**Absentee Ballott Regulation**  
**Attacked By Phi Delta Pi**

A supposed lack of absentee ballots for the upcoming Student Government elections has come under fire from Phi Delta Pi, the FTU chapter of the Florida Student Education Association, because “education majors on the teaching block will not be afforded an opportunity to vote.”

Phi Delta Pi charges this lack of absentee ballots will deal a “severe blow” to the presidential hopes of education majors Thomas Costa and his vice presidential running mate, George Odlo.

**Student Government President Steve Adamick**

explained, “The absentee ballot regulation calls for students to pick up their ballots 10 days prior to election. Philosophically, I don’t care one way or another. I must enforce what is written in the election statutes.”

Adamick maintained that “historically there has never been an outcry for absentee ballots.”

“The present election statutes have been in existence for three years,” Adamick added. “I have asked the Student Senate to rewrite the election laws twice before, and apparently the senators don’t believe it needs rewriting.”

Adamick contended he is “bound by my oath of office.”

(Continued on Page 3)

**Committee Recommends Sale Of Beer**

By Sharon Marek

Beer should be sold on campus as part of the regular Snack Bar operation. Beer should be sold on campus.

This recommendation was released exclusively to the Future this week by President Charles N. Millikan’s ad hoc beer committee, which has been dealing with the matter since December 6, 1972.

In the first draft of a 30-page report, the seven-man committee further recommended “the necessary steps be taken to obtain Board of Regents’ approval and a beer license so that beer can be served in the Snack Bar area by the beginning of fall quarter of the 1973-74 academic year.”

“I would guess that beer on campus is a real possibility as a result of this study, primarily because the committee never would have been appointed if it were to be just an academic exercise,” said Dean of Men Paul R. McQuilkin, committee chairman. “I believe the recommendation stands a good chance of being approved.”

The report, with the recommendation, must be approved by Dr. W. Rex Brown, vice president for student affairs, who will likely consult with Millikan on the issue, McQuilkin explained. Brown should receive a copy of the report today.

The committee report, although recommending Snack Bar use, is contrary to the majority wishes expressed by members of the FTU student body and faculty in a market study.

The study, conducted as part of the overall investigation of the committee, revealed a majority of members of the university community would prefer a rathskeller setup to beer sales in the Snack Bar.

“This is probably the most significant result of the study,” said McQuilkin. “The fact that, in spite of majority wishes, our recommendation covers only what is economically feasible.”

According to the study, it would cost approximately $100,000 in initial capital outlay to start a rathskeller operation, with which lost money for the first several years of operation.

Snack Bar sales will not be greatly profitable either, the study revealed, but will at least break even.

The committee’s recommendation comes just one year and two months after the first liquor resolution was introduced on the floor of the Student Government Senate by then-Senator Lee Constantine.

Further details and an in-depth report on the beer study will appear in next week’s Future.

**Gusher Eases Rationing**

What! Oil discovered in commerce number four in the women’s restroom on the first floor of the Classroom Building! Be ready for next week’s big story when the Future will flush out all the facts and bring the story to the surface.

**Too Many Children? Problem For Crowded Library Facilities**

Unattended children will no longer be allowed in the FTU library.

Bernard L. Foy, assistant director of libraries for reader services, explained it is not the personal intuition of the librarians to interfere with the intellectual development of children whose parents are students or faculty members, but professional librarians are not paid to babysit.

“Unattended children have become more and more of a problem,” Foy elaborated. “Recently these children have become a distracting factor in the library, by riding elevators and roaming through the study areas and hallways.”

Foy pointed out there could be a liability factor involved if a child were injured.

**Dorm Session Airs SG Candidates’ Platforms**

By Jose Rodriguez

Candidates for Student Government offices got a chance to discuss their platforms in an open forum sponsored by the Women’s Residency Association Monday.

A handful of dorm students were present at the discussion. Following the informal presentation of candidates and their platforms, an opportunity for questions from the audience was provided.

However, questioning of candidates was not limited solely to the audience. The candidates themselves provided questions which probed the platforms of their opponents.

Presidential candidates Allen Grower, Lee Constantine, Thomas Costa and Joe Surney were present. Of those running for vice president, only Hunter Potts and Vickie Rhodes were present. However, Min Rhodes left before the questioning period, due to previous commitments.

One of the major questions considered was that of the SG budget and the funds raised by the student activity fees.

Constantine explained he would “like to lower the budget” and ask for $60,000 less. “This way, we can have more money available to the Village Center, the Health Services and intercollegiate athletics, which are the major users of student activity fee funds,” he added. “A budget cut would not jeopardize any of our existing programs or any programs on my platform.”

Costa replied to Constantine’s proposed budget cut by stating he saw “no reason for it.” He based his argument on the fact that Governor Bobbi Ackey plans to turn over $250 million from revenue sharing to education.

Joe Surney encountered criticism of long hair and his platform for hair and dress codes. Surney evaded the criticism by indicting the “ultraconservative running SG and those in the present school administration.”

The issue of voter appeal was brought up for individual consideration. Grower pointed

IT'S STUDENT GOVERNMENT ELECTION TIME AGAIN!

By William Lee Hidden

IF POLITICAL is a gone-wit, it sure had a few Student Government candidates at their wit's end and in a "Meet Your Candidates" meeting Monday in Dorm C Lounge. Anyone who was there and still finds politics boring, even at campaign time, must have just taken a sleeping pill that night. About 10 persons came to hear what was said and ask questions, but any more would have overflowed the small lounge and would have run the questioning into the late hours of the night.

EACH CANDIDATE was given five minutes to state his platform to the audience. The first speakers were the Lee Constantine-Hunter team. Both candidates emphasized their accomplishments and past service in Student Government. Constantine, current SG vice president who is now running for president, said although he and Hunter had been in agreement and worked together wholeheartedly on all their campuses for a year ago, he firmly disagrees with the current president regarding informing students.

Steve believes that students can generally inform themselves," Constantine said. "I believe it's a communications board be set up within Student Government."

IT WOULD have been nice to see this continue but, unfortunately, the only other candidate who might have competed, John Brookes, had not shown up. His absent left the forum to Joe Nursey, who walked out into the middle of the floor equipped with hard hat and toy machine gun.

"We're done cleaning the long-hairs, liberals and the campus out of our campus," he shouted to the floor. "We must stop subversive and un-American activities that continually corrupt our way of life."

Auditing by the looks of some of the other candidates, Nursey was not appreciated, nor was his humor, by the audience, which barely laughed at a chuckle. Even Nursey seemed to know he just wasn't getting anything, and so he sat quietly the rest of the meeting.

THE QUALIFICATION was quite well-rounded, although Constantine continually was cross-examined for his views, particularly by Grover.
FTU Undergoes Food Increases

Proof that FTU is part of the real world has finally become evident. Meal plan prices for resident students will increase in September.

In an April 16 letter to all families, President Robert E. Goree, vice president for business affairs, announced the price increase which is expected to affect the 21-meal-per-week plan. In dollars and cents, the price per quarter will be $219.50 for the 15-meal and $319.35 as opposed to the present $165. The 21-meal plan will increase to $225, compared to the present price of $207.36.

Goree explained the entire cost of serving food must come from these revenues. This includes labor, food, utensils, paper products, heat, air conditioning, lights, water, sewage, and maintenance cleaning. The State of Florida does not and will not subsidize university dining service. Goree stated food service is currently operating at an average profit of 80 to 85 p.c. per cent for the 21-meal-per-week plan. In dollars and cents, it brings in $207.36 per quarter.

Food Increases

The increase will bring about some improvements in the food service. The cafeteria will reopen on weekends. There will be served roast beef nights, steak nights, cook-outs, and second helpings. Also instituted will be a self-service salad bar, a variety of quick order items, and a move to the department of food service in the Village Triptych.

The real world has finally become a reality. Resident students will increase in number. The yearly average will be 2,500 student residents. The average for the last four years was 2,191. The average price increase would go into effect on October 24. In dollars and cents, the price per quarter will be $207.86.

FTU's in house survey of student reactions to the price increase was conducted by Robert Rainville, director of student affairs.

In an April 16 letter issued to all families, President Robert E. Goree, vice president for business affairs, announced the price increase which is expected to affect the 21-meal-per-week plan. In dollars and cents, the price per quarter will be $219.50 for the 15-meal and $319.35 as opposed to the present $165. Foundation Head Suggested Site

The new president of the FTU Foundation was instrumental in determining the location of FTU with his suggestion that the university be located in the area. As Regents back when they were scouting Central Florida for a suitable site for the university, William Davis recommended the present site after several other locations around the Orlando area had been examined and found unacceptable for different reasons.

Davis is most familiar with this area, as his family lives on the campus of FTU Boulevard and Alafia Trail.

Davis, who has lived in Orlando since 1920, was elected to the office of foundation president in January by the board of directors since the foundation was formed. He succeeded Allen Trouillon.

When President Charles N. Millican first came to Orlando, he was associated with Davis. "His first office in town was right above one of my drug stores, and Davis has owned and operated five retail drug stores in the Orlando area. He is presently head of Davis and Associates Inc. Realtors. Davis III from Arkansas and his wife is from Mississippi. After she graduated from high school in Jackson, Miss., Mrs. Davis sang on tour with Sophie Tucker.

While living in Orlando the Davises have raised buffalo, kept a riding stable, owned the Davis Park motel, operated those five drug stores, and in 1969 he served as president of the Orlando Chamber of Commerce.

"We sold the buffaloes just before the university opened," he explained. "We didn't want any students to take them on campus." DAVIS SAYS he prefers to see the name of the university remain FTU, because he feels the time will come when there will be a need for a technically oriented university in Florida and that there is no place better than here.

He agrees there has been an surplus of scientists all over the country since the space program was cut back, "Scientists are coming out of our ears," is the way he put it.

But Davis says he believes things eventually will even out. Defending his position for retaining the technological image of the university, he cited the example of the progress of the Japanese technicians, and specifically their work with developing video cameras. He named three major brands, all Japanese.

"Why doesn't America make this type of camera?" Davis asked. "I would like to see the federal government subsidize as much funding for science as it does for farming," he said.

Some technical equipment has been given to the university, primarily for the engineering department. Davis pointed out. The foundation, a nonprofit, tax-exempt organization, and the gifts and donations in the name of the university. "A GOOD portion of the donations is in loans, equipment and scholarships," Davis said.

Having just finished the 1972 fiscal year, the foundation turned approximately $48,000 over to the university.

Dr. William K. Grady, executive director of the foundation and executive assistant to President Millican, said 60 per cent of the sum was used for scholarships and student aid, and the rest was dispersed to the library, academic, building and student affairs areas. Some was kept in the foundation as a reserve. (Continued on Page 15)

There used to be a time at FTU when one could take a break with nature and spend a few minutes in uncomplicated silence. One could momentarily escape the pressures of student life, sitting quietly without having to undergo either educational input or output.

Not any more. After these few years of relatively clean bathroom walls, a graffiti artist has stormed the bathrooms of FTU, leaving behind his distinctive trail of calligraphic scrawling.

The walls are covered with the stuff. The subjects range from what John does to Mary (or what he wishes he could do) to the socioeconomic pros and cons of Walt Disney World. Graffiti is as old as writing itself. It has been found everywhere, from the walls of ruined cities excavated through thousands of years after their fall to the interiors of rigid transit vehicles in the largest of modern metropolises.

With the advent of printing, glue and the automobile, there emerged a sort of portable graffiti, the bumper sticker. Through the bumper sticker, we can place our ever strike and perhaps satisfy the desire for the ensuing pollution) because of an amusement park.
Meditation Way To Happy Life

By Bill McGrath

HOW WOULD you like to be able to think more clearly, speak more effectively, act with more energy and creativity and enjoy life more from day to day? If you say, "yes, but it sounds complicated," well, it isn't. There are only some of the benefits which result from the natural, easy mental technique called Transcendental Meditation (TM) as taught by Maharishi Mahesh Yogi.

Transcendental Meditation is rapidly spreading throughout the U.S. The Students International Meditation Society, which is a nonprofit organization, has centers located in all 50 states, and already there are more than 100,000 persons in the United States alone practicing the technique for self-improvement.

Unlike other techniques for mental or physical development, TM is not a religion or philosophy. It is easy to learn and continue without special instruction. All that is involved are four 2-hour lessons. After this, a person is able to continue the practice of TM alone, which constituted a sweeping social change. Through TM, a person moves to finer levels of the mind, is ideally suited to the pragmatic individual.

According to this principle, the mind shifts continually in the direction which will bring the greatest pleasure to an individual.

Through TM, a person moves to more subtle levels of thought until the mind arrives at the source of thought. This source is described as the reservoir of energy, intelligence and happiness.

Scientific research at UCLA, Stanford and Harvard has disclosed some very interesting discoveries of what occurs during TM. Basically, the body receives profound relaxation and rest and is remarkably free from tension.

AS FOR physiological changes, there is a reduction in respiration and heartbeat, a decrease of about 25 per cent in cardiac output, a lowering of oxygen consumption of about 20 per cent and an increase in alpha reducibility, which indicates reduction of anxiety.

Most significant is the increased output of alpha waves, those brain wave patterns which are associated with pleasure. All of this signifies that in just 20 minutes, TM produces a state of rest deeper than the rest attained through deep sleep.

ACCREDITED courses in TM are given by instructors who have received personal instruction from Maharishi himself, in conducting the lectures and will answer questions from the audience afterward.

The do-it-yourself style of TM is ideally suited to the pragmatic "show me" characteristic of Americans. While it may be premature to predict Transcendental Meditation will constitute a sweeping social change, it could well have a significant effect upon the collective consciousness of America in the '70s.

Introductory lectures in Transcendental Meditation are currently being held each Tuesday and Thursday at 11 a.m. in VC 214. Kathi Baxter, the Orlando area TM instructor who received personal instruction from Maharishi himself, is conducting the lectures and will answer questions from the audience afterward.

Brown Discusses Obscenity Ruling

By Susan Sauerbrunn

Brown added, "Buying a ticket to a play does not give one license to be one of the players - even Robinson Crusoe was not totally free."

He said he considers the decision a good one for free speech but not for decency in society.

The newspaper in question contained a two-page cartoon "deploring policemen replying the Statue of Liberty and the Goddess of Justice" and "an article entitled 'Mother F... Acquitted.'"

The majority opinion of the court stated, "The mere dissemination of ideas - no matter how offensive to good taste - on a state university campus may not be shut off in the name alone of conventions of decency."

Brown said he sees good and bad aspects of this decision with regard to FTU students. He said, from now on, the responsibility for the censorship must be imposed by the student upon himself. The administration no longer has control.

Library

(Continued from Page 1)

The commotion caused by unattended children disrupts students trying to study, as the noise level is always a problem, explained Foy. "Many times we do not have adequate space to provide for these children during the day."

According to Foy, the problem of unattended children becomes more acute during the summer quarter when children are dropped off at the door of the library by their parents after class. Foy said the problem of unattended children emphasizes the need for a day care center on campus.

Forum

(Continued from Page 1)

...out that his lack of experience in Student Government was an asset because it helps him see the problems from the outside.

In reference to voter suppression, Nursey stated, "I'm appealing to the students on this campus who are sick and tired of cropping pertinacity and moral degeneration within our university and the artists who happen to stumble into the voting booth."

Nursey bases his campaign on general appeal. "I'm trying to appeal to anybody I possibly can.

"We are appealing to everyone. It's not that we're promising to everyone," Costa commented. "But we're appealing to everyone to come back into Student Government and participate."

Ballots

Greenfield Follows Tradition To A ‘Tea’

By Gene Kruckemyer

Greenfield has his tea. It is the classic example of a British tradition. He munched on a German chocolate cookie and leaned back in his chair. His hair was neatly combed and not hit anybody. They are all inside drinking their tea.

It would be easy to convince oneself that Greenfield is going to drive down the middle of the street at four o'clock and not hit anybody. He is muffled up in Canada.

Greenfield is a reproduction of her official photograph. He picked it up in Canada. It's up for the blind date, he says. Next time he goes he's going to take it, but I can't really blame him. You see something as nice as that, you just have to have it for yourself.

Even THIS family pet was unable to escape Greenfield's enthusiasm. The cat, a Siamese, the family pet, is named Edward.

Flags are a major part of the decor in Greenfield's office. Two Union Jacks cover the door and another stands on the file cabinet. The American flag with the eagle on the file cabinet and the Canadian flag with the eagle on the file cabinet.

The one behind his desk, seems to be the kind he's going to like. The other, “that's the Royal Stan,” he stated. "It takes precedence over all the flags in England. The one place you can display it on the Queen's car or the table where she's eating."

He acquired the flag with great difficulty. After going to the place where the flag was made, he told the manufacturer he was a teacher of British history in America and he would like to buy one. The manufacturer, a man who had spent all his life in England playing cricket, even seemed to have a slight accent to go along with his usual appearance.

It was on his desk. A small poster of the Queen's portrait. I picked it up in Canada.

Now lords and ladies, friends and patrons all,
Welcome to FTU.

Or should we call
It SU and CFU? Who knows?
By another other name, it's said, a rose
Would smell.

We hope our play will not.

We've done our level best with what we've got:
A comedy by Sheridan, Richard B.
The Noel Coward of his century,
Known for his Irish wit and repartee.

We ask you now to step into a past
Lovingly recreated by our cast,
A past of smelling salts and lovers' tiffs,
Of unrequited love and many ifs
Of plot and counterplot redoubled twice
All to intrigue, enthrall you, and entice:
Will Captain Absolute win his Lydia Languish?
Or will his plotting only bring him anguish?
Will Squire Acres stand and fight, or flee?
For what transpires, you'll have to wait and see.
And what of Faulkland? Will he get his Julia?
We promise many a contretemps to fool ya,
This in a time when nice girls seldom bedded
Until the man was safely caught and wedded.
But don't forget that ladies worth their salt
Will always find the gentleman at fault.

Tonight you'll hear that paradox of breeding,
'The lovely widow Malaprop, succeeding
At what is catamount to language murder:
You'll understand this better when you've heard her.
She sets her cap for Lucius O'Trigger,
An Irish gent who'd like his fortune bigger.

But Lawks! How I do rattle on and prate!
Our play is ready and the actors wait.

Opens Thursday For Four-Day 4-Day Run
"The Rivals" by Richard Brinsley Sheridan will open Thursday at 8:30 p.m. in the university theatre. The play will run through May 6, with a special matinee performance for high schools students 2 p.m. Saturday. Reservations may be made by calling ext. 2861 weekdays between 10 a.m. and 3 p.m.

Malapropisms

The following is a partial list of malapropism uttered by Mrs. Malaprop during "The Rivals.

Accommodation for recommendation;
Affluence for influence;
Allegory for alligator;
Analysis for paralyzed;
Antistrophe for catastrophe;
Comparisons for companions;
Commotion for emotion;
Conjunction for injunction;
Contiguous for continuous;
Contrivance for inconvertible;
Dilettantes for allusions;
Derangement for arrangement;
Enveloped for developed;
Envoy for convoy;
Epithets for epitaphs;
Epitaphs for epithets;
Geometry for geography;
Harry Mercury for the herald Mercury;
Hesperian for Hyperion's;
Hydrostatics for hysterics;
Illegible for illegible;
Illiterate for obliterate;
Illuminate for elucidate;
Induction for seduction;
Ineffable for infallible;
Inferiority for intellectual;
Inexplicable for inexplicable;
Interceded for intercepted;
Intuition for tuition;
Jove for Jove;
Laconically for ironically;
Lacernity for benevolence;
March for Mars;
Orthodoxy for orthography;
Participate for precipitate;
Perpendiculars for particular;
Persisted for desisted;
Physiognomy for phraseology;
Pineapple for pinnacle;
Preposition for proposition;
Progeny for peoplgy;
Punctuation for punctilio;
Putrifications for petrifactions;
Similitude for simile;
Supercilious for superficial;
Superbious for superficial;
Superfluous for superficial;
Vaidy for vandal.

**PROBE**

**BY DAVID FOSTER**

**MARJO FERNANDEZ**

**BLAST OFF, but no splatdown, from a beautiful beginning to an unknown end. Pioneer 11 is on its way to...**

...where? For a start, Jupiter is on its agenda. 

Curiously on the part of Earth’s scientists is sending Pioneer 11 to one of the strangest planets in the solar system. Not only does this planet manufacture its own life-supporting chemicals without the aid of photosynthesis, but it also radiates into space three times the amount of energy it receives from the sun.

The second and probably the last probe to the outer planets during this decade, Pioneer 11 departed from Kennedy Space Center on April 5. Making a spectacular farewell to Earth in the form of a blazing nighttime launch, the probe is due to arrive at Jupiter in a little less than two years.

**THE PROBE, now on route to its destination half a billion miles away, is traveling at almost 52,000 miles per hour—qualifying the ship of its twin probe, Pioneer 10, which last year earned the distinction of traveling faster than any other manmade object.**

While Pioneer 11’s mission plan is almost a Xerox of its predecessor, Pioneer 10, there are several differences. The two spacecraft will carry different portions of Jupiter’s surface, and the final fate of Pioneer 11 after its fly-by has not yet been decided by NASA.

Depending upon the data collected by Pioneer 10 during its fly-by of the giant planet later this year, Pioneer 11 has at least two mission options. Using Jupiter’s gravitational field as a slingshot, it could follow Pioneer 10 out of the solar system into the unknown void of interstellar space—thus becoming the second manmade object to leave the solar system. Alternatively, it could be diverted to the planet Saturn, with an arrival date in the early 1980s.

**PIONEER 11, like Pioneer 10, will carry a pictorial message intended for other intelligent species. If any existe, who might find the spacecraft thousands of years from now in some other star system.**

The plaque tells when the probe was launched, from where and by whom. Most noticeable on the plaque is a picture of a man and woman standing in front of a scale drawing of the Pioneer 11 spacecraft. The spiked asterisk to the left of this shows the location of our sun—indicated by the intersection point of radio signals from 15 pulsars (cosmic radio sources).

**Binary Dashes** on the intersecting lines show the frequencies of the pulsars as they are today, and they could be read millions of years from now not only to locate our solar system, but also to calculate the probe’s launch date. The two circles connected by a line at the top of the plaque depict the electron reversal of the hydrogen and are shown to provide a measurement standard (its eight-inch radio wavelength) for both pulser frequencies and the size of the figures on the plaque. At the bottom of the plaque the sun and the nine planets are shown, as is the spacecraft’s trajectory, leaving the third planet, Earth, passing Mars and swinging by the fifth planet, Jupiter.

**PIONEER 11’S journey to Jupiter will be a little less nerve-wracking for scientists than was Pioneer 10’s. At one time the asteroid belt lies between Mars and Jupiter and was believed to contain a serious danger to spacecraft passing through it, but Pioneer 10 last month completed its 205 million mile transit of the belt without suffering any damaging hits from high-velocity particles.**

The spacecraft never worried about the spacecraft colliding with large asteroids, let alone even B.S-sized particles. The most serious hazard was believed to be the 1/10 to 1/1000 grain dust-sized particles of the belt. Meteoroids traveling with a mass of 1/100th of a gram and traveling 35,000 miles per hour relative to the spacecraft could penetrate a sheet of aluminum nearly half an inch thick.

**NEVERTHELESS, NASA controllers remain ready 24 hours a day to effect emergency procedures to save the spacecraft if it is hit by an asteroid particle. If nothing else, Pioneer 11 will count the near miss. Its four onboard scanners will record any light scattered by nearby asteroid material, and a gas cell photometer detector will record micro-meter-size particles.**

Except for an extra fluxgate magnetometer, which will measure Jupiter’s magnetic field, Pioneer 11 is identical to Pioneer 10. Both are built for their mission in that they both must have extreme stability, be of very light weight because of launch vehicle limitations, have communications systems for extreme distances and employ non-solar power sources.

**BECAUSE SOLAR energy at Jupiter is only 4 percent of the amount received by Earth satellites, the designers of the probe selected a nuclear power source rather than solar cells. The probe’s 12 onboard experiments are powered by four SNAP-19 radiotopes thermoelectric generators. These generators convert heat from a nuclear power source into electricity. At Jupiter, the four sources will provide about the same amount of power required to light three refrigerator light bulbs.**

**The Planet**

Pioneer 11’s major objective, Jupiter, is one of the strangest planets of the solar system. The planet is immense; its volume is more than 1000 times that of Earth, and it also has a diameter more than twice the mass of all the other planets combined.

Striped in glowing yellow-orange and blue-gray, it floats in space like a brightly colored rubber ball. It is 480 million miles away from the sun, which it circles in just less than 13 years. The planet has as many.
One interesting hypothesis holds that despite the five billion years since the formation of the planets, Jupiter has not yet completed its gravitational condensation. Continued settling toward the center as little as 1/254th of an inch per year could explain the vast amounts of energy radiated by the planet.

The Mission

SOMETIME next spring scientists will have analyzed all the data collected from Pioneer 10’s swing around Jupiter, which will have been completed four months earlier. Project officials will then decide on Pioneer 11’s exact path past the planet and make the required course changes.

A critical question is how close may the probe approach the planet. The question of Jupiter’s radiation belts will be a critical factor. The belts may be as much as one million times stronger than Earth’s belts, and the high energy protons and electrons held by the belts could penetrate deeply into the spacecraft, damaging vital solid state electronic circuits.

Also, any dust particles held close to Jupiter’s atmosphere could impact the probe at speeds approaching 137,000 miles per hour. Scientists are hoping that such particles will be few.

If DATA from Pioneer 10 indicates such dangers are very small, Pioneer 11 could be routed very near to the planet’s cloud tops and fly onward toward Saturn for arrival in 1980. The actual fly-by will be a

### Tech Fair Ends

A miniature model of the campus average treatment plant, an assembly line that kicks out ping pong balls which fall to meet specifications and a two-man helicopter will be on display during FTCU's second annual Enginners Fair, which ends today.

The student exhibit, which is sponsored by the campus chapter of the Florida Engineering Society, features group and individual projects. Prizes will be awarded in each of the categories, according to Dr. Don Wall, faculty advisor to the student group.

Judging the entries today will be a five-man panel from business and industrial firms. Members are Dr. Richard Hall of the Martin Company; M. E. Dawkins of Dawkins and Associates; Edward Lohnitz of Tilden, Johnson and Lohnitz; Joseph Seckna, Martin Company, and Lowry Marks Jr., Martin Company.

Also on display will be the well-known MAL, the pollution free automobile designed by FTCU engineering students for last year's fair which took top honors in the group category and won out to win further honors at the National Clean Car contest in August. The car was on exhibit during the first two days of the fair.

Dr. Robert D. Kersten, dean of the College of Engineering, noted the fair has several purposes, including the stimulation of new ideas that can be practically adapted, the involvement of students and the generation of public interest in "what engineering is all about."

The fair is open to the public. All exhibits will be on the ground floor of the Engineering Building. An awards banquet for the best displays will be held on the last day of the fair, April 27, at the Ramada Inn.

---

### Elect

**LEE CONSTANTINE**

Pres.

**HUNTER POTTs**

Vice Pres.

Fellow Students:

During our 5 years combined experience working in Student Government, we have fought for many programs of importance to the students on this campus. These include the establishment and expansion of the Student Subsidy Program, initiating the drive for beer on campus, the establishment of Pre-Registration and continuation of the quarter system, the establishment of Inter-University Programming open to all students, the establishment of new and better procedures for club funding, working for a student oriented Judicial System, curbing the veto power of the Vice President of Student Affairs, and providing legal aid to our students.

We have laid the groundwork for new projects for the students next year. However, we need your support to continue this progress, and together, WE CAN MAKE IT HAPPEN.

**PLATFORM**

1. Expansion of Student Government Programs such as the Student Subsidy Program, the Used Book Exchange, and Intramural Programming.
2. Establishment of a Board to increase communications with the student body through newsletters and daily meetings.
3. Increase of scholarships given to students through Student Government.
4. Establishment of a Rathskeller on campus within our term of office.
5. Further student causes in Academic Affairs i.e., continuance of quarter system, curbing the veto power of the Vice President of Student Affairs, and providing legal aid to our students.
6. Organization of Student Cardpools to help alleviate the packing problem in residence halls.
7. Establishment of a Child Day Care Center and providing legal aid for students.
8. Expansion of Student Government services and finances.
9. Increased assistance to clubs and organizations including a bulk rate mailing license and establishment of better Student Council.
10. Increased attendance at club meetings and improving of dormitory living conditions.
11. Increased attendance at student and improvement of dormitory living conditions.
12. Increased recreational activities at Lake Chalet.
13. Expansions of transportation to athletic events.
WHILE MARLON BRANDO took some of the glitter off the finish of this year's Oscar presentations, we, the diehard sphincters of the FuTUre, will nonetheless, ignoring all recommendations, go on with this show. It's Vociferous Vulture time again.

In the last year or so (depending on whether you go by semesters, quarters, military or tinie again. recommendations, go on with the FCC might explain, who, contrary to the Board of Regents who explained, been voted down by the Board of Regents, who, contrary to the Board of Regents who explained, been voted down by the Board of Regents who explained)

To Dr. Steve Levenson gives the Trane Gator Silver Slipper Award, for having the nerve to carry a purrve and become FTU's first (and only) resident major in jazz.

Who Was That Masked Man? I wanted To Thank Him... So I gave Birkett Jr., who, contrary to unconfirmed rumors, is not Howard Hughes. Overreacher of The Year, Torchy Clark who scheduled Memphis State for the FTU basketball team to play. We lost. By 19 points. But we didn't pretend.

The Johnny Whitaker Look-Alike Award goes to Mike Murdock, whose veins treater and shoe-boy face make him look more like 'dr Family Affair' than the future Marine he really is.

The Mark Smith Questionable Journalist Award is unanimously presented to Willy Leon, his daughter for the show, and an unconfirmed report reveals that Ron Page, alias "The Pig," was among the group.

Course To Study Noise
The problems and effects of noise pollution, plus identifying existing for the show, and an unconfirmed report reveals that Ron Page, alias "The Pig," was among the group.

Architects See FTU
A group of 40 architects from Frankfurt, Germany, visited the campus April 18 taking pictures and touring the new and modern buildings.

This group was part of an 82-person tour throughout Central Florida, which included a speech by Donald Spivey, which included the mini-assembly and Walt Disney World.

The trip was sponsored by the U.S. Office of Education.

The tour around Florida was arranged by the Mid-Florida Council for International Visitors.

The Country Joe Fish Cheer Award goes to that overzealous FTU cheerleader who screamed out the wrong thing within earshot of a referee at a basketball game, resulting in a technical foul being called on the Knights.

The A MA D I LLO Look-Alike Award goes to the intramural referees and officials who must have thick protective shells to withstand the childish verbal abuse to which they are subjected almost daily during the basketball season.

Hi, Mark Denver.

FROM THE TINY Acren Crew The Mighty Oak, to FTU's soccer team, a cruel joke a you all, that's a take. The Marc Bean Award went to that handful of students who showed up for "An Evening with FFT" by Jeremiah Collins. Only 50 students bought tickets for the show, and an unconfirmed report reveals that Ron Page, alias "The Pig," was among the group.

The course will have been developed by FTU, will study the use of sensible programs for noise reduction in industry and audiological testing for workers.

It is not uncertain that I talk to everyone.

The short course is coordinated by Dr. Thomas A. Mullins of the communications department, and will feature a variety of guest lecturers.

Information on the course and enrollment may be obtained by contacting Al Fickett, who is heading up several projects, including graduate studies and research, AD suite 397, 399B. Students must register for this course by 5 p.m. today.

FM-107

The course will also bring up the economic and legal aspects of hearing conservation programs, pointing out recent federal legislation regarding the effects of industrial noise on workers.

The short course is coordinated by Dr. Thomas A. Mullins of the communications department, and will feature a variety of guest lecturers.

Information on the course and enrollment may be obtained by contacting Al Fickett, who is heading up several projects, including graduate studies and research, AD suite 397, 399B. Students must register for this course by 5 p.m. today.

Campus Clanes
RESUMES PROGRAM
All women students of business are invited to attend a program on how to fill out resumes 1 p.m. today in the dean's conference room on the second floor of the General Classroom Building.

GUNTER TO SPEAK
U.S. Rep. Bill Gunter, D-Fla., will speak at 10 a.m. today in the Village Center Assembly Room. All members of the FTU community are invited.
**IM Offers Services**

The instructional media department, located on the first floor of the library building, provides an extensive audio-visual service for students. Records, cassette tapes, films, tape recorders and slide projectors are available for students to use on campus for as much as 24 hours.

To check out an item for a class presentation, the student must ask his professor to make arrangements with instructional media. Students may view films in the campus services area prior to checking them out.

Tony Logan is the department's interim director while Richard Cornell is in Australia. Logan has a bachelor's degree from the University of South Florida and a master's degree in education with specialization in educational media from Temple University in Philadelphia.

"Instructional media provides equipment to any FTU-recognized student organization," Logan said. The photography section takes pictures of special events and Village Center programs. The graphics section provides layout and design for the VC activities calendar, student handbook and university catalog. Pictures in the handbook, catalog and records are taken by department photographers.

Students are employed in the campus services section to serve as a resource for students, Logan said. The students' responsibilities include developing and maintaining the calendar, student handbook and university catalog. Pictures in the handbook, catalog and records are taken by department photographers.

FTU Vs. Rollins

Winner: None

Darkness Deadlocks Rivalry

Freshman Jimmy Horvath, left, sets himself in anticipation of a Bill Miller curve ball early in the game. The game was called after 10 innings due to darkness, with the score deadlocked at 6-6.

Ron Behe, right, connects on one of his two hits against Rollins. Bebe scored a go-ahead run in the top of the seventh before the Tars tied it in the eighth.

GREG PERICH rears back and fires one to the plate as shortstop Jimmy Horvath sets for a possible grounder in his direction.

Breaking News
Only Two Home Games Remain For FTU

Goldsox To Face USF, Rollins

By Fred Gay

In a week of big rematches for FTU's baseball team, the Goldsox will battle South Florida and Eckerd-two squads vying for college division playoff berths-and cross-town rival Rollins, still smarting a bit from last week's 4-2 loss.

Doug Holmquist's squad is scheduled to face USF Saturday, April 27, 1973, at 7:30 p.m. Tinker Field, Orlando.

USF is 21-12 at the week's end, while Holmquist fully expects Ellison, recently recovered from a hairline leg fracture, is back in form and a key player. The Goldsox face USF with a full week off to prepare.

Eckerd and Rollins are key matches, but neither is scheduled to face the Goldsox this week. However, the Vermont trip cancelled their pair of doubleheaders in Vermont.

Their 16-10, 17-16 victory over St. Petersburg this past Saturday will probably be Coach Boyd's first South Florida start and still hoping for a win.

The Goldsox pounded out 10 hits but these only produced two runs-both coming in on Jack Stirma's clutch double with two out in the fifth inning which tied it at 2-2.

There were two costly errors that led directly to three of the Triton's runs-one by shortstop Jim Howarth and a dropped fly by Ron Behe, considered to be the team's best defensive player.

"Those were the only two physical lapses," Holmquist said, "but they hurt us."

Now 16-10, the Goldsox had hoped to face Lyndon State in a pair of doubleheaders in Orlando this week. However, the Vermont team cancelled their trip south, leaving the FTU squad with a full week off between games.

"It's really hard to stay sharp when you don't play for a week," Holmquist lamented. "Since Lyndon State cancelled out, we've been trying to get practice games with junior colleges or anybody we can find in the area.

The FTU golfers beat Eckerd with a score of 313 to Eckerd's 323. Low score for the Goldsox was Brent Whitley with 72, followed by Tony Kinley with 76, John Thinner with 78 and Mark Sullivan with an 84.

FTU ARCHERS HOST TOURNAMENT

FTU's archery team will host the State Collegiate Target Championships tomorrow on the intramural fields.

Food and refreshments will be hard-pressed by the FTU archers. FTU has a good chance of winning. Their primary competition will come from Stetson University in DeLand. This club has several national championships and usually wins such meets.

FREE BUS SERVICE!

The First Baptist Church, Goldenrod, on 15-A will have a bus here at the Village Center each Sunday morning, at 9:15 A.M. starting Sunday, October 1st, to transport any students wishing to attend services. The bus will return by 12:30 P.M.

LEARN TO SCUBA DIVE

Orlando Otters Underwater
Sportswear training course.

Fred Lynch V. Pres. 838-5108.

Lifters Ready For Region Meet

The FTU Weightlifting Club will travel to St. Petersburg tomorrow for the U.S. Region 4 Weightlifting Championships. This will be the final big meet for this season.

Last year FTU had only three lifters competing in the meet. As a result, FTU came in third as a team. This year the club will have eight members in action.

The roster will be composed of: Sherard Boech (133 lbs.), John Milburn (132 lbs.), Doug Zika (148 lbs.), Chico Figueroa (145 lbs.), Mike Brown (160 lbs.), David Brown (165 lbs.), Marty Lee (198 lbs.) and Harvey Newton (242 lbs.).

Farrell Byrd will be in Mexico lifting in the Junior Pan-American Championships.

Although this will take away some points from FTU's final score, the club has a good chance of winning. Their main competition will come from Stetson's 300 Club of Miami. This club has several national championships and usually wins such meets.

FTU's men's team will receive their primary competition from Florida, while the women's team will be hard-pressed by Stetson.

The tournament starts at 9 a.m. and will continue until about 4 p.m.

STUDENT GOVERNMENT SPRING ELECTIONS

MEET THE CANDIDATES AND VOTE TODAY UNTIL 4 P.M.

Multipurpose Room, Village Center
FTU Lightweight Crew Rows To State Title

FTU's crew team reached the ultimate goal of statewide recognition by capturing two state titles at the Florida Intercollegiate Rowing Association Championships last Saturday at Disney World. The championships were held at the 1,700 meter course on the lake next to the Contemporary Hotel.

FTU captured first place finishes in the lightweight varsity and the junior varsity heavyweight competition. FTU also finished very strongly third in the heavyweight varsity competition.

"We went to the race determined to show the other schools here in Florida that we were to be contended with," said Coach Dennis Kamrad. "And that's exactly what we did."

In what was undoubtedly the closest race of the day-long competition, FTU's lightweight varsity squad out-weighed Rollins Institute of Technology's lightweight varsity team by 11 points. Despite expectations that Rollins would capture the lightweight varsity title, the FTU crew consisted of Greg Cordner, bow; Greg Alward, stroke; Brian Armitage, 2; Mark Ludwig, 3; Charles Filko, 4; Mike Carden, 5; Don Thomas, 6; and Allison Rech, coxswain.

In the final, but most prestigious event of the day, the FTU heavyweight varsity team took on Rollins, FIT, Jacksonville University and Tampa University. In making third, FTU sewed up a second place finish in state point standings.

"When we went into the race," said Kamrad, "we knew Rollins had the best crew on the water, but we did not know how we could measure against the other crews. I think we did very well. As the newest member of the Florida Rowing Circuit, we did more than very well," he added.

Rollins totaled 18 points to finish second in the championship race. Rollins' total of 27 points. Rollins followed FTU, then came Florida Southern, Jacksonville and Tampa. FTU's lightweight crew consists of Al Dimms, stroke; Craig Rich, Bob Miller, Harry Morris, Guettin Rife, Mike Swanson's March Concert at 8:30 p.m. on WFTU Raido 640AM will be rebroadcast in its entirety

In Crucial Tennis Match

Knights Face Rollins Today

By Bill McGrath

Just how good is the FTU tennis team? Well, the FTU varsity racquets are set to show that they can stack up against Rollins, the number one small college in the nation.

Today at 2 p.m., Rollins hosts FTU in a match that promises to be hotly contested. Rollins features All-American John Lowman in its No. 1 slot. According to FTU coach, Mr. Alexander Wood, Lowman is "probably the best player in the state of Florida." Becking Lowman up at No. 2 is sophomore Brad Smith, the eighth ranked men's player in Florida.

FTU, on the other hand, is paced by Octavia Piva, the Brazilian National Junior Champion. At No. 2, South African net star Mike DeZeeuw checks in for the Knights. In addition, No. 4, Bill McGrath returns to the lineup after missing the last two matches. The match stacks up as a close one's softball, not being better than last year's 9-0 defeat at the hands of the Knights. Last year's match has given FTU an added incentive.

SINGLES
1. Octavia Piva
2. Mike DeZeeuw
3. Joe Lucchi
4. Craig Linton
5. Bill McGrath
6. Hernando Dias

DOUBLES
1. Lucchi-DeZeeuw
2. Robert-Piva
3. McGrath-Herrling

Team A Wins Water Polo; Frats Start Softball Play

Four big second-half goals by Willy Belotte led the way as Team A scored a brilliant comeback in Monday's intramural water polo title match to clip Alpha Tau Omega 6-5.

ATO led 4-1 at the half, just as it had in the Greek title contest which it won 8-3 over Tau Kappa Epsilon. However, a determined defense and Belotte's heroes completely turned things around in the last half. The Frats champs got their early lead on three Bob Fisher goals and one by Fred Hauest in the first half. However, they only managed one more--by Hauest--as defensemen Dom Mandicott and Joe Gierobbe and goalie John Smith shut the door. Belotte scored five goals altogether with Jim Morris adding one. The Team A actually did not play its best against the other player. Team A was given a playoff victory over T.K.E. because of an ineligible player. Team A won a playoff with the Frats last week for the Independent title.

Tau Kappa Epsilon and Lambda Chi Alpha won important games Wednesday, the first day of men's intramural softball.

TKE got an unexpectedly tough battle from Sigma Alpha Epsilon before coming out on top 5-0, while Dave Hurdick belted a pair of home runs to lead LAX over Kappa Sigma 11-6.

In the only other action Wednesday, Sigma Sigma Chi won a lopsided 29-9 verdict over Pi Kappa Alpha, and Alpha Tau Omega picked up a win the easy way--by forfeit over Tau Epsilon Phi.

LAX and ATO will definitely be in the battle for top honors in this year's last major sport, but TKE appears the team to beat. Strong defense and pitching are TKE's forte and that's usually a reliable combination. SAE may be a surprise team if it can conquer defensive lapses like the ones that gave Tau Epsilon last week Wednesday.

Eight teams are entered in this year's Greek division, while a total of 11 are split into the two independent divisions.

The Independent Black race will apparently be a two-team affair involving Faculty Staff-and-Students and the Senior--a team consisting mainly of intramural staff members. However, the Gold League is up for grabs with at least four of the five teams in the running.

Early games that should clear up some of the confusion in the Gold League are Psychology Faculty vs. the Cavaliers Tuesday at 4 p.m. and TKE II vs. SAE Tuesday at 5 p.m. on Wednesday.

Interesting matchups in other races are SAE vs. Pepper vs. Seniors at 5 p.m. Monday, TKE vs. SAE Tuesday at 5 p.m. as the highlight of a light Intramurty schedule and Seniors vs. FS & S Wednesday at 5 p.m.

***

Little Lancers is the champion of women's softball, winding up with a perfect 8-0 mark. Tyres, Tri-Delta and Zeta Tau Alpha all tied for second at 6-2.

The IM golf tourney will be held tomorrow at Mid-Florida Country Club. Twelve men's and two women's teams are entered.
