Panel Discusses Health Service

By Vicki Blanchfield
Staff Writer

A Student Health Service panel discusses the availability of funds for students under this program, and help while providing referral to use the community resources.
The budget year allowed us to order such services and lab work, and furnished up to $1,000 benefit to the student in case of an emergency or sickness while on campus. We try to give blanket coverage for the health fee taken by the state.

By Michael Klapp
Intern Writer

casual, delays, related banks, and a Board of Regents (BOR) decision to impound $15,000 earmarked for student aid, have contributed to the "worst crunch in all my years with the financial aid office," according to Don M. Baldwin, Director of Student Financial Aid.

Baldwin said it was normal to run out of funds as the fiscal year comes to an end, but that this year's budget has been drained quicker than usual because of recent "unsual problems." A fixed percentage of each student's tuition fees is used to provide funds for the Student Emergency Loan Fund, a long-term loan authorized by the BOR. According to Baldwin, the BOR impounded $15,000 of this fund for use as a special assessment for an equal access program. This program is designed to increase enrollment of minorities in the state university system. Baldwin said this BOR action has left the Student Regent Fee Program depleted. Baldwin added that the FTU's Financial Aid Office was not consulted prior to the BOR's decision.

Fiscal Crunch Hits Student Aid Funds

By Michael Klapp
Intern Writer

The Federally Insured Loan Program, according to Baldwin, is also suffering a shortage of funds. Commercial banks which underwrite the program, are reluctant to loan funds to students under this program, he said, because the interest rates allowed are lower than normal. Baldwin said he did not know if the banks would ever get involved in the program again but said, "They have a civic obligation to do so."

Despite the widespread shortage of funds, Baldwin said a program, the Florida Insured Student Loan Program, has "unlimited funds" for students who are able to wait four to six months for financial relief. "The money is there," said Baldwin, "but students are going hungry while they wait for the paperwork to go through."

Baldwin said short term relief would be possible if the Financial Aid Office were able to make use of a portion of the Student Government's current surplus of funds. The surplus, estimated to be $50,000 by the end of this fiscal year, is a part of the Student Activity and Services Fee Fund. When asked the possibility of a loan to the Financial Aid Office, Hunter Potts, SG President, questioned the fairness of a contract that asks working students to "subscribe" the education of other students. Baldwin said delays in programs with sufficient funds are caused by "bureaucratic inefficiencies."

The Emergency Short-term Loan Program suffers from accounting difficulties, Baldwin said. "The loans are usually paid off by the end of the quarter and it takes about 30 days to run those funds through accounting and make them available for the next quarter. This delay hurts many students who rely on this loan to help them out early in the new quarter."

Baldwin said federal legislation now in Congress may take the administration of many programs away from the local level where "the interests of the student can be served best."

With regard to present campus facilities, Potts commented that, "Because of the BOR decision, we're providing a health service on an emergency basis supplemented by a contract for out-patient hospital services." Potts added, "We're trying to provide a reasonable health service, so students can receive professional advice and help while providing referral to use the community resources."

Legislature To Act On Hike

By John Becker
AS Writer

The Florida Cabinet has sent to the legislature a proposal for the Board of Regents (BOR) to request the legislature to increase the tuition fee to $20 per quarter hour and increase credit hour cost to $2 off credit hour. Graduate students would also feel the impact of a $10 per credit hour increase from the current $20 per credit hour. Baldwin said that he hoped the political climate could prevent smaller classes and courses offered more often during the year.

Looking Into
The Future

VC Board Urges Name Change
Debaters Begin Series of VF Conversations... Crew Team Finishes Second in State...
ODK Holds Initiation For 19

The FTU chapter of Omicron Delta Kappa (ODK), National Leadership Honor Society, inducted 19 new members in its initiation meeting held April 18 in the Student Union Lounge.

Five faculty members, one from each college, were also inducted including Dr. Jack Noon, Chairman of the Physics Department; Dr. Charles Unkovic, Chairman of the Sociology Department; Dr. Charles Micarelli, Dean of the College of Humanities and Fine Arts; Dr. Charles Gallagger, associate professor in the College of Business Administration; and Dr. Larry Chambarrain, a university vocational counselor, who was also inducted into the society.

Attempts to recognize those individuals who have given the most responsible leadership and service in campus and community, and whose character and accomplishments to democratic ideals, according to Mike Saunders, chapter president.

Dr. Robert Blaisdell, ODK's faculty advisor, said members are "selected on the basis of their involvement in a number of various activities." He also said that improving the academic record of the better is an important consideration for induction.

Undergraduates, graduate students, alumni and faculty are all eligible for consideration for membership in ODK, said Blaisdell. Anyone can nominate a person for consideration and the nominee is selected on the basis of his resume, he added.

The FTU chapter received its charter on March 22, 1963. Prior to affiliating with the national organization, the chapter was known as University Circle.

There were 11 persons who were unable to be at the meeting, but will be inducted later this quarter. They include: students Linda Johnson, Cynthia Chisholm, Mary Scott Welkam, Chris Mercier, Andrew Titen, Jerry Berkont and Peter Marks; Director of Athletics Dr. John Powell; alumni Mary Ann Benbow and Sharon Markis; and John Goree, vice president of Business Affairs.

Senate Passes New Legislation

With a minimum of debate and two bills passing unanimously, the Student Senate passed four bills in its April 17 meeting.

Bill 7-51 was passed, appropriating $2,000 for the purchase of four clocks to be placed in the Village Center area.

In other legislative action, Bill 7-98 was passed unanimously, allocating $35.21 to reimburse the Political Science Union for additional costs incurred during their recent convention at Straton University.

A resolution concerning the greening of the campus presented in Bill 7-51, was also passed. In this action the Student Senate is requesting the University to explore and set on the possibilities of landscaping hazardous locations, and providing grass and greenery in the presently developed area on campus.

The Student Senate passed Bill 7-92, providing funds not allocated for the spring concert to be placed under control of the Projects and Programs Committee, and two concerts on the Village Center green.

The first reading of Bill 7-92 was held by Senator Tortorotilla. This bill was referred to the FTU Debate Team for costs incurred while attending the National District Debate Contest in March.

Student Government President Hunter Potts spoke of a statewide university committee that is in the process of being established to reevaluate student health services.

The general student at FTU has no real concept of the functions and purpose of the Village Center, and this, says Village Center Director Dr. Kenneth Lankford, is why he has proposed a new name change to the Student Union of Florida Technological University.

The Village Center Board is in the process of revising their current by-laws and articles of incorporation. In addition, a Vice President, by-laws director and an in-house by-laws director, will be appointed. Board meetings, and provisions for meetings will be held to allow the directors to serve as proxy for any VC Board program director.

"In the past, people thought of the Village Center as the cafeteria and the snack bar," explained Lawson, adding that the board hoped to overcome this misconception but decided Dr. Henry Vantre, associate professor in the College of Engineering.

Debaters Demonstrate Skill Over ERA Passage Issue

By Vicki Blanchfield

A heated dispute over passage of the Equal Rights Amendment (ERA) followed the heated debate over the first of FTU’s forum debates, which took place on the VCU green on April 17. The planned series is being conducted by the students of the debate club and their coach, Jeff Bahr, who said that ERA passage would involve FTU student participation in upcoming debates.

Last Thursday's program got underway with varsity debater Tom Foster, who followed by attacking the framing of the ERA. He argued that although the 14th Amendment provides for equal protection, the courts have not yet determined whether it protects women.

Marcinko responded that the ERA would give women that protection. He added that a constitutional amendment to get discrimination down to the state level. He cited three particular areas of discrimination: school amendment of ERA passage; 1) Job, employment, and wage discrimination; 2) Social Security; 3) Discriminating state laws.

Support of the latter contention, Marcinko referred to a statement attributed to Florida Senator Birch Bayh. According to Bayh, 36 states restrict women from exercising certain rights in their professions.

Taking the opposing view on ERA passage, varsity debater Ed Foster admitted that discrimination occurs but contended that the proposed bill would not rectify the problem.

Foster asserted that women couldn’t benefit from any new benefits of ERA passage. He claimed that the proposed amendment would only cover those rare cases of discrimination to court, “which can already be done under the Equal Pay Act, the Civil Rights Act, and the 14th Amendment.”

Foster concluded that and passage of the ERA would not curtail the need for legislation to end the practice of discrimination.

A brief rebuttal period followed. Marcinko challenged the audience by asking, “Whose system gives women freedom from discrimination? ERA or the present one?”

Voicing his answer to the pointed question, he said, “The present system is incapable of ever solving the problem.”

Foster retaliated by claiming that ERA passage would not solve present problems either and compared the amendment to the Prohibition Law, which was continually broken and extremely difficult to tightly enforce.

In addition, he produced a documented case studied recently by Senator Sam Ervin, who was quoted as saying that ERA adoption would undoubtedly have a negative effect on future constitutional amendments.

The program was then open to discussion, and questions were entertained from the audience of 25-35 persons. Louise Howell, the coordinator of the Orlando Chapter of the National Organization for Women (NOW), was a member of the audience, and among the active participants in the ensuing debate.

Listeners raised questions on the effect of the ERA with regard to subjects ranging from farming, the draft, statutory rape, and even bathroom facilities.

Howell responded readily to the inquiries, armed with a collection of quotes, study results and statistics to support her answers advocating ERA adoption.

She added that 67 per cent of the nation’s women are now working, and argued that passage of the proposed bill, “would have a psychological benefit in itself. It would make all individuals”

He explained that the program would also provide a capital tax subsidy to break to these employers who hired women, enabling them to pocket a larger percentage of their company’s profits.

The next forum debate in the series of relevant controversial topics will be held on the VC green from 3:30 p.m. to one p.m. on Thursday, May first.

Health Services Considered

By Regents’ Select Committee

Two representatives from FTU were members of a recently convened committee, which met at the FTU campus Wednesday, April 16, to study certain aspects of health services. Master Potts, president of the FTU student body and Dr. Edward W. Storer, director of health services at FTU were members of the committee.

At its first meeting, the Health Affairs Committee of the Board of Regents adopted a resolution authorizing the appointment of a select committee to

1. Determine the level and type of student health services that should be maintained on each USU campus, and

2. Investigate various methods of financing programs offered by the health services.

Following this resolution, Chancellor Robert B. Mauts appointed the following people to the committee:

Dr. Richard E. Hulet, vice chancellor for student affairs, as chairman; Barbara Ooms, commuting student from Florida International University; Dr. Arthur Stoddard, vice president for student affairs from the University of Florida; and Dr. Kenneth W. Thompson, vice president of administration at University of South Florida.

Potts was a member of the committee representing the State Council of Student Body Presidents.

The planned series is being produced by the State Department of Vocational Rehabilitation.

'Apathy' Not Real Issue

What politicians might call a "non-issue" has become one of the focal points of the Student Government executive office campaign which is climaxing today.

It is ironic that indifference toward the "issues" should itself become one of the prime concerns of the campaign; "apathy" is blamed for the failures of programming efforts, it has become the scapegoat for lack of responsiveness on the part of both organization and public, and the target of endless ideas aimed at pricking the apathetic amygdala.

The effectiveness of the student body to some programs, opportunities, and concerns which those in administrative positions think important or interesting have met with no noticeable passivity. Indeed, the same events on another campus at another time might have met with overwhelming support or debate.

But this is not another campus, and a very real part of this campus's character is the diversity of its members and their varied viewpoints and interests, of small groups and the larger student body. As much as the system extends the right to participate in decision-making, it also carries with it a responsibility to participate, to reject the opportunity to contribute. To then complain about the products of that arrangement, however, is without justification.

With all the cashing in on "apathy": there must be some other considerations: methodical condemnation of students for not becoming ecstatic about the latest wave in student activities is treating only a symptom, and is not even a good treatment at that.

Areas of interest must be actively sought out by our incoming officers, and the flow of communications with Student Government must be extensive and deliberate. It interest cannot be aroused in a particular area, there is no reason to be afraid to die in the marketplace of ideas, entertainment, or services.

We are optimistic. Programs with appeal have drawn sizeable crowds; we need to find out why and get more of them.

Apathy has not been an organized or even pervasive movement. The priority of correcting the myth that students don't care must yield to that of responding to what the majority does care about, wherever those needs may be found.

Lack Of Communication Cited As Problem

Editor:

In the April 18, 1975 issue of the PittUCE, 11 editorial candidates answered questions, your second student apathy because no one was at attendance at one meeting, at the expense of perhaps maybe you should reflect more on some other possible reasons why the turnout was so poor.

A significant reason at no why no one attended is a lack of communication concerning the event. In a PittUCE of April 11, 1975, you had a small ad in the right-hand corner of page two and a small exhortation to attend on page four. Where was the advertising? To poster advertising time, date, place and subject?

I share your expressed feeling that there is an involvement and волн and, but then why don't you act on your beliefs and try harder to communicate what you believe, whether or not you are just letting out a lot of hot air.

The other problem that really underlies everything is a lack of or responsiveness on the part of Student Government. There is not even any connection between the needs of the students and effective action of Student Government. If more efforts are made to be more responsive to the students by Student Government, and if more constitutive efforts are made to communicate important events to the students, then maybe apathy will be decreased.

Apathy is not something that just occurs but has a basis in the lack of response to the needs of students. We don't need empathy words but effective action.

Mark Tuching

"Because we are not a program oriented organization, we don't have bidders for "marketing" as groups such as the Village Center do. In the past they have been communicating what we felt was important about SG elections has been expressed in a press conference, a two-page spread as the candidates and the hours, four editors, a news story, and 11 advertisements."

Rock Concert Situation Shows Need For SG-VC Cooperation

Editor:

I was reading last week's PittUCE when I came upon page seven dealing with SG Candidatcs. I then began reading some of the ideas of David Outlaw. I read that Outlaw feels that campus fraternities should be more of a service organization than a social one. He asks what fraternities took part in the recent community people's walk. I suspect what Outlaw was trying to do was not raise a controversy but condemn political suicide - and if I hope he succeeds.

But the whole issue boils down to the future to prevent exorbitant fees, and delays in action from occurring again. Instead of trying to pass the blame off onto one another, they should work together more closely to best serve the entertainment interests of the paying students.
Bike Paths Needed On Alafaya Trail

Editor:
I come very close to a major accident every time I ride the bike paths on Alafaya Trail. Why are the bike paths so wide? I have had many accidents and near misses, and in some cases, I was able to avoid a collision. Other times, I was not so lucky.

And I'm not the only one who rides along Alafaya Trail. An oncoming cyclist can easily hit a parked car and make it difficult for cyclists to pass by. This is a major problem for me and others who ride the bike paths.

Night Parking Has Same Rules

Editor:
I have noticed that the same rules apply to parking on campus as they do off campus. I have seen cars parked in reserved spots, and I have heard stories of cars being ticketed for parking in the wrong spot.

Policy Makes for ‘Sweat Box’

Editor:
I would like to express my concern for the air conditioning conservation policy. I agree with the goal of saving energy, but the solution of turning off the air conditioning in the library is not practical. The library is a public space, and it should be comfortable for everyone.

Cooling Causes Problem

According to R. N. Pefur, Director of the Physical Plant, FTU’s air conditioning system is becoming a major problem.

Pefur said that at present, FTU’s air conditioning system is capable of handling 2,000 tons, but the capacity is only 900 tons. The cause of the problem is that the utility’s expansion is not keeping up with other construction on campus.

The capacity of the utility plant is being increased along with building construction, and an expansion contract is under way to solve this problem. Pefur said it should be completed by the end of the year.

Winter Concert Announced

Dr. Walter Gaudneck of the FTU Art Department will conduct a three-day symposium on Art and the Environment from April 28 through April 30. The first session will be held at 2 p.m. April 29 at the Gaudneck House on campus.

Stop Kidding Around!

It is true that the temperature is rising, and the air handlers must be kept on to avoid overheating the air conditioning system. However, it is not necessary to turn them on at night, as the utility system can handle the load. The air conditioning system is designed to handle the increased temperature, so there is no need for worry.

Breast Cancer: An FTU Coed Tells Her Story

By Michelle McBurney

This article is about an FTU Coed. The Events that Transpired Are Factual. However, The Names Have Been Changed by Request.

Kathy was scared. Her mind was racing with fears of what the doctor might find during her breast examination.

"Oh, God, no!" she thought as she gazed up at the doctor. Kathy knew she was on the edge of something terrible.

"I...I think she has breast cancer," Kathy stammered, her voice quivering with fear.

Kathy's fears were not unfounded. Breast cancer is a disease that affects millions of women every year. It is one of the most common types of cancer affecting women and is the second leading cause of cancer deaths in women. But despite the high prevalence, early detection and treatment are key to improving outcomes.

Kathy realized that she had to confront her fears and face the reality of her situation. She knew that she had to do something to help herself.

Kathy decided to take control of her own health. She went to a doctor and underwent a mammogram.

Kathy's mammogram results were not encouraging. The doctor told her that she had to take another mammogram to see if the lump was still there.

Kathy was scared. She didn't want to face the reality of having breast cancer.

However, Kathy knew that she had to confront her fears and face the reality of her situation. She decided to fight back. She knew that she had to be strong and stay positive.

Kathy's journey didn't end there. She continued to fight and recently got the all-clear result from her doctor.

Kathy's story is a reminder that early detection and treatment are key to improving outcomes. It's also a testament to the power of determination and resilience.

'Compressed Speech' Speeds Tape Playback

By Michelle McBurney
Contributing Feature Editor

It would take twice as long to listen to this article on a tape recorder if it were to read it silently. This isn't a problem for most people, but for those who depend on tape recorders for information, the blind, the handicapped and some students, it is. For these people, a tape recorded message doubles the time they spend absorbing material.

According to Dr. K. Phillip Taylor, Associate Professor of Communications, 79 percent of man's waking hours are spent in some form of communication. Dr. Taylor also points out that research shows man is spending less time reading and more with audio communications.

One means of spending less time listening to tapes is to speed them up. Under normal circumstances, the voice would sound like a 33 1/3 rpm record played at 38 revolutions per minute. This effect would be equivalent to listening to Walt Disney's character "Donald Duck." With a process called compressed speech, one can hear taped material which has been sped up in a voice without distortion.

When speech rate is increased, the pitch automatically increases. But when sound is compressed, the sound waves are stretched out, lowering the pitch. By compressing speech, time listening is saved and the voice is understandable. Compressed speech also cuts down listening time by sampling minute bits of speech extracted from taped material. Some methods shorten vowels, and pauses are removed.

Developers of compressed speech units use digital computer systems which reduces the popping sound produced by conventional methods of editing tape. In the past, machines producing compressed speech were too costly for widespread use. Two companies have developed small electron-beam circuitry systems, making the cost of some models as affordable as pocket calculators.

In two or three years, compressed speech units will retail for as little as $50 above the ordinary retail price of a cassette tape recorder. Current retail price ranges from $400 to $1,200. The price reduction is attributed to the integrated circuitry system, which made pocket calculators a mass consumer product.

Various purposes available through compressed speech include eliminating the blunders in speech dependent on slight readers for information and students who read poorly, and wish to follow tests may do so. A speech therapist can use the units to simplify expanded speech, aid distorted speech patterns, and students, through their university and audio-visual centers, will be able to listen to missed lectures in half the time it takes to sit in class.

Forty-five students at Syracuse University in N.Y. participated in what is thought to be the first class taught using compressed speech. Students using compressed speech scored an average of half a grade point higher on multiple choice tests than the average score of the control group members. This first group also spent an average of 32 percent less time listening to lectures.

New Exhibit Features Weavings And Photos
Presently featured in the joint exhibit at the Central Florida Art Center, helps students find off-campus jobs, said Gracey. "We like to talk to freshmen about career objectives," Gracey said. "We do not tell them, ‘Gee, there are more jobs in this area, so go to this field.’"

The Placement Center can help students find employment while still in school. "We do as much as we can to help students find off-campus jobs," Gracey said. "We have four bulletin boards on campus listing part-time job offers. We list the name of the employer, the salary and where to apply. Students seeking part-time employment should check the bulletin board daily."

The Placement Center’s major objective is to help graduates find employment. "Our service serves three areas," Gracey explained. "Three placement officers work with students on resumes, interview techniques and employer research."

The Placement Center has a video tape library for interviews with representatives of various companies and organizations. "We also have the library listing over 500 firms," Gracey added. "Seniors should register with the Placement Center early in order to take advantage of interviews conducted in the fall."

For more information call: 275-9495.

Mary Lou Boyle, Owner and Operator

Oviedo’s New and Luxurious Unisex Styling Parlor,

Mary Lou Boyle, owner and operator of the Pony Tail Beauty Salon invites you to Oviedo’s new and luxurious unisex styling parlor, now open.

When you come in you’ll meet Rick Swainston, formerly of “The Trimmers” in Ivey’s of Winter Park and Oviedo’s Pat Barnes who recently completed an advanced training course at Woody’s.

The Pony Tail is conveniently located at 97 North Central Avenue in Downtown Oviedo. Visit us Monday through Saturday, 8:30 a.m. until 5 p.m., or call for late appointments on Wednesday evenings. Dial 365-5664 or 365-3878.
Knights Drop Pair; Look To State Skid

By John Bridges
Sports Writer

Skidding to 24-6, FTU's basketball team began the remainder of its home schedule this week. Looking to snap its three-game losing streak, the Knights have lost three in a row. Last week, behind a fairly strong offense, the Knights were led by Lorenz and even stronger support by umpires Don Trawick and Randy Smith, Rollins College edged the Knights 2-1 at Harper-Sheffield Field. Lorenz allowed two runs on six hits, striking out five FTU batters and holding the team hitless for six innings. Lorenz was bothered by men on base, but got out of the close of the game, retiring the last six men to face him - two with strikeouts.

Most of FTU's displeasure was directed at Trawick and Smith, who made some controversial calls and called Rollins a reversed decision here and there. The umpiring exhibition prompted FTU coach Doug Holmgquist to comment, "It was the worst umpiring I've seen in my eight years of coaching college baseball."

A crowd estimated at 500, including former Brooklyn Dodger shortstop Pee Wee Reese, witnessed FTU's seventh defeat. Reese was in Florida to shop for a college for his major-league hopeful son, Mark. Sam Swanger, now 63, was charged with the loss. Swanger was bothered by men on base, but got out of the close of the game, retiring the last six men to face him - two with strikeouts.

Last Friday in St. Petersburg, the Knights club lost their second straight game - a 10-2 decision to Eckerd. Nothing seemed to go right for the Knights: they were held to five hits, committed five errors and then had to watch Eckerd erupt for five runs in the bottom of the eighth to seal the victory.

Harry Johnson received his third loss against four wins this season. Johnson lasted six innings, giving up four runs (two earned) on five hits. Stan Edge again appeared in relief and was on the mound during Eckerd's five-run barrage. Edge gave up six runs (three unearned) on four hits in two innings.

FTU batters managed four singles and a triple by leftfielder John Tate.

The Knights will play at home for the remainder of the regular season. This Wednesday the team faced a re-match with Rollins and tomorrow afternoon (1:00) will meet Stetson University at Tinker Field.

Diamond Dust: According to the latest edition of College Baseball newspaper, FTU is ranked third nationally in the College Division, which includes Division II and Division III. Eckerd was ranked directly behind the Knights. Ranking was based on the Knights' first 27 games in which they were 22-5. Among the regulars, Sam Horvath's 395 batting average along with Steve Cutcher's .346 are leading the overall .386 Knights. Among the hurlers, Sonny Wise has the lowest Earned Run Average at 1.27.

Randy Smith, the Knights; they were held to .407, 1.435, 1.452 and 1.531.

His 521 is .320, 1.435, 1.415, and last weekend. FTU's eight-man varsity crew strokes their way to a state championship over a favored FIT squad. FTU finished overall in second place at the state races held at Disney on Saturday.

State Title For 8-man Varsity

By Gary Timlin
Interim Writer

The FTU crew team finished an overall second place in a field of six colleges at the Florida State Championships held Saturday at Disney World. Their total score was a combination of both the men's and women's results. Florida Institute of Technology (FIT) was the overall winner.

The high point for the FTU effort was the winning of the eight-man varsity state championship in difficult weather conditions by the FTU squad. "Great," was the word used by FTU Coach Dennis Kamrad in describing the race. He said, "The team held together and stayed with the race plan." Kamrad also said the team "rowed marvelously well despite the weather conditions."

According to Kamrad the weather was "very windy" with "severe crosswinds" that made for difficult rowing conditions. The FTU squad held off a strong challenge by a FIT squad that had defeated them last week in Melbourne.

In the coxed four-man varsity division, FTU finished third in their race. Kamrad commented that sickness and injuries have taken its toll on the team.

In the men's junior varsity eight race, FTU came in fifth place. Kamrad said the squad had to race against and defeat five other varsity squads who had entered the junior varsity division.

Kamrad said, "We were never in contention with FIT and we could not answer the spirits of Jacksonville and Tampa." He added "We lacked experience at the sprint-end of the race." Kamrad commented that spirit of the JV squad was great. He said the crew should have the JV squad helped the morale of the whole FTU crew team. Kamrad said the spirit especially helped the varsity-eight team get inspired for the race.

In the women's eight division FTU pulled a third place finish behind Rollins and tomorrow afternoon Florida Tech. Kamrad said the crew "rowed very well." Kamrad added, "We beat three crews that had defeated us last week."

In the coxed four women's division FTU finished in third place. Kamrad commented "lack of experience along with gusty weather conditions." Kamrad said gusty winds caused the FTU squad to lose the lead early in the race. Kamrad added that the rest of the girls are freshman and "that makes the future look exciting for the girls' crew."

On Friday, April 15, FTU travels to Atlanta for the Southern Intercollegiate Championships. Kamrad said the FTU varsity eight team is going to be looking on as the team to beat. Kamrad said FTU will really be looking to defeat the FTU squad. Along with FIT, also entered in the Southern Championships is Georgia Tech and University of Virginia will offer stiff competition according to Kamrad. Kamrad said Virginia has won the Southern Championships the last four years.

What's Up In IM?"
Knights Fall To Miami; Finale Today At Rollins

By Joe DeShano
Sports Editor

A tremendous hurricane, originating from Miami, soared through the FTU tennis courts last Wednesday, destroying the No. 4 nationally-rated Miami Hurricanes overpowered the bewildered Knights.

The lone survivor of the destruction was - you guessed it - unouchable Steve Bryant. The spectacular freshman ran his unbeaten streak to eight matches as he humbled southpaw Joe Garber 6-2, 6-2 in the No. 5 singles match.

"Garber wasn't the toughest opponent I faced," said Bryant while receiving congratulations from his teammates and Head Coach Lex Wood. "I went to his backhand throughout the match because I saw that it was his weakest shot.

Wood, who knew his team would have to play perfect tennis to stay with the No. 4 nationally-ranked Hurricanes, simply called Miami "a very good tennis team."

Wood pointed out Nate Smith, Doug Hull and Trevor Graham of playing "tremendous tennis." He added, "There were too many errors - plus we were psychyed out by their play."

FTU Shots Turned Back Throughout the frustrating afternoon, terrific shots made by FTU were constantly turned back by the precisioned Miami players. Wood commented: "We were hitting good shots but you just get down when they return them back to you."

In the No. 1 singles, Mike DeZeeuw gave it his best shot but a steady John Eagleton played near-perfect tennis to defeat DeZeeuw 6-4, 6-2.

At No. 2, Joe Lucci turned in a strong performance only to have Alvarado Pijuel give a better one as the Chilean took a 6-4, 7-5 verdict.

In the fast match of the day, No. 3 Joaquim Rosgado, an all-American last year, put the lights out on Nate Smith 6-4, 6-1. Smith admitted, "I just couldn't get the winners."

Trevor Graham, at No. 4, was totally outplayed by Ron Meyers 6-1, 6-0. Graham went into the match playing his best tennis of the season.

Six-one, 6-1 was a popular score for Miami as Lance Denzler won the No. 6 match.

The doubles weren't any better - for the Knights as Miami easily took all three matches.

At No. 1, DeZeeuw and Smith lost in straight sets to Eagleton and Pijuel 6-4, 6-4.

The top two Miami players have been unbeatable as a doubles team so far this season. Lucci and Graham weren't too successful against Rosgado and Garber in losing 4-6, 6-2, at No. 2.

The disappointing team performance came to an end when Hull and Bryant lost to Meyers and DeZeeuw 6-4, 6-2.

The Knights will be looking to today's clash with Rollins to close their winning season on a happy note.

Best Chance Against Tar -- FTU, who has been ready for the Tar since last year's controversial 6-3 loss, has its best chance this year, according to Wood.

"They're (Rollins) not as strong as last year," said Wood. "I feel the critical positions will be at No. 4 and No. 5 where the Tar are weaker than in previous seasons."

"I'll give us a good 50-50 chance," added Wood with a smile on his face giving the impression he knew FTU would get its long-awaited victory.

Wood didn't confirm today's starting lineup but he did say DeZeeuw and Lucci will be at No. 1 and No. 2 respectively. As for the remaining spots, Wood wasn't sure who will play which position until same challenge matches were completed during the week.

Wood, however, felt Bryant has an excellent chance of moving up to No. 3 and No. 4.

Match Point: Best crown of the season lined the entire sideline in addition to jam packing the lone bleacher. Bryant went all out for Miami, buying new shorts and white socks. The name Fillit might sound familiar - Alvarado's brother, Jaime - played in the recent WCT journey in Orlando. Only losses for Miami were against the NCAA No. 1 team Stanford 7-2 and 4-1 to USC - losing in triple-match point.

Miami Coach Dale Lewis hopes to finish in top three... Bottom three Miami players are all newcomers. Match took over two and one-half hours.
Campus Glances

The Symphony's concerts are free to FTU faculty, students and staff. Tickets are available at Streek's Ticket Agency in Orlando and at the FTU Music Department.

For further information call 275-2865.

Modern Greek Tragedy

The FTU University Theater will present a modern Greek tragedy, "The Orestian Women," written by Robinson Jeffers, from May 1st through May 3rd at 8:30 p.m. in the FTU Science Auditorium.

The lead members of the cast are Mary, Marion as Phaedra; Scott Patterson as Hippolytus; Jeff King as Theseus; and Tara Buckley as Agamedes.

General admission is $3.50, with an 8x10 black and white photograph of each contestant will be placed beside a jar on a table near the snack bar. Voting will be accomplished by dropping money in the jar of the contestant of your choice.

Heads and Tails

The speakers at this presentation will be Dr. N.H. Cassem, Director of the Center for the Humanities, and co-author of "Understanding Life and Death." Those interested in hearing Cassem speak should contact Art Holos, at 275-7259.

Positions Are Now Open For Editor and Business Manager

Of The Future

For The 1975 - 1976 School Year.

Application will not be accepted after May 10, 1975.

For application see Dr. Fred Fedler, Room 535 Humanities and Fine Arts Building.

Application will be considered by the Board of Publications and no name will be recommended to the President, for each position, for approval.

The Medicine and Morality series is co-sponsored by FTU's College of Humanities and Fine Arts and the Florida Endowment for the Humanities.

The program is open and free to the public.

Voter Registration Drive

A voter registration drive will be held on the FTU campus Friday, May 2, sponsored by Student and Staff who live in either Orange or Seminole counties who will be able to register to vote. The hours of the registration are from 10 a.m. until 5 p.m.

Persons who wish to register to vote must present a photo identification with age on it, and a permanent address.

The drive is being sponsored by the FTU Political Science Union and the transportation to the City Hall will be provided by the group. All persons who wish to register should bring some proof of identification and age with them, such as a Driver's License.

Placement

Cost is $5 from Page 5: "We would advise them to come in three quarters before they graduate," Gracey said. "The heavy recruitment occurs in October, November, February, and March. If a student come in writer in May, he may be too late."

Even though unemployment has been rising, Gracey said the outlook for FTU graduates is not as bad as for others.

The information I have received says that placement offices have had many interviewers cancel. FTU has had no student graduates, I am told by the placement office has had some interest expressed in students, I have been told by the placement office has been canceled, I have not had any candidates cancel.

The Placement Center is located in room 225 in the Administration Building. Office hours are from 8 a.m. to 5 p.m. Monday through Friday.

Alpha Chi Omega

Fledge Class is Sponsoring "MR. FTU" Contest

All males are eligible. Application available in Student Government Hallway - have them returned to same by April 30. Enter yourself or have a sponsor enter you. All proceed go to Easter Seals.

Info is available with application forms.
