A land use planning committee of Dr. Martin Wanielista's "Man and Environment" class is researching the county to obtain information for a report to be released next month. A few of the findings uncovered by the committee thus far include the following:

The Winter Park area has nearly doubled the national per capita average of solid waste disposal. On the corner of Citation Avenue and Fernreek in Orlando stands an historical marker commemorating the Council Oak, a Seminole Indian meeting place.

Some environmentalists consider the period from 1880 to 1896, when the logging industry began in Central Florida, to be the beginning of Orange County's environmental problems. The committee, composed of 28 students, has been preparing the report on present and future uses of land in Orange County. The report will include the group's recommendations for land use planning in the area.

One result of the committee's work will be a map of Central Florida showing areas already developed, areas proposed for development, and areas recommended for particular uses - non-residential or non-urban. The map will be placed on a competitive basis as units will reduce the turnover rate of developments currently being planned and constructed in the surrounding area. Students on file. The consensus of the Board of Regents report to be released next month. The average of solid waste disposal; off-campus housing available to students, etc. Another major section of the report will deal with the proposed area to be known as "Model Community" and the students who are unable to keep their appointment times. Advisement forms are now available the Student Government.

Dr. Martin Wanielista, the proposed east-west expressway, included additional points of SR 416, have been outlined in green, yellow, and red. Dots of gold, green, yellow and blue indicate locations of historical sites, solid waste disposal areas, waste treatment plants and water treatment plants, respectively.

Students Clarabelle Haller, Bill Frick and Charles Neale, project director, have also included triangles of green, gold, green, yellow and pink to indicate parks and recreational sites. Land for the recently-approved Turkey Lake project has been identified by a green and gold triangle with a red dot.

Among other areas to be noted on the map are the localized school areas to illustrate the section of the final report that will be examined by the school situation. According to preliminary findings in the education phase of the report, a combination of future taxes and further construction of needed facilities may provide adequate employment for teachers now being graduated from area colleges and universities, particularly FTU. This quarter the College of Education will graduate more than 70 students.

FTU and its importance in the community will be considered under the topic of housing and urban environment. It has been ranked as an "influential area" along with the University of Florida, Sanford Training Center and Walt Disney World. FTU will be included in the present urban environment, the impact of Disney World on the economy, the population and surrounding land, a history of the Orange County area, and waste water and air - the present situation in relation to pollution control.

FTU Area To Be "Model Community"

FTU will likely become the center of a model community, as revealed by the rapidly increasing number of student-oriented housing developments currently being planned and constructed in the surrounding area. A total of eight apartment complexes, mobile home parks and housing subdivisions, which will make available thousands of dwelling units to FTU faculty, staff and students, are currently in the planning or construction stages by various local developers.

FTU on-campus housing will not be placed on a competitive basis as a result of the boom in construction, according to T. K. Wetherell, director of housing. "The residence halls and the off-campus developments attract different segments of the university population," said Wetherell.

He also said that the off-campus units will reduce the turnover rate in the dorms because students will have the opportunity to live in more than one type of residence hall. In addition, the model community concept will be critical for student housing.

According to a recent article in the Orlando Sentinel, after these first priority needs are met, the directed efforts will be to begin work on patio houses, condominiums and single family dwellings. dormitories."

THANKSGIVING DRIVE

FTU's Black Student Union is planning to bring food to 250 needy families in the Central Florida area through a canned food drive. The group is asking for food that has not been used for Thanksgiving Day.

BSU representatives said the group will appreciate any donation, whether food or money. They will be asking for donations from businesses, students and faculty. Boxes for donations will be placed in the various dorms and on campus with the exception of the Administration Building.

The Black Student Union has a membership of 50 students. Each student will select five deserving families in his area to receive food.

Due to the shortage of on-campus housing, an ever-increasing number of FTU students are expected to seek housing off campus. As a result, area developers are planning to direct construction of apartment units first to meet the soon-to-be greater need.

FTU will probably always maintain a limited number of dorms and there are no plans to gradually phase out the present halls or build more, Wetherell added.

Supervisor

To Register FTU Voters

As part of an effort to register as many eligible voters in Orange County as possible, representatives from the Orange County supervisor of elections office will be on campus Tuesday and Wednesday.

The FTU registration program is being coordinated by Lambda Chi Alpha Fraternity with the backing of Student Government.

Elise Barber, Orange County supervisor of elections, has indicated she will send three clerks to FTU for the two days of registration. Registration of students will take place in the lobby of the Library Building.

Mary Leland, president of Lambda Chi Alpha, said, "We want to inspire the students to vote and help make their mark on the community. It has been said that FTU students are apathetic, but we believe that our students can rally behind some issues that affect us directly."

Students receiving financial aid must take their class registration and fee assessment forms to the financial aid office, AD 266, to obtain their checks to be presented to the cashier.

Students receiving assistance from vocational rehabilitation must report to the cashier with their registration and assessment forms as soon as the forms are received, in order to receive financial aid.

Regular registration to be held January 3 and 4.

Debate Team Scores Wins

FTU's debate team tested its mettle against some of the finest debaters in the United States last weekend at Emory University in Atlanta.

Two teams from FTU were entrapped in the tournament, and each team scored three wins and five losses. A total of 150 teams had been entered.

Carl Boyles and Jack Hight, comprising one team, defeated the University of Nebraska, of North Carolina and Georgia State, while losing to teams from the University of Massachusetts, Pittsburgh University and Stanford University.

Jeff Ranger and Dave Larkin, both freshmen, also scored three victories in their five losses. They lost to teams from Florida State University and against senior debaters from schools such as Ohio State, Michigan State and University of Richmond.

The team's next tournament will be at the University of Florida at Gainesville on November 19 and 20.
Now Is The Time......

A variety of problems plagues the average college student in the area of scheduling time needed to accomplish the many things that must be done. One of the main hurdles is that the student spends too much time doing those things he has to do (reading, studying, term paper research) to allow sufficient time for those things he wants to do or should do.

Such as registering to vote and actually casting a ballot. NO ONE can really help in the actual voting process. You either want to or you don’t, and you either provide or don’t provide for the necessary time.

But registration is another matter. Understanding the “battle against time,” Lambda Chi Alpha fraternity is sponsoring a “bring the registration to the people” campaign, designed to get students on the voting rolls.

Representatives from Elections Supervisor Dixie Barbee’s office will be on campus Tuesday and Wednesday to register students. They are providing an opportunity, a privilege and a responsibility.

The OPPORTUNITY lies for people to attempting to make registration easier for the students. The privilege and the responsibility belongs to the student. You cannot be forced to register and vote, but considering the clamor for the youth vote in the past few years, one would expect overflown lines at both the downtown office and at Tuesday’s registration campaign.

As college students, the 18-20-year-old segment would be expected to be just that much more interested in securing the privilege of voting and living up to the responsibility that goes along with it. The university segment is generally better informed and more prone to become involved in politics than his working counterpart. But only time will tell.

It will probably take about five minutes to obtain the opportunity to help determine this country’s political future. The 1972 political year will prove to be a pretty dull one if, after weighing all sides of a question, you can’t even make a choice.

And this time, it won’t be because you’re not allowed to.

Letters To The Editor

Spirited

Dear Editor:

In reference to the article in last week’s edition of the Future, “Soccer May Discontinue, Fate of Team Decided Today,” the line “As far as cheerleaders go, this writer has not seen one since last week’s edition of the Future. Cheerleaders in action yet.”

It is disheartening to think that a modern university like FTU has been infiltrated by students who, through their passive behavior, reject every and any attempt to broaden their limited spectrum of interests.

Bill McCraith

Letters To The Editor

Save Soccer

Dear Editor:

I certainly hope that FTU does not officially discontinue playing soccer. As good people in the civilized world—except Americans know, soccer is one of our international team sport. As an athletic sport, it far surpasses American football. The players on an varsity soccer team are athletes in the finest sense of the word.

Dear Editor:

PTU! Apathy! Perhaps the fact that the basic attitude is apathetic should not be brought to the fan by saying, “We are apathetic.” Rather, we should publicize the fact that “we are enthusiastic!” In other words, take a positive attitude.

So we are asking Mr. Gordon’s help in taking a positive attitude by pushing enthusiasm and talking up the cheerleaders.

Eileen Brennan

Poetically Yours

ADVICE

Advice is something like the shoes—And it would surely pay—

If it would just fall softly—Then this advice should stay—

Letters To The Editor

Apathy Problem

Dear Editor:

PTU is faced with a major problem which is hindering its expansion as a futuristic university. Contrary to popular belief, it is not the acquisition of funds for further construction which is delaying the growth of our school. Instead, it is the widespread apathy which has permeated the majority of students on this campus.

Evidence of this condition is so prevalent that it is not even considered unusual any more when any student inability fails to receive an adequate response from the students. It appears the only thing that generate interest are fraternal organizations and the intramural sports program.

Apparently, PTU students, unlike students in other universities, fail to realize the need for participation. Recent attempt to form an environmental improvement group and a health awareness group failed because there was no interest shown. This is quite disturbing to think that out of 6,000 students, no one cares or wants to become involved with either of these pertinent topics.

It is disheartening to think that a modern university like FTU has been infiltrated by students who, through their passive behavior, reject every and any attempt to broaden their limited spectrum of interests.

Genre - Based Courses Offered In Literature

All things come to him who waits, and students who have been waiting for special genre-oriented English courses will have to wait no longer than winter quarter. Those courses, designed to appeal to those who feel literature is the most intimate of man's expressions of self, have no prerequisites and are open to all students.

"Love Poetry from Dante to Donne," ENG 491.03, will be taught by Gerald Schiffhorst. The course is a study of serious and comic dimensions of love as expressed in selected major poetry of England and the Continent through the age of Shakespeare. Among topics to be discussed are the woman in the sonnet sequence, Neo-platonic theories of love and the uses of erudition in Marlowe, Spenser and Shakespeare.

Mrs. Beth Barnes will teach "The Role of Woman in the Literature of Man," ENG 491.01. This course is an investigation of the attitudes toward women in literature prior to the neo-feminist movement. Selections will range from such works and authors as the Bible to Shakespeare to Albebrand, Freud and contemporary men's magazines.

ENG 491.02, "Poetry as Vision," will be taught by Mrs. Norman Mason, and will be an exploration of the prophetic role of poetry in distillan (great flood) mythic dualism and its historical modifications. Study will include the magical songs of Homo-Uragi and Siberian shamansim, prayers of ancient Tartary, hardy songs of the Celts and Druids, and selections from the Romantic poets.

A delegation of six students are attending the and vote on. Students will have the opportunity to debate and discuss their issues on the floor of the mock senate, an atmosphere which will greatly increase the reality of the sessions.

"Our students attending the senate were given a list of available senators to choose to represent," said Jervey. "By no means did they choose senators whose viewpoints they agreed with."

The Model Senate which began yesterday is intended to give many cases written to their senator they agreed on. According to Sen. Alan Keyes, the Model Senate was planned initially by two Stetson students, Sandy McCandless and John Prater, has received national attention as "being the only place going into an election year where there will be no movie, Planetarium next Friday at 9:15 investigating the background of Shakespeare to Albee, Freidan and The Coffeehouse will open at 8 of the Central Florida Museum and some two to three months the sessions."

A delegation of six FTU students are attending the Model U.S. Senate today at Stetson University in DeLand.

The model senate, which was planned initially by two Stetson students, Sandy McCandless and John Prater, has received national attention as "being the only place going into an election year where there will be no movie, Planetarium next Friday at 9:15 investigating the background of Shakespeare to Albee, Freidan and The Coffeehouse will open at 8 of the Central Florida Museum and some two to three months the sessions."

The students, each of them representing or actually playing the part of a U.S. Senator, have spent some two to three months investigating the background of their respective senators, Jervey said. "The students have researched the Congressional Record, the Congressional Quarterly and in many cases written to their senator and received answers in the form of volumes of information," said Jervey.

SuTure's Friday Girl

In the spring and summer of this year a schedule of exhibits for the FTU library lobby was organized. This schedule proposed that during the first two weeks of November, FTU would host a display of Mark Lynch's sculptures. When Lynch was unable to "go on," a relative unknown, an understudy was called forth from the wings. In the best tradition of the theatre, i.e., "...the show must go on..." the unknown was revealed to be FTU's director of instructional media, Dick Cornell.

Cornell calls his exhibit an "Interim presentation" consisting of "everything from the walls of my home." By way of background information, Cornell explained that the display--all contemporary pieces from East Africa--were collected on a field trip he and 11 other men made which was sponsored by the American Association of Colleges for Teacher Education, the Agency for International Development and the U.S. Office of Education. The purpose of the trip was to gather first-hand information about East Africa and then assemble written and audio-visual materials for possible development of a curriculum of study on East Africa for classroom use. Although Cornell readily admits that it is impossible to capture the essence of East Africa on a six-week field trip or do justice to her cultures, at least a teacher has access to factual information that, until now, was not available to any teacher.

A brief listing of the items on display consists of a number of coins, ancient and modern, shields made of water buffalo skin, beads from the Masai tribe that began as a substitute ends as a distinct star in its own right. Available to any teacher.

A curriculum of study on East Africa for classroom use. Although Cornell readily admits that it is impossible to capture the essence of East Africa on a six-week field trip or do justice to her cultures, at least a teacher has access to factual information that, until now, was not available to any teacher.

The company is in its seventh year as the only professional repertory theatre in South Carolina, and is one of the few self-supporting professional theatres in the U.S. The troupe will appear on the VC green at 11 a.m. Tuesday.
"Uncle Glenn" T. Wants Students

Being A Full-Time College Student Costs, Many Must Work To Pay Their Way

By John Goldston

students are forced to support themselves as much as possible, "which means like get a job," to quote from "West Side Story." So, while many students get whatever jobs are available, busing tables, washing dishes, janitorial work or similar tasks — others are able to work at jobs which more closely utilize their talents.

One of the latter is senior Chris Schmid, who is working full-time for WDBO television news, and plans to continue on a full-time basis after graduation this December. "I've been in broadcasting for several years," said Chris, "and it's what I like to do." WDBO radio employs another student, Ron Page, to work as the behind-the-scenes man on the new Tom Marshall talk show. Scott Clarke, station manager of WFTU radio, works off-campus in the production department of WDBO-FM, working with video tape, doing camera work and floor directing. And there is Steve Jones, another communications major, who fills his weekends as a floor camera man at Orlando's WFTV.

Over at radio station WRK, FTU students include Jim Gantner, producer and coordinator for the Gene Burns Program P.M. and other 740 evening programs and Bill Bailey and Pat Flynn, both members of the news department at the NBC Affiliate.

The long summer days are not long enough for Bob Pohlad, a junior and betany major. This young Winter Park student has made the most of every summer day for four successive summers doing research work in the fields and labs of the Department of Agriculture.

TODAY newspaper in Cocoa employs student Bill Day as one of three editorials cartoonists. Bill, a junior who is studying in art and political science, finds the job an opportunity to be exposed to his talent and knowledge.

FTU has a program of financial assistance for deserving students, through the Office of Student Affairs. Robert Hall, a German major, and Beth Reichwald, a Spanish major, are student assistants in the department of foreign languages. This gives them an opportunity to be exposed to all facets of the department, including the language laboratory, while earning extra money. Students are employed in this fashion by nearly every department on campus.

With more than 6,000 enrolled, it is safe to assume that several thousand are employed in some way to ease the financial strain. The handful of students above represents merely a cross-section of young people filling the dual role of student/worker.

"Rap With Experts" To Be At ENAUD

"Come Rap With the Experts," the third in a career information series sponsored by the Placement Center and the Developmental Education Center, will be held Tuesday at 11 a.m. in the Engineering Auditorium.

Guests at the question and answer session will be representatives from areas in social sciences: Dr. Werner Metz, director of mental hygiene in Seminole County; Wayne Strickland, psychiatric social worker from Florida Hospital; Robert Ball of the Federal Bureau of Investigation, and Charles Tyson, Kissimmee city manager.

Steve Jones, s u e n wor er.
Construction
(Continued from Page 1)

According to John Phillips Gore, vice president for business affairs, the economic impact by 1980 of the FTU campus will exceed a payroll of $30 million and a student body of 25,000.

"The campus will be 376 million worth of buildings on campus, 3,500 staff and faculty members, 2,100 research and instructional personnel," he said.

Also according to the Sentinel, research specialists say that FTU will require the support of at least 12,630 persons to provide needed goods and services. Including faculty, this means that FTU will add about 35,000 persons to Orlando metropolitan populations.

The community will require 10,322 dwelling units and 367,300 square feet of commercial and retail space. There will be a total of 7,900 jobs generated either directly or indirectly which will pay wages and salaries in the neighborhood of $65,400,000.

The Orange County Planning Commission will coordinate the numerous construction units through a recently approved new zoning designation called Planned Development (PD). According to a Commission spokesman, the PD concept will require developers to file a complete plan of their proposed area.

The original zoning of the area will remain unchanged until a given plan is filed and approval for a zoning change is given by the Commission.

Unlike other zoning designations, the PD will allow pending approval by the Commission on almost any combination of residential and commercial zoning. No additions or changes in the plan can be made without further approval.

Once will be taken, according to some developers, not just to meet the needs of housing, but to meet these needs without upsetting the ecology of the region. All factors considered, the FTU area is "expected to be the nucleus of a community of approximately 35,500 persons by 1988," according to the Sentinel.

In addition to three planned communities, five other construction projects have been revealed. The five are:

*University Hylands - in addition to the 53 already operating homes scheduled for completion by January, those will house between 200-250 students.

*University Park - 423 acres at the intersection of FTU Boulevard and Aladye Trail. Phase One will include efficiencies and one, two and three bedroom apartments. Phase plans call for patio homes, single family homes and townhouses.

*Pepper Place - located north of FTU between Florida Tech Boulevard and Rosle Road. It includes 160 acres, with 80 for mobile homes, 55 for apartments, 20 for patio homes and five for commercial interests.

*A 400-apartment complex with construction set to begin in 1972 on 1,100 acres southeast of FTU. The land is owned by Florencia, Inc., a Detroit-based development company.

*University Village - located two and one-half miles north of FTU. Housing accommodations for less than $100 per month are planned and apartments will be one-story, based on a 20' by 40' prefabricated section.

*Assistant Dean of the College of Business Administration Franklin B. Gin has conducted a feasibility study on this area for a private group of individuals.

"ACH, Inc., has purchased 380 acres southwest of FTU on the Big Econ River, and plans includes a mobile home golf course combination.

A 40-acre mobile home park is presently under construction, bounded - State Road 420, east of Nokomis Road, and south of Highway 50.

*Stanley L. Meadows and Son Development Corporation will build a 30 quadruple units in Ridgeway University Village on Sharon Place south of Oviedo. Units will be sold to private investors for management and will be ready by fall 1972.

RETRO Trainees
Work For Ecology

Former aerospace scientists and engineers enrolled in FTU's RETRO program are working to contribute their decades of experience and technical knowledge to help solve environmental problems.

They have applied their knowledge in a number of studies designed to speed flows of persons, communications and even garbage.

"We like to think of engineering being much more than a technical science wrapped in a cloak of diagrams and formulas," said Doering. "Today's engineering has much to contribute toward the solution of those everyday problems that plague us all.

Studies are now being conducted of patient flow in the emergency room of Florida Hospital. After collecting necessary facts, the students will design various "models" using computers, which will attempt to trim any extraneous procedures that tend to reduce the admission-to-treatment cycle.

The Florida Hospital project is just one of several. Other students are involved in studies of the Orlando solid waste disposal operation, the courts system in Brevard County and a revamping of Orlando's public safety communications system that would put the police and fire departments and ambulance services on a single radio frequency.

The one-time aerospace workers are preparing themselves for their new careers by "going out and doing," according to Lead Instructor, Dr. Robert D. Doering, associate professor of industrial engineering.

"We like to think of engineering being much more than a technical science wrapped in a cloak of diagrams and formulas," said Doering. "Today's engineering has much to contribute toward the solution of those everyday problems that plague us all."

When they complete their four-year course in June, RETRO students will be awarded Master's degrees in environmental systems management.

All of the current projects will be completed in December. Results will be published soon after, according to Doering.
Twelve New Faculty Members Appointed In BADM College

Twelve faculty members have been appointed to FTU's College of Business Administration. Miss Marilyn Faye Bunch, a certified Public Accountant who is also a visiting instructor, is again accounting last year, has also joined the faculty. The native Missourian, who is living in Winter Park formerly employed by Price, Waterhouse and Co. in Miami, now serves in Orlando as a member of the audit staff.

Another new faculty member in business administration and instructor in accounting is Miss Kathleen R. Johnson, an honors graduate from Orlando Junior College and Rollins College. She formerly taught from 1966 to 1970 at the College of Orlando.

Joseph Nish is a visiting assistant professor of business administration. His background includes nine years of teaching at Kansas Wesleyan University, Kansas State University, and Gannon College in Erie, Penn. He is presently completing work on his doctoral in economics at the University of Kansas.

Dr. Henry E. Mallue Jr. returns to the FTU campus as an instructor in business administration after a year as visiting instructor in business administration.

Returning to FTU after a year's leave of absence is Dr. R. Thomas Stone Jr., instructor in business accounting. He has wide experience in public and private accounting.

Dr. Charles E. Gilliland Jr. has announced. Eleven of the new faculty members will be on the staff of the department of business administration, and one will be in the department of economics and finance.

Dr. Raymond L. Martin is visiting associate professor of business administration. Since retiring from the U.S. Army in 1970 with the rank of colonel, he has been working as an independent consultant in research and development management, and has just completed the manuscript for a new book entitled, "The Impact of the Nixon Administration Policies on Resources for Research and Development." This book is being published later this year.

Frank B. Bondurant comes to FTU directly from the business world as an assistant of business administration. He formerly was vice president for marketing with Vandana Beauty Cosmetics and previously had been associated with several national products of New York.

Wanda Russell, VC program director, and Linda Kast as assistant program director, said they urges students, faculty and staff to begin their searches now.

The search and sale are many persons may be interested in attending and everything in the coming Christmas season.

December 3 Christmas Dance To Feature 'Fire'

"Fire" has been selected in the band for the December 3 Christmas Dance. The dance, an annual event since FTU's first year, will be formal-frillsomiformal dress.

Included this year is a contest for Mr. and Miss Elf Requirements, according to chairman Doug lyen, are a 2.0 average and the ability to be alone. There will also be a Santa contest open to all male full-time faculty and staff members.

Entry forms for the contest will be available in the Village Center all next week. Camp will be November 30 and December 1. Finalists will be chosen December 2, and the final decision will be the night of the dance.

Bills McGrath (left) and Phil Philp afiliated at this "natural foods" bakeale Wednesday on the VC Park Texaco for natural organic peanut butter cookies, pecan roll and numerous other goodies all made from health foods.

Art Dept. Members Return From Abroad

Three faculty members from the art department spent the summer months working abroad. Sculptor John Eybl of Winter Park and two museum employees, both native (oland where he supervised the design and installation of a monumental cast stone sculpture, purchased by the capital of Iceland, Reykjavik. This acquisition is now displayed in front of Iceland's National Museum of Art.

Teaching assistants are invited to address a faculty committee at the Academic Affairs Office. They have been invited to attend exhibitions and sale are persons may be interested in attending and everything in the coming Christmas season.
Representatives of Phi Kappa Phi National Fraternity will be on campus Monday and Tuesday to speak to men interested in forming a colony. The fraternity was founded in Cleveland, Ohio, in 1852 and now has chapters at University of Florida and Florida State University and a colony at Florida Institute of Technology. Interested persons may meet with Neil Sandem, national treasurer, and other national officers in AD 211 between 9 and 9:30 p.m. on Monday.

Philhellenic

The annual Philhellenic "Pre-Rush" refugee for prospective rushes will be held Wednesday from 7:30-9:30 p.m. in the Board of Regents Conference Room in the Administration Building. All women students are invited to attend. Prospective rushes will be introduced to the Greek system of the individual sororities, information on the rush schedule, finances and requirements of rush will be presented.

Tri-Delta

The Delta are proud to announce that their colonization procedures are now complete. They offer a thank-you to the little sisters for their cooperation. Thanks to "Dee" for buying the brothers two pitchers of beer Wednesday night to help celebrate the victory of the Delta Tau Delta College Bowl team. On the parade were brothers Joe Thomas (captain), Bob Smidley, Fred Romano and pledge Don Hyman. They appreciate the alternates barring attended the matches. The party afterwards was a rippin success as Gene Lenfest took off pants pockets.

All rushes who are interested are invited to attend the Titan meeting and Monday night. Monday night's program will be a fellowship party at the old R.C. Steak House for breakfast.

The Kappa Sigma brothers-pledge football game was played Saturday with the Friday with the brothers winning by a score of 6-0. Kappa Sigma scored on a pass from Hartley to Meador and on a safety when the pledges' quarterback was tackled in the end zone.

Congratulations to the pledges for a hard-fought game. Also, Kappa Sig thank the little sisters for the pre-game meal they prepared.

KS

The Zetas held a picnic social for the brothers and pledges of Pi Kappa Fraternity last Sunday at Winter Springs Park. Football, canoeing and lunch filled the afternoon's activities.

ZTa

Fifteen was the chosen number of Lambda Chi when 15 new "little sisters" were chosen Sunday night. These girls will be the start of the LXX new little sister program. This program will have no officers or meetings, and members will be at LXX murdered. Each girl will have a big and little brother to keep in touch with.

The charter banquet will have drinks, eats, and song followed by a ball featuring "The Beginning." All brothers will be there with many alumni.

The Ty's Halloween Party for the orphanage the Lutheran Haven Children's Home was held October 31 from 2-3:30 p.m. and was successful. The children made jack-o'-lanterns and bobbled for apples.

On Tuesday, Ty's will be attending the 16th banquet at Southern Correctional Institution. The group will be leaving FTU at 4 p.m. to attend the dinner, which begins at 6 p.m. Correctional officials from all over the state will also be there.

At another service project, Ty's will be helping the Village Center for the arts by making cookies for the Christmas Dance.

The group is in the process of making ties for Phi Kappa Alpha Fraternity, in their colors of garnet and gold. A second work party is planned for Monday, following the regular meeting. The meeting will be at Fucerott Apartments at 6 p.m. Come prepared to work.

The pledge pins have arrived and the brothers are looking forward to another cookout.

Last week a group of brothers were guests at the Sigma Chi Alumni banquet. After the meal, the past presidents of the alumni association were honored and given plaques. It was the 20th anniversary of the association which was founded in 1941.

The Tyes Halloween Party for the little sisters was held Wednesday night for a hard-fought game. The Tyes Halloween Party for the little sisters was held Wednesday night.

LXA

The Kappa Sigma brothers-pledge football game was played Saturday with the Friday with the brothers winning by a score of 6-0. Kappa Sigma scored on a pass from Hartley to Meador and on a safety when the pledges' quarterback was tackled in the end zone.

KS
Anytime you try to build a brainchild it's rough. There are problems, frustrations and hassles of a general nature. So Clark knows what brainchildren and problems. His adopted prodigy, WFTU-TV, is having its problems. Even with the technical setbacks besetting him, Clark foresees a great potential for the station.

"We aren't a 'boy' as people often refer to us. We are a very real and concerned organization, and are trying to impress upon the student the many services we can offer," said Clark.

Among the services was a deep-long coverage of the recent Student Government elections. More than 75 students worked on presenting the coverage, which included interviews with candidates, President Charles Wilson and a "mystery guest." Featuring assistant professor James Coch ran demonstrating the fine points of Japanese cuisine. Most of the show was done live, and Clark reports he was "very pleased with the production."

Scheduled for upcoming programming is a half-hour news show, done weekly, to focus on student news. Focus 4, the new feature in the making, will be a student-oriented program in order to stimulate interest in student affairs. In the same vein, WFTU-TV will also present a Student Government report.

"We want to establish an open line of communication for the students. We have great potential, and we are trying very hard to put this to work for the students. I have some hard-working people really trying to get a good thing going, but each new person can contribute," Clark said.

Brainchildren don't come easy. Clark is finding that out each minute he works on this program. But many grow up into full-fledged productions, and this is what WFTU-TV is trying to do.

\[Campus Glances\]

\[STUDENT RECITAL\]
A student recital will be presented by the music department at 3:30 p.m. Monday in the Engineering Auditorium.

The recital will include three sonatas by Ludwig van Beethoven, selections from Franz Schubert, Richard Strauss and Georg Telemann. Other features will include selections from Mozart's "Die Zauberflote," Verdi's "Il Trovatore," and Debussy's "L'Enfante Prodigue."

Following the recital, Orphessa will host a reception in the music department at the Village Center.

\[BICYCLE CLUB\]
Anyone who owns a bicycle is invited to attend a meeting noon Monday on the Village Center green.

Plans concerning the formation of a bicycle club will be discussed, and a bike hike will be planned.

\[ACLU\]
The American Civil Liberties Union chapter at FTU will meet 11 a.m. next Thursday in LR 239. Anyone is welcome to attend or join at the meeting. There will be a speaker discussing student rights.

\[CHESS CLUB\]
The Chess Club will meet 7 p.m. Monday, due to a mix-up last week, this week's meeting place will be GC114.

\[INTERNATIONAL CLUB\]
The International Club will hold an International Pot-Luck Dinner at the Winter Park Village Apartments clubhouse tomorrow from 6 p.m. till. For 50 cents members and guests may enjoy the dinner and the party afterwards. Any member who is positive about the event may take these items to AD 390 any time today.

There will be an important business meeting 11 a.m. Tuesday when changes in the constitution will be discussed.

The production of the Spanish play, "El Viejo Ocelos," is proceeding well with the selection of actors and actresses to be announced November 30.

One of the upcoming money-raising projects of the club is a shoe-shine.

\[BIOLOGY CLUB\]
The FTU Biology Club, in connection with the Chemistry Club, has succeeded in gaining approval for a lounge area in the science building. The club wishes to thank all persons, both administrative personnel and students who helped achieve this goal. It is also concerned that all science students are thankful for finally having a place of their own.

A meeting will be held Tuesday at 11 a.m. in SC 350. All students are invited; club members always like to see new faces.

\[CIRCLE K\]
After attending the recent State Social Issues Conference, Circle K is ready to set out on its goals of involving the student in campus activities.

A campus-wide poll is scheduled during preregistration next week this is a chance for all students to have their say in governing the action of student organizations in view of the fact that the students who have reached the age of 18 are allowed to vote, students should have the opportunity to vote without having the problem of class conflicts.

"I got the idea from a similar setup proposed at the University of Nebraska in Omaha," said sponsor of the bill Senator Mike Strandberg.

"This will give resident students the opportunity to get off campus and vote. It will also benefit commuter students, especially those who must vote in other counties," added Strandberg.

\[PHI BETA LAMBDA\]
On Saturday, Oct. 30, Phi Beta Lambda held a District III Officers Conference. Circle K was ready to set out on its goals of involving the student in campus activities.

A campus-wide poll is scheduled during preregistration next week this is a chance for all students to have their say in governing the action of student organizations in view of the fact that the students who have reached the age of 18 are allowed to vote, students should have the opportunity to vote without having the problem of class conflicts.

Soccer Given Go-Ahead

Leo Game Raises Spirit

By John Gordon

The FTU soccer Club has decided to continue its season of games into the winter quarter due to the good turnout at last Friday’s meeting and at last Saturday’s meet against St. Leo College.

Four students have joined the team since that meeting, meaning that now player substitutions can be made during a game without fear of risking a goal.

Although FTU lost to St. Leo by a score of 4-2, Team Captain Rob Steadman felt sure his Soccer Knights would have captured their first victory if there were more officiating referees to catch fouls “deliberately aimed at FTU.”

“At the end of the first half, we were winning 2-0,” Steadman said, “but, at the beginning of the third quarter we lost three good men due to intentional fouling by St. Leo players.”

According to Steadman, goalies Rudy Zereldo and Kenneth Rouse were roughly kicked in the head while trying to block a kick. This incident put him out of the game with near-concussion injuries. Two other players were put out of play with swollen ankles and leg injuries when they were tripped while trying to make goals.

Although the Knights would have now player substitutions can be made during a game without fear of risking a goal.

“This is the first time I have ever seen our group of players work together as a team,” Steadman said, “I feel that if we continue playing the way we did against St. Leo, we will have a very successful winter season.”

This Tuesday the FTU Soccer Knights battled Shelton College at 8:30 p.m. on the football field. An action-packed game is promised by Steadman and his team. All students are invited to attend this game.

Wrestlers Enter Fort Myers Meet

The FTU grapplers will enter their first wrestling tournament this Saturday at 11 a.m. in Fort Myers. The AAU-sponsored meet will be held at the Fort Myers YMCA and is open to all high school and college wrestlers.

Twenty Tech grapplers will leave the campus at 6 p.m. to represent FTU in the 122, 129, 135, 141, 148, 148, 170 and 188 pound classes, including all heavy weight divisions. Included in these 20 are John Rouse and Charlie Falleti, last year’s first and third place state champions, respectively.

Although the matches will be led by strict AAU regulations, Wrestling Coach Jerry Gergley said he feels that his squad of men are together this year and will have no trouble placing high in this meet.

HELP WANTED! HELP WANTED!

SPECIAL PUBLIC ANNOUNCEMENT

THE AMERICAN SCHOOL OF MENTAVIOLOGY,
Central Florida’s only licensed school of its kind, teaching TOTAL HUMAN ENGINEERING, needs trainees for a teaching staff.

Trainees should be able to spend a minimum of two hours a week in special class work for a total of 12 weeks. Those applying should have a sincere desire to serve humanity through the unique self-improvement program offered by the American School of Mentaviology.

Course includes a full and comprehensive study of what has become known as “hypnosis” and “self-hypnosis,” which is more correctly intensified persuasion through simple and easy to learn procedures. Each trainee will have the opportunity to submit any personal problems, “hang-ups”, or nerve-oriented physical illness for elimination.

Positively no fees to trainees.

SPECIAL $5,000 SCHOLARSHIP FUND FOR COLLEGE STUDENTS

The American School of Mentaviology has placed an deposit at the Sanford Atlantic National Bank a special scholarship fund of $5,000 to be used to finance the education of qualified students who wish to pursue the Mind-Life Sciences as a career. Students interested should apply by letter to address below.

REWARDS FROM TOTAL HUMAN ENGINEERING ARE MANY:

1. Total and complete self-confidence.
2. Amazingly fast learning ability, developing true “computer­ized thinking”.
3. Rapidly increasing excellence in any motor skills, including athletics.
4. Permanent relief from all forms of nervous tension and the unpleasant symptoms caused by nervous tension, such as migraine headaches, sleeplessness, stage fright, stammering, etc.
5. Rapid relief from health-destroying habits of smoking, drug addiction, overeating.
6. Money-motivation techniques for those who need this type of drive in a competitive society.
7. I-K-I-WA Instant Self Defense, especially adapted to protection from assaults on women.

For full particulars, opportunities and long-range goals, write

AMERICAN SCHOOL OF MENTAVIOLOGY
Box 2031, Sanford, Florida 32771.

Okay, you can say it. I was very wrong about last week's prediction of the Georgia Florida game. Quite wrong.

All day Friday, people talked to me or soon after came out with a statement similar to, "You must have been drunk when you made your predictions."

To be honest, I probably predicted with my heart, not with my head. I just feel that sooner or later my talent is bound to explode - although I was notified that the explosion probably already occurred during the Maryland game.

Florida was supposed to be a one-sided team. If these seniors don't buzz up they just might lead the Gators to the SEC title. As sophomores, three of these seniors scored a 9-3-1 slate including a 14-13 edged-out-one-in-the-Gator-Od over Tennessee. The following year a poor offensive line was blamed for the gators 7-4 season - a great disappointment for most Florida fans.

And now, Florida will be lucky to come out of the season with a 3-6 record. The reasons - there's plenty of them. You could write a book about the misfortunes of Doug Dickey.

It is quite obvious that the Gators are not playing inspired football like the Gators of 1969. Why not? That's right, it's for us to speculate and for Doug Dickey to find out.

Last week's showing (right) didn't help.

This week's games:

Florida 21, Kentucky 13

This score could go either way, but once again I'm picking with my heart instead of my head.

Georgia 24, Arkansas 22

Georgia did not play good ball against Florida despite winning 49-7. The offensive line of the Bulldogs, however, demolished the Florida line, and will do so more of the same against Arkansas. Georgia's running attack will control the game, preventing Arkansas' Pat Sullivan and Terry Beasley from scoring enough to win.

Alabama 21, Miami 13

Ranged up Alabama will not win by that much. Howard "Bear" Bryant will be able to recuperate his big guns enough to beat the Hurricanes and still have enough left to take on Auburn. Look for a tough Miami defense and a strong ground game to give the Crimson Tide a scare though.

Florida State 34, Georgia Tech 17

Florida State desperately needs this game if it hopes to play in any bowl game. Georgia Tech is a very strong and able receivers such as Kent Gaydos, Barry Smith and Rhet Davenport will score the points, while the Seminoles' rubber band defense will contain Tech quarterback Eddie McAshan.

and Faculty, was a wild scoring affair, with both teams scoring at will. ATO outscored the faculty, and won it all by a convincing 41-31 score, and left no doubt as to who is the football king this year. ATO who led 27-19 at the half, scored their first half points on four TD passes thrown by outstanding signal caller Mark Stockwell. Greg Gavel caught two of them, one for 14 yards and other for 25. Mike Abufaris caught another TD pass from 25 yards out, and John Speer caught Stockwell's other first-half TD pass, on a ten-yard extra. Four points were scored by Faller, who scored two, and by Mark Meyers, who scored one.

Fac-Staff scored their 19 points in the first half, on an eighty-yard pass from Walter Shinn to Ray Brownlee, after Shinn took a pitch from John Davis. The extra point failed. The next Faculty score was on a neat five-yard scamper by Shinn, who also scored the conversion, on a fantastic diving catch of a Davis pass. The Faculty's last-first-half score came on a pass from Davis to receiver Ken Renner, but the point after failed, making the score 27-19 at the half.

In the second half ATO scored first on a tremendous eighty-yard TD pass from Stockwell to speedy Abufaris (ABU!), and the same duo hooked up for the extra point. Fac-Staff came right back with a spectacular 40-yard pass from Davis to Brownlee, but again the important conversion failed, Stockwell then hit Abufaris, with an eye-catching 45-yard bomb, as the ATO boozed back and Meyers made the conversion.

If you were born today:
You're not alone. So were several other people. Hua7

FuturE HorRiPsCOpE
By John the Good, Resident Seer
For Friday, November 12, 1971

AQUARIUS:
Your days are numbered as the hairs on your head. Do not feel too secure; however, your hairs are about to desert your cranium, which will quickly begin to limit your days. Vision in your left eye will begin to fail by day and your fingernails will begin to fail to grow. Your signs. Had when.

POISONS:
Don't pool all your money in one spot. Invest wisely and buy the chips, while we still have a bull with us. Sell any life insurance. It's not going to give you the benefits after you're dead and it would be a neat way to get back at your "loved ones." Prepare yourself for the unexpected. If it can happen, it will.

ARES:
As far as I'm concerned, you can carry on the way you have been for the rest of your life but I happen to know that your great and astonishing self with your behaviour and is threatening to cut you out of your will. That would mean that you would have no legitimate successor home after you're 30. You could stay as you are and take a walk with the profession, but there would be a bill, and the neighborhood would talk about it.

GEMINI:
There have been much to rejoice about. Tonight is the night you have been talking about for several months. All should work out well, and go just as you planned. The only problem is he will stand you up, and with no help to have in the entire evening alone. Tough break.

CANCER:
Who do you think you are? Anyways! You go prancing around here as if you own the place. We all know who your family tree really is. Not only do we know, but we have decided not to speak to you any more. We don't like you or your grandmother. Put your arm in it's getting ready in here.

LOCO: The problem with you is that you don't think before you speak. You, in fact, don't think while you speaking. Come in think of it, you don't think after you speak. You seldom stop talking. Plato said that the wise man listens, but I say the wise man should temper his listening, and ignore you completely.

VIRGO:
Mangling eyebrows could be fatal to you this week. If you notice your eyebrows slowly coming together, trim them quickly and take a bath in Cleo. Did you know your eyes are really red, and your mother painted the color in when you were two? That's why there are no color photographs of you when you were little. Hadn't you ever wondered?

TAURUS:
Exercise great caution. The man next to you is an impostor. He is really a giant frog, part of the subversive organization GUFOTCH (Giant Frogs United To Conquer The World), and plans to disrupt the entire school. That song he is humming is "We will overcome," in style. (What would all the walls be, if it wasn't for us frogs?) What could the children play with, if not for us and dogs? We will undermine, we will undermine, how can we take the master arts, help but undermine?

LIBRA:
I suggest that you consult the psychic powers that rule the dimensional inner space. Therein lies the truth of all the universe, and the answers to the Chem test next week. You won't pass anyway, and it might make an interesting excuse to the prof as to why you flunked. It's a thought.

SCORPIUS:
I see by your dress that you see short. If you were taller, your dress would surely contain more material. Let me tell you, quickly, and briefly, if you're not selling, don't advertise. Modesty is its own virtue.

SAGITTARIUS:
You're always picking on "Sagittarians," they tell me. You're always picking on "Sagittarians," they tell me. So this week I ignore the stars, write a nice one. A lie, mind you, but a nice one.

ARIES:
Keep informed $1.75 a year
