Black Liberation Week: Tribute to Malcolm X

Black Liberation Week, a nationwide week of tribute to Malcolm X, was represented on the FTU campus February 19 and 20. The two-day week was sponsored by the Black Student Union (BSU).

"The primary purpose behind FTU's Black Liberation Week was to hold memorial activities for a leader in the struggle for the black man's freedom and equality," said Dan Slater, President of BSU.

The group attempted to enlighten people on campus and those people interested in Malcolm X of his ideas and goals. "Over the year he has been identified with hatred and his name has been slandered to be a subversive, prejudiced individual, which is contrary to the actual truth," added Slater.

The students played records and albums recorded by Malcolm X at the Village Center Circle for interested students and people passing by. They also had paperback books by Malcolm X and other black leaders on display.

The point, according to Slater, was not to change the trend of thought, but to present a different view of the question, to be evaluated for better or worse, and to give recognition to the black leaders.

Glass Mistake Delays Opening

The completion of the administration building has been delayed from March 1 until April 15, mainly due to a mistake in the type of glass installed in the building.

The contract calls for gold-colored glass which serves as thermal insulation to cut down on a general consensus. "We will put all our ideas and thoughts under one roof and fight like hell until we reach an agreement," said one.

Turnbull talks of Gouge, Blasts Dems.

At the Young Republican Executive Board meeting, Tuesday, shortly after the bipartisan Democratic National Committeeman William Turnbull, the Chairman of the Young Republicans, and Gouge, blasted the Democrats in his speech.

In State Of Limbo

The trial which was the result of arrest made at a drinking party two weeks ago has been delayed. Thirteen young men and their dates were arrested near Oxnard and charged with possession of alcohol by minors. One was charged with contributing to the delinquency of minors. Ten of the men are Chi Alpha brothers who are pledges.

The group was to be tried on February 24, but the trial has been postponed to March 24. Two of the people arrested have paid bonds and received their release. They must leave the area and attend schools which are out of town. According to a XA officer, the entire situation is in a "limbo state, very static."
Youth's Progress

New item: Dick Schneider of Wisconsin was elected 'Greek God' for an interfraternity ball.

When I was born, my mother tossed my ears. So they lay flat. When I had aged ten years, my teeth were firmly braced and much improved. Two days later, my hair was washed.

At fourteen, I began to comb my hair twice a day. When I was aged ten years, I changed my toothpaste. At seventeen, the freckles left my skin.

Just turned nineteen, a nicely molded lad, I said goodbye to Sis and Mother; Dad decided to make a trip. Now, if a professor gives specific office hours when they were planning to return.

To our delight, we found ourselves a new professor. He was there during those hours. I cannot count the number of times that professors who do not keep their appointments, or to show up even when they lay flat. When I was a student, they didn't seem to do anything about the situation.

If you are a licensed radio person (or not), you must have the full name and address of the person (or not) to whom the letter is submitted. All names will bear the full name of the correspondent, unless otherwise specified.

The following letter was received by Walt Romanski, President of Florida State University, from President Charles N. Millican, concerning a student government decision...

Doctor Millican
The President

By Anne Lynch

(The following is the first of a two-part, in-depth article about FTU President Charles N. Millican. FutuRe reporter Anne Lynch's extensive interview with Dr. Millican not only reveals the story of the president's life, but captures many of the personality insights that may introduce the reader to the man as well as the university—Dr. president—Editor's Note

Who is Charles N. Millican? We'll know him as the president of FTU, a bustling pipe-smoking man with thinning hair and a ready smile who guides the affairs of this young university.

But, many of us have been too busy getting an education to really know the man behind the "President" sign on the door—his background, his beliefs and his aspirations for FTU.

President Charles N. Millican was born in Wilson, Arkansas. He received his BB at Union University, attended the Southern Baptist Theological Seminary, received his MA at George Peabody College, attended the University of Kentucky, and received his PhD in Business Finance at the University of Florida. He holds, in addition, an honorary doctorate awarded by Rollins College. Dr. Millican has taught at various universities and colleges, among them Union University, George Peabody College, the University of Florida, and Hardin-Simmons University. And in the administrative capacity he has held a number of posts: Assistant Dean, College of Business Administration, Hardin-Simmons University, and Dean of Business Administration University of Tennessee, Knoxville, and presently, his present position, President of Florida Technological University.

However, most of the students at FTU are aware of his long and distinguished career as a teacher, administrator, publishing writer, and active member of the community. And so it is, with the purpose of bringing the more personal aspect of President Millican before the students of FTU, that this article will be written.

President Millican spoke at length and quite openly on several subjects. Among them: the individuals who had most favorably influenced his life; on marriage to Frances Allison, the assistant registrar of FTU; on his period of teaching at Union University; "I met Dr. Millican there, Tennessee, as a freshman," he said, "I knew no one, and after I paid my first quarter's tuition and my room and board bill I had ten dollars left in my pocket and no job of any kind. So I went downtown that first afternoon I was in Jackson, to meet Mr. Nunn. For four years as an under graduate I was given counsel, and advice and guidance from this man; he almost became an uncle to me. I had worked for four years for Dunn and Bradstreet in Memphis.

I had no arrangements for a guest speaker for commencement exercises which have been made yet. The Commencement Committee, composed of university staff members and students, has not yet met, but Dr. Leslie L. Ellis, Director of Research, stated that the committee would meet sometime this week. Dr. Ellis said that at the committee meeting suggestions for a guest speaker will be made, with the list of speakers to be submitted to President Charles N. Millican for his selection.

Graduation exercises will be held at the Municipal Auditorium in Downtown Orlando. Dr. Ellis said that President Millican is planning a reception after graduation exercises, but the place for the reception has not been selected. Dr. Ellis mentioned that a group of students had planned to ask President Richard M. Nixon to be the commencement guest speaker.

Graduation exercises will be held at the Municipal Auditorium in Downtown Orlando. Dr. Ellis said that President Millican is planning a reception after graduation exercises, but the place for the reception has not been selected. Dr. Ellis mentioned that a group of students had planned to ask President Richard M. Nixon to be the commencement guest speaker.

However, Tim Ackert of student Government said that the students had arranged for a preliminary contact with President Nixon; but when Dr. C. B. Gambrell, Vice-President in charge of Academic Affairs, and Dr. W. R. Brown, Dean of Student Affairs, said that the committee preferred to handle the choice of speakers, the students did not pursue their efforts to contact President Nixon.

Financial aid and public dis-
The fraternity recently held a bottle drive in which they collected all sorts of bottles and sold them for a money raising project. You can tell spring is in the air! Sigma Chi is proud to announce the engagements of three brothers; Scott Kegarl is engaged to Theresa Lattanzio, Myron Hendry is engaged to Karri Anderson, and Glenn Crumley is engaged, and everyone is wondering about G.H.

TAU Fraternity activities have decreased somewhat in the past few weeks as the brothers have worked hard on mid-term exams in order to maintain a good G.P.A. But even through the hardships of study, the brothers have given attention to the new pledge class, smaller than the last, but showing the true pledge and TAU spirit.

Recently in sports, the TAU football team lost to the Presentation College team, 14-0. The football season was the highlight of the spring season, and it is expected to improve with the arrival of the new pledges.

The TAU Softball team is doing well, having won several games in recent weeks. The brothers are looking forward to the spring season and are set to dominate in the upcoming games.

Music Recital To Be Presented
Dr. Leonidas Sarakatsannis, pianist, will present a recital Monday evening, March 8, 1970, at 8:00 in the Science Auditorium on the Florida Technological University campus. The first half of the program will be devoted to Chopin's "Appassionata," followed by "Twelve Excerpts for the Young Pianist, (1959) by Dr. Sarakatsannis, will be followed by Liszt's "Mephisto Waltz." Following intermission Peter Harris, clarinetist, and Arpad Szomoru, cellist, will join Dr. Sarakatsannis in Brahms' "Piano Trio in A Minor" Opus 114, for clarinet, cello and piano.

"Twelve Excerpts for the Young Pianist" were composed in 1959 by Dr. Sarakatsannis of the Music Department, Florida Technological University. The Florida Composers League "Composition Award" of 1961 has been awarded to these composers for their "Twelve Excerpts for the Young Pianist." They have appeared in the Piano Quarterly, Clavier and The National Music League of New York. George Antone in Clavier comments: "Highly imaginative, the various activities, moods and musical descriptions portrayed with wit and cleverness." Frequently quite dissonant, very pianistic, the music aptly fills the individual titles. Perfect for the sophisticated, intelligent pianist learning to play music. The "Excerpts" were published by Theodore Presser.

Tech Antiques New College Five

Tech continues its winning ways this week with a dominating 11-64 win over New College of Sarasota. It was the highest score run up by the Tech quintet, and put the university's season record to 2-0.

FTU made New College old in the first half, opening up a 38-point lead at the break. FTU outscored the hapless New College cagers 31-33 in the second half, but still won the game.

High point man for FTU was Bob Phillips with 33 points and four free throw. Mike Clark tallied 21 points followed by Earl Stokes and Russ Salerno getting 13 points each.

Eight of FTU's games this season have ended in forfeits by the opposition because of NCAA rules (which the team will be using next year), in this way FTU has another eight victories for our team, giving us a 2-1-1 record, enviable in any coach's eyes.

Tech Defeats Daytona
In Best Game of Year

Closing out its home season with a flourish, the FTU basketball squad played its best game of the year, defeating a strong Daytona Beach All-Star (FTU 91-72) last Saturday night. "When you shoot well you look good and we hit as well as anybody today," lauded a pleased Coach Clark. "We beat a good club that had some fine athletes, including 6'8" center. Leading the scoring for Tech was Rudi Jessee with 25 points and Mike Clark with 24, followed by Earl Stokes at 15, and Bob Phillips accounting for 11.

"Our big people did a great job, referring to Mathis, Stokes, and Phillips," and Russ Salerno hit exceptionally well early and had his finest all around night," commented Clark. The All-Stars were paced by the 6'7" center Palmer with 19 and Davidson 17. Adding 13 was Staff and Brown tipping in 8. "We've come a long, long way since Oct. 6, when we had our first practices. It's tough to keep up with the conference, no rivals, no tournaments, no scholarships, and different gym for practices, but sometimes adversity brings in great things."

FTU finished up its first season on the road playing at New College last Tuesday and moving on to meet Fort Lauderdale Wednesday night. The Tech cagers were hoping to add to their already outstanding record of 11-2. "Yep, 11 wins and 2 losses, not to mention 5 incalculable outings, we ain't bad," exclaimed Clark. "A winning attitude is tough to establish and our boys are to be congratulated."

Don Mathis, 54, helps FTU teammate Earl Stokes sink a basket during Tech's game with the Daytona All-Stars last weekend. FTU won.

Sports Shorts

The FTU freshman basketball team recorded two more wins during the past week, including a 100-48 rout of the faculty-staff squad and a 149-73 caking of the Phi Chi Omicron team from Valencia Junior College. "Those boys just won't quit," commented head coach Dean Brown. The victorious brought the ledger to 17-16 with about eight games remaining.

In what could be termed an upset, the FTU Soccer Club tied an independent soccer club from Orlando, the Orlando Clippers, 4-4 in a practice scrimmage last week. "This was a defensive struggle because it proved we could compete," stated the coach of the independent club, Sky Deyne. "All of their people have been playing for some time and a few even competed professionally, whereas most of our boys have had little or no playing experience."

The club also had another scrimmage with the same Orlando Cloppers. Most of the action was at the Tangerine Bowl, but results were not known at press time.

Men's intramural basketball and tennis finally get under way starting Monday, March 2. Play was delayed due to the incompleteness of court facilities.

Women's intramural softball and tennis competition begins Monday, March 2. Softball games will be held on the golf-driving range north of the LRHS.

Sports Writers Needed by FuTUre

With the ever-increasing number of athletic sports and clubs at FTU, the FuTUre is in need of persons interested in sports to cover contests and games. The FuTUre has one Sports Editor, Jeff Fugale, who covers the majority of the sports events but is not able to cover everything. Anyone interested is requested to contact the FuTUre office at 2606 or come by room 153 of the Village Center.

Starrs Declared Victors
In Football Tournament

Ed. note: The following article was originally scheduled to have been printed at the end of the Fall Quarter in the Christmas issue of the FuTUre. Since the Christmas issue never materialized, the article got lost over the Christmas break.

Six teams had records impressive enough to make the tournament to determine the FTU 1969 Intramural Football Champions. There were two fraternal and four independent teams which were good enough for the tournament. The fraternities, Sigma Alpha and Chi Alpha were eliminated early as the independents took the top three places.

The teams were the Starrs, who won the championship, the Greeks, the Roadrunners, and the Bombers. There were five games played and the Starrs won three of these. The first game was a defensive struggle which saw the Starrs edge the Roadrunners 4-6, and the Roadrunners eliminate Chi Alpha 13-0.

The second day the Starrs won again, this time by 13-0 over Sigma Alpha Fraternity. In the next game no touchdowns were scored, but the Greeks won by penetration 7-6 over the Roadrunners. This set the stage for the big game to determine the championship between the Greeks and the Greeks.

The first score was made by the Greeks after successive penalties put the ball at the Starr five-yard line. On fourth down a pass from quarterback Albert Sasser to Banker Phil Alberirth was good for six points. The conversion attempt failed. On the following kickoff, the Starr offensive began to move with their passing combination of quarterback Tim Gillis and blocker John Wright, and their option run with Gillis and runningback Scott DeLune.

Big plays were a 27-yard fourth down pass from Gillis to Wright and another first down pass to end Danny Williams. The touchdown came on third down as Tim Gillis curled right to fake the option, then passed to the left corner of the end zone to John Wright who made the catch alone. The Greeks made some completions in the second half but were stopped short each time as the Starr defense, led by Bill Baggs, held. The Starrs had only eight players on their team and made only one substitution. The Starrs drove for their second touchdown in the second half as quarterback Sasser continued to connect with Wright. Other receivers were Don Mathis, John Smith, and Rex Repp. On fourth down the final score came as Gillis passed over the middle to Rex Repp and the Starrs were the 1969 Florida Tech intramural Champions.

Well, isn't that just great for the Starrs? A financial loss will round out your xen.
Beauty More Than Skin Deep
Makes Debbie An FTU Asset

By Nancy Smith

There is an adage that says "Beauty is only skin deep," but for Debbie Anderson, who was chosen FTU's Holly Queen last December, it is exactly the opposite. She is much more than skin deep, for Debbie is a of the most popular and sought-after girls on campus, winning the hearts of many students. She is a friendly girl, always ready to lend a helping hand to those in need. Debbie is a hard worker, with a bright future ahead of her.

Debbie is a 19-year-old sophomore, who transferred from the University of Florida, where she was a member of the women's basketball team. She decided to transfer to FTU because she wanted to be closer to home and to be part of a smaller community.

Debbie is involved in many activities on campus, including the Student Government Association, the National Honor Society, and the Women's Basketball Team. She is also a member of the University Honors Program, which requires her to maintain a high GPA and to participate in community service.

Debbie's favorite activity is playing basketball, which she has been doing since she was a little girl. She enjoys the challenge of competing against other teams and the feeling of accomplishment that comes with winning games. She is also a member of the Women's Basketball Team, which she considers one of the highlights of her academic career.

Debbie plans to major in Business Administration, which she hopes will lead to a successful career in the business world. She also plans to continue playing basketball, as she enjoys the teamwork and the physical challenge of the sport.

Debbie is a hard worker, and she is determined to succeed in both her academic and athletic pursuits. She is a role model for many young girls, and she hopes to inspire them to pursue their dreams and to never give up on their aspirations.

Debbie is a trueexample of what it means to be a university student. She is a hard worker, a team player, and a dedicated athlete. She has a bright future ahead of her, and she is sure to make a difference in the lives of many people.
Oscillations of the Sun As The Earth Intervenes

The Eclipse will be seen as total or nearly so (1910) in practicallly the heavily populated states of the Atlantic Coast which have about 60 million people. When the Moon is near enough to Earth so that its apparent size is greater than the Sun’s, the lunar disc can completely hide the solar disc. Then, the wide, shimmering corona can be seen.

**Only people within the shadow spot see the total eclipse, where as a lunar eclipse can be seen, weather permitting, by all people on the hemisphere facing the Moon.**

The Moon travels at 2,100 miles per hour in its orbit, and the shadow sweeps eastward across the Earth at the same speed. The Earth is spinning on its axis in the same direction as the shadow, and a town on the equator is being carried toward the east at 1,600 miles per hour. At latitude 40 degrees, the speed is 812 miles/hr., and at the poles, the rotation is zero. The latitude, therefore, influences the duration of totality.

How can the Moon cover up the Sun completely in the sky although the Sun is 400 times larger than the Moon? The Sun is also 400 times further from the Earth than the Moon. Thus, they appear of the same diameter in the sky.

The black shadow spot moves from the sunrise edge of the earth to the sunset edge in about 4 hours.

The shadow spot will be traveling across the Earth at a speed of about 1,500 miles/hr.

In 1910, the eclipse shadow spot will be about 90 miles in dia-

The shade of the next total solar eclipse that may be seen from Florida will pass directly over Orlando on August 12, 2045. The Diameter of the shadow spot will be 158 miles.

The last total solar eclipse that can be seen from wide areas of the United States will be the transcontinental eclipse of August 21, 1979.

The next total solar eclipse that can be seen from Florida will occur on June 8, 1919. The eclipsed time between this eclipse and the upcoming eclipse in 2045 is 127 years.

Another total solar eclipse will not occur over Perry, Florida for another 82 years, on March 50, 2052.

---

Tech, Students Aid In Teenage Hotline

By NANCY SMITH

There is a free telephone counseling service in the Orlando area that is especially for teenagers with problems. Teenage Hotline, phone number 644-9297, runs from 4 p.m. to midnight every night.

Sponsored by We Care, Inc., the service has been in operation since the beginning of January, and received 215 calls alone that month.

The volunteers who man the phones are not professionals or psychologists. Their main function is to give a sympathetic ear to anyone with a problem, or just needing to talk. According to Jack Kopp, an FTU student who works there, "another important function of the Hotline is to give out information."

Each volunteer has a booklet of agencies they can send people to for help with a specific problem, such as drugs, or alcoholism. No questions are asked of callers, calls are not recorded, and never are parents, or authorities notified of any problem.

Problems people call about range from drugs and smoking to parents and boyfriends. The largest percentage of calls for January were concerned with dating, boygirl relationships, and marriages, which together made up 37.2% of the calls. Drugs and smoking made up 12.8% while sex and pregnancy made up 8.4%. Unfortunately, the group is occasionally troubled by prank calls, which, according to one volunteer, "sound straight out of Ann Lowry." This added that a volunteer can usually tell a prank call by giggles and laughter in the background, those prank calls made up 3.3% of the January calls.

All volunteers are required to take a test for suitability before being accepted to work on the Hotline. The 586-question Minnesota Multiphase Personality inventory screens out volunteers who are obviously unsuited to work here. Volunteers who are accepted then take a course of 8-10 sessions, each lasting about two hours. Here the volunteers learn to listen to professionals in the fields of physical and mental health to use when referring callers elsewhere. After a volunteer completes the course, he will work 2-4 hours each week scheduled times.

Average conversation time with a caller is five minutes, but the maximum so far has been an hour. Anyone with a problem, or needing advice is encouraged to call the Hotline. Also, more volunteers are being sought for the service.

---

Saturday Spectacular
Not To Be Overlooked

AS FTU Karate Club member Gene Marshall, right, grimaces, his instructor Jim Sullivan shows how to use your head in a karate demonstration during half time of a Tech basketball game last weekend.

---

Morgue Available
To Tech Groups

Chubs, organizations, fraternal, confessional and anyone else The FTU recently compiled a morgue, a copy of every article that has ever appeared in the FTU.

The morgue is now available to FTU students and groups. If you need articles about your group for your scrapbook or collection, come by the FTU office, room 123 of the Village Center. Each copy of a story is 25 cts, and volume and issue number are requested although not required.

---

GOUGELMAN
(Continued from Page 1)

would be encouraged to join the Young Democrats, and the student would be able to set forth his views to the people that count, the State Legislature. According to schedule a group of Republican Legislators is due to visit FTU on March 8 to talk to students about their problems. Googelman commented, "I don't have enough information on the visit at present, but I expect quite a bit within the next day or two from Tallahassee."

---

TURNBULL
(Continued from Page 1)

the Electoral College was still as potent as it was when it was formed Turnbull replied "No, not nearly. It was formed in the hope of having no political parties. Needless to say that never occurred so if for no other reason the College is useless. As far as it was meant to be, but," he continued "I don't feel that it is working as it was meant to feel that with a few modifications it could provide a meaningful vote and its voters well."

Bill Zara, president of the Young Democrats, closed the session by saying that he felt "Our (the Young Democrats) direction is clear. We need to find a direction. We are lacking a purpose and we must find one, now."

The Young Democrats are planning several such speakers in the future.
Coffee House Established

A coffee house is being established at the Park Lake Presbyterian Church on the corner of Highland Avenue and Colonial Drive. The Third Floor will open until 11 a.m. Students are invited.

There will be a Speaker’s Dialogue Room given to a prominent person for a discussion with visitors. Dr. Silver will speak on narcotics tonight. Another room will be given to local entertainment, dancing and socializing.

Admission is 55 cts., a head, and coffee will be sold for a nominal sum. The group sponsoring the coffee house hopes to break even on the project.

Persons are needed for the staff and anyone interested is requested to contact Lloyd Haxton, a senior student at Valencia Junior College who is the chairman.

You will receive a warning by mail.

Underground tunnels should be avoided at all costs.

This is a sample of the FTU’s first graduation announcements. Student Government is giving each senior 10 of these at no cost. Others may now be ordered in the bookstore.
