Task Force Implements Programs

By Jerry Brooks

FTU’s special task force on Energy Conservation is making advances in the areas of express bus service to the university, car pooling and possible implementation of a four-day work week for the summer quarter.

Through the cooperation of various campus activities, including the physical plant and the housekeeping subcommittees of the task force, FTU has consumed 405,000 less kilowatt hours of electricity and 405,000 less thermal units of natural gas for the month of January 1974 than it did in January 1973.

This, according to James Eiler, coordinator of the task force, is a 26 per cent savings of energy as compared to last year’s consumption.

Express bus service to FTU is presently being considered by the State Department of Transportation (DOT), according to Dr. George Scharf, chairman of the mass transportation subcommittee of the task force. The Florida Transportation Authority has several buses which could be used to make an FTU express bus, but according to Scherf the buses could be transferred to other tri-county areas before FTU demonstrates a need for the buses.

Scherf said it is possible to have express bus service to the university by March 25, the beginning of spring quarter. Two surveys will be taken in order to measure student interest in the program: an in-class survey and a questionnaire in the future.

Results of the survey will be sent to the DOT where the final decision on implementation of the bus service will be made. Scherf said the DOT is optimistic on the chances of express bus service to FTU by next quarter.

In order for the bus service to break even, said Scherf, there would have to be two morning and two afternoon runs, with the bus filled for each run. Should the passenger load fall below the break even point, the DOT would pay 50 per cent of the losses with the other half coming from the Orange-Seminole-Osceola Transportation Authority.

Scherf said he feels that changing conditions brought about by the gasoline shortage should encourage students to support and make use of a bus service if FTU gets one.

“The concept of teaching a course on the bus,” said Scherf, “is what really interested the State DOT in the express bus, but it will probably be summer quarter before we can put together any type of course that could be offered on the bus.”

The car pooling subcommittee plans to send out computerized letters again next quarter to encourage students to form car pools.

Subcommittee chairman Lee Constaine said that an effort will be made to group the student’s addresses closer together than the last letters did. The mailing list will be taken from a list of students who go through pre-registration. That list will be taken to the computer center where the letter will be written. Students should receive their letters by the third day of classes during spring quarter, said Constaine. (Continued on Page 2/)

Members of the FAVORS steering committee, (L to R) Dick Jones, Ken Holden, James Dill and Kathy Cavanna, discuss their plans for the FTU volunteer referral service which matches students interested in doing volunteer work with community service agencies in the area. Faculty Senate Requests Evaluation Input

By Michael Lochridge

The Faculty Senate voted Feb. 21 to return the proposed academic administrator’s evaluation resolution to the Instruction Committee, requesting that the committee seek input on the evaluation method from administrators.

The unanimous vote came after several senators suggested the need for academic administrators to offer input before the Senate takes action on the resolution.

Dr. Raymond Buchanan, chairman of the communication department, said that with input from the administration, the evaluations could initiate action with a “healing effect” rather than with a derivative effect.

"By not allowing the administration to have any input into the evaluation method,” Buchanan said, “it tends to drive a wedge between the faculty and administration and also tends to allow bloodletting.”

The Instruction Committee was asked to contact the Administrative Council, the Dean’s Council and the Chairman’s Council for administrative input.

The committee was requested to present the material at the March 14 Faculty Senate meeting.

The resolution, proposed in the Feb. 14 meeting, would allow each full-time faculty member to evaluate each college dean, each department chairman and each college dean to be evaluated by the full-time faculty in his or her college. The resolution also states that all other academic administrator, including the vice presidents and the president, be evaluated by all full-time faculty members.

Dr. Fred Podler, chairman of the Instruction Committee, said the problem of lack of administrative input was considered, but that the committee wanted to go ahead with the evaluation for the first year.

One of the articles of the resolution states that after the form has been used for one year, the Instruction Committee will evaluate the form’s suitability, considering any modifications suggested by faculty members and administrations.

Dr. James Koenig, a member of the biological science faculty, said, “We are in an era of accountability. This evaluation will cause the faculty to really look at the administration for the first time.”

Koenig said he was told by an administrator prior to the meeting that there is no way for the faculty to evaluate the administration. That idea was “false,” Koenig told the faculty senate.

Burton Wright, a member of the sociology faculty, said that receiving input from the administration is “no more than fair,” because the faculty offered input on their faculty evaluations.

He said he would not object to a recording being made if prior Senate approval is given.

Taylor said Tuesday the Faculty Senate may have “defied the recording inappropriate because of the sensitivity of the discussion.”

Florida Senate 286.011 states that all meetings of any board of commission of any state agency, except as otherwise provided in the constitution, at which official acts are to be taken are declared to be public meetings open to the public.

Att. Atty. Gen. Rusty Ingle said that Faculty Senate meetings “ought to be public, I guess. It depends whether the Faculty Senate has any real power.”

“If I were the chairman of the Faculty Senate, I would have said the same thing you did,” Ingle said. “I would have said ‘sure let them record it, it’s not going to hurt us’.

“I really can’t see where it’s in anybody’s interest to prevent tape recordings from being made. I don’t see what harm it does.”

It would seem to me it would do just as much harm to have someone who takes real good shorthand sitting there taking very accurate notes of what people said as it would to actually get the recording inappropriate because of the fact that they’ve said,” Ingle said.

“The only logical justification I can think of for denying permission to bring a tape recorder is in the possibility that the existence of it might be a disrupting factor,” Ingle said. "If you went around the table where all those people were and pick one person and stand up and strung cords all over the place saying, ‘I’ve got a minute—I’ve got to change a tape’ then I could see why.”

Applying the ruling of Chairman K. Phillip Taylor, the Faculty Senate requested a Future reporter not to make a tape recording of their Feb. 21 meeting.

The Senate voted 12 to 7 to ask the reporter to turn off the recorder minutes into the meeting which was called to discuss a resolution concerning the evaluation of academic administration.

Dr. Mark Stern, a member of political science faculty, objected to the recording, saying, “I see no reason whatsoever for having the recorder where he (the reporter) can take notes.”

Defending the use of the tape, Taylor said “the reason for using the tape recorder is that they (Future staff members) are constantly accused of misquoting, and we have to make sure that doesn’t happen.”

Stern replied, “I’d rather have them misquoting the meeting.”

“Tape’s a guest wants to have certain privileges, he must first have permission,” Stern said, following the meeting.

 Facult Senate Prohibits Taping

By Michael Lochridge

The unanimous vote came after several senators suggested the need for academic administrators to offer input before the Senate takes action on the resolution.

Dr. Raymond Buchanan, chairman of the communication department, said that with input from the administration, the evaluations could initiate action with a “healing effect” rather than with a derivative effect.

"By not allowing the administration to have any input into the evaluation method,” Buchanan said, “it tends to drive a wedge between the faculty and administration and also tends to allow bloodletting.”

“Who? Exam time is here already!” Felicia leaves the fish bowl long enough to remind students of approaching finals. The exam schedule is printed on page two. (Photo by Jerry Brooks)
Women's Clinic Planned

Six of the most common anxieties bothering women will be discussed at the "Women's Worry Line" on March 15 at the First Presbyterian Church in Orlando. The Women's Auxiliary of the Orange County Medical Society and Florida University Women's Union are co-sponsors of this clinic.

"The Male Ego" will be the topic of discussion, and will be presented by Dr. Burton Wright, FTU sociology professor.

Anne Frank Immison, a Broadway lawyer specializing in family law, will discuss personal problems caused by divorce proceedings and adjustment to one's new life. Dr. Robert Gedo, a clinical psychologist, will examine coping with depression and anxiety. Dr. Eleanor Brock, assistant sociology professor, will explain how women should begin taking care of themselves to improve their sexual performance. Nancy Grimm, director of the Green House Youth and Family Counseling Center and a licensed Parent Effectiveness Training instructor, will discuss how to deal with your child's rebellion.

The clinic will be held in the Fellowship Hall of the First Presbyterian Church, 1000 S. Rock St., Orlando. There will be no charge for the clinic. All interested persons are invited to attend.

Carol Wilson, dean of women and coordinator of the project, said, "The clinic is our first venture into this type of programming in the community."

Check-in is limited to 200 people and will begin at 8:30 a.m. on March 15, followed by an introduction to the session. Lunchroom reservations are $2.50 and are available at the door, where tickets will be sold.

SUSFSC Members Meet

Various matters of concern to state university faculty members were acted upon at the Feb. 15 meeting of the State University Senate Council (SUSFSC) in Tampa.

The council adopted three proposals of a special committee appointed by the council to review the policies implemented through the Ombudsman Education Act. The first proposal concerned the new 12-hour teaching staff that requires a faculty member to submit a statement of various professional activities on a quarterly basis.

According to a survey conducted by the Pegasus Public Relations Co., approximately 30 percent of the car is coming to FTU are occupied by more than one student. Based on personal observations, conversations with members of the college and comments from members of the faculty and staff of FTU, Constantine said the students are responding much better to the car pooling concept that some faculty and staff said he is hoping that half of the student body will be car pooling next quarter.

The plan scheduling subcommittee of the task force came one step closer to recommending the implementation of a four-day week for the summer quarter Wednesday. The faculty and staff filled out a questionnaire soliciting their feelings on the idea.

Dr. K. Phillip Taylor, chairman of the class scheduling subcommittee, said the administration, during their 10 a.m. classes, was designed to determine the interest, willingness and speed at which the faculty would go to a four-day week during summer quarter. The faculty and staff responded to the survey throughout the day.

"We need broad base support for this project," said Taylor, "so the survey should give all concerned parties a chance to comment on the possible shift to a four-day week."

Taylor said the summer quarter was chosen as a possible time to implement the four-day work week since fewer people will be involved and scheduling will be less of a problem.

Task Force (con't from page 1)

"A lot of people did not believe there was an energy crisis at the beginning of this quarter," said Constantine, "but now they are trying to form car pools."

Test Evaluation To Be Analyzed

A test instrument for student evaluation of faculty members was recently approved by Dr. C. B. Gambrell, vice president for Academic Affairs and the Gordon McElear, chairman of the Teacher Evaluation Committee.

McElear said that the special committee, composed of faculty and student members appointed by Gambrell was formed to develop a standardized faculty evaluation system (based on the teaching model of the Faculty Senate), and selected questions from other tests. Committee members also formed ideas of their own, he added.

The evaluation, McElear said, includes questions concerning the following areas, recommended by the Faculty Senate's teaching model:

- demonstrated interest in teaching;
- ability to stimulate the student intellectually;
- ability to motivate students to learn;
- ability to formulate questions and explain or interpret material;
- preparation for teaching;
- confidence and academic poise;
- achievement of course objectives.

The total evaluation form will be administered to a random sample of the faculty, perhaps as soon as next week, McElear said.

The results, which are strictly for instrument evaluation purposes, will be analyzed by Edwin C. Shively and Dr. Charles Dedman, faculty members of the committee. They will test the results for validity and reliability.

If found valid, the evaluation form will be adopted for use by departmental chairmen, and the committee's goal will be fulfilled.

"By the time companies come to hire us, they have put in a lot of hard work," McElear said. The committee has been meeting regularly since late August to work on the form.

Other faculty members include Dr. James Koenig, Dr. Bruce Nimmo, Mary Palmer, Theodore Pepper and Dr. David Tucker.

Favor, Week which ran Feb. 15 through 22, was organized to provide information and publicity about FTU's newly formed FAVORS, (Florida Annual University Reference Service).

This service, abbreviated FAVORS, a 900,000-university-wide program, opened year-in and year-out.

Blood Drive Has 'Good Response'

While attendants had to get adjusted to working in a small area, the make-up of the Orlando Rotary Bloodmobile turned out to be nearer a steady line of donors passed through the unit Tuesday.

The 83 pints of blood donated Tuesday and the 84 donations Wednesday will go to the FTU blood Bank Reserve. The Reserve is designed to provide blood for any student, member of the faculty or staff, or any of their immediate family.

Miss Brenda Greer, a registered nurse and one of the mobile unit staff members, said several large groups of donors numbering up to 15, had to be asked to wait outside.

The Bloodmobile was introduced to Orlando by the Central Florida Blood Center by Don Puttman Tuesday and Wednesday, taking donations by the knock.

Greer said late Tuesday she hoped to have some there would according to Kathy Cavana, program director of FAVORS.

FAVORS makes available to FTU students information of 100 individual agencies in Orange and Seminole Counties which are in the interest of volunteer help. These agencies include many different areas of interest, including Head Start programs, correctional programs, cultural services, drug programs, recreation, ecology and some pre-professional programs, such as medicine.

Cavana explained the service's purpose as multi-fold. First, it benefits the students by giving them experience for future jobs, she said. Secondly, the administration by providing an added service to FTU students.

FAVORS explores career opportunities, she continued, matching FTU volunteers with the community needs and cutting two types of jobs must go through when looking for volunteer work.

A student inquiring about FAVORS for volunteer work will first approach the FTU office and the list of 100 agencies, forms from each agency. These forms contain information such as agency hours, minimum number of hours, student qualifications are required to work, qualifications volunteers should possess, work conditions and workers.

FAVORS also makes available forms requesting information from interested students relating to their past experiences, hours available and some general interest.

Other and other organizations will be approached for assistance by FAVORS. "We're encouraging other organizations to come along," she said.

This is not just a joint effort between the Societies Club and the Village Center (VC), says Rick Jones, a steering committee member of FAVORS.

Cavana sees FAVORS as a very important program at this university, Rollins College and Valencia Jr. College have similar programs, she explained. Transfer students from these colleges to FTU involved with this type of work, will be able to continue their work experience with FAVORS, said Cavana.

Interested students are strongly encouraged to stop by VC room 140 for new information any week day, from 11 a.m. to 3 p.m.

Jim Nickerson hopes to donate blood during the Orlando Rotary Bloodmobile's recent visit to the FTU campus. (Photo by Pete Wilson)

Simmons Favors Separate Student Directory

A separate student directory produced on a quarterly basis would better serve the needs of the students, according to James T. Simmons, director of personnel services.

The present annual format is fine for the faculty and staff services, said Simmons, but because that change must be made in publication on a calendar year basis, in order to include all phone numbers it would be more accurate than the present annual section in the campus directories, said Simmons.

The cost could be defrayed by either selling advertising or charging the user for the directory, to said.

The directory was scheduled to be printed by March 15, according to Director of Purchasing Leslie M. Gross. He would not set a date for the annual edition.

Another delay was caused by the trucker's strike, which delayed shipment from the publishers in Lubbock, Tex.

Norman Armstrong, an FTU senior, reveals the alterations that enable his late model Chevrolet, displayed at last week's engineering fair, to run on either gasoline or propane. (Photo by Mike Berman)

Barfield's display was an electrical circuit which detects voltage that prevents corrosion in pipes. Daniels and Brown joined forces to present a "Disc Lifting Body." The award-winning display in the group competition went to the student chapter of the American Society of Mechanical Engineers.

Its entry was a "Solar Powered Refrigeration." The solar power collector used to supply the refrigerator with energy from the sun.

All of these winning entries, in addition to others, were on display last week in the Engineering Building.

Loan Activity Growth Expected By Financial Aid

The number of students seeking and obtaining short term loans will probably increase as a result of FTU's new registration procedures, according to Donald M. Baldwin, vice president for Financial Aid.

Baldwin said loans increase when more students have not considered how the changes will affect them.

The changes will not, however, affect financial aid, Baldwin said, "it speeds up the whole process," he added. "Instead of our usual load coming during the first week of classes, the real pressure will come 10 days before classes start.

Two changes in the short term loan procedure are that a co-signer is not required and the upper limit for a loan has been raised from $300 to $620, Baldwin said.

"It's like (the new registration system) because kids (students) shouldn't have to worry about money during the first week of classes," said Baldwin.

Because fees are due one week earlier, Baldwin explained, students should make their applications for loans as early as possible, preferably before the end of the quarter.

A recent informal poll of student opinion revealed that many students have not really considered how the changes will affect them.

One student said "it didn't affect me. If you have a good reason you can get an extension."

Other comments ranged from mild disagreement such as "It's just more of a hassle" to one student who said "You've got to pay it sometime."
FACULTY SENATE NOT HELPING MATTERS

We were irritated and yet puzzled at the Faculty Senate's recent "requests" to stop the tape recording of their meeting-irritated because their efforts to accurately report the news and puzzled because of the remarks made by some faculty members.

The remarks have been held by some administrators and faculty members in the past that their statements are sometimes misquoted. Although we often have evidence to the contrary, we usually give the benefit of the doubt to the speaker because we make mistakes.

In an effort to double-check accuracy, reporters are instructed, on certain assignments, to either take along a tape recorder or fellow reporter during interviews, meetings, etc. We feel this represents a time-consuming, but responsible measure.

Therefore, it is frustrating to hear a supposedly mature individual make a statement that misquoting is preferred over the presence of a recorder. When this individual turns out to be someone trained in the workings of government and, consequently, the importance of an effective fourth estate, the issue becomes even more confusing.

In the first part of the Faculty Senate meeting held Feb. 21, two/FuTUre reporters present the following two, some petty wild and probably embarrassing quotes could have been printed. But the reporters realized the need for those present to vent some of these remarks and more in the next publication.

We plan to make our newspaper evidence that we're working on our problems-let's have a little cooperation instead of obstacles.

---

By Mike Hall

An aid of opinion based on selectively perceived information presented in a manner designed to persuade you to think like I do.

So, is everyone ready for the pre-registration ritual? I say ritual because in addition to placing your name and a list of classes on the registrar's assembly in the glass house and, with the aid of the enlightenment.

Advisors give counsel to scholars during this period in an attempt to put aside until its time arrives.

To attempt to read tiny writing from distances that would challenge an eagle's vision. With everything seemingly in order, he joins a long line of anxious comrades waiting to present their ceremonial schedules to the cybernetic spirit personally.

For the past two or three weeks, we have been reading articles and editorials in our student newspaper regarding the university's ceremonial schedule gripped tightly.

If all goes well, however, a scholar's time of entrance will be announced to the cybernetic spirit by a sum of numbers. If all is well and the numbers are correct, a scholar's name is read and smiles up at him. The cybernetic spirit is pleased and concludes his search for a scholar's presence.

Seconds an answer clatters out.

One will notice the Village Center (VC) calendar for the present quarter and see "Lady Sings The Blues" is officially scheduled for Wednesday, Friday and Saturday showings at 8:30 p.m. in the Village Center Assembly Room (VCAR). Similarly, one will notice that this schedule is inconsistent with the recent publicity regarding days of the actual exhibition of the film. The change in schedule is a result of a direct violation of a stated policy; it represents an indicator by which the university community can estimate its subversive position to those administrations to see and to see an inconsistency with an incorrect number of us who may have been unaware of the change for recent publicity. After all, does not the VC policy represent the announcement of confirmed, officially scheduled events?

In the past, it has been my experience that the VC has attempted to place only those events which are confirmed on the Quarterly Calendar for publication. The VC still subscribes to this policy. However, persons in the VC office can estimate its inconsistency with the recent publicity regarding days of the actual exhibition of the film.

If all goes well, it is frustrating to hear a supposedly mature individual make a statement that misquoting is preferred over the presence of a recorder. When this individual turns out to be someone trained in the workings of government and, consequently, the importance of an effective fourth estate, the issue becomes even more confusing.

In the first part of the Faculty Senate meeting held Feb. 21, two/FuTUre reporters present the following two, some petty wild and probably embarrassing quotes could have been printed. But the reporters realized the need for those present to vent some of these remarks and more in the next publication.

We plan to make our newspaper evidence that we're working on our problems-let's have a little cooperation instead of obstacles.
VC Protests Change (from pg 4)

the VCAR for pre-registration for spring quarter was state which conflicted with the Wednesday showing of "Lady Slides Tennis/Tennis".

These people insisted on the assumption of individual cost which would replace a previously scheduled, university-wide event.

Why the Multi-Purpose Room was chosen has been in past years-particularly under the circumstances—remains an unanswered query. The committee registered an official protest to no avail. We were simply told to reschedule our selection.

I bring this incident to the attention of the university community to inform all inform all to what extent stated policies are adhered to by some elements within this institution. In dealing with some elements of the FTU community, please be wary of dependence on stated policies to legislatively substantiate your position. Though logical and a stated policy may support your position, some elements of the university are simply not expected to understand either.

Jim Pieree
VC Board President

ed note:
Registrar Dan Chapman said he was unaware of a conflict on Wednesday, March 6.

In a memo dated Dec. 19, 1973, Chapman informed the Board of Regents that he recommended the proposed dates of Feb. 27, March 1 be changed to March 4-6 in order to avoid a conflict with the "Jacques Brel" production. It was further recommended that Spring Quarter Regular and Add/Drop registration be moved to the Multi-Purpose Room to avoid conflicts.

A carbon copy of this memo was sent to VC Director Ken Lawson.

Perhaps there's something else we're unaware of, but it seems the FTU communication gap struck again.

University Position (from pg 4)

property tax levied upon citizens of the State of Florida.

In addition there are Statutes regulating certain employee records and, of course, the well-known secrecy of the Grand Jury proceedings. The list is virtually endless with respect to records that are maintained by various State agencies which are deemed to be public record and, in fact, many times criminal penalties are imposed for divulging such records.

In 1973, the Florida Legislature passed what is popularly known as the Omnibus Education Act amending Chapter 239 of the Florida Statutes by adding new subsections which read as follows:

"Student Records Regulations of the Florida Board of Regents may prescribe the content and form of the records which an institution in the state university system shall maintain on its students. Such records shall be open to inspection only by the student, the parents or guardian of the student, and such members of the professional staff of the institution as have responsibility working with the student. Except as required for use by the president in the discharge of his official responsibilities, the custodians of limited access records may release information from such records only with the authorized, in writing, from the student or upon order of a court of competent jurisdiction.

Records of Personnel Files of the Florida Board of Regents shall, if requested, be open to inspection by the employees and employee performance, and employe performance, including faculty evaluations, is nothing other than the Board of Regents passing regulations as the 1973 Legislature gave it the power to do, and, and, of course the University being under the suspicion of the Board of Regents, is simply following the Board of Regents policies in refusing to divulge the contents of faculty evaluation files, certain student records and certain personal files.

It is, therefore, submitted that the Board of Regents, in passing its policies regarding the confidentiality of records regarding student performance and employe performance, including faculty evaluations, is nothing other than the Board of Regents passing regulations as the 1973 Legislature gave it the power to do, and, and, of course the University being under the suspicion of the Board of Regents, is simply following the Board of Regents policies in refusing to divulge the contents of faculty evaluation files, certain student records and certain personal files.

Marathon Opens For Art Activities

By Dale Chihara

FTU's Art Department is holding an unusual art event which began at noon, Feb. 28 and will last until noon, March 2, a 48-hour public marathon at the Art Facilities on the FTU campus.

Art students and faculty will be art marathons, non-stop basis before the invited public. The Art Facilities are located near the parking area, behind the art warehouses near security, and consist of two document film of their efforts by CBS-TV news. This program, "Space Cathedrals" was aired nationally in 1973 and fragments of it appeared on the Emmy awards program last year.

All those interested in observing art in its creation are urged to attend this open-to-the-public art marathon.
New Course Offerings Listed

FTU is offering a variety of courses available for the first time during spring quarter.

New courses available in the College of Business Administration include: ECON 328, Transportation; ECON 481, Business and Government; QBA 461, Quantitative Application to Business; QBA 491, Special Topic formation and ASCT 495, Federal Income Tax Accountability (expanded from those to five hours).

In the theatre department, three new courses are offered: THA 242, Stage Props; THA 491-03, Acting II; and THA 491-04, Directing II.

One new art course is being offered during spring quarter. It is ART 445 Environmental Art. Also in the College of Humanities and Fine Arts, four new English courses are being offered. The single undergraduate course in ENG 483, Back English. Three new graduate English courses are ENG 509, Rhetoric in Literature; ENG 630, Movements in Literature and ENG 649, Problems in Linguistics.

In the Music Department, four new courses will be offered next quarter. These courses are: MUS 306-08, Choral Lab; MUS 306-09, Reading Band; MUS 311, Music in Society and MUS 312, Advanced Recorder.

Two new history courses will be offered next quarter, HIS 457, World War II and HIS 591, Indians and Whites.

In the College of Social Sciences, new courses in communications will include: COM 491-01, Special Topic-Body Language; COM 491-02, Creative Selling and COM 491-03, Special Topic Manual Communication (communications for the deaf). Also in Social Sciences, three courses in Legal Services will be offered: LES 301, Legal Doctrine; LES 342, Probate Law; and LES 374, Real Property Law.

RTV 491-02, How to Watch Television and RTV 491-03, Radio Drama, will be offered for the first time next quarter, as well as PCL 491-02, Political Decisions will also be offered for the first time.

In the College of Engineering, six new courses will be offered next. They include: CERS 321, Surveying; ENT 423, Feedback Control; ENT 424, Communication Systems; ENT 434, Solid Waste Management and ENT 443, Senior Project.

In addition, courses in the engineering core will be offered from 6 to 9 p.m. to enable both Co-Op students and engineering majors to complete their requirements.

In the College of Natural Sciences, BIOL 376, Biology of Marine Organisms and BIOL 554, Ecology of Running Water are being offered. BOT 671, Botany Study and MCR 653, Microbiological Metabolism are being offered on the graduate level.

New mathematics courses being offered next quarter are: COMP 310, Computer Systems/Hardware Capabilities on the undergraduate level; MATH 511, Modern Applied Algebra; COMP 601, Computer II; COMP 612, Systems Programming III and COMP 661, Numerical Analysis II, on the graduate level.

Viewing TV Not Kid Stuff

Do you know how to detect a slack in television news? Do you know how to estimate the cost of commercials and infer the advertisers pass on to consumers in their products? If you do not know and are one of those average Americans who spend seven hours and ten minutes a day in front of the TV set, you might consider taking a course on "How to Watch Television."

Listed in the spring class schedule as RTV 491, the new FTU course will cover television entertainment as well as news and commercials. Drs. Ronald Drabman and Margaret Thomas of the FTU Psychology Department will present lectures on the effects of violence on television.

The course will also feature speakers from local broadcasting stations.

The class will meet on Thursday nights next quarter from 6 to 10 p.m. in the Engineering Auditorium and will offer 4 hours of elective credit.

RTV 491 will be taught by its creators, Dr. Thomas Morgan, of the Communications Department.

"I have never seen anything like this course offered at any other university in Florida or the rest of the country," said Morgan. I expect other schools will copy it, particularly if our enrollment is large."

Morgan noted that the class could include a maximum of 300 students and anticipated that it would be a popular one.

French Works Studied in English

"Insight into the modern French mind on such themes as love and identity, war, violence, anxiety, commitment and the absurd," describe a new course, "20th Century French Literature in Translation," to be taught by Dr. John C. Difrancesco. The course, which will be offered spring quarter, will examine Sartre, Camus, Proust, Beckett, and Ionesco. It will be taught in English, and is open to any FTU student.

For further information, contact Dr. Anthony V. Cerrone, chairman of the Department of Foreign Languages, at 275-2641.

Luiz Dias and Otavio Piva (1 to 2), students in MUS 310, Beginning Recorder, have found that the recorder's musical possibilities are endless. Both beginning and advanced recorder courses are offered spring quarter. According to the class instructor Patricia Stenberg, whether students prefer to play simple melodies, folk tunes, jazz or classical music they will be able to enjoy this versatile instrument. (Photo by Alan Geelin)
New Courses Offered

Six new courses will be offered in the Spring Quarter by the department of humanities, philosophy and religion.

Three new courses will be offered in Philosophy, including Social Philosophy, taught by Dr. John Hetz; The Philosophy of Science, taught by Professor Donald Jones; and Nature, God and Man, taught by Dr. Stephen Levovitch.

Social Philosophy will be concerned with a philosophical criticism of value conflicts. The course will seek to clarify and assess conflicts arising from the interaction of the individual, society and the state.

The Philosophy of Science will examine the relation and relevance of philosophical, logical and conceptual analyses of science.

The third new philosophy course will attempt to clarify the concepts of nature, God and man through an examination of such other notions and attitudes as aboriginal, Hindu, power, trust, decent and love—especially as they operate in everyday life.

Politics of Nazism Taught

The "Politics of Nazism," will explore Adolf Hitler's character, his use of economically depressed people and Germany's conversion into a police state.

Dr. R. G. Holten, professor of political science, will instruct the four-hour course, which will be offered spring quarter. The class will meet Thursday evenings and is open to all FTU students.

Enthusiastic Gathering Greets Tucker' Band

Good weather and a muddy week's rest did not deter a moderately large crowd at L. P. Productions featured The Marshall Tucker Band, Commander Cody and His Lost Planet Airmen and New Riders of the Purple Sage.

Opening last Friday night's concert at the Seminole Turf Club, the relatively new Marshall Tucker Band introduced itself to the audience with a dynamic musical performance.

Beginning the set with "Hillbilly Band," a cut off their first album, Doug Gray proved to be a vocal of exceptional quality.

Toy Caldwell, who has quickly gained recognition as one of today's top lead players, laid open his tremendous ability during "Take The Highway" and "Ramblin,'" also from the band's first album.

Continuing with the precedented tempo of southern rock, Commander Cody and His Lost Planet Airmen kept members of the audience on their feet.

Despite volume problems which interfered with the phenomenal piano playing of the Commander, the group still managed to put on quite a performance for the enthusiastic crowd. Andy Kimen added richness to the sound as he supplied fiddle and saxophone music.

With Bill Kirchen on lead guitar and Billy C. C. supplying vocals, Commander Cody played "Back To The Seeds And Home Blues," one of the group's favorites, followed by a jumping interpretation of Elvis Presley's "Hound Dog."

Topping the night off were sounds of the New Riders of the Purple Sage which consists of John Dawson, acoustic guitar; David Nelson, vocal and guitar; Skip Battie (formerly of the Byrds) on bass and Buddy Cage, whose fantastic drumming performance on steel guitar provided tremendous excitement.

New Riders played a mixture of southern blues and rock, occasionally dipping back into the past to re-live some of their oldies but goodies.

The considerably tremendous quality of the concert can be partially attributed to the selection of three bands which play similar styles of southern music.

There will be no mandatory reading list. Students will choose from a list of texts available at the Bookstore and Library.

Dr. Huan Kamim will teach a new religious course entitled "Religions of China and Japan." The course will explore the basic concepts of Shinto, Taoism, Confucianism, Buddhism and Zen.

A new course in the humanities, "The Spiritual and the Arts," will be taught by Dr. Robert Piek. The course will deal with man's highest aspirations, his efforts to transcend the physical and rational world to emulate or create a divine order.

"Epics and Themes in the New Testament" will be taught by Dr. Dorothy Davis, adjunct instructor in religious. The course will provide a background for modern New Testament study and will explore the development of a variety of themes including spirit, temple, community and kingdom in the gospels, Pauline letters, pastoral letters and apocrypha.

Economics Plans MA

FTU's new master's degree program in Economics is now ready to begin with the 1974 fall quarter, according to Dr. Robert E. Hicks, chairman of the department of economics and finance.

The program is designed to prepare students for employment in business, industry, government, self-employment, to teach at the community college level, and to prepare for doctoral study, he said.

According to Hicks, the program, while general in nature, will allow for a special area specialization in the areas of industrial theory and institutions, urban and environmental economics, and quantitative methods. It involves 45 quarter hours, including a thesis.

The department of economics and finance has received in excess of 100 non-FTU inquiries about the program from throughout the United States and some foreign countries, according to Hicks.

Directional Sign Stolen

After three weeks in use, one of FTU’s new directional signs pointing the way to campus was stolen last week from FTU Boulevard.

The sign, which cost the university over $250, is the largest and most costly university over directional sign ever stolen. After three weeks in use, one of FTU’s new directional signs pointing the way to campus was stolen last week from FTU Boulevard. The demand for this type of reflective sign, as well as the scarcity of suppliers of materials, has created a backlog of requests. FTU has been trying for nearly six years to obtain directional signs as an aid to the driving public. This year, with the help of Orange County Engineer George Cole, FTU was able to obtain its signs after a waiting period of six months, Spinnato reported.

Anyone knowing the whereabouts or having information regarding the missing sign should contact Michael Spinnato at 275-2471, or anyone in the physical plant.

Graduation Ceremonies Scheduled

Winter quarter commencement will be held Friday, March 15, at 7 p.m. in the U.S. Naval Reserve Training Center Field House.

Baseball Wins First Four, Looks To ‘Unbeatable Foe’

By Larry McCorkle

FTU's baseball team opened the season with four straight wins, but the celebration was short-lived as Holmquist was limiting the driving in four runs.

Stetson freshman Stan Edge from Colonial was limiting the assault was Gattis who game, three run third inning. For the school after transferring from later, the Knights finished their two-under-par two-week tourney, Ball 96-54; Medgar-Evers, 85-79, and FtU Cagers face the Hurricanes, or Miami to face the Hurricanes, or Country Club. It was last shortlived as Doug Holmquist's single by Ron Bebe and scored on a throwing error. Luis Escobar. After John Teator and prepping at Boone High. 16-8 campaign.

While the Knights were taking batting practice against Baruch College, freshman Edgertomans, freshman Stan Edge from Colonial was limiting the opposition to two hits and one run while striking out 10. The second game was a continuation of the first, although on a somewhat more subtle level. Luis Escobar's three run homer in the first inning gave FTU a lead which was further enhanced by a seven-run seventh inning. Craig Butler's two run home run was a part of the fireworks in the last inning.

Sophomore Dave Draper earned his first win of the season and posted the team's first shutout. Draper struck out nine, and walked only one while allowing just two hits.

FTU's offensive guns were still going strong Sunday against FIT, but Holmquist was disappointment in the poor pitching performance by "his big guns.

FTU's pitching gave up only four runs against FIT but FTU coach Doug Holmquist swears that Mel Gattis (above) is the best defensive catcher in the state. Gattis didn't do bad offensively last weekend collecting nine hits and driving in nine runs in four games. (Photo by Jim Matthews)

FTU Cagers Take Three In New York

Knights Finish Strong 6-8

By Joe DelSasso

Before the 1972-74 FTU basketball season got underway early December, Coach Torey Clark predicted that the Knights would end up 10-14. Last Friday night, four months later, the Knights finished their season with a "very satisfying" 109-57 triumph over the Baruch Bees.

Arnett Hall shot 10 of 17 from the field and 60% Bob Jones chipped in with 15 points and 10 rebounds.

The next evening the Knights encountered their toughest game of the trip against Medgar-Even.

Claud said, "Medgar-Evens was the best team we played, and they came out with an effective zone defense and it gave us trouble in the beginning." The Knights, who were trailing at the half, (67-57), and as much as 16 points, 43-27, adjusted in the second half and outscored their opponents, (48-33). John Smith led the FTU attack with 25 points. Hall, who was held to 17 points, came through for us." The anticipated debut of Luis Escobar was well worth waiting for. In the four games, Escobar struck seven hits (including two home runs) in six runs, and along with shortstop Horvath was in on seven doubleplays.

"Escobar's such a tremendous ballplayer that his confidence role off on everyone," said Holmquist.

However, the highlight of the weekend was the hitting of catcher Mel Gattis who stroked nine hits in 11 trips and drove in nine runs.

"Gattis was hitting real well to rightfield in batting practice so I told him to stick with it,"

DAVE DRAFTER

Holmquist. "Last weekend everything I looked up he was hitting a line drive right to leftfield." FITU will play Florida Bible in a Saturday doubleheader before the Sunday twin bill with Miami, "the best team in the South," according to Holmquist. Holmquist has far from conceded, however, as he will use the unusual strategy of pitching five different pitchers in both games in hopes of keeping Miami a little off balance.

Pulling, Hargest, Edge, Larsen and McLaughlin will most likely see action.

Holmquist also indicated that it was the only way to keep his staff well rested so he'll have his best available for next Wednesday's doubleheader against FIT. The first game will begin at 3:50 p.m. at Tinker Field.

The next evening the Knights encountered their toughest game of the trip against Medgar-Even.

Claud said, "Medgar-Evens was the best team we played, and they came out with an effective zone defense and it gave us trouble in the beginning." The Knights, who were trailing at the half, (67-57), and as much as 16 points, 43-27, adjusted in the second half and outscored their opponents, (48-33). John Smith led the FTU attack with 25 points. Hall, who was held to 17 points, came through for us."

"Escobar's such a tremendous ballplayer that his confidence role off on everyone," said Holmquist.

However, the highlight of the weekend was the hitting of catcher Mel Gattis who stroked nine hits in 11 trips and drove in nine runs.

"Gattis was hitting real well to rightfield in batting practice so I told him to stick with it,"

DAVE DRAFTER

Holmquist. "Last weekend everything I looked up he was hitting a line drive right to leftfield." FITU will play Florida Bible in a Saturday doubleheader before the Sunday twin bill with Miami, "the best team in the South," according to Holmquist. Holmquist has far from conceded, however, as he will use the unusual strategy of pitching five different pitchers in both games in hopes of keeping Miami a little off balance.

Pulling, Hargest, Edge, Larsen and McLaughlin will most likely see action.

Holmquist also indicated that it was the only way to keep his staff well rested so he'll have his best available for next Wednesday's doubleheader against FIT. The first game will begin at 3:50 p.m. at Tinker Field.

FTU Basketball Team Composition:

- FTU Cagers take three in New York
- Knights Finish Strong 6-8
- By Joe DelSasso
- Before the 1972-74 FTU basketball season got underway early December, Coach Torey Clark predicted that the Knights would end up 10-14. Last Friday night, four months later, the Knights finished their season with a "very satisfying" 109-57 triumph over the Baruch Bees.
- Claud said, "Medgar-Evens was the best team we played, and they came out with an effective zone defense and it gave us trouble in the beginning." The Knights, who were trailing at the half, (67-57), and as much as 16 points, 43-27, adjusted in the second half and outscored their opponents, (48-33). John Smith led the FTU attack with 25 points. Hall, who was held to 17 points, came through for us."

"Escobar's such a tremendous ballplayer that his confidence role off on everyone," said Holmquist.

However, the highlight of the weekend was the hitting of catcher Mel Gattis who stroked nine hits in 11 trips and drove in nine runs.

"Gattis was hitting real well to rightfield in batting practice so I told him to stick with it,"
Mr. Akers, a five-time All-American, was recently inducted into the World of Handball Hall of Fame. He has been a prominent figure in the sport for over 30 years and is known for his exceptional skills and strategic gameplay. His dedication to the sport has earned him numerous accolades, including multiple national championships.

Akers believes in the importance of giving back to the sport and has been actively involved in coaching and mentoring aspiring players. He has also been instrumental in promoting handball in the United States, helping to establish new programs and increasing the visibility of the sport at the national level.

Akers' passion for handball has not diminished, and he continues to train and compete at a high level, aiming to inspire the next generation of handball players. His dedication to the sport and his contributions to the community have earned him the respect and admiration of his peers and fans alike.

This article highlights Mr. Akers' achievements and his ongoing commitment to the sport, underscoring his enduring impact on handball in the United States.
