New Sociology Grant Helps Man Know Man

FTU has received a $43,000 grant to develop an "Undergraduate Program in Social Welfare" in the Department of Sociology under the direction of Dr. William D. Allen, Professor of Sociology, College of Humanities and Social Sciences. The grant was awarded by the Department of Health and Rehabilitation Services, Division of Family Services, as a continuation of the grant-in-aid for the Department of Health, Education, and Welfare, is subject to renewal for a second year at a grand total of approximately $1,200,000.

Mrs. Mary Goree, fiance, has been appointed Coordinator of the project, and she will derive learning experiences and knowledge from an area of research related to social welfare and public interest culminating in a minor thesis.

Grad. Record Exam Set For April 25

A Graduation Record Exam will be administered on campus April 25 to all seniors for graduation purposes March 1. This examination is necessary for all seniors to graduate. The test will be given in the FTU Testing Center.

Plans are being formulated for graduation. These plans rely on some activities that seniors must apply for graduation at least one quarter in advance at the registration office.

The President of the Senior Class, Tim Ackert, needs help in the preparations for upcoming events. Anyone interested in aiding should report to the address for Ackert at the S.G. desk on the second floor of the library.

HEW $5 Veto

Will Hurt FTU

President Nixon's veto of 19.7 billion dollars for HEW will definitely affect FTU's 1971-72 financial budget and in turn, FTU students.

Dean W. Rex Brown, vice president for student affairs, has determined the changes to be made in the budget.

"It is imperative that we get at least 10% of our requests," he stated "else $359,000, said Dean Brown. So far FTU's financial aid department has been unable to meet all students who qualify for financial aid. With the budget cuts, it is possible for HEW to deny many students, financial aid.

Even while only a separate part of the funds were withheld for education, those funds were essential for the institution as a whole. (Others said it was a faulty muller.)

Calendars Violated, Or, Weren't They?

BY MARY ANNA JACKSON

Does the Science Auditorium meet state fire codes, or doesn't it?

There appeared to be no clear answer to the question, even from the State Fire Marshal's office itself.

Last quarter, the FTU reported that the auditorium did not meet the fire codes because it contained too many seats and not enough exits or exit doors.

The FTU received this opinion from Tom Knight, the State Fire Marshal. The opinion also showed up locally in fire marshals.

The administration pledged to have the building checked immediately to see whether it would be cheaper to put in additional doors or make an aisle down the center of the auditorium.

Since there had been no word on any regulations since the story first appeared, the FTU checked again this week.

This is what we were told:

The ruling in the FTU Science Auditorium case is not a fire hazard, according to the latest report from the state fire marshal's office.

The real problem with the Science Auditorium is the size of the table and seat on each set of tables. The table arm is too long, there is not enough room between the back of the tables and the arm of the fire marshal's office.

The fire marshal's office has submitted a report to the National Fire Prevention Association in Boston stating that if the table arms are cut by four inches, the Science Auditorium will comply with the regulations of the state fire code. The problem would be to determine the changes to be made in the auditorium.

John Philip Goree, FTU's Vice President for Business Affairs, expressed the desire to have the fire marshal's proposal approved. He stated that the cost of putting in a side door on the center of the auditorium, or putting on side exits, would be extremely high. Not only would the cost of the Science Auditorium be diminished by approximately 80 seats.

Goree said that adding a middle aisle would "complicate the safety problem," rather than lessen it. He pointed out that a middle aisle could be a serious jam up at each of the two exits from the auditorium, because people would be exiting in one direction and entering in the middle aisle and the side aisle instead of the same direction.

The Science Auditorium is adequate now, he said, if a middle aisle were added. The sight line would improve, and the aisle line would be better.

TAU To Play In 16-Hour Marathon

TALU Fraternity will play the Orlando Panther Basketball team in a 16-hour marathon basketball game at the Bobo Martin High School gymnasium from 11 a.m. tomorrow to 3 a.m. Sunday. For each point scored by a team, the proceeds going to the Telephone.

The overall goal is at all hours for RC Cola, Corona, RC Cola, and supply free drinks. Dickinson Advertising has helped made the arrangements for the game.

Student Government Thursday was announced last week that it was budgeting $26,000 for a spring mini-rock festival.

The group has announced last week it was considering allocating nearly all of its budget for a big entertainment package, but the group still wants the big spring weekend as much as possible.

Some groups that might be considered for the spring Rock Festival, but not have enough money for a big attraction. Before the weekend, the group would help with the arrangements and have the authority to reject any group it doesn't want.

Couple of people have decided to put a road to the lake and supply needed power for the area, plus students would be able to plan and do their own planning to prepare the park.

It was suggested that $5,000 in SG funds be allocated as a starter for this Lake Claire project, and that other funds might be given later from reserve funds to get the park in.

"Everyone agreed that the Lake Claire project should receive top priority," said an SG spokesman after the meeting with Dean Proctor. If any money is made on the Spring concert and weekend, some of those funds might also be earmarked for the lake project.
Editorials

Welcome, WFTU

Well, it looks as though the FuTUre has some competition, it comes from WFTU, the new University radio station. The cry has reportedly gone out to the Communications Radio Broadcast classes that the FuTUre is in need of new blood. All are expected to come on board the WFTU bandwagon. The FuTUre, having been only a five-minute newscast so far (6-6:05 p.m.), is in a desperate need for new ideas on campus, with an eye to scooping the FuTUre. "Don't use the news the FuTUre has in its last edition, but instead produce your own reports on the events of the week."

The WFTU is not all bad news. It will rarely find the doors open. It is a very large, square, multi-colored silk scarf chieftain in blue and gold, and last but not least, a name for which no one can be caught. Miriam Wells.

WFTU is still Nick-Nameless

The Student Government's Mascot Committee is open for business again, and WFTU remains nick-nameless. The half dozen, or so names that were submitted by the committee this week were not acceptable. Apparitions and suggestions were sent back with the suggestion that a name be suggested to the committee. The committee was not satisfied, and Milligan was quoted as saying, "I think we can do better than WFTU." Perhaps the committee is not one of the final recommendations of the committee.

The FuTUre will be pleased to accept any new suggested mascot names. New names are due by February 10. When a new list is compiled, it will be presented to the Student Government in turn, will select three names to be placed before the university for a campus-wide vote.

Tech Talk

A recent poll conducted by the Communications Radio Broadcast classes, reported that 36.3 percent of FuTUre students believe that the school is open for business. The reason given was that the school is open for business.

Letters To the Editor

S.G. Questioned

Dear Editor,

In government in the sunshine, as proclaimed by Florida's illustrious cabinet and Governor, a system by which the populace at large may keep informed of and abreast with the current programs and legislation being considered for public consumption. This is, as originally construed, to be implemented and used by all governmental offices and officers in the state of Florida, federal offices exempt due to national security.

Since "governmental offices and officers" is considered to be any such agency receiving state monetary support, nearly all governmental agencies belong in this category.

An initial response may be negative due to the quality and manner in which the governmental offices are constructed and administered. However, as indicated by the Student Constitution (Section 6, subsection B and Section 7, subsection B), the Student Government does not receive funds directly and indirectly from the state of Florida directly from fees designated by the Board of Regents, and indirectly by the granting of grants from the President of the University who is an employee of the school.

Consequently, one may surmise that the Student Government is subject to government in the sunshine. If this assumption arises, then the Student Government offices open to anyone who may wish to view democracy in action or to become active in the same?

At first glance, yes, that cherished document, a symbol of student participation in the government affairs of university, clearly states that any qualified student may run for office in his or her respective college. And, in the Ten, subsections C, the student is granted the right to attend Senate meetings. If that is not clearly government in the sunshine?

It is, only if you can determine what the Senate is and what its functions are, discounting what its program is proposed to be. Student Government as constructed and operated is a mine of bureaucracy—true to the tradition of our great State, not to mention the Nation. Divided into too many separate entities, this confederation strives while the Executive and Legislative branches try to go one way, the Village Center another, the Education Inter-Fraternity Council and the various assortment of Presidents, Governors, secretaries, and those privileged to find and talk to the Student Government President seem to plan along oblivious to any coordination of efforts. If these statements strike strong, may I be advised for any student to offer his or her time and experience to the vision of the University and attempt to gain an appointive status. It is my personal opinion that Student Government is overloaded with warm bodies and capable people who enjoy work.

Due to personal experience, it is the opinion of this author that the only way in which an activist student might reach the framework of Student Government is to run as a write-in candidate. It is difficult to volunteer for an appointive status. As you walk through the second floor of the Library-Resources Building, take notice of the Student Government Offices. You will rarely find the doors open.

Please Return

Dear Editor:

On Friday, January 9, 1970, I lost a starr that was a Christmas present from someone very dear to me—my boyfriend—and the loss hurt deeply. I am willing to pay a reward—no one who has seen this虽然—will find the starr. I will give it back. It is a very large, square, multi-colored silk scarf chieftain in blue and gold, and last but not least, a name for which no one can be caught.

FOU is Still Nick-Nameless

The Student Government's Mascot Committee is open for business again, and WFTU remains nick-nameless. The half dozen, or so names that were submitted by the committee this week were not acceptable. Apparitions and suggestions were sent back with the suggestion that a name be suggested to the committee. The committee was not satisfied, and Milligan was quoted as saying, "I think we can do better than WFTU." Perhaps the committee is not one of the final recommendations of the committee.

The FuTUre will be pleased to accept any new suggested mascot names. New names are due by February 10. When a new list is compiled, it will be presented to the Student Government in turn, will select three names to be placed before the university for a campus-wide vote.

Kilbride Grieved
By Biafra Situation

By CHAS VAN OMER
The first pronouncement film servant Father Kilbride was that the situation in Biafra was indescribably sad. Father Kilbride appeared at the Science Auditorium last Friday, January 23 to tell of his experience during the 18 days he had spent there. These were the final days of the area that once was the country of Biafra.

Father Kilbride's mood was somber, or as he described it, "like a person at the grave of 2,000,000 people. He was saddened, too, by the fate of the natives. He related that there was shelling on three fronts sending the refugees to encampment. These people had been without food of any kind for two to three weeks. On his way to the airport, Father Kilbride picked up a hitchiker, a young man of about 20. Due to his emaciated condition appeared to be 50 or 60. This young man told him that he hadn't eaten any solid food for weeks. Father Kilbride gave him some packs of salt. That was all that he could give him. The youngster was dumbfounded and said that it would be impossible to try to describe the situation where the United States concerns two urgent needs in the settlement of the dispute. The first action that he requests of the country is that a group of observers be sent in immediately. He asks that they not be military experts, who are usually the heroes of the situation and apparently unsympathetic. Instead he wishes that 30 to 100 photographers would be available to enter the war zone to give a clear, objective report of the situation. His reason is that the first reports by four London observers had noted that no atrocities or acts of genocide had been committed. Father Kilbride does not blame them for their lack of investigation because they had no knowledge of the geography. They were only allowed to examine the area surrounding the Biafra. More recent reports depict the extent of atrocities. He asks that the Department despatched the largest report.

Father Kilbride's second request is that the United States be designated to the area. The acts of looting, murder and destruction of Biafra would be impossible to describe if food and medical supplies could reach the Biafra. The Nigerian Red Cross is not rushing in food. Two weeks after food had been delivered, the Biafrans still have no food. They are at the point of death. No rice, no food, for two million people will be fatal.

The reason for the lack of aid is that the United States does not recognize the Nigerians and the Biafrans. The Biafrans declared independence in November 1966 when Modern Nigeria in the North declared its rule over the area. The Biafrans, who are a minority, drove them into the area known as Biafra. The Biafrans proceeded to bomb the hospitals and strafe the refugees. These appeared to be the reasons why the United States is not deciding to aid the Biafrans. The sentiment of one American is that we should leave this matter alone. We will be massacred. We would rather suffer the consequences of the battle-field. They now feel that their sufferings are only being endured due to the situation from which the Biafrans will begin a program of selective genocide. Every other of the well-educated people.

Father Kilbride charged that the situation is completely handled by Whitehall and the State Department. It has made the observation that in Owerri people are dying of starvation. The United States has not been allowed to see this country. Father Kilbride was also incensed by the inaction of the United States as it pertains to sending help to Biafra, and stood by while the fate of the Biafrans was decided. "Father Kilbride said, "We have to hear him denounce the war," Father Kilbride said, "The U.N., however, considered the matter of a domestic affair. It is Father Kilbride's opinion that the United States should have intervened through the General Assembly much sooner brought the conflict to the conference table."

Oil companies were denounced by Father Kilbride for their involvement. He charged that there was money from oil companies in Nigerian coffers, indicating that they were financing the war. Father Kilbride also alleged that Biafra is a cash economy, to him: "Some days, Father, we don't even know if we will be able to sell one country in our country." It seemed ironic to Father Kilbride that three people had such a terrible loss of life in the wealthiest part of Africa.

The Biafran Mission of 14 years is at an end. Father Kilbride appeared with the great sadness. Father Kilbride appared at the Science Auditorium last Friday, January 23 to tell of his experience during the 18 days he had spent there. These were the final days of the area that once was the country of Biafra.

Bill Zucca Spins at 100 R.P.M.s

Bill Zucca, FTU freshman, seems to be 100 miles away as he enjoys a record from his vast collection of 78 r.p.m.

McCartney and got his manager. This had to do with McCartney's alleged death, "I think that it's a good publicity stunt," Bill said. "Forty years from now I hope to read in their memories how they put the whole thing together."

It is probably obvious that Bill is a Communications major. He is interested in historic radio. For a term project for HFT 140, he did a study of the musical programs of the twenties. On the technical aspect of this interest, he is fixing up two old radios in his room in the dorm. He would like to get up an internets for them because they are not used as they are in the newer models.

In a film class instructed by W. B. Myers, Bill shot a film called "Rooftops Under the Sun." It began with the credits pasted on the Village Line & Stock of Charleston, and project the good quality in the playback equipment has a system which

The last of his collection is a record of the twenties. Bill doesn't know how it was recorded, but he prefers original recordings, Bill often has to go down the street to touch with five big collectors in the Old City. The one who is the principal of Evans High School, Frangus has a collection of 20 records of a jazz show on WHIO PM every night at ten o'clock. But Zucca does not limit his music to the classics. In the latter category he prefers Bach and Mozart. He mentioned a nocturne in waltz

Citation was presented at the University-based organizations which have indicated their interest in purchasing a page in the 1970 Edition of the Pegasus must sign the contract sometime this week (ending February 6, 1970). The contract will be signed in the Pegasus office in the Village Center (Rm. 155). Bills may also be paid at this time, but must be paid by the end of the quarter (March 19, 1970).

Anyone interested in sending a card to FTU Photo Editor Chuck Smith can address them to the Medical University of South Carolina, Room 619W, Charleston, S.C. Chuck is in Charleston undergoing treatment for a disease of the lymph system. His father reports that Chuck is responding and should be home next month.

Bill Zucca, FTU, is a member of the Broadcast Class of 1970. He is involved in the Young Democrats, an organization which he helped form. He feels that all colleges should have representatives of all political parties in order to speak for all of the students. "It shouldn't be a party loyalty situation," he clarified, "You should follow your principles before your party." He combined the Montmorion as a proper form of
THE football techniques might not be the best, but you'll have to admit this team is in the best shape of any fielded by FTU thus far. Actually, these young ladies are practicing for the new intramural Powderpuff Football derby, being conducted on campus, laid the quarterback to the center, "Don't hike the ball so fast, you'll break a fingernail."

PI K E To Sponsor Invitational Basketball

BY LINDA METTEL

The First Annual Pi Kappa Epsilon Invitational Basketball Tournament will be held February 7, 9 and 11 at the College of Orlando gymnasium. The sports event will be highlighted by a three-day basketball tournament with six FTU fraternities and one frat each from Seminole Junior College and Valencia Junior College. Fraternities participating are Sigma Alpha, Chi Alpha, Tau Upsilon Alpha, Pi Kappa Epsilon, Kappa Alpha Sigma, Phi Chi Omicron (VSC) and Delta Beta Pi (KSC).

On February 7 games will be held from 5–11 p.m., and on February 9 and 11 from 7–11 p.m. Tickets are being sold at the Village Center, the Library and the LLRB for 35 cents each per tournament, and 35 cents at the gate. The money received from ticket sales will be used to cover equipment costs, rental of the gym, and trophies.

A first and second place trophy will be given and all students, faculty, staff, and general public are invited to attend. Panhel has been requested to sponsor two women's basketball teams for a game between the two playoff-game winners on February 11. In addition to this, there will be entertainment between games and refreshments will be available through Pi Kappa Epsilon.

Men's basketball entry deadline is February 9. Teams can have no more than 16 game players and at least three non-students.

Volleyball Teams Take Early Leads

BY JEFF PIPPIN

Volleyball competition began in earnest last week with a full slate of 16 games. There are 22 teams participating in the league consisting of eight fraternity squads in the fraternity league, and seven teams in each of the Independent Black and Gold Leagues.

In the fraternity league, three teams have taken the early lead with 2-0 records. Tau Upsilon Alpha and XA-1 for their two victories, while Pi Kappa Epsilon defeating EMP and SSX. Following close behind are Alpha Xi and KAS with 1-1 charts.

The Roadrunners have taken sole possession of first place in the Independent Black league also with a 2-0 slate, their wins coming over the Group and Faculty-staff.

F SPORTS U

The limited action over in the Independent Gold League saw the Psychology–Faculty team defeat Tau Upsilon Alpha while Pi Kappa Epsilon III lost to Beta Beta Sigma and CC was over XRA.

Wednesday's Results:

TAU I 2-0
PAX 2-0
SSX 2-0
XA 1-1
KA 1-1
SA 2-0
EMP 0-2
TKE 0-2

Women's Powderpuff football began play last Monday with six teams competing including the Teks, Tuffens, Beta Betas, Lake Sisters, Dippopotes, and Gabriel's Girls. All football action takes place on the golf-driving range behind the LLRB.

Tech To Participate In Basketball Tourney

Florida Tech will participate in the 1970 Cerebral Palsy Invitational Basketball Tournament January 30 through February 1. This event is being brought about by a joint effort of the United Cerebral Palsy and the Florida Technological University Basketball Club Program, for the benefit of the 750 Telethon.

The Tourney will be held at the Davis Armory for tonight and Sunday's rounds and tomorrow night's round of games will be played at the College of Orlando gymnasium. Admission is a donation to the Telethon and the amount is entirely optional.

Colleges and groups participating in the Tournament are FTU, Freshmen, Moore Painting of Orlando, the Orlando Gator, Whirlwind Appliances of Winter Park, AVO Fraternity of the University of Florida, TRP Fraternity of the University of Florida, Embry Riddle Aeronautical Institute of Daytona, and St. Vincent De Paul Seminary of West Palm Beach.

The Tech Freshman will play Moore Painting of Orlando today at 3:30 p.m. at the Davis Armory.

Tech Dribblers Bounce Back

By JEFF PIPPIN

Sports Editor

Florida Tech's basketball teams came back after its first defeat last week to trample an outclassed McCoy Air Force Base squad 99-65 last Friday night. "This was probably our best game," commented Coach Clark, "and the guys really came back from that loss." I was really proud of Bob Jenkins, he hustled and rebounded like he came to play although he didn't score a point."

Mike Clark led all scorers with 30 home and 20 points while Bob Phillips added 25. "Phillips is always getting better, just ask him. And Mike, well I think he came from pretty good stock."

This game was a complete reversal of last week, when Tech had 34 turnovers and some cold shooting. "Phillips hit three quick baskets in the early going and broke a tight game," related Clark, "then we went off and running."

"We're right on schedule for a healthy future with Jesse, Phillips and Machin, sophomores, and Clark, a freshman."

Men's team tennis tournaments will begin play in a few weeks, but the first entry is February 2. Teams will consist of four individuals – two singles and two doubles. The individual singles tournaments will begin after the team events.

Women's singles tournament entry deadline is also February 2. Contact intramural director Ken Hines for full details.

With an expression like the one on Coach "Torchy" Clark's face, it makes you wonder what's going on out on the court and wish you had been there to see it.
The past, present, and future all have their place this month, as evidenced by the events and opportunities mentioned in this issue of the Florida Times-Union. The Phi Delta Theta fraternity will host International Month, featuring speakers and programs from around the world, including panellists from the Order of Blue Keys. The Women's Panhellenic Council will host its annual Valentine's Dance, featuring local bands and a variety of dance music. The Sigma Chi fraternity will hold its annual fishing trip, providing members with a chance to bond and enjoy the outdoors.

The Choral Club of Florida will be performing at the TAU Fairy Tale Ball, with proceeds going to charity. The Phi Kappa Tau sorority will host a rush party for interested students, withPhi Delta Theta will be having a rush event of their own. The Interfraternity Council will be having a rush event, as well as a recruitment event for interested students.

The Florida Tech football team will be playing against the University of Miami, with gates expected to be at full attendance. The Phi Delta Theta fraternity will be holding a |event that includes a talent show and a pajama party for the children. The Interfraternity Council will be holding a rush event for interested students.

The Sigma Chi fraternity will be holding a rush event, as well as a recruitment event for interested students. The Phi Delta Theta fraternity will be holding a rush event, with events including a talent show and a pajama party for the children. The Interfraternity Council will be holding a rush event for interested students.

Florida Technological University is one of the newest campuses in the Florida system and also one of the most diverse in the area of architecture. It also has the distinction of being designed by a medley of different architects rather than one set firm. This is in itself not had as long as

each individual effort by the respective participating architects is excellent and counterbalanced with other examples that have been drawn up and put into effect. Whether we are conscious of it or

not, architecture dominates every aspect of our daily lives. We live in, eat in, as in, pace our rooms around it, and are visually, emotionally stimulated, or even repelled by it. For these reasons plus many others the campus architecture is important. It is important for learning is fundamental to a campus being created and all factors must contribute to the perpetuation of that atmosphere.

Next the question is, "Does the architecture at FTU convey the image it should?" The answers are both yes and no. In one of the preceding paragraphs I noted that it seemed to a group of architects rather than one consulting firm that the present and future image of FTU. Restating again that this is not but a matter of the question of excellence and I believe the critical factor is the point that the style on the campus is not uniform; it combines both good and bad in every sense and

of times is very disruptive. First, let us look at some of the combined good points as well as the poor ones. For example, the General Classroom Building. Here is one of the more awesome buildings on the campus and one of the most hap hazard in overall design. And one of the more obvious1

issues is that the campus is not used in the best way. The apparent lack of conformity of the entrances (there are four) is a facet that many will agree on. It is peculiar that a building should have different types of entrances, none of which, are particularly suited for the building to which they are incorporated.

On that basis it could be termed a very poor example of architecture but the individual must also look at the incident before making an overall judgment. And the General Classroom Building scores well here. The floor plan is very good, space is utilized well, and it might be what is called utilitarian in the idea of practical use. There is also harmony, and many poorly designed areas for study within the circumference of the hallways that facilitate study.

The last factor is solely lacking in many of the other buildings on campus so here we can look back again to the purpose of the campus’s facility in which the constructions and lighting is poor. I believe this is for this reason, exclusive of the building not to be incorporated in these areas that the General Classroom Building scores well—it is a building that fulfills that purpose very well in the pursuit of learning.

LITTLE MAN ON CAMPUS

"But if I admit to errors on a couple of these questions I raise your grade. - Then门诊 see the principle of evaluation that comes in here an challenges in this test."

Administration Building
To Be Ready By March 1

The Administration Building will be completed by March 1 deadline—except for the glass, Mr. J. F. Schrockroeder, Director of Campus Planning, explained that a mistake was made when the glass for the windows was ordered, and he does not know when the correct glass—a special golden reflective type, as in a one-way mirror—will arrive.

The front of the Administration Building faces north—the future fountain—will be the rear. Mr. Schrockroeder estimates that the fountain should be completed by April. Its potteries will be in the center where there is now a Cypress pipe, but the water flow will reach and cover the bottom steps of the surrounding sidewalk. Theolding concrete areas, which have circular dirt centers, will have rays of beams, each the same color as the Administration Building extending from their center. The present dirt center will be landscaped.

As one enters the Administration Building from the front entrance, he finds himself immediately on the second floor. Facing the front doors is a small information booth of dark wood.

There is a huge stairway just beyond the information booth that leads down to the first floor and the lobby area. The stairway faces a huge pillar of black slate which is the elevator shaft. The elevator doors face the rear entrance. To the left of the stairway is the cashier's office—where the office will have a two-way mirror. The office will be the center and the building will be divided.

The entire first floor—which is below in the front of the building, but which is level with the ground in the rear—is given over to a classroom space. There are test rooms, interview rooms, and conference rooms. There is a pair of rooms with a one-way mirror between them, One room will be used by a psychologist for observation of the person of persons in the other room.

The faculty offices are on the second floor, and the mazes of the General Classroom Building cannot be compared with the rooms and rooms of the Administration Building. Around every corner is another suite with more offices in it. There are also conference rooms and laboratory-like facilities that could be maintenance rooms.

The third and top floor is given to the President and the Administration offices. The President's suite has a balcony that overlooks the rear entrance and the fountain. The suite contains the secretarial office, the President's office, a bathroom, a kitchenette and a semi-conference room which can be divided.

The work on the first and second floors is proceeding rapidly, but the third floor still needs much work. Lighting has not yet been installed. One of the construction workers, who was in the expected the building to be finished, replied, "In the near future..."

The new Administration Building in its final phases before completion, early in March. The name of the university will be put on the low, flat platform at the front of the building.

WRA Sponsors Varied Events

The FTU Women's Residence Association recently announced a schedule of events to be presented under its sponsorship. All students are invited to attend any of these presentations and there will be no admission charge.

January 17, 8:00 p.m. Rev. Dr. John T. Schaff, St. Louis, Mo., "Music of the Ages," Florida Technological University, Administration auditorium.

February 19, 8:00 p.m. T. K. Society, "The Man in the Mirror," Harry Lehner, Sr. Dormitory auditorium.

March 19, 8:00 p.m. Dr. Z. M. Eisenbraun, "The Man in the Mirror," St. Louis, Mo., "Music of the Ages," Florida Technological University, Administration auditorium.

April 19, 8:00 p.m. Mrs. H. E. Schrockroeder, "The Man in the Mirror," Harry Lehner, Sr. Dormitory auditorium.

May 19, 8:00 p.m. Mr. J. F. Schrockroeder, "The Man in the Mirror," St. Louis, Mo., "Music of the Ages," Florida Technological University, Administration auditorium.

Activity Calendar

MONDAY

February 2

Tues Meeting 6-11:00 p.m., 1200 S. L. R. 237

Circle K Meeting 7:00 p.m., B-19

Tuesday's meeting is listed as a special meeting. A number of students have asked if they could have the meaning of their demonstration tests interpreted for them. For this purpose, a special test interpretation service has been set up in which a student individually meets with a counselor to understand the meaning of his scores in relation to his vocational objective, major, and performance in courses.

A student has only to call (272-2121) or stop by the Developmental Center (Dorn C) to make an individual appointment for this service.
