Double Enrollment For Second Year

According to the Board of Regents' projected head count, FTU this year is supposed to have a total of 7,386 students. This means Construction should be around 4,000. The facility also will have more than doubled from last year's figures because of the 147,336.20 contract and Construction needed construction planted up the welcome news last week when it was announced that several months, but Orange County was given the green light. Unfortunately, construction began the same day students were pouring onto the main campus buildings. Heavy equipment would not come on the university property from any off-campus location.

Three of the lots will be converted into parking lots, including access roads, and a fourth will be built in the area of the science classroom.

Orange County called for construction of the parking lots in 110 working days, or about six months. FTU President Dr. Charles N. Millman has repeatedly said that parking is the university's biggest immediate headache. Now, it appears as though the state Department of Transportation, which has been run in some pain relief.

No Vacancies In Housing

Deans' Council applauded

This summer FTU took a giant step toward understanding on campus which many well-established Universities have been striving for years to obtain. That understanding came from the Deans' Council in a simple reassessment of a decision it had already made.

The council had decided on the topic of Deans' List it wanted and the majority of the members seemed pleased with the decision. FTU sources indicated that several offices on campus did not feel this was the best decision but the council stood by it non-the-less. Finally some disgruntled students took proper action by going to the student government on campus and voicing their opinion to that body who in turn voiced it to the Deans' Council itself along with what S.G. felt was an improved system.

The fact that the Council accepted the proposal is history. The Council will be locked on in days as a powerful administration arm which stopped administering long enough to listen to those it administrators to. It will be moves like this, on both sides of the fence that will help life in the FTU community be a little easier for all concerned. Our thanks to the members of the Deans' Council who are big enough to take suggestions, even from students.

Newspaper Ten Commandments

The following ten commandments for the guidance of student Newspaper publication is reprinted from the Freedom of the College Press by Eathin and Sanders.

1. Thou shalt not restrict the right of any person to think.
2. Thou shalt not require, but inspire, responsible journalism.
3. Thou shalt not forget that errors of judgment lead to learning, and learning to greater growth and responsibility.

FOR STUDENT EDITORS

4. Thou shalt not consider factual accuracy as less important than grammar, journalistic or technical accuracy.
5. Thou shalt not bear false witness against any student, any faculty member or college administration, against any event, or against the truth.
6. Thou shalt not libel, nor defame, nor damage the good name or sacred reputation of any campus or community citizen by using half-truths, irresponsible quotations, or any of the well-known Seren Propaganda Devices.
7. Thou shalt not use the Power of the Press for personal aggrandizement, for personal prejudices, or for personal revenge.
8. Thou shalt not forget that the Earth Estate must be an impecable from within as it is irrevocable from without.
9. Thou shalt never forget that with freedom comes responsibility, that with liberty comes licensing, and that with power and prestige should come prayer.
Can It Kill?

The Oviedo Light

(Rev. 1 in a series of articles which will try to give a reasonable and intellectual explanation for the mysterious light in Oviedo, the light that appears occasionally on state road 13. We, on the FuTure staff, feel that with all the outstanding men and women in the Science departments of Florida Technological University on an explanation can and should be found soon.)

By Pat Johnson

This picture was actually taken on State Road 13 by the FuTure photographer while members of the FuTure staff witnessed the light.

The road itself gives you an eerie sort of feeling. The reason for this feeling could be explained by the soundness of the trees on both sides of the road, for the signs of civilization are few. Of course, it could be caused by the eerie stillness in the area. But, more than likely, the feeling is caused by the ghostly apparition that appears periodically on the road.

The road is State Road 13, in Seminole County just 30 miles from Oviedo, at an old battered bridge. The apparition is a light, commonly referred to as "The Lights." Stories of events that happened on state road 13 are numerous and widely circulated, but strangely enough, the reports are only among the so called "youngster generation." The majority of adults that were questioned by FuTure staff members during the initial research for this series either have not heard of an Oviedo light or were too busy to bother with such foolishness! A few did have explanations; they called it "swamp gas," "must phosphorus," or frequently, "0-published parking place for teenagers." The later is to be expected; for it is part of everyday life where there is a dark road there are parked cars. But if there are couples parked along state road 13, chances are the boy is not taking advantage of the dark night; the location, or the girl - the couple is just sitting, watching, waiting.

They are waiting for the "light" that appears from the vicinity of Snow Hill, a Negro community at the end of the road. People that have seen the light all agree on its description; it looks like car headlights coming over hill, but where car headlights separate and become two, the light in Oviedo remains as one! Some say the light has a bluish glow and moves from side to side as it nears the bridge, while others say it's white and moves down in the center - but all agree that as it approaches, you are too concerned about leaving to ram into its color or the way it moves. "The light has never been seen past a certain point of the road. A few years ago a group of boys painted a line across the road and tagged it the "Point of No Return," but traffic and age have done away with the line now and only the memory remains. This faded line is not the only memory shared by "visitors" to the "light." People recall and share tales of it.

The cub scouts who were camping in the Oviedo woods were one young scout with a later mysterious disappearance. Midnight story tellers ask - Could the light be that interaction to keep others from sharing the young scout's still unknown fate?

The young couple that was found parked on the road one morning with the boy gone unconscious in the car and her boyfriend's head burned off and mounted on the car like a head ornament.

The girl who bravado the light, and suffered first degree burns on her neck and body, from an unknown source, while running back to her car, in flight of what?

The two boys who were found murdered in their sports car beneath the bridge. No tire marks were found on the car, illness for death.

The boy who was killed playing chicken on the road with the light. A pal was in his darkened car watching the boy as he ran across the street in a race with the invisibly approaching car.

Are these stories fact or fiction? Is there a reasonable explanation for all the events that have been reported on state road 13?

FuTure

NO. 1

By ROBERT E. HOLSINGER

Stand by PTU . . . Holsinger is back. And he's back with a new thing that he'll do every week in the FuTure. Vietnam "Citromatics" will remember that last year the FuTure featured a weekly movie critique complete with Holsinger's oddly perceptive analysis of the current critical analysis of the current or future movie fare. Only the coming weeks will reveal exactly what the FuTure's "resident freak" will say next.

Go see "Easy Rider." It is not worth spending too much time on, because to explain it would waste the visual experience.

Capital's America, (Peter Fonda) and Billy "Commis Hopper," DO THI THING. Mopic damiers might think the film is about bikes. MR says, "Dig yourself!"

Actually the picture is almost a historical document that explores the social, economic and political pathos of our time. Sounds corny, I'll grant you. But Holsinger, I'll grant you. But it's a great film, Holsinger says. Holsinger has watched every film to come over the past year and he was the first to get the idea of what the film is about. He was the first to get the idea of what the film is about. He was the first to get the idea of what the film is about. He was the first to get the idea of what the film is about. He was the first to get the idea of what the film is about.

In the interest of nowhere objectivity, I have decided to put the axe on all of them. From this date on the column will be numbered. Appropriately, the first will be labeled number "1" and the next will be number "2" and on etc.

FuTure

Hang in there, Teddy!

A 20-year-old man is being sought by the Federal Bureau of Investigation on a charge of embezzling $215,000 from a Cleveland, Ohio, bank. Bond FBI agents announced here today. Theodore John Conrad, (above), believed possibly in Florida, according to the FBI, was allegedly seen leaving the Society National Bank where he worked as a vault teller on Friday, July 11, carrying a paper bag.

CAMPUS GLANCES

This is Campus Glances by Linda, a weekly column of club, organization, sorority, fraternity, and department news and activities. The purpose of the column is to allow students to learn about all the activities. The purpose of the column is to allow students to learn about all the activities. The purpose of the column is to allow students to learn about all the activities.

The first meeting of the fall quarter will be held Oct. 10 in room 154 of the V. C. C., the purpose of the Sociology Club, for all prospective members, is to explore the field of sociology through group interaction with school and community.

Motha, FTU’s theatre group, will present Shakespeare’s "Titus Andronicus" as it’s first production for the fall quarter. Tryouts are scheduled for Oct. 13 at the test.

According to a Motha representative, anyone is eligible to try-out for the play. There are no prerequisites.

Motha will participate in an "Open House" sponsored by the Department of Communications, for all new and old Communications majors. They also will participate in Activity Day where prospective members may fill out an interest form and receive membership information.

The Physical Education Department will hold a class meeting today from 9 am to 12 pm in room 154, prospective members may fill out an interest form and receive membership information.

The Fluid Physics Club plans to show two movies for all new and returning students.

YOUR STUDENT GOV'T EXTENDS
A WELCOME TO ALL STUDENTS

WE NEED
YOU

As a registered member of the Student Body of Florida Technological University you have become an integral part of the FTU Student Government. Unlike most high school student councils and college student governments of the past, the present day University Student Government is an active, viable entity working to solve not only the problems of our particular campus, but the more encompassing social and political questions of our state and nation.

Your participation in this movement depends on one thing alone --- Your Own Motivation. In addition to elected positions in the Student Government there are numerous appointed offices available (including Cabinet positions, Committee chairmanships and so on). You are cordially invited to a meeting Thursday, October 9 at 8 P.M. in the SCIENCE AUDITORIUM at which the structure of your Student Government will be explained, and information concerning the upcoming Student Government elections will be dispensed. These elections are to be held OCTOBER 30 and 31 and will determine the following positions:

5 College Governors
4 Class Presidents
20-25 Student Senators

If you are interested in running for one of these offices, working at the polls, or just curious about the structure of your Student Government please try to attend this meeting. For further information do not hesitate to come by the Village Center, Room 150 (phone 275-2603) or phone the Student Body President or Vice President directly.

"The new thing that everyone is talking about these days is match-making by computer; it's really nothing new except in the past the calculator was called 'Mother.' Anonymous.

But there is something new with computer dating in Orlando. Helen, a grandmother-type widow in Maitland has bought a franchise to the nationally franchised Make A Date of America, Inc.

In the three months the Make-A-Date computer has been processing applications from the area's "memory bank," the identification given to the group from Orange County going through the machine together, 97 percent of the questionnaire so far, the computer has made matches of two or three names.

After filling out the questionnaire, the questionnaire/marriage is mailed to Make-A-Date of America, Suite 101, 540 S. Maitland Avenue. Postage is prepaid but $10 must be enclosed for computer processing.

The key in the "Dating Game" is privacy, privacy for all applicants. When a new application is received by Helen, she makes a note of the applicants name, address, and phone number and forwards the application to Miami, the headquarters of the computer. The applications are processed three times a month.

Three days after going through the computer, the applicant receives a computer receipt stating that 'You have been IDMed.' Then the same changes to the 'Waiting game,' as you patiently await a match.

The three main factors in the matches are age, race, and religion. The questions on the questionnaire from: 'Would you be willing to date a person who has children living with him?,' 'Will God answer prayers if a person is sincere?'

Once a name is entered into the 'memory bank,' it will remain for three months. A person can expect from five to 15 matches. Upon being matched, you will receive a hand written letter from Helen, stating 'Congratulations, you have been matched.'

Your matches are mailed to you. First Class in a plain sealed envelope. At the same time, they are sent your name. All information in the male and female involved, the computer and Helen.

Two Members of the FutUre staff have 'volunteered' to undertake the assignment of making a computer date. John Glodston, Editor-in-Chief and Pat Johnson, Associate Editor have already been processed through the computer and are awaiting their matches.

The following except from a letter received by Helen from a previously matched applicant, sums up the advantages of computer dating.

'I have had a very enjoyable first date. As is my own case I don't have time to socialize and meet people. I moved to this area in June, I have waited through July and August, and now that I have had my first date, I don't think I could have made it through the long hot September.'

**Health Center Increases Staff**

The student health center increased its staff this summer in order to more effectively deal with the increased number of students. The nurses and their hours are:

Mrs. Barbara Klefs, R.N., Supervisor - 7 a.m. - 3 p.m.
Mrs. Naline Weeks, R.N. - 3 a.m. - 7 a.m.
Mrs. Judy Binne, R.N. - 3 p.m. - 11 p.m.
Miss Helen Hoff, R.N. - 11 p.m. - 7 a.m.
Mrs. Sharon Jacobs, R.N. - 7 a.m. - 3 p.m.
Mrs. Shirley Kerr, R.N. - 3 p.m. - 11 p.m.

Dr. Stener's new hours will be from 9:30 a.m. to 11:30 a.m. every day except weekends. The doctor will be on 24-hour call through the health center only.

**Tough Judges**

Let's face it! Young ladies don't know much about diamonds — but they know perfectly well whether a ring is beautiful or not. In the last few years they have brought about a revolution in diamond ring styling and we are all for it.

We will be proud to show you the most modern style selection in town and have a good understanding of diamond quality, cut, color and clarity.

We want you to try on as many as you like and after discussing them thoroughly with you, we will wind up with the right ring on your finger. Right in style, right in price, right for the admiration of your friends. Most important-right for you forever.

**Rough News**

Why not see the best selection before you choose? Come in and see the latest as soon as possible.

Due to the anticipated increase in student enrollment and faculty number this fall, the library has announced a reduction of services in these areas. The library and instructional media staffs were not increased significantly enough for the library to continue serving students and faculty in the capacity it has been in the past.

The practice of compiling bibliographies and conducting literature searches for the faculty will be suspended in order that the reference librarians can devote adequate time to providing reference service to the student body.

In the Department of Instructional Media, equipment deliveries will be made only in emergency situations. Requests for equipment should be made as far in advance as possible.

Other services such as graphics, photography, book acquisition and cataloging, interlibrary loans, and related activities will continue.

The Interfraternity Council recently announced plans for fall fraternity rush, rush registration will take place Oct. 13-17. On Oct. 12, 13, and 15, prospective rushers may sign up for rush in the Library lobby or the Village Center. Rush registration will be held Oct. 16-17 in the office of Ken Lawson, Director of the Village Center. The special event of the year for the Greek system, sponsored by IFC, will be the IFC Rush Welcome Dance, Friday, Oct. 17 in the Multi-Purpose Room of the Village Center or Veteran's Hall.

Smokers for the rushes will be held by all member fraternities of IFC. Sigma Sigma Chi will hold its smoker Oct. 20 from 8:30-9:30 p.m. Phi Alpha Epsilon will hold its smoker Oct. 22 from 7-9 p.m. while Chi Alpha's smoker will be Oct. 21 from 8:30-9:30 on the same date.

Sigma Alpha, Pi Kappa Alpha, and Sigma Sigma Chi will hold rush parties Oct. 24 and Chi Alpha, Tau Kappa Epsilon, and Phi Alpha Epsilon will have their rush parties Oct. 25.

The Rush Wildcat parties will be held Oct. 31 by all fraternities. Each fraternity party must end at midnight, when a moratorium on rushing will take place. Bids will be released Nov. 2 in the lobby of the Library Building.

Further information concerning fraternity rush may be obtained from Lawson, IFC advisor Ralph Bundy, IFC Rush Chairman or Larry Snyder, IFC Chairman.

Frosh Beware

ATTENTION FRESHMEN WITH 8:00 CLASS!!! This article is written with the frosh freshmen with evil advisors who suggested 9:00 classes. Any frosh freshman who does not have one of these early morning obligations should not read this.

Every frosh, by some great law, must, at some time in his career take at least one 9:00. In fact, in most people's eyes every student remains a frosh until he has taken one. Therefore to keep from being frightened off, all who have either experienced said torture should not read this. (And should avoid 9:00's like the plague, but I've been mentioned they will have to take one sooner or later.

Now down to brass tacks. First off, it is important to pick up the jargon of the earlier. For instance, one should never refer to one's 9:00 as an 8:00 but instead as one's "You've got to kidding," or "But it's still dark outside", or even "I thought my advisor liked me!"

Secondly, one must realize that the prof. doesn't like it any better than the students, and chances are that he was stuck with the class because the department head was mad at him, or some such reason. Therefore the chances of this will be even rougher than anticipated. Besides the fact that the students are only partially awake, and many students are worried about how they are going to explain the debt to the father of their car when they ran into that tree this morning when they fell asleep on the road, and the fact that this is the first day of the rougher classes of the day anyway (such great as BIO. and OBM, for example) the purchase of the class too. That, incidentally, is why the prof. is not so tough, as he can read it again, slowly this way.

At any rate, to all who suffer from this affliction be notified that you are not the first, and by no means the last to bear the brunt of this evil advisor's humor.

Shorter frosh might have enough noodles upstairs to inquire as to why the FTU did not issue us a commuter pass before this. The reason, as my advisor so aptly put it to me when I was a frosh, "If I had to it all through them you sure as hell are!"

The Campus Enterprises.

President Milligan talks with Phil Odham and Darrell Bannister, founders of Campus Enterprises.

Campus Enterprises. Ever heard of it? You will, if two FTU students have anything to say about it. Campus Enterprises is a new company formed by Darryl Banister and Phil Odham. Banister, a senior, Communications major and Odham, a sophomore, new comer Communications student started the firm after reading a book entitled How To Make Money In Colleges.

Banister and Odham learned that a student company at Harvard had produced a desk blotter covered with local advertising. Campus Enterprises had a cause. Make a better blotter.

With the help of some letters of introduction from Orlando M. Mas and Carl Long, George King, FTU's executive assistant to the president, and from Bill Warden FTU's director of public information, the fledging troopers began pouncing the pavement, going from one business establishment to another.

"We certainly learned a lot about advertising sales and design in a short time," Odham said.

With all the ads sold, Banister and Odham went to Typegraphics, an Orlando design firm, and asked for help. They received it and some from Typegraphics' head John Ingels. He assisted the students in laying out the ads on the blotter.

To add a durable touch, the blotters were coated with a special plastic after printing.

"More people use ball point pens these days than do ink pens, so we tried to give them a ball pen point blotter," said Bannister.

"When the 3,500 attractive blotter rolled off the press, Campus Enterprises had a product. Besides the ads, the blotters boast a nearly complete FTU telephone directory. How much do the desk blotters cost? Nothing. Who will get one of the blotters? Everyone, if Banister and Odham have their way. The students received permission to pass the blotters out during registration. They also planned to give one to every family member, staff and administration staff worker.

So, by this time, every FTUer, on campus and off, should be able to look down at his study desk and see "Campus Enterprises" staring back at him. And every advertiser hopes that their messages will sink in if gazed at long enough during midnight oil burning.

"We didn't make much money with the first project," said Odham, "but we learned a lot." Campus Enterprises have other plans in the works, but are keeping them under wraps for now.

As one administrator commented, "We are stressing individual initiative here at FTU, and these guys are living proof that it pays off in more ways than one.

The blotters can be picked up at the Student Activity area or the Village Center Building.

To support this record, Clark was voted Coach of the Year six times.

FTU will launch its basketball season against Mansey Institute at Jacksonville on November 21. The rest of the schedule, to be announced shortly, will consist of various opponents ranging from small institutions and colleges to military bases in the area. Coach Clark said that there are numerous tournaments scheduled for this afternoon at 4 p.m. at the Science Auditorium.

And success is a byword for Gene Clark. As athletic director and head basketball and football coach at St. Xavier High School in Wisconsin, other possibilities for future practice sites include the Naval Station at Orlando and the Rollins College gym, where a permanent playing court of their own, the FTU cagers will have the unenviable feeling of being the visiting team at each of their outings, a feeling which hampers a successful season.

Mathematical Science Appointments/Released

Dr. Bernard Cattle, Dean of the College of Natural Sciences, and Dr. Arthur M. Dobson, Chairman of the Department of Mathematical Sciences, have announced the appointment of nine faculty members at FTU. They are Dr. Anthony J. Pettofrezzo, professor of mathematics; Dr. L. J. Jones, associate professor of mathematics; Dr. David H. Falconer, associate professor of mathematics; Dr. Howard M. Ohrar, professor of mathematics; and Dr. Eugene J. Pettofrezzo, chairman of the department of mathematics.

Dr. Pettofrezzo said that the new appointments include the National Science Foundation's Award for the best new study submitted in competition. It concerned the

Dr. Howard M. Ohrar, received the B.A. and M.A. degrees from the University of Texas and the Ph.D. degree from New York University. He is a member of the American Mathematical Association of America, and the American Mathematical Society.

Dr. L. J. Jones' professional experience has been as an assistant professor of mathematics at the Illinois Institute of Technology; as a mathematician for the American Mathematical Association; and as an assistant professor of mathematics at the Illinois Institute of Technology. He is a member of the American Mathematical Association; and the American Mathematical Society.

Dr. Eugene J. Pettofrezzo, chairman of the department of mathematics, has been appointed as chairman of the department of mathematics at the University of Miami. He is a member of the American Mathematical Association; and the American Mathematical Society.

Dr. Howard M. Ohrar received the B. A. degree from the University of Chicago; and the Ph.D. degree from the University of Texas. He is a member of the American Mathematical Association; and the American Mathematical Society.

Food Program Gets Revamping

Threw away the bl-carb, folks, be ready for a whole new and something. The University, smarting over an unsuccessful go at a banquet last year, has decided to try again, this year, with bar-b-ques, cookouts etc. at all the special gastronomic gaieties as lower price plans. The University, smarting over what kind of food is purchased, how much students will pay for it. Eller, director of Auxiliary Services and Dr. D. Miller explained that the food program this year, the university is offering a variety of meals plans. The daily meal plan costs $1.50, and meals will be $0.60. The student will be allowed to select up to six meals a week. Eller explained that the new cafeteria won’t be feasible it would be to broaden the current regulation on the campus can be continued development of a new industry and for that reason, chasing off the industry that they already have.”

Gemmell explained that the problem seems not to be that the tax machinery to get it off. Dr. Gemmell said that he felt the best method to get around this problem was to tap from the national income tax. This system is far more efficient than anything the state could come up with. He stressed the university’s financial statement of education was becoming critical as teachers’ salaries are not raising in portion to the cost of living, and frequently schools are being forced to accept lower grade teachers. That they would like to hire the life of an educator was not an easy one in this society where public demands are becoming starker by the day. Dr. Gemmell explained that the job of the teacher today was to “return the student upside down” to make him realize things for himself. He stated that it was not the job to provide the answers for the students but to ask pertinent questions so that the student can search for his own answer.

Dr. Gemmell will be at Tech for about six months and he and his wife will reside in Winter Park.

The FUTU hopes to periodically carry in-depth studies of the interests of FUTU faculty members.

And now, a word about not wearing safety belts.

Ambulance.
