Traffic Violation Fines Boosted

By Jim Halas

To comply with the recently adopted "Florida uniform disposition of traffic infractions act," the University traffic and parking committee amended the traffic and parking regulation's schedule of fines, to go into effect January first. Tickets for parking violations have been boosted from $2 to $5.

Mr. John Smith, director of the campus police, said, "We have no choice but to enforce this law...it's a state statute, but as you can guess, we at the police department aren't really happy about it.

The new law passed by the State Legislature last session requires the University to raise their fines to uniform state-wide.

Mr. John Smith, director of the campus police, said, "We have no choice but to enforce this law...it's a state statute, but as you can guess, we at the police department aren't really happy about it.

By law, all appeals must be handled by the Orlando Municipal Court, unless the Board of Regents approves a move by FTU Attorney General David Brown to establish a campus "parking violations appeal board.

Such an appeal board is already under consideration at the University of South Florida and the University of Florida. "If the appeals board is established, State Attorney General Robert Shevin's first move would be to appeal their cases to either the campus appeals board or the adjacent municipality.

Hunter Potts, SG president, said, "The campus parking appeals board would serve as a more convenient system of appeals for both the students and faculty. In addition, the board would tend to be more aware of campus parking problems."

Smith continued. "Fifteen dollars is a lot of money for a ticket."

By law, all tickets are posted on the date of violation. If posted bond, he may forfeit bond by failing to appear.

Alcohol Ok In Dorms

By Marcy Muramatsu

Dr. W. Ron Brown, Vice President for Student Affairs, has approved a policy concerning the possession and consumption of alcoholic beverages in the residence halls.

The request was presented to him by the FTU Resident Hall Association (RHA), after researching regulations within the State University System. The policy, which becomes effective immediately, states "that the possession and consumption of alcoholic beverages by those persons of legal age be allowed in the residence halls; that the consumptions of said alcoholic beverages be permitted only in the individual residence suites and that the consumption of said alcoholic beverages be excluded from days home, hallways and other such public and common areas within the residence halls."

Dr. Brown said the original request concerning alcohol in the dorms came from resident student and RHA member Angie Yount in the school year 1969-70. Brown's response then and almost yearly up to this point was negative.

Michael Bisell and Pamela Hindman, Administrative Advisors to the RHA, credited the research and preparation of the resident students as the main reason for the policy approval. The fact that the legal age has been lowered to 18, Dr. Brown said, was also taken into consideration.

Sharon Espy, RHA President, and Jesse McLeod, RHA Judicial Board Chairman, were the students most directly responsible for the policy formulation.

Housing Operations director Leo Goff provided assistance during the research phase. Similar successful policies have been instituted at other universities in the state.

The higher average age of the FTU student and the relatively small resident student population indicates that the policy will provide the opportunity for a more varied living-learning atmosphere for dorm students.

'Simply Shakespeare' Tours Area

By Alan Crouse

"Simply Shakespeare," a series of single acts from different Shakespeare comedies, produced by an FTU literature class, is winding up its tour of area high schools. According to Dr. Stuart Omans, who teaches the course on Shakespearean comedy, student Rick Camarata originally proposed the idea of actually performing a play.

Next Judy Smith offered to help with production, negotiating with the Theater Department for assistance in blocking and the borrowing of costumes.

Omans said calls from local poets and new comers continued to come pouring in, making it necessary to make a new performance schedule.

"The original idea was to take Shakespeare off his pedestal and make him interesting."

In the performance, the question is posed, "How can man get along in his world?"

Omans said identity is given as an answer and acts from the "Comedy of Errors," "Taming of the Shrew," "A Midsummer Night's Dream" and "Twelfth Night" were chosen as variations on the theme of identity.

After the company was "Ready to go on the road," the Music Department offered the services of a recorder quartet which lends a festive mood to the opening of the performance.

Omans opens the show as a jester, quoting some of Shakespeare's paradoxical statements as advice, while jabbing members of the audience with his mop-like staff.

"It was the only way I could get them to do it," Omans added facetiously.

One of the most appealing numbers to the high school audiences is a scene from "The Taming of the Shrew," where both a husband and wife strive to dominate the relationship. The husband wins the struggle by slamming the wife's bottom, wrestling her to the floor and standing with foot rested on her posterior, while singing words of love.

Omans's students plan to continue "Simply Shakespeare" next quarter under an independent study.

Omans said they will polish what has already been done and also write a new presentation on the theme of power.

The group has gotten much mail from area high school students and Omans related one experience when a group of slower students were "allowed" to see the performance.

"There was one fellow right next to the front who was grabbing every one of those jokes long before anyone else in the audience."

Omans said he hopes "Simply Shakespeare" will continue, as it is learning experience for both the high school and college students, as well as being entertaining.

By performing Shakespeare, I think my students get a much better idea as to why Shakespeare has been translated into every language and is next to the Bible in being read.

Robert M. Bowden is the unfortunate owner of this 1961 Ford Fairlane which caught fire Monday evening, November 25, at the corner of Pegasus Drive and Alafaya Trail. No injuries were reported. Bowden, an FTU student presides at College Court Apartments. (Photo by Fred Sommers.)

Adam Zukowski sculpted human figure out of stainless steel wire, for the Art and Technology course taught by Johann Eyefella. According to Eyefella it is a controversial image in the context of the course."

By Cameron Pyle

Can we afford the cost necessary to preserve our sprawling cities, with their waste and resources? Can we continue the indescribable atmospheric phenomena where farmland and animals should be? Is there a window of masked to survive this ecological time bomb? Will be survive the solutions? The Locc Haven Art Center is running an exhibition through December 30th by a woman who thinks he has an answer. Paolo Soleri, an Italian-born architect and protege of Frank Lloyd Wright, came to Orlando November 17th to discuss and define his concept of "Arcology," the fusion of architecture and ecology. Along with displays of Soleri's models, photographs, murals and drawings, the opening day at the art center featured a panel discussion centering on a few facets of his "totally planned environment." The panel included Dr. Elman Petherick and Dr. John River of FTU, Dr. Thomas Hurbin of Rollins College, and Mr. Lowell Leibowitz of the Design Group. Winter Park, who selected a question.

Soleri is acting on his own, without the aid of institutional or government funding, towards designing a working model of his Arcology on an 80-acre tract of land that he owns outside of Phoenix, Arizona. The primary means of support for Soleri's project is the tuition that he charges to students who work with him as labor-apprentices and form the sale of carpenter and wind-bells which he makes in his Arizona workshop.

Soleri explained that his "city" is well on the way towards completion and will provide living and working space for 300 inhabitants on about ten acres of land thus leaving about 97 percent of the property in its natural state. Some of Soleri's model cities, which are on exhibit, are designed for tens of thousands of people within a few square miles of land. Imagine the entire city of Orlando shrunk into an area the size of Disney World with completely enclosed living, working, transportation systems. One of Soleri's ideas is to use the "chimney effect" of vast greenhouses in order to provide heat for single dwellings and reasonably large cities. That is, by using the chimney effect on levels which are lower than the living area, it will allow the free movement of the naturally rising hot air directly into those spaces.

Soleri prefers three-dimensional tetrahedral shapes for his cities, utilizing the free space above and below ground rather than the present two-dimensional cities that merely expand outwards, using up more and more of the natural environment. The living area will take the upper outer shell of these cities so that everyone has a view, and the center is designated as a place for working and cultural activities. It was also pointed out by Soleri that the time element involved in moving from place to place within such a city would be so reduced that much of the space presently used for costly transportation systems could be put to better use. Soleri has taken his cue from nature in that evolution has "totally self-sufficient organism; a totally self-sufficient environment. There are sure to be many problems, some as yet unforeseen, that will need to be overcome. In fact, the main thrust of the panel's questioning centered on whether Soleri's Arcology will work in practice as well as in theory. Soleri stated that to provide proof and factual evidence for the soundness of his admittedly "untried" ideas is the most important purpose of the working model in Arizona.

Judging from the large and diverse nature of the panel's questioning and the number of students who attended, it seems that many people will indeed be waiting to find out just how well Arcology works.

FTU Accepted Into Council

FTU has been accepted into the prestigious Council of Graduate Schools in the United States less than four years after the first graduate degree was awarded. The approve membership in the Council is based upon the number and variety of graduate degrees awarded during a three-year period, said Dr. Leslie L. Ellis, FTU Associate Vice-President and Dean of Graduate Studies and Research.

The University, which currently offers masters degrees in fourteen areas, conferred 845 such degrees during the three years leading to acceptance by the Council. Included in these new programs have been approved over the past year. Ellis noted.

Areas in which masters degrees are offered include Accounting, Biological Science, Business Administration, Communication, Economics, English, Education, Engineering (local call), Environmental System Management, Management Policy and Psychology.

FTU, which was accredited by the Southern Association of Colleges and Schools in December 1970, awarded its first graduate degree in 1971. The University opened for classes in October 1966 with 1,500 students in the number of the State University System. Current enrollment is approximately 8,000.

FTU Student lives in a tent.

Not too far from the FTU campus lives a man in a tent.

"I dig it out here," said the blonde-haired FTU freshman.

"I had an apartment when I was in Gainesville, but it was always noisy and I hated it. The peace out here makes up for it."

The freshman says he plans to get a place for the winter, and try camping again in the spring.

"I say he's biggest fry people who come around to see things, or just to cause trouble. Why not move farther into the woods?"

There's something wrong with the ignition system of my car, so I have to push it get it going. I have to keep it by the road and I'm afraid I go far from it, in case someone thinks it's abandoned and tries to strip it."

He talked about getting a bicycle and leaving his car on campus.

The wooly St. Augustine and some small trees that do not grow wild testify to the fact that the site was formerly occupied.

Collective Bargaining On Faculty’s Minds

By Paula

The faculty at FTU is thinking of other things besides grades and final examinations. Collective bargaining has become an important issue and the faculty has to pick a bargaining agent.

Two groups are vying to become the bargaining agent of the State University System: Association of University Professors and the United Faculty of Florida.

Dr. Richard Adicks, President of the FTU chapter of AAUP said, “Collective bargaining will provide an effective faculty involvement in university government.”

The faculty is consulted less and less on matters and policies that run this University, and collective bargaining will bring back the power of the Faculty Senate.

“Also the faculty will receive improved compensation through collective bargaining,” Adicks added.

Dr. William Eder, President of the FTU chapter of UFF, said that “collective bargaining will deal with any problems the faculty feels exists.”

“In terms of the students at FTU,” Eder said, “UFF ensures a superior quality of instruction and students will benefit indirectly from collective bargaining.”

Eder added, “when a faculty member is confident in the areas of job security and economic pressures, then his students benefited.”

Similarly, Adicks said that collective bargaining would increase faculty morale, thereby benefiting students.

Also, collective bargaining would allow the faculty to be more involved in the “university process” and thereby improve education for the students.

"UFF and AAUP are now beginning a campaign to secure faculty signatures. Either group must get at least 30 percent of the faculty's vote to request an election to determine the bargaining agent.

When one group gets the 30 percent needed, then an election will be held to determine the bargaining agent in either the spring or fall of 1975. Also, any other group that gets to 10 percent of the faculty's signatures is eligible to be on the election ballot.

Adicks said he believed, “the election could go one of three ways: no agent, there the faculty would be prevented from bargaining, the AAUP or the UFF.”

Eder said he felt “UFF should be the bargaining agent, because this organization is a part of organized education. We are a merger of Florida Education Association and the American Federation of Teachers.

"UFF is also a part of organized labor. We are affiliated with the AFL-CIO. Therefore, because we have a political base, UFF hopes to influence the Board of Regents in decision making.”

"The AAUP is a state all-faculty controlled organization. It was formed last May and has nearly 100 members at FTU. There is also a chapter at each of the nine universities in the State University System. Adicks said he felt faculty members were interested in collective bargaining because "some want the militancy found in a union.”

He added that some faculty members have told him “if we were able to have collective bargaining, AAUP should do it.

"AAUP is a national professional organization in which any professor can belong. It was established in 1913 and has been at FTU for five years. According to Dr. Adicks, "AAUP will approach collective bargaining as a professional association, as distinguished from the labor or management approach advocated by the UFF. University teachers can now decide between two distinctive methods.”
Editorial

By Dana Eagles

Rising prices, or perhaps a rather high-handed means of ensuring civil obedience has taken its toll on another front of student affairs. As if being faced with the possibility of the twenty-cent phone call, more increases in postage, and putting saccharine in coffee because the price of natural sweetener might exceed the price of the java wasn’t bad enough, parking in the wrong place on campus will now cost you $5 instead of a dollar, and will failure to have a sticker which used to cost you two dollars. The ultimate infraction of unlawfully parking your bicycle will set you back five bills.

The lucidity of the harried shopper finding himself overdue on his parking meter and paying fifteen dollars as a penalty is not the issue. Nor is the real weight that of uniformity of traffic violation penalties, especially at a fifteen-fold increase; necessarily makes them much cheaper. Now we see the logical result that a moving violation that falls under the statutory damage limits can carry a maximum penalty of $25, but an infraction which is done daily against the right to appeal against the defendant can carry with it a $50 fine.

Police chief John Smith hit it on the head when he said, “It’s a lot of money to pay for a parking ticket.” Ostensibly, however, municipal and county judges hearing appeals on non-moving and moving violations, respectively, can charge part of the standard fine and suspend the rest, after hearing the defendant’s case.

According to state attorney general Robert Shevin, an existing statute provides for establishment of a student court to deal with violations occurring on campus. Appeal to the student court would waive the right to appeal to a civil court but would return the appeals to the university. Chief Smith has designated a one-month grace period for violators of campus regulations, during which the average monthly fine will be significant deterrents to illegal parking.

University charges ten dollars per student to park in a commuter parking lot. The student-oriented tribunal familiar with and sympathetic to the problems and circumstances of the particular university might be better situated to give tickets to those who don’t pay their fees to give tickets to those who don’t pay their fees. Furthermore, it seems to somehow separate the concepts of the school day. As if taxing heavily a group of outsiders who really don’t expect to see alcohol in the dorms before graduation. Many students have fought the administration for their right to appeal to a civil court but would see alcohol in the dorms before they graduated. Many students have fought the administration for their right to appeal to a civil court but would really didn’t expect to see alcohol in the dorms before graduation. Many students have fought the administration for their right to appeal to a civil court but would really didn’t expect to see alcohol in the dorms before graduation.

There seems to be a lot of money to pay for a parking ticket.

Yet Governor Askew’s proposal calls for separate vehicle registration fees to give tickets to those who don’t pay their fees to give tickets to those who don’t pay their fees. Furthermore, it seems to somehow separate the concepts of the school day. As if taxing heavily a group of outsiders who really didn’t expect to see alcohol in the dorms before graduation. Many students have fought the administration for their right to appeal to a civil court but would really didn’t expect to see alcohol in the dorms before graduation.

RHA President Writes Letter

By Mike Hall

An open letter to all resident students, staff and administrators:

Looking back over the past ten weeks, I see the Residence Hall Association (RHA) has already formed Inter-Dorm Council gaining recognition as an important organization at Florida Technological University.

Our accomplishments this fall include: a Halloween party with children from the Lutheran Home, two ice cream parties, the First Annual Veteran’s Day Auto Rally, a dance with Rock n Horse, and a picnic at Lake Clair sponsored by the Resident Advisor. Of course none of these activities entailed 100 percent attendance of the resident students, but most of those who did participate had a good time. And who could ask for more than that?

Topics still being researched for next quarter range from reserved parking to guest speakers to another dance co-sponsored with the Village Inn.

The accomplishment that we can boast most proud of the recent acceptance by Dr. W. Rex Brown of the regulation allowing possession of non-commercial alcoholic beverages within the resident halls. This acceptance came about by following the painfully long procedure of the ‘system’. But all our work and patience paid off proving that the system may have faults, but it does work. Many thanks to the following people who were of great help: Eimer Seferti, Jesse McLeod, Joe Goff, Paul Bihm, Mike Bisesi, Dean Mcmahon, Dean Wilson and Dr. W. Rex Brown.

Anyone interested in working with the Inter-Dorm Council for Winter Quarter, please contact me at 371-6412.

Sincerely,

By Dana Eagles

Our beloved administrators took a long overdue step out of the dark ages last week. Rex Brown (and to make a liar out of me for my last column) passed an RHA proposal allowing the consumption of alcohol in the dorms.

Needless to say, this was a laudable move. I know very well what I pronounced when I heard the news, however, I really didn’t expect to see alcohol in the dorms before I graduated. Many students have fought the administration for their right to appeal to a civil court but would really didn’t expect to see alcohol in the dorms before graduation. Many students have fought the administration for their right to appeal to a civil court but would really didn’t expect to see alcohol in the dorms before graduation.

We believe that the student-oriented tribunal familiar with and sympathetic to the problems and circumstances of the particular university would be better situated to give tickets to those who don’t pay their fees to give tickets to those who don’t pay their fees. Many students have fought the administration for their right to appeal to a civil court but would really didn’t expect to see alcohol in the dorms before graduation.

But a few students who did participate had a good time. The fines students pay and gives scholarships, and then tells the student body that the thousands of dollars collected for registrations are building all the beautiful new parking lots sprouting up on campus.

Worse yet, Governor Askew’s proposal calls for raising the parking fee to $4 per year and then appropriating the licenses plate revenues to state universities and having to store the mode of transportation during the school day. As if taxing heavily a group of outsiders who really didn’t expect to see alcohol in the dorms before graduation. Many students have fought the administration for their right to appeal to a civil court but would really didn’t expect to see alcohol in the dorms before graduation.

The president of the student government decided to give it another try. Polls were taken (most everyone in the dorms wanted this privilege) letters were written to other universities (nope, no drunken orgies here) and finally a bill was submitted to the student senate and passed. Dubious Hall #6 was sent to Rex Brown and promptly vetoed. His reasons for the veto were: 1) Boone will not contribute to the “flying learning environment” in the dorms. 2) There is no scientific evidence that alcohol helps you learn; 3) Boone is a bad drug that makes people have wrecks in cars. The bill went back to the student senate where it was reworked and sent to Rex Boone again. Well, by this time it was summer. But a few students who did participate had a good time. The fines students pay and gives scholarships, and then tells the student body that the thousands of dollars collected for registrations are building all the beautiful new parking lots sprouting up on campus.

Chris Squire's powerful bass and steel guitars, proved his mastery of the six-stringed instrument. Jon Anderson, the leader of the group, was at no time lacking in his vocal leadership. His high falsetto and falsetto balanced the music with overtones of grace and sweetness. Chris Squire's powerful bass lines were prominent as is his style. Squire has an unusual uncanniness and knowledge of the bass guitar and its function in such intricately arranged music.

Not to be delegated the usually subtle role of a bass guitarist, Squire surfaced and exposed aspects of the bass that had a certain freshness and vigor. An encore was granted at the close of the evening with the English musicians playing their most popular number, "Roundabout."

With the Yes concert, Galt Artists was able to bring top entertainment to the Central Florida area. They will apparently continue to do so with three more shows lined up for this month.

Tomorrow night, John Davidson and Nancy Wilson will be doing a charity performance at the Lakeland Civic Center. Tickets are $6.00, $6.50 and $7.50. Next Friday, just as soon as the staffs begin over with, Johnny Winter will appear with Renaissance at the Lakeland Civic Center. Tickets on both shows are $6.00 and each show begins at 9:00 pm.

If you are in the Jacksonville area this coming month, JetEnterprises will have a number of concerts to enjoy over the holiday break. On Dec. 11th, Renaissance will appear in the Jacksonville Civic Auditorium. At the Colosseum Deep Purple, the Electric Light Orchestra and El will appear on the 14th of Dec. On Friday the 20th, Washbone Ash, The Atlanta Rhythm Secton and Camel will perform for $8.00 per person.

The Old Providence, Pure Prairie League and Jo Jo Gunne are in the Colosseum on the 23rd and you can look for Grand Funk on the 3rd of January. All show times are at 8:00 pm. Merry Christmas.

An encore from the reasons expressed in your veto letter of Senate Bill 6-5, in my opinion that the real reason for the veto is the premise that Student Government should keep its nose out of the dorms. It must state emphatically that Student Government represents ALL students on the campus whether they be resident or commuter, graduate or undergraduate, or male or female. Student Government's efforts to effect various policy changes within the residence halls stemmed from the fact that the residence students have not and were not being treated as adults and the "in loco parentis" philosophy was alive and living in the dorms at FTU.

It seems that the efforts made to change this policy were just in exercise of this university's bureaucratic structure; and that the philosophy seems to be keep the students busy on these minor issues so they won't get into anything important and find out what's really going on. I really wish that I did not have the concerns I've expressed but I know that these feelings are shared by many, in the hopes of making FTU one of the finest institutions of higher education in the country, I hope that we can all take a more honest, open and positive approach to change without worrying about whether or not students should be able to have a door to the privacy of their own room.

Sincerely,
R. Hunter Potts
Student Body President

"I got my job through the State Department of Vocational Rehabilitation."
New Drama Course Available

By Alan Crouse

You have heard of bread lines and dust bowl blues, but did you know the Great Depression was an exciting period for the American Theater? Dr. David D. Mays of the FTU Theater Department, in announcing the Great Depression Drama Course for the spring quarter, talked about what the Depression did for theater.

According to Mays, who did both his Masters thesis and Doctoral dissertation on Depression drama, the years following the Wall Street "Crash" was the only period when the theater and other arts were government subsidized. W.P.A., the government's work program, usually met new road, post offices and municipal parks, but Mays pointed out that projects also included works by writers, playwrights, painters and sculptors.

Mays added that "according to Congress," the art projects were cancelled when they were overrun by Communists.

Mays said the American theater developed a new form during this period: the "living newspaper," which used all the current media from live drama and radio to wire-over, to motion pictures.

One of these plays, entitled "One-third of the Nation," documented the history of American Housing.

"It sounds dull, but it fascinated audiences," said Mays.

Another, entitled "Apocalypse," celebrated a cure for syphilis.

According to Mays, the American theater was never more politically oriented, with Broadway railing against communism and portraying the plight of American Negroes.

Orson Welles, famed producer of radio's "war of the Worlds," and the critically acclaimed film, "Citizen Kane," was instrumental in the forming of "Unit 81," a major Harlem theater project.

Mays said his course, Theatre 491 section 04, will meet Tuesday and Thursday nights from seven to 8:50 p.m. The course will focus on popular entertainment during the period 1929-39 including plays, films, radio and other amusements that detracted our parents from the grim realities of that difficult time.

According to Mays, the success of the Depression course will have a direct bearing on whether he will negotiate to offer a similar course in the spring quarter, dealing with World War II.
FTU Shows Concern

By Cameron E. Pyle

Amidst fears of a growing lack of interest, the FTU chapter of the Florida Engineering Society (FES) is working to inform the FTU community and future college students of the possibilities that exist within the various fields of engineering. FES president, Henry Popkin expressed the organization's concern that career opportunities in engineering have not received enough critical attention.

FES is a national organization of professional engineers and the FTU chapter is open to all students within the College of Engineering who are or plan to become registered as a professional as required by the Florida Board of Professional Engineers. Meetings are held in EN 100 at 12 noon on the second and fourth Thursday of the month, and according to Popkin, anyone with an interest in engineering should feel free to attend.

Upcoming Febra popkin' is the annual Engineer's Work Fair co-hosted with National Engineer's Work during the 18-22 of the month. The fair will feature competition in individual and group classes with awards given for the best engineering projects on display and exhibits by Central Florida industries. In attendance last year were MartinMarietta and Florida Power Corp. among others. Some of the entries in last year's competition included a cubic slide rule, solar refrigerator, and a safe with an electronic lock operated by a hand held digital computer.

Popkin said that in the past an automobile oriented towards total safety which was designed by one of the engineering departments, eventually made it to a second place finish in national competition.

Marketing Club Sees Success

Since last spring, the FTU Marketing Club has grown from two paid members and has become one of the top collegiate chapters of the American Marketing Association in the nation.

Although geared primarily to marketing and business majors, the club attracts members from many areas and is designed to give its working experience in business and marketing.

To kick off their second year the members decided to hold a seminar that would orient the freshmen to the community as well as the club. The theme, "Multiple Opportunities for Residential Enrichment" (M.O.V.E.) was held October 2 and attracted about 150 who paid $7 each to hear lectures by FTU faculty members.

Topics and speakers included "Moving from Non-management to Management" by Dr. Weldon Berry, "Consumerism Challenge for Marketing in the 70's" by Dr. Ronald S. Rubin, faculty advisor, "Who is Ruth's Banister, Durston, and Osborn and Why are they doing this to me?" by Dr. Charles G. Newell, "Your Boss Has Problems, Too," by Dr. Ronald Rubin, "Women in Business," by Carol P. Wilson, Dean of women; and "The Salesmanship of a Sale," by Eugene T. Teple.

The instructors donated their time and the program netted the Marketing Club $100, over $60 of which was donated to the FTU fund.

Comments from people participating in the program were good and have continued to come in for the few short months since the club was organized. It has become one of the most successful groups on campus. They are active in the Business College and sponsor Business Day, commercials for various organizations, and publish resumes for their members. In addition, they participate annually in ECA day and conduct marketing research.

Presently, the marketing club is trying to interest more sophomores and juniors. I would like students to have as much experience in business and marketing as possible," commented Irving Siver, club president.

Regular meetings are held twice a month at 12:00 noon on Thursdays. Anyone interested in joining may call the club President, Osborn, extension 2326, or the club office, room 226, in the Village Center.

Newsp games

The continuing growth of new academic programs at FTU has been most recently marked by the establishment of a Department of Public Service Administration, to meet the needs of students planning careers in public service at the local, state or national levels.

The rapidly expanding program already has attracted more than 30 students, who are majoring in Criminal Justice, Social Services and Political Science/Public Administration, the three degrees that are offered.

Dr. William W. Young, former Teachers College superintendent, has been named to head the new department.

Young noted that the full-time faculty and part-time instructors in the program have, in addition to their teaching credentials, practical working backgrounds in their particular fields.

They represent areas such as law, corrections, court administration, local government administration and general public administration.

A major feature of the Public Services Administration program is the availability of internships that place students in positions in government, where they can acquire knowledge of the various activities involved in the governmental process and skills that will enable them to perform more effectively when they are employed by public agencies.

The programs in the new department are designed to educate and train students for careers as corrections officers, law enforcement officers, court administrators, research assistants for State's Attorneys or public defenders, administrative assistant, legal assistants, court service workers, probation officers, juvenile delinquents, assistant, planning and research officers, and advisors to law enforcement agencies, said Young.

Information on the various options offered in Public Service Administration and coordination procedures may be obtained by contacting Dr. Young at 275-3861, or the FTU Admissions Office, 275-2113.

Another activity planned by FES to promote engineering is to circulate among area high schools with prepared presentations utilizing up-to-date films and slides to give students an accurate picture of the field. Popkin stated that this was not to be a self-serving enterprise and is intended to show not only the good points of such careers but will also focus on the hassles and drawbacks involved as well.

This kind of demonstration, said Popkin, is something which is badly needed by high school students as opposed to the distorted representations of "life outside the classroom" that they usually receive.

As far students at FTU who have already decided upon an engineering specialty, the Central Florida Chapter of FES periodically sends volunteers to our campus to take FES members out into the field for a little practical experience in how engineers actually put their training to use. Popkin pointed out that such experiences are invaluable to students before they invest so much time and money in technical training that they can't back out.

Better to be back on the farm than to spend four years of college preparing for something you're going to hate!
Final Exam Schedule
Classes Which First Meet During the Week at

Comprehensive Final Examinations must be scheduled during the final examination week at the times indicated above. Any variance from this schedule must be approved by the dean of the college and reported to the Office of Academic Affairs. Instructors desiring to schedule multiple section examinations must contact the Office of Academic Affairs to minimize conflicts. Most multiple section examinations will be scheduled on Tuesday, December 11, 1-2:45 p.m.

Five members of Mrs. Frances Johnson's group interpretation class at FTU are caught during a rehearsal for skits they presented at eight Orlando-area elementary schools as part of the ADDITIONS program.

Glamour Contest Scheduled

FTU students are invited to participate in GLAMOUR Magazine's Top Ten College Contest for 1975.

Young women from colleges and universities throughout the country will compete in GLAMOUR's search for ten outstanding students.

A panel of GLAMOUR editors will select the winners on the basis of their solid records of achievement in academic studies and/or in extracurricular activities on campus or in the community.

The Top Ten College Winners of 1975 will be photographed by leading New York photographers and featured in GLAMOUR's August College Issue.

During June, the ten winners will be invited to New York to meet the GLAMOUR staff and will receive a $500 cash prize. Anyone who is interested in entering the search should contact the Dean of Women for more information.

The deadline for submitting an application to GLAMOUR is February 15, 1975.

Comprehensive Final Examinations must be scheduled during the final examination week at the times indicated above. Any variance from this schedule must be approved by the dean of the college and reported to the Office of Academic Affairs. Instructors desiring to schedule multiple section examinations must contact the Office of Academic Affairs to minimize conflicts. Most multiple section examinations will be scheduled on Tuesday, December 11, 1-2:45 p.m.

In 1873, Samuel Clemens published "Roughing It," which represented the ideal in the continuing line of the works of Mark Twain.

In chapter 48, turning his attention to jury trials, Clemens wrote: "A jury list was made out, and Mr. E.L., a prominent banker and a valued citizen, was questioned precisely as he would have been questioned in any court in America. "Have you heard of this homicide?" "Yes. " "Have you held conversations upon the subject?" "Yes."

"Have you formed or expressed opinions about it?" "Yes."

"Have you read the newspaper accounts of it?" "Yes."

"We do not want you."

"A minister, intelligent, esteemed, and greatly respected, a merchant of high character and known probity, a former public servant of intelligence and unblemished reputation and a quart mill's worth of excellent standing were all questioned in the same way and all for the same reasons.

Each said the public talk and newspaper reports had not so biased his mind but that sworn testimony would overthrow his preconceived opinions and enable him to render a verdict without prejudice and in accordance with the facts.

But of course such men could not be trusted with the case. Ignoramus alone could evolve an不受偏见的正义."

"When the preperatory challenges were all exhausted, a jury of twelve men was impaneled - a jury who swore they had neither heard, read, talked about nor expressed an opinion. It was a jury composed of two newspapermen, two law over-lodging politicians, three hardwaremen, two ranchermen who could not read and three dull, stupid, human donkeys! It actually came out afterward, that one of these latter thought that incest and arson were the same thing."

"The verdict rendered by this jury was, "Not Guilty," What else could one expect?"

"The jury system puts a ban upon intelligence and honesty and a premium upon ignorance, stupidity, and perjury. It is a shame that we must continue to use a worthless system because it was good a thousand years ago."

"In this age, when a gentleman of high social standing in intelligence and probity swears testimony given under oath, it is a wonder a hundred jurors who will swear to their own ignorance and stupidity, and justice would be far safer in his hands than in theirs."

"Why could not the jury law be so altered as to give men of brains and honesty an equal chance with fools and incompetents?"

"Is it right to show the present favoritism to one class of men and inflict a disability on another, in a land whose boast is that all its citizens are free and equal?"

"Over one hundred years after Clemens wrote that passage, a President of the United States and which had caused over two years of political turmoil."

The jurors named were:

Sandra V. Young, 38, pharmacist's assistant.

Dodie Johnson, 40, hotel doorman.

Gladyes E. Carter, 40, hospital machine operator.

Ruth C. Gould, 57, loan specialist, Department of Agriculture.

Vanessa N. Melby, 40, variety store counter girl.

Marjorie M. Milburn, 55, retired international relations officer.

John A. Hoff er, 57, retired supervisor, Department of the Interior.

Jane N. Ryan, 64, retired secretary, Department of Justice.

Roy E. Carter, 57, logistics coordinator, George Washington University.

Thelma Wells, 65, housekeeper.

Aina E. King, 57, matron, District of Columbia schools.

Lucille E. Plunkett, 59, coffee maker for a government agency.

Alternates are:

Helen B. Pratt, 61, retired maid.

May Smith, 67, retired accounting clerk, General Services Administration.

Jean S. Foster, 45, postal clerk.

Sylvia Hall, 54, laundry clerk.

Elaine Miller, 45, postal service clerk.

Jeanne Williams, 23, housewife.

**Posner Brings Poetry To Schools**

By Dan M. Croose

"What does that black look like?"

"A circle. Na, that's too scientific."

"A dart, Yeah, it does kind of."

"A snake without a head."

David Posner, an instructor of English at FTU, banks his intuition like a drill sergeant, but his recruits at Fitchburg Elementary School are being asked to shrug regimentation and look at things in a different way.

Posner is an active participant in the Poetry-in-the-Schools Program; a national program funded by a grant from the National Endowment for the Arts, with matching funds from the Orange County Public School system.

According to Mr. Lawrence Wyatt of the English Department, the purpose of the program is to put "practicing, publishing poets" into the schools to appeal to the students' creativity. "Quite simply, we're here to turn them on," said Wyatt.

According to Wyatt, the program was established because elementary students cannot read or write. Wyatt added that educators have known that children who can read before starting school actually regress after being exposed to the regimentation in public schools.

Students' creativity is stifled, because they soon learn the "right" answers. "Do the time they reach the fourth grade they already dislike writing."

Wyatt said when the students know someone is coming in to teach them poetry, mild hostility is everywhere, but by the time the poet leaves they are always asked to return.

Posner said, "Sometimes experiments work, sometimes not, but the kids know I love them. They can smell it at the minute I walk in, and then you can do anything."

Wyatt termed the program "creative education" and added, "We appeal to their senses and ask them to write about things instead of ideas." In the first five minutes we learn what they already know about poetry and throw it all out," said Wyatt.

"Now close your eyes. When you open them, you will be a

"...in the Poets-in-the-Schools Program."

The Rotary Club of Seminole County South will sponsor the First Annual Rotary Bowl, on December 6, at Lyman High School Stadium.

Two outstanding football teams from area high schools will participate.

**SPEECH CONTEST**

Dr. Ed Wood, coordinator of Speech (10) programs, has announced the names of six tentative judges for the speech contest to be held Dec. 10.

The judges are: Dr. William Grasty, Dr. Bernard Kissel, Ms. Carol Birdsee, Dr. Ray Buchanan and Dr. K. Phil Taylor. Grasty is the dean of the Faculty Senate.

Carol Bledsoe, Dr. Ray Grasty. Dr. Bernard Kissel, Ms. Kujawa took these slides for the course on Volcanic Rocks at Death Valley, Bryce & Yosemite. Grand Canyon, Death Valley, Bryce & Zion Canyon, Grand Tetons, Great Smokies, Badlands, Meteor Crater, Painted Desert, and Mt. Rainier.

According to Mr. Lawrence Wyatt of the English Department, the purpose of the program is to put "practicing, publishing poets" into the schools to appeal to the students' creativity. "Quite simply, we're here to turn them on," said Wyatt.

According to Wyatt, the program was established because elementary students cannot read or write. Wyatt added that educators have known that children who can read before starting school actually regress after being exposed to the regimentation in public schools.

**AP POSITIONS**

A unit representative from the 919th Tactical Airlift Group will be on campus Friday, December 6, from nine a.m. until one p.m. at the Village Center to answer questions about the reserve program and positions available.

The only Air Force Reserve flying unit in Northwest Florida, the 919th Tactical Airlift Group will soon be converting to AC-130 Hercules aircraft, and needs 200 additional reservists, both officers and enlisted.

Selected students will be interviewed from McCow AFB to Barksdale AFB, one weekend each month and for a two-week encampment each summer.

Animal Control Problem In Central Florida

By Jim Holmes

Col. Hauser, executive director of the Orange Humane Society reported an ever increasing animal control problem in the Central Florida area. Hauser said "last year we handled 36,000 animals, of which only 20 percent were adopted out.

Some 16,000 uninjured animals were destroyed for lack of a home.

Needless to say, a problem of this size requires large financial expenditures.

The combined expenditures of the Orange County Animal Control and the Orlando Humane Society amount to a staggering $270,446.

With increased cost of operations, Orange County residents can be sure they will be paying more and more for animal Control services.

In fact, the Orange County Animal control department has increased its budget by more than $25,000 for next year.

But to make matters worse, the animal population explosion and the entire Animal Control problem is needless.

Mrs. Snow, with the County Animal Control, said if all cats and dogs in the county were fixed (sterilized or spayed), in order to control the ever-growing pet population explosion, there would be no pet control problem at all.

No one seems to know exactly how many pets there are in the Central Florida area, but the Orange County Animal Control reports there are "way over 50,000 dogs" and no one has any idea how many cats there are in the County.

Dr. Christopher Tietze, a N.Y. biological statistician, reported that "use unspayed female dog or cat and the survival of all progeny over a ten year period will produce 2,390,000,000 dogs or cats."

Unless Orange County pets are spayed the problem is never ending.

One minor drawback to the people in charge of the animal control is the cost of spaying.

To have a small pup spayed, it costs $40.00 and up. $45.00 for a medium pup and $50.00 and up for a large dog.

However, if someone is unable to pay to have his pet fixed, Pet Concern Inc., is a non-profit organization which may be of help.

For more information about the Pet Concern Inc., contact Mrs. Mary Bruce at P.O. Box 46, Casselberry, Fla.
FTU's Starting Five

Saturday night FTU made its home debut a successful one by squeaking out a 75-74 victory over the Brahman of the University of South Florida.

Shaw entered the game with 19 seconds remaining on the clock to give the Knights their margin of victory over the heavily favored visitors.

The win, probably the greatest in the history of FTU basketball, was preserved when Dave Rogers blocked a Leon Smith shot in the game's fading seconds.

The Knights got a balanced scoring attack led by Shaw with 22. He was ably assisted by Prather who added 17 markers, Calvin Lingelbach with 12 points, and Bellote with 11 points and seven rebounds.

By Fred Cay

With eight of last year's top nine players gone due to either graduation or attrition prior to the season, an undetermined transfer forward appeared to be the main hope of this year's FTU basketball squad. Early season performances have done nothing to alter this forecast.

Bennie Shaw, last year's leading scorer in Florida junior college ranks, has averaged 24.7 points per game through Monday as well as pacing the depth-starved Knights in rebounding. And at 6-1, Shaw is showing few holes in the contention that, at 6-1, he is too short to be effective playing primarily on the front line.

"I'm still playing forward," grinned the native Orlandoan. I'm still playing forward...and I've always played against people 6-8 and 6-9."

Secret to Shaw's success, most observers agree, is his explosive quickness of hands and feet which enables him to penetrate inside of taller defenders and flit in his variety of short jumpers and driving lay-ups.

"Bennie's one of the few who can play either inside or outside," confirmed Knights' Coach Torchy. He's blessed with those quick first two steps to the bucket. He's a threat to anybody when it comes to playing offense.

However, like most, Clark doesn't believe that Shaw's niche is playing forward against major college competition. "He is going to have to be an outside player," said the coach.

In fact, it is this feeling about a 6-1 player during the type of things on court that Shaw can do that caused him to be bypassed by most major universities. Despite his state lifting scoring mark at Seminole JC (1,001 ppg) a year ago and allowing FTU to grab an athlete Clark describes as "possibly the best ever at this school."

Boone High grad's primary goal, aside from leading "as many wins as possible" to establish a new field goal shooting percentage record (1.2 mark at SJU last year was a phenomenal 62 per cent), was to "just have fun on the team." The Knights return home after the holidays to face the University of Maine on Dec. 30.

Shaw Plugs Gap In Knight Attack

By Pat Murray

One of the week's biggest shocks in high school basketball came when an in-state school, Ft. Myers, defeated a national power and the No. 1 team in the nation.

The Knights, involved in what Coach Torchy Clark terms a rebuilding year, have scrapped their way to a 2-2 mark thus far including two heart-stoppers during the season's initial week.

FTU traveled to Georgia State for the season opener only to fall to the Atlantics in the closing seconds, 64-63.

The Knights led at halftime, 32-31 but had their chances of victory dimmed when big men Willie Bellote and Dave Rogers fouled out midway through the second half.

Led by juniors Bennie Shaw, Calvin Lingelbach and Bennie Shaw, the Knights stayed close in the final stanza only to fall victim to Georgia State's superior height advantage in the late going.

By Pat Murray

Saturday night FTU made its home debut a successful one by squeaking out a 75-74 victory over the Brahman of the University of South Florida.

Shaw entered the game with 19 seconds remaining on the clock to give the Knights their margin of victory over the heavily favored visitors.

The win, probably the greatest in the history of FTU basketball, was preserved when Dave Rogers blocked a Leon Smith shot in the game's fading seconds.

The Knights got a balanced scoring attack led by Shaw with 22. He was ably assisted by Prather who added 17 markers, Calvin Lingelbach with 12 points, and Bellote with 11 points and seven rebounds.

By Fred Cay

With eight of last year's top nine players gone due to either graduation or attrition prior to the season, an undetermined transfer forward appeared to be the main hope of this year's FTU basketball squad. Early season performances have done nothing to alter this forecast.

Bennie Shaw, last year's leading scorer in Florida junior college ranks, has averaged 24.7 points per game through Monday as well as pacing the depth-starved Knights in rebounding. And at 6-1, Shaw is showing few holes in the contention that, at 6-1, he is too short to be effective playing primarily on the front line.

"I'm still playing forward," grinned the native Orlandoan. I'm still playing forward...and I've always played against people 6-8 and 6-9."

Secret to Shaw's success, most observers agree, is his explosive quickness of hands and feet which enables him to penetrate inside of taller defenders and flit in his variety of short jumpers and driving lay-ups.

"Bennie's one of the few who can play either inside or outside," confirmed Knights' Coach Torchy. He's blessed with those quick first two steps to the bucket. He's a threat to anybody when it comes to playing offense.

However, like most, Clark doesn't believe that Shaw's niche is playing forward against major college competition. "He is going to have to be an outside player," said the coach.

In fact, it is this feeling about a 6-1 player during the type of things on court that Shaw can do that caused him to be bypassed by most major universities. Despite his state lifting scoring mark at Seminole JC (1,001 ppg) a year ago and allowing FTU to grab an athlete Clark describes as "possibly the best ever at this school."

Boone High grad's primary goal, aside from leading "as many wins as possible" to establish a new field goal shooting percentage record (1.2 mark at SJU last year was a phenomenal 62 per cent), was to "just have fun on the team." The Knights return home after the holidays to face the University of Maine on Dec. 30.

Shaw Plugs Gap In Knight Attack

Grapplers Hurl Quad Meet

By Joe DeSalvo

It was a somber Southern Open for both the University of Tennessee at Chattanooga (UTC), Florida Institute of Technology (FIT), Florida Christian University (FCU), and Florida Southern College (FSC) as they faced off in the second round of the 1981 Southern Open. The UTC and UTC-Knight's wrestling team took the opportunity to honor the memory of their teammate Sherman, who passed away in November. The Southern Open's 110-pound title bout was named after Sherman, who had been a valued member of the UTC-Knight's wrestling team. This year's Southern Open was the 50th anniversary of the Cotton Bowl, and it was fitting that the match was held in honor of Sherman.

The meet was held at the UTC Indoor Athletics Center, with a capacity of 5,000 spectators. The meet was divided into two sessions, with the first session starting at 8:30 a.m. and the second session at 2:30 p.m. The UTC-Knight's wrestling team was led by Coach Gerald Gergley's assistant, who had been a student athlete at UTC.

College of Tennessee at Chattanooga Knights will definitely have their work cut out for them against two big disappointments for Florida Christian University: Mike Strouse and Mike Wareing. Mike Strouse, who finished fourth in the tournament, will be looking to improve his ranking in the 177-pound class. Mike Wareing, who finished second in the tournament, will be looking to improve his ranking in the 215-pound class.

Another first-year man who showed promise in the tournament was Florida Christian University's Jeff Flowers. Flowers finished third in the 177-pound class. He gave a close match to eventual champion Tommy Saterbo, who was pinned by eventual tournament winner Turner Jackson of Miami University. Flowers showed great potential in the tournament, but the future looks bright for him.

UTC, who improved over the last two years, will feature two of the nation's best wrestlers: Jimmy Rouse and Dave Schüler. Rouse, who competed at heavyweight, defeated UTC's Walker, 4-4, then was pinned by Oklahoma's Jackson. Schüler, who competed in the 177-pound class, lost to UTC's Alberts, but then lost to Oklahoma's Jackson.

UTC's Mike Strouse, from Norfolk, N.Y., in the 110-pound class, losing a 7-6 decision to Florida Christian University's Mike Gillies. The native Miamian finished the meet with a 3-3 record, including a pin over Jim O'Grady of Northeastern University.

The meet gets underway at 1 p.m. at the Village Center Assembly Room.
SLEEP IN SCOTT'S ARMS: Less than one mile from FT and yet convenient to Oviedo's many services. 11600 Mendel Dr. (off Alafia Trail). Spacious 2 bdrm apt. $155 mo. Furnished 1 bdrm apt. $180 mo. Quiet - well maintained. For additional information, call 365-5585 after 3 p.m. or STOP BY and see us - Open House - 7 p.m. to 8 p.m.

SIX DAY CANOE TRIP in Ocala National Forest Dec. 14-21st. All camping and canoe equipment provided. Trip will start at Juniper Springs and end in the Ocklawaha River. Price $120 a person. Wolf Creek Wilderness (305) 275-2525.

72 CHEVELLE, 2 dr., automatic, radio, h.t.-air, power steering, tape deck, one owner. Really great car! Must see - call 671-2526 after 3 p.m.

1/2 ACRE MOBILE HOME OR CAMP SITE. Sand roads, no down payment. $100 per month includes 70% percent interest. Near FTU. Phone Pati collect (305) 358-4141.

3 CHEV BLAZER, power steering and brakes, 4-wheel drive, air-con., many extras, excellent cond. $4,450. Call 273-0351.

73 CHEV. 2 dr., automatic, radio, air, power steering, tape deck, owner. Really great car! Must see - call 671-2526 after 3 p.m.

TRAYNOR 100 - forth guitar or bass amplifier. Need a good amp for a good price? Then call 323-3603 (Sanford) between 5 and 6 p.m.

MOBILE HOME, 73 In­ternattl., 12 x 70, 3 bdrm, 1 1/2 bath, near FTU, children & pets allowed. Call 277-9335.
