Potts Relents on Elections Decision
By John Bridges

SG president Hunter Potts this week disagreed with the findings of the Election Commission, which invalidated the results of last week's Senate elections.

Potts said that he would, however, back their decision. The SG president then went on to inform the FutUre of several pending issues.

The letter to the elections commission is included on page 12 of this issue.

Potts disclosed the SG offices received a reply from Florida Attorney General Shiver's office, regarding a request SG made last April.

"It's not as clear as I'd hoped for," Potts said.

The request was for a ruling on whether or not, Activity and Service fees could be deposited in an account outside the State Treasury. Such an account might then allow easier access to the funds.

The reply stated that such an arrangement would not be allowed because restrictions involving the funds would still exist and if the procedures would not be lessened.

Potts said further that he is planning to attend a meeting on Monday of the State Council of Student Affairs.

Finally, changes in the withdrawal policy of the university are now before the Faculty Senate instruction committee.

The proposed changes began last year in the Student Senate and call for an extension of the present withdrawal deadline.

The faculty committee is presently compiling additional statistics of the number of university withdrawals and examining the policies of other universities.

$19,000 Grant Finances Medicine and Morality
By Cam Pyle

In Cape Town, South Africa, on December 3, 1967, Dr. Christian Barnard performed a heart transplantation on a 50-year-old Italian woman. The operation, removing the body of Louis Washkansky, was performed on her father and obtained his transplant to stop beating of its own accord. Dr. Barnard explained the girl's irreversible brain damage to her father and obtained his permission to attempt the transplant, but she was still waiting out of conscience and a sense of professional ethics for the heart to stop beating of its own accord before proceeding.

This single incident quite dramatically focused public attention on critical questions of morality in medicine. In this case and others of similar nature, what is to be the dividing line between life and death? Should Dr. Barnard have continued his efforts to keep the girl alive even though her...

RHA Discusses Price Hikes
By Arla Filko

In a meeting sponsored by the Resident Hall Association (RHA) October 15, approximately 100 resident students discussed rising prices of the Food Service Operation.

Presided over by David McKissick, the meeting was also attended by the Vice President of Morrison, Inc., Mr. Slokes and the District Manager for Morrison, Ron Willis.

The purpose of the meeting was to explain the reasons for current price hikes and discuss methods of avoiding price increases.

Inflationary prices on food, paper products, utilities and tuition are cited as the culprits. For example, wholesale food costs are up 25 per cent and electricity rates are...

The meeting began with president, Sharon Espiritus, attempting to avoid further price increases and methods to alleviate the problem included installing private kitchenettes.

The proposal was called "the doom of a common kitchen on each floor."

John Williams, Director of Administrative Services, explained, "in order to maintain realistic pricing of meal plan prices, they should be approximately 30 per cent higher on the average." Williams added, "I have heard an equal amount of complaints concerning the Food Service. We do our best we can as we are not set up to cater on an individual basis. We have to satisfy the best we possibly can the majority of the students.

Frula' To Perform Tuesday
By Arla Filko

Frula, an explosive, colorful Yugoslavian Ensemble of 36 outstanding dancers, singers, acrobats and instrumentalists will perform here at FTU Tuesday, October 27.

This Village Center sponsored Dance Production will be staged at 8 p.m. in the V.C. Green and at four p.m. in the V.C. Assembly Room.

Frula was formed in 1964.

Acclaimed by leading critics throughout Europe, North America and Latin America, Frula presents highly diverse folk dances and court dances dating back to medieval times. Lively costumes, high-spirited dances and youthful exuberance has delighted audiences worldwide.

This performance is part of Frula's fifth North American tour.

Admission is free to all FTU students, faculty and staff with activity cards.

The general public may purchase tickets at the door - adults $5.00 and children under twelve, 50 cents.

The council is composed of members from state schools.

Goff, these suggestions are neither realistic nor practical, as cooking in the dorms would create electrical and plumbing problems as well as fire hazards. It is estimated that it would take four years and cost $52,000 to install individual kitchens in the dormitories.

Many of the students present at the meeting expressed complaints concerning the quality and quantity of the food served.

A couple of students expressed concern at not receiving adequate attention from Food Service, due to special dietary and medical problems.

John Williams, Director of Administrative Services explained, "in order to maintain realistic pricing of meal plan prices, they should be approximately 30 per cent higher on the average." William added, "I have heard an equal amount of complaints concerning the Food Service. We do our best we can as we are not set up to cater on an individual basis. We have to satisfy the best we possibly can the majority of the students.

EDUCATION BUILDING AMENDMENT
QUESTION FOR VOTERS

By Alan Crouse

The Public Education Building Amendment, a state program for funding the construction of state educational buildings, will be on the election ballot this November.

The proposal, better known as "Amendment One", is an amendment to the Florida constitution which would continue the authority of the state to use funds from utility company taxes to finance building construction.

In 1963 Florida voters approved a proposed constitutional amendment to continue this bonding authority and to allow the state to use funds from utility company taxes to finance building construction.

In 1969 the voters approved the 1974 legislature approved the 1975.

In addition, Amendment One would allow the state to use funds from utility company taxes to finance building construction.

Despite a decrease nationwide in the demand for new school buildings, Florida's population has been growing at the fastest rate of any major state in the past 10 years.

By 1978-79, the public schools, vocational-technical centers, community colleges and universities must provide new buildings for a projected increase of 400,000 students.

Music Department
Addes Instructors

The music department has added two new faculty members: Lyman Brodie and Robert Harrison, who bring with them notable credentials as teachers and performers.

Brodie, an instrumentalist, has appeared with the Tampa Philharmonic, Florida Gulf Coast Symphony, Florida West Coast Symphony, and the Dallas and Ft. Worth Symphonies.

In 1971, he was the principal trumpeter with the American Wind Symphony in Pittsburgh.

Harrison, also an instrumentalist, has performed extensively as a clarinetist with universities and various chamber music groups.

Both Brodie and Harrison have completed residency requirements for their doctorates; Brodie at North Texas State, and Harrison at Ohio State.

Brodie, who graduated from the University of South Florida in Tampa, received his master's in music from North Texas State.

For the past 2 years, he has taught brass in the public schools and community college in Denton, Texas.

Harrison came to FTT after five years at Baldwin College, Tallinn, Ohio. There he built a concert band and a college community orchestra. He also has taught several years in public schools in Omaha and other Nebraska cities.

He received both his bachelor's and master's degrees in music from the University of Nebraska.

The state university system has received a total of $23,556,874 from this program since 1963. The following is a breakdown of how much each university received:

- Florida State University: $4,601,966
- Florida A&M University: $1,421,104
- University of South Florida: $5,187,652
- Florida Atlantic University: $1,571,457
- University of West Florida: $4,493,256
- Florida Technological University: $24,281,641
- Florida International University: $1,230,481
- University of North Florida: $1,004,709
- University of South Florida: $5,200,000

In addition, Valencia Community College received $5,771,000 in funds up to fiscal year 1973-74.

The state allocated $5,200,000 more in funds to Valencia for fiscal years 1973-74 and 1974-75.

By John Bridges

"Chariots of the Gods" is Sun International's latest entry into the realm of exploitation films, trying to wrest inflated entertainment dollars away from trendy Americans.

The film has done well at the box office, but is about as rewarding as Erich Von Daniken's theories, and now this movie.

While many viewers and readers look upon the man's words as the gospel, Von Daniken vows that was never his intent. He further damages his own credibility when he gives interviews (as in Playboy, August 1974) saying that:

1. he was not convinced of his theories when he wrote his first book.
2. he sometimes writes for theatrical effect or to make people laugh.
3. he accepts what he likes in regard to theories, and rejects what he doesn't.
4. he does not even believe in UFOs.

Von Daniken's central theory is that our visitors had sexual intercourse with our ancestors, accounting for rapid intellectual development on this planet.

The only consistent characteristic throughout the picture is Von Daniken's family. But, back to the film.

The movie begins like a travelog of questions: "How were the pyramids made?" "How were these statues moved?" "Gods of the cosmos?" His first book sold over five million copies. NBC made a TV special and trotted out Rod Serling to expound Von Daniken's theories, and now this movie.

Most of the suspicious theories hinge on ancient relics, paintings, tables, and mythology that are more than open to interpretation. The commentary is so carefully worded that it avoids saying anything.

To punish the viewer further, there are lengthy and pointless digressions into bland camera work, music, and native costumes from various countries with no narration.

The only consistent characteristic throughout the picture is Von Daniken's family. But, back to the film.

The movie finally lumbers into its long awaited conclusion, asking one last question. "Could it be, once upon a time, once upon a time?"

Von Daniken wants at any rate. point is that perhaps, in the future, the public's minds will be changed just enough so they will look at the facts with new eyes.
**Editorial**

The question is often asked: "What does an editor do?" It is easily understood that the News Editor collects news, the Feature Editor writes articles and stories; the Sports Editor has the title of editor behind him. Yet, there still remains a job called Editor.

Over the summer, the editor of the Future was not going to be a student, but an administrator. The position of actually running the paper from the Future office was to be given to a student managing editor. Because of the reaction the administration received from such a change, the Future editor was given the task of managing and staff, train the staff and build the staff. This is probably the only job an average reader might think that he would like to have.

Another job the editor must do is to decide what goes in the paper. Almost invariably, when a person sees something in the paper, he asks, "When did that happen?" This is the old domino sleep. . .

The editor is an administrator in a sense for it is his duty to oversee all the employees of the staff. Each phrase of the paper is under his direct control. The editor must guide the staff, train the staff and build the staff. This probably is the only job an average reader might think he would like to have.

Illegally Parking Observed

LETTFR TO EDITOR FROM SCHULTZE

Fellow Parking:

I have been noticing that for the last week or so there have been a lot of illegal parking.

Many D stickers in B places and the most infuriating of all when the D and B's park in the H places.

Remember H means handicapped persons parking.

These spaces are for only handicapped students, so why should you who can walk park in their places?

Even if it's just to load or unload on weekdays, or for a few minutes while you go over to the administration building or because it's closer to your next class in no reason to park in them.

The handicapped student parks there because he can't walk to his next class, or he can't just jump out and run to his class so he'll have the space. The handicapped student needs more room to get his chair in and out of the car or you can understand.

These spaces were made for

**LETTER TO EDITOR FROM CAYLOE**

Students:

The "average" college student was ever someone who lived on campus with his parents providing all or most of the necessary accommodations other than attending his classes whenever they were offered, that person is not today's F.T.U. student.

We, the students of F.T.U., work, we have families, we commute, we shop, we commute to campus. Yet every registration process there is so confusing...it is all but impossible to work required classes into commuting or working schedules.

There is no justification for class scheduling. The administrator gathers a random assortment of class times against the student. We do have to speak up and make our needs known, if you want input from students to be the basis for the scheduling of vital courses, to start by going to the Co-Operative Education Department, the F.T.U. Administration Building, and leaving information there as to what you want and how you can be contacted.

This is for all students, all colleges: GO AND PUT YOUR SATISFACTION IN WRITING!

Lucy W. CaylofE Chairman Curriculum Committee

Management Apathy Lamponed

Editor:
Last Friday, you rebuked a letter concerning a lack of voter response to the SG elections, October 11. An obviously ridiculous remark was made to Robert L. Smithers' letter about "all the campaign posters" staring us in the face. Then I read an editorial and a column by Mike Hall about another, and no one supplying the Pu'TuE with any "hot tips." Well, that was the last straw. I can't sit back andf 

read the appointments and that a new one is needed. As for grammatical mistakes I have been enrolled at two major 

Editor's Note: I hardly see how my comment about campaign posters has much to do with the fact that candidates were not out canvassing or shaking hands. I never said that they were - only that with all the signs up, it should be obvious that an election is imminent. As for Mike Hall - since did a newspaper columnist who always writes for the official page get the job of setting up an interview with the candidates? Also, Mike wonders how he is to put a panel discussion in the Pu'TuE. There was over a page of candidates platforms that did appear in the Pu'TuE the last day of elections, which was the first possible time for the information to be gathered, due to our Tuesday deadline each week for copy. I called Hunter concerning a lack of voter phone calls me ... 

Robert B. Muirhead management has demonstrated their level of thinking - NONE.

Sincerely,

Mercer Criticizes Abbreviation

Ms. Denosition:
On Friday, October 4th, I submitted to your News Desk a news release concerning an event my organization was planning for October 11th. In that release I printed the name of our organization in full with no abbreviations.

The official abbreviation for our organization is as above: ACM. However, you did not use this abbreviation. The normal abbreviation for the word "association" is ASSOC. However, you did not use this abbreviation, either. Instead, you used ASS. Where did you learn "grammar"? Quite possibly from Webster's New World Dictionary (p. 329). I might also wonder how the president of our organization would suddenly accuse the editor of the mistake. We are a society of professionals dedicated to computer science. Your headline of "ASS. FOR COMPUTER MACHINERY" is a degradation not only on my organization, but on your ability to write.

In view of this situation, I demand that an explanation be printed in your next available issue explaining your mistake. Such carelessness is unnecessary.

Sincerely yours,

Christopher C. Mercer, Jr.
Chairman, Pu'TuE-ACM

Editor's Note: The explanation is that the Pu'TuE staff takes the copy down to the printer's and leaves it there. This year we are no longer doing our own layout. It is doubtful that anyone on the staff called your group an Ass., but it is possible that happened. I feel, however, that the print shop may have overlooked the headline and let it run, when the paper was being pasted up. You may question where I learned "grammar" or, but I might in turn question where you learned to spell. (Consult Webster's New World Dictionary, p. 329.) I might also wonder how the president of our organization would suddenly accuse the editor of the mistake. I do not see cash and everything that the members of my staff do, and I see nothing that the printer does until the paper is delivered. By the way, I don't like to be called Mr.

Available Weekly in Five or Six Column Size

For Release Week Beginning Sunday, Feb. 1, 1970

I'm Not a Cowboy.

I'm Not a Ball Player.

Who Ever Dreamed It Would Be This Hard?
by Kerry Fannee

If you are not one of the 432 students who managed to obtain residence in a university residence hall, you will have to live off campus at home or in an apartment.

This year, over 200 students were turned away from university housing for the fall quarter. Those previously occupying rooms were given first priority before new applications were accepted. With the present retention rate of 70 percent, approximately 500 spaces were available for new occupants assigned a "first come, first served" basis.

Living on campus is certainly the most convenient way to attend college. Library facilities, the food service, and classroom buildings are within walking distance of the residence halls. Movies, dances, and special programs are organized with funds received from activities fees. In addition, various programs are organized by individuals resident centers, students, and clubs. Housing costs range from $35 per quarter for the dean's clean-nest program, to $432 for a single room, 23 meal program.

While on-campus living offers many advantages, it also has its disadvantages. Anyone who has shared a suite with three roommates trying to make an 8:00 class knows what inconvenience communal living can be. A few roommates will also suffer disappointment at university policy prohibiting cooking, alcoholic beverages, and all night visitation in residence halls. Those accustomed to evening living expenses, including food, gasoline, clothing, and recreational expenditures, by the time the student has bought Alafia Trail and FTU Boulevard traffic for a week he is probably wondering whether he's going to make it through the time and the money to attend classes.

At this point, commuter and dorm students are no doubt wondering how it is possible to live "across the street".

Actually, it's not as bad as it sounds. While living off campus may cost up to $300 more per quarter, it is often not the case. In many respects, the increased living expenses may be worth the added privacy, freedom, and flexibility only obtainable with off-campus housing. Many apartments are equipped with a washer and dryer, refrigerator, and stove, and some even come with a garbage disposal and dish washer. Students may live by themselves, with a roommate, or with up to three roommates.

Apartments are generally quieter, and more spacious than their residence hall counterparts, and they provide a haven from the university.

Which way of life is best? To many students, off-campus living offers both a peaceful existence and a more relaxed environment. Many off-campus students feel they are living "across the street". The Greek system was taken out of the old greek page was taken out. Delta Delta Delta, the greek column was taken out. Class Scheduling Services To Begin
By Pat Strange
A new service is beginning for FTU students who find themselves with a conflicting class schedule.
A sign-up sheet is located in the Student Co-op Office (Adm. 118) for students with complaints about FTU's scheduling.
There is a place for your name and your particular problem.
The idea originated with Lucy Caylor, a Senior majoring in Accounting.
Caylor said Business majors have experienced many problems in getting their required classes in time slots suitable to their needs.
Caylor decided to do something about the situation.
First, she talked to students in her own college to get their thoughts on the subject. She found that many others were as dissatisfied as she was.
Next, she asked for permission to put the sign-up sheet in the Co-op office. Permission was granted for this by Derrick Deutsch, chairman of the Student Co-op Council.
Caylor said when she gets students from other colleges on the sign-up sheet, she intends to start a committee to talk to the proper authorities to change the scheduling procedures.
Many of FTU's students either.
Cont. on Page 9

'Liverpool' Revives Beatlemania
By Re Harrison
Revivals have become a familiar occurrence in the music world.
So it would seem logical that the nostalgic craze of the Fifties would be preceded by a revival of the Sixties. Or does it? At this rate music may soon get ahead of itself.
Anyway, to talk about a revival of the Sixties, is to talk of re-creating Beatlemania which engulfed and dominated that era.
This is what the group Liverpool had to do as they performed in the Village Center Wednesday, October 10.
A show which consists entirely of Beatles music could be a disaster without top quality musicians.
You soon realized that Liverpool had the needed personnel to pull off such an act.
The set began with "Got to Get You Into My Life," a complete with the costumes from the album.
The music came through note-for-note and the members authenticated perfectly to bring out that total sound of Beatles material.
An excellent transition moved the group right into "Help From My Friends."
All members of the group supply vocals, but bass player Brian Messner brought out excellent audience response in singing "I Want To Hold Your Hand," and "I Saw Her Standing There," which included a brilliant guitar solo.
Many sat in amazement. They really did sound like the Beatles.
The tempo was fast and the songs came at you in a hurry, often together in medleys.
Again, excellent reproductions in "Come Your Eyes" and "Hard Days Night."
Audience participation never reached the level it should have.
The music was there but the spark needed to really ignite things failed to produce. "She Loves You" brought out a futile attempt for involvement.
Most people were content to sit and witness the cuts from their LP's come to life on stage.
Things mellowed out for a while with "Eight Days A Week" and " Magical Mystery Tour," the latter giving guitarist Rick Pearson a chance to move to keyboards for a display of his versatile talents.
But as had progressed through the years of Beatles debacles, and had moved in to more recent releases like "Egg Man" and "Revolution" of the tremendously successful "Abbey Road" album.
After appropriately, they ended with the last song the Beatles ever recorded together, "Get Back."
It was a long version of the song, complete with drum and guitar solos.
They quickly moved back into "Sgt. Pepper" as the epilogue of the evening.
The majority of the audience remained to call Liverpool back to "Roll Over Beethoven" and a second encore, "Birthday."
Liverpool performed excellently. However, the evening was pretty mediocre.
The most disappointing part of the night was the fact that the show was held inside. But if that didn't bother you, maybe the fact that some non-students were charged two bucks while others later entered for free anoyes you.
Liverpool must have shared my feelings that something wasn't quite right.
They apologized for not playing as long as usual as they left after a rather short performance.
The Liverpool performance was preceded by a foursome which presented various musical pantomimes: Mad Mountain Mike brought forth variety in their form of entertainment but too often were accompanied with boredom.

Air Force ROTC... program with sky-high benefits.

Some people might need to be coaxed with more than a full college scholarship to enroll in the Air Force ROTC Program. So, if free tuition, lab and incidental fees aren't enough... the Air Force offers a monthly allowance of $100.00, tax-free, in your junior and senior years, even if you are not on scholarship.
And flying lessons to those qualified provide the most exciting benefit of all. Interested?

Income Tax Preparation Course To Begin

A course designed to train students in preparing income tax returns will be offered at FTU beginning Oct. 30. According to a spokesman from the Office of Continuing Education, the course will be taught by experienced personnel actively engaged in tax preparation.

Teaching techniques will include illustrated lectures, class discussion and use of regulation tax forms.

Due to the ever changing tax forms and regulations the demand for qualified tax preparers is increasing. This course will qualify students to assist taxpayers in preparing their returns.

The course has a minimum of 30 hours classroom instruction. Classes will be held twice a week on Monday and Thursday, from 7 p.m. to 10 p.m. for ten weeks.

Bible Study Offered

Covering the Bible study group initially, I had my reservations. I suppose I expected some deep religious message, or an hour of listening to some minister, or I’m not sure. What I found was a warm welcome and smiles.

Once everyone had arrived, the group began with a song. Harmony was everywhere. The sound of voices praising the Lord for the happiness felt and shared. When the music ended, there was a moment’s silence, and then a refuge. A solitary voice spoke for all, speaking of a reaching out of kindred souls for nothing more than a union of spirit. Afterwards, there was a brief time of social amenities. Having given us time to meet one another and become acquainted, the spokesman for the group that hour led us into a discourse on a few parables from the Bible.

The hour ended with three thoughts: faith, forgiveness, and commitment.

When you enroll in Air Force ROTC you can get more: an opportunity for a scholarship, a chance for flying lessons… and

You get a tax-free monthly allowance of $100.

Interested?

Enter a Free Man
By Kerry Faunce

Tara Buckley, as Linda, proves to be the highlight of Tom Stoppard’s play, “Enter a Free Man” premiering this weekend, October 24, 25, and 26 in the Science Auditorium. Playing George Riley’s irrational teenage daughter, Tara appears at ease with her part, acts well, and captures the center of attention in her scenes. Playing the part of George is Doug Emerson as a neurotic, self-centered inventor who neglects his family in quest of producing a reusable envelope. Encouraged by Harry (Jeff King) and his swinging girlfriend, Florence (Joy Jones), George ultimately realizes his shortcomings when the envelope’s flaw is exposed and his partnership is dissolved.

One of the most believable roles is that of George’s wife, Persephone, played by Mary Monroe. Mary comes across as a hardworking housewife whose family is her only concern. She handles facial expressions and gestures well, and reminds the audience of the play’s English setting.

Directed by Dr. David Mays, “Enter a Free Man” is delivered with a continuity complementary to set design, and appears well rehearsed. Although the first act tends to ramble on with little action, the plot picks up momentum as the audience is left wondering if George and Linda are really planning to go their own separate ways. The dialogue, especially Emerson’s, flows smoothly and mistakes are inconspicuously covered.

George and his daughter, Linda (Tara Buckley), constantly argue about his nonpaying job and her motorcyclist boyfriend. (Photo by Mike Berman)

DOUG EMERSON plays George Riley, a self-centered, self-proclaimed, neurotic inventor, in Tom Stoppard’s “Enter a Free Man.” (Photo by Mike Berman)

A SPY? Able backs George as he interrogates Brown (Dennis Hill), an alleged spy for a competing stationery company. (Photo by Mike Berman)

An envelope gummed on both sides of the flap will revolutionize the stationery business. Jeff King, Michael Carlson, Chuck Aiken, and Jay Jones (not pictured) play the supporting roles of Harry, Able, Carmen, and Florence. (Photo by Mike Berman)

MARY MONROE skillfully executes “motherly” gestures and facial expressions as George’s wife, Persephone. (Photo by Mike Berman)

FTU THEATRE PRESENTS
FTU Employee Wins Locksmith Award

By Pat Strange

Vic Wikstrom, a locksmith with the FTU physical plant, has won the M. Leonard Singer Award. Wikstrom sent an entry to the technical section of the monthly periodical for locksmiths, "Locksmith Ledger." The purpose of the publication is to further the advancement of locksmiths in the U.S.

Wikstrom's entry concerned a tool he had developed to remove corroded cores from aluminum locks without marring them. The tool is made from solid core tron and is designed to work on 10 or more lock-sets.

The entry was accompanied by a detailed drawing and complete instructions on how to make the tool.

Wikstrom said that five or six entries are accepted for publication by the magazine each month, one of these being picked as the monthly winner.

Wikstrom received a plaque and a check for five dollars. The next step in the procedure is to pick a winner from 12 consecutive monthly winners for the M. Leonard Singer Award. Wikstrom won this competition also.

The award is picked on a point system by a panel of locksmiths and businessmen.

For this award, Wikstrom said he received a larger, nicer plaque and a check for $200.

Wikstrom started working for FTU in July of 1968. For eight years proceeding, he worked as a tool and die maker. There is no opportunity for a tool and die man in this area, Wikstrom said, therefore, he became a locksmith.

Locksmithing, until recent years, was handed down from father to son. A few years ago this system broke down. Sons were no longer interested in becoming locksmiths. Schools were established to teach the art of being a locksmith.

Wikstrom received his training from the Locksmith Institute in New Jersey, partly through correspondence and partly on-the-job training.

New Election Set

By John Bridges

The dates of the new Student Government Senate elections were set this week and Jeff Cepuran, commissioner of elections, informed the Future of additional plans.

The new election will be held on October 31 and November first at the Kiosk, with voting times unchanged.

Absentee balloting for students unable to vote at that time will be held on October 30 in VC 211.

Cepuran said that no new candidates will be allowed to declare and that all present candidates must attend a meeting on October 25th at 4 p.m. in VC 211.

Candidates not in attendance will be disqualified.

Candidates will be allowed an extra 25 campaign expenditure and the new campaigns will get underway October 26.

As to the problems confronting the elections last time around, Cepuran said that the absentee ballots from Co-op students went out last Wednesday. The Co-op office will mail campaign literature to its students on assignment.

Candidates' expense forms must be filed by noon on November fourth and all campaign posters must also be down at that time.

Cepuran estimated that 90 per cent of the candidates' expense forms from the last election were never filed.

Cepuran again said that vacancies would be filled by appointment of SG president Hunter Pitts.

Any interested parties should talk to Pitts about appointment.

C. Seithel catches "fisheye" view of ramp leading to the library entrance.
By Deborah Whaley

Can you beat the clock and save the world's supply of fossil fuel? The name of the game is Energy. When the world supply of fossil fuel is used up, the game stops automatically.

The Energy Game is part of a presentation given by Dr. Bruce Nimmo, Professor of Mechanical Engineering, under the sponsorship of the Oak Ridge Associated Universities. The game uses an analog computer called an energy-environment simulator, and includes a slide presentation providing background on the energy crisis.

The game was presented to an audience at the University of Tennessee and the University of Alabama, Alabama and South Carolina.

Lecture audiences have included faculty, students, school children, civic clubs, and even a group of convicts at Richmond State Prison.

The Energy Game has three sections. The top section represents the world energy supply, divided into natural gas, coal, and nuclear power. Each section has a control for regulation. The natural gas, coal, and nuclear sections each have a lever to control whether the fuel will be used for electrical or chemical energy.

The middle section of the game is divided into three parts. One part shows government or corporate uses of chemical energy. The next section shows environmental impact as well as the personal energy consumption rate. The last part of the middle section shows any deficit or surplus in electrical energy.

The bottom section of the game represents energy consumption. It is divided into usage: industrial, transportation, and household. Each section is subdivided. For example, household use is divided into air conditioning, appliances, lights, etc. Transportation use is divided into automobiles, buses, trucks, trains, railroads, and aviation. Industrial use is divided into refining, steel manufacturing, etc.

Every area of use in the three sections has a knob to regulate the rate of usage. As a clock ticks off to represent years, the participants must try to regulate energy usage so that the demand does not outstrip the supply. Players regulate which sources of fuel will be used to supply energy.

At the same time, environmental impact must be taken into consideration. For example, a switch to coal as the only supply of fuel will create pollution problems. The board will light up and show when a move by a player will damage the environment.

Players regulate whether the fuel will be used for electrical or chemical purposes. Players must avoid creating a chemical or electrical energy deficit.

To add social input, five people play the game at the same time. Each person is given a control board and has one fifth of the total control. If one person turns their air-conditioner off and another turns his to maximum use, the second person cancels out the conservation efforts of the first person.

Nimmo said he had seen the game get very heated at times. He said during one game one man reached across another man's control board and told him "to turn that thing off, look what you're doing." The machine keeps tabs of the players' decisions. The board shows the effects of player's decisions on the environment, the personal energy consumption rate and fossil fuel depletion.

Nimmo said there are a lot of things built into the machine that can give some perspective on the energy crisis.

One thing the machine shows in the short life span of petroleum and the possibility of depletion of the world supply of fossil fuels. It gives you a feel for the environmental impact of some of the options you choose to go with," he said. He added, "It shows the importance of how we distribute fuel (for electrical or chemical use) or how we use hydroelectric power, nuclear power, and new technology."

Nimmo said the Energy Game is a "super device to help people visualize some of these things" that must be taken into consideration in dealing with the energy crisis. "The beauty of it is that it lets them teach themselves," he concluded.

Dr. Bruce Nimmo demonstrates Energy-Environment Simulator, an analog computer used to make people informed of energy situations. (Photo by Mike Berman.)

AAUP Pursues Bargaining Position

By Deborah Whaley

Collective bargaining, extension of the withdrawal period and retention of student exams and papers were discussed at the Faculty Senate meeting Oct. 17.

An Ad Hoc Committee of the Faculty Senate compiled a report on collective bargaining. The Senate carried a motion to distribute copies of the report to the rest of the faculty.

The report states that expense funds for consultants and secretarial services for the report were provided by the university administration. However, the committee says in the report it was completely free in its investigation and the university administration in no way influenced the contents of the report.

Members of the University Faculty Grievance Committee are to be insured, full-time, non-administrative faculty members.

Whether chairpersons of departments may serve on a faculty grievance committee was discussed.

Several senators questioned whether chairpersons of departments were considered faculty or administration.

A proposal submitted to the Faculty Senate by the Student Senate to extend the withdrawal period to six weeks was returned to the committee for further consideration.

The committee is taking a poll of faculty members and will be studying to see if there is a need to extend the withdrawal period.

Dr. Gallagher, chairman of the Faculty Senate, read an opinion of the Chief of Bureau of Records in Tallahassee, stating that the length of time student papers and records are retained is up to the individual professor.

The meeting was recessed until Oct. 24.

The next regular meeting of the Faculty Senate will be Nov. seventh at twelve p.m.
In a tumultuous week of soccer, 'TU's Boosters alumni weekend offered exciting events, including Tony Smith's impressive victories in a varsity tennis tournament as the Knights are preparing them to compete in the nation's premier tennis competition.

Tony, Smith, Quick and Agile

By Joe DeSalvo

Spring is in the air for the FTU varsity tennis team as they prepare for the Nationals in July. To qualify, they need a five-mile course. The place winners and second-place recipients will be the ones to watch.

He's Sailing About In A Hockey Puck

By Walt Morris

Can Harold Downing sail a 130 pound Hobie 12 to a national championship? Downing, a FTU junior, will know the answer tomorrow. The 'Hockey Puck' is Downing's Hobie 12, which he will sail into the final round of the National Hobie Cat Championships at Key Biscayne, Florida.

Downing has been racing competitively for about nine months and qualified for the Nationals in July. To qualify, he would have to accumulate points in competition.

To win the championship, Downing must have the lowest number of points in nine races over a five-mile course. The place winners have the number of points a skipper receives. Restrictions on the boats are very tough. No modifications are allowed by the crew of boats. Each skipper is given the same chance to win and that is why the Hobie 12 is chosen for the races.

Downing is ranked second on the Hobie 12 list of the nation's top ten, but he can't put any points on the board. The Hobie 12 is a durable and quick boat, which is why the Hobie 12 is chosen for the races.

Wood feels next spring's schedule will be the toughest we ever had. It's representative of a wide area of the country.

The Boosters offer three basic membership plans that entitle members to attend all athletic contests, play in a new doubles tournament, and purchase tickets to the Tennis Club event.

In conclusion, the three impressive victories in a week for the Knights are a testament to their hard work and dedication. With the success of the newly resurfaced tennis courts, the Knights are poised to make a strong showing in the Nationals.

Booster Prepare For Autumn Drive

By Pat Murray

The Boosters Club was organized in the fall of 1973 by a group of people who had expressed interest in forming an organization to raise funds to support the Booster's Club. The Boosters Club is composed of 14 members who coordinate several social activities including a membership drive cook-out on November 24, and lend limited support for attendance at all athletic contests.

The Boosters Club will also coordinate membership in the FTU Foundation. Membership in the Boosters Club will entitle members to purchase season passes for their families at reduced rates.
Kappa Sig Defender pressures DTD quarterback, in KS's first win of the season.

**Archer Aiming At Regional Title**

By Walt Morris

The FTU Archery Team will be seeking its second victory in two weeks by defeating Dorm A, the southeastern Regional Champions at Brevard Community College.

Last week FTU put its best foot forward by winning the University of North Florida, Brevard C & Robert University in the FTU Invitational.

The Knights' hopes for a second first place finish rest with John Johnson and Tina Reed. However, the chances appear dim because FTU will not have the services of Sam Reyna. Reyna's eligibility is up and he will now turn his efforts to coaching the young team.

Miss Reed has been finishing second and third this year in the Women's Individual. Individual behind her is teammated from Stetson. Miss Reed transferred to FTU following her sophomore year.

According to Reyna the biggest factor to overcome this week will be only one archer. "The bad and should make a big difference," says Reyna.

The FTU team members have been shooting field targets all summer to get ready for the season. The team hopes to finish high in as many meets as possible to qualify for the National Championships. Money is another factor that will determine if the team goes to UCLA. The team only has $400 to go to the tournament. The National Championships receive no money from the NCAA but is supported by the schools that have teams and from donations from archery-land across the country.

A big disappointment for the team was that Reyna did not make All-American. A protest has been filed because archers from San Bernardino and Arizona State dominate the All-American squad each year and the coaches from the two schools are on the nominating committee.

"The southwestern colleges are trying to get the Nationals as far away as possible," Reyna said. "The fewest southeastern teams the better for them. Florida is rated about fifth in the nation and they are getting scared. Reyna has qualified for the Olympic Trials and is eligible to try out for the World Team. He also won the Southern U.S. Championships this past summer.

**TYES I, Dorm A Lead Volleyball**

By Linda Mitchell

After a full week of Women's Intramural Volleyball, only Tyes I and Dorm A were still unbeaten. Tyes I remained undefeated after putting away Crew, Dorm B, Zeta, and even their own sister team, Tyes II. Dorm A also stayed in the winn­ers' circle behind the efforts of Krems, Tri-Delta, and Alpha Tau Omega Little Sisters.

Tyes II remained the top contender for second place losing only one game to Tyes I. Tyes II team beat A TO Little Sisters three times before falling to Tyes I.

Tri-Delta lost four games in a row, but bounced back on Monday to beat the Crew team, handing them their second defeat of the season and knocking them out of second place.

**TKE Bombs SAE SX Scares ATO**

By Joe DeSalvo

Lambda Chi Alpha and Tau Kappa Epsilon continue their undefeated ways. Both teams remain tied for the lead in the Fraternity League. LXA went into Wednesday's action 4-0 while TKE carried a 3-0 record.

In LXA's game against Kappa Sigma on Thursday, Oct. 12, three Dave Hudick touchdown passes with two of them to Phil McKinnis gave LXA a com­fortable 30-19 halftime lead. KS and LXA exchanged scores in the 2nd half to give LXA a 26-24 decision for win No. 4.

In a close battle, TKE with the help of two touchdowns by Larry McCarroll from quarterback Steve Jackson got by a stubborn Sigma Chi squad, 39-19. Scott Radley scored touchdowns for SX which missed two important extra point attempts.

Rounding out last Thursday's action, ATO buried Delta Tau Delta, 26-6. ATO quarterback Joe Hart ran for one touchdown and threw four others in a well balanced scoring attack. Chi Phi, behind quarterback Steve Kurzdoke's three scoring passes had no trouble defeating SAE 21-6.

In Independent League action on Wednesday, Oct. 16, LXA Gold used quarter back John Swank's strong arm to defeat TKE 26-6. LXA Gold receiver Jim Robish pulled in two first half touchdowns and also ran a second half interception for another score. A pass to Neil Mallins completed the LXA Gold attack.

Smoker's Union took a slim 7-6 lead into the second half but two Dave Johnson scores after the intermission proved to be too much for SAE as they were victimized by Smoker's Union, 26-12.

In a defensive battle, a first-half safety by Mark Voorhis gave God's Squad a 5-0 win over AFROTC.

In Monday's action, TKE won their fifth straight, toutinging SAE 64-0. Steve Jackson ran for one score and threw for four more scores to lead the offensive charge for TKE. In a close ballgame, Ken Lotz's second half touchdowns gave KS their first win of the season, a 12-7 verdict over DTD.

ATO broke a 13-13 halftime tie with two second half touchdowns to defeat SX 26-19. ATO quarterback Joe Hart threw three touchdowns with Kevin Powers grabbing two scores. Pete Heckman scored twice for SX.

Chi Phi rolled by Pi Kappa Alpha 26-7 with Chi Phi quarterback Steve Kurzdoke throwing three touchdown passes.

On Tuesday, Black Student Union remained undefeated shutting out AFROTC 14-0.

**Inspirational Results**

| FIRST MEN'S TEAM | Sam Reyna | Tina Reed |
| FIRST WOMEN'S TEAM | Maurice Cavette | Miss Reed |
| SECOND WOMEN'S TEAM | Patti Mount | Tina Reed |
| SECOND MEN'S TEAM | Sam Reyna | John Johnson |

**Results**

Wednesday, Oct. 16

LXA Gold 26, TKE 12

Smoker's Union 20, SAE 13

God's Squad 8, AFROTC 8

Thursday, Oct. 17

LXA 28, KS 6

TKE 28, EX 6
