Florida Technological University
Longer Hours, Wine Not Approved

By Mike Myers

The State Board of Regents recently failed to approve measures which would extend visitation hours and allow the sale of wine on campus.

At their meeting in Boca Raton last month, the BOR Facilities Committee postponed action on the proposal for extended visitation hours submitted by the State Council of Student Body Presidents (SCSBP). Fred Parker, chairman of the committee, moved that the proposal be prevented from coming to a vote until the SCSBP could provide the BOR with further information on the matter.

The BOR also failed to make a final decision regarding the wine resolution. The issue was voted on and resulted in a four to four deadlock decision. The nine board members who would normally cast the deciding vote, were absent from the meeting.

The question of extended residence hall visitation hours was brought to the attention of the BOR by a report submitted to them by the SCSBP. This report contained letters, signed by nearly 10,000 dorm students, stating dissatisfaction with the current policy. The report also included the council’s recommendation for a daily two hour extension in both the afternoon and evening.

Parker acknowledged the validity of points made in the report, but he raised questions related to visitation which he said merit further study. The question deal with the effects of extended hours on dorm security, the educational environment and the consumption of energy.

Since the meeting, the SCSBP has written and submitted a report containing conclusions that the factors cited by Parker would be adversely affected. The report contained evidence that extended hours may actually be a positive force on these and other factors. One example indicated that a student visiting another would use the electricity in the other’s room, thus cutting consumption.

FTU Student Government President Lee Constantine, who serves as the chairman of the SCSBP, is optimistic about getting BOR approval for extended hours. He said that the objections raised by the BOR are relatively unimportant and that the questions were satisfactorily answered in the second report.

"As it stands now, I can see no barriers to getting passage for the proposal," said Constantine. The BOR will vote on this question at its meeting today in Tampa. If passed, it will go to the State Board of Education for final approval.

"The State Board of Education is a decidedly more liberal than the BOR, but it is very sensitive to public sentiment," he said. "They know the Florida voters remember Eliah B. Thompson’s ‘taxpayer’s whorehouses’ and they may vote accordingly."

A second important proposal before the BOR last month was a recommendation by the SCSBP and the State Council of Student Affairs that the sale and consumption of wine be allowed on campus. The student vote at the State Board of Education is due to come up again.

Constantine said the opposition is based on the association of wine with hard liquor. "Unfortunately wine has a bad connotation. If we could get them to realize that today wine is culturally accepted with ice, I’m sure we could pass it," he said.

In all probability, the SCSBP will use its influence to see that the wine resolution does not come to a vote until it has adequate support among BOR members.

SG President Lee Constantine and Mrs. Aurelia Jones check the computerized listing of FTU students, designed to enhance possibilities for car pooling. Over 91 per cent of FTU students commute. (Photo by Jerry Brooks)

Why They Said Mass Transit, This Isn’t What I Had in Mind!

Aimed with computer-analyzed results, the Student Transit Committee is meeting the energy crisis head-on.

The committee, chaired by Dr. George F. Schader, is presently working with both the Tri-County Transit Authority and the State Department of Transportation to establish express busline service to FTU. An implementation date for the program has not been projected.

The computer analysis used by the committee is the result of a survey given to students in 10 a.m. Wednesday and Thursday classes during the week of Nov. 26.

The survey, designed by Vice President of Business Affairs John P. Garse, yielded 25,000 respondents who said they would use the service. By contacting Bill Morris, director of the computer center.

According to this sampling, the majority of respondents were full-time undergraduates driving motor vehicles to FTU and traveling at least 17 miles to campus. The majority of respondents favored public transportation and preferred the Barras Plaza or Colonial Plaza as pick-up points at 8 a.m. and 5 p.m. Most would be willing to pay a one-way fare of 50 cents for a day pass, Monday through Friday, and would walk three to four blocks to reach a bus.

The Orange-Ocoee

Seminole Transit Authority is studying the survey results with Marti Marietta Corp. and has given indications of undertaking a comprehensive service for FTU. However, introduce extra operating costs is the business. Extra costs will have to be met through money that the university or the State of Florida. The amount of the savings would depend on how busy the buses are, Schader said.

The committee is expected to provide two runs in both the morning and afternoon hours.

The committee also attempts to encourage staff and faculty to participate in mass transportation efforts. A compilation of map data has located all staff and faculty automobiles on campus. In addition, 6,000 FTU student computers were surveyed and 6,000 FTU students wrote down the zip code of each other. In addition, 6,000 FTU students received computerized maps and 6,000 FTU students wrote down the zip code of the nearest bus stop.

Chairmen of the Mass Transit Committee are Dr. Stuart McElwan, Dr. Robert Hicks, Bill Heit, and Mr. Schader, coordinator of energy conservation.

Chairman of the FTU Energy Task Force is Dr. C. B. Gambrell, Vice President for Academic Affairs.

There is little evidence of a mass effort to organize into car pools. According to Constantine, "mass effort to organize into car pools comes at a price. They will have to make their own effort to make the system work."

Eller believes that an increased interest in car pooling is the result of the university money would have to be paid to subsidize the construction, thus freezing the money for other FTU projects. Savings could be considered as fellow car poolers. SG President Lee Constantine explained that in in order to have the letters out before the end of the holidays, the zip code method was used because it was the fastest way the computer could print out the letters.

Several students complained that of the five students listed on their letter only one or two lived close enough to be considered as fellow car poolers. SG President Lee Constantine explained that in in order to have the letters out before the end of the holidays, the zip code method was used because it was the fastest way the computer could print out the letters.

A larger list is available at the SF office in the Village Center. This primary list is in sequence by street name with each zip code, thus enabling a student to see exactly who lives along his or her route and from school. Both Eller and Constantine agree that forming a car pool is not possible for many students and that a 30-50 per cent student involvement in a car pool system would be a success.

According to Constantine, "mass effort to organize into car pools comes at a price. They will have to make their own effort to make the system work."

Alumni Get Newsletter

The first issue of an FTU alumni newsletter was mailed to over 4,500 graduates at the end of last quarter.

Christine Thomas, a secretary in the Cooperative Education office, said the idea for the newsletter was conceived as a result of the controversy over the name change and the need for keeping the alumni informed. Thomas said the voice of the alumni group is extremely important and that the graduate alumni represent a viable organization.

The newsletter will continue to be mailed to all graduates at the end of each quarter, and an additional copy will be made available to any graduate who wishes to receive the newsletter. The newsletter is being financed through the office of Student Affairs under the account of Vice President Rex Brown, with no cost to the graduate. Other means of financing the newsletter are now being considered.

Thomas said she hopes the newsletter will provide information for continuation of university ties and enable all graduates to receive the newsletter and thereby insure its continuance.

The newsletter may be a first step toward an active alumni association, according to Thomas. The Alumni Association was chartered by the state in 1970, but has not been organized.

SG vs. Staff

The Student Affairs staff challenged members of Student Government (SG) to a basketball game, scheduled for 6 p.m. Jan. 16, preceding the FTU vs. New York Institute of Technology game at the Oviedo High gym.

"We're going to get killed," said Lee Constantine, SG president, "but we'll be proud of it.

According to a memorandum sent to Constantine by Dr. W. Rex Brown, vice president for student affairs, the challenge will give SG a chance to regain dignity lost when trounced in a softball game during the summer.

The half-time show during the game will be a one-to-one basketball contest between Brown and Manuel Rodriguez, SG staff member.

Business At Noon

The Registrar and Admissions Office is now open during the noon hour. Students are taking advantage of this new service, according to Paul Lehnhardt, an admissions officer. He expects the need for this extension to decline with the conclusion of the first week of the quarter.

Despite the anticipated decline in the need for this service, and unpopularity among the staff workers, it will continue throughout the quarter.

During the winter quarter, the admissions office will be open from 9 a.m. to 7:30, Monday through Thursday.

Pamphlet Reviewed

Student Government's birth control pamphlet is tentatively set for distribution next quarter's pre-registration in early March, according to SG President Lee Constantine.

Final editing of the 12-page manual was done this week by author Constantine and co-author Barry Milstead, a former FTU student.

Constantine said he will send the pamphlet to Vice President for Student Affairs W. Rex Brown in a couple of weeks, so that Brown may read the manual and suggest any alterations in context.

"Vice President Brown will not approve or disapprove the pamphlet," Constantine said, "but just read it over for clarity."
The newly formed committee has already accepted eight areas which will be included on the standardized evaluation. According to McAleer, the questionnaire concerns the professor's preparation for class, a demonstrated interest in students, and a demonstrated interest in the subject.

The evaluations will measure his ability to stimulate his students' intellect, to motivate them to learn, and to express thoughts and explain material. Self-confidence, academic polish, and achievement of course objectives are included, McAleer said.

Vehicle Survey

How many people are taking all possible steps to get the most out of the gas in their cars? One obvious energy saver is the formation of car pools, putting more passengers in fewer cars. Brumbaugh had counted the number of passengers in a half the cars were occupied. And this at the same time, talking about mathematics, which is my primary concern.

Vet Counseling

A Veterans Administration counselor from St. Petersburg, McCallum, who was a professor of secondary education, had his IDSS 551 students survey the number of passengers in a car, noting that only 11 had more than one occupant.

Students with auditory perception problems are involved in a taped exercise with the FTU television studio to measure their learning progress over periods of time. Twelve students, ages 6-12, of PACE School in Orlando were filmed in a classroom situation dealing with phonetics in the studio Tuesday morning with the expectation of demonstrating learning programs when the tapes are reviewed in May.

department chairman the option of using the standardized form or adapting his own evaluation form, which would tap its own unique concerns, or they can adopt the standardized form.

McAleer said a prototype questionnaire will be ready for winter quarter, to decide the effectiveness of the measuring instrument. The evaluations will be used on a random sample basis for trial purposes only, and the results of the total evaluation will not be turned over to department chairman. The final draft is planned to be ready for spring quarter, he said.

Chairman McAleer said the committee will have to surmount some of the obstacles which delayed the Faculty Senate.

"We're going to have the same problems it did in coming up with a standardized form," he said. "Hopefully, they will adopt our form or at least some of the questions for their own forms. This is our goal, anyway."

OPEN LETTER TO UNIVERSITY COMMUNITY

The Florida Technological University Food Service Operations welcomes everyone to the 1974 Winter Quarter. We hope you enjoy both the Cafeteria and Snack Bar for your meals during this quarter. Our schedule is as follows.

<table>

*Breakfast served in Snack Bar 7 a.m. Monday through Friday.

Communications between Food Service management and customers is vital. In order to improve our service to our customers we must have a means of communicating problems. We take the management so that they can be investigated and, hopefully, corrected.

In order to better accomplish this, a Food Service Advisory Committee has been formed, basically with resident student members. The committee will meet on regular basis with John R. Williams, director of administrative services, and Bill Boone, cafeteria manager, in order to discuss and solve problems that students feel exist in the Food Service Operations.

Students, please contact one of the members of this committee with any problems, suggestions and/or recommendations you have with respect to any aspect of Food Service. Each member will be happy to discuss the problem or question with you and, hopefully, resolve the problem.

Students, please contact one of the members of this committee with any problems, suggestions and/or recommendations you have with respect to any aspect of Food Service.

The newly formed committee has already accepted eight areas which will be included on the standardized evaluation. According to McAleer, the questionnaire concerns the professor's preparation for class, a demonstrated interest in students, and a demonstrated interest in the subject.

The evaluations will measure his ability to stimulate his students' intellect, to motivate them to learn, and to express thoughts and explain material. Self-confidence, academic polish, and achievement of course objectives are included, McAleer said.

The university has given each department chairman the option of using the standardized form or adapting his own evaluation form, which would tap its own unique concerns, or they can adopt the standardized form.

Beer: 20% Of Snack Bar Sales

FTU's first quarter with beer on campus produced a revenue of $7,847 for the months of Sept., Oct., and Nov. This figure represents 20 percent of total Snack Bar sales.

It cannot yet be determined, however, whether beer sales show a profit, since the overall food service "is a losing proposition," reported John Williams, director of administrative services.

The sale of beer has helped Snack Bar sales to some degree. "It hasn't doubled sales, but it has probably brought in people that otherwise wouldn't have come in," said Williams.

Williams estimated that beer sales maxed out during the first quarter, Williams specialized that beer sales may be down even more during the coming months with the advent of cooler weather.

"Happy Hours" were held on the last quarter but were unpublicized events. Williams said he is in agreement with the establishment of such programs.
‘Have’nt you heard? They Canceled Class Today To Save Gas and Decided Not To Tell Anybody To Save Effort.”

HAPPY(?) NEW YEAR

Editor: I would like to take this opportunity to hereby join the friends and family of the FTU TKE organization in a warm salute to this outstanding group of men. Their attributes are far too numerous to list here, but what I would personally like to commend is their ability to escape. No, I haven't wronged pranks to vandalism and personal property damage. Quite an admirable accomplishment indeed.

If you claim no affiliation with this fine group; my affiliation is with a man who is involved with another fraternity who believes whole heartedly in the "Greek traditions." Being an independent, I have only a vague notion of what this means. I do know, however, that the concept of the fraternity system does include vandalism and property damage.

On New Year’s Eve, his car was broken into. A fraternity member party was in progress in the adjacent apartment. During the course of the evening, a group of slovenly drunk TKE’s were apparently responsible for the burglary. The property, including vandalism by the car owner’s roommate; and when he and the car’s owner returned, the hood was down on the car. It appears the TKE’s were back at their party. Wires displaced, nails driven through tires—or a tremendous New Year’s celebration those TKE’s had!

I’m sure the TKE chapter is much too modest to let its national organization know how generous it is at holiday fun, but I want to do my small part to help TKE get the recognition it deserves.

Happy New Year TKE’s.

Editor: I have recently been informed of the denial of the funds for the Student Co-op Council by the Special Committee for Clubs and Organizations. The memo from that committee states substantially that the funds were initially denied and apparently did not follow in accordance with the Student Senate Qualification, Student Senate Bill 5-6.

After reviewing and examining this bill, our committee is at a loss to identify the basis for this action and, accordingly, requests an explanation as to how this determination was reached. You will find in Student Government record that the Student Co-op Council was approved by Senate vote on 2-27 and the requirements for keeping our file up to date have been complied with.

It can be clearly seen the student Co-op Council has a right to be considered a religious or political organization, nor would the funds be expended for items listed in lines 68 thru 71 of Student Senate Bill 56. It should be noted that all travel and food expenses involved in the sponsorship of the Junior Achievement company are paid out of the Student Co-op Council budget.

The $300 we are requesting is solely the sponsorship fee, paid directly to the Junior Achievement of Orange County, Inc. All other expenses are handled by the organizations that request the funds, which are added up to be considerably more than the sponsorship fee we are requesting. It is for these reasons that the Student Co-op Council feels that the denial of funds by the Committee for Clubs and Organizations should be reconsidered in the light of the overall benefits expected to date and logically to follow.

Our organization feels that we have been more than cooperative in complying with the 5G procedures for submitting budget requests. The following is a list of actions recommended by SG that our organization has taken to obtain the necessary funds.

Aug. 15, 1973: Met with SG regarding request for funds from Student Affairs Activity and Service Fee Budget Committee.

Result: Informed that Student Co-op Council budget request was not favorably considered.

Sept. 14: Submitted budget request to Inter-Unit Programs Committee.

Result: Notified of open hearing on request.

Oct. 9: Presented budget request to Open Hearing Committee of Student Government.

Result: No notification of approval or denial.

Nov. 7: Requested meeting with members of SG to resolve any misconception concerning Council and the request for funds.

Result: Meeting was never held. We were informed at this time that an attempt to submit for 5G sanctioned funds was not possible.

Nov.: Submitted budget request to Committee for Clubs & Organizations.

Result: Advised request was denied on Nov. 30.

(Continued on next page)
Inasmuch as the Student Co-Op Council wishes to continue to cooperate with Student Government, we are again requesting assistance to obtain funds from the Student Government. I am sure that you can appreciate the need for organization on campus to be involved in educational as well as related community activities. As exemplified by the Lee Constantine purchase of stock in the Junior Achievement company and by the increased participation in community-related activities, our organization is growing.

Our organization fails to recognize that approved student organization with over 250 members who actively benefit all students on campus, does not receive a substantial number of the benefits from Junior Achievement, since the Senate Committee was expressly against the allocation. We then briefly discussed the benefits of Junior Achievement before the meeting ended. Since that time, I have not received any notification from Fred as to what he intends to do.

For Junior Achievement, since the Senate Committee was expressly against the allocation, we then briefly discussed the benefits of Junior Achievement before the meeting ended. Since that time, I have not received any notification from Fred as to what he intends to do.

Editor:

I wish to clear up some misconceptions that might persist concerning the letter dated Dec. 7, 1973, I requested a meeting with Fred Haddad of the Inter-University Student Government Budget, ruled that which are not open to participation, by all members of all students on campus, does not benefit a substantial number of our organization would benefit. Any programs which are not open to participation by all members of the Student Body will be disallowed. The Committee felt that students of FTU could not participate if the sponsorship of a Junior Achievement organization, and that it would not benefit a substantial number of FTU students.

The Special Committee for the Allocation of Clubs & Organizations Account rejected the request of the Co-Op Council since they ruled that it did not qualify for funds from the Clubs & Organizations Account. Student Senate 5-5 stated: "moneys should be spent for the operational aspects of the organization which includes small club projects expressly outlined." Since the request for $300 was 10% of the $3,000 budget allocation in the Clubs & Organizations Account and there are over 100 clubs on campus, an allotment of $300 would have been a huge chunk of the total budget.

I do not believe that the Projects & Programs Committee of the Student Senate was ever asked or informed the Student Co-Op Council of their decision. However, I also must admit that I was never requested to meet with any Co-Op Council member concerning the "misconception" until Fred Haddad's letter.

At the meeting of Dec. 19, I informed Fred that the only way to receive Student Government funds for this project would be to go through the Inter-University Account of the Senate. I also informed him that it was not a dislike of the Co-Op Council, but of their request that caused rejection. Any project which did not violate the Statutes, as this one did, would have been an asset of management. I suggested that he seek other avenues, such as money raised for the needed funds.
Characterizations Enhance Appeal Of 'Journey's End' Performance

By Weber Ivy

Last Dec. 7, I saw the FTU production of "Journey's End," a play by R.C. Sherriff about a company of English soldiers in World War I who are waiting in their dugout for an attack by Germans encamped a mere 70 yards away.

"Journey's End" draws its strength from its fine balance of characters, and most of the FTU actors were happily suited to their roles. Bill Griffith had the demanding lead role of Captain Stanhope, the company commander. I was impressed by his handling of Stanhope's wild mood changes and the way he was able to simultaneously project his strengths and weaknesses.

Osborne, the company's second commander played by Jim Kerlin, offset Stanhope's personality with a quieter and perhaps stronger kind of grace under pressure.

Scott Buxton, as Second Lieutenant Raleigh, also gave us a believable character in his portrayal of the new, inexperienced young soldier who was able to simultaneously project over the sound effects, the truth about war and the man who must endure it.

Executive Officer Osborne (Jim Kerlin), left, lends encouragement to Captain Stanhope (Bill Griffith) during Act I of "Journey's End," presented last quarter by the University Theater.

I did have some reservations about the pacing, which dragged at times, especially at the beginning. John Gilmore, as Osborne, made Raleigh's "greenness" stick out like a patch of new clover in a field of dead grass and didn't forget to show courage and anger to Stanhope when the play called for it.

Hibbert, played by Randy Fountain, was the least admirable of the characters, but playwright Sherriff resisted the temptation to write him off as a simple case of cowardice, uncomplicated by redeeming traits. Fountain seemed to know this, and portrayed Hibbert in a way that stirred compassion rather than contempt.

From 8 a.m. till 2 p.m. hear the best in popular music with the WFTU Air Personalities.

From 2 p.m. to 7 p.m. we bring you mellow, progressive sounds to spend the afternoon with.

From 7 p.m. to 10 p.m. listen to special music programs, Folk, Jazz, Electronic, etc.

Beginning this week WFTU presents:

Reflection, 8:15 a.m., 3:45 p.m., debuting with Patrick O'Neil and interesting commentary.

Speculation, a science fiction series, 'The Maximum Response', a story at the ultimate pleasure machine, Thursday, 12 p.m., and 9 p.m.

Ardirguya Theatre, our own insane professor lectures on the Art Niva movement Tuesday, 12 p.m. and 9 p.m.

Welcome Back! WFTU returns to the air Jan. 14 with music and special programs.

From 8 a.m. to 1 p.m., hear the best in popular music with the WFTU Air Personalities.

SUS Fringe Benefits

Suggestions for improving the State University System (SUS) position on fringe benefits were discussed at a recent meeting in Tallahassee of the Faculty Senate Study Committee and SUS staff members.

According to Dr. George Bedes, SUS personnel and faculty relations director, fringe benefits for SUS faculty members, administrative and professional personnel are among the lowest in the nation.

Director of Personnel Services, J. Thomas Simmons, represented FTU at the meeting.

MATH CLUB

The Math Club will hold an organizational meeting Jan. 10 at 2 p.m. in CB 216. The club's future activities will be discussed. All interested math majors as well as non-majors are welcome.

HISTORICAL SOCIETY

A proposed state league of historical agencies will form the main topic of the Florida Historical Society's conference on Friday, Jan. 18, at FTU. Dr. Charles N. Mierzejewski, dean of the College of Humanities and Fine Arts, will welcome the delegates to the university.

Dr. John E. Johns, president of Stetson University and current THS president, will introduce James W. Hine, the luncheon speaker, who is president of the Connecticut League of Historical Societies.

Other speakers will represent their local historical societies, reporting on activities throughout the state.

ART DEPT. IN PRINT

ROOM RESERVATIONS

Effective Jan. 1, all scheduling, with the exception of scheduling rooms in the Village Center, will be centralized in the office of the Associate Vice President for Academic Affairs. If you need a classroom or other location to conduct your meetings, conferences or social activities, please contact Fran White, secretary to Dr. John R. Robo, on ext. 2361. In the event of student organizations, please make your request through the Office of Student Organizations at ext. 2766.

THE GREEN MACHINE

The "Green Machine" has been selected as the title for the new newspaper at the college. Articles relating to the university setting will be included, as well as student activities. The Green Machine will be on campus at least one day a week.

The paper, slated for publication on this month, may help bridge the communication gap between students, staff and the main campus.

Through student notes, complaints, and suggestions, the eight-member staff hopes to achieve its primary objective: incorporating many areas of interest.

ENGINEERING • COMPUTER SCIENCE • MATHEMATICS

UNPRECEDENTED WORK • UNPARALLELED OPPORTUNITY

CAREERS AT THE NATIONAL SECURITY AGENCY

Because of the nature and scope of the National Security Agency's mission, we can offer job challenge and career opportunities that are impossible to match.

At NSA, we are responsible for designing and developing secure, insurmountable communications and EDP systems to transmit, receive and analyze much of our nation's most vital information. The advanced technologies applied in this work are such that they will frequently take you beyond the known and accepted boundaries of knowledge. Consequently, your imagination and resourcefulness are essential qualifications for success.

The Career Scene at NSA: Engineers will find work which is performed nowhere else. Devices and systems are constantly being developed which are the most advanced in the world. As an Agency engineer, you will carry out research, design, development, testing and evaluation of sophisticated, large-scale communication and EDP systems. You may also participate in related studies of electromagnetic propagation, upper atmosphere phenomena, and solid state devices using the latest equipment for advanced research within NSA's fully instrumented laboratories.

Mathematicians define, formulate and solve complex communications-related problems. Statistical mathematics, matrix algebra, and differential and partial differential equations are but a few of the topics applied by Agency mathematicians. Opportunities for contributions in computer science and theoretical research are also offered.

Computer Scientists participate in systems analysis and systems programming related to advanced scientific and operational applications. Software design and development is included, as well as support in hardware design, development and modification.

Starting salaries are based on education and experience, and increase as you assume additional responsibility. Further, you will enjoy the varied career benefits and other advantages of Federal employment without the necessity of Civil Service certification.

Check with your Placement Office for further information about NSA, or write to: Chief, College Relations Branch, The Paulist Agency, Ft. George M. Meade, Md. 20755, Attn: M321. An equal opportunity employer, M/F.

Knights Host Biscayne Tomorrow, New Tech Wednesday

**Holiday Season Not Too Merry For FTU**

By Larry McCorckle

Home Sweet Home! Never has there been more apparent than with FTU's basketball teams, especially during the Christmas break. During the break FTU lost four games and won only one. All four losses were on the road while the lone win came at Oleksa. During that period FTU's record slipped from 5-1 to 5-5, FTU recently won twice pushing its record to 7-5. All seven wins for FTU this season were accomplished with an all-time low of five losses.

FTU's Christmas season began on bumbling note as the Knights lost to West Florida 85-82 in Pensacola. Arnett Hall, Angelo Callins, at that time of the season the only experienced ballhandlers, fouled out of the game along with Willy Belotie, the team’s second leading rebounder. Three starters fouled out-out-sloff snuff! Well, the home team had 33 free throw attempts, compared to FTU’s 11. FTU had five more field goals but West Florida made 13 more free throws; thus, the three point difference. Still FTU had chance to win the game.

Last in the game, down by 10 points, Coach Torney Clark’s crew applied an effective press cutting the lead to one point. FTU worked for the last shot but couldn’t convert. FTU’s record to 7-5. All seven wins for FTU this season were accomplished with an all-time low of five losses.

FTU's next traveled to the Hatter Classic in Mobile, Ala. to play the Southern Conference Schools. Despite a slow start, FTU regained its composure behind the play of FTP’s forward John Haslem. Haslem, with 15 points, led the Knights in scoring. FTP’s next game was against the University of Mobile. The Knights were victorious over the Blue Dragons, 89-76.

The next night FTP traveled to Mobile, Ala. to play the Southern Conference Schools. Despite a slow start, FTU regained its composure behind the play of FTP’s forward John Haslem. Haslem, with 15 points, led the Knights in scoring. FTP’s next game was against the University of Mobile. The Knights were victorious over the Blue Dragons, 89-76.

**UN-Omaha Next Tests For Knights**

FTP’s wrestling team, attempting to rebound from its first loss of the season against Furman, will face an opponent possibly even tougher than the Gamecocks. The Knights travel to the University of Nebraska at Omaha in the Village Center.

Nebraska- Omaha was 8-0 and ranked 8th nationally in Division II prior to the start of its Southern swing this week.

FTP is itself ranked in the top 20 of Division II, the first such nationally recognized men’s wrestling team at school. The Knights were ranked in the second 10 of the Amateur Wrestling News poll.

These next three weeks will mark a break in the competition calendar. Coach Gergy Gergley, "We face some really tough opponents. With Nebraska- Omaha, not only are we facing one of the toughest, Mike Block, a 134-pounder, and 167-pound Craig Artist are the team leaders in wins with 11-6-3 and Bob Stitt and 142-pound Ken Boettcher also have outstanding records."

FTP is somewhat banged-up physically with heavyweight Pete Berkery suffering bruised ribs in last week’s match and 142-pound Mike Gates down with the flu. Coach Gergy Gergley, "We face some really tough opponents. With Nebraska- Omaha, not only are we facing one of the toughest, Mike Block, a 134-pounder, and 167-pound Craig Artist are the team leaders in wins with 11-6-3 and Bob Stitt and 142-pound Ken Boettcher also have outstanding records."

FTP will also participate in tomorrow’s Orlando Naval Training Center Open, an AAWC-sanctioned tournament scheduled to attract most of the top grapplers in the country.

**Swim Club Drive Starts**

All FTU students interested in forming a swim team are being urged to sign up at one of several locations-CB 316, VB 201 or PE 10.

Forms will then be given out and should be filled out and returned before Jan. 18. At that time, a meeting of all interested students will be scheduled to elect to most of the top graphical talent.

---

Three starters fouled out-out-sloff snuff! Well, the home team had 33 free throw attempts, compared to FTU’s 11. FTU had five more field goals but West Florida made 13 more free throws; thus, the three point difference. Still FTU had chance to win the game.**

---

**The loss was only the first for the Knights in five matches but FTP will get its opportunity for revenge on Jan. 22 when the Gators again visit the FTU Village Center for a dual meet.**

---

**The Knights' last dual meet victories came at the expense of the University of Tennessee at Chattanooga, 25-14, and Georgia Tech, 25-19. Those matches were on the weekend of Dec. 7-8 at the close of the fall semester. FTP also participated in the Georgia Tech Invitational in Atlanta Dec. 14-15 and the Sunshine Open Invitational with a partial squad Dec. 27-29.**

---

**Ramo had previously defeated Murphy in the Georgia Wrestling Federation event, took second as the Knights dominated the board.**

---

**Tomorrow night at 8 p.m. the Knights face ever-fierce Oleksa which features shooter Ed Zukowski, one of the top scorers in the state, and Colleen Zuckowski, only a sophomore, was 16th in the nation last year in field goal percentage (.462) and fourth in free throw percentage (.846). As a result, Zukowski’s average of 16.5 points per game along with Willy Belotie, a 6-5 forward, recently scored 20 points against the Top. Olympian Bob Jones and 6-10 Mitch Amberg in Biscayne’s recent loss to North Carolina.**

---

**The Knights play home again next Wednesday when they host New York Tech led by 6-8 Hilton Armstrong. Armstrong, scoring 24 points, is a 6-9 forward from St. John’s.**

---

**The Knights are ready for any opponent, possibly any opponent even tougher than the Gamecocks. The Knights travel to the University of Nebraska at Omaha in the Village Center.**

---
Steinad er Picked To All-Star Squad

By Larry McCorkle

Bob Steinad er, FTU's all-time leader in virtually every soccer category, received probably the greatest honor ever awarded to an FTU athlete, as he was picked to play in the Senior Bowl Soccer Tournament played last Saturday in the Tomato Bowl.

Steinad er was one of 34 players picked from throughout the nation, and one of those Floridians chosen for the East squad. Steinad er, at 5-8 and 140 lbs., was the smallest player on the field, but several experts commented that he played even with anyone on the field.

During his four-year career at FTU, Steinad er established the reputation as an outstanding midfielder with exceptional soccer skills in all areas. His greatest attributes are fantastic endurance and a knack for heading and open field tackling.

Steinad er's coach, Jim Rudy, said that Steinad er, who took up soccer as an afterthought instead of football, is probably the 'best soccer player to come out of the Orlando-Winter Park area.'

The Winter Park native was the first player substituted in the game at the 13-second mark. And he remained in the game until the very end. Broadly, the East team of which he was a member dominated the game (29 shots to 11), but lost 1-0. But Steinad er made his mark from the very moment he entered the game as he immediately responded with an acrobatic flying header which sailed the ball thirty yards downfield.

"I was particularly pleased with the way he ran to the open spaces," said Rudy. "Many times his teammates missed him, but the average spectator would not have noticed it.

Many of the athletes came into the game with all-American credentials, but according to Rudy Steinad er impressed many people including coaches and even some of professional teams with the way he played.

One fan rooting avidly for Steinad er at the Tomato Bowl was FTU President Charles Millican.

Chris Polkowski, a Sentinel Star reporter who has covered many soccer games, was also impressed with Steinad er and role him even with most of the players on the field. Polkowski also noted that Steinad er and the Rollins' goalie Ted Marsh, also from Florida, are two Floridians that may go in the pro draft.

Steinad er, who recently graduated from FTU, is now currently working as a YMCA director and has visions of making Orlando the next "St. Louis" soccer-wise with the instruction and training of professionals to the younger set.

Robert Steadman

FTU head coach Torchy McCorlde would have to rank Bob Steadman, FTU's all-time leader in virtually every soccer category, received probably the greatest honor ever awarded to a men's or women's speedball player.

Jan. 19. And believe it or not, "Squeak" is virtually every soccer "greatest category, received probably the greatest honor ever awarded to a men's or women's speedball player.

During his four-year career at FTU, Steadman established the reputation as an outstanding midfielder with exceptional soccer skills in all areas. His greatest attributes are fantastic endurance and a knack for heading and open field tackling.

Steadman's coach, Jim Rudy, said that Steadman, who took up soccer as an afterthought instead of football, is probably the 'best soccer player to come out of the Orlando-Winter Park area.'

Polkowski also noted that Steadman and the Rollins' goalie Ted Marsh, also from Florida, are two Floridians that may go in the pro draft.

Steadman, who recently graduated from FTU, is now currently working as a YMCA director and has visions of making Orlando the next "St. Louis" soccer-wise with the instruction and training of professionals to the younger set.

Women's Tennis

Sets Meeting

Women interested in playing for FTU's extramural women's tennis team are asked to attend an organizational meeting Tuesday at 11 a.m. in VC 205.

Sally Bondurant, the new business professor, has been interested in starting a tennis team. She recently attended a tennis tournament and was very impressed with Steadman and record with the instruction and training of professionals to the younger set.

He comes on stage... and he's big, and shy, and a little awkward. You know from the program notes that he's a Van Cliburn bronze medalist... appeared with the Cincinnati Symphony... did a command performance in Washington for senators, congressmen... but frankly, you don't know what to expect. Now his drummer and bass player enter and take their positions... The funny thing is, even though they haven't done anything yet, you know something beyond the ordinary is moving up there on that stage. You've had this feeling before, watching Mark Spitz or Bobby Fischer, or even Van Cliburn himself... There's an electric split-second as he sits with his hands poised above the keys, and then there's nothing but the music. Nothing! It's like big clusters of black notes flung off the stage at you. Long strings of arpeggio come whirling out of the air and wrap themselves around your ears.

This night, he opens with a medley from 'Fiddler On The Roof,' and you can't believe that three are making all that music. Thunderous applause... the first round of applause in a night that's going to see fifteen minutes added to the concert by the audience's enthusiasm... He goes from high-pitched rock that literally takes the audience apart at the seams to a beautiful, almost classical version of 'Shenandoah.' The audience is breathless. Now he's into an entirely new realm of music and you hear Gershwin's 'Rhapsody in Blue' as you never have before... It's a well-planned concert; he's saved the best for last. In a finale explosion, that piano... that giant grand piano... is shuddering under the force of those hands like a piece of plywood... And then it's over. And all around you people are standing and yelling and cheering and suddenly you're on your feet, too, and for the first time you find yourself really believing those program notes you read at the beginning of the concert... believing that Mac Frampton is the most exciting concert artist on the American Stage today. And maybe you've never heard his name before. But now you've been there. And you're a believer.'
