Dr. Sperry Appointed New Music Chairman

Dr. Gale Sperry has been appointed chairman of the music department at Florida Tech University System, according to Dr. L. J. Hulsey, who resigned to accept a position at North Kentucky State University.

Sperry was appointed by Dr. Charles N. Martin, dean of the college of humanities and fine arts. Sperry was a faculty member of the University of South Florida since its beginning in 1969, and for five years was chairman of the music department there. He earned degrees, including doctorate in music and education, from the University of Minnesota. At the university he served from 1953 to 1960 as director of bands. Sperry was also director of instrumental music in two Minnesota public schools.

Sperry is active in professional music and education organizations, serving as editor of the "Florida Music Director," which is the official publication of the Florida Music Educators Assn., editor of the "Journal of Indian River Band Research," member of the National Policy Committee of the Ford Foundation's Contemporary Music Project, chairman of the Articulation Committee of the Florida College Music Education Assn., first vice president of the Florida Music Teachers Assn., and member of the advisory board of School Musician Director and Teacher. During the past 23 years, Sperry has appeared an average of 20 times annually as guest conductor in 20 states including Florida.

"I am convinced that the university administration wants to develop a top-quality music program at FTU," Sperry said. "We in the department of music are determined to justify this confidence by establishing a musically balanced program which will serve and be a part of our immediate geographical area-one which will enable the student to move at his own speed toward excellence in his field and the communication of his music to others." Mirecki said of the new chairman, "He will add distinction to the music department."

FATIENTLY WAITING - FTU'S 600 plus June The diplomas are shown here, ready to be received by graduates who patiently waited for ceremonies to their new owners. (For more graduation pictures see page 5.)

Legal Counselling Bill Returning To Senate

The future of a bill to provide free legal counselling service to FTU students will be determined during the summer session of the Student Government Senate.

Just before the end of President Frank Santry's term a bill was passed in the senate to allow $2,000 to the students to hire a lawyer for SC business, legal counselling for students, and for students' right to counsel. Dr. W. R. Brown, Vice President for Student Affairs, vetoed the bill. In the SC budget request, $1,800 was allocated for a lawyer on retainer, and $5,000 for a lawyer to provide free legal counselling to FTU students on a weekly or monthly basis.

Students who cannot afford the service often need a lawyer for legal situations in which they have little or no knowledge. FTU has no law school as in other Florida state universities where law students often give legal counsel free or for school credit.

The state House Executive Committee said that SC cannot offer such a service. According to newly elected state Senate President Daniel, "There is no law, rule, or regulation to provide free legal service."

"The issue is not dead yet"

Students Build Obstacle Course

Oviedo's Lanton Elementary School students build an obstacle course because of the lack of time in the course. A few of the two student-teachers. Built in 40 hours for the cost of one dollar and construction from around the area, the course was the project of John Burke and Bob Fish, two physical education majors.

They followed a design for a similar obstacle course at Parks' Aloma Elementary School last year.

"Consisting of a collection of brightly painted tires, monkey bars and scaled down barriers it has been the focal point during recess and after school, & it's a challenge that most people are afraid to try," said Richard Hunter, FTU's sculptor professor of physical education, declared the results as dramatic example of what can be accomplished by college students with elbow grease and ingenuity."

600 Receive Degrees In Outdoor Ceremony

To the strains of Beethoven's "Ode to Joy" and "Pomp and Circumstances" more than 600 graduates received their diplomas June 9. Following for those graduating for the first time in their professional field, the sky was overcast and a gentle breeze continued almost throughout the entire ceremony.

Following an invocation by Rev. A. T. Fuentes, President Charles N. Millican recognized various persons on the commencement platform and in the audience, including Florida Senator Bill Ginter, whose term was being graduated.

Board of Regents Chairman J. D. New delivered the commencement address, congratulating the graduates and calling FTU's "a shining star in the State University System." Daniel echoed his speech, saying the "critical period in liberal arts" theme, stressing that FTU has the opportunity to assume a prominent role in the renaissance of the liberal arts.

Citing changing social conditions and global tensions, Daniel said technological progress needs to be coupled with the Humanities to give an added dimension to the future. He contrasted technological achievements with social failures and said that college which stress technology fail to understand and appreciate the interdependence of science and the Humanities.

In closing, Daniel quoted the famous passage from Shakespeare's "Hamlet," "What a man that is chief good and market of his time/Be he so deep and feed a bank; yet let that man again stand to the compelling necessity of affairs of science with the Humanities for the preservation of our civilization." Daniel then concluded his speech with the following:

Millican recognized and congratulated FTU's first four-year "chatter" graduates who had been with the university since its opening. In fall 1966, the following recognition of outstanding academic achievement, Vice President for Academic Affairs C. R. Cambrell honored Eloise Beach, who graduated with a 4.0 average.

AFROTC Program Gets First Prof

Major Bennett K. Whisenant has been named to head FTU's Air Force ROTC program, and will also serve as university's Faculty of Arts and Sciences, of the University System."

Whisenant has been serving as cadet admissions officer at the AFROTC headquarters at Maxwell AFB, in Alabama. Once at FTU he will be free to manage his program, and to do general studies.

AFROTC Program Gets First Prof

American 65 graduate of the University of North Carolina, where he has served as director of the AFROTC program, Whisenant took over at the beginning of the Fall semester this past March.

A total of 15 AFROTC programs available at FTU, an incoming freshmen like a lot of people who work in education believe there is need in their race for a legal school, and for a salary. The program is expected to be in full operation by Fall quarter.

Tuition is due Monday.

Money may be paid to the Finance and Accounting Department either to the cashier in the Administration Building, or by placing the money or check in an envelope addressed to the department. Envelopes mailed in on-campus mailboxes require no postage, and there is a special mailbox in the administration building where the envelopes may be mailed.

NEW SENATORS

Student Government Board will be appointing three new senators, and is taking applications. Persons interested may see Adamick in his office, Library 219.

WRA POST

Women residents interested in applying for resident advisor positions for the 1972-1973 academic year should pick up applications from the Office of Student Affairs, Administration Building.

Birth Control Bill Signed By Brown

A bill for birth control counselling and dispensation has been passed by the Student Government Senate and signed by Rex Brown, vice president for student affairs.

The bill does not restrict counselling or dispensation because of age or marital status. However, part-time students are excluded because they do not pay a service and activity fee, and are not eligible for health center services.

"Part-time students will probably be able to get this aid for an extra charge," said Student Government President Steve Adamick.

The bill became effective with Brown's signature, but services may not begin until fall quarter, according to Adamick.

Students Build Obstacle Course

Oviedo's Lanton Elementary School students build an obstacle course because of the lack of time in the course. A few of the two student-teachers. Built in 40 hours for the cost of one dollar and construction from around the area, the course was the project of John Burke and Bob Fish, two physical education majors.

They followed a design for a similar obstacle course at Parks' Aloma Elementary School last year.

"Consisting of a collection of brightly painted tires, monkey bars and scaled down barriers it has been the focal point during recess and after school, & it's a challenge that most people are afraid to try," said Richard Hunter, FTU's sculptor professor of physical education, declared the results as dramatic example of what can be accomplished by college students with elbow grease and ingenuity."

MJJ. WHISENANT

A 1965 graduate of the University of North Carolina, where he has served as director of the AFROTC program, Whisenant took over at the beginning of the Fall semester this past March.

A total of 15 AFROTC programs available at FTU, an incoming freshmen like a lot of people who work in education believe there is need in their race for a legal school, and for a salary. The program is expected to be in full operation by Fall quarter.
In the "Death and Destruction" category comes in the shape of "smart bombs". These clever devices can be released from high-altitude planes, and their target with devastating accuracy.

This new wonder allows us to wage a non-nuclear, semi-adequate, but still a destructive attack. The potential is staggering. From high in the clouds, far beyond sight or aircraft range, these guided darts can be released and guided on Kamikaze raids against railroads, supply dumps, and occupied villages. Some of the "smart bombs" even are equipped with television camera in their nose, so the bombardier can direct their own apparent action via a "TV" screen riding on their backs. It is hard to believe some of these foreignies get to be on TV. What an opportunity.

At the recent graduation ceremonies, Regent J. J. Daniel said that more emphasis should be placed on the humanities and arts, and less should be on the sciences. This was good news for the administration.

That would mean we would produce less engineers and we would be able to have fewer engineering advances. Where would we be if we had stopped ranking out engineers in the 40's? We might not have men on the moon, push button phones, or crushed-ice-through-the-door refrigerators. Sometimes a little suppression produces the technological revolutions of such conveniences. Besides, if we stop now, we might never find the best answer for cleaning up the environment.

We (in the royal, collective sense) think we are going to have a headache.

A Matter of Opinion

What would be the purpose of a newspaper if it was only to print what it was allowed to print, rather than what should be printed? Would any of the editors and opinions of its editors, would we remain the unbiased mouth of information? One of the issues that was proposed during the Board of Regents and state university presidents meeting was that papers should be under the tutelage of the presidents. We would be doing less engineering and producing more engineers. Where would we be if we had stopped ranking out engineers in the 40's? We might not have men on the moon, push button phones, or crushed-ice-through-the-door refrigerators. Sometimes a little suppression produces the technological revolutions of such conveniences. Besides, if we stop now, we might never find the best answer for cleaning up the environment.

Another issue that was brought up, was that papers should be released under a slightly different set of regulations. This new wonder allows us to wage a non-nuclear, semi-adequate, but still a destructive attack. The potential is staggering. From high in the clouds, far beyond sight or aircraft range, these guided darts can be released and guided on Kamikaze raids against railroads, supply dumps, and occupied villages. Some of the "smart bombs" even are equipped with television camera in their nose, so the bombardier can direct their own apparent action via a "TV" screen riding on their backs. It is hard to believe some of these foreignies get to be on TV. What an opportunity.

At FTU we run under a slightly different set of regulations. Our president is the publisher, but we are primarily responsible to the editors and the editors of the university president. This new wonder allows us to wage a non-nuclear, semi-adequate, but still a destructive attack. The potential is staggering. From high in the clouds, far beyond sight or aircraft range, these guided darts can be released and guided on Kamikaze raids against railroads, supply dumps, and occupied villages. Committee will study Lk. Claire use, safety

Dr. W. Rex Brown, Vice President for Student Affairs, reactivated the Lake Claire Recreation Area Project Committee Tuesday. The committee will be chaired by Dean Paul McQuillan with Steve Adamick serving as co-chairman.

The separate responsibilities of the committee are: Recommend and submit a proposed plan of development and construction which is within the financial allocation budgeted by Student Government for this fiscal year. Study and recommend a plan of action to safeguard the health, safety, and welfare of all persons who may use the Lake Claire area. This includes suggested regulations, procedures, and equipment.

The committee will be composed of: Dr. Brown; Dr. Paul McQuillan, Dean of Men; Mrs. Carol Wilson, Dean of Women; Dr. Ken Lawson, Director of the Village Center; Jimmy Fellor, Student Affairs Coordinator; Ken Renner, Director of Intramurals and Recreation; James Schroeder, Campus Planner; Buddy T. Perl, Physical Plant Supervisor; John Smith, Security Superintendent; and Leo Constantine, Vice President and Student Government.

Dr. Brown requested that "the lake and its regulations be submitted prior to the end of the summer quarters. If not presented to that point, in order to implement the regulations by the beginning of the Fall semester".

The committee will meet for the first time approximately two weeks from now. They plan to see if students are interested in the development of the lake.

If students are interested $35,000 will be spent on the project. If not, the money will be used elsewhere.

Lake Claire recreational area includes Bar-B-Q pits, canoe, a beach, and soon will have running water. Future possible additions are a bath house and a dance pavilion.

UmphreyQuotes

Chairmanship, Remains Prof

Dr. Robert E. Umphrey is stepping down as chairman of the English department but will stay at FTU as a full professor.

Umphrey sent a letter about two weeks ago to Dr. Charles Mirabelli, Dean of the College of Humanities and Fine Arts, asking to be relieved of the position. He explained that the job was taking much of his time, and that "personal things" affected his decision to step down.

"There's absolutely no animosity involved," Umphrey said. "That's one of the first sessions that will be asked." He praised the department and expressed appreciation of Mirabelli, "who made this move possible for me."

Umphrey is looking forward to teaching, saying "I'm going to enjoy getting back into the classroom."

Dr. Richard Groove, assistant professor in the college, has been appointed acting chairman. He will hold this position until 1974 spring quarter, when a new chairman will be named. Groove has been at FTU since 1968 and will return to the faculty senate for his second term this year.

FTU Journalism Society

Given National Charter

Sigma Delta Chi professional journalism society installed a chapter of 15 members at FTU on May 27, Guy T. Ryan, national president of Sigma Delta Chi, officiated at the installation banquet and presented the chapter charter to campus president Mary Anna Jackson.

Dr. Ryan, who is in his final year as address, Ryan challenged the new SDX members Wednesday to "buy a throwaway bottle and cans when possible.

Take your own reusable "take out" bag to the store. Cut down on use of paper bags and wrapping paper.

Use less electricity. Turn off lights. Power plants are big polluters.

Pollution Plighters

If you commute, fill your car with passengers.

Turn up your car. Refuse go buy batteries, go back to nonpolluting laundry soap. Use cloth bags - the dye pollutes the water.

Stop flushing garbage down sink disposals, sed to the already heavy organic load at the disposal plants.

USE less electricity. Turn off lights. Power plants are big polluters.

Charne Porter, Mimi Wyatt and Jacklyn Leter exhibited their work during the last week of spring quarter. Although they are all graduating art majors, each possesses a distinct vision of themselves, their world and their art. Any attempt to force Charne, Mimi and Jackie into the same frame is to deny them the reality of their uniqueness the degree of their concern, the truth of their individuality and the quality of their sensitivity. Therefore, it is necessary to pursue them at a time, in their own individual frame of reference, speaking for themselves, giving their separate views about their art and their reality.

Charne's miasms are on display at the Creative Art Workshop in Winter Park. Upon entering, Charne's photographs of a carnival barker stands menacingly before his exit and his ugliness. A gold star mother is bitterness, coquettishly appearing ludicrous, coquettishly posing in her booth behind one of her roses.

In another photograph, a rear view of two young girls sitting in a carnival exhibit, you see long straight blond hair that goes swish with backsides to match. A carnival barker stands menacingly before his exit and his ugliness. A gold star mother is bitterness, coquettishly appearing ludicrous, coquettishly posing in her booth behind one of her roses.

Charne is, in her own words, photographing timeless people — in other words, the photographs role-playing.

"I took my camera, as a tool, to the fair, all I said was "May I take your picture." They would put all the things they wanted to be seen as, in great watching that matching working. I never told anybody anything. They all posed themselves, I never told them what to do. I was surprised at the number of people who asked to take a picture, and guess if I wasn't photographing individuals I wouldn't be so picky."

THE NEW VERSUS THE OLD
Mahavishnu Orchestra Show

by Mike Critses

John McLaughlin and the Mahavishnu Orchestra introduced their music to an Orlando audience at the Sports Stadium June 2. Todd Rungren and his patomine performers began the show at 7:30 p.m. Comedian George Carlin broke down some television restrictions in his performance.

Todd Rungren bent away from technical intricacies of his latest album "Something/Anything" to put on an entertaining rock performance. A group of three ventriloquist dolls dressed in white shirts and pants with white tennis shoes, white belts, and white-painted faces played instruments, told mazes stories, pantomimed for Rungren's listeners, and did back-up vocal work.

George Carlin commented "trying to speak in the Sports Stadium is like talking from the bottom of a huge trash can." Carlin gave humorous evidence for the value of permissiveness and when he said that censorship gave humorous lyrics, and did back-up the eight words. Explanations of 399,992 that I can say, but eight I can't say. "Carlin listed" trying "..."

The Mahavishnu Orchestra is a relatively free-form-ensemble on the scenes. They are doing many things with sound that have not been done before. Their lead performer, John McLaughlin, puts his whole body into the playing of a guitar.

Mahavishnu's first song, "Meetings of the Spirit" from the album "The Inner Mounting Flame," employed a recurring theme to tie together a wide range of free-form variations.

McLaughlin, in short hair and white clothes, leaned toward the audience and played the mellow theme on his bottle-neck guitar. The rest of the group picked up the theme and expanded on it. McLaughlin came back with the theme at various intervals and the group would play in different directions.

Mahavishnu includes violinist Jerry Goodman, drummer Bobby Cobham Jr., and Hamner on keyboards, and bass guitarist Rick Laird.

It was a beautiful evening for Together Productions. Members of the audience proudly walked in past the eight words. Explanations of 399,992 that I can say, but eight I can't say. "Carlin listed the eight words. Explinations of 399,992 that I can say, but eight I can't say. "Carlin listed" trying "..."

---

Ben Bombs Badly

by James Henry

What do you do when you do something lucky? The answer is simple. You try to do it again.

"Willard," without a doubt, was a success (unexpectedly so.) Its producers decided not to let a good thing ride, so while the show was still taking in the green, they decided to do it all again. They failed.

"Willard" was the story of a young man, co-incidentally named Willard, who raised a pet rat. Actually several pet rats. They turned out, without any great surprise to the audience, to be a great deal smarter than Willard. They eventually turned against Willard and ate him.

Ben was the leader of the rats that finally "done ole Willard in." Quaintly enough, the sequel to Willard is called "Ben." (Somebody must sit up nights to think these titles up.) It picks up with the promised center group raised. "Willard" had been the first concert in the Orlando area to use a close-up television projection on a screen behind the performers. The device allowed people in the audience to see a closer view of the performers, and presented an intermission light show with the superimposing of color and images on the same screen.

Mahavishnu's experiments were worthwhile as a step in a different musical direction. The whole thing was a classic, rather than the beginning of a bad dream.

National Athlete Champion Brings Tech Honors Home

by Fred Cay

The title culminated an incredible year in which he took four other titles that he currently holds. They are (1) southernmost power lifting champion, (2) All-Southern Olympic champ, (3) Region 4 champion (state of Florida) and (4) collegiate state champion.

Byrd, who may be overlooked partly because of his size-at 5'4" and about 134 pounds, wouldn't stand out in a crowd as a star athlete—has competed since 1969. He placed second in the national collegiate power lifting championships that year but hasn't finished that low many times since.

Does it bother him that he isn't the team had he tried out—probably. "I'd probably try for the July 24; it's been marked up in order to get a good stone," he grinned.

Byrd's refusal to enter the Olympic qualifying—"I'd have had a good chance to earn a spot on the team had he tried out—probably raised a few eyebrows. "I was just tired of the lift. I was doing because I've been in so many tournaments this year," he explained. "I'd like to gain, up to about 150 pounds, and compete in a higher weight class next year."

"I'll probably try for the nationals again after graduation when I have more time," he said.

Rouse Wrestles Next Week For Olympic Team Position

An FTU wrestler is competing in the unlimited division of the Olympic trials in Minneapolis Thursday and qualify for the U.S. Olympic team.

John Rouse, who began the sport two years ago, qualified for the trials by placing second in the Olympic regional qualifying meet at the University of South Florida in May.

The only graduating senior on the Knights squad this year, Rouse who urged Rouse to accept the wrestling, said, "It's a definite honor for the school for John to represent FTU in Minnesota."

DO YOU WANT TO SAVE MONEY?

THE BOOK EXCHANGE HAS GOOD USED BOOKS TO SELL AT GREAT SAVINGS FOR YOU.

THIS IS YOUR OPPORTUNITY TO GET A BREAK ON THE HIGH COST OF BOOKS.
For Friday, June 16, 1919.

AQUARIUS: You will work diligently trying to project a good image to all your friends today. By Monday they will see all through it. You will automatically be labeled as a loser by all but one of your peers, and you know what kind of grades prods give losers.

ARIES: Avoid need fish salesmen. One is out to tell you something you don’t want, and with his high-priced techniques he can sell you, since you are a well-known sucker. You are also a well-known weak-minded (Used fish salesman?)

GEMINI: Gird up your loins against a vicious attack of Pomato poisoning. Stop eating those sandwiches heated by the magic of their minutes. I tell you, they are part of a communist plot to wipe the upper-class Americans out. They even bill themselves as infra-RED-rays.

What more proof do you want?

CANCER: Your distant sun is setting on the horizon of your true love and you are only being restricted by your own inhibitions. You have been prisoner of your own bonds long enough. Throw off the chains that bind you and be yourself. Dance naked. Write lewd things in the street with spray paint. High-prophonic techniques, hearken you: keep on tuggering on with her because you’re madly in love with her, and want it to be close to yours.

Taurus: This week you will feel the thrill of power. You will be placed in a position of authority and you will throw your weight around to get things done. Next Wednesday you will discover that your position of authority is a little-only position, and nobody is responding to you now. Your authority is at all, let alone your weight. Next Friday morning you will know what it’s like to be a patsy. You will enjoy it.

LEO: This morning you can prove what a wit you are to those evanes who say that you have no imagination. Put your shoes on the wrong feet (the left shoe on the right foot, etc.) and wear the amalgamation of both! complaining constantly that your feet hurt. When these clods say “your shoes are on the wrong feet” you come right back at them with “But they’re theonlyones I’ve got.” If that doesn’t demonstrate your rational self, nothing will.

VIRGO: Virgo’s naturally resent all authority, and try to buck the system. Virgo’s will make it their business to cause head-aches within the administration and the faculty. The records will bear out that Virgo’s will kick your屁股 at school than any other sign during the next week. Mark my words.
