President
Tour FTU In Wheelchair
By Torrey Stewart
After spending two hours Monday in a wheelchair, President Charles Millican said he is "much more personally aware of the detailed problems handicapped students have that do not appear on the surface." In order to learn about the problems of handicapped students, Millican visited the Classroom and Administration buildings, the Library, snack bar and cafeteria. He experienced some of the difficulties itemized on a priority list compiled by Robert Van Etten, a handicapped student. The priority list included campus facilities which are difficult or impossible for the handicapped student to use and suggested possible solutions.

Chances of a name change for FTU before fall quarter dimmed considerably following the monthly meeting of the Administrative Council May 17.

President Charles Millican reported he was told by the Board of Regents in Tallahassee May 15 to "come back when you have a name."

Millican then suggested to council members, "I think we should let this simmer through the summer and dig it into again in the fall."

There were no objections. In Millican's opinion, the delay is necessary to approach the problem of a name change from all angles.

President Charles Millican rolls up the curb ramp by the Classroom Building Monday at the beginning of a two-hour wheelchair tour of campus. Millican encountered several problems experienced by handicapped students. (Photo by Jerry Brooks)

ACCORDING to Millican, the decrease in foreseeable enrollment affects the matter because a minor name change will have no impact on the timetable of upcoming projects by about five to six years. The need for FTU once fell for University of Central Florida.

To The Rescue: Astronauts To Save Skylab
By Torrey Stewart
After a prisoning race against time, Skylab 1 astronauts will lift off from Kennedy Space Center at 9:02 A.M. today in an attempt to salvage as much as they can of their crippled workshop.

The space station was disabled May 14 after lift off from Cape Kennedy May 14 when a reflective Samantha sun shade tore off the top of the spacecraft.

The mission meteorological sun shade would have had a stabilizing effect on the thermal balance of the craft. Without it, water in a heat exchange coil on the shaded portion of the ship threatens to freeze, expand and rupture the cool, and rising temperatures in the unshaded portion threatens to fog sensitive photographic film and deteriorate medical supplies and foodstuffs stored aboard.

The rising temperatures are far above the expected tolerances originally foreseen for the lab, and some of the materials aboard, such as insulative foams, are believed to be "outgassing" or being degraded in such a way that they release toxic gases.

The temperatures inside the craft were brought under control before the crew enters the craft they will test for the presence of such gases.

The loss of the shield has apparently contributed to the creation of additional problems. In testing the craft, the shields seem to have disturbed two large solid cell array wings designed to supply more than half of the workshop's electrical power.

Before the crew enters the craft, they will test for the presence of such gases.

The loss of the shield has apparently contributed to the creation of additional problems. In testing the craft, the shields seem to have disturbed two large solid cell array wings designed to supply more than half of the workshop's electrical power.

Before the crew enters the craft, they will test for the presence of such gases.

The loss of the shield has apparently contributed to the creation of additional problems. In testing the craft, the shields seem to have disturbed two large solid cell array wings designed to supply more than half of the workshop's electrical power.
The public document is promulgated at an annual gross cost of approximately $80,000 to inform members of the university community of related news, announcements and activities. Less than an approximate annual expenditure of $38,000, this document is circulated for an annual net cost to the state of $8,600, or 8.5 cents per copy.
Honor Fete Held By SC

By Randy Harrison

Nonacademic university life and its organizers were honored in an awards and honors ceremony Tuesday in the Village Center Assembly Room.

Presentation of the fourth annual ceremony covered Intramurals and extramurals, Village Center Board, Interfraternity Council, Panhellenic Council and Student Government categories.

The Overall Intramural Award was presented to Tony Kappa Epsilon fraternity, with the Faculty, Staff and Student group taking the Overall Independent category. The team Sportmanship Award went to Lambda Chi Alpha in the men’s division and to Tyes sorority in the women’s. Special awards went to Alpha Tau Omegas fraternity and Tom Hobbs for the team and independent cross-country awards.

Jim Pierce, president of the Village Center Board for 1973-74, presented his organization’s awards. “An Evening With Kreskin” was recognized as the top show of the year, and the lecture committee was commended for its part in organizing the performance.

Mary Maynard was chosen as Outstanding Counselor Chairman, while Craig Smith accepted the award for Most Engineering major and president of the former Women’s Residence Association, expressed thanks for Miss Lotz’s efforts: “This is the first year the Men’s Residence Association and Lambda Chi Alpha have actually worked close together.”

The residence associations merged last year into a Residence Hall Association.

Jay Weisbrod, freshman physics major, pointed out that Miss Lotz has been “a lot of help to the school and to the organizations on campus.”

In the year she has been at PFTU, Miss Lotz has acquired a reputation for being a person who really cares about the students. Some of the students who have worked with Miss Lotz were asked their opinions about her leaving.

Sharon Beasley, graduate student in communications and residence hall advisor, said she hoped the person chosen to fill Miss Lotz’s position has the intelligence and forward-thinking as the even, so she’ll still be missed.” Jennifer Hobbs, sophomore

Phone Callers Plague Dorms

By Randy Harrison

“We’re a little puzzled, from what we’ve checked out several possibilities, but since we just didn’t know how to control it, we just cut it out,” said Larry Matthews, assistant for student development, about long distance phone calls made by unknown persons on the dormitory phone system.

Despite Southern Bell’s announcement that it is a normal job to make long distance calls on the campus phones, someone found a way and caught it with a will.

VC Board Elects Chief

Jim Pierce, a junior majoring in political science, was elected president of the Village Center Board recently, defeating board member Lonnie Stevens.

The 1973-74 VC Board is involved in the campus community in Village Center activities, and Pierce’s new job will be to help guide and coordinate various program activities.

In the coming year, the VC wants to become more than an entertainment center, Pierce said. He added Village Center personnel want to work with faculty and student organizations to bring the types of programs the campus wants and needs.

In order to serve the campus more effectively, board members have given up their feed back from anyone who has ideas or complaints to vo ice. Pierce said students and faculty members are needed to serve on eight VC committees to include building, library, student, entertainment, academic, residence hall, volunteer program and publicity. Person interested in serving on any of the committees may contact Debbie Wheatley, assistant program director.

Weitzel and Bill Bryant.

Special Service Awards went to Mark Meacham for his direction of the candlemaking program, Mark Keller for the pool tournament, Jay Adams for the bridge tournament and Dick Brunning for organizing the College of Commerce.

The Intramurals Council presented its Scholarship Award for academic achievement to Lambda Chi Alpha, LXA also walked off with the Spirit Award honors. The council’s Athlete Award went to Tom Wellert.

Liza Young presented the Panhellenic Council’s awards. Regina Murray of Delta Delta Dulta was chosen to receive the “Great Women Award.” The award for the year’s outstanding service went to Tyes sorority.

Student Government presented its Pegasus Award to Dr. Bruce C. Nimmo, who accepted on behalf of the Mechanical Engineering and Aerospace Sciences Club. That award was chosen for its prizewinning work in designing and constructing MAX-PFTU’s politation-freezer, which won first in a nationwide context of 10 entries.

Robbery Nets $$ For Boy

Nearly $300 was stolen from chopper at Seminole Plaza last Saturday by what appeared to be an organized gang of outlaws and MarkVice.

But citizens of Casselberry are more than glad to be “stuck” by the “crooks,” who turned out to be the members of FTU’s Lambda Chi Alpha fraternity.

The loot was turned over the on “Sammie Johnson Fund” to ease the financial burden on the 11-year-old boy’s family. Sammy recently underwent a kidney transplant operation in Mt. Sinai Hospital.

However, the family’s insurance failed to cover the costs encountered before the transplant.

Saturday was designated “Sammie Johnson Day” in Casselberry. The Village Center Fire Department and neighbors, along with LXL, collected money for the family.

Rumors have been circulating that no Casselberry officials will be safe this weekend until the LXL game finishing its goodwill mission.

Stevens Cancels Concert

“The Ray Stevens Show,” scheduled to spin at the right in the Village Center Assembly Room, has been postponed, Stevens said the performance is ill. Tickets will be refunded by the Village Center through June 7. Tickets should be presented before being refunded.

The student-written play for television, "'Til the End of Tomorrow," will be on campus 11 a.m. Tuesday over TV monitors in the Library and Administration building and in the Visual Communication building.

When a special topics class was formed last quarter to produce an original play for television, the goal of all involved was to present a professional program. They did.

Although the FTV production of currents' play, "'Til the End of Tomorrow," suffers from some unavoidable technical difficulties, the sets, costumes and music all compensate for the inadequate facility.

"'TIL THE END OF Tomorrow is a happy marriage of winning and losing. Mabel, the 30-sash proprietress of a small town bar, has found a tiny niche of love and hope in her life. Melvin, a quiet, insecure young man who lives with her and helps her tend the bar, is the reason for her changing life.

Mabel's comfortable relapse in a bar on the unexpected intrusion of Nathan, Melvin's cousin by marriage, and even his own appearance later, Mabel's life the same way he left it—rural and uneventful.

Characters and motivation are established early in the program, and a sequence of foreshadowing is introduced in the opening street scene. Melvin goes to the store to buy a suit and talks with the name Nathan written on the door. In the scenes that follow the next day, Mabel, like a slap, he is at his best at the end of the play, when he arrogantly tells Mabel, "You'll get over it." Bobby, the affable but dignified "credit dealer," who never works long enough to pay her bill, is played by Vernon Cramer with a stoop-shouldered demeanor and twangy drawl that fit Bobby's character to a T. Cramer's voice and posture convey his soulfulness, his self-confidence fall away, and even for the one moment when he gets slightly ized, he is ineffectual. Cramer's voice and posture convey the aliveness and hopelessness of Bobby's character.

PAULINE, the prostitute who frequents Mabel's establishment, injects energy and joy into the plot. Cheryl Cacinuzzo gives Pauline a spirited performance that, when mixed with her rather dense insensitivity, is comic. Cacinuzzo's ability to blend Pauline's traits of frankness, provocativeness and undignified physical desire not only conveys the prostitute's shallowness but also makes her an endearing figure.

The one time that Pauline shows any twing of false sensitivity is when the scene where she is in her "cultured" Southern accent the departure of her father with a traveling woman preacher, "the Rev. Miss Briece Daniels." But Pauline even makes light of her bitterness, as Miss Cacinuzzo illustrates with a cautious flick of her cigarette and the raising of an eyebrow.

Many persons besides the actors contributed a great deal of time and effort to produce "'Til the End of Tomorrow." Particularly noteworthy are costume designer Lom L. Booker, Fred Howard, who designed the 1950s era set, and director Don Jackson. The camera and technical crews also deserve much credit for the success of the show.

"'Til the End of Tomorrow" is as professional a drama as any that has been produced for commercial television. The monumental efforts exerted by all those involved its production have paid off in a product which is well worth watching by all members of the FTV community.

SEEKING EXECUTIVE OFFICERS

Lee Constantine, Student Government president-elect, is looking for interested persons to fill 13 executive cabinet positions.

The offices which Constantine desires to fill are executive assistant, legislative assistant, attorney general, director of operations, comptroller, public relations director, academic affairs director, programs director, black affairs director, residential affairs director, community affairs, auxiliary affairs and clubs and organizations affairs.

Constantine said he would like to have all the positions filled by the 1973 installation dinner, but he emphasized he releases "insert a word" body, "just so deadline can be met."

"Instead, he said he would wait until someone feels interested enough in a position to fulfill its obligations.

Constantine stressed that persons are interested in any of the positions, they may contact him at NC 316 or call ext. 2194 for further information.

Art Exhibits Lusciousness

By Walter Key

For senior art student Donna Darnell, whose exhibit is in the Village Center Art Gallery this week, the sweetest fruits of labor are the large, luscious mini-mutations straight out of Strawberry Fields. You have a choice of three flavors in yogurt: peach, apricot and spot. The last one mentioned looks like an amoeba making a face, and the shapes of the other two suggest features.

In candy pastries there is a round canvas called "Mademoiselle" which reminds me of somebody’s crazy, mixed-up fruit sundae lopped with the sinusous female mouth (it’s more exciting than a marscapone cherry or chopped nuts).

Oh, yea, please touch the sculpture. It talks, stands in a red box with no clothes on and makes a proposal of marriage (hables and houses’ paraphernalia included with one still torso in a white display case, wired).

Finally, in contrast to the bold colors and pastels, a "Sunflower Sutta" shows the ripening center of summer’s bloom, a brown sunburst of seeds in a November wheel of light.

This exhibit overwhelms me with colors. They are pleasing in themselves, but there is so much raw brightness in the exhibit that it begins to play after a while and look garish rather than gorgeous. That is why I was glad to find the resplendent hues of the "Sunflower Sutta."

And while we can know that it takes time, technique and imagination to put together an assemblage, I also wonder what particular set of artistic values one needs to appreciate this sort of thing. I apparently lack them, but perhaps they would appeal to someone else.

So to each his own, and make mine kirschfandango, please.

Delta Sigma Pi Chapter To Hold Banquet Tonight

The Theta Sigma chapter of Delta Sigma Pi, FTU’s professional business fraternity, will hold its third anniversary banquet tonight at the Maitland Civic Center.

Several awards will be given, with Dean of Business Administration Charles Gilliland presenting the Delta Sigma Pi Scholarship Key Award to Robert D. Pace.

Cops’ Topics

Regardless of the means for quelling, a resulting accident is nonetheless fatal, injury nonetheless serious and property damage nonetheless costly.

If you want to live to see 90, don’t keep looking for it on the speedometer.

T.U.F. AUTO PARTS

11815 E. Colonial Dr. / Orlando Florida / 277-7420

formerly T.U.F. AUTO PARTS
According to Don Puddy, a flight engineer at Johnson Space Center in Houston, Texas, it probably would not take much force to pull this wing into position after the instructions are given. It is already partially deployed—"the total force required would only be a couple of pounds." Due to the effects of inertia in space, astronauts could not simply pull on at one end of the wing. They would merely pull themselves toward the workshop.

It has been speculated that in order to free the wing, an astronaut would have to push against the side of the workshop with a rod and pull on the wing simultaneously.

Although most engineers are confident the astronauts will be able to cool the workshop to an acceptable level, the deployment of the first one of these solar wings is crucial to the planning of later and more extended manned visits to the station.

The only power available to the workshop now is generated by the four solar wings attached to the inside shell of the telescope— the portion of the workshop resembling a windmill—which supply about 3,000 watts.

Added to the command module's fuel cells, the crew would have about 4,400 watts available in a joint configuration. Puddy said this would leave only 500 to 600 watts available for use in experiments. The fuel cells of the command module would only last about 17 days, after which power would become a very critical factor.

Studies are now underway at Huntsville, Ala., to find ways the crew can economize the use of power so they can extend a mission. For example, the crew could probably do without certain lights and other simple luxuries.

Probably an attempt will be made to free the solar wing late this afternoon, and the astronauts will enter the workshop early tomorrow morning in helmets and masks in case there are toxic outgases.

Engineers now believe the high temperatures encountered near some of the walk-up to 175 degrees F—may start to decompose the polyurethane liner which adheres by epoxy to the aluminum covering of the inside shell.

Tests have been run on this liner when it is exposed to high temperatures and these principal gases are evolved. All three are toxic.

Puddy explained that toluenediisocyanate (TDI); HCN (cyanide) and CO (carbon monoxide) are also involved to a lesser extent. The TDI is lethal in concentrations about two parts per million.

However, mission control has been clearing the workshop atmosphere of the gas by constantly depressurizing and then repressurizing the workshop. Under the present plan, early tomorrow morning the crew will enter the lab wearing special masks developed by Mine Safety Appliances.

The masks use in-type cylinders with bichloride and charcoal. The charcoal absorbs the TDI and the bichloride takes care of any carbon monoxide that may be present.

The crew will sample the air and test for these gases throughout the day.

If the levels are safe, and they are expected to be, the crew will be ready for deploying the primary sun screen through the scientific airlock by early afternoon.

The scientific airlock is located on the solar side of the craft and is nine by nine inches in size. The airlock was designed to introduce astronomical instrumentation to space.

One of three experiments involved a large box with which the astronauts would extend an experiment out into space while remaining inside the craft in the workshop.

NASA engineers have devised a method by which the astronauts may extend a collapsed sun screen outside the craft by using the hatches/airlocks setup.

This sun screen is a rectangular shaped device resembling a beach umbrella. It will be pulled through the airlock and once fully extended, it will be opened by a spring trigger from inside. The umbrella forms a 22 by 24 feet screen, which can then be drawn tightly against the outer hull of the workshop.

Should this system fail, the crew will probably resort to a space walk (EVA) to rig a sun shade. The second screen the astronauts are carrying in a similar shield up to a T frame.

One of the crew would deploy it in an EVA, pushing the rod over the side of the ship and unfolding the shield. Both shields would cover a little more than 400 square feet of the craft's sunlit skin.

The material used is the same that has been used in the innershells of the lunar suit. It is a three layer sandwich with nylon for strength, aluminum foil for reflectivity and a Mylar coating for combined reflectivity and semi-transmissivity.

If the sun screen is properly deployed, calculations carried out by computer indicates the workshop should cool down significant- although it may never make it down to an ideal 72 degrees F.

Much of the mission's success and the program's success hinges on the deployment of the non-malfunctioning solar panel.

If this can be affected, there is, according to the mission directors, no reason why the second and third manned visits can be planned for 56 days in length.

Any damage to medicines, film and foodstuffs by the heat can easily be compensated for by sending up replacement materials in subsequent manned visits.

If the solar wing was hot during launch or is hopelessly bound to the hull of the craft, then the following Skylab missions probably would be curtailed to 17-day missions—possibly a bit longer.

However, things are looking better all the time, and this afternoon if things go smoothly, America will have the first operational prototype space station.

JOHN PHILIP Gorce, vice president for business affairs, had stated earlier the decrease in FTU's student population has no effect on building and operating funds allocated per student by the State University System. The smaller than expected population affects building and campus size, but has not yet affected FTU, he said.

The State University System advances funds to Florida state universities based largely on student population and class levels; there is equivalent funding on a per student basis. Student population has not changed building plans, Gorce stated. FTU lost 1% years on the Humanities and Fine Arts Building, not because of funds, but because of "technical problems." Now no state university departmental planning has been planned during the past three years because of the federal government's cessation of funding for dormitories, Gorce added.

As enrollments in FTU resident centers increase, building needs must be met and submitted to justify allocation of funds, Milligan said.

(Continued on page 9)
Millican noted that these buildings should be able to handle projected student populations through fall 1979. Planning and money have been approved for a physical plant facility for central receiving, storage and maintenance, which will house a bookstore, offices, physical education facilities, carpentry, electrician and welding shops, a maintenance yard and motor vehicle repair facilities for university-owned vehicles.

Air conditioning and central heating are being considered, but Millican said, "We don't think that we would do it."
Kamrad To Coach On European Tour

By Campus News Service

Dennis Kamrad, FTU’s crew coach who guided his team from obscurity to national small college recognition, has been chosen to lead two teams of top oarsmen to Europe this summer for international competition.

The highlight of the European tour will be the historic Henley Regatta along the Thames.

For Kamrad, the trip is a crew coach’s dream come true. If there is any better laurel, it is the Olympic title, but, as he added in typical Kamradese, “I wouldn’t hold my breath for that one.”

Kamrad directed two FTU teams of little experience into the finals of the Dad Vail Regatta in Philadelphia two weeks ago. The Vail attracted the very best crew teams from around the nation and Canada. When the races were over, FTU finished sixth in the lightweight category and second in the men’s lightweight category.

FTU’S DENNIS KAMRAD will lead composite teams of Florida teams of Florida oarsmen along with the Rollins College oarsmen on a European tour. The tour will include the famous Henley Regatta.

(Kamrad won’t hold his breath at that one.)

TKE Swims To 1st As Records Fall

Winning six of the 10 events and setting three school records in the process, Tau Kappa Epsilon swept to an intramural swimming crown.

TKE also took second and third for 44 total points, besting second-place Kappa Sigma, which took 38 points and claimed a pair of new records. K’s actually topped TKE in one respect—placing in every event (third or better).

On the women’s side, Old Timers was the runaway winner, as Meg Goldcamp set two individual campus records in the 50- and 100-yard freestyle.

TKE’s Bill Walker won the 200-yard individual medley in record 2:26 time, shaving 1.2 seconds off the old mark set by Alpha Tau Omega’s Marion Johnson two years ago.

His teammate and brother, Chuck Walker, covered the 50-yard breaststroke in 32.3 seconds to far eclipse the old record and TKE’s 200-yard freestyle team of Mark Sherwood, Mike Waite and Chuck Walker beat the old record of 1:42.2 by a mere tenth of a second.

Chuck Howarth of Kappa Sigma proved to be the most proficient diver in the pool in the intramural annals, scoring a resounding 134.4 points. ATO’s Jimmy Johnson was a surprise second but trailed Howarth by some 59 points.

Alas for KS, Ennio Cipani swam the 200-yard freestyle in 2:10.9 to beat Mike Walker’s record of 2:11.6 set two years ago.

“TKE had yet another record—for one by ATO’s Marion Johnson, who covered the 50-yard butterfly in 26.8 beating the old record of 28.0 which he held up in the year’s meet.”

Other winners were: TKE (with Sherwood, Howarth, Walker, Keefe, Kerben and Kerben), the 200-yard medley relay; Mike Mustard of TKE, winning the 50-yard free; TKE’s Mike Walker, nipping the 50-yard breaststroke, and Nick Gauder of TKE, winning the 100-yard freestyle.

Besides Miss Goldcamp’s record-setting performance, there were no other new marks and few really close races among the women. Tony won up second, shading Tri-Delta.

In all, the Old Timers won eight events. Crystal Etters took the 200-yard freestyle and 50-yard butterfly. Lezlie Kerben was the 200-yard individual medley and 50-yard breaststroke winner, and Judy Hall won the diving crown.

Tri-Delta’s Jo McLeemore swam a 42.8 50-yard backstroke to take honors in that event while the Tye’s 200-yard free relay team of Renee Parks, Sharon Keefe, Lila Young and Linda Stout wrapped up their team’s second-place finish.

JUDY HALL, left, of the Old Timers was the anchor leg of the 200-yard medley relay. Hall and the Old Timers won the relay 2:27.7 and went on to win the women’s division. TKE’s Rex Riepe, right, attempts intricate diving move but nearly blanks his team. TKE went on to win the men’s division.

DVF Defeats FIU

In FTU’s last golf match of the year, Jacksonville University edged FTU’s contingent by four strokes in a dual match at the Bean Claire Course in Jacksonville.

For the fifth time this year, FTU’s Tony Kiraly took medalist honors as he shot a 71-under-par 71. Jacksonville, led by John Finn’s 74, totaled 300 strokes compared to FTU’s 304.

Doug Perry, who could not get a birdie putt to fall all day, fired a 73 while Brent Whaley hit 240 last year at Braxford.

‘Leader’ String Picked As ‘74 Baseball Captain

String said he feels he has the perfect model to emulate in Doug Holmquist.

“Joe isn’t a good coach—he’s a great coach,” String stated. "Flat. I talk baseball a lot with him, trying to find out what he would do in a certain situation. I know we’re going to have a great program here in the next few years.”

And Holmquist shows that it is a situation of mutual respect. "When Dave graduates, I hope to have him as my assistant,” the head coach added.

FTU Linksters

In FTU’s last golf match of the year, Jacksonville University edged FTU’s contingent by four strokes in a dual match at the Bean Claire Course in Jacksonville.

For the fifth time this year, FTU’s Tony Kiraly took medalist honors as he shot a 71-under-par 71. Jacksonville, led by John Finn’s 74, totaled 300 strokes compared to FTU’s 304.

Doug Perry, who could not get a birdie putt to fall all day, fired a 73 while Brent Whaley staggered in with a 78. John Tanner added an 80 to round out FTU’s team score.

’Leader’ String Picked As ‘74 Baseball Captain

By Fred Cay

To all FTU baseball players and fans, third baseman and sometimes catcher Dave String is now officially designated "Captain." Dave String for the 1974 season.

"He’s a good leader," explained head coach Doug Holmquist. That’s the main reason I picked him to be next year’s captain.

"He also had to sacrifice quite a bit this year when we had to use him at third instead of his usual first base position. But I’m really pleased about his attitude. He made the best of it and really did well."

String admitted the new position took some getting used to. "You have to think about what you’re doing out there—your need good reactions. It’s a lot tougher than first base."

The 6-2, 195-pound junior said he feels he had a good year, though, and who could argue with him? He batted .304 and led the squad in ribbons for his attitude.

"I thought I could hit .300 this year," said String. "I had to prove it to myself since I only did well."
OUTRAGEOUS!

"THE WORST FILM I CAN RECALL SITTING THROUGH...EVER. A young victim is seen about to smoke the devil weed...No one seems to inhale, but it must be powerful stuff. Before the film is over, they all become screaming maniacs, lumbering around like Frankenstein monsters, murdering people, leaping out of twelfth floor windows and tearing at their throats shouting "Give me a refill!..." An incredible series of gags and ludicrous distortions that thirty-six years later becomes hilarious when seen from the other side of the generation gap, a gap this film did so much to create.

Kevin Gaedcke, ABC, TV.

NOTE: THIS WILL BE THE FIRST PRESENTATION IN THE FLORIDA AREA OF THE FULL, UNCUT VERSION OF THIS INCREDIBLE FILM—INCLUDES THE 19 MINUTE SEGMENT DELETED IN ALL PREVIOUS ENGAGEMENTS—PRESENTED IN THE THEATRES BELOW JUST AS IT WAS SHOWN TO THE UNITED STATES CONGRESS IN 1937.

FRESH PRODUCE

NUTHIN' BUTT

By Fred Cay

Indeed increase the run total. Starting Sherwood in the big game was a surprise, since Steve Jackson pitched the earlier crucial fraternity contests. Denno again started pitcher Mark Sherwood who pitched Sunday's game, and hoped the key performers who were missing Sunday could

the Cavaliers, 10-4, Wednesday afternoon to complete a perfect 8-0 season.

The first inning was the most interesting, and as it turned out, the difference in the final outcome. The Cavaliers jumped out in their half of the first, scoring three times on hits by Wayne Aronson, Larry Shearer, Bob O'Mara and Tim Hart along with an error—one of only two TKE made in the game.

However, in its half TKE exploded with five runs and all came after two were out. Jim Nickson and Howie Vandewater singled and came in on Steve McKinnon's hit. Then after a costly dropped fly ball, Joe Gicobbe drove one through the gap in right-center which rolled long enough to be a three-run homer, making it 5-3 at the end of just one inning.

SHERWOOD singled with one out in the second and came all the way around when Mike Murdoch's hit was booted in right field, making it 6-3.

However, Sherwood encountered all sorts of trouble in the third. Triples by Aronson and O'Mara, a double by Hart and base hits by Bill Parham and Jim Stanley accounted for four runs and TKE faced a 7-6 deficit.

"I was ready to take Mark out then," Denno confessed. "But when he started getting them after that, I had to leave him in.

AFTER THE Cavaliers' third-inning outburst, Sherwood set down the next two in a row and allowed only a meaningless run with two down in the seventh.

TKE's winning rally in the last of the sixth was started by shortstop Parham's throwing error and continued with singles by Gicobbe and Rick Keller, the latter hit breaking a 7-7 tie. Sacrifice flies by Larry McCorkie and Sherwood made it 10-7.

The Cavaliers, now in their third year together (they are also a highly-respected Orlando city league team) were reputed to be good hitters but only so-so in the field. The fielding proved their undoing as all five of their miscues led to TKE runs.

The loss was actually their first in 24 games this year, including city league games and two intramural contests.

On Tuesday, the Cavaliers completely demolished the Mafia, Black League champs, 27-8.
