A significant step in the battle against water pollution and for the protection of Florida's water resources was announced yesterday with the establishment of an Institute of Fresh Water Ecology. The grant of $93,000 is the largest and most important grant FTU has ever received.

The present program of the Institute will serve to investigate problems in water pollution, waste control, sport fisheries, general recreation, and water conservation. Funds anticipated from the State Department of Air and Water Pollution Control are in the amount of $93,000, and the grant will be for a two-year period. In addition to this amount, the University will contribute to the project service and other research-related functions valued at about $47,000. The total cost of the project is expected to be $140,000, and the difference between that figure and the grant of $93,000 will be made up by FTU's new Institute.

Dr. T. L. Chesnut, Assistant Professor of Chemistry at FTU, who will be the first Director of the Institute of Fresh Water Ecology, Dr. Chesnut has been a member of the FTU faculty since January 1, 1969. A native of Panama City, he earned his B.S., M.S., and Ph.D. from the University of Florida.

Dr. Chesnut noted that none of the state's public-supported institutions has an appreciable role in the State Government's efforts to control pollution. The Florida State Department of Air and Water Pollution Control is affiliated with the State University's School of Education, and other institutions, such as the University of Florida, have undertaken projects, but none such have been directed toward the study of pollution in such a comprehensive manner.

Major functions of the Institute would be: (1) the investigation of the potential ecological problems of local, regional, and national concern; (2) the covering of water pollution and other problems arising within its fresh water natural resources; (3) the encouragement and stimulation of research in all areas of fresh water ecology; (4) the teaching of both advanced undergraduate and graduate courses; and (5) the provision of a base for offering non-credit short courses, conferences, etc., in continuing education.

Coffee Honors Student Gov't.

The Office of Student Affairs will hold a coffee honoring Student Government on Tuesday, January 13, from 11 a.m. until 12 noon in the lobby of the Library Learning Resources Building.

All students, faculty, and staff are invited and urged to take this opportunity to meet the Student Government members and Student Affairs representatives.

Notice

As a result of last minute cancellations two vacancies existed in the women's housing as of Wednesday morning. Female students interested in one of these accommodations should contact the Housing Office, located in LIRB 120, or call 775-2861. These will be offered on a first come basis.

If they don't find a way now, just think what will happen as the universe continues to grow.

We are very concerned about registration," Dr. Gambrall stated. "That is why this committee will be established to quickly. We are aware of the problems and expect to do something about them."
It Worked in England

Last week Great Britain decided to allow 18-year-olds to vote, get married without parental consent, and become army conscripts. Britain stood back and braved herself for an onslaught of young couples wanting to marry and go on conscription. There has been no election since the 18-year-olds have been given the vote, so as not to have their 'scared off' any elections (as they could if there had been). Much to the government's dismay, (and one disappointment of many of the English people there was no increase in marriages, and no excess property increase. The next line of last year at the same time was two divorces, and both of the parties wanted to get married. At any rate, it will be interesting to watch England to see if she goes to the same last place in the European Community over the winter. At any rate, the entire prospect of a service career would be more interesting. Lowering the voting age can also be accomplished without any disastrous results, as England is again going to have to prove. But, by the same token, it will be a test of the system and the good old U.S. of A. has been around less than two hundred. Let's hope that we can learn from England's mistakes. As they say, 'It looks like we're going to be around long enough to make them all ourselves.'

Foundation Thanked

We have just reviewed some interesting figures that prompted this editorial in recognition and appreciation of the members of the FTU Foundation. These dedicated and unselfish individuals have at times contributed approximately 500 students through loans, grants, scholarships. In all, the FTU Foundation has contributed over 1.2 million dollars. Foundations and other organizations that have advancement emphasis (the education of the masses) have found that the Foundation, though active only a short period of time has collected in excess of $650,000. The Foundation has been given to the students through various activities, such as: sponsorships, subscriptions, and other contributions. The Foundation has received many donations from students, faculty, and the community. The Foundation has also received a generous contribution from the students through the various activities. The Foundation has received many donations from students, faculty, and the community. The Foundation has also received a generous contribution from the students through the various activities.

Donna Ross

Donna Ross has just made her last record with the Survivors and struck on her own. She has now sold two more divorces, and both of the parties want to get married to buy property, and screw up the next election. Married without parental consent, and become property holders. Then that has only upset the laws of England. Law 8.IÊ is.

Class of '91?

Dear Editor,

So many people at FTU asked me to write to you, and I could not turn them out. Since both my husband and I will be leaving this campus this quarter, I would greatly appreciate it if you would print our paper in your newsletter.

Bill and I are very grateful to both of you for your wonderful reception for me and our child last quarter. We both enjoyed coming to FTU, and we have never been better treated. We hope you will be here for our child next year. The child's name is Laura Ellis, Senior. She will be graduating in December 1989, at Orange Memorial. She is a 6'1" tall, blue-eyed blonde with a 10 lbs. 7 oz. and was 21 inches long.

Marsha and Bill Lavingston

Students Thanked

Dear Editor,

Now that the fall quarter is history, the Student Services and all the staff would like to express our heartfelt appreciation to all the students for their help and support throughout the quarter. Without the cooperation and contributions of all the students, this would not have been possible.

E. Clayton
Director of Physical Plant

Virgin Spring

Cussed, Discussed

The Village Center Fine Films series praised the end of the quarter as part of the program for this quarter. The film was released on January 10 and 11, but the Village Center did not mention the title of the film. The film was shown at a later date.

Alafaya Paving Is Promised

Orlando Paving Co. has been awarded a $51,000 contract to resurface dangerous Alafaya Trail, it was learned this week. According to the State Department of Transportation, the awarding agency, work should begin on the road to FTU this week.

University officials had hoped that the narrow, bump-backed road would be completely resurfaced and widened, but the state indicated there was still insufficient travel on Alafaya to warrant the large expansion project.

The resurfacing will cover the rough spots in a three-mile section of the road, from East Highway 50 to the Seminole County line. Secondary road funds will be used for the project.

At one time the Orange County Commission had decided to do the job. Then it was taken over by the state agency which indicated that the resurfacing would be completed before classes began last October.

Delay followed delay. A state department official was quoted last November as saying that the contract had been let in October. If it had, no results were shown.

And during that time, there were several serious accidents on Alafaya during rainy weather that usually coincided with traffic and liminaiting the situation of cars crawling through rain water.

Walt Robinson, of Alafaya Trail and town, had been told by the state department to stop traffic coming through the area.

They will present a $2,000 gift to the University this year, it's understood, by President Charles N. Millican, so enthusiastic about the future of FTU.

"It is most gratifying to find such thoughtful and generous people in our community," Dr. Millican stated. "We have the tools with which to work, it makes us more than eager and extants our educational ability to educate our students, and I am deeply grateful for the support given FTU by this community."

Added the donating needs for FTU, as yet unmet, are boats and small vessels to operate out of the Biological Sciences Department to carry equipment and assist the department professors in their study of water pollution and conservation of our freshwater lakes. FTU will play the major role in the study of such boats, results of which will be of great importance to conservation, as well as on page two about contributions to the university.

NEXT THURSDAY, Jan. 15, Him, He & Me, a top singing trio which visited FTU last spring, will be back on campus again when they join the Mult Multi-Purpose Room at 12:00 noon. Him, He & Me is the first of a series of groups and entertainers who will be bringing FTU to perform during the lunch hours. The series has been titled "Guess Who's Coming To Lunch?" and is sponsored by the Village Center Student Advisory Board. The village center is presenting this series with no cover charge and no minimum.

Chi Beta Alpha Is Explained

Chi Beta Alpha (XBA), a local FTU professional fraternity, was organized six months ago to foster the study of business in the university and the surrounding metropolitan area.

XBA has already gained special recognition from Delta Sigma Pi, the national professional fraternity in the field of commerce and business administration. Due to XBA's outstanding performance as a whole, Delta Sigma Pi will permit XBA (after final inspection and acceptance) to become a regular Delta Sigma Pi chapter the following year instead of the normal waiting period for a new fraternity at a new university.

Sorority Greek Letter Rules Are Explained

Due to a recent communication organizations, the question of the Greek letters is brought up. Rules and sororities and fraternities have been encountering problems due to the misuse of Greek letters. According to G. Wren Sardich, Dean of Women, sororities were requested not to use Greek letters in the names of their societies or anything pertaining to the sorority. The rule was set up by Dean Sardich in coordination with the University Panhellenic Association. This rule was set up because FTU because in many cases, when a local society (all FTU sorority and frats are local) decides to go national, the same national groups may be offended. It may occur in the case of a local group (with the letters of a national) receiving adverse publicity due to a problem within the sorority.

VC Leaders, Come Forth

The Village Center is seeking leadership applications for some of the many activities in the educational, cultural, and recreational programs sponsored by the Student Activities. Of special interest now are chairsmen needed for the Parents' Day on May 16, Spring formal dance on May 23, and a College Bowl program for which no eligibility requirements are available at the V.C. Main Desk and which will be held no later than June 16.

The V.C. wants people with qualities of leadership, organizational ability, and who can work well with other peoples. All applications will be reviewed by a V.C. committee and the applicants will be interviewed.

FEIFFER

I want to return this Christmas present. My husband gave it to me.

My husband gave it to me.

It's the wrong color.

It's the wrong size.

It's the wrong present.

And he's the wrong husband.

Every Christmas I realize that.

"Burp!"

"Home economics was all there was left!"

Well, that's one way to solve the parking problem.
Jet Noise is Studied

Dr. Llewellyn M. Ehrlart and Dr. Walter K. Taylor, the FTU Department of Biological Sciences have just received a grant of $2,400 from the East Central Florida Regional Planning Council to study the effects of jet aircraft noise on wildlife around jet airports.

The first phase of the project will deal with the current airport activity on wildlife, with the second phase to search out possible mitigation techniques of the noise. Resulting recommendations will compile a wildlife management plan for the airport site.

Prior to beginning the project, Ehrlart undertook to survey the area to determine existing wildlife forms. We will be concerned at first with accumulating data on the population density. "Dr. Ehrlart said, "jet planes have been used in the area for a long time, and we will have to compare population parameters with those for the same species at a sufficient distance to be away from the noise.

If we find differences in density or population, we will find it important to accumulate data on reproduction and survival so that we can satisfy the small mammal population." Dr. Ehrlart's work with the gray squirrels and the eastern cottontail rabbit will be used as a comparison with the possible trends to be tracked with colored plastic leg bands, she said, and then recorded.

Students assisting with the project are: Joseph Chambers, Henry Tame and Bruce Anderson, all FTU freshmen; Dr. Taylor's son, Walter, and Lett Feifer, Fort Defiance, Maryland, location of U.S. Army one-person structures.

Book Review

"Buddy Remembers" by Buddy Remembers FTU is a touching account of a young boy's battle with cancer. The book, written by the boy's mother, chronicles Buddy's journey from diagnosis to death, offering a glimpse into the world of pediatric cancer.

The story begins with Buddy's diagnosis of bone cancer in 1986. lavender's childhood, the book provides a realistic portrayal of the challenges faced by children with cancer and their families. Buddy's story is one of courage, determination, and love, as he faces his illness with grace and a spirit of adventure.

"Buddy Remembers" has received widespread acclaim for its honest depiction of the experience of childhood cancer. The book has been praised for its ability to bring the reader into Buddy's world, offering a sense of connection and understanding to those who have been touched by cancer.

The book has also been celebrated for its ability to bring comfort and hope to families facing similar challenges. "Buddy Remembers" serves as a reminder of the strength and resilience of children and their families facing adversity.

This book is a heartwarming testament to Buddy's life, his courage, and his love for family and friends. It is a story that will touch the hearts of readers of all ages and remind us of the power and beauty of life.

AN EXAMPLE of some of Professor Lotz's work, this piece is entitled "Horse Lattitudes" and was inspired by a musical name of the Doors.

VANCE PACKARD

Holly Queen

(Continued from Page 1)

With FTU's first graduating class in 1971, XBA is preparing to open the College of Business Administration to make the Central Florida Business Community aware of the program and available human resources. XBA has doubled its student body since last year. The College of Business Administration has posted 1,281 from 309 students. This year, XBA has 40 members, and 20 candidates. XBA is working with Central Florida businessmen and other interested parties to fill business college graduate space.

The manpower soon to be available with the Graduate College of Business will have a Bachelor of Science in Business Administration with a specialization in the fields of accounting, business administration, economics, finance, management, and marketing. The graduates will have a double specialization with one degree. An M.B.A. (Master of Business Administration) program has also started this year.

Vincent is Not Dead!!!
Chi Alpha fraternity greatly benefited its newly organized sorority, PhilDelta Sigma, through the planning of a car wash on January 22. The proceeds were to be used for educational seminars and to provide an incentive for social events. The car wash was held from 1–6 p.m. at the Campus Realty stand on DSU Road, and it included food, live music, and games.

Debbie Wheatley, sponsored by SRA, is crowned as Holly Queen by Andrea Hillery, Chair of Special Events Committee of the U.C. Student Activities Board.

The role of the school in teaching education is a matter of current discussion. The school instructor must be self-assured that such need is met in the home and in the church. The preparation of the proposal for the college fund.

Lake Claire Job In Bog

The necessity and development of the Lake Claire project is insisted upon between Student Government and the Physical Plant and President Wall. ‘Kamakazi’ hopes that determination between students, SG, the administration, and the community may be the answer.

The project, consisting a recreation area around Lake Claire, was the prime SG project last spring. A committee was formed but failed to act during the spring, summer, and fall quarters. Meanwhile, Kozanski, the class president, and the college government met during Christmas holidays to review and reinitiate the project. They went to the lake and did some tentative planning which coincided with last year’s proposals.

The SG plans include boat docks, launching ramp for a water ski team, a water slide, a cleared beach area, cooking and rest room facilities, a sports field, and a hill overlooking the lake and beach. The hill would be constructed with the excess dirt from construction of buildings and parking area.

The problem is getting the Lake Claire Project into the long range plan and work schedule of the Physical Plant. Mr. James Schexneider, campus planner and engineer in charge of the Lake Claire project, said that any project would have to work into the long range campus plan.

Although Phys Ed, which is working on the immediate and permanent solving problems, Lake Claire will have to wait a long, long time, several from the Student Senate are official and organized work can begin. The Physical Plant also has placed the project on low priority because they feel the new Olympic-size swimming pool which will be finished this spring will cool the interest and pressure on Lake Claire.

Incidentally, however, the main activities on Lake Claire will be pheasants, duck, hunting, boat parties, and general relaxation, said Kozanski. Now, and again this spring, students will have nowhere to go and little to do after all the fraternities are unoccupied. It has even been suggested to make the project a student-community project if no help is forthcoming from the administration.

Topographical study of the area has been completed as has the site proposals for recreational facilities for the beach. The main problem now is cooperation: cooperation and interest between the students, SG, the administration, and the community. Student Government has put up to $18,000 to spend on the project and hopes to receive community donations of money, labor, and skilled supervision. With the money, labor and cooperation of everyone involved, it would be completed as has the SG proposals for recreational facilities for the beach. The main problem now is cooperation: cooperation and interest between the students, SG, the administration, and the community. Student Government has put up to $18,000 to spend on the project and hopes to receive community donations of money, labor, and skilled supervision. With the money, labor and cooperation of everyone involved, it would be completed as has the SG proposals for recreational facilities for the beach.

Dr. Harry Schonberg said, “For our students and our community, we cannot, we must not fool around another year. We need help. We will not be satisfied with nothing, we will not do for the community, for our students, and nothing for our Lake Claire and they will have it for spring activities.”

“FTU’s basketball team is the only undefeated squad in the history of the university.”

Dr. Frank Rober, head of FTU’s athletic program made the statement with his tongue slightly in cheek, since the undefeated basketball squad is the first school team ever fielded by FTU, but the accomplishment is none the less amazing.

The defending squad, coached by Gene Clark, knocked through the first half of the season without a loss. For the surprise of its statewide victims and the delight of the administration and community.

Dr. Rober said, “Our students and our community, we cannot, we must not fool around another year. We need help. We will not be satisfied with nothing, we will not do for the community, for our students, and nothing for our Lake Claire and they will have it for spring activities.”

“I frankly don’t how we can help but have one off night,” he said, “But we have tremendous spirit, so...

The FTU Student Health Center is now giving the second round vaccine injection for those students who previously had the first injection. There will be no charge for this service.

According to the Health Center, it is now time for the second injection.

Winter Sports To Jog Flab

Ken Renner, director of FTU Intramurals has announced the Winter Term schedule of sports sponsored by the department.

If anyone needed any more encouragement to engage in sports, Renner said, “Exercising around Christmas is essential, especially after all the food consumed during the holidays. So let’s organise and play ball.”

Faculty and staff members are also invited to form teams in the various categories offered during the term,” Renner added.

Basketballers Still Undefeated

“FTU’s basketball team is the only undefeated squad in the history of the university.”

Grad Jobs Are Offered

Job interviews for seniors had gone begging in the post. Suddenly this week, they were at a premium.

Thanks to the tenacity of FTU Placement Director John O’Roark, the seniors interest in exploring the field of employment has increased, according to O’Roark, who, for months, has been making arrangements to interview representatives of national firms who would be on campus to interview prospective employees.

There was little response.

So, O’Roark set up a table in the registration line this week, putting out a sign that read “Job interviews for seniors had gone begging in the past. Suddenly this week, they were at a premium.”

The following question-answer series pertaining to the recent draft lottery, was provided by the National Headquarters of the Selective Service System. The FuturE now reproduces the series for the benefit of all students affected by the lottery.

Question: My birth date was drawn number 216 in the lottery. I am in school and will be until June 1973. Will the 216 number apply when I reach my 26th birthday, or will that year's number control?

Answer: The random sequence number you acquired in the December 1969 drawing will apply so long as you remain subject to induction for military service.

Question: Question: Presently I am in Class II-A but this deferment will expire on February 28, 1970. If I have number 306 from the lottery, I will become Class I on May 1, 1970. If the local board does not reach my number before my 26th birthday, what will my status be?

Answer: If the local board has not reached your number before your 26th birthday, you will, upon reaching age 26, leave the pool of those available for induction as part of the 1970 first priority selection group.

Question: If your local board has not reached your number before your 26th birthday, you will, upon reaching age 26, leave the pool of those available for induction as part of the 1970 first priority selection group.

Answer: No. You won't be included in the random sequence selection unless you were born in 1957. The 1970 pool is limited to those born on or after January 1, 1944 and on or before December 31, 1956.

Question: Will there be any more drawings?

Answer: Yes. A new random sequence will be made for each calendar year for those registrants attaining the age of 19.

Question: My birthday in the lottery gave me sequence number 225. I will be in Class I A next year. Can I count on not being inducted in 1970?

Answer: No, because the total manpower requirements are not known and cannot be reasonably estimated at this time.

Question: I have random sequence number 75. When my local board inducts me will other local boards be inducing registrants with this same sequence number?

Answer: Not necessarily. It is possible for all local boards to base their decisions on different factors and the same sequence number may not be reached by all local boards.

Question: I am 19 years old, have no basis for deferment, and have a random sequence number 300. If I am not inducted in 1971, can I be inducted in 1971 or in subsequent years?

Answer: You are liable for induction to age 28 or age 35 if you have a sequence number 300. If you have a higher sequence number, you may be inducted in subsequent years.

Question: I will turn 20 one month before my birthday, and will be inducted in 1970. Will I be inducted under Class I A?

Answer: You will not be inducted as a Class I A registrant because your birthday is after January 1, 1944.

Question: I have sequence number 250. If I want to volunteer for induction, will my local board wait until 1970 before they will accept me as a volunteer?

Answer: No. They may accept you as a volunteer prior to reaching your random sequence number in the induction processing.

Question: I am 19 years old and now deferred as a student. My random sequence number is 250. If sequence number 300 is not reached in 1970 in my local board, will I be free from military service?

Answer: No. It is possible that your local board may have higher sequence numbers than you and may reach your number in 1970.

Question: Which of the following questions could be asked in an anonymous survey to determine the effectiveness of the teaching techniques and the desirability of the course?

Answer: Which professor made the best use of the material?

Question: The purpose of such an undertaking would have several benefits. For the individual professor, the evaluation would facilitate the effectiveness of his teaching techniques, and would give him a criterion other than examination grades.

Evaluations would be of aid to students in their educational decisions and would allow authorities to judge the faculty members on teaching alone, rather than on publications, research, and community activities.

The students would have more involvement in the evaluation process and would give the professor the opportunity to discuss the course.

In conclusion, the evaluation would be of aid to students in their educational decisions and would allow authorities to judge the faculty members on teaching alone, rather than on publications, research, and community activities.

The evaluation would be of aid to students in their educational decisions and would allow authorities to judge the faculty members on teaching alone, rather than on publications, research, and community activities.
