From Steve Jones

Even though most student organizations on the FTU campus are inactive during the summer months, some groups meet regularly and conduct "normal" activities, one of these groups is the Student Government, which to quote the 1969-70 Student Handbook is "the highest student governing group."

Meetings are held every Tuesday and Thursday during the scheduled five period so that all interested Tech students may attend. Interest is high at last Tuesday's meeting where the summer seminar members and two-reporters from the FTUUM (it is seriously desired that these people show up by choices).

Elected SG members have been temporarily replaced by other "interested" students while they visit Disneyland in California. This trip is in no way corresponds with Student Government just by coincidence the majority of students selected to go were from SG.

SG Well Informed

This particular meeting did accomplish one important thing. Ralph Whittington, Engineering, introduced his plans for an entrance marker for the Tech campus (see page 1), Whittington should be congratulated on his idea. A marker such as this would add beauty to the FTU campus, far more appealing than block letters on the water tower. It was suggested that a committee be set up to check the feasibility of this proposal; many Kolanski. When the meeting was finally "overruled", Kolanski replied, "Hey, I got him. It was kind of dow (then dropping his voice added) it must have been Polish!"

Dear Dick,

By PAT JOHNSON

Dear Dick,

After a few trivial problems were proposed and "solved", the question of a speaker for the scheduled Spring Commencement exercise was brought up. It was decided they would try to get President Richard Nixon (from the United States) to speak out of the kindness of his heart. "After all," I was pointed out by Kolanski, "it will be an election year... almost."

If Nixon, by any chance, should not be able to make it, SG will work down through Amsgen, the Cabinet, the Senate, etc. If this is handled in typical Student Government fashion, I can almost finalize the invitation to the president:

SG Well Informed

This particular meeting did accomplish one important thing, Ralph Whittington, Engineering, introduced his plans for an entrance marker for the Tech campus (see page 1). Whittington should be congratulated on his idea. A marker such as this would add beauty to the FTU campus, far more appealing than block letters on the water tower. It was suggested that a committee be set up to check the feasibility of this proposal; many Kolanski. When the meeting was finally "overruled", Kolanski replied, "Hey, I got him. It was kind of down (then dropping his voice added) it must have been Polish!"

Dear Dick,

You WILL speak May - 1970 at our graduation ceremony.

Voted and passed unanimously by the Student Government of Florida Technological University.

1st Day of July, 1969

With the arrival of Mr. President, the meeting finally got underway. The business of the day appeared (at least to me) to be guiding rid of the fly that was bothering Kolanski. When the fly was finally "overruled", Kolanski replied, "Hey, I got him. It was kind of down (then dropping his voice added) it must have been Polish!"

Dear Dick,

You WILL speak May - 1970 at your graduation ceremony.

Voted and passed unanimously by the Student Government of Florida Technological University.

1st Day of July, 1969

After this the Senate proposed that the meeting be adjourned. This motion is voted on by "opposed" raising their right hands and "approved" is signified by getting up and walking out the door. (A Democratic way of life is definitely something to be thankful for.)

Thus ends another chapter in the political life at FTU. Peace.
Bidding on the proposed physical education complex will begin July 15, with the structure scheduled to be completed early in 1970. The $400,000 project will be erected in the cleared lots next to the new temporary basketball and volleyball courts. The complex will include a pool and patio area, locker-room facilities, tennis, badminton and volleyball and basketball courts. A gymnasium will not be constructed at this time due to a cutback in appropriations by the legislature.

At present, there are three

buildings under construction. The General Classroom Building, west of the library, is scheduled for completion by October, 1969. The Administration Building, located south of the library, will be finished by March, 1970. The Science-Technology and Data Processing Center, east of the library, will be ready for use in June, 1970.

Auto Safety Belts

NEW YORK—Experts estimate that more than 5,000 lives would be saved each year in the United States and that injuries would be reduced by one-third if everyone used auto seat belts, says the Insurance Information Institute.

FTU Foundation
Growing Slow

FTU Foundation, Inc., a non-profit organization composed of citizens in the East Central Florida area, has received donations amounting to 17 thousand dollars to be used primarily for financial aid. Scholarships coming from the FTU Foundation will be administered through the Office of Student Financial Aid. In addition to financial aid, the money will be used for attracting faculty, promoting cultural centers, improving library, science, and recreational areas, and promoting research and development programs.

The largest official grant to the Foundation, 16 thousand dollars, was received from the Florida Citrus Open. These funds will be matched by the National Defense Education Program at the state level on a nine to one dollar basis. This will make a total of 100 thousand dollars available for student loans. At the present time, FTU is limited by the state to a 200 thousand dollar ceiling for receiving NDEA matching funds.

In addition to loans, scholarships will be available in restricted programs. Recently a 500 dollar scholarship was made available by a local accounting firm. Three other restricted scholarships are also available.

At the recent organizational meeting of FTU Foundation, 12 citizens were elected from the seven county East Central Florida region. President Millican, in turn, appointed 12 members. Those 24 will elect 12 additional members making a Foundation Board of 36 members. At present, Charles Andrews, Chairman of the Board of Orlando Bank and Trust, is serving President of the Foundation, and George King, assistant to President Millican, is coordinating Foundation activities.

Students interested in qualifying for scholarships and loans must fill out a multi-question form for the Office of Student Financial and a questionnaire, which is sent to the College of Scholarship Service. The questions are used to evaluate the need of the student in order to help the university Scholarship Committee in its decisions.
