# INSTALLMENTS

NEWS YOU CAN USE FROM YOUR UCF LIBRARIES

## Database Spotlight

**SimplyMap** provides maps and reports using recent demographic, business, consumer attitude/preference, purchasing, health and lifestyle data down to the census block group level. Sources for over 70,000 data variables include Nielsen Claritas PRIZM, Experian Simmons, Mediamark Research, and Easy Analytics Software Inc. **SimplyMap** is available from the library database page: <http://library.ucf.edu/Databases>.

Some examples of potential uses include:

- creating a ring study report showing the demographic analysis of a target area based on 1, 3 and 5 miles radius around a local address
- mapping the percent of Orlando residents who last visited the doctor two to five years ago, accompanied by the locations of offices and clinics of doctors
- showing concentrations of Florida households where 11 or more overnight domestic trips were taken in the last 12 months
- comparing the top national markets for the consumption of Carta Blanca brand beer with the areas with large Hispanic populations of Mexican heritage
- ranking all the census tracts in Orange County by the switching propensity of cell phone users

Reports may be downloaded as Excel, CSV, or DBF files. Customized maps may be saved as high-resolution GIF or JPEG files and easily integrated into Word or PowerPoint presentations. Shapefiles may be exported for use with GIS software.

The UCF Libraries' subscription to **SimplyMap** allows for five simultaneous users. Although it is possible to use **SimplyMap** without signing in, it is strongly recommended that users create free accounts using their UCF email addresses so that research can be saved from session to session.

For more information or to contact a librarian for assistance, visit <http://guides.ucf.edu/simplymap>.

### Veteran's Day

The John C. Hitt Library will be closed  
in honor of Veteran's Day.

Sunday, November 11th: **CLOSED**

Monday, November 12th: **CLOSED**
