**Open File Issue Arises**

By Marvin Clegg

Florida Attorney General Robert Shearin will request that state university officials be instructed to open file records to the public, according to Deputy Attorney General Barry Richard.

Richard said that University of Florida, Orlando, plans to ask the state cabinet to tell state university officials to open files in compliance with Florida Statute 119.

"We are going to propose a resolution to instruct university administrators to make records open. I don't know of any confidential personnel records of public employees," Richard said.

"They are looking for reasons to make it confidential, but there aren't any," he added.

When an Oracle reporter asked on normal assignment, to gain information about University President Bill Davis refused unecessarily to gain access to a document concerning UF's G C onstitution.

**Buses Anticipated, State $5 Requested**

By Jerry Brooks

FTU may be one of the first areas in Central Florida to get a bicycle path, according to Scott Henderson, parks planner for the Orange County Planning Department.

Henderson said that next year would be the earliest funds would be ready.

A recent meeting with Student Government President Lee Constantine and SG President Hunter Potts, Henderson said that next year would be the earliest funds would be ready.

The only catch in the law, according to Henderson, is that the student body "would have to break even on the new run in order to maintain service.

Henderson said half of the $7 million for the Orangecount Planning Department.

"Assuming that the Legislature passes the Omnibus Education Act, I would say evaluations are going to propose a resolution to instruct university administrators to make records open. We have evaluations on every employee in this office and they are not just a politician but that I care about upholding the law. We have evaluations on every employee in this office and they are open," Knight said.

"I don't know of any confidential personnel records of public employees," Richard said.

"They are looking for reasons to make it confidential, but there aren't any," he added.

When an Oracle reporter asked on normal assignment, to gain information about University President Bill Davis refused unnecessarily to gain access to a document concerning UF's G.C constitution.

**Bike Path Construction Stymied By Legalities**

**Program Retains Students**

By Michael Lorchidge

Fall quarter's student retention program returned 110 students to FTU classes this quarter, according to Student Affairs Joe Howell.

Two college deans credit the retention program as being the single cause for students enrolling or entering other attrition value to the program for bringing the students back.

The retention program, initiated by Knight and graduate student Rob Sheinkopf, provided FTU students who were not enrolled during fall quarter with re-admit forms and a letter personally signed by the dean or coordinator for the program from the students' respective college.

Program people who were contacted provided their reasons for not returning and expressed appreciation for the university's concern.

Sheinkopf also said several of the letters never reached their destinations. He received 51 returned letters himself.

"We feel that we have had approximately an 80 percent enrollment this quarter of students who responded to the letters from the dean," Knight said.

"Assuming that reciting is efficient and effective, we can expect our enrollment to show a slight gain with normal attrition to graduation. Real progress can then be expected by reducing our percentage of drop-outs," he added.

"The retention program was an "unqualified success" and "worth every penny" to Dean Bernard Oste of the College of Natural Science. Oste expressed the interest of faculty members in being aware of the status of their students. He said he doubts if the letters can be sent out..."
First SUS Energy Policy Workshop Held

Some faculty members along with the professional staff of the Florida Energy Committee from state universities attended the first workshop on "Florida’s Energy Policy." Jan. 22 and 23 in Tampa.

It was the first in a series held by the Florida Interinstitutional Committee, which is coordinated from the BOR office. The committee made its decision to hold these workshops during their final meeting Jan. 6. Each calendar will be a two day affair with experts in certain areas of the crisis meeting to "brainstorm" and to assist the Florida Energy Committee in rapidly and thoroughly examining issues on a certain topic.

The Interinstitutional Committee will serve as a liaison between the Energy Committee and state universities, as well as serve in an advisory capacity to the Energy Committee.

Early on, the BOR adopted a proposal by Chancellor Robert Mautz that the Board request the 1974 Florida Legislature establish a fund of at least $10 million for energy researches.

"This fund will be used to provide "seed money" for research projects for energy sources for use in the state of Florida," said Mautz. "These projects may include research on solar, nuclear, wind, geothermal and other energy conservation mechanisms, but consistent with the goal of providing an ultimate, long-range solution to the energy problem, the principal focus of this research will be on fusion power," he added.

"The appropriation must not be viewed as a mere 'one-shot' effort," he said, "but as part of a continuous commitment on the part of the state, to marshal its forces and join with others in our nation and the world in seeking a permanent solution to our energy problems."

Administration said, "To my knowledge, no students who registered and went to the business college did so in response to the program."

Assistant Dean Dean Harry Smith of the College of Humanities and Fine Arts appreciated the efforts of the program but said he wasn’t able to tell if a person who returned to school came back in response to the retention program or not.

Second Award Given
Prof Receives Barnett $200

Dr. Rudy J. Wodzinski recently accepted the Gordon J. Barnett Professorship of Environmental Science at Florida Technological University. Wodzinski, professor of biological science at FTU since 1970, is the second recipient of the Barnett award.

Wodzinski will use the award funds to finish a book he is now writing. The book is concerned with wildlife and environmental science, a subject he has been interested in for over 30 years. His book will be written from the biologist's rather than the engineering point of view employed in the 1953 publication. He is working in coordination with experts from the University of Wisconsin, where he obtained his Ph.D. in microbiology in 1956. He has a minor in Chemical Biology.

Wodzinski has many years of experience in microbiology of water and waste treatment. He was employed by Squibb Institute in medical research as a research microbiologist and as the manager of animal science for International Minerals and Chemical Corp. Wodzinski has plans to work in cooperation with state and local agencies in solving some current problems.

A committee composed of persons from outside the College of Natural Sciences chose the recipient of the honor. Hal Scott, the secretary for the Florida Chapter of the Audubon Society was a member of the committee.

Seniors And Men Outnumber Others

Twice as many male students are enrolled at FTU this quarter than female students. Enrollment figures released this week by the Board of Regents show these numbers as 4,924 male students and 2,446 female students.

Total enrollment for winter quarter is 7,170 students. This figure includes about 200 students who have not yet been deleted from the official data.

Figures released by the Veterans Affairs Office show 1,556 enrolled veterans and coordinator Larry Mathews expects the figure to jump over 1,600 when late registration and drop-in students are included.

With the Veterans enrollment increasing by more than 150 students since last winter, Matthews said FTU is second only to the University of South Florida in the number of veterans enrollment at state universities.

Full-time students number 5,787 and part-time, 1,383, 1,655 male students and 960 female students are married.

USF Fac Splits
Over Bargaining

By Matt Baker
Oracle Staff Writer

USF faculty members felt differing opinions on collective bargaining with Dr. James Ray, Natural Sciences dean, saying there are "other ways" for faculty to achieve desired goals.

"My personal feelings are that we should meet collective bargaining," Ray said. "There are other ways to achieve desired goals without this type of activity."

Dr. Jesse Bonford, Faculty Senate chairman, said he favors collective bargaining, but said there is no chance to achieve it this year.

"As a minority group," Bonford said, "I don't think we have a chance."

Dr. Harley Mellen, Economics professor, said he disagreed of the "automatic wage packages" that were occur with collective bargaining. He said automatic increases present a problem in that they remove rewards for merit.

"It's all based on seniority," he said.

Mellen said he favors cost of living increases. He said State University System wages have increased nominally when compared to the 45 per cent cost of living increases during the past 10 years.

BOR Appoints Fac Hearings Committee

During a recent meeting of the Board of Regents, Judge John T. Wiggins was appointed to head a special Blue Ribbon Committee to establish standard and system-wide hearing procedures for university faculty.

Marshall M. Ciser, who appointed Wiggins, charged the committee with constructing two general types of procedures: 1) those for hearing appeals of decisions concerning tenure, promotions and non-renewal of term-related decisions; and 2) guidelines for hearing faculty grievances pertaining to job-related problems such as salary, tenure and work assignments.

The committee has also been urged to make its proposals in accordance with the governing Board's recent employment matter.

Ciser stressed "this is not a job that can be done in 30 days, but I sincerely hope that they can report within 6 or 6 months - sometime prior to the close of the legislation." The committee's papers will be delivered to the BOR Personnel Committee prior to action by the full Board.

Sirera stated, "I am counting on this Blue Ribbon Committee to create a set of procedures that will make it unnecessary for the legislature to act on a matter that is more appropriately dealt with by the Board of Regents."

Local Interest Causes Long 'Kate' Schedule

Five performances of Cod Porter's "Miss Kate," performed by member of FTU's University Theatre are scheduled for late February.

Kate, one of the brightest and most sophisticated examples of the American musical theatre, is already in preparation for its Feb. 20 opening under the direction of Frances Johnson.

Because of the great interest in musicals among local theatre-goers, "Miss Kate" is scheduled for 11 performances, ranging from February 14th to March 3rd, and will run through Sunday, Feb. 24.

In the east of 'Kate,' are several University Theatre performances, including, "Randy Fountain, Diane Davit, Dick LaVelle, Richard Goodwin, Denise Long and Joy Jones. Newcomers to the FTU stage, including Susie Fendel, Jose Rodriguez, Roxi LaRock and Tara Buckey, are in the 38-member cast.

Wigington recently retired from the First District Court of Appeal.

Faculty involvement in the establishment of the procedures was intended by the appointment of Prof. Steve Edwards, immediate past chairman of Florida State University's Faculty Professional Relations Committee. Another faculty member will be appointed later by Prof. Dorothy Blakeley of Florida International University, head of the SUS Faculty Senate Council.

Blood, Money Donations Requested

Donations of blood and money are urgently needed for Mr. Chris Humphries, who was recently burned in a flash fire. She is in critical condition, with second and third degree burns over 70 per cent of her body.

Humphries needs at least $125 worth of blood per day and frequent transfusions. Blood donations may be made at the Central Florida Blood Bank, located at 1300 S. Kirk Avenue, Orlando. Any blood type is appropriate, since the blood donated will be placed in inventory to replace blood she needs.

Monetary contributions may be addressed to the Chris Humphries Fund, P. O. Box 6727, Orlando.
KEEP THE LETTERS COMING

While it’s hard to accurately measure the effect two <i>Future</i> columns can have on enrollment, on the basis of figures and administrator’s comments it certainly seems worthwhile to continue the process in the future.

As a personal project by Dr. Knight and Rob Sheinkopf, the coordination of the six colleges’ efforts was done largely on personal time. Although a small budget was set up for postage, etc., nothing formal has been implemented to deal with the program in a professional basis.

We would like to see these letters sent out at least yearly — quarterly if experience proves it to be possible. The personal interview is the most constructive student affair that might well consider adopting this procedure. The university would be regressing if it didn’t at least give this investigative individual contact idea a place in its overall program.

By Mike Hall

My two previous columns have been concerned with gripes that I have about the present visitation policy. This time, however, I feel a little more constructive so I am going to propose what I feel is a workable alternative to the existing restrictions.

Before we begin, let us make the assumption that, as stated, the BOR has granted us the power to create dormitory affairs. For the sake of argument, that we assume the BOR has granted us the power to create dormitory affairs. As it was in 1971 B.C. (before Kovachich), with this assumption made, our learned and far-sighted administrators would be morally inclined to frown upon giving dorm students too much freedom. This does not mean that the students would be any more rebellious or that the same violations would persist. These new arrangements would allow for the establishment of 24-hour visitation suites. This proposal raises several questions from those who are inclined to know upon going down dorm students too much freedom. This does not mean that the students would be any more rebellious or that the same violations would persist.

The arrangement would also allow for the establishment of 24-hour visitation suites. This proposal raises several questions from those who are inclined to know upon going down dorm students too much freedom. This does not mean that the students would be any more rebellious or that the same violations would persist.

...Drove Old Gray Drove Old Dixie Down...
'Sexy' Subject Attracts 200 To Class

Is sex a naughty word? Not in Psychology 492, a recently instated course in human sexuality at FTC. The class is coordinated by Dr. Randy D. Fisher, assistant professor of psychology, and taught by Fisher, Dr. Margaret Thomas and Dr. Ron S. Drabman, and is divided into three parts.

In the first part, taught by Thomas, is the basic physiology and biology of human reproduction. The class ends up with objects such as how the pituitary gland affects hormones, and methods of contraception.

Fisher will teach the second part, the non-normal sexual behavior. In that part, the class will study social aspects of human sexuality, surveys of sexual behavior, and the legal aspects of sex in general.

Drabman's problems such as impotency and frigidity will be discussed by the class in the third part, taught by Drabman. The text for the course, which only recently arrived in the bookstore, is "Human Sexuality," by Dr. James L. McCary of the University of Houston.

According to Fisher, a course like this has never been taught at FTC before.

The subject matter is far more than the FTC academic community.

"We have some 20 people in the class that have not been regularly enrolled in the university and come and take the course alone," said Fisher. "We're attracting some people from the community at large.

Class enrollment is approximately 210, and the course will be offered in spring quarter.

Courses similar to PSY 492 are also taught at Florida Southern College and the University of South Florida in Tampa.

Vampire Myth

By Alan Crow

Count Dracula was real, according to Greg Jarvie, an assistant professor of psychology, was quick to point out that the original Dracula was a vampire and was a prince whose full name was Vlad Tepes Dracula. The real Dracula drew more blood than any movie Dracula could drink in a dozen lifetimes. He earned his reputation by drinking the blood of 70,000 persons. At times, Dracula had forests of impaled bodies on stakes. When the odor bothered him, he ordered 20-foot stakes be used instead of the 10-foot regular.

Jarvie said Dracula usually ordered these executions for the use of blood, and technically be a leech. The vampire's mouth was considered to be a feeding tool, and the blood was drained out of the victim.

Jarvie explained that the Dracula's legend is known to have killed between 40,000 and 70,000 persons. At times, Dracula had forests of impaled bodies on stakes. When the odor bothered him, he ordered 20-foot stakes be used instead of the 10-foot regular.

Jarvie and Dracula usually ordered these executions for the use of blood, and technically be a leech. The vampire's mouth was considered to be a feeding tool, and the blood was drained out of the victim.

Jarvie continued by talking about some of the myths surrounding vampires. He said that most cultures in the world have some folklore concerning vampires. Vampires supposedly possess the ability to transform themselves into other animals. Russians believe vampires turn into bats while in other countries vampires are believed to become butterflies, wolves and even worms. The popular idea of vampires turning into bats is actually a rarity in folklore.

Garlic, as a vampire repellent, is mentioned extensively in folklore along with the cross and other symbols of the church, but the legends figure out how to end the danger early. Since vampires are believed to dig straight ahead while lying in their coffins, the Russians placed potential vampires face-down in coffins. If they did enter the "living death," Jarvie said, "they would dig themselves to hell.

Jarvie is a member of the Count Dracula Society and receives the Count Dracula Quarterly, the club's publication. Despite his membership in the organization, considered mostly by writers, film-makers and scholars of gothic literature, he receives little correspondence and has yet to have any personal contact with fellow vampires.

Jarvie explained that the Count Dracula Society is the world's largest organization in the area of vampire research. The society has approximately 2,600 members worldwide, with chapters in major cities in the United States and in Canada. Three casts are now on tour in the United States.

Surfaces At Symposium

I haven't had a chance to take him up on his offer to show evidence yet," Jarvie said.

According to Jarvie, the University of California offers a credit course on vampirism, and California is rumored to be the new Transylvania, especially the San Francisco area where the University of California is located.

The class delves into subjects that are not regularly taught in the FTU curriculum. Speaking to students of the course-normal sexual behavior and the sexual hormones, and technically be a leech.

Surfaces at Symposium is the theme for the February meeting of the Count Dracula Society and will be held at the University of South Florida in Tampa.

Ex-Convicts To Present VC Play

As a climax to "Criminology and Penology Week," the FTU Village Center will present "The Cage." The play, an "explosive survival drama" written in prison and performed by an ex-convict company, will be at the VCAR at 8 p.m. next Friday.

The three-part program for the day begins when the cast comes onto campus for classroom visitations and dinner with students and faculty.

Following the evening performance, the actors change into their own clothes and return to the stage for a question-answer session with the audience.

The cast, headed by Rick Cheeky, author of the play, does not rely totally on their prison experience, having been trained under a federal grant for rehabilitation.

Ex-convicts of San Quentin Prison will perform in "The Cage," a drama which will be presented in the Village Center Assembly Room February 8 at 8 p.m. and will perform in Germany, Sweden, Denmark, Israel and France this coming fall.

Tickets, available at the VCAR main desk, are $7.50 for FTU students, faculty and Staff, and $2 at the door.

EVENYDAY YOU SPEND IN COLLEGE IS WORTH $295 TO YOU.
If you are thinking of dropping out, don’t. Not just for all the emotional reasons, but for a simple dollars-and-cents reason.
During a lifetime, the average high school graduate earns $371,000.
The average college graduate earns $584,000.

It takes about 720 school days to finish college.
And it doesn’t take a math major to divide 720 into the $213,000 difference and come up with
$295,83 a day. Which should be enough to convince you to study hard and finish college.
And, if you’ve got financial problems, come see us. Maybe we can help. You can be sure well try.
We really want you to stay in school.

Campus Glances
NEW SIGNS
There are three new campus signs located at the entrances to FTU to announce upcoming events.
Activities to which all FTU personnel are invited will be given first priority for posting. Activities supported by an officially recognized organization or FTU department will be given second priority. Interested parties should contact Jimmie Ferrell in ADM 268, one week prior to desired posting date.

Are You in Love?

News in Brief

DORM IMPROVEMENTS

Hall phones have been ordered for A and B dorms which will permit only on-campus calls. Other items ordered include 100 new shower curtains and new lights for B Dorm Lounge, which will be installed in the wall to prevent theft.

Lights inside and outside the dorms have been rewired to operate on timers, but lights in the stairwells can be turned on and off manually.

NEW COURSE

A new course in Environmental Studies (Advanced Program), is being offered by the College of Education. The course will emphasize the use of the library, basic reference materials, library services and research methods.

EDFLS 390 - Library Resources and Materials - now fulfills the requirement in the Advanced Program for Education. For further information, call Ms. Geert Smelsthas at 272-2519.

NEW EXHIBITS

"Iron Honors" and "What Energy Crisis?" are now showing at the John Young Museum and Planetarium in Lock Haven Park.

Florida Power Company's Departments of Display and Research have loaned "What Energy Crisis?" to the museum. The film shows the transformation of energy in its newest forms to available electricity. Tips for conservation of energy are also on display.

These exhibits are on view at no charge from 10 a.m. to 5 p.m. any day, and on Tuesday and Friday from 7:30 to 9:30 p.m.

VOLUNTEER SERVICE

The establishment of a university volunteer cleaning center was discussed at the last meeting of the Sociology Club. The purpose of the cleaning center is to provide a central agency to coordinate the needs of persons who wish to donate their time for volunteer work and agencies who need volunteers.

The Sociology Club is also considering the donation of a bulletin board for personal messages to be placed in the Engineering Building.

Educational Programs
To Begin In February

A real estate appraisal course and a program for parents and teachers of children with learning disabilities will be offered on campus this month in connection with the office of Educational Conferences.

The appraisal course, to begin Monday, receives financial support from the Central Florida Chapter of the Society of Real Estate Appraisers (SREA). In order to participate, students must have passed the SREA course in appraising real property, or have had a course in appraising at the university level, carrying at least three credits.

Registration fee for the course is $15, and it will be held Mondays and Wednesdays at 8 p.m. through April 10.

The program for helping children with learning disabilities will be held Feb. 15-16, Friday night a dinner will be held (optional) at the Ramada Inn East for $5.

At the dinner, Dr. Diane T. Shields, of Northwestern University, will present a lecture and discussion on follow-up study techniques that may be utilized with children.

Saturday, Shields will lead a seminar in diagnosis and prescriptive planning, to begin at 9 a.m. in the Engineering Auditorium.

Registration fee for the seminar is $3 for teachers, parents and the general public, $1 for students.

Another course coordinated by the Educational Conferences office, will be presented off campus. The course, called "Morality in Medicine," will be held on a monthly basis, beginning Feb. 20.

Topics of discussion for that day will be "Bases of Morality in Medicine." Topics for succeeding months include "Control of Birth" "Control of Death" and "Control of the Quality of Life." Director for the course is Dr. Robert G. Flick, humanities department chairman.

The National Committee for the Prevention of Alcoholism (NCPA) will hold a three day seminar on campus March 18-20. Attending will be persons from all over the nation, and prominent authorities on the subject will speak.

Directors for the seminar are Dr. Charles M. Unkovic, chairman of the department of sociology, and Milo C. Sawrel, Jr., Executive Director of the National Committee for the Prevention of Alcoholism and Drug Dependency.

Applications for the seminar, open to students and the general public, are available in the office of Educational Conferences, ADM 398A.

On Feb. 4 and 5, the FTU University Theatre will hold auditions for the Bicentennial Production of Farquhar's "The Beaux' Stratagem." The auditions will be held in the Science Auditorium (SCAUD) from 4:00 p.m. until 5:30 p.m., and in EN 109 from 7:30 p.m. until 10:00 p.m. both days.

"The Beaux' Stratagem" is one of the classics of English comedy, first produced in London in 1706. It has the distinction of being the first English play produced in Florida, done as a benefit by British officers stationed in St. Augustine in 1794. For this reason the FTU Theatre has been commissioned by the Florida Bicentennial Commission to reproduce this historic production.

There are a variety of parts in "Beaux," Director David Maya announced, "ranging from two dashing seducers to the elderly Lady Bountiful. I need eleven men and six women.

The Beaux' Stratagem will be produced for three special performances beginning Thursday, March 21.

INTERVIEWS
February 14, 1974

Dr. William Allen, Dr. David Dees, and other faculty members of FTU's sociology department will attend the Florida Conference of Sociologists Feb. 8 and 9 in Gainesville.

The meeting is an annual affair, to which all sociology instructors from Florida schools are invited to attend. They will discuss problems that arise with transfer students, graduate programs, minority students and other sociological academic affairs.

Dr. Dees will give a speech on the future sociology graduate program at FTU, and Dr. Allen will speak on the problems students encounter transferring from junior colleges to four-year universities.

The instructors will meet with students from colleges and universities throughout the state. Around 15 students from FTU are expected to attend.

"Beaux' Auditions Slated Next Week

There are large and small parts, and everybody's welcome..."

The Beaux' Stratagem was produced for three special performances beginning Thursday, March 21.
Sigma Chi Receives Charter

The former FTU colony of Sigma Sigma Chi received its charter from Sigma Chi International last Saturday night and became the 16th chapter of that organization.

Tom Smith, president of the new Bita Pi chapter, accepted the charter during a celebration held at the Howard Johnson’s on Kirkman Road and 4-1.

The 253 participants included several representatives of other fraternities; Dr. W. Rex Brown, vice president for student affairs; and parents and guests of the Sigma Chi brothers.

M. Craig Nason Jr., Grand Consul of Sigma Chi, presented special awards to FTU brothers Tom Ingen and Hugh King for outstanding service to the fraternality.

Knights Run Out Of Gas
Hofstra Takes 24-15 Win
By Jon DeSalle

"It’s like the energy crisis - we just ran out of gas." FTU’s wrestling Coach Gerry Gergley couldn’t have put it better words describing the recent hard luck the Knights have had.

Last Friday, FTU saw a 15-6 advantage over Eastern powerhouse, Hofstra University of Hempstead, N.Y. disappear in the last four matches. When it was about the way his men have been wrestling, Gergley said, "It’s very disappointing to lose when you’re ahead, but we are fairly confident going into the weekend. We need national exposure: and the competition is giving it to us."

In three of their four defeats this season, the Knights have had marginal leads erased late in the match by Florida, Nebraska-Omaha and now Hofstra.

Watching the Knights wrestle in the early stages of the match, spectators would have thought that FTU didn’t know that Hofstra was 1-0; their lone defeat given to them by Florida, 24-15, the previous night.

FTU received fine performances by Scott Sherman, Elio Junco, Mike Wareing and Tom Huitema.

Sherman, wrestling for the first time in the 118-pound class, pinned Bill Bohn at 6:24 in the third period. The move from his usual 126-pound class, according to Gergley, will give Sherman a better chance for honors in state and possible regional competition.

In his 142-pound match, FTU’s Elio Junco decisioned Joe Garalano, 5-3, in a very conservative bout. Junco received four of his five points in the first period with the fifth point awarded for riding time.

Garalano received all his points by escape.

The most exciting match was the 150-pound bout between Mike Wareing and Jeff Dena. After a scoreless first period and a 4-4 lead, Wareing took charge in the second period with some good moves, including a near fall, to win easily, 12-8.

For Wareing, it was a much needed victory. He was stunned in his previous outing against John Carroll, when he pinned at 58 seconds of the first half. John Smith added six points to Wareing’s performance in the second half by using his headlock to narrow the gap to 8-3.

During the first half, Rollins shot a torrid 62 per cent from the field. The FTU contingent, turning about 60 per cent of the largest crowd ever to see a FTU wrestling bout, prayed that the Tars would cool down.

Sure enough, the Knights rallied outscoring Rollins 12-2 in the opening second of the match.

Angelo Calibuso and Rollins had scored eight of the points to spark the comeback. Rollins scored five of the six points before Hall’s driving layup tied the game for the second time at 46-46 with 14:55 left in the game. From that point on the lead would change hands 11 more times until Rollins took the final lead.

FTU went ahead 54-49 with about 10 minutes left in the game, but a Marcus Wilson free throw with 4:46 left in the game again tied it at 62-62. Bob Jones’ three point play put FTU ahead 65-62. Rollins’ John Powell rebounded his own missed layup off the backboard and put it in to tie the game again 67-67. FTU’s Willy Bellote leaped in a crack, putting FTU ahead 69-67, but Rollins’ Buttry easily drew in for an uneventful layup to tie the game.

With six seconds left, FTU’s Matt Schulz was called for a technical foul. As 2000 fans screamed in fright, Smith’s free throw was off to the left of the rim.

With 12 seconds left in the first overtime, Rollins’ Tom Klusman drove through three FTU players for the winning basket. Final: Rollins 71, FTU 69. That’s briefly what happened.

Heis led Rollins with 19 points and converted the basket with 17. McNally who paced Rollins in the early going finished with 16 in the overtime. For FTU, Arnett Hall scored FTU’s 10 points and Bo Jones added 10 points in the second overtime. In the opening second, Garalano chipped in 10. Bob Jones, playing perhaps his finest game in the second half, added nine points (four of six from the line) and collected several steals and never turned the ball over.

Richard Guerra; 126; Pat Murphy, again back down to his best weight; 158; Elio Junco, first time at the weight after compiling a 4-1 record earlier in the season; 142; Mike Wareing, also down to his lowest weight in preparation for the state meet; 150; Mike McDaniel, back again and hoping for better results; 184; Tom Hammons; 167; -- Dave Alberts; 203; Roy Temple; 177; Tim Flink; 190; Randy Jones; and heavyweight Pete Bernat.

Florida International’s team has an interesting week ahead. The Knights, Devils, Lions and Golden Eagles are scheduled for the National Junior College Athletic Association Championships at the National Training Center Feb. 6-9.

P.E. Majors Meeting Set

The Physical Education Majors Club will hold a meeting Thursday 12 p.m. in PE Building 303. Most of the meeting will involve making plans to help FTU host the Florida State College Athletic Association’s state wrestling champions at the Naval Training Center Feb. 9-10.

By Larry McCarlkie

"It was the same game as last year," said Torchly Clark, "It was like seeing my Fair Lady" for the second time.

These were the remarks of the FTU’s basketball coach made Tuesday morning following last Saturday’s 71-69 overtime loss to what now must be considered cross-town rival Rollins College. Speaking in his usual, this is Clark’s answer to the ridiculously impossible question for me. "Well, Coach, can you summarize Saturday’s game for me?" Because Clark knows, this reporter knows and the field.

FTU’s Elio Junco decisioned Joe Garalano, Mike Wareing and Tom Huitema.

FTU faces FIU, SW Louisiana in Miami

FTU wins squash looks to return to the winner’s circle tonight in Miami when it battles in a double dual meet against FIU and the National Southern Louisiana.

Coach Gergley concess his gratitude and optimism for the meet although he is a bit wary since both FTU and USL are relatively unknown quantities, but the former has shown definite improvement over last year’s 0-11 squad which the Knights soundly thrashed 84-0 in Miami a year ago.

FTU’s progress can be explained to a great extent by the arrival there of high-metabolism Coach Sid Hulmen, as coach of (Muckegeon Mich.) Community College for five years, Hulmen led his team to the national junior college championships in 1979 and coached two-time NCAA champ Deon Anthi and Olympic medalist Chris Taylor.

Southeastern Louisiana has two common opponents with FTU, losing in shootouts to both Hofstra and UT-Chattanooga. The Knights, of course, lost to Hofstra 24-15 last week and defeated Chattanooga 25-14 earlier in the season.

Today’s journey will be a round robin affair in which each wrestler will face both opponents in his weight class, there will also be an exhibition five-style match prior to the event involving FTU assistant coach and ex-heavyweight John McDaniel. FTU’s lineup will most likely be the following: 119--Jeff Emerson or possibly
@FTU Girls Place

@Rogers Field, the starting pitcher was Mike McDaniel, with a final score of 9-4. FTU's Kammy Morrisey, the shortest player on the team, comprised the front line. The added confidence and strength, "the key and from the corner," had a lot of exposure," said Coach Holmquist. "Our pitching is not the best player in the state. He should be picked for national exposure," said Holmquist. This season, the Goldsox have is Escobar, the best player in the state. He should be picked for national exposure," said Holmquist. The season's pitching rotation for the Goldsox will have among its top four hurlers, Mike McDaniel, 9-4, John Powell, 23-7, 78.0, Doug String, 6-6, and an "All-American candidate," according to Coach Doug Holmquist, flips ball to Coach Doug Holmquist, flips ball to shortstop Jim Horvath who gets set to turn a doubleplay in a Knight's practice session. (Photo by Jim Matthews)

The Florida state collegiate wrestling championships meet will be held February 23-24 and for the second time in three years next weekend, Feb. 8-9, at the Oriental Hotel, Tallahassee (NTC). The six points gave Hofstra the lead for the first time and eventually the win. Hofstra's heavywieght, Don Mayorga, made FTU's Pete Berkley his tenth pinned victim in 13 victories at 7:25 of the final period. The 6-4 Mayorga is up for All-American honors.

#FTU Baseball: Stronger Defense

The coach said, "If the team is 500 or better, it would be one heck of a season." FTU opens Feb. 23 with a doubleheader against Emory-Riddle at Daytona Beach.

FTU Girls Place 3rd in Tourney

By Larry McCorkie

After losing three games last week, the FTU women's basketball team rallied to win two straight games in a double elimination tournament.

The six points gave Hofstra the lead for the first time and eventually the win. Hofstra's heavywieght, Don Mayorga, made FTU's Pete Berkley his tenth pinned victim in 13 victories at 7:25 of the final period. The 6-4 Mayorga is up for All-American honors.

Wrestling

118-pound class, wasn't as impressive as Sherman moving to a new weight class. The 118-pounder was doublecrowned by the opponent, Nick Colao, losing 11-2. Pat Murphy dropped a hard-fought battle to 134-pounder John Mirabello, 5-3.

FTU's lead began it's disappearing act in the 167-pound bout, as Dave Alberts, wrestling with a hunched back, only took four escape points, in losing to the other half of the Garetano brothers' team, Dennis, 10-5.

In close match, 177-pounder Tim Finanora dropped a 3-1 decision to Bailey Flannery, Randy Jesse and Sam Muldrow started their 190-pound match exchanging head-and-shoulder holds, but Flannery was in control the second period. Muldrow had the last hold, pinning Jesse.

The six points gave Hofstra the lead for the first time and eventually the win. Hofstra's heavywieght, Don Mayorga, made FTU's Pete Berkley his tenth pinned victim in 13 victories at 7:25 of the final period. The 6-4 Mayorga is up for All-American honors.

FTU's Tammy Morrissey, the shortest player on the court, outjumps a taller Flagler girl for a rebound. The much taller Patrick, a star, from St. Augustine defeated FTU 63-24, but FTU rebounded last weekend of win two straight games and three in South Florida's intramural meet. (Photo by Jim Matthews)
Taking a rather backward approach, this photographer emphasizes the problems involved when the majority of the FTU community insists on driving their own car. (Photo by Alan Geeslin)

The Grass Roots will be featured at Walt Disney World’s first Valentine Party, February 8 in the Magic Kingdom. (Copyright WALT DISNEY PRODUCTIONS)

WDW Valentine Party Headlines ‘Grass Roots’

The Grass Roots, Tony Orlando, Dawn, Harold Melvin and the Blue Notes, and other recording groups will play at Walt Disney World’s first Valentine Party on Feb. 8.

Scheduled to run from 8:30 p.m. until 1 a.m., the event offers a one-price admission which provides unlimited use of the Magic Kingdom’s attractions, adventures, and musical entertainment.

Tickets will cost $6.95 at Walt Disney World the day of the party. They may be bought in advance for $5.95 at Sears, Mass Brothers, Bill Baer’s, and Streep’s, in Orlando; Britches South in Lakeland; Music Unlimited, Medco Discount Drugs, Touchless Drugs in Sanford; and the Music Center in Daytona Beach.

State Co-Op Directors

The FTU Cooperative Education Office is housing a meeting lodge with the direction of cooperative education programs in the State University System.

The purpose of the meeting, according to Thaddaus P. Rajesel, FTU Co-Op Project Director, is to put “finishing touches to the policy statement on Co-Op to be submitted to the Board of Regents Ad Hoc Committee.”

Student Government President Lee Constantine presents Executive Director Clark Powers with over $400 worth of unclaimed books for the Orange County Residential Center. (Photo by David Varnadore)
