Knights Get Mascot Bid

After running the final mascot vote for over two days, the Knights of Pegasus received the most votes and are now the FTU mascot. A total of 15 cents was cast.

Tonight at 8 pm the FTU basketball team plays Patrick Air Force Base at the Osaka High School gym. President Charles N. Millican will perform the official unveiling of the new mascot at half-time.

A plaque and $50 will be given to the head cheerleader who submitted the winning mascot name. A plaque and $25 will be given to the person who submitted the runner-up mascot name. The recognition will be given to the eight semifinalists who submitted names of the mascot. A plaque will be awarded to the second and third place winners of outstanding group effort. The Outstanding Group Effort Award trophy will be given to the organization on campus which did the most to promote a mascot.

The cheerleaders were working on a cheer for the new mascot, which will be shouted for the first time when the FTU basketball team starts to play the second half of the game against Patrick Air Force Base.

The contest to select this mascot actually began last July, when the Plan-B committee was involved in collecting suggestions. The committee was comprised of a staff member, the president of the student body, the president of the student senate, the president of the junior class, the president of the senior class, the president of the intramural athletics committee and the president of the intramural athletics women's committee.

The selection of a committee comprised of the above individuals was made by the president of the university.

The contest was designed to select a mascot name for the university. The story contained a plea from President Millican for ideas on how the selection of a mascot could be improved.

The End of the Beginning

It took seven years of planning and over two years of operation for Florida Technological University to be recognized as being successful in its intentions—to become a fully accredited state institution. This word “accreditation” has come to mean a great deal to many people and has a lot of influence over the actions of many. If we might hazard an opinion, to President Milan he probably represents a dream come true—something he has been striving for and planning for over seven years. To the original FTU student body, it probably represents a huge sigh of relief. To the Greek organizations, it represents national status. Accreditation will allow the University to rise from its position on the brink of official existence to one as the newest member of this state’s highest academic system.

This is the last large step in the judgment of the conditions of this university. Before the only way to go was up but from now on, we must not only gain position but maintain it as well. We have to keep growing the university in worthy of accredited status in the eyes of the academic world. But the constant pressure is off since the greatest goal envisioned by this university is behind us now. We must not forget the overall goal of “accent on excellence” just because we've made it. That phrase and the university's focus on it helped get FTU accredited. To feel relieved of the responsibility of that ideal now that this institution is officially recognized would be a grave mistake. Now however, the goals of this university will be determined in degrees of excellence rather than in official proof of it.

Will Anything Change?

This past week has brought two major honors to FTU—two things we have been anticipating since the beginning.

Wednesday morning brought the official announcement of accreditation. And now after a long wait, we have a mascot. It may or may not be the one you wanted, but it's official. It seems rather a shame that only approximately 20% of those eligible to vote were able to make such an important decision. But they did.

Whoever practices art is a majority. And the majority always gets its way.

Will the naming of a mascot have any effect on the University? That seems rather a shame that only approximately 20% of those eligible to vote were able to make such an important decision. But they did. Is it supposed to create school spirit and identification overnight? Does it all of a sudden make everyone feel concern and interest? Will it make the students feel well-represented? Possibly. Is it supposed to create school spirit and identification overnight? Does it all of a sudden make everyone feel concern and interest? Will it make the students feel well-represented? Possibly.

The Miami Elevator company has delivered numerous CARE packages all of which we have refused, on account of principle. To hell with CARE packages, either toss us a mattress or let us out of our cubicle now.

Walking Suggested

Dear Editor:

This is a complaint. We feel it is our solemn duty to warn unsuspecting students of the perils involved in making a journey on the library elevators.

First of all, the elevators are suspiciously designed for efficient, speedy, non-exhaustive travel. It is quite obvious that the elevator was designed to move the trip between the 4th and 3rd floors, going down. (You don't even have to overcome gravity.) And, it is surprising how exhausting and energy-sapping a five-minute trip in a subdued, bouncing metal box can be.

Anyone who frequents the LRB has heard the plaintive sound of the last bells in the elevators, pushing on the alarm buttons. If this cannot be remedied, we firmly advise all students to take heed of our warning.

Media Questioned

Dear Editor,

It seems rather a shame that only approximately 20% of those eligible to vote were able to make such an important decision. But they did. Is it supposed to create school spirit and identification overnight? Does it all of a sudden make everyone feel concern and interest? Will it make the students feel well-represented? Possibly.

A specific example is that of the recent arrest of two FTU students which was deemed of such importance that it made front page news of the most recent issue (Nov. 20, 1970) of our school newspaper. Not only was it front page news, but it contained many untruths and parts of the story were merely hearsay. When questioned about their sources of information, the FTU staff said the story was a copy of that from The Sentinel. Our question is if this is the way our University newspaper is supposed to screen such information prior to publication, how can students be Business Manager Henry Popkin, who is responsible for the publishing stories containing specifics which will be read as factual word, in fact, these untruths.

Further, it is the last large step in the judgment of the conditions of this university. Before the only way to go was up but from now on, we must not only gain position but maintain it as well. We have to keep growing the university in worthy of accredited status in the eyes of the academic world. But the constant pressure is off since the greatest goal envisioned by this university is behind us now. We must not forget the overall goal of “accent on excellence” just because we've made it. Expansion Forecasted

In FTU's Continuing Education program the number of credit hours earned has doubled from a year ago, Dr. Robert H. Humphrey, the Dean of Continuing Education, is very optimistic on the future expansion and development of the program.

Continuing Education consists of the following courses offered by FTU to the people of Orange, Seminole, Lake, Osceola, Volusia, and Brevard Counties, with offices in Daytona Beach and Cocoa.

Constable Rob Harrison, of District One, Orange County, is instituting a "Safe and Courteous Driver Program" during the holiday season. He is asking that if a driver is observed in an act of courtesy to another driver or pedestrian, the license tag number of the courteous driver be obtained and forwarded to Constable Harrison's Office. The Courteous Driver will receive an Orange County Courthouse, an "Arise Alive" license plate for December. The person forwarding the information can also get a free license tag number should also state communicating his act of the good deed done by the courtesy driver.

Munching on a turkey sandwich for the 9th day in a row, I am appalled at the stark nakedness of my Christmas tree as it stands in the corner, barely visible peeking over the top of a humongous pile of evergreen needles. Ahh yes, Christmas once again is near!!

With a blessed sigh of relief, I pay the final time payment from LAST Christmas. I brood through the piano needle to the phone and place a collect call to "Smiling Shriver's Loan Company." As in the past, Mr. Cratchet answers the phone with a cheery but business-like "HILLO SUCKERS," completely shattering my Christmas spirit (but I can purchase more at the local liquor store). After arranging a 4th meeting on my home, posting all my stocks and bonds, and relinquishing all claims on my wife and daughter, he assures me the twenty five dollars is in the mail.

Donning my gay apparel, tensor pants, pointed patent leather boots, white lace shirt and flowing green satin scarf, I "dash" through the falling autumn sun to the bus stop and thumb a ride to "Big Bert's Super Basement" to buy some Christmas presents. Selling my Bowie knife, I cut a path through a wall of human flesh, dragging my canoe behind me. I grab my gift list that I have conveniently written on an adding machine tape (both sides), and follow my nose to the perfume counter. There I purchase 3 gallon s of all the females and one or two of the males on my list. I still have $22.50 left. I find a picturesque, expensive looking Mug. Even Scrooge himself could not make 49 cents go so far. Isn't Christmas wonderful!!!

Having satisfied all my Christmas obligations, I now, in the true spirit of the holidays, beat up a Salvation Army Bell Ringer; my boots, white lace shirt and flowing green satin scarf, I

Sight Saving Plan To Aid University

Jack Fightmaster wants to thank some students and faculty at FTU. It's not really for FTU who thanks Fightmaster.

Fightmaster went to the PTU Developmental Center for help, and through the efforts of local rehabilitation agencies, he attended Valencia junior college, before transferring here this fall to the University of Florida.

Fightmaster has plans to put the tapes he has become familiar with but have not been able to use due to sight impairment.

Fightmaster wanted to thank Moore, Walker, Glenn Veluz from the Newman Center and many other students whose voices I have become familiar with but have never met. Without them, I probably would not be in school.

Fightmaster says he wants to help and be a happy, productive and an "ideally educated" man.

The Educated Man - Who Can He Be?

The following is in a series of articles presenting different colleges' views of the truly educated man. Here is Dean of Natural Sciences, Ralph Palmer Hall.

The "ideally educated" man is one who has acquired the knowledge and skills necessary to be a happy, productive, and informed member of society.

He is, we are saying, the "whole man" relative to the world in which he has to live and will find himself.

It has been noted that the developers of FTU's Environmental Studies program

First of all, clearly in mind when they specified that, "Each person earning a bachelor's degree at this university should be required to prepare himself to live and work in a number of environments (e.g., rural and urban, physical, political, social, and technological)."

Secondly, it is with the same kind of concern that we come to the development of the "ideally educated man.

Campus Glances

There will be a meeting of all prospective chess players today at 11:15 am in R.D. Hunter's office. Prospects must have their Senior Life Reading badge

The purpose of this meeting is to arrange for each player to commit to a program and according to program chairman, Jim Thomas, the bill may be withdrawn.

Miss Fonda was scheduled to complete her course in February. In spite of her heavy schedule, she arranged in Boston had received dates for her FTU appearance.

The VC staff have discussed the fact that Miss Fonda offered her opinions on the Vietnam war and the American Indians yet was no authority.

That had been countered successfully by others who thought that Miss Fonda could encourage FTU students to begin thinking and talking, and that she would be a much better who FTU had sponsored in the past.

The bill was referred to committee for discussion. He said the bill will be withdrawn in favor of bringing Joan Baez or Ralph Nader to FTU.

Time of the Signs

Locations for the posting of student signs on campus have been announced. Announcements are restricted to designated areas inside and outside campus buildings, but they cannot be hung from or attached to buildings, shrubbery, trees, or drawn on sidewalks, walls, or buildings.

Announcements may be posted on the glass doors of the Science Building, and on the "A" frame board within the lobbies. Students should use Dr. Gramme Baker for instructions about posting notices.

There is one "A" frame signboard to be located between the Science and Engineering Buildings for the posting of announcements.

The doors and the glass areas in the lobby of the Science Auditorium are approved for posting announcements or notices.

One "A" frame signboard will also be located near the SCAUD Southwest corner.

Signs may be posted in the main lobby, the magazine area, and on the south glass partition of the fourth floor of the library, pending approval from Lynn Walker, Director of Library Services. Two "A" frame signboards, one at each end of the walkway on the south side of the library, will be erected for use.

The bulletin boards in the Classroom Building may be used to post signs. An "A" frame will be located in front of the building on the east side of the building.

Signs may be posted in the Village Center Building, next to the V.C. staff. An "A" frame signboard will be located at the north entrance of the VC, and another will be located near the entrance of the Multi-Purpose Room.

Spaces for signs in the Engineering Building have not yet been determined, but notice notification is received from Dean of Engineering Robert Kent. Signing may be posted on sign boards within classrooms. Outside "A" frame signboards will be available for signs in the number of hours a person can have signboards, one at each entrance of the Multi-Purpose Room.

There will be a meeting of all prospects for the Peace Corps Tuesday at 11:15 pm in the Science Auditorium.

NARA: Where to Now? is the subject of the Science in Human Affairs lecture Tuesday. The talk will be given at 7 pm in the Science Auditorium.

Since the Democrats haven't assumed office yet, they don't pose a problem at the moment, so the President can almost be said to have temporarily been given the opportunity to create his own problem. The Young Republicans are on the heels of a dilemma. They have found that their various representatives at a recent state committee meeting are in a severe reprimand. They permute a stiffer consequence of their non-conformity, which happened to be to the political party's will. This group is now protestating that he did not properly represent the club's wishes. The existing administration usually smells of a political power fight but the philosophical point has cropped up before and is applicable to our whole political system.

The point under discussion is this: how much authority and responsibility do we or should we give to our representatives in Congress or to our state legislators? Do we elect them with the expectation that they will exercise their own knowledge and judgment, or do we consider representatives somehow inferior to our desires? Our answer to this affects our action in many areas such as selection of government officials, deciding on legislation and meetings, the adoption of unit and binding rules for these delegates, and situations akin to the one already mentioned.

Concerning our government is generally accepted responsibility do we or should we give our elected officials? Do we think that our elected officials possess superior knowledge and experience above and beyond our own desires? We should consider whether our elected officials are capable of representing our desires. We should consider whether our elected officials are capable of representing our desires. We should consider whether our elected officials are capable of representing our desires. We should consider whether our elected officials are capable of representing our desires.

A good parent is obligated to do what he feels is best for his children. This is not always the same as what the children feel is best. The parent, however, makes his judgment out of superior knowledge and experience. The situation, admittedly, are not strictly analogous. Children do not elect their parents. But the fact that we elected officials persons does not mean that we are not concerning our government is generally accepted responsibility do we or should we give our elected officials? Do we think that our elected officials possess superior knowledge and experience above and beyond our own desires? We should consider whether our elected officials are capable of representing our desires. We should consider whether our elected officials are capable of representing our desires.

One could look closely at our form of government and ask: "What is our form of government?" What is the system we have chosen as our form of government? What is the system we have chosen as our form of government? What is the system we have chosen as our form of government?

But let us look closely at our form of government. It is a representative democracy or, in other terminology, a republic. The system was adopted because the term 'republic' represents a form of government. The system was adopted because the term 'republic' represents a form of government. The system was adopted because the term 'republic' represents a form of government. The system was adopted because the term 'republic' represents a form of government.

The republic is a form of government that is designed to be representative of the people. It is a form of government that is designed to be representative of the people. It is a form of government that is designed to be representative of the people. It is a form of government that is designed to be representative of the people.

One of the advantages of a republic is that it is a system of government that is designed to be representative of the people. It is a system of government that is designed to be representative of the people. It is a system of government that is designed to be representative of the people. It is a system of government that is designed to be representative of the people.

This week Kappa Sigma Alpha will honor its little sisters led by President Phyllis Bateman; Vice President Cheryl Suida; Treasurer Kathy Poeck; Secretary Kathy Flynn; Sergeant-at-arms Nancy Duke; and Chaplain Jan Herald. The campus girls are Shirley Bedinger, Sandie Burden, Irene Carpenter, Dee Carroll, Lennette Gusto, Lila Cunemblay, Leslie Hines, Dawn Colburn, Chris Schumenn, Linda Wolken, Jean Highsmith, Patsy Flower and Penny Trombo. These girls have been busy lately helping the brothers and pledges with a general housecleaning and repairs. We congratulate brother Paul Crawford for his appointment as new Inter-Fraternity Council Secretary.

The brothers extend their best wishes to brother Walter Wedland for his engagement to Miss Debbie Bendure, Leslie Hines, Dawn Colburn, Chris Schumenn, Linda Wolken, Jean Highsmith, Patsy Flower and Penny Trombo. These girls have been busy lately helping the brothers and pledges with a general housecleaning and repairs. We congratulate brother Paul Crawford for his appointment as new Inter-Fraternity Council Secretary.

Tri K and TAU's got together at the TAU House Friday afternoon, November 30, for lots of socializing and refreshments galore. Charlyn Rasvillie, organizer of the big event, was escorted by Paul Newman.

The following Monday, Tri K got down to business with a short business meeting. But business doesn't last long in Tri K society when a party between the sisters and pledges is waiting. The pledges, who had been instructed to come equipped with a loaf of bread, were blindfolded by the sisters and taken to the TAU house, to serenade them with songs. Thus the Tri K's went down the road to build our banner, eat our bread, laugh it up a week on Monday, November 30, we ended our football season with our record win, beating Dippoettes 46 to 6. After the big game we had dinner followed by our weekly business meeting. Our guest at the meeting was our new local Paladine advisor, Mrs. Stevens, who gave us some very worthwhile suggestions.

The past few weeks have been busy and rewarding for the brothers of Phi Alpha Epsilon. The Phi Alpha Epsilon Volleyball Team (PAE) is currently 2-1 with an important win over rival Tri K fraternity to their credit. PAE's only loss was to Tekes in the third game by only two points. There is still a good chance for PAE to win the conference and high in victory and the first team is more than eager for a rematch with PKE. PAE is also doing well in their division with only one loss out of three games thus far.

Tri K continues to lead the Phi Alpha Epsilon community in its efforts to raise money for the underprivileged. Tri K is also very active in supporting the varsity football team. The brothers and pledges expressed their concern by conducting a canned food drive throughout Orlando. At the end of the drive, the cans were collected and given to the Salvation Army who will use them in distributing among the poor. The drive was a tremendous success, and no one had any idea that they could collect so much.

The brothers of Phi Alpha Epsilon are conscious of the needs of the underprivileged of Central Florida and Saturday, Nov. 30, the brothers and pledges expressed their concern by conducting a canned food drive throughout Orlando. At the end of the drive, the cans were collected and given to the Salvation Army who will use them in distributing among the poor. The drive was a tremendous success, and no one had any idea that they could collect so much.

The Phi Alpha Epsilon will also be assisting the Salvation Army during the Christmas holidays.

All fraternities are reminded that there is an Inter Fraternity social to be held tomorrow at 1 pm at 017 Forbes Trail. Come as you are.

Road and Lots
First Phase
Of Lake Work

The Lake Claire Project construction has been started to begin this week, according to Campus Planner James F. Strother.

The work, being done by G. C. Hicks Grounds Dept., may be completed by spring quarter. There will be a dedication ceremony for the first phase of the project is finished.

A road and parking lot will be the first project to be begun by the grounds department.
In this viewing of John Dishman Senior exhibit, I was impressed. John displays a definite masculine approach throughout his works, which is very evident in his simulated stone sculptures created by sand casting in concrete. They are most effective in their serene and sculptural relationships and in using the contrast of the roughness from the concrete and the life of his abilities and even in their smoothness of the globular forms simplicity they are impressive.

The philosophy of the university has two basic tenets: first, an ACCENT ON THE INDIVIDUAL, and second, an ACCENT ON INTEGRATION. Florida Technological University is indicating its attitude toward the individual worth of the student, his vitality, his character, and his development. The phrase is page 14 of the 1970-71 Bulletin. Since its inception, this university has prided itself on the individual, scholarly and professional and it's students.

The administration, faculty, staff, and students of this institution have, I feel, made a sincere effort to achieve this philosophy, but recent events lead me to feel that a bad decision has recently been made. I refer to the conception, inception, and implementation of a final week at FTU.

The purpose of such a week, as explained to me, is to provide the student with a period of study time unimpeded by classes to concentrate on studying for final examinations. It works at other schools and hence, it has been decided to be implemented at Florida Technological University. It is my belief that this will be implemented through adequate planning, organization, and coordination of all areas affected by the decision. Unfortunately, sports fans, this has not been the case here at FTU.

Point No. 1: The finals week was tacked on to the quarter after arrangements had been made for graduation. Hence, the graduation ceremonies will be scheduled for Friday, May 1st.

Point No. 2: Probably because of Point No. 1, most upperclassmen have had their finals moved up to the last week of class, so finals week means nothing to them at all.

Point No. 3: The Auxiliary Services Department announced to resident students that since their food contract was for ten weeks only and since finals week is not covered, all resident students get to buy the food for their own food for that week.

I am not debating the validity of a finals week, nor do I blame the Auxiliary Services Department for opening within a budget worked out last summer before this all came up. What is disturbing is that after the decision was made; the planning was poor, the organization was poor, the implementation was poor, and the results have been poor. It has been decided that graduating seniors will receive "tentative" grades from their professors.

Point No. 3: Probably because of Point No. 1, most upperclassmen have had their finals moved up to the last week of class, so finals week means nothing to them at all.

This week's lecture is entitled 'Plan Sensitization,' as presented at the Winter Park High School. The speaker will be...
FTU's Mike Sterling does his thing in the secondary as he gets "all wrapped up" in game action Friday. Needless to say, FTU managed to edge Valencia 69-18. Other Matadors still can't figure this play out.

Can't Have Team: About Club?

There has been some talk recently about FTU having a football team in the future. In fact, administration officials will discuss a football team but try to pin them down on a definite date -- forget it!

Let's consider that Fact One: FTU can have a football team. Agreed, Opinion: the sooner the better.

Moving right along in Fact Two: FTU's all-star intramural flag football team took the Orlando Recreation Department 1976 Campus Cup championships over Rollins, Seminole and Valencia last Friday. By impressive scores -- 69-18 over Valencia; 50-18 over Seminole and those teams were the best the schools had to offer. All games were played under no-contact rules. Opinion: FTU fields an impressive machine Friday. Precision passing. Competitive defense. Definitely tough.

Fact number three: FTU has the facilities to hold intramural flag-football programs, as evidenced by those already in existence. Opinion: there is enough space for an FTU football club to form. Let's clear the air. A football club is a club that does not award football scholarships, does not require pads and expensive equipment, is composed of students who do not utilize athletic department funds. They play by NCAA flag-football rules, no-contact and use limited equipment. Like open, grassy football fields. And flags.

Please don't get me wrong -- I'm not advocating hiring coaches and spending non-existent funds. I'm talking about students getting together, forming a club football team, challenging other area schools to do the same. You could call it the "I-4 league." I'm sure other schools have already had this idea. Look at the championship all-star teams. These could be the nucleus for the CLUB team. What I am saying is that all we need is here. We have the students, the field, the rules, the game. Let's quit with the monkey wrenches and get with the program. What say you?

D. A. M.
The tremendous weight of the bar is expressed in the face of Nick Stone in the dead lift competition. The strain turns his face a deep shade of purple as his body searches for more power.

Tech, sporting new black and gold uniforms, led the halftime scoring 47-34. The second half was an epiphany for the Knights. The FTU scoring machine was in place of the Friday night game while Riddle tallied 27 baskets, 21 free throws, and 25 fouls.

The weightlifter has seen more than his share of foul trouble this season or as he approaches the mat knowing that in a few seconds he will either share in the happiness brought about by success or sink in the agony of defeat.

He feels slightly pressed by the onlookers, two of whom are his parents, a handful of school supporters and many teen-aged girls with a deep lust for the skin. The weightlifter has seen his competition and feels a bit uncertain as he approaches the bar. All those endless, tiring hours of practice are behind him now as he attempts to lift the weights that more than double his own poundage.

His normal breathing turns to short, heavy panting that flushes his blood cells with fresh oxygen needed for more body energy. Now he is ready. The low murmur of the fans ceases abruptly as the weightlifter curls his fingers around the bar. Now, fully relaxed he gives the weights a yank. The bar rises slowly at first as his muscles begin, and his face glows a pale violet. The silence of the crowd is broken as a permeating groan booms from the weightlifter's mouth. The lift is in the air for a success.

That's the way it was for the fifty-five collegiate weightlifters from around the state of Florida as they competed in the 1970 State D.A.R. Power Lift Championships held last Saturday, November 28 at the Winter Park YMCA.

FTU won a third place ranking behind second place F.A.U. and first place Tampa. FTU's Farrel Byrd was awarded the first place trophy for being the best lifter in the 132 pound weight class. Byrd also beat the state squat lift record in his weight class for pressing 350 pounds.

The meet, sponsored by the FTU weightlifting club, played host to the University of Florida, University of South Florida, Florida State University and weightlifting clubs from Jacksonville, Miami and Tampa.

The bench press, squat lift, and dead lift were the three events that composed the meet. The bench press requires the weightlifter to lie on a bench so the weights are positioned directly above his chest. The lifter must be able to bring the weights to his chest and back up to their original position for the lift to be good.

The squat lifts involve taking the weights in a standing position and bending the knees until the thighs are parallel to the floor. The lift must then straighten back up to a standing position.

In the dead lift, the weightlifter must raise the bar to his chest, through the floor high enough so that his back bends a bit in the backwards position.

All FTU weightlifting meets are scheduled to be held on January 12 of next year to compete in the next major state meet.

If you don't see what you want, ask for it!
Mike Clark, FTU’s top scorer last year and leading scorer so far this season, was named to the All-Tournament team last weekend in Savannah, Ga. FTU went 9-3 in the tourney, but came within a few points of beating tournament leader Charleston College.

Also named to the tournament were: Sandy Mead, (Charleston) Steve Holland (Armstrong), Rick Singer (Palm Beach Atlantic) and Rich Gibson (Charleston).

Charleston won the tournament with an 83-69 defeat of Armstrong.

Basketball

(Continued from page 9)

especially against teams averaging well over six feet, 190 pounds. FTU’s star averages about 5-11, 160 pounds.” “We definitely have put the scare into some teams,” Clark said.

Clark indicated that some of the freshman team might see action tonight. “We will,” Clark said.

One of the more spectacular interceptions was Miller’s one-handed grab coupled with a 20-yard sprint for good for FTU’s second touchdown in the second half. Mike Sterling (TIP) also snatched a pass and fumbled it, with Leland and Jacobs intercepted one-handed grab coupled with a 20-yard position in the second half. Mike Sterling (TIP) also snatched a pass and fumbled it, with Leland and Jacobs intercepted one-handed grab coupled with a 20-yard.

FTU cracked up the FTU machine again with phenomenal passing accuracy. For scores, he hit "Immortals" with a 40-yarder, Thornton with a 15-yarder. Jennings with a 15. Beard with a 25-yarder, and then to rub it in - McCarty showed the Pi Kappa Soul brothers what it all was about with a 50-yard dash into their end zone.

He finished out the day with a six yarder to Jennings. Meanwhile, the FTU defense was on its toe when Ionic defense, put it on their territory.

The playoffs are just around the corner for our girl gridiron guerrillas. It’s now, to a sports shorts.

Zales Custom Class Rings

CUSTOM CLASS RINGS

ONLY $129.00

Custom make your ring with the school name, or the hand-and-whirlwind logo, or the class year. Choose the size in your school color. Black enamel, blue enamel, or glow in the dark. Yes, we will engrave your name, too.

PLAN FOR COLLEGE

WE CAN HELP!

Check your college financial aid package before you commit, and talk with a Zales Jewelry Manager to see if you qualify. If you do, they will work with you in creating a better plan to help fit your needs, and get your ring. All at no obligation.

**Tech Driving Habits Cause Local Concern**

It seems a few driving habits displayed by Florida Tech students have caused law enforcement agencies of Osceola and Seminole County to become quite concerned. Seminole County Constable Chester Boyd has asked that in the future all FTU students traveling to campus, which netted a total of 203 suggestions.

From these five-member screening committee consisting of students selected 10 semi-finalists on the basis of originality and appropriateness. The next step was to have ten campus organizations draw one of the suggestions and support their particular mascot. The next step was to draw one of the suggestions and support their particular mascot. The next step was to draw one of the suggestions and support their particular mascot.

The court said that loss of revenue that American claimed it could not realise because of the law can't be merely speculative, but should be based on uncontested, past performances.

Judge Young ruled that the attorneys for the state refused the American's claim that the controversy amounted to more than $10,000 thereby putting the burden of proof on the printing company.

The court stated that since American did not come forward with positive proof that the loss was within the minimum limits of the federal court ($10,000), the court had no jurisdiction in the matter.

There were indications that the attorneys for American would either appeal the ruling, or file a new suit in circuit court. The 1970-71 Pepper Yearbook is scheduled to be distributed on campus next summer.

Accreditation

The report of this group has made possible concurrent approval of the Southern Association for the Commission on Colleges.

**WFTU Summarizes Achievements, Goals**

With the quarter about to come to a rapid close WFTU radio will be starting its final broadcast week of the quarter. The biggest event for the personnel of the station was when the entire operation moved down to the old computer section of the Library building from the small upstairs broadcasting area. Now the station has many broadcast booths along with a television studio that will be completed sometime after the start of next term. Another achievement for the station came when the first sporting event ever to be brought back to campus was successfully done when the FTU engineers opened the season a few weeks back. The station is now waiting official dedication ceremonies that will occur next quarter. But the main problem faced by the staff is the necessity of forming listeners. According to WFTU, the advertising policy of the station, that is to give each club and organization on campus $750 worth of advertising credit, was not put to full use. Overall though, this quarter helped to indoctrinate a total of 39 students with the procedures and workings of a radio station. The vice-chairman of the board of advisors feel that a good start has been made towards making WFTU a station that will have professional standards, with the reality of having apprentices yet qualified listeners behind the controls. As the popularity of the station picks up, the more new and different events that are on the horizon, there will be more people tuning in.

---

Dr. W. Rex Brown, Vice President of Student Affairs, stated he has been informed by Procurement that the faculty - student directories for the 1970-71 year were shipped to FTU last week from the publishers. As of publication date for this paper the directories have not yet been received.

---

Dr. Millican announced this week that NSF awarded a grant for $94,291 for the 1971 physics project, developed during the past five years at selected high schools throughout the United States. This new program presents physics in a broad cultural context. In addition to physics, students study the history, philosophy, and sociology of science, as well as astronomy.

The summer 1970 Institute at Florida Tech was attended by 53 teachers. Included were two from Canada and two from South Africa. Dr. Bolte said he has no indication at this time who will be chosen from applications submitted during the month of December and January, he added.

---

The screening committee consisted of Melissa Hurst, Jan Lorraine, Randy Tyns, Jody Mills and Paul Eccle.
