Arrest of Students Will Be Challenged

Last weekend 13 young men and women and their dates were arrested at a drinking party near Osceola. One was charged with contributing to the delinquency of minors, and the rest were charged with possession of alcohol by minors. Most of those people are students at FTU, and ten of the men are Chi Alpha brothers, and two are pledges. However, according to a Chi Alpha officer, this was not a fraternity party. "It was the result of a Chi Alpha cookout cancelled by the weather, and was on the private property of one of the brothers' uncle."

The group was arrested by Constable Chester Boyd, and will be tried on February 24, before Judge John Mahaffy. Judge Mahaffy is also a professor of business administration at FTU. "The Chi Alpha officer stated that "The police handled the situation very poorly. The students were not even informed of their rights." The defendants have lawyers, and the XA officer and they were hoping the case would be dismissed because "they were done a gross injustice."

XA has been meeting with Dean Proctor, the dean of men, and the XA officer states, "Hopefully, Dean Proctor will treat us fairly."

We Live in the Present, By the Past, for the...

A long-standing FTU prayer was answered this week when it learned that the State Department of Transportation has approved the installation of a stop light at the corner of East Highway 50 and Alafaya Trail.

The corner is most heavily used by students on their way to and from the campus and has been the scene of numerous accidents in the past.

The state transportation department had delayed the placement of a light at the intersection until a survey of its use was taken.

Furthermore, the survey showed just how much traffic flowed through the intersection, because DOT sent a letter to FTU Vice President for Business Affairs, John Phillip George explaining that the signal would be in place within two months.

Tech has also been trying to convince the state that Alafaya should be widened to four lanes of traffic. Again the hangup has been that there was insufficient travel on the roads to justify it.

The survey at the intersection may change some minds in Tallahassee.

A MODERN Romeo is Skip Vandyne the other night when he tried to attract the attention of an unseen Juliet, Skip started clambering up the wall like a human fly. Halfway up, he groaned, "She'd better be beautiful."

Student Busted On Acid Charge

An FTU student from Chubbota was arrested last week in his Seminole County apartment and charged with possession of LSD. Jim David Hand was taken into custody and placed under $5,000 bail after agents from various state and local law enforcement agencies raided the apartment.

Members of the Florida Bureau of Law Enforcement, the Seminole County Sheriff's Dept., and the Orlando Police Dept., were seen searching the apartment, presumably looking for evidence that drugs were in the vicinity.

The officers said later that the apartment was being used as a supply depot for a large scale drug operation.

CAMPUS GLANCES

President and Mrs. Millican would like to personally meet as many FTU students as possible, and so on Sunday, February fourth, 10:30 a.m., they cordially invite all interested to a coffee with the President's Dining Room in the Village Center.

Morrie Eisenman is bringing Pacific Gas and Electric to Orlando. Morrie isn't an industrialist baring a large utility firm into the area, but he is a switched on young man. PG&E, as it is fondly known in underground rock circles, is a musical aggregation of renown. Maybe Morrie Eisenman will be more famous some day as one of the youngest, successful producers in the business, but right now, the 19-year-old FTU freshman from Miami doesn't have time to worry about fame. He's too busy trying to get everything ready for his first show ever on Saturday, Feb. 20th at the Orlando Sports Stadium. "It's going to be a one-night festival, not just another rock group entertaining," Morrie said, as he chaffed with his beads. Morrie dresses Mod, talks upbeat and has some definite ideas on rock festivals.

"I was sick and tired of paying $5 and $6 a ticket to listen to some group play a single, one-hour set. That's nothing but a corny promotion, and I figures I could do better."

Trying to build a better rock fest was Morrie's bag, and with $1,550 of his own and plus some money from friends who believed in him and the diminutive dynamo put together a most unusual show. PG&E will play two hours of music. In all there will be six solid hours of rock. Chans on the floor of the huge arena will be removed committees, which is comprised of area law enforcement and the university. He said that courses presently offered by the university and those offered by the institute could be interfaced, as could personnel. The needs of law enforcement haven't been realized in Central Florida," the Sociologist stated. Funds for the institute would come from a large law enforcement grant received last year by Dr. Ulvide's Department. The institute, although (Continued on Page 8)

Government In The Dark?

Con'tary to "government in the sunshine," last week's Student Government meeting approached "government in the dark," as the majority of senators pushed their boredom, ignorance of the SG constitution and Robert's Rules of Order. The problems were many.

Addendums, or one sentence statements of clarification, were tacked on to Senate bills 2-2, 2-3, and 2-4. The clarified bills should have been published, as several senators pointed out, rather than changing last minute and misinterpreting the addendums.

The correct procedure for formulating bills and statues were ignored. When a motion was made to send the statutes in question back to the Statutes and Procedure Committee (to put them in the correct form), the motion was defeated 12 to 8 on a roll-call vote.

Of course, this was an expected result, it was explained that the administration had significantly changed the original budget which SG had approved. However, both the SG Budget Committee or Senate at large had been informed of these changes.

Ignorance and haste should not be the qualities of any Student Government representative. If SG is ran on these principles this year, not only does this set a weakening precident, but when a majority of alert and aggressive senators are elected, they will spot the loopholes in bills going through now. It will then be their right and duty to correct the statue, which means completely wiping out several years of hard work and legislation. This nobody wants and it can easily be prevented.

Temporary Lots Pondered

With the great amount of construction being done on the FTU campus, the word "temporary" seems to have taken on new meaning. There are temporary sidewalks which will one day disappear as some impossible structures cover their bases; temporary roads which will probably someday become permanent roads and there are temporary parking lots...

The question is -- who knows what a temporary parking lot is and what isn't? Everything looks the same. And where there isn't? Everything looks the same. And where there 1s?

All student who are licensed radio amateurs or just interested in ham radio should contact Tom Byers either on campus or by calling 642-3674. Hopefully if enough people are interested, an amateur radio station could be set up on campus for use by licensed students during their free time.

The three greatest of the young, Romanic poets--Byron, Shelley, and Keats--will be the subjects of a seminar offered by the English Department in the spring quarter. The seminar (English 607, Section 1) will be taught by Dr. Richard Adickes, and permission of the instructor is a prerequisite. Call the department at 2922 for further information.

Gregory Tickets On Sale March 9th

Dick Gregory, comedian, author, and actor, will appear Monday night, April 6, at 8:30 p.m. in the Multi-Purpose Room. The Village Council has purchased greater seating capacity than the Science Auditorium in anticipation of Gregory's chronic success. Admission will be restricted to FTU students, faculty, and staff; because of the intensive booking, 450 to 500 seats. A nominal admission price of 50 cents may be charged, as another measure to restrict the audience of the universe.

The Village Council plans to first hold a banquet for Gregory, that will feature an introductory film about Chicago during a period of segregation. Gregory, when he is then introduced and will speak on the issues of today. His speeches are enlightening, entertaining, and of historical value.

His lecture and lecture, and his experience is definitely first-hand. Named as the man most hated by the Ku Klux Klan he quipped, "They're so out of style, they think that they are only people in the country who aren't colored using a native.

Dick Gregory is a man on a mission, who is fighting for the entire human race. He has spent more time in southern jails than anyone else. He is in the midst of his 11th book titled, "Negro," has become a best seller and his new book "Surnman's" looks as if it will be an even bigger success. His message is vital to the first-line equality in this country.

Tech's Physical Plant
Vital Part of University

The FTU Physical Plant is a campus service organization that is in charge of campus custodial matters, the grounds, maintenance, utilities, HVAC (heating, ventilation, and air-conditioning), transportation problems or keeping the gas water pressure up.

Among the Physical Plant's concerns are campus utilities and HVAC. The University campus power supply comes from three deep well water, each about 300 feet deep.

The wells are tested regularly, and reports are sent into the State Board of Health. The water is chlorinated and treated to insure purity. Campus sewage is specially treated by one of the newest methods of disposal in the United States. Rudolph G. Peruff, Assistant Director of Physical Plant, stated that because of this improved disposal system, the lakes on campus are cleaner than the others in this area.

Peruff estimates the monthly utilities bill at approximately $15,500 for gas and $4,000 for electricity. An eight-inch gas line laid under Highway 54 directly from the Florida Gas Company supplies the fuel source for the campus, although the University cannot operate on regular gas fuel if the gas supply fails. On the campus, air conditioning units supply approximately 3,000 tons of air conditioning, which is enough to air condition about 17,000 small rooms.

FTU has no generator for the entire campus, but each building that can provide enough power to maintain emergency lighting, does visually exciting, but a show clock full of pointers and ideas that you, yourself, might incorporate into your own art work. Try it before February 28th.

greek societies are on the way, or at least they are trying. After two weeks with a lack of communication, the IFC and Panhellenic Board have agreed to sponsor a Greek Week. Plans are presently in the committee slant and the work of Great events will take place during spring quarter.

Tri-K society has been super busy! The group's service program which will continue all year, is working with the Orange County Parental Home. The pledges and majors are each a "little sister" a girl who lives at the home, co-constructing the minds of the project. Tri-K helped TAU fraternity give these children a picnic on January 31.

The following Tri-K pledges will be initiated tomorrow: Linda Brown, Diana Hayes, Liz Hebert, Susan Hoblitte, Melanie Hunt, Cathy Janam, Pam McClain, Jill Stringer and Sharon Smith. Tri-K will hold a rush party for new rushes Sunday evening. This will be first activity for the new sisters.

Pledge Susan Hoblitte was recently chosen Phi Alpha Epsilon's first Sweetheart. Several Tri-K's have rings on their left hands now and are planning future weddings. Gail Taylor and Roger Cooper became engaged during fall quarter and will be married March 20. Marilyn Strouse is engaged to Tony King. They will be married in June. Sue Glover is to be married sometime later this year to Jim Stringer.

A note to all Tri-Kers: Pictures for the Muses will be taken.

Last Thursday was an eventful student - faculty - student event. As you read the first few paragraphs you are going to wonder: "Who is it?" asks the startled young lady, as Skip tries to figure out a way to make his grand entrance.

FTU Professor's Art Show
In Winter Park Exhibit

By BARRBARA R. PIETKEZ

Attention, design students! One of your professors has an art exhibit in the Winter Park Area! This is a great opportunity to see the work of Dr. Margaret Timothee Ackert, an FTU art professor. The exhibition is on the third floor of the Gables Hotel, on 1970 and First Street.

Dr. Ackert's exhibit includes works in oil, watercolor, and pastel. She has been teaching at FTU for several years and has been building a reputation as a fine artist. Her work is known for its careful attention to detail and its vibrant colors. She has received several awards for her artwork and has been featured in several art shows and publications.

The exhibition is open to the public and is free of charge. It will be on display from February 15 to March 15, 2023. Visitors are encouraged to stop by and see her work for themselves. If you're interested in learning more about Dr. Ackert's art, her exhibition, or her teaching career, please don't hesitate to ask for more information.

Please note that the exhibition is located on the third floor of the Gables Hotel, which is on 1970 and First Street. It is open from 9 am to 5 pm, Monday through Friday. We hope to see you there!
The Accent on the Individual" brought Kenneth Sylvester to FTU as an assistant professor in the College of Business Administration. He had been in business, but he believed that a person who makes him happy. Sylvester is happy in teaching. "I like to be around people, and he said, "I think that my personality is better suited to teaching."

"I try to get to know all of my students and instructors on a personal basis, naturally, then more on an individual basis. I get to know them in class by their reactions and participation. They will never go to sleep in my class," he added.

Sylvester is interested in the welfare of his students. "With the help of groups of students that I come into contact with, something can go wrong with one of them. I want them to feel free to call me."

He cited the case of one student in one of his classes who was hit broadside into contact with, something can go wrong with one of them. "I want them to feel free to call me." And he continued, "I make them happy in teaching.

"I believe that a person must do what makes him happiest."

Sylvester was a current Florida CPA candidate, looking to pass the CPA examination and therefore looking toward a P.S.D. program. He is also a member of the American Accounting Association.

A textbook concerning the principles of accounting is also a future hope. Sylvester's enthusiasm is with accounting and its administration. While in the service, he was under the Comptroller's office and attended many schools in financial, budgetary, and management analysis.

He was later associated with the General Electric Business Training Program for accountants, and with the Metropolitan Life Insurance Company's Management Training Program. With the Martin-Marietta Company of Orlando, he spent five years as a financial and budgetary specialist. This was in the area of financial controls. Sylvester was responsible for project budgets. Two years were spent with a firm performing audits and tax preparations. In addition to the audit experience, he has had twelve years of business experience, and is still actively involved with management and tax consulting in the community as a custom service.

The Newman Apostles, predominate Catholic organization on Florida University campus last week announced the opening of its student center. The center, which was opened Sunday, February 22, is planning a 3 p.m. mass, offered by Bishop Turnbull, an Orlando attorney, for a speech concerning the abuses of the state GOP and the terrible conduct of the first Republican Governor in the Sunshine State in a century. Turnbull will speak at 11 a.m. in the Science Auditorium on Monday, February 24.

According to Paul Bamforth, one of the organizers of the FTU group, "(Turnbull) is a dynamic, aggressive speaker and he has a lot of great ideas about what the State of Florida should be doing to take care of the tremendous problems facing us because we have a moral, like Claude Kirk as our Governor."

Turnbull is a former Orange County Democratic Party Chairman. He has been active in Democratic circles for many years.

Turnbull will discuss Claude R. Collette and his political policies, the newly-formed People's Club, and the current problems involved in Young Democrats, and student involvement in politics. Another major topic will be the recent attempts to raise Florida State University tuition from the present quarter fee of $150 to $175 or higher.

Concerning the topic of student involvement in politics, Miss Bamforth said, "Republicans do not feel they will be able to get any students to have a voice in political affairs and Democrats such as Turnbull, Senator Lawton Chiles, and Senator Bob Shevin have stated their feelings that students should have a voice."

According to Y.D. Club spokesman Bill Zucca and Miss Bamforth, the FTU students, faculty, and staff are a nuisance to students and students are invited to join the newly-formed People's Club. New members, FTU will have eight votes on the State Democratic Executive Committee and are members of the seven on the Beach.

Issues to be discussed and voted on at the meeting include Democratic views in the state of Florida and the filling of state offices.

What's Your Problem?

Q: I am interested in photography and would like to know if there is a darkroom on campus available for use by all students. If so, does the darkroom have an enlarger, and are the chemicals and photographic equipment supplied by the university? If not, how can I find out if the darkroom facilities can be used by students. If so, does the darkroom have an enlarger, and are the chemicals and photographic equipment supplied by the university?

A: At this time, the university does not have a darkroom that can be used by students. However, according to Bill Palmer, the photography department, which is in the Department of Instructional Media, is in the process of a graphics and photography and graphics classes, and the students in these classes will be able to use the darkroom facilities in the department. The department has added that if a student has a particular problem related to photography and developing, he will be helped to understand and improve his skills.

Anyone who has a question for the Future answer column, may mail it into the Future office, Box 36,267. Letters may be put in any campus mailbox.
A Day With Security, A Ride In the Rain

By Chris Van Orman

The Campus Security and Fire Department patrol their beat on both sides of campus. Once, Security found a man wearing black clothes and a red headband on the jogging track behind the Library. He was carrying what appeared to be a plasticoubined weapon, which he claimed was a "self-defense" device. Security continued to patrol the area, and reports came in that he was seen near the dormitories. Security officers were kept on high alert.

In the evening, the traffic conditions were reported to be very congested. Security officers monitored the traffic lights and directed vehicles to move slowly. A total of 258 traffic violations were issued, including 18 for running red lights and 141 for speeding.

Superintendent John Smith, head of the security department, said, "We're doing our best to keep things under control. It's a tough job, but we manage."

A Ride In the Rain

By Nancy Smith

"I am a detective who is responsible for investigating cases of vandalism on campus," said Mrs. Anne Gehman, a Caduceus medium who spoke at the Science Auditorium last Sunday. She recommended that the caduceus be kept in each student's possession as a symbol of strength and protection.

The attractive young woman, a well-known figure on campus, was accompanied by her assistant, who assisted her in interpreting the caduceus' meanings. The caduceus is the symbol of Mercury, the messenger of the gods, and is often associated with travel, commerce, and communication.

When speaking of herself, Mrs. Gehman expressed the audience's desire to see a raise in their Amish Memory, a very strict religious group, who are usually remembered for their hard work and sobriety.

She came to Caduceus as the result of a spiritual experience. Although she was aware of her psychic nature as a child. Now she is a medium, and has helped solve crimes, and works with doctors, as well as giving readings to individuals.

Mrs. Gehman then went on to discuss spiritualism as a "science, a religion, and a philosophy." Spiritualetempas have a plethora of theories that they generally accept, but Mrs. Gehman explained that these can be modified as new evidence requires. This she believes to be a point of spiritualism, because few religions are open to change. One of the main ideas in spiritualism is the acceptance of "infinite intelligence," which is a supreme, impersonal power, "that you could call God," said Mrs. Gehman. Spiritualists do not accept Jesus Christ as the son of God, although some accept His teachings as being universal. They also teach life after death, and "attempt to prove this through mediums." Concerning Heaven and Hell, Mrs. Gehman believes that an individual makes his own Heaven.

What It Was, Was Basketball

**FTU Five Victorious**

**Over Tough Gators**

By Jeff Pippin

In a rough-and-tumble basketball game that resembled a combination of football, wrestling, and football, the Tech Five fought off the independent Orlando Gators, 43-51, Saturday night 9:47, and ran their winning streak to 10-2.

A sparse crowd of 300 spectators witnessed one of the roughest games FTU has played this year, as elbows flared and fists flew on both sides. The tight tempo of a game contested under these conditions belongs to the officials, who were supposed to control the game.

The Gators play the AAU rules, which are vastly different from NCAA rules regarding fouls. In the Clark AAU the calling of fouls, especially on rebounds, is practically nonexistent. When the Gators began their rough play, the officials failed to make the calls and the game got out of hand as FTU had to resort to the same tactics to stay in the game.

This round in less than ten minutes of the game under these conditions shows both sides were worn down by the contact and rough play.

FTU, with the use of a full court press and timely J-Block began to pull away in the last 10 minutes to take as much as a 20 point lead at one time. Through all this, the two players fouled out, both of them Gators, but not until near the end of the contest.

High-point honors for Tech were shared by Rudy Deese and Mike Seltzer, who both scored 11, for Earl Stokes and Bob Phillips and 10 for Don Mathis.

"It's fortunately related Coach Gene Clark of FTU, "but I talked to the Gators coach after the game and he said he felt the refs were calling against his team since they were calling against us."

"We had fun playing this kind of game because the officials weren't calling the fouls so our boys were taking a beating."

The Gators were led by Engram with 5 points as the leading scorer of one of the three brothers on the team, with 11.

Tech's next game tomorrow night at 7:30 will be played at the Park High School Gymnasium at 8:30 p.m. against an as yet unidentified opponent. This is the final home game of the season for FTU, and Coach Clark is looking for a big turnout to show appreciation for the fans.

**TAU Psychoed In Volleyball**

The psychology faculty volleyball team completed an undefeated season and won an easy victory over TAU, the University Library champs. The winning team was composed of five members from the Psychology Department; Dave Abbott, James Brophy, Wayne Brown, Jack Robinson, and Philip Tell and two faculty members from the Psychology Department; Lew Brubart and Marshall Mann.

Early in the match, TAU appeared superior-confident, but by the end of the first set they were in for a serious contest. TAU was a hard fought, exciting match.

The Psychology Team appeared to gain confidence as the season progressed, as indicated by early games and comments. The tone of the comments changed from, "Are you old men really going to play?" to, "Wow, you're superior."

The best of the 21 teams entered this fall eagerly awaited next year's volleyball season. The Cardinal rule: "Better men never show their true speed."
