Open File Issue Arises

By Marvin Clegg
Florida Attorney General Robert Shevin will request that state university officials be instructed to open file records to DeSoto County circuit court Judge Barry Richard.

In a recent issue of the University of South Florida's student newspaper, the Oracle, Richard said that State Buses plans to ask the state cabinet to tell state university administrators to make records in compliance with Florida Statute 119.

"We are going to propose a resolution to instruct university administrators to make records open," Richard said. "If they know about it there will probably be a lot of them who have to lobby against it, and its chances of passage will be slim."

The open file issue arose at USF two weeks ago, when Student Government President SG President Bill Davis refused unreasonably to gain access to a document concerning USF's SG constitution.

Buses Anticipated, State $$ Requested

FTU may have an express bus service this spring quarter, according to Dr. George Schrader, chairman of the mass transportation subcommittee of the university's special task force on mass transportation.

The Orange-Seminole-Osceola Transportation Authority has just purchased several new 43-passenger buses, one of which could serve FTU, according to Schrader.

Schrader said half of the $700,000 per-day operational cost could be covered by student passengers, and that the remainder must be generated.

"We are requesting assistance from the State Department of Transportation," said Schrader, "and are aware of other universities which offer free service to the student body." Universities throughout the country which presently provide free transportation to the student body include the University of Massachusetts, Kent State, San Diego State, etc. (Continued on Page 2)

Bike Path Construction Stymied By Legalities

By Jerry Brooks
FTU may be one of the first areas in Central Florida to get a bicycle path, according to Scott Henderson, parks planner for the Orange County Planning Department.

Henderson said that next year would be the earliest funds would be available.

In a recent meeting with Student Government President Lee Constantine and SG President Hunter Potts, Henderson said Central Florida is far behind other parts of the state in the development of bicycle paths.

In 1973 the federal government allocated $6 million for the construction of bicycle paths throughout the country. The 1973 Federal Highway Act provides $2 million per year, per state for three years to help the states build bicycle paths coupled with matching funds furnished by the states.

The path that Henderson is referring to, according to Henderson, is the funds can only be used in conjunction with federal highway projects. Since most of the areas which need bicycle paths are served by state roads there is little chance of obtaining much aid for the Central Florida area. Henderson said Washington legislators are aware that the law was badly written and are in the process of rewriting it.

The State Department of Transportation has long range plans for the widening of FTU Boulevard and Alafaya Trail, according to Potts, who said the most economical time to build the bicycle path would be during the widening of these roads.

Potts added that the state has passed a bill supporting the construction of bicycle paths, but there were no monetary provisions made for the $5,000 per mile asphalt bicycle paths.

Henderson said he is devising a comprehensive bicycle path plan for the county and has not had enough time to make any projections or recommendations to the County Commission concerning which areas of the county most need and would most benefit from a bicycle path.

As soon as the funds from the Federal Highway Act are eligible, Henderson said he expects the state to allocate a generous portion of the funds to the Orlando area since Orange County officials have had no money to support the construction of any bicycle path.

Due to the growing student population along Alafaya Trail, a bicycle path would have value to the program for students, according to Director of Records Ed Knight.

Many people have seen Jeremiah Turk, dog about campus, but very few realize that he offers one of the most unusual courses at the university. If you, like Jeremiah, see the world in a different light, the FuTUre would like to help you share your ideas with others. Black and white or color prints may be submitted for publication. Picture information and identification as well as photographer's name and phone number should be included with each print and delivered to LB 213. (Photo by Mike Berman)

Program Retains Students

By Michael Lochridge
Fall quarter's student retention program returned 110 students to FTU classes this quarter, according to Director of Records Ed Knight.

Two college deans credit the retention program as being the single cause for students re-enrolling and other attributes value to the program for bringing the students back.

The retention program, initiated by Knight and graduate student Rob Sheinkopf, provided FTU students who were not enrolled during fall quarter with re-admit forms and a letter by college deans to the students' respective college. More than 600 letters were mailed in November.

Seventeen per cent of the persons contacted have returned to FTU, Sheinkopf said, but "to describe the retention program in terms of statistics is misleading."

Figures for the number of letters mailed in the fall and the number of students enrolled this quarter by the separate colleges are:

- Engineering: 88 letters, 24 students
- General Studies: 101 letters, 26 students
- Education: 118 letters, 17 students
- Humanities and Fine Arts: 80 letters, 7 students
- Natural Sciences: 105 letters, 14 students
- Social Sciences: 112 letters, 13 students

"The whole program is an effort to get personal attention to students from the colleges by the personal efforts of the college representatives to sign the letters," said Sheinkopf.

He added that 2 in 10 students have returned to school which is "2 in 10 more than would have come back without the program." Students returning are full-time part-time and graduate students.

Many people who were contacted provided their reasons for not returning and expressed appreciation for the university's concern.

Sheinkopf also said several of the letters never reached their destinations. He received 51 returned letters himself.

"We feel that we have had approximately an 80 per cent enrollment this quarter of students who responded to the letters from the dean," Knight said.

"Assuming that recruiting is efficient and effective, we can expect our enrollment to show a slight gain with normal attrition to graduation. Real gain can then be expected by reducing our percentage of drop-outs," he added.

The retention program was an "unqualified success" and "worth every penny" to Dean Bernard Oute of the College of Natural Science. Oute expressed the interest of faculty members in being aware of the status of their students. He said he doubts if the letters can be sent out

(Continued on Page 2)
The new policy will allow for visitation between members of opposite sexes from 2 p.m.-midnight on weekdays and from 2 p.m.-2 a.m. on weekends. This exceeds presents restrictions - one hour on weekdays and two on weekend evenings.

The student government president is optimistic about getting the new policy approved, but he acknowledges that the present outlook is not totally favorable. He said he had examined the issue in relation to the BOE and determined that the prevailing sentiment may well be against the proposal. According to Constantine, the opposition within the board is based on their fear that approval will result in an adverse publicity reaction. He explained that the cabinet members are all elected officials and in this election year they are cautious in dealing with controversial matters.

The SCSBP has prepared its strategy with this political consideration in mind.

"We hope to convince the governor that the small increase in hours will not impair insufficiency in the eyes of the public," said Constantine. "We will also take this opportunity to inform him of the strong student support for the proposal. I personally believe that when he considers the relative political consequences, he will vote for the new policy." In addition to visitation, Constantine will speak with Askew about several other topics. Among these will be veterans affairs, openness of faculty records and legal aid for students.

While in Tallahassee, the SG president will also meet with Jim Dennis, who is the executive assistant to the Florida Speaker of the House. They will discuss plans for a student mock legislative session in March.

The BOE will consider the proposal at its meeting next week. The conference with Askew today is the council's last opportunity to influence the decision of the board.

"We honestly have a good chance to win, but it's imperative that we get the governor to support us," said Constantine.

BUS SERVICE ANTICIPATED (cont'd from page 1)

University of California at Irvine, and the University of California at Santa Cruz. These bus systems provide transportation to and from school.

The University of Iowa has a bus system, operational since 1973, which consists of about 12,000 new buses. The system is supported by university. The entire system is paid from federal work-study funds, which can be obtained from sources including federal funds and other energy conservation mechanisms, but consistent with the goal of providing an ultimate, long-range solution to the energy problem, the principal focus of this research will be on fusion power," he added.

"This appropriation must not be viewed as a mere 'one shot' effort," he said, "but as part of a continuing commitment on the part of the state to marshal its energy, wind, photovoltaic, and other energy conservation mechanisms, but consistent with the goal of providing an ultimate, long-range solution to the energy problem, the principal focus of this research will be on fusion power," he added.

Assistant Dean Harry Mautz that the Board request the Florida Legislature establish a fund of at least $50 million for energy research.

"This fund will be used to provide additional monies for research projects for energy sources for use in the state of Florida," said Mautz. "These projects may include research on solar, nuclear, wind, geothermal, and other energy conservation mechanisms, but consistent with the goal of providing an ultimate, long-range solution to the energy problem, the principal focus of this research will be on fusion power," he added.

"This appropriation must not be viewed as a mere "one shot" effort," he said, "but as part of a continuing commitment on the part of the state to marshal its energy, wind, photovoltaic, and other energy conservation mechanisms, but consistent with the goal of providing an ultimate, long-range solution to the energy problem, the principal focus of this research will be on fusion power," he added.
Blood, Money Donations Requested

Donations of blood and money are urgently needed for Mrs. Chris Humphries, who was recently burned in a flash fire. She is in critical condition, with second and third degree burns over her body.

Humphries needs at least $5,000 worth of blood products and frequent transfusions. Blood donations may be made at the Central Florida Blood Bank, located at 1300 S. Kuhl Avenue, Orlando. Any blood type is appropriate, since the blood donated will be placed in stock to replace blood she needs.

Monetary contributions may be addressed to the Chris Humphries Fund, P.O. Box 6727, Orlando.

BOR Appoints Fac Hearing Committee

During a recent meeting of the Board of Regents, Judge John T. Wigginton was appointed to head a special Blue Ribbon Committee to establish standard and system-wide hearing procedures for university personnel. Wigginton is also a member of the Senate, and was appointed by the Senate chairman, said he favors the appointment of someone more experienced in handling such matters.

The committee will be headed by Professor John T. Wigginton, and will consist of six additional members, appointed by the Board of Regents.

Local Interest Causes

Long 'Kate' Schedule

Speaking of Wigginton, Criser said, "I can see no other person who could bring greater wisdom to this problem." Criser also noted that Wigginton was the primary author of the current procedure now used in Florida and was sensitive to the right of due process.

Meetings of the committee will be held on a regular basis, and will be open to the public. The committee's recommendation will be presented to the Board of Regents, and then to the full Senate for approval.

Figures released by the Veterans Affairs Office show the number of veterans who are seeking help is on the rise. More than 1,500 veterans were seen in January, up from 1,400 in February 1974.

USF Fac Splits

Over Bargaining

Dr. Rudy J. Wodzinski recently accepted the Gordon J. Barnett Professorship of Environmental Science at the University of Florida. Wodzinski, professor of biological science at FTU since 1970, is the second recipient of the Barnett award. Wodzinski will use the award funds to establish a professorship of environmental science at FTU.

A second award was given to Dr. Edward J. Humphries, director of the School of Business Administration. Humphries is the first recipient of the Paul G. McKissick and Paul Potak award. Humphries is vice president of the University and is responsible for the operation of the university.

Seniors And Men Outnumber Others

At the end of the spring quarter, 1,883 male students are enrolled at FTU, compared to 1,655 female students. The difference is due to the fact that FTU is a coed institution.

The senior class has the largest enrollment, with 1,284 students, followed by the junior class with 1,171, sophomores with 992 and freshmen 1,307.

UFOW Pow On Camera

An NBC film crew shot news footage on the FTU campus Jan. 29. The crew, based in Atlanta, was working on a feature story about the current enrollment at FTU.

The crew left after the FTU Pow, which was held in the Student Union. The Pow was attended by 1,200 students.

Another feature released by the Veterans Affairs Office shows the number of veterans who are seeking help is on the rise. More than 1,500 veterans were seen in January, up from 1,400 in February 1974.
KEEPCUP THEGOODSPIRIT

The final score of last Saturday's FTU-Rollins basketball game was disheartening after such a close struggle, but the enthusiasm shown by FTU fans was enough to keep spirits high even then.

Guest Columnists Asked ToContribute

Do you have an opinion, idea or topic you feel the university community should be made aware of? Then share it in the FTUe "Guest Column." The Future invites contributions from students, faculty, career personnel, staff—all are welcome. The topic may be of your choosing but preference will be given those subjects which are deemed to have the most interest to Future readers.

The Future reserves the right to edit, revise or reject any copy. Material that is libelous, guilty of harassment, libelous or poor taste will not be accepted.

Deadline for contributions for the "Guest Column" for the next issue is MONDAY NOON.

Bring typed, double-spaced copy to the Future office, U.1215. Include your name, home address or office name and telephone number with your article for verification.

FTU Pratctures

With the printing of "Dylan, Band Concert Charities" in the next issue of the Future, the university paper has shown incredible mediciity. I hope to see a substantial attraction in the next issue of the Future.

Michael Ollis

The Future is a public document for the purpose of informing the members of the university community of related news, announcements and activities. Growing approximately $9,065 from advertising annually, the Future is circulated for an annual net cost to the state of approximately $27,600 or 5.5 cents per copy. Total annual gross cost of publication is approximately $42,728.

By Mike Hall

My two previous columns have been concerned with gripes that I had about the present visitation policy. Then, however, I feel a little more constructive so I am going to propose what I feel is a workable alternative to the existing restrictions.

Before proceeding, I should point out, for the sake of argument, that we assume the BOR has graciously returned control of dormitory affairs to the individual university as it was in 1971 B. K. (before Kovachevich). With this assumption made, our learned and far-sighted administration would find little difficulty in issuing the new rules which would best meet the needs and desires of the resident students. These new rules would also be little more than a logical extension of the existing policies of the university in terms of individual visitation restrictions and those which have no visitation at all.

This procedure is accomplished by allowing incoming resident students to request visitation rights from non-visitation rooms, or vice versa, within the limits set by the university's current policy. At least one visitation restriction (before Kovachevich) would be granted to any student student to request either a visitation or non-visitaiton suite through the building's RA or dormitory director. This arrangement would also allow for the establishment of 24-hour visiting periods.

Such a proposal raises several questions from those who are inclined to frown upon giving dorm students too much freedom. To address these questions, I would like to present two points of consideration.

1. Study habits. Students have the freedom to live in and study habits of their choosing. Let's examine what affect 24-hour visitation might have on individual study habits. Sagi, you can calculate the next morning's and your roommate has his or her girl or boy-friend in the room and they're giggling and rolling around and obviously not studying. What could you do? Tell them your situation for starters. This goes for any student who is going to claim to be studying. If you are going to study (the library and dorm lounges are some of my favorite hideaways), or call the RA if they persist, and get them thrown out on their ears.

24-hour visiting suites could be put into a separate part of the dorms which would not be able to sustain visitation violations. And a lot of people would just be a little happier... I think that's the most important advantage.

'Sex' is a Navy Wort
Not in Psychology 492, a recently instituted course in human sexuality at FTU. The course is coordinated by Dr. Randy D. Fisher, assistant professor of psychology, and taught by Fisher, Dr. Margaret Thomas and Dr. Ron S. Drabman, professor of psychology.

The first, taught by Thomas, is the basic physiology and biology of human reproduction. The class will focus on topics such as how the pituitary gland affects hormones and other glands, and methods of contraception.

Fisher will teach the second part of the course on sexual behavior.

In that part, the class will study social aspects of human sexuality, surveys of sexual behavior, contraception and the legal aspects of sex in general.

Clinical problems such as impotence and frigidity will be discussed by the class in the third part, taught by Drabman. The text for the course, which only recently arrived in the bookstore, is "Human Sexuality," by Dr. James L. McCull of the University of Michigan.

According to Fisher, a course like this has never been taught at FTU before.

The subject matter is more than the FTU academic community.

"We have some 20 people in the class that are not regularly enrolled in the university and come and take the course alone," said Fisher. "We're attracting some people from the community at large.

Class enrollment is approximately 210, and the course will be offered in spring quarter.

Courses similar to PSY 492 are also taught at Florida State University, Rollins College and at the University of South Florida in Tampa.

Vampire Myth
By Alan Crowe
Count Dracula was real, according to Dr. Janie, an FTU psychology student active in the study of vampire lore.

Speaking to students enrolled in Dr. Jarvie's "Myth and Legend" course, Jarvie explained how the, now plentiful, vampire stories originated. He was browsing through the Rollins College, psychology, was quick to point out that Count Dracula was not the prince whose full name was Vlad Tepes Dracula. "Vlad Tepes Dracula drew more blood than any movie Dracula could earn his reputation by impaling (running stakes through their bodies) on stakes. When the odor bothered him, he ordered these executions in the name of justice and was thought of as a national hero for his service.

Vampire Myth
By Alan Crowe
Count Dracula was real, according to Dr. Janie, an FTU psychology student active in the study of vampire lore.

Speaking to students enrolled in Dr. Jarvie's "Myth and Legend" course, Jarvie explained how the, now plentiful, vampire stories originated. He was browsing through the Rollins College, psychology, was quick to point out that Count Dracula was not the prince whose full name was Vlad Tepes Dracula. "Vlad Tepes Dracula drew more blood than any movie Dracula could earn his reputation by impaling (running stakes through their bodies) on stakes. When the odor bothered him, he ordered these executions in the name of justice and was thought of as a national hero for his service.

Jarvie, a senior studying psychology, was quick to point out that the real Dracula was not a vampire and was actually a prince of Transylvania, named Vlad Tepes, or Dracula.

Although not a vampire, the real Dracula was a very bloodthirsty man, more so than any movie Dracula could dream of. According to Jarvie, he earned his reputation by impaling running stakes through the full length of the body rather than biting necks.

Jarvie explained that the Vlad Tepes, Dracula, was said to have killed between 40,000 and 70,000 persons. At times, Dracula had forests of impaled bodies on stakes. When the odor bothered him, he ordered 20 foot stakes be used instead of the 10 foot regular.

Jarvie said Dracula usually ordered these ceremonies in the name of justice and was thought of as a national hero for executing Turkish invaders in the same manner, thus earning the ranks of the Turkish army.

According to Jarvie, the first individual to kill for the use of blood, and technically, a vampire, was Elizabeth Bathory, a Countess of Hungary, who was mentioned in the book, "The Truth About Dracula." As a result of a minor accident, a handmaiden spilled her blood on Countess Bathory. Bathory felt the blood reinvigorate her skin, so she began the practice of killing her handmaids and rectifying their virgins for the purpose of bathing in their blood.

Jarvie continued by talking about some of the myths surrounding vampires. He said that most cultures in the world have some folklore concerning vampires. Vampires supposedly possess the ability to transform themselves into other animals. Russians believe vampires turn into rats while in other countries vampires are believed to become butterflies, wolves and even women. The popular idea of vampires turning into bats is actually a fairly recent folklore.

Garlic, as a vampire repellent, is mentioned exclusively in folklore along with the cross and other symbols of the church, but the literal meaning of how to end the danger early. Since vampires are believed to dig straight ahead while lying in their coffins, the Russians placed potential vampires face-down in coffins. If they did enter the "dead zone," they would dig themselves to hell.

Jarvie is a member of the Count Dracula Society, which receives the Count Dracula quarterly, the club's publication. Despite his membership in the organization, composed mostly of writers, film-makers and scholars of gothic literature, he receives little correspondence and has yet to have any personal contact with fellow vampires.

Jarvie explained that the organization's purpose is to caution the serious number of inquiries by "kooks" and journalists, he has received an invitation to a meeting in Los Angeles, and has received pamphlets from the Bella Lugosi Memorial Fund. Jarvie is still in the investigative stage of his research and has yet to believe on personal theories on the subject of vampires. However, he did say that unless he sees documented case studies, he would not believe in the existence of vampires, which, according to Bram Stoker's novel, "Dracula," the blood of "live humans in order to maintain their dying death."

The existence of vampires in a broader sense is widely accepted," he said. "Several authors have gathered police and medical reports which show the existence of people who have bitten other person to draw or obtain blood."

"There's a man in the Halifax area who has to have evidence of vampires who need blood, but

Surfaces At Symposium
I haven't had a chance to take him up on his offer (to show evidence) yet," Jarvie said.

According to Jarvie, the University of California offers a credit course on vampirism. And California is rumored to be the new Transylvania, especially the San Francisco area where the University of California is located.

The class delves into subjects such as psychology, was quick to point out that Count Dracula was not the prince whose full name was Vlad Tepes Dracula. "Vlad Tepes Dracula drew more blood than any movie Dracula could earn his reputation by impaling (running stakes through their bodies) on stakes. The existence of vampires in a broader sense is widely accepted," he said. "Several authors have gathered police and medical reports which show the existence of people who have bitten other person to draw or obtain blood."

"There's a man in the Halifax area who has to have evidence of vampires who need blood, but

There's a somewhat lighter side to those chilling stories, Jarvie referred to a story, told by Dr. Wyatt, of a man in England who could not sleep at night unless he was surrounded by garlic to ward off vampires. Unfortunately, the piece of garlic he used to place in his mouth, slipped into his throat, choking him to death.

Ex-Convicts To Present VC Play
As a climax to "Clinical Psychology and Peonology Week," the FTU Village Center will present "The Cage." The play, an "explosive survival drama" written in prison and performed by area convicts, will be at the VCAR at 8 a.m. next Friday.

The three part program for the day begins when the cast comes onto campus for classroom visitations and dinner with students and faculty.

Following the evening performance, the actors change into their clothes and return to the stage for a question-answer session with the audience.

"The Cage," a drama which will be presented in the Village Center Assembly Room February 8 at 8 p.m.

Three casts are now on tour and will perform in Germany, Sweden, Denmark, Israel and France this coming fall.

Tickets, available at the VC main desk, are $7.50 for FTU students, faculty and Staff, and $2 at the door.

Ex-convicts of San Quentin Prison will perform in "The Cage," a drama which will be presented in the Village Center Assembly Room February 8 at 8 p.m.

"The Cage" has been and will perform in Germany, Sweden, Denmark, Israel and France this coming fall.

**EVERY DAY YOU SPEND IN COLLEGE IS WORTH $295 TO YOU.**

If you are thinking of dropping out, don't! Not just for all the emotional reasons, but for a simple dollars-and-cents reason.

During a lifetime, the average high school graduate earns $371,000. The average college graduate earns $584,000.

It takes about 720 school days to finish college. And it doesn't take a math major to divide 720 into the $213,000 difference and come up with $295.83 a day. Which should be enough to convince you to study hard and finish college.

And, if you've got financial problems, come see us. Maybe we can help. You can be sure we will try. We really want you to stay in school.
News In Brief

DORM IMPROVEMENTS
Hall phones have been held on a monthly basis, beginning Feb.

NEW COURSE
A new course in Environmental Studies (Advanced Program), is being offered by the College of Education. The course will emphasize the use of the library, basic reference materials, library services and research methods.

EDLS 380-Library Resources and Materials---now fulfills the requirement in the Advanced Program for Education. For further information, call Ms. Garet Snowfield at 272-2851.

NEW EXHIBITS
"Iron Honors" and "What Energy Crisis?" are now showing at the John Young Museum and Planetarium in Lock Haven Park.

SREA (Society for the Study of Education and the Advancement of Real Estate). The seminar is $3 for teachers, and discussion on follow-up topics for students and the general public is available in the office of Educational Conferences, ADM 386.

Volunteer Service
The establishment of a university volunteer clearing center was discussed at the last meeting of the Sociology Club.

'Beaux' Auditions Slated Next Week

On Feb. 4 and 5 the FTU University Theatre will hold auditions for the Bicentennial Production of Farquhar's "The Beaux' Stratagem." The auditions will be held in the Science Auditorium (SCAUD) from 4:00 p.m. until 5:30 p.m. and in EN 109 from 7:30 p.m. until 10:00 p.m. both days.

"The Beaux' Stratagem" is one of the classics of English comedy, first produced in London in 1706. It has the distinction of being the first English play produced in Florida, done as a benefit by British officers stationed in St. Augustine in 1794. For this reason the FTU Theatre has been commissioned by the Florida Bicentennial Commission to reproduce this historic production.

There are a variety of parts in "Beaux," Director David Dees announced, "ranging from two dashingly seductive to the elderly Lady Bountiful. I need eleven men and six women.

Dr. William Allen, Dr. David Dees, and other faculty members of FTU's sociology department will attend the Florida Conference of Sociologists Feb. 8 and 9 in Gainesville.

The meeting is an annual affair, to which all sociology instructors from Florida schools are invited to attend. They will discuss problems that arise with transfer students, graduate programs, minority students and other sociological academic affairs.

Dr. Dees will give a speech on the future sociology graduate program at FTU, and Dr. Allen will speak on the problems students encounter transferring from junior colleges to four-year universities.

The instruction will meet with students from colleges and universities throughout the state. Around 15 students from FTU are expected to attend.
Sigma Chi Receives Charter

The former FTU colony of Sigma Chi received its charter from Sigma Chi Fraternity last Saturday night and became the 161st chapter of that organization.

Tom Smith, president of the new Bta Pi chapter, accepted the charter during a celebration held at the Howard Johnson's on Kirkman Road and I-4.

The 333 participants included several representatives of other fraternities; Dr. W. Rex Brown, vice president for student affairs; Dr. Paul McQuilkin, dean of men; and parents and guests of the Sigma Chi fraternity last Saturday night.

M. Craig Nason Jr., Grand Consul of Sigma Chi, presented special awards to outstanding service to the Fraternity.

Members and invited guests of the FTU colony of Sigma Chi received its special awards to outstanding service to the brotherhood and became the 161st chapter of Sigma Chi Fraternity.

Also honored were Dr. Henry Kennedy, the new chapter's faculty adviser, and Harry Winkle of the Central Florida Sigma Chi Alumni Association.

John Wayne and other notable "Sign" tent telegrams and letters of congratulations.

Knights Run Out Of Gas
Hofstra Takes 24-15 Win
By Jon DeSalle

"It's like the energy crisis - we just can't get out of gas," FTU's wrestling Coach Greg Gergley couldn't have put it in better words describing the recent hard-fought efforts of his wrestlers to push the powerhouse Hofstra team out of their clutches. "We need national exposure and some regional competition," said Gergley.

Last Friday, FTU saw a 15-6 advantage over Eastern turned into a 1-1 tie in the last four matches. When it came to the Flying Dutchmen, 24-15. "We've been wrestling. Gergley said, "It's very disappointing to lose when you're ahead, but we are familiarizing ourselves with the competition. We need national exposure and the competition is going to give us that."

In three of their four defeats this season, the Knights have had marginal leads erased late in the match by Hofstra, Nebraska-Omaha and now Hofstra.

From watching the Knights wrestle in the early stages of the match, spectators would have thought that FTU didn't know that Hofstra was 10-1; their lone defeat given to them by Florida, 24-15, the previous night.

FTU received fine performances by Scott Sherman, Elio Junco, Mike Waring and Travis Alberts, but sheriff, wrestling for the first time in the 118-pound class, pinned Bill Johns at 6:10 in the third period. The move from his usual 126-pound class, according to Gergley, will give Sherman a better chance for honors in state and possible regional competition.

In his 142-pound match, FTU's Elio Junco defeated Joe Garicano, 5-3, in a very close and hard-fought bout. Junco received four of his five points in the first period with the fifth point awarded for riding time.

---Continued on Page 11---

FTU Faces FIU, SW Louisiana in Miami

"The most exciting match was the 150-pound bout between Mike Waring and Jeff Deen. After a scoreless first period and a 4-4 dead at the end of two, Waring took charge in the last period with some good moves, including a near-fall, to win easily, 12-8."

For Waring, it was a much needed victory. He was stunned in his previous outing against John Carroll, when he was pinned at 58 seconds of the first period.

Tom Hammons in the 198-pound class, came from a 0-2 deficit to take a 4-3 win. The one point awarded to Hammons turned the tide and turned out to be the winning margin in the match. His three points would turn out to be FTU's last for the entire match.

Jeff Emerson, usually in the

Tri-Meet Set For Wrestlers Today

Richard Guerra; 126-Pat Murphy, again back down to his best weight class, 134-Elio Junco, first time at the weight after compiling a 4-1 record last year. 142-Mike Waring, also down to his lowest weight in preparation for the state meet; 150-Mike Shivers, back again and hoping this time to win the NCAA 142-pound title; 167-Dave Hammon, 177-Tom Elmore, 203-Randy McDaniel, 203-Champions at the Naval Training Center. 190-Randy McDaniel, 203-Champions at the Naval Training Center.

Florida's international team has an interesting weekend ahead. The Knights, in addition to soccer, tennis and basketball teams, will compete against local university teams in Bogota, Cali and Medellin.

P.E. Majors Meeting Set

The Physical Education Majors Club will hold a meeting Thursday 12 p.m. in PUB Building 503. Most of the meeting will involve making plans to help FTU host the Florida State College at Jacksonville Wrestling Championships at the Naval Training Center Feb. 6-9.
Grapplers Host State Tourney

The Florida state collegiate wrestling championships meet will be held here for the second time in three years next weekend, Feb. 8-9, at the Leading High Gym.

The NTC site was last couple years we were six or seven deep but this year I think we have 10 men who could start for any other fraternity team," explained Hardy. "We have a lot of

FTU Baseball: Stronger Defense

The top five positions have been determined for FTU's extramural golf team which began its season yesterday against Flagler and plays again this afternoon against Embry-Riddle at 1:30 at the Winter Springs Country Club, homebase for FTU matches.

In the Sunday double round-robin at Winter Springs, Roger Amick led the Goldsox with a 75-68 score while Mark Meidbroch, Tony Kirby, Doug Perry and John Tanner also shot in the 70's. Seven more golfers are vying for the next five spots with the final cut scheduled for Tuesday.

These 12 are the survivor of an original group of 28 which greeted new coach Marc Mayorga two weeks ago at a reorganizational meeting.

Wrestling

118-pound class, wasn't as fortunate as Sherman moving to a new weight class. The 152-pounder was knocked out by his opponent, Nick Calva, losing 11-2. Pat Murphy dropped a hard-fought battle to 134-pounder John Mirandel, 5-2.

The coach said, "If the team is 500 or better, it would be one heck of a season." The Goldsox opened Feb. 23 with a doubleheader against Embry-Riddle at Daytona Beach.

Golfers Face Embry-Riddle

FTU's lead began to disappear as the 167-pound bout at Dave Alberts, wrestling with hurting knees could only tally four escape points, in losing to the other half of the Garetano brothers' team, Dennis, 10-2.

In a close match, JTT-pounder Tim Finneran dropped a 3-1 decision to Rudy Fronst, Randy Jesse and Sam Muldrow started their 190-pound match exchanging bear-hug holds, but Muldrow hung in the second period, Muldrow had the last hold, pinning Jesse.

Luis Escober, FTU-second baseman and an "All-American candidate," flips bat to shortstop Jim Horvath who gets set to turn a double play in Knights' practice session. (Photo by Jim Matthews)

The outfiel will have among its depth, team captain Dave Stieg, Ron Seha, Jeff Swie, Pete MacLeish, Brian Springer and Dave Depper will return to the pitching rotation for the Goldsox.

"The pitching is not the strongest I ever had," said Horvath, "but it'll back up with good hitting." Coach Holmquist will not rely on the long ball to gain runs this season. Last year's power-hitter Pat McCarthy graduated and the only threat the Goldsox have is Escobar, who Holmquist said, "can poke one out now or then." The team will count oniously hitting to produce their runs.

Holmquist stated two things the team needs more: scholastic and playing field on campus. The present practice field is the most inferior fields which are not the best for practicing baseball, noted Holmquist.

"The team needs competition to get national exposure," said Holmquist. This season, the Goldsox will have their toughest schedule, including Miami, Jacksonville, University of Central Florida, Stetson, Eckerd College and Rollins.

The Grass Roots will be featured at Walt Disney World's first Valentine Party, February 8 in the Magic Kingdom. (Copyright WALT DISNEY PRODUCTIONS)

WDW Valentine Party Headlines ‘Grass Roots’

The Grass Roots, Tony Orlando, Dawn, Harold Melvin and the Blue Notes, and other recording groups will play at Walt Disney World's first Valentine Party on Feb. 8.

Scheduled to run from 8:30 p.m. until 1 a.m., the event offers a one-price admission which provides unlimited use of the Magic Kingdom's attractions, adventures, and musical entertainment. Tickets will cost $6.95 at Walt Disney World the day of the party. They may be bought in advance for $5.95 at Sears, Mass Brothers, Bill Baer's, and Streep's, in Orlando; Britches South in Lakeland; Music Unlimited, Medco Discount Drugs, Touchless Drugs in Sanford; and the Music Center in Daytona Beach.

State Co-Op Directors

The FTU Cooperative Education Office is hosting a meeting today with the directors of cooperative education programs in the State University System. The purpose of the meeting, according to Thaddeus P. Rajchel, FTU Co-Op Project Director, is to put "finishing touches to the policy statement on Co-Op to be submitted to the Board of Regents Ad Hock Committee."
