Outlines Other Issues

Potts Relents on Elections Decision

By John Bridges

SG president Hunter Potts this week disagreed with the findings of the Election Commission, which invalidated the results of last week's senate elections.

Potts said that he would, however, back their decision. The SG president then went on to inform the FutUre of several pending issues. The letter to the elections commission is included on page 12 of this issue.

The council is composed of members from state schools.

Finally, changes in the withdrawal policy of the university are now before the Faculty Senate instruction committee.

The proposed changes began last year in the Student Senate and call for an extension of the present withdrawal deadline.

The faculty committee is presently compiling additional statistics of the number of university withdrawals and examining the policies of other universities.

$19,000 Grant Finances Medicine and Morality

By Cam Pyle

In Cape Town, South Africa, on December 3, 1967, Dr. Christian Barnard performed a heart transplant operation, removing the heart from a critically injured body of Louis Washkansky.

Barnard had explained the girl's irreversible brain damage to her father and obtained his permission to attempt the transplant, but she still waited out of conscience and a sense of professional ethics for the heart to stop beating of its own accord before proceeding.

This single incident quite dramatically focused public attention on critical questions of morality in medicine.

In this case and others of similar nature, what is to be the dividing line first prior of life and death? Should Dr. Barnard have continued his efforts to keep the girl alive even though her chances for survival were almost nonexistent? Was Washkansky's life more important?

Frula' To Perform Tuesday

By Arla Filko

Frula, an explosive, colorful Yugoslavian Ensemble of 36 outstanding dancers, singers, acrobats and instrumentalists, will perform here at FTU Tuesday, October 25.

This Village Center sponsored Dance Production will be staged at 8 p.m. at the V.C. Green and at four p.m. at the V.C. Assembly Room.

Frula, which opened in 1964, Frula was formed in 1964 by the Union of Professional Artists in Belgrade and is comprised of young artists age 17 to 22.

This internationally known troupe skyrocketed to fame, performing at the World Folk Festival in Moscow in 1965.

Acclaimed by leading critics throughout Europe, North America and Latin America, Frula presents highly diverse folk dances and court dances dating back to medieval times.

Lavish costumes, high-spirited dances and youthful exuberance has delighted audiences worldwide.

This performance is part of Frula's fifth North American tour.

Admission is free to all FTU students, faculty and staff with activity cards.

The general public may purchase tickets at the door — adults $1.00 and children under twelve, 50 cents.

The purpose of the meeting was to explain the reasons for current price hikes and discuss methods of avoiding price increases.

Inflationary pressures on food, paper products, utilities and other items have forced the budget to increase from what were considered alarmingly low levels.

Prices proposed by RHA president, Sharon Esposti, to avoid further price increases and methods to alleviate the problem included installing private kitchens in the dorms or a central kitchen in each floor.

According to the Director of Housing Operations, Freeman Goff, these suggestions are neither realistic nor practicable, as housing the dorms would create electrical and plumbing problems as well as fire hazards.

It is estimated that it would take four years and cost $250,000 to install individual kitchens in the dormitories.

Many of the students present at the meeting expressed complaints concerning the quality and quantity of the food served.

A couple of students expressed concern at not receiving adequate attention from Food Service, due to special dietary and medical problems.

John Williams, Director of Administrative Services, explained, "In order to maintain realistic pricing of meal plan rates, they should be approximately 30 percent higher on the average." Williams added, "I have heard an equal amount of compliments concerning the Food Service. We do the best we can as we are not set up to cater on an individual basis. We have to satisfy the best we possibly can the majority of the students."
EDUCATION BUILDING AMENDMENT

QUESTION FOR VOTERS

By Alan Crouse

The Public Education Building Amendment, a state program for funding the construction of new educational buildings, will be on the ballot this November.

The proposal, better known as "Amendment One", is an amendment to the Florida constitution which would continue the authority of the state to use funds from utility company taxes to finance building construction. It was approved by the voters in 1963.

In 1971, voters approved a state bonding authority which would continue the authority of the state to use funds from utility company taxes to finance building construction. In 1976, voters approved a proposed constitutional amendment to continue this bonding authority and to allow the state to use funds from utility company taxes to finance building construction.

The authority if approved by the voters will allow the state to issue bonds for construction, financing to be repaid by revenues from utilities gross receipts tax program. Amendment to the Florida constitution extends the authority to expire June 30, 1979.

Music Department Adds Instructors

The music department has added two new faculty members: Lynn Brodie and Robert Harrison, who bring with them notable credentials as teachers and performers.

Brodie, an instrumentalist, has appeared with the Tampa Philharmonic, Florida Gulf Coast Symphony, Florida West Coast Symphony, and the Dallas and Ft. Worth Symphonies. He received both his bachelor's and master's degrees in music from Ohio State University.

In 1971, he was the principal trumpeter with the American Wind Symphony in Pittsburgh. He also taught brass in the public schools and community college in Denton, Texas. Harrison came to FTI after five years at Huddleston College, Tifton, Georgia. There he built a concert band and a college community orchestra. He also has taught several years in public schools in Omaha and other Nebraska cities.

He received both his bachelor's and master's degrees in music from the University of Nebraska.

Music Department has begun renovations, kindergarten through high school.

The state university system has received a total of $525,956,874 from this program since 1963. The following is a breakdown of how much each university received:

University of Florida: 14,601,064
Florida State University: 16,431,364
University of South Florida: 21,597,622
Florida Atlantic University: 19,773,457
University of West Florida: 22,493,356
Florida Technological University: 30,391,601
Florida International University: 47,263,280
University of North Florida: 16,084,979

In addition, Valencia Community College received $5,771,000 in funds up to fiscal year 1971-72. The state allocated $5,200,000 more in funds to Valencia for fiscal years 1972-73 and 1973-74. Despite a decrease nationwide in the demand for new school buildings, Florida's population has been growing at the fastest rate of any major state in the past 10 years.

By 1978-79, the public schools, vocational-technical centers, community colleges and universities must provide new buildings for a projected increase of 400,000 students.

By John Bridges

"Chariots of the Gods" is Sun International's latest entry into the realm of exploitation films, trying to wrest inflated entertainment dollars away from trendy Americans.

The film has done well at the box office, but is aimed at rewarding as an evening playing pinball machines, and as pointless as Erich Von Daniken himself.

Needless to say, the film is based on Von Daniken's theories and takes its title, from his first book, although Von Daniken did not write the film's commentary and is not directly connected with any phase of its production.

For those unfamiliar with Von Daniken, he says that he is not a scientist and has been called a fraud and a criminal psychopath.

He was convicted for fraud and embezzlement, and while in prison wrote his second book, "Gods From Outer Space," which was never his intent. He further damages his own credibility when he gives interviews (as in Playboy, August 1974) saying that:
1. he was not convinced of his theories when he wrote his first book.
2. he sometimes writes for theatrical effect or to make people laugh.
3. he accepts what he knows in regard to theories, and rejects what he doesn't.
4. he does not even believe in UFO's.

Von Daniken's central theory is that we were visited from outer space in ancient times, and that those visitors had sexual intercourse with our ancestors, accounting for rapid intellectual development on this planet.

The visitors apparently musk Von Daniken's family. But, back to the film.

The movie begins like a play, with black and white photography, and as digressions into bland camerawork, and as sorely missed.

The commentary is so carefully worded that it avoids saying anything.

Most of the suspicious theories hinge on ancient relics, paintings, statues, and mythologies that are more than open to interpretation.

The only consistent characteristic throughout the picture is its mediocrity, mediocrity in narration, filming and presentation. The talents of Serling's TV personality are sorely missed.

To punish the viewer further, there are lengthy and pointless digressions into bland camerawork, work, music, and native costumes from various countries with no narration.

The movie finally lumbers into its long awaited conclusion, asking one last question, "Could it be, once upon a time, once upon a time?"

Hard pushed to find something good in the film, the only plus point is that perhaps, in the future, the public's minds will be changed just enough so they will look at the facts with new eyes.

That's what Von Daniken wants at any rate.

**'Chariots of the Gods' 'Pointless'**

Frat Meeting

At FTU

**Grindle To Speak At Frat Meeting**

Art Grindle, the famed Orlando automobile dealer who jumps on used vehicles yelling, "I want to sell you a car," will be the featured speaker at a meeting of Phi Beta Lambda, the social business fraternity.

According to fraternity president Pete Bush, Grindle will speak to the open meeting on the topic "business motivations."

Bush said Grindle was invited because of his dynamic speaking ability demonstrated on countless local television ads, which make him a television personality known to most Central Floridians.

Bush added that Grindle's controversial sales techniques make him appealing to most major and well suited for this meeting, which is open to anyone on campus.

The meeting is scheduled for Thursday, October 25, at 12 p.m., in General Classroom Building room 118.
Editorial

The question is often asked: "What does an editor do?" It is easily understood that the News Editor collects news, the Feature Editor writes feature articles, and the Sports Editor covers sports stories. But the Future Editor has the title of editor behind it. Yet there still remains a job called Editor.

Over the summer, the editor of the Future was not going to be a student, but an administrator. The position of actually running the paper from the Future office was to be given to a student managing editor. Because of the reaction the administration received from such a move, the editor must guide the staff, train the staff and build the staff. This is probably the only job an average reader might think of.

Another job the editor must do is to decide what goes in the paper. Almost inevitably, if one person wants something in the paper, the other does not. In any given week, at least one person has allowed a reporter to interview him and then decided that he does not wish the interview to be published. There are now more students that the reporter who has spent a great deal of time and effort in getting the story, and the person who gave the story, who often is in a position of higher authority than the editor.

The editor often has to scratch people's backs. It seems that in order to get information or permission for various things, there are usually strings attached. The most common string is that everyone who is anyone has something he wants to put in the paper. Sometimes the person who wants something to be put in the paper is the editor's fault. The editor ends up getting blamed for a lot of things that he never even knew were up to him to print or to the utmost in order to keep the operation in smooth, running order.

The editor has to do all sorts of junk that nobody did if you copy needs to be taken to the printer, suddenly everyone disappears, leaves or it is decided that he doesn't need it. If a position is offered on the staff by someone else, the editor is filling that position.

The editor censers the paper. He decides on printing obscenities in the paper, the content of the editorials and all sorts of hard decisions rests on his shoulder.

If the editor is not enough, the editor is constantly defending his position. He always has to assure students that the paper is not censorship free, that there is freedom of the press and he needs to be happy and that he is doing a good job.

Besides missing classes to get the paper out on time, spending everything he has to get classes to stay together and the editor still needs to find time for social activity and much needed study.

The next time the reader thinks of the editor it might be noted that there is no justification for class scheduling. The editor gatherers from the student body that does not mean mistakes are his fault. The editor has a job to do and very few people make it easy on one.
Management Apathy Lampooned

Editor:

Last Friday, you rebuked a letter concerning a lack of voter response to the SG elections, October 11. An obviously ridiculous remark was made to Robert L. Smithers' letter about "all the campaign posters" staring us in the face. Then I read an editorial and a column by Mike Hall about another, and no one supplying the PuTUE with any "hot tips." Well, that was the last straw. I can't sit back and remain silent any longer.

Over the last eight years, I have been enrolled at two major universities and a junior college and this past election was truly the most pitiful example of "SG" organization I have ever seen. With my present class schedule, I travel the length of this campus at least twice a day - beginning at 8 a.m. and ending at 3:50 p.m., I'll be damned if I bump into a single candidate out canvassing or even shaking hands. Why doesn't Mike Hall get off his butt and round up a few candidates for an interview or panel discussion - or something besides wasting good column space with "Nobody calls me..."

I might add that a full page "GO VOTE" ad in the PuTUE is entirely futile if a few candidates' faces and platforms don't appear along with it. What about apathy? Let's talk about it. I stopped at Hunter Potts' office during orientation to fill out an application for the judicial board. I felt my qualifications as an obvious example of a veteran, and married might be needed by the type of past western university student, a veteran, and married might be a society of professionals dedicated to management. Our organization in full with no abbreviations.

"grammer" is a degradation not only on my organization, but on your ability to write. In view of this situation, I demand that an explanation be printed in your next available issue explaining your mistake. Such carelessness is unexcusable. The official abbreviation for our organization is as above: ACM. However, you did not use this abbreviation. The normal abbreviation for the word "association" is ASSOC. However, you did not use this abbreviation, either. Instead, you used ASS. Where did you learn "grammer" (sic)?

We are a society of professionals dedicated to computer science. Your headline of "ASS. FOR COMPUTER MACHINERY" is a degradation not only on my organization, but on your ability to write. In view of this situation, I demand that an explanation be printed in your next available issue explaining your mistake. Such carelessness is unexcusable.

Sincerely,
Robert B. Multhead

Editors Note: I hardly see how any comment about campaign posters has much to do with the fact that candidates were not out canvassing or shaking hands. I never said that they were - only that with all the signs up, it should be obvious that a election is imminent. As for Mike Hall - since did a newspaper columnist who always writes for the editorial page get the job of setting up an interview with the candidates? Also, Mike wonders how he is to put a panel discussion in the PuTUE. There was once a page of candidates platforms that did appear in the PuTUE the last day of elections, which was the first possible time for the information to be gathered, due to our Tuesday deadline each week for copy. I called Hunter concerning the judicial board. He remembers meeting you but says that at the moment he has many other things that are of greater concern. You may have noticed, for example, that the SG elections were contested and are scheduled to be run again. Hunter said that it is only at this time that the Attorney General has received enough applications for a new judicial board and is beginning to look over applicant's qualifications. It should be within the next two weeks that you are contacted. There is already a judicial board that was appointed spring quarter that will continue to function until Hunter decides that a new one is needed. As for management demonstrating their level of thinking - if you will turn question and leave it there. This year we are no longer doing our own layout. It is doubtful that anyone on the staff called your group an Ass, but it is possible that happened. I feel, however, that the print shop may have overlooked the headline and let it run, when the paper was being pasted up. You may question where I learned "grammer" (sic), but I might in turn question where you learned to spell. (Consult Webster's New World Dictionary, p. 293) I might also wonder how the president of an organization would blindly accuse the editor of the mistake. I do not see cash and everything that the members of my staff do, and I see nothing that the printer does until the paper is delivered. By the way, I don't like to be called Ms.
Many Lifestyles available to FTU Students

by Kerry Fannee

If you are not one of the 432 students who managed to obtain residence in a university residence hall, you will have to live away from home or in an apartment.

This year, over 200 students were turned away from university housing for the fall quarter. Those previously occupied rooms were given first priority before new applications were accepted. With the present retention rate of 70 percent, approximately 116 spots were available for new occupants assigned on a "first come, first served" basis.

Living on campus is certainly the most convenient way to attend college. Library facilities, fraternities and sororities, and the university's policy prohibits cooking, alcoholic beverages, and all night visitation in residence halls. Those accustomed to popular bars may find the mass-produced lunchroom "specials" a bit gastronomically disturbing.

For those who are commuting, there are 20 or 30 miles; you may even save money. Those who live away are generally compelled to rent as an apartment.

Apartment living may appear glamorous at first thought. The planer, however, may quickly wear off when confronted with the first month's bills. Rent may range from $60 to $120 per month, depending on the size, location, and number of people occupying the complex. In addition, most proprietors require a damage deposit and/or security fee prior to occupancy, and utilities are purchased separately.

Once the initial expenses are met, the apartment dweller must cope with everyday living expenses, including food, gasoline, clothing, and recreational expenditures. By the time the student has fought Alafaya Trail and FTU Boulevard traffic for a week he is probably wondering whether he's making ends meet and the time he should attend.

At this point, commuter and dorm students are no doubt wondering how it is possible to live "across the street".

Actually, it's not as bad as it sounds. While living off campus may cost up to $300 more per quarter, it is often not the case. In many respects, the increased expenditures may be worth the added privacy, freedom, and flexibility only obtainable with off-campus housing. Many apartments are equipped with a washer and dryer, refrigerator, and stove, and some even come with a garbage disposal and dish washer. Students may live by themselves, with a roommate, or with up to three roommates.

Apartments are generally quieter, and more spacious than their residence hall counterparts, and they provide asylum from the university.

Which way of life is best? Of the students who are off campus, all but one were satisfied with their present housing. The one dissatisfied student was commuting from Vero Beach.

Living on campus provides convenience and a moderately priced housing cost while restricting privacy and flexibility. Off-campus living features privacy, freedom, and flexibility at a greater loss to the pocketbook.

"Campus life is what you make it," commented one student. "It doesn't really matter where you live."
Air Force ROTC...
The college scholarship program with sky-high benefits.

Some people might need to be coaxed with more than a full college scholarship to enroll in the Air Force ROTC Program. So, if free tuition, lab and incidental fees aren’t enough... the Air Force offers a monthly allowance of $100.00, tax-free, in your junior and senior years, even if you are not on scholarship. And flying lessons to those qualified provide the most exciting benefit of all. Interested?

Income Tax Preparation

Course To Begin

A course designed to train students in preparing income tax returns will be offered at FTU beginning Oct. 28.

According to a spokesman from the Office of Continuing Education, the course will be taught by experienced personnel actively engaged in tax preparation.

Teaching techniques will include illustrated lectures, class discussion and use of regulation tax forms.

Due to the ever changing tax forms and regulations the demand for qualified tax preparers is increasing. This course will qualify students to assist taxpayers in preparing their returns.

The course has a minimum of 60 hours classroom instruction. Classes will be held twice a week (Monday and Thursday, from 7:30 p.m. to 10 p.m.) for ten weeks.

Bible Study Offered

Covering the Bible study group initially, I had my reservations. I suppose I expected some deep religious message, or an hour of listening to some minister, or I'm not sure. What I found was a warm welcome and smiles.

Once everyone had arrived, the group began with a song. Harmony was everywhere. The sound of voices praising the Lord for the happiness felt and shared.

When the music ended, there was a moment's silence, and then a reflection. A solitary voice spoke for all, speaking of a reaching out for kindred souls for nothing more than a union of spirit.

Afterwards, there was a brief time of social amenities. I suppose we waited as much to meet one another and become acquainted, the spokesman for the group that hour led us into a discourse on a few parables from the Bible.

The hour ended with three thoughts: faith, confession, and commitment.

Class Scheduling

work or commute great distances, said Caylor. These students have special scheduling needs. Something should be done about meeting these needs and I hope to do it.

"There is a tremendous demand for night courses in the Business College because working people..."

Campus Glances

There will be a forties revival on Saturday November second at 8:30 p.m. in the multi-purpose room.

This 40's sound revival will feature BIG BAND DANCE MUSIC provided by THE LEGENDS. Come dance and listen to the sounds of the BIG BAND ERA.

The dance is open for any student who wish to come, and is specifically aimed at faculty and staff here at FTU. The event is free to faculty and staff with activity cards and free to students. $1.00 per person will be the charge to those faculty and staff without activity cards and to non FTU students who are guests of FTU students.

Tara Buckley, as Linda, proves to be the highlight of Tom Stoppard's play, "Enter a Free Man" premiering this weekend, October 24, 25, and 26 in the Science Auditorium. Playing George Riley's irrational teenage daughter, Tara appears at ease with her part, acts well, and captures the center of attention in her scenes. Playing the part of George is Doug Emerson as a neurotic, self-centered inventor who neglects his family in quest of producing a reusable envelope. Encouraged by Harry (Jeff King) and his swinging girlfriend, Florence (Joy Jones), George ultimately realizes his shortcomings when the envelope's flaw is exposed and his partnership is dissolved.

One of the most believable roles is that of George's wife, Persephone, played by Mary Monroe. Mary comes across as a hardworking housewife whose family is her only concern. She handles facial expressions and gestures well, and reminds the audience of the play's English setting.

Directed by Dr. David Mays, "Enter a Free Man" is delivered with a continuity complementary to set design, and appears well rehearsed. Although the first act tends to ramble on with little action, the plot picks up momentum as the audience is left wondering if George and Linda are really planning to go their own separate ways. The dialogue, especially Emerson's, flows smoothly and mistakes are inconspicuously covered.

George and his daughter, Linda (Tara Buckley), constantly argue about his nonpaying job and her motorcyclist boyfriend. (Photo by Mike Berman)
FTU Employee Wins Locksmith Award

By Pat Strange

Vic Wikstrom, a locksmith with the FTU physical plant, has won the M. Leonard Singer Award. Wikstrom sent an entry in the technical section of the monthly periodical for locksmiths, "Locksmith Ledger." The purpose of the publication is to further the advancement of the technical section of the monthly periodical for locksmiths, "Locksmith Ledger." The award is picked on a point system by a panel of locksmiths and businessmen. For this award, Wikstrom said he received a larger, nicer plaque and a check for $200. Wikstrom started working for FTU in July of 1968. For eight years preceding, he worked as a tool and die maker. There was no opportunity for a tool and die man in this area, Wikstrom said, therefore, he became a locksmith. Locksmithing, until recent years, was handed down from father to son. A few years ago this system broke down. Sons were no longer interested in becoming locksmiths. Schools were established to teach the art of being a locksmith. Wikstrom received his training from the Locksmith Institute in New Jersey, partly through correspondence and partly on-the-job training.

FTU Employee Wins Locksmith Award

By John Bridges

The dates of the new Student Government Senate elections were set this week and Jeff Cepuran, commissioner of elections, informed the P&U of additional plans. The new election will be held on October 31 and November first at the Kiosk, with voting times uncharged. Absentee balloting for students unable to vote at that time will be held on October 30 in VC 211.

Cepuran said that no new candidates will be allowed to declare and that all present candidates must attend a meeting on October 25th at four p.m. in VC 211.

Candidates not in attendance will be disqualified. Candidates will be allowed an extra 200 campaign expenditure and the new campaigns will get underway October 30.

As to the problems confronting the elections last time around, Cepuran said that the absentee ballots for Co-op students went out last Wednesday. The Co-op office will mail campaign literature to its students on assignment. Candidates' expense forms must be filed by noon on November fourth and all campaign posters must also be down at that time.

Cepuran estimated that 90 percent of the candidates' expense forms from the last election were never filed.

New Election Set

Illegal Parking Observed

the handicapped student so please don't park in their spaces. Just thank God that you are able to walk. Someday you may need the same.

Thank you.

Linda Schultz

Editor's Note: There is always illegal parking but you can rest assured of one thing: nine times out of ten, Campus Police will be there to give people tickets if they are illegally parked. As for unloading on the weekends, let me defend the dorm students. With about ten spots by the dorms, and the lots virtually empty, a few minutes of unloading will probably not take up many of the spots, and definitely not the closest ones. But don't despair, the dorm students are trying to get a reserved parking lot fairly close to the dorms, which will make parking easier for them.

INNOVATORS, NOTIMITATORS
'Energy Game' To Inform Public

By Deborah Whaley

Can you beat the clock and save the world's supply of fossil fuel? The name of the game is Energy. When the world supply of fossil fuel is used up, the game stops automatically.

The Energy Game is part of a presentation given by Dr. Bruce Nimmo, Professor of Mechanical Engineering, under the sponsorship of the Oak Ridge Associated Universities. The "game" uses an analog computer called an energy-environment simulator, and includes a slide presentation giving background on the energy crisis.

The Citizen's Work Shop On Energy and the Environment began the program about a year and a half ago, before the energy crunch hit.

Dr. Nimmo said that before the Workshop could work on new methods to solve the energy crisis, it had to convince people that the crisis was real.

FTU received a grant to present a lecture and the Energy Game given by Nimmo. Florida, Alabama, North Carolina and South Carolina.

Lecture audiences have included power company executives, school district superintendents, civic clubs, and even a group of cooks at Richmond State Prison.

The Energy Game has three sections. The top section representing the world energy supply, is divided into natural gas, petroleum, coal, nuclear, hydroelectric power, wind, solar, and geothermal.

Each section has a control to regulate usage. The natural gas, coal and petroleum sections each have a lever to control whether the fuel will be used for chemical or electrical energy.

The middle section of the game is divided into three parts. One part is the control board, works on an existing background of chemical energy. The next section shows environmental impact as well as the personal energy consumption rate. The last part of the middle section shows any deficit or surplus in electrical energy.

The bottom section of the game represents energy consumption. It is divided into usage: industrial, transportation and household. Each section is subdivided. For example, household use is divided into air conditioning, appliances, lights, etc. Transportation use is divided into automobiles, buses, trucks, trains, railroads, and aviation. Industrial use is divided into refining, steel, manufacturing, etc.

Every area of use in the three sections has a sign to indicate the rate of usage. As a clock ticks off to represent years, the participants must try to regulate energy usage so that the demand does not outstrip the supply. Players regulate which sources of fuel will be used to supply energy.

At the same time, environmental impact must be taken into consideration. For example, a switch to coal as the only supply of fuel will create pollution problems. The board will light up and show when a move by a player will damage the environment.

Players regulate whether the fuel will be used for electrical or chemical generation.

Players must avoid creating a chemical or electrical energy deficit.

To add social input, five people play the game at the same time. Each person is given a control board and has one fifth of the total control.

Dr. Nimmo said he had seen the game get very heated at times. He said during one game one man reached across another man's control board and told him to "turn that thing off, look what you're doing."

The machine keeps tabs of the players' decisions. The board shows the effects of player's decisions on the environment, the personal energy consumption rate and fossil fuel depletion.

Nimmo said there are a lot of things built into the machine that can give some perspective on the energy crisis.

One thing the machine shows in the short life span of petroleum and the possibility of depletion of the world supply of fossil fuels. "It gives you a feel for the environmental impact of some of the options you choose to go with," he said. He added, "it shows the importance of how we distribute fuel (for electrical or chemical use) or how we use hydroelectric power, nuclear power, and new technology."

Nimmo said the Energy Game is a "super device to help people visualize some of these things" that must be taken into con-

consideration in dealing with the energy crisis. "The beauty of it is that it lets them teach themselves," he concluded.

AAUP Pursues Bargaining Position

By Deborah Whaley

Collective bargaining, extension of the withdrawal period and retention of student exams and papers were discussed at the Faculty Senate meeting Oct. 17.

An Ad Hoc Committee of the Faculty Senate compiled a report on collective bargaining. The Senate carried a motion to distribute copies of the report to the rest of the faculty.

The report states that expense funds for consultants and support services for the report were provided by the university administration. However, the committee says in the report it was completely free in its investigation and the university administration in no way influenced the contents of the report.

Members of the University Faculty Grievance Committee are to be trained, full-time, non-administrative faculty members.

Whether chairpersons of departments may serve on a faculty grievance committee was discussed.

Several senators questioned whether chairpersons of departments were considered faculty or administration. A proposal submitted to the Faculty Senate by the Student Senate to extend the withdrawal period to six weeks was returned to the committee for further consideration.

The committee is taking a poll of faculty members and with-
In a tumultuous week of soccer, FOX's世俗 climbed away the memory of a hapless, winless week of seven days ago, ringing up three impressive victories in a five day period. Shining out the University of Miami 4-2 last Thursday a week ago, shutting out College of Looking Mountain Tennessee 1-0, Saturday the team notched up a 3-2 win over a 3-2 win against Jacksonville University. Turnover was not a record for consecutive wins by a 5A-FTU soccer team. The Knights will be going for win number six and fourth in a row this Saturday at an aggregation at Florida Institute of Technology in Melbourne, Florida.

It was a week filled with many heroes in the American Cup, it could possibly be mistaken for the “Winning Wounded.”

All-American candidate goalie Winston Dubonne lining up in two steering goal-free performances against Miami and Covenant. Tom Barber drilling home the low score against Covenant with only 1:15 remaining on the clock.

Speedy Dean Andraud sending home one of FTU’s three goals to be Jacksonville’s one, during a powerful first half of action only yto twist an ankle in the second half and watch from the sidelines while the Delphic attempted to overcome a 3-6 half time deficit.

Quick and agile Tony Smith, darting and scoring over the field frustrating Dolphin defensive man Steve Cooper into deficit and eventual ejection from the game when Cooper decided the only way out was to trip Smith. Our Romero, gaining an equal hero status with his relentless speed and masterful ball handling, something only a coach could love.

Of the three matches, Miami proved to be the easiest of quests. FTU bolted out to an early lead while Dubonne guarded the nets like a Lioness shielding her cubs.

The last minute score by Barber against Covenant culminated a Knight attack that was turned back time and again by the Scots’ goalie, Bruce Kramer. FTU outward the visitors from Lookout Mountain, 37-11, but were unable to put anything past Kramer until the final moments. The Knights winning tally came after a John Brown shot was blocked by Kramer in the corner of the goal. The half rolled loose and Barber was there to drive it home for the victory.

Knight coach Jim Rudy said the play of Barber and Bill Morse made the difference in the win. Morse is a 14 year old sophomore late in the game and pressured the Scots at the field. I was also glad to see us finally put the ball in the goal in a tight one.

Against Jacksonville, the Knights scored early and often with Andraud hitting the first goal, a minute later in the match giving FTU a 1-0 lead.

Romero got into the scoring column next as he popped a shot past Delphin goalie Walter Olsen with the contest only five minutes old.

Andraud picked up another goal with seven minutes gone in the game to give the Knights a 2-0 advantage. Jim Maddon had another score called back by the officials.

Jacksonville got on the board late in the first half when the Dolphins punched home a goal after a scramble in front of the net.

In the second half, Jacksonville narrowed the margin to 5-2 on a “mystery” goal. The remainder of the game saw the Knights hammer away at the “hows” but were unable to put any points on the board.

“Could have scored eight goals in the first 16 minutes,” Rudy related. “But we had touffle our players in and out due to injuries and this cost us on our continuity.” Listed among the FTU players were Andraud with a twisted ankle, Doug Dyer with an ankle injury, and Walt Cordell with a barked up shin. In the reserve game the Knights prevailed 2-0 on the strength of Walt Cordell’s two goals.

Tony Smith, Quick and Agile

He’s Sailing About In A Hockey Puck

By Walt Merris

Can Harold Downing sail a 390 pound “Hockey Puck” to a national championship?

Downing, a FTU junior, will know the answer tomorrow.

The “Hockey Puck” is Downing’s nickname for his 12-foot catamaran which he will sail into the final round of the National Hobie Cat Championships at Key Biscayne, Florida.

Downing has been racing competitively for about nine months and qualified for the Nationals in July. To qualify he had to accumulate points in ten races.

To win the championship Downing must have the lowest number of points in nine races out of the fifteen race course. The place of finish is the number of points a skipper receives.

Restrictions on the boats are very tough. No modifications are allowed among the boats. Each skipper is given the same chance of winning and it is sailing skill that counts.

Downing is ranked second on the world’s top forty Hobie class. He won the Florida Labor Day regatta, the Spring regatta in the Florida State Spring Regatta, and was second in the Disney World Invitational Regatta.

Downing is a junior and was third in the 10th Annual National Hobie Kids “Hockey Puck” regatta last year.

Downing’s boat is called “Hockey Puck” after the sport he originated in the fall of 1973 by a group of students from the University of Miami. The sport is gaining in popularity and is not unlike the sport of tennis with a swimming tank instead of a tennis racket.

In the reserve game the Knights narrowly lost to the Florida State University again. This time, 3-0.

Wood feels next spring’s schedule is a bit more difficult than this year’s. ‘It will be the toughest we ever had,” Wood feels. “It’s representative of a wide area of the country.”

Included in the schedule are Miami, who finished No. 4 in the nation last year. Jacksonville, cross-town rival Rollins, Florida A&M, Rollins and South Florida.

A new addition to the Knights’ regular season play is the Southern Mississipp Invitational which includes University of Alabama, University of Mississippi, Mississippi State, University of Georgia, University of Kansas, and North Carolina. “It’s new for us and I’ll be awfully tough,” said Wood.

Six members of the team along with six women players will be competing in a mix double tournament in the Midwest. The team is currently practicing at the Racquet Club today, Saturday and Sunday.

Boosters Prepare For Autumn Drive

By Pat Merris

The FTU Boosters, a group dedicated to sustaining the university’s athletic program, are currently making preparations for their fall membership drive.

The Boosters Club was originated in the fall of 1973 by a group of people who had expressed interest in forming an organization to actively support and could actively support FTU athletics.

Athletic Director Dr. John Humphery said the purpose of the Boosters is to support university’s athletes by simply attending sporting events and by donating financial aid to team members.

Membership in the Boosters Club will also entitle member- ship in the FTU Foundation. The Boosters offer three different membership plans that entitle members to purchase season passes for all athletic contests and to help defray unexpected expenses.”

The Boosters Club has no offi cers. An executive planning committee instead provides advice and counsel in regard to activities of the committee. The committee is composed of 16 members who are deeply interested in FTPU athletics. The committee is coordinated by Dr. Robert Humphery.

The executive committee will coordinate several social activities including a membership drive cookout on November 24 and lend untied support for attendance at athletic contests.

Membership in the Boosters Club will also entitle membership in the FTU Foundation. The Boosters offer three different membership plans that entitle members to purchase season passes for all athletic contests at reduced rates.
Kappa Sig Defender pressures DTD quarterback, in KS's first win of the season.

**Archers Aiming At Regional Title**

By Walt Morris

The FTU Archery Team will be seeking its second victory in two weeks tomorrow in the Regional Title of North Florida, Brevard CC. Seeking its second victory in two weeks tomorrow in the

However, the chances appear dim because FTU will not have the services of Sam Reyna. Reyna's eligibility is up and he will now turn his efforts to coaching the young team.

Miss Reed has been finishing second and third this year in the Women's Individual. Besides her own teams, she has teams from Stetson, Miss Reed transferred to FTU following her sophomore year.

According to Reyna the biggest factor to overcome this week will be the good weather. "The bad and should make a big difference on me," Emily added.

The FTU team members have been shooting field targets all summer to get ready for the season. The team hopes to finish high in as many meets as possible to qualify for the National Championships. Money is another factor that will determine if the team goes to UCLA. The team only has $600 to go to the tournament.

The National Championships receive no money from the NCAA but is supported by the schools that have teams and from donations from archery-archery across the country.

A big disappointment for the team was that Reyna did not make All-American. A protest has been filed because archers from San Bernardino and Arizona State dominate the All American squad each year and the coaches from the two schools are on the nominating committee.

"The southwestern colleges are trying to get the Nationals as far away as possible," Reyna said. "The few Southeastern teams the better for them. Florida is rated about fifth in the nation and they are getting scared."

Reyna has qualified for the Olympic Trials and is eligible to try out for the World Team. He also won the Southern U.S. Championship this past summer.

**Tyese I, Dorm A Lead Volleyball**

By Linda Mitchell

After a full week of Women's Intramural Volleyball, only Tyese I and Dorm A were still unbeaten. Tyese I remained undefeated after putting away Crew, Dorm B, Zeta, and even their own sister team, Tyese II. Dorm A also stayed in the win column by beating Stetson, Tri-Delta, and Alpha Tau Omega Little Sisters.

Tyese II remained the top contender for second place losing only one game to Tri-Delta. The Independent, the Independents before falling to Tyese I.

Tri-Delta lost four games in a row, but bounced back on Monday to beat the Crew team, handing them their second defeat and knocking them out of second place.

**TKE Bombs SAE SX Scared ATO**

By Joe DeSalvo

Lambda Chi Alpha and Tau Kappa Epsilon continue their undefeated ways. Both teams remain tied for the lead in the Fraternity League. LXA went into Wednesday's action 6-0 while TKE carried a 5-0 record. In LXA's game against Kappa Sigma on Thursday, Oct. 13, Dave Hudick touchdown passes with two of them to Phil McKinnis gave LXA a comfortable 30-0 halftime lead. KS and LXA exchanged scores in the punchless second half to give LXA a 24-6 decision for win No. 4.

In a close battle, TKE with the help of two touchdowns by Larry McCorley from quarterback Steve Jackson got by a stubborn Sigma Chi squad, 30-19. Scott Rainley scored two touchdowns for SX who missed two important extra point attempts.

Rounding out last Thursday's action, ATO buried Delta Tau Delta, 26-6. ATO quarterback Joe Hart ran for one touchdown and threw four others in a well-balanced scoring attack. Chi Phi, behind quarterback Steve Kurziolek's three scoring passes had no trouble defeating SAE 21-6.

In Independent League action on Wednesday, Oct. 16, LXA Gold used quarterback John Swank's strong arm to defeat TKE 25-6. LXA Gold receiver Jim Robisch pulled in two first half touchdowns and also ran a second half interception for another score. A pass to Neil Mullins completed the LXA Gold attack.

Smoker's Union took a slim 7-6 lead into the second half but two Dave Johnson scores after the intermission proved to be too much for SAE as they were victimized by Smoker's Union, 26-12.

In a defensive battle, a first half safety by Mark Vourgin gave God's Squad a 5-0 win over APROTC. In Monday's action, TKE won their fifth straight, trouncing SAE 44-0. Steve Jackson ran for one score and threw for four more scores to lead the offensive charge for TKE. In a close ballgame, Ken Lock's second half touchdown gave KS their first win of the season, a 12-7 verdict over DTD.

ATO broke a 13-13 halftime tie with two second half touchdowns to defeat SX 26-19. ATO quarterback Joe Hart threw four touchdowns with Ken Powers grabbing two scores. Pete Heckenman scored twice for SX.

Chi Phi rolled by Pi Kappa Alpha 24-7 with Chi Phi quarterback Steve Kurziolek throwing three touchdown passes.

On Tuesday, Black Student Union remained undefeated shutting out APROTC, 14-0. Two first half scores by Carlos Feza took care of all the scoring. The Bunglars protected Jim Marshall's first half touchdown to get God's Squad 6-0 and Stafel Hall and Students took advantage of a Ken Renner extra point to defeat the Mafia 7-6. Ken Riepe scored for FS&S while Jack Miller pulled in a 42 yard scoring pass from Mafia quarterback Steve Russell.

**STANDINGS AS OF TUESDAY,**

**FRATERNITY DIVISION**

TKE 8-0

LXA 7-0

ATO 3-2

SAX 3-2

SAE 1-3

PKA 1-3

DTD 1-3

KS 1-3

**INDEPENDENT GOLD**

BSU 5-0

Bunglars 4-1

FS&S 4-1-1

APROTC 4-2

God's Squad 1-2

Mafia 0-3

**INDEPENDENT BLACK**

LXA Gold 1-0

Individuals 1-0

Smoker's Union 1-1

TKE II 1-1

SOFM 0-2

**DeSalvo's Predictions**

Monday: BSU over Bunglars by 2; LXA Gold over Smoker's Union by 14; Individuals over SMOFM by 12.

Tuesday: LXA over Chi Phi by 19; SX over DTD by 14; KS and SAE even; ATO over Phi Sigma 28.

Wednesday: Mafia over God's Squad by 6; Bunglars over APROTC by 12; BSU over FS&S by 6; Smoker's Union over TKE II by 12.

Thursday: le Xover SX by 14; TKE over Chi Phi by 18; DTD over SAE by 12; KS over PKA by 1.
