Regent Parker Meets With Student Leaders

By Sharon Marek

Regent Fred Parker of Tallahassee met with student leaders and faculty members on campus Monday afternoon, said Parker, and the meeting was held on campus to discuss the major problems facing the State University System.

The growth and development of the State University System has far outstripped the original allocation of $80,000 allowed by the BOT to service the needs of all the universities, said Parker.

"The number of students has grown from the original three to a total of nine," Parker further detailed the problem, explaining that when DOT funds are used by the universities for parking construction, all work must be done by DOT crews to their specifications, which in many cases are more rigorous than would be necessary for university parking.

"Chancellor Mosle and I met six months ago," said Parker, "and began outlining a tentative program which would allow campus people to design their own specifications at a smaller cost than that of the DOT."

According to Parker, the university, under this program, should be able to build adequate permanent parking for approximately $2.50 a year as opposed to the DOT per-year cost of $14.50.

"Hopefully this will help the problem somewhat," said Parker, "however, there is not a lot of hope of ever making parking completely adequate."

The actions of the BOR facilities committee, also discussed vandalism and dormitory problems. He expressed his doubts as to the enforceability of the present policy.

"However," said, "I foresee no change in the policy before the fall term of 1972."

'Borrowing' Is Theft

Stealing is a word that most of us find difficulty identifying with, perhaps because we aren't familiar with its all-encompassing definition.

Stealing also includes certain types of borrowing - whether for an extended period of time or for just one evening. Stealing explains the lack of many catalogued books in the library, even though some of them are just "borrowed."

PROBABLY THE hardest-hit area in the library is the area of periodicals. Students are frequently assigned readings from professional magazines. Granted, it is a great deal more expedient and inexpensive to casually place a magazine in one's notebook, but the only tangible accomplishment is the loss of the magazine to other students. The various bookdrops could serve as a means of getting rid of excess borrowed periodicals.

Many a large university is forced to take drastic steps to avoid being completely cleared out in the area of library resources. Thus far, all FTU has done is lock all doors except the main entrance and exit of the Library Building and set up a check-out table in the lobby which serves to direct outgoing traffic through one exit.

THES STEPS in themselves could be ultimately dangerous. The doors leading from the stairwells have been permanently locked and are now fire exits. This step could cause confusion in the event of an unexpected fire drill, with no one much caring how they leave the building.

A major part of the problem is that it is simply easier to take a book or magazine than it is to wait in line at a copying machine and pay five cents per copy. A nickel a copy may sound expensive, but it is as inexpensive as they can be found anywhere. As far as the lines go, the Library recently purchased four machines to cut down on the time spent in copying.

Stealing is an individual value judgment. But it isn't exactly uplifting to think that the book or magazine you need is gone.

College Of Engineering Offers Core Program

What do courses in analytical geometry, thermodynamics, computer programming and man and his environment have in common? These and other courses are part of the "core program" adopted by the College of Engineering, after consultation with the Board of Visitors, to unify engineering's many parts and to give FTU's engineering students a view of the whole.

Created by the President Charles Millican and Vice President for Academic Affairs C. B. Gambrell, the board consists of 12 members from corporations such as Martin-Marietta and Xerox, from schools such as Stanford and Northwestern Universities, and from the United States Army.

Members serve without pay, meet once a year at FTU and correspond regularly for the rest of the year.

The board exists to give us students, many of whom will leave Florida, that understanding of engineering's many parts and to unify the college in 1969 with the help of President Charles Millican and Vice President for Academic Affairs C. B. Gambrell.

"The board exists to give us background," said Kersten, "and the more visible we are around the country, the better we can serve our students, many of whom will leave Florida."

This idea of a Board of Visitors is not really new, but so far at FTU only the College of Engineering has one. Kersten added: "It has helped us in many ways and deserves to be tried in other colleges too."

Correction

The name of one of the girls in last week's fashion spread was printed incorrectly. The young lady's name is Amelia Evans, not Amanda Evans, as shown.

'SISTER SARA'

"Two Miles for Sister Sara," starring Clint Eastwood and Shirley MacLaine, in the last University Movie, has been a hit. The full-length feature is showing at 8:15 p.m. today and 7 p.m. Sunday. Admission is 50 cents.

In the movie an American missionary in Mexico rescues a woman, who is apparently a nun, from her would-be molesters. He finds that the chance meeting is a stroke of luck for him, too. The drama, in which nursery and fortress walls both explode is set in 19th Century Mexico.

A coffeehouse is scheduled after tonight's movie.
Salary increases for several categories of faculty and administrative personnel have been approved for implementation. The raises are retroactive to the beginning of the contract period of September 1971.

The announcement was made Tuesday by President Charles Millican to the faculty and staff of the American Association of State Colleges and Universities in order to determine which of the planned pay increases would be permitted under the present national wage freeze guidelines.

From the findings and opinions of these groups, Millican announced that the four previously mentioned categories would receive scheduled salary raises.

According to Millican, Vice President for Academic Affairs C. B. Gambrell will confer with the appropriate persons in the Business Affairs areas to immediately initiate the increases.

The president further stated that he would pursue every possible course of action with the commissioner of education and the BOG chancellor to attempt to get pay raises for all other members of the university during Phase II of the wage and price freezes.

THE COLLEGE bowl team of Delta Tau took the overall trophy Wednesday night in the climax of a two week competition sponsored by the Village Center. Delta Tau defeated teams from ATO and Apocalypse in the final night of competition.

Questions Raised On Food Service

By Harry Smith

Is the mandatory food program for resident students or various complaints about the FTU food service valid?

Student opinions on the topic of food service were voiced last week during a meeting with board of Regents member Fred Parker.

James Elley, director of auxiliary services, said the food program is mandatory because the funding of student participation is necessary for successful operation of the cafeterias. He said that without the guarantee of participation that the mandatory program provides, the service could not remain in operation.

The food program was placed on a voluntary basis during summer quarter, but due to lack of the necessary participation it had to be discontinued, Elley said.

"The quality of the food," Elley added, "is the highest quality used." Elley said that in four years of operation he has had one complaint on the quality of the food. "The food used in the cafeteria is the same quality as that used by Morton's Cafeterias.

At an overall assessment of the food service, Elley said that he thinks FTU's is the finest food service offered in the State University System. He said that the resident student is saving 15 to 20 cents per meal over prices paid by commuter students, who, he said, "never gripe, because they know that they are getting a deal."

Frank Santry, Student Government president, called the mandatory food program "ridiculous." He said he feels resident students should be allowed to make their own decision as to utilization of the food service.

When asked his opinion of the food service Santry said, "While the price of the food is reasonable, the quality is very poor." He further stated that he felt the snack bar is a "shame."

Santry said he feels that future food service should be on a competitive contracting basis, if the shared-kitchen concept for old and new food services is not to be used.

In a tentative draft of a Student Bill of Rights which Santry plans to introduce to the Senate there, is a clause that would prohibit the mandatory food program for resident students.

Janet Vickers, president of the Women's Residence Association, who said she has no particular complaints about the mandatory program, plans to ask, "Where else are dorms required to go to eat?" Miss Vickers said she felt that the plan while "not the best in the state, it is not the worst, either."

When asked about the necessity of making the program mandatory Miss Vickers said, "Miss Vickers who said that there are no complaints about the mandatory program," asked, "What is the best in the state?"

When asked about the necessity of making the program mandatory Miss Vickers said, "We are under the assumption that the cafeteria is the same quality as the best in the state."

Miss Vickers said she wanted to know, "why the 400 resident students have this requirement to fulfill when there are many commuter students who are not on campus during the day. Why do we matter so much?"

Bob Carroll, president of the Men's Residence Association, said that he is not against the program being mandatory, but that he thinks an optional plan should be added to the presently offered plan. He said a weekly plan allowing for two meals a day would be sufficient for him and other members of the MRA.

Grasty Cited 'Outstanding' By Educators

Dr. William K. Grasty, executive assistant to the president, was recently chosen to appear in the 1971 edition of Outstanding Educators of America, a national honor based on professional achievement. Grasty's appointment was a supplement to the appointments of five other FTU professors in August.

They are Dr. George F. Schrader, chairman of the department of industrial and engineering management systems; Dr. Ronald Levin, chairman of the department of mechanical engineering; Dr. David Hernandez, chairman of the teaching analysis program in the College of Education; Dr. David L. Back, assistant dean of the College of Engineering, and Dr. Greene Baker, chairman of the department of chemistry.

Grasty said he was "proud and pleased to be chosen as one of several from FTU." He was named executive assistant to President Charles N. Millican on the resignation of George King last spring.

Gurney To Speak At Model Senate

Six FTU students will be among the 1600 delegates at Stetson University's Model United States Senate Program, next Thursday through Sunday.

Guest speakers include Senate Majority Whip Hubert Humphrey, D-Minn., Senate Majority Leader Mike Mansfield, D-Mont., Speaker of the House Carl Albert, D-Okl., Majority Leader Mike Mansfield, D-Oreg., and Edward Gurney, and D-Fla., president of Stetson University.

The students are representing are Robert Smith, political science junior, representing Georgia; Carlson, political science junior, representing Oregon; Baker, chairman of the chemistry department.

A total of 1600 students and the senators they are representing are Robert Smith, political science junior, representing Georgia; Carlson, political science junior, representing Oregon; Baker, chairman of the chemistry department.

Lake Project To Be Ready In December

Student Government's Lake Claire recreation area will be ready for student use "by the end of Christmas at the outside," SG President Frank Santry announced recently.

According to Santry, it was decided at the first meeting of the Lake Claire advisory committee to authorize additional work on the project including electrical wiring for lighting, installation of a well and pump, minimal landscaping including grass seeding, purchase of barbecue pit equipment and sand for the beach area.

The cost of all of this work, including the recently approved land clearing and digging operation by Hubbard Construction will remain within $7,000. Lake Claire allocation carried over from last year's SG budget, Santry said.

No new monies will be spent until "we have a very good idea of how well used the area will be," said Santry. "We intend to approach the engineering and sociological departments to begin surveying student preferences for Lake Claire.

The go-ahead for additional work at the site may be given by the beginning of spring quarter.

The recently approved 1971-72 SG budget includes an item allowing $22,350 for Lake Claire, to be used for this additional construction.

The Lake Claire advisory committee, which includes representatives of the administration, physical plant, Village Center and Student government, will continue to meet regularly to set up priorities for future developments of the Lake Claire project.

President's Abolition Bill Postponed Until Spring

A motion to postpone the constitutional amendment concerning the abolition of class presidents was passed by the Student Government Senate at its October 25 meeting. The bill was delayed for consideration until the third Senate meeting of spring quarter.

SG President Frank Santry, who earlier expressed strong feelings in favor of the amendment, termed this move a "responsible action."

"Sections are over and class presidents should be allowed to operate without the shadow of this bill for the last year for the office over their heads," said Santry.

The controversial bill created differences of opinion among SG senators. Although many of the senators agreed with the present usefulness of the office, proposed actions ranging from passing the bill as it stood to deleting parts of it or tabling it indefinitely.

Proponents of passing the bill pointed out that the enactment date was not until fall quarter 1973, and the amendment could be reversed at any time.

"This gives them one year in which to change their minds," said Senator Sandy Jackson.

"The decision should be made after we have observed the class presidents," said opponent of the bill Senator Jim Brooks. "This is a constitutional amendment and should not be changed on whim."

The office of class president was defended by newly-elected Senior Class President Gary Raspmi who stated that he felt "a lack of specific duties gives the presidents much more freedom to concentrate on any projects which need assistance."

According to Santry, planned objectives of the office include using the class presidents as sounding boards for legislation, assisting in the execution of SG projects and using the president's overall as an advisory board to set SG objectives.

STUDENT GOVERNMENT... SUBSIDY PROGRAM...

COMING SOON:
CENTRAL FLORIDA CIVIC THEATRE ASSOCIATION
Production of Raffens Players - "Home in the Park"
Arnie Russell Theatre, Sunday night December 12, 1971 -
PTU Night. Exclusively for PTU Students.

Florida State Theatres - Tickets good any time at any Florida State Theatre, Price 75 cents.

Now showing:
Beach - "WINDJAMMER"
(Off the Big Band-SATURDAY IN THE MORNING" starring
Richard Chamberlain.
Colony - "FORTUNE IN MEN'S EYES"

Sebastian's Dinner Theatre
"THE LITTLE HUT" - spicy French comedy
Dinner served from 7:00 p.m. Play at 8:40 p.m.
Price $4.00 any day including dinner.
$2.00 Tues. - Thurs. excluding dinner.
Closed Monday.

Book Thief Called 'Psychological Loss'
By John Goldston

Any student who fails to find a book on a library shelf when he needs it, suffers a psychological loss, according to John C. Sanderlin, assistant FTU library director.

"The book may be here—it may even be on the shelf—but just in the wrong place. But the student doesn't care about that," said Sanderlin. "The book may be here but it just doesn't exist to him."

Sanderlin said that there is now no way to tell how many books have actually been stolen within the past three years, even if the figure is closely estimated. He said that the thefts would not reflect the need for the book by the students.

"If there are only three books on a subject which a class of 50 has to research, and one of those three books is missing, then chances are we will get 30 requests for it, and we must report that it's lost 20 times. That might as well count as 30 lost books," said Sanderlin.

Sanderlin said door guards in the library have been strengthened to try to catch a thief, but that if a student really wants to get a book out, he will find a way. "We certainly can't search every student who passes through the door," he said, "nor can we truly watch every door in the building." 

Sanderlin said that the Library Building is being used for several other purposes other than as a library. "There are classes and offices on the second floor, and it's impossible to check every one who comes and goes to those classes.

"The only thing left is to check the electronic devices with which we would register if someone is walking out of the library with an un-checked book," Sanderlin said.

Sanderlin added "but the electronic devices and total installation acts as a big deterrent." 

The library is planning a full inventory during Christmas break, which will be the first inventory since the library opened.

"It is quite a task," commented Sanderlin, "but we will accomplish it. Two things, first, we can find out how many books we have actively lost, and second, we are switching over the check-out system to use an IBM card, rather than the plastic cards. This will give us a chance to make the change in all the volumes."

"They also told me there is very little malicious thievery at the library. "I'm sure that most of it is simply a case of a student needing the book for an extended time, and he feels he is in a do-or-die situation."

"We frequently find books, which have been missing for months appearing on the shelf, but they have never been checked out," said Sanderlin.

Sanderlin said the main concern of the thefts is the replacement of lost back books, not who took them, or even why they took them. "We turn the books on their heads somewhat if we feel someone is trying to bring a book back in," he said.

"We do have a very bad rate of book thefts being apparently missing," said Sanderlin. "Whether they are gone or not, it is very difficult, if we are not on the shelf when they are needed."

Sanderlin was working on trying to cut down the losses, and trying to keep the shelves read in order, but presently it is a pretty bleak picture," he said. "Until we move into the new building, and things are more organized, we are simply losing two things on the shelf."

The new identification cards will allow students to check out books from almost any other state university library, and will allow students from other universities to utilize the FTU library while they are here.

"We have great hopes for the new library, and we are still going to need student cooperation."

Grant Requests Exceed '70 Total

FTU's number of applicants for grants for the fall semester has exceeded the total number of grants for 1970. Three weeks ago the 100th grant was applied for, and thus has now increased to 115 according to Leslie Ellis, dean of Graduate studies.

Applications are sent to sources outside the university, and these include the federal government, industry and private foundations. Although in the past research grants were being sought and fulfilled, organizations are now funding more graduate students.

"It's in parts of Germany," said German Instructor Finley Taylor, at right, describes FTU's educational systems to a group of West German school administrators, teachers and teachers and teachers who toured campus Monday. The West German visitors are touring the United States to get "a first hand look at education in the United States."
ENVIRONMENTAL COUNCIL

The FTU Council for Environmental Improvement will hold its final meeting 3 p.m. Monday in GC 117. The purpose of the council is to allow students to participate in solving environmental problems. Among its goals are the establishment of a new campus-wide solid waste recycling system and the annual celebration of Earth Day.

KAPPA TAU

Kappa Tau, the journalism honor society, will hold its fall quarter initiation banquet Saturday, Nov. 13 at the Banana Haus Restaurant in Winter Park.

Richard King, a recent graduate of FTU and news director at radio station WFTU, will be the featured speaker. King will speak on college preparation for work in the "real" world.

All students and faculty members are welcome to attend; for further information contact Dr. M. Timothy O'Keeffe at 275-3001. All persons who plan to attend the banquet must contact O'Keeffe before noon Tuesday.

PHYSICS SOCIETY

FTU's Physics Society will present an exhibit at the Instrument Society of America Convention at Cocoa Beach Sunday and Tuesday.

Scott Campbell will present a holography demonstration while Bruce Stockton and Mike Herman will present a demonstration of transmitting music via a laser beam. Stockton will also demonstrate Faraday cell laser modulation system.

Other demonstrations by the Physics Society will include the specular properties of light scattering off objects with reflective indices the same as their surroundings. Dr. Fritz and Bob Woshoff constructed this exhibit.

The exhibits will be open to the public on Tuesday from 10 a.m. to 9 p.m., and on Thursday from 9 a.m. to 5 p.m., at the Atlantic Beach Motel in Cocoa Beach.

The Physics Society will also be presenting a series of demonstrations to physics and science students at high schools located in the central Florida area.

CHESS CLUB

The Chess Club will meet 7 p.m. Monday in GC 104. Last week the club received $50 from Student Government for the purchase of chess clocks. These will be used for tournaments in upcoming quarters.

Members who have not paid their dues are requested to bring them this week.

Campus Glances

PART-TIME LATE FEE

All part-time students who register late will be subject to a late assessment of $10, beginning in winter quarter. Late full-time registrants will still be assessed a $20 late fee. To avoid the late fee assessment, students must register fully and pay all fees by January 7.

FORMAL SORORITY RUSH

Deferred To January

Formal sorority rush activities will begin this month with a Panhellenic Coffee for all women interested in Greek Rush. The coffee will be held Monday November 17 from 7:30 to 9:30 p.m. to give out information regarding the Greek system and the individual sororities.

Dean of Women Carol Wilson will speak to the prospective members about Panhellenic and sorority life, sorority representation will include 10 members of each group and there will be no mercy displays or Greek jewelry or clothing.

According to LaDonna Wann, a chairman of rush, "the coffee is a Panhellenic activity and will introduce prospective members to the Panhellenic.

This year's rush has been deferred from October to January in order to allow freshmen a sufficient amount of time to get used to the campus and so that the sororities will have a smaller quota of girls to work from.

Registration for rush will begin after the Christmas break from January 3. Cost will be $2 and registration is scheduled to be held in the Library or at the Kiosk.

Rush parties will occur during the week of January 9-14. Phase I will be an ice-water tea held on campus from 3:30-5:30 p.m. A series of parties is mandatory for all rushes. Each girl will attend parties given by all four sororities.

Phase II will be a casual split party on January 10 and 11 from 7-9 p.m. Business may attend all four parties if they receive invitations. Sorority choices will be narrowed down to two after Phase II.

On Thursday, Jan. 13, the Phase III informal party will be held from 7-9 p.m. and 8:30-9:30 p.m. Preference parties will be Friday night from 7-9 p.m. and 8:30-9:30 p.m. Dates are offered first and the parties will be followed by preference signing at FTU. Rushes will then rank the four sororities in order of preference.

Rides will be released on Saturday, Jan. 15 at noon in the Dean of Women's office.

There are velours, and there are Hathaway velours

A few years back everybody and his brother was making velour sports suits—al with the quality of a paper kite. And, predictably, the bottom fell out of the market.

Well, men still like velour for Fall and Winter. It's good looking. It's warm. But and velour is now a shoddy product and never will be. Turn back the collar and the placket and see for yourself. There are velours, and there are Hathaway velours. $22.

A delegation of PAR brothers and little sisters attended the Sigma Alpha Epsilon Province Convention last week in Boca Raton. The host for the Province was the Sigma Alpha Chi fraternity, a local group at Florida Atlantic University.

Wednesday Phi Alpha Epsilon was unanimously accepted as a colony of SAE. The Council picked FTU for the 1973 Province Convention. The meeting will be held during spring quarter. The Phi Alpha’s will be the host fraternity. Thanks go to the "Patrons" for their hospitality.

A party will be held tomorrow night to celebrate colonization. A Halloween party will be held this Sunday night at brother Jack Stacey’s and Don’s "Hedges’ house. Congratulations to the brothers and little sisters really had a great time.

Chris Johnson gets the EHA award this week for his outstanding display of Motorcross at the party. Last Friday little sister Kathy Lauten had a birthday party at her apartment and Monday night the brothers, pledges and little sisters got together and partied at the TGI.

The Phi Alpha’s wish John Mike Walker and Dale Wise for a fantastic Halloween. Congratulations on the engagement tomorrow.

The brothers congratulate Jim Cardella, who was elected president of the junior class, and Rick Schults, elected governor of the College of Business Administration.

The Histor Fred Carter, has announced that he will soon unveil Rotundo, John Speer, Marc Scala, and little sisters attended the Sigma pledges gathered together for an intramurals competition this past week in Cross dormitory. Mike Holloway has taken the junior class, and Rick Roberts will allow the Pikes to use his Walker’s cabin for the all night gathering. On Sunday the Zetas will entertain the Pikes at the Springs for a picnic social.

Colonization seems to be coming at the end of this quarter for the Pikes. A local fraternity at VIC will also be colonized Pi Kappa Alpha, giving two colonizing fraternities and a feeder chapter to the FTU chapter.

The Pikes wound up the football season disappointed but with the realization that they were fully initiated into the the seven man flag league. On Thursday brothers and Pikettes went to Disney World together using the free tickets given them for participating in the opening parade.

This past Saturday night, the annual Kappa Sigma Halloween party took place with many unusual costumes making the scene. Congratulations go to Lee Costantine and Bill Massaker for having the best costumes.

The brothers are looking forward to the upcoming football game to be played today at the Aloma Elementary School. The pledges are confident that the Brothers will take care of business.

All brothers are urged to attend the meeting Sunday at 7:30 p.m. Elections for next year’s officers will be held. The meeting will be formal and will be held in LK 245.

The brothers of Lambda Chi Alpha are busy finalizing plans and raising money for their November 28 charter banquet. Tomorrow the brothers and associate members are painting houses to raise the remaining funds. Last Sunday night the brothers held the final black ball session on the associate members. All passed and are looking forward to the November 19 banquet.

Practice for the three volleyball brothers of AK Pi will attend a Tri-Delta banquet at 7 p.m. Congratulations to the Brain Tri-Delta would like to extend a warm thank you to the RIT Lambda Chi Alpha Fraternity for the social last Friday. It was enjoyed by all sisters.

Tri-Delta Darlings just finished their last volleyball game.

 cheaper in the long run

You will never cost you much, (You'll get up to 27 miles to the gallon.) And the oil that you use is like a drop in the bucket. (It only takes 7 quarts and almost never needs more between oil changes.)

And the engine is air-cooled, so you don't have to spend a red cent for anti-freeze or rust inhibitors.

And you get more than your money's worth out of a set of tires.

But don't buying in new volkswagen is just another old rip-off scheme.

You have to wait until the next set of tires wear out.
Soccer May Discontinue

Fate Of Team

Decided Today

by John Gordon

FTU soccer may soon be a university sport of the past because only a very small handful of players care one way or the other about its future.

Of the 22 students that tried out for soccer at the beginning of the fall quarter, two dropped out at the beginning of the fall quarter, two dropped out at the beginning and five left the team gradually as the season progressed.

One of the five was considered by captain Bob Steadman as being the best player on the team. He played forward, and left because there was no "team spirit." Others found that playing intramural sports for their fraternities or independent leagues was more important than supporting FTU soccer.

The FTU soccer program needs more interest than it now has. According to Steadman, the Soccer Knights have lost all four of its games so far this season because of a lack of experienced alternate players for substitutions whenever they are needed. "In our last game against Sheldon College, I played out the entire game because any substitutions made would have just made the score worse," Steadman said.

For an intramural sport, soccer lacks the one driving element that leads teams to victory. That element is student support. In many of the Florida's junior colleges and small universities where soccer is ranked the number one or two sport of the athletic program, sidelines are filled with screaming students and cheerleaders to give support. Here at FTU basketball, wrestling and an occasional intramural football game will bring out a great crowd of students per game.

Apathy strikes deep in the hearts of athletes. If nobody cares to come out and watch them, it often ebbs them to sub-par performances. If apathy affects the pros, it team up the amateurs. And this is my point. Here at FTU, we have a new sports program. Most of our sports haven't reached varsity status yet. But we have many good athletes. Who knows how much better they could be if someone would come out and watch them, it often ebbs them to sub-par performances.

As a student and professional weightlifter, says, never have I reached the position where I have had the opportunity to be at an FTU meet against Brevard College Olympic Championship Meet. Here at FTU basketball, wrestling and an occasional intramural football game will bring out a great crowd of students per game. But, on the other hand, if somebody would come out and watch them, it often ebbs them to sub-par performances.

The FTU wrestling team will be pressing forward. 

POOL HOURS

Beginning Monday FTU pool hours will be changed to 2-6 p.m. daily, Monday through Friday. Pool hours on Saturday and Sunday will be 1-4 p.m.

Stadium Motocross Is World Of Bikes And Men

By BRAD FULLER

Motocross is the second most popular spectator sport in the world, and probably each of the more than 17,600 people who witnessed the $8,500 purse races at the Orlando Sports Stadium Sunday can tell you why.

There were two classes of bikes racing Sunday; the 500cc International racers competing for points applying to the World Championship title, and the 250cc support class, competing for points applying to the Trans-AMA National Championship title.

On a television interview prior to the race, Sylvain Geboers of Belgium predicted that he would win the 500cc class and that Heikki Mikkola of Finland would be number two. This would be the third place start to easily finish first and to the finish straight. The after 50 minutes only Geboers passed Mikkola and his Husqvarna remained between Sylvain and the finish line. When the dust cleared after the race, however, Mikkola of Sweden, the man who witnessed the races at 26-year-old Geboers had never relinquished.

After ten minutes he had worked his Suzuki into third, and by the end of 30 minutes only Mikkola and his Husqvarna remained between Sylvain and the finish line. On the final lap, Mikkola held just a slight lead and then the two riders dropped out of sight of the judging tower. As the two bikes exploded over the high jump, Geboers passed Mikkola in the air and maintained that slight lead through the last turn and into the finish straight. The third place race gave the Belgian a first lap lead which he never relinquished.

Geboers had entered the Trans-AMA International event with just a 30-point lead over the second place rider on the world circuit, Torleif Hansen of Sweden. Honored by Husqvarna, Geboers walked away Sunday with 2,116 points and $3,100. Although Hansen picked up no additional points this weekend, he still holds the second place point total of 1,630, while separate heats. The length of the heats vary with the classes of bikes.

Mikkola moved from a fourth place world standing to third, by adding 320 points to his 910, giving him a nine-point lead over Adolf Geiss of Germany, riding a Maico.

Geboers has captured two thirds and two seconds in world competition for the 500cc title. Roger DeCoster is the current 500cc World Champion. Roger rides a Suzuki, but was not there Sunday. In the 250cc class, Doug Grant rode an AAM to first overall by taking two firsts and a second for the day. Second place went to Tom Hopp on a Beta and third to Dewayne Jones riding a Yamaha. Fourth went to Barry Higgins on a CZ, and Gary Chaplin was fifth on a Maico.

Motocross is one race run in three the first heat he moved up from a third place start to easily finish first in the 30-minute race. The second race, however, was the most hotly contested of the day as 26-year-old Geboers had won the sixth place position after the first lap.

After ten minutes he had worked his Suzuki into third, and by the end of 30 minutes only Mikkola and his Husqvarna remained between Sylvain and the finish line. On the final lap, Mikkola held just a slight lead and then the two riders dropped out of sight of the judging tower. As the two bikes exploded over the high jump, Geboers passed Mikkola in the air and maintained that slight lead through the last turn and into the finish straight. The third place race gave the Belgian a first lap lead which he never relinquished.

Geboers had entered the Trans-AMA International event with just a 30-point lead over the second place rider on the world circuit, Torleif Hansen of Sweden. Honored by Husqvarna, Geboers walked away Sunday with 2,116 points and $3,100. Although Hansen picked up no additional points this weekend, he still holds the second place point total of 1,630, while separate heats. The length of the heats vary with the classes of bikes.

Mikkola moved from a fourth place world standing to third, by adding 320 points to his 910, giving him a nine-point lead over Adolf Geiss of Germany, riding a Maico.

Geboers has captured two thirds and two seconds in world competition for the 500cc title. Roger DeCoster is the current 500cc World Champion. Roger rides a Suzuki, but was not there Sunday. In the 250cc class, Doug Grant rode an AAM to first overall by taking two firsts and a second for the day. Second place went to Tom Hopp on a Beta and third to Dewayne Jones riding a Yamaha. Fourth went to Barry Higgins on a CZ, and Gary Chaplin was fifth on a Maico.

Motocross is one race run in three times. In international competition the heats are 30 minutes long with 30 minutes between heats. The course is closed circuit track three-fourth to 1/4 mile long, usually with every conceivable natural hazard to the riders. Motocross requires a man combination of speed, courage, balance and stamina, which must always be coupled with a mechanically perfect machine. If a potential winner misses just one race of the series, he will have very little chance of regaining his lead for the world title.

This Sunday, the sixth meet of the 10-event, $120,000 Trans-AMA series will be in St. Louis, Mo. That race there will be $10,000.

Golfers Set Up Qualifying Bouts

The FTU Golf Team has scheduled qualification rounds for next Thursday, and Friday, at a local golf course to determine the six starters for the following week's match.

The golf team will be practicing throughout the following weeks for these qualifying rounds. Any member unable to make the 11 a.m. meeting Tuesday in the Engineering Building, 109 can call Durry Howard at 465-1894 to be assigned a foursome and starting time for the qualifying round.

The Great McCoRlce Predicts The Sports

BY LARRY MCCORLCE

After eight years of Saturday afternoon columns, there still remain 10 college football teams with unblemished records.

Three of these, Alabama, Auburn and Georgia, represent the Southeastern Conference. Alabama has LSU, Miami and Auburn left to play, while Auburn plays Mississippi State and Georgia before the big game with Alabama.

Louisiana Tech, Mississippi State and Florida, however, represent the SEC. Tech faces Alabama in the season opener and both Mississippi teams have games with unblemished teams.

The author's number two and three teams, Nebraska and Oklahoma, represent the Big Eight. Nebraska appears to have the better balanced team on paper with a game-controlling offense and a solid defense (third in the nation in fewest points scored upon). Oklahoma has given up 133 points this season defensively, but with an offense averaging 47 ypg. Coach Chuck Fairbanks has little to worry about.

One of these teams will hit the dust on Thanksgiving Day. My guess? Any football expert will tell you the basis of a good football team is a rock-hard defense, but in Oklahoma's case I think you have to make an exception. I think you have to make an exception. I think you have to make an exception.

If you think you have to make an exception, you have to make an exception.

Oklahoma's defense is so solid that it can put up a contest with Alabama. The Sooners' defense had 6-0, 6-6, 19-19, 20-12 and 23-6 victories, while the Crimson Tide had 23-0 and 23-14 victories, as well.

The Sooners' defense had 6-0, 6-6, 19-19, 20-12 and 23-6 victories, while the Crimson Tide had 23-0 and 23-14 victories, as well. This is the most important of the victories, the 23-0 game, as it was tied with the Crimson Tide last place in their division.

In their division, the 23-0 game, as it was tied with the Crimson Tide last place in their division.

This week the story centers on the Bombers, last year's defending champions.

The Bombers are now in first place in the gold division with a perfect 6-0 record, and have won the right to meet stout in the first round of the playoffs last week. The Bombers played three games. They defeated 23-27, All Stars 13-0, and the Palo Verde 23-6.

The most important of these victories, was the 23-0 game, as it was tied with the Crimson Tide last place in their division.

IF YOU WERE BORN TODAY:
You will contract a fatal headache tonight. It will spoil your weekend.

AQUARIUS:
You will finally get enough money this evening for that world cruise you have been waiting for all your life; you will sail off the edge and become famous by proving that the world is truly flat, and the flat-earth society was right.

PIECES:
Avoid trimming nose hairs this week. Train them to form a good mustache and hope that you don't get a cold. Nose hairs with heavier frames—they hide GEMINI:
sail off the edge and become PISCES:
world is truly flat, and the flat-earth society was right. money this evening for that TAURUS:
headache tonight. It will spoil AQUARIUS:
You are good for you.

CANCER:
That's a nasty cough you've developed. That's what you get for riding the bus. The cough will settle in your knees and will develop into cancer. They will name a new type of cancer after you and your sign. None Cancer, it will be a smashing success.

LEO:
You registered Democrat and voted against the corporate tax. You live in Florida and don't drink orange juice. You hate fun of Polacks but mark 6 one, You're extremely inconsistent. Do you realize that? Do you care?

CAPRICORN:
Klutz, Schmoo, Creep, Prank. God. Jerk. Stay off the streets part-time supervisory positions. Inconvenience for students with 8

Cancer:
The winner of next year's Miss America contest will almost be a tinker toy robot built by a Scorpio. She will stand in Florida but her green sticks will come loose during a dance routine, and your sign will live in shame for seven long years.

SAGITTARIUS:
You are a great and respected leader of men. You, however, will fight the urge and respected leader of men. You,
just polishing your feet? just polishing your feet? You don't get a cold. Nose hairs with heavier frames—they hide

Virgo:
Don't harm any small bugs today, if you can help it. One will be of great assistance to you later, when you discover your slimes need cleaning out.

Libra:
If you could draw you might be a good artist. You have the temperament and the lack of patience for it. I have not better tempered paste-pots in my day. It's no wonder your mother moved out last month.

Scorpio:
Whenever you sing, it comes out like "The Battle Hymn of the Republic." That's not necessarily bad, mind you, but it is monotonous. Try to diversify and branch out this weekend. Your fellow church-goers and I will be appreciative.

Sagittarius:
The winner of next year's Miss America contest will almost be a tinker toy robot built by a Scorpio. She will stand in Florida but her green sticks will come loose during a dance routine, and your sign will live in shame for seven long years.

Capricorn:
Klutz, Schmoo, Creep, Prank. God. Jerk. Stay off the streets part-time supervisory positions. Inconvenience for students with 8

FTU Volunteers Sought To Aid Deprived Youth

Volunteers are needed to assist Youth Programs, Inc., a non-profit organization which works with delinquent, pre-delinquent and economically deprived children.

Street workers are needed to organize the boys and girls into small cohesive clubs throughout the community. These groups will be involved in such activities as canoeing and handcrafting, sewing and guitar classes.

Volunteer street workers must be able to give at least one afternoon or evening a week and may occasionally be expected to participate in a weekend activity.

Volunteer caseworkers are also needed. A resolution supporting the needed to render social services to extension of library hours was the families of these youths. The resolution was approved at the October 21 SG Student Government meeting, but a minimum of two days a week is necessary. Caseworkers assist in extension of library hours from 10 such things as recommending family and suggesting employment contact or medical aid.

"Anyone who has an interest in working with children can participate in the program," said Mike Neidig, coordinator for the program. There are no age limits, program. There are no age limits, program. There are no age limits, program. There are no age limits, program. There are no age limits, program. There are no age limits, program. There are no age limits, program. There are no age limits.

According to SG Vice President Charles Simpson, additional funds for salaries of $1,400 a year would be required to keep the library open the extra hours.

Youth programs, Inc., which coordinate solutions could present problems. The current training program will continue, and students would be forced to take part of the program and part of the library was not
