Save Our Symphony

New Dean of Men
Approved, Appointed

The new dean was one of three candidates extensively interviewed by various groups. According to W. Rex Brown, vice president for student affairs, McQuilkin received positive and favorable reactions and one of the faculty interviewers, was favorably impressed by his publications and extensive knowledge of student activities. He and his wife, of a family who is a member of the board of education, are also strong supporters of higher education. His presence will be welcomed by students and staff alike.

Marking him a man with very good judgment." The new dean was one of three candidates extensively interviewed by various groups. According to W. The question of university visitation has been in the news for the past two months and at this point, things are looking pretty grim. The issue of student-age visitation has been discussed extensively, with many students and faculty members expressing concerns about the policy.

From our viewpoint, the majority of the students are not satisfied with the current visitation policy. They believe that the policy discriminates against older students and that it sets unrealistic expectations for students over the age of 21. The trend is toward giving more responsibility to 18-year-olds, and this move represents a sharp slap in the face of older students.

We believe that the university should allow each of the nine universities to design a specific program for visitation. Considering the problems that may arise in the future, we feel that the university should consider a new policy.

In addition, the segregation of students over the age of 21 is not only unfair and unreasonable discrimination but also unfair to the students themselves. Maturity and responsibility are not based on age.

This is a matter that should not be tolerated. Our world is made up of people of all ages and backgrounds, and there is no reason why student-age visitation should be limited to those under the age of 21.

In conclusion, we urge the university to consider a new policy that allows visitation hours for those desiring those privileges. We believe that this will protect those students not desiring visitation and at the same time allow for enough mentality and insight to come up with some plan or policy.

The implementation of the new policy will be challenging, but we believe that it is necessary to ensure a fair and inclusive university environment.
FTU Interns Work In Area Government

Florida Tech University's political science department has initiated a unique internship program for seven seniors which has placed 11 in public administration jobs in seven Florida governments. All students are paid by the government they are working for, and all expect to follow careers in local government. Their assignments include budget and management analysis, planning aide, systems analyst and assistant to a city manager.

"The program carries full college credit," said Dr. W. W. Young, chairman of political science, and director of the new program. "The intern's individual performances will be evaluated on a basis of appraisals from supervisors and written reports each student will submit, detailing the scope and the content of his assignment."

Richard Thomas, who is interning in the Ocala Budget and Fiscal Office, said his assignment is to develop a control system of fixed assets. "I am working on a type of formula," said Thomas, "which city officials will be able to use for requisitioning and disposing of fixed assets."

Thomas said he finds two definite advantages to the internship program. "One is that it offers a preliminary view of the workings of governments so you can make sure you like it before you get into it. Secondly, of course, is the experience obtained from the assignment. It provides a reference for the future that's invaluable."

"The program is expected to produce graduates equipped to move directly into line and staff positions in government," summarized Dr. Young.

"We hope it will make an effective contribution to local government in Central Florida as well."

Students participating in the program besides Thomas are: Candy Bell, working with the Jacksonville-Duval government; William Hockmoran, Brevard County; John Kettinger, Orlando; Roger Sanders, St. Cloud; Robert Smith, Maitland; and John Washington, Kissimmee.

PROJECT PHYSICS UNDERWAY — Lester Dwyer, (1) from Hollywood, Florida discusses some of the finer points of a device to measure the density of various materials using photo electron cell, with some other of the 41 physics teachers from around the country. In the center of the picture is Frank Ficic, from Ft. Lauderdale. To his left is Rod Roberts, from Orlando, and Charles Dixon, from Ocala.

**Dyson To Build VC Expansion**

Dyson Construction Company will be awarded a $11,354,400 contract to begin expansion of the FTU Village Center.

Dyson Construction, low bidder for the expansion project of the FTU Village Center, which will double the size of the center, will be awarded the $11,354,400 contract within 30 to 45 days according to Vice-President of Business Affairs John G. Goree.

Before the contract can be awarded, said Goree, "it will be necessary to raise money by the sale of bonds." The state agencies responsible for this sale are the Department of General Services and the Board of Administration.

The expansion, known as Phase II of the Village Center, will see the addition of two student dining rooms, study lounges and rooms for student organizations and activities, and student lounge areas.

"We would like to begin construction on the project by September 1," said Goree. "This is almost a necessity as the project will require one year to finish and by September of 1972 we will need the extra space desperately."

**Senate Approves Four Committees**

Four Summer Committees were named last week at the Student Government Meeting Tuesday, and two more Summer Sessions were approved at the meeting a week earlier, on June 28.

The committees, which will serve until the end of the summer quarter, are Budget Committee headed by Jim Brooks; Construction Committee headed by Alan Tchirgi; Senate Affairs Committee, headed by Jim Thomas serving as the Chairman; and the Statutes and Procedures Committee, headed by Danny Scott.

Jim Schwank, an unsuccessful candidate for the UC Presidency, the Spring, and Cheryi Poo were named by the Senate to serve as Summer Senators. At that meeting on June 28, a bill, proposing to donate 3,000 lbs. of food and goods to the Symphony fund drive in Orange County, was again defeated, with a four to two vote.
