THE HAZARDS of being a university president are many and the job calls for an ability to deal skillfully with unusual situations. True to this requirement of his job, President Charles N. Millican apparently had no trouble dealing with Delta Tau Delta's newly acquired rush mascot, Bob the goat. Bob was loaned to the brothers of Delta Tau Delta by the U of P chapter to help publicize rush activities. (Photo by Chuck Settel)

Brown Releases Budget Allocations

The 1971-72 budget for student activities and services totaling $653,387 has been released by Vice President for Student Affairs W. Rex Brown. Budget allocations will be jointly made by Brown's office and the Student Government.

The procedure of budget allocation amounts proposed and recommended for each service or activity was reviewed by an ad hoc committee of the activity and service fee committee, composed of Vice President for Business Affairs John P. Goree; Frank Santry, Student Government president; Assistant to the Vice President for Student Affairs, Dr. Bill Brown; John D. Mahaffey, an assistant professor of business administration; and Comptroller Joseph Goree.

Recommendations were made to Rex Brown by the ad hoc committee of the President's Budget Committee and the budget was reviewed by the ad hoc committee a second time. The executive committee, composed of Vice President for Student Affairs, and Dr. C. S. Gambrell, vice president for academic affairs, completed the final action by approving the budget to President Charles N. Millican for final approval.

Health Services had a balance from 1970-71 of $20,000, which will be combined with an allocation of $900,000 and an estimated $25,500 from the internal and sinking fund, and $59,070 for operational expenditures. An estimated income of $17,000 will be added to the operational expenditures.

Student Government will receive an allocation of $100,000 to be combined with last year's balance of $49,000 for a budget of $105,000. The allocation for Social Activities will be $719. A $781 balance from 1970-71 will provide a $1,500 budget.

The Pegasus will receive $19,000 in funds, earn an estimated $5,000, and have a budget of $25,000, including $1,500 from last year. Allocation for the Pegasus will be $7,500 combined with last year's balance of $1,800 and an estimated $1,000.

Controversial Board of Regents member Elizabeth Kovachevich, in a whitened tour of FTU Tuesday, fielded questions from curious students, visited classes in session and like a modern-day Pied Piper fielded questions from curious onlookers as she hurried from one student policy, was intended to be the entertainment area of approximately 100 people. (The room is barely large enough to accommodate the dorm or so students with the group.)

Miss Kovachevich answered all questions with ease and candor, eliciting a fist of much of the time or pontificating expansively to show erudition. Even before Miss Kovachevich became an issue it was suggested by Regents' Counselor Robert Mautz that plans be made to renovate visitation facilities. This will almost certainly have to be done soon.

Miss Kovachevich visited the dorm lounge and spoke with the residents, engaging in conversation. She was loaned to the Brothers of Delta Tau Delta by the University by a representative of the Delta Tau Delta chapter to help publicize rush activities. (Photo by Chuck Settel)

Tuition Fee Hike Upheld By Mautz

A delegation of university student body presidents asked the Board of Regents during its recent monthly meeting here to reconsider its decision to permit collection of higher registration and tuition fee.

While the Board considered that the increase was implemented before the wage-price freeze, those requesting reconsideration countered that fewer than 450 of Florida State University's 18,000 students had paid their fees prior to August 14 and that, "technically, the increase was not implemented until September 20 when classes began." Thus, it was argued that "a substantial number of transactions" had not been affected.

University Chancellor Robert B. Mautz Monday issued a clarification: "Economic Stabilization One-Eighth Percent Fee increase, published in the Federal Register, August 24, 1971, rends the ceiling price for the sale of a commodity or service is the highest price at which a seller delivered or furnished during the base period such commodity or service to purchasers in such usual manner and under such usual conditions that transactions, that is, 10 per cent of his actual transactions."

The criterion is, according to Mautz, 10 per cent of the transactions made during the base period (July 15-August 24, 1971) and not 10 per cent of the transactions expected to be made. Thus even only 997 of the transactions paid during the base period (July 15-August 24, 1971) national rate, 100 per cent of the transaction were at the higher rate.

In the basis of the aforementioned guidelines, said Mautz, the Office of Higher Education continues the collection of registration and tuition fees at the higher rate and no exception can be made during the freeze except those that have received a waiver from the Federal Register.

FREEZE AFFECTS ALL; FTU NO EXCEPTION

The August 15 national price freeze has affected nearly every United States institution, with FTU being no exception.

Although the issue is still under consideration, FTU professors have not and will not request reconsideration of the freeze. The debate continues on the K-12 increases and no decision has been made by the University to change the 10 per cent increase already announced prices.

Any student who would like to obtain an absentee ballot for the upcoming Student Government elections must register at the SG office on the second floor of the Linfield building no later than today.

PEGASUS SALE

The PEGASUS '72 Yearbook will be on sale this week in AD 108. The price is $10 which includes all tax. The office will be open for sales from 10 am to 2 pm.

STUDENT TEACHING

Application forms for winter quarter student teaching for quarter are available in GC 320. These applications must be completed and submitted prior to October 1, 1971.

GOREE EXPLAINS

Goree stated that the increase in housing costs would result in a quarter for students in the area of $100 per year. With the $450 announced price increases expected to be sold for the amount they were bought. Another advantage to students was the area of cafeteria costs which were scheduled to be raised slightly.

One positive effect of the freeze for students is in the area of book sales. Mr. Goree said that already announced price increases for textbooks would only be sold for the amount they were bought. Another advantage to students was the area of cafeteria costs which were scheduled to be raised slightly.

(continued on page 6)
Rejuvenate Governors

When the specifications of a position are not being lived up to, it is generally assumed that position will be abolished. In many cases, this is the best action to take. A bill to abolish the elected position of class president and college governor has been proposed and was scheduled to go before the Student Senate this week. It is our feeling that this is a case that could be handled in a different manner.

According to the Student Government constitution, governors and class presidents "shall preside over meetings of their individual Senate delegations and shall sit as, on the President's Council. They shall have the power to appoint such administrative assistants as deemed necessary."

They have no voting power. Consequently, these positions have, in the past, been responsible for very little positive action, other than committee work and the formulation of class projects.

Perhaps a more positive bill would suggest the abolishment of one office and the restructuring of the duties and responsibilities of the other.

We are in favor of seeing the office of class president abolished, basically because of the lack of distinction in the various classes. Class is determined by the number of quarter hours and does not necessarily constitute a year-to-year change.

We do, however, favor maintaining the office of college governor, with a marked change in office responsibility. The majority of students identify more strongly with their particular college than with their class of year of study, so more emphasis should be placed on individual colleges.

A great deal of thought should be given to a more authoritative and rational set of duties for college governors. The governors could serve as an advisory board to the university in the area of academic affairs. These governors should have a working knowledge of the problems and needs of their colleges. Areas such as general studies requirements and semester changes and the pass/fail system, and additions to the class schedule are just a few of the areas where students have expressed interest. This group could serve as a liaison between students and administration by submitting requests for changes and additions.

Considering the nature of this responsibility, we suggest that a person be a junior or senior in class standing to be eligible to run for the office of governor.

But most important to making this suggestion workable would be full cooperation from the university. These students should ideally be mature and concerned about the welfare of those under them and would need to be taken seriously by university officials and academic affairs. What good could they possibly do if no one listened to them?

Seminars Under Fire

Due to a number of changes and discrepancies in format, the senior seminars are once again under fire. Two of the five seminars are on par with the rest of the student activities of the students in these courses (Humanities and Natural Sciences) are wondering how a pass/fail grade will meet their GPA. There will be an addition to the number of quarter hours but no notation of grade.

The pass/fail system appears to be relatively popular with students. It was originally requested for seminars in 1969 and is finally in effect in response to the actions of various student committees.

However, we cannot justify two seminars being on pass/fail and three not.

Additionally, the various sections of at least one of the two on the news are not compatible in course requirements. Case in point. The Humanities and Fine Arts seminar is divided into several discussion groups, all meeting at the same time but being taught by different professors. One of those sections requires attendance and discussion for a pass/fail - the other attendance and a possibility of two papers and one exam.

Although the pass/fail system is in the early stages of implementation, it is not too early to get on the bandwagon for a more structured system of senior seminars.

If few facts from the students' point of view are taken into consideration, the seminars could be administered in a more positive manner. At the present time, senior seminars are basically unpopular. The system is unstructured and inconsistent by virtue of the grading and requirements of each seminar. Perhaps it wouldn't be a bad idea to make a few changes, allowing the seminars to be simply a brief and general look at the course study of each college within the university. First of all, the seminars should all be on the pass/fail grading system. There are disadvantages to this, but all in all, they are "short courses" and should not be treated in anymore. Secondly, the requirement should be limited. Class attendance and discussion with an optional paper would be plenty for a class where no grade is being offered. And thirdly, a different approach from the standpoint of the professor himself. Those who have realized the positive and negative aspects of the seminars and are teaching accordingly are one step ahead of the others.

And modernization and implementation of change should figure highly in the overall education process.
SG Candidacy Sign-Up Due

Today is the deadline to declare candidacy for the Student Senate elections to be held October 14 and 15. Students have until 5 p.m. today to sign up at the SG office in the Library building. Campaigning is scheduled to begin Monday at 8 a.m.

As of Tuesday, 35 students had declared. According to SG Vice President Charles Simpson, this is a "fair" turnout. Simpson added that he expected more candidates to sign up towards the end of the week.

Minority students from FTU's seven colleges had entered the race for student senator for next Tuesday: College of Business Administration: freshmen Desi Dugger, seniors Tim Brooks and Jim Schwank; College of Education: sophomore Danny Scott and juniors Joy Jolly, juniors Debbie Hamsher and Kevin Hopper, senior Jan Schoenknecht; College of Engineering: sophomore Robert Van Etten, junior Donald Broch, Arthur Haas and Bill Hopkins, senior Boaz Weidman. Also General Studies: freshman Karen Day and sophomore Lee Conant; College of Humanities and Fine Arts: freshmen Barry Ganong and Celia Sn Veget; seniors Myrna Denny and Paul Aiello, senior Alan Constantine; College of Natural Sciences: sophomores Jerry Frey, junior John McCann, senior Sandy Jackson; College of National Security: freshmen Mike Sanders and Chester Gremillion; College of Journalism: sophomores Gougelman, juniors Myrna Denny and Paul Aiello, senior Alan Technician.

Four students had declared candidacy for college government governors by Thursday: ducks Robert Lamb, College of Fine Arts: freshmen Larry Walton, Michael Carlson and Yelvis Roielo, sophomores Tom Lashman, junior David Boelzner, senior Charles Mason, sophomore Myrna Denny and Charles Black; College of Humanities and Fine Arts: freshmen Barry Ganong and Celia Sn Veget; seniors Myrna Denny and Paul Aiello, senior Alan Constantine.

Ken Lawson Returns To Village Center Post

Ken Lawson has returned to the FTU Village Center. Lawson, who was selected as director of the Village Center when FTU opened in 1969, has come back to FTU from the University of Illinois with a Doctorate degree in administration. During his absence, another program Dr. Lawson is planning, "The College Bowl," a question-answer competition, in which any group of four students can form a team. Using reference books, encyclopedias, television and other sources, Lawson already has written almost a foot-high stack of questions for the event, which begins in late October.

Lawson hopes to acquire more equipment, especially ping-pong tables. "Ours are beyond repair. There is no more money for them.

One problem with more equipment, he said, is storage space. Currently there is no place to store the five new bicycles Student Government has bought for the Village. Although most of the bikes are being used by students much of the time, there is no place to keep more than two-wheelers. Things like storage space and good places for speakers and performers must wait for the new addition scheduled to be completed in 1977.

The blond director keeps an open door, as do the other VC personnel. He doesn't see his youthful appearance as any real barrier to his directing the center. "I think it might help students identify more closely with him.

Senat Considers Bill To End Class Offices

A bill calling for the abolition of class presidents and college governors was scheduled to be introduced to the Student Senate yesterday at the 4 p.m. meeting, according to VP Santry.

At press time Santry said he "hoped to secure no opposition from an assembly of class presidents. However, I do not as involved in Student Government as FTU for three and one half years, and in that time I have yet to see a purpose for class presidents. The framers of the constitution, including myself, were working from a high school reference point when they included this item."

"Since that time, we have received a valuable practical lesson in group identity. For practical purposes there is a difference, if any class identification, and there just are no problems or issues peculiar to one class."

Santry further explained the intent of the bill, stressing that the Ad Hoc Committee Has First Session

No official statement has been released on the results of the first meeting of the ad hoc committee appointed to investigate the possibility for an FM radio station at FTU.

The meeting, which was held last Thursday, was according to the committee's chairman Dr. Bernard Kuenzel, "a planning session. We may have more definite results after our October 7 meeting."

Reliable sources, however, reported that the atmosphere of the first meeting was "harmonious" to the creation of the proposed station. The committee, which was investigated by the committee include the cost factor (which has been the most controversial issue among the subject), possible external funding sources, the possible housing for the radio facilities.

Also the relative need for the facility and the steps necessary to secure Federal Communications Commission approval of such a station.

The station, it is approved and grants funded, will be noncommercial and educational and will broadcast over most of Central Florida.

College governing, as they do now, are not as effective as class presidents. "SG is not as involved in academic affairs as it should be," said Santry. "The college governors as an appointive office would offer great potential to increase this involvement."

The bill, sponsored by Senator Sandy Jackson, has been introduced prior to the upcoming Senate election in the hope that the legislation will pass and the bill would then be introduced into both House of Representatives offices from the docket.

"All students who have declared candidacy for either of these two offices have been given the opinion of the bill from the Governor, said Santry. "If the bill is not passed before elections, candidates must drop one office and if they fail to do so they will become ineligible for either."

The deadline for declarations of candidacy is today.

Co-Op Enrollment Doubles Numbers

At the beginning of last year the enrollment in Co-Operative Education numbered 20. This quarter 90 students will work under the Co-Op system. Ted Rajchel, coordinator of co-operative education, said, "My objective is a double enrollment each year. We should have at least 100 students by next year." Rajchel predicted that one-fourth of the students at FTU will be Co-Op in 1976.

The total gross income of Co-Op has exceeded $600,000. Rajchel said this is money that ordinarily could be supplied by the Department of Transportation, Florida Technological University, a notice concerning campus parking regulations. The new parking policy was announced Tuesday by all Co-op students, including a mid-term report form, housing questionnaire, mailing list, co-op news article information and a notice concerning campus elections. The Co-op office has a new location in Suite 374, Administration Building, and a new phone number, 275-2314.

Winter Park Telephone Company will begin hiring Co-op students for the first time this year. NASA now employs 18 Co-op students through its contract with the Walt Disney World. Both the First National Bank of Maitland and the Department of Transportation employ three. North American Rockwell has hired two Co-op students. The Florida Power Corporation, Florida Technological University, the Lilliston Corporation, Martin Marietta, the Orange County Department of Public Instruction and Sears, Roebuck and Company all employ one student each.

Rajchel issued a memorandom Tuesday to all Co-op students, including a mid-term report form, housing questionnaire, mailing list, co-op news article information and a notice concerning campus elections. The Co-op office has a new location in Suite 374, Administration Building, and a new phone number, 275-2314.

IN THE BEGINNING, a local rock band, will be featured at the Interfraternity Council dance tonight. The group is in the process of working on a contract with Capital Records to possibly cut a record next year. On the left is Jon Fisher, an FTU engineering major. Next to him is Peter Lane, also an FTU student; majoring in communication. And "Caracas" Jack Stanley, a business administration major here. Ken McCoy is the fourth member of the group, and is presently attending an area community college.

More Speech Help Offered To Students

Approximately 20 students have signed up for a voluntary speech lab designed to give students more practice time in speaking before groups, according to coordinator for the speech program, Dr. Kyle P. Taylor. "The goal of the program is to supplement the speech training received through Speech 101 for students who need or want additional work in overcoming articulation and voice problems," said Taylor.

Two speech problems areas will be covered by the program. The speech improvement phase will deal with people who have problems with articulation or voice problems. According to Taylor, this phase will deal with such problems as dialect, difficulties, excessive nasality and voice projection. The speech improvement phase is designed to instill self-confidence in the speaker and overcome delivery problems.

Lab sessions are scheduled to meet once a week for the 10 weeks of the quarter. The participants will be speaking every week, as opposed to the four class sessions required for Speech 101. Taylor said the labs will be limited to "small groups of no more than 15 or 20." 

"The program is open primarily to students in Speech 101, but there are available places for anyone who is interested," said Taylor. Students can sign up for the program in the communication department, AD 124.

---

Parking Difficulties Start Space War

The first day of classes held surprises for more than one student—especially where parking was concerned. Students accustomed to minimal problems in finding parking were dismayed to find spots usually available were occupied this A.M. last year were occupied an hour earlier.

There are now 5,400 registered vehicles on campus, although security guards expect about 4,100 cars to be parked on campus at one time. Smith said the campaign against late parking, which was started last year, has borne fruit.

"Heavy" citations the first week and those who are parked in violation. Students accustomed to minimal problems in finding parking were dismayed to find spots usually available were occupied this A.M. last year were occupied an hour earlier.

Bicycle Population Booms, Security Registers 33

Along with more cars, motorcycles and students, there are more bicycles on campus.

Bikes, which range from small-tired "choppers" to white-basketed women's to sleek lightweight 12-speed racers, were almost as numerous on campus during the first weeks of the fall quarter alone as they were during the entire previous year. Security secretary Shirley Garrett said Tuesday that 33 parking decals had been given to students applying for them this quarter. Last year a total of 41 decals were distributed.

Bikers attribute the increase to ecology, economics and the lasting or temporary fad of cycling. Some of the riders drive cars onto campus, but because of the parking situation, cycle from the parking lots to class.

Larry Gerardi, senior in the College of Social Sciences, owns a blue 10-speed, often pedals to FTU from his home about three miles away. He cycles because of "pollution, exercise and gas money," and has been doing so since last Easter. He sees bikes becoming a lasting trend to the extent that some cities now are closed streets to cars and opening certain roads for bikers and pedestrians. "If I were back in New York, I'd still ride the bike."

Not all the bikes on campus belong to students. The Village Center now has eight of them, which students may use while they retain their ID cards. All the bikes are straight gear, which means they are single speed and one is a tandem bike. Five of the eight bikes were recently purchased for VC by Student Government.

A GROWING number of students, seeking to avoid the crush of four-wheeled traffic on campus this quarter, have taken to the old two-wheelers (both for pleasure and sensible transportation). Students (l to r) Fran Kaufman, Bette Heins, Jan McCormack and Susan Trapp and many more have joined the ranks of bicyclers. (Photo by Ike Spinof.)
FTU STUDENT Lloyd Wooley questions Regent Elizabeth Kovachevich about visitation policies. Miss Kovachevich's half-day tour of the campus was part of a Board of Regents plan to put the individual Regents more in touch with university atmosphere. (Photo by Ed Burton.)

9th Alcohol School 'Most Well-Received'

The 9th Annual Florida School for Alcohol Studies, the third cosponsored by FTU, was called the "most well-received" by one of its coordinators, Dr. Charles M. Unkovic, chairman of sociology. The school, attended by over 200 persons who work in alcoholic rehabilitation, was held on campus August 28 through September 3. The federal government provided a $7,750 grant to finance the project.

The Florida Bureau of Alcoholic Rehabilitation planned the school comprised of lectures and workshop sessions that include such topics as mental health, rehabilitative, psychopharmacological, and industrial aspects of alcoholism. Joe G. Marquart, educational coordinator of the Bureau, was Unkovic's coordinator. One day was also spent on drug abuse, with Dr. James Doyle, assistant director of the Orange County Public Health Department conducting the drug workshop. Dr. Frank Rohrer, chairman of the college of education, and Alexander Sulloway, coordinator and professor of education, participated. Rohrer presented a paper on marijuana and Sulloway spoke on involvement of public counseling for university students. I didn't vote for it and I have my doubts as to its success. Miss Kovachevich spoke on a variety of issues including education, mental health, and industrial aspects of schools in various drug programs. State representative F. Eugene Stubbs of Merritt Island and Lewis Earle of Maitland spoke at the opening of the school, and C. Barth Enger, FTU coordinator of educational conferences, made and coordinated physical plans for the program.

"Most Wide-Received" 1-- The dorm construction memorandum: "Florida International has no dorms and I believe this will become a trend. In essence housing has become, or will become, an academic nonessential. I personally know of no one who eats, sleeps, and plays at their place of employment. We must take a hard look at the system and decide between what is an academic essential and what is nonessential. As educators we must be less concerned with providing these services which, in my opinion, should be provided by private enterprises. If it comes to a choice between the dorm and the classroom, I would choose the classroom."

- Preparing students to enter the business world: "We must spend our time providing greater, more realistic guidance and counseling for university students. I have been on the outside, and I know what it is like - it's rough - the university atmosphere today is unrealistic - isolated from the community - this situation scares me. I am opposed to the isolation that exists on the university campus. We must make the university more relevant to what is realistic."}

--- The possibility of a woman being chosen for a Supreme Court seat: "The fact that there are two vacancies on the Court, I believe, makes the chances very strong that a woman might be chosen. President Nixon is concerned with creating a balance on the court which does not now exist. Therefore I believe at this point in time a woman with equal experience and qualifications would have the edge over a man."

- Radical speakers on campus: "We need a better balance of speakers on the college campus. An atmosphere should be created which will include the whole community... By asking one kind of speaker and extending the audience we are practicing a form of segregation. Student audiences should be given the opportunity to rub elbows with the real world, with members of the community. By not doing so students are losing a valuable common sense experience at a highly impressionable time of life." The fiery female Regent ended her tour of the campus with a promise to make every effort "to return to FTU later in the year for a speaking engagement."
Forensic Team Faces 30 Foes At First Competition Of Season

Today marks the beginning of the FTU forensics squad's second season of competition, as a six-member team goes to Middle Tennessee State University, Murfreesboro, to face debate teams from more than 30 colleges and universities. Among their opponents will be teams from the University of Georgia and Emory University, both of which have a strong debate teams, Duke University, the University of South Carolina and Penn State University.

The forensics team has shown a "significant increase" in members this year, according to forensic coach Jeff Butler and Dr. Raymond Buchan, acting chairman of the communication department. From a squad of 12 last year, the team now numbers 30, with the coaches looking forward to a further membership increase.

Among the new team members are three out of four of the top debaters from last year's National Forensics League state contest. Several freshmen and transfer students are also on the team.

The six debaters from FTU competing at Murfreesboro today and tomorrow are Jack Higgin, East Boyle, Geoff Ringa, David Lashey, Ben Shriver, and Bill Snyder. They will participate in at least 12 debates, be divided into junior and seniors from the other universities, and will accumulate 24 hours of debate over the two days.

Activities of the forensics squad are not limited solely to debate, but also include extracurricular speaking and original oratory. Butler said forensics is open to any students willing to work and willing to use their minds "in intellectual competition." The six-member team members spend from 15 to 20 hours per week in research and case preparation. The squad members have been preparing for this year's round of competitions since mid-July, Butler said.

This year's resolution will be presented "under this many arguments should be imposed upon federal agencies collecting information about U.S. citizens." Butler, who came here for the first time this year, said he feels that the FTU team is "among the strongest young squad in the state and one of the strongest in the Southeast." He spoke highly of FTU's record for last year, and added that he expects the team to be able to beat University of Florida's group this year.

Dr. Buchan worked exclusively with last year's team and was complimentary of the debaters' efforts, calling them "brilliant, hardworking students." He also said that team members have maintained high grade point averages, despite long hours devoted to forensics.

Buchan added that one of the forensics' aims is to bolster the academic experience of students and said anyone interested in the team, regardless of major, may contact him or Butler in the communication department.

Among the goals of the forensics team are the training of students to speak more effectively; the encouraging of students to learn and use tools of research; the increasing of students' abilities to analyze topics, determine issues, and relate concepts into coherent, rational patterns, and the providing of students with opportunities to visit other schools, to meet other students and to share and compare cultures and ideas.

Besides today's and tomorrow's competition in Tennessee, the forensics team will also debate at Stetson University, Deland, last Wednesday and Thursday; Emory University, Atlanta; the University of Florida; the University of South Carolina; the University of Alabama; Birmingham, Ala. Universities slated for winter quarter competition include Florida, New Orleans and The Citadel in Charleston, S.C.

Foundations Gets More $1

FTU has received three additional scholarships amounting to $1,320 for the current academic year.

The contributions were brought in by the Foundation's class of 1968, who are all degree-holders, and is the result of procedural delays.

The group, all degree-holders, is procedural delays.

A scholarship for $500 has been provided through a Memorial Trust Fund created in memory of Martin Marietta employee Loren D. Evans. Additional funds for the scholarship will become available next year, according to a student in the College of Engineering.

Buchan, Higginson Co., an Orlando accounting firm, has contributed $500 to a fund for research scholarships in the sciences. The fund is being set up for a student majoring in accounting.

Draft Deferment Laws Explained

All college students who had Selective Service deferments last year are still eligible for deferments this year, but new freshman students will be exempted, according to Registrar W. Dan Chapman.

In explaining how the new laws apply to FTU, Dr. Buchan said, "The Selective Service laws are written to put those eligible for deferments in the armed forces. A major reason for this is that 80 per cent of the freshman males are 18 years old and will not be subject to induction until 1975, when induction calls are expected to be low."

Of the freshmen who are 19, about half will not be inducted because of high lottery numbers. Of those men, 50 per cent will be disqualified on other grounds. Thus a maximum of 50,000 men will be drafted in 1972 by the end of student deferments, and half of those men will probably not be inducted because of enlistments in Regular, Reserve or National Guard units, officer training programs or because of procedural delays.

At this time, there are about six million men under age 20 with deferments. An average of 500,000 men in the armed forces each year for the past 15 years.

The larger groups of deferred men are those who have received college educations, occupational or student deferments.

Dr. Tarr said that college students will be able to postpone their induction until the end of a quarter or semester, or if they are in their last academic year, until graduation. He said he does not foresee a large increase in the number of freshman inducted into the armed forces. A major reason for this is that 80 per cent of the freshman males are 18 years old and will not be subject to induction until 1975, when induction calls are expected to be low."

Delta Tau Fraternity Brothers invited all rushees to their rush party tomorrow night at 9 p.m. in the Treetop Room at the Langford Hotel in Winter Park. Blue Canyon, a band from Tampa, will be providing the sounds to dance and listen, to have a good time eating at the buffet and gambling with play money at the Monte Carlo center. For information about this party, just ask a brother of Delta Tau (Triangle T) or the gorilla that was campus.

The Delta Tau gorilla was borrowed from the Delta Tau Phi chapter at the University of Florida in Gainesville. Rushes are also invited to the Smoker in the Library tomorrow from 11 a.m. to 6 p.m.

**Tyke's**

This year will witness many changes within Tyke's Society. To cope with the ever-changing structure of a sorority, Tyke's has revamped its pledge program. By doing this, they hope to build an even better sorority by helping their pledges to become the members possible.

This year, looking forward to participating in Intramurals once again and plan to work hard this year, there will be the Overall Trophy in Women's Intramurals.

College Rush is on the calendar again this year and Tykes have already started preparations for their teams.

Also on the agenda are "to keep them busy" are service projects, socials and fund-raising projects. Added to these are planning for winter rush and the fall calendar is filled with events.

Finally, the sisters of Tyke's would like to congratulate all the sisters. They look and "brothers" they hope to fill the summer. Kathy and Ken Martin, Joyce and Jerry McCarty, Susan and Hans Ashby, Lauren and Tom Batchelor, Nick and Scott Filamato, Kris and Rich Brandtner.

**SSX**

Last Saturday night marked the annual awards and installation banquet for Sigma Sigma Chi. The following awards were presented: Little Sister of the Year, Linda Warren; Athlete of the Year, Richard Hudson, President of the Year, Joe Hartman; Belles of the Year, Tom Smith; Junior of the Year, Dave Kirkpatrick; Most Dedicated Brother, Dave Kirkpatrick; and Brother of the Year, Dave Kirkpatrick. The little sisters presented their award for Brother of the Year to Tom Smith and the brotherhood gave Fred pool room was donated by Bob Matasek, Wilson Gordon. A regular meeting was in the pool room over the weekend. All rushees are invited to come and meet the brothers in the surroundings of the ATO House.

Mike Abufaris was elected to the honored Worthy Chaplain post. Jim Montgomery has taken over Service Chairman to handle all service projects.

**LXA**

Members of Zeta Tau Alpha Sorority will entertain FPU sorority representatives and advisors, alumnae advisors and several FPU staff members at a coffee honoring Dean Carol Wilson tomorrow. The event will be held from 10 a.m. to noon at the home of Zeta Alumna, Carol Robison.

Plans for fall quarter include pledge training, officer training, rush and Zeta Picture practice and a social with fraternity representatives.

Tri-Delta alumnae donated $300 from the Century Fund for books in the FPU Library. These books will officially be presented at the leta Lambda installation dinner but the books are now available in the Library for student use.

The sisters are getting ready for the dance to be held winter quarter. Mrs. L. Dunlap will be rush advisor.

Tri-Delta and AXP will present a fashion show next Wednesday. Clothes will be provided by Rotundas and the show will be held during lunch hours.

 Lambda Chi Alpha ended the summer by sending four brothers to the fraternity's annual national Leadership Seminar, held this year at Buffalo State University in New York. During the August 25-27 seminar, brothers Bill Evans, Marvin Dennis Wayne Leal and Bart Barnes participated with Lambda Chi's from the U.S. and Canada in a Leadership Lab conducted by National Leadership Methods of Austin, Texas.

The results of the Ball State lab were so impressive that Lambda Chi Alpha at FTU conducted a Leadership Retreat last Saturday at American Federal in downtown Orlando.

Some 70 persons participated, including brothers, alumni, faculty, interested non-faculty members and Crescent Girls. The lab utilized small groups of eight doing leadership exercises, solving current problems and offering suggestions for the operation of LNA for the coming year. The reaction to the lab was highly favorable from those who took part. Jim Brasher, director of alumni affairs for Lambda Chi Alpha National, conducted the retreat.

After the retreat, everyone enjoyed a barbecue at brother Tim Batchelor's house.

During the past week, LNA has been planning for the upcoming football season, bound to improve on last year's 6-2 record.

Last Monday's meeting, Bart Barnes was selected as the new High Kappa (fraternity educator). Barnes will be in charge of Lambda Chi's new fraternity education program, which replaces the old methods of pledge training. LXA invites all rushees to drop by their fall rush schedule and their Wildcat Party Saturday night, or they may share the contents of the new education program.

The Developmental Center is now registering students who experience unreasonable fear when taking tests and who are willing to devote several sessions to overcoming their problems.

Anyone who makes adequate preparation for tests, but still gets too "upset" to use what he has learned when he tries to answer the exam questions will find this program useful.

Interested students should apply to the Developmental Center, Room 116, Residence Hall. Now registering for fall classes, students are interested in becoming part-time companions. According to the center's social director, Shirley Hiley, "both male and female students are needed who can give even one hour a week to tutor those in need of reading, play cards or just talk to some lonely old people."

Interested students may contact Shirley Hiley at 671-5400. The home is also interested in finding groups who would be interested in entertaining on a volunteer basis.

PEGASUS PILOTS
The Pegasus Pilot Flying Club will meet next Wednesday, at 7 p.m., at Showalter Flying Service, Melbourne Airport. Officers for the new year will be elected. A doorknob of one hour free flying time will be given away. All members and prospective members are urged to attend.

WESLEYAN FOUNDATION
Students interested in forming a Wesleyan Foundation on campus are asked to attend a meeting Tuesday at 11 a.m. in AD 110. The “club” will be a fellowship for Methodist students, and premises will be a worthy addition to the campus. Smile, God loves you!

ASTROLOGY CLUB
An Astrology Club is now being formed on campus for students sincerely interested in technical astrology. Memberships are now being taken and as soon as student interest is sufficient a program of monthly lectures on this fascinating and enlightening subject will begin. For more information call Mary Greer at 2671 or 644-4694 or Kay Hagor at 295-7369.

ACLU CHAPTER
There will be an organizational meeting of the American Civil Liberties Union (ACLU) 11 a.m. Wednesday in SC 115. Interested students who cannot attend may contact Jim Brooks (647-5670).

CHESS CLUB
The first meeting of the Chess Club for this quarter will be 7 p.m. Monday in LR 212. The Chess Club is now officially recognized by Student Government. The purpose of the club is to promote the game of chess. You need not know how to play. Come and learn!

YOUNG DEMOCRATS
The Young Democrat Club of FTU will hold a meeting 11 a.m. Tuesday in LR 210. All interested persons are invited to attend.

CIVINETTE CLUB
The Civinettes have been busy preparing for welcoming new girls. Plans are also being made for the upcoming council meeting in Miami. Civinettes are very happy to have a new advisor, Miss Marilyn Busch, who comes from the College of Business Administration. Any girls interested in joining Civinettes may call Carolyn at 841-8816.

Quiz Competition Scheduled By VC
The Village Center is sponsoring College Bowl 1973-74 competition which will begin the last week of October and should be finished during the first week in November. All campus organizations as well as individuals are eligible to form teams and enter the competition. The College Bowl is a quiz program run according to television’s G. E. College Bowl and will consist of a double elimination campus tournament.

Organizations may form as many teams as they wish. Entry blanks may be obtained from the VC. Team should consist of four regular participants and one to three alternates. All must be listed on the entry blank.

ASSOCIATION CONCERT
SCHEDULED FOR OCT. 14

There are still plenty of good seats available for the Association concert, Village Center Assistant Program Director Linda Kastner said Tuesday. The concert, featuring the seven-man group that recorded such million-sellers as “Cherish,” “Windy,” “Never My Love” and “Along Comes Mary,” will be Thursday, Oct. 14 at 8 p.m. in the Orlando Municipal Auditorium, and is sponsored by the VC.

Tickets for the Association Concert are available at the Village Center Ticket Office and are $2 for FTU students. There is a two-ticket limit and ID cards are required. General public tickets are $4 with no limit. FTU persons may purchase any number of these tickets. All seats are reserved.

The fall quarterly concert sponsored by the Village Center will feature the Association, the seven-man group which recorded such million-selling records as “Cherish,” “Windy,” “Never My Love” and “Along Comes Mary.” The Association will perform Thursday, Oct. 4 at 8 p.m. in the Orlando Municipal Auditorium 101 W. Livingston St.

The group was organized in 1965 in Los Angeles beginning with Jules Alexander and Terry Kirkman. The rest of the originals are Brian Cole, Ted Hueschel M., Jan Yester and Russ Giguere, who is no longer in the Association and was replaced by Richard Thompson. Also added to the first six was Larry Ramos, who once sang with the New Christy Minstrels.

Soon after their November, 1965, debut in Pasadena, the group recorded “Along Comes Mary,” which became a rapid success. Their next release, “Cherish,” was selected the number one song of the year, and three Grammy (recording industry) nominations.

On the strength of the Association, Valiant Records sold in company to Warner Brothers for over $1 million, and under the new label, the group has released “Windy” and “Never My Love,” among other records.

The men were introduced to older audiences on television programs, including the Smothers Brothers, Ed Sullivan and Johnny Carson’s Tonight Show, and became the first rock group to star at the Cocoanut Grove. Their concerts have broken many attendance records; in Ravinia Park, Chicago, over 17,000 persons, 3,000 over the previous record set by the Kingston Trio in 1956, created to see the Association.

In 1967 the group received three more Grammy nominations and the Bill Gavin Radio-Record Congress voted them the number one pop group in the nation, which displaced the Beatles for the first time in four years.

The Association, which writes most of its recorded music, was asked to write music for “Goodbye, Columbus.” Although the group was on tour, Paramount Pictures rushed a print of the film to the East Coast for the men to screen. By the next month the entire score, including the title song had been written and recorded.

CAMPUS GLANCES
A common course numbering system will be devised and the student program planning simpler, will be implemented in community colleges in 1972-73 and in the state university system in 1974-75.

The plan is the result of efforts by the Florida Association of College Registrars and Admissions Officers, the Division of Community Colleges and the State University System and will apply to all courses from freshman to graduate level.

STUDENT PLACEMENT
Student Placement officers have been relocated in Suite 225 of the Administration Building. John J. O’Bourne, placement director and seniors expecting to graduate through June 1972 should register at the placement office.

Visitation Rights
Win Vote Favor

Tuesday evening dorm students voted in favor of boy-girl visitation rights in the dorms at FTU.

Visitation privileges will go into effect today if the proper room changes can be made in time, according to T. K. Wetherell, director of housing.

One hundred eighty out of 216 women students living in the dorms voted; 114 voted for visitation and six against. A total of 198 men live in the dorms and 171 voted at the time of the voting; 127 men voted yes and six voted no. A two-thirds vote is required to approve visitation.
Presentation of the Folks
Behind FTU Intramurals

Newly appointed men's coordinator, TIM GILLIS, hails from Palatka, Fla., where he was involved in most all of the phases of high school life. After receiving his A.A. Degree in 1969, Gillis transferred to FTU where he has since been active in intramurals, Tau Kappa Epsilon social fraternity, and filled in as captain and shortstop of the FTU Golfer. Assisting the director in the coordination of the women's intramural program will be two well-qualified women; namely, TAM BURKE and JO OPPSOU. A new face in the intramural office will be that of KATHY MATTHEWS. With experience in typing and office procedures, Kathy will help provide for a more efficient and productive intramural program. Coordinating major sports for women will be a new thing to KAREN MATTHEWS since she has never been involved in all the sports offered for women at Mt. Dora High School.

Intramurals will be

Future Intramurals

ECOLOGY PROJECTS

Dr. Martin Waniekula has requested that students who did projects for his spring "Man and Environment" class pick up the proceeds from the sales of some of the projects. He said a "poisky" ashtry, a Budweiser light and a milk bottle light were among items that were sold. He will refund the money obtained from the sales to the students who made the items. His office is in EN 419.

PERSO N AL GROWTH

The Developmental Center is sponsoring a personal growth laboratory for students. The lab is designed to develop interpersonal communication skills and self-understanding. Interested students may apply at the Developmental Center, Room 316, Residence C.

The INTRAMURALS bulletin board provides a unique identification of the 1st staff. Punny, they all look alike.
Goldsox Seek Out New Players

When the baseball season officially opens for Florida Tech next spring, the FTU Goldsox can look forward to tougher competition.

An expanded 36-game schedule against colleges including Harvard, Princeton, University of South Florida, Embry Riddle, St. Leo, Austin Trey, and Biscayne College means more hours on the road and more hours on the practice field for FTU's Goldsox.

Baseball Coach Jack Pantelias strongly believes that FTU will have a second year of success on the diamonds. Not only does he base his decision on last year's astounding eight-game winning streak, but also because most of the men that made it happen last year will be returning this year.

Included in this roster of returning players will be: outfielder Allen Tuttle, who batted .423 last year, shortstop Tim Gillis, batting a .340 last spring, second baseman Eddy Barks, outfielder Steve Wilson and George Milwae and pitchers Mark Dennis, Billy Spellman and Eddy Baris.

Arrows Need Fourth Member
For Southeast Contest Entry

There are three people on FTU's campus who care enough about representing their university in the old sport of archery, but they need help.

They need a fourth person to enter the Southeastern Championship as a mixed team of two boys and two girls. They have a little over a month to find and train a fourth party to compete for the November 13 meet.

Dena Pickens, Lywayne Harvey and Jeff Morton believe they can place high, if not first, in the Southeastern Championship. One look at their individual records will prove why.

Dena Pickens, who shot for Boyd Community College (BCC) before attending FTU, won first place honors in the All Amateur Women Division in State meet and first place winners in the 1971 Florida College Indoor Archery Championship.

Lywayne Harvey, who also shot for BCC, placed first in the 1971 Florida Indoor Championship, won third place honors in the 1971 Florida College Target Championship and fourth place mention in the 1971 National Collegiate Archery Championship. Jeff Morton, also from BCC, placed first in the 1970 Florida College Target Championship, second in the 1970 Southern Collegiate Championship. Last year Jeff placed first in the Florida Collegiate Indoor Championship as well as in the Student Invitational.

In the future the Archery Club hopes to add more members so that they can have more than one team to enter. Anyone interested in shooting for FTU is asked to call the Future office at Extension 2900.

During the summer, Pantelias recruited first baseman Steve Railsback from Boone High School and first baseman-outfielder Doug Hutto from Oak Ridge High School.

The first organizational meeting of the baseball club will be held Wednesday, in the Physical Education building of the FTU campus.

FTU is still looking for new recruits and invites anyone interested in baseball to attend this meeting.

A WATCHFUL EYE-FTU Basketball Coach Gene "Torchy" Clark carefully selected the style of new team recruits during a practice session held at the Trinity Prep Gym. From the sneak preview of this season's team, which will include FTU basketball superstars Bill Smith and Mike Clark, it appears as though FTU will have a team that will prove hard to beat.

McCollrle The Great Predicts The Sports

by LARRY MCCORKLE

College football, believe it or not, begins its fourth week, and already fans throughout the nation are voicing their opinions about what team is the best in the nation.

Big 10 Conference experts believe that their conference has two possible national champions, Nebraska and Colorado. Nebraska has easily handled its three opponents, while the Buffaloes also are undefeated, having achieved wins over LSU and Ohio State.

Football fans in the Midwest can't seem to decide between Michigan and Notre Dame, while both Auburn and Alabama have received notice from the Southern fans.

Of course, Texas can never be counted out until the season is over.

Just about anyone who writes a column on college football, will try to show off his knowledge (or else make a fool of himself) by trying to predict scores of the weekend games. So here we go.

**Florida State 31, VPI 14**

The Gators will play their best form of the season, but the Vols are just too tough. The Vols' Bishop Mason will neutralize the passing of Reeves to Alvarez, while linebackers Jamie Rondell and Jackie Walker will slow the running of Durrett and Rich. Tennessee has an added incentive of playing against former coach, Tricky Riley.

**Florida State 24, Tennessee 14**

The Seminoles under the guidance of Larry Jones look like one of the top independents in the nation, and it's only a matter of time before they catch the eye of the polls. Quarterback Gay Hauff is just now coming into his own, and he has excellent receivers in Scott Dowman, Barry Smith, and Winter Park's Krist Gaylord. If the offense of FSU falters, little Frank Fontes can kick from 50 yard line.

**Miami 17, Baylor 10**

Fran Curr's got his boys believing that they're winners, and their play last week against highly-rated Wake Forest shows it. The Hurricanes' John Hornibrook quarterbacks for Miami, and he has a host of talented running backs including Chuck Foreman, Tom Sullivan, and Steve Gurne (not affiliated with the Mafia).

**Alabama 20, Mississippi 10**

It looks like the Bear has another one of those teams, The Crimson Tide will roll over the Rebels behind the running of Terry Davis, Joe LaBue, and Johnny Musso, Austin Teay, and Parkhouse of Orlando Boone a sure choice for All-SEC defensive end, leads the defense.

**Nebraska 28, Utah State 6**

Nebraska has another of those pleasant problems of two possible national champions, Nebraska and Colorado. Nebraska has easily handled its three opponents, while the Buffaloes also are undefeated, having achieved wins over LSU and Ohio State.
Ye Ole Fu[Future HORRIDSCOPE
By John the Good, Resident Seer

Friday, October 1, 1971

IF YOU WERE BORN TODAY:

It is written: "No man knoweth the hour whereby October doth pass into bloom, save he count these things which are close to him." Thus, since the stars could not be sounder on this occasion. What October has to offer, only you hold the keys to unlock. Ignore the counsel of those who might be related to you.

AQUARIUS:
The glorious pattern etched into the sky by the moon this month foreshadows a change in your life. The pattern which was drawn in the sand on the back of the Tiber by the son of Deepfried the Great. Grab someone close to you and feed them grapes from the Andes. Better yet, feed them candle wax to seal your soul in.

CANCER:
If you already have a cold, the month is for you.

CAPRICORN:
By tomorrow morning it will be all over.

The staff has given me the honor accompanying my official photo.

By mid-afternoon your left thumb will begin to shrink, and your right hand will feel as if it is located first, but then it will fail the test, however. You, naturally, will crack and the wolf to learn why. If you don't learn why, you will begin to grow a beard tonight, and will turn out to be a Jinni, and will not even be considered by the kiss of three-toed gnome, and you know how rare they are.

GEMINI:
What fun! Why are you out of bed? After the way you worked yesterday you should stay in bed all day. Besides, if you stay in bed, and stay very still and very quiet, they will think you are dead, and the law says they can not prosecute a dead person. How did you find the strength to do all that yesterday? You always did have a mean temper.

LEO:
You will be invited to a masquerade party for the end of the month. I suggest you go disguised as a hypocrite. The costume will be easy to make, and you won't need a mask. You are a heart breaker and a great lover. (It was very difficult for me to write that with a straight face.) Somewhere a great person calls your name out softly in the evenings. It is the perfect mate for you, and has all the qualities you desire in a spouse. You will die before you meet, however, as your secret admirer is also very shy.

MARCH:
You will begin growing a full beard tonight, on the end of your left elbow. Hire out to the fair in the side-shows. It will prove to be the only job you can hold on to for any length of time. You're actually lucky. It could have grown from your knees.

LIBRA:
See Sagittarius.

SCORPIO:
A tall, handsome man will affect your life tonight. He will turn out to be a Jinni, and will turn you into an apricot seed. You can only be changed back by the kiss of three-toed gnome, and you know how rare they are.

SAGITTARIUS:
See Libra.

CAPRICORN:
One of the greatest dangers which faces you each morning is the bathroom mirror. Do not be concerned because there is no image reflected. While it's tough to shave, think of the neat night life you will have after you die. Put on your fake and have patience.

Budget
(Continued from Page 1)

estimated income of $10,000, the budget will be $29,300.

Orientation and Handbook require an allocation of $5,028 in addition to $1,557 for a budget of $7,586. Student Arts and Culture (Theater) had a balance of $211. Their allocation of $3,500 will provide a budget of $3,931.

Intramurals, Extramurals and Recreation managed a $7,344 surplus, which will be combined with a $59,560 allocation for a budget of $67,904. Intercollegiate Athletics will have an estimated income of $30,880. An allocation of $170,733 is provided to give the intercollegiate teams $91,013 to work with. The total budget of the intramural reserve is $71,118.

The total balance for Student Activities and Services from 1970-71 was $63,266. Total allocations for 1971-72 are $905,987, and the Total Estimated Other income will be $102,686. The total budget, as approved by President Millican, amounts to $797,138.

Night Curriculum Increased By FTU

The largest number and variety of evening on-campus courses are being offered this quarter by FTU. A total of 108 undergraduate courses and 33 graduate courses are scheduled for 5 pm or later.

Registrar W. Dan Chapman said over 1,600 registered students had indicated an interest in evening classes.

Evening courses may or not be taken for degree credit. Fees include a one time application fee of $15 and $16 per hour for students taking less than nine quarter hours.

The courses range in scope and variety from Introductory Biology to Advanced Photography.

The forty-year-old Pegasus business, which has been in operation since 1931, succeeds the Now Back to Reality. I am pleased to announce the willingness of the FTU shop to fill our orders. The shop is now open from 8:00 AM to 5:00 PM, Monday through Friday.

Please allow two weeks for delivery. FTU will pay the postage of $1.50 on all orders.

Any returns will be accepted within ten days of receipt. The price includes mailing costs.

Please make checks payable to PEGASUS and mail to:

October 1, 1971

At the outset let me make one thing perfectly clear: I am the President.

Now back to reality. I am pleased to announce the willingness of the PEGASUS Yearbook staff at FTU in Orlando to follow my directives in setting our economy back on the right path.

It's a good thing. The staff has given me the honor of presenting the price of the PEGASUS '72 as $4. That's right folks $4! (Last year it was $7.50).

This of course includes the mailing costs. Sales will start Monday at the PEGASUS office (AD 108).

Complete payment will be made at one time and if you wish you may use the handy mail-in coupon accompanying my official photo graph here.

Now let's get those orders in early. My Fellow Americans; many of you missed out last year.

So long for now, your President.
