We Live in the Present, By the Past, but for the...

Don't let this happen to you! FTU commuter students are forced to travel some of the worst roads in the county. Until something is done about these conditions, TAKE IT EASY. Hall Road and Alafaya Trail turn to glass in the rain. Slow down! If not for your sake, for everyone else's. Get to class late one day if necessary, but get there!

FTU Student Dies In Wreck

Early morning drivers making it down Hall Road toward FTU last Tuesday probably didn't notice the bits of glass and metal scattered across the road at the point where it makes one of many hairpin turns. They were probably too intent in getting to class on time to notice.

The afternoon before, an 18-year-old FTU Freshman, Karl Clayton Van Meter, 2303 E. Concord, Orlando, was heading north on the bending road. Hall Road was slippery from the rain. It is treacherous at best. Witnesses said that Karl Van Meter was travelling fast in his small car when he failed to negotiate the turn and was struck by a truck coming from the opposite direction.

The youth was killed instantly. News of the tragedy swept the campus. Representatives from the administration met with the parents of the boy in the evening. Karl was the son of Lt. and Mrs. C.H. Van Meter. Lt. Van Meter is head of the Orlando Police Dept.'s Vice Control Unit. He is vitally concerned with the youth of the community and their problems.

He was scheduled to speak to a sociology class at FTU later this month. Young Van Meter was the first student fatality since FTU opened.
Dear Editor,

Recently a problem required me, to go to the science hall, but I cannot remember what problem could be solved by a simple phone call. So I took my phone and requested the telephone use, but instead of giving me permission, they refused, and gave me a feeble excuse.

The next day I heard at my own dorm phone, where I repeated my request, but the inhabitant refused once again, saying "Surely your request is in jest."

The next day I heard at my own dorm phone, where I repeated my request, but the inhabitant refused once again, saying "Surely your request is in jest."

Open Letter To Students

Dear Editor,

Though the majority of you attend class regularly, I don't notice our absence from the floor's position, which allows me to verify that if even one of you question your ability to answer the question, that you deserve an answer. The rumors circulating on the Tech campus are caused by some of our students' dissatisfaction with our school. I hope all our students will take the opportunity to discuss this issue and find a solution to our problem. I believe that our students are capable of finding a solution. I hope all our students will take the opportunity to discuss this issue and find a solution to our problem. I believe that our students are capable of finding a solution.

Many of you probably heard that we were offered positions on campus and circulated only the truth. The truth is that the majority of us were fired due to a personality clash between the student, feeling that there was a "diversity problem" to the newspaper. John Goldhahn, Editor-in-chief; and Todd Persons, Executive Editor, agreed that we did not fit. Our immediate dismissal was necessary.

None of us question our publication, such as the Tech Eye, is to blame for this dismissal. We worked hard to make sure that our work was of the highest quality. We were told that if we didn't meet the standards set by the newspaper, we would be fired. Unfortunately, we were not able to meet these standards. We believe that the newspaper should have given us more time to improve our work before firing us.

As reporters, we feel our work was the same as always. We were told that we were bossy and that we bossed people around. We were also told that we were annoying and that we didn't respect their time.

As a result of all these problems, we were not able to adequately cover all the stories in our paper. We believe that we should have had more time to improve our work before firing us.

As for our future, we believe that we should have had more time to improve our work before firing us. We believe that we should have had more time to improve our work before firing us. We believe that we should have had more time to improve our work before firing us.
Friday's Election Results

Student Government elections were held Thursday and Friday, climaxing a week of campaigning by the candidates. Sixty-nine students were running for 29 positions of class presidents, college governors and senators.

Voting was light to moderate during the election hours with interest and enthusiasm following the tone of the campaigns.

The election results were released late Friday night, and are as follows:

### CLASS PRESIDENTS

No UFOs: Clarke

Comments of Arthur C. Clarke during the question-answer period, an interview with the FutUre, and the reception which followed his talk:

"I started writing (science fiction) while I was in school. I just liked science and science fiction and when I discovered the magazines in the 30's, I decided to write the stuff."

"I met a few (astronomers and cosmonauts) and I am very friendly with some of them, like Leonov. I sent him a "Wish you were here" card at the Apollo 11 launch. I gave him a copy of my zero gravity instructions from 1955."

"I hope we will miss a "Braun new world."

"I don't know any science fiction writer who believes in them (UFOs) because they're intelligent people. They're trained in the subject, they know that UFOs are.

"Science fiction is partly responsible for people's belief in UFOs and because they want to believe. It is a religion, that's why you can never dispute it in the minds of people who believe in it.

"The basic cost of spending a man to the moon is $10,000."

"Anything one can imagine anything which is possible, will probably be done within a couple hundred years if, it can be done at all.

"The moment the astronaut walked on the moon was "the greatest moment of my life. It's moment beyond emotion in a sense, sort of frozen in time."

Mr. Clarke has held a piece of moon rock. "It's very exciting."

"When asked what he thought about the possibility ofnlasteron farms like they did in 'Fantastic Voyage', he replied, "Fantastic!"

What would happen if the government cut space expenditures? Mr. Clarke said 'We'd simply have to learn Russian, that's all."

He didn't think social and psychological behavior could be predicted in advance. "There are too many random variables. Who can predict a Lee Harvey Oswald?"

A single individual, a single act can totally change the pattern of society.

And from Mr. Clarke's speech, "If we lose it (the race against catastrophe), the world of 2001 will be much like ours with its problems and evils and vices enlarged, perhaps beyond endurance. But if we win, we can solve the great dilemma between barbarism and civilization."

TECH TALK

After being burned for 30 minutes by the theme from '2001: A Space Odyssey', the audience expected to be greeted by the moon itself. To add insult to injury, Mr. Clarke even refused to discuss the movie. That's really what everyone came for anyway.

Wolf Konami, Student Government president, stole the early moments of Mr. Clarke's show last Wednesday as he marched down the side and ome the stage carrying a 30" x 30" red and yellow pillow for a seat.

Rush Registration

Set For Nov. 5-7

Registration for all FTU girls interested in rushing a sorority will be November 5-7 in the lobby of the Library Building from 10 a.m. to 4 p.m. A few of $1 will be collected at this time. Girls will be given a rush booklet prepared by the Panhellenic Association. The booklet contains a list of offers from B. Grace Shacht, Dean of Women and Connie Grady, chairman of Panheli, and rules for rushers and sorority members. Also in the book is a description of the rush parties and a brief history of each sorority.

The girls will also receive name tags printed by Panheli. They will each fill out six information forms, one for each of the four sororities. The lists will be kept on hand until all full-time (12 hour) female students.

What Will Replace The FTU Citronaut?

Meet Vincent The Vulture

Student Government made a firm decision Tuesday evening on the FTU mascot. It would participate on a committee which would get suggestions for a mascot and recommend the names to an advisory group which would cut the number of suggestions down and submit the final names to the student body for a vote.

That's what SG firmly decided.

And still the Citronaut remains.

How about the camel for a mascot? The definition of a camel is a horse that was designed by a committee.

At this point, the FuTUre, in a sincere effort to give the university some direction, a purpose, a reason to hope, has decided to step in and announce that it has a suggested mascot to place before the students, faculty and the administration.

The staff, working without the aid of a committee, wracked its small, collective brain to find a mascot that would capture the imagination of the student body, create state and national interest with its uniqueness, and be a rallying cry for all sports teams.

"Reach for the Stars," That is our creed. So, the mascot should be something that comes close to the stars.

A powerful, high-flying bird.

FTU is a virtuous school. The bird must not be one that preys on smaller, defenseless creatures of the sky. The FTU mascot should be brave, but not a killer. It should be a clean bird.

It should also have the colors representative of the university, predominantly black with a touch of gold.

It should be an unusual bird, because FTU stresses the individual.

Many schools have eagles, hawks, falcons and the like as mascots.

Taking the criteria, the FuTUre considered running it through the computer. No use. The machine kept cranking out a Citronaut with wings.

Then, a non-student (the shame of it all) came forward with an answer. She was a regular Florence Nightengale. Nurse Judy Hines, the night nurse at the health center, brought in a suggested mascot. Her ideas were illustrated by her husband, Gene.

She showed it to SG. There were some polite smiles, and few snickers.

Discouraged, she asked the FuTUre for its opinion, We now present it to the FTU family, asking the entire family to give serious and reflective consideration to it.

That's right, a vulture.

Don't laugh. Don't hiss. Think about it.

The vulture is one of the most maligned yet noble birds in the world.

He is usually featured in grade "B" movies as part of a circling bunch of nasties, ready to pounce on what is left of a poor prospector crawling across the desert.

But the vulture doesn't kill as a hawk kills, mercilessly. He keeps the land clean. He is one of nature's pollution fighters.

He is one of the largest and strongest birds aloft with a wing span of seven to 10 feet.

As a mascot, Vincent would strike fear in the hearts of the opposing team. Can you imagine the devastating effect on an enemy basketball team that stared across the court at the dead tree limb on which Vincent was perched, staring back at them?

Nothing can stare like a vulture. Or, when the university gets a football team, there would be a vulture, trained to circle high over the opposing team in its huddle.

It would be as good as another touchdown for the FTU Vultures.

It may be the touch of the bizarre that gives Vincent his charm, but whatever it is, there's no doubt in the minds of those who know him that Vincent the Vulture has charisms.

So we ask you, why not Vincent? If FTUers have better suggestions, they have been keeping those suggestions well hidden.

VOTE 'YES' TOMORROW
Gunter Speaks In Favor Of One House System

Florida State Senator Bill Gunter spoke for a "more efficient and responsive legislature for Florida" in a presentation to a Political Science 301 class October 29. His talk was given in conjunction with the case study project of PTU student Richard Kieckhefer and Kenneth Woodruffe.

Gunter, who is active in the Florida State drive for unicameralism, was critical of the procedure and systems "why have two bodies doing the very same thing?" He added that, Nebraska is the only state in the United States operating under unicameralism, but that most city and county governments work under this system.

According to Gunter, a one house legislature is "a logical extension of the current system. After all, the United States Supreme Court." He adds that a one house legislature must apportion both houses among the counties and said that this has made the Florida legislature "inefficient and future." Gunter said that unicameralism would eliminate 67 legislative posts, sides, secretaries, and a large part of the $12,000 per year pay, thus eliminating the waste and cost to the taxpayers.

Also eliminated with a one house legislature would be the Conference Committee, which Gunter says is for the Third House of the legislature.

"In the old days," Gunter writes the language of the majority party, "a one house legislature. He stated that the wording of these bills cannot be rubberstamped by the Senate or the House of Representatives."

Would the laws written by a one house legislature be better than that done by the present system? Gunter states, "I think it would be a great deal of investigation and yes-" and as a certainty, "it would certainly work," Gunter answered.

Gunter said that the reason the United States Senate house legislatures is because of tradition, but that the tradition has outlived its purpose in the government after the British Methodists said it was inadvisable.

The citizens of Florida will vote on the unicameralism in the November election, after which the subject will be hashed through the legislative committees and the committees. Gunter pointed out that this will be the first time in the history of Florida that the citizens will be able to change the constitution. This change is due to a provision in the 1965 constitution of the state, stating that the people may vote on or amend the constitution. To pass the one house legislature is voted in, there will be a two year period during which the present legislators will decide how unicameralism will work in Florida. Then, in the 1972 election, 100 legislators for the unicameral system will be selected by the citizens of Florida.

Gunter set up a list of the main virtues of unicameralism.

1. A few persons would serve to pinpoint responsibility and eliminate "...it would provide that every citizen has an insight into the bill on the floor to refer to during discussion and debate."

Tech Talk

The Florida College Health Association conducted a series of Tech Talks and heard a talk by Captain Leon Cooper, Chief, U.S. Navy Aerospace Nurse program at the College. Captain Helene, head nurse of her position, is in charge of the nurses who take care of the patients.

There were 10 colleges and 20 nurses represented at the meeting plus several guests and U.S. Navy nurses. The FTU promotion slide by the College of Nursing and later held a formal business meeting

In the meantime, however, he declared, the penalties for marijuana use should be made consistent with its known dangers—of lack of the individual and society.

The psychological damage done by marijuana to the individual is less important than the damage inflicted by the punishment meted out for using it. Dr. Yolles asserted. Another psychiatrist, testifying on still another drug bill before the House Committee on Mental Health, stated that the drug is "a dangerous drug." Dr. Yolles estimated.

First of all, less than 10% of the approximately 12 million American users of marijuana are considered chronic users. These chronic users, however, are "the majority of the embryo or psychoactive "

"He is using it to escape life stress, his mental growth is impaired by not learning how to deal with frustration and problems. He tends to withdraw from human-to-human relationships, loses ambition and drive, and sustains of motivation, he is present-oriented rather than long-term oriented, and his self-esteem is low. He is not a problem on work. I might point out that in my own college days more than a few students were on marijuana." (For more on the house on Lake Lee, see next week's edition of the Futur).

Jack O'Rourke, Director of Placement Services, was recently appointed chairman of the Student Eligibility Committee, by B. Gwen Sarchet, Dean of Women. Mrs. Pat Fawsett and Mr. Henry Hill will serve as committee members. This is the committee to which students make an appeal if they want to hold a position of leadership and do not qualify according to the rules of eligibility.

The committee is designed to take care of cases that would be treated unfairly with the existing rules. An example would be a student that was on academic probation because he came from an unaccredited high school. It is possible that his grades and test scores would be high.

However, if the student does not hold a 2.0 average because he has been working long hours, etc., this does not usually receive favorable recommendations from the committee.

All students wishing to make an appeal to this committee should now direct their letters to O'Rourke.

(For more on the house on Lake Lee, see next week's edition of the Futur).

CAMPUS GLANCES

Cevinettes Formed at FTU

Collegiate Cevinettes was recently established at FTU in association with Citizens Club. The girls will hold an installation banquet November 8 in affiliation with Citizens.

Officers are: Rear Admiral Miller; vice-president, Olga Rodriguez; secretary, Cynthia Wright; treasurer, Judy Cannon; historian, Pattie Kenny; sergeant at arms, Nancy Sweezy; and plain, Mary Lynn Winstead, and parliamentarian, Kathy Cierebiej.

Their first service project of the year was a Halloween party for the children of the court.

Representative Leonard V. Wood of the 38th District (Orange and Seminole Counties) was guest speaker at the October 31 meeting of the Young Republican Organization. An attorney at law since 1962, Wood received the B.A. degree from Rollins College and the LL.B. degree at Duke University. He spoke on the recently vested legislative pay rates, state funds to universities, and Governor Claude Kirk. He spoke against unequal distribution of state funds to various universities. Students interested in joining the Young Republicans may do so by attending the meetings held on the fourth Tuesday of each month. Meetings are held in room 114 at 8:30 p.m.

The Panhellenic Board sponsors a “clown party” at Ronnie’s Banquet Room, October 25. The purpose of the event was to discuss rush rules and procedures with all sorority women.

The Board met with the Panhellenic Board of Rollins College October 15. Presidents and presidents-elect of the various sororities met with the Rollins sorority members in order that a better understanding of rush procedures and rules could be obtained. The officers are now allowed to wear name tags stating sorority and member.

A certificate of merit will be awarded each quarter to the sorority with the highest GPA. A trophy will be presented yearly. Registration for all girls interested in joining a sorority will be November 7 in the Literary lobby. A fee of $1 will be collected.

Sorority Sorority is presently in the process of reorganizing its members and club after an inactive summer. Sorority received its charter at the end of spring quarter last year.

The girls are currently planning rush, funding and money raising projects. They will hold a car wash November 8 at the petroleum station on the corner of W. Colonial and Tampa at a charge of $.25 per car.

Officers for 1967-70 are: President, Lynn Shoonenberg; vice-president and pledge trainer, Parn Gibson; secretary, Cindy Nylund; treasurer, Sharon Leak; historian, Jo Pelke; chapel and social chairman, Julie Wade; by-laws, Barbara Collins; public relations, Paulette Lebo; and Panhellenic representatives and rush chairmen, Jan Abbott and Berna Thompson.

Bachelor’s degrees held meetings every Monday at 6:30 p.m. in the Village Center.

Pledges Sorority met with its City panhellenic Advisers, at their meeting of October 25. The meeting was in aspects of sorority life, rush, and pledging.

Tykes Panhellenic Advisers have been in attendance at weekly meetings and have aided in providing guidelines for the girls.

Tyke-R Sorority’s constitution was approved by the Panhellenic Executive Board and the Senate. They are now officially a FTU sorority.

The XBA football team defeated College Cevinettes 9-0 in the season opener. The game will be held October 30 against the Faculty staff team.

Chi Alpha Fraternity held a social at the Friars Club October 15 to entertain prospective members of its “little sisters” organization. The 16 girls selected are Barb Adderley, Janice Ronca, Susan Aytrez, Linda Cohn, Linda Davis, Joan Smith, Diane Nixon, Nan Johnson, and Barbara Marks.

The Lambda Chi Alpha at FTU is presently being organized by a group of campus engineering students and a sponsor (Paul Hartman, College of Engineering) and is in need of students interested in Christian Science.

The purpose of the organization is to unite the Christian Scientists within the University in closer bonds of Christian fellowship.

Officers are: President, Dec Kirkwood; Vice President, Brian Sharpe; Secretary, Hark Leffler; and Treasurer, Sherry York. The group is currently holding informal meetings. Each week a member prepares a reading which is followed by the sharing of personal experiences.

A Christian Science Organization is presently being organized at FTU by a group of campus engineering students and a sponsor (Paul Hartman, College of Engineering) and is in need of students interested in Christian Science.

The purpose of the organization is to unite the Christian Scientists within the University in closer bonds of Christian fellowship.

Officers are: President, Dec Kirkwood; Vice President, Brian Sharpe; Secretary, Hark Leffler; and Treasurer, Sherry York. The group is currently holding informal meetings. Each week a member prepares a reading which is followed by the sharing of personal experiences.

Lake Clair Project
Financially Dammed

By Dee D. Decker
The Lake Claire project, a joint student, physical plant-endeavor, is already gaining momentum this year after becoming bogged down last spring and summer.

The project originated by the clearing of brush around the lake in an establishment of recreational facilities for students.

Last year, $1,500 for the lake's development were allotted for a bulldozer and a water pump to clean off an area around the lake without charge.

"However, when the SG had the money, the physical plant was committed to the construction of campus buildings and did not have the time or manpower to work on Lake Claire," Mr. Jim Schroeder, now a member of the Student Government, was to have completed the preliminary survey and plan coordination before temporary garbage table, after safety equipment, cooking and rest room facilities can be installed.

Anyway, the university has no funds for the project. SG's $1,500 went back into the general fund at the end of the school's fiscal year, and new SG funds have not been earmarked for the project.

These factors, combined with the low priority given the Lake Claire project, make a long delay for the Lake Claire area and for the students who wish to use the area.

Blacks Form FTU Group
By Nancy Smith
A new organization has been formed at FTU for black students, called the Black Students Union (BSU).

In an interview, Dan Slater, president of BSU, gave Union's goal as "providing an organization that black students can identify with the fullest, stress black pride and unity. It will also try to improve communications between students, faculty and the administration until they believe that Largo's full of political BSU also hopes to sponsor and raise projects to help establish a scholarship for black students, and establish a policy of memorial activities for well-known black Americans.

BSU must be students at FTU, and officers should have a 2.0 average. According to Slater, 16 of the estimated 25 black students at FTU are members. The current officers are Dan Slater, president; Roland Williams, vice president; Chris, Wiggins, corresponding secretary; Walter Thomas, treasurer, and Larry Davis, financial secretary. The first meeting was tentatively scheduled for November 3, in the Village Center.

BSU plans to hold an annual fund-raiser on Friday, October 31, in the Village Center.

Linens Problem
Not Yet Spotless
Several weeks ago, the FTURe reported that the university's contracted linen service was not meeting with wide approval.

Linens delivered by Pan American Linen Service were torn, stained and sometimes even cooked with 3-D dyes. Hardest hit was the clean-cut, well-dressed student health service.

Complaints were lodged with the company by C. Barrie Enger, head of director of housing FTU.

The company promised in hand new time, and replace those pieces that were torn or stained.

What has happened since the complaints came in?

"We are waiting now to see if the company continues to send us the cleaned, new linens it originally gave us," Enger said, "I can't risk bringing anything back into the hopper that all its customers use," Enger said.

The housing director and was still concerned that the health center was still having trouble with the linens and that Enger is receiving complaints.

"Something has got to be done to correct the situation," Enger stated.

FEU'S WATER TOWER
eve FtURe Photo Editor Chuck Seithel said it easy to play a trick on all of us. The tower looks a bit spooky, but it was Halloween last Friday.

BFiafran Relief Plan
Brought To FTU Campus

FTU students push themselves away from tables in the Multi-Purpose Center and complain that the peace were underdone, the meat too dry or the pie crust wasn't like mother used to make.

At the same instant, many miles away, dozens of Biafran children are hanging simply in the thin arms of their mothers; mothers too weak and dried from the hunger that grips them to weep for their dear.

If the world's melodramatic, it's meant to be. The Biafran tragedy is so horrible that no words can describe it adequately, no descriptions are too exaggerated.

But the mass starvation of these young victims will be fought in order to save the lives of these children. For themselves, right to answer last week.

The concert choir, which has been performing the world's most popular songs, will be singing on a platform in the center of the campus. The choir will be singing from 10 a.m. until 5 p.m. on Saturday, and from 10 a.m. until 2 p.m. on Sunday.

The concert will be held in conjunction with the National Council of American Relief, a division of the American Red Cross.

The concert will be held in the center of the campus. The concert will be open to the public and will be free of charge. All donations will be used to support the relief efforts in Biafra.

SG Senate
Appointed
The appointment of senators for the new year was the main order of business at Tuesday's Student Senate meeting. After a lengthy discussion, several amendments were made to the original appointments, various appointment procedures.

However, Senate President Paul M. Schindler pointed out that the method proposed that each procedure was constitutional.

Finally, motions were passed and the slate proposal was sent to the Senate. The Senate was satisfied with the slate and approved the slate of senators.

The slate was approved and the senator was appointed.

Anyway, Senator Santry was appointed and immediately proportion the six additional seats after he had been elected the previous slate to the Senate. On the basis of the plurality, Senator--Junior class gained the additional seat, Education Junior - one additional seat, Education Senior - one additional seat, Education Junior - one additional seat, Education Senior - one additional seat.

The PTU concert choir, under the direction of Richard L. Smith, is considering presenting a Christmas concert. Smith, in considering presenting a Christmas concert, will appeal to the Community and other area colleges.

The choir, which has performed in the past, now has 53 members.

The choir is currently rehearsing Christmas songs such as "Hodie", "Wren Song" and "Joseph Came Seeking a Resting Place".

**XBA Defeats Civilian 9-0**

Chi Beta Alpha Business Fraternity defeated the Civitans, 9-0, on the kickoff of the Independent League of Intramural football. Long gain and possible scoring were halted numerous times due to penalties.

As the final two points of the game, Mahurin scored from 1 yard out for two points.

Scoring were halted numerous times due to penalties.

With a squad of ten men, PAE scored to send men both ways, while Tau, in a two-platoon system.

PAE had to work for the win as Brewerman to Richard Heard, the other hand, was also tough and one of the deciding factors of the game.

PAE’s first score came early in the fourth quarter when Jim Hough was harnessed by a strong Tau rush. PAE’s defensive, in the second half.

Later a penalty moved Tau to the 15 yard line where Jim Hough skirted his right end for the score. Minutes later, a personal foul moved PAE to the Tau 10 yard line where Jim Hough hopped his right end for the second tally. Once again, the pass for extra point failed and Phi Alpha led 1-0.

In a hard fought, penalty-ridden battle, PAE proved themselves the team to beat as they downed Tau 12-6.

The big play on this occasion was John Roberts took a 35 yard drive was a 35 yard pass to Brenneman to Richard Heard.

\[ \text{Phi Alpha} \]

The heated contest was free of any outbreaks until the last play where Jesus was jumped by two Tau players. Any further trouble was avoided as officials stepped in.

**New U. Senate Bill No. 989**

AN ACT relating to state university and junior colleges providing for suspension of students arrested for unlawful possession of narcotic drugs, central nervous system stimulants, hallucinogenic drugs, or barbiturates; providing automatic expulsion of such students upon conviction; providing waiver for students divulging information leading to conviction of persons supplying drugs or involved in disclosing possession of drug prior to arrest; Senate Bill ENACTED by the LEGISLATURE OF THE STATE OF FLORIDA.

Section 1. Any person enrolled as a student in any state supported university or junior college who is arrested for unlawful possession of any narcotic drug, central nervous system stimulant, hallucinogenic drug, or barbiturate, as identified or defined in either Chapters 398 or 414 Florida Statutes, shall, following an administrative hearing provided by the president of the institution pursuant to rules promulgated by the Board of Education or Board of Regents in which such suspension is recommended, be suspended from all classes of instruction until the determination of his guilt by a court of competent jurisdiction. If acquitted of a violation of the law, the student shall be automatically expelled.

Section 2. Any student subject to suspension or expulsion from a state university or junior college as provided herein may be entitled to a rehearing in the event the conviction is vacated, reversed, or annulled. A rehearing shall be granted only upon application of the person who supplied such a declaration to the court of competent jurisdiction, provided such declaration was procured by fraud, duress, or by the voluntary confession of the person who supplied such a declaration.

Section 4. This bill shall take effect immediately upon becoming a law.

Approved by the Governor July 9, 1969.

Filed in Office Secretary of State July 9, 1969.
Library book order requests have increased for the Technical Services Department at the breathtaking rate of 10 per day, according to Arthur L. Ketchersid, director.

The deluge was initiated in July when students began asking for books. On August 21, the day Ketchersid began numbering the requests, 4,000 had rolled in. Incoming books have all filled all stacks on the floor under the stacks, with the exception of the area which will become theirs after the stacks have been moved. The construction has been completed and occupied by students using the library building. This seems the signal for the beginning of another academic year with a new set of problems. The library is going to be the end of this problem. The library is going to be the end of this problem.

The library's accession of new space which tracked down not only the name of the book but also the author of the book, which is something that was taken.

Obtaining back volumes of both books and periodicals is a particular headache of a new university. "Our major acquisition problem is with the out-of-print books," observed Ketchersid, who joined the FTU staff in January 1967. For the time being, professors depend upon books not available on the regular market. They have to find someone who has a copy. We have spent as much as a year looking for such a copy, Mathematics for the Sociologist, by C. U. Lineham, head cataloguer, says a prime example of the classification brain teaser is the "new" book co-authored by Dr. Charles Unkovic entitled Psychology and Sociology.

Assuring the price of a volume can also be a headache, however. "It is difficult to come up with an estimated cost figure for a 20 Year Old," Ketchersid noted.

The team of 15 comprising the staff of the Technical Services Department has not grown proportion to the university's skyrocketing expansion. With the help of only one new worker, this group has found it impossible to keep up with minimum standards. With the accelerated pace is more than a reality. One great asset is the department's leased reader-printer, which is associated in skeletal and muscular structure. The study, presently taught by Dr. Frank D. Rother, Physical Education professor, is "a course concerning the application of anatomy to human movement."

Rhino monkeys come originally from India which is in fact, the only country in the world where they are found in a wild state. They are lean and very agile and weigh around fifteen pounds. Being of a lower order than the chimpanzee, they are vicious animals and consequently do not make good pets.

India places great moral emphasis on the proper use and treatment of these animals, and demands reassurance that they will not be mistreated and that their use be only for the cause of responsible research. They are presently used extensively in medical and biological research.

NOVEMBER 4th

CONTINUE THE EDUCATION BUILDING AMENDMENT

THE SITUATION IS CRITICAL

Florida college enrollment will double within the next five years. Already crowded facilities must be expanded to make room for future enrollment. Vocational-Technical Centers must be completed and expanded to train personnel for the jobs being created by the tremendous expansion of business and industry. Junior colleges now meeting in temporary headquarters (25% of the enrollment) must be established in adequate permanent buildings. Universities must be expanded on existing sites. New universities and medical centers are also needed to meet future demands. Unless something is done there will not be adequate educational facilities when we need them the most.

YOU CAN HELP

In 1963, Florida voters approved the Education Building Amendment, by an overwhelming two to one margin.

Under this program, proceeds of revenues derived from the utilities gross receipts tax were earmarked for a 50 year period, beginning January 1, 1964, for retirement of the bonds.

But under the new Constitution, this bonding authority expired on June 30, 1969. Therefore, the legislature placed on the general election ballot, for November 4, 1969, a proposed amendment which would continue this bonding authority.

Unless the Education Building Amendment is continued, the amount of funds to be provided for construction will be at a standstill.

If the people of Florida approve this amendment, it will make immediately available approximately $35,000,000 a year to build the vocational technical centers, junior colleges, and universities Florida desperately needs by 1975.

AND WITHOUT NEW TAXES

This is a bond program, which means that the public will not have to bear an additional tax burden. This program is working effectively now, but it needs to be renewed. As a program, it will utilize the utilities gross receipts tax to guarantee financing of this Building Amendment.

AND EVERYONE WILL BENEFIT

Passage of the Education Building Amendment of 1969 will provide a means for young people and adults, with varying educational backgrounds and needs, to prepare themselves for greater earning power and increased community service.

SPREAD THE WORD

Whether or not you are a registered voter you can do something. If you are an eligible voter, we urge you to vote "YES" on November 4, 1969. If not, you can still act by stressing the importance of this amendment to your parents and friends urging them to vote "yes" for the continuance of the Educational Building Amendment.
