Potts Relents on Elections Decision

By John Bridges

SG president Hunter Potts this week disagreed with the findings of the Elections Commission, which invalidated the results of last week's senate elections.

Potts said that he would, however, back their decision. The SG president then went on to inform the FutUre of several pending issues.

The letter to the elections commission is included on page 12 of this issue.

Potts disclosed the SG offices received a reply from Florida Attorney General Sherris's office regarding a request SG made last April.

"It's not as clear as I'd hoped," Potts said. The request was for a ruling on whether or not Activity and Service fees could be deposited in an account outside the State Treasury. Such an account might then allow easier access to the funds.

The reply stated that such an account was not utilized but that restrictions involving the funds would still stay the same. The procedures would not be lessened.

Potts said further that he is planning to attend a meeting on Monday of the State Council of Student Affairs.

Finally, changes in the withdrawal policy of the university are now before the Faculty Senate instruction committee.

The proposed changes began last year in the Student Senate and call for an extension of the present withdrawal deadline.

The faculty committee is presently compiling additional statistics of the number of university withdrawals and examining the policies of other universities.

$19,000 Grant Finances Medicine and Morality

By Cam Pyle

In Cape Town, South Africa, on December 3, 1967, Dr. Christian Barnard performed a heart transplant operation, removing the heart from a critically ill body of Louis Washkansky.

Barnard had explained the girl's irreparable brain damage to her father and obtained his permission to attempt the transplant, but she was still waiting out of conscience and a sense of professional ethics for the heart to stop beating of its own accord before proceeding.

This single incident quite dramatically focused public attention on critical questions of morality in medicine. In this case and others of similar nature, what is to be done with the living body once the life is past? Should Dr. Barnard have obtained his father's permission to attempt the transplant, or did he still want out of conscience and a sense of professional ethics for the heart to stop beating of its own accord before proceeding?

This single incident quite dramatically focused public attention on critical questions of morality in medicine. In this case and others of similar nature, what is to be done with the living body once the life is past? Should Dr. Barnard have obtained his father's permission to attempt the transplant, or did he still want out of conscience and a sense of professional ethics for the heart to stop beating of its own accord before proceeding?

This single incident quite dramatically focused public attention on critical questions of morality in medicine.

These types of questions will be discussed at length early next year in "Medicine & Morality:" a five-part series presented by FTU and coordinated by Dr. Robert G. Flick, Chairman of Humanities, Philosophy and Religion.

This series will be made possible by a $10,000 grant from the Florida Endowment for the Humanities.

Formerly, the question of life or death was fairly simple, when the vital life processes stopped the person died and there was little or nothing that a physician could do.

Now with the advent of new and highly sophisticated medical technology, these same processes can be indefinitely prolonged. At what cost is this to be done? Are all the man hours and dollars expended in the care for patients for whom there is no real hope an inordinate burden upon the resources of society? Is it a fact that there are not enough hospital facilities, life-saving machines, or transplantable organs to go around.

Who is to decide which patients shall or shall not receive necessary treatment?

Should it be provided only to those who can afford it, offered on a first-come-first-served basis, or should medicine be "socialized?" at the cost of private practices in order to provide for all.

RHA Discusses Price Hikes

ARLA FILKO

In a meeting sponsored by the Resident Hall Association (RHA) October 18, approximately 100 resident students discussed rising prices of the Food Service Operation.

President over by David McKiessick, the meeting was also attended by the Vice President of Morrison, Inc. Mr. Blokes and the District Manager for Morrison, Ron Willis.

The purpose of the meeting was to explain the reasons for current price hikes and discuss methods of avoiding price increases.

Inflationary prices on food, paper products, utilities and other extent services are cited as the culprits. For example, wholesale food costs are up 36 percent and electricity rates are 20 percent.

Suggested proposals by RHA president, Sharon Esposito, to avoid further price increases and methods to alleviate the problem included installing private kitchen in the dorms or a shared kitchen on each floor.

According to the Director of Housing Operations, Freeman Coff, these suggestions are neither realistic nor practical, as cooking in the dorms would create excessive and plumbing problems as well as fire hazards.

It is estimated that it would take four years and cost $250,000 to install individual kitchens in the dormitories.

Many of the students present at the meeting expressed complaints concerning the quality and quantity of the food served. A couple of students expressed concern at not receiving adequate attention from Food Service, due to special dietary and medical problems.

John Williams, Director of Administrative Services explained, "In order to maintain realistic pricing of meal plan, we should be approximately 30 percent higher on the average." Williams added, "I have heard an equal amount of compliments concerning the Food Service. We do the best we can as we are not set up to cater on an individual basis. We have to satisfy the best we possibly can the majority of the students."
The Public Education Building Amendment, a state program for funding the construction of state educational buildings, will be on the November election ballot this November.

In 1963 Florida voters approved a constitutional amendment to continue state bonding authority and to allow the state to use funds from utility company revenues from utilities gross receipts tax program. In 1969 the voters approved the Amendment One, a state amendment to the Florida Constitution which would continue the authority of the state to use funds from utility company taxes to finance building construction.

According to the Florida state university system, the state university system has received a total of $11,145,653 from this program since 1962. The following is a breakdown of how much each university received in 1974 as of October 25, 1974:

- University of Florida: $4,601,964
- Florida State University: $8,421,104
- University of South Florida: $3,387,629
- Florida Atlantic University: $4,671,457
- University of West Florida: $3,492,236
- Florida Technological University: $2,981,611
- Florida International University: $3,142,309
- University of North Florida: $3,404,979

In addition, Valencia Community College received $5,771,000 in funds up to fiscal year 1973-74. The state allocated $5,300,000 more in funds to Valencia for fiscal years 1974-75 and 1975-76. Despite a decrease nationwide in the demand for new school buildings, Florida's population has been growing at the fastest rate of any major state in the past 10 years.

By 1978-79, the public schools, vocational-technical centers, community colleges and universities must provide new buildings for a projected increase of 400,000 students.

Educational Building Amendment

**Question for Voters**

- The state university system has received a total of $11,145,653 from this program since 1962.
- In 1969, Florida voters approved Amendment One, a constitutional amendment to continue the authority of the state to use funds from utility company taxes to finance building construction.
- The state allocated $5,300,000 more in funds to Valencia for fiscal years 1974-75 and 1975-76.

Eerie arrangement of fixtures give science fiction effect to campus lighting outside Administration building.

By Alan Crouse

Music Department

Adds Instructors

The music department has added two new faculty members: Lyman Brodie and Robert Harrison, who bring with them notable credentials as teachers and performers.

Brodie, an instrumentalist, has appeared with the Tampa Philharmonic, Florida Gulf Coast Symphony, Florida West Coast Symphony, and the Dallas and Ft. Worth Symphonies. In 1971, he was the principal trumpeter with the American Wind Symphony in Pittsburgh. Harrison, also an instrumentalist, has performed extensively as a clarinetist with symphonies and various chamber music groups.

Both Brodie and Harrison have completed residency requirements for their doctorates: Brodie at North Texas State and Harrison at Ohio State. Brodie, who graduated from the University of South Florida in Tampa in 1971, received his master's in music from North Texas State.

For the past 2 years, he has taught brass in the public schools and community college in Denton, Texas. Harrison came to FTU after five years at Riddell College, Tiffin, Ohio. There he built a concert band and a college community orchestra. He also has taught several years in public schools in Omaha and other Nebraska cities.

He received both his bachelor's and master's degrees in music from the University of Nebraska.
By John Bridges

"Chariots of the Gods" is Sun International's latest entry into the realm of exploitation films, trying to wrest inflated entertainment dollars away from trendy Americans.

The film has done well at the box office, but is about as rewarding as an evening playing pinball machines, and as pointless as Erich Von Daniken...

Grindle To Speak At Frat Meeting

Art Grindle, the famed Orlando automobile dealer who jumps on used vehicles saying "I want to sell you a car," will be the featured speaker at a meeting of Phi Beta Lambda, the professional business fraternity.

"Gods From Other Space"...
Editorial

The question is often asked: “What does an editor do?” It is easily understood that the News Editor collects news, the Feature Editor writes feature articles, and the Sports Editor covers athletic stories. This is the old domino theory. Their reasons would be economic. The editor is an administrator in a sense for it is his duty to oversee all the employees of the paper. Each phase of the plan is under his control. The editor must guide the staff, train the staff and build the staff. This is probably the only job an average reader might think of.

Another job the editor must do is to decide what goes in the paper. Almost inevitably, when a person wants something in the paper, the editor does not. In any given week, at least one person has allowed a reporter to interview him and then decided that he does not wish the interview to be printed. The editor makes the decision. The editor must maintain a balance between the reporter who has spent a great deal of time and effort in writing the story, and the person who pays the editor, the student, who is often in a position of higher authority than the editor.

The editor often has to scratch people’s backs. It seems that in order to get information or permission for various things, there are usually strings attached. The most common string is that everyone who is anyone has something he wants to put in the paper. Sometimes the protection of this string carries away the editor.

The editor is bombarded with Letters to the Editor. It seems that the majority of these letters are aimed directly at the editor. It appears that these people think that the only thing the editor has to do is listen to the people who have something to tell him. He must give time to the people who do not have something to tell him. If a person needs to be taken to the printer, suddenly everyone disappears, leaving the editor with the work. If a person needs to be called by someone else, the editor is filling that position.

The editor censors the paper. The decision on printing obscenities in the paper, the content of the editorials and all sorts of hard decisions rests on his shoulder.

If, for some reason, the editor is not enough, the editor is constantly defending his position. He always has to assure students that the paper is not censored. It is this jurisdiction, the paper smoothly and efficiently and that he is doing a good job.

Besides missing classes to get the paper out on time, spending every available moment to put the paper together are some of the things the editor still needs to find time for social activity and much needed sleep.

The next time the reader thinks of the editor it might be noted that the editor has a job too. And that people who read the paper but that does not mean mistakes are his fault. The editor has a job to do and very few people make it one easy.

Committee Chairman Complains of Class Scheduling

By Mike Hall

Our Administrators are always talking about the cartoon about campus, I have ample opportunity to talk with them. They are all, for the most part intelligent, capable administrators. They are just had fun to talk to, especially when the topic is student rights and privileges.

Why just the other day I had the opportunity to talk to Leo Goff (Director of Housing) and Paul McQuilken (Dean of Men) on the subject of refrigeration in the dorms. This all came about when a friend of mine, who is a diabetic, went to Goff to ask permission to put a small refrigerator in his room to store her insulin. Goff said that this was against policy and he has no refrigerator. This was against policy and he has no refrigerator. Therefore, he asked me to give it to her R.A. to keep in her refrigerator. Well, she had tried to do this but the whole health center had been monitoring her medication.

She had tried to do this but the whole health center had been monitoring her medication. She had never tried to do this but the whole health center had been monitoring her medication. She had never had to do this but the whole health center had been monitoring her medication.

When I heard of this instance of “accept on the individual”, I always called God and then McQuilken to find out just what the reasons were for this eim- bargo on refrigerators in the dorms. They gave me no reason of reasons which boiled down to three general categories: (1) The plague of the summer of ‘71; (2) Nobody else has them, why should we; and (3) Refrigerators lead to hard stuff, like cooking. The plague of the summer of ‘71 came as about a result of a noble experiment by the ad- ministration. They thought (since the dorms were overcrowded and people were cramped at the time) that they would allow dorm students to have refrigerators and feed them.

Well, by the end of the semester the little savages scattered so much food around the dorms that rats and insects ran rampant. Apparently someone surely would have died had the Department of Health come in and practically shut the dorms down. Now two students who were in the dorms at the time report that the Department of Health did raise some hell but only about a few specific rooms and not the entire buildings. As for the rat and the bugs, the little beggars are still there, three years ad d no refrigerators.

Another reason for not having refrigerators in our dorms is because other state universities have refrigerators. However, University of Florida has refrigerators in many suites in their dorms and where they are not standard equipment. They can be rented and installed by students.

Now about argument that refrigerators lead to hard stuff. This is the old domino concept at work again. You know, marijuana leads to heroin ad- diction and now that we are out of Vietnam, Australia is going to be the next.

What I’m saying is there will be (as presented in the dorms without refrigerators (see Dr. Goff’s work that is utter nonsense and is legal) But if refrigerators are legalized, I don’t envision all the students running out and buying refrigerators. Televisions are legal in the dorms, but not every room has one. There are many things that can be kept in cold storage that do not have to be kept cold (like insulin, for example.)

I don’t believe the above moves. And reason that the administration objects to refrigerators, however, I think their reasons would be economic. From what I’ve seen, they seem to think in dollar signs. If this is the case then there are probably two reasons for this. The added cost is electricity, and 2) the loss of business which would occur if students were given refrigerators.

SAUMER W. Caylor Chairman, Curriculum Committee

The public document was published weekly at Florida Technological University by President Charles N. Millican, and distributed free of charge for the University community.

LETTLE TO THE EDITOR FROM CAYLOE

Students: If the “average” college student was ever someone who lived on campus with no real commitments other than attending classes whenever they were offered, that person is not today’s F.T.U. student. We, the students of F.T.U., work, we have families, we commute to and from campus. Yet every registration process is seemingly the same. It is all but impossible to work required classes into commuting or working schedules.

There is no justification for class scheduling. The class scheduler gushes to the students that he does not schedule classes against the students. We do have to speak up and make our needs known. If you want input from students to be the basis for the scheduling of vital classes, then start by going to the Co-operative Educational Services, the Dean of the Administration Building, and leaving information there as to what you want and how you can be contacted.

This is for all students, all colleges. GO AND PUT YOUR SATISFACTION IN WRITING!!

Illegal Parking

Fellow Parkers:

I have been noticing that for the last week or so there have been a lot of illegal parking.

Many D stickers in B places and the most infuriating of all when the D and B space in the H places.

Remember H means handi-

capped person parking.

These spots are for handi-
capped students. So who should you who can walk park in their places?

Even if it’s just to load or unload on weekends, or for a few minutes while you go over to the administration building or because it’s closer to your next class is no reason to park in them.

The handicapped student parks there because he can’t walk to his next class, or he can’t just jump out and run to his class so he’ll have time to read this.

The handicapped student needs more room to get his chair in and out of the car or you can’t.

These spaces were made for

Management Apathy Lampooned

Editor:

Last Friday, you rebuked a letter concerning a lack of voter response to the SG elections, October 11. An obviously ridiculous remark was made to Robert L. Smithers' letter about "all the campaign posters" staring us in the face. Then I read an editorial and a column by Mike Hall about another, and no one supplying the PU'TUR with any "hot tips." Well, that was the last straw. I can't sit back and remain silent any longer.

Over the last eight years, I have been enrolled at two major universities and a junior college and this past election was truly the most pitiful example of "SG" organization I have ever seen. With my present class schedule, I travel the length of this campus at least twice a day—beginning at 8 a.m. and ending at 3:30 p.m. I'll be damned if I bumped into a single candidate out canvassing or even shaking hands. Why doesn't Mike Hall get off his butt and round up a few candidates for an interview or panel discussion— or something besides wasting good column space with "Nobody calls me..."

I might add that a full page "GO VOTE" as in the PU'TUR is entirely futile if a few candidates' faces and platforms don't appear along with it.

What about apathy! Let's talk about it. I stopped at Hunter Pot's office during orientation to fill out an application for the newly adopted or revised judicial board. I left the applications as past western university student, a veteran, and married might be the type of experience needed by this board. Three weeks later I hopped into Hunter's office and asked again about my application. I was told that the SG Attorney General was handling the appointments and that he would get back with me about the possible appointment. Well—it's the 18th of October and I haven't even received a "Kinz" alfoof letter mentioning an interview with this mystery Attorney General.

Let's put things in perspective, gang! As Ken Wagner, in the Computer Science Department, has shown us—once again management has demonstrated their level of thinking—NONE.

Sincerely,
Robert B. Muirhead

Editors Note: I hardly see how my comment about campaign posters has much to do with the fact that candidates were not out canvassing or shaking hands. I never said that they were—only that with all the signs up, it should be obvious that an election is imminent. As for Mike Hall—since did a newspaper columnist who always writes for the editorial page get the job of setting up an interview with the candidates? Also, Mike wonders how he is to put a panel discussion in the PU'TUR. There was an interview of candidates that did appear in the PU'TUR the last day of elections, which was the first possible time for the information to be gathered, due to our Tuesday deadline each week. If you called Hunter concerning the judicial board. He remembers meeting you but says that at the moment he has many other things that are of greater concern. You may have noticed, for example, that the SG elections were contested and are scheduled to be run again. Hunter said that it is only at this time that the Attorney General has received enough applications for a new judicial board and is beginning to look over applicant's qualifications. It should be within the next two weeks that you are contacted. There is already a judicial board that was appointed spring quarter that will continue to function until Hunter decides that a new one is needed. For management, demonstrating their level of thinking—if you willl—will require the membership in my organization to do several spelling, punctuation and grammar checks. Mike, I'm afraid you were corrected in your letter before sending it to the printer....

Mercer Criticizes Abbreviation

Ms. Denonatus:

On Friday, October 4th, I submitted to your News Desk a release concerning an event our organization was planning for October 11th. In that release I printed the name of our organization in full with no abbreviations. The official abbreviation for our organization is as above: ACM. However, you did not use this abbreviation. The normal abbreviation for the word "association" is ASSOC. However, you did not use this abbreviation, either. Instead, you used ASS. Where did you learn "grammer" rule? We are a society of professionals dedicated to computer science. Your headline of "ASS. FOR COMPUTER MACHINERY" is a degradation not only on my organization, but on your ability to write. In view of this situation, I demand that an explanation be printed in your next available issue explaining your mistake. Such carelessness is unexcusable.

Sincerely yours,
Christopher C. Mercer, Jr., Chairman, PU'TUR

Editor's Note: The explanation is that the PU'TUR staff takes the copy down to the printer's and leaves it there. This year we are no longer doing our own layout. It is doubtful that anyone on the staff called your group an Ass., but it is possible that happened. I feel, however, that the print shop may have overlooked the headline and let it run, when the paper was being pasted up. You may question where I learned "grammar" rule, but I might in turn question where you learned to spell. (Consult Webster's New World Dictionary, p. 237). I might also wonder how the president of an organization would blindly accuse the editor of the mistake. I do not see cash and everything that the members of my staff do, and I see nothing that the printer does until the paper is delivered. By the way, I don't like to be called Mr.

FEIFFER

AVAILABLE WEEKLY IN FIVE OR SIX COLUMN SIZE

For Release Week Beginning Sunday, Feb. 1, 1970

WHEN I WAS A KID, I USED TO DREAM OF BEING A COWBOY.

NOW I'M FORTY, AND I'M NOT A TEST PILOT.

IM NOT A COWBOY, AND I'M NOT A BALL PLAYER.

WHO EVER DREMED IT WOULD BE THIS HARD.
Many Lifestyles available to FTU Students

by Kerry Fanner

If you are not one of the 432 students, who managed to obtain residence in a university residence hall, you will have to live off campus at home or in an apartment.

This year, over 200 students were turned away from university housing for the fall quarter. Those previously occupying rooms were given first priority before new applications were accepted. With the present retention rate of 76 percent, approximately 100 spaces were available for new occupants assigned to a "first come, first served" basis.

Living on campus is certainly the most convenient way to attend college. Facilities include the food service, and classroom buildings are within walking distance. In residence halls, movies, dances, and special programs are organized with funds received from activities fees. In addition, various programs are organized by individuals, resident centers, students, and clubs. Housing costs range from $325 per quarter for a dorm room, to $432 for a single, 21 meal program.

While on campus living offers many advantages, it also has its disadvantages. Anyone who has shared a suite with three roommates trying to make an 8 a.m. class knows what inconvenience communal living can mean. A few sore throats will also suffer discomfort as university policy prohibits cooking, alcoholic beverages, and all night visitation in residence halls. Those accustomed to home-cooked meals may find the mass-produced lunchroom "specials", a bit gastronomically disturbing.

For some, the answer is commuting. Those over 20 or 30 miles, you may even save money. Those who are not in the distance are generally compelled to rent as a result of cost.

Apartment living may appear glamorous at first thought. The planner, however, may quickly wear off when confronted with the first month's bills. Rent may range from $60 to $250 per month, depending on the size, location, and number of people occupying the complex. In addition, most apartment complexes figure deposit and/or security fee prior to occupancy, and utilities are purchased separately.

Once the initial expenses are met, the apartment dweller must cope with everyday living expenses, including food, gasoline, clothing, and recreational expenditures. By the time the student has bought Alafia Trail and FTU Boulevard traffic for a week he is probably wondering whether he's being overcharged for the time he and the money to attend classes. At this point, commuter and dorm students are no doubt wondering how it is possible to live "across the street".

Actually, it's not as bad as it sounds. While living off campus may cost up to $300 more per quarter, it is often not the case. In many respects, the increased expenses may be worth the added privacy, freedom, and flexibility only obtainable with off-campus housing. Many apartments are equipped with a washer and dryer, refrigerator, and stove, and some even come with a garbage disposal and dishwasher. Students may live by themselves, with a roommate, or with up to three roommates.

Apartments are generally quieter, and more spacious than their residence hall counterparts, and they provide a less hectic atmosphere from the university.

Which way of life is best of all? It depends. At this point, off campus, all but one were satisfied with their present housing. The one dissatisfied student was commuting from Vero Beach.

Living on campus provides convenience and a moderately priced housing cost while restricting privacy and flexibility. Off-campus living features privacy, freedom, and flexibility at a greater loss to the pocketbook.

"Campus life is what you make it," commented one student. "It doesn't really matter where you live."

Union Enroll

8808

According to a source in the Office of Academic Affairs, preliminary figures for the fall quarter are 8,808 for head count and 6,006 for Full-Time Equivalent (FTE).

However, a source warned that these figures are subject to change, because of those students who failed to pay their tuition and consequently must be dropped from the rolls.

The head count figure represents the number of students currently enrolled, while the FTE is a figure computed from the head count and the number of credit hours students signed up for.

The FTE is at the heart of a state university's budget proposal accounts for 30 percent of the funds, which are used to finance the student's college education and to run the university.

The preliminary figures were recently announced at a meeting of the faculty senate and compared to last year's FTE figures of 8,566 in fall, 5,667 in the winter quarter and 4,667 of the spring.

Safety Director Named

JAMES ELLER

James K. Eller, who has been a member of the administration at FTU since 1968, has been appointed the university's first Director of Safety Programs.

In his new position, Eller will be responsible for conducting educational programs emphasizing safety practices for all members of the FTU community and to familiarize them with current rules and regulations.

The appointment is reflective of the university's policy in meeting regulatory requirements of the Occupational Safety and Health Act (OSHA), said John P. Goree, FTU Vice President for Business Affairs.

Eller, who was FTU's first Director of Auxiliary Services, and previously served in that capacity from 1964-1966, had been a member of the Florida Industrial Commission, holds a master's degree in educational administration from the University of Florida.

Class Scheduling Services To Begin
By Pat Strange

A new service is beginning for FTU students who find themselves with a conflicting class schedule.

A sign-up sheet is located in the Student Co-op Office (Adm. 118) for students with complaints about FTU’s scheduling.

There is a place for your name and your particular problem. The idea originated with Lucy Caylor, a Senior majoring in Accounting.

Caylor said Business majors have experienced many problems in getting their required classes in time slots suitable to their needs.

Caylor decided to do something about the situation.

First, she talked to students in her own college to get their thoughts on the subject. She found that many others were as dissatisfied as she was.

Next, she asked for permission to put the sign-up sheet in the Co-op office. Permission was granted for this by Derrick Deutch, chairman of the Student Co-op Council.

Caylor said when she gets students from other colleges on the sign-up sheet, she intends to start a committee to talk to the proper authorities to change the scheduling procedures.

Many of FTU’s students either.

‘Liverpool’ Revives Beatlemania
By Ike Harrison

Revivals have become a familiar occurrence in the music world.

So it would seem logical that the nostalgic craze of the Fifties would be preceded by a revival of the Sixties. Or does it? At this rate music may soon get ahead of itself.

Anyway, to talk about a revival of the Sixties is to talk of re-creating Beatlemania which engulfed and dominated that era.

This is what the group Liverpool had to do as they performed in the Village Center Wednesday, October 11.

A show which consists entirely of Beatles music could be a disaster without top quality musicians. You soon realized that Liverpool had the needed personnel to pull off such an act.

The set began with “I Want to Hold Your Hand” and “I Saw Her Standing There,” which included a brilliant guitar solo.

Many sat in amazement. They really did sound like the Beatles!

The tempo was fast and the songs came at you in a hurry, often together in medleys. Again, excellent reproductions in “One Your Eyes” and “Hard Days Night.”

Audience participation never reached the level it should have. The music was there but the spark needed to really ignite things failed to produce. “She Loves You” brought out a futile attempt for involvement.

Most people were content to sit and witness the cuts from their LP’s come to life on stage.

Mime brought forth variety in the music. Liverpool’s mask was preceded by a foursome that total sound of Beatle material.

An excellent transition moved the group right into “Help From My Friends.”

All members of the group supply vocals, but bass player Brian Messner brought out excellent audience response in singing “I Want To Hold Your Hand” and “I Saw Her Standing There,” which included a brilliant guitar solo.

Many sat in amazement. They really did sound like the Beatles!

The tempo was fast and the songs came at you in a hurry, often together in medleys.

Again, excellent reproductions in “One Your Eyes” and “Hard Days Night.”

Audience participation never reached the level it should have. The music was there but the spark needed to really ignite things failed to produce. “She Loves You” brought out a futile attempt for involvement.

Most people were content to sit and witness the cuts from their LP’s come to life on stage.

Things mellowed out for a while with “Eight Days A Week” and “Magical Mystery Tour.”

The latter giving guitarist Rick Pearson a chance to move to keyboards for a display of his versatile talents.

But a show had progressed through the years of Beatles dominance and had moved in to more recent releases like “Egg Man” and “Revolution” of the tremendously successful “Abby Road” album.

And appropriately, they ended with the last song the Beatles ever recorded together, “Get Back.” It was a long version of the song, complete with drum and guitar solos.

They quickly moved back into “ Strawberry Fields” as the epilogue of the evening.

The majority of the audience remained to call Liverpool back to “ Roll Over Beethoven” and a second encore, “Birthday.” Liverpool performed excellently. However, the evening was pretty mediocre.

The most disappointing part of the night was the fact that the show was held inside. But if that didn’t bother you, maybe the fact that some non-students were charged two bucks while others later entered for free annoyed you.

Liverpool must have shared my feelings that something wasn’t quite right.

They apologized for not playing as long as usual as they left after a rather short performance.

The Liverpool performance was preceded by a foursome which preceded various musical pantomimes. Mad Mountain Mine brought forth variety in their form of entertainment but, too often were accompanied with boredom.

Income Tax Preparation
Course To Begin

A course designed to train students in preparing income tax returns will be offered at FTU beginning Oct. 30.

According to a spokesman from the Office of Continuing Education, the course will be taught by experienced personnel actively engaged in tax preparation.

Teaching techniques will include illustrated lectures, class discussion and use of regulation tax forms.

Due to the ever changing tax forms and regulations the demand for qualified tax preparers is increasing. This course will qualify students to assist taxpayers in preparing their returns.

The course has a minimum of 60 hours classroom instruction. Classes will be held twice a week (Monday and Thursday, from 7 p.m. to 10 p.m.) for ten weeks.

Bible Study Offered

Covering the Bible study group initially, I had my reservations. I suppose I expected some deep religious message, or an hour of listening to some minister, or I’m not sure. What I found was a warm welcome and smiles.

Once everyone had arrived, the group began with a song. Harmony was everywhere. The sound of voices praising the Lord for the happiness felt and shared.

When the music ended, there was a moment’s silence, and then a reflection. A solitary voice spoke for all, speaking of a reaching out for love, a brotherhood.

In conclusion, the speaker said, “The courses offered at FTU are open to students. We hope to attract more students who are interested in learning more about the Bible.”

When you enroll in Air Force ROTC, you can get more: an opportunity for a scholarship, a chance for flying lessons...and

You get a tax-free monthly allowance of $100.

**Enter a Free Man**

By Kerry Faunce

Tara Buckley, as Linda, proves to be the highlight of Tom Stoppard's play, "Enter a Free Man" premiering this weekend, October 24, 25, and 26 in the Science Auditorium. Playing George Riley's irrational teenage daughter, Tara appears at ease with her part, acts well, and captures the center of attention in her scenes. Playing the part of George is Doug Emerson as a neurotic, self-centered inventor who neglects his family in quest of producing a reusable envelope. Encouraged by Harry (Jeff King) and his swinging girlfriend, Florence (Joy Jones), George ultimately realizes his shortcomings when the envelope's flaw is exposed and his partnership is dissolved.

One of the most believable roles is that of George's wife, Persephone, played by Mary Monroe. Mary comes across as a hardworking housewife whose family is her only concern. She handles facial expressions and gestures well, and reminds the audience of the play's English setting. Directed by Dr. David Mays, "Enter a Free Man" is delivered with a continuity complementary to set design, and appears well rehearsed.

Although the first act tends to ramble on with little action, the plot picks up momentum as the audience is left wondering if George and Linda are really planning to go their own separate ways. The dialogue, especially Emerson's, flows smoothly and mistakes are inconspicuously covered.

An envelope gummed on both sides of the flap will revolutionize the stationery business. Jeff King, Michael Carlson, Chuck Aiken, and Joy Jones (not pictured) play the supporting roles of Harry, Able, Carmen, and Florence. (Photo by Mike Berman)
FTU Employee Wins Locksmith Award

By Pat Strange

Vic Wikstrom, a locksmith with the FTU physical plant, has won the M. Leonard Singer Award. Wikstrom sent an entry to the technical section of the monthly periodical for locksmiths, "Locksmith Ledger". The purpose of the publication is to further the advancement of locksmithing in the U.S.

Wikstrom's entry concerned a tool he had developed to remove corroded cores from aluminum locks without marring them. The tool is made from solid core- tion and is designed to work on 10 or more lock-sets.

The entry was accompanied by a detailed drawing and complete instructions on how to make the tool. Wikstrom said that five or six entries are accepted for publication by the magazine each month, one of these being picked as the monthly winner.

Wikstrom received a plaque and a check for five dollars. The next step in the procedure is to pick a winner from 12 consecutive monthly winners for the M. Leonard Singer Award. Wikstrom won this competition also.

The award is picked on a point system by a panel of locksmiths and businessmen.

For this award, Wikstrom said he received a larger, nicer plaque and a check for $200.

Can you beat the clock and save the world's supply of fossil fuel? The name of the game is Energy. When the world supply of fossil fuel is used up, the game stops automatically.

The Energy Game is part of a presentation given by Dr. Bruce Nimmo, Professor of Mechanical Engineering, under the sponsorship of the Oak Ridge Associated Universities. The "game" uses an analog computer called an energy-environment simulator, and includes a slide program giving background on the energy crisis.

The Citizen's Workshop On Energy and the Environment began the program a year and a half ago, before the energy crunch hit.

Dr. Nimmo said that before the Workshop could work on new methods to solve the energy crisis, it had to convince people that the crisis was real.

FTU received a grant to present a lecture and the Energy Game throughout Florida. Alabama, North Carolina and South Carolina.

Lecture audiences have included power company managers, educators, school boards, civic clubs, and even a group of convicts at Richmond State Prison.

The Energy Game has three sections. The top section represents the total energy supply, is divided into natural gas, petroleum, coal, hydroelectric power, nuclear power, and waste. Each section has a control to regulate usage. The natural gas, coal and petroleum sections each have a lever to control whether the fuel will be used for chemical or electrical energy.

The middle section of the game is divided into three parts. One part deals with fossil fuel on a worldwide scale, the second part deals with the demand for fossil fuel and the possibility of depletion of the world supply of fossil fuels. It gives you a feel for the environmental impact of some of the options you choose to go with," he said. He added, "It shows the importance of how we distribute fuel (for electrical or chemical purposes) or how we use hydroelectric power, nuclear power, and new technology." Nimmo said the Energy Game is a "super device to help people visualize some of these things" that must be taken into consideration in dealing with the energy crisis. "The beauty of it is that it lets them teach themselves," he concluded.

AAUP Pursues Bargaining Position

By Deborah Whaley

Collective bargaining, extension of the withdrawal period and retention of student exams and papers were discussed at the Faculty Senate meeting Oct. 17.

An Ad Hoc Committee of the Faculty Senate compiled a report on collective bargaining. The Senate carried a motion to distribute copies of the report to the rest of the faculty.

The report states that expense funds for consultants and secretarial services for the report were provided by the university administration. However, the committee says in the report it was completely free in its investigation and the university administration in no way influenced the content of the report.

Members of the University Faculty Grievance Committee are to be named, full-time, non-administrative faculty members.

Whether chairpersons of departments may serve on a faculty grievance committee was discussed.

Several senators questioned whether chairpersons of departments were considered faculty or administration.

A proposal submitted to the Faculty Senate by the Student Senate to extend the withdrawal period to six weeks was returned to the committee for further consideration.

The committee is taking a poll of faculty members and withering to see if there is a need to extend the withdrawal period.

Dr. Gallagher, chairman of the Faculty Senate, read an opinion of the Chief of Bureau of Records in Tallahassee, stating that the length of time student papers and records are retained is up to the individual professor.

The meeting was recessed until Oct. 24.

The next regular meeting of the Faculty Senate will be Nov. seventh at twelve p.m.

AAUP Pursues Bargaining Position
Thursday a week ago, shutting out Covenant College of Lookout Mountain, Tennessee 1-0. Saturday was another day for the books as FTU beat Rollins 3-0 for a 3-2 win against Jacksonville University. Combined, they total 36 points, a record for consecutive wins by a FTU's soccer team. The Knights will be going for win number six and fourth in a row this Saturday at 2 p.m. against Florida Institute of Technology of Melbourne, Florida.

It was a week filled with many heroes in the University's Cup. FTU could possibly be mistaken for the "Walking Wonders." All-American candidate goalie Winston Dubbene tuning in two stellar goal-free performances against Miami and Covenant.

Tommie Barling returned home the love score against Covenant with only 1:15 remaining on the clock.

Sloppy Dean Androutsos sending home both of FTU's three goals to be Jacksonville's, sending in a powerful first half of action only to twit an ankle in the second half and watch from the sidelines while the Dolphins attempted to overcome a 3-6 half-time deficit.

Quick and agile Tony Smith, darting and slicing through the field frustrating Dolphin defensive man Steve Cooper into defection and eventual ejection from the game when Cooper decided the only way to stop Smith was to steamroll him.

Our Romers, gaining unswerving hero status with his relentless speed and masterful ball handling, something only a coach could love.

Of the three matches, Miami proved to be the easiest of quests. FTU bolted out to an early lead while Dubbene guarded the nets like a Lioness shielding her cub.

The last minute score by Barling against Covenant culminated a Knight attack that was turned back time and again by the Knights' goalie, Bruce Kramer.

FTU outdid the visitors from Jacksonville, 3-0, but were unable to put anything past Kramer until the 85th minute. The Knights winning tally came after a John Brown shot was blocked by Kramer in the corner of the goal. The ball rolled loose and Barber was there to drive it home for the victory.

"We could have scored eight goals in the first 16 minutes," Rudy related. "But we had to shuffle our players in and out due to injuries and this cost us in our continuity." Listed among the FTU's key players were Androutsos with a twisted ankle, Doug Dyer with an ankle injury, and Walt Cordell with a hangover. In the reserve game the Knights prevailed 2-0 on the strength of Walt Cordell's two goals.

Tony, Smith, Quick and Agile

Experience Keys Nettters Hopes

By Joe DeSalvo

Spring is in the air for the FTU varsity tennis team as the Knights are preparing themselves for next spring's competition. FTU enters the new season ranked 16th in the college division after competing in the NCAA Division Tournament held late last June in Irvine, Calif.

Dr. Lex Wood, coach for the FTU women's is, very happy about his team for this year. "We have a fairly experienced team with six of the 10 players on the usual point of view," said Wood.

In discussing the outlook of his team, Wood pointed out on the courts during a practice session three things that should mean to him which are "our future." Doug Hall, Mark Gundersen and Trevor Grenier are among these men Wood will be counting on to field the strongest tennis team in school history.

Hall, a freshman from New Jersey, comes to FTU with impressive credentials. He was 52-6 in high school competition and was ranked number one in the state. Gundersen, from Boca Raton, is another first-year man, while Graham in a sophomore who placed fourth in singles in his first year on the team last season. Graham is one of the most exciting up-and-coming FTU players.

Wood has come up with another new member in Bill Tiegjen to bolster next spring's lineup. In the season that was, this will be the last year of eligibility for Tiegjen.

Returning from last year's 9-7 team are seniors Gary Tinlin, Gill Graham, Nate Smith, Joe Lucci and Mike DeCesare. Wood will be counting on latter three players to set the pace for the Knights.

In describing the three player's abilities, Wood compares them with Larry Curran, Mercury Metts and Kim King. "Lucci is durable and Smith is quick - the quickest on the team - while DeCesare seems to rise to the occasion. It's anybody's guess who'll be playing in the number two or three position... in the Florida Sun next season." Last season. Wood alternated the three players out according to their performance during practice sessions.

Wood feels next spring's schedule and personnel should be the toughest we ever had. It's representative of a wide area of the nation. Included in the schedule are Miami, who finished No. 4 in the nation last year. Jacksonville, cross-town rival Rollins and South Florida.

A new edition to the Knights' regular season play is the Southern Mississippi Invitational, which includes University of Alabama at Birmingham, University of Mississippi, Mississippi State, University of Georgia, University of Kansas, and Notre Dame. "It's new for us and I'll be awfully tough," said Wood.

Six members of the team along with six women players will be competing in a mix doubles tournament at the Orange County Racket Club today, Saturday and Sunday.

He's Sailing About In A Hockey Puck

By Walt Morris

Can Harold Downing sail a 139 pound "Hockey Puck" to a national championship?

Downing, a FTU junior, will know the answer tomorrow.

The "Hockey Puck" is Downing's 139 pound, 15-inch-diameter disc that he will sail into the final round of the National Hobie Cat Championships at Key Biscayne, Florida.

Downing has been racing competitively for about nine months and qualified for the Nationals in July. To qualify he had to accumulate points in competition.

To win the championship Downing must have the lowest number of points in nine races over a five-mile course. The place of finish is the number of points a skipper receives.

Restrictions on the boats are very tough. No modifications are allowed on the "Hockey Puck". Each skipper is given the same chance of winning and it is sailing skill that counts.

"Hockey Puck" is being ranked second on the list of candidates for Hobie Cat championship in the Florida State Spring Regatta, and was second in the Disney World Invitational Regatta.

"Does he one day dream of sailing in the Olympics?" "I don't know if I would want the responsibility," Downing said, "but I'd like to be the first one to do it," answered Downing.

Sports

Booster Prepare For Autumn Drive

By Pat Murray

The FTU Boosters, a group dedicated to sustaining the university's athletic program, are currently making preparations for their fall membership drive.

The Boosters Club was originated in the fall of 1973 by a group of people who had expressed interest in forming an organization that would actively support and could actively support FTU athletics.

Athletic Director Dr. John Wood stated the purpose of the Boosters is to support all athletes by simply attending sporting events and渲染 financial aid for Powell reports the purpose of the committee instead provides advice and counsel in regard to a host of activities. The committee is composed of 14 members who have been involved in maintaining and supporting FTU athletics. The committee is coordinated by Dr. Robert Humphreys.

The executive committee will coordinate several social activities including a membership drive cook-out on November 24 and lend untied support for attendance at all athletic events.

Membership in the Boosters Club will also constitute membership in the FTU Foundation. The Boosters offer three basic membership plans that entitle members to purchase season passes for their families at reduced rates.
**TKE Bombs SAE SX, Scares ATO**

By Joe DeSalo

Lambda Chi Alpha and Tau Kappa Epsilon continue their undefeated ways. Both teams remain tied for the lead in the Fraternity League. LXA went into Wednesday’s action 6-0 while TKE carried a 5-0 record. In LXA’s game against Kappa Sigma on Thursday, Oct. 13, three Dave Hudick touchdown passes with two of them to Phil McKinnis gave LXA a comfortable 30-7 halftime lead. KS and LXA exchanged scores in the second half and gave LXA a 2-46 decision for win No. 4. A close battle, TKE with the help of two touchdowns by Larry McCurtain from quarterback Steve Jackson got by a stubborn Sigma Chi squad, 39-39. Scott Radeley scored two touchdowns for SX, which missed two important extra point attempts.

Rounding out last Thursday’s action, ATO buried Delta Tau Delta, 22-6. ATO quarterback Joe Hart ran for one touchdown and threw for others in a well-balanced scoring attack. Chi Phi, behind quarterback Steve Kudrow, Lee’s three scoring passes had no trouble defeating SAE 21-6.

In Independent League action on Wednesday, Oct. 16, LXA Gold used quarterback John Swank’s strong arm to defeat TKE 26-6. LXA Gold receiver Jim Robigh pulled in two first half touchdowns and also ran a second half interception for another score. A pass to Neil Mullineux completed the LXA Gold attack.

Smoker’s Union took a slim 7-6 lead into the second half but lost two Dave Johnson scores after the intermission proved to be too much for SXMF as they were victimized by Smoker’s Union, 20-13.

In a defensive battle, a first-half safety by Mark Voorhis gave God’s Squad a 5-0 win over APROTC. In Monday’s action, TKE won their fifth straight, toutinging SAE 14-0. Steve Jackson ran for one score and threw for four more scores to lead the offensive charge for TKE. In a close ballgame, Ken Lotti’s second half touchdown gave KS their first win of the season, a 12-7 verdict over DTD.

ATO broke a 13-13 halftime tie with two second half touchdowns to defeat SX 26-19. ATO quarterback Joe Hart threw two touchdowns with Kevin Powers grabbing two scores. Pete Heckman scored twice for SX. Chi Phi rolled by Pi Kappa Alpha, 24-7 with Chi Phi quarterback Steve Kudrow, Lee’s three throwing touchdowns.

On Tuesday, Black Student Union remained undefeated shutting out APROTC, 14-0. Two first half scores by Carlos Feen took care of all the scoring. The Bunglers protected Jim Marshall’s first half touchdown to get God’s Squad 6-4.

Fauci Hall and Students took advantage of a Ken Renner extra point to defeat the Mafia 7-4. Rex Riepe scored for FS&S while Jack Miller pulled in a 42-yard scoring pass from Mafia quarterback Steve Russell.

**STANDINGS AS OF TUESDAY, OCT. 18**

**FRATERNITY DIVISION**

TKE 9-0
LXA 8-1
ATO 7-2
SX 6-2
SAE 4-4
PKA 3-3
Chi Phi 2-4
SP 1-5

**INDEPENDENT GOLD**

BSU 4-4
Bunglers 3-4
FS&S 3-4
APROTC 2-4
God’s Squad 1-5
Mafia 0-5

**INDEPENDENT BLACK**

LXA Gold 1-2
Individuals 1-2
Smoker’s Union 1-1
TKE II 1-3
SOMF 0-2

**DeSalo’s predictions**

Monday: BSU over Bunglers by 2; LXA Gold over Smoker’s Union by 14; Individuals over SOMF by 12.

Tuesday: LXA over Chi Phi by 19; SX over DTD by 14; KS and SAE even; ATO over PKA by 28.

Wednesday: Mafia over God’s Squad by 6; Bunglers over APROTC by 12; BSU over FS&S by 6; Smoker’s Union over TKE by 12.

Thursday: LXA over SX by 14; TKE over Chi Phi by 18; DTD over SAE by 12; KS over PKA by 1.

**Archers Aiming At Regional Title**

By Walt Morris

The PTU Archery Team will be seeking its second victory in two weeks this coming weekend. The southeastern Regional Championship is at Brevard Community College.

Last week PTU shot the University of Florida, University of North Florida, Brevard CC and Embry-Riddle University in the PTU Invitational.

The Knights’ hopes for a second first place finish rest with John Johnson and Tina Reed. However, the chances appear dim because PTU will not have the services of Sam Reyna, Reed's eligibility is up and he will now turn his efforts to coaching the young team.

Miss Reed has been finishing second and third this year. In the Women's Individual, Reed is coming from Stetson. Miss Reed transferred to PTU following her sophomore year.

According to Reyna the biggest factor to overcome this week will be very cold game conditions. "The cold and should make a big difference on our score," Reyna said.

"The PTU team members have been shooting field targets all summer to get ready for the season. The team hopes to finish high in as many meets as possible to qualify for the National Championships. Money is another factor that will determine if the team goes to UCLA. The team only has $500 to go to the tournament.

The National Championships receive no money from the NCAA but is supported by the schools that have teams and from donations from archery lanes across the country.

A big disappointment for the team was that Reyna did not make All-American. A protest has been filed because archers from San Bernardino and Arizona State dominate the All-American squad each year and the coaches from the schools are on the nominating committee.

"The southwestern colleges are trying to get the Nationals as far away as possible," Reyna said. "The fewest southeastern teams the better for them. Florida is rated second in the nation and they are getting scared.

Reyna has qualified for the Olympic Trials and is eligible to try out for the World Team. He also won the Southern U.S. Championship this past summer.

**Tytes I, Dorm A Lead Volleyball**

By Linda Mitchell

After a full week of Women's Intramural Volleyball, only Tytes I and Dorm A were still unbeaten. Tytes I remained undefeated after putting away Crew Dorm B, Zeta, and even their own sister team, Tytes II. Dorm A also stayed in the win column by defeating Delta Sigma Theta, Tri-Delta, and Alpha Tau Omega Little Sisters.

Tytes II remained the top contender for second place losing only one game to RGC. The only win was over Tytes I.

Tri-Delta lost four games in a row, but bounced back on Monday to beat the Crew team, handing them their second defeat of the season and knocking them out of second place.
