The annual sacrament of sea and sun.
Which browns the face and heals the heart....

----Robert Penn Warren
Fundamental Animal Research Groups in the United States

[Text continues with various paragraphs discussing animal research, including mentions of the American Medical Association (AMA) and the National Institutes of Health (NIH).]

[The text then transitions to another topic, discussing the impact of animal research on society, ethical considerations, and public perception.]

[Further content discussing collaborative efforts, policy changes, and the future of animal research in the United States is presented.]

[The concluding section reflects on the significance of the research and its implications for the scientific community and the broader public.]
The FTU coed seems to be considering finishing her exams early with visions of the swimming pool, furniture, and possible renovations but she said it has consistently gone downhill, "I plan on staying here but if I pay any rent it will be at reduced rate," she said.

Students have been paying $70 a month each, regardless of how many are in the apartment. Most of the apartments have the maximum four occupants.

Another resident, Chris Byrne, said, "Creech gets to keep these apartments, I’m getting the back end. He seems to make a habit of ripping people off. I don’t know how he stays in business.

The IRS has refused to reveal anything about its responsibility, saying that the relevant information was confidential. However, an IRS spokesman said that future action has been filed with the Clerk of the Circuit Court of Orange County as of March 1974.

Pierce Says SG Concert "Poorly Planned"

By Glenn Padgett

The first round in a rather heated ‘debate’ between Village Center (VC) and Student Government (SG) over their programming efforts was yesterday Wednesday by VC Board of Directors President Jim Pierce when he charged that the recent SG sponsored ‘Cultural Entertainment’ on May 18 was ‘poorly planned.’

At about 5 p.m. May 22, many students were in the cafeteria, Pierce called WFTU (the campus radio station) which was being piped into the cafeteria, "to protest, not as VC board president but simply the student, that the money that SG spent for the concert.

After making the allegation of poor planning, he added that "all the money should be turned into a ‘bandwagon’ and say where their money should go."

If Pierce had concluded his remarks the disc-jockey solicited responses to comments on the criticism of SG.

Although some of the early calls were unfavorable to SG, one student responded that Pierce’s remarks were "self serving and in ‘poor taste’.

This student expressed the opinion that "The VC and SG are always competing for power and I do not see what gets out of the Activities and Service Fees.

He concluded by saying that "the idea that SG programming should be controlled under SG."

Other callers expressed the idea that "VC does provide reasonable leadership under, "The VC is jealous of the SG concert, when it shouldn’t be," he said.

One caller, later identified as SG senator Bill Kealoha, defended SG by saying that the concert was not 'poorly planned' and that what had forced them to move it to inside "Maybe it was a little shady," he added, "but that it was a different kind of show compared to the events like ‘Melane’ and ‘McLean.’"

He said the concert was scheduled for concerts and that a "mellow" looking atmosphere type of concerts such as SG’s. He contended that this was the only sure way to protect the student rights that the students want. He indicated that no other concert scheduled for this semester that the all comment had been favorable. Comment on page 7.

**Campus ‘Cache’ Fielded**

By Torrey Stewart

"Someones ‘private Little cache,' of marijuana and drug paraphernalia, found in a library garbage can Monday, has led a university police department investigation into what FrU Police Department Inspector James Jordan called an "annual case.

A custodial worker who found a tin box filled with a ‘nickel’ bag of ‘poor-grade’ marijuana, needles, a syringe, cigarette papers, a half-empty pack of cigarettes, and a ‘nice’ roll-up dip taken the day before was Richard Miller who then turned them over to the Police Department about 10:30 a.m. Monday (May 21).

Although he has ‘one or two leads,’ Jordan said the owner of the box and contents would be ‘very hard to try and track down,’ but he is certain that the investigation is continuing.

The plastic bag of marijuana, worth about $5, according to Jordan, and the other paraphernalia were taken. The plastic bag of marijuana, worth about $5, according to Jordan, and the other paraphernalia were taken. However, an investigation into what FrU’s police department said that it was a ‘party’ had been held sometime over the weekend, because the second-floor study area had not been cleaned since the previous weekend morning.

Jordan said someone was ‘letting their imagination run away’ with the idea of ‘a party’ and he does not know how many more than one individual was involved, or if someone had been planning to pick up the cache before it was discovered.

Although Jordan said it was a ‘fornication’ possible over possible investigation results, "this kind of stuff would be very hard to try and pin down. Too many people have handled this," for dust for final results.

"The very difficult thing about this case would be to try and prove possession," Jordan said.

One, which Jordan termed ‘unusual’ because of the location of the box on the second floor, was found, will be handled only by the FrU Police Department, he said.

Conviction for possession of less than five grams of marijuana is punishable by a maximum of 60 days in jail or a fine of $500 fine, according to an Orlando Police Department spokesman, who said that conviction for possession of more than five grams of marijuana, federal drug law, is punishable by up to 30 years confinement.

"I don’t know if he found it," Jordan said he had not measured it, Jordan said he believed the marijuana found bordered on five grams in weight.

"Any student formally charged by a properly prosecuting attorney for unlawful possession or sale of a narcotic or hallucinogenic drug shall, following a proper hearing and recommendation of a suspension, be suspended from all classes until the determination of guilt or innocence by a court of competent jurisdiction. If adjudicated guilty, the student shall be automatically expelled," according to the university handbook entitled, "Student Rights and Responsibilities.

Jordan said drug and paraphernalia may have been left by someone who planned to retrieve the box but forgot that no classes were being held Memorial Day. The investigator said he did not know how the items were left, and he added that he had confiscated a college, prompted the search.

About an additional misdemeanor charge should be filed based on the paraphernalia found in the box, Jordan explained.

Considering FrU’s size and the majority of commuting students, Jordan said, "I don’t think we have a big drug problem. We have 40,000 students and 7,000 faculty and staff.

"But," he continued, "I’m not naive enough to say the kids don’t use drugs. Marijuana is prevalent in Florida.

"The sale of drugs is a serious problem that’s being handled by the department since the university’s opening, Jordan said, and he indicated that the majority had not been found. Attempts to cite the drug problem on campus are very difficult, Jordan said, since approximately 90 percent of FrU’s student body commutes."

"Hopefully at least once a year," Jordan said he re-familiarizes Police Department officers with drugs and abuses. At the beginning of spring quarter he said he showed a training display board, complete with samples of drugs which had been confiscated on campus, to Director of Housing Leo Gott, assistant for Student Development Pam Browning and dormitory, residence advisors.

**Rentals Objections Aired**

By John Becker

Grievances by FrU students living in the University Hylands townhouses near campus continue unresolved despite growing tension between tenants and landlords.

The latest complaints erupted when a furniture leasing firm repossessed all the furnishings from all the buildings because the owner neglected to pay the rent on the furniture.

The occupants have complained ceaselessly that the owner failed on all accounts in his promises to provide a swimming pool, washer and dryer, and a general clean-up of the premises since the first building was completed in September 1973.

Student-tenants at the Hylands are eating off makeshift tables and sleeping on the floor or in sleeping bags. The exterior is littered with construction debris topped by a rusted-out earth mover with four flat tires. Sand has been placed in front of only one of the five buildings. The others are landscaped with weeds and dirt.

Blandness is on the side of one building in large block letters is the inscription: MONEY IS THE ROOT OF ALL EVIL.

A major problem of the occupants now is trying to find out who is responsible for the recent rent collection and upkeep of the buildings. According to the Building Construction Co., owned by Samuel L. Creech, was builder and owner of the buildings before getting into financial problems over water and sewage hookups and taxes.

In an interview, Creech said that the Internal Revenue Service (IRS) took over the Hylands six months ago and is now responsible for services to the apartments. "I don’t have anything to do with them (the apartments) now," Creech said.

Creech said he bought the Hylands from two local doctors who told him that there was water and sewage. "It’s the kind of service that they already provided," he said. "But I found out later that they were not, so I had to pay $17,000 in order to get the service for the tenants." In addition, a lift station was needed for the second floor sewage to flow which brought the total cost to $75,000, Creech added.

"I got a loan for $46,000 to build the apartments but with the added costs I was behind from the beginning," Creech explained.

It was reported that Creech had other large holdings within the apartment complex on Alafia Trail.

Creech said the reason why students are not getting their deposits returned when they move out is because the IRS put a lien on that money and refused to release it. He also said that he did not have to actually pay the electricity bills for the Hylands for the first four weeks until they moved in.

John Miller, who is employed by the building owners in the tenant complex, said he was made the manager necessarily but that he was not the manager and he collected rent for the apartments. He was under the impression that the IRS had returned control back to Creech.

Miller said, "Creech couldn’t go bankrupt and not pay anybody, but he hasn’t. He (Creech) has lost pretty near anything- to believe a custodial worker who found a tin box filled with the cache to believe a ‘party’ had been held sometime over the weekend, because the second-floor study area had not been cleaned since the previous weekend morning.

Creech denied SG’s "the VC is jealous of the SG concert, when it shouldn’t be," he said.

One caller, later identified as SG senator Bill Kealoha, defended SG by saying that the concert was not ‘poorly planned’ and that what had forced them to move it to inside "Maybe it was a little shady," he added, "but that it was a different kind of show compared to the events like ‘Melane’ and ‘McLean.’"

He said the concert was scheduled for concerts and that a "mellow" looking atmosphere type of concerts such as SG’s. He contended that this was the only sure way to protect the student rights that the students want. He indicated that no other concert scheduled for this semester that the all comment had been favorable. Comment on page 7.

Another resident, Chris Byrne, said, "Creech gets to keep these apartments, I’m getting the back end. He seems to make a habit of ripping people off. I don’t know how he stays in business.

The IRS has refused to reveal anything about its responsibility, saying that the relevant information was confidential. However, an IRS spokesman said that future action has been filed with the Clerk of the Circuit Court of Orange County as of March 1974.

Reuben, City Byrum, said, "If I want to use drugs, I have a habit on campus. I don’t think there are any hard drugs (here). This is just something else."

"But," he continued, "I’m not naive enough to say the kids don’t use drugs. Marijuana is prevalent in Florida.

The sale of drugs is a serious problem that’s being handled by the department since the university’s opening, Jordan said, and he indicated that the majority had not been found. Attempts to cite the drug problem on campus are very difficult, Jordan said, since approximately 90 percent of FrU’s student body commutes.

"Hopefully at least once a year," Jordan said he re-familiarizes Police Department officers with drugs and abuses. At the beginning of spring quarter he said he showed a training display board, complete with samples of drugs which had been confiscated on campus, to Director of Housing Leo Gott, assistant for Student Development Pam Browning and dormitory, residence advisors.
Disposal
In addition, through his persistent efforts he has obtained numerous donations of anthropological needs which are invaluable and irreplaceable. This has brought recognition to the University Anthropology Laboratory and has resulted in much more work and innumerable hours devoted by Mr. Smith. His contributions to the University's research accomplishments and Mr. Smith's enthusiasm for his students and their professional development, we therefore hereby recognize by awarding him the annual PROTEST SMITH

Mike Hall

An anecdote of bias based on actual, perceived information presented in a manner designed to persuade you to think as I do.

Those of you with keen enough vision to see past final exams know that summer is approaching. This probably means classes or work or both (academic masochism). However, you now realize that Richie Furay (not Furry, as he has with Poco and has now left the group)

I would like to clarify a few of Be's previous statements about Poco. To begin with, Neil Young was the first and only member of Poco. Richie Furay founded the group andGBH, and remained a member until shortly after the release of their sixth album, "Crazy Eyed, Seagull Man." In addition, "Drivin' Wheel" is both written and sung by Paul Cotton, not Tim Schmidt. Finally, Poco's performance

The future

The FuTUregainsanewgroup

To begin with, Neil Young was the first and only member of Poco. In addition, "Drivin' Wheel" is both written and sung by Paul Cotton, not Tim Schmidt. Finally, Poco's performance

Students Protest Smith

We, the undersigned are submitting this letter to express our feelings regarding the recent action of the administration concerning the non-renewal of the contract of Instructor of Anthropology, Richard L. Smith. Richard Smith has been a faculty member of the Department of Sociology since 1970. He obtained his Master's degree in Anthropology from North Carolina at Chapel Hill in 1971, and completed his Doctorate by September, 1974. Although he had no bolognese to him, he will have not have his Doctorate before June and will, therefore, not have his letter of interest of a large number of students. He has been a part of this field of study. As the only instructor, he graduated several students who are now graduate students of high standing in Florida universities.

Last summer (1973), through his efforts, the FuTUre gainsthe new group, the FuTUregainsanewgroup. In the past four years we feel that Richard Smith has gone out of his way to help the FuTUregainsanewgroup. He has always been doled out to people with no programming money and has been waiting for the legislature to pass a budget, three weeks ago an editorial was published in the Florida Legislature. Among the items scheduled to be dealt with was no joke. Students and Public Information Office for keeping our deadlines and those of you with keen enough vision to see past final exams have already been so high because of last year's budget. In light of these facts, we feel that Richard Smith has been strongly urged to continue his efforts to help the FuTUregainsanewgroup.

How does it feel to sleep on the floor of a university? Or to eat in a cafeteria? This is the condition 31 residents of the University Hylands Townhouses on Pasture Drive have had to live in since May 30, 1973. The townhouses, valued at $14,000, were supposed to be cleaned and restocked by the building and owner, Samuel Creech, of Creech Construction Co., so that the tenants could move in on June first. However, Creech has failed to completely clean and restock the buildings. Apparently the tenants upstairs in the shower or bathroom entered when we were not on the premises also.

Furniture in our front yard is a filthy mess, and the University Piano festival at the request of a Future staff member has been postponed due to a curtain. The townhouse was supposed to be completed by May 30th.

Criticizing Creech

Editor: I am writing this letter at the request of a Future staff member who suggested it as my only recourse after replying "I don't know" to the following questions:

1. Why did the Future print the statement that there were only three copies in the library, when in fact there are four as before?
2. Why didn't the Future print that many machines were there before printing misinformation?
3. Why did the Future choose to bring to attention the fact that Xerox machines run out of paper instead of mentioning improved quality and service at no extra price?

Since the Future failed to responsibly research and report the facts on copiers I would like to point out some relevant facts that would have been given to all Future reporters interested in avoiding sensational yellow journalism.

Creech, of Creech Construction Co., has failed to completely clean and restock the buildings. Apparently the tenants upstairs in the shower or bathroom entered when we were not on the premises also.

Editor: This issue is sponsored by the American Matthay Association and has been made possible through some money given in memory of Clara Wells.

Advertisement:

**Copy Machine Situation Answered**

**Editor:**

1. Those copiers were secured at extra cost to the University to improve the quality of service to the students. This extra cost was not passed on to students.

2. As I mentioned before there are not three but four as before.

3. Four university employees have attempted to remove the Future's Xerox Operator classes so as to provide more efficient service and maintenance for these machines.

4. Xerox copiers do indeed run out of paper and upon occasion break down. Cars also run out of gas and have breakdowns. Perhaps next week the Future should run a picture of a car out of gas and denounce auto manufacturers. Or just maybe the Future would see the irrelevant absurdity of such an action, most especially to an organization that purports to be a newspaper.

**Piano Festival Draws National Attention**

By Glenn Padgett

Musicians and students from around the country will attend the ninth Piano Festival and Workshop, a major national piano festival, June 15-19 on the FTU campus, in the first appearance of the festival as a campus event.

Former Festival sites have includedTampa, Florida, and University of Connecticut. For more information or copies of the program call 801-9317.

**STUDY ROOM**

RHA has opened the Village Center Multi-Purpose Room for final exam week studying, from 10 a.m. to 10 p.m. continuously through Wednesday for all students.

**NEW VC PRICES**

In answer to a letter to the editor in the May 13 issue of the FTU, the Village Center Board has passed a motion concerning FTU faculty/staff admission prices. In the fall quarter of 1974, FTU faculty and staff will be able to purchase a yearly ticket to VC events. This ticket will enable the faculty and staff to attend any event at student prices. However, if the ticket is lost or not purchased, faculty and staff must pay the general admission price.

For the yearly ticket has not yet been established, when the set up of VC board members will be appointed to decide the price of the ticket. After the committee decides on a price, the entire VC board will vote on the recommended price.
The Future Is Building For Fall

APPLICATIONS ARE BEING TAKEN FOR:

EDITOR
Backgrounded in reporting, copyediting, layout; ability to train, encourage, develop staff; to direct, coordinate newsgathering efforts; overall supervision, responsibility during week.

LAYOUT EDITOR
Artistic sense desirable to design, lay out news pages, photo features; new judgment needed to evaluate positioning, emphasis of stories, photos; need Wednesday afternoons clear.

REPORTERS
Strong in grammar, spelling, punctuation; experience in writing, newsgathering desirable but will train; assignments fitted to your weekly class schedule.

NEWS EDITOR
Develop, assign, follow-up, evaluate news stories, features, photos; thrust of job comes on Mondays, Tuesdays, Wednesdays.

COPY EDITOR(S)
Strongly backgrounded in news style, spelling, punctuation, grammar, headline writing; job thrust on Mondays, Tuesdays, Wednesdays.

PHOTOGRAPHERS
Experienced with own news camera, developing, and printing own work; assignments fitted to your class schedule.

ALL THESE ARE PAYING JOBS, RANGING
FROM '50 TO '400 PER QUARTER!

EARN while you LEARN! Submit your NAME, SUMMER MAILING ADDRESS and PHONE NUMBER, FUTURE JOB DESIRED (or would like to try out for), and CLASSROOM and/or EXTRACURRICULAR journalism data just as soon as possible to: G.W. Averill, Director of Publications, Room 215 Library Building (Ext. 2865).

All applicants will be contacted during the summer by mail, phone or in person regarding his or her place on the Future this fall.
Greek Woman Picked

Tyson Sorority member Linda L. Spencer was recently chosen as the first woman representing the Greek Sororities as the Outstanding Greek Student. Spencer, a graduating senior with an overall GPA of 3.4, was chosen by an Awards Selection Committee composed of faculty members.

Spencer's achievements are many, including being part social chairman, vice-president and president of her sorority, co-chair of the Fund Raising Committee and many individual projects such as work with the Lutheran Haven Children's Home and leader of the project to supply cheerleaders to the Orlando Youth Center.

The Ty's were doubly honored, also being chosen by the Committee in the sorority accomplishing the most in the area of service to the university and the community during the past year.

Their service projects included such efforts as running coke booths at graduation, chairpersoning a Junior and Senior high students at the Orlando Youth Center, selling "Spook Insurance" for the March of Dimes, and providing Christmas dinner for the needy.

Cherry Dancek, Strange Odor, Gigger Stubs and Betty Burp, are among Williams' records, along with Starlight Cauliflower Shaw, Penny Flowers Greenwood or Mac Armi.

Williams says he has recorded names for twins like Pete and Repeat, Early and Curty, A.C. and D.C., and Julius and Lerovey.

The longest names he has every encountered are Gospel Lilly Floweywvivie Virgin Mary Lord Caroline and Kayla Papalsonpalashudalluulistlehato

Williams says the most unusual name he has come across is that of 5/8 Jameson, written as a fraction rather than spelled out.

He says he was so intrigued that he called the parents to find out about the baby he had been named after.

"The father said his child was named after somebody in politics," Williams said. "Apparently, 5/8 has been very successful. His name stands out on voting ballots."

Williams has also had some chills about the strange causes of death listed on some death certificates.

SG, VC Debate Programs

(Continued from Page 3)

At the conclusion of it discussion with the announcer, Kekalos said: "We had no plans for success or failure, we had money and we were just prepared to spend it on the show."

He added that SG thought the concert was a success, while the problems, and that the Renaissance was as appropriate as the VP sponsored it.

When questioned about the 'debate' between President Hunter Petti and former president Lee Constantia, said that they were no 'debate' since Kekalos did not officially represent the SG.

Constantia added that the whole affair was "childish" and that SG would not get involved in it.

Constantia did say that at the beginning of the Spring Quarter SG offered matching funds to the VC for concerts if prices for students could be cut in half.

He said that the VC turned it down because the board felt they would lose revenue by the long run, because of more students attending at reduced rates, in spite of the proposed SG subsidies.

Constantia concluded by saying that "We don't want to have to program, we would rather do it. Only reason we do it because the Senate feels VC programming is inadequate."

New Technique Found By Senior

By Glenn Padgett

An FTC senior has developed a new technique for reading x-rays which makes possible the discovery of minute objects in the x-ray which are not visible to the naked eye.

Bob Butterfield's research, according to Dr. William Walls, Chair, Radiology at Jess Hunter Center, has much promise for aiding in the early detection of cancer, gall stones, ulcers and other ailments because it detects objects hidden in the grey zones of a normal x-ray.

Walls said that the technique can also show slight bone fractures that do not show up on normal x-rays.

Butterfield is a co-op student employed during his work quarters at the university by the Earth Resources Office at Kennedy Space Center.

The technique adapts methods originally developed to analyze imagery from the Earth Resources Satellite and Skylab. Butterfield, who has been employed by NASA for three years, did most of the work during his work assignment winter quarter.

Walls evaluated the results and served in an advisory capacity, according to Butterfield.

Walls explained that he was not satisfied with the optical resolution of normal x-rays because "people's breathing depends on them."

"He added, "There is much in an x-ray which is beyond the range of the human eye. It is there all the time, and we cannot see it."

So, he continued, "I applied

There was the case of the man who "died suddenly, nothing action." Another case was listed as "unknown, died without the aid of a physician."

Still another case was "went to bed feeling okay and woke up dead."

LIBRARY SCHEDULE

Thursday, June 6, hours are 7:45 a.m.-5 p.m. Friday, June 7, and Monday through Friday, June 11-14, the library will observe 8 a.m.-5 p.m. hours. June 8, 9, 15, and 16, weekend days, the library will be closed.

Summer hours, which will go into effect Monday, June 17, are Monday through Thursday, 7:45 a.m.-10:00 p.m.; Friday, 7:45 a.m.-6:00 p.m.; Saturday, noon-5:00 p.m.; and Sunday, 2:00 p.m.-10:00 p.m.
Conspiring against unsuspecting reporters and photographers, the news and photo editors coordinate assignments for the coverage of the week's news.

HFA Ranks Last In Job Survey

By Mike Hall

If you graduate from college this year, your chances of finding a job are good... maybe.

One problem could be the oil crisis. But nobody seems to know for sure yet. As one recent report on graduate employment says, "It is important to note that predictions for layoffs in 1974 were made before the impact of the energy crisis had been felt."

According to this same survey, 61 per cent of the companies surveyed planned to employ more male graduates in 1974, and 70 per cent planned to hire more female graduates.

"The major demand was for the technical disciplines," says James W. Gracey, director of FTU's Placement Center. "The accounting marketing and business type disciple followed somewhat behind the technical area. The least job offerings are going to the liberal arts degree."

A national report by The College Placement Council shows similar trends. It concentrates on salaries and reports that in 1972 through 1973, civil engineering majors with bachelor's degrees were offered $874 a month and humanities and social science majors got $894 a month.

The report indicates that accounting majors were offered more jobs than civil engineers. Accountants received 1,364 offers for 1972-73, civil engineers received 369 and humanities and social science graduates received 138.

Although the two previous reports are national, their findings closely correlate with trends at FTU.

The FTU Placement Center conducts an employment survey of graduates each year. The survey for the 1972-73 school years shows education majors obtained the most jobs: 244. Although this deviates from national trend, there are two possible explanations. First, more education majors graduated from FTU during this period than any other major. Second, according to Mr. Gracey, "It is because we are creating new schools every year. So it could be that this is creating good opportunity in the area of education."

Ranked just behind business (which was second, social sciences had 56 employed graduates. There are three reasons for this. First, social sciences were second to education in the number of graduates during this period. Second, the greatest percentage of students to reply to the survey were social science majors. And third, more social science majors were employed out of their field than any other majors.

The remainder of the data corresponds more closely with nationwide averages. Business administration had 70 employed. Engineering was fourth with 32. Natural sciences was fifth with 29. Humanities and fine arts reported 12 employed. And general studies had 2. The last two colleges graduated the fewest number of students.

The highest average salaries reported are typical of national averages. Engineering was on top at $11,948 a year. Next came business with $9,971.

The lowest average salaries were reported by education $7,336, and humanities and fine arts, $7,833.

Having found their assignments in the mailboxes at left, reporters, below, make a half-hearted dash for the one available telephone to contact their sources. Losers prepare questions while waiting.
e's A Will......

The FuTUre hits the presses (upper left) more than one week after assignments were first given to staff members. At right, the fearless editor answers a near endless stream of calls and complaints from FuTUre readers on Friday mornings.

Summer Busy For RTV

The radio and television (RTV) department at FTU will be very busy during the summer planning two finals for the university.

A committee made up of Drs. Thomas O. Morgan, Robert L. Arnold and Milan D. Meeske will be working to secure an FM radio station for FTU. Moreover, they are seeking bids for color equipment for the television section. The bids are scheduled to be opened around June 6.

"We expect the FM station will cover all of central Florida," Dr. Morgan said. "It will be the voice of the university," he added.

Dr. Morgan, in anticipating the new station, cautioned that it takes 12 to 18 months to build a station after the construction permit is granted.

Tentative programming will span the entire range depending on the time of day. There will be contemporary music, classical music later in the evening and educational and instructional programs. Dr. Morgan, in commenting on the importance of the new radio station, said, "Radio offers a great potential for instructional programs. Our job is to offer an alternate service. We have to be more than just music, news and sports."

Starting this summer, the RTV department will produce television classes for the first time. They will be called open-circuit classes. This new production program was one of the most popular for special funding to the department.

"We'll be putting together the scripts, scenery, backdrops, and props for a series of classes," said Dr. Morgan. "We will be taping them right here," he said.

Forty to fifty half-hour shows will be taped to be aired by the winter quarter. They will include classes that can be taken at home by using local television stations (Channel 24) to present them to the public.

Junior and senior level RTV courses will use the color equipment.

Staff artist prepares this week's front page illustration (below) which is later coordinated with news and photos during the layout session (upper left) and is then "paste up" at the printers (upper right).

Not only does working on the FuTUre increase vocabulary and writing skills, but the pressure of an approaching deadline often causes (left) a marked increase in smoking. When "smoker" is indicated, you are asked how many packs of "cancer sticks" you smoke every day, the number of years you have smoked, and of those years, how many were spent smoking the short ones, and how many were spent smoking the "big monster" 50 cent roll.

After digesting this information, the computer tells you the number of packs of "weed" you have smoked, the number of packs of the little ones and how many packs of the "big monsters." Finally, if you indicate that you smoke grass, the computer returns, "You do? Well, I do too, and I really mess up my engineer!"

A large peace sign is printed, and the computer continues, "Now that I have caught you smoking the devil weed, I will tell you that I am a racist? You are under arrest, you have the right to remain silent, you have...the book with this. You have been tried and found guilty, if you try to escape, the gun in this pen will blast you!"

According to Dr. Walter Ritten, assistant professor of computer sciences, all the computers at FTU are on the TSO (time sharing option) system-they are connected to a main computer elsewhere in the university.

In order to activate and conserve with a computer, you must know its "language," and an access number.

Bill Morris, director of computer services, said his policy is to discourage the use of computers for games, unless students are assigned this in a computer class, because the games cost the university money.

Smokers are to indicate (1) tobacco, (2) grass, or (3) neither. When "smoker" is indicated, you are asked how many packs of "cancer sticks" you smoke every day, the number of years you have smoked, and of those years, how many were spent smoking the short ones, and how many were spent smoking the "big monster" 50 cent roll.

After digesting this information, the computer tells you the number of packs of "weed" you have smoked, the number of packs of the little ones and how many packs of the "big monsters." Finally, if you indicate that you smoke grass, the computer returns, "You do? Well, I do too, and I really mess up my engineer!"

A large peace sign is printed, and the computer continues, "Now that I have caught you smoking the devil weed, I will tell you that I am a racist? You are under arrest, you have the right to remain silent, you have...the book with this. You have been tried and found guilty, if you try to escape, the gun in this pen will blast you!"

Events Assigned To Play Games

Summer Busy For RTV

The radio and television (RTV) department at FTU will be very busy during the summer planning two finals for the university.

A committee made up of Drs. Thomas O. Morgan, Robert L. Arnold and Milan D. Meeske will be working to secure an FM radio station for FTU. Moreover, they are seeking bids for color equipment for the television section. The bids are scheduled to be opened around June 6.

"We expect the FM station will cover all of central Florida," Dr. Morgan said. "It will be the voice of the university," he added.

Dr. Morgan, in anticipating the new station, cautioned that it takes 12 to 18 months to build a station after the construction permit is granted.

Tentative programming will span the entire range depending on the time of day. There will be contemporary music, classical music later in the evening and educational and instructional programs. Dr. Morgan, in commenting on the importance of the new radio station, said, "Radio offers a great potential for instructional programs. Our job is to offer an alternate service. We have to be more than just music, news and sports."

Starting this summer, the RTV department will produce television classes for the first time. They will be called open-circuit classes. This new production program was one of the most popular for special funding to the department.

"We'll be putting together the scripts, scenery, backdrops, and props for a series of classes," said Dr. Morgan. "We will be taping them right here," he said.

Forty to fifty half-hour shows will be taped to be aired by the winter quarter. They will include classes that can be taken at home by using local television stations (Channel 24) to present them to the public.

Junior and senior level RTV courses will use the color equipment.

Dear Student:

This is, I hope, the beginning of a tradition. It is Student Government's year end report of 1973-74. It is my report, as President of the Student Body, of our activities as your representatives over the past year. Please remember that nothing is done by one individual but accomplishment is the result of group cooperation. Nothing would have been done without a number of people working in many directions towards one goal. That goal was to serve students.

Our record speaks for itself.

I. Communications - At the beginning of the 1973-1974 administration, to communicate with students was our one priority. We have achieved this goal only partially. The problems in informing students, as you may guess, are too numerous to mention. However, we can never stop trying. Some of the things we have tried this year include:

A. Wednesday Bitch and Suggestions Table near the snack bar.
B. News releases given to the campus media and the local press concerning newsworthy stories coming from SG.
C. The placement of Government Bulletin Boards or strategic locations around campus containing all important SG documents.
D. The open files policy on all SG letters and documents, including budget reports.
E. Services personalized to students - SG this year has maintained a tremendous amount of services which students could avail themselves of. Among them were:

F. Referral Service for students who either need a sitter or would like to work as sitters. Over 500 people have used the service since its inception.
G. Movie Subsidy Tickets - which sell movie tickets to both Florida State Theatres and Montecito Theatres as well as the University Drive-In for a reduced price, usually a saving of one dollar per ticket. Over the past two years, SG had approximately 30,000 tickets and has saved the Student Body about $35,00 each from this one program.
H. Used Student Book Exchange - Student Book Store which sells used books at a price set by the owner.
I. Since the University Bookstore buys used books back for 50% and sells them for 75% of their original cost, the student buyer and seller can both make money by selling the book at around 60% of original cost. The Student Book Exchange has averaged over 4000 books per quarter this year. When figuring this over the entire year, the Book Exchange has saved the student body about $32,000.
J. Subsidies to L&S Productions, Street Programs and Crusty's Pizza - In addition to the Movie Tickets, SG has an ever increasing program to include other subsidies such as theatre productions, basketball games, concerts, and amusement park subsidies.
K. Computerized Car Pools - Each quarter, Student Government sends a computerized letter to each student informing them of students in their vicinity which they could set up car pools with. This service has increased car pool usage by students from 5% to a high of 25% during the year.
L. Travel Board and Teacher Evaluation Listings - Besides car pools, Student Government also maintains at the SG offices a Student Travel Board for those students interested in traveling the nation as well as a listing of all Faculty Evaluations which were made public by the professors.
M. Legal Referral - Student Government has established a legal referral service which is operated through the office of the SG Attorney General.
N. Buses to FTU Basketball Games - Over the past year, Student Government has provided free bus transportation to 3 of FTU's away basketball games.
O. SG Concerts - Although Student Government is not in the business of programming and entertainment, we have provided 4 free concerts for students over the past year as well as sponsoring the Florida Symphony Orchestra to come on campus and perform regularly.
In addition, SG has also attempted to establish a student credit and loan fund, but was stilled in starting this project.

III. Pamphlets Published - This year, Student Government has found it necessary to expand its services and has provided free information to students. Information on various topics, such as Birth Control, Abortion and Venereal Disease were covered in our "Be Kind to Your Friends" publication which is available to all students free of charge. Also, we were instrumental in the publication of a Handicapped Student Pamphlet. Student Government is also now preparing an off-campus Housing Manual which should be available by Fall Quarter.

IV. Programs for Dorm Students - SG has expanded its interest in the dorm students this year by working for the establishment of certain policies which the Resident Students desire. Student Government determined these needs through extensive surveys conducted through the Resident Halls in the Fall Quarter. Among the changes this year have been:

A. An extension of the BOR policy concerning visitation hours.
B. The elimination of curfew for freshman females.
C. Additional appliances allowed in the dorms.
D. The purchase of an additional ice machine in A - B Dorms.
E. The sponsoring of an RHA Dance for all interested students.
F. Through the continued cooperation of the RHA and SG, more policies can be changed for the betterment of dorm students.

Although Student Government has fought for the adoption of policy to allow alcoholic beverages in the dorms, the administration has vetoed the proposal. In addition, SG has attempted to establish on-campus Greek housing which was approved this year.

V. Academics - To provide a better educational program for the students of FTU, Student Government has worked for the betterment of the Academic Affairs area of the University. Among them were:

A. A new and more equitable Honors service which has increased car pool usage by students from 5% to a high of 25% during the year.
VI. Services to Clubs and Organizations - Student Government, through its Clubs and Organizations and Unallocated Reserves accounts in its budget has funded over 20 clubs and organizations this year. Included with this, SG has provided and distributed a Club Organizational pamphlet. This pamphlet contains all Student Government procedures which the club needs to know about becoming recognized and obtaining funds. Also, SG worked on the establishment of a non profit mailing service for clubs, but was unsuccessful in this venture.

VII. Equipment Available for Student Use - Over the past 3 years, Student Government has purchased various types of equipment for student use. Among them are:

A. Camping and outing equipment.
B. Bicycles.
C. Canoes.

All of the above are available in the VC Games room for a small rental charge.

In addition, we provide:
D. Bathhouse and Barbeque Grills at Lake Clair.
E. Lounge Furniture at the Swimming Pool.
F. Typewriters for student study use in the Library.

Also, Student Government just purchased a Universal Weight Lifting Machine which should be available in the PE Dome for all student's use in the beginning of the summer quarter.

VIII. Community Relations - This year Student Government has involved itself in a number of Community programs as well as volunteering many man hours to community interests. Some of our community programs included:

A. A speaker's bureau to area community clubs. Over the year, SG representatives spoke to over 20 area clubs about PTU and its students special needs.
B. Donation of left over Used Book Exchange books to the Orange County Halfway Houses.
C. Participating in a Black Student Union food drive for the needy.
D. An outreach program into the Black Community to make them aware of benefits available through PTU.

Also, Student Government was the head­stone of the drive to begin a Mass Transit System to PTU.

IX. State Relations - Student Government has made great strides into state politics this past year. Among the issues worked for were:

A. An extension of Visititation hours.
B. An increase in veterans benefits.
C. The allowing of wine on State University campuses.
D. The opening of Public Documents such as faculty evaluation.
E. The re-writing of the Student section of the BOR Operations Manual to reflect the change of attitudes toward student rights.
F. The establishment of students on the Board of Regents.

G. The defeat of the proposed BOR fee structure.

In addition, SG members had regular communications with the State Legislature on bills concerning students. Also for the first time, the Chairman of the Student Council for Student Body President was the PTU Student Body President.

X. Campus Issues - Student Government was also very active in relation to pertinent campus issues this past year. We were successful in obtaining the right of drinking beer on campus as well as renovating the snack bar to be a comfortable place to enjoy a drink. We helped the Office of Student Affairs obtain the grant to establish an on campus Child Day Care Center. Also, we made it possible to acquire money for the building of the facility. Student Government re-wrote its Elections Statute and Judicial System to be more comprehensive while allowing more individual students vote in these procedures.

SG was a strong force in keeping the University's name of PTU, as well as establishing a Board of Publication, a Financial Aid Committee, and an increased student voice of the Activity and Service Fee Committee.

As you can see, Student Government has not been a stagnant organization over the past year as many claim. Student Government's purpose is to represent students and provide services to them which other areas of the University can not. SG has done this over the past year. Although our budget was cut by $50,000 from the previous year, it still maintained and increased its operations. Just two programs, the Movie Subsidies and the Book Exchange saved the Student Body approximately $50,000. This was done with a budget of $69,000 and almost exclusive volunteer help. The people who are responsible for our success this year deserve recognition. Some of them are:

Hunter Potts, Vice President
Gabriel Yanni, Executive Assistant
Thom Costa, Executive Assistant
Dan Scott, Attorney General
Susan Carrick, Community Affairs
Ruth Bousock, Campus Affairs
Ginny Ward, Legislative Assistant
Dave Lefkowitz, Comptroller
Ellie Beasley, Executive Secretary
Anne Shoemaker, Assistant Secretary

There are many, many other cabinet members, Senators and Judicial officers who should be recognized but are not, due to lack of space. However, I extend my thanks to all.

Remember all this the next time someone says Student Government does nothing. There are a lot of dedicated students who spend an enormous amount of time for this. They do care and will help you if given the chance. Participate in Student Government's activities, it will be rewarding. Thank you for allowing me the honor of serving you this past year and good luck in the future.

Sincerely,
D. Lee Constantine
HFA, Biology Buildings Near Completion

The College of Humanities and Fine Arts will probably be able to move into a new "home" by September, according to Fred Clayton, director of the physical plant. The building is taking so long to complete because "they're using the system's method," said Clayton. "There are nine separate contractors on the job. There are no 2 floors alike-everything is specialized. Had it been a conventional field house, it would have been a conventional contract, we'd be in the building already."

Another project that is in the planning stage is the three-story Education Complex. The building will have offices, classrooms and a teaching gymnasium.

"The gymnasium will not be a conventional field house. It will be used also as a teaching facility," says Clayton. Clayton seemed very excited about the new project.

"The complex will give the College of Education a home. Everything in the building is very well planned. The program gives them the facilities and tools to work with," says Clayton.

According to Clayton, construction on the education complex will begin around the first of the year. The preliminary drawings are still in Tallahassee for study.

The Biology building is also under construction, and should be completed around November. "We should get into the Biology building after Christmas," says Clayton. "The construction is not far behind the Humanities Building. The building is making good progress-it's coming along fine."

This building will also have many facilities valuable to students. The building will have many laboratories and research work areas.

In answering a question concerning lockers, Clayton said: "If we want to have lockers for the entire university use, we'd have to have a whole building. The lockers in the Educational Complex will just be for people using the physical education facilities and for visiting teams."

"Those kinds of things come eventually. We're still in infant. The time will come (for such facilities)- but it's some distance, off," Clayton added.

Bills Passing House And Senate Now Await Governor's Signature

At press time, these bills had passed both the Florida House and Senate and are awaiting the governor's signature:

- A bill which would make a tenant liable for the financial losses of a landlord if the tenant broke the lease and another bill to give landlord tenant cases priority on court calendars.
- Authorization for a school of optometry to be located at one of the existing medical school at state universities and $750,000 for the planning of the school.
- A bill to provide for the "involuntary commitment" of "drug addicts or habitual drug users" to drug treatment centers in the same fashion as the insane are committed to mental institutions. The intent of the law would be to provide an alternative to prison sentencing and would apply only to the use of "hard drugs"-including speed and "downs"-and not "soft" drugs such as amphetamines, mescaline, LSD, and cocaine.
- A bill permitting state employees, including professors and other university staff, to bargain collectively. The Board of Regents is considered the employer for purposes of university bargaining.
- Authorization for the board of Regents to pay funds out of the employees' annuity contracts.
- Authorization for insurers to invest in another project that is in the planning stage is the three-story Education Complex. The building will have offices, classrooms and a teaching gymnasium.
- Authorization to provide for the board of Regents to pay funds out of the employees' annuity contracts.

How much constructurion was given to the energy crisis arising from the standpoint of evening classes at FTU during the summer? Was an attempt made to schedule all classes in the building where possible? If so, air conditioning could be turned on at 8 p.m., instead of 10 p.m. in unoccupied buildings.

The actual scheduling of classes and classrooms is handled individually by each school. For example, there are no special policies regarding assignments of classes and classrooms to the deans of five colleges and their assistants. In addition, these allocations are made on a first-come, first-served basis.

We talked to the associate dean of five colleges and the general consensus seems to be that there was no special policy toward energy conservation in connection with the scheduling of classes and the availability of Thursday classes in some instances.

Scheduling for the College of Education, however, has tried to end classes by 8 p.m. and evening classes for the College of Natural Sciences will meet in the Engineering Building.

What is the procedure for having an announcement placed on the large bulletin boards at the campus entrance?

Persons or organizations wishing to place announcements on the entryways signs should contact the student organization office at 275-2706 or bring a copy of the message to the office located within the student affairs complex in the administration building. The only priority system is on a first-come, first-served basis.

At the college, the associate dean will post announcements on the large bulletin boards and those wishing to place announcements should contact the office located within the student affairs complex in the administration building. The only priority system is on a first-come, first-served basis.
By Jon Teator

While many FTU students will be lying in the sun enjoying the summer break, four members of the FTU tennis team will be competing in the NCAA College Division Tournament which takes place in Irvine, Calif. on June 11th-16th.

It will be the first time Joe Lucci, Mike DeZeeuw, Nate Smith and Trevor Graham will be in California. It will also be the first time Dick Wood will be coaching an FTU contingent.

"The drawing is the secret to the tournament," said a concerned Wood. "A bad draw could just wipe out our chances. If we get a fair drawing, our chances are good for a fine finish." The three hurlers mentioned above and second-baseman Holmquist, a team consisting mostly of seniors--the Independent champs for the past two years--are among those who figure to make next year's flock of talented standouts. The Cavaliers are a team with an 11-9 win over Kappa Epsilon last year.

The Cavaliers are a team with an 11-9 win over Kappa Epsilon last year. Holmquist Signs Six Hurlers

The 1974 FTU baseball season has only been history for three weeks but already Coach Doug Holmquist has signed a first-class group of added standouts which figure to make next year's squad much-improved one at two areas.

"For the first time, we should have pitching depth," the Holmquist. "Also we have a couple new guys who will improve the batting speed." The six who intend to come to FTU in the fall are pitcher Harry Johnson from Brevard Community College, first baseman and outfielder Sonny Wise from Valencia CC, brother Sam Swanger of Seminole JC, catcher Jay Ilder from Seminole as a relief pitcher Dave Johnson from Valencia and prep star Jim Delvecchi of Holmquist's hometown of Fairfield, Conn.

Johnson, a 6-2, 180-pound righthander was 8-4 for the Huns. "He throws hard and has a tremendous amount of speed," the Holmquist. "Also, something most people don't realize is that he's a great hitter." Swanger, 6-2; and 185, had a "bad day," according to Holmquist. "He was 8-4 as a freshman, though. He has a good breaking pitch and good control. He was just super as a freshman and I know what he's capable of."

The best all-around player in the state is the way Holmquist puts it when he says to "The 354 at Valencia this year and is still hoping to make a comeback on the mound. He was a "super prospect," as a hitter in the 1973 Holmquist before hurling his arm last spring. Wise is also a lefty swinger which pitchers detest. Holmquist said "I don't think that Holmquist could have had one of this season. Ron Behre--and Joe is hurting."

Ilder is "one of the most knowledgeable players in the state," says Holmquist and figures to split the catching duties with veteran Mel Gutts this year. Ilder could also figure as a designated hitter candidate and any hitting mark would indicate.

Dave Johnson is a "real stopper--just a super reliever," according to Holmquist. Johnson, a 6-1, 170-pounder, throws hard, has a good curve slider and changeup.

Delvecchi will be "a great one if he comes," said the coach. "Pitcher and team captain Larry Shearer, one of the four veterans, who is not graduating. "We look over the place. We're in the position hopefully that all four will be hot at once."

Holmquist has a good opportunity to receive recognition for the individual, and the school," said the 21-year-old Lucci, who completed his second full season at FTU with identical 11-5 singles and doubles records.

"There's an urgency to be in the best physical shape "right now," said Lucci who is "excited and optimistic" to be returning to the tournament. "I feel physically good and just going to try to play good tennis the whole time."

"I'm feeling good enough to stand anything," said Lucci, who is better with his game. "I'm feeling good, nice and loose. I'm more relaxed in tournaments this year," DeZeeuw, who finished second-baseman and outfielder to FTU's third baseman, completed an 11-5 singles and 11-4 doubles records. DeZeeuw will be "counseled on a good serve and volley game" to help him through the competition.

The 21-year-old South African, who completed his third season at FTU feels "our team has as good enough chance as anyone else."

For Smith, "it's the biggest tournament of his life," but he could step into "Dr. Zhivago" with no problem.

The "Brooks Robinson Hitter" Award goes to the FRA third baseman who forgot to turn on his light. The "Oscar Meyer" Award goes to the Oldest. The former FTU baseball player usually had the mustard to back up his theory. The "Talent Streaker" Award. The "Ike's Price "Ike's Streak" Award goes to basketball's John Smith. Smith had his leading rebounder, would certainly make it big in the movie business. The "Best Looking" Award goes to the new much-publicized Miss Alison Pach, Miss Pach, the co-captain of National Championship cross country team is to get most of her competition from Mike "The Oiler" Teator, who is the best football player and one of the best tennis players in Intramural history. The winner of the Pete Rose "Hustle" Award goes to none other than Fred Maitl. Probably the best athlete in the school (Maitl won the Superstar Competition), the only time Fred ever slowed down was when he was empty. Seriously, Maitl has earned the highest respect from the other freshmen in intramurals for his excellence of play and desire in achieving that excellence.

The award for the most celebrated high school athlete now participating for FTU in sports is baseball's Jon Teator. Teator is a native of Ind.1:pendent. He is All-American football team halfback while playing high school ball in Vermont as well as being named All-State in hockey and All-South in basketball his fourth year in high school. Teator has also been named the "hustler" (positive connotation) on Doug Holmquist's baseball team.

LXA's Lewis Jones rates high in the "Outstanding Athlete" award and ranks as one of the top "Hustlers" (any connotation you want) in the school.

The winner of the "Most Independent Athlete" award goes to the Fraternity in D-Dorm Room 288. One of their alumni, 6-10 Tod Danen, rates in the "Biggest Man on the Team" and his reason Wood is pleased with identical 11-5 singles and 11-4 doubles records.

"It's a good opportunity to receive recognition for the individual, and the school," said the 21-year-old Lucci, who completed his second full season at FTU with identical 11-5 singles and doubles records.

"There's an urgency to be in the best physical shape "right now," said Lucci who is "excited and optimistic" to be the tournament. "I feel physically good and just going to try to play good tennis the whole time."

"I'm feeling good enough to stand anything," said Lucci, who is better with his game. "I'm feeling good, nice and loose. Cavaliers Win Softball (Continued From Page 14)

depend on our hitting as well as our outfield—we have three extra outfielders and three corners.

As for defending LXA, Shaeer says the key is stopping with the stopping of the line of John Bitman, Lewis Jones, and Hubert Howie. Shaeer said, "We knew they had three or four good hitters," continued Shaeer. "As for stopping Hudick, though, we knew there was no way, he just too good a batter." Indeed, Hudick enjoyed his 10 home runs, five times-two-four including a two-run homer but there were no other extra-base hits for LXA in this contest.

As for the Cavaliers, there was a marked turning point as six hits

ATO Whips Foes
In IM Track Meet

Alpha Tau Omega took first in nine of the ten events to run away from the field among Outstanding Western College, as the IM track meet at Middletown High completed the men's intramural schedule.

At the same time, Tyce exalted Tau Kappa Epsilon Little Sisters in the final event—the standing broad jump. To win the women's title and once again assure themselves of the gold, and the brothers. Also, TKE bid edged out the Cavaliers for the independent crown.

Competing for ATO, Paul Hook and Mason Gordon both took first place. Hook won the 440-yard run (49.7) and Gordon took the 100-yard dash (10.5). It seems Gordon looks that fast (90% 10.0) in and diuresis (105 ft.) and he was good. But he was good.

Often a writer when being a first baseman I never forget Arnett Hall's comment on the sideline. I remember Rudi Jessee, Rick Danen and how good he was. But he was good.

Remember Embry-Riddle. I remember when the weightlifting team used to get

ARNEKT HALL
fantastic features to the future by threatening mid-manned Duncan Marks, then sports editor.

I remember the old FTU-Catholic; "I remember when their flying hit the third base coach, when Ve Spoto was the first baseman. I remember when Ve Spoto struck out six times in one game.

I remember a certain man with a crew cut who will never forget. I remember "Pookie" Tim Fitzgerald's last home run batted over 400 feet in two years. That was a shutout. I never forget Arnett Hall's comment on the sideline. I remember Embry-Riddle. I remember when the weightlifting team used to get

Mike DeZevou (left) and Randy Jessee (second from left) battle for third in the 880-yard dash at Middletown Junior High while right) behind Peter Heckman, Don Miller and Phil Merrick attempt to place. DeZevou got third here but Howe Vanderwade edged DeZevou for first in the race. (Photo by Rick Wells)

"I remember...I remember...I remember..."

By Larry McGirk

It always happens. This time it comes a time when a writer must say farewell. Hopefully you'll truly will grow up and understand and since this is the last issue under the name of your old high school and how she forgot.

I remember a cousin who was the very first one to run around the field. He belongs in his own class.

I remember Dr. Cofield's physiology classes and the sleepless nights I studied it. I hope he remembers.

I remember a bowser's eye and how she forgot.

And most of all I remember FTU, young and growing. And I am sure that most students graduating and leaving will look back on FTU much the same as I did, and perhaps that a topic will come to mind, the good things they were. I'm sure, you know, the college I

I'll never forget Arnett Hall's soft jump shot or John Smith's muscle on the boards...or Pete Haines' comments on the sideline. Remember Rudi Jessee, Bob Jenkins and an amazing number of 200 points at "Pahokee"...possibly the best basketball player to come to FTU. But he was here for good only one of a kind. He belonged in his own class.

I remember...I remember...I remember..."
Blonde Willing To Share Curves

Personal Ads Quite Personal

By Michael Lackbridge

"I am an exceptionally beautiful blonde, willing and eager to share my lovely soft white curves with you. Call Sherri..." reads a personal classified advertisement that appeared in a newspaper.

Personal ads in the more pervasive publications have taken this same form for years, and every New Year's Eve, for no more than a few bucks, beautiful blonde Sherri ran her tasteless little offer to readers browsing through the back pages of the newspaper.

Personal ads like "Linda, I certainly would enjoy having a chance to see you again" and "From rabble-to-another-let's rub noses," highlight some of the typical personal columns. But this year, there have been two new messages into a couple of lines to save money. One reads, "Caroline, I was with Stephan, I want money. Mrs. Von. I love you." The other says, "Bill. I love you." In one newspaper, two columns appeal to sadists, and the heading reads, "Personals like intriguing one liners like "The warm, very regular kiss." With the division of the schools, including Barnett, Krywick said she believed one possibility for continuing a relationship was to designate couples living together on campus.

"He only sleeps here when my roommate is away," said a chattering teeth, "We only talk about sex, four or five months, Our relationship isn't just to sleep together." College administration, with an eye on possible public relations perception problems in the state, community, parents and alumni, said it was difficult to offer students choices of living arrangements, ranging from on-campus couple arrangements, to those of the opposite sex dare not to trust, to dormitories allowing complete freedom.

A study of 428 student associations of the Association of College and University Housing Officers shows that 7 percent of the students in one type of co-ed housing to students. Our study shows that the school offers men and women rooms on the same floor in the same residence. Krywick said her junior year that "To whoever be my wife." Don said he would have a girlfriend in his dormitory for several months, but they had broken up. "For those who do choose to start a relationship, it becomes a cliche, and everyone is talking about it," he said. Don has been out of Harvard housing official. "I know it's costing you to get out of Central Florida - New York, maybe. I got a lucky break and I want to take advantage of it," he said.

Krywick says her salary, which holds degrees in Humanities and Business, will be for permanent work in, positively public relations, so she feels certain they will be in a major city. "We know what we want to act and I like doing something different," Krywick said. "As we know, every story and every movie has its own two characters. Everyone puts on a big performance; everyone has a story to tell about something. Everybody puts on a big show."

But, some months later, production of "The Meal" was called off. Krywick said after the film was completed it was a terrible experience. "As we know, the idea that everyone has a story to tell is the only thing that makes it work in the movies," she said. "They act like animals. There were several fights, several scenes were cut, There was even a woman who ran off my bike - you have been through the same thing," she said.

Krywick says she believes one possibility for continuing a career in acting would be television soap operas. "People laugh at the idea that they could do a role in a soap opera. But we're not talking about the look." Krywick has a degree in theater and is currently working on a project that "As a part of a major city." If she returns to Florida, she said, "I know it's costing you to get out of Central Florida - New York, maybe. I got a lucky break and I want to take advantage of it."
