Eight Students Approved For Psy Grad Program

FTU's recently approved industrial psychology Muster's degree program will put under way this fall with a maximum of 10 graduate students enrolled, according to the program's coordinator, Dr. Cabot Jaffee.

Jaffee released the names of eight students who have already been accepted. They are William Garrett, Robert Carrano, Beverly Falchone, Jayne Drucker, Ivan Applebaum, Frederick Fran, Ph.D. in industrial psychology (Dr. Wayne A. Burroughs, instructor) and Charles Michaelis.

Also tentatively accepted to the program, pending the arrival of official credentials (such as Graduate Record Exam scores), are William Schulz and Donna Weiler.

"We believe we have a very good group of students to start the program with. If the group they averaged a score of 1190 on the Graduate Record Exam and have an average GPA of the fall.

The deadline for admission and counseling of students accepted to the program is August 16; however, students may receive admission as late as August 18.

Curriculum for the new program was approved recently by the university curriculum committee. Six hundred level courses to be offered in the fall will include: Human Motivation (Jaffee, instructor); Advanced Social Psychology (Dr. Wayne A. Burroughs, instructor); Experimental Personality (Dr. Robert L. Edelman, instructor); and Research Methods in Psychology (instructor indefinite).

According to Jaffee, only study in 600 level courses will be accepted for credit towards earning the Master's degree in the two-year program.

The psychology department has acquired three new faculty members, one of them Dr. Paulitch Franken, Ph.D., in industrial psychology, will assist implementation of the program in the fall.

The psychology department has also obtained a $30,000 grant from the National Science Foundation to implement the program beginning in the fall quarter.

Psychology (Dr. Wayne A. Burroughs, instructor) and Charles Michaelis.

letters to the editor

incident degrading

Dear Editor:

I am writing in response to the incident that took place at the university in recent weeks. University security has been called upon to address this issue. The incident occurred while a group of students was engaged in a peaceful protest. Despite this, the university administration did not take immediate action to prevent the incident from happening.

I strongly believe that the university administration should have taken stronger measures to prevent such incidents from happening in the future. It is important to protect the rights of peaceful protesters and ensure that students are not subjected to harassment.

Sincerely,

[Name]

college of business administration

ed. note: the concept of contractual agreement between a student and the university is not new and has been in place for a long time, in which the student contracts to enroll in an educational institution. This should be expected. However, it is important to note that students are entitled to limited administrative changes after a certain period. The administration must be cautious in changing regulations at a later point in time, to prevent a significant number of students from being affected. The university administration should be open to discussion and dialogue with students and faculty to ensure a fair and equitable process.

change 'unfair'

Dear Reader,

We have just read the announcement in the Florida Times Union that the GPA requirement for a degree with honors will be raised from 3.0 to 3.4. The article said that this was initiated after consultation with students and faculty. Finding a donor who was “consulted” on this matter is difficult on this campus.

When this student or the collection house his hours hard and efforts to define what the course values are. Many have gone on to achieve such levels for their degree requirements. Now in their senior year they find that they have no source of meeting the relatively raised standards. These rates and unjust situations become a concern of many students and faculty members that are on present standards. We hope that the university looks at this matter in a fair and balanced way, allowing all to concern the standards presently in effect for rats and students until they graduate. Apply the new standards for the fall 2021 semester. This gives all an equal chance of obtaining a degree with honors.

Sincerely,

[Name]

"leave the summer behind and take a trip..."

three days to soak up the rays on a cruise to Freeport and Nassau in the Bahamas. Join us July 10 to 13.

sunday through tuesday, a trip you will remember, for only $599.00. all fees included, airfare, transportation, hotel, meals, and all activities. a convenient way to travel, all costs included in a group cruise package. your meal to call is lucien (443-7940)

im tourney results told

Intramural activities this week included the conclusions and results of some of the fall tournaments and announcements of upcoming games.

The volleyball tournament came to a conclusion with the Project Physics team winning the championship with a record of four wins and no losses. The winning team was played off, but to the surprise of everyone, the Kappa Alpha Fraternity team entered with a surprising win over the team tie-breakers. The tournament will be held on Thursday, July 25. After two days of play, the Club Tennis team will complete the league with two wins and no losses.

In individual competition, the tennis tournament was won by Bob Matsuoka with a surprising score of 6-0 in the final match.

The coming events will include a basketball tournament, which will begin on August 12. The entry fee is $5.00, and the tournament will be held on Sunday, August 15.

A football tournament will be held during the middle of August. The details will be announced later.

The annual TRAVEL event will be held on August 17 at the Village Center at 11 am. The event will feature an exhibit of the Physical Education Building. Visitors will be able to see the university may enter and teams may be few.

rollins named assistant dean

Dr. Jack Rollins, Rollins named assistant dean of the College of Business Administration, has been named assistant dean of the Rollins College of Business Administration, as announced by Dr. Charles F. Gambrell, president of Rollins College.

Rollins, an Associate Professor of Management at Rollins, joined the faculty in 1969. He was formerly chairman of psychology at Emory University in Atlanta.

A native of Savannah, Georgia, Rollins received his B.A. degree in psychology from Emory in 1953 and his M.A. and Ph.D., in 1966, both from the University of Virginia. Rollins was a personnel research analyst at American Telephone and Telegraph in New Bedford, Massachusetts, before joining the Rollins faculty, where he taught in the Department of Business Administration.

Since joining the FTU faculty, he has been active in both research and writing, and was recently invited to present a symposium on personnel selection in Miami.

E.T.P. thanked

Ed. note: the following letter was received by the Temporary Physical Education Department. The letter is a response to the requirements as stated by the department. No mention of any effort was made to determine what the breakdown of this percentage was in each college.

Sincerely,

[Name]

The "Fly Navy" and Navy Officer Information teams from Jacksonville will be on campus at FTU Wednesday through Friday, August 11 through 13. The teams will be available between 8:30 am and 4:00 pm each day to discuss Navy issues.

Both teams will interview, counsel and fight eligible men and women students who are interested in serving. Programs include Officer Candidate School (OCS) at Newport, Rhode Island; Aviation Officer Candidate School at Pensacola, Florida, for those interested in flying Naval Aviators or Naval Flight Officers; and the Master's Degree Program for those interested in receiving the full appropriate degree, there are special programs leading to a degree in engineering, medical, chaplain, legal and medical training.

Students are invited to discuss their interests with teams of those who desire, on campus testing may be accomplished without obligation.

**Book 'Exchange' Close To Reality**

The Student Government book exchange should be a reality by the end of this summer quarter, and will be in a position, hopefully, to purchase second-hand books from students on campus at that time, according to SG President Frank Sunthrus.

"We have been granted permission to use room 315 in the Library for the temporary book exchange," Santry told the Student Body. The SG officials are presently in the process of acquiring the necessary equipment which will be required for the exchange, such as a cash register and shelves.

If need be, we will stock the books from the downtown area, and look good for purchases by the end of this summer quarter," Santry said.

The exchange will essentially be a small store, but with the students, rather than a purchase/sell system. Santry said that more information on the exchange, and a definite opening date would be released soon.

**Florida Land Co. Buys Property For Development**

The tract known as the Davis ranch, across from the entrance to FTU, located on the corner of NE Boulevard and Alafaya Trail, has been sold. The Florida Land Company to be developed into a campus-oriented community. The ranch represents 20 acres of a 432-acre purchase by the company. The total sale price is reported to be $14,000.

The community is billed as one of the first planned university development projects in Orange County. According to Florida Land Company spokesmen, the first phase of construction will include 160 garden apartment units to be ready for occupancy by September 1972.

Florida Land Company president, W. J. Bowen, described the development as an especially attractive way to combine housing elements of all kinds, the preservation and enhancement of natural settings.

About two-thirds of the acreage in the first plan will be used for open space in its natural form or will have formal or informal dotage. "We have seen the need," Bowen said. The company is hoping to rent mostly to FTU students and faculty.

Switzerminated Associates of Winter Park drive up the design of the community, which John P. Goeke, FTU's assistant for business affairs, described as "a major, significant project," to the critical housing shortage adjacent to the campus.

"With the expected increase in enrollment, the shortage in the next few years, the availability of modern, convenient housing will greatly assist students and others who wish to live close to FTU and its facilities."
Armadillos don't take Sominex to insure sleep. And even if they did, their sleep might not be "safe and gentle." Most people probably aren't very interested in the dream patterns of slumbering armadillos, but Dr. Henry B. Van Twyver of the Psychology Department is studying the sleep and dream time of the armored, nocturnal animals as part of his summer in serious research on the prehistoric appearing mammals.

Dr. Henry B. Van Twyver of the psychology department is studying the sleep and dream time of the armored, nocturnal animals as part of his research. It has been conducted for almost six years. This summer's work is being funded by a $7,700 grant from the U.S. Public Health Service.

Van Twyver has been asked to co-author a book on the evolution of sleep, along with a University of Chicago professor who is studying sleep activities of reptiles and amphibians.

The study of sleep, according to Van Twyver, is especially vital in the sleep and dream time of the armored, nocturnal animals as part of their daily life. According to Van Twyver, "Sleep is essential, Van Twyver stated. He feels that his own study will probably last 20 years, and possibly more."

** lifters place 2nd in meet **

FTU's Weightlifting Club placed second in the July 10 Walt Disney Invitational Power Meet.

Four of the six members of the club placed second in the unlimited class with a total lift of 1,350 pounds. Mike Richards placed third in the unlimited class with a total lift of 1,350 pounds.

According to Van Twyver, "Sleep is essential, Van Twyver stated. He feels that his own study will probably last 20 years, and possibly more."

KRYLON CRYSTAL CLEAR

Dries in minutes

8 oz. 98¢
1 pt. $1.95

A permanent, protective covering for any artwork, etc., after they have been televised. Prevents smudging, fingerprinting, dripping, dusting. Goes on clear, stays clear, does not yellow with age.

KRYLON WORKABLE FIXATIVE

Dries in seconds

8 oz. 98¢
1 pt. $1.95

Fixes pencil, charcoal, chalk, pastels, including oil pastels. No more worry.

KRYLON DULLING SPRAY

semi-drying

1 pt. $1.95

Costs money and effectively the article to be photographed or televised. Simplifies lighting arrangements. Leaves no marks — smears or dusts. Dusty, any surface including chrome. When camera work is completed coating is washed off with black and white or color use.

MATE TE FINISH

1 pt. $1.95

Finishes glossy to flat in one application. Produces a superior surface for any artwork to be photographed, televised. Matching colors available. The lower sheen and light reflection of Matede Finishes are effective on black and white or color. The lower sheen is less reflective than the satin finish to glossy surfaces. The effect is an anti-glare finish to glossy surfaces that reduces glare and specularities in photographs. Matede Finishes for negative and positive film, black and white, color, textures, etc. Dries in minutes.

DAMAR VARNISH

8 oz. 98¢
1 pt. $1.95

Finest quality finishing material. Damars, nitrocellulose, plastic and varnish, or a combination of these, is the most satisfactory type of finishing material for use on this type of film. Damars are the most resistant of the various types of finishing materials against easy abrasion and adhesion, and they are also the most resistant to the effect of moisture, dust, etc. Suitable for slides, negatives, and prints. Damars are particularly useful for the protection of all types of film, but are especially useful for the protection of still photographs, negatives, and prints. Damars are available in white, black, and color. Damars are available in white, black, and color. Damars are available in white, black, and color.
