Sheinkopf Predicts Big Year For FTU Foundation

By Pai Strange

The FTU Foundation in previous years has received more than $500,000 per year, and according to Kenneth G. Sheinkopf, this year looks to be the biggest of all. Sheinkopf is the director of University Development and says one of his biggest jobs is working with the foundation.

The purpose of the FTU Foundation is to provide the non-profit, tax exempt organization in which accepts gifts for the university that the money received would take care of ten scholarships.

The foundation has eight to ten projects per year. Providing scholarships and loans, equipment for the various labs, books for the library, and research are some of them. The TV in the VC was provided through the foundation.

Out of each dollar given to the foundation, Sheinkopf said, 97 cents comes to FTU. The remaining three cents goes into running the foundation.

The Foundation Memberships are as follows:

Contributing Member - any person who contributes $10 or more per year.

Sustaining Member - those who contribute $100 or more per year.

Pegasus Club - for persons contributing $1,000 or more annually.

Members of Pegasus Club who give $10,000 or more become President's Medalion Members. These members hold certain privileges which increase as their gifts increase.

Registrar’s Office
Testing New System

By Marcy Muramatsu

According to University registrar, William Chapman, a new class registration system is presently in the midst of testing.

The system was put through a trial run last year at FTU, but the system undergoing the “debugging” process right now is much more refined.

Essentially, it is a modification of the current system, but with a complete computer rewrite.

"It runs all of the checks the current system does," Chapman said. "For example, the computer checks the student’s Social Security number to make sure he is enrolled, whether the course is open, checks for time conflicts, etc."

In total, there are 29 checks the computer must complete before registration can continue.

The main differences in the new system is that the student obtains his fee assessment sheet, or bill, and his official class schedule at the time of registration.

One of the bugs in the system is a five second delay between the initial computer check and your fee assessment printout.

"Five seconds doesn’t seem like much, but when you multiply that number by the 20 students per minute the computer is designed to handle, it adds up," Chapman said.

Another feature of the new system includes a different drop process.

At the first machine, students find out whether the class they desire to add is open. Course access codes are typed in at the next terminal, and the computer adds or deletes classes immediately in the same check.

If all the bugs are out in time, Chapman said, the new system may be used for winter quarter pre-registration.

FTU Already Complying With New Records Law

By Alan Crouse

According to an article in the October 25 edition of PARADE magazine, a federal law for safeguarding records of elementary, secondary and post-high school students goes into effect on November 19 of this year.

The Legislation, originally submitted by Senator James L. Buckley of New York, provides parents the opportunity to inspect transcripts of a student’s records only upon presentation of written consent by the student.

Under state law, students can be denied admission to state universities because of “disruptive behavior” or “bad conduct.” With the new federal legislation, Chapman said, counselors will not gather such information for fear of losing suits by students or parents.

Chapman added the new federal law has little bite, because it was a rider on an appropriations bill, and the penalty for non-compliance is the termination of federal funds.

State universities receive little in federal subsidies.

Under the new law, parents or students have the right to challenge anything they consider “misinformation.” Chapman said FTU students have always had access to their own records.
FAVORS Coordinates Students & Community

By Deborah Whaley

Do yourself a favor, and others too, by the philosophy of FAVORS, The Florida Technological University Volunteer Referral Service.

FAVORS is a student-run volunteer program whose purpose is to be a link between student interest and community needs. The program, which began in November of 1973, is the result of an idea to combine the efforts of the Village Center Board & Staff, the Sociology Club and the United Campus Ministry.

FAVORS combines all separate attempts to coordinate volunteer activities into one service with a campus-wide appeal. According to Kathy Cavanna, Assistant Village Center Program Director, before the formation of FAVORS there was no one on campus where any student could come and get into volunteer work. It was mainly through courses.

Sociology majors were often placed in volunteer jobs by professors or by the Sociology Club. Now anyone on campus who has an interest in volunteer work is referred to the agency by FAVORS.

There are 65 students actively volunteering at this time, not including groups, such as Delta Tau Delta Fraternity. Several Sororities have contacted FAVORS and expressed an interest.

FAVORS is presently finding a place for them. FAVORS has about 140 agencies on file who need volunteers.

Areas of volunteer work include: consumer protection, correctional programs, cultural services, day care centers, aging, blind, ecology, education, tutoring, Headstart, drug programs, half-way houses, recreation, health agencies & hospitals, mental health & mental retardation, physically handicapped, suicide prevention, and legal services.

This year agency listings will be divided into four major areas of Youth, Education, Health, and Social Agencies for ease of placing volunteers.

FAVORS has two student co-chairs: Cathy Kane, a junior psychology major; and Walter Johnson, also a junior psychology major.

"We emphasize the chance for a field learning experience to the student," Johnson said.

Volunteers are referred to an agency in their field of interest. For example, an education major might be interested in working with the ADDOIONS program in the Orange and Seminole County school system.

"I feel the FAVORS program is campus-wide, especially to freshmen or sophomores trying to decide on a major. Volunteer work also gives many juniors and seniors a chance to apply the theories they've learned in class.

FAVORS listings of agencies include a description of the job, the hours volunteers are needed and if any training is given. Some agencies such as We Care, have extensive training programs.

FAVORS works with the student and the community to serve the needs of both.

Marnita Jernigan is a Junior Social Work major who was placed by FAVORS. Jernigan has been working through Youth Programs, Inc., with a 14-year-old girl who is on probation for four months.

When asked how she felt about her work, Jernigan said, "It made me feel positive that I want to make that kind of job my career. It's very rewarding personally. It makes you feel good when someone you are working with tells you to "hurry out here, I need you".

Delta Tau Delta Fraternity is the first fraternity on campus to work through FAVORS.

They have been working at the Association for Retarded Citizens Adult Activity Center and spent one entire Saturday washing down the outside of the building and another Saturday painting it.

Delta Tau Delta will be helping the Association with other projects in the future. FAVORS can find volunteer work for any interested student. For information, stop by the Village Center main desk area and ask for FAVORS, or call extension 2611.

Please do yourself a favor and others too, by the philosophy of FAVORS.
Police Use New Device

Two FBI professors, Dr. David Clapp and Dr. Robert Doering, from the Department of Industrial Engineering and Management Systems are working with the Orlando Police Department to increase the efficiency of police patrol cars.

Clapp and Doering have investigated a new device, the Automatic Vehicle Locator (AVL), which will reduce the time it takes a squad car to reach the site of an emergency.

By using an electronic system, AVL allows police headquarters to immediately know the location of all squad cars.

A small device called an AVL emitter is placed on utility poles near police headquarters. This signal then appears on a screen indicating which car it is and the car's location.

AVL can also be used whenever a major crisis occurs in the city.

Keep all squad cars from converging on a crisis or unnecessary cars reporting to the area. AVL allows headquarters to see the location of all cars and judge which cars should report to the crisis.

Another use for AVL is to increase police protection.

AVL's potential for saving time in an officer's day is great. The officer can place a device on his belt which he presses if he is in trouble. A signal appears on the screen at headquarters, indicating the problem.

"This is just one of the major features of the AVL system, but only an added bonus," said Dr. Clapp.

AVL is now being tested at the Orlando Police Department in a limited capacity and only on an experimental basis.

This particular device only tracks two squad cars in two distinct areas of the city.

However, other full scale AVL systems are being used in Montclair, California and in Wichita, Kansas.

The cost of AVL is not known yet.

structure, etc.,) was being handed by a different company, ten in all. The result, as one papersman put it, was that no one had any control over anyone else. Also, union and non-union labor was being used. Union labor got mad and walked off the job.

Here we are a year later and we've finally got a building over there. The result, as one foreman put it, was that we've finally got a building over there. But alas, there are still disgusting little things called hallways.

The real projectors were placed by Ford Motor Company, which in April 1953 opened up a new and highly automated metric assembly line in Lima, Ohio to produce the Mustang II and Pinto, and General Motors, which said that all their new products, components and facilities including the rotary engine will be built to metric specifications.

The factor seems to be the most obvious hassle involved in the conversion attempts.

Instead of an overnight switch, careful planning for a gradual phasing out of non-metric products is necessary, because the changeover, although beneficial in the long run, usually entails years of duplicate inventories of metric-non-metric products, high scrap rates, and especially a loss of a considerable amount of competitive, economic position.

We must work together and be optimistic! That's the only way we're going to stay afloat!

You shouldn't say that! We do hit obstacles now and then, but the staff members are like the crew of a ship, guiding it across the ocean!
We Care’ Handles Crisis Calls

By Jim Holmes

"Hello? - I need help. I'm fourteen and my girl friend is pregnant. She's fourteen too, and we haven't told our parents." Mr. C. a volunteer for the "Teen Hotline" and the "We Care" crisis center handles calls like this every day.

Mr. C. graduated from a month long "We Care Training Class" and now contributes two afternoons a week to counsel teenagers and adults over the "Teen Hotline" (444-2023) and the "We Care" line, formerly the suicide prevention number (422-1227).

Mr. James C. Castello, Jr., a member of the board of directors for the agency, said that the volunteers handle "every possible problem a young person would encounter." Problems ranging from family troubles and dating problems, to the problems of unwanted pregnant teenagers, drug addiction, and even potential suicides.

Castello explained that individuals seeking help through their program need not identify themselves and can receive counseling over the phone, often being referred to other agencies or counselors which are especially equipped to handle specific problems.

Now the hotline and the "We Care" program has a problem of its own. According to Castello, the hotline handled 1,127 calls during the past three months with only 40 volunteers.

One volunteer commented, "It seems we always need more volunteer people to handle calls."

Campus Glances

VC ART GALLERY

The Village Center Art Gallery will be hosting a new exhibit in photography, "The Strangers" November third through fifth.

The photography is the work of Lorean Mears and may be viewed Monday through Friday from nine a.m. to five p.m.

MOVIE SCHEDULE

The Village Center is showing the movie "Dr. Strangelove" November first and second.

The award winning film produced by Stanley Kubrick, also producer of "A Clockwork Orange", will be shown at 8:30 p.m. in the Village Center Assembly Room.

1980's DANCE

The Village Center is sponsoring a 1980's style party and dance. Saturday November second.

Music reminiscent of the Big Band era will be provided by "The Legends". Activities will begin at 8:30 p.m. in the VC Multi-Purpose Room.

CENTRAL FLORIDA VANS

A new club, the "Central Florida Vans" invites you to an organizational meeting on Saturday, November ninth from nine a.m. to five p.m.

The meeting will be held at United Speed World, in the Herndon Plaza on Highway 50.

For additional information, interested persons should call Bill at 837-1977, after five p.m.

AUDITION

Auditions for the recently released Broadway hit, "Sugar" will be conducted Monday, November fourth at 7:30 p.m and Tuesday, November fifth, from five to nine p.m. in rooms 111-112 in the administration building.

Many parts are available for singers, actors, and dancers.

"Sugar" is a 1980's musical based on the screenplay, "Some Like It Hot!"

CONCERT LISTINGS

UPCOMING ROCK CONCERTS

NOVEMBER

Tonight at the Orlando Sports Stadium, "Peter Cetera" and "Chicago" will perform. "Peter Cetera" and "Chicago" Productions will present the English Group - "Traffic". The concert will begin at 8:30 p.m. and the tickets are $8.00 per person.

The date for the Todd Rundgren Concert at the Sports Stadium has not been set as of yet, but it is tentatively scheduled for the end of November.

On Friday, November 20th, Joe Cocker and Mountain will appear under the green dome of the Jacksonville Coliseum. The show will begin at eight o'clock and the tickets are $8.00.

Metric Awareness Workshop

Scheduled By The Village Center

Arla Filko

"Think Metric". This well intended advice may soon be the cry of Americans as the United States progresses toward the world-wide metric system of measurement.

To help you learn and begin to use the metric system the Village Center, in conjunction with the Math Education Department, has scheduled a Metric Awareness Workshop for Wednesday, November sixth.

Numerous learning activities will be presented on the Village Center Green from 11:45 a.m. to 2:45 p.m.

Coach Gygley will assist in measuring your metric mass and Coach Clark will assist in measuring your metric height.

This Village Center funded program was initiated by the Math Department in an effort to make our campus and the surrounding community aware of the metric system.

Further information may be obtained by calling either the Village Center or the Math Education Department.

**Financial Aid Picture Rosy Despite Inflation**

**By Arla Filko**

"Higher education is a luxury," said Donald Baldwin, Director of Student Financial Aid.

"With this tremendous inflation there is competition for dollars in food, clothing, housing and education. As the cost of everything in school goes up, the cost of presenting the education, which is providing aid, looks brighter than ever." Baldwin explained that, "Luckily for the student the state of Florida, in conjunction with the Student Financial Aid Program, looked ahead and established some very good programs."

One program that has increased tremendously this year is the Federal Basic Educational Opportunity Grant Program which is providing $3,000 to freshmen and sophomore students.

This federally funded program is available however only to students who entered college after April 1, 1973, and have family incomes of $10,000 or less per year. Another similar program is the state sponsored Florida Assistance Grant Program.

Program is receiving more money than ever before from both the state and federal levels, Baldwin does not see this as a means to catch up with inflation. "It is too little too late," he said, adding that, "higher financial aid only justifies higher fees and so on. At the pace we are going inflation has a direct influence."

Available funds have increased from $2,600 in the 1972-73 academic year to $10,000 this school year.

Applicants must be full-time undergraduate students, generally with annual family incomes of $10,000 or less.

"We're in good shape for loans this year as well," said Baldwin.

The eight different types of loans available to PTU students this year have equalized or increased over those of last year. The indicator of inflation has been the sudden onslaught of applications in Emergency Short Term Loans.

Provided by Student Financial Aid and Traffic Fine Funds, these 90-day emergency loans increased from $19,000 last year to approximately $60,000 this year. Utilizing part-time employment with his full-time academic schedule is another possible source of financial assistance for the student.

"Nine hundred PTU students are either state or federally employed under these programs," Baldwin said. "Luckily, for the student the state of Florida, in conjunction with the Student Financial Aid Program, looked ahead and established some very good programs." Despite the dismal economic situation, the area of student financial aid looks brighter than ever.

**Plans Released For 3 Buildings**

University Physical Planning officials disclosed further plans this week for the three complexes presently underway on the FTU campus.

Fred Clayton and Oswaldo Garcia discussed those plans with the FUTURE, revealing that the humanities building is set for occupation next week.

A "substantial completion check" was made on Monday, according to Clayton.

Although a few details remain to be ironed out, the music department is expected to begin moving in next week.

The biological sciences complex, originally planned to be opened this year, will not be available until "around the first of next year," Clayton said.

The education complex which will house classrooms, offices, and a teaching gymnasium, has cleared all approval stages and bids are planned tentatively for January.

Construction on that complex will begin "the early part of next year," Clayton explained.

Record Reviews

By the Harrison

Popular rock is too new a concept in music to have any real distinguished type of history. The field has progressed through dimensions of noticeable boundaries, characterized by a unique sound of the era.

There have been a few bands who have managed to make successful albums of their original sound, while most bands fall back as the popular trends change.

These unchanged groups may be considered classics of their era.

"It's Only Rock 'n Roll" - The Rolling Stones

"Rollin' Stones" Records CDE 72891

The forefathers of British rock n' roll have managed to become a household word throughout America.

Following many gold albums and sell out United States tours, the Rolling Stones come up with "It's Only Rock n' Roll," their latest LP.

"If You Can't Rock Me" starts the album off in a driving tempo with Jagger's wailing vocals. Billy Preston adds some brilliant piano work in " Ain't Too Proud to Beg."

The title cut shows the commanding vibrations of the Stones' music. Jagger's forceful image demands vibrations of the Stones' music.

"Honky Tonk Women" and "Tumbling Dice" are quite an involving experience.

The simple repetition of the Stones music fills the album and their reputation alone guarantees its success.

War Child

"It's Only Rock 'n Roll"

"It's Only Rock 'n Roll" is one of the few individual performances of the band - most cuts are a balance between the two.

The songs are composed by Ian Anderson who also plays brilliant flute throughout the album.监听 должна быть с удобствами:"
Acupuncture Center Opens

The first center for Acupuncture consultation and treatment in Central Florida utilizing Oriental acupuncturists will open to serve residents of the Orlando Metropolitan area. On October 30, it was announced today.

The Acupuncture Center of Greater Orlando will be located at 475 North Mallard Avenue, Altamonte Springs. Dr. Donald Iafornaro, D.O., Winter Park, will be the medical director and Dr. George Hsu, a Chinese physician skilled in Oriental medicine will be the clinical director of the center.

The announcement of the new center's opening was made today by William F. Hinson, executive administrator and an officer in National Acupuncture Centers, Inc., parent firm of the new center.

The new center is similar to one in Washington, D.C., originally established by Mr. Hinson. He has established centers in Hollywood and St. Petersburg, Florida.

At the new center, local licensed Florida physicians will perform medical examinations and diagnosis, while the Oriental acupuncturists will administer acupuncture treatments. All individuals coming to the center for acupuncture consultation and possible treatment will undergo a thorough medical examination first. This is a requirement before any acupuncture treatment will be administered, Mr. Hinson explained.

Dr. Iafornaro has practiced in the Orlando area for the past four years. In 1970, he became a graduate student at the Kansas City College of Osteopathic Medicine. He interned at Richmond Heights General Hospital; Cleveland, Ohio, was in family practice for eight years and affiliated with that hospital before moving to Orlando in 1979. Dr. Iafornaro is no longer in family practice in this area.

Dr. Iafornaro has been practicing acupuncture in addition to general western medicine since interest in acupuncture was intensified by the improvement in sino-American relations. He regards acupuncture from his western medical viewpoint as a continuing subject of research and develope in this country. He also sees it as an adjunct to present medical modalities directed toward both acute and chronic pain control therapy, without losing sight of the importance of continued vigilance in the conventional methods of examination and treatment of disease.

"Acupuncture in my practice has made an enormous number of patients more comfortable and mobile without interfering with their conventional medical care," Dr. Iafornaro.

"I have found acupuncture clinics can provide a valuable service both to the patient and to western research and scientific knowledge by providing case data, while at the same time providing an alternative non-pharmacological means of effective pain control. This in itself can break the pain cycle, improve circulation and restore more normal homeostasis and mobility, as well as to contribute to the brighter outlook which many patients report.

The Orlando-area site was selected for the new acupuncture center due to the great growth of the area and the large number of residents who may be able to benefit from acupuncture, Mr. Hinson explained.

Dr. Iafornaro stated that although many people have been skeptical about acupuncture, it has gained increased acceptance as more and more people have been treated and helped by it.

He explained there is a variety of illnesses and diseases which acupuncture may treat. "Almost any condition can be treated, provided there are no medical contraindications. The conditions which are treatable include osteoarthritis, rheumatoid arthritis, low back pain, emotional disorders, post-traumatic pain, headaches, sinusitis, asthma, chronic digestive or constipation, painful menstrual periods, certain symptoms of multiple sclerosis and other neuromuscular conditions," stated Dr. Iafornaro.

"Deafness due to nerve damage problems is controversial now," stated Dr. Iafornaro. "The American College of Otolaryngologists takes the position that acupuncture for nerve deafness is ineffective and may cause worsening of present level of hearing disability."

"Although, in my own practice, early treatment of deafness was promising at the time of the acupuncture, if it becomes unable to demonstrate positive good results because of (a) drop-out after 4-6 treatments, (b) inability to contact patients for further evaluation, and (c) small changes in audiogram after 20 treatments in ones I could communicate with," Dr. Iafornaro explained.

"We must not think of acupuncture as a cure-all," warned Dr. Hsu. "Similar to our approach dealing with medical biological matters, it offers percentages of excellent results, percentages of good results and percentages of no benefits."

In general, Dr. Iafornaro stated, it is fair to say that acupuncture renders its greatest benefits in the alleviation of pain of diverse causes.

Since National Acupuncture Center opened its centers in Hollywood and St. Petersburg, Florida, many cases have been seen with many patients claiming varying degrees of relief from pain associated with various illnesses and diseases.

"The fact that acupuncture works many of the people who have not been helped by conventional medical methods is indicative of its clinical usefulness in this country," concluded Dr. Iafornaro.

The telephone numbers at the new Acupuncture Center of Greater Orlando are: 393-4045 and 830-0668.

FSU Accepts Applications

Applications are now being taken for the Fifth Annual Florida State University Summer Study Program in Hotel and Restaurant Administration (HRRA), to be held in Leysin, Switzerland.

Students will study June 23-Aug. 1 in Washington, D.C., originally established by Mr. Hinson. He has established centers in Hollywood and St. Petersburg, Florida.

Students may enroll for either a full or partial schedule with a minimum of eight hours. The courses are instructed by Florida State HRRA faculty members.

Classes meet three days weekly (Tuesday, Wednesday and Thursday) allowing four days for field trips, group or individual travel. A number of professional, cultural, sporting and social events are also available. Leysin is centrally located in Western Europe.

Organizations and Promotion (4 hours); HRRA 339-Hotel and Restaurant Administration Policies (4 hours); and BSA 40: 3-34-Directed Individual Studies in International Hotel and Restaurant Operations (4-4-4-4 hours).

Students are advised to allow 10 minutes maximum length presentation of and by students.

A screening board will choose from a series of presentations of and by students.

According to Ashby Stiff, Jr., associate professor of HRRA, students who enroll allow $2,300 for all expenses. "This is a comfortable approximation," Stiff said, "but is subject to change. The flight returns to the U.S. Aug. 15 allowing a two-week travel holiday after the close of classes."

The limited enrollment is open to HRRA majors and interested non-majors who are graduates of, or students in good standing, at accredited colleges or universities.

For further information and application, contact Ashby Stiff, director, European Summer Study Program, Department of Hotel and Restaurant Administration, Florida State University, Tallahassee, Fla., 32306, or call 994-4646.

Village Players Sponsor "Gratus II"

The FTU Players are sponsoring "Gratus II," a series of presentations by and for students.

The program consists of two student directed one-act plays, a maximum of 40 minutes in length, one-act presentations in English, 25 minutes maximum length and one or two script presentation of anything else (preferably a student film).

Any student wishing to submit their work should do so by Nov. 18 to Francis Johnson, Lib. 240.
Developmental Center Offers Reading Lab

By John Bridges

Amidst the various services offered by the FTU Developmental Center is a special block of reading and study skills, available at no cost to all FTU students.

The reading and study lab is operated by Ken Moore and his assistants, Mrs. Mary Hartman and Miss Joan Greer. "The Art of Rapid Reading" in the lab's feature, a six week directed lab program utilizing Craig reading machines.

The student begins at his personal level and progresses at his own rate. The course develops speed and comprehension while allowing the student to budget his lab time within his personal schedule.

An additional individual reading improvement program is "Reading at the College Level.

Topics include vocabulary, study reading textbooks, and college subject comprehension.

Also available are vocabulary programs directed at the student's personal and professional vocabulary; independent studies in written communications; self-study materials and mathematics; and an advanced skills program for students preparing for graduate and professional schools.

Study skills such as reading textbooks, class note-taking, and exam preparation may be organized into an individual program also.

The student may take confidential diagnostic tests in any of these areas to assist in structuring an effective program.

Clinicians are available by appointment to discuss these programs with interested students.

Moore stressed that these programs were not of a remedial nature and said a survey of last year's students shows a balance from each university class.

"It's not something that just freshmen do," said Moore. "It's never too late to improve efficiency."

Moore cited the large numbers of professional people presently taking commercial reading courses as an indication that people are often unable to balance the amount they have to read, with the time they have to read it.

The reading and study skills lab is open year-round from nine a.m. to five p.m. and Tuesdays and Thursdays until eight p.m. The lab is located in room 106, Residence Dorm C.

Ghost Writers' Draft Speeches

By Kerry Faunce

With election day approaching and Halloween right around the corner, it is only natural the candidates enlist ghosts to write their campaign speeches.

Consequently, six local politicians have permitted six FTU student "ghost writers" to draft campaign addresses as part of a political speech workshop designed to give speech majors working experience in speech writing.

Instructed by Dr. Ed Wycoff, the political speech workshop is a mid-quarter program in the SPE 366, Speech Style and Writing, curriculum. Each student consults the candidate or his secretary for speech content and style. Once these elements are determined, the student writes a five to eight minute political address.

Upon completing their assignment, the writer presents the speech to the candidate for his use. Most candidates prefer to have it cut, shorten, lengthen, or add personal style before using it.

In some instances, the writer may even improve the candidate's style.

Of the candidates and students interviewed all have been pleased with the results of the program. The criticisms and compliments of the candidates and their professional critics have been of valuable aid to the students as ghost writers.

Ultimately, the writers have gained valuable experience in public speaking and the politician's workloads have been somewhat reduced. After all, you might say their endeavors have been "a ghost of a chance."

Faculty Member Defined

Deborah Whaley

The Rules Of Procedure Governing Faculty Governance (PROFG) was amended to include a definition of a non-administrative faculty member at a Faculty Senate meeting Oct. 21.

The amendment states that the term "non-administrative faculty member" includes all faculty members except those who either hold the positions of President, Vice President, Associate Vice President, Assistant Vice President, Dean, Associate Dean, Assistant Director, or Department Chairman.

In other section at the Senate meeting, an amendment was passed stating that faculty members will vote on grievance grievances brought against them from their own college only.

Another amendment was passed to give the right of two preliminary challenges to the
Engineers Win, 6-3

By Pat Murray

The FTU soccer team, with its offense sputtering, had its third game win streak snapped Saturday by Florida Institute of Technology, 6-3.

It was a disappointing defeat for the Knights who outshot the Engineers from Melbourne 26-14 but couldn't maintain any consistency with their attack.

With the reserve team starting the game, the Knights fell behind early as the visitors scored in the first two minutes. FTU tied the score at 1-1 when Gus Romer employed some fancy footwork and scored unassisted.

The next five minutes were gusting from 15 to 25 miles per hour. Waves on a foot high were rising to four feet.

Downing's biggest problem last weekend was his inability to set goals for himself. He again finished third, third, and second in the next five races. Under the regatta rules he was allowed to drop one race. This gave him a six race total of 17 points. 1.25 points behind the second place finisher.

The system is loyal to the program.

The fact that Haas is 'steady and a good ball-handler for a big man' has resulted in his playing system and is loyal to the program.

If I feel that Pete needs to average 12 points to be ready for a game for us to win," said Clark. "I think that's what we expect.

He is an outgoing native of Appleton, Wisconsin, who remembers Clark as coach at Appleton Xavier High. He said, "I just want to have a good year. I'm not going to force shots to get 12 a game."

"There is a lot that can't be measured by statistics," he went on. "The things like giving him the ball and setting picks help team just as much as scoring and returning." Clark pointed out.

"I don't believe in setting goals for myself," he added. "I'm not really a rah-rah type.

I would hope to lead more by example--I'm not really a rah-rah type," Haas said.

He made the all-tournament team of the 1973 Lakor Holiday tourney. In Racine, Wis. which was won by the Knights. A year ago, still suffering for star guard Arnett Hall in the first home game against St. Leo, he poured in 51 first-half points, ending with a game-high 60 to lead FTU to a 60-59 win.

The hectic soccer season has veteran status although he does not necessarily see himself in the leader mold.

"I don't believe in setting goals for myself," he added. "I'm not really a rah-rah type.

LXA, TKE Battle Looms

Monday Showdown Set

By Joe DeSalvo

Barring any upsets to Lambda Chi Alpha and Tau Kappa Epsilon in yesterday’s action, the two undefeated teams will meet in the big showdown, Monday afternoon at 4 p.m. to decide the Fraternity League championship.

In Wednesday, Oct. 22 action, LXA built a comfortable 27-0 halftime lead to upset Delta Tau Delta, 33-0. LXA quarterback John Himmam threw five TDs to five different receivers. Sigma Chi smoked Kappa Sigma, 36-0. SX QB Phil Merrick hit his favorite target, Scott Bailey, for two of his four touchdowns passes. TKE, led by Joe Godbold’s two scores, trimmed Pi Kappa Alpha, 38-4. TKE QB Steve Jackson led the offensive attack with six TD passes. Kevin Power’s four TDs from QB Joe Hart proved too much for Sigma Alpha Epsilon to handle as ATO romped over SAE, 36-0.

In Thursday’s games, the individuals battled TKE II, 36-4. Larry Stabin scored a pair of TDs for the victors. LXA Gold remained undefeated, beating SAE 0-11. SX QB Neil Mullins, replacing starting QB Kerry Swank who left the game at the half with a chin cut that required ten stitches, ran for two TDs and passed for one other. Swank threw two first half TDs.

In this past Monday’s action, Steve Hurstman in first half TD proved to be the winning score as LXA Gold continued to roll, this time a 15-7 win over Smokers Union.

A Frank Crane safety with no remaining on the clock, gave the Individuals a 24-0 win over SAE. The win kept the Individuals tied with LXA Gold for the Independent Black lead.

The Bunglars took over first place in the Independent Gold as they knocked Black Student Union their first defeat, 14-6. Jim Bowen and Jim Marshall did the Bunglars scoring.

SX used Scott Bailey’s two first half TDs to hand, DTD a 107-setback in this quarter’s action. SX QB Phil Merrick completed the SX attack with a touchdown pass to Chuck Patrick.

ATO QB Joe Hart had a field day throwing three TDs to Kevin Powers and two scores to Bob Caine to lead ATO to an easy 41-0 win over PKA. The battle of the last place teams ended in predictable fashion as SAE and SX fought to a 10-10 tie.

Happy Halloween

from Joe DeSalvo

LXA remained undefeated, beating Phi Mu and two scores to Bob Caine to lead ATO to an easy 41-0 win over PKA. The battle of the last place teams ended in predictable fashion as SAE and SX fought to a 10-10 tie.

Phelps Cops Harrier Run

By Joe DeSalvo

Rivers Phelps of Tau Kappa Epsilon won his second straight intramural cross-country meet, last Thursday afternoon, while Kathy Mitchell, running as an independent, took the women’s title.

Phelps ran the 2.1 mile course in an 8:56 time. The FTU Track Club was well represented in the top five times with Don Hama-5:36, Casey Jones 5:19, and Dean Hoyt 5:13. taking a second and third places, respectively. Rick Hall of LXA finished fifth with a 9:23 mark.

In overall team placing, ATO took first place with 34 points, while TKE was second with 47 and SX third, 53 pts.

Mitchell ran the women’s one mile course in 5:44. Tye’s Linda Mitchell came in second at 5:56, while Tracy Stapp of the ATO Little Sister was third at 6:18. Laura Powers 6:18 and Kim Ery 6:36, both of Tye, rounded out the top five positions.

In the team standings, Tye took honors with 19 pts. and Zeta Tau Alpha was second with 39 pts.
